* Andy and April are left alone in the office with nothing to do while the rest of the gang goes hunting, and amuse themselves by practicing spit-takes. April is quite good at coming up with fake revelations to make Andy spit ("I'm pregnant...with Josh Groban's baby!") but Andy can't seem to think of anything shocking to say to April, instead just saying boring facts about himself.
* Andy and Company, Arthur takes offense when one of his friends calls the protagonist a "mouse": "He's not a mouse, he's a... something. I forgot."
* Andy apparently got the district manager his job, which earns him a promotion — and he immediately takes off for three months, lies about it, and gets away with it. However, while he avoids consequences from the manager, he loses a ton of respect from the other employees, who
* Andy Barker P.I.. Trying to find his daughter's toy which has gone missing, a veteran detective tells Andy that he suspects a kid. After school, the veteran roughs the kid up and shouts at him, only to turn to Andy and say "OK, now you be bad cop".
* Andy becomes one in the second season after Ann dumps him and begins dating Mark, and he goes to great lengths to try and get her back, including moving into a pit in front of her house. He ultimately gets over it when he grows closer to April... and in Season 3, when she starts dating a guy she met on vacation in Venezuela (to get back at Andy for accidentally kissing Ann), he goes to similar lengths to win her over.
* Andy, being the only one who can understand the Alien, serves this role in Season 4.
* Andy Berman's sole voice credits are as the voice of Dib Membrane and several minor characters from
* Andy Breckman makes an appearance in "Mr. Monk and the TV Star" as the guy that walks past the golf cart Monk and Sharona are riding on at the studio
* Andy Buckley, who plays former-CFO David Wallace on the US version of
* Andy Capp, a shop owner calls Andy some bad names. Andy quips "Words can't hurt me, mate." He is hit in the head with a dictionary the shop owner throws at him.
* Andy Capp didn't think it was funny. (In the last panel, the bartender muses, "A little knowledge is a dangerous thing...")
* Andy Capp: In one strip when discussing increasingly low turnout of supporters at one of Andy's football matches, his wife says at the latest one the "crowd" wore a fawn raincoat and a cap.
* Andy Capp is a lazy unemployed drunk, whose relationship with his wife frequently escalates into violence on both sides.
* Andy Capp used to qualify. In one of Britain's longest-running newspaper comics, things are getting steadily better. Andy Capp used to give Flo black eyes on a regular basis. Later, she was more and more often shown winning the fights, sending Andy tumbling out of the house and into the gutter. In fact, Andy looked like he was becoming an abused husband for a while. Now, however, they almost never resort to violence and attend marriage guidance meetings. He's stopped smoking, too.
* Andy catches Peter when he mentions he's halfway done with his summer reading list. She realizes correctly he means he's halfway through reading the list, not halfway through reading the books on the list.
* Andy complains to her mom about sending Peter music that annoys her, defending her claim with "But the music
* Andy Dick's sexuality. Lisa Lampanelli especially dishes out the most euphemisms

for homosexuals when talking about him (e.g. pickle kisser).
* Andy discovers that a plate of fresh cookies was missing, and she asks Paige if she's
* Andy ends up like this in "The Five Calvins". Tracer Bullet saves him with a vine.
* And yes, even the said content warning is also huge (albeit in the bottom) in the home video release.
* And yes, Garnotte had a very dark sense of humour and his works were mostly featured in the adult-rated satirical magazine
* And yes, the author is a bit off on the issues of size, crew, and the number of fighters. The ships are often ridiculously large (topping off at around 7
* And yes, there is a national clown registry to prevent identical makeup.
* And yes, you can load the grenade launcher with incendiary ammo to light an entire horde of zombies on fire!
* And yet again, in "Lisa the Vegetarian", when Homer is offended that Ned didn't invite him to his
* And yet again in the season 6 opener, where what looks like a flashback to the crash diverges from the actual events, and we get our first
* And yet again in vol.25, when the Guyver Gigantic in Exceed mode is facing off against the Draglord and erects a forcefield around himself to deflect incoming missiles, only to find to his chagrin that the missiles will actually
* And yet again, in "When Aliens Attack:, when Fry (in present day) accidentally knocks out the Fox network with spilled beer. As a result, the aliens of Omicron Persei 8, who receive the television broadcast a thousand years later (in "present" day),
* And yet again when Farnsworth harvested chronoton particles to speed the growth of his atomic-powered mutant basketball team. This destabilized time with increasingly dangerous effects. If the world is going to end, Professor Farnsworth is probably responsible in some way.
* And yet another episode had elderly Springfieldian Cornelius Chapman, who won an award for being Springfields oldest resident (well into his 100's). Among his accomplishments (building Springfields first log cabin and introducing the tooth brush), Chapman once took a bullet for Huey Long. Unfortunatly, he only took ONE bullet, as Long was shot several times and Chapman only caught the last one.
* And yet another episode where this is the YOUNG man's idea. He discovers he has the power to exchange traits with other people (an ill-defined ability, but hey...). So he finds a very rich old man and gets the multimillionaire to trade his fortune for renewed youth. Now old and rich, he proceeds to purchase youth a year at a time from a large number of young men at a thousand dollars a shot... eventually leaving him back at his original age, but with a lot of money.
* And yet another has them finding an Old West-style planet which was populated by abducted humans previously used as slave labor by the aliens who now work as
* And yet another time, Ranma, Akane, and Ukyo try to pacify a rampaging (and ugly as sin) divine horse by drawing a flattering portrait of it . Ranma and Akane's attempts are so terrible that Miss Hinako tries to guess whether they're drawings of shrimp or bugs.
* And yet another unmade episode concerned a friend of Bruce Wayne's turning out to be a sadistic hunter who captures Catwoman and attempts to hunt her down.
* And YET ANOTHER was poisoned because his murderer put poison on the spot on the lazy susan between two dishes that the victim was allergic to, and so he kept getting poison on his fingers every time he saw said dishes.
* And yet another with Optimus Prime vs. Gundam. From the analysis, it's clear that the
* And yet at the same time, Humans have a unique capacity for kindness and cooperation on a scale unmatched by any other species. Humanity is the only species in the history of the planet with the power to not only save other species from extinction but to bring them
* And yet, despite everything that happened to them, the Jedi and Republic get themselves back in shape within a generation, kick Sith ass all over the Galaxy,

and reclaim a lot of their lost glory. It gets to the point where the Sith, suffering from inherent problems in their own society, are barely hanging on to power by the time
* . And yet, despite how everybody thinks that there might be more to their relationship (like Uraraka), they're really just good friends.
* And yet, earlier in the game, you were in a building with bloodstains (including in the battle background) and see a giant,
* And yet he doesn't seem to care when he eats something that's not supposed to be eaten (engine oil, cigarette butts, dryer lint, etc). Everyone else complains, but not Ax.
* And yet he's still a janitor, despite saving his home planet and the galaxy several times over.
* And yet, in season six, her control is apparently still lacking. After she shared the Dragon's Flame with her friends, both her health and her grasp over her powers became severely weakened.
* And yet in the background, all the prices end with the number five.
* And yet it also makes sense — both are alienated from humanity in a way.
* And yet it remains intact when he turns into an elephant, dinosaur, whale or other animal of enormous proportions.
* And yet pointing this out to Dave does not prevent Rose from doing the same
* And yet, she can only fire one missile at a time. a Macross Missile Massacre would have been more doable in the original
* And yet, somehow, they're always back to normal by the next episode.
* And yet somehow, they're back to flirting in her next appearance, until something even
* And yet, there are frequent reports of phenomena such as a tank continuing to fight after its entire crew has been killed. Given the level of
* And Yet the Town Moves, as the final episode. While there is still some humor in this episode, it still ultimately gets played in this way.
* And Yet the Town Moves, described as the art of "luring men with the illusion of gentleness, and taking their money".
* And Yet the Town Moves episode 10, Kon to Arashiyama (who was being petulant at the time).
* And Yet the Town Moves falls victim to a large number of unfortunate mishaps. A little sneeze sends her face-first into a cup of coffee, and she trips while trying to clean it up, getting a bucket stuck on her head.
* And Yet the Town Moves, followed that up with two other minor roles, and then announced that she was leaving the voice acting business to focus on her studies.
* And yet, they pale in comparison to Delman's manager Mina, who will backstab anyone she can in order to become manager, and once she did so, set out to foster a hostile work environment where everyone is either cowed by her presence or just as backstabby as her.
* And yet, they still are reluctant to build anything with more than two floors, or put doors anywhere but at ground level.
* And yet, when the climax arrives, Wilson and Shane confront each other in the classic
* Andy Griffith actor, but his only chart hit was his 1953 monologue "What It Was, Was Football".
* Andy Griffith in his last days, he'd try to reach him by using his first name Jesse, knowing how he'd disliked it.
* Andy Griffiths' Just Series has "A Terrible Christmas and a Crappy New Year", in which Andy vandalises some Christmas cards, but then tries to go back and replace them so he'll get presents from Santa.
* Andy Griffiths' Just Series, the story "Busting" in "Just Stupid" has Andy needing to pee at a shopping mall but can't find a toilet. There's a magazine with an ad for "Great Rivers of the World", an indoor fountain, some kids who squirt him in the crotch with squirt guns, and finally fire hoses.
* Andy Griggs' "Tonight I Want to Be Your Man," about a husband who realizes his relationship with his wife has hit the stage and wants to fix it.

* Andy Hallett" as his "favorite-favorite-favorite!" because the cast and crew got to go on location to Las Vegas. He said, "I've always wanted to have like a Vegas show, so it's like a real Vegas show...except that all the people sitting in the audience were getting paid to be there."
* Andy Hallett's death, his character, Lorne, was retired in a self-titled, one-shot comic. While it would've been easy to keep the character alive since the series had long since transitioned from television to comic books, this was seen as the proper way to give tribute to the actor.
* Andy Hamilton has a routine about hearing a train announcement repeat "Could passengers
* Andy Hamilton presented an extract from the minutes of a parish council meeting on the 7th November 2008 edition of
* Andy Hamilton's comedies often share a similar supporting cast, for example both
* Andy Hardy — Romantic comedy series. 16 films between 1937 and 1958.
* Andy has this weakness too; she tries to suppress it, being a health food nut, but on Halloween and Easter, she occasionally loses it. In a 2013 strip, she stole from the kids' Easter baskets after giving up candy for Lent.
* Andy, having been fired by his hated boss Robert California, engineers a buyout from David Wallace where he would get his job back and Robert would be ousted. To set up the reveal for this coup, he first pretends to be down and out and desperate, dressing in shabby clothes, reeking of alcohol and begging for work. When he finally turns around and reveals his triumph, however, it completely falls flat because everyone just thinks he's drunkenly hallucinating, and when the truth is finally confirmed, everyone's too concerned with their own jobs to care about Andy. (Robert, meanwhile, negotiates a generous severance package and it's implied that he's leaving on a sex tour of Europe.)
* Andy Ihnatko has referred to himself as "America's 42nd most beloved industry-figure and "Possibly not the least-beloved technology pundit in the land!"
* Andy is completely incapable of picking up social cues or noticing when he's being exploited, and takes the dumbest advice from whoever offers it, to the point of hero-worshipping the very
* Andy Kaufman...and then shocked when it turned out to be a good impersonation, complete with full costume.
* Andy Kaufman "Andy Kaufman," but not representative of his real personality.
* Andy Kaufman by (among other things) saying the punchlines to his jokes before he does. Then they get into an argument, and Zmuda's character calls Kaufman out on the fact that he's a plant and the whole thing is scripted.
* Andy Kaufman, completely tanked. Combined with the miserable time he had filming it, he never tried films again before his death.
* Andy Kaufman despite the fact that he agreed to do it only after he was convinced it would be good for his career.
* Andy Kaufman featured numerous people from Kaufman's life as themselves, including
* Andy Kaufman had a separate stage persona for this, and became rather famous for being a jerk due to the difficulty in telling the difference between Andy and Tony. Onstage, he was already a bit infamous; he was often too committed to the "bit," and when his audience became uncomfortable, he'd drag it out for ages and let them stew in their juices.
* Andy Kaufman. He also manufactured a completely separate comedic persona, Tony Clifton, and caused as much confusion as possible over whether he and Clifton were the same person.
* Andy Kaufman him - "him" actually being a friend (usually Andy's close colleague Bob Zmuda) dressed as Clifton and imitating Andy's Clifton voice.
* Andy Kaufman impressions of all time (when he was alive, Elvis himself stated that it was his favorite).
* Andy Kaufman in his Little Foreign Man character would do a stand-up routine with deliberately incomprehensible, unfunny 'jokes'.
* Andy Kaufman is unique in that his ban was his idea. In 1983, due to his controversial stint wresting women, he suggested that viewers phone-in to ban him

or allow him to continue appearing on SNL. The majority picked banning him, and he never appeared on SNL again.
* Andy Kaufman jokes, and then just forgets the rest of his routine and freezes on stage. As Foreign Man desperately tries to cut the skit short, he gets more and more upset that the audience is still laughing at him.
* Andy Kaufman, only appearing via phone call during the closing minutes of the show.
* Andy Kaufman or not, a lot of people thought his illness was another elaborate hoax, and some still think he didn't actually die in 1984.
* Andy Kaufman proved fleeting, since most people came to see him as a lunatic.
* Andy Kaufman's "Foreign Man" was like this originally. Then he became a regular on
* Andy Kaufman. The final episode of Season 3 thus had Latka choosing to remake his personality, becoming the suave jerk Vic Ferrari and temporarily forgetting who he really was; the following season revealed Latka had developed multiple personalities, allowing Andy to take on other personae in addition to Latka's. (For those unaware, playing multiple persons was a large part of Kaufman's shtick.) This plot thread was wrapped up by the end of the season (though in the process, another change came — Latka got married).
* Andy Kaufman was a method actor who took the technique far beyond stage and screen. With certain characters, he absolutely refused to break because there were always people around from whom he could get a reaction. His dedication was such that his gags could last days or weeks. His "Tony Clifton" persona, in particular, was so all-consuming that Tony was treated as a separate entity, even getting separate contracts from Andy.
* Andy Kaufman, was born January 17, 1962. (One TV ad for the movie even pointed this out.)
* Andy Kaufman would do esoteric or unfunny sketches if he thought he was becoming predictable, or audiences just wanted him to go over the same material again. There are even some people who think his death was faked in order to troll his fans and family.
* Andy later falls in love with Connie McDowell, a female detective, after she starts babysitting his son by Syliva. They get married, and shortly after that she gets written out of the show.
* Andy Mangels, who frequently writes for the Pocket Books Star Trek series, has been known to feature names of real people in his books. Sometimes the names are featured because of a high bid in a charity fundraiser, and other times as a thank-you for doing something helpful.
* Andy Mientus was known for being the creator and maintainer of the first
* Andy Murray is generally considered to be the fourth member of the "Big Four" of the era, together with Federer, Nadal, and Djokovic, but has been consistently outshone by the other three throughout his career. Of the eleven Grand Slam finals Murray has reached, he's won just three - losing three to Federer and five to Djokovic - whereas the other members of the Big Four are already in double figures in terms of Grand Slam wins. Some have even questioned whether Murray
* And you can also see Nina, who is the daughter of a dragon father and a human mother.
* And you can imagine Kevin, Kate's husband from "I do," would have invoked this trope when she told him, "my name's not Monica," if she hadn't already drugged him half-way to unconsciousness.
* And you can probably make a drinking game out of every time an ad for
* And, you know, a century-long war, with plenty of rich, undeveloped ground for exciting battles and stuff. And one thousand Avatars in the history of the world, too.
* And you know how significant that is when all the character animations are expressed in a few sprites. That's right; out of say, five sprites they drew of Haru, one of them is of her fiddling with the straps.
* and you know the local language and customs. There are tons of people already there who can do the work you're doing, and you'll wind up getting in the way and

consuming food and water that could go to the people you're trying to help. This is especially true in the critical few days and weeks after a major natural disaster where many thousands of people are in need of rescue (case in point, the thousands trapped beneath rubble after the 2010 Haiti earthquake). Unless you're trained for this sort of thing specifically, you'll just waste everyone's time.
* And you may also wanna count an ancient voice-over, with a single person talking over the original audio track.
* And you must not forget the Rugby League player (a VERY manly game) Tracy Lazenby.
* and Young Money. Any album by any member of YMCMB is probably going to have at least another member of the team on it somewhere (
* and your entire stack all go to the Pile. At the end of the game, if any cards are left in the Pile, the players play a versus microgame for it. This means it's highly likely for any given game of Card-e Cards to come down to a battle for a huge stack of cards and a highly likely victory.
* And you're still buying in multiples of four, instead of three or two or even one item at a time, however many you actually need.
* and you're the one who has to guide her into the afterlife. Not to mention being abandoned by your father afterwards.
* And Your Little Dog, Too!: A villain shows just how evil they are by threatening the hero's loved one.
* And Your Little Dog, Too!: Just to show you how much of an asshole I am, I'm gonna threaten the lives of your loved ones in front of you!
* And Your Little Dog, Too!: Next time you wrong me, it'll be your beloved who gets it!
* And Your Little Dog, Too!: The villain boasts that they'll harm someone the hero cares about to prove how nasty they are.
* And Your Little Dog, Too!: The villain threatens one of the hero's loved ones just because they can.
* And Your Little Dog, Too!: The villain threatens the protagonist and also a friend of theirs, who's completely innocent.
* ...And Your Name Is Jonah: After yet another fruitless drill, Jenny hits a door with frustration over Jonah's inability to speak.
* ...And Your Name Is Jonah came out in 1979, it was widely believed that a deaf child allowed to use sign language would become unable to read lips and speak, and thus be unable to function in a hearing world. It is now known that the earlier a child is exposed to language, the better, and knowing sign language increases a child's chances of gaining functional speech later on.
* ...And Your Name Is Jonah: Jonah tries to communicate to Jenny that he wants a hot dog. When she doesn't understand him, he starts hitting her repeatedly, and when she hugs him, he cries into her shoulder.
* And Your Reward Is Edible: When you get food as an expression of gratitude for heroics.
* And Your Reward Is Infancy: Someone is turned into or reincarneted as a baby to give them a new life.
* And Your Reward Is Infancy: The story ends with the main character becoming a baby.
* And You Thought It Was a Game: A character thinks an event is staged but it's not.
* And You Thought It Was a Game: Did you really think this was a game? What a loser! Ha ha!
* And You Thought It Was Real: A fake situation (such as a roleplay, a work of fiction, or a simulation) or some people practicing for something gets mistaken for something real.
* And You Thought It Would Fail: A work ends up becoming more successful than people anticipated.
* And You Thought There is Never a Girl Online?: Ako Tamaki spends almost all of her time inside playing video games. Whenever she is inside, she is either in her underwear or naked.

* And You Thought There is Never a Girl Online? avatar invariably becomes their real-life self in cosplay.
* And You Thought There is Never a Girl Online?. He then closes the door again and tells her to Please Put Some Clothes On.
* And You Thought There is Never a Girl Online? is very shy in real life with most people, even to those who are nice to her. She also doesn’t understand why Hideki and Akane don’t want her talking about their MMORPG in class. Her net game is one of the only places where she is comfortable. Improving this was one of the reasons her guild started the Net Game Club.
* And You Thought There is Never a Girl Online? plays with this quite a lot:
* And You Thought Your Parents Were Weird!: After reporter Alice hears about Josh and Max's secret robot, she pursues the story to the point of breaking and entering and airing footage obtained from shooting through house windows.
* And You Thought Your Parents Were Weird! has Matt, a ghost, possessing Newman, a robot. Matt needs Newman's body to interact with the world, and Newman benefits from having a smarter mental roommate.
* And You Thought Your Parents Were Weird!, teens perform a séance and accidentally summon the late father of one of the participants.
* And You Thought Your Parents Were Weird! uses this as a lighthearted way to end a scene. Matt warns his son to watch out for the... box.
* Andy Panda cartoon, a circus performer attempts to dive into a tub, but an elephant drinks all the water just as he dives. Ringmaster Andy takes the tub to get refilled and rushes to put it back, but the diver, now aware of his predicament, starts running around in mid-air. The two go back and forth, knocking down the big top tent in the process. Andy finally catches the diver, only to realize the bottom has fallen off the tub long ago.
* Andy Panda cartoon "Fish Fry", a fish bites a cat on the finger, who reacts by jumping up hundreds of feet in the air.
* Andy Panda's father tried to tar his roof to save the money he'd have to spend if he hired a professional. Seeing the results would make Mrs. Beary glad she's not Mrs. Panda.
* Andy Panda, with the bird getting much more screen time than Andy and his poppa.
* Andy Pandy provides a truly strange example. Andy plays with his best friend Teddy, a living teddy bear, all the time. Yet Looby Loo, Andy's rag doll, is played with as a toy by the other two and only comes to life when they're away. Averted with the remake, however, where she's as active as the rest of them
* Andy Partridge of XTC packed "The Wheel and the Maypole" with euphemisms (arguably starting with the title): "I've got the plow if you've got the furrow/I've got the rabbit if you've his burrow home/I've got the pen if you've got the paper...I've got the seed if you've got the valley/I've got the big stick if you've Aunt Sally's head
* Andy Pettitte retired in 2010, unretired in 2012, and re-retired in 2013.
* Andy Pirki, Andy and Pirki receive a box of prank items and use them on an unsuspecting dinosaur. Among the items from the kit they use on him is a gun which shoots out a little flag with "BANG!" printed on it.
* Andy Pirki doesn't really have spoken dialogue. It's mostly just the characters' actions.
* Andy Price seems to have started a habit of forgetting pegasus wings in Funny enough this is a common animation error
* Andy Richter Controls the Universe, Andy's voice-over narration would frequently address the audience directly.
* Andy Richter Controls the Universe: Give a man a fish, and he'll eat for a day. Kill that man with a rock, and you can have all his fish, AND his wife.
* Andy Richter Controls the Universe superiors, and the cycle repeats.
* Andy Richter Controls the Universe. The train going through the tunnel goes in and out repeatedly. Andy explains that it's not a metaphor, the train really did do that as apparently that tunnel really spooked the conductor.
* Andy Richter Controls the Universe used it as a central theme, often with voiceover commentary by Andy. Example: "I was thinking about what it would be like

if I had wheels for feet. In case you were wondering, here's what it would look like!"
* Andy Rooney (who was a correspondent during WWII) once told the story of a platoon of American soldiers who came across a German weapons cache. Either out of curiosity or necessity, they equipped themselves with the best guns the Third Reich had to offer. To paraphrase: "A U.S. mortar team, hearing the familiar sound of German firearms to their flank,
* Andy Samberg offered a similar style when he showed up at the James Franco roast. Similar to Norm's case, the audience seemed to take a while to catch on, but some of the dais members (ESPECIALLY Bill Hader) found it hilarious.
* Andy saying "You're gonna give me X without the Y if you keep doing that." to Martha after she slaps him.
* Andy Serkis. In all cases, the detailed motion capture performance was completed with the help of hand animation for the face and fingers, based on footage of Andy's performance.
* Andy Serkis met his wife while they were playing a couple on stage. They went on a date in character to prepare for the role and then started seeing each other in real life.
* Andy Serkis, spent time at the gym strengthening one side of his body so he could realistically emulate Dury, who had a crippled arm and leg as a result of suffering polio in his childhood.
* Andy Serkis where a live-action hobbit-Sméagol played by Serkis transforms into Gollum.
* Andy's granddaughter Brittany Colonna as Young Andy's little sister.
* Andy Shank is described as having friends solely because it's marginally safer than being his enemy. It's specifically stated, also, that people follow him because it's safer than being
* Andy's initial appearance has him trying to force Dwight out of the company by undermining him to Michael at every occasion. In one episode he invents the verb "Schruting" to mean screwing up and betraying everyone. He has no intention of making it a
* Andy's Mother also accidentally kickstarts the events of the first three films: In the first, she buys Buzz Lightyear for Andy's birthday. In the second, she grabs Wheezy of the self and into the yard sale box and in the third, she throws out the toys who were inside the trash bag thinking they were trash and it also gives them the belief that Andy doesn't want them for much of the film.
* Andy's third partner Danny Sorensen is a former Special Forces ranger.
* Andy takes a job in London for several months while April remains in Pawnee. They know it will be ok because they already did the long-distance relationship before.
* And Yukari and Ran's shikigami. And Orin's army of spirits. So many characters actually use them, that Marisa designates it as a quality for many spellcards (slave type) in her grimoire, as opposed to a mere gimmick such as Kaguya's item based attacks (all five of her original attacks also happened to use slaves).
* And Yuki blackmails her older brother by threatening to reveal his stash of adult games to their mom.
* Andy Warhol at a film critic who complained about his films being - you guessed it - based on shots of Taylor Mead's ass).
* Andy Warhol, iconic American illustrator, painter, filmmaker, producer, director, and musician, lived openly as a gay man even before gay and lesbian rights movements kicked off in the 1960s.
* Andy Warhol's Bad is about a woman who makes extra money who runs a beauty salon out of her house and makes extra money by providing ruthless women to do hit jobs.
* Andy Warhol's family insists that he died a virgin, and despite his often-erotic art, there is good evidence in his biography to believe this. He was also a devout Byzantine Catholic, which may have played a part in his decision.
* Andy Warhol's muses. Had a history of mental illness and alcoholism in her family, an abusive father, a mother who let her take diet pills, one brother committed suicide, another died in motorbike crash, her father openly had affair

and she claimed she walked in on him in bed with a woman, suffered from anorexia as a teen, parents isolated her and her siblings, allegedly exploited for her money and naivety, hospitalized due to mental illness and died at 28.
* Andy Warhol used to wear a rather apparent rug, initially to hide the fact that he was balding, but it soon became part of his signature look.
* Andy Warhol, with academics such as Laura Winkiel arguing on her behalf. Those who know Solanas have given inconsistent accounts of whether or not she herself claims it to be satire.
* Andy, which has no effect on his troops, be it positive or negative, as well as a repair power that has an average charge time and is useful for all units. In the reboot
* Andy Whitfield right before he was diagnosed with cancer. He died eighteen months later and his role as Spartacus was recast, but he was still considered the star of the show and touted as a real-life badass by fans — often treating him as if he were Spartacus in real life. In lots of ways, his critically acclaimed performance in the show has led to his previous work being rediscovered.
* Andy Williams is a collection of English translations of French popular songs, with the exception of one song which he sang in iffily-accented French.
* Andy Williams' recording of "It's the Most Wonderful Time of the Year" didn't even chart until 2017, as it was written for Williams' 1963 Christmas special and was not issued as a single. In his later years, Williams was surprised that the song had become one of his best known despite its low profile at initial release. "Wonderful Time" now has a perfectly respectful #7 Hot 100 peak, but for years it was outpeaked by several less remembered songs. This is still the case for another of Williams' classics; His cover of "Moon River" was also never issued as a single and has never charted.
* Andy Williams's "Music to Watch Girls By" got a boost after it was used in a British car advert. The funny thing is that it was a
* Andy Willoughby's Three Step Plan. "Hi! How in the world are you anyway? Are you tired of having too much month left at the end of the money?"
* And Zhao does it again against Aang in a later episode; when warned by his former master that he is not ready to fight the Avatar, Zhao arrogantly replies "I think I can handle a child." The result? Aang makes him look like a fool by tricking him into
* And Zuko/Mai had been completely open for a long time as well. It was entirely unclear if their childhood crush would develop to anything when they first met again after years and when things seemed to get resolved after The Beach, everything was out in the open again up to and during the volcano prison. Only when she attacks Azula to save him does she commit to accepting his decision to join the Avatar. But then she vanishes again until the finale, and they get back together. Then they break up
* And Zuko's dream in "The Earth King", where he's being crowned Fire Lord with
* And Zuko tends to be fairly Genre Blind throughout. No, the golden egg on the pedestal that they found in the
* An E3 trailer shows the player character moving down a tunnel, a comrade in front of him. Your comrade turns to talk to you, but a second later someone appears from
* An Eagle Among Lions written for her by her world's Ferdinand and Hubert. Dorothea has to remind the other Edelgard not to say "pause for effect" when giving the actual speech.
* A near aversion takes place in another episode, where David leaves some dirty rags lying about in the basement. A few days later, the house catches fire, but quick thinking and the timely action of the fire department ensures that there is no serious damage and no injuries. Afterward, Gus tells the family that he doesn't want to know whose fault it was, as it might be simply too big for him to forgive.
* a nearby cat actually has the subject's tongue. Including the ending, where it's an angel cat with St. Peter's tongue.)
* A nearby shooting leads to the school being evacuated. A few students are missing, due to following plotlines outside the school, and realise how terrified

they must be making their parents.
* a near-fixed path of technological discovery are usually invented at about the same time as combustion engines, and radio transmissions rarely predate nuclear fusion. Some technologies on Earth are far in advance of what we should be able to produce.
* An earlier additional scene had Ernest (who they believe to be Nash) brought into a room the night before his execution to be entertained by a lady of the night. Naive Ernest, not knowing what's in store for him, is heard off-camera screaming. The scene ends with him being physically dragged out of the room by two guards, completely exhausted.
* An earlier and even less funny example occurs when Max Shreck discovers that Selina Kyle has been snooping around his office and has uncovered his plot to siphon electricity from homes and businesses around Gotham City and sell the power back to them at below market price. Seemingly angry, Max orders Selina not to tell anyone about this and then backs her toward a window, accusing her of trying to thwart his attempts to establish a family legacy for himself and his son. Selina is apologetic all the way until Max actually pins her against the window and appears to be on the verge of hitting her - or worse. She turns defiant, calls him a bully, and snaps:
* An earlier arc also features two students in an arranged marriage to seal a business alliance between their families. It's clear that
* An earlier attempt to inspect the fire extinguishers in the building resulted in him setting them on fire. All of them. The whole event is explained after the fact by Fantasio, so
* An earlier Australian car ad had a car drop out of the sky and land safely in the front yard just as a bloke raised a can of beer to his lips.
* An earlier case happened during Luffy's fight against Don Krieg. When Luffy punches his hand through a spiked cape to hit Don Krieg, several of the Baratie's chefs clutch their hands and cringe.
* An earlier case involves Ikki and Metabee, after a sound defeat against an aquatic medabot, asking an old fisherman to teach them how to robattle in the water. After much begging, the "training" indeed consists of all sorts of chores for the old man, including a back massage, but eventually Metabee does learn how to retain balance while in the water, just not
* An earlier crawl includes "Stay tuned for 'Wet Pets': 2 hours of puppies caught in the rain" and "Tsunami warning in Wichita confuses many."
* An earlier episode also had Sheldon casually mention that he could hear Penny having sex in her apartment for the past three years he had lived next door to her. She was appropriately mortified.
* An earlier episode also involving a kidnapping has three witnesses give different descriptions of the car that was used to abduct the victim. One of them ends up being right.
* An earlier episode, "Dumber Dolls", had Happy Time Harry, who rather than being homicidal was just depressed, cynical, and bad-tempered. His depression
* An earlier episode establishes the concept when hiding from simulants, though the AR machine prevents it.
* An earlier episode "Fear of a Bot Planet" also introduces a planet whose native inhabitants are all robots who hate and fear humans in a similar way to how sci-fi characters from old movies fear alien monsters. The anti-human sentiment is fueled on purpose by the ruling Robot Elders to keep the population distracted.
* An earlier episode features a child pornographer who's been molesting his elementary-school-aged daughter; when the mother found out and tried to get the kid away from him, he claimed
* An earlier episode features a prank date that ended with one of the pranksters killed by the mark.
* An earlier episode focuses on the science club entering a competition and, like the chorus episode, ends without revealing the outcome. A full year later,
* An earlier episode had a gag involving an actual studio audience having moved in across the street. Peter eventually gets fed up with them and goes to call the

cops.
* An earlier episode had a similar camp for earth benders. They were kept on an island build with steel on the sea specifically to prevent an escape through bending powers, which prompted the Gang to get creative.
* An earlier episode had Benson and Stabler inadvertently catching a suspect who had been on the run for thirty years after pulling one of these; she told then-junior prosecutor Elizabeth Donnelly that she wanted a meeting, and when Donnelly let her use the bathroom, she climbed out the window. And you better believe Donnelly remembers it like it was yesterday, because her coworkers never let her live it down, leading her to take a leave from the judiciary to prosecute the woman.
* An earlier episode had Blackadder and company trying to impersonate a man who they prematurely executed for a last meeting with his wife, and needing to preempt various threads that she fortunately mentions just before meeting him; they almost stumble at the fact that Blackadder pretends to be missing more arm than the man actually lost, but covers it up by claiming to have gotten in a fight with another prisoner. At the end of the episode, he has to do the same thing with the Queen (who happens to be talking about how unexpected it was that the man was a traitor, considering his various debilities...).
* An earlier episode had Hodgins accidentally exposing the team to a potential biohazard, meaning they all had to stay in isolation during Christmas, getting only a few minutes to see their families through glass. This episode revealed that Brennan, beyond just being an atheist, doesn't celebrate Christmas because her parents went missing shortly before the holiday and her brother Russ had gone out of his way to give her as normal a Christmas as possible- accidentally tricking her into thinking they'd come home.
* An earlier episode had Nancy end up getting fired by the women's sexist and ageist corporate manager and her working as a waitress at a seedy diner to make ends meet. When it was pointed out that discriminating against her due to age is illegal and the women manage to get audio evidence of the guy's behavior and views, he soon hires her back while he gets reported to
* An earlier episode had Phoebe switching places with her past self, an evil witch in the 1920s.
* An earlier episode had the kids in a bathhouse. Jou tries to get into the bath with a towel while the other boys are nude, so Yamato and Taichi try to strip him.
* An earlier episode has a three-way battle between the Gaang, the Fire Nation, and pirates.
* An earlier episode has a version of this by proxy, when an officer working a case mentions having known Don's (dead) ex-girlfriend, with Liz being the Missus in this situation.
* An earlier episode has Bill Church Sr. (head of the Intergang) marry a young nurse after some heart surgery.
* An earlier episode has half the camp coming down with the flu, including Colonel Blake and Major Burns. At one point Major Houlihan tells Hawkeye that, as ranking officer among the well, she should be in charge rather than him. Hawkeye, who couldn't care less about being in charge, immediately agrees, but she keeps stating her case (seeming to believe that Hawkeye is mocking her/being sarcastic), leading him to invoke the trope name.
* An earlier episode has Meg telling Lois she loves her. Lois just mumbled something at the "love" part. Not to mention this was during Meg's wedding.
* An earlier episode has Spongebob and Patrick end up in possession of a magic pencil, with the latter promptly asking to have a magic mustache drawn on him, so that his dreams could come true (
* An earlier episode has this little conversation occur after Buffy shows her mom her SAT scores:
* An earlier episode involved James' parents faking their death to get him to marry Jessiebelle.
* An earlier episode involves a group cheating to win an alternate-reality game associated with an MMORPG. The creator was aware of the issue but didn't take it

seriously because all of their actions were digital, through the game — until they weren't.
* An earlier episode, "Legends," before the series changed names, had some of the League transported into a dimension that bore resemblance to an in-show comic book (it's theorized that the creators of said comic had a subconscious link to that universe and used what they thought were original ideas for the comic) and pair up with equivalents of the
* An earlier episode, "Marge on the Lam", also starts with a Public Television telethon. Donations are coming in so slowly, that Troy McClure doesn't recognize the phone ringing when Marge calls in to pledge for ballet tickets.
* An earlier episode of the show had Hawkeye and Trapper helping Margaret who got crazy drunk after breaking up with Frank (albeit temporarily). After sobering up, Margaret expresses herself in the O.R.:
* An earlier episode showed the family watching a show with two women eating ice cream and making very lame jokes about men. Then it went to commercial announcing that they were watching Lifetime:
* An earlier episode spoofs the trope with a physically mutated and clearly failed clone of Shake. Not only are the clone's attempts to pass himself off as the original
* An earlier episode uses a similar trick. Samantha comes up with some clever ideas for Darrin's latest advertising client (a soup-making company), and at first, he loves them—but then he decides that the only way she could have possibly devised the slogans was with her magic (in case you hadn't noticed,
* An earlier episode, "Waffles", used an instrumental of "The Pee Pee Dance" from the episode "Serious Business". This case is actually justified, as
* An earlier episode was set at Jane's aunt's funeral, with one attendee (Jane's other aunt) making no secret of her joy at the dead woman's passing.
* An earlier example could be Shirou's first vocal declaration to Saber. He's been stabbed through the chest, and is about to go up against
* An earlier example has Ash deciding to sample the food Brock has made for Pikachu, which he immediately regrets. Brock mentions that while Pokémon can and do enjoy food made for humans, the reverse is rarely true.
* An earlier example is an article (guest-written by Ernest Kovacs, the famous TV comedy pioneer) for a board game called
* An earlier example is the Hiruma brothers. Hiruma Kihei tries to sell the land around the Kamiya Dojo, and has his brother Gohei impersonate the Hitokiri Battousai while claiming to use the Kamiya Kasshin Ryu style of swordsmanship to ruin the reputation of Kaoru's dojo. In the anime, Gohei is made into a
* An earlier example is the hollow that shows up at Ichigo's doorstep and nearly kills his family in the first chapter, since it forces Rukia to transfer her power to Ichigo, turning him into a substitute soul reaper so he can save them. But despite this, it's just a regular hollow and easily slaughtered by Ichigo.
* An earlier example occurs when Peter turns live action during a drug-induced
* An earlier example would be getting to the king dagganoths, which requires two people (or one person and a pet rock) to get past any of the three entrances to the monsters, then three people (each having gone down a different path) to open the door to the kings' lair. The rune thrownaxe was later introduced to circumvent it, as its special attack lets it ricochet off of all three ends.
* An earlier example would be their host entry from 1989, Furbaz's "Viver senza tei" - their only entry in the Romansh language.
* An earlier Halloween episode featured Mr. Burns as a vampire living in Pennsylvania. (He
* An earlier hypotenuse, an actor named Lars, did die, but neither of Agatha's primary love interests was ever aware of his existence, much less his removal from the equation.
* An earlier instance was when Simon was explaining to the others that Natsu's power is enough to stop Jellal, causing Natsu to sneeze (added humor was that he was wearing a cat mask at the time, filling it with snot)
* An earlier iPod touch model had room for the yet-to-be-included camera.

* An earlier issue has him boosting himself fast enough so bullets fired seem to stand still. Problem is, it's in a dark theater and he can't -see- all of them.
* An earlier, less intelligent iteration of the Sentinels was thwarted, on the other hand, by one of the heroes convincing them that the ultimate source of mutation is the sun, and that rather than obey their creator, they should eliminate the source. The Sentinels
* An earlier line of Herbal Essences commercials had women moaning and squealing with delight while in the shower (using the shampoo, of course), ending with an exhilarated "Yes! Yes! YES!" as they see how shiny their hair has become. The tagline? "A totally organic experience."
* An earlier, more comedic episode had Hawkeye accused of petty theft. He eventually tricked the real thief into revealing himself.
* An earlier offshoot of the Church of Zakarum, the Crusaders, make their return in the expansion to
* An earlier one involved Muffy getting fed up with Arthur's shabby clubhouse and leaving to start her own club, and Buster and Francine deciding to join her. Gradually,
* An earlier one-shot had a villain attempt to shoot Castle, who was standing in front of an Aquarium shark tank. Castle dived out of the way, and somehow, the handgun bullets managed to shatter the tank and send an angry shark right at the gangster.
* An earlier page has Matchu struck by lightning and coming out all charred up.
* An earlier Russian example: in April 1242, Prince Aleksandr Nevsky defeated an invading army of Teutonic knights by luring them onto an icy lake. The lightly-armed and armoured Russians were able to retreat to safety, but the heavily armoured and mounted German knights regretted their impetuous charge - they went right through the ice and drowned or froze. The defeat ended the war and the Germans learnt a lesson they'd forgotten seven hundred years later - never fight Russians in winter.
* An earlier scene had him and Esther escaping from a mob via the Jewish Underground - which played like an amusement park ride through Jewish history, including awful scenes of their persecution throughout history that both she and Mordecai laugh at... until they see a Jewish woman getting her credit card declined at Macy's,
* An earlier scene has Anakin confess to Padme what he did in the Tusken camp.
* An earlier scene has a villainous example: goblins strapping armour onto Uruks, pressing weapons into their hands, and marking them with the White Hand of Saruman.
* An earlier scene plays the trope seriously, though also averts it. Faith has told the Mayor that Willow is trying to hack into his computer files, so the Mayor decides that Willow must be killed. When Faith looks upset, the Mayor assures Faith that it's too early in her
* An earlier scene refers to World War III directly. When McKittrick tells David what his playing with their computer nearly did, McKittrick mentions that if they hadn't caught him him, DEFCON 1 would have been declared.
* An earlier Scooby episode played with this. Shaggy takes the fifth when the gang is about to enter a doorway, saying "I refuse to enter on the grounds that it might
* An earlier single "Take a Bow" is much slower, and more suited towards adult contemporary than her normal 'urban' material.
* An earlier song about danger, performed by Little Jerry and the Monotones, also features the band just dodging a falling piano.
* An earlier story had the Punisher himself go to a dental office, where he is attacked and nearly tortured and killed with the dentist's equipment by gang members, who he eventually turns the tables on.
* An earlier story has the Squad on a mission only for Captain Atom to show up as his boss wants to get the glory of the win more than the Squad. Both he and Flagg agree it's better to work together than getting dragged into this petty rivalry.
* An earlier story mocked the divorce of Tom Cruise and Nicole Kidman through a war between two blocks named after the actors.
* An earlier strip had a convenience store that stocked Liberal Art Degrees next

to Particularly Low Quality Brand of Toilet Paper. They got a lot of complaints. From the toilet paper vendors.
* An earlier strip has a joke about a prototype reactor that lost its plasma containment,
* An earlier Strong Bad e-mail had Strong Bad criticizing toys that come with cereal. When he comments on how one should avoid health-based products, he shows a defibrillator and sarcastically remarks "oh great, I can restart my heart if it stops."
* An earlier UK example: when there was a sugar shortage in the UK in the early 1970s, a presenter of BBC Radio 4's morning news-magazine programme
* An early 1960's Maxwell House commercial featured the melodic bubbling of a percolator as a jingle. That sound effect inspired not one, but two singles: "Perky" by Al Hirt in 1961 (which didn't chart) and "Percolator (Twist)" by Billy Joe and the Checkmates in 1962 (which hit #10 and was later covered by the Ventures).
* An early-1990s commercial for a beer which had some beer-drinkers wanting to try something new, be it "Grandpa's Old Fuzzy Ale" or "Benedict Arnold Pittsburgh Lager". Most people probably won't remember the beer which was actually being promoted.
* An early 2000's ad for Kit Kat bars shows a male model talking about how exhausting his job is, with the implication that he's a wimp for complaining about a job that involves nothing more difficult than making a pouty face. The slogan is "If he deserves a break, you certainly do". The thing is that while being a model may not be the most intellectually demanding work, it can still be pretty draining — in addition to having to keep their bodies up to the standards demanded by the industry, models work very long hours, often for very little pay, for extremely demanding clients. As for "smiling all day" - well, holding your face in a specific expression and your body in a specific pose exactly as directed is not as easy as it sounds.
* An early 2000s commercial for Kim's potato crisps featured a black African as the cook of the Viking ship. Considering everything else historically inaccurate in the commercial
* An early 60s pop song titled "Haunted House" by one Gene Simmons (no, not
* An early-'60s storyline has Linus preparing for a rare solar eclipse. He lectures to the other characters about viewing safety, puts together a pinhole projector with two sheets of cardboard... and, when the day of the eclipse finally comes, it's raining outside.
* An early '90s commercial for a brand new cereal called Bran News used a pair of Abbott and Costello lookalikes to do this style of comedy.
* An early advertisement for the Singapore Civil Defense used "Every Breath You Take" by
* An early anime original segment has Kobayashi taking Tohru and Kanna shopping for supplies for Kanna's first day of school, and the two dragons are fascinated by all the stationery they encounter.
* An early anime storyboard had Walpurgisnacht's familiars take the form of Mami, Kyouko, and Sayaka, which was removed from the final product. In the manga, the scene stayed in. Many other action scenes are also noticeably changed.
* An early attempt to create a rival to the Daleks resulted in the invention of the Mechonoids, giant spherical robots that were about as threatening and maneuverable as a garden shed. They also had voices that made the Daleks sound positively eloquent in comparison. Fortunately they never returned (except in the spinoff media).
* An early attempt to cure the Rash sickness caused what appeared to complete brain death. What the scientists didn't know was that their cure caused the victims' souls to be stuck in the world without a way to the afterlife. The souls grew angry and insane over the following 90 years.
* An early book mentions that wizards often relish the chance to go home again... and meet every bully who wronged them, and get some magical payback.
* An early book shows he does indeed know, from personal experience. In

* An early chapter used this as part of a psychological test the Student Council took, where the number of flowers you wanted to take from a field revealed how big your crush was.
* An early child movie star, Jackie Coogan, lost almost all the money he made through his parents' mismanagement. This led to the enactment of the
* An early code name for Star Wars, "Blue Harvest," also appears frequently in the Expanded Universe.
* An early coloring book followed the "Life's Too Short" version of the story, in which Elsa tells Anna she
* An early commercial parody poked fun at the United States Navy's "Not Just A Job, It's An Adventure" campaign, showing the less-than-glamorous side of military service: peeling potatoes, doing laundry, painting ships, scrubbing toilets, etc., followed by the slogan, "it's not just a job, it's $96.78 a week."
* An early concept for the first game had Chernobog as the source of all Heartless and the final boss fight. After his defeat, Kingdom Hearts would appear as "Ave Maria" played, in an imitation of the "Night on Bald Mountain" sequence from
* An early conversation between a frazzled first-time mother Lori and her new nanny Francesca in
* An early David Bowie song "The Little Bombadier" is all about this trope, including the (incorrectly) sinister interpretation of those observing the events.
* An early David Sedaris essay talks about trying to write erotica for a Giantess fetish magazine. He harbors no such fetish himself, he simply needs any job he can get. He ponders the more mundane aspects of being a giant that tends to get glossed over in such works. (How would they find enough food to eat? Wouldn't it be lonely? Wouldn't a bowel movement evacuate a city?)
* An early draft of the script included an extra scene where Eddie visits Marvin Acme's funeral, which would feature more animated cameos. Then, Eddie would be spying on a private conversation between R.K. Maroon and Judge Doom, which further raised Eddie's suspicions of the former's involvement and led to him snooping into Jessica's dressing room.
* A nearly-drowned Hank is given mouth-to-mouth from Molotov. He acts suave and worldly until he sees the erection in his shorts, and runs screaming "My pants are haunted!!!", after dealing with the ghosts of an Indian burial ground earlier in the day.
* An early episode, "Aria", shows a stage mother whose obsession with living through her children had already driven her older daughter away. She thus pushed her younger daughter into porn, hoping that would land her bigger roles. The younger daughter
* An early episode because according to the teacher it was the closest thing to hell the school board could think of. She later came back and said the principal had pulled out a gun while she was talking to him and shot himself so he would not have to hear her. While she was talking the teacher and other students pulled out guns and pointed them at their own heads until the teacher seemed to have an epiphany decide to put their guns to a different use which could probably be classified as "Homicide as Comedy".
* An early episode begins with a man drifting through space in a small shuttle, playing a radio message which details his backstory and the plight of his home planet "Gworim". Then the Lexx runs him right over, and nobody even notices due to his comparatively small size.
* An early episode couldn't use the term "Jell-O Desserts" so Homer instead called them "Gelatin Desserts."
* An early episode does this. A woman confesses to shooting her father before he feel overboard while at sea. Later, when his body washes ashore with two gunshot wounds to his chest she claims to have fabricated the story as part of a plan to help her father fake his death. The established time of death and the mismatch of the bullets in his body with her gun seems to support her claim, as does Jessica having met the man
* An early episode ends with a spoofed memorial to Tristan's original voice, which had spontaneously changed (with everyone but Tristan noticing). This references the

point in the English dub when Tristan gets a new voice actor who doesn't make him sound like
* An early episode featured a Norseman who was cursed with eternal life by the
* An early episode featured a plot to drain people through adorable little pets. When close enough to them, their pheromones trigger this result in anyone. Luna realizes the whole thing is off when Usagi and Shingo are so enamored with the creatures that they actually yell and kick at her if she tries to come close to them.
* An early episode featured the gang watching a telenovela and making their own story as they didn't know what was going on. One scene had two women fighting and ended with one of them being thrown down a flight of stairs which the gang all cheer for.
* An early episode features an entire street full of people who have been dragged down to the precinct after a murder who can only offer vague, contradictory and nearly-useless descriptions of the victim, the suspect, and exactly what happened between them. Some of the witnesses were standing right next to one or both of these parties. The cops, not surprisingly, are a little exasperated. This episode was a comment on homelessness in New York at the time. Many of the witnesses were mentally ill people who had been dumped on the streets. The one moderately functional one says she didn't see anything because she doesn't have the glasses social services has been promising to get for her, and asks the cops if they can help her with that. Finally, one of the people, who is quite elderly, and was initially dismissed, actually turns out to be the healthiest, sanest person there, with some useful information; she had neighborhood watch training and took down the car's license plate number.
* An early episode features the set of a Hollywood horror movie being plagued by ghosts, and features this trope.
* An early episode had a guy shoot a man to death, and in attempt to cover it up, he set a fire... which killed at least twenty-two others.
* An early episode had a killer taking organs he believed housed the human soul. He (or possibly his mother)
* An early episode had Allison unable to get involved in a case because Joe was on the jury, but she knew the defendant was guilty of killing his wife. After the defendant was acquitted, Allison led the police to evidence that he was guilty, after which he was killed by his father-in-law, who up until then had been his strongest supporter.
* An early episode had Aquaman villain Black Manta dressed in brown and referred to only as Manta. However, this was reversed in the
* An early episode had Bender joining a robot religion led by Preacher Bot and swearing off alcohol for the religiously acceptable synthetic oil. And yet the very first episode established that alcohol is
* An early episode had J.D. competing (purely in his own mind) with another intern named Nick to see who was the best between them and who should be the unofficial leader of their group of interns. Eventually, J.D. has to concede defeat, as Nick can match JD's medical knowledge while also being more handsome, less socially awkward, more charismatic, less of a
* An early episode had Mort and Muriel Goldman talk about how they met. Turns out Muriel found Mort through one of these as one of the worst possible choices in a video dating service.
* An early episode had O'Neill resolve a problem late in the episode by giving a local Mongol warlord his handgun, which the warlord celebrates by
* An early episode has an assassin dueling with Jin. After Mugen kills his employer, he tells Jin that there's now no need for him to kill, and gives a
* An early episode has Dillon try to ditch training, while Dr. K tells him he has to learn to be ready for anything. To drive the point home, when he opens the fridge to get a drink, she has a ludicrously over-sized laser cannon emerge. Later on, a comedic
* An early episode has Elliot treating a psychiatrist. She unthinkingly asks him what prompted him to go that direction and not become a "real doctor".

* An early episode has El Peterete as the main antagonist, and he hides in a farm doing this with a scarecrow.
* An early episode has frozen businessmen. At the very least, they're suffering memory problems from being encased in ice for who knows how long.
* An early episode has Odo wondering about his people, feeling that his strong sense of justice is a racial memory, giving him an idea of the kind of people they are. His people are in fact a group of brutal oppressors who often engage in genocide. That being said, they do have the ability to transfer information through touch, but it applied to his sense of order, not justice.
* An early episode has Peter tell Chris that sometimes good things happen when you're asleep. Cut to Peter seemingly having a wet dream about a woman named Jenny.
* An early episode has Rose, who had just lost her late husband's pension after his company went out of business, searching for employment. Even after much rejection, she ends up as a waitress at a diner (although this is retconned out of existence and she is instead a grief counselor and eventually gets a job as a consumers' reporter).
* An early episode in Advance Generation has this fate befall Ash's Corphish after Treecko attacks him to get him out of a hole.
* An early episode in the first season involved one clone attempting to frame another for being a traitor. The framed clone was blamed because he looted the fingers of destroyed battle droids from the battlefield and strung them together to make little bracelets, which was explicitly forbidden. The real traitor was found out immediately after he blamed the other because
* An early episode involves the murder of an off-duty officer who was a childhood friend of Logan's. As the cops investigate, they find that the dead cop was on the trail of a former priest who was a serial child abuser, and that said former priest lives only a few blocks from where the victim's body was found.
* An early episode of has the boys construct their own horde of robot clones of themselves to increase productivity, in a rare non-violent use of this trope.
* An early episode of Season 14 has Agent Florida, upon assembling everyone at Blood Gulch, muse that he could make the conflict last for fourteen seasons. When Vic asks what he means, he laughs it off and explains he means
* An early episode of Voyager had Tuvok criticize his trainees for this; in his version of the scenario there was literally no reason not to simply retreat, but they tried to fight it out anyway.
* An early episode specifically notes that Kevin Stoley's parents are from China, and
* An early episode suggests that he also has a crush on Haley's sister Alex, who is 13 at the time.
* An early episode "The Gamekeeper" has the SG-1 team trapped in a simulation of one of the most terrible moments of their lives and tasked with changing the outcome.
* An early example from Spider-Man's original run — villain Big Man was revealed to be Peter's coworker Frederick Fosswell. Later, Fosswell gets out of jail and gets his job back. The Crime Master shows up, having a mysterious relationship with Fosswell. In the end of the two-parter, it turns out the Crime Master is... some random, never-before-seen mobster. Fosswell did reform (as far as that issue went, at least), he was working as a police informant all along, which could explain how he got such a good plea bargain.
* An early example in the technology world was a group of engineers known as the "Traitorous Eight" who worked under William Shockley, the inventor of the transistor. Irritated by Shockley's increasingly erratic behavior and iron-fistedness, the Traitorous Eight quit and formed Fairchild Semiconductor, which in turn spawned Intel.
* An early example involves Emma and her daughter Amelie, Lynne's neighbors who seem only tangentially related to the story.
* An early example is gawky Walter Denton's brief ukulele and singing solo in
* An early example is Harry Belafonte and Joan Fontaine in the 1957 film
* An early example occurs in a 1980 episode of the short-lived series

* An early example: Shin attempts to stab Kenshiro with his hand. Kenshiro simply raises an arm and holds Shin's hand as it goes through his. Then Kenshiro does the same attack on Shin, which is blocked in the same way.
* An early example that's seen to this day, straight from 1938, is the Cowering Man, who's seen in Action Comics #1, running in fear from Superman lifting a car. Whenever this scene is referenced, you can count on him running away. Dude's been running for almost 80 years.
* An early example was the Ford Sierra, when it was first released in 1982. It was the first of the Fords to sport the bulbous "aero look" and was so unique at the time, it was dubbed the "Salesman's Spaceship".
* An early fake commercial for "Santi-Wrap," a plastic sheet similar to disposable toilet seat covers, featured John Belushi as a slovenly, drunken mall Santa, thereby illustrating why such a product is necessary.
* An early fansub added to this by applying subtitles and karaoke that were reminiscent of those you'd find on old fansubs, complete with
* An early fan sub of the series put a disclaimer on the third to last episode: "
* An early gag pointed out the problem with nudist camps is lack of quality control.
* An early installment has Nestor the butler working for someone he doesn't know is evil, and for much of the plot he actively sabotages Tintin and the Captain.
* An early instance occurred in TGS Podcast #10 where during the middle of the discussion, a woman enters Jesse's room and starts cleaning the shelf behind him. Jesse promptly loses it (albeit silently) and points her out causing TB and Dodger to start dying with the latter leaning out of frame to compose herself while JonTron sits there oblivious to it for a good fifteen seconds. He finally notices and starts laughing just after Dodger gets a hold of herself and leans back into frame causing her to start again. Finally after the woman leaves only to come back moments later causing Jesse to turn his webcam off and the others start laughing all over again. It's a full minute and a half of continued laughter from all four of them and a shining example of how contagious TB, Jesse, and Dodger's laughter can be.
* An early issue has Liz Allen pointedly call Betty Brant "Miss Brant" when inviting Peter to a Spider-Man Fan Club party being held at her family's dinner club and Betty's inner thought reaction states that "when she calls me 'Miss Brant,' I feel a hundred years old!"
* An early issue of vol. 2 has Rocket Raccoon stating a fondness for Ebay. After all, how else is he supposed to get the DVDs of his favourite shows?.
* An early issue (specifically issue #3, when the comics were still silly,
* An early Japanese version of the trope involves the "Ghost of the Rashomon Gate" in old Heian Kyo. People have been vanishing mysteriously in the vicinity of the Rashomon Gate and a daring young swordsman decides to do something about it. However his watch proves completely uneventful and he is on his way home when he encounters a pretty young girl astray in the bad part of town and looking for a lift. He takes her up on his horse behind him but, luckily for him, turns his head just in time to catch her turning into a demon. He cuts off her arm with his sword and she vanishes upward like a rocket. Badly rattled the young man returns home, locking the severed arm in a chest. A few days later a woman claiming to have been his first nanny comes to visit. He pours out the whole story to this sympathetic listener and is persuaded to show her the arm. Predictably the old woman immediately turns into the demon, grabs the arm and vanishes again - this time for good.
* An early Mages' Guild questline involves a bet between the alchemist Ajira and the enchanter Galbedir on which apprentice will become journeyman first, with the player helping Ajira gain an edge... but Galbedir is already set as being a journeyman when the game starts, despite the plot treating her as still an apprentice. Oddly enough the game
* An early mission is similar, allowing you to sabotage a production of
* An early mistranslation of Yajima's name ended up calling him "Shitou" instead. Since subsequent chapters call him "Yajima", many fans were led to believe his full

name was actually "Shitou Yajima", to the point where the character was briefly credited as "Shitou" in the English dub of the anime.
* An early one from "The Ambassadors of Death". "Hello Space Control, we are not cleared for re-entry."
* An early page at this trope by slashing the dragonling's top clear open.
* An early panel of #7 shows OCs of Sibsy (Wild Fire) and fan musician Mando Pony and a later panel has an appearance from Holly Giesbrech (Holly Dash) among other background ponies in Ponyville.
* An early "parents'-guide" film review website, Screenit.com, invoked this trope
* An early part of Barry Manilow's career was helping major corporations sell you stuff:
* An early post featured an investigation of a strange death associated with a photo of the Slender Man himself photographed with a tentacle ready to be wrapped around the victim's neck. A witness was quoted as describing the sound of "a watermelon *unable to understand subject*".
* "An early preview" used a placeholder voice actor (one of the programmers) for new sidekick character Wheatley, who added a particularly amusing emphasis on the phrase "You did WHAT?!"
* An early running gag is that Florence would interpret Sam Starfall's decisions and behavior based on her own very moral worldview, and assume that they were the actions of a respectable and morally upstanding citizen, words that do not describe Sam well. Even when he would take seemingly bad actions (such as abandoning her in a dangerous storm), she would assume that circumstances had forced him to do so against his will. Eventually, she comes to learn his true character, but chooses to stand by him because he does have a code of honor inherited from his homeworld, and will stand by it no matter how much money selling out would get him...
* An early scene has Ben Bradlee crossing out large portions of the article and saying "Stick it inside someplace."
* An early script. The closest we get to anything intelligible is when he gets startled by the flames shooting up from the grounds of Hell and he shouts, "MMLY MMMT!", which is clearly supposed to be "HOLY SHIT!"
* An early story arc revolves around Daryl suddenly finding himself unable to
* An early story had Nami stabbing Usopp and pushing him into the water in order to prove her loyalty to Arlong. Of course, she was only pretending to do it, and stabbed her own hand to help with the ruse.
* An early storyline had George mention some "pesky aliens" that might have followed him to the
* an early strip, a UNS intelligence officer is killed by his superiors during an intelligence briefing when he unwittingly lets slip that he might have learned details above his security clearance.
* An early strip features this kind of situation in a car full of adults, complete with the "Don't make me stop this van" response. The purpose was probably to emphasize the childishness of the interactions between Owen and Shelly.
* An early strip had Dilbert getting sucked into the Internet, which he described as looking like a
* An early strip had Lucy repeatedly shouting "OLEE-OLEE-OLSEN-FREE-O!" Violet came by and pointedly told her that the expression was "Ollie-Ollie-Oxen-Free." This left Lucy more thoroughly humiliated than she'd ever been in her life.
* An early strip had Susie invite Calvin to a tea party with her various plushies, which he rudely turned down (of course) due to not wanting to play with a girl and because he was looking for Hobbes, who had previously been stolen by a dog. However, when he notices Hobbes is among Susie's guests, Calvin thanks her for finding him and kisses her hand in gratitude, though not before all the cookies are stolen. Due to the
* An early strip has Dilbert use his computer to find the funniest words, which turn out to be "weasel", "chainsaw", "prune", and any reference to
* An early strip has Sam win a free cake, which he shares with Fuzzy while gleefully touting what a great friend he is for sharing his cake with him. One bite of said cake both silences him, and shows why it was free in the first place.

* An early strip shows Davan attending the funeral of his childhood friend, Scotty, who committed suicide. His grief quickly takes the form of rage towards Scotty, which he then takes out on the corpse. Literally, taking the corpse out of the coffin to shake it and yell at it. In the background, J. Grant, making a cameo, urges Davan to "let the legions of the dead know we living will no longer be oppressed by their cold clutches."
* An early termination fee of $300 to get out of a 12-month contract.
* An early version of an early Homestar cartoon advertising a (fake, at the time) album of Strong Bad's greatest hits featured a real phone number, 1-800-BAD-SONG. The Brothers Chaps had assumed that no one would actually try to call it. They changed the cartoon shortly after a Brooklyn-based limo company complained that people were calling trying to purchase the album. The new phone number is 1-800-555-SBSINGS.
* An early version of Otaku O' Clock relates to different reasons in the years before anime was mainstream in the US. During its initial 1985-1986 runs,
* An early Wienerschnitzel ad campaign featured an anthropomorphic chili dog as a fugitive on the run from people who want to eat him. Later, he was changed into a generic mascot (possibly because people took the ads at their word and refrained from eating him).
* A near-miss occurs in "Krusty Gets Busted" where it's revealed Krusty the Clown had a heart attack while filming one of his shows. The kids in the audience think he's doing an act and burst into laughter, and the whole thing apparently wound up being considered one of television's funniest bloopers according to reporter Kent Brockman.
* A near-miss version occurred with the Chicago Bears in the 2010 NFC Championship against the Green Bay Packers. Starting quarterback Jay Cutler was pulled out with a knee injury after a first half in which his team failed to score even a single point, and second-string quarterback Todd Collins threw four incompletions in a row, so with a minute to go in the third quarter, the Bears decided to pull Collins and take a chance on third-string quarterback Caleb Hanie, who proceeded to suddenly turn the game around and give the Bears a fighting chance. Hanie ultimately wasn't able enough to pull out a victory in the time he had left, but he got the Bears a lot closer in one quarter (a quarter they began with a 14-point deficit) than Cutler and Collins had in the first three quarters combined; many fans believed after the game that had he been put in immediately when Culter came out, giving him a little more time to make things happen, he might have been able to pull off the
* A near-miss with Mr. Midshipman Easy. Jack Easy is indeed an officer, and from a relevant social strata. He is also, however, the sole heir to an immense fortune beyond the means even of most admirals, and his fellow sailors, enlisted and officers alike, are bewildered by his choice to go to see when he had so many better options. Jack eventually comes to agree, and resigns his commission to manage his estate.
* An Earth-based example: it's most common to shake hands with the right hand in Western culture. The Scout Association shakes with the left hand. This tradition originated with the Scouts in Africa where Baden-Powell observed tribesmen shaking with the left hand being a gesture of trust; the shield being carried in the left hand, you had to put your shield down, indicating your trust for the other guy, in order to greet him. (While the Western custom of shaking with the right indicated you weren't carrying anything in your
* an Earth-like planet orbiting in the habitable zone of Proxima Centauri, the closest star to the Sun, that was discovered in August 2016. However, this planet would suffer from flares, similar to 186f and 438b.
* An Earthly Knight by Janet McNaughton explicitly mentions that Jeanette is a head shorter than Tam Lin.
* "An Earth Without People" that addressed how likely this trope would be.
* An Easter egg at the end of "Summer Short Shorts" has Puppet Homestar telling "Very Very Little Girl" to "take it away!" Since Very Very Little Girl is just a baby, she just lies in her crib while crickets are heard.

* An Easter egg at the end of the email "pizza joint" has Strong Sad criticizing the email in his "Review Revue".
* An Easter egg in "Meet Marshie" has a guy rambling "Fluffy Puff Marshmallows and Marshmallow Mayonnaise. Each sold separately. Comes with everything you see here. Batteries not included.
* An Eastern European cartoon from the 70s has a despondent man repeatedly trying and failing to kill himself. Then a man with a gun holds him up and, terrified, he hands over his wallet, watch, clothes, everything... and ends up overjoyed that he's still alive.
* An Eastern European film taking place in an unnamed state had a communist functionary being reassigned. She thinks she's been promoted, but instead ends up in a frozen rat-infested hovel with an old man who says only, "They sent you here, so you could think about why they sent you here."
* A neat little skit set in a library, with Miss Piggy, Fozzie, Gonzo, and company playing it by coughing, rustling papers, tapping pencils, etc., and a librarian trying to shush them.
* An eBay advertisement once involved satisfied customers explaining what they used eBay for, edited together in this manner.
* Anebriate's answer to people who ask him what it's like being the "greatest warrior in the universe" in
* Anecdotal accounts of dreams suggests that the parts of our brain in charge of three dimensional space and short-term memory don't work all that well when we're asleep, resulting in passages to nowhere, doors that weren't there before (or the
* Anecdote of Error, and Atshi’s hopelessness with magic only makes it worse.
* Anecdote of Error, and it’s a miracle that no one gets seriously injured.
* Anecdote of Error. As far as Talshko and Yensha were concerned, she had just committed treason out of naïve sentimentality.
* Anecdote of Error, Atshi had never seen a bunk bed before enrolling at boarding school. Her eyes go wide, and she claims the top bunk because she wants to be like a bird.
* Anecdote of Error: Luntsha’s boyfriend Ikal has been mentioned a couple times, but has not appeared in person yet.
* Anecdote of Error, people believe his victims deserved it, which completely disgusts Yensha when she hears this.
* Anecdote of Error, she suggests that Shimei might have some Alemi ancestry, knowing that this will piss her off because their country is at war with Alemi. Then when Shimei retorts that she is purely Gahadelian, Nishkose asks if she’s inbred, to Shimei’s annoyance. Then she accuses Shimei of having a crush on Luntsha, since Shimei was going to ask her for advice.
* Anecdote of Error starts off as a cute story about a girl at a magic school. Then the oppressive caste system is revealed, and the ghastly dismemberments, and the women forced into domestic servitude, and the brutal war that’s been waging for years between two sides that are both guilty of war crimes.
* Anecdote of Error: Whenever Atshi reveals part of her backstory, it’s illustrated the way she draws her own doodles.
* Anecdotes about the show state there was originally supposed to be more of this interaction but for Serling's extreme discomfort when interacting with anyone on-camera.
* a necessary part of life, because hey, may as well get it all done at once right? Needless to say, worship of Rymrgand isn't met with much more acceptance than Skaen worship.
* A necessary part of live action movies that feature actors who are clearly not trained athletes. In the final scene of
* An Echo in the Bone, Jamie is fed up with the problems caused by his rigid ring finger on that hand, such that when the tip is severed and his hand further mangled by a sword blow at the Battle of Saratoga, he has Claire amputate the offending digit entirely.
* A Necklace of Strangulation chokes to death anyone who puts it on. It sounds like a horrible item to find. No one says you have to wear it. No one says you

can't, say, bribe an enemy with it. Oops. There are many similarly wicked items enterprising players can abuse.
* An Economy Is YouAll stores in a city are centered around selling things you in particular will need.
* An Economy Is You: All stores in a videogame city are centered around selling things you, in particular, will need, because no one likes wasting money on unnecessary items.
* An Eddie Lawrence routine, "Abner The Baseball," was turned into a two-reeler cartoon by Paramount in 1963. It was about the baseball that Mickey Mantle hit for the longest home run a ball had ever travelled and as such was enshrined in the Baseball Hall Of Fame. (The eponymous sphere was obviously named for Abner Doubleday, the man credited for creating the sport.)
* An editiorial about if film makers should stop making movies in the found footage style.
* An editorial cartoon had a father telling his kids a campfire story that ended with "...and we sat on the runway for hours with only peanuts to eat!" (dramatic hand gesture)
* An editor of the site will often introduce themselves as "This Troper". This is frowned upon for examples. So are
* An editor on Cracked.com mentioned that while red foxes are cute, their calls are
* Ane Doki. They never do it, but there were plenty of situations where it could have happened.
* An educational animation series was written by TV Ontario and describes the concept of Electronegativity in one episode. The animation per one atom as a small baby carrying to electrons, and another atom as a larger child that pulls the two electrons from the baby. The scene extends to a third atom personified as larger who then takes the electrons. Upon return to the scene, the second atom is held at arm's length, with the first atom crying as if the electrons will never be rightfully returned.
* An educational short titled "Bodycare and Grooming" inspired the quip, "Body Care! And Grooming! They're cops!"
* An Education would convince white homeowners into selling their homes at a loss to them by implying that black people or other racial minorities would move into the neighborhood and cause property prices to plummet.
* A needle scratch interrupts the opening credits of an episode when the newspaper
* Aneen are bipedal pack animals twice as tall as the average human, used as pack and riding animals and as meat producers.
* An eerie variation occurs in Robert Smythe Hichen's classic horror story "How Love Came to Professor Guildea". Among other hints of a growing supernatural presence, the professor's parrot begins to twitch and move in increasingly unnatural ways, and babbling in a low, grotesque voice. It turns out that the parrot is mimicking something the human characters can't perceive...
* , a nefarious possible-alien who kills a man, and the man's nephew goes after him.
* An effective way to keep protected from infected people, most of whom show no symptoms and are unaware they're infected, is to remain in a car, which is an enclosed space. As a result, the
* an effect looks terrible—towards the end when Daredevil awkwardly leaps upwards between two buildings onto a roof—and tells the audience to look away for thirty seconds and then come back.
* an egg onto his head, which quickly hatches three little critters that cut ahead of him in line.
* A negotiation between Halfdan and Thors' village almost becomes violent when Ari and one of Halfdan's men are revealed to have a blood feud. Rather than let things turn violent Halfdan punishes his follower for dishonouring him.
* "An egotist is a person of low taste — more interested in himself than in me." — Ambrose Bierce
* An Egyptian In Scotland can withstand their own. They learn from the setback and

adjust their tactics to compensate, inventing the hinged phalanx in the process.
* An Egyptian mummy is unearthed. No one can figure out who it is, so the archaeologists invited three KGB specialists. They ask everyone to leave the room and roll up their sleeves. Not long after that, they leave the room, while wiping sweat off their brow. They tell the archaeologists that the mummy is Amenhotep XXIII. When asked how they managed to ascertain that, they answer, "The bastard confessed!"
* An Egyptian Pharaoh protested that the ability to write things down would inevitably result in his subjects' memories atrophying from disuse.
* A neighbour came to the gate of Mulla Nasreddin's yard. The Mulla went to meet him outside. "Would you mind, Mulla," the neighbour asked, "lending me your donkey today? I have some goods to transport to the next town." Having heard that that particular man was occasionally rather harsh with his own donkeys, the Mulla didn't feel inclined to lend out the animal to that him, however. So, not to seem rude, he answered: "I'm sorry, but I've already lent him to somebody else." All of a sudden the donkey could be heard braying loudly behind the wall of the yard. "But Mulla," the neighbour exclaimed. "I can hear it behind that wall!" "Who do you believe," the Mulla replied indignantly. "The donkey or your Mulla?"
* An eighth Freakie that never came to fruition, the aristocratic Nifty Nifty, was set to be based on Mary Wells Lawrence, the Wells Rich Greene founding president and chairman.
* An eight-year-old boy died after eating Pixy Stix that had been laced with cyanide; however, it turned out that the poisoned candy had been planted in his trick-or-treat bag by his own father, who
* an eight-year-old Harry asks Hermione to marry him. When she says they're too young, he states that he'll keep asking every year until she decides they're old enough.
* Ane Kurabe, Shun finds himself being pursued by his four childhood friends - Rio the athlete, Miku the cook, Nana the nerd, and Yuri the student president.
* An elaborate magic trick sometimes performed where the magician's assistant will be run through with a large 12"+ diameter drill. The drill is removed and they're fine! Averted
* an elaborate surprise birthday party, the marriage is stated to have been real.
* an elderly, bearded man. In fact, Moses was the only prophet He allowed to see Him in person and specifically said not to look at His face because it would be too much for Moses to withstand.
* An elderly couple in their sixties were celebrating their wedding anniversary when a genie appeared and granted them one wish each. The wife asked to be able to travel around the world, and the genie granted this wish nicely by giving her plane tickets. The husband then asked to have a wife 30 years younger than him, and the genie made him 90 years old.
* An elderly man in Florida had owned a large farm for years. He had a large pond in the back, fixed up nice; picnic tables, horseshoe courts, and some orange and peach trees. The pond was ideal for swimming, although he rarely did that anymore. One evening he decided to go down to the pond, as he hadn't been there for a while, and look it over. He grabbed a five-gallon bucket with which to bring back some fruit. As he neared the pond, he heard voices shouting and laughing with glee. As he came closer he saw it was a bunch of young women skinny-dipping in his pond. He made the women aware of his presence and they all went to the deep end. One of the women shouted to him, "We're not coming out until you leave!" The old man frowned, "I didn't come down here to watch you ladies swim naked or to make you get out of the pond naked..." holding the bucket up he said, "...I'm here to feed the alligator."
* An elderly soldier who lives in a care home in "Snakes" kills a telemarketer who had been taking advantage of an elderly neighbour of his with Alzheimer's by calling her repeatedly and selling her stuff, knowing she had forgotten the last call.
* An elderly woman berates her husband for using her freshly-bake cake as bait in this arrangement.. in an attempt to trap neighborhood kids.

* An Elder Scrolls Legend: Battlespire. When asking a Scamp where it hid the key:
* An electron beam that could be considered close to a lightning gun — which would make every functioning vacuum tube in existence a little lightning factory. It
* An electronics store called "Crazy Gideon's" in the Los Angeles area had some interesting ads, usually featuring policemen and/or doctors trying to take him away. His catch phrase was "He may be crazy but he's not stupid!".
* An electronic version of this: after the AI Wintermute merges with
* An Elegy for the Still-living archetype, sort of a universal soul of all tricksters. From the same work, Masoch behaves rather like an anthropomorphic personification of death.
* An Elegy for the Still-living: Begins halfway through the first chapter and stays until the end. Environments change in ways tied only the logic of emotions. Characters appear out of nowhere. Buildings talk, giraffes dance and no one bats an eye.
* An Elegy for the Still-living, hallucinogenic perfumes, characters from Arthurian legend, reincarnation, and more!
* An Elegy for the Still-living is in many ways a story about stories. The author interferes in the plot a couple times, and the characters show signs of awareness that they are fictional. The main character eventually finds a copy of the manuscript and freaks out. He tries to fight doing what it says, but he can't help himself.
* An Elegy for the Still-living Jeremy Reinertson appears briefly to retrieve an umbrella, tell Francis a story, and generally wreak havoc with the fourth wall.
* An Elegy for the Still-living, the main character spends a few minutes walking down a forest path before realising he is seeing the same scenery looping over and over again. Also, this passage:
* An elementary school created and distributed customized pencils for their students to use. The pencils were emblazoned with the words, "It's Not Cool to Do Drugs." This lasted until a student pointed out that, as the pencils are sharpened, they begin to read "Cool to Do Drugs," and then later, "Do Drugs." and finally, "Drugs."
* An elementary school teacher in the old Soviet Union wanted to teach her pupils that it was bad to steal from the state-owned enterprises. Every child described with glee the things their parents stole- until one child burst out crying because his parents didn't bring home any pilfered goods. His classmates clustered around him and hugged him, assuring him that they would share their loot. An inspiring lesson, but possibly not the one the teacher hoped to make.
* An elephant does one in the ending of "I Just Can't Wait to be King" in
* An elephant gets ready to fight a human in a bar. His friend pushes him back, saying:
* An Elephant Makes Love to a Pig" when they are talking to Pip at the cafeteria. To be fair, this is a scene that was not used in the version of "Cartman Gets An Anal Probe" that aired on television. However, given that CGAAP is (to this day) the only episode of South Park to actually be made with construction paper, the difference in animation between this scene and the remainder of "An Elephant Makes Love To A Pig" is pretty jarring.
* An elephant's trunk functions very much like a tentacle in its muscle mechanics, and can be quite a dangerous weapon. It also makes for a very effective extra limb, and even a gentle shove using it is enough to knock a flimsy human to the ground, as this tourist who was dumb enough
* an elevator that finally goes up, but is blocked by boxes of explosives.
* An eleven year old Blaise Pascal ends up becoming a ward of Grantvile and becomes a frequent source of headaches as he attempts insanely dangerous experiments.
* An elf called Salvanas, who can be found in a bar, is a minor character whose only function is to hit on every female party member that talks to him (except Imoen, who was added at the last moment). Salvanas flirts so blatantly shamelessly that he's inevitably angrily rejected. The only one interested is a temporary

female Edwina—but after Salvanas's verbal slip she gets angry and kills the poor elf. If a female player character chooses
* An Elf's Lament of Draco, Dumbledore and Santa Claus in a threesome and wonders if he can bleach his own brain.
* an elite division of the Osean Military known as the LRSSG (Long Range Strategic Strike Group).
* An elite Massachusetts boarding school went for over 200 years by the name of "
* an elite squad of Fire Nation archers. They are tasked with hunting down and capturing Aang, a task they actually succeed in. Despite this, they are never seen again.
* an elite unit of Brotherhood of Steel paladins joining you in the first stages, the Boomers shelling the other side with howitzers and flying a bomber over the battlefield, the Enclave remnants taking to the battlefield, the Great Khans throwing their lot in if you didn't convince them to leave the Mojave
* Anelog probably only saw her as a sister figure instead of the pretty girl next door.
* An Elsa pairing that started turning up is Elsa and Mister Freeze (
* an elven archwizard gets flanked by two former humans turned bloodthirsty vampires, one of whom has embraced monsterhood pyromania entirely and is too stupid to be a serious threat, while the other pulls out a revolver
* an elven, usually whenever their travelling party stops at an inn. It's understood that their arrangement is strictly business; not that Bobo's complaining.
* An embarrassed customer on a tampon run brings a box of Tampax tampons to the checkout counter. There is no price on the box, so the checkout clerk shouts out, "PRICE CHECK ON TAMPAX!" Another clerk miss-hears this as "thumbtacks" and replies, "YOU MEAN THE KIND YOU PUSH IN WITH YOUR FINGER, OR THE KIND YOU POUND IN WITH A HAMMER?" This so embarrasses the customer that he runs out of the store without his purchase.
* An Ember in the Ashes: Is it any coincidence that the Nightbringer is the greatest threat to the Scholar nation?
* An Ember in the Ashes life if Helene pledges herself to anyone who becomes the next Emperor.
* An Ember in the Ashes to interfere with the Trials and to assassinate the current Emperor.
* an embryo in Aeryn's womb. The kid doesn't even have a brain yet. Give it a break.
* An Emerald Nuts commercial featured an "Evil Navigator" who spun his head a full 360 degrees before eating an Emerald Nuts pistachio.
* An Emerald Unearthed does not give two fucks about anyone other than himself. Killing is as natural as breathing to him. He’d kill his subordinates, rivals, and people’s loved ones. When she thinks Emerald died when she messed up a jump from a window, he doesn't seem particularly perturbed by it. And he won’t even acknowledge why Emerald might have a problem working with him after killing her parents.
* An Emerald Unearthed takes a man's wedding ring for being a Jerkass and noticing that the girl he was with wasn't into him. After that, she goes to where he's proposing to him and uses her Semblance to make him think he still has it, making him look like a fool.
* An Emergence of Green) as well as mysteries and science fiction with lesbian relationships.
* An Emergence Of Green, attraction becomes evident while one woman is teaching the other to swim.
* An emergency tracheotomy performed by a non-professional is a key plot event in
* Anemone is one of the only characters who seems to know about the mysterious woman who grants powers to the
* an emotionless stare combined with very quiet and flat speech, though the last is also used for moments of helplessness.
* An Empire of Ice and Fire Dolgren Hill and tossing him out a window to his death.

* An Empire of Ice and Fire that this was done to help deal with the memory of the much despised finale.
* An Empire of Ice and Fire: The Golden Company makes use of them, as per canon. During the Battle of Winterfell, they supplement their regular elephants with mammoths from North of the Wall.
* An Empire of Ice and Fire uses a major battle to close out each of its major storylines:
* An Empire of Ice and Fire with this mentality. They know that if they fail to defeat the Night King at this point, there'll be nothing left to stop the Army of the Dead from overrunning all of Westeros. Therefore they all acknowledge that there's no option to retreat this time — win or lose, their war ends here.
* an empire that covered a quarter of the globe (as well as the world's oceans), across so many lines of longitude that famously "the sun never set" on their Empire. The British Colonial Empire actually has the Genghis' empire beat for the title of largest empire in history, although it wasn't created by a single conqueror.
* An employee at Robotoki's office pushed a button because he was apparently curious about what it did. It was the studio's panic button;
* An EMP problem ensued in an episode of the short-lived alien invasion drama
* an empty gesture. Lord Renly Baratheon is his true sweetheart, but Loras obviously cannot offer his favour to another man in a homophobic society, so he simply hands the rose to the young lady who happens to be seated the closest to Renly in the stands.
* an empty room with a light turning on and off 'Let there be light!'"
* Anencephaly, when a child is born with no brain, only a brain stem. A disturbingly common birth disorder. About half are stillbirths. Most of the rest survive a few hours or days. However,
* An enchanted double edged battleaxe is the favorite weapon and insignia of the villain Skurge the Executioner. It's capable of opening portals throughout space.
* An Encounter and an Offer has a fae boy being exiled from the fae realms. Why is not revealed: the fae refuses to explain, and would rather die than tell.
* An Encounter and an Offer has the fae banishing a young boy and stripping him of his name, leaving him to the mercies of the humans. It also appears, in implications, that the fae are duplicitous, arrogant, cunning and dangerous.
* An encounter in the Item World has the player ending up in a bonus room full of cockatrices to initiate a fight. The cockatrice the player talks to claims to wet his feathers in surprise.
* An encounter in the residential area has a character get his head knocked off by a passing truck. The head starts
* An encounter with the Entrepreneur of Sensory Shapeshifting with Purpose of Infiltrationary Actions.
* An endgame sidequest involves playing a sound generated by the unstoppable entropic force that will come to devour the world. You can use this sound to improve a piece of rave music - using sidechain compression, a production technique that makes the sound feel like it's being 'pushed' into the background by the beats. This is symbolism for how the young people use dance music to
* An end to a rather strangely named ARG has this happen to a former shadow government official/cultist turned power-hungry God. Thanks to the players, another, more powerful and more moral God throws him into a dark cellar, and blasts "Time After Time" by Cyndi Lauper and the covered versions over and over. He really,
* An enemy agent injects herself with a sizable amount of ricin so that she will not talk. That's all well and good, as ricin has no antidote...but it also takes
* an energy source. At the height of their civilization Ancients could power their ZPM factories with energy available from elsewhere, most likely inefficient but plentiful source (like charging your hi-tech Li-ion accumulator from the solar panel). Now that their facilities are mostly destroyed and the city is strapped for energy in the first place...
* An enforced example had a bunch of one second long videos put on

johnoliversecstapes.com.
* An enforced example of this is during a WWE Raw in 2009 that was forced to move to the Staples Center after its original venue for the show, Denver's Pepsi Center, was rendered unavailable due to the Nuggets making the NBA playoffs and having a home game scheduled on that day. At the beginning of the show, Vince McMahon ran down Stan Kroenke, the owner of the Nuggets, and he even featured a fake Kroenke whom he proceeded to beat up. The main event featured a 10-man tag team, with the face team in Lakers jerseys and the heels in Nuggets jerseys, with the faces winning in a
* An Enforcer with the Fugitive's Thick Skin can make them tankier than they already are while giving them a much-needed movement boost, with healing options to help them last longer.
* An engaged woman may toss the ring down a sewer or the drain or the toilet if she believes she's been cheated on.
* An Engineer can also tele frag by using the Eureka Effect to teleport to his Teleporter exit while an enemy is standing on it.
* An English countess organizes a horsemanship competition in a village, with the prizes kept a mystery until the end. The third-place winner gets a sports car, and the second-place winner gets a cake.
* , an English-language website which focuses on satirizing the culture of Tel Aviv, especially recently immigrated English-speaking Jews.
* An Englishman, a Frenchman, a Spaniard and a German are all waiting for a ship. Looking to kill a little time, they troop down to a local vaudeville theater. They arrive just after the show has begun and take their seats in the far back of the theater, just as a juggling act is starting. After a minute, the juggler notices the four of them in the back and calls to them "Can you four see me back there?" The Englishman, Frenchman, Spaniard and German reply "Yes." "Oui." "Sí." "Ja."
* An English professor's suicide note is considered fraudulent and a product of foul play because it contains a split infinitive. (Because English professors always follow grammatical rules, even when distraught and suicidal, and all English professors accept "don't split infinitives in English" as a rule.)
* An Englishwoman, a Frenchwoman, a Spanish woman, and a German woman are out and about when they come across a street performer surrounded by a big crowd that blocks their view. The performer stands up on a box and asks if he's more visible that way: "Yes." "Oui." "Si." "Ja." (Yes, we see ya.)
* An English writer falls in love with a Portuguese woman. They overcome their
* An enigmatic individual by the name of "Sook" was allegedly this to Truman Capote. His last words were "It's me, Buddy." Apparently, "Buddy" was Sook's nickname for him.
* an enormous supermajor caste the enemy nest with the smaller workers to weaken their defenses, before sending a final wave of the big majors and supermajors to finish the job.
* An enraged Jade comes in through the window to ambush Cat in "Crazy Ponnie".
* An enterpreneuring couple came up with a seemingly adorable idea during the campaign:
* An enterprising user has created a machine that uses enchanted armour to automatically create pathways above an endless Void in the End, an
* An entire arc started this way, with Richard lampshading how the trope usually works, and then takes a more serious turn.
* an entire army consisting of them (plus one Inquisitor), colloquially known as the "Barrel of Monkeys" army build.
* An entire audiences laugh at Kevin while singing a solo at a Christmas pageant because his older and taller brother Buzz was holding two electric chairs up to his ears and pretending to use them as drumsticks. Thinking it was a harmless prank, everyone except Kevin's parents, aunt, the piano teacher, and the conductor laughed, including the fellow children on stage, Kevin discovered Buzz humiliating him, punched him, causing the end of the play. Granted, the officious audience was probably not as harsh as perceived, to do that to someone let alone a child, is

quite sadistic and unfunny. Thankfully, it did not scar Kevin and Buzz later apologized to him (later genuinely), Kevin accepted his apology.
* an entire baseball stadium and mocked by the announcer because she's the one proposing to him.
* An entire building full of torture technicians is killed by the poor kid they were experimenting on.
* an entire civil war over the fact that each faction considers the other faction sub-Dalek in some way — or, as the Doctor's companion Ace memorably put it, they "weren't pure in their blobbiness".
* an entire conference figuratively come back from the dead. The Central Collegiate Hockey Association was founded in 1971, and established itself as one of the best NCAA conferences in that sport by the late 1980s. Things went along swimmingly until energy billionaire Terry Pegula funded the startup expenses for men's and women's teams at his alma mater of Penn State, kicking in a lavish new arena as well. This gave the Big Ten Conference six members with men's hockey teams, which was the exact number required for the conference to (1) officially sponsor that sport and (2) receive an automatic bid to the NCAA tournament. Accordingly, the Big Ten announced it would start a men's hockey league in 2013–14... which led to a massive conference realignment in that sport. When the dust cleared, the CCHA was no more. Though one of its members, Bowling Green, would keep ownership of the conference name. This proved important later in that decade, when the seven Midwestern schools among the 10 men's members of the Western Collegiate Hockey Association got tired of being in a league with two schools in Alaska and one in Alabama. Four of these seven, Bowling Green among them, had played in the final season of the CCHA. In November 2019, said schools announced they would leave the WCHA after the 2020–21 season; three months later, they officially formed a new CCHA.
* An entire corridor of Pendulums of Death stands in Hype's way in the Lost City in
* an entire court of evil vampires and monsters from beyond the universe. The most impressive aspect is the wards need to be grounded by some threshold, like the one guarding a home. Lacking one means the ward's strength is reduced greatly. So, even without that essential quality to make a good ward, he maintains one against an incredible danger.
* An entire episode is devoted to the status of beef. Actual beef (from cows), is illegal due to the environmental effects of methane emissions. However, the same episode also shows a group of high-ranking officers enjoying a roast beef lunch. The tone of the scene suggests that beef is roughly equivalent to what Cuban cigars are in the US today; technically illegal, but if you are rich and well-connected enough to get a hold of the stuff, you are rich and well-connected enough that no one will arrest you for it, and a common way of greasing the wheels of negotiation among the rich and prominent.
* An entire episode revolved around this. While trying to copy his butt, Beavis ends up
* An entire episode revolves around an assassin erasing clones from existence by using a powerful acid in his blood.
* An entire forest turned to stone is home to one of the goblin tribes in "B10: Night's Dark Terror".
* an entire generation meet him, they salute and tell him it's an honour.
* An entire hemisphere is now buried under ice and snow, which is very concerning when you remember it happens to be the hemisphere with the majority of Earth's farmland. But that's probably of minor concern when you consider that all this extra snow is going to raise the Earth's albedo: the amount of sunlight that is reflected back into space. Once ice or snow fields pass under 20 degrees latitude, you reach a critical point where so much sunlight is being reflected Earth starts becoming even colder due to lack of heat, which obviously leads to more snow, even higher albedo, eventually resulting in the whole planet freezing into a giant snowball. Guess around which latitude the Mexican border (the first patch of land not covered with ice) is. Even if that won't turn Earth into a snowball, it will

destroy most life on it thanks to huge climactic changes.
* an entire international advertising campaign based around taking the phrase "Does a bear shit in the woods?" to its logical extreme. (Apparently, the answer is "Yes, and they use Charmin toilet tissue to clean up afterwards.")
* An entire invading army can be distracted by one of your pet cats, chasing after it instead of laying siege to your fortress.
* , an entirely fake game fabricated and promoted with media from other, existing games just to raise funds for the project. Fortunately, it was exposed and the contributed funds returned.
* an entirely innocent attempt) to relate to someone he loves. In this case, the offending party (and it is usually a guy doing the tying up) probably won't be able to put together what's wrong with that situation.
* An entirely sexual version in "6,741" when Root puts her leather jacket around Sameen Shaw, who is shivering after escaping months of torture, not to mention field surgery to remove a
* An entirely straight variation, even with a Chinese factory: In 2019 an English girl was making out Christmas cards when she discovered one with a plea for help inside, along with instructions to contact an English reporter who was previously a prisoner in the same prison. The reporter investigated and says it's real, while the Chinese government says it's fake.
* An entirely visual one that's easy to overlook if you're not paying attention: during his review of
* an entire movie off of it," causing many of the restaurant's other customers, dressed in costumes, to turn around and look at her.
* An entire saga revolves around how to get onto one of these, where different types of clouds serve as both land and sea (called both "Skypiea" and "Sky Island") and the Straw Hats' adventures on it.
* An entire school of philosophy, Pessimism, insists that we live in the worst of all possible worlds. Arthur Schopenhauer is a good exemplar: he argued that the world is a kind of penal colony, in which misery and suffering greatly outweigh happiness. Some (like him) therefore argue it's better to have never been born (anti-natalism).
* An entire sequence narrated by Horton is done in the style of a colorful anime. The producers explain that this was simply for the entertainment of the children watching.
* An entire sequence of "Silvery Moon" is retraced animation from "Toy Time".
* An entire series of increasingly narrow categories in which a presidential candidate can be the first.
* An entire song by the band Luce on the subject ("In the Middle There"):
* An entire style of painting, the classical landscape, was dedicated to this. It incorporated classical, medieval, and contemporary architecture while showing biblical or historical characters.
* an entire trope focusing on non-Russian actors in the roles of Russians and occasionally other Soviet-era nationalities (i.e. Ukrainian and Georgian).
* an entire Wikipedia article devoted to its many appearances in films, television, music videos, album covers, etc.
* an entire wing, completely ignoring the stairs and the doors. Ranma's classmates even feel the tremors and think it is an earthquake.
* an entity with deep knowledge of the game world, an omnipotent dog, and and a God with powers over space itself.
* An Entrepreneur Is You: A game where you run a business of some sort.
* an entry Blue Moon's page of roving (fibers for spinning) had no entry for mawata, only a plaintive note urging eager knitters to be patient while they caught up with "overwhelming demand".
* An Entry with a Bang, a B-1B Lancer crew, faced with being unable to pull off their bombing run and being shot down if they break off, ram their bird into the Dropship of the pirates attacking Chicago and succeed in taking it out.
* An Entry with a Bang. Less than an hour later, YouTube crashed due to the sheer number of users trying to access this one video on the website.

* An Entry with a Bang Mechwarrior Brox takes a strong liking to mama jokes.
* An Entry with a Bang, the Buron Cavalry joined Vorax's expedition to "Motherload" partly because Vorax had promised harm to their dependents if they refused.
* An Entry with a Bang, the marauding pirates get this reaction when they find out that Earth has nukes and isn't afraid of using them.
* An Entry with a Bang, the pirates attacking Chicago use the plumes of their Dropship to toast a lot of infantry. The Fusion Torch project aims to use Dropship reactors in this fashion. The weapons' nickname, "Shipkiller", should tell you everything you need to know.
* An Entry with a Bang... uh, tech... are somewhat confused by the fact that while Clancy-Earth has highly effective BVR capability, their warmachines can't take hits worth a damn.
* An Entry with a Bang... uh, tech. The first prototype BearCat aerospace fighter is not mounting weapons. Both in-universe and at the writers' level, there has generally been agreement to take things slow and not do any funky stuff.
* An Entry with a Bang, when a person of Native American descent learns Motherlode has numerous tribes surviving upon it.
* An environmental group is suspected of planting a bomb on an oil drilling platform. While they turn out to have been responsible for a number of arsons, they didn't bomb the oil platform. As the leader herself points out, the bombing could have resulted in a massive environmental disaster by contaminating the ocean with a lot of oil, which is the last thing they want.
* An EPA agent pops out from behind a thin tree when the Simpsons find a screamapillar in their backyard.
* An Epic Comic, Bowser has the ability to change his dimensional appearance from events before the comic. Putting that into thought and seeing a glimpse of what he can do, how far can he go before it reaches a limit?
* An epic-level character with high ranks in Escape Artist is explicitly allowed to crawl through spaces that are smaller than his own head.
* An epic one involving San and Akeno in a bath, sounding for all the world like they're... enjoying themselves, while Nagasumi and Mawari listen outside. They were actually
* an epilogue showing Shiki and Mikiya walking together after Shiki got out of the hospital.
* an episode, 2 girls sneak into a nightclub with one of them wearing a crochet skirt. In the process, the skirt gets caught in a window and the obvious happens.
* an episode and has to realize that his world was destroyed. In the same episode, Batman is attached to the plot device in question, and realizes it almost immediately—he knows, deep down, that his father didn't beat up the mugger, but was killed by him. A tearjerker moment for both, as Superman tells his scared son good-bye as Krypton explodes and Batman is forced to relive that terrible moment again.
* An episode appropriately titled "Death Penalty: Final Appeal" had a man wrongly convicted of rape and murder executed before the detectives could clear his name. In this case, however, the detectives
* An episode begins with Wakko drinking a huge root beer float, expanding, and floating back onto his seat afterwards... then he got hiccups.
* An episode called "Action", where a fan of a comic book was sabotaging the set of a film adaptation because
* An episode centering around the prom has "Crazy Tazzy's House of Tuxes", where the already-established-as-several-kinds-of-insane Taz applies these tactics to selling formal wear, of all things. The commercial features Taz grunting, spitting, and spinning his way through cutting prices on tuxedos as Bugs Bunny and Daffy Duck chased him in white coats with butterfly nets.
* An episode centers around a firearm Starfleet was planning to use when their phasers wouldn't work. The weapon was quite versatile: The person using it could not be found by normal means, and it was modified with a microtransporter so that it could
* An episode dealing with car theft has a "false alarm" as two crooks attempt to

steal the pimped-out K.I.T.T., and quickly prove not to be the professionals Michael is looking for: They're trying to break in using a Philips-head screwdriver instead of a flat one, and
* An episode deals with three wesen who rob banks who woge (show their
* An episode depicted Arnold in search of a missing children's author who has turned extremely bitter and reclusive.
* An episode depicting an ancestor of Janeway makes an aside reference to the fact that the Ferengi consider
* An episode distinctive physical trait at the time: in Homer's case an eyepatch from an accident, in Marge's case brown hair because of a failed attempt to style it that left it burnt.
* An episode ends with the Hokage's funeral, and one of the character telling Konohamaru that he's in a better place.
* An episode entitled "The Cape and Cowl Conspiracy" centers around this trope. An interrogator named Wormwood, who specializes in using Death Traps to terrorize people into giving him information is hired to steal Batman's cape and cowl. He repeatedly sets up a number of traps for Batman, who escapes every one until the Bat finally captures him. As it turns out,
* An episode featured an elderly woman made a voodoo prediction about her own death at the hands of a "scarred man" and then died in suspicious circumstances the next day. As it turns out, she had long suspected this particular scarred man of her daughter's murder, and she faked her own murder at his hands in order to get the police to investigate him again.
* An episode featured a series of flashbacks showing Mayor Yoko giving members of the community trinkets that he claimed were magic, but were really just Magic Feathers. When the community was threatened by an impending catastrophe, Shelldon and his friends traveled to his office to try to get some of his magic, and discovered the truth.
* An episode featured Norm being hired to paint the bedroom of Rebecca's millionaire crush Evan Drake while the latter is away on a business trip. Rebecca then convinces Norm to let her tag along for her to "see where he sleeps". Unfortunately, Drake returns early leaving only enough time for Rebecca to hid in the closet, making Norm go to increasingly ludicrous attempts to make the exhausted Drake leave the room (since he would probably find Rebecca in the morning), culminating in Norm convincing Drake to help him carry out his "fantasy" of "carrying a rich man across the lawn in his pajamas".
* An episode featured Steve dating a girl who had a doll as a companion whom she believed was alive and could talk to her, and which she sets up on a date with Steve's friend Snot, who is not amused. When the girl thinks that Snot raped her doll, she goes as far as taking the doll to a hospital because she believes that it's pregnant. Eventually Steve and Snot write a suicide note and hang the doll from the ceiling fan, but she thinks the doll was murdered because it wasn't "her handwriting".
* An episode featured Thomas F. Wilson as the victim's boss. You best remember him as Biff Tannen from
* An episode featured two serial killers in the same city, one targeting middle-class white women, the other shooting hookers. The police don't even realize the second
* An episode featured virtually every sitcom-funeral trope imaginable, from the hilarious, angry, and hate-filled eulogy to Jake's Gameboy getting left in the coffin to Charlie scoring with the widow.
* An episode features a gas that paralyses people in this manner. It's used on a room full of police officers attending a dinner for Commissioner Gordon.
* An episode features an "X Days Since Last Accident" sign in the warehouse. Michael caused an accident, requiring the sign (which had a high number on it) to be reset.
* An episode features a Steve Reeves film where Hercules loses his memory and Ulysses is trying to get him to remember who he was. In the film, Ulysses gives Hercules a cup of wine and says "You're Hercules." The Bots provide the sound

effect of a spit-take.
* , an episode features brother and sister, Dominic and KC, in a very seductive dance nearly kissing. Thought, it looks like KC was possessed. However, in a later episode, Dominic stares at KC as she is sleeping and she seems to have no problem with it.
* An episode features Francis playing Commandant Spangler at pool. If Francis wins, the other cadets will beat him to a pulp because they fear if Spangler loses, he will pettily take it out on the entire school. However, Spangler threatens to punish Francis personally if he
* An episode features Janeane Garofalo as a woman who simply can't organize the bags in her kitchen, shouting, "Help me!" at the camera. The solution is "Bag Hutch," a box to put bags in. The writers had to change the name of the product because "bag box" was already the name of a product that did the exact same thing.
* An episode features Mr. Burns trying to amuse himself by shooting Smithers. The bang flag pops out to Burns' dismay, shouting, "Curses! It's jammed!" he smacks it on the side and the flag shoots out and sticks in Smithers. Burns declares it to be "hi-larious".
* An episode features Stan name his top ten favorite fictional dogs. The #1 spot belongs to Brian from
* An episode features the aptly named "Marty the Rabbit Boy and his Musical Blender" playing "The Blue Danube" on well, a blender.
* An episode features two teenage girls who got abducted, one of whom was killed. The surviving girl is in Witness Protection because her father is testifying against (and is a former member of) the Mob, and the team believes the kidnappers knew this and are trying to stop him from testifying. Turns out the
* An episode featuring Kyle Justin (who wrote and performs the theme) has him singing it at the very end, with the Nerd commenting "You bet your ass!" The episode also implies that the song was written because Justin was living behind the Nerd's couch since the start of the series, and overheard some of his reviews, incorporating them into the lyrics.
* An episode focused on a family whose tradition it was to "make wives" for their sons. They would do so by having the boy pick a girl he liked and then the whole family would abduct her and murder her parents. Aw, bonding.
* An episode focused on a spirit that was created (and maintained) by people's belief in it. Unfortunately, getting people to
* An episode focused on the death of a girl who'd been unfortunately involved in the fake kidnapping of another girl. They couldn't find the live girl and were warned that she was faking in an effort to gain attention from her father, but they had to find her to be sure.
* An episode focuses on Saiki discovering a Germanium ring that allows him to shut his telepathy off when worn, and it shows that he's so used to using his telepathy that he has a hard time walking about in public. He gets startled by his dad who opens his door rather calmly to tell him about dinner, and he dad figures he's just making fun of him given he knows his son can hear his thoughts.
* an episode for his own in which he tells about the only time someone managed to get past him and made him scared for his life. But in the end, it seems quite likely that he just made it all up with a completely straight face, just to show someone how unbelievably good he is at bluffing. Or did he?
* An episode from Fat Albert uses a made-up version (I think it "eats Cleveland"). But there really was a radio program about
* An episode from the last season had a man wearing a bomb vest that was wired to his heart rate so it would go off if he was killed. The female bounty hunter Immortal pursuing him got around it by
* An episode from various reviews of said movies, both by professional critics and random internet users, starting with backhanded compliments, then moving on to more bland statements, before finally going into ones that border on downright bizarre.
* An episode had a bank robbery hold up with Conan and his friends including Jodie trapped inside. The robbers plot was to transfer money electronically, use hostages without close friends or loved ones disguised as robbers thinking to have died in

an explosion accident, and escape as escorted hostages.
* An episode had a bet between Yemana (to stop gambling) and Harris (to stop smoking) to see who could last the longest. At the end of the episode Captain Miller matches up a blind man whose apartment keeps getting robbed with a newly-evicted man facing homelessness. That leads to this exchange:
* An episode had a clone who collected droid fingers from battles. In-universe, it was considered contraband and downright creepy.
* An episode had a news reporter who the others kept referring to as "the one with the hair". When an avalanche of rubbish pours out from the garage, the force of it knocks the reporter's wig off on live TV.
* An episode had a perfectly-conscious character who required cardioversion for atrial tachycardia telling the doctors to use a certain energy level, as he had had the problem a number of times before and 200 joules was always what fixed it before. The doctors follow procedure, shocking the patient multiple times at increasing energy levels, but 200 is still what sets his heart rate to normal.
* An episode had a variation in which the person giving the instructions was suicidal and
* An episode had Dexter identifying an STD in some bloodwork, then going into the Florida STD Database to find the names of people afflicted with that particular — and, of course, extremely rare—strain. It is implied that he never leaves the building during all of this, so Dexter's miraculous set of databases even cover what you might be doing with your genitals.
* An episode had Dolly, the protagonist, standing outside her osteopath's house whilst serenading him (badly) with a recorder. She is eventually chased off by the osteopath's cougar wife/girlfriend.
* An episode had Dorothy teaching an American History course for adults going for their
* An episode had Doug's family putting on a play to impress his sister's new boyfriend, as Judy thought they were too boring. Doug took offense to being written out of the family and cast as a butler, so he struck back by improvising his part as a secret agent trying to stop a bomb threat.
* An episode had Dr. Pulaski get a mutated virus that aged her. They used a stray hair from her brush and a transporter to restore her to a condition before she contracted the illness. In other words, if you keep a healthy DNA sample, you can restore someone to any age and cure any disease.
* An episode had Homer hosting a late-night talk show, and he finished each
* An episode had J.D. play a classic TV trivia game with his friends and girlfriend Kylie, the topic being being fat sitcom husbands and the crazy hot women that marry them.
* An episode had Miyako and Mimi growing really close, and Miyako even has a
* An episode had the sliders travel into a world where kids had taken over, and it was illegal to live too long, as low as 50 in some states.
* An episode has a gag of Brian making some comment to Peter, followed by canned laughter and applause; the two of them fidget while waiting for it to die down.
* An episode has a man believing he is haunted. There's a message written for him on the wall written in "blood". Shawn notices it's not blood, he identifies it as ketchup, and to prove it he eats some.
* An episode has a man build a teleportation device, which he uses to teleport bombs directly to the target to perform assassinations. When his hideout is discovered, he promptly teleports himself to a warehouse he owns, only to be half-embedded in some shelves, which had been moved when the feds raided the place earlier. Realizing he is pretty much dead, he chooses to destroy his creation to prevent it from falling into the Taelon hands. He does this by teleporting to the same exact location. According to Augur, this will create an anti-matter explosion.
* An episode has a man seemingly framed for murder and on the run with a young woman who also ends up dead. The first "murder" turns out to be faked as part of a huge live-action role-playing game the man's brother was playing to get him out of a funk. The man's wife found the "mistress" (who he never actually slept with) with her husband in bed and, getting the wrong idea, killed her.

* An episode has a member of a post-human-extinction android society trying to resurrect the species through cloning. One of its comrades eventually betrays it, having concluded that the best way to serve the human race is to prevent the species' greatest threat: the existence of the human race.
* An episode has an off-hand reference to the "Tennessee Logjam", which apparently requires three men, one woman, and a ladder.
* An episode has a police sketch artist draw the boys in a very realistic manner, completely different from the animation style of the show itself. Kyle's mom says the sketches are a bit off.
* An episode has Doctor Zin's wife claim that she thought she was his beard. This was because after many tries to have a son their marriage eventually became sexless until they discovered she was barren.
* An episode has Frasier prompt this line from Niles after repeatedly yelling "If I were,
* An episode has Fred forced to attend classes in high school and it's a struggle. However, he's a whiz in the local geology course, which he notes he learned the hard way considering he works in a quarry.
* An episode has Fred riding on top of Wilma during a surfing contest.
* An episode has Garfield at war with a pizza delivery service which kept
* An episode has Hank bring his old football coach in to teach Bobby's football team. He has them do push-ups in the mud... that he makes with a hose. Any and all injuries, pain, complaints, etc. are responded to with "take a salt tablet". Eventually, he starts going
* An episode has Homer go to college to attain his degree in nuclear physics (because he works at a nuclear power plant, people — it just makes sense). The joke is that he keeps on expecting college life to be like a
* An episode has Jack waking up after a wild party, finding Mr. Roper
* An episode has Lilith Crane tangling with Frasier's first wife, children's entertainer Nanny Gee (
* An episode has machines start acting on their own and killing people. Turns out
* An episode has Malcolm's parents be the former while Stevie's parents are the latter. By the end, the latter couple become the ones bickering through the former couple's influences.
* An episode has Mr. Burns order a subordinate that a package must absolutely be mailed today. A Delegation Relay ensues, ultimately ending at Homer, who promptly runs the package back to Mr. Burns's office, who angrily tells Homer that
* An episode has Patsy get a facial peel to stop the tabloids from overestimating (
* An episode has Peters lose his memory. Lois tries to jog his memory without result. When she catches him peeking in on her while changing, she assures him it's alright since they are married.
* An episode has Phil giving Vivian a foot massage as they sit on the couch and hum
* An episode has poker novice Frank Burns sitting in on a game, getting plastered and winning hand after hand through sheer dumb luck.
* An episode has recurring character Sideshow Bob attempting to rig the election for Mayor of Springfield by including the names of dead people and animals as those who voted for him. When Lisa's cat Snowball appears on the list, she angrily declares that "
* An episode has Roseanne and Dan preparing to give this talk to Becky, then discovering that Darlene actually needs it more.
* An episode has Sabrina getting hit with an airhead virus that turns her into the stereotypical dumb blonde.
* An episode has Sayid and Shannon trying to translate maps that they've found from the French woman. Shannon recognizes the lyrics as a song she heard while in France, and starts singing the French original of Bobby Darin's "Beyond The Sea".
* An episode has Spencer hiring a film involving a goat and a balloon in order to impress a hot foreign girl.
* An episode has the characters deal with an awakened mummy, which turned out to

be a Hyperian. Frank the Pug was brought in as their resident Egyptologist. Him and Jeebs end up opening a portal to Hyper. They see pyramids everywhere, and all the Hyperians dress in Ancient Egyptian fashions and worship dogs (specifically, pugs). Frank ends up temporarily being their god, until Jeebs takes off Frank's dogsuit.
* An episode has the dead ancestors of the cast of "US Acres". Someone shouted, "Ghost!" and Not-Wade does the "Where? Where?"
* An episode has the detectives trying to deduce who planted a bomb that killed a married couple by interviewing the friends who had visited them the weekend before. It soon became obvious that the supposedly dead wife was in fact alive and pretending to be one of the friends in question (they bore a strong resemblance to each other)—it was the friend who died in the blast along with the husband—when one of the other friends mentioned hearing the wife say something very similar to what the woman had told them.
* An episode has the entire cast succumbing one by one to a virus which causes them to speak this way. At first it's just funny, until they can no longer run the station properly due to being unable to communicate with each other, and it's also revealed that the virus is potentially deadly.
* An episode has the Gromble giving a lesson on how monsters have shaped human history, like Krumm's dad Horvak
* An episode has the hosts Henry and June as astronauts in spacesuits. Henry commented that he needed to use the bathroom and June asks why he doesn't just do what she did: Use her spacesuit like a real astronaut. June runs off embarrassed when Henry informs her that they aren't wearing real spacesuits, merely cheap Halloween costumes.
* An episode has the police x-raying the kids Halloween candy and finding
* An episode has the team looking for a firebreathing monster. Of course they split up. It takes Wheeler and Linka all of ten seconds to completely abandon the mission and move in for a kiss...
* An episode has this as the underlying motive for the entire country (world?) and its obsession with celebrity. It's gonna be a good harvest, indeed.
* An episode has Tuvok going down to 20th-century Los Angeles. How does he hide his ears? With a
* An episode has Zelda refuse to have sex with Link after saving her from Gannon. So Link says to his hand, "Then I will save you, my princess."
* An episode has Zeta bringing a sandwich from Terry to an imprisoned Max, monotonously calling it "your fav."
* An episode in season 7 has the drones and Malory hear Archer calling them for help, but Malory refuses to send anyone out as she anticipates another voicemail hoax, despite the gunfire heard. They are all shocked when they finally discover that the call was real and was still going on.
* An episode in season three involves a murderer who was inspired by a recently-published book. One of the three protagonists for the episode is a reporter who wrote a well-researched article on the case, only to have it replaced by a highly sensationalized article that her boss did no research on and published under her name. The reporter sends her boss to Hell for destroying her reputation and livelihood as journalist.
* An episode in the Ben Stone era features an African clan leader, whose drug-trafficking resulted in a few deaths and was thus charged with
* An episode involved a few of the British reverse-V variant; it was described to prospective Japanese buyers of the store as the British Workers' Salute.
* An episode involved a man who killed his wife while she was taking a bath (he pressed her head underwater until she drowned), then made it look like an accident.
* An episode involves Data's relationship with a boy of about 10 or 11, who idolizes him for saving his life.
* An episode involves the family having bought too much stuff at Rainer Wolfcastle's garage sale to fit in the car along with all of them. Homer declares "This is what all those hours of playing
* An episode involving virtual reality has Jimmy Olsen advise Superman on how to catch the bad guys in the virtual world.

* An episode in which the cast visits Puerto Rico had them sing it in Spanish. The song has been performed several times on the show, due to TV broadcasts in the United States coming under compulsory licensing standards. They just don't have the rights to release it on home video.
* An episode is dedicated to this trope when Barney's brother expresses a dislike of his girlfriend Nora because she, in his opinion, reminds him too much of their mother. Later on in the episode, Ted, Robin, Marshall, and Lily all realize that their dates and partners remind each of them of one of their parents and get
* An episode makes a joke using this where, during a feminist speech by Lois, Marge appears in a pop-up ad for
* An episode near the show's finale (when the Nazis are becoming increasingly worried at the possibility of an Allied invasion) had General Von Klinkenhoffen provide Gruber and the Colonel with "suicide teeth", ridiculous-looking dentures that served the same function when bitten down hard. Those didn't work either.
* An episode of an Australian news parody show (the name escapes currently) had one short about a man who refused to sign a chain email that said, 'if you don't pass this on, a little boy will die'. He ignored it. The boy died, and the man is being held accountable for manslaughter.
* an episode of a show where the plot can be considered an excuse to put the cast in period costumes). "The costumer took great pride in supplying quality costumes to his customers".
* An episode of deals with Terry fighting a group of teenagers who were spliced with animal DNA to take on certain animal traits. Other splicers are seen throughout the series.
* An episode of Family Guy has Peter becoming a jerk after plastic surgery turns him into one of the beautiful people,
* An episode of had a trio of medical students sell discarded organs on the black market. Major Motoko Kusanagi later threatens to sell their currently-in-use organs on the black market to
* An episode of has a grade school principal wearing such a toupee as a plaintiff. The defendant is a disgruntled prodigy student who programmed the school gym's scoreboard to publicly announce that the principal wore a toupee. Upon hearing this, nobody in the courtroom could keep a straight face.
* An episode of has Benson and Stabler investigating a child rape case. They track down one convicted sex offender, only to have him drop his pants. Turns out he had himself voluntarily castrated rather than risk prison again.
* An episode of has Charles using this as a ploy to yank Col. Flagg's chain. Hawkeye is accused of being a traitor by an infirm colonel for giving priority to a wounded North Korean soldier. Col. Flagg arrives and retrieves a notice which Charles happens to notice first. The notice tells of a meeting in the Swamp with Hawkeye, Col. Potter and two Korean officials. Col. Flagg bursts through the meeting, thinking a plan is afoot for North Korea to overtake South Korea and that Hawkeye and Potter are in cahoots ("Caramba! The fish stinks from the head down!"). It turns out to be a poker game, and the two Koreans happen to be the Mayor and Chief of Police of Panmunjam. Charles conveniently now recalls who the two Koreans are and embarrasses Flagg.
* '' An episode of Pokémon the Series: XY hints that the Pokémon world is either a few decades out of sync with our world, or they use a different calendar. Regardless of which is true, the year in the anime is implied to be 1958 or possibly later.
* An episode of revealed that laughter (or, perhaps more correctly, the Power Of Fandom) helped cartoon characters stay young.
* An episode of SVU had the detectives realizing that their murder victim was in fact
* An episode of the 1980s Ruby-Spears cartoon "Dingbat and the Creeps" had the title characters dealing with an
* An episode of the British show featured a duet which host Clive Anderson called
* An episode of the "Fast Forward" season has Splinter taking it to the extreme, tipping Mikey's chair over so he could hit him

* An episode of the Japanese Hidechan Radio podcast featured several voice actors from
* An episode of the original Hawaii 5-0 had a killer family coming to Hawaii. They are generally presented as dumb, inbred Southern hillbilly types (Slim Pickens was the patriarch). When they are caught, the old lady of the group calmly explains they weren't thieves because they only took money and valuables from people they already killed, who didn't need it any more. It also wasn't murder because their victims "weren't kin".
* An episode of the (possibly) defunct webcomic Isometric features Dangerman fending off a comically inferior alien invasion. It is noted that these aliens do not natively understand the concept of detecting vibrational energy (what we call "sound"), have a visible spectrum that stops just short of "ultra-red" and "infra-violet" (Dangerman is perplexed by the "invisible assassin" and his bright glowing red "stealth" outfit), are apparently highly vulnerable to banana cream (said assassin's dying attack is to throw such a pie at Dangerman, to no effect), and lack the ability to jump (thus parking their craft six feet off the ground, allowing easy access). None of this seemed to be a problem before; they just picked the wrong planet to invade this time, is all.
* An episode of the TV series, "Dunce Upon A Time", has Cuddles hiding
* An episode of the TV show, "Recess is Cancelled," actually invalidated Benedict's belief that getting rid of recess would improve test scores. While he's right to be concerned about said scores, it was shown getting rid of recess altogether would rob children of a much needed break between classes. Without that time or space to relax and being subjected to the monotony of work and testing day in and day out, it would not only rob the kids of energy and enthusiasm but causes their test scores to
* An episode of where the Defiant was hit with a warhead, and Quark and a Gamma Quadrant merchant are stuck right next to it. It turns out the merchant sold that kind of warhead to the Defiant's attackers, but it was designed to go off on impact. Quark jokes that they deserve a refund. To a Ferengi, that would be almost a sin, but considering they were that close to death, he and the merchant burst into laughter. The merchant also prided himself on only selling
* An episode opens with Col. Potter and Father Mulcahy together in the mess tent:
* An episode plays the trope for a different kind of comedy. After her son was spotted when he tried to spy on some skinny-dipping girls, his mother decides he's old enough for The Talk... and, being a medical doctor, proceeds to read from a textbook on the subject. For hours, apparently. He's bored stiff
* an episode racist, in fact, that he apparently didn't catch that "before it's too late" was a dog-whistle phrase until it had already become the campaign's main slogan.
* An episode revolves around Courtney Gripling taking a high-school French class. She wants to get closer with an older boy who she has a crush on but doesn't want to look too young, and her breasts make this obvious (she is 12 years old at the time). She stuffs her breasts to make herself look older.
* an episode, Ross gives his perspective on the story. That train of thought came from hearing Kevin talk about his fear of bugs while he was feeling super sleepy.
* An episode's cutaway gag had him ask certain people in the line-up to step forward, then act out various improv acting scenarios "Ok, pretend like you haven't seen Number 3 in a while and are really glad to see him!"
* An episode set in the Stone Age had cutaways to the show's creators in deliberately choppy photoanimation explaining what was going on.
* An episode shows McGee doing something stereotypically feminine (a running gag), and Ducky assuring him that "there is nothing homosexual about doing that. Er...
* An episode, since Bigfoot pictures are so common that are worthless. As Jon walks away, lamenting on his failed photographer career, Elvis asks him what time it us... and only after he goes do Jon and his pets realise who it was.
* An episode starts with Sheldon wanting to ask a question regarding
* An episode subverted this trope with Ivanova, who did not want to have sex with an alien diplomat whose species uses the act to finalize business negotiations.

Because the alien actually had no idea how humans mated, she she managed to trick him into thinking that a firm handshake and a weird dance was the human way to
* an episode. The ad mercilessly poked fun at homosexual stereotypes, then, at the end, said the ad was run past "two fags and a queer" to make sure it wasn't offensive.
* an episode, the smooth-talking Barney carefully lays out to Marshall how to get away with not cleaning the dishes for his wife. Sure enough, Barney's well-thought out lines become garbled and only succeed in making Marshall's wife hate him for an episode.
* an episode to get audiences interested in playing a narrative about a romance that they didn't start, or maintaining one that's gone south.
* An episode uses a sinister variation of the trope. Two visitors from out of town come across South Park, but find it devoid of adults because the kids had the vast majority falsely arrested for "molestering" them and the remaining adults moved away for fear of being arrested. Run by kids, the town has fractured into two units; the area now known as Treasure Cove is apparently led by Stan and occupies the poor side of town, whereas Cartman has seized control of the wealthy side of town and renamed it Smiley Town. Aside from the fact Cartman as dictator is scary enough (add to that the fact only one phone has survived in the entirety of South Park, effectively cutting off communication with the outside world), both sides have an agreement where they essentially play
* An episode was centered around the Girly Rangers. It was implied that they violently attack anyone who doesn't buy their "Chocolate-Covered Ninja Star Cookies". Dib eventually ends up with half a dozen of the cookies embedded in the back of his abnormally large head (
* An episode where Alex shrinks herself and a little girl thinks she's an actual doll and plays with her.
* An episode where Elliot assumes this about a man who says his wife is "not with us" and is obviously showing interest. Turns out she just wasn't there that day, and Elliot spends the rest of the episode running from the man's angry wife.
* An episode where Muriel gets sucked into a computer, and when Courage goes in to save her, the first segment of the computer world has Courage animated in CGI.
* An episode where Reed, a blogger, tried to get Mac to give information on the
* an episode where when everyone fails to notice for ages that they're on a planet of two-headed aliens and all the statues have one head, when the Doctor declares that it's either a perception filter, or they're just all idiots.
* An episode which took the form of a news report on the station had a "commercial" for the Psi Corps. During the commercial, the message "The Corps is your friend, trust Psi Corps" was flashed on the screen.
* An episode, which was the very least of what could’ve happened to them according to the officer interviewed.
* An episode with this trope title has the girls decide to adopt identities based on the superheroes in their favorite comics. Blossom becomes
* , an EP of dark ambient and noise music featuring many drones, released for free under Creative Commons.
* A nerd summons a demon and wishes to have sex with hot devil girls. The demon tells him that as a punishment,
* A Nerf gun called the "Secret Shot" had a second barrel in the handle, so you could shoot your opponent as you pretended to surrender.
* A Nero Wolfe Mystery played with, or possibly completely inverted, this trope: The supporting cast stayed mostly the same from episode to episode, but except for a small core cast the actors played different roles in different stories — so while you can nearly always recognize "the guy" (or "the gal"), it's of no use to you in jumping to the solution of the case, since the murderer one week might be the victim the next week and just some background supporting character the week after that.
* An erstwhile one sleeps better at night by (illegally) providing what people want instead.
* A nervous character who finds certain situations and things scary turns into an

extreme coward who freaks out at the mildest creepy things and has multiple phobias.
* An escaped mental patient from the first segment of the anthology film
* An escape room puzzle in the United States, unnamed here to preserve the secret for people who might play it (if you're dying to know, it is
* An especially bizarre example from North America happened in 2009, when the song
* An especially blatant example is Luigi Illica with his librettos for
* An especially close call happens right at the end. The kids have finally managed to make their way back into the house, but Nick ends up falling into Wayne's cereal. Wayne, lost in thought over having still not found the kids, isn't paying attention to the bowl and only avoids eating Nick when his dog bites his ankle.
* An especially interesting case is clan Lasombra. The bulk of clan Lasombra are members of the Sabbat, and consider Camarilla-affiliated Lasombra to be the
* An especially interesting example of these was Harvey's adaptation of
* An especially noticeable example is how when Kira fights Abirama, he
* An especially ridiculous example was The Briscoes wearing "Powerhouse Gym" apparel for their 2012 Ring of Honor promos even though Jay openly derides going to the gym. They're farm boys who carry a 300 lbs loads of dead bird and get their cardio from chasing chickens you see.
* An especially strange variation on this trope can be found, of all places, on one of the G1
* An especially tragic example of why you shouldn't try this: a man attempted this in a stairwell of the Brooklyn Museum, but lost his balance and fell from the third floor resulting in a fatal head injury.
* An especially tragic version of this happens with Peko Pekoyama in
* An especially vile rapist in season 3 was one who targeted only elderly women as a power trip.
* An esper that doesn’t have any natural ability for a talent tree can gain access to it by taking the appropriate PPEC. They can also increase a character’s affinity for an existing talent tree.
* An essay by Evan Connell mentions that when Thomas Huxley, while defending
* An essential part of Artillery. Artillery strikes are performed by a soldier on the field giving coordinates and payload orders to an artillery team miles away. Confirming coordinates and payload is the difference between leveling a city block of enemy troops and leveling a city block of innocent civilians (or quite possibly leveling a city block of your own troops).
* An essential part of chess strategy is identifying and attacking weaknesses in your opponent's position. Said weaknesses can take many forms (weak squares, weak pawns, exposed king, overloaded pieces, etc.) Of course there are times when the opponent's position doesn't have any weaknesses, in which case you first have to create some.
* An established part of Minbari legend states that Valen, their warrior-prophet from 1,000 years previous, disappeared in this fashion, somewhere out in space. Some of them apparently
* An establishing shot of Qo'noS shows that the above mentioned Praxis disaster happened decades earlier than it did in the prime universe (and the film suggests that, at least in this timeline,
* A nested doll appears in the "Making Christmas" sequence, the smallest doll of which contains a live scorpion. (
* Anesthesia is a sci-fi adventure about a crazy boy, who is the heir to an incredibly wealthy company, and his twin sister.
* An eternal night could be the product of living in the night side of a planet
* A Net of Dawn and Bones it still released enough curses to cause the catastrophes that occurred in the next few centuries, including the Black Death.
* a neural interface integration, but also for data storage/networking. Additionally, advanced training simulators can feed simulated sensory inputs into their participants' neural interfaces to make their training scenarios more authentic.
* An European Portuguese Cartoon Network advertisement begins by showing footage

of
* An even better display of fireworks is from the surprisingly smaller and weaker Missile Corvette. If a player can get a hold of one of these, he essentially has the ability to rain
* An even better example are the Smart Guns carried by Vasquez and Drake (which even had matching sets of
* An even better example comes from "A Comedy of Eros", in which Xena
* An even better example comes from "Boom, Boom, Out Goes The Ed". Ed blames a blackout on mutant man-eating moles. Everyone except for Edd and Eddy (and Rolf and Kevin, the former of whom ropes the latter into helping him restore power) fall for it, and chaos inevitably ensues.
* An even better example: his and Ruben Studdard's duet of "Jesus is Love" wherein Clay held a note at full belt for 22 seconds.
* An even better example is Munakata, who spends basically the entire show cool and unruffled, even when he's in combat...until
* An even better example is the announcer broadcasting from atop the CBS building in New York, watching the Martian's poisonous smoke drift across the city.
* An even better example occurs with the Alchemicals, who are effectively cyborgs, and have an enhancement called Omni-Tool Implant which replaces a character's hand with a device which looks like a hand, but can unfold to produce so many tools that the character is considered to have a master level workshop no matter where they go, which essentially means they have every tool necessary to produce any kind of mundane object, up to and including things that would require a forge to produce. One of the upgrade submodules turns it into a highly advanced piece of surgical equipment.
* An even better example would be the pacifist, mystic, Pkunk — an offshot of the warriorlike Yehat, who left their brethen long ago due to their cultural differences and are hated by the latter
* An even better option that he also had was Dragon Knight Draco-Equiste, a Fusion Monster, meaning that the Meklords couldn't equip it even if its effects were negated. Draco-Equiste only ends up being used in 1 duel.
* An even bigger example is Bryan Clauson, who won Indy's Most Popular Driver award in 2016. Unlike Wheldon or Wilson, he never started a single race in the series outside of the Indianapolis 500, and wasn't even killed in an Indy car crash, but rather a sprint car crash on a dirt track. Much of his popularity from that season came from his campaign to run a combined 200 paved and dirt races in various disciplines (including the 500) in 2016 and reviving the old-school dream of short track open-wheel racers working their up to the promised land of Indianapolis.
* An even bigger example is Stan didn't realize Greg and Terry were gay until it was spelled out to him
* An even bigger example is the Legacy-era (set 137 years after the films) Galactic Empire which has evolved into a semi-benign hereditary monarchy.
* An even bigger example would be Chisame Hasegawa. A side character in the beginning who was mostly annoyed with the whole situation, Chisame gets pulled rather unwillingly deeper into the story, and subsequently starts acting
* An even bigger hand-wave of the same stripe comes in the form of the Camouflage Tonic, discovered by research-photographing the disappearing-reappearing Houdini Splicers. That's right, kids, all it takes to engineer an advanced tonic that allows you to go sight unseen is a few handy snapshots! Grab those cameras and do Andrew Ryan proud!
* An even bigger moment happens when Atticus wishes to know about the tales of Pokémon in Chloe's world. Chloe realizes that even if she doesn't like being a Professor or Trainer, she could still be involved with the monsters in some way by researching the numerous legends and myths surrounding them.
* An even blacker variant uses the same punchline, but instead has Jeffrey Dahmer asking this of Lorena Bobbit.
* An even crazier design (albeit backed by Buzz Aldrin in his Mars proposals) is the "bola", which has two sections of the craft connected by cables to get the

longest possible distance from the barycenter with the least required mass.
* An even earlier example of a silent player character in a Bungie-made shooter would be
* An even earlier example of the trope are the Hai Karate cologne commercials of the early 1970s, in which it was once claimed that if you got in trouble from using their product — and it showed a man trapped in a phone booth in the middle of a parking lot, surrounded by extremely attractive women who apparently wanted to rape him — they had a toll-free number you could call for assistance, and it shows a helicopter lowering a rope ladder so he supposedly could reach it. Most Hai Karate ads showed the wearer ineptly attempting to use karate to defend himself against the women who were irresistibly attracted to him, causing a good deal of
* An even earlier example of Triple H using not only an overhand but an
* An even earlier scene has Paul Richter directly referring to the WOPR as "spend[ing] all of its time thinking about World War III."
* An even easier method is to get them between a few turrets firing at the right rate. The flinch effect will keep them immobilized long enough for you to take them out. Sadly, they'd just respawn like Agents in
* An Evening at The Larches by Harry Hearson and J. C. Trewin is the epitome of Crusty Caretaker. Jusitified, since the entire book is one long parody of thrillers.
* An Evening Wasted with Tom Lehrer fears of nuclear annihilation: "We will all go together when we go / All suffused with an incandescent glow / No one will have the endurance to collect on his insurance / Lloyd's of London will be loaded when they go".
* An Evening Wasted with Tom Lehrer: "I am reminded at this point of a fellow I used to know whose name was Henry, only to give you an idea of what an individualist he was, he spelt it H-E-N-3-R-Y — the three was silent, you see."
* An Evening Wasted with Tom Lehrer included this wonderful ditty about the most famous incident of this trope in the Western Canon:
* An Evening Wasted with Tom Lehrer, offers the mock-optimistic consolation that if World War III wipes the entire human race out in one go, nobody will have to deal with grief or go to the trouble of rebuilding civilization.
* An Evening Wasted with Tom Lehrer. The jacket included a narrative claiming that that the entire thing had been made up on the spot in a desperate and unsuccessful attempt to salvage a boring dinner party, and was accidentally recorded by a passing sound engineer.
* An Evening Wasted with Tom Lehrer, the spoken introduction to the song "In Old Mexico" includes a reference to "the late Doctor Samuel Gall, inventor of the gall bladder".
* An even major example comes later in the game. The characters go back to Al Mamoon so they can ask for an audience with the
* An even more bizarre example occurred in Thailand, where a police sketch was made of a man
* An even more blatant example is Lutecia Alpine, who goes from an emotionally-stunted
* An even more dramatic example is v1 #14, "What if Sgt. Fury and his Howling Commandos had fought World War II in Outer Space?": Thanks to the inventions of Leonardo Da Vinci, mankind has advanced technology including casual spaceflight by the 1940s, but there's still a World War II and it's still got the Howling Commandos fighting in it, complete with all the usual war-comic tropes. Fury's even still a
* An even more egregious example is in "If It Smells Like an Ed" where Jimmy framed the Eds for ruining the kids' friendship appreciation day even though Eddy, and ONLY Eddy, gave him a wedgie while Ed and Edd did absolutely nothing to deserve the crime other than stick by Eddy.
* An even more extreme example in the same series happens before this, when all the trouble began when the greatest magic users in history discover a new and amazing source of power, without realizing that they are tapping into

* An even more extreme example is a 1920 British newspaper cartoon which considers the impact of mobile phones, which had just been announced as a possibility in the future, and has them going off during weddings, in theaters, etc.
* An even more extreme example is that when voice actresses were once gravure or porn actresses. The best they could receive is to have no or little future roles. On worst, it would be
* An even more extreme example occurs in "Minecraft Speedrunner vs 3 Hunters FINALE", where Dream has gone through a huge ordeal, exhausting his supplies and at incredibly low health when he finally takes out all 3 hunters in the End. He yells out in triumph, thinking that all he has to do is take out the less threatening Ender Dragon... only for Bad to sneak up behind him and
* An even more extreme example would be the nameless vagrant who harassed Dio and became the first victim of the Stone Mask. His transformation into a vampire was what gave Dio the idea to use it on himself, and subsequently become an immortal menace who haunted the entire Joestar line.
* An even more fundamental error: the main driving force behind evolution is competition for survival and for mates, the only needed force is a means for introducing genetic diversity (spontaneous mutation will occur without radiation present), and therefore Sanctuary will not be a stable island of unchanging organisms. All the details of DNA replication were not known in 1959, as its structure had been announced only in 1953.
* An even more infamous example from the same war and company (and eventual miniseries) is 1st Lt. Norman Dike. He's been accused of delegating all duty to lower officers and NCOs during his tenure, and for disappearing from the front lines for hours at a time during the Battle of the Bulge; many of the men under (and over) him accused him of simply using the E Company assignment as a way to get "field experience" before continuing his climb up the ladder. Most infamous, however, is his historically documented
* An even more memorable monster was Bones, who is pretty much Hatchasaurus, except that his
* An even more recent commercial shows a parent being unable to get their kid to eat their vegetables, so they give the kid Kraft Macaroni 'n Cheese instead.
* An even more recent NFL example: Laurent Duvernay-Tardif, Kansas City Chiefs offensive lineman, was named the top lineman in Canadian university football in 2013 while attending medical school at McGill University in his hometown of Montreal.
* An even more regrettable variant twins this trope with the (equally
* An even more tragic natural disaster example: In 1902, the volcano Mount Pelée erupted on the French Carribean island of Martinique. It sent a pyroclastic flow down towards the city of Saint-Pierre, killing nearly everyone in the city, about 30,000 all total, including the island's Governor. Famously it was reported that only one man, a prisoner protected by his cell, survived. There has been at least one other documented survivor, and a few more who lived but died later from injuries or ash suffocation. The city was eventually rebuilt and new residents moved in, but its present day population is only 4,590. And the town itself is indeed a shadow of its pre-eruption days, when it was called the "Paris of the Caribbean".
* An even more vague war is shown briefly in the last chapter of the main game, which didn't even receive an official name.
* An even purer example can be found across the Pacific, where you have the Empire of Japan (feudal, about 16th Century technology plus extensive use of magic) right next to the Republic of Japan (a temporally-displaced portion of Japan from 2098 A.D. loaded with pre-Rifts advanced technology). The Empire is deliberately primitive, having adopted anti-technology attitudes since the Great Cataclysm and reverting to a more traditional way of life. The Republic was literally brought forward in time from the moment of the Great Cataclysm, and thus still has a capitalist, technology-centric culture that does not use magic. Stepping across the border between the two is very much a case of crossing centuries of cultural differences.

* An even straighter example at the Enchantment Under the Sea Dance near the end of the film, when Marty is playing
* An even stranger version in an easter egg of Strong Bad Email Cliffhangers is where Homestar starts talking about how he thinks Homestar (IE himself) stole Strong Bad's computer. Strong Bad asks if he's confessing and he tries to cover it up. A similar occurrence happens in another Easter Egg with Bubs and Coach Z.
* An event in which a couple crashed a White House party pointed out this. The White House actually used to be like this
* An event occurring that other events in the work simply do not allow.
* An event similar to the event with Jamie Madrox above showed up during the
* An eventual character corresponding to her via IM services, Kanaya, has just as big a vocabulary if not more so, and applies it in a less purple and more literal way.
* An even weirder example was when "The Song of the Count" was used to underscore
* An even weirder part of this was how Raven told them they'd be trapped there forever if she was beaten (the reason she pleaded with them to leave). Given that they're inside her mind, it isn't known exactly how it's possible that the place could even still exist if she were killed (assuming that's what she meant by "beaten").
* An even worse hope spot that is ultimately soul-crushing is the point where Vitruvius happens to be hanging around the Think Tank after his friends have all just been captured. After Lord Business sets his robots on him, he immediately
* an everlasting love") to convey the idea that dating matches that resulted from using eHarmony would last.
* a never-say-die attitude. Fifteen minutes into the second half, after three goals in six minutes, the score was 3-3. However, the actual last play was a double save from Liverpool's goalkeeper Jerzy Dudek against Andriy Shevchenko (then one of the best players on the planet) near the end of extra time that was later voted the greatest UEFA Champions League moment of all time. Those saved took the match all the way to penalties, which Liverpool won.
* An evil bastard CEO also quotes the Alexander line when he finds himself bored with his success. He ends up making a
* An evil version in Donald Hamilton's short story "The Guns of William Longley". A young cowboy's buddy sells him a pair of guns that once belonged to ruthless gunfighter Wild Bill Longley. The cowboy feels as though the guns want to kill again, and lets himself be drawn into a duel with one of the town's upstanding citizens.
* An evil witch set herself up as secret ruler of the Magic Kingdom of Genua in
* Anevka and later Prende's electric-touch weapons turn their clothes and wigs to ashes. Of course, they have it in the first place because both of them are sufficiently advanced Clanks, with Anevka's design largely cribbed from one of Prende's sister-Muses.
* Anevka does a pretty good job herself, convincing almost everybody she meets for an entire arc that they're really on her side, whether they are or not. She is eventually defeated by Tarvek's hidden ace, though.
* Anevka Sturmvoraus says that her brother Tarvek could probably charm Baron Wulfenbach himself, and he indeed does a pretty good job at playing all sides up the middle, until he's forced to reveal a hand in an effort to keep Lucrezia from ordering a city full of revenants to attack incoming soldiers and gets shot for it. Later events reveal that Tarvek has been able to keep some major lies running for
* A new apartment block overlooking Slough railway station—on a major commuter route to/from London—carried a hoarding making the sensible observation: "If you lived here, you'd be home by now."
* A New Beginning, a group of time-travelers from the apocalyptic 26th century try this as part of a last-resort effort called the Phoenix Plan in an attempt to prevent the ecological apocalypse.
* A New Beginning, a lot of Dunhill's dialogue mentions the player character's father, who once ran a farm on the same land you're using now, as being the source of their success. It also makes it pretty clear that the male farmer is the

default; it's not very flattering as a girl to hear that, from the back, you can easily be mistaken for your dad. Especially if you're wearing a dress and a ponytail. Made even more jarring considering that the developers are well aware that the vast majority of the franchise's consumers are women.
* A New Beginning and soon, the last dregs will be wiped out by a solar flare without the ozone layer to protect them.
* A New Beginning His psychiatrist insists on him repeating "I am not responsible for the whole world" when she gets the impression that he's backsliding.
* A newborn infant on ''Killjoys ages rapidly to his early teens before his condition is stabilized. In a nod to actual biology, he eats a ton of food rather than just gaining mass from an unknown source.
* a newborn Naruto from right in front of Tobi's face before he could even move his arm slightly.
* a newborn that looks like a teenager. Because of his looks, people assume he can be interacted with normally. But because of his actual age and life experience, he doesn't understand slang, subtlety or pop cultural references which results in very literal and awkward responses. He often mimics those around him as he tries to figure out the appropriate response, sometimes with comical effect.
* A New Brain, while Gordon is in the hospital, his boss keeps threatening to replace him with the boss's son.
* A New Bunny as one of the Ur-examples of blatantly trying to make "updated" versions of older characters so that today's kids will like them more. This exchange exemplifies this trope:
* A new but hostile land surface is created (new medium), deterring all but the hardiest forms of life — the pioneer species (site-makers) — with the most basic needs (such as profit) to exploit the only available resources (in this case, desperation). As a result of this, a community develops (the site-makers, who are the producers/pioneers, and the consumers who feed on the efforts of the producers).
* A New Chance For Adventure after being thoroughly and soundly defeated by Ash and his Pokemon, and facing arrest for his poaching activities, Rico tries to knife attack Ash. But with Pikachu nearby that works about as well as one could expect.
* A New Chance Series is enraged by this process, believing that Pokemon deserve free will, and thus, she must save these Pokemon in order to protect that right.
* A New Chance Series The infant Lugia encountered in the Whirl Islands is alone older than human history.
* A New Chance Series, there are several story arcs ongoing, some of them originating in the first story of the series and continuing into the second:
* A New Chance Series. Unlike canon where he is still ten, Ash actually ages. He is eleven at the start of the story and is close to twelve. This actually fits quite well with the evidence canon presents on time progression.
* A New Chance Series with a mouth full red, sharp teeth. She is described as being very kind and peaceful, and tries to act as discreetly as possible... until she sees a horrible injustice done to Pokémon.
* A new character and his route open up after the first playthrough of
* A new Chinese ambassador is to meet Gromyko. When the latter enters, the Chinese presents himself: "Zhui Hui!" Gromyko, unperturbed, retorts "Zhui sam!" The surprised Chinese asks: "And where is Gromyko?"
* A new clone of Cryptosporidium is released everytime you die in the
* A New Dawn: Calcoraan Depot has tractor beams serving as parking attendants for spaceships arriving and departing.
* A New Dawn taking advantage of her, as so many others have done. But it's not until that evening, when she's thinking back on these events, that she realizes she loves him.
* A newer comic has Jughead pull this on Mr. Lodge as a joke, after he decides it's hilarious how Mr. Lodge has a
* A newer example is Global Port, a talented team (led by the likes of Terrence Romeo (a renowned player in FIBA Asia tournaments) and Stanley Pringle) which rarely ends up making the playoffs. When they do, they often fail to get past the

Quarterfinals.
* A newer example that will likely only get worse: there is a good deal of ire directed at
* A newer standard called BVI (body volume indicator) uses a 3D scanner to measure one's dimensions. Unlike BMI, it takes one's volume and distribution into account, providing a more accurate measure of obesity.
* A new event brings new characters that will bring a lasting change to everything since they'll interact with the characters you already know and love and will sort of fade away over time in
* A new forum from Wizards called Gleemax.com, though it ended up being shutdown.
* a new game several years later that conclusively proves Roll was cured.
* "A new generation, a new destiny." — the English premiere of
* a new generation of characters. But it doesn't set up any kind of continuing plot.
* A new guy Buddy (Jack Black) insinuates himself into the study group and fondly recalls memories together, including Britta and Annie cat fighting in cheerleader outfits - which he admits may have been a daydream of his.
* A new highway sign for southern Oregon's Valley of the Rogue State Park was misspelled, and until the sign was replaced, the park announced itself to visitors going south on I-5 as the "Valley of the Rouge State Park".
* A New Hope a bit more than usual, which could be why he insisted that he could pull out of his fatal dive into the Death Star's surface.
* A New Hope. A couple of criminals don't take too kindly to Luke Skywalker, and probably don't think the old guy with him would be much help in a fight. A few seconds later someone's lost an arm.
* A New Hope: After attacking the detention block on the Death Star, Han Solo tries to do this to an officer who calls over the intercom. He's unsuccessful.
* A New Hope. After blowing up the Death Star, the team pulls R2 out of the X-Wing in disrepair. 3PO is in a panic, begging the others to fix the droid and even offering to donate any of his own parts to help with the repairs.
* A New Hope, after first rejecting Dantooine (where he was told the Rebel base was) for being "too remote to make an effective demonstration."
* A New Hope, after the heroes escape from the Death Star and the TIE fighter attack, there's a scene where Luke mourns Obi-Wan's death and Leia tries to comfort him.
* A New Hope Almost nothing is known about these dubs, and they're believed to be lost.
* A New Hope also has a (ridiculously specialized) circular table that shows the Death Star's position.
* A New Hope, an abridged audio adaptation of the film that used audio clips from the movie, also had a Japanese dub, resulting in a total of six Japanese dubs. Goro Naya, who voiced Ben Kenobi in the audio adaptation, reprised his role for the fourth dub, while Yusuke Takita played him in the third and fifth dubs.
* A New Hope (and by extension the whole franchise) starts with a money-maker: an Imperial Star Destroyer chasing a Rebel ship. George Lucas wanted audiences hooked from the get-go.
* A New Hope, and if you watch the scene closely, Ben kind of rolls his eyes, seeing through Han's BS.
* A New Hope and the massive increase of Jedi characters that outfit seems rather standard for Jedi, although with variations like Mace Windu's knee length robe.
* A New Hope, and when he gets back, he finds his Uncle Owen and Aunt Beru savagely murdered and the farm pillaged. Obi-Wan Kenobi tries to console him, saying "There's nothing you could've done had you been there. You would've been killed, too, and the droids would now be in the hands of the Empire."
* A New Hope, an Imperial officer on the Death Star is suspicious when Stormtrooper TK-421 isn't at his post and doesn't respond to the officer's radio query.
* A New Hope as Carth attempts to bluff his way through a Sith base with Zaalbar as a "prisoner." Subverted, as the receptionist on duty doesn't buy it for a second.
* A New Hope as dialogue tends to fluctuate in volume and intonation even in the

same scene. In this film, almost none of the Imperial actors even have the same voices as their onscreen performers.
* A New Hope, a Stormtrooper is done in in this fashion just before the Millennium Falcon takes off from Docking Bay 94.
* A New Hope before that became the name of the series, rather than the name of the original film.
* A New Hope believing he would later be dubbed over by another actor.
* A New Hope briefly drops out of hyperspace in the middle of a cluster of spaceborne rocks, these asteroids are fragments of Alderaan, which has just been destroyed.
* A New Hope by being burned alive. Before they're killed, one of the stormtroopers gives them a message from Darth Vader, saying that they may now laugh at the Little Orphan Ani joke, causing Owen to say that it was funny then, and funny now. Owen continues this trope until his death needless to say.
* A New Hope. C-3PO thinks he's responsible for Luke and the others dying in the Death Star's trash compactor.
* A New Hope certainly qualifies. She's captured by the Empire in the opening and held prisoner until freed by Han and Luke.
* A New Hope: Cloud has his last battle with Sephiroth after his wedding. It almost kills him.
* A New Hope, combined with the beautiful cinematography and Mark Hamill's superb acting, altogether make an image of wistfulness, nostalgia, and longing that's almost too poignant for words.
* A New Hope confirms to the audience that he's human, but due to his armour and the fact that most characters are unaware of his past identity as Anakin Skywalker, there's much in-universe speculation as to whether he's human, an alien, or a droid.
* A New Hope continues to write more and more just-off-screen characters into the battle.
* A New Hope could count, as he has the Death Star, and is a strategist with his own doctrine.
* A New Hope (Danganronpa) enter into polygamous marriages with their partners after escaping the Killing Game.
* A New Hope (Danganronpa), followed by a series of Killing Games that take place in farther regions (space, the moon, an amusement park, a secret island filled with monsters, a train, a desert, and supposedly be followed by an underwater city). Though each of the sagas has different protagonists, the scale of the Killing Games creates a bigger world within the facets of the franchise.
* A New Hope (Danganronpa): This is hinted to be the reason that Mikan falls for Hajime and Chiaki. After a lifetime of getting bullied and abused by everyone, Mikan is touched that the two of them are nothing but kind and supportive to her.
* A New Hope, Darth Vader takes to space with his TIE Advanced to defend the Death Star.
* A New Hope delivery of the sleazy dialogue proved so charming that he was kept as the voice. Daniels did, however, have to re-dub the lines because the C-3PO suit's plastic pieces scraping together made it impossible to hear his on-set voice.
* A New Hope, dissolving them the moment that the Death Star is fully operational and he no longer needs to pretend he needs them.
* A New Hope during the assault on the Death Star (unfortunately for the pilot, he gets blown up before he has time to eject). The starfighter is designed so that the cockpit and couch would separate from the fuselage and engines, thus leaving the pilot drifting in what was effectively a survival capsule. The suit is air tight and has a small force field that will keep you breathing for about three or four hours. Now being next to a giant moon-sized space station that explodes isn't exactly survivable so it was still a waste of time.
* A New Hope explanation during the Death Star escape to explain why the gunners can hear the scream of TIE fighters around the ship.
* A New Hope from within the ranks of the Old Republic's military, and it never makes it clear that Imperial Stormtroopers are all under standing orders to kill

Jedi on sight. As Michael from Belated Media points out, this can make it seem odd that Obi-Wan has seemingly no problem with igniting his lightsaber in the middle of a crowded bar in Mos Eisley, knowing full well that there's a squad of Stormtroopers right outside the bar looking for a pair of wanted fugitives.
* A New Hope gives us the situation seen in the page quote, where Luke and Han mug some stormtroopers to sneak around the Death Star to rescue Princess Leia.
* A New Hope Grand Moff Tarkin orders the Death Star to blow up Alderaan, invoking this trope to the captured Princess Leia in order to get her to reveal the location of the rebel base in exchange for sparing her home world. Leia gives up a location, but Tarkin orders Alderaan destroyed anyway.
* A New Hope had scenes on Tatooine in which Luke first observes the hunting of Leia's spaceship with a telescope, then goes to tell his buddies about it, after which they discuss whether it would be worth to join the rebels. Leaving these scenes in would have explained why Luke was talking to some of the rebel pilots he meets later as if they were friends of his - they were, in fact! The scene where Han is confronted by Jabba the Hutt before leaving Tatooine was originally cut, but restored in the Special Edition with a CGI makeover.
* A New Hope had the idea for a space-fantasy film in 1971. However, he has said that he had the idea long before then. He began writing in 1973 and production started in 1976.
* A New Hope hallway from otherwise being an outright massacre by the Empire. Leia also manages to kill one before she's captured, which was just a distraction from her real mission, helping C-3PO and R2-D2 to escape with the Death Star plans.
* A New Hope, Han infamously says that the Millennium Falcon can make the Kessel Run in 12 parsecs even though a parsec is a unit of distance rather than time.
* A New Hope, Han mentions Wookies tear arms out of sockets when they lose.
* A New Hope. Han Solo kills Greedo in the Mos Eisley Cantina, blasting a hole through his chest before tossing the bartender a coin along with the page quote.
* A New Hope, hardly an improbable age — although Tarkin could be interpreted as referring to Empire's purge of the Jedi.
* A New Hope has the battle of Yavin IV, where the Rebellion sends all of its starfighters against the Death Star as it moves to destroy the Rebel base.
* A New Hope has this dynamic between Darth Vader and Grand Moff Tarkin; while Vader is the Emperor's top enforcer, Tarkin governs the entire Outer Rim and is in charge of the Death Star. In fact, Tarkin is perhaps the only Imperial officer on good enough terms with Vader to give him orders.
* A New Hope have of the Death Star's nearby presence is Obi-wan's observation that the small TIE Fighter harassing them does not have hyperspace capabilities and thus could have neither followed them nor been separated from a convoy; it has to be based nearby and Alderaan didn't have any Imperial bases.
* A New Hope Imperial stormtroopers. Later, in the Battle of Yavin, the Y-wing squadron is completely wiped out and only a handful of pilots from the X-wing squadron survive.
* A New Hope. In the reboot canon, Luke taught the Jedi ways in a jar-shaped temple with several wooden huts, on a unspecified planet the biome of which is significantly different from Yavin 4.
* A New Hope; in the rest of the series, there is no blood from lightsaber dismemberment at all.
* A New Hope is Asian, and utters a single line of dialogue — you can barely tell by his helmet and the very brief appearance he has).
* A New Hope is so fast, it "made the Kessel Run in 12 parsecs", which sounds cool — except a parsec is a unit of distance, not time. There are three ways to go about this:
* A New Hope is the New Hollywood becoming a victim of its own success.
* A New Hope. It is for those reasons that a single normal man can stand alongside Darth Vader and Emperor Palpatine as one of the most iconic villains in sci-fi movie history.
* A New Hope It's also justified, as he really needed the money to survive against Jabba the Hutt (let's just say that he needs a lot of money to redeem himself for

not delivering spice to Jabba).
* A New Hope. It's implied one of the reasons the Death Star was built was just that: hit planets through their shields.
* A New Hope; It's then when Leia says "It's not over yet". She's right, the movie still has 30 minutes left to depict the battle of Yavin.
* A New Hope: Luke calls it a "piece of junk", Leia, upon seeing it for the first time says, "You came in that thing?"
* A New Hope, Luke interrupts C-3PO (who is about to start whining about his problems while Luke, Leia and Han are about to be crushed to death in the garbage compactor) by saying, "Will you shut up and listen to me?!"
* A New Hope, Luke is actually commended by a Rebel leader when he admits that rescuing Leia from the Death Star was improvised, because "the ability to think on one's feet isn't common."
* A New Hope, Luke, who owns the laundromat that Cloud works at, is one of these. He admonishes him for missing two weeks of work due to being in the hospital, and threatens to fire him if he doesn't show up for work the next day. But Cloud, being the Extreme Doormat that he is, puts up with it.
* A New Hope: Mind trick, Force choke, Force sense, oneness with the Force
* A New Hope, neither the subtitle "A New Hope" nor the "Episode IV" designation were a part of the opening crawl, they were only added to later releases following the next two episodes).
* A New Hope of the first-released film. And that's probably only because "It is a period of civil war." is pretty hard to screw up.
* A New Hope. One of the Y-Wings explodes, and the other Y-Wing suddenly leaps forward, leaving that explosion behind him.
* A New Hope on it to ensure Luke escapes while Darth Vader's attentions are elsewhere.
* A New Hope, only Vader's intervention stops him from being killed by the Emperor.
* A New Hope opens with Imperial Stormtroopers blasting their way into Princess Leia's starship, leading to a series of intense shoot-outs in the narrow corridors of the ship.
* A New Hope opens with Princess Leia's ship being boarded by Imperial Stormtroopers and Darth Vader.
* A New Hope performed the swing over the Death Star chasm themselves.
* A New Hope performs the traditional GIB function of getting injured to increase the drama). In the prequels, Obi-Wan Kenobi also has an R2 droid as his GIB. In fact, the design of the X-Wing starfighter, with the R2 units poking out of the top behind the cockpit, was meant to invoke the image of bombers with gun turrets (compare an X-Wing to a Grumman Avenger or a Boulton-Paul Defiant).
* A New Hope. Perhaps also the larger one seen in Palpatine's entrance.
* A New Hope. Peterson Adriano did not return as Anakin Skywalker in the prequels because he no longer works at the dubbing studio (Delart). Interestingly, Isaac Bardavid voiced Obi-Wan Kenobi in at least two versions of each of the original trilogy.
* A New Hope. Princess Leia's image projected out of R2-D2, and the chess pieces in the game between R2-D2 and Chewbacca.
* A New Hope. Princess Leia's message to Obi-Wan Kenobi (stored in R2-D2) starts with a burst of static.
* A New Hope replied "It ain't that kind of a movie, kid. If anyone's looking at your hair we're all in a lot of trouble."
* A New Hope's boots were too small for him. So, he wore slippers while filming most of his scenes.
* A New Hope's engines and weapons being disabled by a Star Destroyer, leaving it helpless as Darth Vader's ship tractors the corvette into its massive carrier bay.
* A New Hope shortly before the Battle of Yavin. (There were apparently some scenes written that took place days or weeks earlier, and they were expanded for the later radio version, but they didn't appear in the movie.)
* A New Hope show more, but Chewbacca remains the only nonhuman, non-droid member of the main cast.

* A New Hope since Luke (with help from C3P0 and R2D2) then has to rescue them from her rescue.
* A New Hope's, which featured numerous naval victories and culminated in a successful planetary rebellion.
* A New Hope talks about his Aunt and Uncle's deaths to Cade who's in their old home. More or less, at first he wanted to make the Empire pay but knew he couldn't stop and angst about it. Later, when he became a Jedi, he accepted their deaths and knew they're part of the Living Force now, which they are.
* A New Hope that fatal flaw, so the Rebel Alliance has to destroy it before it's complete or it will be basically unstoppable.
* A New Hope that Luke's home planet is Tatooine, that the Rebel ships are called X-Wings and the Imperial ships are TIE fighters, or that the Rebel base is on Yavin IV (though it does say the name of the system). Some things that went unnamed in the original film did get named onscreen in the sequels (eg. Star Destroyers).
* A New Hope that rewrites the entire initial scene so that Darth Vader is now asking the Rebel forces about his missing headphones. The following scene, where Luke and Uncle Owen acquire R2-D2 and C-3PO from the Jawas, is also given... an interesting twist.
* A New Hope the collapsing enemy ship. Note that in the book, that was Biggs, not Wedge. It's not the only film/book discrepancy; the novelization was finished well before the film was. Also (justifiably) averted, when several fighters are shown to crash into the Death Star without destroying it; their relative sizes make this completely understandable.
* A New Hope: The Death Star, twice: once to rescue Leia, once to blow the place to bits.
* A New Hope, the fighting was done by fencer and choreographer Bob Anderson, who was much better at it, and the props were sturdier, but he still had difficulty seeing.
* A New Hope the heroes, more sorta past them, but to be fair it's hard to tell with the mask.
* A New Hope them as being part of the Death Star's ventilation system.
* A New Hope theme, but it only got to #81. The LSO remains one of the world's most respected symphony orchestras and still regularly record film scores, but they haven't touched the pop charts as a billed artist since the 1970s.
* A New Hope, there's the garbage monster, the Dianoga. We only ever see one of its eyestalks pope out of the rubbish, and then one of its tentacles, the latter of which grabs Luke and drags him underneath the surface. Shown in the EU to be a squid-like monstrous alien octopus.
* A New Hope things more powerful than the Death Star, including the Force; he's then proven right, as it's a Force-sensitive pilot who fires the shot that destroys the Death Star.
* A New Hope? This was actually an inversion. Expanded Universe novels have shown that these droids are perfectly capable of speech, but are usually simply told not to by whoever is conducting the interrogation, because a torturer who remains silent can be far more effective than one who speaks to the victim.
* A New Hope to be funny, but his only purpose in the film was to be a punchline for Han Solo.
* A New Hope trope. For specificity's sake, the first Death Star was established as 120 kilometers in diameter, and the second would've been either 160 kilometers or 900 kilometers (there are contradictory sources) if it hadn't been blown up first.
* A New Hope. Vader is just beginning to fire his lasers at Luke when Han Solo comes back at the nick of time and blasts one of Vader's wingmen, causing a much needed distraction.
* A New Hope version (okay, space station the size of a small moon, close enough).
* A New Hope was dubbed for theatrical, VHS (Bonton Home Video), and Blu-Ray releases.
* A New Hope, we learn that the two aren't even blood relatives, and they only met each other once. Briefly, at that. They were originally intended to have been brothers, but this was changed (obviously).

* A New Hope, we start with the droids, who "happen" upon Luke Skywalker, who knows Ben Kenobi, who takes them to Mos Eisley whey they meet Han Solo, and so on.
* A New Hope, when chasing a Stormtrooper down a hallway and running into a whole legion of them... hilariously prompting a hasty retreat of his own.
* A New Hope. When Luke and Leia are trapped by a chasm in the Death Star, Luke discovers one of the compartments of his Stormtrooper utility belt contains a grappling hook and line, but no launcher. He tosses the line so that the hook snags on some overhead piping, allowing he and Leia to swing to safety.
* A New Hope when Luke's looking for Obi-Wan Kenobi, although in that case he's actually already an acquaintance under another name ("Old Ben" Kenobi). Luke momentarily speculates that it might be Old Ben, but he's not expecting it. He also wonders if Obi-Wan might be related to Ben, and even asks him if that's the case. In this case, Ben tells him straight-out that he's Obi-Wan instead of hiding it.
* A New Hope: When R2-D2 refuses to display the rest of Princess Leia's holographic message to Luke, pretexting a dysfunction, C-3PO slams the top of his dome and tells him to stop fooling around.
* A New Hope wherein Greedo repeatedly fails to hit a dartboard positioned only a few inches away from him.
* A New Hope), which narrates the story of Luke Skywalker and his friends from the Rebellion in their struggle to defeat Darth Vader and the Empire.
* A New Hope, who was much older, whiter, and less physically strong than what they had in mind, more Shakespearean than Samurai. He ended up delivering one of the best portrayals of a mentor figure in a sci-fi film ever, if not the very best.
* A New Hope, with an entirely different ship profile. It's just that the Y-Wing's design flaws resulted in a constant need for maintenance, and by the time of the Rebellion decades after the ship's introduction, Rebel technicians got fed up with removing the armor to get at the cooling system and stopped bothering to put it back on.
* A New Hope would later explain it as a deliberate weakness built by a rebel-sympathetic scientist in an attempt to sabotage it.
* A New Jersey family earned some controversy for a particularly disturbing Halloween display of hanging bloodstained baby dolls. Their
* a new layout, with angry anime fans going after people who liked [as]' live-action programming, and home to a bunch of trolls in general. They changed the layout into something awful so the diehard users would leave, and eventually, there would be nobody left to care about it.
* "A New Leaf": After bringing the "happy plant" to work and being dopey from its effects, Richfield fires Earl, who is all too happy to be fired. When Fran finds out, she brings Earl to work to talk Richfield into rehiring him. At this point, Richfield had taken the plant and is a hippy. He's happy to not only rehire Earl but also make him his assistant... Only for Richfield to get a call from his superior telling him that he's fired (which also means Earl is still fired).
* A New Life", Daniel, Beth and Thomas join a religious community in an isolated wooded area that eschews technology and advocates the return to traditional values. However, as Daniel later discovers, its leader Father is one of a group of shapeshifting alien merchants who plan to sell their descendants as slaves once humanity's rebellious streak has been bred out of them.
* "A New Life" had a group of humans decide to go live in a colony out in the woods, starting families away from civilization. At the end of the episode, it's revealed that the "colony" is actually inside a disguised alien spaceship, and the humans are being bred for slavery.
* A New Life, newly-divorced Steve flips channels only to keep seeing the same mattress store ad with the jingle "have more fun in bed!"
* "A New Life": This episode's premise may remind some fans of Shyamalan's
* A newly empowered Peter Parker rescues Mary Jane's upended lunch this way early in the first
* a newly magically-mature Gabrielle burns off Dumbledore's beard with a fireball in front of a shocked Triwizard Tournament crowd.
* A newlywed couple go to bed. The husband, who suffers from traditional

upbringing, asks his wife if he's her first, and gets only silence in return. He apologizes for doubting her... only for her to reveal that she was sorting out the
* A newly-widowed Jewish woman comes home with her husband's ashes and spreads them over the coffee table. "Harry?" she says to the ashes "Remember that fur coat I always wanted? I'm wearing it now. The
* A New Man", a spell turns Giles into a demon and Spike encourages him to work off his frustrations with some gratuitous violence. Giles indignantly refuses...until he sees Professor Walsh, whom he promptly chases down the street with load roars.
* A New Man", he was so upset about feeling useless that he went out and got drunk with Ethan Rayne. Bad idea.
* A new mechanic called Special/Finish Zoom is introduced to facilitate shocking blows in a match when there are only two fighters on screen. When a certain move (like Captain Falcon's Falcon Punch) or an attack strong enough to likely KO an opponent connects, time slows down and the camera zooms in on the impact.
* A new meme has shown up in the same vein: "Ligma." "What's ligma?" "
* A new mode that allows the player to swap Materia between party members, even those who are not currently members of the party. This is acually Lampshaded in the
* A new neighbor boy spreading malicious lies about Malcolm, turning the entire neighborhood against him. When Malcolm confronts him, the kid says, "Hey, it's just a joke. Lighten up," and continues doing it.
* A new one features a movie-trailer-ish narration stating that you won't get to experience many action-movie clichés and "You won't even get my cool american voice."
* A New Order and ask for his help. The rest of her team object to this and she explains her plan to them (and the reader). The next day it goes off without a hitch, but because of the previous discussion the audience is expecting it to go catastrophically wrong.
* A New Order, Naru and Rei's Grandfather know Usagi and Rei are Sailor Moon and Mars, respectively.
* A New Order not only meets Mamoru this way, but also Ami (whom she crashes into while running through the halls).
* A New Order. There's also a more meta example: Sailor Uranus is the author's least favorite character and, despite being a powerful fighter, her first fight ends with her near death while the other senshi are relatively unharmed.
* A New Order when she is injured and bleeding. The more blood she's lost, the stronger it is.
* A new player asking where to find the Androsynth is always a source of humour on the
* A new player checks the chest for traps. An experienced player checks the floors, walls, and ceilings for traps. A
* "A New Position for Roz", when she is teaching Noel how to produce Frasier's show:
* A new preacher comes to a small town on a Friday and decides it would be a good idea to visit each member of his congregation at home to get to know them before Sunday's service. All goes well until he comes to one house. The preacher knocks and rings the doorbell, but even though the lights are on and activity can be seen inside, no one answers the door. Exasperated, but deciding it's best not to bother them, the preacher takes a card out of his pocket and writes "Revelation 3:20" on it, before slipping it under the door and leaving. Comes Sunday, after finishing his sermon at the local church, the preacher finds the card in his collection basket and sees that the resident of the house has written "Genesis 3:10" on it.
* A new program intended to take over with the space shuttle being discontinued will be called Orion (
* A new range of plastic Sororitas and a Codex was released in June 2021. This was preceded some time before by a special collectors box of plastic Sororitas.
* A new recruit on his first foot patrol gets killed in "King of Thieves" by Tin-yu's gang during a routine search.
* A New ROAD of Misfortune, Aiho Yomikawa, Touma's busty teacher, asked him out on a date, though she didn't necessarily said it straight, her intentions where

crystal clear. In the end, Touma didn't realize it was an actual date despite that Aiho dressed herself with a stunning dress, not even wearing a ponytail as she unusually did in order to look more feminine. While one would assume Touma's denseness as definitive by the end of the chapter, it also could be a self-defense measure on his part to avoid misfortune screwing with his life.
* A New ROAD of Misfortune: It is implied by the author that Touma may be hiding his true colors from the people he knows. He gets into trouble several times do to one of the girls interested in him. Maybe the fact that he is a lot more nervous than in canon is due to the unwanted attention he attracts from the opposite sex. So far he seems to be dense, so only time will tell if this part of his personality is true.
* A New Russian exits the Hermitage Museum (former Russian Imperial Palace filled with priceless works of art): "Meh, what a hovel." (People around look at him reproachfully). "But a tidy one!"
* A New Russian is in an auto accident. He stumbles out of his car, and his left arm has been torn off. He starts yelling "Oh God, my car! My car!" A bystander says, "Your car? Look at your arm!" He looks down and says, "Oh God, my Rolex!"
* A New Russian meets his daughter's boyfriend for the first time. They are alone in a room and the New Russian starts asking a few questions:
* A New Russian once caught the Golden Fish and offered it three wishes.
* A new "Sabrina" comic series was introduced shortly after the debut of the
* A news article reported about a mugger who stole a plastic bag from an old woman walking her dog. The bag, of course, turned out to be full of dog shit.
* A newsboy is shown hawking a paper this way (an extra about Central City's brand-new superhero) at the end of
* A new shield enhancement that allowed a ship to fly into a star's corona was introduced as a mere plot device for a minor episode, but reappeared not long after in a major episode when they used it during a battle with the Borg.
* A newspaper accidentally called German politician Björn Höcke "Bernd", perhaps because there is another prominent member of his party, the AFD, named Bernd Lucke. Höcke publicly made a fuss about it, and
* A newspaper advert for a "Genuine Mexican coathanger. Only $5." When the curious shoppers send away for their coathanger, they receive a rusty nail.
* A newspaper article reporting on a plan to install solar panels in London had to spend a few paragraphs debunking this trope, due to the obvious jokes.
* A newspaper boy shouting "Extra! Extra!" shows up briefly in the German movie
* A newspaper cartoon shows the conductor concentrating intently on his music stand, which is showing not notes but the poses he needs to take, wand orientation and all.
* A newspaper opinion piece once featured the captain of a 'satirical panel game' protesting vigorously that Cedric Brown over at British Gas was getting £10,000 of public money for just three days of work a week. Producer Harry Thompson (of
* A newspaper report in one of the British newspapers caused some controversy in the news over this trope once because it criticized the media over its fascination on the Duchess of Cambridge's (Kate Middleton's) looks instead of the enormous amounts of charity work she'd been doing ever since her marriage to Prince William. The media were quick to deny the accusation, but not before
* A Newspaper Solves Everypony's Problem rolls up a newspaper and thwarts harebrained ideas by whacking the newspaper against her friends' heads.
* A newspaper story concerned three youths who mugged a retired gentleman in his sixties as he left a London Underground station late at night. Unfortunately for them, the job he had recently retired from was thirty years teaching unarmed combat to the SAS. His attackers were arrested in hospital.
* A news radio station in Regina considers someone winning $25,000 in a contest on a sister station to be a news headline. It's big, but still...
* A news report about a Londoner complaining about the missile launchers being installed to defend the 2012 Olympics quoted him as saying "The Ministry of Defence have tried to claim I am a lone nutter. But I am not alone."

* A news story in around 2004-2005 about someone emulating the Jackass films. The guy tried putting a firecracker in his rectum... resulting in second-degree burns and a cracked pelvis.
* A new trend around anime conventions: getting voice actors to say their characters' famous lines after inhaling helium.
* A new trend in kitchen appliances are retro ascetics. It helps that some designs have have been incrementally improved since the 30s, and "retrofying" them means adding back decorative artistic elements that have been removed over the years. For example most toasters are built in a chrome bubbly shape because its ancestors were in Art Deco Streamline Moderne style. It also doesn't hurt that the 50s and 60s saw the peak advertising for home appliances in most places.
* a Newtype. He also happens to be the most dangerous character in the series, hinting that Coordinators might still be muggles by comparison.
* A new Urban Legend going around is that of an extremely sinister/dangerous Monster Clown in Bradford, which has been rumored to be doing everything from peering in windows to robbing people to stabbing them. The police department consider it a hoax, and a news story about it can be seen
* A new version of Dan Garrett, revamped from a cop to an archaeologist. First appeared in June, 1964.
* A new version of this trope is to name the electronic first down line after a sponsor, like the "Overstock.com First Down Line".
* A New Way is a dream of Chrysalis's, viewed by Luna, though this is not immediately apparent.
* A New World", after Connor returns from hell, he sees a girl about to get raped by a drug dealer. Connor beats up the drug dealer, then cuts off his ear to keep as a trophy.
* A New World, A New Way are named after Pokèmon moves. The chapter title also follows suit in a different way, as it's named after a Pokèmon ability.
* A New World, A New Way) are this for the most part. Even then, the ones that attack do it out of confusion.
* A New World, A New Way, as MANY of the Pokemon develop (or harbor) feelings for their Trainers, which only grow stronger when said Trainers are turned into Pokemon.
* A New World, A New Way Inti the Heliolisk does one with her tail when Apocalypse the Tyrunt tries to run her tail over with a rock and fails.
* A New World, A New Way Naruto the Zoroark's shadow does not change while he is using his Illusions. This is how Emperor Carapace begins to doubt who he really is.
* A New World, A New Way series (specifically A New World, A New Stage), leaves a calling card with one side depicting a black Zoroark head symbol, while the other side is blank and used to write her notices.
* A New World, A New Way she met Arceus, the god of Pokèmon (and is willing to accept the fact that Arceus is a god).
* A New World faction executes a virtual coup d'etat by killing the Watatsuki sisters and refusing to leave the True Moon even in the face of the human advance in the surface. Then they use their super-advanced technology to hack into Earth's arsenals and trigger a massive apocalypse by faking huge amounts of telemetry, and when that's not enough, outright seizing control the planet's nuclear arsenals and liberally dispensing nukes. The result is a bloody collapse of Earth's infrastructure, killing billions, to save a force of less than two hundred Lunarians. And to cap it off, the remaining Lunarians descend en masse to smash Gensokyo.
* A New World hinges entirely on the Lunarians being too stubborn to admit she's dead.
* A New World on her Shoulders, Penny carries Ruby this way to quickly take her to Ironwood's introduction speech for the new Atlas students.
* A New World portrays Kaguya, Eirin, and Reisen as this, all having tired of Lunarian pretensions to being some sort of superior beings. Having forsaken Lunarian authority, Eientei, their palace, is marked as an important target for the invading Lunarian forces, who want them back to increase the invasion's legitimacy.

* A New World, the books in the Scarlet Devil Mansion library have been heavily enchanted for a wide array of defensive purposes. It has been a long time since anyone was sure of how many layers of protection have been placed over the books, so when a band of unwary invaders is lured into the library and the books triggered to attack, they wind up unleashing a maelstrom of every kind of magic available.
* A New World, who's been filling her lungs with paralyzing toxins for a while. As she chokes on the venom, Medicine realizes she's not feeling particularly merciful, and snaps the Lunarian's neck.
* A New York businessman has to make a trip to South Carolina around Christmastime. As he's driving through the state, he notices Nativity scenes in front of the many churches he drives past. In each of these, the Three Wise Men are wearing firemen's hats. Finally his curiosity gets the better of him, and he stops at a church, walks in, and asks the pastor why the Wise Men are wearing hats. The pastor replies, "Ain't you read the Bible? It says, 'Three Wise Men came from afar!" (In a heavy Southern accent, "fire" is a homophone of "far".)
* A New York Christmas Wedding (queer main characters, subject matter includes queer romance/ same sex wedding).
* A New Yorker named Kevin worked for the Central Park Zoo, the Bronx Zoo, and the Prospect Park Zoo. He caught strange and exotic animals for these zoos. The day after he officially retired, Kevin got a call from the Central Park Zoo. "We know you retired yesterday," they said, "but we need to send you to Africa to fetch us a short-necked giraffe!" When Kevin arrived in Africa, who should he see but Tarzan, the legendary king of the apes. He was painting black stripes on a white zebra. "Do you know where there are any short-necked giraffes?" asked Kevin. Tarzan pointed to his left, and there was a whole herd of short-necked giraffes. Three days later, Kevin got a call from the Bronx Zoo. "We know you retired four days ago," they said, "but we need to send you to Africa to fetch us a hornless rhino!" When Kevin arrived in Africa, who should he see but Tarzan, painting white stripes on a black zebra. "Do you know where there are any hornless rhinos?" asked Kevin. Tarzan pointed straight ahead, and there was a whole herd of hornless rhinos. Three days later, Kevin got a call from the Prospect Park Zoo. "We know you retired ten days ago," they said, "but we need to send you to Africa to fetch us a trunkless elephant!" When Kevin arrived in Africa, who should he see but Tarzan, painting black and white stripes on a transparent zebra. "Do you know where there are any trunkless elephants?" asked Kevin. Tarzan pointed to his right, and there was a whole herd of trunkless elephants. Three days later, Kevin cut his phone line and never got any calls from any zoos again. And the moral of the story is,
* A New York restaurant called Han Dynasty has been the butt of jokes for its website, handynasty.com (also a case of the

* An exaggeration of the high-pitched sounding, sing-song tone of the accent. This can seem like
* An Exaltation of Larks, and then expand again over billions and billions of years, allowing life to start again.
* An Exaltation Of Larks: Mr. Turtle is essentially a time traveler from the end of the universe where entropy has reached maximum and the underlying fabric of reality begins to break down — meaning he's at least a trillion years old. When the protagonist conjures up a number for his age (one hundred billion), Mr. Turtle simply laughs.
* An examination of Brandon affirms that some elements of his DNA defy categorisation by Earth science, although scientists speculate he might be able to breed with humans.

* An Examination Of Extra Universal Systems Of Government has a couple of examples:
* An Examination Of Extra Universal Systems Of Government has a few examples:
* An Examination Of Extra Universal Systems Of Government of a scholar traveling through various universes, studying the different and unique forms of governments found in them.
* An Examination Of Extra Universal Systems Of Government's Southron Popular Republic Timeline has two different Second American Civil Wars. The Confederacy wins the Civil War and secures its independence from the Union, only to later fall to a communist revolution, while the Union has a second civil war of its own in the 1930s, resulting in California's independence.
* An Examination Of Extra Universal Systems Of Government versions of real countries.
* "An examination of philosophical themes in science fiction, with seventeen stories by:
* An example: A babelicious college-aged girl, wearing a plain white T-shirt and jeans, is driving her sports car at 55 mph and texting a friend as she nears a railroad crossing with a train coming. The ominiously toned announcer reminds audiences of the warning (in this case, "You chose to text on your cell phone while driving") before stating, "These are the next 60 seconds of your life.") The scene will shift back and forth between the train and the driver — in this case, the engineer frantically sounds the horn and the young woman just presses the "send" button on her mobile device as her car enters the crossing ... and is struck by the train. The deadly consequence shown (the dead woman, horribly bloodied and entangled in the twisted frame of the car) before the announcer finishes with "America's roads can be highways or dieways ... the choice is yours!"
* An example appearing both in Diamond's book and in similar studies in general is Easter Island. Once home to a flourishing, distinctive Polynesian civilization, it saw its downfall in a matter of a few dozens of years. Archeological study links it to the deforestation caused by the expense of construction of famed
* An example arises not out of snarkery but a genuine misinterpretation/hopefulness on the part of
* An example at the end of an episode: the A.K.A. Cartoon logo at the end of every
* An example between Pokémon: Meowth and Ash's Oshawott both fall for a Purrloin. The expressions on their faces following the surprise revelation are priceless. The pairing name for this Purrloin/Meowth became, appropriately enough, Bridgetshipping.
* An example can only be added once the event that makes it no longer funny has ended.. Please don't add examples of this nature.
* An example concerns the discussion of anti-bacterial hand soaps, which carried over onto episodes of
* An example displaying neither strength nor fortitude, but endurance, was
* An example featuring the Shetland Pony provides the page quote for
* An example for people that were already dead: When the city of Pompeii was being excavated it was discovered that the ash layers from the eruption of Mount Vesuvius contained the impressions of human remains. Plaster was poured into these impressions, creating what some have called "living statues".
* An example from an action movie, although still comedic in nature: in the first
* An example from before overtime existed: In the 1984 Orange Bowl, Nebraska scored a touchdown to pull within 1 point of Miami. Rather than call for the extra point kick and a tie
* An example from Italy, a 2002 commercial — a woman is in her flat, talking on the phone. She's arguing with her boyfriend, and in the end she shouts "I'll go out and date the first man I meet" and hangs up. In another flat, a man is washing dishes and hears all that yelling. When the woman opens the door to go out, the man is there, on her landing,
* An example from the latter: "She was gorgeous, she was charming/Yeah, she was perfect in every way/Except she was always using the word "infer"/When she obviously meant "imply"/And I know some guys would put up with that kind of thing/But frankly, I can't imagine why." He's got a point.

* An example from the opposite direction - FT&T in Anne McCaffrey's
* An example from the same series is Subaru and Seishirou. It's not as obvious in
* An example from the "Treehouse of Horror" comic book - one story has Bart find a "Tales from the Crypt"-esque story entitled "Harvest of Horror", which is hosted by the Old Lamplighter.
* An example from the UK in 2008 or so: a two-day strike at an oil refinery in Scotland wouldn't have affected petrol distribution in the slightest as several days' reserves are stored off-site. However, as soon as news of the strike got out, queues appeared at petrol stations all over the country - even those areas which got their petrol from completely different refineries. This, of course, meant they sold out of petrol quickly, leading to local news stations running stories about petrol stations running short, which led to more people trying to fill up before the nationwide fuel drought struck their beloved motor...
* An example happens in the third issue of the four issue miniseries of Kaboom's
* An example involving a convention, when the Sidemen (then still known as the Ultimate Sidemen) went to EGX 2014 (the event formerly known as Eurogamer Expo), they didn't have their most famous member
* An example involving a unit made up for the show. Early on, it was decided that time on the station would be measured in cycles, possibly to avert
* An example involving re-runs: From the fall of 2015 until January 2017, the holiday themed episodes of
* An example, in which Kevyn actually is trying to convey important information — but he's been talking to scientists all day and needs to recalibrate for his military watchdog:
* An example is at the end of the Indian casino episode, where Captain Hero preaches the moral of the story; that it was wrong for him to let innocent people die so he could make some money. Instead he preaches that although white people slaughtered the Indians and took their land, they shouldn't be allowed to have casinos because casinos bring out the worst in weak minded white people. He concludes his speech by yelling, "U.S.A.!" repeatedly while the crowd cheers along in a spoof of the film
* An example is used in the first episode; it's particularly blatant when Appa sneezes toward
* An example not involving potatoes, but the other unpleasant aspects of K.P. duty. Following one of Lou's usual screw-ups in
* An example not related to Bubs is Strong Bad naming his preferred kind of
* An example occurs within the series: until they were forced into the open, no one (except possibly a few high-ranking HYDRA leaders) had any idea about the existence of the Inhumans, thinking the odd one they ran across was simply some random superpowered human. Following the events of Season 2, knowledge of Inhumans and that aliens were involved with them is widespread (if not completely understood) around the world.
* An example of absurd Stock Footage comes from the Zucker brothers' classic
* An example of a double failsafe failure. After several tragic mid-air collisions (most notably over India in November 1996, claiming 349 lives) a system was introduced to prevent such collisions from happening: all airliners were equipped with TCAS (Traffic and Collision Avoidance System), detecting other aircraft on a collision course and telling the crew if they should climb or descend to avoid a crash. Then, in January 2001, two Japan Airlines aircraft with a total of 677 lives onboard nearly collided over Suruga Bay, even though both of them were equipped with properly working TCAS - because at the same time, one of the crews received commands from the ATC controller to avoid a collision, and those ATC commands were contradictory with the TCAS commands, and that plane followed ATC and disregarded TCAS, while the other plane did not receive ATC instructions and therefore followed TCAS; it was only thanks to one pilot's quick judgment and subsequent implementation of evasive action that a collision was averted, and the two aircraft still missed each other by just 35 feet (11 metres). The Japanese investigation commission asked the ICAO (International Civil Aviation Organization) to establish a clear set of rules whose commands have a priority in such situation. For some

reason though, the ICAO ignored the pleas and seventeen months later, two aircraft collided over southern Germany for exactly the same reasons, killing 70. Only then were the TCAS commands were given absolute priority.
* An example of a high-school tandem writing assignment (two students taking turns writing paragraphs that are supposed to be a coherent story) that was sent to a local radio morning show ended this way when the students killed each others’ characters in the third and fourth paragraphs.
* An example of a poorly implemented gimmick: Paste Pot Pete. (Pete later changed his name, because it was too silly, even for
* An example of a power copier with this problem. Congratulations Aria Blaze, you've copied some of
* An example of a prophecy coming true because somebody wants it to occurred in "Rightful Heir". The Klingon messiah Kahless said he would return on Borath. After 1500 years of waiting the Klingon religious leaders decided to use science to make the prophecy come true. They created a clone of Kahless and programmed it with Kahless's memories, essentially making it identical to the original. Thus, as the prophecy predicted, Kahless returned from the afterlife on Borath.
* An example of a subverted one is in case 3 of the first game. Jack Hammer, an actor,
* An example of a tactical victory and a strategic loss is the Battle of the Glorious First of June, between the British and the French in 1794. The French harvest in 1793 had been bad, and the French government feared a popular uprising because of it. To avert this, in the spring of 1794, they bought over a hundred shiploads of grain from the United States, and sent a fleet of warships to escort the convoy of grain ships. Of course, the French couldn't buy such a large amount of grain without the British hearing about it. So the Admiralty sent the Channel Fleet under Lord Howe to intercept the convoy. The cheerful French Admiral Villaret de Joyeuse, commanding the French escorts, after a few preliminary brushes with the British fleet, joined battle with Howe on June 1st (13 Prairial in the French Revolutionary calendar). Howe won a great victory, taking or sinking seven French ships and damaging 13 more, with none of his ships taken or sunk. HOWEVER, the grain convoy, which was the centerpiece of the whole affair, made it into Brest, losing only one ship, and that to bad weather. The French people were fed, the government was saved and Howe screwed the pooch. Howe was given the Order of the Garter, more for propaganda reasons than anything else, and his retirement from active command was accepted. (Admittedly, he was 68.)
* An example of a villain using this trope is found in Marvel's 1990s series
* An example of "cis" being used outside of the context of gender are cis fats
* An example of gameplay change done right would be the arcade-style mashfests in Cyberflix's two games,
* An example of how cheap heat attempts can still fail if you don't read the crowd right. 2008 House show in the Quad Cities for TNA featured '
* An example of how television could be killing us - if calling 911 from a cell phone, don't count on them simply being able to do a quick trace and find out where you are: the best a trace could get is the nearest tower to your location, and the number of the phone itself would be useless, as it would only indicate where you were when you bought that phone line. In fact, as of February 2015, a
* An example of incompetence in a newly-joined hierarchy: Gilderoy Lockhart, for all his ego, is a masterful storyteller. But since flying and memory charms are the only things he can do, teaching Defense Against the Dark Arts is beyond his physical competence.
* An example of Moat Cailin's lethality: 2000 years before Aegon's Conquest, King Theon Stark goaded the Faith to launch a crusade against the North, which they did through Moat Cailin, landing close to a quarter of a million men on the planet. Within a month, that number was reduced to a few hundreds of starved, deathly ill survivors of animal, plant and futile attacks on the fortresses.
* An example of Speed's speed, he ran from New York to Genosha (off the coast of Africa) before Wiccan could teleport there. He also searched the entire place in the time he spent waiting for Wiccan's near instantaneous teleport. As Wiccan put

it "Um, Tommy, how fast are you exactly?"
* An example of the character injury variant of this trope exists in
* An example of the edge on edge part comes as an aversion and justified trope. Assassin and Saber are fighting, and Assassin always parries because his sword can't take the kind of abuse real blocking would require. Saber, on the other hand, has a magic sword and doesn't have to worry about such things, so she gets annoyed at his refusal to match her in a contest of pure power.
* An example of the "possession via angry ghost" variety occurs in the
* An example of the scenario which this page is actually about appears at the climax of
* An example of the trope that predates Pope's coining of the term comes from John Dryden in
* An example of this is where the camera pans over an extremely long and elaborate chute for rolling a ball on to. After the camera pans over this for some time, we see the Coyote at the top of the chute with a
* An example of this occurred with a British teenager travelling in Australia. He went out for a trek alone without a mobile phone or supplies and got lost. He survived two weeks in the wild. His dad, on hearing the news, said he felt partly, "Yay! My son is alive and well!" and partly, "OMG! What a fucking idiot! I am going to kick his arse!".
* An example of this working to the character's benefit is Jeremiah Gottwald, the
* An example of "trick by the villains to lure the heroes into an ambush": The 1970s
* An example of what Paperinik routinely does. On one occasion, the Beagle Boys decided to empty Duckburg to sack it and choose to organize a marathon with Paperinik's secret identity as the prize. Ticked off at the scare he got before finding out what was happening and that the BB didn't actually know his identity, he decided to forgo beating them up on the spot and rerouted the marathon, getting them caught in the act and beat up by
* An example of why revolvers are just better for criminals: Unlike most semiautomatic weapons, spent shells remain in revolvers after firing, lowering the chances of leaving incriminating evidence.
* An example played seriously occurred in the first volume: after a vampire (
* An example so classic, jokes about it pre-date the concept of this trope: a wit from the 1960s noted this definition of a "longhair" (a person of culture): "he can hear the William Tell Overture and not think of the Lone Ranger." The piece of music referred to is from the Rossini Opera
* An example so famous it's taught in US History classes is Upton Sinclair's
* An example specific to one monster: Time elementals (which first appeared in the 1st edition but were later converted to the 3rd edition in the third party book
* An example: Start at the North Pole. Go to the equator. Turn right 90 degrees. Continue along the equator. Turn right 90 degrees. You will reach your starting point.
* An example that can't just be blamed on fannish obsessiveness: The big reveal of
* An example that does not involve capital punishment was the trial against Arthur Andersen LLC for their destruction of the files relating to Enron. To establish
* An example that doesn't concern organizations but individuals, with the
* An example that had nothing to do with humans occurred about 3 million years ago when North America connected to the once isolated South America and caused what's known as the Great American Interchange. Species from both continents would cross into the other but it was definitely more one-sided in favor of the north as many of the native predatory marsupials, terror birds, giant rodents and native ungulates were outcompeted and replaced by canines, big cats, camelids and elephants. However there is some debate on whether it was as simple as competition as some ground sloths, terror birds and giant armadillos managed to make it all the way into North America, some theorize that the extinction of the South American megafauna was more to due with the ice age that was starting up adversely affecting the southern ecosystems and the northern animals just took advantage of the now vulnerable natives.

* An example that happened with an angle instead of a match (pardon the pun; this is going to involve a certain Olympic gold medalist). After the end of the Invasion angle, Stone Cold was part of the Alliance while
* An example that has gone unnoticed for decades: Paramount altered Col. Philip Green's jumpsuit from the

* An example that is both this and a Post Ass-Kicking One Liner (after one ass-kicking, but before the next) from
* An example that isn't actually a "work": the outrage caused by the book
* An example that lead to a retool and eventual aversion is Angelica in
* An example that looks funny in English: the German electronics company Siemens. Though the German pronunciation, ZEE-mens, is retained in English-speaking countries, dirty-minded anglophones giggle at the similarity to the word "semen."
* An example that predates the Web would be James Burke's BBC series
* An example that probably came about because of lack of knowledge of French;
* An example that's still too new to see if it'll really have this effect, but interesting regardless: the new
* An example that was clearly on purpose would be when the Villain describes his future plan for the prey animals, and visualizes what it will be like.
* An example: the one time he uses his sorcery to control the weather, he nearly causes an ice age
* An example we often hear referenced but have yet to visit in the narrative is Asshai. It's not entirely abandoned and hosts a few thousand inhabitants, but is so large (you could comfortably fit several of the most populous cities of the setting side by side within its walls) that it may as well be.
* An example where the character in question exaggerates their accomplishments occurs in
* An example which specifically starts out meta and goes on from there, in-universe:
* An example with games released in Europe, PEGI restricts simulated gambling to adult audiences only, but games released before then retain their original rating.
* An example without falling: When Wilbur is coming in for a landing in
* An example with rather more serious consequences was the Colony Laser, Zeon's answer to the Federation's Solar Flare System, which was fired early in an attempt to prevent a secret surrender offer. It was completely wrecked as a result, denying the Principality a potentially war-winning superweapon. Apparently, it didn't occur to Gihren to wait for the Colony Laser to be completed, then
* An example with two males: Jin Akutsu (6'0) and Taichi Dan (4'10) from
* An example would be '70s!Erik's "Imagine if [your claws] were metal" remark to Logan.
* An example would be the fact that unlike other shooters, the shots you fire aren't instant and actually travel through the air, and home in on the opponent. Some weapons have more homing than others, and you can use powers to make the shots
* An example would be the protective clothes and armor that are ubiquitous in the setting. There are free public charging stations to ensure your gear is always ready to ward off the basic hazards, and common protective gear able to stand up to the void of space or other common local conditions are so ubiquitous as to be virtually free. However, as a
* an exceedingly large number of named partners. (Example: The real firm Ziffren, Brittenham, Branca, Fischer, Gilbert-Lurie, Stiffelman, Cook, Johnson, Lande & Wolf.)
* An excellent example of his addressing this, specifically with respect to
* An excellent modern example of this is the reveal that the United States was spying on (among others) Germany's Chancellor, Angela Merkel, despite the US and Germany being putative allies. Germany expressed outrage, as did many other European Union countries, and publicly, the US issued various
* An Excellent Mystery: Brother Humilis arranged a marriage for himself with a very young girl prior to going on Crusade, since he knew he'd be gone for years and wanted to have children. However, when he returned, he entered a monastery rather

than completing the contract. She then supposedly entered a convent; the plot is set in motion when it is realized that she never arrived at the convent.
* an exceptionally large warhammer) wherein Robert wins the throne by smashing Rhaegar's chest in.
* An exception is generally made for pediatric nurses, as looking too formal might distress the children.
* An exception is the Argonians, who upon death return to an ambiguously-transcendant entity called the Hist, which then returns the soul to a new mortal body.
* An exception that proves the rule was Savio Vega's stint in the World Wrestling League, which he successfully took control of after turning face around the same time company founder Richard Negrin turned heel (
* An exception: The Fifth and Tenth Doctors both have only minor vision problems.
* An Excess Male takes current problems in the PRC and projects them onto the near-future. Due to the lack of Chinese women, the government has granted women the right to marry more than one husband, with the first husband still being the nominal head of the family, and has encouraged families to take on the women's family name (rather than the husbands') to encourage the birth of more girls. Nonetheless, families more often than not prefer male sons and girls are only deemed valuable by greedy parents hoping to sell them for an exorbitant bride price. Not that the situation is better off for the titular "excess males" who are viewed suspiciously by society and their government as volatile, sex-crazed, and potentially murderous due to their unmarried status.
* an excess of nicotine. It's very unreliable for an assassin who does not have permanent access to the victim's personal belongings and therefore it has hardly been used. Also, a lethal dose of nicotine is usually a blatant giveaway of the foul play unless the toxicity screen test is provided several days after death.
* An exchange also occurs at the end of the episode "Mutantcy on the Bouncy" after Darkwing and the Rubber Chicken defeat Cement Head.
* An exchange late in the movie between Mitch and his new girlfriend Jordan:
* An Exchange of Hostages and its sequels deal with a medic/torturer assigned to the resident Space Navy.
* An exchange with a disgruntled customer on Campbell's official Twitter feed culminated in this when the company's representative asked, "What can we do to help?":
* An exclusive private school, which it predates. The one student who is immune to the process manages to escape and tell authorities — who prove to be alumni, and drag him back to undergo the procedure (now corrected to work on the likes of him) as the assassination he'd tried to prevent is successfully carried out.
* An executive takes a prospective employee to lunch at a restaurant. If he puts salt on the food before tasting it, he's clearly someone who jumps to conclusions without investigating the situation and is unfit for the position.
* an exemplary of the "ridiculously over-sized enemy battle art" trope seen commonly in early RPGs, spanning the full height of the screen.
* An Exercise in Futility doubles the size of the empire and gets over his insecurities.
* An Exercise in Futility has the Kalharian Empire. They aren't so bad, really, provided they conquered you a long time ago.
* An exhibit in partnership with the Natural History Museum in London for the upcoming third
* An exhibition in the Centre Pompidou consists of a series of films of this happening from lots of different camera angles, many of which evoke classic scene transitions.
* An expanded lineup of Neco-Arcs (aka the NEKO spirit race) run the Ahnenerbe cafe in
* An expanded version of the Battle of the Bastards (which sees Tyrell and Tully loyalists on Jon's side and the Freys on the Boltons' side) closes out the first part of the story and ends the
* An experiment in which one group of participants watched a romantic comedy and

another group watched a drama found that the group watching a romantic comedy became more idealistic about love and romance.
* An Experiment once Scrapeface is separated from his hands. He often hovers along in a straight line, the character model itself eerily motionless like an animation bug, while other times he and others near him get horrifically distorted.
* An experiment was done to see if bi-maternal mice have longer lives by changing some eggs to behave like sperm (answer: yes, but they were also drastically smaller).
* An expert at the IEEE out of nanomachines, and thus many of the constraints of biology would be mirrored into nanotechnology.
* An explanation of the exact circumstances of Peter getting his powers, usually involving Oscorp.
* An exploding cigar packed with a lethal charge of black powder was used as a murder weapon in the
* An explosion ensues hungry, why didn't you have a sandwich instead?"
* An explosive-driven sonic cannon that would use compressed air blasts to shoot down planes was researched — and the only working model had a range of a few dozen meters.
* an explosives division need to set off a truly large explosion, this is where they go to do it.
* An extended Don Martin story has Fester making a fortune displaying his sidekick Carbunkle's imperviously hard head, but falling objects intended for his head usually land on Fester's foot — one example resulting in a yell that can be heard by the Yeti in the Himalayas.
* An Extended Performance, Trixie Lulamoon and Piercing Gaze, to each other. (This is possible because of Trixie's serious emotional problems.)
* An extended preview for the "96,000" musical number, from the above-mentioned
* an extended sequence of this running over 3 full strips are looking for a place to stay.
* An extended time-travel subplot establishes that it is difficult, but not impossible, to change your own history. Physical time-travel takes all the energy that exists in the Universe
* An extended version appeared in the pilot, where the kitten throws the ball off-camera.
* An extended version of the scene where Marty sneaks into George's bedroom posing as "
* An extensive chapter in one of his books deals with the water heater making a weird noise, and the misadventures of the hapless mechanically-impaired husband who goes off to the hardware store, only to find his wife has called a plumber.
* An extensive number of celebrities have shilled for various Japanese energy drinks over the years.
* an extensive topic on following Islamic dietary and behavioural restrictions as closely as the game allows.
* An external security consultant is given a device with enough privileges to not only control everything, but also to lock out all other admins, including the person who designed the system. The device also lacks a timeout feature; it only needs to be unlocked once to gain full admin access.
* A "Next Generation" TV movie explains it; the son Hoss never knew he had comes to the Ponderosa and learns that Hoss drowned saving a young woman and her daughter from a river during a raging storm.
* an extra content warning screen, with "TV-MA" in massive red letters.
* an extradition agreement) but it will try its own citizens for overseas crimes, which can be a bad thing because China has the death penalty and some states don't.
* An Extraordinary Journey, in reality she was just pretending not to care about this reality to put the First off-guard until she could contact the Asgard for help getting home.
* An extreme case of this occurring was in “The One With Ross’ New Girlfriend” where Joey didn’t realize he was being sexually abused until Chandler went to that tailor.

* An extreme example: an ad for Whiskas claimed that "8 out of 10 Cats prefer Whiskas." This was later changed to "8 out of 10 owners who expressed a preference said that their cats preferred Whiskas." "Who expressed a preference" means there could be twenty thousand cats who'll eat anything for every eight Whiskas lovers, but they don't count. Another way to look at it is that it's entirely plausible 8 out of 10 cats would prefer Whiskas to, let's just say: starvation, being hit with a brick, being burned alive,
* An extreme example from the episode "Blood Under the Skin": In a trial for a quest to gain armor, Finn goes through a swamp with curtains that are all full of people taking showers. Finn was mentally scarred by the sight of old people private parts, and a mother bathing her child called Finn a pervert.
* An extreme example happens in V7E11 "Gravity", when the fight between
* An extreme example is sign-language expert Barbie Reade; her sole acting credit is a single
* An extreme example occurs where this trope occurs not once, but twice
* An extreme form of this happened in 2020, as merchandise featuring Ash with Lucario and Goh with Cinderace appeared at least three months before their Riolu and Raboot actually evolved in the show.
* An extremely clear-cut example is Rias' mother Venelana, to the point the rest of her husband's harem isn't even seen. While nobody questions she earned her way to the top (you don't get a title like
* An extremely common challenge for any of the games in the series is to role-play —
* An extremely common trope in transgender fiction, as seen on sites like
* An Extremely Goofy Movie already), who is shown to be sensible but usually not very intelligent in the academic sense, is somewhat skilled in the field of free-verse poetry. This managed to surprise not only Bobby, but also Max, who had been friends with PJ for seven years at the time. His poem is about how people tend to overlook overweight people without noticing how interesting they can be.
* An Extremely Goofy Movie and the behaviors only appeared to be contrary to the description.
* An Extremely Goofy Movie, as Beret Girl takes the lead at every step in their relationship, and PJ enjoys this, contrast to how Beret Girl was annoyed by Bobby's attempts at flirting moments beforehand. Beret Girl also has a significantly deeper voice than PJ and is not much shorter, as well as going out of her way to protect him early on.
* An Extremely Goofy Movie episode "Puppy Love", PJ got a crush on a girl after she recited her poetry. He does the same thing for the same reason in this movie. In the episode "Date with Destiny", Goofy went on a dancing date with one of Max's school staff members—he does the same thing here. The final scene has some to the first movie: the trophy engraving was reminiscent of what Max and Goofy said to each other when their relationship was at its tensest moment, and Bobby calls back to two jokes in one line when he uses the word "cheesa" to describe the pizza he's holding and pointedly calls it "scrumptious."
* An Extremely Goofy Movie example below), and the central plot of the film is them competing in every sport involved.
* An Extremely Goofy Movie from back in the day revolved around Goofy's ineptitude at sports.
* An Extremely Goofy Movie has "Beret Girl". One of the few original characters in the movie who appear at the dancing scene in the credits and the girlfriend of one of the main characters, the movie proves extremely shy about telling us what her name is. Even the credits list her as "Beret Girl".
* An Extremely Goofy Movie: he immediately becomes a lot happier, less insecure, and more confident.
* An Extremely Goofy Movie: In the scene introducing the Gammas, Tank gives PJ a wedgie from both sides.
* An Extremely Goofy Movie Max teases Bobby for this. After the initial meeting, Bobby is happy to let the two be.
* An Extremely Goofy Movie: One of the Gammas hides in a bush while sabotaging one

of Team 99's bikes during the X-Games.
* An Extremely Goofy Movie, On the way to college, Max and PJ are trying to read the map, but Max is confused about which way is the right way to go and PJ admits that he has no sense of direction, so Bobby decides to help them read the map by pointing to the correct locations. Thing is, Bobby's supposed to be driving the van, and ends up driving it right through a cornfield.
* An Extremely Goofy Movie, Silvia has a dance solo in front of a strobe light.
* An Extremely Goofy Movie, Sylvia pours Goofy a cup of coffee, only for him to down what's left in the pot.
* An Extremely Goofy Movie. Their relationship ends up being based mostly on conversations with some cuddling.
* An Extremely Goofy Movie, the toy factory Goofy works at is shown to use black and white checkerboard paint to color chess boards.
* An Extremely Goofy Movie threatens to hurt him with a biscotti... somehow, though all he says on the subject is "I'm not afraid to use it!" This threat is nullified when Tank bites the biscotti right out of his hand.
* An Extremely Goofy Movie. While he studies his textbooks, Goofy is also literally exercising.
* An extremely perverse variant of this trope acts as one of the possible bad endings in
* An extremely primitive example compared to most, but Root gains one of these in
* An extremely quick one when Kimble first returns to Chicago; the first car he sees is a police car which startles him with its lights and siren, but it has nothing to do with Richard.
* An F-117 Nighthawk stealth fighter was shot down by a Serbian anti-aircraft battery
* An F-18 ramming into the primary weapon of the alien ship just as it's about to fire happens to be precisely what's needed to destroy it in
* An F1 race car from the 1980's isn't all that much slower or less safe to drive than a modern F1 race car. The biggest difference between a modern F1 race car and one from the 1980's is that modern F1 race cars are subject to a lot of rules meant to slow them down that F1 race cars from the 1980's weren't subject to. It should also be noted that manual gearboxes and foot operated clutches give drivers a whole lot of flexibility that modern automatic transmissions aren't capable of.
* An FBI agent discussing a meeting he had with a Mafia boss described the situation: he met the boss at his business and congratulated him on going straight and staying away from the mob after an earlier prison sentence. The agent, of course, knew he was the family's boss. The boss knew the agent knew he was the family boss, and the agent knew the boss knew the agent knew. Thus they carried out a conversation where both were fully aware that while they were apparently talking about the legitimate business, both knew that wasn't what they were really talking about.
* Anfield, home stadium of Liverpool FC, respectably sized at 54,000 seats after a recent expansion, has been a little less consistent about this
* An Firestar stopped Sandstorm from falling off a gorge, and Crowfeather managed to save Leafpool from falling off a cliff, and... Never mind. If one character saves another, they're probably going to end up in a relationship at some point.
* Ang, and it is built in very weird shapes that make no sense to men or elves. People who has been inside barely can describe the place (beyond vague words such like "ugly", "burnt", "angled", "deep", "rough" and "paths and overpasses winding up and down and you never know what direction you are going towards") or they do NOT want to remember what it is like. The ex-thrall confirms that nothing of its design suggests that it was built by elves, and Luthien said that none of the architecture seemed designed with people in mind at all, but it was actually designed to NOT seem homely.
* Angara are sometimes called "flopheads" due to their cobra-like hoods.
* Angband and its variants have the "Create Food" spell which creates "a pint of fine grade mush" - its taste can only be speculated upon but it's far less nutritious than "real" food. Later versions of the game replace the spell with

"Satisfy Hunger" that directly increases your satiation level, averting this trope.
* Angband and most of its variants have black markets in the town. The black market can sell any item in the game—but at a substantial markup.
* Angband are immune to almost every status effect, besides any resistances the base monster might have.
* Angband: Besides torches and lanterns, the game has the Phial of Galadriel, the Star of Elendil, and the Arkenstone of Thráin. These unique artifacts are all permanent light sources.
* Angband has a type of cursed item called the Amulet of DOOM. It is the only item in the game which is capitalized like that.
* Angband has close to 1000 unique monster types, the reason for this happening in such a game is probably more that the designers started running out of ideas rather than not being able to animate distinct monsters.
* Angband has Rings of Teleportation, which teleports you randomly every once in a while. Some of its variants have other sources of random teleportation, including mutations and weapon properties. Additionally, the Teleport and Phase Door spells teleport you to a random empty space within a given radius.
* Angband, if you cast a spell without enough mana, there's a chance of damaging your CON (health stat) temporarily or permanently. Also, the Genocide/Banishment spell will subtract 1d3 HP for each monster killed by the spell. Potions of *Healing* recommended when casting said spell in a monster pit.
* Angband, the Iron Helm of Gorlim is described as a gaudy, barbaric helm, and it aggravates all nearby creatures.
* Angband (which at that point is nothing more than an even bigger bragging rights reward).
* Ang Dating Daan fame has no qualms about cussing during his "Bible expositions", although the local television ratings board in the Philippines do beg to differ.
* Angélique due to the sheer amount of slash-worthy guys involved, making this a rather funny occurrence.
* Angélique in 16th century Paris, as former slaves acquired from the Mediterranean Turkish and Arab traders, or children of former slaves, and were much sought-after by the French aristocracy as exotic "pets" / status symbols. In the books, they display fierce loyalty to anyone who treats them as human beings, including the eponymous heroine and serve them as spies, couriers, and bodyguards.
* Angélique Kidjo: Singer from Benin who emigrated to France and combines music from Africa with other influences from abroad.
* Angélique series of dating sims for girls. Yes, he is a possible love interest in every game he appears in.
* Angélique series, your relationship values effect both the dating sim and the world-building sim portions of the game. Guardians who like you will give you free buildings and guardians who like your rival will either give her buildings or destroy yours.
* Angélique where in one chapter, the heroine has to select a priest to deliver her message to the people of the continent she is cultivating. Due to the difference in the flow of time between the Sanctuary and said continent, she meets her choice as a child one day and then as an adult the next, causing her a great deal of confusion.
* Ange is whipped when she is put on trial and sentenced to a hanging.
* Angela. Also what else could she do? Angela is way too stoic even for an inner monologue.
* Angela Anaconda also lost. Angela says it would normally be enough but she counted on the $200 cash prize to make up for losing her father's new wallet and the $200 he kept inside it.
* Angela Anaconda and was surprised at how much more he wanted to see.
* Angela Anaconda as well as the episode "Good Seats", which reuses footage from the short, Gina Lash gets a very large drink at the movies. On learning that refills are free, she slurps the whole thing down in seconds, then asks for a refill.
* Angela Anaconda because it promotes witchcraft. After they realize what it means,

they panic more.
* Angela Anaconda episode "Snow Mercy," Gina gets pretty upset when the snowball war that Angela and Johnny are having causes a slice of pizza she was enjoying to get covered in snow. When Angela wonders why Gina was so upset, Gordie tells her about the "snowball incident." A few years ago, a young Gina saved up to buy herself a hot dog that she was old enough to eat whole instead of someone cutting it up for her. But just as she was about to take a bite, a random snowball knocked the hot dog out of her hands. Gina was so devastated by this that she would visit the spot where the hot dog fell for weeks and leave a bouquet of flowers.
* Angela Anaconda: In "Yellow Book Road", a panicking Bunny Manoir laments that her husband is worried about her disappearance. Cut to him sleeping in his seat at the living room, not seeming to be that upset.
* Angela Anaconda: It's très interesting how they did this. They had models come in and take about 30 or so pictures for every mouth movement and a mouth movement for every letter in the alphabet. They then took the model's face and mouth movements and created each character.
* Angela Anaconda Nanette assigned to hike with the same team as Angela and her friends. Nanette demands that the others help her carry what she packed, and at one point pulls out a hairdryer and asking where she can find an outlet.
* Angela Anaconda: Nanette Manoir isn't just a rich bitch, she's the queen of all rich bitches. Sweet and polite towards the adults (especially the teacher), she exercising all her worst traits on Angela, her friends, and anyone unlucky enough to be considered beneath her (which is just about everybody). She uses her family's wealth and status to assert her bitchiness.
* Angela Anaconda, when Gordy and Angela's brothers are making a soufflé and tell her to be quiet because it's in the oven.
* Angela Anaconda, where Angela forgets to wear green on St. Patrick's Day. She tries to get detention so that she can avoid getting pinched during recess, and fails each time. She manages to escape this fate when she turns her jacket inside out to green.
* Angela Anaconda where Angela is determined to discover the mystery of the boys' room since the boys are in and out in moments while there is always a huge line outside the girls room. When she manages to sneak in, she mistakes the urinals for drinking fountains and thinks the reason the boys are so fast is because they are only in to get a drink.
* Angela and Diabola so much that she sends in return the wettest, most wicked thoughts she can muster up, which are enough to make Angela convulse in shivers. Later on, Angela uses this power on other people. Inverted with Diabola, who can hurt and attack people with her mind.
* Angela and Heather have moved into this after running into each other by chance and catching up, and by the end, both have apologized for what led to them breaking up.
* Angela and Hodgins as well. She forgot she was married before, they broke up because she had commitment issues, then got back together and married. She got pregnant and they faced the possibility of the baby being born blind due to a genetic issue. Later, Hodgins lost his family fortune to Pelant and worst of all he was paralyzed from the waist down in season 11, leaving him bitter and angry. He asks for a divorce, but Angela talks him out of it and things finally begin to get better. Angela even got pregnant again in the end of the series, though the explosion terrified them both.
* Angela and Hodgins had it as well. She broke up with Hodgins in season 4, then dated her college friend Roxie, then intern Wendell, then finally got back with and married Hodgins. He tried a Tindr-like app and had a few dates before reuniting with her.
* Angela and Jack. They started off as friends, moved to UST, went on one date, decided it was too perfect and would end terribly, changed their minds, got engaged, found out she was
* Angela and Shane Desoto have both inherited their powers from their grandfather
* Angela Bassett than her husband, putting her own career on hold to help him with

his, putting up with an unhappy marriage for over 11 years, and not even getting the satisfaction of ending things on her own terms.
* Angela Bettis TV series (which ultimately didn't get picked up due to the film's disappointing ratings), and she took the role hoping it would lead to the sort of steady paycheck that working on a TV show provides.
* Angela Brazil, writing in an earlier and more conservative age, openly described her schoolgirl characters kissing.
* Angela. But she's raised by Angels, a deity race who are in war with Asgardians.
* Angela Carter are shown to be just as willing to embrace their sexuality.
* Angela Carter is essentially a commedia dell'arte play in prose form, with the titular cat helping his owner get in bed with Pantalone's young beautiful wife. Several stock characters of the genre are referred to by name.
* Angel, according to Gunn, lying is the "one" thing Fred isn't good at.
* Angela Cicero, the Acid Angel, is a slasher who seduces men into sex before killing them with her pheromone-activated acid secretion powers. Before she was resurrected as a slasher, she seduced her best friend's husband and was murdered for it after the friend committed suicide.
* Angela considers Sir Edward to be her top love, but admits that Moroha is easily her "Number 2".
* Angela Costain also had a short-lived voiceover career, with Nabiki Tendo being her only anime role (or major role, period). Her sister, Elena Wotten-Costain filled in during Season 6, and also never did any other voicework.
* Angel act as a general deconstruction of the trope, although play some parts to a T.
* Angel acted like this every once in a while for the first 2 seasons of his show, as he had to play private eye to figure out who he was supposed to beat up with his vampire powers/how to best beat them up.
* Angel actually like this in general, taking pride in helping "damsels in distress" or anyone else who needs his help. He's served as a loyal
* Angel actually takes up the offer, as she feels humans will never respect mutants. Darwin also claims to defect, but that's only a ploy to give his teammate Havok a clear shot at the villains (and also to shield Angel). Not that it does him any good
* Angel addresses the Buffy/Angel romance where Cordelia and Wesley use this and imitate the pair.
* Angel a dead character has to be dismembered by a loved one (Holtz by Connor, and Lilah by Wesley) due to the (incorrect) belief that they were killed by vampires.
* Angel, a demon is getting married to Doyle's ex-wife. As part of their culture, he must eat the brain of his wife's last husband to ensure a proper marriage. They are genuinely shocked and offended when Doyle refuses.
* Angel", a demon tries to eat Doyle's brain as part of a ceremony before said demon marries Doyle's ex-wife.
* Angel, a doctor is shown asking his receptionist for a random clue for him to solve. This happens twice and he's unable to solve either of them, asking "give me another one". The doctor ends up being somewhere between incompetent and evil.
* Angela does this at various points during the story, and even during her level up animation.
* Angela eventually meets up again with Seamus, her ex-boyfriend from when she appeared in
* Angel". After exorcising the evil ghost haunting her new apartment, however, another not-so-evil ghost who'd helped defeat it became her roommate. Also, there was the Hyperion Hotel, which was infested with a paranoia demon before they managed to remove it.
* Angel after he finds out. Later, Angel visits him in his hospital bed and tells him:
* Angel, after it is revealed that Wes, while making an ad for Angel Investigations, put down the wrong phone number.
* Angel, after making a violent prison escape, Faith asks if Wesley's okay. His response: "Five by five."

* Angel: After the Fall has LA in hell, with both sun and full moon up at the same time, which makes things interesting for werewolves. And vampires. And, well, it's hell.
* Angel: After the Fall Hell A. Everyone knows that demons are real, everyone remembers seeing death or possibly actually dying, and everyone knows that Angel's a hero.
* Angel: After the Fall. It should come as no surprise what music plays when Spike gets in an elevator...
* Angel: After The Fall series). He is determined not to become a monster and continue being a hero, though he's really trying to prove he's better than Angel, who he blames for letting him get turned.
* Angel: After the Fall when the psychic floating fish Betta George flooded Illyria's original form with Wesley and Spike's memories of Fred.
* Angel. A group of very Nazi-like pureblood demons (though it was said somewhere else that even 'pure' demons have some human taint, so they weren't as pure as they thought.)
* Angela has a less-violent example of this trope. The first time she shows any sort of magical talent is after being told that she's going to be a
* Angel-A has to prove her claims to André. First she makes an ashtray float in mid air, but he believes in a trick. Then she makes her cigarette butt grow back which eventually convinced André.
* Angela has two false leads. Andy is the first one, and the trope is played differently than usual, with Angela being portrayed as the wrong one, by continuing her affair with Dwight. In a later season, she marries and has a child with a
* Angel, "A Hole In The World", Gunn had Knox incapacitated and held a large object over his head, wanting to smash Knox's head in, but couldn't do it. Probably because he knew the team needed to get as much info out of Knox as they could. (Wesley does him in later).
* Angela in the most famous scene of the film. Bonus points: not only is it the last shot of the film, but the screen freezes and the end credits scroll over it, so viewers get to have the thing burned into their brain. It's somewhere between horrifying and hilarious.
* Angel aired its last episode, if not before. It irritated Joss since it prevented him from doing a shocking intro for anyone who had even looked at the website or read articles pertaining to the show.
* Angela is like this. She renamed herself because she hated her birth name of
* Angel, a.k.a. Tachibana Kanade to each other they find they have no reason to fight anymore.
* Angela kills a police officer this way (the syringe was just filled with air) in
* Angela knows a spell which uses dragon bones to predict the future, although she herself admits that interpreting them is tricky. A group of elves at some point created a spell which could outright see the future, no interpretation necessary....and it killed them when they tried using it.
* Angela Lansbury. Feeling she was too young at 23, she lobbied for Milady instead, but was turned down.
* Angela Lansbury most famous, as well as the most famous TV variation.
* Angela Lansbury, who portrayed Mrs. Potts, was initially reluctant to provide the vocals, thinking herself a poor fit for the style of song. At the directors' request, the actress recorded one take as a backup, in case no other options were found. Lansbury reportedly brought the entire studio to tears with her performance.
* Angel. A later line in the episode makes it clear that the puppets' explicit goal is to steal the innocence of children and export it into the hell dimensions.
* Angel, Alexis Denisof and Amy Acker play love interests Benedick and Beatrice (no doubt delighting the fans who wished to see them together on the show).
* Angel all the time since his friends believe that is the practical solution every time he is in danger of having lost his soul. Inversely his vampire ex-friends chain him up for having a soul. Can't really win that one.
* Angel also had a sewer-dwelling demon on whom Angel frequently used to pound in order to get information.

* Angel also had to deal with a literal version of this trope, having an actual biological son who loathed him specifically for being a vampire.
* Angel also played on this in the episode "Guise Will Be Guise", in which Wesley found it necessary to impersonate Angel. When his cover was blown, he tried horribly to keep up the facade.
* Angel also suffered this. Doyle was the first casualty, followed by Cordelia and then Wesley. Lorne broke ties with Angel after killing Lindsey and then died in the comic continuation. By the series finale, Only Angel, Spike, Illyara and Gunn are left standing.
* Angel also used this quite extensively. The Beast dripped blood onto the artifacts it had gathered as the final part of its ritual to blot out the sun. The blood of a virgin was used to expedite the birth of Jasmine. Lorne's blood was used in another ritual calling for the blood of a demon. And of course Hamilton's blood turned out to be full of the power of the Senior Partners. There are probably a lot more. Any show with vampires and magic is likely to feature a lot of this trope.
* Angel? Also, Wesley's wardrobe gets considerably darker as he becomes a darker character.
* Angel: Although she'd flirted with him on Buffy a lot in the early seasons, once they change over to the spin-off, the possibility of intimacy with Angel doesn't come up in Cordelia's mind until she glimpses a world in which she never joined the agency. This resulted in Angel inheriting Doyle's visions instead, causing him to go mad.
* Angela Merici was a very good looking tertiary member of the St. Francis Order with blond hair. She showed her determination to dedicate herself only to God and teaching by cutting her hair short and dyeing it with soot.
* Angela Merkel's split with Marianne Faithfull. The song's lyrics includes lines like "All the dreams we held so close seemed to all go up in smoke / You can't say we're satisfied". A spokesman for the group said, "We are surprised that permission was not requested. If it had been requested, we would have said no.", though the group took no action to stop her.
* Angel & Faith, a flashback shows Angelus killing Drusilla's father by tearing out his heart with his bare hands.
* Angel & Faith, a magical plague has mutated some of the residents of Hackney, London into magical creatures. The area they live in is now called Magic Town.
* Angel & Faith. As he explains, a vampire's bite stimulates the brain's pleasure centers, and the sensation was able to calm Willow down.
* Angel & Faith has the titular characters, especially at the start of Season Nine, where Angel is recovering from having killed Giles.
* Angel, and Angel and his friends are horrified because Yarbnie demons (all of them), are absolutely peaceful and harmless.
* Angel and Angel gave her sanctuary in his apartment. Wolfram and Hart then hire a demon to kill Faith, but Faith kills it instead.
* angel. And as angels have next to no body fat (in order to be able to fly), even a fairly slim human woman is just his type by angelic standards.
* Angel and being a despairing rant rather than a self-righteous justification. Jasmine got a shorter one, shortly before that.
* Angel and Big Joe: Angel needs his phone fixed. Joe tells him to call the phone company. Angel says "How am I going to call the telephone office if my phone's broken?"
* Angel and Buffy during season 3 of her show, although how 'ex' they were varied from episode to episode. Angel eventually decided to leave town so she could move on (and he could get his own show).
* Angel and Faith, allowing the Beast to weaken her before he killed it, as he wanted to kill Faith himself. Luckily, she manages to get away.
* Angel and Faith in the main series to get their own series/mini-series (Angel/Faith, Spike, and Willow).
* Angel and her absence is literally when everything goes wrong in Season 3.
* Angel and his allies in Angel Investigations. Holtz's assistant, Justine, is also a clearer example, int that she hates all vampires because one of them killed her

sister.
* Angel and his film career (spent fighting gangsters, robots, vampires and other monsters).
* Angel and his team finally attack the Circle of the Black Thorn and try to avert THE apocalypse.
* Angel, and is driving out of town, we see Angel has hung a sign on the back of his truck that reads, "Cops suck".
* Angel and letting him feed on her. They both fall into a coma and end up reliving Angel's life, with both providing appropriate snarks and jibes.
* Angel and locked in a closet with a little food, water, and a bucket to be used as a bathroom; by the time of the premiere, Wesley has so thoroughly broken Justine that he can dissuade her from attacking him by simply threatening to take said bucket away.
* Angel and nothing is happening in Los Angeles — not even a young couple making out on a midnight stroll — without her approval.
* Angel, and now his father could never approve of him, being dead. This hit home.
* Angel and parted on good terms. When they reconnect in LA and both start working for Angel, they develop a very strong but completely platonic bond. They bicker like siblings, but they always have each other backs in a fight, and they clearly adore each other.
* Angel and so on). It's an example of the trope where the corporation is the character and one that changes the very structure of the show, since the nemesis from the first episode onward is transformed into the ally. Very Wheedonesque.
* Angel and Spike attempt to do this over Buffy during "The Girl In Question," but their high vampiric alcohol tolerance prevents them from getting properly hammered on the relatively small amount of liquor they've brought on their plane.
* Angel and Spike do this over Buffy, just adding one more aspect to their competitive relationship. In "
* Angel and Spike have pulled this off a few times, fighting alternately for good and evil.
* Angel and Spike sometimes hide underneath their trenchcoats so they can walk around in the sun.
* Angel and team used this trope a couple times to infiltrate the evil law firm of Wolfram and Hart. This nearly backfired on Angel when another lawyer points at him accusingly only to start talking about a business deal he thinks Angel had a part in.
* Angel and the Ape and would rather just draw comic books anyway; his lovely partner Angel O'Day is a crack shot who can take care of herself.
* Angel and the Ape to emphasize the female partner of the duo. Under the new name it lasted to the end of 1969.
* Angel and the Ape, with a watered-down version of Grodd's powers that just lets him cloud the minds of people around him so they see him as a normal human.
* Angel and the Badman, the doctor suggests looking at Quirt's gun to see how many notches are in the grip, i.e. how many men he's killed. (It's never said whether he actually has any such notches.)
* "Angel and the Ghost". In the spoken-word bridge of the song, her ghost promises to haunt him at night and lay her head before his feet.
* Angel and was made up on the spot by the writers; it has no basis whatsoever in reality.
* Angel, an elderly demon sorcerer who appeared barely able to walk at first, but when attacked turned out to be faster and stronger than someone in his prime. Although as a demon, it's possible that this is just in comparison with humans and by his own species' standards he was very weak.
* Angel: "Angel and I were never intimate. Well, except that one time..."
* Angel: Angel and Spike are bickering like five-year-olds as usual, but then...
* Angel": Angel and Spike visit the Rome branch of Wolfram and Hart, and it's entirely identical to the Los Angeles branch.
* Angel Angel and Wesley describe Cordelia's acting as having "good projection" and said that she had "taken the role and made it her own."

* Angel: Angel and Wesley often lock horns over the best way to handle cases. Wesley always finds a way to outmaneuver him, with disastrous results. One of these guys is too clever by half.
* Angel, Angel becomes human for one episode by touching the blood of a particular demon. He feels his heartbeat for the first time in centuries and actually needs to eat. Buffy comes to town and they share a day as "normal" lovers. Except she is still a slayer who has to fight evil, and he can't help her. So Angel undoes it all by the end of the episode, and he is the only one to remember the entire thing.
* Angel, Angel, Down We Go after the Manson murders; also one of the last films of Jennifer Jones (who plays the mother), giving it a touch of hagsploitation.
* Angel, Angel, Down We Go, Bogie takes a very expensive necklace from Astrid and tosses it back and forth with the band members, saying he'll only give it back if she goes skydiving with them.
* Angel, Angel, Down We Go opens with Tara as a child, being yelled at and ignored by her wealthy, constantly fighting parents.
* Angel, Angel, Down We Go, sexually frustrated Tara stares at Bogie as he sings onstage, resulting in a closeup of his crotch.
* Angel, Angel, Down We Go: Tara's earliest memory is of walking into the bathroom and catching her father in the shower with another man.
* Angel: Angel gives one of these to Spike in the episode "Smile Time" when Spike discovers that Angel has become a puppet.
* Angel", Angel has become his evil alter-ego Angelus and is about to kill vampire slayer Faith.
* Angel: Angel has one in the final episodes by sending Lindsey to kill one of the leaders of the Black Thorn; in case he survived, Angel sent Lorne to finish him off.
* Angel", Angel is having a phone conversation with Giles, trying to get a hold of Willow to help solve the Fred/Illyria problem. Before the show was cancelled, Willow was planned to show up in Season 6 to help separate Fred and Illyria's souls.
* Angel: Angel is rather fond of crashing through skylights. He also smashes through a lot of windows. The fact that he's a vampire might account for his ability to survive such an impact, but not the fact that he never gets cut.
* Angel. Angel kicks a grenade (lying in the hand of a dead W&H mook) into the air so he can grab the pin with his teeth, then shakes his head violently to free the pin. Given that he's undead, he survives the blast and escapes.
* Angel", Angel nearly makes this choice when he learns that the only way to save Fred is to let hundreds of thousands of people die in her place. He initially spits out an angry "to hell with the world" and storms off to perform the ritual as the scene cuts away. When it returns, though, he's still standing at the threshold, unable to actually go through with it, and he finally, sadly turns away.
* Angel: Angel's black leather longcoat is badass enough to stay that way even when it's being worn by a muppet-Angel in the episode "Smile Time". And in "Guise Will Be Guise", Wesley is forced to impersonate Angel. By the end of the episode, Wes has become so badass that he's giving orders to everyone while Angel stays in the background griping that he'd like his coat back.
* Angel Angel's body; when Gunn arrives to the office with burritos, he mistakes Gunn for the delivery boy and leaves a tip.
* Angel. Angel's first sidekick Doyle is a half-demon, and he dies in the process of them saving a group of demons. Indeed, Angel spends nearly as much time helping innocent demons as he does humans.
* Angel: Angel's journey of redemption at times involves him actively taking on aspects of this trope.
* Angel", Angel sold himself to Wolfram and Hart so that his teenaged son Connor could be placed with a new family and new memories, to be safe and happy. It doesn't quite last - the kid's memories are restored a few months later - but while he gets the memories back, he keeps his new, much more stable, personality, so it's still an improvement.
* Angel, Angel sought to help a boy possessed by a demon. Did Angel call Willow or

try to cast a spell? Hardly. He sought out a Catholic priest. It should also be noted that when Angel and Wesley enter the church, a nun immediately recognizes Angel as a vampire on sight (a talent not even Buffy had).
* Angel", Angelus is trapped in a cage most of the time, but throughout his interrogations by the members of team Angel he works at their points of mental or emotional weakness. Unlike most versions of this trope, Angelus knows most of the team's pressure points already because he became aware of them when Angel had his soul, with Angel just not the type of person who would normally use that knowledge).
* Angela Nicely story "Puppy Love", one of the dogs that Angela, Maisie, and Laura are walking poops on Angela's driveway, then Mrs. Nicely steps in it.
* angel Anna (both occupying very attractive bodies at the time) are sitting in the backseat of the Impala with Dean at the wheel. Dean apparently ships them, since he can't resist comparing the scenario to a Penthouse forum letter.
* Angel annual. Angel was offended by how inaccurate it was, while Spike thought it was funny how his counterpart in the movie was a woman and Angel's love interest. A man named Jeremy Johns who had personally been rescued by Spike during the crisis also protested how inaccurate the movie was.
* Angel: Anyone who touches Gwen Raiden receives an electric shock powerful enough to kill them (provided they aren't undead), much to her chagrin.
* Angela often addresses Brennan as "Sweetie", particularly when explaining some social nuance Brennan missed.
* Angela Petrelli, who managed to keep such major secrets such as superpowers,
* Angel) appeared in front of Connor when Cordelia (good but was possessed at the time) was trying to convince him to kill an innocent teenage girl. To make it more anvilicious, Darla was dressed in white while Cordelia was dressed completely in black.
* Angel, a private hell where former Wolfram & Hart lawyer Lindsey was sent to featured a very special Torture Cellar. On the surface, it was a nice suburban neighborhood, where Lindsey was a white-collar office worker-type with a beautiful wife and young son. But when he had to go down into the basement, a demon would force him on to a table and then cut out his heart. Worse, his heart would regenerate after the ordeal was over and his memory would fade, but he would be left feeling the trauma of his torture. Inevitably the cycle would be repeated again and again, until finally Charles Gunn took his place.
* Angel are better at fighting demons, and sometimes have to hire a real PI when actual investigating is required.
* Angela recalls Angelus having been a ‘lover’ of men and women in his time, but he was naturally into sex as a means of control and asserting his dominance rather than actual love, leaving Angela herself conflicted about her feelings for Buffy as she still thinks like a man with eighteenth-century morals (Liam would have enjoyed being with two women at once, but the idea of two women on their own would have been weird at best from his perspective).
* Angel are the best example of this trope in any Whedon show. Anyone who joins is guaranteed to develop into a badass within one season. And Gunn's crew.
* Angel. Artode, a demon guest at Wolfram & Hart's Halloween party, is wearing what appears to be a green leather jacket.
* Angela's Ashes contains a character named Angela, but it's not clear where the ashes come in.
* Angela's Ashes cynically observes at one point: "Doom. The favourite word of every priest in Limerick." Or something to that effect.
* Angela's Ashes, In the beginning of the book, a daughter is born to the McCourt family. The normally alcoholic father Malachy McCourt dedicates himself to his daughter. A week later the daughter dies, sending Malachy back to the bottle in grief.
* Angela's Ashes, Malachy Jr frequently moons Oliver and Eugene to try to make them laugh.
* Angel. As a vampire, Angel is several hundred years older than those closest to him. Despite that, he ends up becoming best friends with Cordelia.

* Angel as better than the main character (who went off the deep end in the previous season).
* Angel, as he was determined to travel during the day while hiding under blankets, jackets, and such, thus smoldering in the sun.
* Angel as he was trying to either scare Angel off or anger him into a direct confrontation.
* Angela's Magic Lesson by one of the original creators, in which the reader chooses the consequences of the titular witch casting a random spell on herself. The project is fueled by commissions, with people paying to create new routes or elaborate on existing outcomes with Epilogue sequences.
* Angel, as of series end, she's capable of being defeated by a minion of creatures she previously barely noticed. And the closest thing she has to a worshiper just drinks a lot and called her a smurf.
* Angela speaks with the young Company Founders about 7 dream, in which they form a company, and of the horrible things they will do to protect the secret, and of how it's a necessary evil.
* Angel as remarked upon by Cordelia, is a surprisingly good cook for a blood-drinking vampire. Given Angel has lived well over 200 years he’s bound to have picked up some culinary skill at some point.
* Angel", as (the very drunk) Fred and Wesley need to catch an elevator quickly.
* Angela talks to Pam about her friend "Noelle," whose boyfriend went to corporate to cover for her. Pam seems to see through it, though.
* Angel", at a party, being asked if he wanted to dance. The ensuing Imagine Spot is brilliance.
* Angel, at his worst he's a petty old man willing to sacrifice the lives, happiness, and even sanity of people who love him in order to have his revenge.
* Angel, at least until he grew a little hair in the fifth season. This came as a shock to Cordelia.
* Angel at Lindsey. Lilah starts to join in, but they snap at her to shut up.
* Angel, a vampire has his heart surgically removed so that Angel can't stake him. Unusually for this trope, he is eventually defeated not by locating and destroying his heart, but by waiting until the time limit was up.
* Angel, awakens from millions of years of stasis to find herself trapped in a human body, her cult all but extinct and her armies long since turned to dust. She spends a lot of time moping about how powerful she used to be. It's actually quite poignant to see how she deals with the modern world.
* Angela Wytte was also a near-victim (saved only by intervention of the king) , but was pushed over the
* Angel Azul of the Bolivian New Xtreme Order tends to have shots with transparent wings that later leave him.
* Angel Batista from Homicide dates a detective from Vice. That's OK because they're allowed to see people from other departments. When they broke up, a colleague says to Angel that office romances never work out, but asks whether he can ask her out.
* Angel Beats!, a dish so spicy that nobody in school can stomach it except her. She likes the taste and finds it to be the only thing on the school menu worth eating. The spiciness doesn't affect her in the least, while when another character tries it, he's downing multiple glasses of water just to try and ease the suffering.
* Angel Beats!. Although, she doesn't give the same grace to Hinata when it's his turn to climb:
* Angel Beats!, and not only succeed but get away with it. Several episodes later, Otonashi, having befriended Kanade, comes clean about the entire thing, resulting in her being reinstated as president and him and his accomplices being punished.
* Angel Beats! Before then, there's only the weak explanation that one character is an angel and some other characters are musicians.
* Angel Beats! blames herself for not being able to save her siblings. Needless to say, nobody else does.
* Angel Beats! can actually be killed permanently- they just return to "life"

within a few hours. But suffering enough damage to kill a living person still hurts a lot.
* Angel Beats!) deaths, only to return to life a few minutes later whole, hale, and cracking wise.
* Angel Beats!) due to a beam jutting out from the slope the characters were sliding down. When they reach the bottom, they look back and conclude that their enemies must have gotten her.
* Angel Beats!, due to the fact that everyone is already dead and in the afterlife, everyone will fully recover from any injuries, no matter how fatal or violent. This leads to several scenes where characters are killed for humor.
* Angel Beats! features a universe where no one can die, so obviously this trope is used frequently. It's made even funnier when there are "instant replays" with the sad, dramatic ending theme in the background.
* Angel Beats! has an additional episode included in the 7th Blu-ray release.
* Angel Beats! has Hinata's assaults on Yui be played just as much for laughs as hers on him.
* Angel Beats! has Yuri, who had to deal with a group of robbers who broke into her house and told her to bring valuables to them quickly, or one of her three siblings would be killed every ten minutes. It took thirty minutes for the cops to come.
* Angel Beats!: In a pre-afterlife flashback, Yuri stares at her own blood-covered hand, after she fails to prevent some sadistic burglars from murdering her siblings. She tries to bring the burglars a vase she thinks is valuable to calm them down, but breaks the vase and cuts her hand, leading to this trope. At the time, she thought that she metaphorically killed her siblings by breaking the vase; but the burglars probably would have been unimpressed by the offering anyway, and she eventually decides that she should stop blaming herself for their deaths.
* Angel Beats!: In episode 5, Angel catches Otonashi by the shirt just as he's leaving an exam to find out what her name is. He ends up introducing himself and getting her name in return.
* Angel Beats! is a rolling boulder. Apparently, this is massively averted, as not only the resident ninja Shiina managed to find a small nook to hide from the boulder (and pull away most of the members, Hinata tackles Otonashi to the corner of the hallway, thereby evading the boulder (remember, a boulder is spherical, the hallway is rectangular, so the edges on the bottom won't be swept by the boulder). Indeed, the only casualty is the guy who kept running.
* Angel Beats! is, at least on the surface, an example of this. She's quiet, and impassive seeming even when dishing out violence or receiving grievous injury. She has emotions, but she rarely shows them.
* Angel Beats!: It's played for laughs in the very first episode. Twice. On the main cast.
* Angel Beats! it was implied that Otonashi's sister died on Christmas Eve.
* Angel Beats! light novel, Shiina does this to Hinata. The cuts are so clean that he doesn't feel them, and thinks she missed until Yuri tells him to fall down already.
* Angel Beats! manga implies this is the case with Shiina, a feudal era ninja who ended up in an afterlife modeled on a modern highschool.
* Angel Beats! packed in a small girl's body, although isn't evil like the latter and isn't an alien like the former.
* Angel Beats! puppy. The puppy trap was actually meant for Angel, so it's possible she has the same weakness.
* Angel Beats!, respectively), but their singing voices are by marina and LiSA.
* Angel Beats!: Tachibana uses her "Angel Program" to create wings to make her seem more "angel-like." They're beautiful and seem to be mere decoration—until the moment she actually uses them to glide off a building.
* Angel Beats! there is a running joke about Hinata saying something questionable and Otonashi asking him if he's gay. And Naoi's... rather extreme admiration of Otonashi after his episode also gets played for laughs a lot.
* Angel Beats!. There's no literal wall, but the world around the high school complex just disappears into a thick fog once you travel beyond the hills.

* Angel Beats!, this is what the Battlefront was created to fight because they feared they would be reincarnated as something low such as a barnacle. Fortunately they get over it later.
* Angel Beats!, this is zig-zagged with Otonashi and Angel's plan to lure Yui away from the rest of Girls Dead Monster by insulting her guitar playing and stealing her guitar, which they discuss on-screen. Angel follows the plan to the letter, but since the rest of the band had previously criticized Yui's poor performance, she gets depressed instead of angry, and doesn't give chase. Otonashi and Angel sneak back to the band's room, and when Yuri storms out again, she sees Angel and gives chase, enabling Angel and Otonashi to execute the second phase of their plan as they'd originally envisioned.
* Angel Beats! to get her cohorts to stop arguing in class. Both times it attracts Angel's attention and Otonashi is forced to make up some excuse to cover for her outburst.
* Angel Beats! uses a giant halberd most of the time, though he sometimes fights with guns.
* Angel Beats!, when she activates Guard Skill: Distortion. They phase through her harmlessly.
* Angel Beats! - While strictly not exactly an military school, due to the size of SSS, one of the biggest organizations within students, all students attending there have a high chance of learning how to use firearms.
* Angel Beats!, Yuri's aim, to diminish Angel's appearance of infallibility through defeat in a baseball competition, may result in the obliteration of another team member.
* Angel because Cordelia was doing a horrible job as Nora, but couldn't/didn't because they knew Cordelia would be upset if they did.
* Angel becomes this. She wants to kill Faith; it doesn't matter if Angel wants to redeem her. The former lovers even come to blows because of it, and part on bad terms.
* Angel before he could do anything but brandish some meat cleavers menacingly.
* Angel be on every channel that it'll happen. Also, doing this is the culmination rather than the start of her plan, because anyone who sees the broadcast will fall under her control.
* Angel". Bethany, the girl with telekinesis, had it awakened when she was abused physically and sexually by her father. It also flared up when someone threatened her in an alley early in the ep.
* Angel, between Connor and Cordelia; later lampshaded in the comics with Connor's line about "My first time was with a woman who changed my diapers?!" (Though she didn't actually raise him.)
* Angel between them. The funniest of these is when Angel doubts that Cordy's cheerleading experience allows her to remember the moves he's teaching her; she does a "cheerleading routine" with her sword and ends up about an inch away from him, holding the sword to his throat; whereupon he laughs nervously and says "Go Team!"
* Angel black evening gown. Likewise, after Cordlia gave birth (but Carpenter had not) she was unconscious and only shown from the chest up.
* Angel Blade, is how dramatic and serious characters can be, even with all their naughty bits on display. It's even funnier whenever the main character actually becomes aware of it.
* Angel: both Gunn and Wesley obsessed about her before and after their relationships.
* Angel budget from the get-go, it managed to have the "skeleton" effect right from its start.
* Angel", Buffy and Angel face this problem when Angel spends a night in Buffy's room. Buffy offers Angel her bed (because he's wounded) but he declines. Their first kiss occurs about 24 hours later.
* Angel", Buffy kills a random mook vampire by shoving a burning torch/brazier against its chest, which causes it to go up in flames like it was made of straw soaked in gasoline. Given how the series occasionally spiced up vampire-killing up

with decapitation or holy water, it's a small wonder fire didn't come up more.
* Angel Bunny, Fluttershy's rabbit companion, has shown extreme signs of this as of "
* Angel. But by Season Five, the public at large still doesn't seem to realize that the paranormal exists. How the heck they explained everything that happened the previous year is never revealed. At least Jasmine's "message" never made it much past LA, as she was defeated during her first global broadcast.
* Angel - but she still has the disease that was killing her before she became a vampire. As a last resort, Lindsey brings in Drusilla to vamp her. On having this "family tree" explained to him, Gunn has this to say:
* Angel, but the realization that they were a family, which he has massive unresolved issues with.
* Angel by herself" subtrope, as immediately afterward Illyria is given "one free shot" by Wesley's killer, who thinks she's the powerless human Fred and not the angsty hellgod that she actually is. Her rapid transformation from one to the other as she punches the bad guy is priceless.
* Angel by the fact that he's the only person in LA wearing a trenchcoat.
* Angel carries Buffy like this in "Halloween" (after a spell causes Buffy to act like a
* Angel carries Cordelia like this in the first episode before jumping off a balcony and later does the same with Fred in "Magic Bullet".
* Angel Catbird: After Strig becomes the titular superhero, he comes across a baby bird whos mother is begging Strig to return it to its nest. However, there's also a bunch of cats around who beg Strig to eat it or play with it, or let them have it. Strig decides to return the baby to its nest, which the cats don't take kindly too, calling him rude names over it. They come around eventually, though.
* Angel Catbird sends a giant drone he calls "The Drat" (Drone Rat) after Angel Catbird and his group. It's designed to look like the biggest, most irresistable cat toy around. It has twirling feathers and fluttering wings, multiple wiggling rat-tails, a catnip and rotting salmon aroma, and concealed missile-firing powers.
* Angel Catbird: Strig gains a pair of wings whenever he turns into the titular superhero.
* Angel Catbird: Strig usually only wears a set of shorts when he's in Angel Catbird form.
* Angel Catbird. The main protagonist gains the ability to turn into a human-owl-cat hybrid (essentially a humanoid cat with feathery wings).
* Angel, charging towards an army of demons and monsters they failed to prevent their incursion into Earth.
* Angel Charles Gunn, enter a Chinese tea shop, owned by an old Chinese couple:
* Angel comics, Angel gets up to this with Illyria in Season 11. Then it's revealed in Season 12 she still has access to her original form.
* Angel complicates the trope, being anatomically female but intensely gender fluid, and identifying as a straight woman on some days and as a gay man on others. Jerzy, a man who identifies as gay with a bisexual past (but who may be fooling himself about the "past" part), finds Angel confusingly attractive, enough to get into a relationship; Richie, a straight man, apparently sees Angel as male when they first meet, and doesn't show any immediate signs of attraction, but is evidently attracted (and
* Angel computers that they really are guardian angels. They also plan to invoke this trope when they find Earth, which they calculate will have collapsed into barbarism.
* Angel concerned a vampire that removed his heart surgically so that Angel would be unable to stake him. His heart being removed was symbolic of the fact that Angel was responsible for the death of his lover. His final comment, when he eventually runs out of steam, at least left an impression, since it was directed at Angel, and his well-known curse never to know the greatest joy. "I lived. You just existed."
* Angel Connor gets a Care-Bear Stare from Cordelia when he tries to kill her.
* Angel: Connor, upon returning to Earth from a hell dimension, carries around bits and pieces of demons he's killed. At one point, after a fistfight with a drug

dealer, he cuts the guy's ear off to add to his collection.
* Angel. Constantly makes references to culture and events that may not EVER exist in that universe.
* Angel". Contact with the blood/sweat of Billy triggered male characters to murderous hatred of women. This causes men to assault women close to them, and almost drove Wesley to kill Fred.
* Angel continued exploring the idea of hell dimensions. Angel's own son Conner is eventually lost as an infant to "the Quor'Tath, darkest of the dark dimensions". Although that world's also not seen onscreen, Conner reappears after a few months as a very powerful, and very traumatized and angry, demon-slaying teenager.
* Angel convincingly enough for the Circle to let him join; in so doing, he's able to identify their members, and arrange for them to be assassinated separately by different members of his own team.
* Angel cool... and Wesley admits he was saying the evidence out loud to work it out and didn't know who the guilty party was until he named her.
* Angel Cop. For some reason, his conversion to a cyborg also involves a personality change.
* Angel Cop) gloats that those who once mocked his genius would now be destroyed by it. Raiden makes short work of all the bad guys attacking the facility.
* Angel Cop has the Red May, a pro-communist terrorist group from Japan.
* Angel Cop involved a Jewish conspiracy to take over Japan (this was removed in the dub).
* Angel Cop suffers from this as it takes place under the belief that the Japanese economy would continue to grow; instead, the economic bubble popped in the mid '90s.
* Angel Cop: Taki has a tape recorder inside a false cigarette box. He also bugs the villain via a microphone hidden inside a cigarette that he had left in the ash tray.
* Angel Cop: The story initially starts by dealing with terrorism at the end of the 20th century, where Japan is the largest economy in the world. The communist radical group, the Red May, are trying to bring down Japan's economy and take over the government. The protagonist becomes a cyborg in the manga while she remains human in the anime.
* Angel Cop was rated "14" in Nova Scotia when released in separate volumes for violence and offensive language. A year after the last single volume, a complete collection was released, and ended up getting an "R" rating for offensive language throughout and extreme violence.
* Angel: Cordelia Chase becomes one following a few lessons in swordsmanship by Angel.
* Angel, Cordelia Chase's new boyfriend, a being from another dimension, makes her a drink called "mochra". He mentions the ingredient he needs to properly make the brew isn't available in our world. Cordy dubs the tea "mock mochra".
* Angel. Cordelia does this when spoofing the Buffy/Angel romance in "Fredless". And she actually does say gasp.
* Angel, Cordelia ends up with a similar problem, combined with mystical pregnancies.
* Angel Cordelia is handing out business cards for their business with the ambiguous slogan "We help the helpless". One of the guys she hands them to assumes she is a hooker and Doyle is her pimp.
* Angel. Cordelia is snooping around an empty house when she has a vision of being attacked by a big ugly demon. As she recovers from the headache, she turns around and finds herself face to face with the very same. "Real helpful!" * Concussion*
* Angel: Cordelia is this to Angel. Doyle originally played this role. Wesley tries to assume it after Cordelia is gone, but by that time his relations with Angel are strained, to say the least.
* Angel, Cordelia kicks a demon between the legs, only to get a metallic clonk and a sore foot.
* Angel: Cordelia makes a commercial for Angel Investigations, but they never have it aired. Doyle is the on-air "talent," and he's very uncomfortable on camera.

* Angel", Cordelia notices that the house she's in has no reflective surfaces at all. Out loud, she realizes that she's in a vampire's house and challenges the owner — until her Sunnydale instincts catch up with her mouth and she tries to pretend that she was joking.
* Angel. Cordelia's absence is also certainly a factor in causing everything to go wrong in the third season.
* Angel: Cordelia tries it to prevent Angel from using his "patented burst of violence" to get past a security guard.
* Angel, Cordelia tries to move in with Angel when she gets sick of her own roach-infested apartment, saying "It's not that you're my last resort; it's just that I had nowhere else to go."
* Angel Cordelia waking up from her coma with partial amnesia of her time in Los Angeles so that she only sees Angel as a friend.
* Angel Core before promising to murder everyone the Vault Hunters have ever spoken to in retribution.
* Angel Core has SS-style uniforms (including the SS lightning bolt insignia), and experiments relating to the supernatural.
* Angel Coulby. The producers said that they had looked at hundreds of potential Guineveres, but Angel Coulby was the only one that could nail the quirky, clumsy servant girl, but also "bring the queen" when the occasion called for it.
* Angel couldn't all work on the same thing, and stabbed another. Though they were all involved with what happened to Fred, and Wesley and Sanity have never been friends where she's concerned. It helps that they felt most of their employees deserve to die, so they didn't have much of an incentive to set up proper conflict resolution. Harmony also staked a secretary in full view of most of the management, during a business meeting. Though she probably would have got in trouble if the demons they were meeting with hadn't assumed it was a blood sacrifice and taken it as an apology for their earlier treatment.
* Angel cries into Buffy's chest/stomach while kneeling in front of her after he returned from hell.
* Angel curse they originally thought but is, in fact, this trope played straight. In series 1, When Wesley and Cordelia discuss the idea of Angel and Rebecca Lowell having a relationship, Wesley points out the curse's requirement is "perfect happiness" and also points out how rare that criterion actually is. In series 2, Angel can get away with having sex with Darla, who he has complicated emotional ties to because he experienced "perfect despair" with her. In series 5, Angel doesn't lose his soul by having sex with Eve because he doesn't trust her and they were under a mystical compulsion. Wesley reiterates that "perfect happiness" is very rare and most relationships are formed from "acceptable happiness" instead which is why Angel can have sex with Nina without his soul being endangered. As a result, the only people Angel can't have sex with are the women he regards as his true loves (and the ones he truly wanted to be with): Buffy and Cordelia.
* Angel cushions his fall. Lack of injury is justified in that Faith, who has superpowers, is shown to take most of the hit and Wesley is still in noticeable pain afterwards.
* Angel Dana may well like to talk about mistreating little girls given her backstory, but turns out she's a Slayer, so when Spike does this her reaction is basically, "Score."
* Angel Daniel Holtz came to the present: frozen inside a statue by the demon Sahjhan.
* Angel, Darla uses this to frame Angel and turn Buffy against her by tricking Buffy's mother, Joyce into letting Darla into their house, biting her, then leaving Angel holding Joyce as she leaves just as Buffy returns. Making her think Angel had bitten Joyce due to the bite wounds on Joyce's neck.
* Angel demons, no matter how harmless they were. This appears to have been mostly out of boredom after the vampire nest they had used to fight was wiped out.
* Angel Densetsu doesn't have friends at the start because he looks like a walking waking nightmare, and rumours painted him as a violent drug addict. The joke is he's a sweet, kind boy who always tries to think the best of people, even when he's

being beat up. His parents love him though. Averted in flashbacks to his old school though. Before his transfer, Kitano was actually very well-liked and highly regarded by both the faculty and student body of his old school. Its only transferring to Heikiku High that his friendlessness starts.
* Angel Densetsu has the main character, Kitano, threatened as though he is the demon king himself, going as far as to bring people into the school, with the sole purpose of beating up Kitano, or better yet, get him expelled. Of course, Kitano is anything but evil — he merely looks evil.
* Angel Densetsu, his mother, while pretty, scares people because she looks like this.
* Angel Densetsu: "I call this strategy triangle attack alpha!" "So, basically is just surrounding a guy and jumping him together, right?"
* Angel Densetsu, Ikuno says this about Kitano when Ryoko asks her how she feels about him, then follows up by saying she likes Ryoko and her other friend as well.
* Angel Densetsu it evolves into real friendship, with Yuji declaring that Kitano is the best friend he's ever known.
* Angel Densetsu. Midori overhears and realizes the truth, culminating in the more heartwarming relationship between her and Ryuchiro.
* Angel Densetsu: Seiichiro Kitano is the scariest character to be incorruptibly pure.
* Angel Densetsu. Suda is meant to be a parallel or antithesis to Kitano. While Kitano is frightening in appearance and often called a monster, while actually being kind and gentle, Suda is quite attractive and charismatic, whom people often adore and proclaim to be awesome or hot (If by people, you mean Ikuko). However, he is more like a monster in his behavior, often lying to people and manipulating them to achieve his ends. He even goes so far as to try to turn Koiso against Kitano in order to emotionally devastate him and win the war going on between them at the time.
* Angel Densetsu. They have only four main fighters but won a fight against a far more numerous enemy force in the last chapter.
* Angel Densetsu: Two generations worth. This trope seems to run in the Kitano family and plays it straight in that the Kitano men may look scary but both have the hearts of saints.
* Angel Densetsu when Ikuno's father, a martial artist hired in a teacher's role to discipline/expel the good-natured but thug-faced Kitano offers a handshake in the men's bathroom (intending to actually start his attack once he has a grip on the student's hand, and choosing the bathroom for being semi-private), but Kitano rejects it because he just used the urinal and it would be gross/inappropriate to shake hands without at least washing their hands and drying it off.
* Angel Densetsu, when the sunlight reflects from Takahise's knife into Kitano's eyes.
* Angel Densetsu with a very poor grasp of history and current events.
* Angel department. This gets him on the bad side of a powerful necromancer.
* Angel/Devil Shipping: Audiences ship a nice, innocent and wholesome character with a character who is dark, mean and evil.
* Angel/Devil Shipping: Romance between a heroic, sweet-natured character and a darker, more devilish character.
* Angel/Devil Shipping: Shipping an innocent and pure character with a dark and cruel character.
* Angel Devoid. Your "dialog" choices consist entirely of two buttons that allow you to act either intimidating or receptive in response to conversation.
* Angel did it in the tie-in short story collection "The Longest Night". A man was killing people by using a demon's help to steal their youth, because he was desperate to see his son grow up. He tries it on Wesley, and when Angel gets there, it's the boy who's growing older while Wes becomes an old man, at least until Angel manages to break the spell.
* Angel didn't seem capable of loving her while he was evil, Angel continually tries to help and support Darla when she's human again and later when she's pregnant. He is distraught when she is bitten by Drusilla and when she stakes

herself, despite her being evil during the latter event.
* Angel did once get into a home despite the invite...Kate didn't want to invite him in when she attempted suicide, but Angel was able to get in the moment her heart stopped and revived her. Either that or the Powers That Be broke the rules to let him save her.
* Angel did the dance of joy for 3 moons. She then has Numfar demonstrate said dance.
* Angel did this a few times, covering several characters in demon slime. And Angel's car keys in one ep.
* Angel did this very frequently. A notable subversion occurs in "Hell Bound".
* Angel dissection scene involving, amongst other things, a completely random bear.
* Angel does this and later complains about being billed for the broken window.
* Angel does this. When a person is under the influence a certain type of magic, they can paint pictures that are portals to the worlds in the paintings.
* Angel doing Tai Chi with Buffy leads to some awkward tension, as they
* Angel Down: Ariel has a cybernetic left arm, wich replaces the one she lost in an explosion
* Angel Down Chloe's hair comes all the way to the bottom of her back even when braided.
* Angel Down paladin who's favored weapon is a long range anti material sniper rifle.
* Angel Down : Samuel's mark allows him to move through walls and doors.
* Angel Down, Sussex": After the alien being's human guise is unmasked, she escapes by leaping through a closed window. When one of the characters catches up to her, she appears to be unharmed.
* Angel Down, Sussex", a UFO incident is preceded by a farmer finding some of his livestock dead and strangely mutilated. Given the part of England it is, though, it's sheep instead of cattle.
* Angel Down, Sussex features alien visitors whose appearance and actions vary depending on the expectations of the people they encounter. That one of the characters gets his rectal cavity probed really says more about him than about the aliens.
* Angel Down with both Samuel and Ariel, who both have traditionally villainous scars despite being heroes. Samuel has a large slash over his left eye, and Ariel has extensive burns on the entire left side of her body.
* Angel: Doyle didn't take the news of his demonic heritage well, and ended up boarding himself up in an apartment and chain-smoking all day.
* Angel Doyle is perfectly human—on his mother's side. His father was a Brachen demon. Later in the series and the comics there are more half-demons. Many parents are not known, but it is implied that in most cases, the father is a demon and the mother is a human.
* Angel: Doyle's ex-wife Harriet prepares to marry into a family of apparently humanized, peaceful demons who nonetheless make, um, unusual wedding preparations. Harriet's prospective father-in-law reads from the to-do list: "First we greet the man of the hour. Then we drink. We bring out the food. Then we drink. Then comes the stripper, darts, and then we have the ritual eating of the first husband's brains, and then charades." The demon family, of course, objects to the charades.
* Angel, Doyle tries to come to Cordelia's aid by dramatically driving Angel's car through the gates leading to a mansion. The attempt fails as the car simply crashes into them and stops due to the gates being too tough.
* angel dude after he meets two nice - but traumatized - demons and freaks out.
* Angel during their fight, said boost, along with his fighting skills, let him take Hamilton down in less than a minute.
* Angel Dust is more concerned when Kira's abs and pecs are cut up than he is with losing an arm and the hotel taking major damage.
* Angel. Each slowly reach over to touch her (causing the audience to anticipate either a very startled Winifred or a hilarious accidental-gay joke) when she suddenly says that Angel and Cordy have been gone too long and they'd better go look for them.

* Angel entitled "Destiny," Angel and Spike beat the living crud out of each other in their race to drink from the Cup of Eternal Torment. The cup turned out to have a "Made in China" sticker on the bottom and was filled with Mountain Dew.
* Angel episode "Apocalypse, Nowish" using a map of recent mystical disturbances to find out where the Beast was heading.
* Angel episode "Calvary" features a demon that can move so fast that it makes Connor look like a noob in battle.
* Angel episode. Cordelia is magically shown several conversations her teammates have about her by the demon Skip, all of them seemingly very insulting towards her. However, Skip is actually deliberately showing her very specific parts of the conversations taken out of context for his own agenda.
* Angel episode "Dad", Wolfram and Hart have cameras in the Hyperion Hotel and are spying on the team. Lorne hears the humming sound the bugs make and passes a note to Angel telling him that they are being watched and explaining his plan. He also sneaks a hint into their conversation that he should read the note in the janitor's closet to avoid being spied on. The team then Bluff The Eavesdropper for the rest of the episode: even the audience don't know it was all an act until the end.
* Angel episode "Fredless", Wesley and Cordelia summarize events for newcomer Fred's benefit.
* Angel episode had a demon species who had no lips or tongue, and communicated with teeth-chattering similar to Morse code.
* Angel episode "I Will Remember You" is any indication, she's willing to dump Riley at the drop of a hat if it looks like Angel's willing to be with her again. Whether you like these two together or not (or believe they're "soulmates", or whatever) you have to admit that Buffy's actions are pretty unhealthy. One of the many reasons she turns Spike down is because he loves her without his soul, which in turn questions why Angel didn't love her without his (hinting that maybe he didn't love her as much as she believed). The fact that she unintentionally compares all her other love interests to him doesn't help. "End of Days/Chosen" reinforces just how ridiculous she's being, even though she does turn him away and she does tell Spike that she loves him. The continuation comics though seem to show that she is still divided over the two of them.
* Angel episode "Sanctuary". She was a little less than sane at the time.
* Angel episodes "Darla," "Dear Boy," "Orpheus"... heck, a LOT of Angel is backstory contributing to various season arcs (Darla in Season 2, Holtz in season 3, etc.) as well as one or two "one-shot" backstory episodes such as "Why We Fight," the mentions of Angel's past in Vegas in "The House Always Wins," and "Are You Now or Have You Ever Been." Well, a guy does accumulate a lot of backstory in 240+ years of living...
* Angel episode "Smile Time" Angel finds himself turned into a muppet-like felt puppet. Not strictly speaking a cartoon, but related.
* Angel episode "That Old Gang Of Mine," Cordelia gets Fred to go out to a bar with her and Wesley, after spending all her time inside, fearing the outside world because of past bad experiences. The bar gets attacked by a gang of demon hunters, and Fred spends most of the rest of the episode clinging to Wesley's arm.
* Angel episode "The Girl in Question", Spike is shown flashing across a crowded room as fast as Angel can. Darla, Angel's sire, also speeds up to Cordelia when she's pregnant and hungry in "Offspring".
* Angel episode "The Ring", Cordelia and Wesley briefly pretend to be cops. Cordelia blanks on a name to call Wesley, then glances at his yellow suit and introduces him as "Detective Yelsue."
* Angel, even though her body was still walking around and could do a very good impersonation of her.
* Angel, even though it is potentially fatal to humans, to incapacitate him so that he can be captured and resouled. Most of the episode "Orpheus" depicts their resulting shared hallucination.
* Angel, even though she was the one who killed him in the first place. It's odd.
* Angel example is Lorne's head asking for the praising and extolling of his virtues. For whatever reason, his particular variety of demon can survive

decapitation—the body needs to be mutilated. The bad guys didn't forget to, though—the Groosalugg, knowing Lorne was Cordelia's friend, switched his body with a soldier.
* Angel, except that when the creature reaches its maximum of 3000 demons, they'll all be expelled from its body... in a spirit form that will let them directly possess living humans, instantly turning 3000 people into vampires in one night.
* Angel, Experiment 624, can turn any experiment back from good to evil by singing a siren song; however, if that experiment is created after her, the song will have no effect on them. This is shown when she sang to Stitch (experiment 62
* Angel Exterminatus about how everyone just thinks of him as Siege Guy and assume he has no appreciation for culture.
* Angel Face (1953), Diane Tremayne conspires with chauffeur Frank Jessup to murder her parents by tampering with their car. Both Diane and Frank are arrested for the deaths, but they get married so they cannot be made to testify against each other.
* Angel Face, Demon Face: When a sentient creature's appearance is based on the morality of their owner.
* Angel", Faith mentioned using 'loud' as one of the basic torture methods when she kidnapped Wesley, but she never got to use it.
* Angelfall, after a few days, the amputation of his wings doesn't seem to bother Raffe much, at least physically.
* Angelfall, Penryn dons a little red dress, strappy shoes, and makeup. Raffe is stunned for a moment when he first sees her like this.
* Angelfall. Raffe is not used to walking long distances, so his feet become raw pretty quickly and he starts moaning.
* Angel featured a demon arena where all the captured demons had bets taken on them. Angel is captured as well, and spends the episode trying to free them... and then realizes that he's unleashed a whole gang of demons on Los Angeles.
* Angel features the Gem of Amara, a ring that protects vampires from all their usual weaknesses like staking and sunlight. It allows Spike to catch Buffy off-guard at school, and, more horrifyingly, allows a pedophile vampire named Marcus who is known as a "master torturer" to go out in the daylight unharmed, and shows him at the beach, happily hunting his favorite prey: children. Angel has to find a way to stop Marcus without getting immolated by the sun.
* Angel fights a blind but extremely skilled and deadly assassin. Since Angel is a vampire who lacks a pulse, breath, or body heat, she can't sense him unless he's moving. He takes advantage of this fact to defeat her. She is shown terrified out of her wits before Angel kills her.
* Angel figures out that an overzealous cop is a zombie when he decapitates the cop and the cop keeps on talking for awhile.
* Angel Fire: The discovery of evolutionary levels in fruit flies is presented as a Nobel-winning breakthrough rather than evolution-as-usual.
* Angel fits this, especially with her improvised flying blade of beheading in season 3 "Fredless".
* Angel for 150 years so feelings can’t just be swept aside so easily.
* Angel for a brief moment, but neither recognise each other due to it being three years ago.
* Angel for getting pregnant during filming have only added to that sentiment.
* Angel for the Beta Couple between Gunn, Fred, and Wesley, while Angel began a relationship with Cordelia. Gunn and Fred were the Beta Couple on their own during seasons 3 and 4. While Angel and Cordy were trying to figure out that they were in love with each other in the third season and god knows what happened to Cordy in the fourth, Gunn and Fred had a fairly stable relationship from the time they got together until "Supersymmetry".
* Angel. Fred is about to get revenge on her former teacher who condemned her to a hell dimension, when her boyfriend Gunn steps in and kills him so she won't become a murderer. Fred resents this and the incident causes them to break up.
* Angel, Fred liked to call Wes Bookman during their all-too-brief romance before Illyria came to town.
* Angel: Fred spends her first few months back on Earth as an agoraphobic hermit

who covers the walls of her room with her mathematical formulae until she is able to finally come out of her shell, symbolized by her painting the walls. This is a hold over from her spending five years hiding out in a cave in a demonic dimension, where the only thing she could write on while trying to figure out how to get home were the cave walls.
* Angel: Fred's tendency to be this is never completely gone — just dormant.
* Angel from a spell being used by a desperate, dying father who was trying to stay alive to see his son grow up. Angel rescues Wes and the boy is briefly aged by the spell, thereby letting the dad see him as an adult before he returns to being a kid.
* Angel gets a short sword, "Solitude", similar to Buffy's that can burst into flame, and will burn him up if he loses his soul.
* Angel gets plenty of flashbacks on his spin-off series, the season 1 episode "The Prodigal" specifically shows his human life and eventual siring from Darla. Speaking of Darla, she gets an episode like this to herself in season 2.
* Angel gives an impromptu lesson about Baudelaire to a bunch of museum tourists while tracking a humanoid demon (who had told a security guard that Angel was stalking her — meaning he also had to evade the guard). It was an impressive
* Angel gives Buffy his leather jacket in the fourth episode, "Teacher's Pet". She wears it for the rest of the first season,
* Angel gives one of these to Illyria, declaring himself champion of humanity, even for a traitor on her side ("He's scum, but he's still human"). Subverted when the speech is cut short by Wesley shooting the traitor in the chest. Angel, somewhat annoyed, asks him "Were you even listening?"
* Angel, "Ground State": Angel, Gunn, and Fred are breaking into an auction house. Fred has just explained the plan in detail. The men boldly head off, one to the left and one to the right... at which point Fred shouts "Guys!" Embarrassed, they switch directions.
* Angel gun and continues to shoot while walking closer to said enemy. It doesn't work.
* Angel: Gunn after getting his brain upgrade—he stops wearing the suit after discovering what the upgrade cost him.
* Angel: Gunn and Fred juggle between this role in terms of needing information about the deeper implications of some of the supernatural elements the others are more familiar with (Gunn having just fought vampires on a street level while Fred has spent five years in another dimension after studying physics back on Earth), with Gunn showing irritation whenever he meets another vampire he's not allowed to kill.
* Angel. Gunn and Fred occasionally use guns as well, but without Wesley's showy movies.
* Angel: Gunn is instantly upgraded to über-lawyer thanks to Wolfram & Hart's surgeon. The procedure makes him an expert on human and demonic law within a few hours.
* Angel, Gunn's gang, as well as some street-level demons, use abandoned warehouses as their living and working area. Cordelia also gives birth to Jasmine inside an abandoned meatpacking plant, which is given a sinister air thanks to its rows of hanging meat hooks.
* Angel: Gwen enlists Gunn's help to rescue a girl named Lisa. It turns out she meant to steal a piece of technology, with the acronym LISA, to use it to control her powers. Gunn only finds out after the little girl he tried to rescue told him that she was in her own home.
* Angel: Gwen, the sole employee of the Files and Records department at Wolfram and Hart, looks like a normal clerk, but there's a lot of strange things about her. She acts like a living search engine, i.e. she appears to be effectively omniscient at least as far as Wolfram and Hart is concerned, she has memorised every line in every file of the cavernous records room but won't tell you any of it unless you explicitly ask her to, and begins almost every sentence with "I'm Files and Records, it's my job". At one point, she is implied to sit at her desk for fourteen hours without going home or changing clothes. Also, when she is recalling something

her eyes flicker. Exactly what she is — demon, robot, magical construct or very specialised witch/psychic — is never stated.
* Angel had a creature, Polyphemus, with an encyclopedic knowledge of demonology. There was some romantic subtext between him and Laura, a former watcher.
* Angel" had a flashback to the 1940s, where it is revealed that the Nazis have been experimenting with the creation of a vampire army.
* Angel had an ep actually named 'Time Bomb', where the team had to drain some of Illyria's power before she blew the whole world sky high.
* Angel had an episode where a Las Vegas casino owner stole the destiny of important guests and sold them on the black market. Anyone who lost their destiny would have literally "nothing" happen to them— without a destiny, they were incapable of affecting or being affected by worldly events. Eventually, the plot was foiled thanks to some celestial intervention helping a de-destinied Angel win at a slot machine, or have "something" happen.
* Angel had an episode where humans were harvested for parts for transplant to rich people.
* Angel had Angel being poisoned by a leech-like parasite that forced him to remain asleep and have crazy nightmares. The director, David Boreanaz himself, said that there were two main props of the leech, one crafted out of a spongy material with some slime on it and another that had full animatronics and cost them $85,000. He resorted to filming as little of the costly prop as possible because he felt it was too goofy looking and the cheaper sponge prop actually worked better. He wouldn't have used it at all if it wasn't for the fact it cost $85,000.
* Angel had Angel going to fight a large dragon once the city goes to hell. By the beginning of After the Fall he has become Angel's ally.
* Angel had a variant of type two, where Wesley was sucked into a book and trapped in its pages-he to help the other trapped people and defeat the people-eating worm demon hunting everyone before he could escape.
* Angel had a whole fleet of Cool Cars in season 5. Spike destroyed a few of them.
* Angel had a woman being stalked by her zombie ex-boyfriend. Turns out she'd killed him because she thought he was too needy. They agreed to work on their relationship and patched things up. Awww?
* Angel" had Charles Gunn magically influenced to "mark his territory" around the Wolfram & Hart offices during a Hallowe'en party, which culminated in his accidental wetting of a co-worker.
* Angel had Connor kidnapped only a few months after his birth and raised to his late teens in a hostile dimension, taught to become the ultimate opponent against his birth father. Angel spends the end of Season 3 and all of Season 4 trying in vain to defuse him.
* Angel had Gunn's tricked out Ford F250 known as "The War Wagon". It had a mounted stake cannon among other weapons.
* Angel had the same thing. Fred and Wes traded off or went together for research roles, sometimes with Cordelia joining in, though Gunn occasionally got in on it in season 5. Before Wesley joined the team in season 1, Cordelia did most of the research, often using the internet. Fred became part of the team in early season 3.
* Angel had two pairs who worked together at Angel Investigations, though Angel probably did not mind anyone getting together romantically.
* Angel" had Wes and Gunn get into a physical fight because they were both in love with Fred.
* Angel: Hanging around Angel and Doyle has ruined Cordelia's preference for preening, rich day trader types. (No comment on Wesley.)
* Angel has a couple of episodes dealing with this, mostly with Cordelia's desire to become an actress. The antagonist of the first episode is a vampire who preys on wannabe starlets. A later episode revolves around an actress who's aware that her looks are starting to fade, and she considers becoming a vampire in order to maintain her youth (and by extension, her career) forever.
* Angel has a few of these, including the suburban prison Wolfram & Hart sends wayward employees to late in the show's run.
* Angel" has a mass of tentacles that pops out of a portal and picks up Angel and

Fred. We never see if it had a body, but each tentacle has its own pincer mouth on the end.
* Angel has an Army of Doom. Spike responds sardonically, "Now there's a shock."
* Angel" has Angel cut during an earthquake, the blood drip onto his son's sheets, and him mentioning that if they did get trapped at least they would have food. As Wesley had learned of the prophecy that Angel would kill his own son everything that happens after this is really his fault.
* Angel has Archangel, the persona he developed after being experimented on by Apocalypse. Warren usually has wings and average healing powers. Archangel has razor sharp, retractable wings that launch out metal feathers that are dipped in his natural poison. X-Force had to call upon Archangel more than a few times, though he has since been extinguished, and Angel now possesses angelic metal wings.
* Angel has a set of retractable stakes that can pop out of his sleeves. Not blades, but just as effective, as evidenced by the piles of dust that used to be vampires. In the same series, Wesley uses a folding sword that pops out of his sleeve. He appears to hold it like a normal sword once its extended, though. When he loses his memory in one episode the practical problems of the concept are lampshaded, i.e. he nearly kills himself. And at one point, Connor shows up with an axe blade strapped to his arm.
* Angel has a slightly different premise, different tone, and most importantly, completely different characters. Put the same characters in a different situation, and they react differently. Put different characters in the same situation... and they react differently.
* Angel has a story where a search for a missing boy leads to the boy’s father, who’s terminally ill, trying to steal Wesley’s life energy. There’s a part where the rest of the team find Wes looking old and wrinkled before they manage to reverse it. They do have pity on the father, and the life energy ends up briefly in the boy, letting his dad see him as a man before he dies.
* Angel has a whiteboard which they occasionally put lists of jobs on. It goes away when they realize it makes them more focused on keeping score than on doing good; it then comes back after Connor is born, listing everyone whom they think might be a threat.
* Angel has Charles Gunn as the only black guy, though Doyle and Lorne might count as token demons.
* Angel Has Fallen magically get rid of the evidence and in fact makes it so that he now has a limited time to kill President Trumbull since the FBI is rapidly closing in.
* Angel Has Fallen on the roof of the building where the latter just tried to kill the President again, Mike intercepting Wade before he can escape via helicopter and forcing him into a showdown.
* Angel Has Fallen to assassinate President Trumbull and make Mike Banning take the blame.
* Angel has Lorne as the only visibly demonic main character who is unable to alter his appearance in any way.
* Angel has Lorne being told that he got the forehead wrong on his costume.
* Angel" has Lorne telling the story of the episode to a theatre — that, at the end, is revealed to be empty.
* Angel has memories of his son Connor removed from all of his friends' minds, so that only he remembers Connor ever existed. The difference here is that Connor still exists, just not in the minds of the supporting cast. Their modified memories of what happened the previous seasons are never fully explained, even after certain characters get their memories back.
* Angel has one to her panic room, saying you should never pass up a good cliché.
* Angel has Russell Winters in its pilot, who in turn is a client of the overall main villains of the series.
* Angel has several bottles of alcohol to choose from when Apocalypse pays him a visit. Warren Worthington III is drunk because although he managed to escape from the East Berlin fight club venue, he has no friends and nowhere to go.

* Angel has several rooms full in "Habeus Corpus", where the zombies swarm all over the Wolfram and Hart building.
* Angel has something very similar with the victims of the Skilosh demons, who got an extra eye in the back of the head.
* 'Angel' has such a feminine connotation in modern English, despite the fact that the only times angels have a specified gender in the Bible, it is male. This has led to the oddity of angels in general being thought of as being female, but most angel characters in works are male or sexless.
* Angel has the power to revive the recently deceased, which is something she doesn't like to do.
* Angel has this theme in a more upbeat fashion. While Angel & Co. try to fight the Senior Partners (and evil in general), they come to realize throughout the series that they can never defeat their adversaries. However, the point is not whether they will win against evil, but that they will fight the good fight regardless, issuing quotes like "We're not running a race, we're doing a job" and "If nothing we do matters, then the only thing that matters is what we do". In the Series Finale, they engage in a mostly suicidal mission that won't defeat Wolfram & Hart, but will hopefully set them back a few decades.
* Angel has to stay in his place. Gunn volunteers and the others don't object much, because Gunn was indirectly responsible for the death of a much-loved team member, Fred Burkle. On their return to our dimension...
* Angel have dance, which looks rather dumb with no audible accompaniment.
* Angel". Having been in a coma since the birth of Jasmine, she miraculously awakens and breaks Angel out of his growing crisis of conscience. At the end of the day, it's revealed she had never actually woken up but had instead cashed in a favor with the Powers-That-Be to manifest a body for one day. At the end of the day, her physical body dies and she disappears.
* Angel he agrees to fight a demon loan shark stalking Doyle if he finds Cordy a new apartment.
* Angel. He also used it to kill Marcus Hamilton (albeit just by punching him in the face really hard) and Drogyn in the series finale. Angelus mentioned when he killed Jenny Calendar with one that he never gets tired of doing it. Maybe Angel just got into the habit.
* Angel Heart, also got a live-action TV adaptation in 2015 which aired for 9 episodes.
* Angel Heart centres around a classical private detective, though he doesn't wear the suit and fedora as much as some of the others on this list. Unfortunately, the things he ends up dealing with are probably a heck of a lot more horrific than the other people on this list.
* Angel Heart, Glass Heart's final job from the Organization that trained her was to kill a hitman, and once she goes missing, there's a contract out on her. Several cases in later volumes have to do with this theme as well.
* Angel Heart: Harry Angel becomes the prime suspect for several murders which he didn't commit. Turns out he actually did.
* Angel Heart is an assassin trained from early childhood for the job. She develops a heart, kills herself, and is resurrected with a donor heart which carries with it the memories and soul of the dead woman it belonged to.
* Angel Heart's character, a private detective, turns out to be the very man he's been hired to track down. Bonus points in that mirrors are involved with the revelation.
* Angel Heart. The drops of rain gradually turn to drops of blood as the sex scene gradually becomes violent. Eventually, blood is pouring down the walls.
* Angel. He explains "vampyres" and the nature of Slayers to Angel and his team, much to their annoyance as they already know pretty much everything.
* Angel, he is so distraught that all he can choke out is a repeated "Please."
* Angel, he made a speech reaffirming his commitment to protecting people while watching the sun set, and as it went down smashed the magical ring that made him invulnerable so he could see it.
* Angel", he meets some demon relatives who look too much like demons to ever have

the luxury of making the choice that Doyle does.
* Angel, he noted "I like George. Let's find a place for him." The fans are reportedly somewhat squeamish about the inclusion of such a blatantly strange character in canon, despite the show's other eccentricities.
* Angel. Her resident ghost Phantom Dennis floats over a packet of tissues and then gently pulls the quilt up over her.
* Angel, he's being held in place from behind by another vampire and there's a human present who might want to kill both of them, or might just want to kill the other vampire. She stabs Angel through the chest at such an angle that she hits the other vampire's heart, but not his. She only found out about the existence of vampires the day before, so it's not like her vast Slayer experience was helping her there.
* Angel. He simply owned the building. As CEO, Angel offhandedly remarks that they kinda, sorta... "own" the police.
* Angel, he tells her to shut up because he no longer has the hands to cover his ears.
* Angel. He was stuck in a cage but was still able to pit the team members against each other and manipulate his way out.
* Angel himself became an example after he and his crew took over Wolfram & Hart during
* Angel himself could move like that. They never show the movement on-camera, but occasionally a camera jump shows he's moved 60 feet in about a quarter of a second. Notable in "That Vision Thing" right after he kills Kal Penn's character and in the
* Angel himself doesn't speak any demon languages, but he speaks at least eleven human languages.
* Angel himself is destined to be the wild card in the apocalypse who will sway the odds in favor of good or evil. The Senior Partners want to make sure that Angel sides with evil when the time comes.
* Angel himself. Lampshaded early on, in which Angel addresses to a bickering Cordelia and Wesley as "children."
* Angel himself of him. Sure enough, the sociopathic youth is already trying to kill his own family just for fun.
* Angel. His friends attempt to comfort him by telling stories about times in the past when they've had to kill their own parents as well. ("You know, I killed my mum. Well, first I made her a vampire, and then she tried to shag me, and THEN...") It isn't terribly comforting.
* Angel Holtz took to the 21st century pretty well for someone transplanted from the 18th century, at times seeming better adapted than Angel, who actually lived through the intervening period. It probably helped that he quickly gathered a group of modern people who could help him deal with the things he didn't understand (cars, styrofoam) by using the same, fairly timeless motivations - desire for revenge over vampires killing those close to them. Also, the demon who resurrected Holtz taught him a few basics of the modern world.
* Angel how easily intruders can get into Wolfram & Hart without (immediate) notice. Indeed, after abusing this lax security for years when Wolfram & Hart was the opposition, Angel then discovered that their security didn't improve much even after he and his friends were put in charge of the W&H LA branch office.
* Angel, human slaves in Pylea are kept in check by collars that will can explode if the slave attempts to remove it.
* Angelica always claims to know more than the babies and constantly fills their heads with false information. She frequently gives them wrong information intentionally, however, since she seems to get a strange kick out of tormenting them with her lies. Of course, more than once (like the chickenpox episode), something will happen that dupes Angelica into
* Angelic Abomination describes angels as wheels with eyes and animal body parts, which was horribly uncomfortable for the human viewer.
* Angelica Breaks a Leg", Angelica fakes breaking her leg to get attention.
* Angelica Breaks a Leg with those of one "Antonio Peaches", a football player who really did break his leg.

* Angelica does this a couple of times after telling scary stories to the babies in "
* Angelica has a few good ones, such as one after crashing into a wall:
* Angelica is the best example, being the very first cyborg made. When the story opens, she is already so forgetful and frail that her ability to go on missions with the other girls is limited, and she's often forced to stay out of the action.
* Angelic Aliens: Graceful aliens that look sort of like humans and are seen as extremely beautiful.
* Angelica pretends to be this. She's just plain bratty-yelly, though.
* Angelica's Birthday", Angelica decides to act like a baby to avoid the responsibilities that come with getting another year older. She dresses herself in a purple shirt and a green bonnet from the dolls in her own bedroom, as well as a diaper from the babies' diaper bag.
* Angelica's parents; according to her, they just work in a restaurant without worrying about Angelica and her brother. The film shows that Angelica and her brother do not get along so well.
* Angelica's tattered fashion doll, Cynthia, which she treats as her most valued possession. Later on in the
* Angelica stays onstage after "The Schuyler Sisters", and watches the events of "Farmer Refuted" from the upper level.
* Angelica tries to get a new Cynthia doll, along with the other babies' stash of candy, by faking Cynthia's kidnapping, complete with a ransom note and a phone call with the "kidnapper". However, the babies realize something's up when they figure out that the ransom note is a page torn out of Angelica's coloring book. Soon after, Angelica is found with chocolate smeared all over her face, and tells the other babies that the kidnapper demanded more candy... even though she wasn't there during the phone call where this happened. The babies immediately call her out on this, and Angelica's plan is exposed.
* Angelica, who was primarily known for managing otherwise, a wrestling role in the WWF.
* Angelic Layer allowed many of its actors to be able to show their work to their children, due to the show's lighthearted, childlike atmosphere being a significantly different direction from most of their roles in adult-oriented animation.
* Angelic Layer, a mangaka team well known for their work in shōjo.
* Angelic Layer, and Tamayo wonders how they managed to gather such diverse people in their humble party. All of them agree that Misaki's personality has won them over.
* Angelic Layer Athena. Also possible is the fact that every heavyweight angel except for Shirahime looks absolutely hideous and unnatural. Case in point: Vasquez.
* Angelic Layer, by a very important person in the competitive Angelic Layer world, but since it's not an official match and she's trying her hardest, he lets it go because getting through this will help her out in the long run.
* Angelic Layer changed the eyecatch mid-season from just Misaki to Misaki and Hatoko. In the English voice actors' audio commentaries, someone would often announce "Commercial!" when the eyecatch showed up.
* Angelic Layer, despite your parents probably thinking they have a valid point.
* Angelic Layer dispenses wisdom like Yoda but without the fractured syntax.
* Angelic Layer fights anyone smaller than she is; they're all bigger, heavier, and initially have a strong upper hand.
* Angelic Layer (in the anime, she fears her child would be ostrasized for having an "useless" mother), but in the end, reunites with her daughter and is seen competing side-by-side with her.
* Angelic Layer of a pair of bashful couple waiting for the other to confess first.
* Angelic Layer prodigy Suzuhara Misaki is able to pick up her opponents' moves on the layer after seeing them only a few times, and she picks up moves performed by real people as well.
* Angelic Layer, Tamayo confesses that she is in love with Kotaro and that he's her

first love. In the manga, though, Tamayo and Kotaro's relationship is completely platonic, and Kotaro ends up with Misaki.
* Angelic Layer, Tamayo treats Kotaro only as a close friend until he develops obvious feelings for protagonist Misaki.
* Angelic Layer the pairings, putting Tamayo with Koutarou and Oujirou with Misaki anyway.)
* Angelic Layer to the titular toys when the design team unleashed against the tourney players a new prototype model with improved capabilities. Also, the original series can go to "Hypermode" which the later versions can't. Subverted by Shuko using a prototype that can barely move to beat the later version doll Wizard around like a, well, ragdoll even with vastly inferior tech and movements simply because she's that good.
* Angelic Layer win involves taking a beating first while she figures out her opponent's style and tricks.
* Angelic Transformation: Changing to or from an angel form. The former is a common folk belief regarding humans when they die.
* Angel (IDW), has Mosaic Wellness Center, a mental hospital/rehabilitation center for supernatural creatures to get help.
* Angel: If Fred hadn't gotten so curious over Illyria's sarcophagus, she'd still be alive.
* Angel: Illyria. Can't talk to me during your meeting? Then I'll kill everyone at the meeting.
* Angel immediately ends up in Cordelia's crosshairs. Luckily, Angel later confesses that he always found the noblewomen of his era (for whom Cordelia is the modern avatar) to be a horrific bore. Ironically enough, she became his actual
* Angelina Ballerina, Angelina and Marco did this with a poster after they were assigned to work together. Marco didn't want frills and a tutu on his poster, while Angelina couldn't abide by the idea of having soccer balls in the poster. It didn't work work out, and they went through a couple of other hangups, before finally hitting on a working idea.
* Angelina Ballerina, "Angelina and the Dragon Dance / Angelina's Opera", which also plays out like an ordinary episode.
* Angelina Ballerina, Angelina gets so caught up in hers that somebody usually has to shout her name a couple times to snap her out of it.
* Angelina Ballerina, Angelina's neighbor comes over to complain to her father that she can't sleep because the music that's being played for a party is too loud. Her father replies that he can't hear her - the music is too loud.
* Angelina Ballerina episode, "Angelina's Lost Ice Skates" where Angelina and her best friend, Alice, are excited of going to the ice skating show that they become absent-minded of their things. First, when they left the former's house, they almost forgot their lunches and ice skates if it wasn't for Polly and Mrs. Mouseling retrieving it at the time they left. Next, they left the park without their lunches, resulting in the birds gobbling it with their mouths full. They almost forgot their skates again if it wasn't for the two getting it. When they left Mrs. Thimble's shop for smoothies, Angelina ended up forgetting her ice skates there. Luckily, she gets it, but when she comes back in the rink, she missed her opening solo. Nevertheless, she could still perform with Alice.
* Angelina Ballerina has Henry, Angelina's younger cousin, as the tagalong in the original books and the 2002 series. Polly, Angelina's little sister, takes over this role in the 2009 CGI series.
* Angelina Ballerina in both the 2002 and 2009 series. William and Henry (Angelina's younger cousin) are the only two boys in Angelina's predominantly female ballet class. The Next Steps has Marco and A.Z. as the only regular boys in the cast.
* Angelina Ballerina, Ms. Mimi appears this because of having laryngitis. She spends the whole episode communicating with Angelina and her friends by notes and music. Luckily, she got her voice back in the end.
* Angelina Ballerina, one episode involves Angelina's baby sister Polly and her classmate's yoyo going missing around the same time. When Angelina sees the

classmate, she believes he's looking for Polly, but really he's looking for the yoyo.
* Angelina Ballerina revival seems to be aiming at getting the series to enter Stage X.
* Angelina Burnett, née Dalles, AKA Madam Red, Ciel's maternal aunt. She and another woman, grim reaper Grell Sutcliff (who was posing as her butler at the time), were their universe's version of Jack the Ripper, and together they killed at least five people.
* Angelina, disgusted at having half-chewed food spat on her, hexes Ron's mouth off. In an attempt to continue eating, he shoves a chicken leg up both nostrils.
* Angelina Jolie, actress and humanitarian, came out as bisexual in 2003.
* Angelina Jolie, and regularly takes time out from her movie shoots to work on some project involving children or refugees (or refugee children). She often keeps her work low-key so as not to have her celebrity status distract from the matter at hand; for instance, at the time of this writing, she and Pitt visited Bosnia to look into the issue of civilians who haven't been able to return home even 15 years after the war's end, but are making no public appearances.
* Angelina Jolie are visible during her time with Grendel, and a keen observer will see her posing as a part of her treasure-hoard when Beowulf first comes to confront her, looking like a very fishy, naga sort of creature.
* Angelina Jolie because of the locations she got to visit. She fell in love with Cambodia and ended up moving there to avoid the paparazzi and help with mine cleanup. Jolie adopted her first child while making the film.
* Angelina Jolie claims to have tried this once, when in a deep depression.
* Angelina Jolie is about the Soviet Union having a secret program of sleeper agents out to destroy the United States and restore the Soviet Union. Given they intend to blow up Mecca to frame the United States for it, they are a PROFOUND collection of dicks.
* Angelina Love and when she goes back to those gimmicks, her gear tends to reference her TNA time as Love.
* Angelina Love: Left and came back to TNA several times before ending the decade in ROH.
* Angelina Love. When Love won, Rayne ran out and hit her with the belt.
* Angel: In a season 5 episode where Lorne hosts a party, he invites the senior partners, who set a trap for Angel. They discuss the trap and the plan to kill everyone at the party while standing next to the dance floor.
* Angel: In "Billy", Angel turns up at Lilah's door to confront her about the consequences of her evil actions. He kicks down the door and threatens her- until she steps into the light, and he sees that she has black eyes and is covered in bruises. Suddenly, Angel turns from threatening Lilah to saying he's going to go have a talk with the man who did this to her. Played with, as Lilah calls him out on it, pointing out that this sudden change of tone and outrage on her behalf is coming from someone who she knows hates her and came to see her with rather violent intentions himself.
* Angel in fear because she thinks there's an earthquake, but it's just the subway.
* Angel, infecting Fred after she inhaled dust from Illyria's sarcophagus and then turning her slowly into the shell.
* Angel. In "Five By Five", Wesley is kidnapped and tortured by rogue vampire slayer Faith. In the following episode Cordelia examines his injuries and says, "If it's any consolation, it really does look like you were tortured by a much larger woman."
* Angel informs him that the beast was actually his three o'clock appointment, here to start negotiations to get the demons to stop eating baby heads.
* Angel. In "Fredless", Wesley does this while spoofing the melodrama of the Buffy/ Angel romance.
* Angel: In one episode Angel manages to extract information from the officers at a crime scene by acting like a pissed-off plainclothes man - largely through scowling and demanding coffee.
* Angel: In one instance, several employees of the Wolfram & Hart were reported

to have been sacked with actual sacks, and Knox mentioned that on at least one occasion they literally fired an employee. As mentioned by Harmony, there are also non-Human resources.
* Angel: In Season Five, Andy Hallett (Lorne) probably spent more time in the makeup chair than he did in front of the camera. On the upside, Lorne does get his own episode and is featured in the final stretch.
* Angel; instead of giving up the chase, the monster grabs the end of the train as it moves off and climbs inside.
* Angel. Instead, there was a dark void that trapped the demon inside the boy. All of the creepy antics during the episode were the demon's attempts to escape by getting its host killed, even if that escape meant death for himself as well. When the demon is finally freed of the boy and Angel is about to kill him, it calmly accepts death and warns Angel about the boy's true nature.
* Angel in that it's mentioned that the portals need psychic energy to open. The Pyleans, and a few of the wild animals nearby, produce quite a bit of said energy.
* Angel in the comics when Faith gripes that she's meant to be a slut when everyone but her has slept with Spike.
* Angel, in the episode directly after Angel fires Cordelia, Wesley and Gunn.
* Angel: In the episode "Ground State," Gwen Raiden not only uses her electrical powers to kill and then revive Gunn, but she also manages to shock Angel's 200-plus-years-dead heart into beating temporarily.
* Angel: In the episode "Through the Looking Glass", the gang is discussing the picture of a male red deer. Had Wesley simply used the term "hart" or "stag" in the layman fashion (to refer to any male red deer regardless of its age), it might not have been accurate but it wouldn't have been comment-worthy. Unfortunately, he goes into detail saying a hart is "a male red deer or staggard" indicating the script-writers may have attempted to research the proper naming convention that exists for male red deer (that or they thought a "stag" and "staggard" meant the same thing). A staggard is a male red deer in its fourth year of life. A stag is a male red deer in its fifth year of life. A hart is a male red deer over five years old (i.e. in its sixth year of life). The picture itself shows a 10-point deer (5 tines on each antler) which is a "great hart" (a stag over six years old, i.e., seven years old or older with 10-16 tines). By using generalised layman terms, it all could have been handwaved as an ordinary conversation or at least the "hart" being a contraction of "great hart" where the picture itself was concerned. The attempt to be clever by referring to "staggard" simply exposed that the writers had been sloppy about research.
* Angel: In the season 2 episode "The Thin Dead Line," Wesley is shot in the gut by a zombie cop and spends the next few episodes in a wheelchair. Though he's out of the chair by "Disharmony," any strenuous activity still causes him visible pain.
* Angel In the season 4 episode "Awakening" the late Larry McCormick, real-life Los Angeles news anchor for KTLA (the WB/CW affiliate), appeared "on-air" as himself.
* Angel in the Whirlwind heads of the corporations declare themselves dukes and a king. It's still possible to get rich and buy yourself a peerage.
* Angel in the Whirlwind Major Pat Davidson were in a relationship on a previous assignment together but broke up when they were reassigned to different ships. They get back together after he's assigned to be the commander of her shipboard Marine complement, essentially saying "screw it, we're in love and we could both die tomorrow". This one slides into a legal gray area: despite being part of the ship's crew the Marine complement is technically a separate chain of command.
* Angel in the Whirlwind, that has by now become mired in a bloody and expensive insurgency and is riven with corruption and incompetence on the part of the occupiers.
* Angel in the Whirlwind trope to the hilt, preferring partying to doing his job (which leaves his fleet in horrible disrepair and morale deadly low), and convincing himself that the coming war won't come if he doesn't do anything to antagonize the Theocracy. He's presumed dead after the Theocracy invades, and protagonist Kat Falcone repeatedly laments not having killed him herself, never mind the consequences.

* Angel in the Whirlwind weapons commonly used against other ships would make the planet worthless.
* Angel invokes this trope a few times. Usually someone is focused on something and looks up in the mirror as if to reassure themselves there's no-one behind them. Then the camera pans to behind them where it's revealed Angel is standing right there but, obviously, isn't reflecting as he's a vampire.
* Angel involved a demon species whose females had bony ridges along the spine that became red hot when they were in heat. The extremely patriarchal males of the species would cut off these ridges to keep their females docile, as sexual arousal was implied to make the women supernaturally strong. Of course, the whole episode was one big allegory for female genital mutilation.
* Angel", in which our heroes had to Maintain the Lie to Mr. and Mrs. Burkle that their daughter is still alive, when in reality she'd been killed and her body taken over by an ancient demon-god. Among the many complaints that viewers had about Season 5, this is often cited as the most execrable thing the writers/characters ever did.
* Angelique Cabral made it easy to just not feature her during her maternity leave. On top of this, there was also a dream sequence in which her character was pregnant.
* Angelique had arranged a marriage between Lindesfarne and a hedgehog without telling Kevin, only bringing it up — and that it hasn't been broken off — when she got engaged to Fenton. Turns out though that the hedgehog, Quinn, was dating Lindesfarne's best friend Rhonda, and they got married so Lindesfarne was free to break the contract and marry Fenton.
* Angel) is a bit of a mystery. She seems to ascend at the end of Season 3, but it's discovered in Season 4 that she's trapped in some cloud plane. The audience is fooled into believing she comes back, but it's really the higher power (Jasmine) who orchestrated Cordy's ascension. After her death, she really does ascend, though. It's worth noting that being trapped on the cloud plain may have been a plot orchestrated by the season's big bad.
* Angel is able to jump through a skyscraper window without obtaining so much as a scratch,
* Angel is a former cowboy actor and stuntman who used to hang out with stars like Tom Mix and Hoot Gibson. He still dresses in his old cowboy outfit and wears a pair of Colt Peacemakers. He earns a living telling stories and selling autographs to tourists, and operates as as the unofficial Sheriff of Hollywood Boulevard; providing protection to working girls. He walks Molly and her friends home each night to keep them safe.
* Angel is agender and used "they/them" pronouns, voiced by non-binary actor Angel Lorenzana.
* Angel is a vampire who hunts other vampires. When Angel first meets Buffy he tells her that what he wants is to kill them, to kill them all. It turns out that he wants to kill them to make up for his own monstrous actions.
* Angel is cursed with a soul. Good in that he's immortal with superpowers,
* Angel is discovered that the reason why the Van Helsing-like famous vampire hunter Daniel Holtz hates Angel so much and dedicates his life to kill him is that Angelus raped and murdered his wife.
* Angel is given the "gift" of visions that turned out to cause her brain to slowly deteriorate since humans weren't meant to have them. She keeps it secret for years before slipping into a coma and learning that she will eventually die from this if she doesn't agree to become half demon to compensate. She is also shown other examples of what happens because of the visions: one girl whose head literally blew out the back, and an alternate-universe Angel who was driven completely insane by them.
* Angel Island, but once Hazel pointed it out he took that info and ran with it.
* Angel isn't much better. He's clearly pinning for Buffy for the first two seasons. By the end of season 2, it looks like he's finally moving on with Cordelia, but even afterwards it's implied that he's still holding a torch for Buffy. By season 5, he's having Buffy followed by Wolfram & Hart spies - and

has a fling with a werewolf while this is happening. A short, blonde werewolf...hmm...
* Angel is revealed to have killed Manny, the group theorize she must have stripped off her clothes as there was no blood on them and she wouldn't have had time to wash or had another change of clothes on her (see Real Life below).
* Angel is so deeply a part of who he is, changing his memories and personality doesn't make it go away.
* Angel is temporarily made stronger after he drinks the blood of Hamilton, the Senior Partners' liaison, in "
* Angel is this. Buffy and Cordelia, his two major love interests, are former cheerleaders.
* Angel is this; she had her own experiences and values from before her return, but they're quite inhuman.
* Angel is viewed as narcissistic in the show and his spin-off show turns that into a
* Angel", it is revealed that, just as Angel's curse had a clause that would cause him to lose his soul, there was another loophole that would make his soul permanent; he would lose his soul if he experienced a moment of selfish happiness, but would keep his soul if he fed on the blood of the purest innocent, offered freely. While Willow expresses surprise that the loopholes were that way around, they speculate that the second clause was triggered when Max fed Angel her blood, as her potent healing abilities mean that her blood is comparable to the blood of an unborn baby, due to such factors as her potent stem cells.
* Angel", it reverts to Gunn's shape after Gunn unknowingly arranges the death of Fred.
* Angel, it's implied that there is a balance imposed by one side. Evil demons, gods, and so on, are constantly trying to take over and/or destroy the world, and the Powers That Be only do enough to prevent it. Given how much they could do, it's clear they're only trying to stop evil from taking over and not defeat it permanently.
* Angel it's leaving behind... like the kind that's now dripping on his shoulder.
* Angel It turned out Angelus pretended to be Angel, and he was free for a few episodes until he was captured and Willow re-ensouled him.
* Angel": "I wrote a song about courage and pluck. It's called Courage and Pluck. It goes like this: courage and pluck, courage and pluck..."
* Angel, Jasmine is born as a full-grown woman. She's of the "born with world survival skills" variety (or in this case, world-destroyer skills).
* Angel) joined him shortly afterward, making his escape from his Sunnydale life not completely successful. Still, he did make mostly new friends and enemies and successfully lived a new productive life away from Buffy.
* Angel jokes to Alexis Denisof on the DVD commentary about dialing Wesley back since "Angel" is still the title of the show.
* Angel", just to get Wesley's gears spinning, she does a fetish impersonation of Fred, complete with pigtails to show how she sees Fred's relative immaturity.
* Angel Killer and the later books in the series have Jessica Blackwood. The daughter and granddaughter of professional magicians. She was one herself until a trick went wrong nearly killing her and her family focused on mining that for PR rather than taking care of her. Now she is an FBI agent and her knowledge of magic tricks helps her solve serial crimes.
* Angel, Kit Carson has a fine handlebar mustache, fitting for both a neighborhood protector and a former cowboy actor.
* Angel: Knox worships the Old Ones and brings about Illyria's resurrection.
* Angel later on. Unsurprisingly, this came directly from the writers; Joss Whedon walked into the writer's room one day and saw "CAVEMEN VS ASTRONAUTS - WEAPONS TBD" written on the board. He couldn't resist.
* Angel lawyer Eve. When Eve begins to introduce herself in turn, Cordelia interrupts her, saying, "I didn't ask."
* Angel left off and Angel's struggles in a Los Angeles ravaged by monsters.
* Angel lends Buffy his coat (because she's just the last hope of humanity, she

can't be expected to dress adequately) and Xander gets pissed because he knows what it implies. Sure enough, Buffy keeps the coat and is
* Angel likes to claim it was planned, but there are some disputes to this point and he may have just been putting on a nice spin to protect the actor's reputation.
* angel-like wings can be genengineered, but don't give ability to fly in 1 G. They might be useful at lower gravity or in a space habitat, through.
* Angel; Lilah is only slightly taller than Lindsey, but her high heels make the height difference more significant.
* Angel, Lindsey and later Gunn were at one point trapped in a hell dimension that appeared to be an idyllic peaceful suburban neighborhood superficially, but had them living in a home that had a demon in the cellar that would rip their heart out every day, only to have them heal and relive the same thing the next day. And if anyone interfered or tried to upset the status quo all the residents would mindlessly shoot at them with machine guns.
* Angel", Lorne finds out that the arterial blood of a demon is required for a spell, and asks if urine could work instead after Gunn produces a knife.
* Angel", Lorne (holding a crossbow) remarks that he's gonna need a bigger arrow.
* Angel, Lorne is a native of the dimension of Pylea, which doesn't have singing or music of any kind, although they do have dancing. ("Numfar! Do the dance of joy!") When he finally went to Earth, he loved music so much that he opened a karaoke bar. He can also read peoples' futures when they sing. When he revisits Pylea, it turns out that singing causes excruciating pain to other Pyleans.
* Angel: Lorne's got red eyes because he's a demon, but he's a gentle soul who's pretty sweet and fun company.
* Angel: Lorne's perpetual comic persona starts turning into this in Season Five, mostly after Fred dies. He even gets a whole scene talking about this in "Underneath."
* Angel, Lorne's species (technically known as Deathwoks) all have long red hair to go along with their green scaly skin. Lorne's hairstyle is comparatively shorter than his kinsmen, giving the impression of highlighting his brown roots; it's all-natural, though.
* Angel Love has Angel's apartment mail slot exploding with letters that were all addressed to her roommate Wendy when she put an ad out looking for a date.
* Angel love interest and occasional antagonist for Angel Investigations for the first 2 seasons.
* Angel Love is dedicated to the title character trying to find if there's any chemistry in her relationship with a guy she's seeing or not.
* Angel Love of her eponymous series catches her next-door neighbor Everett and his girlfriend Lola smooching in the dark in her apartment twice in one issue.
* Angel, Mae is a feather-boa clad blonde transvestite who watches over Angel and the other young prostitutes like a mother hen.
* Angel Mage: Gender discrimination doesn't seem to exist in this world. In fact, most positions of authority are held by women, with all Cardinals seen or mentioned being female. It's also mentioned that Kings of Sarance are by tradition expected to scheme ineffectually against the Queens (the real rulers).
* Angel Mage: The country of Ystara is destroyed by one of these, the Ash Blood plague, which as the name implies turns the blood of the afflicted to ash. One third of the victims instead turn into monsters called "beastlings".
* Angel magical. Before Angel's team got access to these they used "Demons, Demons, Demons: The Demon Database".
* Angel, make an ancient symbol of destruction, with Connor's birthplace-slash-the place where the Beast rises smack in the middle.
* Angelmaker by Nick Harkaway: "Is that O-soto-gari? No! It is not! It is a yak making love with a tractor!"
* Angelmaker. Early in the novel, Joe muses about his father's victims and the likelihood of there being makeshift graves and pig farms that his father had a hand in.
* Angelmaker is a throwback to the heavier side of MySpace deathcore from the mid to late 2000s, with a sound somewhat comparable to acts like Molotov Solution, And

Hell Followed With, A Different Breed of Killer, and very early
* Angel Matos lack of sportsmanship on display, he was banned from all Federation events and his 2008 records were wiped. Furthermore, his coach made rather wildly unfounded accusations that the referee was taking bribes from Kazakhstan, and even Fidel Castro got in on the debate, accusing the Olympic judges of "stealing fights" from Cuban participants.
* Angel — and Doyle or Cordelia's visions served to explain why Angel usually dealt with them.
* Angel: Merl was eventually killed by members of Gunn's gang who had gone out of control and started killing demons indiscriminately. When Gunn asks where Merl's body is, Angel casually points at assorted splotches throughout the room.
* Angel: Mesektet's last act was saving Angel and Co. from The Beast during its attack on Wolfram and Hart.
* Angel, Miss Allen is attempting to gain access to Molly's apartment but is being stonewalled by Molly's landlord Solly. Miss Allen then tells Solly that she used to work for the Department of Health and she can see so many violations in this rattrap that she could get the apartment building closed with one call to City Hall. Solly relents and gives her the key to the apartment.
* Angel moans about how hard it is for vampires to get drunk. He and Angel are next seen drunk, several hours later having drunk all the alcohol on the private jet they're on.
* Angelmouse, the part were Angelmouse get his Halo while someone said "You're an angel, Angelmouse!" is Re-used at this point.
* Angel Moxie about her new boyfriend Kevin, who's really into science and math:
* Angel Moxie about how the school's dress doesn't forbid her from wearing stockings, said professor stay frozen as a result, and Alex says the words.
* Angel Moxie: A bunch of high-level literal demons get released for our heroes to practice on.
* Angel Moxie, Alex's magical ability is centered around the magical elements. The 6 magical elements are Water, Fire, Earth, Lightning, Pearl, and Shadow. Every lesser demon is aligned with a particular element, and as Alex slays demons of an element, she gains more power to cast spells of that element.
* Angel Moxie: Alex's magical form has wings. Better yet, they do allow her to fly.
* Angel Moxie: In the final battle, Yzin does this. (He fails. Sort of.) Both Yzin and Alex survive, Alex then pulls this too. Sort of.)
* Angel Moxie: Miya is normally cat-shaped, but has a humanoid form, which keeps the cat ears and tail.
* Angel Moxie: Ms. Konk. Her creator makes some drastic changes to her, revamping the scary old lady robot to a bubbly, ditz, with a body like a supermodel.
* Angel Moxie: Riley, a shy nerd with glasses half the size of her head.
* Angel Moxie. The site synopsis is also just one giant spoiler of every plot point in the series.
* Angel Moxie trio. Loves school, programs computers, and builds her own weapons from scratch.
* Angel Moxie wets herself when a giant monster grabs her, prompting the monster to hope that it's sweat. It's confirmed otherwise when Alex teases Riley about it.
* Angel Moxie, when accused for wearing socks in breach of school's statutes on dress. She retorted that they were stockings and quoted a point that saying that if the student didn't want to wear the prescribed socks, she has to wear stockings; to the shock of the teacher, the statute didn't say anything about what those stockings should look like.
* Angel Moxie (who is the result of the merging of the aforementioned plague of rabbits).
* Angel my first-born son to a demon", this has caused some uncomfortable moments.
* Angel named Wolfram & Hart, who turn out to be the Earth front organisation for a trio of extremely powerful extra-dimensional demons known as the Wolf, Ram, and Hart.
* Angel Notes. World of raging badass indeed — then again, it did give us Archer.

* Angel not having a grave, Buffy returns to the place where she stabbed her
* Angelo Agnus falls into this. His transformed form is incredibly strong, able to effortlessly
* Angelo Bronzino's painting "Venus, Cupid, Folly and Time" is fairly obscure nowadays, even in art circles, but one specific detail on the painting may ring a bell to Python fans. Cupid's foot has been used in the intro of every episode of "Monty Python's Flying Circus" and is now their official logo.
* Angel of Darkness gets this as well, however, it is justified in that the game ended on a cliffhanger and the fate of Kurtis was never revealed.
* Angel of Death are criminals, and were killed in the process of committing crimes. In particular, he has stopped at least one rape and at least one mugging. Then again, the narrative doesn't really treat them like they had it coming, only like they're the best option available for Cody because killing them means saving someone else.
* Angel of Death. Every lich keeps their soul in a Phylactery, which can be anything from a Rubick's Cube to a book to a piece of jewelry.
* Angel of Death has a special room in which she does this. So far, she's been seen preparing to press an electric sander against someone's hand with the intent of grinding it off (though something came up before she could get around to it). She also tortured a woman in an alley in order to attract the Angel of Death.
* Angel of Death in the form of a childish game in her special "playroom."
* Angel of Death is a division of the US government who, among other things, work to combat the numerous liches who go about devouring human souls.
* Angel of Death is a twenty-year-old woman who has a high-pitched voice, wears clothes made for small children (they're cut apart, and have extra fabric added to them.) She skips everywhere and loves to sing nursery rhymes. She also seems to enjoy torturing people and often describes things like death how a little girl would, despite seeming to comprehend these things fully. She also uses brightly colored handguns, and loves explosions.
* Angel of Death is such a terrible liar that people around him can instantly pick up on any lie he tells no matter how plausible or how little they know him, though his need to conceal his secret identity seems to be forcing him to get better at it over time.
* Angel of Death must devour the souls of the living to survive. If they fail to do daily for too long, they will go into a frenzy and devour hundreds of people. Even when they're not in their frenzy state, they still crave human souls, it's just not as overpowering.
* Angel of Death sings a short rhyming song about how much she loves killing people.
* Angel of Death, the first of the seven conventions all liches are required to follow, the convention of public ignorance, forbids liches from allowing themselves, or the supernatural in general, to become public knowledge.
* Angel of Death: There are hellhounds in service to the Underworld. There's also Sparky, who has been in service to Cody ever since his contest with Ntullnarlth. Despite his being pitch black with glowing orange spots and leaving burning footprints behind him, he has the personality and mannerisms of a normal dog.
* Angel. Off-screen, Lorne goes to Vegas and makes it big as a singer. For a few episodes, no one can get in contact with him, and when they finally do talk on the phone, he's distant, doesn't seem to care about his friends, and hangs up abruptly. They pay him a visit in Vegas and he snubs them directly, brushing them off as clingy fans to his bodyguards. Everyone assumes this trope has happened to him until they manage to find out he's being blackmailed and imprisoned by the Casino to use his psychic powers for evil. If he resists or anyone tries to help him, they wind up getting their brains blown out. He was trying to protect his friends' lives (and Angel's destiny) by snubbing them.
* Angelo fits, and in his case, it is more justified than the typical cleric character in that he is a
* "Angel of Mine", by Monica. Betcha didn't know it was originally by a British girl group called Eternal.

* Angel of people in LA who have to accept their capacity for evil and decide what to do next — but as soon as a new writer took over, the "angels" were retconned as having been evil demons from the beginning anyway, rendering the whole arc moot.
* Angel often goes without a shirt. In fairness, it's hard to find anything that fits with the wings taking up all that space.
* Angel of the apocalypse battle — message being that "you never stop fighting." There are probably some other reasons for the ambiguous ending, as the show was suddenly canceled by the WB. And the series was picked back up in comic book form, anyway.
* Angel of the Bat acknowledges that The Seraphim and Cassandra have a few things in common, including that they were raised without religion and came to embrace it as they grew older and that both were groomed to be assassins. Naturally the difference is Cassandra's healthy association with her faith and The Seraphim's murderous obsession.
* Angel of the Bat) and that he is descended from an English occultist whom the Catholic church imprisoned when he foretold events such as the destruction of Gotham.
* Angel of the Bat backstory, "The Prodigal Son" and "Jael" both feature Stephanie Brown and Jason Todd heavily and Gordon is featured most of anyone in "Malachi".
* Angel of the Bat: Da Pacem Domine presents the Suit of Sorrows in this way. It can be removed, but only when its wearer is killed or by a specially trained religious figure.
* Angel of the Bat entitled "Sinfully Delicious," in which Gotham's titular Angel must stop her dogmatic, Christian terrorist enemy from... destroying a truck of Duchess brand Devil Finger cakes.
* Angel of the Bat etc.). But Jason Todd/ Red Hood's role in the story is simply acting as a hired killer for a few scenes. Despite this, defeating him helps bring closure to Stephanie's story arc and his knowledge of infiltrating The Seraphim's base is what leads to one of the two climaxes.
* Angel of the Bat ever since. By his own admission, he hates the title, and Connor Hawke and Stephanie Brown both lovingly crack jokes about him sharing his title with a burger restaurant.
* Angel of the Bat features its main antagonist The Seraphim, who is the Cain to his older brother Joshua's Abel.
* Angel of the Bat has a scar of a cross cut into the side of his mouth courtesy of The Joker. The fact that its only mentioned in a flashback either means his helmet covers it or it’s a sign of sloppy writing.
* Angel of the Bat, hates all religions except for his own and has a particular disdain for Jews. He is ethnically Jewish.
* Angel of the Bat, his parents were part of a superstitious sect of the Irish Mob, who agreed to forgive his father's debts if they raised him to be a priest. The plan was this would allow the mob to wash their hands of their sins and go right back to doing them, but Ryan's religious conviction became too strong to be swayed by them and he eventually abandoned them and began working for the betterment of Gotham.
* Angel of the Bat is highly simplistic and only has any real length to it when the plot absolutely demands it, though she is definitely more eloquent than in canon.
* Angel of the Bat later. The writer admitted its canon status was sketchy and he mostly just wanted to celebrate the ban on same-sex marriage being unconstitutional. Despite all that, a later fic in the same universe does depict them happily married without much said about how they got there.
* Angel of the Bat makes it very clear that in spite of their flaws, he has an undying love and admiration for humanity thanks to its inclination towards doing good.
* Angel of the Bat, Red Hood slashes Spoiler's ACL in an attempt to cripple her. After a distraction by Nightwing, she manages to return the favor. Neither of them fall unconscious, but neither is able to continue fighting.
* Angel of the Bat she admits everything she believes may just be a beautiful

dream, but chooses to believe it isn't.
* Angel of the Bat stated it's The first half of the story is basically written in two parts: The first half of the story is much more focused on the Bat family in their personal, non-costumed lives, Cassandra’s being the most significant. The second half becomes more a more traditional action story. In a sense, the first half is more of a Cassandra story, while the second half is moreso a Batgirl/Angel story.
* Angel of the Bat. Tim Drake/Robin and Bruce Wayne/Batman share the tritagonist spot.
* Angel of the Bat: Times of Heresy be attracted to Connor, but her damaged emotional state at the time prevented her from feeling it, and Connor's sexuality would have made it impossible to work in the long term.
* Angel of the Bat: Times of Heresy, but are so rarely referenced that Batman himself claims the name tells them almost nothing about his MO.
* Angel of the Bat: Times of Heresy girlfriend's faux leather jackets.
* Angel of the Bat, which Cassandra thinks benefits both of them, even if she appears a little jealous of it.
* Angel of the Prophecy; with luck, the future can be altered. (Unless the Partners were just dicking with him again.)
* Angelo had the ability to do this with his aqueous Stand Aqua Necklace by having it enter his victims' mouths and control them from inside.
* Angel on a daily basis. If successful, she would have essentially made everyone into peaceful, Jasmine-loving followers, destroying all evil in the world; but also have eaten thousands of people per year (but fewer people than would have died from wars and starvation she would have prevented). She was shown to be a very vain being, possibly more concerned with being worshiped than with helping people. We also get to see the last world Jasmine visited. It's...not a very nice place, since she had abandoned it. She said she "did all she could" for that world and abandoned it due to its limitations, although some interpret it as her just getting bored.
* Angel once faced a demon who, no matter how many times he cut it up, would always piece itself back together and come after him again.
* Angel: One demon ate only the hearts of heroes. This gave Angel a bout of low self-esteem when it didn't want his, though a couple of people pointed out that maybe it just didn't want to eat a heart that had technically been dead for over two hundred years.
* Angel: One episode had a demon hire men to help him impregnate dozens of human women.
* Angel one episode mentions Fred laughing at something a Shrub said. Later in the last season when she becomes Illyria one of her powers is talking to plants.
* Angel One", Riker dresses up in chest-baring native garb and goes off to score with the head-of-state of the titular planet, claiming it is part of the "diplomatic" aspect of their mission.
* Angel: One scene involves Cordelia telling Angel "I love you." When a shocked Angel responds "What?", she says "Of course I love you." Then she calls out to where the others are working "Angel loves me and I love him. Don't you guys love Angel?" and Wesley, Fred, and Gunn all chime simultaneously "We love you, Angel!" It turns out that five minutes earlier everyone else was saying they loved each just in case they all die in the coming apocalypse.
* Angel One sought to have the script changed to remove the sexist elements. He was overruled, resulting in a thoroughly despised episode.
* Angel. Only the chair hits the ground, the executive having combusted on exposure to direct sunlight.
* Angel on My Shoulder, a gangster looks exactly like Judge Frederick Parker and, aided by the Devil, attempts to ruin the Judge's reputation.
* Angel on My Shoulder, and he recruits a recently murdered gangster to go back to the land of the living and impersonate a do-gooder crusading judge, in order to destroy the judge's good works.
* Angel on My Shoulder inspection, even turning her around. After he's done looking over the very snug business dress the costume designers squeezed Anne Baxter into,

he says "You got a lot of curves...in all the right places."
* Angelo Rules: Butterfingers always gets picked last at volleyball due to his poor athletic skills. In one episode, Angelo tries to help him getting picked first for once. After trying to teach him to play better to prove himself worthy fails, Angelo bribes the team captains with tickets to Adventure Land in exchange of picking Butterfingers first. It works.
* Angelo Rules reveals that Sherwood only eats muffins that don't contain flour because he's allergic to... carbohydrates (rather than gluten). This is not referenced in other episodes, where he's seen eating normal cakes.
* Angelo's Infinity Plus One Bow, the Odin Bow, is created by combining three lesser bows: the Eros' Bow,
* Angelo's Kids. Though some of them aren't so blind about it (notably Umbria) and still do it out of genuine sadism or racism.
* Angel", our eponymous vampire is supposed to meet Cordelia to discuss their relationship. It would be spoilery to say how, but neither of them make the appointment.
* Angel out of people not knowing what the logo on the Angel Investigations business card is (it's meant to be an angel). When Angel hands Kate a card at the end of the episode she says "What is this? A duck?
* Angel parents first meet green-skinned demon Lorne, they refer to him as a man in a bathrobe wearing make-up. Lorne defensively replies that "it's just a little eyeliner."
* Angel, particularly his unquestioning obedience and how disconnected he really is from human suffering.
* Angel played it perfectly straight when Angel gets ready to hunt down Darla and Drusilla.
* Angel played the ghost of a Russian prima ballerina. The accent was fairly decent, as was the ballet—she is a trained dancer.
* Angel: Played with in an episode where Angel visits the goddess of lost things trying to find a way to locate Cordelia. She's big and spider-like and covered in webbing.
* Angel plays this role in the Four Horsemen of the titular villain in
* Angel points out in this situation that "I'm willing to let my men die. Can you say the same?"
* Angel poses as one of these in order to infiltrate The Scourge, a gang of pureblood demons with a burning hatred for humanity, including any demons with human blood (especially vampires).
* Angel, prisoners have their hearts torn out and shown to them regularly (once a day?) by a torture demon. They recover with no ill-effects and almost no memory of the event except a lingering sense of dread about going into the cellar.
* Angel. Probably the rest of the Old Ones too, but he/she was the king.
* Angel pulls this on Wolfram & Hart employees when he wants to intimidate them. Since he's a vampire, they can't see him in the rear-view mirror.
* Angel: Pylea has two suns, not that we see either more than once. Conveniently for any vampires present, neither are of the undead-frying variety.
* Angel rather than by an obsessed vampire hunter, in a hell dimension.
* Angel reached his peak of Straw Nihilist-ness in the Season 4 finale, and gave a rant that still sends chills down the spine.
* Angel reboot "Eggs Over, Not Easy" was also dedicated to Glenn Quinn, who played Mark Healy.
* Angel: Referenced a few times, most notably by Cordelia when she tries to drum up business for Angel Investigations:
* Angel refers to necromancers on occasion, and features Los Angeles necromancer Magnus Hainsley as a minor villain in the last season. As expected from a series that constantly subverts fantasy and horror tropes, Magnus turns out to be a short, bald fast-talker who seems more like a car salesman than a sorcerer. He does prove to be a powerful enemy, though, given that he has "power over the dead" and the heroes confronting him are a vampire and a ghost (or close enough to a ghost for his purposes).

* Angel reflecting his current fears, but is rather puzzled by the presence in one dream of a man in a bear suit.
* Angel regarded as a disgrace for his nonviolent tendencies, lack of suicidal bravery, and a tendency to forfeit each joust.
* Angel Ric abducts Molly and threatens to rape her, she responds by firing a shot just his head and through the windscreen of his car, and then forcing him and his two buddies out of the car. As Molly drives off in Ric's car, his two buddies notice that Ric has wet himself.
* Angel, Ric is the quarterback on the school football team, and is attempting to bang all of the hot chicks in school. Molly turns him down, and later humiliates him, so he attempts to avenge himself by trashing her reputation.
* Angel runs through one of these to save Darla's life, though it should be noted that this was set up for the explicit purpose of testing the mettle of applicants to a specific and quite powerful supernatural favor.
* Angels 2200 another ship, at one another, then letting the fighters duke it out while they wait for the beams to recharge.
* Angels 2200 are the character type, if not specifically 5-enemy-pilots-killed aces.
* Angels 2200 is about the pilots of carrier-based space fighters which look and fly like planes.
* Angels 2200 is a textbook example. Not surprisingly, she almost gets booted off the squad when she can't bring herself to fire on an enemy fighter knowing she'd be taking someone else's life.
* Angels 2200, Kid is looking for someone to stay the night with, distraught over Hammer reprimanding her for not taking a shot at an enemy fighter and thus putting Bubblegum's life in danger. After being turned down by Hammer, she goes to Whiskey, who lies and says that she's letting one of the Green Giant pilots (who lost one of their squadmates in the battle) stay with her. Kid leaves and Whiskey says this as it is revealed that Loser is the one who's sleeping over.
* Angels 2200, Lance is a male sexbot, whom no one on the all-female ship wants to use, because, in the words of one character, "Who would want to use a communal dildo?"
* Angels 2200: On her very first day in captivity, one of Hammer's captors cuts off her hand in revenge for the death of her son.
* Angels 2200. The most frequently portrayed are the Siren-class medium fighters used by the protagonists.
* Angels 2200 things like deliberately sacrificing his own troops as bait.
* Angels 2200, when Sasha "Hammer" Carelli is called before the captain for a dressing down, she uses this phrase, to which the captain says yes, then proceeds to criticize the squad being given great expectations and little help, a criticism the captain rejects.
* Angel's '67 Plymouth managed to survive multiple collisions and various forms of abuse, including a trip to a Hell dimension without so much as a scratch.
* Angel said in an interview that an attempt to avert this trope led to the show's cancellation. WB's refusal to renew the show until the last possible minute created problems for the cast and crew, as it left them no time to seek new work if the show weren't renewed. Joss requested a quicker decision for the staff's sake, and WB decided to cancel.
* Angels also play a role in Western Esotericism and Occultism. This is kind of complex but most of it comes from the Esoteric concept of Theurgy that might originate in some Gnostic and Platonic magical practices of the Classical Age later Christianized. Theurgy consists in invoking the "powers of heavens" and generally working with heavently beings (originally gods, later angels), the opposite of Goetia which is working with demons. This was also a way to rationalize the practice of magick for many Christian esotericists despite the fact that the Bible forbids magick. Their argument is that what the Bible forbids is dealing with demons, not magick per se (and indeed many important Western esotericists and ceremonial magicians were devote Christians like Jhon Dee, Eliphas Levi, Michel de Nostradamus and Paracelso much to both fundamentalist Christians and modern neo-

Pagans/Occult enthusiasts surprise today). The use of angels in Esoteric work is common in many systems. One of the most famous is the Enochian System developed by John Dee and Edward Kelly in Elizabethan times, later spread in many circles, most notably the Golden Dawn. Similarly angels are also mentioned as part of the divine hierarchy in Theosophy and use in books of many modern Occult writers including the likes of Ben Woodcroft, Damon Brand and Henry Archer, sometimes alongside Goetic demons. Although the exact definition of their nature is often matter of debate, angels (and demons) are seen as powerful otherwordly spirits that can be summon for help.
* Angels. Although not as commonly as demons, angels can interbreed with mortals to create half-angels.
* Angels & Demons, a young priest fakes an elaborate plot by the Illuminati involving anti-matter to kill various cardinals who are being considered for election to pope, to try to get himself elected pope and suppress the encroachment of science on religion.
* Angels & Demons contains all sorts of gadgets. Granted, it's not as cool a collection as many on this list, but it still counts as a Super Wheelchair in that setting.
* Angels & Demons for at least three methods of opening it without the password.
* Angels & Demons, includes similar fictional insights into the lives of Galileo and Bernini.
* Angels & Demons is replaced in the movie by a generic (though very creepy) Caucasian villain for hire in the movie version.
* Angels & Demons, Langdon used a tarp to slow down the fall from an exploding helicopter.
* Angels & Demons) means that it's actually a compliment to the one you're bunny ears-ing's virility.
* Angels & Demons: Religious buildings in Vatican City are used as locations for the murders. Also, the description of the papal conclave wouldn't be out of place in a locked room mystery.
* Angels & Demons seemingly wraps up with half an hour remaining is a hint that twists are still coming.
* Angels & Demons sees a plot to exterminate the Vatican with an antimatter bomb. The brains behind the attack remain hidden until the novel's end, but that doesn't stop Professor Langdon of suspecting Maximilian Kohler, a vocally anti-religious scientist who helped fund the antimatter bomb to begin with.
* Angels & Demons so Brown could just be sharing his outlook on the world and culture.
* Angels & Demons. Thanks to editing for time constraints, it's pretty much all she's there for.
* Angels & Demons the four cardinals. This is especially conspicuous after it was revealed his client institution was a long-term repeat customer.
* Angels & Demons: The Illuminati are used as the enemy of the Catholic Church.
* Angels & Demons. The Illuminati killer dresses as a priest when dumping a fatally stabbed victim in the middle of St Peter's Square.
* Angels & Demons, the main character is standing in the Vatican vaults when the power is cut, killing the oxygen supply, and leaving him unable to breathe. He immediately assumes that someone was trying to kill him, but he is assured that the Vatican police (who were systematically cutting power to parts of the city to find a bomb's location) accidentally cut power to the grid that supplied the vaults, nearly suffocating him by mistake.
* Angel Sanctuary and the punishment is severe), they sent him off to kill the leader of a rebel fraction in their Ghetto. Turned out the supposed leader was actually the Angel's lover - her hair was cut short, dyed red, and a gun tied to her hands so he wouldn't recognize her at first. He didn't realized this until after he shot and killed her.
* Angel Sanctuary could not be more blatant about Setsuna and Sara, but some see this between Rociel and Alexiel as well.

* Angel Sanctuary has a thankfully milder version of this: after she's dead, Kira holds Alexiel up and kisses her corpse passionately.
* Angel Sanctuary Rosiel force feeds Katan one of his undeath-granting feathers to keep him alive.
* Angel Sanctuary. Volume 1, when Setsuna finds out that Kira isn't human, asks him if their friendship was all a lie, and gets a resounding cold-hearted 'yes'. Subverted in that he looked like he was gonna cry after saying that.
* Angel Sanctuary, where the protagonist Setsuna goes and gets a blood test to see if he's related to his sister Sara, whom he lusts after, just for the possibility of this trope occurring. They're 100% blood-siblings, but it doesn't stop them from getting together.
* Angels and Demons, which featured an attempt by the Illuminati to destroy the Vatican with an anti-matter bomb utilising anti-matter stolen from CERN's storage facility, CERN installed an option on their answering machine to handle all the enquiries from anxious readers, assuring them that: Anti-matter does exist, in fact CERN creates some every day; No, they don't have any in store, because it can't exist in our universe; as soon as they make it, it disappears in a flash of light; so, it's impossible, even theoretically, to use it to create a bomb.
* Angels and even more powerful supernatural beings have killed other entities by causing them to burst into flame or burn from the inside-out. It's also how the angels before the Apocalypse sentenced their underlings to death — Zachariah says, being fired is "pretty damn literal" among angels.
* angels and humans, they are described as being powerful giants, taller than many men and sometimes with horns or other inhuman characteristics or powers. As the Bible said they were "the mighty men who were of old, the men of renown", it's possible that they were powerful enough for being confused with gods by other humans.
* Angels appear to characters throughout the series in the form of other characters. Notably Six to Baltar and vice versa, as well as an angel who looks like Leoben to Starbuck. Head-Leoben is the only one who confirms this, though. Head-Six and Head-Baltar appear in these forms even when no-one is around to see them. In fact,
* Angels are meant to be as neutral as it gets, being an Angel, promptly fades from existence after deciding to fight all out and seal Moro's ability to copy others' powers.
* Angels are notable in that their Soul assumes the physical form of a red sphere, deemed the "Core" by NERV.
* Angels aren't really good in this setting. Most of them despise humanity and want to wipe them out, and they probably would if they ever defeated the demons, so keeping the fight between Heaven and Hell going is in humanity's best interests.
* Angels. At the end of the book, the heroine rushes to the airport in pursuit of her estranged husband, but is stopped by security guards. She returns home, only to find him there waiting for her - he decided not to get on the plane after all.
* angels because their mind just can't wrap itself around their true forms. Technically, the angels aren't even taking this form, the mind of the observer just interprets them as looking like angels. This even applies to witches, who have much more expanded minds than other races and were aware of things like parallel universes long before them.
* Angel's bird-like wings are grafted to metal, he is provided with a suit of silver-and-dark-grey armour, and he adopts a new persona called Archangel.
* Angel's blood even burns mutants descended from ancient beings whose mutations classify them as "demonic," but
* Angels can be warded off with Enochian sigils, and outright banished temporarily with a sigil written in blood.
* Angels can see demons' true faces, which is useful for identifying those possessed. It poses issues a couple of times when amnesiac angels run into demons and are extremely confused and horrified, while everyone else just sees a normal human face.
* Angels' celestial forms are completely incomprehensible to humans, and variously

described as "multi-dimensional wavelengths of celestial intent" and the size of the Chrysler building. Whenever they appear in their true forms, all that is seen is a blinding light that engulfs the entire area, a booming deafening sound that is apparently their voice, and everything in the vicinity getting destroyed due to their awesome presence, and they are so much of a
* Angels? Check. Vampires? Check. Titans? Check. Leprechauns? Check. Demons? Check. Genies? Check. Human representations of the animals in the Chinese calendar? Sure, why the hell not?
* Angel's conversions to Angelus don't count as they are instant and involuntary. But he goes dark in season 2, in a tantrum over not being able to save Darla. For example, he lets a room full of lawyers get eaten by vampires. That's dark, isn't it? Isn't it?
* Angel's Cordelia raided Angel's supply of pigs' blood during her demonic pregnancy episode.
* Angels, Devils and Squid: When a story blends Christian and Lovecraftian elements
* Angel season 4, Angelus figures out that the only thing that can harm the Beast is a knife crafted from its own rocky hide. Which it had conveniently crafted already as an offering to its master.
* Angel season 5, when Cordelia returns, she and Angel watch Doyle's video and talk about him.
* Angel (see below), but apparently after Doyle left they ditched the second bag and gave everything to Cordelia.
* Angel's Egg admits to having no idea what the film's ultimate meaning might be (though he may be lying..... just watch it and decide for yourself).
* Angel's Egg has only two characters, neither of which have names, and less than a page of dialogue, most of which is contained in a single scene. The anime focuses more on the girl's devotion to her egg than anything else.
* Angels' Envy in that this woman is obviously dead. Note that this variant alone displays the aftermath rather than the setup.
* Angel series. Cordelia's powers start to get stronger and they consequently cause her much more pain. She's told she must give them up or her head will explode. Cordy even meets someone with most of the back of her head missing. Instead, she chooses to become part-demon, which gives her the strength to contain her visions in her head and tame the splitting headaches.
* Angel sexual comments and threats towards both Cordelia and Fred, and even agrees to provide the information they want after Cordelia offers herself to him in every sense of the word.
* Angels Feather. Given its title, it is not surprising that there should be plenty of winged people.
* Angel's first interaction with Joyce Cooper where they seemingly insult one another ("Fascist!" "Hag") while solving a crossword
* Angel's first shot is getting out of a John's car and firing off a flurry of insults when the John calls him a slut.
* Angels Flight case. Because of heavy conflicts of interest, Irving creates a special task force for the investigation comprised of Bosch, Edgar, Pierce, and Robertson from Hollywood Division, and two Internal Affairs investigators, Amy Snyder and Gabriella Lincoln. Bosch initially doesn't get along with Snyder because she investigated him for an IA complaint in season 3 over a public altercation Bosch had with District Attorney Rick O'Shea, though warms up to her after Snyder gets on his case and demands to be shown some respect. Lincoln, meanwhile, turns out to be dirty, and tries to frame one of the Black Guardian detectives for the murder. It's eventually discovered she was part of a scheme with Elias and police commission president Bradley Walker where she'd sell inside information to Elias via Walker, Elias would sue the city for large settlements, and Walker and Lincoln would get a cut of the settlement money as kickbacks. The scheme fell apart when Elias decided he wanted to take the Black Guardian detectives to trial after seeing a video of the torture they subjected Michael Harris to, which would've meant exposing Walker's part in the conspiracy, prompting Walker to personally murder him.

* Angels Flight: Detective Harry Bosch's investigation leads him to a dominatrix's fetish site. He further discovers that the dominatrix's web site has been hacked and hijacked to lead to a far darker example of this trope: a child pornography ring.
* Angels Flight, Gabriella Lincoln, one of the IAD cops that Bosch has to take onto his task force in season four, is on the take, passing information through Bradley Walker to Howard Elias and getting a portion of the kickback in return.
* Angels Flight in 2018, police departments in the United States were falling under public scrutiny for several high-profile police-on-black shootings. This tension was thus written into the season, with a subplot involving a Black Lives Matter protest going on outside the police station where the investigators for the Elias murder are working.
* Angels Flight, the murderer turns out to be one of the detectives on the LAPD task force investigating the murder. He uses his inside access to tamper with evidence in order to frame a different cop.
* Angel's Friends Reina from her prison in Limbo, thanks to the sacrilege they committed. They also broke off the scales of VETO, much to the disdain of their superiors.
* Angel's Friends: Sulfus gets this power. He uses these to heal Raf once.
* Angel's Friends They later kiss, thus committing the sacrilege that Reina had been waiting for. This can backfire on them.
* Angels Game It would at least explain why Zafon, who normally creates complex, three-dimensional characters, wrote these cops as ludicrous stereotypes.
* Angels have to possess human "vessels" in order to interact with humans, because seeing an angel's true form will
* Angel. She becomes famous but Angel gets the visions (because Doyle still died) and it drives him mad. Wes and Gunn are with him, but with only three arms between the two of them.
* Angel. She manages to evade uncomfortably lascivious conversation with the guards, and slips by, only to be stopped...because she missed a spot of paint on the back of her neck, and really ought to fix it before she goes out on stage.
* Angel, she started having symptoms. She was nauseated, especially by the smell of meat, she had cravings for meat, and her senses were heightened.
* Angel short story collection "The Longest Night". He was dying of an incurable illness and got desperate to see his son grow up. So, he'd been stealing victims' years for himself at first, so he could stay young, and then when Wes comes to investigate, his years are transferred into the man's son, who rapidly ages, allowing the father to see him briefly as an adult, and then de-ages, returning Wesley to his young state, once Angel arrives and breaks the spell.
* Angel's human self Liam was known for spending all his time drinking and whoring to the disappointment of his father.
* angels; if slain (which can sometimes require killing their souls separate from destroying their bodies), they crystallize in the void outside of reality into the flame of their soul is stoked back to life again, meaning that they can persist through eternity (although they will lose a certain section of their memories, which is why only one angel remembers the ancient gods despite them all having existed back then). It differs from most in that the time taken for resurrection can vary, and can even take a phenomenally long time; the most powerful angels were killed thousands of years before the time of the story, but only one has resurrected since.
* Angels in America about lacking social, economic and political power.
* Angels in America does this right to the face of the doctor who diagnoses him with AIDS.
* Angels in America (gay main characters; subject matter includes homophobia, HIV/AIDS, HIV/AIDS discrimination)
* Angels in America has an extensive family history; the Walters go back for centuries, and Prior is an old family name. Not too long after discovering he is suffering from AIDS, Prior is visited by the ghosts of two of his ancestors, both of whom were also named Prior, and both of whom also suffered from fatal diseases

and (as is implied might happen to Prior) died alone.
* Angels in America has the "threshold of revelation," a sequence where Harper turns up in Prior's dream and Prior turns up in Harper's hallucination. They actually have an extensive conversation, but end up revealing details to each other that they normally would have no idea of (Harper knows Prior's dying of AIDS, Prior can tell Harper's husband is gay).
* Angels in America: "I I I I Am the CONTINENTAL PRINCIPALITY OF AMERICA"
* Angels in America is like this. While it can be placed as being on the more feminine side of androgynous, it also has multiple penises and notes that angels don't really have sex or gender in the same way that humans do. Prior Walter still awakens confused after his encounter with it, remarking that in his dream he'd had sex with a woman - adding that the Angel "wasn't a regular woman".
* Angels in America: Joe walks in on Louis crying in the bathroom and in the ensuing conversation Louis assumes Joe is gay. He's completely right, but Joe just hasn't wrapped his mind around that yet.
* Angels in America — Roy Cohn, mere seconds after faking his own death as a trick.
* Angels in America, naturally, although his villainy in both goes far beyond this.
* Angels in America, Prior recounts his encounter with The Angel to Belize in the middle of a later scene, and both his telling and the encounter are played simultaneously onstage.
* Angels in America revolves around a number of queer characters, including a drag queen, a pair of closeted gay men (not together), and a few open gay men.
* Angels in America uses some of this in the opening scene, when Rabbi Isidor Chemelwitz is talking about the turn-of-the-century Jewish immigrants.
* Angels in America), who serves as a deadly serious embodiment of corruption and the abuse of power.
* Angel. Since they can't use their wings to fly, there are in-universe theories for why else they would have evolved - protection from harsh weather is one.
* Angels in OvercoatsIf angels appear on Earth, they're wearing overcoats.
* Angels in Overcoats: If angels appear on Earth, they're wearing overcoats to hide their wings.
* Angels in the Outfield divine intervention earlier in the season — it just wasn't there in the final games of the season.
* Angels in the Outfield, during the climactic final game, announcer Ranch Wilder says the Chicago White Sox will have the "heart of the order" - which usually refers to the team's 3-4-5 hitters - leading off the ninth inning against the Angels. Kit Keezy ends up being the sixth batter in the inning, which would mean he was eighth in the lineup. Not the most likely spot for the Sox to place the guy who's leading the league in RBI. In fact, had the script called for Wilder to say the "bottom" of the lineup - the 7-8-9 hitters - that would have put Keezy in the more likely 3 spot.
* Angels in the Outfield: George Knox is being forced to make a statement to the press denying the involvement of real, heaven-sent angels in his team's recent winning streak... but when Roger, J.P. and Maggie come into the room, he abandons his planned speech and instead reaffirms his belief that angels are helping the team win.
* Angels in the Outfield included (simulated) newsreel interviews with (actual) famous people concerning whether or not McGovern is actually conversing with angels. Among them is Ty Cobb, who simply says "All I can say is the game of baseball has certainly changed!"
* Angels in the Outfield, Mel Clark has pitched an entire game, and his last batter is the other team's heavy hitter. With two outs, and a foul ball that was nearly a home run, it comes down to one last pitch. The batter hits a line drive up the middle, but Mel manages to make a diving catch for the final out, the win, and the pennant for the Angels. And he did it all with no angel help whatsoever.
* Angels in the Outfield, Roger and JP are trying to stealthily watch a baseball game from a tree in the gounds near the stadium. Roger has binoculars to get a good view, while JP listens on a radio. They would've been able to enjoy the game from

there just fine, but JP ends up alerting the nearby security guard by loudly exclaiming his frustration with the progress of the game.
* Angels in the Outfield, Roger covers up JP's ears when George Knox starts swearing during the game.
* Angels in the Outfield (shown fairly often on Turner Classic Movies), a foul-mouthed baseball manager lets fly several times in the first few minutes of the film. Actor Paul Douglas was told to yell out anything he wanted (no problem there), then his words were cut, mixed, spliced together and run backwards, so that we don't really know what he's saying. The "swearing" sounds like gibberish even on a backwards play!
* Angels, it's implied, are supposed to be this — follow your orders and don't ask questions — and the higher-ups don't like it when the doormats start questioning.
* Angel, Skip simply deadpans, "Well, that ain't right," before dropping dead.
* Angel Slayer, but with more health. Like Rodin, she must be fought at the highest difficulty, due to how difficulty in Angel Slayer progresses on Verse instead of being set by the player.
* Angels must get their host's permission before possessing them, but this is often portrayed as problematic with religious people, such as Castiel's vessel Jimmy, saying yes without comprehending what it entails.
* Angel's mysterious past proved fodder for multiple flashback scenes in both
* Angel's not known for his talkativeness, either; lampshaded when the two chat:
* Angels of Caliban. Luther and his renegade Dark Angels try to turn Caliban into a truly neutral planet ruled by neither Horus nor the Imperium. Dark Angels players know how well this ends for Caliban.
* Angels of Death, and are thus harder to trace. Again, usually women, though Harold Shipman — British doctor and the most prolific serial killer in the world — falls into this type.
* Angels of Light and Darkness one, and John comments that her sense of humor is declining to the point where she'll be invoking this trope, next.
* Angels of Music, after Kate and Yuki attend a stage show at the Théâtre des Horreurs which features realistically gory decapitations and mutilations. Yuki says that she can tell the decapitations are fake because the heads come off too easily: "To cut off a head... it is not so easy as they make out. Even with a sharp sword. The head does not come off like a doll's, at the merest love tap." Kate reflects that there's a lot she doesn't know about Yuki's past.
* Angels of Music as a vocal eqivalent, able to create the impression of being another person simply by adopting a different voice and manner.
* Angels of Music chides her for using Americanisms; Irene replies she wasn't.
* Angels of Music homage that begins with the protagonists receiving a mission briefing on a phonograph that self-destructs at the end.
* Angels of Music in "Guignol" who is dismissed for collaborating a little too willingly with the horrors. He returns in "Deluge" equipped with dozens of blades and looking to extract vengeance on the Angels by skinning them.
* Angels of Music) reveals that he's been able to obtain the blueprints of Kane's lair by asking around the contacts he made in the lair-construction industry back when he built his own elaborate underground base beneath the Paris Opera House.
* Angels of Music, some of the characters attend a stage show at the Théâtre des Horreurs. At one point in the show, a representation of Saint Denis is decapitated and his headless body continues to blunder around, while his bodiless head preaches against immorality until another character kicks it off stage like a football.
* Angels of Music, the climax shows that he can still haunt a theatre with the best of them and instill terror into his enemies.
* Angels of Music, the villain is a newspaper magnate who made a fortune selling newspaper headlines about the Spanish-American war, so he plots to start a sequel of sorts: a crisis involving the Suez Canal.
* Angels of the Silences by Simon Bestwick, two girls are murdered and return as

ghosts. They don't realise at first that they are still on earth, and when a bus comes down the road towards them, they initially think it is a bus to the afterlife (it's not.)
* Angel, so he had a good reason to avoid sex. Subverted in the second season, when it turns out that this doesn't just mean sex, he actually does have to be happy as well, and abandoned in the fifth when he realized this doesn't mean he can't have what a colleague describes as "acceptable happiness".
* Angel, so it was really a matter of her leaving the show and having Anya to fill in that place.
* Angel, someone could have just brought them it when The Beast showed up. Give Faith that bitch and apocalypse averted.
* Angel's one is to protect Buffy as she assumes the Slayer mantle and, later, to fulfill the Shanshu Prophecy and become human. Angel sometimes deviates from this, for various reasons, among them a belief that his mission is being clouded by self-interest. By the fifth season of
* Angel sort of had one of these in season two, when Cordelia asked Gunn if he could hotwire Angel's car when she couldn't find the keys.
* Angel, sort of. He's not out to destroy demons in general- only ones who are openly threatening. Demons who aren't threats can grab a drink with him at the same karaoke bar without comment.
* Angel, so while Miss Andrews is arguing with the landlady Solly, Mae uses a spare key to let herself into Molly's apartment. When Miss Andrews arrives, Mae claims to be Molly's mother. As Mae is a very masculine looking transvestite, Miss Andrews is not fooled for a moment.
* Angels, perhaps including Satan and other demons/fallen angels, may also qualify in that the only way they could "die" is to be uncreated by God himself, and this is not something God is generally believed to do.
* Angel", Spike and Angel have a massive brawl. Upon returning, when Angel shows up bloody and bruised, Fred asks, "What happened?!", and his response is, "I fell down some stairs. Big stairs." When Spike shows up later looking very similar, Fred's response is, "Stairs, huh?"
* Angel, Spike had his car with all the windows blacked out. Complete with Spike squinting through the blacked out window to see where he is going. Later seasons had him covering himself in a blanket while running like hell while trailing smoke when he needed to get somewhere during the day.
* Angel, Spike is a ghost, and is mindlessly wandering around Wolfram and Hart in silence. Fred mistakes his movement through a desk and then a wall for a sign, and by luck there really is an important plot item in the desk.
* Angel spinoff episode, "Somnambulist", there was a vampire sired long ago by Angel's evil side, Angelus, who could move at super high speeds.
* Angelspit, made some awesome music out of a salad bowl and a lampshade, and instead of simply making a video asking for video entries from those who wished to be their new videographer, created a video where ZooG killed the old videographer, asked for video entries, and finished the vid with 'I need a knife, a fork, and an oven built for one. Happy New fucking Year!'
* Angel's predecessor, Sgt. Popwell, is mentioned by Frank to have had "A GREAT BIG BUSHY BEARD!"
* : Angel's price for sharing his blood with Ford and saving the young man's life is that he not date Buffy. As Angel explains, he'll be able to share Ford's senses and he recently broke up with Buffy.
* Angel's Proper Charlies who routinely toyed with the boys' love for her for her own ends.
* Angel's real-life pregnancy, and also threw out an idea to have the season end with a fight between Angel and Cordelia.
* Angels refer to humans as "mud-monkeys", while Dean called the Angels "
* Angels regardless of how many preceded it. The Prime Angels have done nothing but maintain a shield around Throne for several millennia, but they outrank all other angels simply because they've never had to reincarnate.
* Angel's response reveals that the common explanation for vampirism doesn't

* Angel's retractable stakes became iconic for the series, remaining in the title sequence until the final season, and reappearing one last time (used by Gunn this time) in the
* Angels Revenge as they're dressed in bikinis on a ridiculously cold, foggy day on a deserted beach.
* Angels Revenge; the singing was actually dubbed by someone named Patty Foley.
* Angels Revenge), the team of "angels" puts together a van that looks like a rip-off from the A-Team, except that this movie was made before the A-Team.
* Angels Revenge, who irons out the details of the raid on the compound as soon as she arrives.
* Angels Revenge, writer/director Greydon Clark makes a cameo as the director of Terry's film shoot.
* Angels run into the same trope. Castiel is almost completely ignorant of modern culture and human interaction, to the point where he has problems understanding sarcasm. On the other hand, villainous angels such as Zachariah, Bartholomew and Lucifer (who was locked in a cage for almost the entire time humans walked the earth) have no problems blending in or making pop culture references.
* Angel's sleek black convertible, not to mention Gunn's vampire-hunting truck (for which he
* Angel's "Smile Time" episode, from one muppet to another: "I'm gonna tear you a new puppet hole, bitch!"
* Angel's son, Connor, also fits the bill. In contrast to Buffy and Angel's more technical approach to fighting, Connor is shown relying more on brute force, hitting hard and fast and beating his opponents into submission. On one occasion, he actually lost to Angel when the latter had
* Angel's son Connor appears to be completely human as an infant, and later develops the superhuman strength, speed, and senses of a dhampyr. His body is not truly undead, though, so his healing powers are inferior. He was born to two vampires (a predestined event that, until that point,
* Angel's son Connor is this to the demons of Quor'Toth, "darkest of the dark realms". They refer to him as "The Destroyer" and will break into
* Angel's son Connor takes this and runs with it. Not only did his adoptive father teach him to fight vampires and demons, he groomed him to fight his biological father.
* Angel's soul is apparently removed by a sorcerer, thus allowing Angel and Faith to kidnap Buffy and in reality allowing Angel and Buffy to learn of the Mayor's plans for the ascension. Since this is quite drawn out, it might actually count as a reverse interrogation instead.
* Angels, such as Metatron, Sandalphon, Melchizedek and Ophanim, and the Innocents from IMAGINE.
* Angel, stabbing both him and his vampire spawn with a (very long) wooden stake. The other vampire dusts, but Kate reveals that she deliberately avoided Angel's heart.
* Angel's Tactics & Fragments of a Dream Are the Scent of Murder (2005)
* Angel started wearing one after losing his soul and turning back into Angelus.
* "Angel" starts out as a typical love song with Sephiroth picking up a woman at a club,
* Angel starts out this way, although there was a hidden moral. Cordelia has been impregnated by the monster of the week, and was surprised when her teammates helped her out:
* Angel Station. Apparently, any ship can be equipped with devices for capturing black holes. Why they don't get torn to shreds by gravity is never brought up.
* Angel Station for best performance in space. This seems to be rather normal in their culture.
* Angel Station good understanding of technology, definitely surpassing any mundane talent.
* Angel Station, many servants of the Beloved, like the navigator race, are insectoid or crustacean-like.
* Angel Station, organic tech is pretty much the only tech the Beloved have as a

race.
* Angel Station rules over its drone-like "crew". She is a member of an entire species of sentient ships.
* Angel Station, ships entering or exiting a jump must do so far away from planets, as the process releases deadly radiation. The protagonists are forced to jump fairly close to an inhabited moon, realizing they're committing a heinous crime.
* Angels themselves long predate humans and had remained in Heaven, avoiding intervening on Earth, for millennia by the start of the series. While angels in general are of varying moralities (though usually evil), the four Archangels certainly qualify:
* "angels" trying to prod humans and cylons down a path that wouldn't lead to Eternal Recurrence
* Angels used whips (Shamsel, Zeruel... Armisael's body WAS a long, huge whip). At one point, Rei mentions that whips were their enemies' most effective weapons.
* angels wanted to rejoice at the Egyptians drowning, but God reprimanded them, saying "How dare you sing for joy when My creatures are dying?"
* Angels with Dirty Faces act so that the kids who knew him would stop viewing him as a role model. Did he take the advice and fake the whole thing to discourage the kids who looked up to the gangster lifestyle, or did he really just lose it?
* Angels with Dirty Faces A huge part of the end of the film is his best friend begging him to destroy his own legend and be remembered as a coward so the kids won't follow in those footsteps.
* Angels with Dirty Faces has a paperboy selling them this way, with the "extry" variant.
* Angels with Dirty Faces's street-bred toughness, however. The first time Leo Gorcey pulled an ad-lib on Cagney, the star stiff-armed the young actor right above the nose. From then on the gang behaved.
* Angels with Dirty Faces's Yorkville, a tough ethnic neighborhood on the upper east side, just south of Spanish Harlem. His main inspiration was a drug-addicted pimp who stood on a street corner all day hitching his trousers, twitching his neck, and repeating, "Whadda ya hear! Whadda ya say!" Those mannerisms came back to haunt Cagney. He later wrote in his autobiography, "I did those gestures maybe six times in the picture. That was over thirty years ago - and the impressionists have been doing me doing him ever since."
* Angels With Filthy Souls, Johnny counts off one, two, ten before pumping Snakes's guts full of lead.
* Angels With Scaly Wings: There are four-legged dragons with or without wings, wyverns, and ones that stand upright. Ones with wings are referred to as Fliers, and upright ones as Runners.
* Angels With Scaly Wings, when the protagonist isn't satisfied by an ending they can go back through time and try to make things better. Or, as the player experiences it, do another playthrough.
* Angels would on occasion receive this treatment when they appeared to man. They would always be quick to point out that they are just messengers and that the worship should be directed elsewhere.
* Angel takes the trope to heart. "We're not interested in anything as prosaic as winning". They just want to throw evil spanners in the works.
* Angel, taking it and letting Angelus bite her) Faith does come to a greater level of mental stability and acceptance of her evil past through the trip. Probably to avoid endorsing drug use too controversially, she nearly died from the physical side effects of the substance, which wasn't intended for humans.
* Angel. Team Angel discover that Cordelia's old school friend Harmony is a vampire. They charge over to her apartment and kick down the door, only to find Harmony painting Cordy's toenails.
* Angel Terminators: Bullet, from the second movie, is killed by a bullet.
* Angel that Cordelia could no longer realistically fulfill. Therefore playing this trope straight. Of course, this only lasted a season, and then more men were added.
* Angel that didn't work on a Thraxis demon. Wesley and Knox get into an argument over whether the technical or magical components failed.

* Angel that featured a fantasy ballet sequence between Fred and Wesley.
* Angel that jacks up the I.Q. points?" More emphasis on the evil, though.
* Angel that killed all the Dinosaurs, after having cursed God in his "own Dinosaur way" after losing a mate, and Satan giving him the power.
* Angel that lifts Fred and Angel off the ground until Angel stabs it.
* Angel, the audience knows Angel is ensouled. Angel then rescues the child.
* Angel the bartender is a much less positive example. Thea thought they were in a relationship. Angel thought Thea was just another friend-with-benefits. Thea found this out the hard way. Then she found out Angel didn't use protection with any of her other partners, leading to the STD testing storyline.
* Angel, The Beast is so slow that Angelus can easily dodge his attacks while cracking jokes, but he's an order of magnitude stronger than a Slayer.
* Angel. The big bad, Jasmine, uses magic to make herself Awesome In The Eyes Of Others, otherwise she appears as a gross slimy thing. Connor, supposedly a good guy, thinks there's nothing wrong with the gross slimy thing (he wasn't brainwashed) because that's what he grew up with. Gross.
* Angel, the biggest sign of Wesley's increasing competence is that he starts spending less and less time on his appearance and manners.
* Angel, the Brethren surround him and order him to put the baby back in the bassinet. He looks at the baby, who shakes his head.
* Angel", the characters tell Cordelia she shouldn't go back to her place, as Spike could just burn it down to get to her.
* Angel, the demon Sahjan is trapped in a magic jar, but he is not a genie himself and otherwise has no relation to the related mythology. Because he is a pop culture-aware demon, he jokes around when Connor frees him from the jar.
* Angel The episode "Lonely Hearts" had a parasitic demon that leapt between victims, coming out of the chest of the old host, and burrowing into the back of the new one, after it had sex with the next victim.
* Angel the evil law firm Wolfram & Hart has an enormous archive of supernatural info.
* Angel", the gang actually deliberately sought this once for an obviously guilty human trafficker, as he threatened to mystically release a virus that would wipe out California if convicted. They succeeded by giving Gunn a large brain zap of legal information, allowing him to discover a potential conflict of interest involving the judge on the case, forcing a mistrial.
* Angel the hand stopped acting on its own, though that didn't stop Lindsay using it as an excuse to cause havoc in a board meeting.
* Angel". The head of Wolfram and Hart's Rome branch used it several times.
* Angel. The heroes are facing an entire army of demons, including a dragon, and someone asks what the plan should be.
* Angel", the heroes are surprised and disturbed to find they have such a thing at their command (in the form of microwave laser satellites) after taking over Wolfram and Hart. Angel considers using them to wipe out all the bad guys rather than continue to live as a corporate drone.
* Angel the home office. It is because evil lives in the heart of every human being. This revelation completely demoralizes Angel.
* Angel the inhabitants of the demon dimension Pylea speak English and communicate with dimensional travellers without problem, but their books are still written in strange demonic tongue that takes effort from a person familiar with the dialect to translate.
* Angel, The Killer dresses as a Hare Krishna monk in order get close to Angel.
* Angel. The later seasons had her wear high heels to have Buffy appear taller than Dawn.
* Angel The magical glamor that makes everyone who sees her fake face love her is her main weapon, so if you can see her real face, she needs you dead.
* Angel theorises that it might be the government and she vocally imagines herself lying naked on an examination table, being probed and prodded, completely at their mercy. Wesley's spring-loaded stake spontaneously pops out of his sleeve.
* Angel. The plan to capture Angelus has to qualify. It involved Faith doping up

during a fight, allowing herself to be fed on, then Angelus getting high off the drugs she took.
* Angel, the Powers That Be, the official name for the higher forces of good within the show, generally act in opposition to the forces of evil. They set Angel on his path as a Champion and assist him by supplying visions through a conduit.
* Angel: The protracted war between Angel Investigations and Wolfram & Hart LLC comes to an apparent close in S4 when the firm suffers huge losses at the hands of Jasmine and her pet Beast. The firm magically rematerialized with a new office building, but with a worker shortage: Impressed by Angel's ingenuity and ideas, they offer him an ever-increasing suitcase of money — essentially corporate head-hunting — until he finally caves and unilaterally merges his agency into the firm (admittedly to save his son). This leads us into S5, aka Dilbert with vampires, where most of Angel's ideas for reform end up in the conference room wastebasket anyway.
* Angel there is a scene in which someone looks into a microscope and tells Fred he can see that the disease-causing agent is a retrovirus. Not only would he be unable to see something this small without an electron microscope, but there is no easy way to tell by looking whether it is a retrovirus or not.
* Angel, there's Angel Investigations, and when he leaves, the group all try to name the group after themselves, but decide to keep the original name, partly to save them the trouble of putting up new flyers.
* Angel", there were demonic puppets sucking the life force out of children. They'd talk to children through a TV show and tell them to put their hands on the TV, and then the children would fall into comas.
* Angel. The scar is visible for a long time afterward, so it's possible that too much talking is physically painful for him).
* Angel: The series mostly skirted this issue, as Angel Investigations tended to stick with demonic activity (though the fact is the law probably wouldn't particularly care that the murderer was an immortal demonic entity). They tended to operate without police sanction, but they were called in by Detective Lockley a few times.
* Angel", the title character teaches Cordelia to use a sword, and all he's describing is this trope. Although this is also a possible subversion/aversion, since his idea is to teach her to stall until he can get there to rescue her.
* Angel, the title character throws a pair of sunglasses at a woman who is supposedly completely blind. She catches them.
* Angel", the titular character scores tickets for the opera. Everyone cleans up well, but Fred and Gunn, both of whom are probably the least upscale fashionable, seem to attract the most attention — especially from each other.
* Angel the titular character used his condition as a vampire to infiltrate the Scourge. The Scourge at first despised him due to his human origin, but he convinced them that he loathed that aspect of himself and wished nothing more than to see humanity wiped out.
* Angel, the titular vampire hero has to climb (without equipment, but, hey, he's a vampire) insanely tall cliffs in a hell dimension in order to reach a temple which houses the only creature to know Jasmine's true name.
* Angel The trope namer is even mentioned in the following episode — "Macduff was from his mother's womb untimely ripped."
* Angel, the two share some amusing eyebrow movements as they wordlessly assess each other.
* Angel - they have a shared history as well as being the only two vampires with souls in the world.
* Angel they included eventually led to Angelus murdering the last descendant of their clan.
* Angel. They weren't the real threat of the episode; that happened to be Darla herself.
* Angel", things aren't going so well between Buffy and her fan club. As the leader of the Three is going for the kill, Angel suddenly yanks his hair from behind and punches him in the face.

* Angel, this bit of dialogue occurs with Doyle, otherwise shown to be straight:
* Angel this is lampshaded when Angel announces that they're waiting for Wesley's Eureka Moment — at which point Wesley promptly shouts "Eureka!"
* Angel, though not a professional scholar, is also heavily multilingual, well versed in both human and demonic tongues. As a vampire born in 1727 and having lived in most of Europe and the U.S., he presumably has had plenty of time to learn.
* Angel", though the second one doesn't become clear until some episodes later.
* Angel, thus his combat potential is actually a bit lower than on Earth (unless he risks hurting innocents).
* Angel to an incoming vampire and asks, "What's the password?" When the other guy says, "Password? There is no password." Angel stakes him, muttering, "Good, just checking," and goes on to impersonate him.
* Angel to entice Angel "back to the fold" by arranging to have him kill Buffy.
* Angel to Fred: "My feelings for you are changing. I feel... warmth. Wait, no I don't. That's just me wetting myself because you wouldn't let me pee!"
* Angel to kill Angel, which would make him invulnerable for six hours, at the end of which he would die.
* Angelton was a mole, on the grounds that starting a witch-hunt for a KGB mole is exactly the sort of thing a KGB mole would do.
* Angel too, of course. It's completely canon that he and Buffy consummated when she had just turned seventeen, and were at the stage of regular making out before this, but properly understood, this isn't squicky. The memetic interpretation is that Angel is an
* Angel to show that he's in a morally-questionable mood to set Darla and Drusilla on fire with petrol.
* Angel, transparent crustacean-like demons who enter their hosts through their mouths, the downside being that these creatures require lots of water to survive, causing their hosts to dry up and die.
* Angel tries a "we humans are noble creatures who can forgive our enemies" variant during a standoff with the newly reawakened elder god Illyria, but he is interrupted midway though by Wesley, who calmly fires his gun and murders the man who caused Illyria's rebirth. Angel is rather understandably annoyed: "Were you even listening??"
* Angel turns everyone into her fanatical worshipers willing to kill others for trying to free them from her influence. Ironically, being infected with her blood frees you from her control. Jasmine refers to it as "spreading the hate".
* Angel (turns out Deathwok demons can survive decapitation). Lorne patiently tells Cordy to get it out of her system, but when the scream goes on and on without stopping, Lorne tells her to shut up because he no longer has the hands to cover his ears.
* Angel TV series, Fred is infected by an elder demon and consumed from the inside out, everything aside from her skin and hair replaced with something else and changed in color. Oh, and her soul is destroyed in the process, though it seems as if some part of her has imprinted on the demon, giving it at least one of her personality quirks in that she is fond of Wesley.
* Angel Unaware: A mysterious character is implied to be an angel or other supernatural being.
* Angel UnawareThe story doesn't make it clear if a character is an angel.
* Angel, unlike the parent show, tended to explain any absences among the main cast.
* Angel (Until season 5) and not a sequel, Angel fits this trope well in contrast to Buffy. Serious and brooding where the original was cheerful and social, a vampire where Buffy was a human, an anti-hero where Buffy was more of a straight hero (occasional "what the hell, hero" moments excluded), solitary where Buffy was social, and generally facing adult problems like parenthood, unemployment, and legal issues, where Buffy started out in high school and only started facing adult problems in her later seasons.
* Angelus and Darla. Once Darla teamed up with Angelus, the duo started traveling

the world, often staying wherever a genocidal civil war was currently going on.
* Angelus Apatrida's "First World of Terror" has a protagonist who is a raging jingo who acts like he thinks that he's fighting for a good cause but really knows that he's a
* Angelus attracts those who absolutely gush at his talent for violence. Darla tries several times to unleash these tendencies from Angel's psyche, as she desperately misses the whirlwind of carnage Angelus would leave in his wake. Even Spike, Due, and Darla together cannot keep up with him.
* Angel used quick flashes of images in the episode to cut from one scene to another.
* Angelus' entire M.O. revolves around this, both physically and psychologically. In "
* Angelus' entire plan throughout Season 2 revolves around this; all he wants to do is
* Angel uses psychics specifically to scan if a vampire has entered their building.
* Angelus first encountered Drusilla when he was killing a priest in a confessional; she entered the other compartment unaware of what was going on, and he pretended to be the priest during her confession. It turns very creepy very fast, as she's very religious and he tries to convince her that her visions make her inherently doomed to damnation.
* Angelus flinging the Orb at the chalkboard right next to Jenny's head as she ducks. "Must be that shoddy gypsy craftsmanship."
* Angel using the guy's own shotgun to blow his head off did make others at least briefly re-evaluate their positions, however.
* Angelus in the second season, who constantly needles a wheelchair-bound Spike and outright flaunts his relationship with Spike's lover Drusilla. Spike eventually turns on him out of both revenge and
* Angelus is even funny sometimes, in a sick sort of way. ("Othello and Desdemona! My favorite couple. Only Desdemona didn't love the other guy.")
* Angelus is locked in a cell in the basement, he greets Gunn and Fred with "Othello and Desdemona!'
* Angelus is very thorough in disposing of everyone who knows how to restore his soul.
* Angelus on this in Season 4, with Cordelia observing that Angelus is "smart" and Angel taking umbrage, and Wesley (the guy employed to be smart) outright states that Angelus is smarter than him.
* Angelus possesses all of Angel's narcissistic inclinations with none of the compassion to off-set it. He cannot shut up and is one of the cockiest, most dangerous, and sociopathic characters in the entire show.
* Angelus, Spike, Warren, and Buffy herself. She flashes a pretty smile
* Angelus, to a practically legendary degree. Spike cites him as his "
* Angelus was always pretty good about slipping or tricking his way around this little inconvenience. In one episode he convinced Holtz's daughter to invite him inside by claiming to be friends, asking for an invitation inside, and making certain she voiced it verbally.
* Angelus. Who is one of the most sadistic monsters in the Buffyverse but has such a great personality and is the most personal of the villains that he elevates here as he is fun to watch and someone you want to see get their ass kicked.
* Angel vampire. "I mean, on a scale of one to ten, 10 being someone who's killing and maiming every night, and 1 being someone who's... not."
* Angel vampires, this is never seen again. It would have been particularly useful when Los Angeles was being swarmed with vampires and there were too many for them to attack one at a time.
* Angel Vegas party and several famous Las Vegas mobsters in "The House Always Wins".
* Angel walks in literally seconds too late to save Wesley from being mortally wounded by the villain he was fighting. Given how effortlessly she'd dispatched her own foes and the fact that she was not showing any sign of being in hurry, Illyria could've easily arrived minutes earlier just by traveling at a slightly brisker

walk, let alone running...it's just that the plot required her to arrive late.
* Angel was abandoned by her father at a young age and ignored by her
* Angel was also in play due to Glenn Quinn's drug addiction. Whedon wanted to bring him back later, but Quinn died of a drug overdose in 2002.
* Angel was eventually able to control him almost completely by taking advantage of his desire for a family.
* Angel was mostly this as well, although he befriended some of the less evil demons. He also slays other vampires.
* Angel", was originally owned by a mother and her son, but when the son tried to get married and move away, his mother instead buried him alive by bricking him up into the wall, only to promptly drop dead of a heart attack. Their spirits continue to haunt the apartment, such that the mother attempted to kill Cordelia or convince her to commit suicide, believing her to be Dennis' fiancée, who she hated in life. Dennis himself was much more benevolent and helped Cordelia and continued to cohabitate after his mother's spirit is exorcised.
* Angel was sponsored by Verizon, many episodes included bumpers that showed the "Can you hear me now?" guy testing his phone in various sets from the show.
* Angel was turned into a human, the thing he wanted most, and could be with Buffy, something he desperately wanted. They had one, glorious love-filled day, but they both realized that him being human meant that he wouldn't be able to fight in the potential upcoming apocalypses, which would result in thousands of deaths including hers. So Angel very selflessly decided to turn back time and erase their perfect day and remain a vampire, losing her forever.
* Angel was usually a pretty bad boss in the fifth season, openly despising and occasionally executing employees, he does have a moment of this towards his ditzy vampiric assistant Harmony. After unexpectedly being a pretty good assistant most of the season, she betrays him to his enemies. When he confronts her about this, reveals he saw it coming and fires her, she asks him for a recommendation. He not only says yes but when she brings up that he might well not survive, he reveals that it's in her desk. Meaning that at some point he realized that Harmony was going to betray them and leave him to die, and he responded by taking time out of planning his assault against the forces of evil to sit down and write her a letter of recommendation. That's class.
* Angel wears an outfit quite similar to her stripper costume in the climactic battle. She does fly, so we can assume moving around isn't too much of an issue.
* Angel, Wesley and Cordelia explain Buffy and Angel's relationship to Fred in this manner. Probably the standout line is:
* Angel. Wesley and Lilah have very disturbing sex-only encounters for a while, eventually placing a bet on who would be first to call it a "relationship." Wesley loses. It's shown that sex ends up causing emotional attachments and complications for both of them, with each of them trying to "save" the other: Wesley had hoped to save her from evil and Lilah had hoped to corrupt him to evil. This does not end well.
* Angel, Wesley and Lilah Morgan, whom he later beheaded. Angel/Eve. (Lorne made them do it!) Angel/Faith in season 4 and (arguably) Gwen Raiden.
* Angel Wesley describes how a species of demon bugs they're exterminating reproduce by regurgitating crystals that attract microbes that are mutated by said crystals into their eggs.
* Angel Wesley gets access to a set of books which really do have all the information in the universe; however, they are magical (they can, on command, display the text of any book ever written), and their power becomes a plot point in one episode.
* Angel: Wesley's folding wrist blade/sword in later series. Could function as a short 'assassin' style retractable blade or could unfold with a 'swinging' motion into a full-blown long sword in one of the simpler yet cooler special effects to appear on the show.
* Angel, Wesley shoots (repeatedly) someone who turns out to be a robot double, to dramatic rather than comedic effect. Fred tries to tell him that he must have known, deep down, but Wesley says that he was in fact absolutely sure he was

killing the real person. That's what happens when you threaten to hurt Fred.
* Angel: Wesley's reaction to some blackmail photos of a client's antics at a demon brothel. When Angel points out that he's looking at the picture upside-down, Wes almost faints.
* Angel", Wesley walks into an alley intent on attacking Faith who just spent the last couple hours torturing him. He sees Faith collapsed on the ground in Angel's arms sobbing (having just begged Angel to kill her). We see Wesley's blood-soaked hand drop the knife to the ground framing Angel/Faith in the background.
* Angel: Wesley was "Head Boy" at Academy. He seems blissfully unaware of the connotations—which is understandable, as Head Boy (and Head Girl) is an extremely normal title in British schools.
* Angel: Wesley, who tells Fred he has been in love with her basically his whole life, with her being the part that had always been missing.
* Angel Wesley Wyndam-Pryce is a very unusual version of this trope because he's considerably more cynical than most of the examples on this page. But Wesley shows love better and more consistently than anyone else in the show — arguably better than anyone in the entire Buffyverse. More than anyone, Wesley understands what it means to love unconditionally. Wesley understands that love is a choice, not a feeling, and even when his feelings are a screwed-up mess of anger and bitterness and hurt and loneliness, he still chooses to love the people who caused all those feelings, to fight for the people who hate him, to protect the people who want nothing to do with him. Wesley loves so strongly and so deeply that it tears him apart, hollows him out, and swallows him whole, but he never stops loving. He pours every ounce of himself into the people he cares about, he loves with every fiber of his being, and it’s never reciprocated in equal measure, but he still never stops loving. Love gives Wesley the courage to overcome his fears because the people he loves are more important than the things he’s afraid of. Love drives Wesley to commit an unthinkable act of betrayal against his closest friend. Love drives him to empty nine bullets into a cyborg he fully believes is his father. And eventually, love drives him insane. Love is a terrible thing for Wesley. But it’s the most beautiful thing about him.
* Angel what he should do with his character Wesley. It was his suggestion to kill Wesley off in the finale.
* Angel, when Angel joins the Circle of the Black Thorn, he has to leap through a flaming doorway (he's a vampire) and feed off of Drogyn, a friend of his. Afterwards, the members have a friendly cocktail party.
* Angel, when Cordelia has disappeared at the start of season four Angel sketches a photo-realistic portrait of her, which demonstrates his longing to find her and the fixation he has on it.
* Angel", when Cordelia of mid-season three swaps places with her past self shortly before Doyle's death, the two Cordelias spend two days in each other's times, switching back just after the older Cordelia has destroyed the Beacon and saved Doyle's life, apparently at the cost of her own, while the younger Cordelia arrives back in that time having spent a couple of days in the future.
* Angel when Darla teases Lindsey and she and Drusilla start laughing at him. Lilah isn't told to, but starts laughing with them. She promptly gets a "Shut up" from Darla and a "Shh.." from Drusilla.
* Angel when Doyle's ex-wife, Harry, popped in to get their divorce papers signed. Needless to say, Doyle's new love interest Cordelia was surprised by how much that bothered her.
* Angel When Fred visits Wesley in the episode, she informs him of his blunder, even quoting the trope name word for word.
* Angel when Gunn and Wesley freak out over a rat and Cordelia is the one to get up and deal with it.
* Angel. When Hamilton shows up to replace Eve, she loses her immortality but her appearance doesn't change. Of course, we don't know how old she was.
* Angel. When he first got to our world, having never heard music before, he was so fascinated that he opened a karaoke bar. Of course, it turned out that his species could read a person's future from their singing, but he was the first to realise.

* Angel" when his rant is cut off because he's walked under a hole in the roof and the sunlight has set his hair on fire.
* Angel, when Illyria returns to Vahla'hanesh to get her demonic army. She's been dead so long they have all crumbled to dust.
* Angel when Lindsey briefly believes himself to be the only one left alive by Darla and Drusilla's massacre of the Wolfram and Hart Special Projects division. Just as he's pondering the implications of this, and seemingly finding them somewhat to his liking, one of the paramedics reports finding "a live one" (Lilah), to which he responds "We do?" in a disappointed tone.
* Angel when Lindsey shows himself to Spike and calling himself Doyle, any viewers who followed the show know something is up because the real Doyle did the same thing for Angel.
* Angel when she revealed in 2021 that Whedon had essentially written her off the show to punish her for getting pregnant at a time he considered inconvenient.
* Angel", when Wesley discovers why you should let sleeping vampires lie.
* Angel, where Angel bets his soul to a demon on a single high card draw. His opponent gets a nine, and Angel... draws a three. He then switches to Plan B and chops the demon's head off before the bet can be claimed.
* Angel, where Fred had to be forced to drink alcohol to force out the slug that was dehydrating her in "The Price".
* Angel, where Lindsay tried to activate Wolfram and Hart's failsafe, but Angel's people stopped it from getting loose.
* Angel where one of the prophesies concerning the eponymous vampire is that he will "save the world, then die." Eventually it's revealed that a more accurate translation would be "save the world, then eventually die in the sense that you will become a mortal human again, which is kind of what you've been hoping for ever since you got your soul back."
* Angel", where she had conceived a set of demonic septuplets the, er, usual way after a one-night stand. In both cases, the pregnancies were mystically terminated.
* Angel, where the Blue Fairy comes and turns Spike into a 'real boy' in Angel's coma-dream in "Soul Purpose".
* Angel, where Wesley, after impaling a demon which constantly laughs says, "Who's laughing now? ... Well, you. But I still win."
* Angel, where Wesley and Gunn fight a two-headed, fire-breathing, twenty-foot tall monster. Neither it nor the battle is shown on screen. This might be because it wasn't particularly crucial to the plot. An earlier episode featured the Haxil Beast, a huge demon that was nonetheless shown on-screen for quite a while.
* Angel (which has no shortage of monsters) but in "Spin the Bottle" the entirely human Gunn introduces himself, where upon the person he's talking to looks around in alarm for the gun, shouting "Where?!"
* Angel, which led to some viewers being displeased when their relationship changed to a romantic one from partway through the third.
* Angel, which not only describes the killer, but Angel himself (mind you, he's a vampire that Angel sired).
* Angel", while attempting to prove she didn't kill someone, Harmony uses the possibly-true fact that vampires tend to always bite on one or the other sides of their victim's neck.
* Angel, while Cordy is still wearing the antique necklace she stole from the museum of national history. Wesley doesn't know that, but...
* Angel: While running Caritas, Lorne firmly believed that anyone, human or demon, could turn their lives around if given sufficient guidance, and thus allowed everyone, even baby-eating demons, entry.
* Angel, who had to eat people in order to heal herself and maintain her human appearance.
* Angel who slouches into her throne room with a sack over his shoulder, only for the real Groosalugg — a handsome blue-eyed hero — to stride inside and tell the demon to just leave his stuff anywhere.
* Angel who stole the body of one of Angel's friends, killing her in the process) decides that Connor (Angel's 19-year-old son) would be an acceptable person to

procreate with, since it's her mating season. Angel is not pleased and neither is Connor.
* Angel, who was more or less the Terminator with etiquette. After being told his friends were running from "a tall, well-dressed..." and then Hamilton bursting upon the scene, Angel remarked, "Wow. He really is well-dressed." The season previous, Gunn attended a fancy party, and in order to blend had to wear a suit... and then had to beat up a bunch of warrior monk-types, which he lamented would get blood on it. (It didn't, though. He's that good.) In a minor Moment Of Awesome, he flips one mook over his head and fixes his tie back into place before he even lands.
* Angel Williams and La Sociedad. During this time her old finishing moves were phased out for a bicycle kick, apparently since she wouldn't be wearing any out for awhile.
* Angel, with Angel himself having to clarify more than once that he's "not a eunuch."
* Angel with Cordelia and her beau, the Groosalugg. She has reason to believe that having sex will lead to her losing her precognitive powers; after spending time bemoaning, her response is to find a magical prophylactic so that won't happen.
* Angel with evil zombie police racists or something where they need to get arrested by them and Gunn says it will be easy to get their attention because he'll be committing the offense of WWB - Walking While Black.
* Angel with full access to the human's memories results in her becoming more and more intrigued by them.
* Angel with his father at gunpoint, causing the latter to comment sarcastically, "Of course, we're in Los Angeles. We have to talk about our feelings."
* Angel", with Spike's line: "Me and Angel have never been intimate. Except that once."
* Angel. With the alarmingly frequent amounts of Apocalypses going on, it's pretty safe to assume there are several happening all at the same time. Wolfram and Hart has an archive specifically devoted to upcoming Apocalypses for Christ's sake!
* Angel With The Iron Fists, the main villainess has a descending mechanism in her lair, which she uses to dispose of subordinates who fail her by suddenly dropping above them and chewing their entire heads off.
* Angel", with Wolfram & Hart using the recently resurrected Darla to tease Angel, making his friends think he's lost it.
* Angel, Wolfram & Hart's client threatens to detonate a virus bomb hidden somewhere in L.A.; it turns out to be inside the client's own son.
* Angel: Wolfram and Hart have a worker in "Files and Records" who appears to have memorised the entirety of their resources. How does she know about the demon hunter who appeared and is fulfilling the ancient prophecy? "I'm Files and Records. It's my job"
* Angel. Yet the series makes their influence an undeniable and terrible thing. By the end of the series, they ultimately prove to be an unstoppable force of Evil that Angel and company can only fight, but never defeat. In contrast to the First Evil, the Wolf, Ram, and Hart were once ordinary (and quite lowly) demons in primordial times. But when most of the more powerful demons died off (first by warring with each other, then being defeated by early humans and the original Slayer), and they managed to survive in the shadows, scheming and building up their power to the point that they're even more threatening than the First Evil.
* Angel you?") out of a room they are trapped in, but the wooden beam the wire attaches to crumbles under their weight. He did use it once again, without incident in "She" to gain entry to an office building. It worked fine that time; obviously he learned from his mistake. Probably it was too expensive or cliched a stunt to replicate again. Wesley had a grapnel-launcher at the end of Season 4/beginning of Season 5, which he used at least once.
* Angel: "You're Welcome". Cordelia wakes from her coma to help Angel and company rediscover their true calling:
* Angemon and Angewomon resemble classical angels in most respects, except for the metallic helmets that firmly cover the upper halves of their heads and obscure everything above their noses.

* Angemon reverts to an egg form after using up all his power to fight Devimon.
* Ange of Ray, who banked on her appeal as a cute, innocent, and "pure" girl when she was still performing.
* Anger Born of Worry: Angry with others' foolhardiness, but is very glad they're safe and sound.
* Anger Born of Worry: Don't you ever make me worry like that again or it'll be me who endangers you next time!
* Anger Born of Worry: How dare you put yourself in danger! I was worried sick about you!
* Anger Born of Worry was referring to losing control of your fears, and feeling anger towards the source of the fear.
* Anger Born of Worry: When you love someone, you get angry at them for endangering themselves.
* Angered Jane writes about Tom Lefroy to her sister Cassandra as a reaction to a friend's advice: "Careful, Jane, Lucy is right. Mr Lefroy does have a reputation." — "Presumably as the most disagreeable, insolent, arrogant, impudent, insufferable, impertinent of men." Lampshaded. She then says to herself that that's too many adjectives and she cuts some of them with scissors from the letter.
* Anger examples would include Dragon Shiryu vs Cancer Deathmask, Gemini Saga in the Abel
* Anger Is a Gift (a young adult novel about a gay African-American teen dealing with racist policies at his school while overcoming tramua from a police brutality incident, there several LGBT supporting characters, subject matter incldues LGBT youth, queer male romance)
* Anger Is Not Enough: Character who has up until now resolved their problems through anger finds that it is no longer a viable solution.
* Anger Is Not Enough, no matter how much one tries to say or confirm it otherwise, and trying to hold onto that belief will only make things worse for everyone.
* Anger Management: At the beginning, Lynn tries to say her injury isn't severe, only to barely be able to walk when she gets up.
* Anger Management: Carlota teases Ronnie Anne by saying that Ronnie Anne has a small butt but will probably soon fill out and become curvy like her or chubby like Rosa.
* Anger Management: Discussed. Bobby wonders if Ronnie Anne wet the bed because of the horror movie she watched, but he also thinks it could have been the soda she drank.
* Anger Management: Discussed when Bobby reveals that Ronnie Anne wet the bed the night before.
* Anger Management: Discussed when Leni wants to make Lynn a steak for her eye, having heard of the treatment.
* Anger Management: Discussed when Lynn pretends like she's going to flush Bun-Bun.
* Anger Management: Exploited when Lola is about to attack Lynn for (accidentally) making her eat mayo instead of vanilla pudding and spraying soda on her, but Lynn says that she can't go outside drenched in soda and with makeup running.
* Anger Management, is overflowing with references to his sometimes bizarre past behavior while under the influence of narcotics.
* Anger Management. Later on, Dave confronts a now grown-up Arnie, which ends with him giving his childhood bully a wedgie.
* Anger Management: Lincoln gives Lynn two extremely violent beat-downs and also headbutts Lori.
* Anger Management: Lincoln says, "No one can spoil my fun, not even—-" and then Clyde sees Lynn and says, "Lynn!".
* Anger Management: Luan and Lynn are often described as laughing in an "obnoxious" way, as is Flip once.
* Anger Management: Lucy stalls Lynn by claiming she needs a rhyme for "orange".
* Anger Management: Lynn tells Lincoln that he has a girly scream and that she finds it funny.
* Anger Management: One of the ways Lynn tries to rile Lincoln up is by flushing the toilet while he's showering.

* Anger Management Punjabi, one of the lighter-skinned Indian nationalities). One of the other group-therapy members, who is quite the redneck, dislikes her because she looks like an Arab to him. Many viewers seeing her for the first time will probably just think she's a white brunette (Italian or Jewish, say).
* Anger Management: Ronnie Anne claims her underwear is Carlota's, even though Carlota has a much larger posterior.
* Anger Management: Ronnie Anne is embarrassed by her bunny-print underwear.
* Anger Management: Ronnie Anne wrote her and Lincoln's initials in her notebook.
* Anger Management: the film's main plot is kicked off when Dave has to endure a flight where he's stuck sitting next to Buddy, who's acting as obnoxiously as possible, and being ignored by a rude and confrontational flight attendant. He eventually gets tased by a sky marshall who, as it turns out, was having a miserable flight, himself.
* Anger Management when he starts describing the kind of angry person he is.
* Anger Management: While Lynn's injuries aren't played for slapstick, Ronnie Anne once fell down on her butt while skateboarding.
* Angerman of it. He even believes it is actively trying to hurt or kill his friends.
* Anger of the Dead is set in a zombie apocalypse that's been going on for four months by the time the main events of the movie take place.
* Anger of the Dead, the screen cuts to black, then it fades into a shot of a building with "4 Months Later" in the top left corner of the screen.
* Anger of the Dead: While being pursued by zombies up a flight of stairs, Rooker shoots and wounds his number two so he can't move, then leaves him to suffer this fate.
* anger will attack your camp screaming "I'LL KILL YA AND FUCK YER CORPSES!"
* Anghel claims that he and Hiyoko were star-crossed lovers in a previous life.
* Anghel the Luzon bleeding-heart, a bird appearing to have a huge wound on its chest surrounded by legends of being marked by Jesus's blood, is a melodramatic
* Ang Huling El Bimbo: Anthony marries a woman at the behest of his homophobic father, leading to an unhappy and unfulfilling marriage.
* An Giant Robot smash an buld in an indie music video "Measure of a Man" by Comrade Robot.
* Angie and Beneviento parallels both the creepy, possessed dolls, and ghosts in general. The main gimmick of her area are evil dolls, while she herself is a noblewoman clad in a black shawl that covers her face and is a
* Angie getting abnormally aggressive from a mixture of Jiggy's muscle tics, testosterone, and Angie's infamously short temper.
* Angie, Himiko, Kirumi, Rantaro and Miu don't wear anything close to the uniform.
* Angie Jordan shows these tendencies to Tracy Jordan, who's not her son, but her
* Angie's First Case is about Angie Zane, the distaff to Leroy "Encyclopedia" Brown, written by the same author. It didn't go over so well with readers.
* Angie to question Himiko if they are to get to the bottom of things and identify the Blackened.
* Angie Tribeca. Angie's morning workout culminates with her trashing her apartment, including tearing down a bookshelf and punching the refrigerator hard enough to leave dents in the door. When she finally leaves for work, she passes by a line of repairmen ready to fix everything she just destroyed.
* Angie Tribeca as an entire volley of these erupts between Tribeca, Geils, and Lt. Atkins when Tribeca objects to being given another partner.
* Angie Tribeca, as a parody of police procedurals, lives on this trope.
* Angie Tribeca come from a character taking cop slang or everyday figures of speech literally. One example is a perp bargaining for immunity, and then getting a vaccination shot (along with a lollipop).
* Angie Tribeca episode "The Thumb Affair", when a velvet rope and a "Do Not Touch" sign are revered by art gallery visitors as though they were a high-tech security system. The thief is considered brilliant for unhooking the rope and crossing out the word "Not" to change the meaning of the sign.
* Angie Tribeca: Geils and Tanner are chasing a murderer on a golf course.

Naturally, they have to play an entire round of golf in the process, which includes waiting for some old ladies who take forever at every single hole.
* Angie Tribeca, Gelis goes undercover with some lifeguards to figure out who among them is part of a drug operation. The cops arrest the head of them only for him to reveal he's also LAPD. One by one, the other lifeguards start pulling out badges from FBI, ATF, Immigration, DEA and a few other agencies down to the IRS.
* Angie Tribeca He ditches his partner just so he can do donuts in the parking lot.
* Angie Tribeca-inspired show with a similar style of humor that mocks police procedurals of the 2010's.
* Angie Tribeca leads to a cutaway parodying the "Crying Indian" PSA from the early 1970s. Cue Geils' remarking, "Wow, that's a really old reference."
* Angie Tribeca pilot is Angie arriving for an elderly woman lying dead on the ground. The woman suddenly wakes up with a smile and asks what's going on. The cops respond by putting a sheet over her, still acting like she's dead.
* Angie Tribeca's timeslots that morning to make up for the absence of the annual marathon.
* Angie Tribeca These can pile up so quickly in certain scenes that you're likely to miss one because you're still laughing (or groaning) at the previous one.
* Angie Tribeca. The title police officer and her partner stop short of kissing for no obvious reason, then repeat the process two more times, before switching to cleaning the condensation from their now-fogged-up car.
* Angie Tribeca when Angie puts her sunglasses on to deliver a snappy one-liner, then whips them off again.
* Angie Tribeca, where a young cop vomits at EVERY crime scene, including that of an art theft.
* Angie Tribeca: While driving, Tribeca tells Geils not to get attached to her because she's bad with partners. Cut to Geils holding a photo of the two of them in a "BFF" picture frame, then casually tossing it out the window.
* Angie Tribeca (you're looking at Life, you're in a lot of Trouble, you'll be Sorry, etc.) is an excellent example of how this usually goes. In another episode, Angie and Jay also quite literally sweat a perp by turning the interview room into a steam room.
* Angkor, an ancient city that was at least the size of modern-day Los Angeles County.
* Anglachel also fulfills the 'evil' or at least dark requirement; it is quite happy to
* Ang Larawan and horror movies mainstream studios churn out every so often, though they did not necessarily intend to compete toe-to-toe with the big-ticket entries.
* Angle also did the hometown jersey thing, and so did then-champion Ken Anderson, the day before Super Bowl XLV. Angle is from Pittsburgh, Anderson from Green Bay.
* "Angle" and "Satin" for "Angel" and "Satan" are infamously common, cheerily deconstructed in
* Ang Lee, and yet too silly for more serious audiences that might otherwise enjoy the kinds of films Ang Lee is known for making.
* Ang Lee is as close as we'll get). It doesn't help that Disney/Marvel would have to share profits with Universal (a condition of Marvel getting the film rights to the character back is that Universal gets distribution rights to any solo Hulk film).
* Ang Lee, where apparently the sheep were even more of a headache.) The babies presented an unusual problem: the scene called for a crying baby, and none of them would cry.
* Angle Man creates a robot capable of "animating" inanimate matter, such as floating a cigar in the air and whacking its owner over the head with it.
* Anglerfish, particularly the females, look like nightmares incarnate. They're far from alone when it comes to ocean life: goblin sharks and blobfish, just to name a couple, have faces you would definitely not want to see swimming at you in the ocean abyss.
* Anglerfish said that his son, who had the same illusion powers as him, used them to get laid.

* Anglia seems to view sexual liaisons very casually. To be fair, this may be because most of the major Anglian characters are military cadets or young officers, but there is not even any mention of such a thing as marriage, the closest thing being lovers in regular (but still informal) relationships.
* Anglican sorcerer - precisely modulating her voice in order to send fake control signals to enemy spells, allowing her to disrupt or hijack them.
* Anglo-French actress Emma Mackey pulls off an Irish accent rather effectively for the film
* Anglo/French relations, in a nutshell. The industrial English/British have been at odds with the artistic, sophisticated French for almost a millennium.
* Anglo-Irish relations and who is passingly familiar with the large Irish-American population in modern-day Boston will be amused to learn that the evacuation was ordered on St. Patrick's Day.
* Anglo-Saxons and other Germanic cultures considered this a noble art form and one of the manly pastimes (Íþróttir, in Icelandic). The Old English name for this contest of wits is a Flytting.
* Anglo-Zanzibar War, which lasted all of a whopping 40 minutes before the conflict ended. It's the shortest war in history.
* Angola. Although, it must be noted, prisoners still went to Angola 'till the end (by then Angola won its independence however).
* Angolmois: On his second clash against Fuheng, Jinzaburou wields the fallen Onitakemaru's broken naginata along with his katana.
* Angor Rot invade Trollmarket and start attacking everyone they can get their hands on.
* Angor Rot wields a dagger laced with Creeper's Sun, a poison that can turn anything it cuts into inert stone, Troll or otherwise. According to Vendel, there is no cure.
* An government inspector visits Mr. Burns' plant and Mr. Burns has to feign surprise every time the inspector finds a violation, acting like it just started happening. Eventually, he gets tired of this and just admits that one of the problems has always been like that. Then he's "surprised" by the existence of a large sum of money on a table in his office. He suggests that he & Smithers leave the room, and perhaps the money will mysteriously disappear while they're gone, as a government inspector is in the room. The inspector meanwhile is pretending to not realize that Burns is trying to bribe him.
* Ango was too distraught over Shingo's death, leading to him sleepwalking and looking for him, due to
* Ang Pagdadalaga ni Maximo Oliveros), 12-year-old Maxi, a boy from a family of petty criminals in the Manila slums, falls in love with a handsome rookie cop. They become friends and the cop, whose sexuality is left ambiguous, grows quite fond of Maxi, but nothing happens between them except the cop telling Maxi he's pretty and stroking his hair and Maxi stealing a quick peck on the cheek.
* Ang Pagdadalaga ni Maximo Oliveros Filipino audiences may read the film quite differently to Western ones, however.
* Ang Probinsyano (2015): Much of the flashbacks to Cardo's teenage years is set in the first half of the decade.
* Ang Probinsyano (2015): Much of the flashbacks to Cardp's childhood is set in this decade.
* Ang Probinsyano (2015): Much of the flashbacks to Lola Flora's youth is set in this decade.
* Angra Mainyu and was in no way capable of standing up to a Heroic Spirit.
* Angra Mainyu/Avenger was an ordinary villager whose compatriots chose him to be the embodiment of all mankind's sins and sacrificed him. In doing this they wished for there to be an external embodiment of evil they could dispose of in order to purify themselves. The Grail, when it absorbed Avenger, attempted to grant that wish, and as a result there now exists a being made up of every sin mankind has ever or will ever commit, an Embodiment of Evil
* Angra Mainyu (better known by the Persian name Ahriman) in some forms of
* Angriest Pat/Pat Stares At, they both absolutely melt around Elmo and coo about

how adorable, fluffy, and chubby he is.
* Angrish: A character becomes so overwhelmed with anger that all they can say is gibberish and/or incomplete sentences.
* Angrish: A character is too angry to get their point across coherently.
* Angrish: A person becomes so overwhelmed with rage that they resort to yelling gibberish and/or incomplete sentences.
* Angrish: Someone gets so infuriated that they lose the ability to speak rationally and resort to hollering gibberish and/or incomplete sentences.
* Angrish: Sometimes devolving into incoherent rambling can help someone calm their nerves during their (usually sudden) rage.
* Angron crash landed on the planet Nuceria as a child, where he was enslaved by the populace to fight as a gladiator. Part of that process involved the Nucerians shoving archaeotech called the Butcher's Nails into Angron's head, so he could feel no emotion other than rage and suffered constant pain when not killing stuff. Eventually he rebelled and amassed an army of his fellow gladiators, slaughtering their former captors until they were finally cornered. Just before the final battle,
* Angron, Primarch of the World Eaters. After he becomes a Daemon Prince, he's a literal redhead.
* Angron prior to the Heresy often blamed the Butcher's Nails implanted in his head for his problems. One of the first things Angron did when he was given command of his legion the War Hounds whom he renamed the World Eaters (not a good sign) was to have the Nails copied and implanted into all of
* Angron was turned into a raging berserker in his childhood by the implantation of neural augmetics that would cause him extreme pain and rage until he killed something. When he finally led a slave revolt to go down in battle with the people he considered his own, the Emperor chose this moment to come in and teleport Angron out, denying him his chance to finally make the pain stop (and making everyone think Angron was a coward who ran off instead of facing his enemies). No wonder he was one of the first Primarchs to rebel against his "father".
* Angron... Where to begin? His uncontrollable rage, his obsession with avenging his comrades, his resentment against his father for letting them all die, his inability to relate with any of his brothers because of the pain of losing his old ones on his homeworld, his
* "Angry Alligator" Gemini 9 from physically docking with it after matching orbit with it.
* Angry Anderson is a hard rock artist who got his biggest hit when the romantic ballad "Suddenly" was chosen to be the song at Scott and Charlene's wedding in
* Angry and humiliated with this (she had confessed to Ashley after hearing of the engagement plans), Scarlett married young Charles Hamilton a little later. He dies an unheroic death from measles a few weeks later, leaving Scarlett pregnant.
* Angry, Angry Hippos: Grrrrr... (I'll crush you the every minute I chase you!)
* Angry, Angry Hippos: Hippopotamuses that are portrayed as particularily aggressive and brutish creatures.
* Angry Animalistic Growl: A character growls in anger when sufficiently provoked.
* Angry Beavers inexplicably shaped like a cocktail weenie and the rules were that each player's chapter had to pertain to the heroes or the antagonists (much to the annoyance of a character who only cares about driving his 18-wheeler).
* Angry Bird 2, a ROM hack of Moai-kun that has replaced the sprites with ones loosely based off the Angry Birds characters.
* Angry Birds 2, depending on how you defeat a boss pig, he may fly up and crash into the "screen" then slide down.
* Angry Birds 2 has gone to this system. You only have 10 lives, and it takes 30 minutes to get one back...or you can spend the crystals you earn in the game to get continues and other features.
* Angry Birds 2, some stages feature plants that will swallow anything that touches them, including birds.
* Angry Birds applies the same principle for their Space Eagle. You get one use a day for free; more than that and you have to buy in.

* Angry Birds, despite the game's point being that the pigs are drawing the ire of the titular avians, that out for the blood of anyone who touches their eggs.
* Angry Birds features many levels with small planetoids that have gravity bubbles that affect the birds' trajectories.
* Angry Birds Go!, the slingshots aren't loaded with birds... they're loaded with birds (and pigs) on karts!
* Angry Birds Go!, while the whole cast is on display and playable. Chuck is pretty much the main face of the game since he is, after all, the fastest character of the series.
* Angry Birds had the evil pigs distract the birds this way in order to steal their eggs.
* Angry Birds has become quite the force of merchandising, with plushies and all sorts of other tie-in products.
* Angry Birds have Goldbergian layouts, especially the Golden Egg levels - fling a bird at a pebble or TNT pack and watch as it sets off a chain reaction of flying stones and TNT explosions.
* Angry Birds in many levels. Popping lets the stuff the balloon was holding up crash on what's below it.
* Angry Birds is largely made of this. It is rather satisfying to drop a massive asteroid onto those bloody pigs.
* Angry Birds) is like a sitcom: Red needing anger management and being made to take such a class, and then having to argue with people who don't believe that the Pigs are unfriendly.
* Angry Birds, making things difficult because any objects you collide with that should just continue to collide with other objects or otherwise keep floating until they leave the screen, will instead gradually slow and stop.
* Angry Birds on the Run. King Pig drops the phone in the ocean, and the birds realize that their only chance of getting home is gone. Luckily, the mother and daughter happen to have a tablet with them that the birds can use to get home.
* Angry Birds on the Run: The main characters are puppets with the exact same design as their cartoon counterparts, and none of the human characters' faces are visible.
* Angry Birds Rio was originally released on March 22, 2011 at the same price as the other Angry Birds games. However, on January 17, 2013, the game was rereleased for free, initially as part of Apple's "Free App of the Week" promotion.
* Angry Birds sets you buy comes with figurines you can scan into the game to customize your setup of birds (or pigs, in certain level sets). However, there is a limitation to using Telepods in that you can only use one specific bird/pig per level. If you want, say, a lineup of nothing but Jedi Lukes or Episode III Anakins, you have to buy them from the in-game shop with in-game currency, and getting unlimited amounts of them with this method is more expensive than the limited amounts.
* Angry Birds some later bird additions and merchandise have stylized "feminine" eyelashes and bows on their heads.
* Angry Birds Space, Rovio hung a 35 foot wide Red Bird from a slingshot attached to the Space Needle. Residents of Seattle were encouraged to stop by the Space Needle and try the game for free. Images of this spectacle quickly spread across social networking.
* Angry Birds, Stella's sabotage causes large pink bubbles to float up from the bottom of the screen and obscure the gameboard.
* Angry Birds. The concept is simple: Start each level with some birds, and use those and only those to break through a structure and kill all the pigs inside. Rinse and repeat for dozens of installments.
* Angry Birds the Darth Vader pig is shown in cutscenes as three pigs stacked on top of each other with the top one wearing the helmet, presumably to imitate the original Darth Vader's height, but they make no attempt to hide it.
* Angry Birds, to get so busy trying to hit said Golden Egg that you wait and do the actual level after you get the Egg.
* Angry Birds Toons episode, "Chuck Time", Chuck gets sidetracked by a butterfly

when he's supposed to save Red from falling off a cliff.
* Angry Birds Toons episode "Trojan Egg", Chef Pig builds a huge wooden egg and put King Pig in it to steal the birds eggs. The birds are not fooled, but the pigs are when they send it back. Chef Pig even attempts to usurp the throne in the King Pig’s absence.
* Angry Birds Toons plot instead, applying to either the birds or the pigs.
* Angry Birds Toons, the latter screaming in pain from all the squeezing and stretching.
* Angry Birds Toons, the ray not only becomes extremely overpowered, but also grows limbs and actively tries to chase down the birds. The Ray eventually disappears after Chuck use a blanket to cover the magnifying glass.
* Angry Birds was released in the UK in October 2016, two months before the USA, and even before the voices were added.
* Angry Black Man: Black men who are highly temperamental, especially in regards to perceived racism.
* Angry Black Man convinced of his guilt, such as when he sneeringly declares that he can't have been responsible for ordering an attack on the other suspect, who is claiming that Andre intimidated him into falsely claiming responsibility by threatening his family, because if he had given such an order, the other suspect wouldn't have survived it.
* Angry Black Man: I constantly feel pissed off by all the oppression that my people have suffered because of white racism, both past and present.
* Angry Black Man - Intimidating, loud black man with violent behavior.
* Angry Black Man is a wizard hunter thanks to a long family history of magical obsession leading to evil and death, although his favoured enemy is "golems" (presumably because a lot of evil mages use them). The only real question that has to be asked is why he's a ranger given that there's a fighter subclass known as the Wizard Slayer and specifically geared up to kill mages.
* Angry Boys Daniel's mum's partner offered him to go hunting with him, but Daniel declined because "We don't fuckin' go hunting, mate."
* angry crocodiles by swinging across the river, only to land in quicksand, with Indy's bullwhip out of reach.
* Angry Dad web animation goes bust, they explain "Bart, it's not about how many stocks you have, it's about how much copper wire you can get out of the building with!"
* Angry Dance: Someone is so furious and so distressed they have to dance it out.
* Angry declaration: Quasimodo, upon seeing Esmeralda being put on a stake in Disney's
* Angry Eyebrows: A character gets a different face than usual when very angry.
* Angry Fist-Shake: If I'm shaking my fist at you, that means you've seriously pissed me off!
* Angry German Kid how German politicians saw gamers. Unfortunately, if you ask around today, most people won't actually know it's faked because of how easy it is to put on a show for the camera.
* Angry German Kid) political debate. It ended up being cited by several media outlets as a genuine example of videogame-inpired violence.
* Angry German Kid, which is a staged performance of a kid getting angry after his computer breaks, and then he proceeds to scream and throw his keyboard across the room.
* angry grizzly bear who could easily decide to maul you. Not the image you want for a cereal mascot.
* Angry Guard Dog: Evil dogs or other sinister canines guarding the villains.
* Angry Guard Dogs actually require a temperament that is affectionate, devoted, and fun-loving when they aren't working. Their sheer size and power also require a strong focus on temperament and training, so they tend to have a more stable temperament than smaller dogs. Without them, there simply isn't any way an owner can manage them since they tend to be STRONGER than a human. Larger dogs also tend to be more confident (and tougher!) than smaller dogs, so will trust and welcome humans more readily, as well as tolerating rough play from children.

* Angry Guard Dog the bureaucrat... But then dawn comes and Alberto goes back to normal while in the WC, leading Moses to think it was just a prank.
* Angry Guard Dog: The Greek underworld is guarded by the multi-headed Cerberus.
* Angry Guard Dog: WARRWF! SNARRRLLLL!!!! (Back off my yard, or I'll bite you!)
* Angry Harry And The Seven on the Hogwarts Express is Harry Potter placing "Please Knock" signs on the door to whichever carriage compartment he claims, people ignoring the signs, trying to barge in without knocking, getting thwarted by spells, and getting indignant about it instead of learning the manners that Harry Potter is trying to teach.
* Angry Housewives Eating Bon-Bons: the abusive husband of one of the women forces her to wear her hair in the same outdated, complicated updo that his mother favors. She begins to hide things in her hair — like rolled up tissues, candy, etc. — to feel like she was subverting him.
* Angry Joe holding up two middle fingers, both censored out with Nintendo logos, for his commentary about one of Angry Joe's rants about Nintendo blocking one of his gameplay videos.
* Angry Joe singled this out as the only positive thing he could mention about it.
* Angry Joe, spending the entire video criticizing it, particularly the combat system. This again led to accusations that Joe wasn't really taking his time to actually familiarize himself with the game and made very little mention about anything else, and the video received backlash from fans of the series. Some of his fans still accepted his word, however, arguing with anyone who had anything positive to say about the game. That, by itself, is not particularly notable, but some of his fans even spread onto sites like Amazon.com leaving 1 star reviews of the game with one line reviews, mainly pointing out the same criticisms Joe made in his video (often ignoring the rest of the game, like exploration, quests, skills, etc.), with at least a couple of reviewers even mentioning Joe by name.
* Angry Kid: An off-screen spit-take (courtesy of the sound effects) happens in the short "Curious" when the titular Angry Kid asks his dad "What's a butt plug?" after inquiring about some 'strange noises' he heard from his mum and dad the night before.
* Angry Marines memes, do this all the time to everything and everyone. Just look at the first image.
* angry mob in a parody of monster B-movies, and runs away from them... until she exclaims "Wait, what am I doing?", and remembers she can just fly away from them.
* Angry Mob of British university students upset about their tuition costs being tripled ended up doing this to most of the furniture in the offices of the Conservative Party, among other things.
* angry mob with being turned into rats, or fish. "Yeah, you in the back will be fish!"
* Angry Remembrance story with an Urban Fantasy bent. Brian Cargill learns that the father he thought walked out on his family actually died a hero—fighting an ancient battle between two warring factions of shapeshifters who call upon the powers of legendary heroes and their nemeses.
* angry Scotsman. Though in earlier seasons the trope was a bit subverted because he wasn't portrayed as thrifty or walking around in a kilt.
* Angry small dogs can be terrifying under the right circumstances. An angry Maltese or Chihuahua? Not so much.
* Angry Splash Mountain Lady a picture of people having fun riding Disney World's Splash Mountain ride, but with one lady looking utterly deadpan and angry.
* Angry Video Game Nerd and instead spends his whole time fighting with getting the thing set up, as it was not only damned funny in its own right but also a very clear illustration of how poor the console was.
* Angry Video Game Nerd consists almost entirely of lines written by fans.
* Angry Video Game Nerd encounters one in the Aladdin Deck Enhancer episode. The Genie is just happy to be free, granting whatever Nerd asks him for. Even when Nerd wishes for the Genie to go skinny dipping in a septic tank, he obliges albeit reluctantly.
* Angry Video Game Nerd. Finally, he gets the console to start up... and he can't

even play any games because the controllers don't work. So he orders a third-party controller, but the plug isn't compatible with his console's ports.
* Angry Video Game Nerd franchise despite the fact that supernatural curses do.
* Angry Video Game Nerd, the eponymous Nerd starts the video off by having a bowl of Rice Chex cereal for breakfast. When he notices the cereal tastes funny, he looks at the box and finds out it expired in 1996 (the video was uploaded in 2019), causing him to vomit behind the box. He then remarks that he "really needs to go food shopping somewhere besides eBay."
* Angry Video Game Nerd: The Movie, Death Mwauthzyx, the creator of God and Satan, is buried under Mount Fuji until Dark Onward accidentally blows up the mountain, releasing him.
* Angry Video Game Nerd: The Movie, designed to suck even more than the original, thus causing copies to fly off the shelves thanks to the Nerd's influence.
* Angry Video Game Nerd: The Movie-esque quality to them because after paying the cast and crew, transportation fees, catering and other "normal" costs, there simply wasn't money left to do the "weird" stuff Hollywood-style.
* Angry Video Game Nerd: The Movie is an intentional case of this trope.
* Angry Video Game Nerd: The Movie: The Rocks serve as a launch ramp for a mocked-up flying saucer. And Cooper (well, an obvious puppet) plummets from the top.
* Angry Video Game Nerd: The Movie the worst game of all time, but one that, in spite of its myriad flaws, was actually very innovative for its time, especially considering it was developed in less than two months.
* Angry Video Game Nerd: The Movie, with the EeeTee presentation removed and the real game being shown.
* Angry White Man: We white people are being marginalized by minorities!
* Angry White Man: White men who feel like they're oppressed by minorities.
* Angry White Man: White people who think they're being marginalized by society in favor of minorities.
* Angry White Pyjamas the students receive a call informing them the founder of their aikido school has died, so the dojo will be shut down for a week in mourning. They carefully put down the phone, then start dancing around the room, calling for champagne.
* angry zombie. Makes more sense when you consider purring on housecats, and then ramp it up accordingly.
* Angst are often involved with ghostly hauntings, particularly when love is involved.
* Angst Aversion: Audiences are disinterested in a work because it's too dark or depressing.
* Angst Aversion: A work is known to contain enough dark themes and subjects that people avoid partaking in it at all.
* Angst Aversion happens when the work is too upsetting for viewers to tolerate.
* Angst bits. However, she really could - she's now considered to be one of the best performed companions in the show's history, as comic acting is just as difficult as serious acting and the skills aren't too dissimilar. This situation unconsciously echoed fan concerns about well-loved comic actor Jon Pertwee being cast as the Doctor in 1970, which confused a lot of people when he performed the Third Doctor as probably the most serious and dignified Doctor of them all.
* Angst Coma after Kaneki leaves him and the others to try to sacrifice himself for his companions' sake. He goes crazy from Kaneki leaving and possibly dying, and nearly dies himself from his self-destructive behaviors until he regains the will to live as soon as he learns Kaneki still exists.
* Angst Coma: An extremely stressful or traumatic event results in someone falling into a deep state of sleep or unconsciousness.
* Angst Coma considers secretly murdering Kaneki to be the best way to help his ailing master.
* Angst Coma. The same thing happens in real life two episodes later, but without the dragons.
* Angst Dissonance: The character is angsty, but the audience doesn't sympathize with him.

* Angstrom Levy has a robotic hand replace one that was torn off by Invincible.
* Angst? What Angst?: A character isn't shown to be bothered by a misfortune they've endured when realistically it should upset them at least a little.
* Angst? What Angst?: Character whines a lot less than you think they should vs. character whines too much.
* Angst? What Angst?: Seen as a strength in both genders, but it's more considered a strength in men than it is for a woman. Women who fit this trope are often cold as ice.
* Angst? What Angst?: You had experienced a horrible tragedy, but you're still smiling.
* Angsty Surviving Twin: A person is upset that they've outlived their twin.
* Angsty Surviving Twin: A twin dies and their surviving sibling grieves their passing.
* Ang Tanging Pamilya (played by Sam Milby). Some of the said gags include:
* Ang, the Golden Dragon and his twin sister Ying, the Shadow Dragon (whose names
* Angua finds every day to be a struggle with her inner wolf, especially around the full moon. The rest of her family stopped struggling
* Angua is lacking ways to protect herself. And as a fellow police officer herself, she's involved with the same things that Carrot is. But he demonstrates the trope whenever a conflict between his relationship and his duties as a policeman does arise:
* Angua may be a werewolf, but she's also the daughter of a baron. She had an elder brother who would have inherited the title, but he dies during the events of
* Angua of the City Watch and other werewolves speak like this mid-way through the change into wolf, due to elongated fangs.
* Angua's sense of smell when in her wolf shape verges on this trope, and she's usually forced to draw analogies to colors and sounds in her efforts to convey what it's like to non-werewolves.
* Angua von Uberwald has rejected the usual life of a werewolf. She lives in a city and works as a Watch officer. She's a strict vegetarian most of the time, and when she does find herself compelled to kill chickens, she always pays for them afterward.
* Anguillette, the protagonist, Hebe, loves Prince Atimir, though she marries the Prince of Pleasure Island. Hebe's older sister Ilerie competes with her for Atimir's affections, and Atimir marries her.
* Anguirus pops this upon first encountering an erratically flying Derpy Hooves.
* Anguished Declaration of Love: A character admits their love for a person when it looks like the two of them will die.
* Anguished Declaration of Love and decades of misery for everyone in the book.
* Anguished Declaration of Love, and dies protecting him when he's injured trying to stop her execution.
* Anguished Declaration of Love: Confessing your love for somebody during a moment of angst.
* Anguished Declaration of Love in an edit note on Memory Gamma wiki. No word yet on how they're working around the fact that them being together violates regulations (she's his direct superior).
* Anguished Declaration of Love—A character dramatically declares their love for another after much anguish.
* Anguished Declaration of Love seems to be trying to provoke him into action) and he's noticeably tight-lipped about the exact details, or even if he's really going to go through with it at all.
* Anguished Declaration of Love: Someone who's harbored their feelings for another person ends up confessing their love when it looks like they and their object of affection are done for.
* Anguished Declaration of Love to the unconscious Cordelia, only to start railing on her for not telling him that the visions were slowly killing her.
* "Anguished English", a collection of pupil bloopers, funny typos etc. dug up: "
* Angus Buchanan), who was kicked out of his home when this fact was discovered. He ended up becoming a famous professional rugby player in the Muggle world and an

activist for equal rights in the Wizarding world, making him one of the few people in the series to attain fame in both worlds.
* Angus Og, Angus is the runaway groom. Being too cowardly to break off his engagement to Big Mairileen directly, he arranges to be away working on a fishing boat the day of the wedding instead.
* Angus Og: Granny McBrochan has all the attributes of the classic wicked witch; living in a remote cottage, magical cats, purveyor of curses and potions, and a cauldron. In practice she is a mostly benign feature in the lives of most Drambegians. Her wrath is mostly confined to Angus, and goodness knows but he deserves it at times.
* Angus Og it can be said that it was probably Mairileen who had the lucky escape whenever Angus ran away.
* Angus Og: It is strongly implied in several strips that the cast are mainly speaking Scots Gaelic amongst themselves and only speaking English whenever it is to outsiders like tourists, or the Laird and his guests.
* Angus Og strip has Angus' mother cutting peat and saying that if they are to get their peat stack built up for the winter then Angus will need to put his back into it. We cut to a panel of Angus lounging against the side of the stack saying "Don't worry, that's exactly where I've got it".
* Angus Og territory, a scathing parody of the kind of Upper Class Idiots who claimed Scottish Ancestry but spent most of their time in England and caring little for their Scottish holdings and were completely disconnected from the lives of their tenants. It was during this time that land reform became an issue in Scottish politics, and continues to be so even today.
* Angus Og: The Devil shows up in many incarnations throughout the run of the strip, but usually defaults to the classic goat-legged, horns, goatee, and pitchfork motif. He regularly tangled with protagonist Angus either attempting to snare his soul or with one of Angus' schemes causing havoc with one of his own, such as when Angus accidentally created giant demonic midges (a type of swarming biting black fly) which then got dumped in hell right on top of the Devil himself.
* Angus stole his boxers and ran them up the school flagpole. Angus' friend doesn't help matters by remarking that the shorts are nearly as wide as the flag. The last time is when Rick plays an embarassing video of Angus at the Winter Ball dance just as Angus is being crowned. The principal, at least, is unamused.
* Angus, Thongs and Perfect Snogging. The implication is that Georgia and her friends expected everyone else to dress stereotypically so they had planned to dress as food to be different. Georgia just missed the memo when the other girls changed their minds.
* An honorable mention goes to the US Office of Personnel Management storage facility at Boyers, PA. It is located in an abandoned mine 230 feet below ground, and in there 600 people process and store every federal employee retirement file,
* An honourable mention for the number of players who were convinced that the game was originally developed as a
* Aniara breaks down irreversibly, the narrator, who is the head computer tech, is called into a "heads-will-roll" court to explain himself. He tries... and fails, because he literally cannot explain the inner workings of the A.I. without resorting to the highly technical jargon only comprehensible to A.I. techs. When he tries, he only succeeds in muddling his analogies so badly, he loses track of what he was trying to say.
* Aniara from the poem cycle of the same name. Justified because it is meant to be an "arc ship", carrying a good bulk of humanity towards a new home.
* An ICBM hidden inside the Washington Monument. "Most powerful presidential monument ever" MY FOOT!
* An ice cream parlor in London called Baby Gaga is now serving breast milk ice cream. The milk is provided by donors who must first have their blood tested.
* A Nice Derangement of Epitaphs, and figuring out the truth about her death becomes the B-plot to the more recent violent death that is the main mystery.
* A Nice Derangement of Epitaphs has an interesting example, where Simon Towne has an epiphany regarding one of the mysterious deaths after George Felse repeats a

comment made by his son Dominic. The interesting part is that Simon was present when Dominic made the comment in the first place, but it didn't trigger an epiphany then because he didn't have enough of the other pieces of the puzzle yet.
* An ice hockey game in Illinois multiplied this problem by twenty. The women's team from Lake Forest College met the high school girl's team from Lake Forest Academy, and both teams showed up wearing similar uniforms. The end result? A bench-clearing brawl.
* A nice little play on the trope came after they broke up. Penny started seeing Zack, a dense but friendly guy, but she quickly discovered she had a harm time dealing with his stupidity after dating Leonard. She later invited him to a New Years party only because her love life was tanking and was trying to find
* An Ice Person, so blasting her with heat or fire will make her more powerful. Ironically, she can be defeated by freezing her, as it takes away her energy.
* A Nice Place to Visit", Rocky Valentine discovers that Pip is not human when he shoots him and the bullets have no effect.
* A Nickelodeon short called "Attack Of The Giant Vulture" gives this sort of vibe to the vulture who preys on a little girl, corners her in a tunnel, and tries to eat her and her friends.
* Ani Com their two children to get together and get married, and they do.
* an iconic British spy took over the role and Walther asked for Bond to carry what was their then-newest weapon.
* AniDB.net - catalog and review site for Japanese animated television, film, and OVA.
* An idea directly swiped, without attribution (but with a belated and muted apology) from Paul Jennings's article
* An Ideal Gift, Mikey has taken to calling Irrilia "Rilly." While Irrilia doesn't seem to mind, her father does.
* An Ideal Husband states that, essentially, men are meant to go out into the world and do great things, while the most a woman can ask for is to help and support a great man.
* an idealized body and skimpy outfits, but an inherent part of the genre.
* An Ideal World (尋找自我的世界)
* An idea of the scale involved is that the Lions ruled the Five Galaxies for
* An idea on how well she interacts with people, her advice to Finn for talking to Princess Bubblegum in "Go With Me" is to
* An idea that works for private investigators when tailing someone. Wear a red jacket, and you're just a person in a red jacket. Take off the red jacket to show a black sweatshirt, and now you're a person in a black sweatshirt. Put on a hat, and now you're a person with a hat. If these relatively minor changes in wardrobe and appearance seem to small to fool you, think about how often you might be looking for someone you know
* An identical force field device shows up later in the hands of Lucius Lavin, a con man who uses it to fight off bandits raiding a village (whom he hired). The former Genii officer Acastus Kolya tests the shield with dynamite. Lavin survives. Kolya then tortures him by nearly drowning him in a barrel of water.
* An identical height difference can be seen in one of the pairings on Season 26 of the U.S. version of
* Ani Difranco, American singer-songwriter, is bisexual and sings about LGBT issues in her songs.
* Ani Difranco. "...in walked a man in the shape of a man holding a hat-shaped hat..."
* Ani Difranco. She has dyed her hair A LOT of colors during her lifetime. Green, purple, blonde, blue, black etc....
* Ani DiFranco's lyrics from "32 Flavors." "God help you if you are an ugly girl, of course too pretty is also your doom, 'cause everyone harbours a secret hatred for the prettiest girl in the room."
* An Idiot Abroad could be summed up as two intelligent British comedians send a fairly dim man abroad, make him as uncomfortable as possible, and then laugh in his face about it. Though how much the titular idiot is in on the joke is open to

question.
* an idiot in the Dragon Ball universe, though, Vegeta was brought back to life and got to see the fulfillment of the prophecy anyway.
* Ani-Earth is a completely different story altogether - it was a series of stories by another author that started out as a simple crossover between
* A niece version comes from Sam's wife Grace apparently preferring her deceased twin sister's daughter, Charity, over her own elder daughter, Kay. Even though it may or may not be just a perceived slight on Grace's part,
* Aniela is aware that most people see her as an easy lay, and secretly wishes for true love.
* Ani Ga Imouto De Imouto Ga Ani De has two pairs of these. Youta Koizumi and Kakeru Mayama are fairly tall teenage boys. Hikaru Koizumi and Yurika Oda, the two teenage girls they swap bodies with, are tiny. While their heights aren't explicitly given, they appear to be about 122 cm tall.
* A Night at the Opera, a girl looking for her aunt... It ends with Margaret Dumont opening the door and everyone tumbling out.
* A Night at the Opera and try to avoid getting on stage and spoiling the show themselves, even long after it makes any sense for them to worry about interrupting.
* A Night at the Opera, Driftwood begins his speech with: "Ladies! Gentlemen! ...I suppose that covers most of you."
* A Night at the Opera, Driftwood (Groucho) and Fiorello (Chico) have the following exchange:
* A Night At The Opera every few items. That comes out to a lot of eggs.
* A Night at the Opera, Groucho Marx's character improvises an opening speech at an opera theatre that in real life would have brought the house down with laughter and inspire thunderous applause for making a normally boring formality so entertaining, but in the film, evoked only stony silence.
* A Night at the Opera) has been fired from his post with an opera company. Upon leaving, he is denied access to the building elevator and protests that it's four flights down. The elevator operator "helps" him by kicking him in the butt, and he tumbles down the steps, out a door and into the street.
* A Night at the Opera, the bad-guy opera singer tries to steal the good-guy opera singer's thunder and is pelted. When he angrily objects to apples thrown at him, Groucho explains "Well, watermelons are out of season!"
* A Night at the Opera. ("The party of the first part shall be known in this contract as the party of the first part...")
* A Night at the Opera thumbs its nose at the Sex section of the Code. A few cracks are still on the outrageous side.
* A Night at the Opera to hear the Anvil Chorus without thinking of Chico and Harpo after you've seen it...
* A nightclub in Minneapolis plays with this; it's called "The Gay 90's," and is,
* A Night In A Moorish Harem and was only able to escape by dressing herself as an boy and fleeing on a merchant's ship. However, Myrzella is handed by her master as an gift to an Moroccan pasha who figures out her gender and she ends up being forced into his harem.
* A Night In Casablanca (1946). When a pompous and wealthy married couple by the name of Smythe turns up demanding a suite, Groucho's character assumes this trope is in play and sends them packing.
* A Nightingale Sang In Berkeley Square and has decided to go straight from now on, but takes a job as a maintenance man at a large bank, which gives him a lot of undue attention from "Ivan the Terrible", the local hoodlum. By using Pinky, Ivan hopes to rob the bank, and Pinky starts to like the idea of going back to his old ways.
* A Night In Heaven a love affair develops between a community-college professor and her failing student.
* A Night in the Lonesome October attempt, but Snuff doesn't go for it.
* A Night in the Lonesome October, each of the main human characters has an animal companion. Jill the witch has the traditional cat, Jack has a dog (who is the

story's narrator), and so on. The nature of the relationship varies; Snuff is an equal partner to Jack (and actually better than him at some kinds of magic that are usually handled by the human), while some of the other characters have more coercive relationships (Owen's squirrel familiar is bound by magic, and when his master dies is quite happy to go back to being a normal squirrel).
* A Night in the Lonesome October) learned he never was in their game too late for it to matter.
* A Night in the Lonesome October. Nobody knows who he really is, and there are rumors that he's something strange even by the standards of his colleagues, including one that he's the immortal Cain.
* A Night in the Lonesome October of the contestants could figure out the location for the showdown.
* A Night in the Lonesome October, one chapter has the narrator and his friend sucked into Lovecraft's Dreamland.
* A Night in the Lonesome October planning to sacrifice his stepdaughter to acquire supernatural power.
* A Night in the Lonesome October presents opening the gate to the Great Old Ones as a game played by Jack the Ripper, Dracula, the Wolfman, witches, mad scientists, and assorted other stock characters of horror. And it's narrated by Jack the Ripper's dog. What's interesting here is that looked at carefully, the actual setting isn't really much brighter or more idealistic than straight Lovecraft. All the coziness comes from the "insider's perspective" on the happenings, as well as the main characters' resistance to the more debilitating forms of insanity.
* A Night in the Lonesome October Quicklime goes on a several-days-long bender, using fermented windfall fruit as his source of alcohol.
* A Night in the Lonesome October, Snuff practically rips the vicar's ear off after he abuses Graymalkin. Snuff himself has scars on one ear from a past encounter with (implied) a voodoo-animated zombie.
* A Night in the Lonesome October, the final showdown over the fate of the world has a variety of dramatic side-effects. At one point, the moon turns blood-red and starts dripping.
* A Night in the Lonesome October, the narrator describes the vicar ranting about "Creatures of the Night and Unholy Practices and Living Blasphemies and Things Like That".
* A Night in the Lonesome October the size of a plum, and it's a bird-eating carnivore.
* A Night in the Lonesome October, which involved semi-regular contests between "Openers" and "Closers" over opening a portal to ancient gods of wonder and terror. If a contest was a draw, or won by Closers, the world remained the same, maintaining the current balance. Much of the month of the contest was filled with players carefully feeling out each other's allegiance and angling for advantage without sending the contest up into premature fireworks — maintaining another balance, if a pragmatic one.
* A Night in the Lonesome October) will kill each other, though deems it less than necessary, but really doesn't like involvement of others, warned normal animals away from the site of ritual and twice actually referred to them as "civilians".
* A Night In the Moorish Harem has Circassian harem girl Anna, who is described as very tall and slender despite being 19-years old, with skin as white as alabaster and hair being of the palest blonde. She used to be a princess that was taken captive during one of the Caucasian campaigns, sold to slavery and ended up on the harem in Morocco.
* A Nightmare on Elk Streek set in the same universe is actually an indestructible spirit. It is the Boogeyman, the King of the Boggarts, and a literal god of fear invoking a movie slasher from the script they're working from.
* A Nightmare on Elm Street (1984) as a means of freaking out Tina before her quite violent death.
* A Nightmare on Elm Street (1984): During Nancy's classroom nightmare, she follows Tina's corpse down the school hallway, which has left a bloody trail on the floor behind it.

* A Nightmare on Elm Street (1984), Freddy Krueger is set on fire (again) by the heroine, Nancy Thompson. Not surprisingly for the undead, Freddy manages to chase Nancy around while still on fire, and get in a final kill (her mother). Even his footprints are flaming as well.
* A Nightmare on Elm Street (1984), Freddy possesses Nancy's phone and sticks his tongue through it and into her mouth.
* A Nightmare on Elm Street (1984), giving him not only an artistic setting to jump off from, but a synthesizer riff for the movie soundtrack.
* A Nightmare on Elm Street (1984) had read that those colors together tend to mess with viewers' eyesight, and produce a generally unsettling result.
* A Nightmare on Elm Street (1984) has a more sinister subversion of this trope, as the first scene shows Freddy Kreuger assembling his iconic bladed glove.
* A Nightmare on Elm Street (1984) named Freddy Krueger after a bully who harassed him and based his appearance on a disfigured hobo who scared him as a child.
* A Nightmare on Elm Street (1984). Nancy falls asleep in the tub and Freddy's bladed glove pops out of the water, but she wakes up in time for nothing to happen. When she dozes off again, he suddenly drags her under into a huge underwater space that he created with his dream powers, and she almost drowns.
* A Nightmare on Elm Street (1984), Nancy's mother mentions that she took and kept Freddy's knives after participating in the lynch mob that killed him (which eventually turned him into the dream ghost we know).
* A Nightmare on Elm Street (1984), Nancy's mother reveals that she participated in a plot to bait and murder Freddy Krueger and kept his knives.
* A Nightmare on Elm Street (1984) of Freddy's rampage became a Vomiting Cop. This is expanded on in a deleted scene, although part of the scene is in the regular version.
* A Nightmare on Elm Street (1984) rips off Freddy's face as she struggles with him. But he allowed that to happen to scare her even further.
* A Nightmare on Elm Street (1984). The first of Freddy's victims in the movie.
* A Nightmare on Elm Street (1984): There's some Freddy Krueger and Nancy Thompson fanfics out there, mainly caused by the line:
* A Nightmare on Elm Street (1984); they included it in the video, again for no reason.
* A Nightmare on Elm Street (1984), though it's justified as he exists within dreams.
* A Nightmare on Elm Street (1984). When Freddy first confronts Tina in the nightmare that ultimately leads to her death, as he walks toward her he stretches his arms out to the width of the alley they're in.
* A Nightmare on Elm Street (1984) When Lt. Thompson arrives at the scene, he asks where the coroner is and gets the response "He's been in the John puking since he saw it."
* A Nightmare on Elm Street (1984), which for some reason is most common among South East Asians.
* A Nightmare on Elm Street (2010), but nevertheless, the fanfic writers took to it like a fish to water...
* A Nightmare on Elm Street (2010) has Freddy doing this, except it's actually an inversion, as he appears when the eyes of the one watching him close, since they are drifting in and out of consciousness, and Freddy attacks in dreams.
* A Nightmare on Elm Street (2010) has the human-Krueger do this for a while as angry parents pursue him through an abandoned factory complex.
* A Nightmare on Elm Street (2010) reboot: "This won't hurt one… little... bit!"
* A Nightmare on Elm Street (2010) remake, when Kris wakes up from her nightmare and goes to the bathroom to splash water on her face. Played straight at the very end.
* A Nightmare on Elm Street (2010) video blogger. We see several video entries about his dreams of Freddy... and then we see one with him asleep. He then suddenly slams into the camera and the screen blacks out.
* A Nightmare On Elm Street 2 Freddys Revenge gym teacher, is revealed to be one of

these when Jesse finds him in an S&M bar and he brings him to the gym and makes him run laps before hitting the shower. It's heavily implied he intends to sexually abuse Jesse before Freddy possesses Jesse and kills him.
* A Nightmare on Elm Street 3: Dream Warriors as it is a dream and she has mad acrobatic skills in her dreams.
* A Nightmare on Elm Street 3: Dream Warriors being controlled as a marionette by Freddy in his dreams.
* A Nightmare on Elm Street 3: Dream Warriors by manifesting himself through a marionette doll.
* A Nightmare on Elm Street 3: Dream Warriors, Freddy and Nancy come face to face for the first time since she defeated him, and all he says is an angry "you".
* A Nightmare on Elm Street 3: Dream Warriors, Freddy conjures up a rusty, spike-covered killer wheelchair to attack a paraplegic youth in his dream.
* A Nightmare on Elm Street 3: Dream Warriors, Freddy kills Jennifer by possessing a television set and causing her to jam her head through the screen.
* A Nightmare on Elm Street 3: Dream Warriors, Freddy Krueger kills Jennifer by popping out of the television, although his head comes out of the top and his arms come out of the side, rather than out of the screen. She ends up with her head smashed into the screen.
* A Nightmare on Elm Street 3: Dream Warriors, Freddy's bones come to life when the characters try to give him a proper burial.
* A Nightmare on Elm Street 3: Dream Warriors, Freddy transforms himself into a giant snake creature and tries to eat her from the feet up. He lets her go when Nancy comes to the rescue.
* A Nightmare on Elm Street 3: Dream Warriors had one of its alien doppelgangers attempt to imitate a cardboard Freddy Krueger standee at a video store.
* A Nightmare on Elm Street 3: Dream Warriors has Kristen construct a dollhouse version of 1428 Elm Street. At the end of the film, a light suddenly turns on in one of the house's windows.
* A Nightmare on Elm Street 3: Dream Warriors is a walking television, who can transport people through herself.
* A Nightmare on Elm Street 3: Dream Warriors of the mental patients), but they survive alongside Kristen in the filmed version.
* A Nightmare on Elm Street 3: Dream Warriors Taryn is approached by a creepy orderly who offers her drugs if she'll sleep with him, an offer which she manages to defiantly reject.
* A Nightmare on Elm Street 3: Dream Warriors, though some consider that a separate film from the main series.
* A Nightmare on Elm Street 4: The Dream Master. Alice suits herself up with articles of clothing that belonged to her dead friends before going off to fight Freddy.
* A Nightmare on Elm Street 4: The Dream Master) before going in for the kill.
* A Nightmare on Elm Street 4: The Dream Master: Dan Jordan, the popular sports jock whom Alice crushes on, is an all-around nice guy who avoids the mean behavior of the trope's counterpart.
* A Nightmare on Elm Street 4: The Dream Master, Freddy attacks Kristen in one of her dreams on a sunny beach. She actually tries to dream about a nice and bright place in the hopes that Freddy won't appear, but alas.
* A Nightmare on Elm Street 4: The Dream Master. He fixes himself up with just a wave of his hand.
* A Nightmare on Elm Street 4: The Dream Master is the one doing the killing.
* A Nightmare on Elm Street 4: The Dream Master: "I've been guarding my gate for a long time, bitch!"
* A Nightmare on Elm Street 4: The Dream Master, Kristen finds herself trapped in the beach dream when the sand beneath her turns into quicksand. Freddy Krueger places his foot on her head, and pushes her down.
* A Nightmare on Elm Street 4: The Dream Master: The film where it all went downhill by going even further to make Freddy comical to the point that he is little more than a one-liner spewing joke on top of unceremoniously killing off the

leads of the more popular previous installment or is it a well directed fun, creative, and flashy entry that knows what it is and embraces it with one or two good scares along the way and an above average slasher sequel heroine? It actually did okay with critics, polarizing reviews for a slasher sequel qualifies as such, and seems to be enjoyed by many fans whilst others see it as the beginning of the end or the end itself.
* A Nightmare on Elm Street 4: The Dream Master to reveal the insect parts underneath.
* A Nightmare on Elm Street 4: The Dream Master undisturbed. They eventually catch on, but it's already too late by then.
* A Nightmare on Elm Street 4: The Dream Master when Freddy finishes up by crushing her in his palm.
* A Nightmare on Elm Street 5: The Dream Child birth, as Freddy attempts to brainwash Alice's unborn son so he'll be a cooperative catalyst for Freddy's dream-invasion powers.
* A Nightmare on Elm Street 5: The Dream Child: "Die, bitch!", as well as "Bon appetit, bitch!"
* A Nightmare on Elm Street 5: The Dream Child features Greta alone with her doll collection, looking at a picture of her group of friends and crying about how one of them has just died.
* A Nightmare on Elm Street 5: The Dream Child has a scene like this. After Greta has been force-fed to death in her dream, we cut to Alice going to fetch her father a drink in the fridge. When she opens it, the food rots in front of her eyes (and an eyeball even shows up on them) before her dead friend suddenly bursts out of the fridge, only to be dragged back inside by Freddy Krueger. The fridge closes, is opened again, and everything is back to normal.
* A Nightmare on Elm Street 5: The Dream Child has Freddy trying to turn the main character's unborn son into one of these, feeding the fetus souls to strengthen it, presumably intending to either make the baby into his agent, or possess it. In a nightmarish flashback to Freddy's own birth, he's also depicted as one of these.
* A Nightmare on Elm Street 5: The Dream Child in a nightmare sequence.
* A Nightmare on Elm Street 5: The Dream Child. Lord of nightmares, indeed.
* A Nightmare on Elm Street 5: The Dream Child: Played with as well. Alice is taking a shower when it turns out she's dreaming and the shower cabin starts filling up with water. She jumps out through a portal that just appears, but it's to lead her to something more dangerous.
* A Nightmare on Elm Street 5: The Dream Child starts just as protagonist Alice graduates from high school.
* A Nightmare on Elm Street 5: The Dream Child TV series wrote his dialogue. In the end it leaves the viewers wondering who its intended audience really is.
* A Nightmare on Elm Street 5: The Dream Child: When Yvonne does her swimming pool dives at night, Freddy attacks her by turning the swimming platform into a giant hand to crush her. She jumps off the platform to escape, but the pool morphs into an empty one in mid-jump.
* A Nightmare on Elm Street after killing them. Considering Freddy's urban legend status, it's left dubious as to whether or not it's true.
* A Nightmare on Elm Street. After the entire town is destroyed, he just creates another "Elm Street" in a neighboring city and admits that he intends to repeat this until literally everyone is dead.
* A Nightmare on Elm Street. All he cares about is mutilating and murdering people, whether in real life or in their dreams.
* A Nightmare on Elm Street: Although Freddy Krueger enjoys his living in Hell and often sets fire to various victims, it's often shown that fire is something he's truly afraid of following his physical death, and is one of few things that can truly harm him, even in the dream world.
* A Nightmare on Elm Street and similar cases. A number of healthy middle-aged immigrants died in their sleep from heart attacks. After checking and rejecting every cause they could think of, the investigators concluded that the deceased were scared to death by nightmares.

* A Nightmare on Elm Street, but turned into something resembling a nightmare ghost/demon after his death.
* A Nightmare on Elm Street by the dream demons who gave him his powers in the first place.
* A Nightmare on Elm Street comic Freddy kills a boy attending a pep rally by causing him to explode in a mess of blood when he nods off.
* A Nightmare on Elm Street films, as he started to have more fun tormenting his victims and became a theatrical wisecracker.
* A Nightmare on Elm Street films end this way (most of the others end with Freddy explicitly coming back).
* A Nightmare on Elm Street films, Freddy Krueger spoke with a very deep, sinister voice (in the first film for instance, he sounds almost demonic). It became less deep in later films as Freddy became more comedic in general.
* A Nightmare on Elm Street films. It's useful as a defense against Freddy's attacks, but is later shown to pose a serious risk of rendering patients comatose.
* A Nightmare on Elm Street films occasionally have examples between the set-up for gory kills and the kills themselves.
* A Nightmare on Elm Street films resemble a Dark World version of Springwood.
* A Nightmare on Elm Street) finds it refreshing, while his intended victim is completely horrified, especially when the drains fail to work and the room starts filling up.
* A Nightmare on Elm Street: Freddy becomes something of one due to making a deal with the Dream Demons.
* A Nightmare on Elm Street - Freddy is still wisecracking, but his cracks are now played more for horror than laughs.
* A Nightmare on Elm Street. Freddy Krueger has the power to kill people in their dreams. Any damage that he inflicts on you in a dream crosses over into the waking world.
* A Nightmare on Elm Street: Freddy Krueger is killed several times by the heroes, but he returns each time. The dream demons who are the source of his powers promised him that he would indefinitely resurrect no matter what anyone does to him. He even boasts about it.
* A Nightmare on Elm Street, Freddy Krueger is virtually unstoppable in the dreamworld, as it houses his spirit.
* A Nightmare on Elm Street: Freddy Krueger often decorates his victims' dreams with mutilated dollies, and is occasionally seen holding one by its legs or hair. A symbolic nod to his past killings of young children, which we never actually see on-screen.
* A Nightmare on Elm Street: Freddy Krueger used to work as a janitor at a high school when he was still human and living a double life as a serial killer. Thus his fondness for shaping his nightmare realm like a boiler room.
* A Nightmare on Elm Street: Freddy Krueger was originally a mix of both types, but after killing the children of everyone involved in his death, became strictly Type 2.
* A Nightmare on Elm Street gives Freddy a clear element of paedophilia, and thus this trope plays into the parents hunting him down.
* A Nightmare on Elm Street had his hair and its follicles burned off, but his eyes not only remain untouched, he also still has perfect vision.
* A Nightmare on Elm Street, has extensive burns all over his body, the result of the parents of Elm Street taking the law into their own hands during his days as the Springwood Slasher.
* A Nightmare on Elm Street has reprised his killer role as Freddy Krueger in all eight original-series films.
* A Nightmare on Elm Street has the main character use his powers to suppress the dreams of the townspeople, in order to protect them from Freddy. Unfortunately, this has the unintended side effect of gradually causing everyone to become violently unstable, and begin lashing out at random. A few incidents mentioned by the police include a student stabbing a teacher in the eye with a pencil over a bad grade, and a man shooting his wife because she was "vacuuming in a really

irritating way".
* A Nightmare on Elm Street, he's more likely to rape a woman than to show any love or affection. This doesn't stop people from shipping him with the women who frequently oppose him, the most popular being Nancy Thompson and Lori Campbell.
* A Nightmare on Elm Street, hinting that this is in fact his biological father.
* A Nightmare on Elm Street In addition to being a fit jock, recurring character Dan Jordan is the valedictorian of his class.
* A Nightmare on Elm Street, is particularly notable since Freddy only makes his big appearance in the last 15 minutes. The rest of the movie is dedicated to homoerotic scenes featuring the main character, Jesse, though this is what viewers tend to remember most.
* A Nightmare on Elm Street is set in a bathroom in which Freddy's razor-gloved hand emerges from a bathtub still occupied by a dozed off Nancy.
* A Nightmare on Elm Street is sometimes revealed to have the screaming faces of his past victims embedded in his torso.
* A Nightmare on Elm Street Krueger, and was taciturn, creepy and imposing. In the sequels he became known as Freddy and turned at first darkly comedic and then just comedic, killing his victims in increasingly zany and bizarre ways (the top was probably using the Power Glove to kill a kid turned into a videogame), and acting much more like a cruel jokester.
* A Nightmare on Elm Street masquerading as him who has taken other forms throughout the ages.
* A Nightmare on Elm Street movies are just one long love note to this trope.
* A Nightmare on Elm Street once woke up and saw Freddy Krueger staring at him from out of a mirror. Mr. Englund admitted to being scared until he realized he'd fallen asleep while the make up artist was working on him.
* A Nightmare on Elm Street only give you a temporary period of safety...that you have no way of knowing has ended until people (possibly you) start dying again.
* A Nightmare on Elm Street only to have him come back later rather upset about all of it.
* A Nightmare on Elm Street Part 2: Freddy's Revenge: A rushed cash grab of a sequel that missed the original point of Freddy's MO and is filled with both hilarious failed attempts at horror and laughable homoerotic imagery and overtones, or is it actually one of the better sequels that tried something different and managed to maintain a really dark, ferocious, and truly terrifying Freddy Krueger? It was largely panned when it first came out, but over time has been getting a bigger and bigger cult following.
* A Nightmare on Elm Street Part 2: Freddy's Revenge films are hated even worse than the second though.
* A Nightmare on Elm Street Part 2: Freddy's Revenge: Freddy jumps through the glass doors of Lisa's house and disappears briefly after confusion at his inability to kill Lisa (Jesse, whose body he is controlling, won't let him).
* A Nightmare on Elm Street Part 2: Freddy's Revenge, Freddy takes over Jesse's body by messily transforming it into his own shape. This includes blades growing out of Jesse's fingers, his skin peeling off, and Freddy ripping open and bursting out of his chest. Jesse is howling in visible agony the entire time.
* A Nightmare on Elm Street Part 2: Freddy's Revenge has gone on record saying that he thinks that Freddy in this film represents Jesse's repressed homosexual desires. Mark Patton (who played Jesse) came out as openly homosexual after the film was released, and thinks that his self-doubts about his sexuality at the time when the movie was shot carried over into his performance.
* A Nightmare on Elm Street Part 2: Freddy's Revenge has just moved into the house on 1428 Elm Street when Freddy starts making his comeback.
* A Nightmare on Elm Street Part 2: Freddy's Revenge, Jesse's little sister digs through a box of cereal for the free prize, a set of small, plastic finger blades. The cereal, incidentally, is called "Fu Man Chews".
* A Nightmare on Elm Street Part 2: Freddy's Revenge. Subsequent films gave him normal looking ones, though.
* A Nightmare on Elm Street Part 2: Freddy's Revenge, when Freddy cuts his way out

of his body.
* A Nightmare on Elm Street Part 2: Freddy's Revenge. When Freddy possesses the hero of the film, Jesse, and chases his girlfriend Lisa, Lisa states that she still loves him and kisses Jesse/Freddy. Jesse gains the strength to fight Freddy from within and destroy him, regaining control of his body.
* A Nightmare on Elm Street. Partially subverted, considering he just came back as a dream demon with horrible burn scars.
* A Nightmare on Elm Street (PC) feature living skeletons as minor enemies.
* A Nightmare on Elm Street (PC) is a chainsaw. It grants you an ability to go though walls until it breaks.
* A Nightmare on Elm Street: Perchance to Dream has a Fast Food Restaurant Brawl, caused by everyone being rendered edgy, paranoid and violent due to Jacob Johnson stopping everyone in Springwood from dreaming for at least a month (to protect them from Freddy). Later on, in the police station, patrons are still fighting, with several cops now involved.
* A Nightmare on Elm Street reinstates the sexual aspect of his crimes and actually removes the murder, which most audiences saw as upping the ante of his crimes overall.
* A Nightmare on Elm Street seems to suggest they are when one killed character tries to warn his friend not to fall asleep. Having to wade through the souls of Freddy's previous victims to do so.
* A Nightmare on Elm Street sequels. Which is quite a feat from a rapist child-killer.
* A Nightmare on Elm Street series has a fairly well-known rhyme associated with its dream killer, Freddy Krueger:
* A Nightmare on Elm Street series is themed around this, as Freddy Krueger attacks his victims through nightmares. Even worse, considering how much power he has over the dreamscape, he is able to manipulate your dreams according to your fears, desires and insecurities. Makes the glove itself feel like being put to sleep in comparison, not to mention a more merciful death at that (let's just say the multitude of freakish nightmares some of the teenagers suffer increase in frequency the further the series progresses rather than describe them).
* A Nightmare on Elm Street series loves to scrape his finger blades along the nearest surface while stalking his latest victim. As well as creating sparks upon the impact of metal on metal, it echoes across the surroundings, screwing with his victims by freaking them out before they even get a chance to see him.
* A Nightmare on Elm Street series, particularly the later films, where the children discover they can use hypnosis to enter the dream world together and give themselves superpowers.
* A Nightmare on Elm Street series whenever someone enters Freddy's home.
* A Nightmare on Elm Street: Several teenagers try to postpone a confrontation with the deadly dream demon Freddy by taking coffee, as he kills people when they go to sleep.
* A Nightmare on Elm Street: Suffer The Children girl Kat's tattoos to come to life and peel themselves, and the skin they're printed on, off her body.
* A Nightmare on Elm Street. "Ten years from now" (2001) Freddy has managed to kill off all of the teenagers and children of Springwood, leaving only the adults. The town is a complete wreck, near abandonment, except the adults are still there. They've all been left in a state of psychosis, possibly due to Freddy's influence.
* A Nightmare on Elm Street. The children are strongly implied to be spectres of Freddy's previous victims, as he often populates his nightmare world with them.
* A Nightmare On Elm Street The Dream Dealers allows people to experience the dreams of others, including sexual ones.
* A Nightmare on Elm Street (the remake), Nancy attempts to hide from Freddy while in the dream world. She hides in a closet, and for a moment it seems like it works, as Freddy scouts the room and leaves... only to appear in the closet beside Nancy and growl "Boo" in her ear. She naturally screams and runs out.
* A Nightmare on Elm Street. They chose Freddy Krueger, and made him immortal too.
* A Nightmare on Elm Street to (temporarily) slay him after he's inevitably killed

off the rest of the cast.
* A Nightmare on Elm Street, what are you going to do about it? Tell him he's not funny?
* A Nightmare on Elm Street, when Freddy is chasing Tina down the alley, his arms extend to a freakish length, with his claws scraping the walls on both sides of the alley.
* A Nightmare on Elm Street which went more into depth about Freddy's past, but it was cancelled after three issues.
* A Nightmare on Killmotor Hill! who is trying to get Lena to give her magic back. Yet again, it nearly worked.
* A Nightmare's Trip himself is a nightmare created that way, though he doesn't remember who his Conductor is.
* a nightmarish dimension, which has been known to flicker and dim on occasion.
* A nightmarish version occurs in one of the novels in Andrey Livadny's
* "(A) Night/Nite to Remember" is not by The Real McCoy, but by their former frontman, Olaf Jeglitza, under the name O-Jay.com.
* A Night on Bald Mountain. (When she wakes up, she even eats the last piece of the pizza.)
* A Night on the Town, a character gets a knife thrown at his foot. He's rushed to the doctor, the doctor administers the solitary necessary stitch. He then gets told that while he was administering this tiny stitch to a tiny wound a man with a stab wound just died. He then meets the plucky bunch of kids in the hall, who want to know what happened to their friend with the stab wound. He tells them he died, they go into a fit of mourning, he walks into the corridor asking everyone what they're crying about, "Don't you ever die on me again!", etc.
* A Night to Remember, from the "You and I will be in the same boat later" conversation, to an aristocratic lady moaning about being out of bed due to the Titanic being 'unsinkable', cut to the boiler room flooding and the stokers desperately evacuating.
* A Night to Remember stay aboard for one reason or another. There's even a sub-plot about a young married couple who initially want to stay behind just so they can remain together, but are talked out of it by Thomas Andrews, the architect who ironically went down with the ship himself.
* A Nike Jordans commercial aired during the 2012 Olympics showed two preteens, one in China and the other in the U.S., watching the 2012 Olympics and being inspired to pursue careers in basketball because of it. It shows them training throughout grade school, playing each other in college sports, then being recruited for the 2029 NBA draft, then playing in the 2032 Olympics, which are apparently in Cairo (even though the actual 2032 Olympics are in Brisbane). The technology gets increasingly high tech, showing whole building ads and futuristic TVs that take up whole walls.
* Aniline dyes were available from 1854 onward, and fashion called for color combinations most modern people would describe as clashing, like bright yellow and mauve.
* Anil Kapoor, a Bollywood (Indian) superstar, is playing a character of presumably Iranian origin, though not a terrorist, but a foreign President.
* An ill-fated romance between two forms part of the plot of the adventure game
* an illicit arrangement in which Washington players were paid bonuses for deliberately injuring opposing players to take them out of the game was discovered. They appealed the charges and won, resulting in no penalties or suspensions from the ever more vigilant NFL Executive Office. The New Orleans Saints, whose bounty program supported by the coaching staff meant to encourage defensive players to injure opponent players in exchange for cash bonuses started the whole investigation after a pre-game speech by their defensive coordinator, Gregg Williams, before the 2011 NFC Divisional Game was leaked (in which he calls for taking their rivals' starting RB, Frank Gore, out of the game and make their starting receivers fear catching the ball by hitting them hard at the beginning of the game), ended with money fines, lost draft picks, and coach\player suspensions that at times extended to the entire 2012 season.

* An "illicit art mistaken for approved art" variant: Banksy has left his own reinterpretations of famous pieces in museums as though they were meant to be there. They often stay up for days or weeks before someone notices and takes them down.
* An ill-thought remark the Emperor makes about Rogal Dorn saying "fuck that" to the Codex Astartes gets him more information than he wanted. Rogal is apparently literally brain-damaged, explaining how he can be
* An illustrated children's book (title unknown) had a king whose land was suffering from famine appealing for help from a neighbouring dictator ruling a land full of food. The dictator rejects his plea because "You are too thin to be a king" and has the king thrown into prison as an impostor. The king escapes and is chased by the dictator's army, who are all so fat their vehicles plough up the hard ground of the king's land, making it suitable for cultivation. The king then proposes they make peace. "
* An illustration: A school district in a rural school district covering 200 square miles purchases five new buses. The new buses are placed on the high-mileage routes and used for athletic trips. The buses they replace are then put on shorter routes, perhaps in-town. The oldest buses still on regular routes are then parked at the bus garage, used only when one of the newer buses is being repaired or otherwise unavailable. To mean – as a bus gets older, they begin fitting the trope more and more as the newer buses fit the spotlight.
* An illustration for the official storybook adaptation of the movie, which shows the thugs in a more well-lit scene, makes clear that they are indeed human: they have hairy, flesh-colored forearms, and their "black faces" are just executioners' hoods. But you can't know this from the movie proper.
* +Anima, and neither of them can tell that the fish + anima is actually Husky in a wig and girly clothes until they get right up in his face.
* Anima: Beyond Fantasy and his followers were kicking supernatural asses elsewhere, that's something to be expected.
* Anima: Beyond Fantasy are dressed like high-class call-girls, with plenty (well, relatively speaking) of leather, lace, and frills.
* Anima: Beyond Fantasy aren't exempt of this, even with the large possibilities of customizing them the game offers. Lowest life points per level and high costs of the abilities to attack, parry, and use armor, even if it does not interfere with their ability to cast spells or invoke creatures, say it all.
* Anima: Beyond Fantasy, are said to suffer since childhood a training so hard, including of course religious indoctrination, that few survive the ordeal — those less worthy end up as guards of the place.
* Anima: Beyond Fantasy as in her country women were not expected to become that.
* Anima: Beyond Fantasy, as they skin the face of the person who want to copy and place it over theirs to look as the previous owner of that face. The game says nothing about what happens to the unfortunate victim, by the way.
* Anima: Beyond Fantasy as well as golems- are highly sought by the current powers.
* Anima: Beyond Fantasy Daphne, the Kingdom of Roses, works this way with women ruling and being warriors, etc. while men behave in the way the former act elsewhere being soft, etc. and basically staying in the kitchen, caring and raising children, etc.
* Anima: Beyond Fantasy features a huge, sprawling ancient city buried beneath the city of Hecate.
* Anima: Beyond Fantasy has a somewhat indirect version of this in Nobility magic. It's a minor path of magic, but it nonetheless features quite horrifying spells, if you think of the implications. This magic in general features spells that seem to define Nobility as a question of appearances. At no point is nobility of heart mentioned. Examples include:
* Anima: Beyond Fantasy has Edamiel, a Beryl that after no emotions were able to fill her, even joy that was what she represented, embraced oblivion.
* Anima: Beyond Fantasy has the sphere of magic of Darkness, most of whose spells mirror the ones of the sphere of magic of Light allowing for stuff as manipulating the former to make solid objects and of course shadow manipulation.

* Anima: Beyond Fantasy have very good reasons to keep the masquerade and be under the aegis of an organization of them named "Samael", namely to stay alive in a human-dominated (part of the) world where are considered as demons by the Inquisition and hunted by the latter, and are supposed to be just legends. Presumably the same would happen with humans in those two other parts of the world where non-human beings rule.
* Anima: Beyond Fantasy in that magic was used to divide the planet in three regions, each one of them even if the world itself was not physically divided appearing as an independent planet for their inhabitants.
* Anima: Beyond Fantasy in three smaller, spherical ones plus a bunch of much smaller territories that did not get included in them. Depending on someone's location, those barriers take different forms - from a large, perpetual tempest that allows circumnavigation of the (sub)world in the case of the human territories to terrain that repeats again and again in the case of some of those separated territories.
* Anima: Beyond Fantasy is almost rampant, we've Samael, an organization that encompasses sentient, non-human races. While some members of it just want to live in peace again with mankind, others want to destroy it.
* Anima: Beyond Fantasy. Little details, however, are given on what are her implants.
* Anima: Beyond Fantasy makes not just the katana, but all Japanese weapons superior to western counterparts. They all have a higher presence(coolness factor basically) than western weapons. Mechanically, however, it's not really any different from a longsword in combat and its higher presence score only means that it's very slightly more resistant to being — for example — magically transmuted into a rubber chicken. It's also slightly less durable physically.
* Anima: Beyond Fantasy. Nothing that a high level group of adventurers couldn't handle, though... And contrary to appearances, Edamiel is anything but insane. There is no pain nor evil in oblivion, while existence is full of it. The best option is crystal clear, if unacceptable. Beside, even the highest gods are no match for a Beryl — especially one like her.
* Anima: Beyond Fantasy. Not only she governs the largest empire of the game's setting but is also very good at fencing, being said she'll overtake her mentor Kisidan — a badass himself.
* Anima: Beyond Fantasy ones, the former good at tanking and leadership and the latter at attacking and coertion, and nothing stops someone of playing a paladin who behaves in the opposite way to the standard one and viceversa, the game's setting features several paladinesque characters most notably Khaine D'elacreu, Lilian Virgil, and even the Empress herself -the three having "Paladin" as character class-.
* Anima: Beyond Fantasy on this game, they're more than likely to look like chocobos.
* Anima: Beyond Fantasy powers are the already mentioned Empire of Abel (much larger and powerful than any other, but with its forces scattered over its entire area) and Azur Alliance (considerably smaller than Abel, but looking for ways to offset that difference of power and with its armies much more concentrated), plus the Holy Church of Abel (very small in geographical terms, but having significant political and especially religious power).
* Anima: Beyond Fantasy RPG allows a mage to erase anything from existance. From a single person to an entire species or continent the Uncreation spell completly stops it from ever having existed at all, with the timeline changing to match. Only people with a very high Gnosis (basically how important they are in reality) can even notice that something is different.
* Anima: Beyond Fantasy. Since in that game spellcasting can be done even tied and/or gagged, presumably the chains and the like used to hold the victim would nullify their powers.
* Anima: Beyond Fantasy stones. Once submerged in water, they shine so much that usually are used as street lights.
* Anima: Beyond Fantasy that. Azrael is also featured there, even if she has

nothing to see with the Grim Reaper and represents instead justice and goodness (in paladin-esque sense).
* Anima: Beyond Fantasy: The Holy Order of the Heaven, bodyguards and private army of the Emperor (now Empress) of Abel, which includes some of the best combatants in the setting.
* Anima: Beyond Fantasy. The manual suggests the mess left behind by Eljared is weakening the barrier between it and the world.
* Anima: Beyond Fantasy, this was the way to resolve large conflicts between principalities, with wars arbitrated by the Empire following very strict rules that ensured no damage to civilians or innecesary bloodshed.
* Anima: Beyond Fantasy Vatican (see further) having apart the clerics of the Church of Abel little more than a small nobility.
* Anima: Beyond Fantasy with the Empire of Abel and the Azur Alliance -as well as before things got screwed up, when the Empire is described as a benevolent entity (at least for humans and not supernatural stuff).
* +Anima dressed up like one. Nana even believes he's a girl secretly crossdressing as a boy in the beginning.
* Animaestro, determined to show the power of 2D animation and just what a director of a cartoon can do. And yes, he voices himself in the French dub.
* +Anima, fish +Anima, is at least two times taken for a mermaid and Cooro, crow +Amina, constantly freaks people out, because they think he is black angel.
* An image from the opening credits and a few other places depicts the Cipher Wheel/Zodiac, with the aforementioned Bill Cipher surrounded by symbols for various characters: the pine tree from
* an image in one of the devs' Twitter feeds territory, measuring in at 134 kilometers.
* an image of a woman about to perform fellatio hidden in one of the ice cubes. This one was so graphic, it DIDN'T make it past the radar and was recalled.
* An image offering worthless "advice" on surviving wild animal attacks depicts a wasp in between a goose and a snake ("
* Animagi seem to like using this reasoning, especially unregistered ones. In
* Animagus transformations are heavily implied (and confirmed in the movies) to be almost instantaneous so they never get interrupted.
* +Anima, he won't go against anyone's decisions, even if they were made under stress, frustration or stubbornness. While the early chapters pointed it out, it wasn't until the final volume that it was properly addressed.
* +Anima. Husky and Nana both have phobias that seem to go against their +Anima abilities — Husky is a fish +Anima and afraid of drowning, Nana's a bat +Anima and afraid of the dark. This is because they gained their +Anima powers when their lives were being threatened in those exact positions (Husky was being drowned by a spiteful relative and Nana was being chased by her murderously abusive father through a dark forest).
* Animainiacs episode "Video Review" is an updated homage to the above shorts, particularly "Book Revue", applying the same concept to a rental store full of videocassettes.
* +Anima is, admittedly, only ten years old, but he still doesn't care much for girls. Maybe it's because he was forced to crossdress to make a meager living for longer than he'd care to say, or maybe because of a rough experience with an all-girl gang in one of the early chapters (where he lost his most prized possession), but when the bat-girl Nana tried to join the group, he objected rather violently, and said that he hates girls. He eventually softened up... a little. But he still gives Nana grief for being "such a girl" despite being very, very girly himself, and so feminine that he's frequently mistaken for a girl by women and men alike.
* Anima itself inverts this trope. It appears as a boss and is not particularly hard. When obtained for the player to summon, admittedly much later, it's much more powerful with its Overdrive dealing over 100 times the damage it did as an enemy.
* Animal Actors, a dog would come on stage by bursting through a stone wall.
* Animal Actors, during the obstacle course segment, one of the dogs pees on the volunteer's shoulder instead of jumping over them as planned.

* Animal Actors, one of the show's birds is taken off the stage by a "stage hand" — a human hand sticking out of a part of the set.
* Animal Alpha's "Bundy" contains the lyrics "Shut your face—shut your—shut—shut—shut your face up" repeated four times.
* Animal and Gonzo. No-one has any clue as to what either of them is, to the point where the latter was frequently referred to as a "whatever". Of course, Gonzo later
* Animaland, it died after just nine shorts. David Hand's son has tried to revive the series, but nothing ever came from that.
* Animal Assassin: The Greek goddess Hera sent two serpents to kill her infant stepson Heracles. It didn't work.
* Animal Athlete Loophole: An animal plays sports since no rule bars it.
* Animal Athlete Loophole: An underdog sports team brings a pet in to play and wins the game.
* animal attributes. The characters use the term "species" when referring to Faunus and humans, which suggests that they're different species who simply look alike, but they also use "humanity" to collectively refer to both humans and Faunus.
* Animal Battle Aura: An animal motif appears around or behind a martial artist in battle.
* Animal Behavior: Dr. Clement gives a tiny bag to one of his patients, Lorraine the leech, for her to breathe into when she has a panic attack.
* animal characters seem to have the sexual dimorphism of their real life counterparts. Meaning a character's gender isn't always apparent. In light of this the females tend to wear tiaras with decorative threads that give the impression of long, feminine looking hair.
* Animal charities warn against doing this to train dogs, since it doesn't work and frequently makes them untrainable. Feed them treats for good behaviour instead.
* Animal Chick Magnet: Women who like animals want to date men who share a similar interest in pets.
* Animal Collective shows a blossoming romance between a human woman and... something else.
* Animal Collective. The Goth herself looks normal throughout most of the video, except during a brief moment in the middle when an alien head pokes out of her mouth and starts singing.
* Animal Collective were initially based around a series of looped recordings of member Avey Tare playing a friend's piano: The piano in question hadn't been tuned in years, so the band ended up tuning their instruments to the out-of-tune piano loops, resulting in some unusual guitar sounds. When they decided to also add live piano to the album, they had a professional piano tuner detune the piano they had in studio to match the out-of-tune piano from the recorded loops.
* Animal Cops: Houston, which survived mostly unaffected with a hole completely through its neck, possibly resulting from a dominance fight with another stallion (it was not deemed abuse-caused as is the norm on these shows).
* Animal costumes that require multiple people, the most famous examples being two-person horse costumes and Chinese lion dancers.
* Animal Crackers (2017)" The creators hired a real barbershop quartet just for this gag.
* Animal Crackers avoid having to go out in a thunderstorm by taking an alternate exit into a sunny garden.
* Animal Crackers, Captain Spaulding dictates a letter to the law firm of Hungerdunger, Hungerdunger, Hungerdunger, Hungerdunger, and McCormick (or Vasserschlagel, Vasserschlegel, Vasserschlugel, and McCormick, according to one script). At one point he has his secretary read back to him what he's written thus far:
* Animal Crackers, Captain Spaulding has the first name of "Jeffrey" in the film credits and in the script of the play, but "Geoffrey" in a newspaper headline also displayed at the start of the film. (Spaulding's name originally lacked the U, but was changed to avoid coincidental resemblance to persons living or dead.)
* Animal Crackers: During one of his "strange interludes", Captain Spaulding (Groucho) proposes marriage to both Mrs. Rittenhouse and Mrs. Whitehead at once:

* Animal Crackers, Harpo uses one at the end of the movie. It knocks everyone out, including himself.
* Animal Crackers, in which the forgery substituted for the stolen "Beaugard" is determined to be the work of a left-handed painter.
* Animal Crackers is the leader of a local gnu heard. However, he's not that good at it, causing his heard to often try getting him off their backs.
* Animal Crackers (not included in the movie version) involves this during the scene where Chico and Harpo plan to steal the painting, and Harpo has the fold-up latter set upside-down.
* Animal Crackers. One of the few songs from the original stage show retained for the film.
* Animal Crackers: play —> what the Marxes did to the play —> movie —> play based on the movie
* Animal Crackers, Ravelli threatens to reveal Chandler's past identity, taunting him: "Abie the fish man! Abie the fish man!" (In the script of the original play, the taunt was "He's Ivan the Fish-Peddler.")
* Animal Crackers, Spaulding proposes marriage to both Mrs. Rittenhouse and Mrs. Whitehead at once:
* Animal Crackers, the Professor (Harpo) makes his entrance with balloons in his mouth, which he proceeds to inflate. Spaulding (Groucho) asks him, "You haven't got strawberry, have you?", and he produces a red one. The 1930 movie version, being filmed in black and white, changed "strawberry" to "chocolate".
* Animal Crackers was a co-production between Alphanim (France) and Cinar (Canada).
* Animal Crackers was based on the long-running comic strip of the same name.
* Animal Crackers: "We tried to remove the tusks, but they were embedded so firmly we couldn't budge them. Of course, in Alabama the Tuscaloosa, but that is entirely ir-elephant to what I was talking about. We took some pictures of the native girls, but they weren't developed."
* Animal Crackers, when Spaulding is examining the painting John has forged:
* Animal Crackers, when Spaulding is inquiring about the stolen painting, Ravelli (who helped steal it) suddenly comes up with a dubious theory of what happened:
* Animal Crackers, where the secretary decides not to write down what Capt. Spaulding says on the grounds that it was nonsense.
* Animal Crack-Ups, in which celebrities answered trivia questions about animals with the winner getting a cash donation to the wildlife-based charity of their choice.
* Animal Crossing (2001) is allegedly a black version of one of the dog townspeople with red eyes. He is claimed to move in if you neglect your game for too long, speaks and sends letters in binary, and has a house full of nothing but fish that crashes after entering it. He apparently leaves the town after just one day. Everyone who claims to have seen him has either misplaced their cameras or had him...mysteriously disappear as they were getting ready to snap a photo. The one "screenshot" available on the internet is clearly edited.
* Animal Crossing act like prepubescent children, despite being at least young adults. They also dress cute at times, like the villager Bob who wears a cute pink shirt. They also cry a lot and talk about food, sleeping, and playing with you. D'aww...
* Animal Crossing, and as such are prodigious farters. Some stories even depict them with three anuses in order to perform literally inhuman farts!
* Animal Crossing and get one from a villager. Though in the other villages they could have tons of of stuff that you want.
* Animal Crossing, and in addition, in-game the ground curves downward into the distance.
* Animal Crossing anime movie, in which the main character, like in the games, is the only human. Though there is another human character that pops up, humans are still vastly outnumbered.
* Animal Crossing, at the start of the game, you get to choose between Goldie, Rosie, Jay, or Apollo depending on the category chosen. After going through the tutorial with Isabelle, the villager you just invited over will approach you and

explain that it would be better if you hosted a lot of visitors, before stating that they have a vision about the future campsite (though Rosie says nothing about a vision, starting it without warning, and if Jay is chosen, Jay will say that he is not sure if it is a vision or if he is super dehydrated, but he nevertheless tells you to strap in). The vision itself consists of a campsite with a merry-go-round and a tree swing, several tables and chairs, drinks and flowers. In hopes of making the vision come true, the villager will tell you to go to Saltwater Shores and the adventure begins.
* Animal Crossing bio. It translates to: "When I suddenly met her she asked me to please paint her face, it really surprised me! Did her makeup fall off maybe? Huh? She’s a boy?!"
* Animal Crossing. But animal neighbors never actually commit to anything, so instead of anything related to marriage, they just give you a framed photo of themselves once you max out their friendship.
* Animal Crossing: City Folk, except Kapp'n drives a bus instead of a taxi and can take you to a city where a few shops/characters have been moved to.)
* Animal Crossing: City Folk has Felicity the cat and Twiggy the canary.
* Animal Crossing, despite being a Japanese game, has two different references to the 4th of July (American Independence Day):
* Animal Crossing dubs him a turtle, his love of cucumbers makes it obvious what he's supposed to be. His name is also an obvious pun.
* Animal Crossing. Either it's too long, it's too repetitive, or it really ought to be skippable.
* Animal Crossing) face entirely, using the same interface that the game uses for drawing clothing patterns.
* Animal Crossing finally averts it. When your villager's stomach is filled with fruit, it's possible to use a toilet to empty any "excess fruit energy".
* Animal Crossing, fossils can be dug up, such as trilobites, the Peking Man, a dinosaur track, a dinosaur egg, and... dino droppings. So close...
* Animal Crossing games, if Gulliver washes up on the shores of your town, he'll indulge in a bit of this as you try to wake him up.
* Animal Crossing games. If you forget to visit every so often, you start to lose your town to the inexorable decay of time—without maintenance, buildings become dilapidated, fields are overgrown, belongings rot, and townsfolk leave. No one actually dies, but your village is little more than a ghost town by that point.
* Animal Crossing games, the player will see rare, alternative colored variations of fruits (except for coconuts) that sell more than their regular colored counterparts.
* Animal Crossing games, there are no deadlines to anything in-game. You play the game at your pace.
* Animal Crossing games, you are rewarded with a Golden version of the Bug net/Fishing rod, which allows you to catch the two more easily. However, at this point, you'll have no need to catch any more of the things outside of maybe earning money for upgrades to your house/town. Also, in the DS version, there are no bonuses for fully upgrading your house at all (the Gamecube version had a Golden Statue in front of the Train Station for paying off the last upgrade).
* Animal Crossing game without the main aspects; however, there is a market out there for designer games. Despite the heavy criticism, it sold quite well in Japan.
* Animal Crossing has a few penguins at potential residents, but then, you're the only human, so it's not a big shock.
* Animal Crossing has an annual cherry blossom festival, even if you don't have any cherry trees in your town.
* Animal Crossing has both the "Creepy" and outright "Halloween" themes; "Creepy" is more haunted-house oriented while "Halloween" is full-out Jack-o-Lantern style Halloween.
* Animal Crossing has roving fashion consultant Gracie, a giraffe. Gracie will judge your clothing in some of the games, and in all games, she provides the player with her signature clothing line. She is depicted as having overall very expansive tastes.

* Animal Crossing has the Spooky furniture set, which can only be found on—of course—Halloween. It allows you to turn your house into one of these.
* Animal Crossing has two armed canine guards at the north gate. You can't even leave your own town until you get friend codes. The trouble is that you can't get friend codes within the game; you have to get them from other players.
* Animal Crossing. However, the inside of his house is decorated to resemble an ancient Egyptian tomb, implying that he's actually dressed as a mummy.
* Animal Crossing incarnation as a bus driver. He genuinely complements them frequently, however, so he comes off as more charming than creepy. Usually.
* Animal Crossing introduces C.J., who will pay even more Bells for them).
* Animal Crossing) Isabelle has quite the fanbase due to her cute appearance and perky attitude.
* Animal Crossing is in place for some NPCs, and the characters seem older (most pronounced with the Tanuki twins and Kapp'n's family).
* AnimalCrossing, it may thank you by sending you a 4-piece snowman family set in the mail. Both can be opened out in a row or tucked back away by touching them.
* Animal Crossing. Just take a stroll round the town to the tune of that ultra relaxed music, saying hi to your friends, maybe doing a little fishing or catching bugs.
* Animal Crossing, Lyle does this when presenting you with a questionnaire: "I got a few questions here. Ten. Actually, less. I got seven. Three. Ready? Bang!"
* Animal Crossing: New Horizons, Blathers does this when awakened during the day.
* Animal Crossing: New Horizons example of using this trope. The painting's title in Japanese is a phrase more accurately meaning "this is a woman who is only beautiful when seen from behind".
* Animal Crossing: New Horizons Gulliver and Gullivarrr can both show up as visitors in your island on the same week, but never on consecutive days.
* Animal Crossing: New Horizons has more than a few players literally call their island Pen to purposely invoke this trope.
* Animal Crossing: New Horizons has this when your villager feels like you're going to cry.
* Animal Crossing: New Horizons How much does it cost to order? 314 bells.
* Animal Crossing: New Horizons if you give Blathers a frog as an exhibit donation.
* Animal Crossing: New Horizons introduced these in the 1.2.0 update. Some of the paintings you can buy from Redd turn out to be fakes, and some of those fakes turn out to be haunted and will change slightly every so often. One painting opens and closes its eyes, while another goes from smiling to frowning and back again.
* Animal Crossing: New Horizons occupied only by yourself, Nook and his two employees, an airport run by two dodos, and two other residents, with nearly everyone roughing it in tents. As you progress through the game and tame the island, the community grows, permanent homes are built, infrastructure is put in place, and the formerly-deserted island grows into a community just like from previous games.
* Animal Crossing: New Horizons, once you attend the first K.K. Slider concert, Tom Nook gives you the ability to build/destroy cliffs and reroute rivers on your island.
* Animal Crossing: New Horizons players, critics and even celebrities, which helped to spark interest among people completely unfamiliar with the series. The popularity of the game has also helped boost up the sales of the Nintendo Switch, a console which was already doing very well.
* Animal Crossing: New Horizons, Smug villagers will sometimes greet you with "Buongiorno! That means it's gonna be a great giorno in Italian!"
* Animal Crossing: New Horizons statues from the Jomon period) not only has antennae, but glowing eyes.
* Animal Crossing: New Horizons's traditionally laid-back atmosphere, wide variety of content, and interesting/funny villager interactions?
* Animal Crossing: New Horizons, the interest rate was nerfed from 0.5% to 0.05% due to the time travel abuse to generate bells, meaning that only 9,999 bells will be delivered in your bank account, making this method completely unreliable for

profit.
* Animal Crossing: New Horizons, the pilot Wilbur speaks like a soldier on a field mission, giving himself and the player codenames, discussing their outings to other islands like a battle plan, and using the NATO Phonetic Alphabet unnecessarily. However, due to the game being rated E, "Whiskey" is substituted with "Whisker" for the letter W.
* Animal Crossing: New Leaf also did much to push Nintendo's attempts at publishing major titles digitally through the eShop.
* Animal Crossing: New Leaf, a Snooty villager may ask if you believe in UFOs: Unidentified Floor Oranges.
* Animal Crossing: New Leaf, Blanca takes a different role, more akin to the mythical Noppera-Bo (See mythology for more). Instead of letting the player draw on her face, she becomes the April Fools event character, shapeshifting into villagers and letting the player decide who is the real villager and who is Blanca.
* Animal Crossing: New Leaf lets you respond to an invitation for some future event (whose date hasn't even been specified) with "I'm feeling sick that day."
* Animal Crossing: New Leaf. Uchi villagers are blunt and tomboyish, but are also very protective of characters they've befriended. They'll even give you medicine if you get stung by bees!
* Animal Crossing. Not helping matters is that more people entering the fandom means more drama over things such as turnip prices and the market for items/villagers, which some fans find to be exhausting.
* Animal Crossing plays one to accompany a character's "shocked" reaction. Like when Blathers accepts a bug donation from you or when you knock down a wasp hive and are about to get stung in about five seconds.
* Animal Crossing: Pocket Camp and give them to Chip, who would talk about them the same way he'd talk about any other fish in the game: with hunger.
* Animal Crossing: Pocket Camp has a monthly "Pocket Camp Club" introduced in its second anniversary update, featuring two premium plans: "Happy Helper Plan", which the player can choose an animal to fulfill animal requests and accompany in-game events; and a more expensive "Cookie & Depot Plan", which the player can choose five fortune cookies and expand item storage in a form of warehouses.
* Animal Crossing quick, fortunately, they just knock you out and cause you to wake up in front of your house.
* Animal Crossing repeatedly within a short amount of time will cause them to request that you give them their personal space.
* Animal Crossing series. Four are jocks, four are lazy, four are snooty, four are peppy, two are "normal," and one is smug. Most of the ducks' catchphrases contain the word "quack", and as with every other species of animal villager, the player character can form a friendship with them by talking to them, giving them presents, and performing tasks for them.
* Animal Crossing series, special orders at Tom Nook's store (and, in the first game, fossil identifications) take only one day to show up in your mailbox at no extra charge. That's slower than some of these examples but still several times faster than real-world free shipping.
* Animal Crossing subverted with Cyrus and his wife Reese. In the Japanese version, Re-Tail is named "R. Parkers". This suggests their surname is "Parker[s]".
* Animal Crossing. The conflict is simply "you're living on your own and have to pay for your house." The worst folks you have to deal with are the occasional mean neighbor or sly salesman.
* Animal Crossing, there's a number of DIY recipes that use the junk you fish up, making them genuinely desireable for a change; for instance, a tin can can be recycled into a thumb piano or a planter for a succulent plant, while managing to catch two boots allows you to refurbish them into a pair of wearable "recycled boots".
* Animal Crossing. There's one certain screenshot that should count...
* Animal Crossing. The song begins with a high-pitched, quiet drone that could probably equate to a One-Woman Wail in-universe, and the ‘chorus’ consists of several low-pitched ones as well.

* Animal Crossing. They also complain about how they don't have a favorite TV show anymore because whenever they get into one, the network cancels it.
* Animal Crossing to get better items, they created Resetti to punish anyone else who tries this by deliberately wasting their time with endless walls of rambling dialogue.
* Animal Crossing) to have additional characters available for in-game photography. Some players even create alts just because they want their town to have more buildings in it.
* Animal Crossing. Villagers mention dating one another, however they're never shown doing anything romantic, like going on dates, on-screen.
* Animal Crossing was inspired by developer Katsuya Eguchi's experiences with loneliness after moving away from his hometown in Chiba to work for Nintendo in Osaka; similar to how the player's humanoid character moves to a new community of anthropomorphic animals.
* Animal Crossing, when a neighbour gets an idea, a cartoonish lightbulb appears over his/her head. By talking to psychologist Dr. Shrunk, you can learn to do this as well.
* Animal Crossing, where he cooks the food himself. He still references the trope by saying that he thinks people "use the Harvest festival as an excuse to eat turkey".
* Animal Crossing: Wild World states this reflects their slightly obsessive nature and their strong dislike for germs.
* Animal Crossing: Wild World was an even more popular sequel to the GameCube installment, retaining the crown as the best-selling game in the series for thirteen years.
* Animal Crossing: Wild World was one of the best selling Nintendo DS games, and thus helped sparked interest in the series.
* Animal Crossing will sometimes ask you to retrieve items for them. Some of these items include VHS tapes, Game Boys, and the obscure Pokémon Pikachu device. All of these were pretty common back in 2002 when the game first released. Funny enough, the game runs in real time, so they'll still ask for these items nearly two decades after they've been made obsolete.
* Animal Crossing with tools, including axes, but they only ever seem annoyed instead of injured.
* Animal Crossing years can pass (the limit is 2050 before it loops back to 2012), yet the characters don't age. At most they'll just comment on how much time has passed since you last talked to them.
* Animal Crossing, you get chewed out by Resetti the mole if you reset the game without saving. His rants are quite amusing, and some players keep resetting just to see everything he says.
* Animal Crossing, your face will be noticeably affected, with one eye swollen shut, and the other swollen halfway. Talking with any of your villagers in this manner has the chance of frightening them, as they might mistake you for a monster, before their fright immediately turns to sympathy.
* Animal Detectives Kiruminzoo who can hardly bite at least one woman.
* Animal Detectives Kiruminzoo with huge animal costume motifs and serious comedy.
* Animal Encounters can randomly encounter quicksand in swamp terrain on two types of planets: small worlds with thin atmospheres and medium sized worlds with standard atmospheres.
* Animal example: A baby hippopotamus that was rescued after floods in Kenya made news everywhere when it befriended a 100-year old tortoise in a wildlife sanctuary.
* Animal Farm (1954) never speaks on-screen while his pigs spend the whole film talking to each other.
* Animal Farm, after the first windmill is destroyed by a strong wind, Napoleon begins a speech for the animals:
* Animal Farm. But it's worth remembering that the original revolution arose from the idealism of a prize boar named Old Major, though he didn't live to see the revolution itself.
* Animal Farm: Farm animals break loose and — unprecedented in the animal

world — take over the place and establish a revolutionary community.
* Animal Farm has the foresight to take a newborn litter of puppies under his wing. They eventually grow up to be fearsome and totally loyal enforcers.
* Animal Farm if farm animals are killed after they are no longer able to perform their intended function, perhaps to reduce costs on the industry to feed and shelter useless livestock.
* Animal Farm, is one of the most perceptive animals on the farm, but rarely speaks up. His enigmatic phrase is: "Donkeys live a long time. None of you has ever seen a dead donkey."
* Animal Farm, Mr. Frederick buys some timber from Animal Farm — with counterfeit money. Napoleon is furious when he finds out he got cheated.
* Animal Farm qualifies, though this is supposed to represent Heaven — and in the context of the novel in general, it's meant to symbolize the promises of religion (represented by Moses the Raven), which were seen as empty and another means of control by those with the money and power (represented by Man) according to the proponents of the Russian Revolution.
* Animal Farm, Snowball is more of a benevolent leader than the other pigs on the farm, but he does act condescending to the other animals while explaining his plans, and he doesn't always like listening to criticisms of his ideas.
* Animal Farm tear up Snowball) turns his back on the dogs mauling the hens and sheep and goose, horrified at this cruelty.
* Animal Farm that Napoleon (now suffering a hangover) is dying. Then: Great news! Our dear leader is going to be making a complete recovery. Anyway, I'm off to procure some books on brewing. Oink!
* Animal Farm, the design of Napoleon makes it far too evident that he is or will become the bad guy, especially if you compare him with the other pigs.
* Animal Farm, the dictator pig Napoleon rewrites the original constitution of Animal Farm multiple times to make his actions legal (since most animals are dumber than pigs, they didn't realise the secret rewritings). Eventually all the laws on equality and freedoms are reduced to one, "All animals are equal, but some animals are more equal than others."
* Animal Farm, the dogs actually killed Snowball and the film ends with all the other animals attacking Napoleon and the other pigs while his dogs are too drunk to defend them.
* Animal Farm: The other animals are horrified to watch the pigs, who were satirical allegories of Communist dictators, gradually become indistinguishable from the humans they overthrew, though the pigs barely seem to notice.
* Animal Farm: The pigs generally seem to be the smartest animals on the farm and all are the beneficiaries of Napoleon's dictatorship. Benjamin the donkey is usually taken to represent intellectuals who grumbled about the rise of the Stalin but did nothing to actually stop it, supporting it by inaction.
* Animal Farm, the theory of Animalism compared to what it became in practise. This, of course, parallels Communism perfectly.
* Animal Farm was made into an allegory involving animals. George Orwell originally intended for it to directly expose some of the horrific crimes committed by the Soviet Union since Stalin came to power, but because the Soviets under Stalin were part of the Allied Forces during World War II, the book publishers could not release the book without risking Stalin either abandoning their alliance, or worse, attacking them.
* Animal Gender-Bender: An animal's gender isn't consistent with their appearance because they look closer to a specimen of the opposite gender.
* Animal Gender-Bender: Animals look or behave like the opposite sex from what they're meant to be.
* Animal Gender-Bender in birds. Most notably peahens with trains, female mallards having the coloration of the males, and female ostriches being black like the males instead of the correct brown or gray (not helped by both sexes having long eyelashes usually associated with females).
* Animalguy001 (now Fawful's Minion) is also one of those people. He went unnoticed by the countdown community, until he started releasing his first vocal

countdowns.
* Animal House, after the infamous toga party, Larry leaves a drunk girl (whom he met at the supermarket) at her parents' front door in a shopping cart.
* Animal House, are stated to be extremely bad students; the highest-scoring person is fraternity president Robert Hoover, with a 1.6 GPA (four Cs and an F), with Bluto having a 0.0 and D-Day having no GPA at all (no courses completed). However, they had to have been pretty damn smart to pull off the events of the climax.
* "Animal House" at the very beginning with some viking wearing purple and a black beard pushing a wheelbarrow walking straight through the camera.
* Animal House, a whimsical folksinger (played by Stephen Bishop, who wrote and performed the movie's theme song) is strumming a wistful ballad to two young girls on the stairs. Bluto seizes the guitar and smashes it against the wall, then mutters a sheepish apology.
* Animal House becomes this near the end when the Delta House members disrupt the parade. Examples are the band members blindly marching into the alley, Bluto showing off his pirate gymnastics moves, and the Death Car ramming the stands and knocking the spectators into the air.
* Animal House, before, eventually, he is literally flattened by the advancing crowd.
* Animal House, Bluto Blutarsky uses a ladder to peer through the second-story window of a sorority house.
* Animal House, Boon asks if she used the "I have to wash my hair" excuse. Subverted with Otter's reply — "Dead mother".
* Animal House. Budding playboy (and future gynecologist) Otter subverts the main cheerleader's romance (such as it is) with the college jock by cheating with her (and getting further than he does). True to her archetype, she casually blows him off and dismisses his performance, the only blow to his persona that occurs. He consoles himself by seducing and satisfying the wife of the Dean of the college.
* Animal House, complete with super-bland quote/motto "Knowledge Is Good".
* Animal House. Curiously, the same song is always playing on the radio when they do.
* Animal House ends with a still of the Delta gang as the credits roll.
* Animal House is almost completely destroyed during the Deltas' hasty escape from the nightclub, and the preparations for its use in ruining the homecoming parade serve to finish the job.
* Animal House) of a mid-term exam, so they can do well in the class without having to actually study the material. Unfortunately, the Omegas had already stolen the actual stencil and substituted a fake stencil with all of the answers being wrong.
* Animal House of the "chick-flick" subgenre popular during the early '10s) have successfully pushed the envelope by resorting on less juvenile humor.
* Animal House, one of the Delta Fraternity members mugs the drum major of a marching band, steals his baton and leads the band into an alley. The band marches up to a wall and tries to go through it.
* Animal House: One of the fraternity members starts making innuendos at a woman in the grocery store, who introduces herself as the dean's wife.
* Animal House, Otter gets revenge on the Omega who was in charge of beating him up earlier, then immediately lampshades the trope.
* Animal House, Otter leads the Delta House in taking the fraternity pledge:
* Animal House, Pinto tries to get his girl's attention by chucking pebbles at her window. He breaks the glass.
* Animal House plays at being formal—until everyone gets rip-roaring drunk, and the formal facade collapses under a drunken rendition of "Louie, Louie." This is in contrast to the more painful Omega ritual of being spanked with a paddle.
* Animal House's character downs an entire bottle of whiskey; reportedly, the bottle was actually filled with tea.
* Animal House's charmingly dark and hard-hitting observations on college life, as well as its undeniably quirky brand of vulgar humor, was so refreshing to moviegoers in the late 70s that the film recouped its $2 million budget 50 times over. Donald Sutherland, as you might imagine, was not pleased.

* Animal House so they could revise the age upwards after the inevitable objection and keep the entire scene. There was no objection.
* Animal HouseThis led to a confrontation with the director while shooting his scene at the beginning of the video, a confrontation the director settled by saying that if he really wanted to make his point, the two of them should step outside. Metcalf backed down, and the next take, with him still visibly agitated, is the one used in the video.
* Animal House To their shock, the censors allowed the scene with no objections.
* Animal House ultimately succeed in wooing Mandy Pepperidge away from him, after all), then this trope is played straight.
* Animal House: "Was it over when the Germans bombed Pearl Harbor? Hell no!" "The Germans?" "Forget it. He's rolling."
* Animal House, when Bluto gives a speech with numerous historical inaccuracies, and fails to rouse his fraternity brothers, who have given up. Finally, though, they do listen to him and create an incredibly funny end sequence.
* Animal House when Bluto stops an annoying crooner's song by smashing his guitar against the wall.
* Animal House, when Clorette introduces Pinto to her father as "the boy who molested me last month", then adds "we have to get married".
* Animal House when he makes the point that the Deltas aren't just lovable pranksters; they're drunken and destructive hooligans who need to either shape up or ship out.
* Animal House, when the gang enters the black night club, and everyone inside is instantly silent (including the band), Otter leans forward and says, calmly, "We are going to die."
* Animal House wherein Bluto, the frat boy of Delta House, climbs a ladder to peek in as the sorority girls undress. Suddenly, the ladder tips back (implied to be pushed away from the wall by a certain anatomical reaction on the part of Bluto).
* Animal House, while wrecking the parade, Bluto shouts "Take no prisoners!"
* Animal House, who died in 1982. His absence was explained by noting that Belushi's character Bluto had become President of the United States and was too busy to be interviewed.
* Animal I Have Become. Many AMV of this song in youtube subscribe to this interpretation.
* Animal Inn... and Sam. (Which is apparently a retcon, since he's referred to as Peter in the first book.)
* Animal Inn: Book 3 and book 6 each focus on the Taylors temporarily taking care of an animal, who goes to a new home at the end.
* Animal Inn: Book 6 features Tiny the piglet, who's literally the runt of his litter (the smallest of ten), and whom Val is given as a present since his former owner feels Val would take better care of him and out of gratitude for Doc saving the entire litter.
* Animal Inn: Catherine Sparks for Doc Taylor, who proposes to her during a Christmas celebration in book 11, and marries her in book 12.
* Animal Inn in book 12 sees Doc and Mrs. Sparks marrying, holding a small ceremony in the Taylor family living room (despite the efforts of the mayor, who wants to turn the entire thing into a big to-do because of Doc being one of the family's most respected citizens) and the reception at Miss Maggie Rafferty's estate.
* Animal Inn: In book 1, after Val diagnoses Harvey Curran the rabbit, Toby doesn't believe her, so Val bets him a week's salary that she's right with her diagnosis. Toby, in turn, agrees that if she's right, he'll work at Animal Inn, without payment, for two weeks. Val, naturally, is right, and her father agrees to the conditions when he finds out. Toby stays on as a paid employee after his first two weeks, and is still there at the end of the series.
* Animal Inn: Mrs. Racer and Erin certainly think so in book 6, as they have minor panic attacks when Teddy brings home Herman the tarantula, a class pet, for a short while.
* Animal Inn: Sparky, when first introduced in book 4, who's lashing out partly in reaction to suddenly moving to a new town and being angry at the local kids for not

even giving her a chance. She stops after she gets to know Teddy and joins his circle of friends.
* Animal Inn: Val and Andy, the dog she rescues from a tar basin, in the start of book 9.
* Animal Inn: Valentine Taylor is a lesser example, as she just goes by Val or Vallie most of the time. Philomena Sparks, on the other hand, can't stand her first name and goes by Phil or Sparky.
* Animal Inn: Val's never met an animal that didn't like her. Even Gigi the capuchin monkey in book 3, despite her misbehaving, does genuinely like Val.
* Animal. In the Zero Mostel episode, there's a knock and Kermit asks him to "get the door". Animal responds by ripping it off its hinges and bringing it over to Kermit.
* Animal is occasionally shown playing drums and stating how much he likes the drums, a nod to how he'll grow up to be the drummer of Doctor Teeth and the Electric Mayhem.
* Animal Is the New Man: Humanity falls, and animals rise up to take their place.
* Animal is the only Muppet to notice Kermit has been replaced by Constantine in
* Animalistic Abomination, allowing them to make an entire settlement die of dehydration from sheer lack of caring about continuing to survive.
* Animalistic Abomination and the embodiment of primal chaos is a giant snake.
* Animalistic Abomination: An eldritch creature which somewhat resembles or behaves like an ordinary animal.
* Animalistic Abomination: A strange, incomprehensible creature that (sort of) looks and acts like a familiar animal, but this beast is definitely something far worse.
* Animalistic Abomination that (sort of) looks and acts like an ordinary animal.
* Animalize, had two songs (Lonely Is The Hunter, Murder In High Heels) with his future replacement, Bruce Kulick, playing lead guitar.
* Animal Jam, and regular mountain-sized loads of new updates, in less than a decade.
* Animal Jam aside from temporarily altering the area's appearance. Claims that the bridge can break completely and the ice can disappear are similarly false - even if the room is full and everyone jumps, this still does not occur.
* Animal Jam created the game; they just had National Geographic to partner with them. This has died down after National Geographic ended their partnership in 2018 and thus the branding was removed.
* Animal Jam has both free accounts and membership accounts. Price per month varies by how long the membership will last (1 month costs $6.95 per month).
* Animal Jam requires a paid membership for nearly every core feature. Non-member players cannot upgrade or buy additional dens, buy music, purchase and wear a majority of the available clothing and den items, have limited inventory space, can only own two animals (and only have access to a small handful of the available species), and can't access Free Chat.
* Animal Jingoism: Certain animal species are rivals with other species.
* Animal Jingoism: Two different kinds of animals that don't get along well with each other.
* Animal Jingoism: Two species of animals (usually cats and dogs) despise each other.
* Animal Kingdom has Joshua, who carries a dull, blank expression through most of the movie, including when his mother dies at the beginning, and barely seems to react to anything. However, after his girlfriend is killed, he finally breaks down and cries alone in the toilet.
* Animal Kingdom. Pope carries the teenage girlfriend of his brother to bed, then lingers and stares at her as she sleeps. The brother catches him looking at her, prompting Pope to hastily leave.
* Animal Land features 5 human characters who are gifted with the ability to communicate with animals, although one of them is evil. After he is defeated, the remaining 4 gets paired up together—even though only one of the couple has any chemistry, while the other two characters never actually interact on-screen.

* Animal Land has distorted mix and match animal abominations that contrast the normal animal characters. These things are fittingly called Chimeras.
* Animal Land, Jyu completely believes in the "survival of the fittest" notion wherein strong animals prey on and can do anything towards weaker animals. He is totally against anything that goes against this notion, such as animals working together, as he sees it as a lie to the natural order of things.
* Animal Man: An unnamed alien who has similar powers to Buddy and used them to go on a rampage in a small town, only to plummet off a cliff at the end of the issue.
* Animal Man by retconning it into a dream as a favor to the title character.
* Animal Man can mimic the abilities of any animal in existence. Sometimes, this can mean mimicing the powers of other superbeing like the Flash, Black Lightning or Superman.
* Animal Man Corps has passed over human candidates and chosen a blue whale as the lantern for Earth's sector. He has a uniform, and his ring is a crest embedded in his belly.
* Animal Man) Earth's current Green Lantern is a blue whale — whose powers, as with all other Lanterns, include unaided spaceflight.
* Animal Man gained his powers from an exploding alien spaceship. At a later point some of the aliens reappear to help Animal Man.
* Animal Man has the titular hero completely stumped as to how to disarm a Thanagarian bomb. Luckily, resident Thanagarian Hawkman walks in at the last second and figures out where the off switch is.
* Animal Man, it's implied that any one of the three sides has the ability to grow beyond its means and become a threat.
* Animal Man series, the B'wana Beast was infected with Anthrax and it drove him a bit crazy, to the point he was using his powers to merge random animals and turning the resulting chimera into killing machines.
* Animal Man starts (see above entry), resulting in multiple forgotten "ideas" bleeding into one another.
* Animal Man story arc "Deus Ex Machina" is notable in that it plays this scenario for drama.
* Animal Man, the Bakers' neighbour, Morris Weidemeir, fires a warning shot at Ellen's would-be rapist and tells him, "One more step, sonny, you're singing soprano."
* Animal Man where Cliff Baker watches his dad's movie on his phone. The art is actually better and smoother in the movie.
* Animal Man, who finds pleasure in animal cruelty. To make up for that Morrison makes them both materialize out of thin air and attack Animal Man, while he is thanking everybody he worked with on the series. He also mentioned that Buddy is what writers wants him to be, so if they'll decide to make him eat meat, he will. Next writer on the series decided to play with that and wrote a story where Buddy copies the abilities of a lion, is overcome by its instincts and tries to eat a gazelle.
* Animal Mask: The kind you would see at a kid's birthday party. When worn by an adult (or several of them) it brings to mind not animal cuteness, but savagery.
* Animal Mecha from the first series (such as Winder A2 or Megaron P1 and its "brothers") resemble giant, vaguely-humanoid insects.
* Animal Mecha Lord Equus kicks him across the valley. He's already surfeited with energy from being hit by lightning twice, so the kick incapacitates him with pleasure.
* Animal Mechanicals ends with the Mechanicals facing a new task (varying from having some fun with whatever item they fixed to a whole new mission altogether).
* Animal Mechanicals used a cast almost entirely composed of Halifax-based theatre actors.
* Animal Mechanicals was comprised of local Halifax theater actors for whom this show is their only film/television credit.
* Animal Mechanicals world is entirely populated by these, including the titular Animals, all designed to look like kid's building blocks.
* Animal Metaphor: Character's personality is reflected by their animal companion.

* Animal Mother (an example of the Psycho for Hire variant) and Crazy Earl (
* animal motif of superorganisms such as bee hives or man-of-war jellyfish. He keeps them in check by imagining a prison where he drains their powers. When they assert dominance and assume control, it's depicted as them gnawing on his body.
* Animal Motifs: An animal that underlines a theme or says something about a character.
* Animal Motifs (like Man-Ape and the Rhino), set them loose on a remote island, and went on the prowl. He had seemingly lost his mind at some point prior to this, as this was a dramatic departure from his usual M.O. and he was extremely irrational throughout the ordeal.
* Animal Naming Conventions: Animals don't have human names, or if they do, they have another, "real" name separate from what the humans named them.
* Animal Naming Conventions: Common ways animal characters name each other.
* Animal Nemesis: I'm gonna get my revenge against that irritating creature!
* Animal Parade., and their "we're getting married now" cutscene even involves Chase making a vow that all Maya has to do now is taste-test. Once they actually get married, though, they argue incessantly. When they eventually have a daughter (Dakota), even she remarks she'll never get a little sister the way they carry on.
* Animal Parade is only if you gave your child a gift before they left. If you didn't give them one, (you can probably read that as you didn't know you could) then there's no real link to the first game at all.
* Animal Parade of the Witch Princess and Harvest Goddess. The difference is that courting the Harvest King has him show reluctance to open to the player character, and actually marrying him leads to several of his lines driving home the fact that he's well-aware of outliving his spouse, explaining his hesitation.
* Animal path Pain breaks into the Leaf Village's interrogation facility by
* Animal Planet, about the fictional discovery of a mermaid-like body and the supposed science behind it.
* Animal Planet and something that dog-trainer Victoria Stilwell often had to help dog owners deal with.
* Animal Planet, anytime there's a child involved, they will be ensured to survive. A most egregious example is in the Thunderbird episode, where a boy with a broken leg is picked up by a massive raptor. The end narration says they found him the next morning with minor scrapes and bruises, meaning the giant bird of prey didn't so much as nibble the boy and carried him in its talons with the utmost care.
* Animal Planet are the closest living relatives of dinosaurs, including birds.
* Animal Planet at their events (such as a flea that cleared the entire stadium completely) or too stupid to complete the event.
* Animal Planet bug for a then-upcoming show about training dogs to perform various cool tricks used the "pause the actual show" trick. A frisbee would fly in, the current show freezing while a dog caught it, then the host would walk up, praise it, and lead it away before letting the show continue.
* Animal Planet, clips from B-movies and horror flicks are used to demonstrate talents that a particular animal has.
* Animal Planet during its run probably gave the breed's popularity a boost, too.
* Animal Planet follows various litters of kittens and puppies through the early stages of their lives. In the larger litters, only a couple are actually named and focused upon; the others' names simply aren't mentioned.
* Animal Planet Heroes programs can end up being euthanized is if they react violently to a rubber hand held near their food as they're eating, demonstrating that they're too aggressive to be adoptable.
* Animal Planet Heroes programs, the officers rescuing animals will often baby talk them.
* Animal Planet makes it look like infestations are caused by unstoppable pest species that will overwhelm the people dealing with said pests. In reality, such infestations are rare and most infestations can be treated rather efficiently.
* Animal Planet nice and soft; pet food is significantly harder to prepare.
* Animal Planet teaches about different breeds of dogs. Despite this, not all their facts are correct. For example, they mentioned that English Bulldogs were bred so

wrinkly to help keep blood out of their eyes during bull-fighting. This is incorrect as Bulldogs in the 1800s were less wrinkly and had longer muzzles.
* Animal Pragmatism and casually stroll through the school halls in the buff, getting some appreciative looks from the female populace.
* Animal Precinct aggression issues, and concerns about avian disease means they can't be taken anywhere near a chicken farm.
* Animal products have been mostly replaced by bacterial cultures, the old-fashioned versions being
* Animal Reaction Shot: Animals reacting to a situation like humans for comedy.
* Animal Religions since the only deity proven to exist thus far is the Fossah. Still, the individual belief systems differ significantly from each other and closely resemble real life religious practices:
* Animal Restaurant. He wears a hazmat suit and goggles and carries a bottle of spray sanitizer.
* Animal Restaurant: With the other troublesome customers (the thief and the skunk), you only need to tap on them until they go away, and the game in general is non-violent. So it can be quite shocking the first time you tap Mr. Roach to get rid of him and he ends up splatted.
* Animal Restaurant: You have the option of watching ads to summon more customers, increase claimed earnings, make more wishes at the wishing well, get more bait, get more courtyard gathers per day, or refresh shops, among other things.
* Animal rights activists also love this trope, with many of them showing footage from slaughterhouses, animal testing labs, and factory farms to win people over to the cause of vegetarianism and veganism.
* Animal Rotary allows player to play ads after finishing each round to gain an additional 10 gems, which can then be used to unlock additional game modes.
* Animals album features sounds from the animals referenced in each song's title.
* Animals, although the allegory is modified for British society at the time.
* Animals and birds that have litters, especially predators. A kill will be fought over by the siblings, and weaker ones do not always survive. Some bird species will even push weaker siblings from the nest. Or fake siblings, in the case of cuckoos and cowbirds.
* Animals and vegetables are also like this. Such as strawberries and potatoes being called rolanberries and popotoes, respectively. Giraffes are called dhalmel, tyrannosaurus are vinegaroon, and elephants are marid.
* Animals can sense a spectre's unnatural and evil aura, and will not come within thirty feet of one of their own will. If forced within a spectre's presence, they will panic and attempt to flee as long as they remain too close to them.
* Animals don't appear to react to the loud sound effect a bow makes when unloading an arrow when switching to another weapon, avoiding frustration if you happen to change your mind about what to kill it with.
* Animals hate Hedge (particularly after he becomes undead himself), so he has to resort to killing and reanimating horses to ride. Plural because, even as Dead entities, they keep finding ways to destroy themselves rather than be near him.
* Animals Hate Him: Animals react negatively to a particular individual.
* Animals, he uses this scenario as a metaphor for the Falklands War. As the Argentinian guns had a range of 10 km and the British guns had a range of 17 km, the British ships "parked 11 km off the coast and bombed the crap out of them." Gervais described this tactic as "the military equivalent of holding a midget at arm's length and kicking him in the bollocks."
* Animals in general and dogs in particular tend to be afraid of the Dark Others in
* animals, initially did the same thing, but Second Edition introduced a separate "Fungus" creature type.
* Animals Lack Attributes: Regular or mostly regular animals depicted in fiction lack genitalia.
* Animals Not to Scale: An animal isn't the same size as it would be in real life.
* Animals occasionally do this with their dead infants. It's slightly less
* Animals often run directly away from danger, as this is a better way of escaping

from a predator. Turning while running will put them at a disadvantage, as the predator can cut the corner to catch up. This causes a problem with cars, as they don't know the car is not (usually) actively chasing them, moving at a speed they could never hope to run away from, or stuck on a marked path.
* Animals on Pandora are in two main types; four-limbed and six-limbed. Seeing as how the life on Pandora is
* Animal Species Accent: A talking animal who speaks with an accent reminiscent of their species.
* Animals react strongly to the presence of the Ringwraiths. In the books, the wraiths' horses (and later, the
* Animals ridden by a large ape at some point or another? A frog, a parrot, a snake, and even
* Animals See in Monochrome: Animals, especially dogs and cats, see in black and white.
* Animals See in Monochrome: Animals, especially dogs and to a lesser extent cats, see in black-and-white.
* Animals See in Monochrome: Few animals have completely monochrome vision. Many, such as dogs and cats, would be considered partially colorblind by human standards, but they can still see some colors.
* animals so genetically modified they could no longer legally be considered chickens. KFC doesn't run its own chicken farms, so they'd have some difficulty pulling something like this off, even if they wanted to.
* Animals songs "Dogs" and "Sheep" begun being called by their opening lines, "You Gotta Be Crazy" and "Raving and Drooling" (in the latter's case, the opening of what became the post-breakdown verse - and even then, changed to "Bleating and babbling").
* Animals, such as raccoons, monkeys, and such are pretty darn scrawny compared to the average human being. However, thanks to being able to move quickly, expertly climb, and a knack on how to use serious pressure with their sharp claws,
* Animals Talking in All Caps, and it's exactly what you'd expect. It's even lampshaded.
* Animal Stampede: Hundreds of herbivores running together and trampling everything in their path.
* Animal Stampede: We animals don't give a fuck and we'll run over you, useless vermin!
* Animal Stereotype: Certain traits that are stereotyped of animal species.
* Animal Stereotypes - How various species of animals are commonly seen in media.
* Animal Stereotypes: To the Ancient Egyptians vultures, cows, and female hippos were seen as nurturing and motherly, hawks and lions as warlike, bulls and rams as symbols of male virility, and a whole slew of animals (antelope, donkeys, male hippos, pigs, tortoises) as evil. These symbolic meanings were part of the associations between gods and animals, and of depicting gods in animal or animal-headed forms.
* Animals that rely on camouflage, such as praying mantis, also do this.
* Animals, the family of Jerry the pigeon wears tee-shirts sporting #TeamJerry for his big race against Mike.
* Animals. These jokes are based around animal behavior stereotypes, which have their roots in
* animal", Strong Bad's attempts at creating an imaginary animal keep coming out wrong. ("What the? Why do these keep coming out as nasty blob things?")
* Animals United, animals worldwide used blue whales as submarines to come to New york and confront humans in United nations.
* Animals United speak as clearly as the humans do. Except for the Leopard, for some reason.
* Animals United: The Leopard and Hunter's names are never mentioned. Even stranger, one of the human characters refers to the Hunter as "Hunter" instead of his real name.
* Animals United, whom Charles knows is a carnivore after being grossed out by his "unpleasant breath."

* Animal Sweet on Object: An animal gets the hots for an inanimate object, usually mistaking it for an animal of the same species.
* Animal Sweet on Object: An animal has a crush on an inanimate object.
* "Animals" who have huge yak horns for no apparent reason. Their fur-covered bodies and mournful expressions make you wonder why people don't just give them a hug instead of shooting them.
* Animal Talk: All animal species can communicate with each other, except for humans.
* Animal Testing: Animals are used as test subjects in laboratory experiments, because it's far more legal than doing the same to humans.
* Animal Testing: The controversial act of testing medicine on animals.
* Animal-Themed Superbeing: A superhero or villain based on an animal.
* Animal-Themed Superbeing: A super-powered being who themes themselves after an animal.
* Animal Themed Superbeings for rabbits in this regard, to the extent that it requires special medical treatment to help them control it.
* Animal-Themed Superbeing: Some superheroes and supervillains have an animal motif as their main gimmick or the source of their powers.
* Animal-Themed Superbeing: Supervillains (and superheroes) are fond of animal motifs and have powers based on them.
* Animal-Themed Superbeing who styles their name, costume, or abilities after an animal.
* Animal Theme Naming, the Nezu siblings' given names are based on varying degrees of luck.
* Animal, the monster pursues the cast to a cabin in the woods. At first it seems that it's simply a bloodthirsty beast, but it gradually becomes clear that the creature purposely herded them into the cabin to trap them and pick them off one by one.
* Animal Title Index: An index of works with titles that mention animals.
* Animal Wars, featuring a version of World War I with anthropomorphic animals. Sam, a dog in an aviator suit, would have been the central character, with a stage where the player controls a mouse through a field with enemies large in perspective. Vehicles would have features resembling the animal associated with them. However, Sony decided to cancel Animal Wars to ensure Lair would be finished in time. Because of Lair's disappointing sales and reviews, the deal with Sony was dissolved and Animal Wars was never worked on again.
* Animal Wrongs Group: A group of animal rights activists who are willing to hurt and kill other human beings if it will help their goal to prevent animals from being harmed or killed.
* Animal Wrongs Group: Animal rights are more important than animal health and safety (including protecting other animals from disease or predation), than protecting human life and safety!
* Animal Wrongs Group: An organization who wants to protect or promote animal rights through immoral or illegal means.
* Animal Wrongs Group are shown spraying the security cameras on their way in.
* Animal Wrongs Group: Eco-terrorists who are specifically targeting people for causing harm to non-human animals.
* Animal Wrongs Group: Every single animal on the planet has a right to live, except you disgusting humans!
* Animal Wrongs Group who believe we're morally inferior to non-human creatures.
* Animal X, giving the audience very little information about how a fertile dinosauroid female is normally treated.
* Animal X of the creature as "the only known photograph of the Chupacabra."
* Animal X series (Animal X: Daichi no Okite, Animal X: Aragami no Ichizoku, Animal X: Genshi Sairai) made by Sugimoto Ami in 1990, Yuuji, one of the main characters, a gender bender, has the ability to get pregnant and does several times through the series. The series is not only very mature, but provides an even more in depth view of MPREG than even Sex Pistols/Love Pistols.
* Animal Ya - Originally companion studios before splitting off from each other.

Animal Ya would rebrand themselves as Ekura Animal in 2007.
* Animalympics, an official has to move the landing pad for the high jump when the contestant goes up too high. He still lands short of the pad.
* Animalympics, being a pastiche of the Olympic games, has one of these, showing Bolt Jenkins' training for the games set to Graham Gouldman's "Born To Lose"
* Animalympics, both verbal and visual. Half the fun is catching them.
* Animalympics featured some parody ads, most of which spoofed Olympic endorsement deals.
* Animalympics, has a shapely figure both above and below, accentuated by a dashing blouse and riding breeches. She also has eyeshadow and eyelashes for good measure. Other bird characters, like Babwa Warblers, are treated more naturally; Contessa happens to be the most humanoid.
* Animalympics has Bolt Jenkins, an alligator who grew up in the sewers of a big city. When he watched Boris Amphibiensky's high jump world record on TVs in a store front, he decided he wanted to achieve that, too, and made Amphibiensky his role-model. Fast-forward to the first Animalympics: Jenkins gets his first opportunity to compete against Amphibiensky. Not only that, but he manages to beat him right away and become the new world record holder.
* Animalympics has two Hungarian dubs, one made in 1998 for TV2 and one made for a DVD release by Fantasy Film in 2007.
* Animalympics the flamingo figure-skater's big finish has her spin around so fast her feathers are blown off, revealing a set of underwear beneath, which she immediately covers with a robe.
* Animalympics: This is parodied with the 100-metre dash: the runners take on the characteristics of drag racers.
* Animalympics turns into a warzone... and a pastiche of war movies. Even the briefing from the coach is violent, starting with "First, you start with the faceoff. After you take his face off, you kick him in the shins..."
* Animalympics, where the pole vaulting sequence segues directly into a breakfast cereal commercial.
* Animalympics, which was originally meant to air as a TV special, plays as Olympic coverage from channel ZOO, "the station that brings you the beast in sports."
* Anima Magic in the GBA titles is balanced in comparison to the light and accurate but weak Light Magic and the strong but heavy and inaccurate Dark Magic. Lance weapons follow much the same pattern, slotting in between swords and axes.
* +Anima means that he's hiding a fair amount of sadness, some of which he's implied to have not even realized he had.
* Animamundi Dark Alchemist to what looks like dark-ages wood carvings of scenes from the aforementioned work.
* Anima mundi - the World Soul. It is described as an intrinsic connection between all living things on the planet, which relates to the world in much the same way as the soul is connected to the human body.
* Animaniacs (2020) at least shows that Melania Trump's first term would end in 2020 (which could have just been added in last-minute).
* Animaniacs (2020) franchise has become one to the point where a billboard displays a reboot featuring zombified versions of the characters.
* Animaniacs (2020) has Nils Niedhart, an Olympic gold medalist who has very large muscles and a thick Austrian accent.
* Animaniacs (2020) is keeping him from it means they're forced to remain in orbit just above Earth.
* Animaniacs (2020) of a little girl while the rest of his fleet waits for the command to invade.
* Animaniacs (2020)", The Brain's first attempt at a viral video involves him dressing as a baby.
* Animaniacs (2020): While trying to solve the mystery of what happened to Wakko's donuts, Yakko suggests that they go back the beginning. Smash cut to the beginning of the opening theme, which makes Yakko confused and stops the theme song.
* Animaniacs a girl!". Does he believe "conjugate" has a dirty meaning because conjugal rights are to do with sex, or is he confusing it with the word

"consummate" or "copulate"?
* Animaniacs, a hunting dog quickly becomes smitten with Minerva. When he finds out she likes Chinese food, he digs all the way to China for it.
* Animaniacs. All the characters race to find a fallen star; the first one there gets one wish.
* Animaniacs also uses a cold open in the episode "Bun Control" as well as the first episode of the series, where a parody of "Jurassic Park" finds Yakko, Wakko, and Dot reanimated.
* Animaniacs and a big butt) that was going to make the world fear and obey her. "In school they called me mad and insane. They also called me All-Toppy-Big-Bottom. I wonder what that meant."
* Animaniacs, and after they get out, they wind up trying to catch up on everything they've missed in the interim.
* Animaniacs and a red cape. The Warners assume he's their court jester and beg him to do tricks, frustrating him.
* Animaniacs and meet Picasso. He says, "No dogs allowed", but they reply, "We're not dogs." He says, "OK then, cats. No cats!". The Warner siblings say, "We're not cats either", so he reluctantly lets them in.
* Animaniacs, and Slappy falls asleep just before the scene where Bumbie's mommy is shot. When Skippy starts crying, a startled Slappy blurts this out:
* Animaniacs (and to non-werewolf Wilford himself in "Moon Over Minerva", due to Minerva flirting with him).
* Animaniacs around a table debating whether to destroy the dragon or capture it for study. The Warners decide to forget the War Room after that and deal with the dragon themselves.
* Animaniacs arriving as her replacement - to which they run screaming "Slappy!"
* Animaniacs as "The worst French film I've ever seen! It's also the only French film I've ever seen."
* Animaniacs, a TV anchorman tires of the Warners' antics and locks them inside the control room. When Dot asks why he would do that, Yakko responds "I don't know. Maybe he wants us to direct." Sure enough, they start messing around with the video controls and screwing up the broadcast until the anchorman is driven mad.
* Animaniacs, Babs' voice actress had to cancel several convention appearances near his hometown because he had sent several very creepy fanletters that gave them reason to believe he would try to rape her.
* Animaniacs based several characters on people they encountered, like the surveyors in "Survey Ladies" and Candy Chipmunk from "I Got Yer Can". Nicholas Hollander based Katie Kaboom on his teenage daughter.
* Animaniacs beatdown (thus convincing the Warners it was real), and then continued with the match.
* Animaniacs being shown for the first time as a final surprise for the viewers.
* Animaniacs by quipping to the audience "Goodnight, everybody!", implying that the joke might get them cancelled.
* Animaniacs. By the end of the cartoon when Rita finishes the last song, Runt comments, "That was nice. I hope we don't get sued."
* Animaniacs by the short's end. Meanwhile Lincoln is nice to them (although clearly annoyed by their wackiness) and they help him with his speech. He and Beethoven were working on something, but how they treat the Warners at the start of short affects how differently they are "helped" by them.
* Animaniacs cartoon "Bumbie's Mom", Slappy used the "Have I ever lied to you?" line on her nephew Skippy. The boy proceeds to give a laundry list of his aunt's past fibs, such as keno being legal in Burbank.
* Animaniacs cartoon had Daniel Boone cutting down a variety of trees for extremely specific purposes as part of his efforts to make a log cabin, with the implication that any wood left over from that purpose would be thrown away. He ends up facing Slappy Squirrel when he decides that her tree is made from a type of wood that is ideal for making front doors - and only front doors. The back door and any internal doors would be made from a different wood taken from a different tree.
* Animaniacs, "Chairman of the Bored" a character goes on a long and boring Wiki

Walk, he even manages to scare the titular characters with it.
* Animaniacs' character Elmyra in probably one of the most questioned moves ever done in animated television.
* Animaniacs characters who have that general appearance of the low-grade Topaz cat white spotting pattern, black furred with a white face and white feet.
* Animaniacs Charlton Woodchuck. If you call him Baynarts, he'll put your name on his list and make a point to not like you when he's famous.
* Animaniacs: Chased by Nazi dogs, Rita makes it to the train, but Runt misses it; so Rita disembarks from the train to stay with Runt.
* Animaniacs chimney (badly, of course) and humming an obnoxious tune that went a little something like "Hm hm hm hmmmmmmmm". As they're leaving, ol' Ludwig finally has the inspiration for his Fifth Symphony. The next house on the Warners' route is "that Van Gogh grouch again", and Wakko picks a sunflower to help cheer him up.
* Animaniacs comic book got in on the act: the outwardly dumb blond Hello Nurse was revealed to be the mundane version of Hello Nurse, Agent of H.U.B.B.A., a James Bond-style superheroine with a leotard styled to look like a nurse's uniform.
* Animaniacs comic, the Warner kids do this to fool Ralph with Yakko on top.
* Animaniacs could really play this trope for all it was worth. 'The Monkey Song' stands out in particular for being a four-minute-long series of Chekhov's Gags, from Squit's flute, to Mindy and Buttons flying around on balloons, Pinky and the Brain running away with the mousetrap, even Slappy vs. the Mime.
* Animaniacs dead. Realizing that they're going to be trapped in the Underworld forever, Yakko, Wakko, and Dot accept Death as their new father and annoy him so relentlessly with their demands that he play with them that Death agrees to let the Warners return to life for the time being. Once they're back on earth, Yakko informs his brother that even if Death hadn't let them go, it would still be preferable for the siblings to remain together than for two of them to be alive and one of them dead.
* Animaniacs did a short with the Warner Siblings that would have fit right in with the actual shorts above, which focused on recycling for the war effort. With all the zany gags that implies.
* Animaniacs: Dot pictures herself on one with Dr. Scratchansniff in "De-Zanitized":
* Animaniacs, Dot was stated to desperately need an operation. In the end she finally gets it. Turns out the operation was plastic surgery to have a beauty mark implanted on her cheek.
* Animaniacs double-subverts this. At first, it appears that everyone is better off without Yakko, but it turns out that that couldn't be further from the truth - without "major patients" like the Warners to keep him busy, Dr. Scratchansniff is fired; Mr. Plotz is happy - too happy, to the point where he gladly signs away millions of dollars to shady businessmen; with no Warner Brothers to lust after her, Hello Nurse feels as though she isn't pretty enough, so she lets herself go; the other toons like Slappy Squirrel and Pinky and The Brain were not hired for the show because Yakko wasn't around to recommend them; and without a big brother, Dot and Wakko were easily caught and kicked out of the Studio - not only are they homeless, it's actually stated that they're going to die.
* Animaniacs: Dr. Scratchansniff ends up wearing a rather obvious toupee when he went on a date at the drive-in. Made even funnier seeing that it appeared to be several sizes too small for his immense head. When the Warners come in to crash his date, Yakko, at one point, comments, "By the way, something died on your head."
* Animaniacs": Dr. Scratchansnif gets a parking ticket and tries to simply pay it off, but the Warner siblings insist on barging into traffic court and acting as his lawyers, spoofing as many courtroom drama tropes as they can along the way.
* Animaniacs, Dr. Scratchnsniff's face resembles the painting when he first wakes up.
* Animaniacs: "Elvis lives on in our hearts, in his music, and in a trailer park outside Milwaukee."
* Animaniacs episode "A Christmas Plotz", Yakko's song as the Ghost of Christmas Future is set on a stairway lined with chorus girls. Of course, Yakko flirts with

them throughout the song.
* Animaniacs episode "Animaniacs Stew", little Mindy puts a dress on Brain the evil rat.
* Animaniacs episode "Broadcast Nuisance", Dot interrupts Newstime Live to ask her brother Yakko for his opinions on the news anchor they are trying to annoy.
* Animaniacs episode "Cutie and the Beast", Dot keeps blowing her opening line. We see take after take being shot until she gets it right, and they have to skip ahead to later in the script because they took up too much time.
* Animaniacs episode "Fake" has Dr. Scratchansniff takes the Warners to a wrestling event. The sibs are embarrassed to be there, partially because the match is fake. Scratchansniff, frustrated with trying to reasoning with them, yells that wrestling isn't fake. All anyone else heard was "Fake!" and one of the wrestlers dragged him into the ring where they beat him to a pulp. Only then does Yakko admit that wrestling may not be fake.
* Animaniacs episode "Hooked on a Ceiling" there were several jokes about the painting on the ceiling of Sistine Chapel being full of naked people.
* Animaniacs episode "I Got Your Can" pulls one off on Candie Chipmunk, after having subjected her to some well-deserved revenge. And then it stopped. Cue the Paranoia Gambit.
* Animaniacs episode "King Yakko" has Anvilania, the tiny anvil-shaped anvil-exporting country Yakko is suddenly king of, and its rival Dunlikus.
* Animaniacs episode "King Yakko", Yakko addresses his army with "I'm not going to lie to you. Some of you might not come back from this battle. And the rest of you? Definitely won't." Naturally, as he goes on about potential horrible death, the army abandons him.
* Animaniacs episode "Lookit the Fuzzy Heads", the Warners have their own puppets in their likeness that are used during a therapy session. Dakin made them into actual toys a few months after the episode aired.
* Animaniacs episode "Mighty Wakko At The Bat" which is based off the poem "Casey at the Bat".
* Animaniacs episode "Potty Emergency" had a scene cut from the final broadcast and DVD version where a man watering flowers in the park turns his hose towards the camera, and Wakko acts squeamish at this sight. This version was only shown at an animation convention back in the 90's before the show's debut. However, there are reports that this scene was shown on Teletoon Retro broadcasts.
* Animaniacs episode "Potty Emergency", Wakko sees a dog trying to use a fire hydrant.
* Animaniacs, episode "Temporary Insanity". The Warners are fighting to answer the phone first, causing Mr. Plotz's office (and Mr. Plotz himself) to be wrapped in a telephone cord.
* Animaniacs episode "Warner's 65th Anniversary Special" has a scene where Daffy Duck recalls a cartoon where the Warners got flypaper stuck to their butts. Dot gets hers ripped off when she tries to remove the flypaper from Yakko, and upon seeing this Wakko then rips his own off.
* Animaniacs episode "Yes, Always", producer/creator Tom Ruegger, writer Peter Hastings, voice director Andrea Romano, and recording engineer Harry Andronis all appear as themselves.
* Animaniacs, especially considering that their backstory is that they were created in the Thirties. Also they stole many, many jokes from them.
* Animaniacs-esque company, and placed in a Yogi-Bear-esque cartoon with plenty of these.
* Animaniacs even had an example of one of these: In one Slappy Squirrel short, Slappy's nemesis, Walter Wolf, is dead, and Slappy has to deliver the eulogy at his funeral. The twist is that Walter isn't really dead, and he's set up a bunch of booby-traps at the funeral for Slappy. Slappy finds out about this, and hilarity naturally ensues.
* Animaniacs. Every episode began with some inane plot to take over the world, only to fail. Brain then prepares for next time.
* Animaniacs everyone, until his costume falls off and everyone realizes what he

really is. A GIANT CHICKEN!
* Animaniacs expensive, each segment required an original song that needed to be written, scored, and recorded, significantly adding pressure to the show's small budget.
* Animaniacs falls in this trope, as does Rita the cat from the Runt and Rita segments, and sometimes Slappy Squirrel and Dot.
* Animaniacs fandom, though probably more because there aren't very many other shipping options.
* Animaniacs fashion. In a nutshell, if Mr. Plotz had just let them stay since they were behaving, the entire thing would have gone off without a hitch.
* Animaniacs featured a Batman parody using Chicken-Boo. The villain was a guy called Punchline (obviously an amalgamation of Joker and Riddler), and his whole shtick was this trope. The one he used that stands out is "... Forget the subpoena, MY monkey doesn't DRIVE a Lexus!"
* Animaniacs features them getting married and having 8 daughters that are just like their mother.
* Animaniacs finale "Star Warners", the Bicentennial Falcon flies past a sign that says LIGHT SPEED STRICTLY ENFORCED.
* Animaniacs from the short "Chairman of the Bored", who never stops shaking his hand during the introduction. Wakko first lampshades it by asking not to waste his wish on ending the handshake, and then gets out of it by replacing his arm with a fake one that the wish fulfiller continues to shake.
* Animaniacs gained a new generation of fans when it was added to The Hub in the early 2010s.
* Animaniacs gains these when she begins one of her famous anger-induced transformations.
* Animaniacs Game Pack you get after quitting the game is Wakko yelling "Help! We're trapped in a software company!"
* Animaniacs game, the CEO of Warner Brothers, after giving Wakko, Yakko and Dot their mission to retrieve a movie script stolen by Pinky and the Brain, says "This message will self-destruct in one second," followed by an exploding videophone and Wakko mournfully saying, "There goes my lunch..."
* Animaniacs gets out unscathed, but Buttons is subject to all manner of brutal slapstick while trying to keep her safe.
* Animaniacs had a total of 99 episodes, but unlike Tiny Toons, only 13 episodes were dubbed (this includes the first twelve and episode 50). Whenever or not it's due to the show's American pop culture references flying over Japanese viewers' heads is unknown by this point.
* Animaniacs had several shorts using this trope: "Babblin' Bijou", the second half of "Potty Emergency" (from the point where Wakko finds the toilet in his bag) and "Toy Store Terror", the latter two of which have dialogue from the characters at the end.
* Animaniacs had several songs that were long lists. One listed all of the countries in the world and the other was a list of all the US states and their capitals.
* Animaniacs had Slappy Squirrel use the proper name for the song, teaching at least some viewers its real name.
* Animaniacs had this line in the episode "The Girl with the Googily Goop":
* Animaniacs happy with what he's doing. She gets her fellow nuns to gang up on Flaxseed, preparing to beat his ass with rulers, but then Flaxseed reminds them nuns can't resort to violence. Realizing he's got a point, the head nun gets the group to pray, and the Notre Dame Fighting Irish football team immediately shows up and pummels the crap out of Flaxseed for them.
* Animaniacs has had quite a few, such as "The Slapper," "Buttermilk (It Makes a Body Bitter)" and "Branimaniacs."
* Animaniacs has Slappy accused of cartoon violence against Walter Wolf. Slappy's defense consists of describing how she basically blasted Walter to smithereens, leading the jury to find her...not guilty, at which point it's revealed that Slappy rigged explosives under the jury's seats.

* Animaniacs has The Goodfeathers (Pesto, Bobby, and Squit), who are Italian, and Flavio and Marita, who are Spanish.
* Animaniacs. Her usual questions are "What's you doing?", followed by a series of "Why?"
* Animaniacs honoring Chick Vennera, who played Pesto and the Godpidgeon, after his passing.
* Animaniacs: Implied in one short. The Good Feathers claim they will "dive-bomb" Mr. Plotz's new car, and splatting is heard offscreen.
* Animaniacs". In a great gag, one of the spots reads "Bankrupt", making it both a parody of "Wheel of Fortune" and of the phrase "morally bankrupt". There's also a prize space, which they actually hit at one point.
* Animaniacs: In a story from Issue #32, Dot invites some girls for a slumber party and tries to offer records for entertainment but her guests, not being cartoon characters from old times like her, don't know what records are.
* Animaniacs: In "Critical Condition", Slappy uses "not on the list" to deny two film critics entrance to a film premiere - despite their invitations. They'd severely ticked her off criticizing some of her old cartoons, and this is just the beginning of her revenge.
* Animaniacs: In "Hooray for North Hollywood (Part 2)", Mr. Plotz is ousted from Warner Bros. for turning down the Warners' script that became a mega-hit movie, and he gets reduced to a bum holding a sign reading "Will run a studio for food".
* Animaniacs: In "Moby or Not Moby", Captain Ahab has a "Have You Seen This Whale?" sign asking people to call 555-harpoon.
* Animaniacs in October 2014 when The Hub was changed to Discovery Family and the latter stood around, with less promotions, before also getting canned in July of the next year.
* Animaniacs: In one episode, the teacher Ms. Flamiel has a textbook called "Mathematics: Easy as π".
* Animaniacs: In "Operation: Lollipop", Buttons uses a mailbag as a parachute.
* Animaniacs: In "O Silly Mio", the Warners confront a snooty opera singer for constantly shattering their stained glass windows with her high notes, and she tosses them out of the building and drops a grand piano on them.
* Animaniacs: In "Roll Over, Beethoven", Yakko, Wakko and Dot do this to Beethoven after he describes himself as a 'pianist'.
* Animaniacs; in "Scare Happy Slappy" a bomb blows Walter Wolf in half and he later sews himself back together, and in "Rest in Pieces" Sid Squid is cut in half by a statue's sword.
* Animaniacs, in "Sound of the Warners", after using the bathroom in a bush, Dr. Scratchansniff gets an awful itch, because he was in a poison oak bush.
* Animaniacs instead of resourcefulness, many of her stories have the dog Newt trying to catch Minerva (whether to make pelts out of her or just date her) and failing in painful, amusing ways.
* Animaniacs. In these stories, Buttons goes through great pains to keep the infant child Mindy safe, only to have his exploits go completely unnoticed by Mindy's mother, who always finds a reason to scold Buttons for being a bad dog at the end of the story.
* Animaniacs: In the short "H.M.S. Yakko", the villain Cap'n Mel is introduced by having the door to his quarters open to reveal nothing; Mel holds up a sign with an arrow pointing down to get the camera to focus on him.
* Animaniacs is completely absent due to Yakko Warner accidentally leaving it out) are all drawn as backgrounds.
* Animaniacs is playing, leading to a confused back and forth between the two where Slappy keeps asking about the band and Skippy keeps answering "Who". About a third in, Slappy notes that Skippy is beginning to sound like an owl.
* Animaniacs is pretty much the only thing standing between her and Child Protective Services.
* Animaniacs is so used to bad things happening to him that, because Danny pushed him out of the way of a falling anvil, he helps keep Danny safe from Katie.
* Animaniacs is to stretch his neck to ridiculous lengths usually so his siblings

can measure something or use him as a ladder.
* Animaniacs is trying, and for most of the sketch failing, to explain why Chicken Boo, who walks like a chicken, clucks likes a chicken and looks like a chicken is, in fact, a chicken.
* Animaniacs it doesn't work: Mindy accidentally knocks Brain into the smelly formula, then causes the lawnmower to crash, so only Brain himself ends up stinking.
* Animaniacs. It's also used as part of a "Good Idea, Bad Idea" sketch:
* Animaniacs, itself a parody of early Looney Tunes episodes, Walter Wolf experiences this upon sneaking up on a younger Slappy. (Worth mentioning: she's bent over at the time, the meat is labelled "rump roast", and is 69 cents a pound.)
* Animaniacs, Katie Ka-Boom's parents try to discipline Katie when she can't get her way, but Katie's violent outbursts terrify them to the point where they're too frightened to properly discipline her.
* Animaniacs king who will randomly start shouting before going back to normal.
* Animaniacs: Lampshaded. In the episode with segments themed after Russia, at the end when the moral of the day is revealed to be "Brush your teeth," Dot says, "That makes me feel all warm and squishy. Either that or I need to wear diapers." In episode 35, she said "That makes me feel all warm and squishy inside. Either that, or I sat in something."
* Animaniacs. Lampshaded when Mindy's mother leaves Mindy alone to go to a "better parenting conference".
* Animaniacs) leading to him being fired or worse. (Probably why he disguises himself in the first place.)
* Animaniacs" "Maybe I was a bit hasty," Death says, and he tells the kids they're free to go - for now. Someday they must return, but Death hopes that it won't be for a very long time!
* Animaniacs of all people, who won't buy any of the Warner kids' cookies.
* Animaniacs often parodies this, after a Scare Chord it is usually revealed, that one from the trio plays it on a piano or even church organ.
* Animaniacs of the characters. The final shot is of Ralph, Dr. Scratchensniff, and Hello Nurse bringing a net down onto the Warners, presumably catching them and dragging them back off to the water tower now that the series is over.
* Animaniacs, one of the kids' excuses to leave was that she had to iron her bed. However, given how goodie-two shoes both kids were, including said girl saying she wishes she could marry school, it's entirely likely that this was true.
* Animaniacs only had 13 episodes dubbed in Japanese, which were the first 12 episodes and episode 49.
* Animaniacs opening theme. Spielberg then has a change of heart and decides that the preceding segment was just a dream.
* Animaniacs plays this with Rita the cat, who is torn between wanting desperately to escape, and feeling terrible at how sad the gorilla is when she does get away.
* Animaniacs poked fun at this. Otherwise averted though, as the show tends to have very fluid animation for a TV cartoon.
* Animaniacs Prunella Vandergast is convinced that Dot's name is "Dit," Wakko is "Wikky," and Yakko is "Petey Pie."
* Animaniacs rated it TV-Y (even though it's not a show for preschoolers).
* Animaniacs recurring segment "Mime Time", a mime mimes something which then comes true. For example, he'll mime pulling a rope and it turns out he's pulling a tiger towards him.
* Animaniacs reused footage many times, the most common being "Wakko doing drum roll." Also notable in the "Yakko's Universe Song," where they reused footage from the planets song (particularly blatant, since Yakko goes from flying around in a saucer to a rocket during those bits).
* Animaniacs: Rita busts out of the Animal Shelter in the episode When Rita Met Runt. Calling over her shoulder to Runt, she says, "If you ever need anything, just whistle." She has almost gone when Runt begins whistling "Pop Goes the Weasel." Rita quickly turns around, mumbling sourly, "Me and my overused cliches."
* Animaniacs role in "the international friendship song". The extremely good-

natured obese professor took jokes about his long name and weight in stride, but then they went from curious children into full-blown antagonists and took away most of his clothes and he gave the Warners the boot (literally), and after they landed Wakko said "gee, some international friendship song" and the cartoon ended right then and there, indicating that they knew they deserved it because of how they were acting.
* Animaniacs: Satirized in a segment in which Boo the giant chicken is mistaken for a TV executive, and when asked for the punchline for various gags on TV, keeps saying "B'gawk!" All of the other execs are in hysterics except for one other who doesn't understand why it's supposed to be funny, yet when she suggests the same punchline, no one gets it. Well of course not. Her delivery was awful.
* Animaniacs saw the Warner siblings pestered by an extrememely boring guest they were unable to get to leave and who him continued droning on as they went to bed. Unable to get get to sleep Dot squeezed her pillow into one of her ears to block out the sound, resulting in half the pillow popping out her opposite ear.
* Animaniacs segment "Potty Emergency" after countless unsuccessful attempts to find a bathroom, Wakko stops at one at a gas station. Howver, he runs into one of these guys who warns him that he hasn't washed the bathroom in over a year. After seeing the nightmare of a bathroom himself, he decides not use it, no matter how badly he needs to.
* Animaniacs segment "Puppet Rulers", when on the Treckle and Meaney show, two new characters called "Big Ears" (Pinky) and "Noodle Noggin" (Brain) joined the show.
* Animaniacs segment "Space Probed" has an alien abducting the Warners and telling his brethren, through captions, "There are typical Earth creatures." The Warners then rearrange the words to read "Are these typical Earth creatures?" before making funny faces.
* Animaniacs, she tells him she's willing to wait thirty days until it's full again.
* Animaniacs. She was so busty that some shots of her abundant breasts were edited in the DVD collection. The intent was for her full cleavage to resemble a large puff of fur, but resulted in what fans tend to refer to as a "uni-boob". Apparently, what was OK on broadcast TV at 4 pm in 1992 was a little too spicy for a DVD release in 2009.
* Animaniacs short "All the Words in the English Language" deconstructs the Warners' long list songs by exaggerating it to have Yakko sing the entire dictionary and also get tired as the song goes on (he barely finishes it before fainting at the end), plus he makes a mistake on a word he can't pronounce.
* Animaniacs short "Book Revue", this time with tapes instead of books.
* Animaniacs short "Cute First (Ask Questions Later)" has Snow White having two of her dwarfs kidnapping Dot after her magic mirror says she's cuter than her. The dwarfs are then shown kidnapping Dot while she and her brothers are acting out the theme song.
* Animaniacs short involves a rodent from the country trying to become a big name Hollywood actor. Anyone he didn't like was added to his "list of people I'd snub when I become rich and famous." By the end, it was quite a list.
* Animaniacs short parodying the Salem Witch Trials, Rita is forced to go through one after being accused of being a witch's familiar. The trial is explained as "We will hold you under water for a really long time. If you drown, we will apologize."
* Animaniacs short "Plane Pals", an obnoxious executive has the bad luck of sitting next to the Warners, who decide to make him their "special friend" for the flight.
* Animaniacs short "Space Probed", Yakko, while on an alien cruiser, stumbles on a room containing Elvis Presley, Amelia Earhart, Bigfoot, and Jimmy Hoffa.
* Animaniacs, Sid the Squid tries to pull the cake variation off, but Slappy recognizes it.
* Animaniacs. Since she's unaware of the dangers she keeps getting into, she's constantly cheery.
* Animaniacs since there are a couple occasions where he makes some kind of noise (such as whistling or brief snippets of off-key singing).
* Animaniacs sketch "Noah's Lark" models its Noah, both verbally and vocally, after

comedian Richard Lewis, whose acts are nothing but this.
* Animaniacs, Skippy does this just as the social worker is about to take him to a foster home.
* Animaniacs: Slappy Squirrel has "You remind me of a very young [classic cartoon character]."
* Animaniacs, slurping loudly every time the leading lady in the movie screams.
* Animaniacs songs "Yakko's World" and "Wakko's America" have been used to teach geography of the entire world and the United States, respectively.
* Animaniacs, starts gnawing on his arm in desperation after trying numerous other means to free himself.
* Animaniacs streaming series, 22 years since its last episode. They heavily mock the trend of rebooting/remaking successful shows, and flatly admit they are sellouts for being in a reboot themselves.
* Animaniacs-style humor, came out at a time when Moral Guardians started to grow rampant when it came to cartoons with said style, and considering how this show loves to poke fun of society...
* Animaniacs such as Wakko's special salad he gives to the mobster in "Mobster Mash" and the plate of cockroaches and dung beetles Slappy gives Daniel Boone in "Frontier Slappy".
* Animaniacs that for some reason actually copied scenes from the song "Circle of Life" at the very beginning of that film. Here are comparisons between the two versions:
* Animaniacs that matches up the description. It was in black-and-white, and in French, but the dialogue was made up entirely of lines from the song "Alouette" — resulting in three people in a train car talking about preparing a bird for the oven as if it was a matter of dire importance. Later on, they quote "Frere Jacques", with the bearded man becoming overly tearful while crying out "Ding dang DONG!" (Quoth Yakko, "This is the worst French film I've ever seen! It's also the only French film I've ever seen.")
* Animaniacs that they were surprised the infamous "finger prints" joke was left in.
* Animaniacs that will grant his wish in any random way unless he words it carefully. One of the hypothetical wishes on his list is "a million bucks." He then gets trampled by a deer herd. He also wishes for all the dough in the world and ends up getting pelted with pastry dough.
* Animaniacs: The accidental version happens to Mindy and Buttons in "Up the Crazy River". As always, Buttons comes off the worst for it.
* Animaniacs: The city pound Rita and Runt are in during "When Rita Met Runt" has those.
* Animaniacs the employees, so Plotz has a big meet-and-greet party organized. After being introduced, and behaving very nicely, the Warner siblings are sent home by Plotz. Dr. Scratch'n'Sniff explains matters and takes them home. As they start climbing back into the water tower and Dr. Scratch'n'Sniff leaves:
* Animaniacs, the episode "Potty Emergency", Wakko is in a desperate search to find a bathroom and arrives at a gas station. When he turns on the light, the entire wall seems to recede: It's covered ceiling to floor in cockroaches, and the rest of the horrors within are mercifully implied by Wakko's reaction to it rather than shown to us.
* Animaniacs, the "glowing bars of energy" version was used in a futuristic Buttons and Mindy short for Mindy's playpen. She had no more difficulty opening it than she did the regular version.
* Animaniacs, the innkeeper and Keeper of the Cats (the skit's answer to Monsieur Thernardier) makes pies that are so bad, even the Inspector's dog is disgusted by them. (The inspector tells him, off the record, that with the proper seasoning, cats can be rather tasty; not coincidentally, Fantine and Valjean are represented by Rita and Runt, respectively, in the skit.)
* Animaniacs (the King is played by Sheila MacRea, the Wiper is played by Art Carney, etc.)
* Animaniacs theme-for a "Mission Implausible" for which such drama is not really

necessary. Wakko then eats the tape recorder, and burps, breaking all windows in the place.
* Animaniacs theme song. Although the series subverts this as Dot is just as involved in the same, zany adventures as her brothers.
* Animaniacs: The premise of the song "I'm Mad," which features Dr. Scratchnsniff trying to take the Warners on a day trip in his car. Unfortunately Yakko and Dot are apparently at each other's throats while Wakko has a litany of complaints that combine to make Scratchy lose his mind. All set to a fun song that was probably the bane of parents from the 90s to the early 2000s.
* Animaniacs: The protagonists and generic villains tend to get into elevators together and then just stand there as the elevator descends.
* Animaniacs, there would be a sudden cut to Wakko playing ominous music on the organ. (Except when Wakko said it; then Dot covered for him.)
* Animaniacs; the skull is inspired by Elmyra's skull on her headband.
* Animaniacs, the Warner Brothers (and Dot) create nodding dummies of themselves to allow them to sneak off a boring chat show they're hosting.
* Animaniacs: The Warner Brothers don't have a set species, thus no one has any clue as to what they are. Fans usually call them dogs for simplification reasons, but that's not completely accurate. Some viewers also genuinely think they're cats, but they've disproved that in an episode. Dr. Scratchansniff calls them monkeys but also knows they actually aren't.
* Animaniacs, the Warners are working as Mr. Plotz's secretaries while his regular secretary is out sick. Dot is tending to the phone and putting everyone on hold. When Yakko asks why, she explains that Mr. Plotz is very busy, and can't be disturbed. Cut to Mr. Plotz in his office complaining about how bored he is and wondering why he hasn't had any calls.
* Animaniacs, the Warners do this sometimes, but not very often. Yakko is usually on the bottom since he's the "big" brother.
* Animaniacs, the Warner siblings are taken aboard an alien spaceship. Yakko Warner briefly sees Elvis playing cards with Amelia Earhart, Bigfoot and Jimmy Hoffa. Yakko says "A lot of people are looking for you guys!", gets kicked out by Elvis and then goes off to see the rest of the ship. It's a throwaway gag, as Elvis and company aren't seen again in that episode.
* Animaniacs: The Warner siblings are the personification of unfettered Looney Tunes characters.
* Animaniacs, the Warners play Pictionary with Pablo Picasso. The Warners are unable to decipher his realistic drawings, while their weird-looking doodles leave him flummoxed. When an art dealer arrives and sees the Warner's drawings, he mistakes them for Picasso's and praises his new "Cubist" style.
* Animaniacs: they demonstrate literal "eyes in the back of their heads" (with Wakko having 9 eyes as opposed to 2), interpret a "pop quiz" as a soda taste-test challenge, and when asked "Are we clear?" demonstrate the difference between opaque and clear.
* Animaniacs. They're a homeless cat and dog who are always seen together, and despite having a desire to find a nice permanent new home, the two manage to live quite comfortably by offering each other a close unbreakable friendship of mutual support and protection.
* Animaniacs, this is Dot's attack. She can use this to distract other characters in the Warners' path.
* Animaniacs to look like human guys, but there's always one character who sees through his disguise and tries to convince everyone "He's a chicken, I tell you! A giant Chicken!"
* Animaniacs") to suck up some dishes on a nearby shelf. The Warners have to dodge these dishes and avoid being sucked in until the Vacuuminator overloads and explodes.
* Animaniacs to The WB. The show ended with 99 episodes (and having the strange side effect of having Season 1 have more episodes than the other four combined). It received a reboot in 2020 that is still ongoing.
* Animaniacs trying to cause an everlasting one of these after watching one in the

middle of the arrest of the Hyde Park monster, trying to take over England by making the Big Ben stop during tea time.
* Animaniacs two months before it premiered but with the lyrics changed.
* Animaniacs two-parter "Hooray for North Hollywood", the Warners barge in onto a Hollywood party to get their movie script approved. Wakko goes to the buffet table and cuts a slice of cake, and promptly eats the rest of it.
* Animaniacs", ultimately winning out when the best insult Tern can think of is: "You're a little shorty-shorty." Tern then explodes.
* Animaniacs" Unfortunately for the good doctor, the wrestlers in the ring only hear the last part of that exclamation, which results in Scratchansniff getting a firsthand look at how "fake" it is after all. Which just goes to show you that yes, Kayfabe exists, but the wrestlers are still 300lb masses of muscle and adrenaline who can, must, and will beat the tar out of anyone who breaks the illusion, intentionally or not.
* Animaniacs used this in "The Presidents Song" in an intentional Terry Gilliam-esque manner, "animating" old portraits and photographs of the past presidents.
* Animaniacs uses this a lot, too. In the episode "Meet Minerva", this is a squirrel's reaction to seeing the title character clad in nothing but a towel.
* Animaniacs version: "I know a song that gets on everybody's nerves. Everybody's nerves, everybody's nerves. I know a song that gets on everybody's nerves. And this is how it go-o-oes."
* Animaniacs version: "Of course you realize, this means — Warners!"
* Animaniacs, Wakko did this once, complete with Leroy Anderson's "The Typewriter" as accompaniment.
* Animaniacs: Wakko in "Ups and Downs", after the maintenance men raise the elevator he and Dr. Scratchansniff are trapped in and drop it really quick:
* Animaniacs. Wakko tried using it as an instrument until he learned where it had been.
* Animaniacs, Wakko Warner has to pee and when none of the shops offer him a bathroom, he decides not to think about it. As soon as he starts his attempts not to think about it, however, he enters a park, upon which he sees several sprinklers, a man watering the grass, a lemonade stand and a kid with a drinking fountain.
* Animaniacs. Walter Wolf does this once as well, with the same results.
* Animaniacs was a romantic piano piece composed in 1839, but most 90s kids call it the "Slappy Squirrel Theme".
* Animaniacs was changed to show Dot holding a crystal ball with the Nickelodeon logo inside it while saying "Nickalaney!".
* Animaniacs wasn't afraid to have sketches with dark humor. For example, "The Ballad of Magellan" ends with Ferdinand Magellan's death at the hands of angry natives in the Philippines, and plays it for laughs:
* Animaniacs weaponized the Warner Bros. water tower in "Super Strong Warner Siblings." This is also an actual building, though it has a greater role in the cartoon.
* Animaniacs: When asked to find their seats by their teacher Ms. Flamiel, the Warner siblings point at their hineys.
* Animaniacs. When the chairman of the FTA and Skippy's counseler arrive to lecture Slappy, she deals with them too.
* Animaniacs, where Rita's owner's meat pies are not selling, so he starts secretly using the cats he shelters for the pies. Since the protagonist is a cat, it has the same effect.
* Animaniacs where the Warners are being put through military training, and their sergeant is instructing them about grenades, with the above line. Wakko, naturally, throws the pin.
* Animaniacs), which leads to Ned telling him "Isaac Newton". This results in Ned winning the game and a six-month trip to the Rock of Gibraltar, which he doesn't even want. Of course, the Warners' main gimmick is screwing with people anyway.
* Animaniacs who was a small boy who told stories that had happened to his friend Randy Beaman and the stories were always told in a near-monotone and in one long

run-on sentence and at the end he'd recite the punchline in the same way and you wouldn't be sure if he'd reached it or not. Okay, bye.
* Animaniacs will associate it with The Goodfeathers, who occasionally used this catchphrase.
* Animaniacs with Slappy Squirrel causes Candie Chipmunk to do this; terrifying a pair of nuns before blowing herself up.
* Animaniacs, would often be tickled by his father while he was recording to make his laughter sound more genuine.
* Animaniacs, writer Sherri Stoner voices Slappy Squirrel, while Paul Rugg voices Mr. Director.
* Animaniacs: Yakko burbles his lips after encountering a giant Ralph for the first time in the "Warners and the Beanstalk".
* Animaniacs. Yakko lampshades this trope by saying, "Was that a long way to go for a joke or what?" before everyone says, "Goodnight, everybody!"
* Animaniacs. Yakko's physically about 14, Wakko's physically 10, and Dot's physically 8. And yet, some of the things they say are a bit...
* Animaniacs, "Yakko's World" and "Wakko's America", have been used to teach children the names of countries and states.
* Animaniacs: Yakko traps a pet woodchuck in a toilet, who, at the end of the episode, can be heard saying "Hello? Hello? Anyone? Anybody? Can anyone hear me? I'm still in the potty!"
* Animaniacs: Yakko, Wakko, and Dot run afoul of one after accidentally joining the army in "Boot Camping".
* +Anima. Not only does he spend the entire 10 book series tracking all of Cooro's movements, but he refers to him as 'his Angel', and states that he'll 'never let him go'.
* "Anima: Resolution" features reference to a goddess called Troloria.
* Animas Conquest is a charming, pigtail-sporting neo-hippie of sorts who is absolutely not above kidnapping and terrorizing the faculty of Salva Academy.
* Anima Tactics game is The Colonel, a man implied to be feared over and above others even in his own kingdom (which is made up of badasses and demons). In his description, it is stated that the number of people who know his actual name can be counted on one hand.
* Animate Body Parts: A body part with no "body" has its own sentience.
* animate cereal pieces are constantly trying to eat each other. This, along with the Krave cereal commercial, should really reconsider their message.
* Animated Actors: An animation-specific subtrope, where animated characters are treated like they're actors in a production.
* Animated Actors are said in an early strip to form Local 428 of the Federated Sisterhood of Lesbian Comic Strip Characters.
* Animated Actors: Fictional characters act as if they're in-universe actors performing on the show.
* Animated Actors: Fictional characters are portrayed as being actors on their show in-universe.
* Animated Actors). One video featuring Rod even treats puppets as a separate race, with him calling himself "the first Republican Puppet-American".
* Animated Adaptation also contain a blink-and-you'll-miss-it sequence where a silhouette of Joseph is whirling his clackers, only to end up tying himself up and falling off-camera.
* Animated Adaptation, an analog version of Santa named Mr. Nicholas takes on his role.
* Animated Adaptation: An animated remake of a non-animated work. Manga-to-Anime doesn't count.
* Animated Adaptation and made the real Destro believe the Commander went that one step too far.
* Animated Adaptation, and the chains/tatters served a similar purpose for it before it melded to him.
* Animated Adaptation: A non-animated work is adapted into an animated film or series.

* Animated Adaptation: A non-animated work is adapted into an animated work.
* Animated Adaptation, Bear does this to Franklin at the end to get him to give him his friendship bracelet.
* Animated Adaptation, Big Nutbrown Hare does this to Little Nutbrown Hare at the end of "Four Seasons" as he's putting him to bed.
* Animated Adaptation Bordurians to rescue Professor Calculus. Yet in the moon stories, we see Calculus happily working for the government of one of the countries who fought over his kidnapped self (Syldavia).
* Animated Adaptation, both seem to be about the same age they were at the end of the original television series.
* Animated Adaptation, both the mother and father are portrayed of either equal competence level, or Mr. Large being slightly more competent compared to the slightly bumbling Mrs. Large.
* Animated Adaptation, but he's simply Johan's jousting opponent, and after he's defeated he says that he should've taken up dancing.
* Animated Adaptation cartoon, a major saving grace of the cartoon was that it helped provide Abbott an income towards the end of his life after bad contracts and gambling habits.
* Animated Adaptation, Cornflower gives Matthias her favorite headband - a yellow one with the flowers she's named after - to wear as an armband.
* Animated Adaptation entirely in character for the ever practical Granny.
* Animated Adaptation (Fiori later also died in 2013), by Jorge Alex in the 90's episodes' dubs, and by Gustavo Berriel in the one DVD dub that featured him.
* Animated Adaptation), followed in late 2018, albeit censored and almost banned by the Hungarian state. The full, uncensored series was released on Vimeo's on-demand platform some time later.
* Animated Adaptation for the 20th anniversary but nothing has been heard of it since the initial preview.
* Animated Adaptation friend Peggy Brandt is the only person who knows that he and The Mask are one and the same. (Well, her and Stanley's dog Milo, anyway...)
* Animated Adaptation has an episode in which the title characters visit "Bunningham Palace" and Max attempts to get a smile out of one of these, or their bunny counterpart anyway.
* Animated Adaptation has him lose his footing when moving from a window to another (to attack a bandit guarding his door). He manages to pull himself up. Note that in the comic, he just crossed the gap without incident.
* Animated Adaptation has this trope as the introductory scene between Oliver and the Dodger. In a subversion, however, Oliver isn't actually trying to pick Dodger's pocket - he's trying to retrieve his pet frog, which has jumped into the pocket in question.
* Animated Adaptation has three of the supporting characters from that show survive, and the premise allows for others. But at least a good portion of them met their fate before the Tanners even found Alf.
* Animated Adaptation: he is accidentally shot by Mr. Jones during the meeting.
* Animated Adaptation, Howl explicitly tells Sophie that she's the thing he wants to protect.
* Animated Adaptation, Imp y Celyn is prone to putting his foot in it.
* Animated Adaptation include enlarged teeth which force her to speak like this.
* Animated Adaptation in the beginning of each episode — in one case, pulling off Ota's earphones — to talk about something she thinks as "Amazing", which is usually pretty lame.
* Animated Adaptation into this reality. (In the book, choosing which road is an important choice, but beyond that the crossroads isn't significant.)
* Animated Adaptation, in which the ape civilization depicted in the series was more advanced than its live-action counterparts. (Ironically, this is the only adaptation that comes close to the simian world as shown in Pierre Boulle's original novel!)
* Animated Adaptation Ivy instead of her younger brother Zach) on top of the titular female character being the series mascot but is a very well-liked cartoon

with all genders.
* Animated Adaptation: Of practically everything, including films, TV shows, comic books, video games, action figures, dolls, plush toys, music videos, and real-life celebrities!
* Animated Adaptation of the series, a second season was never greenlighted.
* Animated Adaptation picture books by Lucy Cousins (about an anthropomorphic mouse).
* Animated Adaptation retiring from the anime industry made any future adaptation of the series uncertain.
* Animated Adaptation, Rikki has them whenever he's around the cobras or when feeling angered, annoyed or suspicious.
* Animated Adaptations as the titular cat himself. The second movie is a rather stange case, however, since both English dubs have American-sounding voices, including the British dub's voice for Peter/Pelle.
* Animated Adaptations child turned into a were-bull, with matching footprints at some point.
* Animated Adaptation series had plush toys of the title character as well as his best friend, Nelly Gnu. With the animated release, plush toys for all the major characters on the show have been announced, as well as other merchandise.
* Animated Adaptation So seeing Doris in her original appearance can be jarring to those used to her appearances in later books and the animated series.
* Animated Adaptation stated that their musicals would no longer be adapted into animated feature films.
* Animated Adaptation story "The Astro Smurf". In a one-page gag where Dreamy visits Smurfette, Dreamy accidentally mistakes Smurfette's fishbowl for his helmet and leaves her house wearing her fishbowl on his head.
* Animated Adaptation, Susan tosses the lifetimer of one of the Assassins towards him, sending him diving desperately to catch it because he'd die if it shattered.
* Animated Adaptation: The animated version of a pre-existing, usually live-action, franchise.
* Animated Adaptation the characters also often interact with the narrator, to the point two of the villains threatened him to skip over things and cut to the end result.
* Animated Adaptation, the episode "Cats Alive", has Milly's clumsy father trip and land in the litter box. Unfortunately, he doesn't like cats, so this situation just makes him all the more impatient for her to find homes for their cat's kittens.
* Animated Adaptation, the Roman invasion fleet is being coordinated by a centurion using hand flags. Just then a seagull lands on his helmet. His frantic efforts to brush it off inadvertently signal the catapults to open fire on their own ships.
* Animated Adaptation. (They were probably thrown by the fact a Japanese accent doesn't sound much like the played-up Cantonese accent used for all Asian people in most Western media.)
* Animated Adaptation). Though Sullivan Productions created both shows, so they're only reusing characters they created.
* Animated Adaptation, to show how Aya feels inside despite appearances.
* Animated Adaptation uses this arrow at the end of every episode (except obviously for the final episode of a story arc).
* Animated Adaptation was so despised by critics and the Rodgers-Hammerstein estate alike that the latter stated that no further animated adaptations of their works would be produced.
* Animated Adaptation, when Jay first sees his quick clone, they say in unison "He's stunning!".
* Animated Adaptation. Whereas the book ends with the animals of Animal Farm watching helplessly through the window as the now-corrupt pigs and the evil farmers gloat over their new alliance, the film ends with Benjamin the donkey rallying his fellows in a second rebellion. Thus the film ends with the pigs cornered, trapped and cowering, their literal guard-dogs too drunk to lift a paw to come and help, as an army of other animals begins breaking through the windows and door and, it's heavily implied, trample and gore them all to death.

* Animated Adaptation where Dilbert is delivered Rusty's head on a platter at a restaurant).
* Animated Adaptation while) due to Monthly Asuka growing concerned about the manga's rather violent storyline and imagery present in the storyline, and the authors actually didn't want to be censored so they opted for hiatus. (Of course, the manga was actually pulled a couple times already for similar reasons.
* Animated Adaptation who must save the sleeping beauty and her prince from an evil witch.
* Animated Adaptation. Yoko and Timothy are best friends and have tons of moments like this. This also shows up in the original books, which is implied that Timothy and Yoko have a crush on each other.
* Animated advertisements for Red Bull say that it "gives you wings" and show people growing literal bird wings on their back. It's supposed to be a metaphor for giving you energy and alertness.
* Animated Analysis consists of a human reviewer, and a sentient drawing of a face who floats around.
* Animated Analysis: Online critic who reviews cartoons with a cartoon floating head.
* Animated, and the actions of his creators made it clear that they knew what this would do to him, and how wrong their actions were.
* Animated Armor. He also dual-wields axe heads, even though in the original, he used lances or swords and had a shield.
* Animated Armor, that being the ghost within the very heavy shell. Fittingly enough, Darius is one of the few Noxian characters he seems to have any measure of respect for.
* Animated Autobots aren't exactly paragons of military competence, it doesn't end well.
* Animated band's members Evangeline and Roscoe are often portrayed as a romantic couple in their songs and videos. Their real-world performers Sarah Darling and Weebl are married.
* Animated Credits Opening: A live-action work uses an animated title sequence.
* Animated Credits Opening, Ambrose is drinking a coffee while working on a corpse.
* Animated Credits Opening itself features baby George as well as many jungle animals doing vine swinging and repeatedly smashing into trees. It's hinted that this happens mostly because George doesn't know any other way to stop himself mid-swing.
* Animated Critic: A blog that reviews animation. Mostly individual episodes of western animated shows but also anime and other animated works as well.
* Animated Critic celebrates Halloween every year with a marathon that last all October called Toon-O-Ween.
* Animated Critic is an unusual case as most review blogs don't have ongoing story arcs. Currently he has 3
* animated does this when the heroes reach the site of their ultimate battle, only to find an exact replica of their command satellite.
* Animate Dead and can use a daily ability to try to take control of an already existing undead creature for 24 hours.
* Animate Dead, and the Death Domain Clerics get bonuses related to Necrotic Damage, the School of Necromancy Wizards can raise more numerous and more powerful undead than Clerics. So Clerics are better at using damaging Necromancy spells, but Wizards are better at actually raising undead hordes.
* Animate Dead Animals as a low-level magic spell, useable by novice necromancers who aren't yet powerful enough to affect humanoid corpses.
* Animate Dead on a carnivorous creature's last meal and see what happens. If all works out, they'll have a zombie in their tummy.
* Animate Dead ultimate can bring back half a dozen corpses to fight under his command, which then explode after use. The expansion made them invulnerable as well.
* animated for kids, as often applied when the show or film is deemed to be "too mature" to be for their demographic.

* animated .gif floating around the internet where someone wants to open a door. It proceeds to summon mecha, fire missiles, bash at it with oversized swords and hammers and finally drop a nuke whose explosion can be seen from space. When he is exhausted, the door finally swings open inwardly.
* Animated. He later teams up with and starts dating the villain Slo-Mo, who can use her time manipulation abilities to make him young again whenever she chooses.
* Animated He speaks in complete sentences. This differentiates him from the original. His inflection remains flat and heavily synthesized. His sentences are clipped and precise. His voice remains a tinny monotone under all circumstances. He is Soundwave.
* Animated, however does both. Most of the time, transformation is instantaneous, however characters occasionally do get a transformation sequence where this trope is in effect.
* Animated Inanimate Battle has an example with a male character. To be specific, Filmy treats every moment of his life as if it is a big twist of tragedy from a five-star dramatic movie.
* Animated Inanimate Battle. He has bladder issues and has to see the little leek's room often.
* Animated Inanimate Battle is hated by the other contestants for an unknown reason. So much so, that they put a restraining order on him where he is only allowed to go at least twenty feet apart from everyone else. Oodle's the only guy who actually likes him.
* Animated Inanimate Battle may seem cute in first sight, yet she's 6 stars of pure evil. She tries to bite Candle's face off after being kicked by Jelly
* animated intro has the Pink Panther imitating Chaplin as well as other famous movie stars.
* Animated. Is it any wonder that this guy is considered to be a badass?
* animated. It later goes back to static, leading the viewer to assume there's still nothing behind it.
* Animated!Jazz would get along well with Boulder, who is likewise fascinated with pretty much everything Earth has to offer.
* Animated keeps him a disembodied head until the first season finale.
* Animated Megs had some pretty doomy shoulders in his Cybertronian body, but his Earth-mode ones are arguably closer to
* animated movie adaptation. Due to a notorious case of "Hollywood accounting," his share of the profits were much smaller than would seem fair.
* Animated Movies Filmed by Animating the Images of the Animated Movies
* Animated musicals often up the action and the animation during musical numbers, to create the show stop potential of the scene. This is evident in the
* Animated Music Video has one, around 04:34, when two of the main characters are about to die.
* Animated Music Video short "Friendship Through the Ages", where all seven girls are seen dancing together.
* Animated, namely Optimus' "cog in the great Autobot machine" speech and the fact that the guys put out on space bridge repair duty all seem to be ones who either violated or disregarded conformist Autobot patriotism.
* Animated Outtakes, all on Buzz—hiding in one of the spaceship boxes and making faces in the background, drawing on Buzz's helmet and making the film crew break up when Buzz puts it back up (twice), and finally writing "THIS SPACE FOR RENT" on his wings. By the final one, Buzz marches off camera shouting "DARN IT, WOODY!"
* Animated Outtakes to you?" line, resulting in them having to re-take the scene repeatedly and culminating in her shrieking "YES!" before utterly cracking up.
* animated prequel that was dug up. But when it comes to be your turn to escort the thing, all manner of baddies can come right up to the thing with no issue. And by extension, you.
* animated series for a decade. To nearly everyone's surprise, the show turned about to be a notable success with that was faithful to the source material while adding its own twists, featuring violence and dark themes that not only wasn't

watered down from the games but also went further than any game had previously. The only major complaint was its short length, confirmed as a pilot for a longer story. Thankfully, its strong reception ensured it a second season a day after it went up, with it later confirmed that said season would be twice as long as the first one, answering the major complaint.
* animated series from the 80s was even worse than any of the games. Not only does Link do all of those things and get no reward for his trouble, everyone in the show still treats him like a useless moron and Zelda can't even be bothered to acknowledge him as a hero while repeatedly insulting him and his well-proven capability. There's even an episode where Ganon steals Link's soul and his ghost is only able to seek help from Zelda to stop him from dying a slow death as his spirit fades out of existence. Zelda never lets up on reminding him what a great burden it is for her to lend any amount of aid to the guy that regularly saves her, her family, her kingdom, and her entire damn universe, on a weekly basis.
* Animated Series has Spock (disguised as a distant cousin) claim to his father Sarek that he is visiting the Vulcan city of ShiKahr to honor their family's gods.
* Animated Series, the titular character has a pirate form that has an appropriately-styled cannon replacing one arm.
* Animated Series with the titular character's form of 'Toolverine', whose forearms are literally replaced by giant swiss army knives.
* Animated Shock Comedy-inspired adult cartoons became incredibly popular and culturally dominant during this period.
* Animated Shock Comedy would appeal to older audiences using vulgar comedy.
* Animated Short demonstrates how lack of fire safety can result in this.
* animated skeletons are not terrorizing humans, they're going jogging and riding bikes in the park.
* Animated Spellbook's Longerform Campaign Journal starts with the villain Shifty Wick in danger of being killed by wolves, and the party choosing to save him. The third episode ends with wraiths attacking the cave Shifty Wick is hiding in, and the party needing to decide if they're going to help him.
* Animated Tattoo snake bites people to mark them as vessels of Orochi.
* Animated, Transformers have either an aversion if not downright fear of organic beings (Autobots) or a deep disdain/hatred of them (Decepticons).
* animated Transformers movie" After that doesn't work and they're chased away, he quickly realizes: "Me Grimlock need new strategy."
* Animated tried. Unfortunately, Megatron is more than strong and skilled enough to handle his schemes.
* animated TV specials (a role which saw her singing on multiple occasions).
* Animated universe and written by Marty Isenberg and Derrick Wyatt, showed Blurr alive, but still stuck in cube form, as Cliffjumper took him to see the Stunticons' stunt show.
* animated version of Selina Kyle is an outspoken animal rights activist, and when she was given a suspended sentence at her trial, the assembled press and citizenry cheered her (possibly because in her previous appearance she had helped Batman stop a bioweapon attack on Gotham before he arrested her — a major part of why the judge was willing to grant her probation — and thus could be seen as a hero).
* Animated version of Swoop kidnapped Sari this way when Prometheus Black forced the Dinobots to become his minions.
* animated version. The Christmas special reveals Yeti and Elves are of alien descent, too. The nature of Santa, however, is left unstated.
* animated video for their single "Boys That Sing" after all four members and their manager died in a car wreak. The real boys are projected onto a tower a few times.
* animated video kills him, he explodes, revealing that inside he was full of money and nothing else at all.
* Animated World Hypotheses: When animated characters perceive their world as animated, rather than realistic.
* Animated Wreck-Gar was voiced by "Weird Al" Yankovic, who didn't voice Wreck-Gar in G1, his song "Dare to be Stupid" (which he quotes) was played over the big scene on Planet Junkion where the Autobots meet the Junkions. They'd originally wanted to

get
* Animate Inanimate Object: Inanimate objects that are alive and sentient.
* Animate Object, allowing a character to animate a random object to serve as a cheap and fragile minion.
* Animate Objects lets player characters create their own killer objects. (The rules for these only really cover combat.)
* Anima They've done it so many times that Paulsen, Harnell, and MacNeille eventually became friends even after the original 90's series ended.
* +Anima; though the manga has very few color pages, the portrait of Fly's childhood self present on the back cover of volume 9 reveals that he has brown hair.
* Animation Age Ghetto, and a large wave of adult-oriented anime, but the mentality still existed to some extent.
* Animation Age Ghetto: Animation can only be enjoyed by children, so there's no point in making any for anyone else.
* Animation Age Ghetto: Despite the large volume of animation S. Korea produces, almost all of it produced for the Korean market is made for kids. This is starting to change, though.
* Animation Age Ghetto, in that they hate anyone older than 12 who watches anything animated.
* Animation Age Ghetto often cited as the uber-example) was unsuccessful, however.
* Animation Age Ghetto: Teenagers and Adults who admit to watching animation tend to be looked down upon in society from those that don't. While there are exceptions, animation titles are usually "supposed to be" avoided like the plague.
* Animation Age Ghetto: The belief that animated works are only for children.
* Animation Age Ghetto: The stigma that animated works are only for children.
* Animation Age Ghetto want your kids to watch western animation... at least after sunset.
* Animation Age Ghetto, which was wildly popular among said kids and teens.
* Animation Anatomy Aging: Animated works make the difference between ages more noticeable.
* Animation and explanation side which shifts to create the Moon's phases.
* Animation Bump, and the bottom image comes from a frame of said show where the animation suddenly becomes realistic and detailed.
* Animation Bump, as well as a sub-plot involving Itsuki Takeuchi's friendship with Kazumi Akiyama, may explain the slump.
* Animation Bump: Moments in an animated work where the animation is of a higher quality.
* Animation Bump: Periods where the animation shifts to a better quality.
* Animation director Adrien Beard's only notable acting role is voicing Token Black on
* Animation Domination Hi-Def's recurring "Scientifically Accurate" series: The very first episode was "Scientifically Accurate Spider-Man", which repeatedly mentioned the fact that male spiders detach their penises in order to mate, and ever since then, every episode has gone out of its way to include some strange scientific fact about characters' genitalia, or at the very least shoehorn the word "dick" into the parody lyrics.
* Animation From Script To Screen to target children only, because only if you write for adults will you be completely uncondescending. However, his prejudices toward his own profession still show through at times. He assumes that most animators aspire to make people laugh - which would be fine, except that it implies that cartoons cannot inspire any emotion other than hilarity. He also writes that "very subtle acting may never be possible to meet in this medium." (If only Culhane, who died in 1996, could have lived to see the "performances" of the characters in the Pixar and DreamWorks movies!)
* Animation Lead Time: Animation often gets finished a long time before it actually airs.
* Animation Magazine first aired, and they featured an article panning the show. They actually ended up retracting it and released a new article in a later issue

with a more positive review.
* Animation of the Sheriff of Nottingham is often used more than once throughout the film (most notably his leisurely walk cycle.) The Sheriff's main animator Milt Kahl was reportedly not amused by his animation being reused more than once.
* Animation Resources has published 425 articles about animation and art since 2004, and it is still regularly updated to this day.
* Animation/spaaaceTransformers the (green) red soldiers are shot down by Crackle, yet no wounds appear. Their clothes aren't even torn! However, this is probably due to the cheap animation rather than censorship.
* AnimationVideos21 joke and excessive blood in the Halloween special). It's definitely not for adults either, as the writing in these shows is just as insipid as Animation Films 1212's ones.
* Animation vs. Minecraft: Cave Spider Roller Coaster, a cave spider snatches Yellow from a thin corridor above his head.
* Animation VS Minecraft, Red fakes it in the AVM short "The Rediscovery". This earns him a slap in the head by Blue.
* Animation VS YouTube incapable of attacking him as he breaks YouTube from the inside out.
* animation was a final project for an animation school in Paris. It will never be a movie, but it looks like a trailer (and people have reported that they would like to go and see it).
* Animation was considered a medium inferior to live-action, and destined to remain seven-minute-long curtain raisers to feature films. That is, until Walt Disney decided to make
* Animation writer Merriwether Williams, who has written on cartoons like
* AniMat one of the worst animated films, and one of his least favorite films.
* Animator and director John Hubley worked on two films that were released after his death from a heart attack,
* Animator Brenda Banks, one of the earliest known female African American animators, was known for her work on most of
* Animator Cliff Nordberg died in 1979. This film, which was his last project for Disney, was which was released two years later.
* Animator Jacques Muller passed away in November of 2018, The Looney Tunes Critic's commentary for
* Animator Katie Rice is staunchly opposed to Rule 34, particularly if it involves underage characters. She even warned on her Twitter that any porn artist who tags, retweets or likes her posts will be blocked in sight. Given that she was a victim of grooming and abuse as a minor by
* Animator Sam Singer requested to have his name removed from the credits of
* Animator vs. Animation, Animator attempts to deal with him by drawing a stick figure named "The Dark Lord"... Who then teams up with The Chosen One in order to destroy Animator's computer.
* Animator vs. Animation: As the series itself is inside a literal computer, it's of course the pointer that the titular Animator has.
* Animator vs. Animation finally managed to make peace with and befriend the animator. Similarly, other programs (such as desktop icons and Clippy) were shown to be alive in the first three installments.
* Animator vs. Animation, in "Command Blocks", Blue can be seen snacking on it and offering it to Green.
* Animator vs. Animation is about to kill The Second Coming, a portal appears. After some time passes, The Chosen One comes out of the portal to help the animator and the stick figures to destroy the virus.
* Animator vs. Animation is a regular occurrence, and in "PvP", Green starts a brawl over a conflict in building space.
* Animator vs. Animation, Red got possessed by Herobrine. When Red fakes it in the AVM short "The Rediscovery", this trope is how everyone reacts. In particular, Blue takes off his helmet and uppercuts Red with it.
* Animator vs. Animation series is actually named "The Chosen One". He wasn't chosen by gods nor does he have any quests, however. His name seems to simply

indicate his power level and the animator intentionally created an over-powered stick figure to fight for fun. It took years of real time to see him do something heroic, which is stopping a virus from infecting every computer in the world, starting with the animator's computer despite the animosity toward each other they used to have.
* Animator vs. Animation series of flash animations does this in a pretty awesome way: the interface is used by both animator and animation for weapons.
* Animator vs. Animation series takes place in a computer. Because of this, the Animator who owns the computer is pretty much a god, having the abillity of create and destroy whatever and whoever he wants. It's downplayed because outside of the computer, the Animator is a normal human.
* Animator vs. Animation short "PvP", Green starts a brawl over conflicting building space. It escalates to a war when Red gets involved.
* Animator vs. Animation shorts. Green is such a good builder that he almost always wins building contests. Very frequently, at least one person throws TNT at his builds. And when part of his build is destroyed by an accidental boss summoning, no one bothers to help him, finally causing him to lose.
* Animator vs. Animation takes place in a realistic computer, and the original trilogy is about drawn stick figures coming to life and fighting the Animator, exploiting (and wrecking) the computer interface in the process. This trope even applies to other stick figures, as in the fourth video, the stick figures from an internet website look very different from the stick figures drawn by The Animator.
* Animator vs. Animation that lead to different websites. Throughout the scene, the stickmen use each site's assets to their advantage.
* Animator vs. Animation: The files in the Recycle Bin are labeled "crap", "junk", and "crappy junk".
* Animats version of this trope, almost being that they aren't complete brains (and usually animal neurons).
* +Anima, when a boy named Kevin falls in love with Husky, thinking he's a beautiful Mermaid Princess. Eventually, Husky tries to break the news him that he's really the 'Mermaid Princess' without overwhelming him, but ends up screaming it at Kevin before becoming human again. Kevin, is, to say the least, rather shocked that his Mermaid is Husky.
* +Anima, where people (usually children) receive animal-based powers when subjected to extremely harsh conditions, intense fear, and life-threatening dangers.
* +Anima, who also often is thought to be glaring menacingly at people when really he's just... really out of it.
* Animax Latin America premiered, it cluttered most of the schedule in the past few years (it had 47 episodes).
* Anime Abandon cracking a pool cue on him to knock him to the floor. The pool cue was breakable, but it broke in a completely different area, meaning Bennett really did have a pool cue broken on his back. He shows off the bruise in the outtakes with Marc joking that they were filming an assault.
* Anime Abomination but most people let it slide because he was at least fair towards the series.
* Anime Abomination he said he hoped for the fan's sake he would never meet them at a convention he was going to, which sound like a threat.
* Anime Accent AbsenceIn anime, a foreign character will normally speak Japanese flawlessly, unless the plot depends on a language barrier.
* anime adaptation does this with Kazuto Hongo, the male protagonist from the games.
* anime adaptation has "Idol☆Halloween". It's about Akari and her friends in a contest to collect the most candy in order to enter a special halloween audition.
* anime adaptation. In the anime on other hand downplays the romantic aspects of the leads, in favour of focusing on Shoya overcoming his depression and self-hatred thanks to Shoko and unlike the manga ends right there and doesn’t explore any further. Their relationship is mainly left affectionately platonic in the anime, while the manga was more clear about it.

* anime adaptation on the protagonists. They never amount to anything useful and get blown to bits by the enemy.
* anime adaptation, Phoenix and Maya cement their new partnership by bowing to each other — which turns into a cute yet comic pratfall since she's behind a glass wall at the time and they both bump their heads.
* Anime & Manga (and Light Novels that have been made into Anime or Manga)
* anime, and eliminating the need to wait a week for the next installment.
* anime as the 3rd version doesn't appear aside from Moon's version of it.
* Anime based his gimmick on it, even using the show's theme song as his entrance music.
* anime based on or otherwise text-heavy games nearly without fail. Examples include:
* Anime) before bursting into mainstream in the mid-1990s, peaking in the early 2000s when 85% of people under 35 watched at least one hour of anime a week. It hasn't faded away completely, but it has declined in popularity since the mid-2000s. Much of this may be due to declining quality as production houses, looking to exploit the new American market, focused on making shows that were either fast and cheap or overly filled with injokes for anime fans.
* anime boom. As a result, more people were familiar with anime adaptations than the manga they were based on. For a while, the only place to talk about a manga series was the forum of the people translating the manga.
* Anime but the second doesn't is likely part of the reason why the latter season was critically panned by comparison.
* anime). By doing so, the trapped characters lose all personality and appear to be within a catatonic state. It is unknown completely what happens if the inanimate objects are destroyed or damaged in some way, but it is generally acknowledged that it can't be good.
* Anime: Called "Japanimation" at the time, the medium started becoming somewhat popular in the US in the '80s (although it would take until the second half of the '90s until it truly exploded in mainstream popularity).
* Anime conventions to the spotlight in the early 2000s, "Where did all these 13-year old girls come from?"
* Anime Crimes Division. Being a web video series with episode lengths around ten minutes, there aren't any ads, but such bumpers are placed where there would be in a real show.
* Anime Crimes Division instead of anime. It's even lampshaded with an original song playing in the background all about how you have to have a hallway fight scene now.
* Anime Crimes Division: Joe treats the destruction of Gundam models as murders.
* Anime dubbing, in general, tends to be like this. Ask any voice actor in a convention. They'll tell you that anime voice acting is the lowest paying work in the industry and is also one of the hardest (due to
* Anime dub voice actor J. David Brimmer is also a Broadway fight choreographer.
* Anime episode 146: Nel explaination of the nature of numbered Arrancar is accompanied with diagrams for the audience.
* Anime episode #150 (Season 7, Hueco Mundo Sneak Entry). Ichigo, Rukia, Ishida, Chad and Renji are in Las Noches and facing five doors that might lead to Orihime. Rukia suggests that each member of the party go through a separate door, and they do. Ishida ends up finding Renji and getting involved in his battle agains Szayelaporro, while Ichigo ends up being the one to find Orihime.
* Anime episode 156. Uryu Ishida does the same thing to the arrancar Cirucci Sanderwicci, firing an arrow into her chest to seal off her power.
* Anime episode 193: Szayelaporro Grantz uses a slide show to demonstrate the difference between the protagonists' and their clones to the audience.
* Anime episode 197: During the fight between Espada #7 (Zommari Rureaux) and Captain Byakuya Kuchiki, Rureaux gives Captain Kuchiki a lecture about control and the nature of his special eye power.
* Anime episode 22: Ganju Shiba uses the visible only to the audience sort (with Japanese writing) while introducing himself.

* Anime episode 23: Orihime Inoue, Chad and Uryu use Type 3 diagrams when discussing what Yoruichi's friend Kūkaku Shiba looks like. Then Orihime draws a Type 1 diagram in the dirt to combine their ideas together.
* Anime episode 287. While exploring Uravira's mansion in search of the Snow Crystal, Ichigo and friends are caught by Uravira himself. Uravira pulls a cord and releases a giant ball from a hole in the ceiling, which rolls toward our heroes. They run away from it at high speed. It's
* Anime episode 28. During the fight between Uryu Ishida and the Soul Reaper Jirobo Ikkanzaka, Uryu fires an arrow into Jirobo in such a way as to prevent him from using spiritual pressure and thus making it impossible to continue as a Soul Reaper.
* Anime episode 298. While Ichigo is being shanghaied into making a movie, he turns to the camera and says "I need an agent."
* Anime episode 33: Don Kanonji a chart appears to detail the strategy of the Karakura Superheroes against a giant Hollow.
* Anime episode 346. Riruka Dokugamine says that wearing contact lenses makes her eyes dry out as soon as she puts them in, then turns to face the camera in a close-up and says "It's because my eyes are so ginormous." (a reference to the large eyes of anime characters).
* anime episode "Cruise Blues". If that isn't obvious enough, look at how short her hair is in this disguise!
* anime episode that adapted this story renamed the twins Anita and Latika.
* anime-esque. While the new hair is still unusually colored, at least it obeys gravity.
* Anime First: When the anime series comes out before any other adaptions.
* Anime-focused sister station HERO TV was launched in 2005 and was shut down about the same time as TAG due to the lack of advertising support and "a change in business direction".
* Animegao kigurumi (not to be confused with the above mentioned kigurumi) is a form of mascot costume common in Japan that gained popularity with western cosplayers in the mid-2000s. Quite a few kigurumi owners/"dollers" are also furries.
* Anime-Gataris inevitably going to be made by using nameswapped versions of the titles.
* Anime-Gataris, they refuse to call him anything else despite his demands to call him Kouji.
* Anime Hair the world has ever seen. In the abridged series particularly amazing hair grants the owners special powers.
* Anime has an inverted case in its first season. The "Phantom Blood" story ends precisely and cleanly at the end of its 9th episode, leaving the rest of its first season to adapt the next part, "Battle Tendency."
* Anime helped bring girls into the fold; now girls and women constitute a sizable portion of the international fanbase. Moreover, thanks to wider distribution of titles and the proliferation of the Internet, anime fandom has spread across nearly every national, linguistic or ethnic boundary.
* anime (he once rigs the bathroom scale to break hilariously once Usagi steps on it) but spends a lot of his free time messing around and picking on his sister.
* AnimEigo out at about the same time. Nonetheless, the OVA's for both ended up coming out a couple months before the first manga chapters.
* Anime in Chile met a lot of controversies during its peak in popularity, especially with the most popular series.
* Anime in general is actually made on half or less of a western cartoon's budget.
* Anime in general is somewhat notorious for having teenager characters designed in a way that makes them appear much older than the age they're supposed to be (and the same even goes for adult characters too). It's especially common in
* Anime in general, which are mentioned under the Tabletop Games and Video Games sections below.
* Anime in North America has had a roller coaster of popularity over the years, normally with a particular series leading the surge. In the mid '90s, anime surged

big time thanks to particularly
* anime in particular — often includes drawn-in lens flares as well. Exaggerated lens flare is fairly pervasive in 2010s anime.
* anime is an extended war between the human lands of El-Hazard and a race of giant insects called the Bugrom.
* anime, Jessie and James of Team Rocket were seen on one of these. Their only complaint was the unflattering pictures.
* Anime/Kite; she can be seen walking past the car window and glancing inside when Kurokawa is talking to the detective during the film's opening minutes.
* anime_lj_tcg, is also misspelled as "Rouge". The admin in charge of making cards has said that it's too much work to redo a deck, so everyone has basically accepted it.
* anime loved her he'd stay with her no matter what. And it was given to him by his future self, no less.
* Anime managed to take it up to eleven: in the G8 filler arc, the marines have set up an ambush at one end of a straight hallway and it doesn't have any offshoots from it. Zoro was leading the crew down that hallway towards the end where the marines set up the ambush, but they were being followed by a separate bunch of marines. Somehow the marines that were chasing Zoro and the crew got to the ambush before the Straw Hats did. It is this event that proves Zoro can get lost in a straight hallway.
* anime Manjoume and Johan×Possesed Johan are also fairly common.
* anime", many of the psychics in Sabrina's gym are shown to be practicing their psychic abilities by trying (to limited effect) to bend spoons. One such psychic tries demonstrating this to Ash, Brock and Misty with great difficulty. For some reason, Ash was unimpressed, then bent a spoon with his hands and boasted his method was better.
* Anime Maru fan waking up after an 8-year coma found its way to 2ch and started spreading on the Japanese internet; understandably it took some time before they worked out it was satirical.
* anime moments but the writers are intentionally vague on whether they were intended to be love interests or not (with the lead director of the Original Series, Takeshi Shudo, saying they weren't). In the manga, Ash and Misty clearly like each other.
* anime movie's big climax is Sailor Moon using the crystal's power to destroy the Xenian Flowers all over the meteor that would spread them to Earth. Despite her friends telling her she could die and their pooling their own power to try and prevent this consequence, the crystal shatters and Usagi dies to save the Earth. A remorseful Fiore gives up his own life force in the form of a flower to revive her.
* Animemusicvideos used to have a particularly invasive manner of requesting donations. While the site was displayed, it would randomly pull up a screen asking for donations, then at the bottom of this screen there were three buttons, one of these buttons would say something like 'continue', and the two others would say 'donate'. These buttons would be randomly swapped every time the screen pops up, forcing you to either pay attention or risk mistakenly hitting the 'donate' button.
* Anime Network's video-on-demand/former online service fit this trope, which is really strange considering Anime Network is owned by the same company that releases these series on home video. (Also keep in mind none of these series are censored for Anime Network.):
* Anime News Network was immediately canceled after the death of its creator and ANN's editor-in-chief Zac Bertschy, with its last episode being a recorded memorial service by his friends and colleagues.
* Anime News Nina, saying she wouldn't be likely to do it. Fortunately, the comedic nature of the strip kept the obvious result from getting too dark.
* Anime News Nina. The second time, Nina witnesses a girl crash into a guy. Saying "accidents like these are usually the start of a great anime romance!" Nina watches...only to see the guy yelling at the girl to watch where she's going.
* Anime no Chikara project aimed to create entirely original anime, although it ultimately produced just three of them. All of them aired in 2010:

* Anime no Chikara that a lot of lessons were learned from the project and they were able to make more successful original anime.
* Anime of the Game, Lucifer promises Dante's father endless gold and 1,000 years free of torment if he will simply kill his own son. Outraged, Dante asks him where he expects to spend it in Hell. His father attacks him anyway.
* Anime-only character Docrates. In his attack, Heracles Fierce Onslaught Fist, Docrates crosses, then flexes his arms, concentrating his Cosmo in his fists and causing the winds around of him to change due to the pressure. Next, he attacks with both fists, projecting two powerful blasts which affect a large area.
* Anime-only example: In the first episode, Gohei Hiruma was a former student at the Kamiya Kasshin dojo who harassed and was overly violent towards the other students. In retaliation, Kaoru's father shattered Gohei's right thumb, specifically mentioning this trope as the reason. It doesn't take, as Gohei learns to fight left-handed – which is what clues Kenshin into having Kaoru check her father's old records. During their fight, Kenshin shatters the knuckles on Gohei's
* Anime Otaku (which is what most people think of when they hear the term "otaku")
* "Anime Physics." "Nearly everything explodes in the anime. Most attacks explode when they connect with an opposing attack, even if the attacks would not normally do so." The entry lampshades the water/leaves explosions and the "moves amplified in power and even made to explode just to enable them to blast off Team Rocket", and notices "Some moves explode when they clearly cannot, such as a Bite attack."
* anime: Primeape, Aipom (traded to Dawn and now an Ambipom), and Chimchar (now an Infernape).
* Anime producer Nagateru Kato left Tatsunoko Pro to serve as a producer for MOVIC before going on to form
* Animerica. In fact, just about every blonde (except for Takuya and Shirogane) in the series symbolizes this.
* Anime, Riku falls of a cliff with Daisuke Niwa, and Daisuke on the bottom when they hit the ground, cushioning the fall. In the English translation at least, the dialogue follows the model outlined in the trope description.
* anime series would recognize as meaning "plan" in Japanese. And he also drinks "Koros" vodka, Koros being the Greek demon of disdain and surfeit (disgust brought about by overindulgence).
* Anime Slushie and is known for his very bad forum posts in which he flat-out lies about what's in the show and/or manipulates the fandom. While Cube and Feen read these posts for the audience, a chill elevator music tune plays.
* Anime Slushie, is given a content warning for "basically anything that could be in an edgy anime" (because it's probably in the show being discussed).
* Anime Slushie Volume 8 Preview, Cube reacts harshly to the commentary's claim that there are no retcons in the show:
* Animesque: After having done animation segments for Japanese shows for so long, it is no wonder there is such an influence.
* animesque alter-ego Stinkoman has his trademark "Double Deuce!" attack.
* Animesque call themselves "Club Ned" (but are referred to by Ned and his friends as The Huge Crew). They may be a tough, intimidating, leather-and-bandanna-wearing gang, but on the bright side, they don't see any other girls who like Ned as competition, but invite them to join the club!
* Animesque comic by Adam Warren has both Kei and Yuri as recipients of the "Lucien" genetic upgrade package, which granted them superhuman abilities along with increased attractiveness. (The prologue to the "Fatal, But Not Serious" miniseries has an activist complaining that the Lovely Angels are feeding the stereotype of Luciens — like the activist — as stupid bimbos.)
* Animesque considering he's the series' greatest victim of racial violence and leads Remnant's only active Faunus Rights organisation.
* Animesque, Earth is the center of the universe because all other cultures are fascinated with its cultural diversity.
* Animesque. Granted, it predated anime itself (which, ironically, began as an imitation of Western artists such as Disney and Fleischer), but it was the first instance in which Western artists began to use Japanese styles.

* Animesque: Guess what. I actually look like that. Some think I overdosed on watching Anime.
* Animesque linework. To experienced artists, it is an anathema called "shoestringing" which turns precisely controlled twitches and pressure changes into bland smears and tapering streaks only vaguely related to the actual stroke.
* Animesque of the male characters, "promoted" in their absence. But there are a few straight examples of this trope, including a female Sinestro, and an Indigo made indistinguishable from a female Brainiac.
* Animesque sales. It died in its third year due to the loss of the studio producing the related comics and because the bigger sets of the second year stayed behind in stores like solid rocks.
* Animesque shows, with the writing and characters being seen as overly childish. Even as the show gained in popularity with this group, the comedy aspect of the series remained as the biggest point of criticism, with many bemoaning it as the worst element of the cartoon.
* Animesque starts becoming cheaper and sloppier. As they rush to a local fast food joint to agree to do a commercial, the animation degrades to sketches and low-poly CGI, then to storyboard images, and finally to crude sketches on sticky notes.
* Animesque style, and Mandy says "His eyes aren't fixed yet" in Japanese.
* Animesque subtitles; as in, they're Google Translated gibberish which has nothing to do with the dialogue that plays along with them. An excerpt (translated back to English):
* Animesque than the rest of the cast, right down to the large eyes and exaggerated expressions. She's even rendered in a pseudo-"2D" style, despite being in a CGI film.
* Animesque, the Boy/Girl Gun is a standard item, and one alien power replicates the effect on the user. It's probably best to not speculate about the non-standard items.
* Animesque The squid rips its guts out in a form of seppuku and dies. The factory appears to play the clip on rotation as a motivational tool.
* Anime: Starting in 2004, anime, manga, video games, and penumbra products replaced physical goods like cars and electronics as Japan's highest monetary-value export.
* Anime tends to come in rough multiples of 12- or 13-episode chunks. If you don't know going in that
* Anime the main cast had been fighting against throughout the series. Notably, the anime had diverged significantly from the manga at this point so these events haven't taken place in the latter.
* Anime Theme Song: A jaunty pop-type song that's the theme tune to an anime.
* anime the only available clip of (which was recorded from a convention screening on a camcorder hence the low quality and cacophony of attendee laughter) of what is commonly nicknamed "Saban Moon" due to people assuming the company who made it was Saban.
* anime, the song actually takes jabs at itself for not making any sense.
* anime The "what goes on there screws with technology outside" factor is greatly downplayed compared to most series that use this trope, but it exists.
* anime through almost two years. When the Yu-Gi-Oh GX manga kicked in, though, it introduced two new additions, which greatly boosted the popularity of the Archetype:
* anime unrelated to the anime). The main character of the comic series, Sara Pezzini, is more of a heroine than an antihero, but she wields a powerful magical artifact which doubles as a skimpy outfit, uses it to dispatch of her enemies, and has a rather dark backstory.
* Anime/Vanguard manga came with a limited edition Blaster Blade card.
* anime version had its fair share of gags involving deliberately terrible English:
* anime was no better, instead the wars were all incited by Dante in order to cause enough despair in order for philosopher stones to be made. Then she would take those stones for herself.
* Anime Weekend Atlanta was banned from one hotel after some guests dressed as

* anime, where the latter, a small boy, would often ride on the back of the enormous Belle (also a Great Pyrenees), as they traversed the French and Spanish countryside in search of Sebastian's mother.
* Anime World Order as one of the many reasons why the average life expectancy of an AD. Police officer is fairly low.
* Anime World Order: Daryl often voices his contempt for recent shounen series for trying to get a female audience, dubbing them "neo-shounen" because of it.
* An Immigrant's Tale: The story of packing up and leaving for a new country in hopes of a better life, as well as coping with the change.
* an immortal alien invader who had to be subdued by an army of hundreds
* an immortal in the region of 500,000 years old, and a habitual thief capable of stealing the Tesseract from Asgard's highest security vaults whenever he feels like it, he's accumulated an extremely extensive library. It's also implied to be a more conventional armoury.
* An immortal Nazi got chained up and dumped in a river for 60-odd years, coming to life and drowning every few minutes. When he finally gets out, he's a bit peeved.
* Animorphism also has the cyborg Due, who can reshape her appearance for long-term infiltration missions.
* Animorphism situations. That said, the army in question is still at least powerful enough to overwhelm regular fighting forces.
* Animorphism: Transformation into an animal, either as a special power or a one-time event...
* Animorphs “The Extreme”. Even in bear and wolf morphs, it’s cold, and Ax and Tobias have no cold weather morphs. It helps when the group can morph seals and then polar bears. They still have to evade the Venber, an extinct alien race revived and hybridized with humans so Visser Three could use them as Arctic shock troops.
* Animorphs #26, the alien race known as the Howlers has these. For extra points, their skin has the texture of dried lava.
* Animorphs abilities - even staying in their normal forms around the Yeerks, who they are supposed to be hiding their identities from. On the opposite end, the andalite characters, Ax and Visser Three, spent nearly all of their screen time disguised as humans, even when there was no clear reason for them to do this.
* Animorphs). A boy named Julio later also takes a grizzly bear as his battle morph. Rachel is a bit offended about that.
* Animorphs, after accidentally morphing elephant and having her house collapse, while reacting to crocodile DNA she's allergic to. It doesn't go well because she begins experiencing her body's rejection of the croc DNA, which means 'burping up' an actual crocodile. Cassie morphs her and takes her place, while Marco morphs a llama from an animal handler who's also appearing. The crocodile causes chaos, and Cassie has to think fast so her secret isn't revealed when someone calls her an Andalite.
* Animorphs after Ax, the only alien on the team, has been watching too much Earth TV. He says something dramatic, then freezes in place. When the others ask him what he's doing, he responds that he has to remain silent until they get to "These Messages", at which point the others realise he's doing a "soap take".
* Animorphs, after David has the group on the ropes thinking he killed Tobias, they stage a conversation in the barn where they admit he has them beaten before discussing out loud what to do next. Tobias reports that a rattlesnake left the barn soon after they did, confirming that he took the bait, allowing them to get rid of David.
* Animorphs"; after the Animorphs free Tom and fake his death on their first trip to the Yeerk pool, Tom lets his hair grow out while living in the basement so that, if anyone sees him brushing his teeth in the bathroom from outside or anything like that, he may look enough like Jake that people will assume it's Jake rather than Tom.
* Animorphs. After the Yeerks find out where the Hork-Bajir valley is located, they plan to storm it and kill everyone. Jake and his friends attempt to explain to Toby

that going into battle is suicidal, and to demonstrate his point Jake draws a line in the sand and asks the Hork-Bajir to vote on which course of action is the smartest. Jake's point backfires when every Hork-Bajir votes to fight back.
* Animorphs after when the Yeerks used their new tech to conquer and enslave other species.
* Animorphs, all Andalites in the military have translator chips implanted into their brains that can translate any language after a brief exposure to it. In addition, their "thought speak" can be understood by any sentient being, because it communicates concepts in addition to specific words.
* Animorphs allegedly there are as many female and male soldiers among the Andalites, but one sees almost only male ones.
* Animorphs: all Gleet Bio-Filters at Yeerk Pool enterances are equipped with poison gas in case of entry attempts by unauthorized life forms. The main characters barely make it out alive when they trigger one.
* Animorphs already made him into a weapon when they gave him the morphing power, and he's horrified by the idea that he was the ideal host all along.
* Animorphs. Also, at the end of the series it's stated that peaceful aliens now live openly among humans.
* Animorphs. Also done when they manage to acquire T-Rex morphs via time travel, likely to prevent it being an in-universe game breaker.
* Animorphs also has the Hork-Bajir, who while not as advanced, were also totally peaceful, and were enslaved when they caught the attention of a more aggressive race. Notable in that all of these species were created artificially, and designed to be non-violent by their creators. The series seems to give the impression that while being a pacifist sounds great; in reality, it isn't a good survival tactic.
* Animorphs, although it might make just as much sense to put it under Heroic BSOD.
* Animorphs: Among the many things Ax has consumed that gross humans out was Taco Bell hot sauce straight out of the packets. The manager who kicked them out suggested getting him a bottle of Tabasco.
* Animorphs, an arrived Andalite is easily identified by the heroes due to her uncontrollable reaction to the food she's devouring while in human morph.
* Animorphs - Andalites and Yeerks begin to fear humans once they realize that humans, while much less technologically advanced, made technological progress far faster than their more advanced counterparts. Ax, an Andalite, is astonished to learn that humans went from first powered flight to space flight in under a century.
* Animorphs: Andalite shredders and Yeerk Dracon beams fill this purpose (and even have phaser-like power levels so they can stun, blow holes in, or vaporize targets). Despite the name, shredders are actually the less evil of the two- the Yeerks reverse-engineered Andalite shredders so they didn't kill as quickly, the victim feeling their cells exploding. Spacecraft-mounted versions are powerful enough to ignite a planet's atmosphere from orbit.
* Animorphs: Andalite technology tends to be based around the colors blue and white. Yeerk tech (at least that used by Visser Three) is usually black and red.
* Animorphs - andamquitedisappointedthatIhavenotyetbeenmentionedonthispage... Iwillreportthisdefeciencytomysuperiorsandbepromotedformyefforts."
* Animorphs and crawls inside Tobias' head so that the two can infiltrate the Yeerk Pool to rescue Jake, Ax, and Cassie from their human-Controller captors.
* Animorphs, and does so horribly that it was obvious he didn't actually read the book.
* Animorphs and don't bother investigate. Downplayed when they finally admit that aliens are indeed invading; they send some Redshirts to die in support of the main cast, and give them heavy weaponry to save the world with, but don't have a very important role in the end.
* Animorphs, and even though the tower is conveniently empty, the Animorphs' method of destroying the tower is still something that could never have been published after September 11. (It involves deliberately crashing an airplane.)
* Animorphs and every car had a car alarm. Really, really much funnier in text.
* Animorphs) and Hitler is just an army chauffeur with a particular mustache.

Tobias (in Hork-Bajir morph, an alien with blades on its arms) instinctively puts him in a headlock despite Cassie pointing out that this Hitler isn't responsible for the Holocaust. He ends up with his throat slashed anyway (possibly accidentally).
* Animorphs and is strikingly happy and comfortable in her body, easily navigating a verbal misstep and enjoying positive attention from bystanders. That's also the book where he considers if he stayed too long in morph to avoid the complicated or unpleasant facts of his life, and when listing them starts with "being a boy".
* Animorphs and it's made clear that the Nartec are pretty much all insane.
* Animorphs and later into this. Years after the series ended, Applegate candidly admitted in interviews that she'd gotten too reliant on using Erek as an expository device.
* Animorphs, and of the question of dolphin and whale intelligence, seems to be based on this trope.
* Animorphs and probably have no real culture of their own, making them named by him or others whom they've come in contact with.
* Animorphs and recklessly pursues trouble, and Marco keeps himself busy and claims happiness but jumps to throw it all away for a suicide mission. Cassie calls herself and Marco the "only two survivors" among the Animorphs, but she's the only one who's managed to move on and make a new life and find love. The last several books in the series feature these characters looking at their options and choosing again and again to work for that world above their own personal interests, so perhaps it's not surprising.
* Animorphs and then strictly raised for hosts. This isn't typical of the Yeerks, but the fact that the human population is so massive compared to the Yeerks allows them to be choosy on what particular individual is desirable and which isn't.
* Animorphs") and treated as slaves, but once given a pep talk about standing up for themselves they prove just as bombastic and crazy as the females. Also, slaves captured from other species are automatically classified as male regardless of their actual sex, and will be killed if they disobey an order. Incidentally, being executed makes them eligible for leadership roles, which possibly means that they're now considered female.
* Animorphs, and winds up doing so (while in Hork-Bajir morph with a blade to Hitler's throat, he's hit by a bullet, causing his arm to move) while still debating it. Whether it was accidental or not is left ambiguous.
* Animorphs any fan attempt to make it make sense in light of previous events.
* Animorphs apparently worship their home world's sun, the Kandrona, because they need its rays (or an artificial equivalent) to survive.
* Animorphs: Arbat, who was probably just a rogue faction rather than representing the Andalites in general; and Alloran, who developed a biological weapon to eliminate the alien race of Hork-Bajir.
* Animorphs are a chilling example. They're constantly plagued by a hunger so fierce that even the Yeerks apparently controlling the Taxxons can barely restrain it. Such is its severity that they'll even eat each other to satisfy it. Part of it is driven by an irrational fear of starvation, and the worst part is that it can never be satisfied. At one point a Taxxon ate too much and nearly dies from the bloating, yet in its head is still convinced that it's starving and needs to eat more.
* Animorphs are basically a whole race of them. They aren't specifically in either type, though...maybe a bit of type one without the violence and death. They go around kidnapping creatures to either add to their own collections, sell or get ransom for and whatever items they can sell or trade.
* Animorphs are basically walking Cusinart, born with blades attached to their elbows, wrists, ankles, knees, tail and forehead (the poor mother...). Somewhat anticlimactically, they use them for gardening and harvesting bark from trees.
* Animorphs are like this under their holograms: sleek ivory and steel androids that vaguely resemble two legged dogs. The Pemalite ship that powers them has a similar look.
* Animorphs are normally an aversion, but when the Yeerks screw with the ship that

powers them, the holgrams begin to fizzle, fade and fail.
* Animorphs are this. They're 5 ordinary teens who are suddenly given the potentially limitless superpower of being able to become any animal they can touch, who then go out and save the world from brain infesting parasites.
* Animorphs arrives, morphs a huge alien and devours Elfangor alive. The screaming features in several of the Animorphs' nightmares.
* Animorphs a Sario Rip that didn't pan out due to more mundane explanations, but these didn't usually seem to involve time travel, thus probably meaning translated from the original Andalite, 'Sario Rip' means space wedgie.
* Animorphs as Erek drained the Pool ship's weapons. Erek and the Animorphs never reconcile.
* Animorphs, as if he was writing in the diary while bleeding out on a battlefield.
* Animorphs as Jake also usually appoints him leader of the Marco-Tobias-Ax sub-team, which ended up carrying the end of the war.
* Animorphs, at least one whale is confirmed to be sentient: the Drode must spare its life for this reason.
* Animorphs: At one early point, the alien Ax laments that, stuck on Earth, there is no opportunity for military advancement. So he decides he will make the most of the situation and become his species' foremost expert on humans.
* Animorphs at one point came across a species called the Jallians, whose leader, the Life-Giver of the Jain Sea, was a giant slug giving birth to multiple other Jallians even as she talked to him. She was unpleasantly demanding, but not particularly terrifying.
* Animorphs averts the convention that aliens are named after their own home world, and instead, they call their planets "the Andalite home world," "the Hork-Bajir home world," and so on; it's mostly unclear whether they have any other names for these planets. Despite the fact that they use this convention for every other inhabited planet, they still call this planet "Earth" rather than "the human home world."
* Animorphs: Ax, an alien Andalite, morphs into a human to better assist the rest of the freedom fighters on Earth. For the first time he can experience food culture (Andalites don't have tongues), and finds his favorite things to eat are cinnabuns, hot peppers, and vinegar.
* Animorphs Ax, an andalite himself but never referred to as a core member of the team. (i.e. "The Animorphs and Ax")
* Animorphs, Ax chases Visser Three onto a rooftop to confront him for a one-on-one battle.
* Animorphs, Ax comments that he never wants to speak about what happened ever again.
* Animorphs, Ax is promoted from Aristh (cadet) to Prince (an officer of the Andalite army)
* Animorphs Ax is the more commonly accepted Sixth Ranger: he and the original five initially consider themselves "five kids and an Andalite," but by the final book, Ax refers to the group as "We, the Animorphs," when speaking to Jake.
* Animorphs, Ax knocks out Jake so that Jake won't have to bear the responsibility for Ax's plan to threaten Visser Two with the nuking of the Yeerk Pool (and therefore, the Animorphs' hometown).
* Animorphs, Ax notes at one point that human firearms are no match for the energy weapons of the Yeerk and Andalites, but still do a good job of blowing large, messy holes in you. Visser One observed the same thing when justifying her decision to take Earth by infiltration, rather than by force as Visser Three had been pushing to do.
* Animorphs.) Ax's internal monologue is not quite as formal as his speech, though it is still clearly the thought process of someone foreign to American culture; when speaking, he's actively affecting a formal tone because he believes that's how a soldier in the Andalite military should act.
* Animorphs, because everyone came to pay their respects—Hork-Bajir, Andalites, all the remaining Animorphs, the President of the United States.
* Animorphs: Being an alien, metaphors don't really work well with him. He has a

tendency to take instructions literally, which, combined with him being in public in human morph, makes for some very funny situations. (He also has a notable fascination with pronouncing things, as in his original form he has no mouth and communicates telepathically. Hence the repeated syllables.)
* Animorphs, being put on trial by the victorious humans. At first they're stumped about how to do this—he can't interact with the courtroom without a host, but one of the court's arguments is that taking one is a war crime. The Andalites wind up making a machine to help this problem. It's also mentioned that the visser's former host, Alloran, is not being called as a witness, as this was deemed too close to having him testify against himself.
* Animorphs bites Tom in cobra morph in half. Fortunately, he doesn't die instantly.
* Animorphs book, Cassie jokes about how Rachel never seems to get dirty - that any mud just seems to be deflected away. She throws a ball of mud at Rachel, who knocks it away without it splattering all over her. Cassie comments that Rachel's hand probably isn't even muddy, but Rachel refuses to show her.
* Animorphs book covers famously each show a main character turning into an animal. The model for Marco cut his long hair short sometime between books #5 and #10, so a minor subplot about Marco having had his hair cut was written into book #10.
* Animorphs book. For starters, two years after the end of the war Jake is hired by the UN to train morph-capable paramilitary units to combat terrorism against alien tourists.
* Animorphs book. Jake and Marco go to the zoo to acquire animal morphs but are spotted by security. They see two doors to go through, and the first one brings them face-to-face with a rhino. So, they choose the second door, which leads to a lush jungle. Jake turns around to talk to Marco, only to notice that Marco, normally a tan Hispanic guy, is very pale, and deduces that whatever animal inhabits the place is right behind him. He asks what it is with a forced calmness.
* Animorphs book, Jake writes that he's "writing this so more people can learn the truth", implying that he and the others are writing the series as events unfold.
* Animorphs books, Ax, an alien, is amazed that humans invented computers after books, which he finds much easier to use. He's also surprised that the telephone was invented before the chat room.
* Animorphs books begins this way, with the Yeerks supposedly invading the Hork-Bajir valley. It's used to demonstrate how unprepared everyone is, especially with all the families hiding there.
* Animorphs books, but most notably done by Tom's Yeerk in the final two books (narrated from different perspectives):
* Animorphs books has the group encounter a group of Trekkies. It doesn't end well for them.
* Animorphs books, the alien Ax is looking through the other Animorphs' text books and comments, "That's not how gravity works at all." In fairness, modern physics is still working out how gravity works on a quantum level.
* Animorphs book "The Message" had the Animorphs tire of running (swimming, actually) from Visser Three and opted to go down fighting instead of being picked off one by one. It was only due to a last-second save by a whale that they didn't all get killed.
* Animorphs book The Other, Mertil and Gafinilan share a link that allows them to hear each other's thought-speech even over long distances. It's not clear, or as easy to decipher as if they were near each other, but they can still pick it up.
* Animorphs book "The Sickness", Tobias (a boy turned into a hawk) angrily says Cassie's veterinarian father is a quack because he tried to treat him by shoving a pill up his rear.
* Animorphs book. Tobias asks Ax, "What's up?" to which Ax replies, "Up is the opposite of down. However, these terms are meaningless outside of a localized gravity field." Despite this being a fairly good joke, it's played as yet another example of Ax's utter inability to grasp human humor.
* Animorphs, both the books and TV series. The Chee are androids who pass in human society with human holograms. They often project holograms to hide conversations

with the Animorphs, or in at least one book, hide the kids' escapes with their parents.
* Animorphs, Bug fighters destroy the kids' hometown in the second last book to create a giant dead zone around the Pool ship's landing site. They reduce the entire city to a desert of ash, so the nothing can get close without being seen.
* Animorphs built to do nothing but have fun destroying and murdering. When Jake learns that all Howlers ever created share a hivemind, he begins pushing all of his memories of love and kindness into it. The end result is that the next time the Howlers are sent to destroy a planet, they try kissing everyone instead.
* Animorphs, but she happened to have a time machine at the time she came to this revelation. Sorry John.
* Animorphs, but she's also been quite bitter about Scholastic owning the rights to her franchise. It might even be a bit of both.
* Animorphs, but this being a kids' book, we get a more toned-down version: Marco uses the internet almost exclusively to look up scantily clad girls.
* Animorphs can snark with the best of them, but when it comes to telling outright jokes, he inevitably summons the crickets. Even Ax, at one point, gets a big laugh just by repeating a joke that Jake had told him earlier. Nobody laughed the first time.
* Animorphs Cassie, Ax and Tobias also acquire elephants in book 22, but they never use them other than that one mission.
* Animorphs Cassie doing her level best to keep up. "We grovel like... um... like people who are really, really grovelling."
* Animorphs: Cassie gets along swimmingly with all the animals at her farm, and has such affinity for critters that it makes her the best morpher in the group.
* Animorphs, Cassie gets to stay behind on Earth and enjoy the peaceful new life she's made for herself.
* Animorphs. Cassie infiltrates the Yeerk pool with the aid of a pacifist Controller to rescue Katran. As she goes osprey and hauls tailfeather out of the pool, she notices the guy making this gesture- or at least, that's what it looks like to the Yeerks, she knows he's pumping his fist in elation.
* Animorphs, Cassie suddenly grabs Jake and kisses him before he gets on the plane because Tom told her to try to reconcile with him.
* Animorphs characters do cross-gender human morphs. Marco morphs the female governor in one book, and presumably, Cassie and Rachel morph male when they acquire sailors for a mission on an aircraft carrier. Rachel's eagle, acquired between books 1 and 2, is male, as is the grizzly bear that she acquired in book 7. Marco acquires a girl wolf in book 3, while Jake, Marco and Ax all become a female skunk in book 9, and Rachel and Cassie (along with the four boys) acquire a male polar bear in book 25. Tobias acquires Taylor, a human female, in book 43.
* Animorphs, choosing to attack an alien base at first light to smash-and-grab the nuke they need to get back to their own time. They explain that no, there really isn't a practical reason (the aliens used automated towers for most of their defenses, which obviously don't sleep). It's just traditional.
* Animorphs) claims he's from "a piece of Balkan territory that has changed hands so many times Alan himself doesn’t know what country it is today".
* Animorphs comes off as this in-universe in his human morph. As it contains DNA from four different people (two of them white, one Latino and one African-American), and he introduced himself as being from various countries, culminating in Canada ("I am from Canada. I am Canadese.")
* Animorphs considers herself this. She started out loving the fighting and adrenaline rush and ended up the go-to kid for death threats and assassination.
* Animorphs considers the human sense of humor one of their pluses over Andalites or Yeerks.
* Animorphs could be seen as an actual villainous example, though she generally avoids using her unique fighting skills in favor of psychological manipulation.
* Animorphs Crayak tempts Rachel with godlike power, transforming her into a steel-clawed, indestructible killing machine dubbed 'Super Rachel'.
* Animorphs Crayak was unfortunately watching when this happened (being the guy who

pushed the Ellimist into said black hole), and was thus able to replicate the feat and become god-like himself.
* Animorphs crazed, if that's possible to imagine. He also gets bonus points for taking an actual admiral as his host.
* Animorphs does this with Ifi's response to the ending of "The Beginning".
* Animorphs: During the David trilogy, the team are investigating a problem at sea near some boats when a killer whale moves in on them. They move closer to the boats, thinking the noise of the propellers will drive it off, before it reveals itself to be David in morph. Fortunately, Cassie gets away and morphs a humpback whale before looming up behind him (because he doesn't know enough about whales to know she wouldn't be able to eat him, he backs off).
* Animorphs: During the fourth book, the Animorphs save a 'great one' - a whale, though their dolphin morphs think of it as a 'great one', and the whale thinks of them as 'little ones' - from an attack by sharks (and dolphins really do not like sharks, particularly when sharks are attacking a great one). Later on, Visser Three comes after the Animorphs in his own morph (a very, very big sea-going creature from another planet), trying to kill or capture them. The Animorphs send out a cry for help via echolocation. Cue two massive sperm whales, two slightly smaller ones, and the great humpback that they saved from the sharks earlier. Sixty feet long and weighing in at approximately sixty-five tons each, tearing in at absolute top speed to first ram Visser Three's morph, and then subsequently start beating the life out of him with their tails, using blows that are described as being quite capable of knocking entire walls down. The exact same thing happens in book 36, oddly enough, also involving whales.
* Animorphs, Elfangor notes that human technology is so primitive doctors "can't even treat a simple tumor without cutting large holes in the body."
* Animorphs, Elfangor says he talked to a guy named Bill who worked at a computer company...obviously intended to be Bill Gates. He also mentions a guy named Steve, which could indicate one of Apple's Steves.
* Animorphs enter through the ear to take control of the host's brain, and leave the same way every three days to feed on Kandrona rays.
* Animorphs. Erik helped build the pyramids, but he was a slave who quarried rocks, not their designer. He also claims to have coined the phrase "New Deal", but it was in a poker game while he was the White House butler, not as a Washington official. He also said he was Beethoven's helper or butler.
* Animorphs essentially gender flips this with Tobias and Rachel. Rachel is the one who smashed anything that got in the way by turning into a grizzly bear, and Tobias brings out the best in her, despite being trapped as a bird himself.
* Animorphs even suggests that the buffalo is the latter book's rough counterpart to amnesiac!Rachel.
* Animorphs, except for some Yeerk hosts who wear minimal clothes to depict rank or faction. When Elfangor first met humans he was actually freaked out by Loren taking off her shoe, since he had assumed that was her actual foot. Ax has trouble understanding why he has to wear clothing while morphed as a human, and frequently refers to clothes as "artificial skin" and shoes as "artificial hooves."
* Animorphs extra-galactic in origin though, and other beings like themselves are said to exist in all galaxies.
* Animorphs falling in love with each other, but acknowledging that it probably can't work out with any sort of permanence. Rachel invokes this trope in her narration. "When you're seven, people think it's cute when you say you want to marry your cousin. When you're seventeen, they call you a redneck."
* Animorphs fandom consists of adults who read the series as kids back in the '90's.
* Animorphs features a subversion. Normally the Yeerks enslave humans by basically turning them into biological versions of this. Eventually an android captures one and places it in his skull, unable to enslave it the Yeerk is trapped in a Mobile-Suit Human with no access to the controls.
* Animorphs finds out that he's the son of the Andalite war hero Elfangor, who is also the dying alien who gave the kids the morphing technology.

* Animorphs fits this trope. When all of the Jahar's energy is taken away by the living asteroids in Andalite Chronicles, they are left floating inside their ship with no gravity. Also, Andalite dome ships have an interesting mechanic wherein it feels and looks as if you're walking off the edge of a cliff when moving from one part of the ship to another, where the new floor is at a ninety degree angle to the old, and each has its own gravity.
* Animorphs, forcing her to go on a very dangerous mission alone. Oh, and give Ax brain surgery.
* Animorphs for the dominant species, in this case because they're numerous and superficially similar to Andalites (who resemble centaurs).
* Animorphs frequently had Marco invoke this trope, followed by a declaration of its insanity. Occasionally used with other characters.
* Animorphs frequently make use of the morphing power's healing properties. Their fights often go like this: Attack; get torn to shreds while decimating the enemy's defenses; de- and remorph; carry out the mission. Rachel in particular seems to lose and regrow limbs on a regular basis. Their regeneration ability becomes a major plot point in one book where Rachel morphs into a starfish and gets cut in half. She returns to her human form, but so does her other half, creating split personality Rachels, a decent, kind-hearted girl, and a total ruthless bitch.
* Animorphs from the Animorphs information that would portray the Howlers in a more sympathetic light, which seems very out of character compared with his pacifist rants in the final book.
* Animorphs from the series of the same name, a crew of shapeshifters.
* Animorphs gets a phone call from a man harassing them for (supposedly) harbouring former voluntary hosts, Eva decides to rack up his phone bill as high as possible.
* Animorphs given how the characters can feel their bones crunching around as it happens.
* Animorphs gives us The Sharing, an organization full of nice, friendly people who do charity work and have a great time doing it. And after you are initiated, a parasitic alien crawls into your ear and you are a slave to the invading alien race.
* Animorphs gland, as he's an Andalite and thus it would be impossible to get a surgeon to operate without causing a lot of problems.
* Animorphs group was nicknamed by Marco. It's short for "Animal Morphers". Or "Idiot teenagers with a death wish." Whichever.
* Animorphs had a unique variant of this. A Yeerk who had displeased the Visser one too many times was fed to a natural Yeerk predator nicknamed the Yeerkbane. I believe Vanarx was the actual name. It enveloped the host's head with its mouth and sucked the Yeerk right out of the host's head. Yikes.
* Animorphs had the group going into an undersea cave and stumbling into a whole museum of stuffed humans on ships(with a few just-added Hork-Bajir in the mix as well.)
* Animorphs had the Yeerks doing this with Taxxon trackers in one book. Jake uses it, too, with his morph of his dog Homer.
* Animorphs has Andalite tail blades that seem to be able to cut through pretty much anything. Although, at one point, Tobias (in Andalite morph) gets his tail blade stuck in the trunk of a tree he was practicing on, much to Ax's amusement.
* Animorphs has a non-sadistic version when the group is stuck on Leera due to a morph accident, and are being snapped back to Earth one at a time. The Andalite commander needs an infiltration team to enable a continent-destroying bomb, in the dark, in the middle of enemy territory.
* Animorphs has an twist on this trope. Every planet not in Earth's solar system is named for the indigenous sapient species; for instance, the planet the Andalites evolved on is called the Andalite homeworld, the Taxxons' planet is the Taxxon homeworld, etc. Whether this is what the natives themselves call it or simply the named used for convenience's sake is not entirely clear, however.
* Animorphs has a pair of CYOA spinoffs, which were not well-received. Perhaps it was the fact that the story did not actually branch at all, and making the wrong choice simply got you killed on the very next page.

* Animorphs has a particularly rowdy fight — involving Human-Controllers with guns, Hork-Bajir, a portable Yeerk Pool, and Marco in gorilla morph — at a typical suburban home. At some point, Marco pauses.
* Animorphs has a variation. Tobias' parents were a human named Loren and an Andalite named Elfangor. However, the variation is that Elfangor was in human morph at the time, so they were able to have sex the usual human way.
* Animorphs has a variation: Yeerks are slug-like aliens who can flatten themselves to wrap around a host's brain and control them, entering through the ear canal to do so (being soft-bodied, the host isn't harmed by the Yeerk slug entering and exiting every three days to feed).
* Animorphs has Ax, the Andalite (alien) ignorant of human cultures and customs, often reacting hilariously to new scenarios he encounters. On occasion, while he's in human form, the other Animorphs will try to cover for him by claiming he's from Canada- doesn't quite work.
* Animorphs has become one of these. It's stated in the epilogue that the only reason he's not being tried as a war criminal is that he fought for the side the won the war.
* Animorphs has David. He starts out as a very-reluctant new addition to the team's anti-Yeerk resistance movement, only to rebel against them and briefly become a side unto himself.
* Animorphs has pretty much the whole gambit. The small craft are the Bug Fighters, and the Andalite craft they were stolen from, differentiated by the placement of the 'tail' that holds the Dracon cannon. Bigger is Visser Three's Blade Ship, and the biggest are the Yeerks' Pool Ships and the Andalite Dome Ships, whose front halves seperate to double as medium-sized fighters. Possibly a Detachable Drive kind of thing.
* Animorphs has several books centered around deep sea action. Exaggerated when the characters travel to the mostly aquatic planet Leera. There the scattered islands and lone continent are mostly dull, barren rock, while the sea is filled with bizarre, colorful lifeforms everywhere you look.
* Animorphs has several examples of this throughout the series, and it could be said that the entire premise was at least partly based on this trope.
* Animorphs has several. The Yeerks use Bug Fighters, which look like mechanical insects. They were stolen from a similar Andalite ship, the main difference being the position of the "tail" that contains the dracon or shredder cannon.
* Animorphs has such an apparently useless offspring that he just lets Tobias waltz right on out.
* Animorphs has the human Animorphs go to a sex ed class given by Vice Principal Chapman. While the information isn't wrong, it's still pretty awkward, not helped by Chapman having an alien slug inside his brain. Also, Ax is very confused by human reproductive biology.
* Animorphs has the Pemalites, a ridiculously peaceful race who were completely obliterated by a more militaristic species. Tragically, their incredible technology could have been converted into weapons that would easily destroy their opponent but as a species, they couldn't bear to do so.
* Animorphs has these on the bug fighters and other alien craft. Ax makes a comment about human computers being so primitive they don't have a decent psychic link.
* Animorphs has the Yeerks attempt an abduction at a theme park, with the Visser in Andalite form decapitating a mascot. He's actually horrified to find a human inside the suit complaining about it.
* Animorphs has the Yeerks attempt to start WWIII between the U.S. and China. They get pretty damn close before the Animorphs stop it.
* Animorphs has two different Bad Future plots. In book #7, the Ellimist shows them a future in which the Yeerks had taken over; they had all been made Controllers, except Tobias, who was eaten by the others (This book took place before he regained his morphing ability, so he was useless as a host. They complain that he was a "bit stringy," but good with barbecue sauce). In book #41, Jake wakes up in another Yeerk-controlled Bad Future; in that one, the characters' fates are more varied. Ax is dead, Tobias is stuck in Ax morph, Cassie is a Controller involved in the

resistance, Marco is a Controller who leads the yeerk forces on Earth, Jake is a regular Controller, and Rachel was severely injured in battle and is now paralyzed, somehow unable to morph.
* Animorphs have access to his memories) play the role of Jake badly, while all this is going on... To his own family's shock.
* Animorphs have three horns on their faces, while females only have two.
* Animorphs head, they keep this suspicion to themselves. If Visser Three weren't such a Caligula, he might have caught them.
* Animorphs, he first visits our solar system around the time the dinosaurs died out. He mentions that Mars has life, but it's dying and, unlike on Earth, isn't going to recover.
* Animorphs. He is bound by restrictions and rules, which include not interfering. In these cases he's simply providing them with subtle clues, but they have to recognize them and deduce what he's trying to tell them.
* Animorphs". He often calls or refers to Jake as "Fearless Leader" and "Big Guy." Tobias is usually "Bird-Boy." It seems like Cassie is the only one he doesn't have a nickname for, which might stem from the fact that they never really get along.
* Animorphs, high fashion is socks that actually match for once. She's also gentle in being the team's moral center and doing what she must but hating the need to fight.
* Animorphs him. It's made more literal since one of the kids, Tobias, is Elfangor's son, though he doesn't find that out until later. Elfangor realized it, though Tobias has his doubts.
* Animorphs. His cover story to his crew is that he's a retired professor of technological history. Of course, he's anything but retired, though it's anyone's guess if he was actually a professor, though given his patient personality, it's likely.
* Animorphs. His students point out that the Animorphs did that all the time. He says that he's pretty sure he's supposed to be passing along his good habits, not his bad ones.
* Animorphs hosts who welcome being controlled and will feel lonely without their Yeerk partner.
* Animorphs, however. Erek turns into a fairly important minor character, as the Animorphs' spy inside the Yeerk organization and using his and his friends' holographic abilities to impersonate the Animorphs so that they can go into outer space or something without being missed.
* Animorphs, however, expresses astonishment at how quickly they manage to do things; apparently it took his species three times as long to get from heavier-than-air flight to space exploration. (Another book reveals the primitive version of his species were around millions of years ago, and also that the Ellimist gave them their boost to sentience.) The Howlers are also mentioned as being thousands of years old but more or less stagnant, which makes sense if you know their origins.
* Animorphs however, Jake has enough highly specific knowledge of a particular aircraft carrier to rattle off its construction date, what company built it, its full arsenal of weapons down to their model number, and which uniforms belong to which crews.
* Animorphs. However, they can't do either in full view of any alien or human that may be around, since they can't reveal who they are (or even that they're human), since any human is a potential Controller. So they have to deal with injuries they suffer until they're clear.
* Animorphs: in book 18 Ax is surrounded by Controllers and asks to surrender. When he's taken to a smaller room he immediately attacks the Controllers, pushing them back in order to dive out a window.
* Animorphs: In book #4, as Ax morphs into a human for the first time, the others realize he'll soon be naked and turn around, pointing him toward some clothes. When they turn back to him, he's pulled the T-shirt on like pants and the boxers are on his head.
* Animorphs in case their enemies read the books, they still give away plenty of

other information their enemies would find useful — which this is not the place to discuss in detail. The use of the second person in opening narration is primarily just a way to put the reader in the fearful background.
* Animorphs in class, as has been insinuated, he just became calm and restful and not completely alert.
* Animorphs in human form is a rare sight even when there's no in-universe reason to do it.)
* Animorphs: In one book showing a possible future where the Yeerks have taken control of Earth, there's at least one mention of humans being bred.
* Animorphs in one story while both are in bird morph on a car and then a helicopter, while Jake once landed on a roller coaster (in seagull morph) as it went in a dive.
* Animorphs in the back of his mind. It enrages the Yeerk so much that when it uncovers time travel, the first thing it does is try to go kill Henry V at Agincourt.
* Animorphs In the books (see above), one entrance to the Yeerk pool is in a McDonald's, and the code to get in is ordering a "Happy Meal with extra happy." In the TV series, it's changed to a place called Tom's Burgers and the code is ordering a "cheeseburger, hold the cheese."
* Animorphs: In the first episode, Visser 3 morphs into something huge and eats Elfangor alive. However, it's in silhouette and the shot cuts away the moment it happens.
* Animorphs. In the latter, Ax is taken out by an Andalite illness that will require brain surgery in the near future, and everyone but Cassie picks up a non-fatal version. Naturally, this happens at the exact same time as a vital mission. Cassie has to single-handedly infiltrate the Yeerk pool to rescue an anti-invasion Yeerk, escape, and then immediately perform brain surgery on Ax. Brought home by the last line of the book:
* Animorphs in the other planet's path, nuking the enemy into extinction. Suddenly without an enemy, they fell into civil war and ended up bombing themselves to a preindustrial state.
* Animorphs. In the third book the kids see the Yeerks regularly send down supply ships to retrieve water and oxygen for their ships in orbit, but it's not the main reason for their invasion.
* Animorphs 'In The Time Of Dinosaurs' Rachel discusses the 'bare midriff look.'
* Animorphs into the atmosphere, overheating it and incinerating all life on Earth. Thanks, Ax.
* Animorphs involves faking a nuclear attack by the Chinese on a United States aircraft carrier, giving him an excuse to have a submarine under his command "retaliate," which would actually involve the Chinese and kickstart World War III. The goal is to weaken the entire world enough for the Yeerks to switch from infiltration to open invasion of Earth.
* Animorphs is actually offended that they were not interested in his DNA before discovering that truth.
* Animorphs, is a Hork-Bajir Controller with the respectable rank of Sub-Visser Seven. He's promoted to a low Visser rank immediately upon (and explicitly because of) his infestation of Elfangor's commanding officer and becomes the only Andalite-Controller in history. His rise turns meteoric from there. It helps that Visser Three had full access to all of the military knowledge in his host's (a high-ranking though disgraced Andalite warrior-prince) mind. Obtaining a prize like that would definitely warrant a promotion.
* Animorphs) is dedicated to her gleeful torture (both physical and mental) of a captive Tobias.
* Animorphs is extruded out into Zero-Space when they morph something small, they begin to worry about the possibility that a ship passing through Z-Space might splatter their mass across its hull. Ax reassures them that such a thing would be impossible- their mass would be disintegrated by the ship's shields first.
* Animorphs is frequently noted as having below-average grades and not really trying in school, which becomes hilarious when the books gradually reveal him to be

by far the most cunning and clever member of the team.
* Animorphs is introduced this way. He tries and fails to get on the basketball team, but it's stated right away his build and strengths are suited more for football.
* Animorphs is largely this. While we do see a lot of wars, they never seem to be for conquest of the planet themselves (just the population) and no great imperial space empire is ever described (The Yeerk's describe themselves as an empire, but they largely abandon the invaded worlds or leave them as military outposts). This is helped by the fact that FTL travel is wildly unpredictable and the distance between two worlds is not static. A trip between two planets could take hours one time and years another time.
* Animorphs is narrated to a then-unnamed dying Animorph, indicating that at least one of them will die.
* Animorphs is never brought up again, some of the pre-finale stuff comes out of the blue. Oh, and the ending introduces a new arc. Plus, there's that group of 'friendly' Yeerks, Ax's desire to avenge his brother...
* Animorphs isn't addressed, but he's definitely dead, and Rachel indicates they eventually find the body.
* Animorphs is pretty adept at reading people and uses the ability to keep everyone together. One of her main struggles is how she starts to inverse this trope and more become more callous and, instead of nurturing, manipulative.
* Animorphs is really oblivious to the differences between what's food and what's not, whenever he's in human morph.
* Animorphs is set in 2000, so Eva doesn't understand why her son Marco would be open about being bisexual.
* Animorphs is Visser One, one of the characters becoming a Controller and the group having to keep them under guard for three days, meeting the Ellimist, meeting Erek and the Chee, Tobias (or whoever the nothlit is) getting their morphing back, and David finding the blue box (if they get that far).
* Animorphs is what drove them to put a their warrior culture on a pedestal. Before that, they were far more interested in art and science overall, and even after the war started they believe that a warrior should be intelligent and educated as well.
* Animorphs It doesn't work. From that point on, both the narrative and the Animorphs lose all sympathy for David and don't see him as anything but a villain.
* Animorphs) It ends with a grizzly bear fighting a crocodile on national TV while scaring the crap out of an infuriatingly annoying teen star.
* Animorphs. It's revealed at the end of series that this is largely due to the war with the Yeerks having lasted so long. Ordinarily, Andalite warriors were supposed to put their civilian lives first, and be warriors only when needed, but the size and severity of the war with the Yeerks meant that they were always needed.
* Animorphs it would still be visible due to the stars it obscures, and you'd think either Elfangor or Sub-Visser seven's ship's sensors would have detected the gravity well and tidal forces from it.
* Animorphs, Jake becomes infested by a Yeerk and the others decide to hold him captive for three days until the Yeerk dies of starvation. They initially tie him to a chair in an abandoned shack in the woods. The Yeerk easily gets out of the bonds using Jake's morphing powers, but each escape attempt ends with them being caught or driven back by wildlife and forced to return to the shed.
* Animorphs, Jake decides to call a meeting to discuss strategy and names every main character except Cassie. He says it's accidental, but the reaction is the same.
* Animorphs, Jake feels this about every single thing that goes wrong.
* Animorphs, Jake says that his most useful morph is the seagull, because it can fly, walk, swim, and be anywhere on Earth without looking conspicuous.
* Animorphs: Jake's rhinoceros morph and Rachel's elephant morph are used as living versions of this on a number of occasions.
* Animorphs, Jake works training a squadron of morphers for the US military. He remarks on how bizarre it is that he's instructing soldiers five to ten years older than he is, but it's justified since Jake and his friends are probably the most

experienced morphers in existence (the Andalites, who invented the tech, tended to use it very sparingly).
* Animorphs: "Join us" and "Know the secret", usually written in thought speech brackets.
* Animorphs (jokingly) stated that she loves all the fan art after being linked to a picture of an Andalite with boobs. The only exception, she said (still joking) was the ones where Tobias screws with Harry Potter. Wand on feather action isn't something she's a big fan of, apparently.
* Animorphs just as the Ellimist wants to protect it. A direct fight between the two would destroy themselves and the universe, so they created a "game" where each tries to fulfill their goal within certain agreed-upon rules. So basically, it's the Cold War with god-aliens.
* Animorphs: Know the Secret, while possibly not as offensive as the PlayStation game, was pretty subpar and had trouble being consistent with the books (such as assigning the wrong signature morphs to the wrong characters).
* Animorphs (later Three) has a pair of weird pets that move on wheels—until their upper bodies detach so that they can attack on wings.
* Animorphs level of technological development, decide that the Earth is ripe for invasion.
* Animorphs-like video game when his species is eaten by the other player's. His opponent caused an overpopulation-induced famine, motivating them to develop a space program so they could travel to the moon Ellimist's species lived on.
* Animorphs Likewise, teammate Tobias eventually becomes accustomed to being a hawk, but still tries to avoid the feelings of pity from his friends. That said, he is Emohawk, so he spends most of the time wangsting. Jake, similarly, can't stand pity, because he feels that as the leader, he should appear flawless and confident in every decision he makes and therefore tries never to let the others see him second-guessing himself.
* Animorphs long lived androids who helped build the pyramids and use advanced holographic projections to masquerade as humans, appearing to age normally and eventually faking theirs deaths and assuming new identities when they decide they're getting too old. Some of the people they refer to are Moses (Erek's "father" was his law professor), Catherine the Great (Erek used to cut her hair) and Roosevelt (Erek "was the White House butler when he suggested the phrase 'New Deal'. Of course, it was during a poker game."). One Chee is also said to have been a famous actress in a previous life-cycle.
* Animorphs. Made worse once a Yeerk has a taste of how parasitic good life can be, and the fact that their leaders are quite crazy.
* Animorphs main space-faring race in the series basically reverse-engineered all their technology from the Andalites, they'd have this technology too.
* Animorphs many species are capable of "thought-speak," a form of willing telepathy, but Leerans read minds automatically even if the subjects don't want them to. Though this is normal for them, the Animorphs found it disturbing when they morphed into Leerans and suddenly could hear each other's neuroses. Luckily, they figured out how to shut it off.
* Animorphs, Marco and Tobias acquire a tank in book 51. They steal it off a train, drive it the wrong way down a freeway, and leave it parked on top of the remains of Vice Principal Chapman's house.
* Animorphs, Marco claims to have "paid" at restaurants by signing his autograph on a napkin, which the waiters can then sell for a lot of money.
* Animorphs, Marco forgets a can opener after he and his family are forced to flee and hide in the Hork-Bajir valley. Fortunately, there are more than enough blades on the Hork-Bajir themselves to make it not a problem at all.
* Animorphs, Marco's dad confided that he and Marco's mom had a brief period of ideal, perfect love before she disappeared and was presumed dead. Of course, this period of perfect love occurred only because she was under the control of a parasitic alien.
* Animorphs, Marco's dad tries to serve him chicken for dinner after he was nearly killed by a bird while in spider morph (and only escaped by demorphing, exploding

the poor crow). Marco opts out.
* Animorphs, Marco's favorite battle morph was a gorilla. Chimpanzee and monkey morphs show up as well, although the monkey morphs were sario rip morphs and unusable after the end of the rip.
* Animorphs: Marco's mother Eva is thought to have died in a boating accident, but in actuality she was infested by the parasitic alien Visser One, who staged the accident as a cover. Marco eventually discovers this, but is forced to keep it and his double life a secret. However, his dad starts courting another lady Nora, and Marco has trouble accepting her knowing that his real mother is still alive. He ultimately lets them marry, deciding it's better that they move on, but the battle with the Yeerks continue to complicate things. After a while Nora is infested and Eva freed, but she and Marco's dad have some trouble reconnecting, since she's been changed by her years enslaved and he's long moved past her "death".
* Animorphs, Marco's mother has said this to Marco about his heroic activities in fighting the Yeerk presence on Earth. It means a lot coming from her: She forms a lot of his motivation for fighting, for she has been abducted away from Earth and seldom has an opportunity to say anything to anyone.
* Animorphs." Marco then narrates something to the effect of: somehow this brilliant comeback did not reduce Rachel to tears.
* Animorphs. Marco ultimately realizes that food has stopped being the point of the chase, and that the Rex is chasing him out of pure blood-lust and rage.
* Animorphs. Marco, who came up with the idea, offers his hand to Jake as a sign of all being forgiven (Jake had been dealing with the possibility that his brother might be finally freed), but Jake just lets it sit there.
* Animorphs may represent the flipside of this trope, as they break up after the war ends.
* Animorphs — The Crayak, a malevolent godlike alien and the Ellimist's opposite number, has a voice so low Jake feels like it's shaking him apart when they meet in person.
* Animorphs member, takes over the Leader's role. Her 'plan' to get into the enemy's stronghold involves stealing a private jet and crashing it into a building.
* Animorphs miles deep in less than an hour. In their more bitter moments, the Animorphs frequently lament the fact that, if the Pemalites would have just reprogrammed the Chee's violence prohibition, they might not be extinct and the Yeerks would done over in a week.
* Animorphs millennia later). Despite all the aliens who seem inexplicably drawn to our blue planet, all the credit (and the blame) of our history goes to us.
* Animorphs: Mostly averted, with similarities generally being more by analogy, such as Andalite vs. Earth grass despite theirs coming in shades such as red. The Yeerk planet is completely different and unpleasant. Fittingly.
* Animorphs. Much later, he gains the ability to temporarily turn into his former human form - but he still has the tendency to stare intensely at people like a hawk, and has to put significant effort into forming facial expressions.
* Animorphs named Aloth arrested for trying to sell the organs of warriors who fell in battle.
* Animorphs need to return there every three days to exit their hosts and absorb the radiation they need to survive, and said hosts are caged in the meantime. There's also enough room for several spaceships and storage areas.
* Animorphs No, it's not. That cousin is Visser Three. In morph. He's trying to kill him.
* Animorphs, nothing between books 35 and 45 contributed to the overarching plot at all, instead defaulting to filler books the entire time.
* Animorphs notice the change but asks Marco if it's an Earth disease.
* Animorphs novel "The Forgotten," the Animorphs are inadvertently trapped in the Amazon rainforest in the recent past after a mission to take the Yeerk Blade ship to the White House to expose the Yeerk invasion goes horribly wrong, and they have to fight off both the Yeerks and the jungle's inhabitants in order to return to their own time.
* Animorphs novel, the group comes across a drowning man. Rachel, in her bald eagle

morph, decides that they should try to help them, and since she knows that eagles are fishing birds, figures she's in a perfect position to do so. This leads to her learning the lesson, "Eagles may dive, but that does not make them ducks."
* Animorphs novel, where Ax is narrating. He's posing as Jake and is kicked by Cassie before he blows his cover ("Why has your father removed the hair from the top of his head?")
* Animorphs of ants, was so horrifying that they swore to never morph ants again. Their next attempt (termites), was only allowed because they promised the termite they would morph would be from the same colony that was in the mission area. They did social insects only one more time after that (bees), which were from the same hive as the one in the mission area.
* Animorphs, once, the kids morphed into bulls and went to a slaughterhouse to investigate Yeerks tampering with human food. Ax was very happy to get out of there.
* Animorphs one of the Pyramids of Giza was built over the Time Matrix.
* Animorphs on their own, being exiled to the surface is basically a death sentence.
* Animorphs. Or any other technology more remarkable than you might find in a high school. Also broccoli. In the Animorphs universe, Earth had actually been colonized millions of years ago by a pacifist race who brought with them the main staple crop of their society, yes broccoli. The reason there's no evidence of them is that the meteor that hit earth was aimed at earth by a race that hated the pacifistic one, they got a bull-eye strike right on the colony.
* Animorphs. Ordinary middle/high school kids whose lives are changed forever when they decide to take a shortcut through a construction site.
* Animorphs. Or more specifically, our bodies with our big, fat brains ripe for infestation. Every other species the Yeerks had found were some combination of ineffective (Taxxons and animals), extremely low population (Hork-Bajir), or advanced enough to counter them (Andalites). Humans are numerous enough for every Yeerk in the invasion force to have a host, while also being strong enough to use tools and technology.
* Animorphs out loud, which naturally is the last proof the rest of the gang need to know that Ax is right.
* Animorphs: Pemalite ships use huge trees as computers for their spaceships. Even Ax (whose species' ships have giant biodomes filled with forests and plains) finds it ridiculous.
* Animorphs. Prince Elfangor broke this law by giving morphing powers to the title characters.
* Animorphs race to be conquered. And even then, that's purely due to our high population, as while human beings make better hosts than the Taxxons and the Gedds, most Yeerks would sooner have a Hork-Bajir or (far better) an Andalite to ride around in.
* Animorphs: Rachel discovers that jamming a six-inch-long grizzly bear claw into the ignition and turning works just as well as the actual key.
* Animorphs: Rachel is trying to get Erek (whose hologram is malfunctioning) out of the store, but a particularly obnoxious clerk is in the way. Fortunately, Marco is there in gorilla morph, ready to knock him out!
* Animorphs: Rachel's mother Naomi, who doesn't adapt well to going from high-powered attorney to camping with aliens and subordinate to her teenage nephew. Not at first, but Naomi eventually proves herself rather useful, helping the Hork-Bajir draw up their own Constitution and persuading Captain Olston to lend his support to the team.
* Animorphs: Rachel's parents, Dan and Naomi, are uncomfortable spending time together, but they'll do it. On the other hand, she's friendly enough with Jake's parents (her ex-husband's brother and his wife) that she'll dog-sit for them when Jake's mom's grandfather passes away, while she and Jake still refer to each other as "aunt" and "nephew". And on the other hand, she and Saddler's parents don't really get along, but her family still "helps out" once he's in the local hospital.
* Animorphs, Rachel takes the secret of David's fate — whether she killed him

or returned him to the island — at book 48's end to her grave.
* Animorphs Rachel that if they were a hockey team, she'd be the goon, always looking for a fight.
* Animorphs: Rachel turns out to be allergic to crocodiles when she absorbs the DNA of one for morphing. The result is that she starts unexpectedly morphing whenever she has a strong emotion, whether angry, afraid, or even lovestruck. Her body curing her condition turns out to be even worse, as first she starts behaving like a crocodile while still in a human form, then the DNA is expelled from her in the form of a crocodile growing out of her body.
* Animorphs Redux, a complex chain of events sees the Animorphs acquire an invisible spaceship during a mission, but Ax explicitly notes that this ship would only be invisible so long as the Animorphs do nothing to draw attention to its presence, such as start shooting at other ships.
* Animorphs Redux when Tobias observes that Loren reminds him of Rachel, but Rachel asks him not to bring that up as it just makes things weird given how she feels about him.
* Animorphs Redux, when trying to retrieve the morphing cube from David, Marco, Rachel and Cassie end up facing Visser Three, two Hork-Bajir and three armed human-Controllers while they're all in wolf morph. Marco explicitly muses that there's no way they can win such a fight, but he and Cassie manage to cripple the arm and leg of a different Hork-Bajir while Rachel manages to do some damage to Visser Three before Tobias, Ax and Jake (in tiger morph) show up to even the odds.
* Animorphs regularly raided Yeerk projects to capture Hork-Bajir controllers and starve out the Yeerks inside them.
* Animorphs' resident alien, always gives time intervals in "your minutes" — no matter how many times the others tell him not to do so.
* Animorphs resident techno whiz, due to Andalite knowledge being highly advanced compared to our own.
* Animorphs routinely wipe out entire species at their master's command so the protagonists assume they must be consumed with rage and enjoy causing destruction. It turns out they think it's all a game.
* Animorphs, said whenever about to go on a dangerous and possibly lethal mission. Marco, being the comedian of the group, does what he can to prevent the gag from going stale:
* Animorphs's day when they killed a political rival in the process, and he didn't bother to stop them from leaving the mess. Rachel, folks.
* Animorphs series, after the morphing cube is stolen and Visser Three launches open war.
* Animorphs series Andalites are said to have the ability to keep time perfectly and are able to tell cardinal directions. Also, according to Ax, their stalk eyes can see into the infrared spectrum.
* Animorphs series, Ax makes a point of noting Cassie and Jake doing this in his observations of human culture.
* Animorphs series can neatly be divided up into a couple story arcs. The first arc concerns itself with the development of the children into soldiers and explanations about morphing, the Yeerk invasion, et cetera. The second arc concerns itself with the day-to-day missions, and is cut in half by what you could call Story Arc 2.5, which concerns itself with the seventh Animorph, David. The third story arc deals with the escalation of the war and the reorganization of the Yeerk Empire - the execution of Visser One, Visser Three's promotion, Operation 9366, et cetera. The final story arc begins when the Yeerks discover the kids' identities.
* Animorphs series, David sees nothing wrong with using his newly acquired powers for casual theft. Fortunately, the other heroes are a bit more moral.
* Animorphs series. There’s been a few “The Ellimist did it” replies to inconsistencies.
* Animorphs series, the Skrit Na are described as using saucer-shaped spacecraft, implied to be because they need aereodynamic ships capable of traveling through atmospheres quickly as well as through space.
* Animorphs series. The Yeerks needed to keep their invasion secret because if

humanity knew about it, they would overwhelm the invasion by sheer numbers. As Visser One once put it, "6 billion humans, all firing one bullet, missing almost 100 percent of the time, would wipe out the entire invasion." The Animorphs needed to keep their identities secret because if the Yeerks knew they were human, they could find them. Averted at the end of the series when the Big Bad of the series becomes Visser One and does take the invasion public—and almost wins.
* Animorphs series was undergoing torture, and distracted his torturer with questions about her own past.
* Animorphs: Shattered Reality. Even the animations look almost exactly like Crash's, and the Wumpa fruit has been changed to "A" coins.
* Animorphs s he used to describe throwing up and now that there was nothing gross from Animorphs work that sparked the vomit session, he could bring this topic up. He, Cassie, and Jake (who is still queasy mind you) begin to list all the various terms they heard in the past and have a good laugh at it until Marco gives us "A yawn in Technocolor" which seems to be the one that causes Jake to vomit again.
* Animorphs. She was believed dead, but technically it fits because she disappeared without a trace, then surfaced as Visser One four books in.
* Animorphs's is Elfangor-Sirinial-Shamtul. It's notable that "Esgarrouth" and "Sirinial" are their respective parents' second names, but it's unknown if that's a convention.
* Animorphs. So, they've agreed to a game of manipulation and guidance, with each bound by inviolable rules (not that both don't try to cheat).
* Animorphs. So when Tobias wants to kill him, while Cassie doesn't see how they can kill Hitler in this world just because he's Hitler, given that he didn't do any of the things he did in the regular world. But Tobias "accidentally" kills him a few minutes later.
* Animorphs's pet dog Homer, a golden retriever. Aside from being Jake's very first morph, Homer shows up infrequently in early books as a source of some comedy relief.
* Animorphs starts off with the kids trying to expose the Yeerks' silent invasion to the world, in hopes that once the world knows what's going on, they'll be able to fight back. This plan becomes less significant as the series progresses, in favor of simple guerrilla war, but ultimately succeeds near the end.
* Animorphs's "The Enemy Within" with a split into aggressive and passive personality characteristics, each with their own flaws that get counterbalanced with the other strengths and with the passive side being frightened of the aggressive violent tendencies of the other.
* Animorphs story has Cassie and Rachel infiltrate their teacher's house to retrieve a doodle Cassie accidentally turned in with her test, featuring, according to Rachel, "a heart with the words 'Cassie loves Jake' and a really dorky cupid". Thankfully they're able to grab the offending item and leave before humiliation ensues (although Rachel insists that as Cassie's best friend, she won't say anything like "Awww, isn't that sweet?" or "Cassie is in lo-o-o-ve, Cassie is in lo-o-o-ve").
* Animorphs story. In the first book, the reader became part of the group that gained the morphing power from Elfangor and joined the Animorphs on their first adventure. Upon completion of this, the story continued with an adventure involving a Sario rip (rip in time). The second book involved elements from two different Animorphs stories from around the midpoint. However, the books were structured in such a way that only a single set of possibilities allowed you to continue the story. Perhaps, for this reason, the series never really caught on, has been largely forgotten, and was discontinued after the second book.
* Animorphs: Subverted. An alien species called the Orff are introduced, which have transparent skin so that their vital organs are apparently visible. However, Jake reasons that having their weak points visible would be an evolutionary disadvantage, and that their apparent organs must be decoys. Sure enough, when he hits the transparent section of its body, it collapses.
* Animorphs. Subverted by the fact that it is the same character every time, only in a different form.

* Animorphs: Subverted in one Megamorphs story where the villain was messing around history and tried to make the D-Day landing fail as he'd caused the American Revolution to fail, all in an attempt to weaken human resistance to the Yeerks. Unfortunately, he'd already changed time quite a bit, and so the defenders weren't Nazis but an allied French and German force. Hitler himself shows up as a low-ranking chauffeur in the army, and thus has no clue why these people are suddenly very angry at him.
* Animorphs superior to humanity. Yeerks are useless without a host; Gedds are barely sentient, weak and clumsy; Hork-Bajir aren't terribly bright on average (seers being the exception) and appear to age faster (though they're no joke in physical matters); and Taxxons can't control their own hunger.
* Animorphs supervisor who has been giving a very bad report about Visser Three to his superiors, that he distracts him by groveling so the Animorphs can sneak up and defeat him.
* Animorphs, survive the virus just fine, and preserve the memory and culture of their creators as best they can.
* Animorphs take out a tank this way when time-jumped back to D-Day. Since they were birds at the time, they even managed to bypass the "kill the lookout" step.
* Animorphs territory. Elfangor reflects that humans are the only bipedal species he's ever seen or heard of that can balance without a tail.
* Animorphs that also had an opposite number feature built into the device. The idea was, that while pain was a good form of torture, a better method was to cause pain, then an overwhelming happiness, than quickly turn it back to pain to break the victim faster. Rachel considered its use on Tobias one of the worst things that was done in the war.
* Animorphs, that basically runs much faster than normal. They have to enter here to regain the Time Matrix and travel back home. Loren uses its ability to hedge the details of reality to make sure nobody at home notices, either.
* Animorphs that they could not give away their location, and about three years pass from beginning to end of the series.
* Animorphs, That was one that returned in a big way. However, nothing ever did come of the aliens who put Jake through that waking-up-in-the-future illusion. Presumably those guys are still out there and just never saw fit to return.
* Animorphs) that will cripple the alien invasion for a short time is.
* Animorphs the alien Elfangor-Sirnial-Shamtul has taken on a human form to live among humans. Because his species is centuries ahead of humanity, it was easy for him to work as a computer programmer. He founded a company that was very successful, and keeps mentioning his friends Steve and Bill. Most likely are Steve Jobs and Bill Gates.
* Animorphs: The aliens use infiltration, with only five kids armed with alien technology and one helpful alien available to fight the threat.
* Animorphs, the Andalites are like this thanks to their knowledge of z-space, the negative space that let them pop in at one point and out at another—although Z-space is notoriously unpredictable and always shifting. The Yeerks stole the tech and have equivalent capabilities.
* Animorphs, the Animorphs attempt to infiltrate a resort where they know many Yeerks and Human-Controllers are gathering. They fly in as seagulls, but one security guard is wearing sunglasses that can painfully stun any bird from a distance.
* Animorphs: The book introducing Ax has him send a telepathic distress call to anyone else who might have survived the dome ship crash. Cassie and Tobias intercepted it, probably because of Cassie's special nature that was revealed later and Tobias being Ax's nephew.
* Animorphs: The Bug Fighter is the standard Yeerk combat ship, resembling a headless cockroach with two spear-like protusions for energy weapons.
* Animorphs. The consequences for both were catastrophic: their battle caused massive loss to the lives the Ellimist wanted to protect, and Crayak lost what little progress he had made in controlling the threads of reality. This led to the Ellimist and Crayak's current arrangement of fighting through proxies, with any

final victory only taking place after eons of "playing."
* Animorphs; the dad just goes with it because he loves his son that much and just wants him to come home safely.
* Animorphs: The Escafil Device is an Andalite invention that looks like a blue cube, and whoever touches it gains the power to morph into other lifeforms.
* Animorphs, the existence of the Yeerks is largely unknown on Earth. There is one website devoted to Yeerks, but it is run by a Controller. Justified in that Yeerks tend to go for important people, and many people in the media are probably Controllers.
* Animorphs. The final book ends with Jake giving the command to ram The One's ship, and whether they survive or not is left to the reader.
* Animorphs. The final book even notes that, upon meeting Andalite civilians for the first time, they are much kinder and humbler than the stereotypical racist, sexist, ableist "arrogant Andalite" they'd previously encountered.
* Animorphs the first couple of times they try particularly exotic morphs, but after a while they get used to it. Shining examples include:
* Animorphs the first thing he does with it is kill the inspiration for that play, just to silence him.
* Animorphs: The Helmacrons are a microscopic species with egos the size of planets. Their one invasion force is a single ship the size of a plastic toy, and they still think they can win. To quote Marco, who snaps after constant exposure to their bravado:
* Animorphs the hero and team leader Jake is a minor example of this. He's just a kid, but he's a kid built with a football player's stocky physique and is both the tallest and strongest member of his team. In a later book set in the future, Jake's adult body is described as having a 'Schwarzenegger-esque' build.
* Animorphs, the heroes have to cover for a broken-down Chee android named Erek (Chee are normally disguised with a hologram, but due to Yeerk tampering with the Pemalite ship that was the source of their technology, their holograms were failing) by pretending he's some kind of personal multifunction tool. Cassie gives a (nervous) sales pitch in front of a store audience.
* Animorphs. The Hork-Bajir actually called them monsters, although they were created by the Arn in reality.
* Animorphs ''The Hork-Bajir Chronicles" gives Earth dates (the late 60s), Andalite dates (a year in the 8000s with decimals attached), Hork-Bajir dates (simply a reference to the current season) and Yeerk dates (a reference to generational cycles).
* Animorphs, their version of Roswell (many things were renamed ostensibly to obscure the character's location from Yeerks) explained the object that they found was... an Andalite toilet.
* Animorphs, the Ketrans had a god game called Alien Civilizations. The Capasins wiped the Ketrans out because they caught their transmissions and thought it was real.
* Animorphs, the Ketrans play a game that revolves around slightly modifying the conditions of their chosen virtual creatures' planet in order to influence their evolution towards a specific direction. Different players' creatures can even come into contact with one another through space travel.
* Animorphs, the kids end up pretending to be Controllers a couple of times.
* Animorphs, the kids got the general hang of morphing easily, but had to watch every new morph because they risked losing control of it. And in some cases, like termites, they never morphed them again.
* Animorphs the main character finds himself in a dream world created by a semi-sentient sponge called "Father." It turns out that out of his entire race, he is now the only surviving member, and all the people he meets in the dream are the resurrected memories of the dead that Father had captured from his ship. When he has children in his Lotus Eater world, they only appear to him when he thinks of them. Unlike most Lotus Eater Machines, the Ellimist knows he's in a dream world, but he still has to figure a way out of it.
* Animorphs. The Mercora plan to use a nuke the Animorphs acquired to detonate the

comet before it lands, but Tobias has Ax make the nuke into a dud. He later justifies his actions by saying that the Mercora cannot be allowed to survive, as the presence of a flourishing sentient species would prevent humanity from evolving. The fact that they only had a single settlement directly under the impact site explains why no Mercora (who look vaguely crab-like) fossils have ever been found (though they're apparently responsible for broccoli's existence on Earth: it was a staple Mercora crop that survived the impact).
* Animorphs The Mercora's only legacy would be that they introduced broccoli to Earth.
* Animorphs, the morphers will normally tear their clothes if they morph into bigger animals, and the clothes will fall off if they morph into smaller ones. To prevent this, they wear skin tight clothes when morphing, such as bicycle shorts, tight undershirts, and for the girls of course, leotards.
* Animorphs. The other Animorphs also point out that if Jake was really the one "in the driver's seat", he would have gone along with their plan to starve the Yeerk just to make absolutely sure and settle everyone’s minds. But since the Yeerk was fighting them every step of the way, the other Animorphs tied him up, knowing with 100% surety that he was a Controller.
* Animorphs, the parasitic, mind-controlling Yeerks have no concept of romance -or even gender- in their natural form, since they reproduce by merging with two other Yeerks and then dissolving into hundreds of young, effectively killing the parents. There are at least two examples in the series of Yeerks who had human hosts betraying their superiors after being caught off-guard by their own emotions and falling in love with each other.
* Animorphs, the Pemalites and Iskoort are both examples of this trope, with their playful societies and fanciful architecture. The Andalites, too, have given up the habit of living in cities in favor of a natural lifestyle on the open plains, without losing any of their great technological skill.
* Animorphs the reader may sit back and think, "Hey, wait a second. Yeerks are a race with insanely superior weapons. Not only that, but anyone can be a Controller. And this is a worldwide invasion. The heroes are six teenagers who live in a small town in California that can turn into animals? How can they stop the invasion? A bunch of animals couldn't beat the U.S. Army, never mind the Yeerks." This is lampshaded many, many times throughout the series, as the kids admit that at best all they do is slow down the Yeerks from time to time. They mostly lose battles and they agree that they'll never really be able to beat the Yeerks. They do eventually win, due in large part to the morphing technology being so dangerous and versatile. Rachel sums it up pretty well during David's betrayal when the kids are reflecting on how hard it is to kill an Animorph:
* Animorphs: The Reckoning. The Yeerks speak the languages of their hosts, and the Andalites can communicate ideas telepathically. Ax and Elfangor are also capable of understanding and communicating in English, thanks to a translator implant.
* Animorphs. There is also the Auxiliary Animorphs. Toby's Hork-Bajir army get killed a lot, too, near the end of the series.
* Animorphs there is an in-universe example: at the end of the series, Marco sees the years he spent fighting Yeerks as the "good old days". He remembers life-and-death battles as "cool, rock 'em sock 'em battles". He doesn't really seem to remember how much they scared the crap out of him at the time. But then, it's said that Marco has a much easier time adjusting to civilian life than the others, because he doesn't feel guilty about the things he's done.
* Animorphs The Return, thanks to Crayak. She morphs into a bigger, more muscular version of herself with long claws.
* Animorphs: The Veleek, a nearly unstoppable swarm of insects all working as one that can shred any solid matter by touch, is killed when the kids trick manipulate it into going out over the ocean, and then Cassie drops onto it as a humpback whale. The whale's weight is far too great for the Veleek to carry, and it gets forced into the ocean. The water either drowns the bugs or separates them and keeps them from working together anymore.
* Animorphs: The Venber melt in above-zero temperatures. They nearly went extinct

when it turned out the resulting liquid had many useful properties.
* Animorphs. They are a race of parasitic slugs who infest a host body by entering through the ear and wrapping themselves around its brain. It can then read the hosts mind and control the host's every action, imitating its behavior. The mind is left a prisoner, able to think freely but unable to control any aspect of their physical selves. They are returned to themselves briefly every three days, when the Yeerk needs to feed.
* Animorphs, they are forced to continue their war through mundane proxies such as the Animorphs and the Yeerks, respectively.
* Animorphs. They believe that the most important thing for a leader is that they make no mistakes, so as a result every Helmacron in a position of authority is ritually executed as soon as they're elevated to their position.
* Animorphs. They could split in two so that the front half could become the fighter ship, while the back contained crew living quarters in a dome.
* Animorphs, they decided to conquer as many species as possible just to prove that they could.
* Animorphs: The Yeerks' Bug Fighters bring to mind a cockroach the size of a school bus, but can operate in both space and atmosphere (and even underwater). Visser Three's Blade Ship is even bigger but still manages atmospheric flight.
* Animorphs, the Yeerks can take control of any human. As a result, they choose highly respected members of the community, such as Jake's universally loved brother and the school principal. Their front organization for recruiting new voluntary hosts, the Sharing, pretends to be a Boy Scout/Girl Scout kind of thing that anyone can join. All-American nuclear families, outcasts, rejects...
* Animorphs. The Yeerks have Sub-Visser and Visser, both followed by number designations (Visser Three, Visser One, Sub-Visser 56) and the Andalites have Aristh (cadet),Prince, Prince Commander, War Prince and probably others.
* Animorphs, the Yeerks were invading Earth anyways to obtain hosts, but it ends up the strategic battlefield for the Yeerk/Andalite war.
* Animorphs, they find themselves able to toss around pebbles as big as themselves, while Tobias (to them, now a hawk the size of a human) notes that he can flap faster and climb proportionally higher, and might even be able to carry one of them. Evidently the shrink ray also reduces mass along with size.
* Animorphs. They look mechanical without their holograms, but act human. Turn on the hologram, though, and no one can tell the difference, meaning they usually both look and act human.
* Animorphs, they probably didn't want to attach that to any real person. There's also a Yeerk pool entrance in a McDonald's, though see below under "Live-Action Series."
* Animorphs. They then stole the Andalites' ships, loaded a quarter of a million Yeerks onto them, and fled into space. For the first few years, all their technology was stolen from other species, though they did eventually apply their new tech and acquired knowledge to develop uniquely Yeerk ships and weapons.
* Animorphs. This actually works to the heroes' advantage; as no-one wants to tell the Visser something that might set him off, his underlings frequently omit useful info out of self-preservation.
* Animorphs. This is generally considered to be the start of the series' endgame.
* Animorphs this is how Jake became leader of the team. Tobias decided he was, and everyone else agreed.
* Animorphs, this is lampshaded when Rachel comments that a force field they're swimming through generates a sensation 'like chewing on aluminum foil with a mouth full of fillings' and Marco asks her how she'd know what that feels like...
* Animorphs. Though, as Jake notes, his rank isn't very intimidating to any of the Animorphs; "After you've stared down the likes of Ellimist and Crayak, you don't quiver just because some guy has stars on his shoulder."
* Animorphs, though justified since they speak a mixture of their own language, Gilard, and English.
* Animorphs. Though they're actually hybrids of Venber and humans brought back by the Yeerks.

* Animorphs, though, they're wise beyond their years. If they weren't, they'd be dead by then.
* Animorphs, though this makes sense, as the inner circle have the most experience fighting the Yeerks.
* Animorphs (though when one ship was destroyed, the other sang its praises) and #42 had the males and females.
* Animorphs through David's yard, and they are able to make their escape because the mooks fall into the pool.
* Animorphs to all, including his enemies. In fact, in the whole series (when in an Andalite body), he speaks to one person at a time a grand total of ONCE.
* Animorphs, to a point. Mainly, he does want to save his mother, but he also talks repeatedly about being famous by the end of the war.
* Animorphs to ask if a tornado had feet. When they try to explain to him what a tornado is, Ax points out that whatever knocked the trees over had feet and that Jake was in one of its footprints.
* Animorphs Tobias, just an innocent red-tailed hawk that happened by. David had simply lost Tobias early in the evening, and the latter had spend a good couple hours trying to find him.
* Animorphs, Tobias morphs a mother rabbit and defends her young from other hawks...after he killed and ate her. We never hear about the rabbits after that book, and it's unclear what exactly his reasoning was for doing that.
* Animorphs: Tobias's guardians are an aunt and uncle, who live on opposite sides of the country and pass him off between them at different times of the year. Both are implied to resent having to take care of him, and neither made the slightest effort to look for him when, as far as they knew, he just disappeared (his friends did send each a forged note saying he was staying with the other, which was apparently enough for them). Tobias even casually states in the first book his belief that he has no one who would care if he died fighting the Yeerks.
* Animorphs: Tobias's mother Loren is a feisty, fearless, often reckless, and smart-mouthed blonde who falls for a guy outside her species. All of these traits hold equally true for his love interest, Rachel.
* Animorphs, Tobias uses the Hork-Bajir swear word "hrthesthr", which literally translates to "one who is so careless in cutting the bark from a tree as to damage the wood underneath, causing the entire tree to become diseased and rot". Tom mainly heard it used to refer to Yeerks.
* Animorphs to make the titular group relatable to as wide a demographic as possible. In-universe, this was justified as part of the characters' many attempts to protect their own identities. In the last book, it was revealed that they were 13 at the time they first met Elfangor and 16 by the time the Yeerks surrendered.
* Animorphs, Tom learns about the fugue state, which is when a Yeerk dies of Kandrona starvation and its memories are dumped into the host's brain. He asks Jake why he never told him that he saw some of his memories when Temrash 114 died, which leads to Tom ranting about how Jake didn't do more to save him during the war.
* Animorphs too, although the main characters don't directly participate in it. (Jake even describes it as the "final battle.")
* Animorphs to opt out. Jake makes it clear that this isn't an option.
* Animorphs to Terrans, humans have emerged as the dominant species. This would make for great shock troops and since humans reproduce in great numbers, the Yeerks couldn't resist.
* Animorphs, to the point where he once crawled around the floor of a movie theater, looking for "brown globules" (Raisinets). And his favorite television programs are "These Messages".
* Animorphs trope. It spawned games, toys, a few videogames and a TV series, albeit a bomb one. Sadly, the re-release didn't make it popular again. 2020 brought the start of a second revival attempt, with the first of graphic novel adaptations of the books being released,and the announcement of a movie in development.
* Animorphs tropes- making them the perfect shock troops for the Yeerks after being conquered and enslaved.
* Animorphs TV series version, Tobias as a red-tailed hawk was played by a Harris'

Hawk.
* Animorphs two copies of one person at a time, and the annihilation occurs in place of a stable time loop resulting in only one copy, meaning that the person would go from two to none, instead of one.
* Animorphs, unfortunately it also permanently removes their need to leave their hosts to feed, and drives them insane, although it does also weaken their ability to control the host's body.
* Animorphs. Until everything gets blown wide open in the end of the series.
* Animorphs using them as pawns in their game made the whale beach itself so the kids could go out to sea and find the ship.
* Animorphs-verse are demonstrably sharp enough to cut metal and lop off limbs.
* Animorphs version: Ax is close to being trapped in human form, counts down the last few seconds to a nearby teammate, but is finally able to get away and has none of the difficulty changing back that the book versions had when cutting it close. This would suggest that changing back after 1 hour, 59 minutes, and 59 seconds is no different from changing back after five minutes, but changing back at 2:00:00 is completely impossible.
* Animorphs, very much so. You have your main races: the Andalites, Yeerks, Hork-Bajir, Taxxons, Skrit-Na, Helmacrons, Gedds; and your less mentioned but described ones like Arn, Anati, Kelbrid, Nesk, Mercora, Venber, Iskoort, Garatron, Orff, Leerans, Howlers, Ketran (the Ellimist is one), robot Chee, and extinct Pemalites, plus sapient whales and dolphins.
* Animorphs", Visser One needs to disappear so she can continue her duties elsewhere in the galaxy. So she stages her own death by leaving on a fishing boat during a storm and never returning. The boat is found, damaged, with a frayed safety rope, and the Coast Guard assumes her body is in the ocean somewhere.
* Animorphs Visser One notes that unlike Yeerks, humans will continue fighting even when it's completely illogical. This is her main argument for continuing her secret invasion of the planet as opposed to Visser Three's plan for all-out war. (Although she has other reasons.) She turns out to be totally right, the eventual full assault is a disaster.
* Animorphs, Visser Three has two of his Hork-Bajir controllers attack during his trial of Visser One, along with an ordinary starved bear and tiger, so that he can end the "Andalite Bandits" while in front of his bosses and look good. Visser One doesn't buy it and calls Marco (who she knows, at this point, to be one of the "Andalite Bandits") to attack for real, discrediting his attempt.
* Animorphs: Visser Three's preferred method of execution, though he's a fan of torture as well.
* Animorphs: Visser Three, the main antagonist for most of the series, is near-undefeatable in combat because of the bewildering array of horrible monsters he can turn into thanks to his Andalite host body, but is easily outwitted and tends to slaughter his own subordinates when they speak against him, or if things start going badly, or if he's annoyed, or... By contrast, Visser One has a regular human body, but was a far more dangerous enemy (figuring out that the Animorphs were humans and not Andalite bandits as Visser Three believes).
* Animorphs. Visser Three then usurps her position and kills everyone loyal to her, replacing them with his own subordinates.
* Animorphs, Visser Three tried to start a war between America and China to weaken the Earth so that the Yeerks could win in all-out war.
* Animorphs wander into a whole collection of ships with skeleton crews when they find the Nartec city and its macabre museum.
* Animorphs wanted no part in the war with the Yeerks, and went as far altering their own physiology so they couldn't be forced into it by the Yeerks, who can possess other species. They thought this would make the Yeerks leave them alone, but instead the Yeerks just used them for slave labor, and target practice.
* Animorphs was adapted into a series of graphic novels starting in 2020.
* Animorphs. What everyone finds is a British force invading a France-Germany alliance, no one can figure out which side has the good guys, and Hitler is just a driver of a jeep. Tobias wants to kill him anyway, but Cassie insists that they

can't kill him just because he's Hitler since he hasn't actually done anything in this reality. But Tobias "accidentally" kills him a few minutes later anyway. While it may be true that the actual Nazis didn't win, they also still start off in an alternate-timeline-present that has America (including the Animorphs) in a very Nazi-like state, where everyone's racist and whatnot.
* Animorphs: When David (in lion morph) leaves Jake (in tiger morph) half-dead, the Gardens' vet team gets called in, with the vet noting that if she didn't know better, the tiger's wounds were caused by another big cat. There is some confusion later when Jake demorphs out of sight, leaving the vets confused as to why the tiger is not only back in its cage but completely unharmed.
* Animorphs When he comes back to lucidity, he mentions dreaming about being chased around the conservatory by Professor Plum.
* Animorphs when he inwardly notes that he has to stop himself from calling Jake 'sir'. It gets even more pronounced towards the end, when they encounter alien militaries and are explicitly treated as soldiers.
* Animorphs: When infiltrating Joe Bob Fenestre's mansion in #16, Rachel flies through an open window and is immediately knocked out by an invisible force field/electric barrier. In hindsight, an open window was an obvious trap.
* Animorphs, when Marco has to morph a wolf spider. He really, really doesn't want to.
* Animorphs when morphing birds and so on) are bona fide performance artists.
* Animorphs: When Mr. Responsible Jake has to leave for a week, his cousin Rachel, who is, to put it diplomatically, something of a violence junkie, is made temporary leader. The end result is Cassie getting captured and dangerously close to the 2-hour limit, rescued by crashing a jet into the roof of a (hollow) building then following the flaming wreck as birds, and whipping an unbelievably fast alien with a cobra.
* Animorphs. When one of them dies, their consciousness is transferred to another, living, Helmacron. This doesn't really make them more effective, however, because as a race they are batshit insane.
* Animorphs. When the heroes take control of the Yeerk Pool Ship and Visser One, the Yeerk general, it provides the Andalite army with comprehensive intelligence on Yeerk military, that allows them to turn tides in the war and defeat the Yeerk Empire.
* Animorphs when the kids use bird morphs. Tobias even joked about it once, saying anyone who makes him mad better buy a hat.
* Animorphs when the others are in insect morph. Other times they just morph birds themselves.
* Animorphs. When Tobias is tortured by Taylor, Rachel is ready to literally rip her to pieces in grizzly morph, and it's only Tobias's pleading that stops her.
* Animorphs when Visser Four goes back in time to change history and make Earth easier to conquer. However, he screws himself when he gets to D-Day and realizes that Hitler is a nobody and there aren't Allies or Axis the way we usually think of them. When our heroes get the Time Matrix back, they struggle with changing things back so there was a Holocaust and think that maybe they should check out the current future and see if things are better. Eventually they come to the realization that some things are Necessary Fails and they shouldn't mess around with the past.
* Animorphs, when Visser Three is chasing the heroes, Cassie calls out to the whale she'd been communicating with earlier and two humpbacks and several sperm whales respond to fight him. Her narrations says that it seems like the sea itself is fighting back.
* Animorphs, where characters communicating mentally will pause frequently if they are out of breath, as if panting between words. Presumably this is simply because we're used to pausing if attempting to speak when out of breath, and the characters never trained themselves out of the habit for thought-speak.
* Animorphs, where Tobias serves as the trope, carrying the other Animorphs in bug morph and then dropping them off someplace for a mission.
* AnimorphsWhere various aliens (usually Andalites) note just how vicious a place

Earth is and how addicted to fighting each other humans are, and wonder if the Yeerks knew what they were getting into. This is explicitly why they are using a shadow invasion in the first place, which proves totally justified once things get more open. This also edges into the Humans Are Soldiers variant. Neither side in the Yeerk-Andalite war seems to have a concept of "total war", and so the protagonists doing anything it takes to win (including targeting enemy population centers and helpless Yeerks with no hosts) completely blindsides them.
* Animorphs where Visser One quips that a Taxxon could be killed by a human armed only with a can opener.
* Animorphs, which seems to give her some degree of reality-warping powers when she isn't in her "right" universe. Even with that, most of them die in the process.
* Animorphs: While giving first aid to a Yeerk-controlled little girl named Karen, Cassie warns her that she's going to pull on three, but goes on two, explaining that Karen would have tensed up on three.
* Animorphs, while protesting for ex-hosts to be given the same rights as other prisoners of war, Tom is approached by CNSB reporters who ask him what he feels about voluntaries. He says that they aren't all worth prosecuting and certainly don't deserve to be murdered, and society should focus on rebuilding instead of witch-hunting. A few hours later, the news shows a cut-down version of that interview with the claim that Tom was a voluntary Controller all along, because why else would he be concerned about voluntaries being punished?
* Animorphs while racing against the extreme temperatures of space, invoking this trope.
* Animorphs. While recounting her past during a trial, Edriss notes that she had potentially discovered an ideal host species for the Yeerks, but was reassigned to a dead end position. She implies to her inquisitors that her rival Visser Three was responsible, but then notes to herself that it was more likely incompetence than conspiracy that led to her discovery being ignored.
* Animorphs while saying <Courage, my friends.> He still says that line in the graphic novel, but it's not explained why.
* Animorphs, while the (human) Animorphs refer to the main Yeerk ship as the Mothership, the Yeerks and Andalites refer to it as the Pool Ship. It acts as a command, heavy transport, and supply ship in contrast to the Blade Ship (a ship of war).
* Animorphs who doesn't quite understand human humor, but his weird mannerisms among other things make him into a very funny character.
* Animorphs, who executes subordinates for even the tiniest annoyances.
* Animorphs, who has plenty of experience flying, notes that those wings couldn't possibly allow it.
* Animorphs who inhabit a city beneath the ocean. They are descended from humans who lived in a city that sank beneath the waves, and over time adapted to their new home — a process sped along by the fact that the glowing rocks they use to light up their city are highly radioactive. Unfortunately, the same radioactivity has cursed them with a host of genetic illnesses and resulting short lifespans, resulting in most Nartec being horribly frail or dying young, and the Nartec as a whole being headed for extinction — something they try to prevent by harvesting fresh DNA from baseline humans, with whom they're still compatible.
* Animorphs, who is, unfortunately, now getting involved with The Sharing, a youth group/secret cult that serves as the villains' front.
* Animorphs, who restore the Animorphs' memories and send them through time to fix things.
* Animorphs who takes the blame, even though Rachel was just doing Cassie's dirty work.
* Animorphs with his manner of maiming or even executing minions who would interrupt him in the middle of an important matter with some hogwash. Naturally, it dishes him:
* Animorphs with Tom is when Jake morphs into a dog and smells something unsettling.
* Animorphs. Woo, however, didn't. Marco was in the pool about to test his shark

morph, and he'd just grown shark teeth. Jake showed up just in time to very likely save Woo from getting his throat ripped out.
* Animorphs, yeerks are "slugs", Andalites are "grass-eaters", Taxxons are "bugs" or more commonly "worms", Hork-Bajir are "geniuses" and "bark-chewers", and humans are "monkeys." The standard Yeerk-on-Andalite insult seems to be "Andalite filth!," while the inverse is "Yeerk scum!"
* Animorphs, Yeerks take over human beings by way of infestation through the ear canal.
* Animorphs you can see the taxxons. They are an alien species of giant millipedes that have uncontrollable hunger and eat everything they can get. It is never shown in the books, but if a taxxon gets the opportunity, he would eat a human too.
* Animosity takes place in a world where the animals of the world all suddenly become sapient and able to talk one day. The main characters are a bloodhound named Sandor and his human Jesse, who are caught in a conflict between the crumbling U.S. government and the "Animilitary" rebelling against the human race.
* Animotion from the one on their first hit, except for the guitarist (and he wasn't even a founding member to begin with).
* An Imperial-controlled Chopper attempts to kill the crew by opening the forward hatch of the
* An Imperial warship picks up a distress call from an Imperial vessel under heavy attack, and goes to respond. When it arrives, it finds no Imperial ship, but the warship itself comes under heavy attack... and sends out a distress call. Thanks to the ability of the Warp to mess with time, the ship went to its destruction answering
* An important design feature was that the point was smaller then the shaft. Thus you can stab a horse and easily recover your weapon. Boar spears have sort of a sidebar design under the blade for the same reason. The tactic for boar hunting consists of letting a big furious animal with mean tusks charge at you full speed, catch him on your spear, pull it out and quickly kill or immobilize it before it rips your bowels apart. If your only weapon is the one you're using to stop charging horses with, you need a decent chance of being able to use it against the angry knight in full armor that's sitting on said horse. A simple pointy stick or point on a stick will likely get stuck deep in the horse.
* An important figure in the story of the Japanese hero Minamoto no Yoshitsune's life was the warrior-monk Benkei. His goal was to defeat a thousand warriors, but after 999 victories, his thousanth opponent was Yoshitsune, who bested him. Benkei
* An important note about this concept that is often forgotten: there is no logically meaningful difference from our inside perspective whether the universe is a simulation or the stack-top. For some reason a lot of people seem to find the idea that the universe could suddenly be revealed as "not real" disturbing, when it really makes no difference at all (
* An important note though, the ancient Aes Sedai symbol lacks the opposite color dots within each half representing harmony of the two parts, another allegory for the conflict between the two sides within the story.
* An important reality that further debunks this line of thinking is the fact that everyone isn't on an even playing field. For example, a nineteenth-century capitalist who may have believed in this idea isn't more successful because he is naturally smarter or stronger then the workers he exploits, he is most likely (there are of course some historical exceptions) wealthier and more powerful then they are because he was born to a wealthy and powerful family, a circumstance that afforded him education and opportunities that were unavailable to your average person, giving him a massive advantage that he didn't earn and that has nothing to do with his genes. In fact, some socialists used Darwinism to argue against capitalism on exactly that basis-it rewarded people not from fitness, but being lucky enough to be born in the upper class. The people there were also frequently occupied with things that could
* An important rule of time travel using Pym Particles as fuel should always save one particle for the trip back home, which Tony and Steve break by using their last particle to jump to another time where they'll be able to get more.

* An Impossible Enchantment: The princess, Graziella, is called Galantine in the original version, her mother Mutinosa was called Mutine, and her husband Blondel was called Blondin.
* An impressive chain between the five warriors and Manta forms at the end of
* An impressively ineffective boycott strategy: buying an item in bulk in order to destroy it (especially after the
* an impressive one while getting ready to attend the Wonderbolt Derby with high-society pony Fancypants.
* An imprisoned owlbear is incapacitated after going on a rampage against its cruel captors. Upon hearing that the creature will be kept alive and tortured, a fellow prisoner
* "Animus" has an example of lone wolf sexist terrorism when a spree killer goes on a rampage against women whom men posted revenge fantasies online about in an extreme MRA group, which is pretty clearly based on Elliot Rodger or similar people. After the team stops him, a similar act's committed in Kansas City, having been inspired by the first, to their dismay.
* Animusic but have even less plot, being just a bunch computer animated music videos of animated instruments, machines, and robots playing songs.
* Animusic originally created its "Pipe Dream" video as a CGI visualization, but Intel has made a functional version of the devices in the video, down to having notes play when launched balls strike the appropriate keys.
* Animusic's "Future Retro" has futuristic instruments, but retro tunes.
* Animusic. What's more interesting that the piano is real, rather than animated.
* animus to create a simulacrum of his lost love, who died centuries ago. If he were a normal dragon, he would have had to accept his grief and move on, but having magic gave him the false hope that he could "fix" things, even though all of his attempts have failed miserably.
* Animus, which recovers crystal-clear genetic memories of ancestors to the point where Desmond-as-Altaïr can act in ways that Altaïr never did as well.
* Animutation Dave Thomas and then using "Worthington's Law: more money = better than)" to eliminate the less successful of the two.
* Animutation genre of animation depicts random images moving around the screen, characters' heads on wrong bodies, fake misheard lyrics, subliminal messages, "singers" whose jaws fall off their face while they sing, all with no apparent plot.
* Animutations featuring cutouts of random characters and things usually lifted from Google Image Search.
* An inaccessible island in the very first level fueled a lot of rumors, which range from it being the result of leftover testing artifacts to housing secret items of unimaginable power. It was later revealed that it was meant to be an integral part of the first mission; it was abandoned to make room for local multiplayer and for being uninteresting. What had been developed at that point was simply left in.
* An inadvertent example from a stage play. The scene involved two men, one of whom was supposed to draw his gun and murder the other, but he realized after he was on stage that he had forgotten to bring his prop gun. Desperate for improvisation, he kicks the other person. The murder victim is willing to go with it. He falls off his chair, writhes in the floor and gasps out a last line... "His boot was poisoned!"
* An inadvertent variant happened in the US version where Michael thought that Diwali was like Halloween and told his girlfriend there was a costume party. Both went in costume but she went as a cheerleader, while he had a second head he could remove when he realized his mistake.
* an inanimate carbon rod, a much later glimpse at the nuclear plant employee chart gives us just enough time to see that Homer is right at the bottom... and the rod is his immediate superior.
* An in-character interview released in a Japanese magazine not soon after the release of
* An incidental conversation in the second game features an Alliance Gunnery Chief

* an incident at the San Francisco Museum of Modern Art in 2016. Two teenagers decided to pull a prank on the museum-goers by placing a pair of glasses on the floor, to see if people would mistake it for an actual art piece. Sure enough, the patrons were fooled, crowding around the "art" and even taking pictures of it.
* An incident in the backstory of Miles Edgeworth is particularly bad about this.
* an incident in Virginia where a doctor (secretly) used his own sperm for all his artificial inseminations, meaning that a community now has many couples who might well be half-siblings.
* An incompetent group of terrorists ended up doing this in 2007 with separate attacks, each of which ended in an
* An Inconvenient Truth, a slowly-melting glacier park is referred to as "The Park Formerly Known as Glacier".
* An Inconvenient Truth: The CO2 chart goes off the screen and requires an adjacent screen to be turned on to display it.
* "An Incon-Wheelie-ent Truth" was dedicated to character designer Dave Creek who had died from injuries stemming from a skydiving accident in January 2021.
* An increasingly common criticism towards mainstreaming of nerds and geeks is the tendency for a lot of self styled nerds/geeks to base their qualifications on passionate interest in topics that are solely entertainment oriented as opposed to topics that require above average intelligence, technical skills, and serious study well above and beyond the layman's level. Being a fan of
* An increasingly common variation nowadays is basically a whiffed dope slap. Make all the motions and aim for the general vicinity of the back of the head without actually striking the person. This avoids actually physically contacting people's heads and the imagery ensures the message is clear. Sometimes, the quip ("what are you stupid?!" or, "you dumbass!") is also left out as receiving the action is indicator enough that the recipient is doing something inane.
* An increasingly popular fanon idea in later years particularly following the
* An incubus shows up in one episode of the now-canceled live-action adaptation of
* An incumbent Republican senator would also go on to becomes a national star.
* An independent game company called Dahku announced a project called "Prism Queen"
* An Indian carmaker's name, Tata, means "Dad" in Polish, and "Goodbye" in some South-East Asian pidgin slangs. In American English, "ta-tas" is childish
* An Indian family bemoans their son saying he wants to be a doctor instead of a pop star, made even worse when they're coincidentally accurate about him being
* An Indian funny fairytale tells the story about the dogs trying to get a president. Unsurprisingly, it goes like in a kennel, every candidate was rejected, until a little cur suggested to vote for the dog who smelled good from behind. This clearly was meant sarcastically, but was critically acclaimed, and
* "An Indirect Kiss" starts of with Connie and a downcast Steven having a picnic, and Connie persuades him to tell her about the events of the episode, explaining why he's so upset.
* An individual Skut is actually a single personality and intellect spread over multiple bodies.
* An Indonesian folk lore of Banyuwangi (literally means Sweet-smelling Water) River. Ida Ayu Surati was a princess escaped from destroyed kingdom, but was saved by and then married the prince who raided her kingdom, Raden Banterang. One day, Ida Ayu Surati met a beggar, who then she recognized as her brother Agung Bagus Mantra. Agung asked his sister to kill her husband for destroying their kingdom, but Ida who grew to love him, refused. Agung then spread a lie about Ida's infidelity, and Banterang who heard it became angry. When confronted by her husband, Ida prophesied that her innocence would be proved by the river's water condition. Already in his wit's end, Banterang stabbed Ida and threw her corpse into the dirty river, which then turned fragrant and clean. One of the examples where the innocent wife
* An industrial spy is telling the CEO of a car manufacturing company about all the features in the latest car a rival company has built.
* An industry running gag is translating thriller (erotic or otherwise) titles as

a "Deadly X" or "Fatal X" with the X being vaguely related to the movie subject / original title (for example,
* a nineties Russian TV guide journal comercial, which began with placing the journal in distilled water and the "ordinary newspaper" in sulfuric acid.
* An inexperienced team of younger members has adventures and gets forgotten about.
* An infamous 90s Reebok advert went a bit further than this and showed a disembodied giant hairy belly chasing an athletic man through a city, mostly by gelatinous hopping, and culminating in a motorbike chase, while repeatedly shouting "Belly's gonna get ya!"
* An infamous and brutal example in Genesis 34. Shechem, prince of Shechem, rapes Jacob's daughter Dinah, and then has the audacity to ask for her hand in marriage. Dinah's brothers say sure, but first you and the entire male population of Shechem have to be circumcised in accordance with our tradition (keep in mind that at this time, the "kingdom" of Shechem was probably a small city-state with a few hundred people). Shechem and the males agree, and are circumcised. With the newly circumcised men too sore to do anything, two of Jacob's sons, Levi and Simeon (and probably a number of servants and retainers of Jacob's family, making it the size of a small tribe), enter Shechem and kill all the men, enslave the women and children, and loot the town.
* An infamous animated promo for a 1983 special report entitled “Green Street Reds” for the KGO (San Francisco
* An (infamous) Australian advert for Clayton's from the '70s began with actor
* An infamous biblical example is the Book of Job, in which God is challenged by Satan to prove that Job, a good man, would still have faith in God if he was not blessed with a good life. While it is often cited to prove the importance of retaining faith in God even through dire circumstances, it is easily interpreted to mean "don't trust God because he'll sell you out to Satan to prove a point".
* An infamous discussion of the concept: During the infamously inflammatory court hearing of Denver Fenton Allen, a convict who demanded a different public defender than the one he got (supposedly because that defense attorney was demanding sexual favors from him), Judge J. Bryant Durham explicitly told Allen that his only other choice would be to represent himself, which he then explains is a terrible idea.
* An infamous example from the nineteen-eighties is Xuxa, hosted by an oversexed (and not very smart) former model that inspired the wrath of
* An infamous example is Encyclopedia Dramatica, which was originally started as a place to chronicle
* An infamous example is the basketball final at the 1972 Olympics. When the time expired, the USA had an 50–49 lead against the Soviets. However, the referees added three seconds back to the clock on the direct order of the head of FIBA, who had no authority to do so (the FIBA head claimed the Soviets had attempted to call time out prior to the last free throw). After the Soviet shot failed, the referees added three MORE seconds back to the clock due to an error in restarting the clock. In this three seconds—on their third chance to win the game—a Soviet player scored, winning the team the gold medal. The Americans refused to accept the silver and filed a protest, but it was denied. It was the first loss
* An infamous example of a benchwarmer was Winston Bogarde, who signed for Chelsea in 2000 and made just eleven appearances in four seasons after falling out with manager Claudio Ranieri. Bogarde was earning £40,000 a week at Chelsea (which was a
* An infamous example of The Woman Sticking It To The Man is Virginia Slims' "You've Come a Long Way, Baby" campaign from
* An infamous plane crash in 1975 killed its pilot, a man named Joseph Farkas, and also ended the careers of professional wrestlers Johnny Valentine and Bob Bruggers. Future legend
* an infinite jump glitch Notably, the developers caught wind of this one and patched it out.
* An infinite universe can simulate other infinite universes within itself, so long as it confines the simulation to an

* An infomercial contained a testimonial from a young man who looked to be about thirty years old, stating that "every Dyson he'd ever owned" worked great. He was on his fifth Dyson and he loved it. Sounds like a great testimonial, but
* an informant who got punished for breaking the same rules he snitched about.
* An in-game poem that's impossible to understand without context and might even seem like an example of
* an Inhuman, which means that she is, for all intents and purposes, a baseline human unless exposed to Terrigen Mists... which happens halfway through the second season.
* A ninja-like character who turns out to be one of Snake's fallen allies from the previous installment. (Black Ninja in MG2, the Cyborg Ninja in MGS1)
* an injured Allenby Beardsley is briefly kept in a "jar" before she's Brainwashed
* An injury or surgery can also often completely change how the crowd is to react to the wrestler in question. A main-eventer can be the dirtiest most unlikable cheater in the entire federation, get injured and be out for a while then come back as the biggest babyface around.
* an innately high critical rate on top of that. They may only hit half the time, but when they do, it'll hurt.
* An Innocent Man) is framed as a drug dealer by two crooked cops that don't want to admit they busted into the wrong house and shot a man who simply walked out of the shower holding a hair dryer. Once he is convicted and ends up in prison, he ends up having to kill another inmate in cold blood to keep the inmate from raping him.
* An Innocent Man was recorded in 1994 following his legal battle with his ex-brother-in-law (to his first wife) turned financial manager, and while Joel was breaking up with Brinkley.
* An innocent person would have had a 50 percent chance of guessing right, but would probably have asked 'Which shoe?'
* An inordinate number of car dealers who got the short stick on locations away from a visible highway try to make the best of it by mentioning they're 'cleverly located behind the mall' or 'a little gem hidden four blocks from the highway'.
* , an insane black and white short from the '70s that features lots of animation effects and disfigurements.
* an insanely hot. It's the job of the Reapers to guide the deceased to their afterlives.
* An Insert - Close-up shot of hands, a document, a murder weapon, and so on
* An Inside Man": Kanan and Ezra go undercover first as factory workers, then as a stormtrooper and scout trooper respectively, while sneaking around Lothal City's Imperial complex. Chopper's also along, repainted as per usual.
* An Inspector Calls is frequently "squiffy". It's obvious to most of his family, but his mother's in total denial about it.
* An Inspector Calls. The inspector in question is calling upon the Birling family to investigate the events leading up to her suicide.
* An inspirational tale that did the rounds about two captives who were being tortured into renouncing their faith. One night, the first man admits that if the tortures continue the next day, he will have no choice but to surrender. His friend spends the night mulling over whether to kill the first man so that the first man's immortal soul might remain saved - while he himself will be damned to hell for the murder - but at last realizes that it would be wrong. His choice was right, because the first man mercifully dies on his own in the morning before the torturers come.
* an inspiration he ruthlessly advocates for his patients' health, which Kelso admits he uses as a balance to his own ruthless focus on the hospital's bottom line.
* An Instagram account for a "Mushnik's Flower Shop" once existed, promoting all sorts of lovely plant arrangements..though some eagle-eyed followers may have noticed the shadows of some...strange and interesting vines looming over the flowers. Surely those who found the account, recognized the flower shop name, noticed the shadows in the photos, or realized several of these posts were
* an instance after the Storm of Souls arc where Dominic and his girlfriend Luna

are making puns about the leg he has lost ("Your words wound me in ways that will never HEEL" and the like), until a loud "OW!" is heard from downstairs, prompting Luna (and in some cases, the reader) to think the puns were getting so bad they physically hurt someone (Turns out, however, that it was Dominic's mom getting zapped).
* an instance. This prompts a nearby lighting mage (called the Maestro because he's "a great conductor") to hit them with a small lightning bolt.
* An Instinct for War, every other officer in Motojiro's company is dead or wounded after the battle at Nanshan, so he gets promoted and put into command of the unit for the attack on Port Arthur.
* An Instinct for War is set in one of the Association of the U.S. Army's trade shows.
* An Instinct for War: Machiavelli's jail guard used to be a mercenary, and Wallenstein's armies are basically mercenary forces. One of the issues discussed in the book is the question of armies organized for profit, or armies organized to fight for a state.
* An Instinct for War, the stories within are fiction, but the author says "Some of this actually happened and some of it didn't, but all of it is as true as I can make it."
* An instrumental jam that eventually became the verse section of "Zombie Eaters" was informally known to the band as "Surprise! You're Dead". While the finished song ended up being called something else,
* An instrument that's both cheap and easy to use can only be quite limited. A common example is the entry-level arranger keyboard, and the Korg Monotron series and the Dübreq Stylophone go even further. The Roland TB-303 is very limited, it's fairly easy to use, and at least it used to be cheap before it became a
* An insult that is spoken in the first person that the echo repeats in the second person.
* an insult to their culture and an intrusion on their very way of life. The viewer's empathy for the plight of their lost empire is...limited.
* An insurance advertisement had a similar slogan, with a naked man sneaking into their office to get his payout.
* An insurance commercial features a bunch of men who have saved on their insurance, and thus splurged on completely ridiculous items, the primary being the goofy, giggling man who has bought a falcon. A parade of unintelligent-looking men (except the black guy,
* An insurance commercial has a guy inside his house flipping a light switch up and down and looking around trying to figure out which lights it controls. It then cuts to an exterior shot of the house showing that the
* An insurance commercial shows a bunch of rabbits laughing themselves sick at a rattlesnake with a pink and white baby-rattle in place of a normal one. Did the writers not know that it's the
* An insurance company had a radio commercial involving actors doing the falling trust exercise. Cue falling, thump, muffled cry of pain, and the catcher saying, "Wait... what's my motivation?" At which the slogan of the commercial came in, "Life's better with a partner you can trust".
* An insurance company named Independent Health advertises a policy known as the
* An insurance company once had a rule against issuing car insurance to anyone who had not yet registered the vehicle in their name. That was in a state that required anyone trying to register a vehicle to provide proof of insurance in their name. The company eventually changed that rule.
* An insurgent force against the US in a Middle Eastern country abruptly stopped fighting when
* an integral part of the world, as much as good for the world to function properly. As such, he's perfectly fine with co-existing with his good twin brother, Belyolen, with whom they co-rule the Bogolenya Deer Pantheon. He embodies evil as a testing force, driving the good and worthy to rise up against it while weeding out the evil and unworthy, whom he would then torment/devour in the afterlife. The only outright villainous thing he is up to is trying to destroy his father, High King

Irminsul of the Eltenteil Deer Pantheon, whom he understandably hates for abusing him as a fawn and treating him as nothing more than Belyolen's unwanted "cast-off".
* an intellect that insults egg plants by association), but because he expresses himself in opposite action every time he speaks, no one gives him the time of day.
* an intelligent construct campaign. While most of them try to hide it behind a dashing swashbuckler façade, the fact that they aren't truly human pains them to no end.
* An intentional example is the seeing eye dog, a guide for blind people. Naturally, the "dragging the owner" part is entirely averted.
* an intentionally broken English translation — because difficulties in translating the local name of the car (Fusca) made him seek what Volkswagen meant in German, and it was "people's car".
* An interactive Canadian museum exhibit about forensic science challenges visitors to solve a young woman's murder. If you correctly determine who the killer is and what evidence proves it, you'll get to see the killer's Motive Rant.
* An interdimensional rather than interplanetary example: the fantasy world in
* An interesting, and averted case for Mercury. Nearly all the forces of good fear and hate the Dark Empress, who is actually an outside context hero with phenomenally poor public relations.
* An interesting and common variation on this trope is to have the big secret hid from the
* An interesting article on the rise and fall of this trope can be found here.
* An interesting aside: in the revival of formal ritual magick at the turn of the 20th century, with its rigid heirarchies and emphasis on bringing about the advent of the "Super Man" (in the Nietchzean sense), the
* An interesting aspect of this version of hell is that every Demonic Entity in the Marvel universe (Sutur, Mephisto, Zarthos, etc.) has a place in a central area of hell and each's location is dependent on their power at the moment. In the center of this area the throne which each dark ruler believes belongs to the one being of absolute evil (which would be Lucifer in Christianity or the absolute ruler of evil in any other religion). The closer a dark lord is located to this throne, the higher their standing in the hell dimensions. None of them dare try to claim the throne however, as each is fearful that to do so would cause the other lords to rise up and destroy the usurper or worse, the owner of the throne (the true devil and incontestable embodiment of evil) might return.
* An interesting aversion comes from the fact that Douglas Adams originally scripted a scene where the Heart of Gold ship creates a jump-suit for Arthur. The producer, however, realised that he would have been in his pyjamas until this point and kept him in them.
* An interesting case- all the surviving legal speeches we have from Antiphon, the oldest Athenian orator whose works we still have, deal with murder cases. We know he did write on other topics, we just don't have any complete speeches of them.
* An interesting case, and he's actually surprised she knows his name. However, while he does think she's pretty, she actually wasn't his school crush, and his reaction to finding out about the whole stalking thing was fear rather than pleasure.
* An interesting case, as the content is all the same. It's just that the improved graphics from game-to-game, making the sexy figures of the main cast more obvious. As such, the series has gone from the Game Boy Color original being rated E, then
* An interesting case coming from a part of the audience, according to
* An interesting case happens to Flame Princess whom initially, enters the plot as an alternative
* An interesting case in "The Leap". Barney wanted to confess his love to Robin, but she told him she loved him.
* An interesting case involving a character originally known as "Stan the newspaper man" in "
* An interesting case is played with Shingo Takagi. His name is written with kanji in Japan, but
* An interesting case is the music player Amarok, which was originally spelled

amaroK until it was decided that looked stupid. "Amarok" is the name of a real Inuit deity, however.
* An interesting case; it's something of a back-translation on the Japanese side. The original title had the English "Scrapped" [Sukurappudo] rather than the Japanese equivalent "Suterareta."
* An interesting case occurs in "extra plug", where after the power goes out (caused by Strong Bad's new boots being
* An interesting case occurs in The Tale of Happy Valley sketch from
* An interesting case occurs in the TV special "The Great Bear Scare". While the characters' eyes and mouths are fully animated the rest of their bodies move every couple frames and walk in an animated storybook style; one theory is the studio probably ran out of time and money and quickly edited it together.
* An interesting case occurs in Turnabout From Heaven, in which Diana Wheatley is accused of killing her abusive father, Buck. Post-
* An interesting case of a hero's return causing a villain's return occurs in any number of the times the Batman has "died", causing the Joker to go temporarily sane or catatonic. Which always reverses itself upon Batman having his own He's Back moment.
* An interesting case of this is the infamous "Zombie Genocider" achievement in
* An interesting case shows up with Road and Allen. In terms of appearance, she looks younger than him, but in reality, she's actually older than him. And
* An interesting case, since while they lifted a few ideas and characters from the
* An interesting case with Tollan technology. The Tollan are a race of
* An interesting case with Twelve Foot Ninja and their song "Coming For You". It opens as heavy metal, and then about 30 seconds in switches to salsa, followed by disco, back to metal and then through a plethora of genres over the course of the song.
* An interesting case with Yoda. When he first appears to Luke Skywalker in
* An interesting detail is that despite having 425 days, each of 25 hours, in the year, a sixteen-year-old in Creation is functionally equivalent to a sixteen-year-old on Earth.
* An interesting detail is that rather than play a stock cut scene, the game remains interactive during the journey, so you can zoom in and out and circle around your character as s/he stands in the gondola while the actual terrain you are traversing unrolls below. The balloons can not be seen from the ground though.
* An interesting dueling version: During the 1971 Indo-Pakistan War, the US sent in the Enterprise battle group to threaten India to stop
* An interesting example from "The Boy Who Knew Too Much", where both Principal Skinner & Homer think at Bart; it's not clear that Bart can hear them but it is implied that Homer can hear Skinner.
* An interesting example happened in the 12th season of the Spanish series
* An interesting example in Case 5. At the time this line is said in the previous chapter (which is closely tied to this one), the player is likely to think nothing of it. But when a flashback occurs later in the case, when the player has worked out that the ladder was used as an escape route by a double murderer and an international spy,
* An interesting example, in that it's not for the greater good or anything...he's just anxious to get to the next fight. He's ALMOST
* An interesting example is Chris Comstock, whose early hard edm and trap work were released under the name Dotcom, before shifting to a more upbeat synthpop- and futurebass-leaning sound, and the emergence of a mysterious masked DJ by the name of
* An interesting example is heard earlier on in "Sweet and Elite". Rarity is packing up to head back to Ponyville from Canterlot, when she gets a letter asking her to come to a garden party at that day. She changes her mind. Turning to the bagpony that has all her things (and I mean ALL her things), and her cat, Opal, in her cat crate, piled onto his back, she tells him that she won't be leaving, but will be needing help to re-unpacking them. The poor guy then subsequently collapses, and we hear what is assumed to be Opal yowling as all the luggage comes

crashing down. We never see Opal during the collapse, but she was the only cat in that pile.
* An interesting example is Mrs. Vashti, a.k.a. "Spell Syrin", one of the teachers of
* An interesting example is Nimueh. Though she is a formidable opponent, most of her evil plans are done from a distance, and Prince Arthur never discovers who she truly is after she pulls a
* An interesting example is the New Testament — few Christians realize that Paul's epistles, although they describe events after Jesus's death, are actually the oldest Christian writings. 1 Thessalonians was written around AD 51, while by all accounts, the gospels were written after AD 59 at the earliest.
* An interesting example is the (now-extinct) Mbabaram language of Australia, in which a domestic canine companion was referred to as "
* An interesting example occurs in "Rattlestar Ricklactica"; after accidentally killing an alien snake, a guilty Morty decides to send an ordinary Earth snake to the alien snake's planet in its place. The rest of the alien snakes quickly find out that the snake Morty sent is not from their planet, and when a scientist snake tries interacting with the Earth snake, the Earth snake proceeds to have sex with him.
* An interesting example of a logo that happened by accident: The makers of the Commodore Amiga home computer created an animated demo to show off their machine's graphics capabilities. One element of this demo, a rotating ball with a red-and-white checkerboard pattern (so you could tell it was rotating), quickly became so heavily associated with the system that a higher-quality version of it became the logo of
* An interesting example of firebending manipulating existing heat pops up in "The Avatar and the Fire Lord." During one of Roku's flashbacks, Fire Lord Sozin is shown drawing the heat out of a volcano's erupting lava and directing it into the air to cool it into solid rock. Interestingly enough, he is using the same stance and technique that Iroh would demonstrate a century later for redirecting a firebender's lightning.
* An interesting example of the criminal himself suggesting the framing. In
* An interesting example: out of the Super Sensors, only one has their name alliterate with their sense:
* An interesting example. Stone is sacred to the Shin ethnicity, meaning that extracting metal by mining or smelting is forbidden. However, the Vorin ardents have access to Soulcasting, the power to turn one substance into another, and often practice by turning random trash into metal. At least one Vorin merchant makes a fortune by trading this trash-metal for exotic Shin fruits, vegetables, and livestock.
* An interesting example with Rachel. Her first love is Finn, and he has been portrayed as her true love. While they were broken up in season 1, she dated Jesse before getting back together with Finn by the end of the season. Finn was supposed to be her endgame, but
* An interesting exception is the Spartan Federation; because of their
* An interesting fact about British tax law has come to light in the wake of increasing public disapproval of the proliferation of unpaid internships. There are quite specific rules on what an intern can and cannot be made to do before they cease to be an intern and turn into an employee, but unfortunately enforcement is somewhat spotty and the UK treats theft of services as a civil matter rather than a felony. However, it has been pointed out that if a company is not paying someone wages when they should be, it's an odds-on bet that they are
* An interesting historical case: Ancient Greece. Towards the later parts of its history, this society seemed to be teetering on the brink of an industrial revolution, but never quite made the plunge, instead sticking with slavery and other traditional, labor-intensive methods of production. Ancient Greece had a great deal of scientific thinkers, the capacity to build complex mechanical devices, and even developed a simple steam engine. The steam engine especially, if developed further and perfected, could have been used to simplify a lot of labor-

intensive jobs, as it was when the Industrial Revolution finally did roll around. But the Ancient Greeks saw it as nothing more than a curious toy.
* An interesting historical example is the murder of King Erik IV of Denmark by his brother, Abel. Chroniclers called the murderer "Abel by name, Cain by deeds."
* An interesting instance, as in the Rebuild, Gendo still orders the activation of the dummy plug but as the frenzied Evangelion proceeds to tear the Angel/Evangelion-03 to gibs, we see a satisfied smirk from Gendo in spite of the carnage that forces Maya to turn away and bury her face in her hands, and the others on the bridge to watch in silent horror. It is also one of the few (or possibly the only) time Gendo has ever really smiled since Yui died.
* An interesting in-universe case: although there are no technical restrictions for the player characters, Drow society is pretty much 50%
* An interesting inversion appears with the superheroine "Micro-Might". Her power is, specifically, to take advantage of the Square-Cube Law — shrinking herself down to half height, but keeping the same mass — to become stronger and tougher. (Okay, so it plays a bit fast-and-loose with the actual equations, but it's still nice to see someone USE the law instead of just ignoring it.)
* An interesting inversion are Arabian vampires. They're active during the day and sleep at night, since people were naturally more afraid of the daytime in the desert.
* An interesting inversion comes in the middle of the 15th season of
* An interesting inversion of the "army battles giant monster" is the
* An interestingly related setting. The viewer is initially given no reference frame for when it occurs relative to Earth history, but it fits the pattern of Twenty Minutes into the Future in that it combines highly advanced, futuristic technology with a culture that is almost indistinguishable from the USA of 2005, down to the clothing. As the series progresses, more specific elements of American culture start appearing, and the fleet discovers
* An interesting new variation was introduced in Brewfest 2007; when donned they render
* An interesting non-sci-fi example appears in Erich Maria Remarque's famous novel
* An interesting note from a passenger on a plane which had a hole ripped in it in flight in 2011. A passenger noted:
* An interesting occurrence in the S season - Usagi and co. defeat Kaolinite and assume her to be dead. Some ten episodes later, Usagi visits Dr. Tomoe and sees Kaolinite there; and yes, she does go all "OMG the villain is alive!". But then Tomoe says it's just his assistant,
* An interesting phenomenon was when an event in the anime and the manga happened at different seasons. When Ranma fights Cologne, it's a summer
* An interesting point about the Discworld examples is that Discworld magic is unreliable enough to be a very poor substitute for technology, it's just the only one available. There were demon-powered watches in the early books, but as soon as miniature clockwork was developed these were abandoned as almost totally useless.
* An interesting retroactive example with the show's original main character, Jason Gideon. This trope was originally not the case, as when
* An interesting side-effect of Equip Spell Cards that give Piercing is that you can inflict damage to your opponent by equipping them to your opponent's monster(s). Then, when your opponent attacks one of your Defense Position monsters with an ATK greater than your monster's DEF, he/she will take the difference. After all, even though it's your opponent's monster, it's
* An interesting side effect of the switch is that some early digital video sensors, which were often black and white only, won't work in places with LED or fluorescent lighting as they were tuned to be more sensitive to infrared. The reason is the most likely places cameras with said sensors were used were homes and outside. Incandescent bulbs provided plenty of infrared while the sun is... well, a giant fireball in the sky.
* An interesting side-effect of Toronto doubling is that there's a certain amount of spill-over to Hamilton, a city that has a certain level of industrial grunge that Toronto proper lacks. Various scenes in, for example,

* An interesting story from World War II came from a misinterpretation of this trope: Switzerland, who remained neutral during the war, nonetheless detained any planes, Allied or Axis, who crossed their lines seeking refuge. Most of the time, these were Allied bombers who had sustained too much damage in battle to make it back to base, and instead opted to land in Switzerland where they would be treated better than as P.O.W.'s by the Germans. Some Swiss pilots tasked with escorting these bombers to airbases were surprised at how compliant the crews of these B-17s and B-24s were to being approached by unknown fighters, especially when the Swiss Air Force tended to fly
* An interesting subversion of this can be found in most versions of
* An interesting subversion with Jo. She made her first appearance in the second season as an
* An interesting take: One caller described his car as running "rough for two minutes... then after six and a half minutes the engine dies."
* An interesting take on the 'magical girl healer' idea is seen in the
* An interesting take on this is that Tom, one of Stjepan Sejic's major characters in
* An interesting take on this is when the US military started mass recruitment during WW1, they discovered a large percentage were below acceptable standards on
* An interesting thing to note was that older alien characters had thicker accents than younger ones.
* An interesting twist is in the Frost Lord Ahune encounter. When he is summoned, the player is the one delivering the lines - one of the rare instances in which the game makes a player character talk. Also done in the Headless Horseman encounter, actually. "Horseman rise/ Your time is nigh/ You felt death once/ Now, know demise!" There is never any other indication in the game that your character
* An interesting twist is presented in the fifteenth installment of the
* An interesting twist is that, apparently, the magic, unlimited gift cards that the hotel staff constantly hand out aren't limited to working just inside the casino. When the main characters manage to escape and hail a taxi, they use one of the cards as payment. Its amount on the card scanner eventually prints out
* An interesting twist is that, compared to other cultures the Romans interacted with, they themselves often appeared to fall into the warrior role more often, despite their use of a professional standing army. One comparison would be the Romans and the various Greek city-states, especially during the Hellenistic period where the Roman Republic began to come into conflict with the Greeks. The difference in connotations can also be seen in the characterization of Ares versus Mars. While more popular in Sparta, most often Ares was seen as the embodiment of the negative aspects of war, whereas Mars (helped by origins as an agricultural deity as well) was seen as more positive. And complicating it further, the Spartans again interpreted Ares more favorably (though in different ways compared to how the Romans viewed Mars) and are typically perceived as the odd one out among the various ancient Greek city-states, being interpreted more as Warriors.
* An interesting twist occurs in a episode where one of McCoy's subordinates is forced to act as a defense attorney. The moment she is teased for "working for the dark side", McCoy instantly lays down the law, saying that she is acting as a proper lawyer and any personnel of his office giving her a hard time for doing her duty would be punished with reassignment to traffic court.
* An interesting twist on this comes in the form of the Vex. The Vex are an outwardly mechanical species of
* An interesting twist on this is Buggy. While not the largest by far, he is a toweringly lanky figure. However, when he is defeated and separated from his crew, portions of his arms, legs, neck and torso were stolen, reducing him to a chibi-version of himself standing at barely 3 feet tall. However, the moment he is reunited with his crew he finds his missing body parts and resumes his more imposing form.
* An interesting use of this by the hero, explicitly called out by the villain in
* An interesting variant because all of the events of the Universe of the Four Gods take place in a book. Anything that occurs in the book only takes about as

much time in the real world as it would take for someone to read about it.
* An interesting variant of this happened in the United States in the 90's. Prior to the boom of scheduling shows as
* An interesting variant, where the character never learns he was telling the truth, in the
* An interesting variation comes in the form of the animation website
* An interesting variation. Hordak most certainly is a villain, but you will find people who would rather gloss over his more sympathetic aspects, portray him as an irredeemable monster, and argue against the sympathy the show gives him.
* An interesting variation: in 2013, shortly after Barack Obama stated that he goes skeet shooting, the White House posted a picture of the president firing a gun. Pretty standard procedure; President says a thing, White House releases a photograph that news outlets can use when reporting on the thing. However, the photograph in question came with a note that stated that the photograph was not allowed to be manipulated in any way. This caught the attention of a handful of people on the Internet, and so within a few days, there was a significant increase in pictures of Obama firing Super Soakers and ray guns while shooting at everything else. A few months later, the President himself made light of this during a press dinner and showed a photoshopping of it himself.
* An interesting variation in Shizune's story, where a single bad act (which can be a romance-ruiner in itself so very much) committed by Hisao doesn't, in fact, have any direct grave consequences, but another practically unrelated chain of events appears and eventually leads to a bad ending.
* An interesting variation in the UK. Their iconic 1979 single "Boys Don't Cry" made the Top 40 in the UK in 1986... but only in a new and widely disliked re-recording that
* An interesting variation is the Zulu Iklwa invented by King Shaka in his military reforms to complement the traditional Assegai. Because it was a shorter weapon, it freed up a hand to use a shield and was effectively
* An interesting variation later on comes at the end of an action-packed dogfight between some fighter jets and some alien fighter ships, culminating in the immortal line:
* An interesting variation occurred with the U.S. gold rush into the Black Hills of South Dakota. Miners were pissed that their sifting machines kept getting clogged with a thick blue powder. An enterprising businessman found a way to filter it out and kept the powder as part of the payment. It turned out that the blue powder was silver in concentrations of nearly 100 times higher than the gold. While gold is significantly more valuable than silver, it's not 100 times more valuable.
* An interesting variation occurs because the energy belts are merely
* An interesting variation occurs in a couple of game settings, including the
* An interesting variation occurs in "Portrait in Brown", an episode of
* An interesting variation occurs in the episode "Wing". Token sings "You'll Never Find Another Love Like Mine" by Lou Rawls, but since the actor couldn't sing they sped up the original song instead. The sped up version sounds just like Token so it's pretty subtle.
* An interesting variation occurs with Might Guy to Kakashi. Guy is the intense one, and whenever he brings up the "rivalry" Kakashi says something to the effect of "I'm sorry; did you say something?" Kakashi knows full well that Guy wants an intense rivalry, but puts on an act of indifference because he doesn't terribly want to
* An interesting variation of this: Shinra (5'10) has just about one head over Celty (5'8.5) — not because Celty is particularly short or Shinra is particularly tall, but because Celty is literally
* An interesting variation on this is used in an early episode by Sokar, who attacks the Earth gate's iris with a particle accelerator. He modulates the accelerator to make his face appear on the iris and even have his voice come out, informing the
* An interesting variation was the Hounds of God. In Swedish Livonia, a man by the name of Thiess claimed that Werewolves were given their powers not by the Devil,

but by God to battle the forces of the Devil. Our Werewolves Are Different indeed. So, no,
* An interesting variation was used back in 2005. The Daleks, being the most popular villain of the original series, had not been seen for almost 17 years due to the original series being cancelled. For their return to the screen (which would possibly be the first time some children had ever seen them) in
* An interesting version appears in "Rabbit Hood" when Bugs pulls a paper and pen out of the side of his chest as if he was wearing a coat.
* An interesting version in that it's technically a one-handed shower juggle—
* An interesting version of this, ironically not applicable to poker as such, appears in
* An interesting way to skew results in your favor is to obviously make the poll biased. Most people will then vote
* An interesting wrinkle comes from the nature of the player characters in single/multiplayer. Jack, protagonist of the first game, is (basically) a normal human, while Subject Delta of the sequel is a heavily enhanced Big Daddy who is many times stronger and tougher. As a result, all eight of Subject Delta's weapons are larger, heavier, and unique from the ones Jack used (even though there is some crossover with how they work, like Jack's crossbow and Delta's speargun). The catch is that Jack's weapons mostly carry over into the
* An intergender example is between the adult Mr. Hagen and the teenage Jenny Jeffers in R.L. Stine's
* An Interior Designer Is You: A video game that lets you decorate a room.
* An Internet message board administrator once joked about the change in moderation policy to a much more laissez-faire one consisting of only deleting obvious trolling and spam as "Under the old system if you posted something ridiculous and/or offensive, the punishment was we'd delete your post. Under the new system the punishment is we
* An Internet Protocol address. A string of numbers identifying your computer.
* An intern isn't as lucky. When he gets it on him, they apply iodine (which the Clone is repulsed by) to his arm. What they don't realize is that the Clone then works its way around iodine on the surface, to eat its way through the inside of the arm and absorbs him from the inside out. Harry chops his arm off anyway, but it's too late by this point.
* An intern made a mistake and was getting chewed out by Dr. Kelso. J.D. and Elliot approached and started chewing the intern out too, before shooing Kelso away and saying that they got the intern's punishment handled. Once Kelso was out of earshot, J.D. and Elliot than reassure the traumatized intern that she's doing just fine.
* An interracial and/or same-sex couple dramatically making out in public. One or both members of the couple will naturally get pissed at our hero for staring at them (shocking to
* an interview canon gets made, they'd rather use the middle as the starting point.
* An interview claimed that Season 3 wouldn't feature Desmond running naked through the jungle, but then there's Desmond running naked through the jungle.
* an interview he said in a series of curt replies to fan questions that King has red eyes because he ate cooked red flowers to gain their power without going rabid.
* an interview is because the original game's extremely short development (4 months to make the actual game, 2 for debugging) meant there was no time to create original characters.
* an interview, or something else). Because the interview took place many years after he accepted the role, and because he had not known much about either one of the two characters, he simply stated that he did not know enough about them to comment on their relationship, and did not want to offend fans (shippers of this couple and otherwise.)
* an interview take on his original idea. If you read much of the comic you'll realize this is saying something.
* an interview that in their first episode together the director instructed them to

act like brother and sister, forgetting that they actually were.
* an interview their nonsentient young, or otherwise are not concerned by animals eating them. Most adult Tendu select one nonsentient subadult and cause it to metamorphose into an adult which is then cared for and taught, and choose to die soon after this child/apprentice is fully mature; there are a few individuals who choose not to die, and then they are culturally compelled to leave home forever and metamorphose again, becoming sort of wandering judges/problem solvers. This is portrayed as more frightening than death. It's mentioned that there was a time when they did things differently and the ecology was absolutely swamped with Tendu, and there weren't enough resources for everyone.
* An interview the two did to advertise their movie reveals that Beavis refers to his nads as "Bon bons".
* an interview voice in a store... and other people there said they could do a better job.
* an interview, where after asking a table tennist about tattoos, the host wonders the opposite of our page quote, if in China disgruntled tattoo artists write Portuguese words (in Comic Sans!) to take advantage of clients who can't read them.
* An interview with a man who claims to have seen red and green UFOS chasing his car, from Otis G. Firefly's Phantasmagoric Almanac and Calendar: "I remember it real good 'cos it the Fourth of July!"
* An interview with early female CIA operatives suggested that women at the CIA were better at this than men. One now senior analyst stated, "You could always tell them by their socks." Another pointed out that regular Russian embassy employees always had cheap shoes, but the intelligence agents had very nice shoes.
* an interview with Jimmy Kimmel, admitted to having recited a Greek monologue to help his twin brother Sami score extra points for an exam.
* an intimidating and powerful leader who commands the respect of legions
* an intimidating, scent-less stranger whose every action matches their own.
* an INTP or INTJ personality may quickly recognize the technique for what it is, but simply not wish to waste their time on what they see as pointless or unnecessary mind games.
* An intriguing variation occurs in the Zenna Henderson short story "Food to All Flesh": a Catholic priest in a rural parish witnesses a landing spaceship which contains a single, utterly alien occupant which is quickly revealed to be both peaceful and extremely hungry. When the priest deduces that the alien is in the process of giving birth and desperately needs to feed its young, he endeavors to find something the creature can eat, but nothing is palatable.
* An Introduction to Language, 9th Edition spoiler: "The girl Professor Snape loved married the man of her dreams".
* An Introduction to Planetary Defense by Travis S. Taylor, Bob Boan, R.C. Anding and T. Conley Powell: A nonfiction look at the possibilities of an alien invasion of Earth. They make various suggestions, discuss issues regarding first contact, and possible ways to help deal with an invasion.
* An introverted engineer looks at his shoes while he talks to you; an extroverted engineer looks at
* An in-universe case. Fans were unhappy when Zilpha Keatley Snyder killed off Raamo in the
* An in-universe example actually happens to Mike Wazowski, who for some reason,
* An in-universe example: any video game character who dies outside of their game in
* An in-universe example. Britta does an impression of a bit Jon Stewart does frequently on
* An in-universe example happens when the show's ratings go down a tiny bit and the executives decide to add a few new changes to the show. Instead of a lab, they now live in a house in the suburbs with their
* An in-universe example has Moe remodeling his tavern into a postmodernist bar with trippy decorations such as TV screens showing moving eyeballs and lifeless bunnies hanging from the ceiling. While he attracts the attention of many VIPs, his old barflies are confused.

* An in-universe example: Homer always finds monkeys (or actually, chimpanzees) hysterically funny whenever someone dresses them in human clothes. It helps that he's easily amused in general, but for his entertainment value, nothing beats chimps.
* An in-universe example is Artanis, who becomes the leader of the Protoss after
* An In-Universe example is the Blue-Eyes Toon Dragon, a Toon version of the Blue-Eyes White Dragon. Seto Kaiba was not amused to have Pegasus turn his trademark monster into an animated abomination with
* An in-universe example is the fictional Emperor Zhark series mentioned in the
* An in-universe example occurs in the episode "Dog Gone", when Brian's book,
* An in-universe example occurs with Sydney Morvran. The winner of v0 (the prequel to v1), he is put into the next version as punishment for not actively killing anyone, and then becomes one of the first fatalities.
* An in-universe example played for comedy can be seen in the marriage of Jessica and Roger Rabbit in
* An in-universe example when Henderson and Jimmy smoke a blunt Henderson had made with a page of the Necronomicon. They get visions of horrors, but the marijuana high makes the experience funny instead of menacing.
* An in-universe example with the Box Ghost and Lunch Lady. Danny, Sam and Tucker are all bothered by this relationship happening in the future.
* An in-universe example with the saxophone player in the bar who suddenly stops at the mention of Kriss' name in episode 10 of season 2.
* An in-universe one: In "A Higher Power", the BAU is called to investigate a recent spike in suicides in a small community in Pittsburgh, the victims of which had lost their children to a huge fire months prior and had apparently succumbed to their grief. They are called in because the lead officer's brother was one of the victims and the cop is adamant that his brother would never have killed himself so suddenly and suspects foul play. The team investigates and discovers that the suicides are actually staged murders, caused by an "Angel of Death" type who had been attending the victims' group therapy sessions looking to "save their souls from their grief". After the catching the killer, the cop thanks the BAU for their help and for vindicating his suspicions. However, the team reveals that they had looked into his brother's suicide as well and it turns out that he had never been to the same support groups as the killer and his suicide did not match the killer's MO, meaning his death was very likely an actual suicide, something the cop is heartbroken to hear.
* an in-universe reputation during Tenbi's previous Himekagura Festival.
* An in-universe version occurs in "Meltdown". When exposed to a gas that causes people to act on their instincts Crichton and Aeryn find it impossible to keep their hands off each other and keep interrupting whatever they're doing to make out some more.
* An invasion of the US as things stand now at the time of typing would be very difficult, as the US has the second-largest military in the world, with 1.5 million active personnel, including the largest air force and navy (fairly important when its main rivals are overseas), and spends more on its military than most of the planet's other major nation-states combined (and that's
* An invention exchange. The BANG gun leads to the BANG uzi, BANG knife, BANG harpoon gun, BANG nun-chucks, and finally BANG dynamite.
* An inverse example, Stories of players leaping off cliffs planning to shift into flight form or use sometype of movement slowing, thinking they're on their druid, mage, etc., then realizing they're not and dying.
* An inversion and subversion. A group of heroes fleeing their own universe after a coup against the corrupt
* An inversion being the race of Succubi. However they play with this trope as well as they fall in love with their master relatively commonly - and it happens no matter how hideously ugly the summoner can be.
* An inversion by Ahriman, who turned the entire Thousand Sons legion (the ones loyal to Tzeentch) into living coffins to STOP the mutations/evolution. Needless to say, he is not well liked, even among the Thousand Sons.

* An inversion by Martin Luther is well known in Germany: "Warum rülpset und furzet ihr nicht? Hat es euch nicht geschmacket?" ("Why don't you belch and fart? Not to your taste?")
* An inversion comes in this physics joke: when someone asks you 'what's new?', respond 'C over lambda'.
* An inversion happens in the chapter "The Most Bizarre Bizarro Of All" from the
* An inversion happens in the episode "The Launch Acceleration", where Leonard shows Penny how the sulfur hexafluoride he uses in his experiments causes deep voices.
* An inversion happens with Grizzmon's Maul Slasher attack and Gallantmon's Final Purification attack, which are a counter move, therefore they only happens after the opponent makes its attack, and deals damage based on the damage taken from the opponent's attack. Which makes the damage possible to be ridiculously low and unable to finish the target if the user is already high level and the counter move is used on a really weak opponent, as said opponent most likely won't be able to inflict much damage in the first place. A different kind of inversion happens with Marsmon's Mugenhadou (literally meaning "Infinite Wave"), which despite its name, can actually NOT knock the opponent out in a single hit, as its damage still depends on the Marsmon's offense stats and the opponent's defense stats.
* An inversion in a halloween episode: A "Haunted House" has turned into
* An inversion in Series 2 of the new show: it's Rose's boyfriend who
* An inversion in the episode "Real Me" as Giles had just purchased a new
* An inversion in the first book, Speaker to Animals can't eat with the humans, because their food "smelled like burnt garbage". Kzinti are hypercarnivores who consume their meat raw, and besides a general distaste for eating prey food (i.e., plants), they tend to be repulsed by humans consuming what is essentially partially burnt meat.
* An inversion in "The Great Game," Moriarty strapped bombs to people Sherlock had never met and gave him a time limit to solve several mysterious crimes. Sherlock was mostly dispassionate towards the hostages and only cooperated because he found the mysteries amusing. When the final victim was
* An inversion in the pasta episode is Hamada's Celeb Party pasta: Spaghetti with foie gras sautee, consommé soup, and ham salad inside a roasted chicken. All the contestants hated it so much it is given a full skeleton.
* An inversion is the price of meat. Until relatively recently, meat, especially red meat, was something most people would only have rarely if their farm animals died (it was more worthwhile to keep the animals alive for milk, eggs, wool to be produced consistently). Only the wealthy could afford to eat meat regularly until mass farming and refrigeration became common, lowering the price of meat, although the price may go up again as demand increases.
* An inversion: it's possible for otherwise non-disabled people to suffer a "Full-Dive Nonconformity" of varying levels of severity that can leave them at a crippling disadvantage during gameplay. In
* An inversion occurs during the Fuchsia Tag Tournament: Red, who was the first opponent to defeat Ash, learns that he has the ability to give his Pokémon temporary power boosts, but refuses to do so because he considers it cheating, and views Red in this light when he learns of his Victory Sight ability and how he's always constantly using it. Red on the other hand views Ash's attitude as a display of arrogance and disrespect for his opponents for not giving out his all.
* An inversion occurs regarding T'Pau. When she appears in The Original Series, she's considered a legendary figure by Kirk. Forty years later, in the prequel series
* An inversion occurs with porn star Eva Angelina, in that her glasses have become so synonymous to her general appearance that she's gone to conventions without them and wasn't recognized at all.
* An inversion ocurred with the constant use of double-breasted blazers by bankers and financiers between the 1980s and 2000s. After the 2008 crisis, the jacket's reputation went from "cool gangster suit" to "corrupt banker suit", and thus demand evaporated overnight, becoming basically extinct... before it saw a revival of

sorts about a decade later.
* An inversion, of a sort, occurred where various online ads for weight-loss supplements used photos which genuinely were normal photographs of the same women, before and after they lost significant amounts of weight. Only problem was that the photos were copied without permission from weight-loss bloggers, who had not been using the supplements and who were not at all happy that their photos had been stolen.
* An inversion of sorts from the same show is Killgore, a little wind-up toy robot with delusions of being a master criminal. Despite almost getting the better of Jenny a couple of times, no one usually takes him seriously, as he's too darn adorable.
* An inversion of sorts occurs in "Devil in the Dark", when Spock calculates extremely low odds that both he and Kirk would be killed by the
* An inversion of the above happens with the Spanish branch of Italian media group Mediaset and its... odd... relationship with
* An inversion of the typical "actor/writer leaves because he's pissed with the producers" setup of this trope was
* An Inversion of this can be found in the comments for a lemon fic that involved molten gold being used as a lubricant.
* An inversion of this trope is products that are commonly used for criminal purposes, but are presented as ideal for a purpose that practically nobody actually uses it for:
* An inversion of this trope: Many cans and bottles are able to be returned to a recycling facility in South Australia for between 5 and 10 cents per item... If the item was originally
* An inversion of this trope occurs in an episode in which Fry and Leela are forced to disguise themselves as robots to infiltrate a planet of human-hating robots. Their literally paper-thin disguise of aluminum foil and cardboard fools the robots despite their terrible attempts at acting as robots.
* An inversion of this trope that makes it, if possible, even more sad: in
* An inversion: The line "Sora... Riku... There is falsehood within your hearts. Do you dare deny it...?" is often included in lists of unused Xemnas quotes. However, the quote
* An inversion: Wendy O. Williams of the Plasmatics grew out her trademark mohawk upon the release of her solo album, choosing instead to wear it long.
* An inversion when the Matrix starts glitching out on Neo after he takes the red pill:
* An inversion would be the Greenskin incursion at Grimspike Pass. The Dwarf High King Kurgan Ironbeard marched his throngs out to meet the orcs. The newly appointed High Chief of Men, Sigmar Unberogen, gathered his warriors and moved to reinforce Kurgan's position, rather pragmatically counting on that their combined forces would have a better chance or repelling the orcs. Kurgan, in a similar bout of pragmatism, equipped Sigmar's warriors with steel weapons to replace the bronze or iron ones they brought, and gave Sigmar the rune-hammer Ghal-Maraz. From this simple act of
* An inverted case with Zoro, who, though he doesn't care much for animals, often finds them coming towards him. An octopus stuck on his head when he was inspecting a shipwreck. A South bird stayed near his side during Skypiea (to get his food) and his crewmate Chopper (a half-reindeer) clamps on his head when he's scared.
* An inverted example involving Wiggum, he has also been willing to break the law for a very honorable reason: To help Homer's fugitive mother escape arrest, as her crime caused his asthma to be cured when he was younger. He has done so twice.
* An Inverted example. Ultimately, the show's failure to catch on forced the Toonami crew to let it go in 2016, but it stuck around way longer than any other show with similar viewership.
* An inverted variant is the Linear Bomb: when the ground is traced by some
* An inverted version happens later in Dressrosa, when one of the dwarves is giving Zoro directions (after having personally experienced
* An investigation into fraudulent credit card charges of carpet cleaning business

ZZZZ Best by the
* An investigation into the massacre of Cass’s caravan and a few other caravan raids.
* An investigation, saving the family untold amounts of money. Their friendship with the Rubbles would soon become strained.
* an invincible army of cybermen created out of humanity's dead, which the Doctor can use to conquer the universe. See: "Mounting insanity."
* An invisible god and his sisters come up with a test for a prospective bride. Girls are brought to his dwelling place, and whoever can actually see him is worthy to be his wife. Many girls (including the protagonist's wicked older sisters) try, some even lying. But the only one who can actually see him is a kindhearted and shy girl who goes by Oochigeaskw ("Little Burnt One," or "Rough-Faced Girl," because her sisters pushed her face into the embers of their fire.)
* An invoked example from the same series comes from the space fortress Libra's
* an involuntary example imagery for the TV spots etc, and didn't want to have to start over from scratch. A compromise was reached by spelling the name phonetically, and the rest is history. The fact that it looks vaguely Gaelic doesn't hurt either.
* An iPod touch can manage to survive being submerged in water for ~five minutes with minimal damage, which kind of shows how fickle they can be when faced with H2O.
* An Iranian journalist who was imprisoned following the 2009 election riots said that his jailer/interrogator was obsessed with New Jersey, which he saw as some sort of capitalist American paradise and was intensely jealous that the journalist had been there. Neither the journalist nor
* An Iranian Lemon64 user called Ali Pouladi became rather famous for his negative reviews. He also made positive reviews (even if he attracted controversy for the fact that he considered
* An irate spectator is yelling "Kill the umpire! Get'im outta there! Kill the umpire!" and suddenly a gunshot rings out and the guy looks pale. He and the rest of the spectators then stand up and doff their hats as the now dead umpire is taken out of the stadium offscreen.
* an Irish car thief falling victim to a humorous aversion. While he was clearly smart enough not to try and punch the window with his hand, he picked up a brick and threw it at the window. The brick at this point bounced off the window and into his head, knocking him out. By the time the officers found him, they were apparently laughing their arses off.
* An Irish mother is teaching her son her recipe for bean soup. She tells him to add exactly 239 beans. He asks her why. "Because if you add just one more bean, it'll be too farty."
* An Irish radio ad for a glazier boasts that their windows are 64% "better".
* an Irish teenager sued his former football club. The boy's father was the team's former coach, and behind the scenes, he complained to the club's board and even unsuccessfully attempted to bring a vote of no confidence in the team's current coach. Unsurprisingly, the judge ruled in the club's favour, and he saw exactly what was going on, explicitly telling the boy's father to distance himself from his son's sporting career.
* An Irish Young Scientist Exhibition stand once concluded that eating cheese before bed did cause nightmares, even though the students behind the stand were skeptical of the saying from the outset.
* , an Irken, is the biological mother of both Dib and Gaz (albeit only in the sense that she combined her DNA with the human Membrane's).
* "An iron flute with dazzling ornamentation. Also useful as an instrument."
* an ironic nickname for the Volkssturm: "Gulash". Because it consisted of old meat and fresh vegetables...
* An ironic self-depreciation occurs in the preface to the print version of book 4, "Don't Split the Party". It features a helpful diagram of the comic's
* An Island Called Moreau has World War III happening in the mid-1980s between the USSR and "its Middle East allies" against NATO, Israel and China.

* An isolated example with "Blow Me Away". It is well remembered for its association with
* An ISOT in Grimdark: Inverted. The Renegade German faction adopts one of these from the Dark Elves, but to everyone's surprise quickly turns it around into a professional and effective military force, thanks in no small part to proper discipline, training, tactics, and weaponry.
* An Israeli Air Force F-15, during a 1983 training exercise, lost one wing in a mid-air collision. Pilot Zivi Nedivi increased throttle to maintain control, actually succeeded (due to the F-15's wide airframe giving it a half-decent lifting-body effect) and attempted a landing — not actually knowing he was missing a wing the whole time. He touched down at over 260 knots (double the normal landing speed), and though he caught the emergency arresting gear it ripped the tailhook off the plane; this slowed the plane enough that he got it stopped 20 feet short of the crash net.
* , an Israeli comic about a group of teenagers (featured in a teen magazine), had a children spin off called "Zbengale" (which featured in a children's magazine).
* An Israeli commercial for a sale offered to the holders of a local credit card in a hotel chain featured a family preparing to move in permanently to a hotel room. In the commercial
* An Israeli commercial for the lottery shows a woman who hires some help with a construction project, and gets
* An Israeli mineral water ad has a woman claim that she looks young thanks exclusively to said water. Then her son comes in and says her plastic surgeon is on the phone.
* Anissa, and expresses regret for her past actions before dying helping to protect the Earth.
* Anissa Jones. This is often cited as a major factor in her eventual death by drug overdose.
* an issue, but the body is brought back to 1945 to keep history flowing.
* An issue of Bart Simpson's solo comic had him stealing a powerful hair growth formula from Professor Frink to prank everyone with. This is after finding out that he's genetically immune to its effects, which he exploits both to handle it without protective gear and as part of the delivery mechanism.
* An issue of Fantastic Four showed Johnny Storm sleeping in his bedroom, which is adorned with Spider-Man merchandise. In particular, he's cuddling a Spider-Man doll. Then there was the time Johnny and Spidey became roommates. Johnny cooked Peter breakfast wearing nothing but boxers and a frilly apron and generally acts like a jealous housewife. In the Ultimate Universe, Johnny Storm ends up once dating Jessica Drew, then the Ultimate Spider-Woman (now the new Ultimate Black Widow), who in this world is a clone of Peter Parker, including memories and personality, but in a female body. The original Peter is pretty horrified by this.
* An issue of Lobo has the Main Man dying and going to the afterlife... only to be reincarnated as an extremely masculine female version of himself.
* an issue of Marceline's "zine" by Lady Rainicorn, a creepy one-pager by the Earl of Lemongrab, and a superhero pastiche by Finn and Jake.
* An issue of Marvel's S.W.O.R.D. had rock aliens going on a rampage because they mistook Mt. Rushmore for a
* An issue that explores all the backstories of the secondary characters in
* Anita Blake (although, it implied, it often is), theoretically the triumvirs could just be very close friends.
* Anita Blake, and revokes his invitation. Cue a mystical gust of wind blowing him out of her apartment and slamming the door behind him with all the ire that she would have used herself.
* Anita Blake book series, the police squad the titular character works with is the Regional Preternatural Investigation Team (RPIT), nicknamed "Rip It" or simply "The Spook Squad".
* Anita Blake books, where the supernatural is known to exist, there is occasional mention of the last time a witch was burned in the U.S. — in the 1950s. It was captured on photograph, and the photographer got a Pulitzer Prize out of it.

Anita wonders if a Pulitzer makes the nightmares easier to live with. Possibly justified, as popular assumption might have been that witches were burned in that universe, much as it is in ours.
* Anita Blake book, the parents of a dead girl ask Anita to do this for them before their daughter rises as a vampire.
* Anita Blake briefly tries to date a fellow animator, only to run into this trope.
* Anita Blake example) is so extreme that it's more like a before-the-fact Actual Plot Tumor on a larger and more bulbous Romantic... thing.
* Anita Blake. Harley was a maniac, and Olaf would disassemble his female targets and eat them.
* Anita Blake has Edward as this to Anita. Or at least that's one of the rumors. "I heard he was more like your Svengali," is the response of one Las Vegas cop to Anita referring to Edward first as her partner and then as her "rabbi" (mentor, one assumes).
* Anita Blake. In addition to being a love triangle, the metaphysical bonds formed between the human necromancer, the vampire, and the werewolf makes all of them more powerful.
* Anita Blake: In addition to raising the dead, she's a Federal Marshal, and consults with the local police force's preternatural task force.
* Anita Blake: In the later novels, the main force driving the plot is Anita's need to add more men to her harem.
* Anita Blake is a licensed necromancer who often uses her powers to interrogate the dead (when she isn't busy sexing them up for one contrived reason or another).
* Anita Blake is shaken up by doing some "major magic" with a werewolf and drops her machismo long enough to let Jean-Claude carry her this way. Both think it's kind of romantic until Anita notices... something... about Jason's pants....
* Anita Blake Knowing Jean-Claude, it was probably something a little more subtle than that. Probably.
* Anita Blake Master of St Louis, and later Valentina. The latter was turned by a vampire pedophile who was killed when the other vampires found out what he was doing. Turning children for any reason is forbidden by the Vampire Council because the child vampires usually go crazy. Bartolomé as well, although he is an adolescent.
* Anita Blake: Most all of the security/bodyguards and assassins in the series, including Claudia and Edward, up to the point that many of them, unless you are actively trying to hurt them, won't kill you unless they are get paid for it. That would be giving out their services for free.
* Anita Blake(!) Nathaniel was probably this way before becoming a wereleopard, having been a child prostitute, raped, and a drug addict, not to mention living in an abusive home before all that. Dominant natures are not created by gaining the ability to shift shape. When you consider he's first introduced at age seventeen or so, and all this has already happened to him... It makes more sense.
* Anita Blake novel: Religious symbols will only harm vampires if the person wielding it actually believes in it.
* Anita Blake novels Anita, Edward (or rather his legal identity, Ted Forrester) and other licensed vampire slayers are granted federal marshal status, mainly to take care of the legal hassles of a slayer chasing a vamp over state lines. Actually one of her more plausible upgrades.
* Anita Blake often involves raising the dead to settle estate matters. Zombies can be raised to settle things like disputes over which version of a will is accurate or not, but they make terrible witnesses in court cases, since they can really only respond to the animator who raised them, and the animator has to ask very specific questions, thus opening them to objections for leading the witness. Zombies are also useless when they've been murdered, as a murdered zombie will, no matter how powerful the animator who raised them is, beeline straight for their murderer and attempt to kill them. It might be useful for the police to track down the killer, but not exactly admissible evidence in a court of law (to say nothing of potential countersuits for siccing a mad zombie on someone without due process).
* Anita Blake of them are starting to transform and abruptly breaks away from their

tryst-in-progress.
* Anita Blake on steroids in order to distract a group of men. Anita points out that said character has the most Common Superpower so all said character has to do is do up her hair.
* Anita Blake picking up new wereanimals, so this probably isn't going to stop any time soon. And breaking the link between vampire and servant is severely damaging to both parties, but if the human dies that means the vampire is hurt and maybe goes insane, and if the vampire dies an unshielded human will die or go insane.
* Anita Blake reacts this way to everything. No matter how shocking, horrific or terrible the event, she reacts by opening her mouth slightly and looking perturbed.
* Anita Blake series fit this trope except for Richard and a couple of others. Most of them are swooningly subservient, have feminine faces, slender bodies and long flowing hair.
* Anita Blake series, owns and runs a fully functioning vampire circus, clowns with fangs and all.
* Anita Blake series Preternatural Biology, the study of preternatural (magic/paranormal) creatures, like dragons, yeti, vampires, what have you. It's actually portrayed fairly realistically (for instance dragons aren't magic exactly and don't breathe fire, they are giant lizards, many of them hunted to extinction, and trolls are a kind of primate closely related to humans).
* Anita Blake series, the serial killer Olaf develops the hots for Anita after seeing how efficiently and ruthlessly she kills vampires.
* Anita Blake suffers from this in regards to Anita's sex life and sexually-fueled magical powers, to the point where the longest book in the series to-date barely managed to get out of the bed, to say nothing of the bedroom.
* Anita Blake, the eponymous heroine of Laurell K. Hamilton's monster hunting series, although as the harem gets bigger it seems to be less and less unwanted. When it was just a vampire and a werewolf she was stressing over it.
* Anita Blake turn him: It's stated that he was turned by another vampire whose Master of the City essentially pimped him out. However, Belle as the head of her line is a "mother" or at least ancestor to all the vamps of her bloodline so it still can apply.
* Anita Blake Vampire Hunter: All sorts of werebeasts - including leopards, tigers and hyenas - show up and sometimes have important roles in the books.
* Anita Blake Vampire Hunter men with supernatural powers and inhuman combat prowess who are completely devoted to them and wish to cater to their every whim. And both of them eventually find that they've got a destiny as the saviors of the supernatural.
* Anita Blake Vampire Hunter novel. Justified as Anita's occupation is to raise zombies from graves.
* Anita Blake Vampire Hunter: People with psychic or magic abilities (in this universe, acknowledged as the same, the only difference is if you need a ritual to use it) in the military, and also the police force, are called "wizards". They are normal soldiers or cops, but just have a 'special skill', the same as 'snipers' are normal soldiers, they just have sniper training that other soldiers don't. There isn't much information as to what they do in the military, but their primary purpose seems to be sensing enemy magic users or preternatural creatures and what they are doing with their magic, since magic in this universe is much more subtle than others (hurling lightning bolts is not a thing that most magic users can do). Some also have special talents to help them sense what others have experienced or if someone is telling the truth, which is helpful in investigation. Wizards are also expected to know more about preternatural creatures and magic users so they are the go-to person in their unit for information on how to deal with them.
* Anita Blake Vampire Hunter series, the chaste heroine was engaged to marry her college sweetheart. However, his wealthy parents objected to her being half-Mexican and the engagement was broken. This left her cynical about romance, but primed for a non-human menage-a-trois with Jean Claude the vampire and Richard the werewolf. And then, once she gets started... "Katie, bar the door."
* Anita Blake Vampire Hunter that the most appropriate level of response is more

angst.
* Anita Blake Vampire Hunter, you have the rodere, groups of giant wererats. As if that wasn't frightening enough, they can call regular rats to an extent to horde around them, and so can some vampires.
* Anita Blake Vampire Novel series, in which the main character Anita often has problems with this trope seeing as about 99% of the people surrounding her are gorgeous supernatural men who want to get into her pants.
* Anita Blake version of this. She hates vampires but will not blame a vampire for a crime he did not commit.
* Anita Blake with any of their clients), he actually threatens to leave the triangle if Anita didn't start sexually using and abusing him like he wanted her to.
* Anita Bryant's campaign against gay rights laws in Florida was literally known as "Save Our Children."
* Anita Bryant's mid-70s orange juice commercials are notable not for the content of the ads themselves, but because her anti-gay stance at the time resulted in a massive backlash and a boycott of Florida oranges forcing the Florida Orange Growers Association to pull the ads.
* Anita is this to vampires as told by Jean-Claude, who is the Master Vampire of St. Louis. "To us, you are the boogeyman who snatches young foolish vampires." Or something like that. And when she executed a were serial killer in the middle of a mall in front of small children who looked horrified that she was going to kill him after she strolled up to him in the food court. Then she snaps at a werewolf who annoyed her on the phone, who breaks down in tears and blubbers for her not to kill her. It helps she's a licensed Executioner who can kill vampires and weres legally. Oh, and one of the most powerful necromancers in the United States.
* An Italian comedy show once had a sketch featuring an interview with a woman with a wandering G-spot.
* An Italian Donald Duck comic story had Daisy Duck and her friends eating madeleine cookies. One of the friends remarked "The memories they awaken..." If you're a fan of
* An Italian peasant woman deals with soldiers who claimed that the actual text of Catch-22 did not have to be revealed when carrying out orders related to it, meaning that "they have a right to do anything we can't stop them from doing." (In simple terms, "We don't have to provide a citation of the rule that allows us to do this because the rule that we're claiming allows us to do this says we don't have to provide a citation of it.")
* An Italian pop band founded in 1994 is named "Dirotta Su Cuba" ("Hijack Towards Cuba")
* An Italian soccer team has embraced a variation of this trope, but with donkeys instead of pigs. Verona hosts two soccer teams: Hellas Verona and Chievo Verona. In the past decades, the first team used to play in Serie A, while the second used to play in Serie B. Supporters of Hellas Verona even made a rhyme about this:
* Anita Rachvelishvili, a mezzo-soprano from Georgia, had grown up in a poor family in Tbilisi during the violent War for Independence in the 1990s and often had no food, water, or electricity. After making her breakthrough as the title role of Bizet's
* An Itch In Time apply this with the line "Well, now I've seen everything!"
* An Itchy and Scratchy cartoon in "Deep Space Homer" has the cat and mouse duo go into space. Scratchy's head blows up like a balloon; it explodes when Itchy pricks it with a pin.
* An item can only be labeled "chocolate" if it contains both cocoa solids or powder
* Aniverse. In the "Boring" dimension, there's Tokyo Prime, a universe where Tokyo is the center of everything, but nothing ever happens there, and so on.
* Anjelica Huston tried out for the role of Kathleen Moore. She got the smaller role of Edna.
* Anjette Lyles and a mother-in-law, and apparently was willing to kill her other daughter Carla. All for the life insurance money she got each time.

* Anji the Destroyer) are Enishi's Brutes during the final arc of the manga.
* Anjren, while in her robot suit, can charge up and fire balls of lightning.
* Anjren, while in her robot suit, can send out a sideways cyclone from her chest cavity.
* Anke Engelke's success had also been massive but relatively brief, and both Ricky's solo career and the later reunion were particularly short-lived.
* Ankha, a snooty cat villager, has a design heavily inspired by Cleopatra, right down to having a house that resembles the inside of a pyramid. Her species is also a reference to the fact that Egyptians worshipped cats. Her English name is based on "ankh", which is s hieroglyphic character that means "life", her Japanese name is "Nairu", which is a reference to the river Nile, her Italian, Korean and French names reference Cleopatra, and lastly her French name is "Neferti", which is derived from Queen Nefertiti.
* Ankha (who does have super strength) kills Carrie this way while Meriem is paralysed and can only watch helplessly in
* Ankhegs are large burrowing insects that look a bit like giant rove beetles and are able to spew acid from their mandibles.
* Ankh-Mopork's criminal elements, in later books, start using stink bombs to make a scene so smelly that picking out the scent of the perp becomes impossible over the stench (since anyone hit by the bomb starts smelling, it also means multiple tracks leading away from the site). The favoured type appears to be concentrate of peppermint, which is overpowering to a werewolf without being physically harmful.
* Ankh-Morpork being One of Vetinari's rewards for Vimes was rehabilitating his ancestor's memory and commissioning a statue of him; it's the only one not graffitied in the city because no one wants to see Vimes' reaction on finding out it was vandalized.
* Ankh-Morpork citizens are known for a certain amount of literal-mindedness, if not so much as the dwarfish race in general is.
* Ankh-Morpork City Watch armor is described as "a museum exhibit of
* Ankh-Morpork from the square from which it entered the Slurks that the Assassin can turn up again. The player can change plans suddenly.
* Ankh-Morpork has a low rate of murder but a high rate of suicide. This is because there are many more ways to legally commit suicide in Ankh-Morpork than elsewhere in the Disc. These include
* Ankh-Morpork has had its share of unbalanced rulers as well, like King Ludwig the Tree, who once issued a royal proclamation on the need to develop a new type of frog and thought up the city motto "Quanti Canicula Ille In Fenestra" (which is
* Ankh-Morpork has The Shades, which is such a dangerous neighborhood that in
* Ankh-Morporkians, in particular, are infamous for their literal-mindedness when it comes to metaphors, and former ruler Olaf Quimby II even wrote a law requiring all metaphors to be able to be made literal. The law still exists, and the current ruler enforces it in order to keep that sort of people occupied. In Quimby's memory, the Morporkians still say "the pen is mightier than a sword" with the addition, "but only if the pen is very sharp and sword very small". Apparently, the king had demanded an unusually smart poet to prove the phrase on himself.
* Ankh-Morpork is also the home of the delightful new form of medicine known as
* Ankh-Morpork is concisely plotted, but everywhere else can be pretty vague. Fortunately, any possible continuity errors were explained away in
* Ankh-Morpork is full of small diners, with Harga's House of Ribs being one of the more well-known ones, and actually relatively sophisticated, offering a full menu and coffee. Others include Gimlet's Hole Food Delicatessen, a dwarf joint that serves fried rat, and the Curry Gardens, a
* Ankh-Morpork's shortest-reigning king was Loyala the Aargh, at 1.4 seconds.
* Ankh-Morpork Times one of the only people on the Disc who can regularly flummox Lord Vetinari. Vetinari enjoys the pastime but keeps his most likely suspect for "Puzzler" under discreet observation.
* Ankh-Morpork, Vimes expects a tactic just like this... so he boards up the basements around the barricade ahead of time.
* Ankh-Morpork Watch, which leads to a misunderstanding early on ("Is it because

I'm a w...") Boyfriend Carrot mentions that he tends to stay out of the way around a full moon.
* Ankh Robot Gunchest. Oh, but they're no ordinary guns, they fire pretty big beams. When he finally makes use of them, it's pretty sweet.
* Ankle Drag: A character is dragged to their unfortunate end by their ankles.
* ankles. At one point, he's irate because a rematch with Shobu causes him to miss a hairstylist appointment.
* Anko Itosu,, and then Itosu helped revive the unconscious Judo champion.
* Ankoku Kishi Monogatari, the protagonist view comes from the side of Demon King Modes and his army. The primary antagonists are the Hero Party summoned by "The god of Wisdom" Rena. In order to survive the one-sided armed invasion, he summons Kuroki as his champion.
* Ankou, from the folklore of Brittany, is a skeleton in a black robe who uses his scythe to collect the dead, and may have been an inspiration for the modern Reaper.
* Ankur Kingdom Of The Gods" has this as a major part of the setting. Taking place millennia in earth's past, aliens colonize earth to mine for gold and created humans as a workforce. While most humans in the city-states are not slaves, they are forced to live at a mostly bronze age level under a feudal system ruled by alien nobles.
* Ankylosaurus as well, it’s thick armor and short legs meant that it wasn’t a fast dinosaur, but it is often called “The Living Tank” for a reason, at the end of its tail was a 250 lb lump of bone called a club, which could be swung at an attacker, and could shatter the bones of even The Mighty T. rex.
* Ankylosaurus makes her presence known. They then fly into a panic when she starts attacking.
* Anla'Shok fame were known to train their warriors to exploit Intimidation and Dread.
* Anla'shok Na. The title originated with Valen himself, and only Sinclair, Delenn, and Sheridan have held it since.
* An M&M commercial had Red demonstrating a new variety or feature by putting his partner Yellow
* An more distant example also comes from the OVA, where a woman and her child are crushed by a mobile suit-sized shell casing. The same thing happens in
* An more straightforward interpretation is that "the other things" are "that stuff I already mentioned but don't feel like repeating, to wit, climbing the highest mountain, flying the Atlantic, etc."
* Anna (after she returned to normal) is another example, being unable to solve basic mathematical problems.
* Anna Akana admits in the video "How to Get Fired from Phone Sex" that the word "penis" makes her giggle.
* Anna Akana Ruins Lives" demonstrates some of the dangers of placing catching Pokémon as the utmost importance.
* Anna also had a powerful Reishi ability as a child. By the time she first met Yoh in person, it was causing her to accidentally manifest demons when she was around other people. She lost her Reishi powers not long after that meeting, sealing it herself after
* Anna & Bella: A wedge is driven between the two sisters for the first time when the young man that Anna is sweet on winds up going out with Bella.
* Anna & Bella: Bella's sex with and orgasm from the handsome young man is symbolized by them flying up to space together and circling the moon, followed by Bella descending to earth with a dreamy look on her face.
* Anna & Bella in which two elderly sisters flip through their photo album and laugh, with the story of their lives being told in a series of flashbacks. At the end, a servant enters to call the ladies to dinner—then turns around and flies away with the wings sticking out of her back. Anna and Bella then follow her, flapping their wings. They are both angels in heaven.
* Anna and Elsa's parents are only alive for the first 15 minutes. Yet their isolation of the sisters causes the entire plot of the movie.

* Anna and Elsa were raised in seclusion their whole lives and didn't have any friends throughout their childhoods. This may be why Anna was so naive to the point that she was willing to marry Hans, a guy she just met
* Anna and the Apocalypse and hits it on the top of the head, which is protected by a hard hat, rather than aiming for the face, which ends poorly for him.
* Anna and the Apocalypse between Tony and Anna, was cut because of pacing, but is an extra in the Blu-ray release.
* Anna and the Apocalypse Chris and Lisa form this nicely, with Chris being a film geek while one reviewer called Lisa a budding cabaret performer.
* Anna and the Apocalypse demonstrates how he's aware that she probably doesn't return it. He takes it maturely and doesn't push her.
* Anna and the Apocalypse is breaking out in the background, with the main character obliviously singing it as her neighbors are being torn apart or running for their lives.
* Anna and the Apocalypse — a zombie musical set at Christmas. The titular heroine wields a candy cane lawn ornament as a zombie-bashing weapon.
* Anna and the Apocalypse musical number), Lisa is a pretty huggable character.
* Anna and the Apocalypse: The two students performing "The Fish Wrap" are dressed as penguins. Subverted in their second appearance, when they've been zombified and look pretty creepy.
* Anna and the Apocalypse This is where Anna gets her first kill in the movie. She stays there with John for a little while afterwords in order to figure just what the heck they're going to do.
* Anna and the Apocalypse were created thanks to a virus (which is briefly mentioned in the beginning) and are of the "shambling, flesh-craving corpse" variety. The infection is spread when a zombie bites a human with or without killing them, and they can be killed permanently by destroying the brain.
* Anna and the King of Siam ends up getting banned in that country. The fundamental problem here is that no matter how respectfully and positively modern filmmakers may portray the King, the basic story still implies that Thailand is a backwards country filled with people who need someone from the West to civilize them.
* Anna And The King Of Siam has given us one Broadway musical, four movies (two of which are based on the musical), and a short-lived sitcom.
* Anna: Anna uses the corpse of a large man she just killed as a human shield while in a gunfight.
* Anna: As part of her modeling work, a lot of other attractive models are seen with Anna.
* Anna Baragli gives Eddie a cappuccino laced with the sedative ethyl chloride. After he drinks it, he falls asleep instantly.
* Anna becomes solid ice after being struck in the heart with Elsa's ice powers.
* Annabella Sciorra auditioned for Janice Soprano. She was later cast as Gloria Trillo.
* Annabelle: Creation Linda and Janice recall sneaking through their old orphanage and pilfering candy at night to the point that their caretaker thought that the house was full of mice.
* Annabelle: Creation: Made in 2017 and set in 1955, the final scene is set in 1967.
* Annabelle: Creation: The late Annabelle Higgins has a suspiciously accurate recreation of her own house in the form of a dollhouse in her bedroom. While protagonist Janet is observing the dead girl's dolls and dollhouse, a demon posing as Annabelle's ghost tries to take her soul.
* Annabelle Lennox is kidnapped by Laserbeak and Starscream so that the Autobots will be distracted with trying to get her back.
* Annabelle's Wish depicts reindeer with button noses instead of moose-like snouts that they have in real life.
* Annabelle. That didn't stop them from raking up as much money as other films in the franchise that did earn praise.
* Annabelle the Haunted Doll. When a medium was consulted, she said that the doll was being inhabited by the harmless spirit of a girl named Annabelle who died on

the property, and Donna and her roommate felt compassion for the spirit. However, Annabelle the Doll was not what she seemed as she reportedly violently attacked one of Donna's friends. After two incidents, the famous paranormal investigators Ed and Lorraine Warren were consulted and eventually came to the conclusion that the doll was being haunted not by the spirit of a little girl, but by a demon. The doll was eventually relocated to the Warren Occult Museum in Moodus, Connecticut, where it is reported that the doll still moves and growls at visitors on occasion from behind its glass case.
* Annabeth and Piper are vaguely implied to be attracted to each other despite their canon boyfriends. Piper mentions that her charmspeak power only works on people that are attracted to her, and Annabeth mentions that it takes a lot of willpower to resist it. Piper also mentions how pretty Annabeth is multiple times.
* Anna Bolena ("Anne Boleyn"), the historical Henry Percy has his first name changed to Riccardo to avoid confusion with King Enrico/Henry VIII.
* Anna Bolena is very loosely based on the real-life Anne Boleyn. In fact, Riccardo Percy, her lover, was actually a judge at Anne Boleyn's trial in real life. And while Anne Boleyn was executed for her inability to give Henry VIII a male heir, Anna Bolena is executed because Enrico has fallen in love with another woman, Giovanna Seymour (Jane Seymour).
* Anna Bolena spends the first half of her opera praising the faithfulness of her friend, Giovanna Seymour. Meanwhile, she curses the woman who has stolen Enrico's love from her. But the audience knows from the very first scene that Giovanna
* Anna breaks up with Nitori near the end of middle school after it really hits her that
* Anna Brisbin - A voice impressionist YouTuber, geek and voice actress.
* Anna Brisbin: Known on YouTube as Brizzy Voices. Voice actress, voice impressionist and avid gamer.
* Anna brushes a lock of hair behind her ear whenever she feels nervous or embarrassed. She also bites her lower lip a dozen times throughout the movie.
* Anna Chapman, the gorgeous hot chick, turned out to be a spy for the Russians. Along with
* Anna Chapman, the Russian spy who lived in Britain, who was a well-known example of
* Anna Chase of v4 seems particularly fond of psychological horror and slasher movies and can be described as a bit obsessed over them at times. It has been shown that on a couple of occasions if something reminds her of a horror movie she could easily have a "Cool!" type reaction, though not always. Occasionally, this, combined with her normal
* Anna curtsies when introducing herself to Hans and when she introduces Hans to Elsa.
* Anna does this all the time, making "wait, what?" something of her catchphrase. It's actually a quirk of her voice actress that was adapted in.
* Anna Draper, widow of the real Don Draper is free-spirited and warm. She has a sister who is sour and uptight.
* Anna dreams about her parents dying while Hans tries to kill her with a sword.
* Anna Dressed in Blood: A ghost-hunting teenage boy travels to a new town to dispatch a particularly troublesome ghost. They fall in love instead.
* Anna, Eddie and Tommy are paralyzed instantly by curare-tipped blowgun darts. Subverted by
* Anna Faris that she told the casting people she was a natural brunette. No doubt she knew what happens to blondes in horror movies.
* Anna figures out Keaton is onto her as he notes how he tends to clench his fists whenever telling a lie or hearing her tell one.
* Anna Fulford is a very young and very beautiful blonde with curly hair. She intuitively recognized that Detective Murdoch (suffering from
* Anna Galactic, are even weirder. There's a lot of wild speculation from the human protagonists about whether their attempts to communicate are having any effect at all.
* Anna Galactic: Dilvan Ceylon has been a veteran of a war and he has troubles

trying to cope with it.
* Anna Galactic. Of the main human characters, only Foxglove is white, while Anna and Teapot aren't.
* Anna gets a period of this after her younger brother Harvey's death, due to having encouraged him to take care of things himself and rely on others as little as possible.
* Anna gets one as well. First her beloved sister shuts her out without any explanation (Elsa's powers are erased from her mind and kept secret from her), she's locked up in the castle as well — also without explanation, and becomes so lonely that she starts talking to paintings for company. Then she becomes an orphan and has to attend her parents' funeral alone, with her only remaining family still ignoring her without explanation. Then in the space of a day she has to endure her sister refusing her to marry
* Anna gets struck in the head with Elsa's ice magic, so the sisters are separated for thirteen years to keep Anna from getting harmed again. Due to Anna's memories of the incident getting erased, she has no idea why Elsa shuts her out. A lot of the film's conflict (especially regarding Elsa's glove and the major argument between the two sisters over Anna's impromptu engagement to Hans) might have been avoided if Elsa or their parents had just told Anna about Elsa's powers when they felt she was old enough. One gets the idea that Elsa was ordered specifically not to tell her, and it seems to be suggested
* Anna Goanna difficulty, her name-personalized cracked sash sold in-game for multiple high-value items.
* Ann agrees to give GOB some space in Season 4. Unluckily, she takes it literally).
* Anna himself is equipped with three Breaker skills, Sol, Luna, and nearly maxed stats making him quite a challenge to defeat.
* Anna Hutchinson had to cut and dye her long blonde hair brown and into a mullet for her role in the soap opera
* Anna, indicating she's likely bisexual if this was legitimate attraction.
* "Anna is becoming lost in the loneliness of her own world when she discovers she can visit another, a house she has drawn herself and occupied by a young disabled boy. But as she discovers more of the links between her fantasy world and the mundane present, she is drawn only deeper into a dream turning into a nightmare. "
* Anna is increasingly absent from episodes she has no large role in, culminating in her being
* Anna Jarvis, the creator of Mother's Day, resented the commercialization the holiday brought and was even
* Annaka has her big "EEEEEEEEEEEEEEEH?" that she does with regularity.
* Anna Karenina, include random bursts of French from certain characters. Learning French was considered part of a "respectable" education for the Russian nobility at the time, so it was a marker of status for people to be able to converse freely in French. In particular, it's used when well-off characters discuss things they don't want the servants to know.
* Anna Karenina is 'Happy families are all alike, but unhappy families are each unhappy in their own way.' You just can't squeeze 700+ pages out of happy families.
* Anna Karenina, the character of Konstantin Dmitrievitch Levin is an Author Avatar: Tolstoy and his wife courted using the "letters game" that Levin and Kitty used in the novel. Also, Levin's musings on philosophy reflects Tolstoy's own internal debates at the time, and his idea of economic reforms that could be enacted to improve the Russian Empire's agricultural efficiencies were those suggested by Levin.
* Anna Kournikova was considered by many to be the surprise package at the 1997 Wimbledon tournament, getting through to the semi-finals despite not being seeded. Afterwards, while she did not too badly as part of a doubles team with Martina Hingis, her solo career was almost without exception a complete disaster until her eventual retirement in 2003. While she remains one of the most publicly well-known female tennis players of the modern era, among serious fans of the sport she's
* Annala's family is pretty high status in Dnnac Ledo (her mom is an R&D

company CEO, her dad's an ambassador, and her aunt is the police chief) while Eric is a
* Annal of Emergency Medicine. 1988 Aug;17(8):872). AKA shoving a finger up someone's asshole to treat a week-long bout of hiccups.
* Annals Of Darkness, Tom Marcinek takes a blow from a Neoshadow meant for Namine, when neither she nor Roxas noticed it because they couldn't stop fighting.
* Annals of Improbable Research has a long list of authors, many of which are dubiously disguised names of celebrities past and present. The actual text of the article? "So far as we can determine, peanut butter has no effect on the rotation of the earth." That's it.
* Annals of Improbable Research One of the paper's three authors, a "relatively inexperienced researcher (t=0.9167 yr)", is the 11-month-old daughter of the other two authors, and blue, green, yellow, orange and red toy rings are described as "five toroids of different radii having mean reflected photon energies of 2.76, 2.43, 2.18, 1.97, and 1.80 eV."
* Annals of Improbable Research ran fake ads for HMO Black (later HMO-NO), which advertised its avaricious health care plans with the too-honest slogan: "Because we care about you, and your pocketbook."
* Annals of the Western Shore Alloc still considers himself to be the Number Two even though Orrec is mostly just agreeing with his suggestions.
* Annals of the Western Shore by offering a mentally disabled niece as Orrec's bride. In the lowland city-states, marriages between great families are arranged for the usual land/money/political purposes.
* Annals of the Western Shore. Gender seems to influence the division of labor, but they lack the sexism seen elsewhere. Namely the Uplands (the setting of the first book) where women can be clan leaders, and Ansul, where women used to have pretty good rights until the Alds took over.
* Annals of the Western Shore gives its holder the potential to be this. It's often used to call animals so they can be hunted more easily, but Gry refuses to use it for that purpose and remains squarely within this trope.
* Annals of the Western Shore, has Emmon the lowlander asking Orrec and Gry about the titular "gifts" of the Upland domains, which allows them to tell the audience about them and how they shape society.
* Annals of the Western Shore, it's done for the standard political and financial reasons.
* Annals of the Western Shore religion, they come down brutally on anyone they catch saluting one of Ansul's many religious statues or shrines.
* Annals of the Western Shore to have one, otherwise it would be Annals of the Eastern Shore.
* Anna Marie points out that a reason Otto was able to have a better personal and business life than Peter was that Otto knew he didn't have to answer
* Anna masturbates with a shower head while thinking of Lucas. When that isn't enough, she has sex with her husband.
* Anna May Wong was made before there was a Best Supporting Actress category - and studio racism preventing her from being a leading lady and limiting the amount of parts she could play.
* Anna May Wong, who was Chinese-American, also played Native American and Polynesian characters in her career.
* Anna mistakenly thinks that "Of The Southern Isles" is Hans's last name, due to that being his title.
* Anna Naklab's cover of "Supergirl" is more popular than the original by
* Anna Navarre and Gunther Hermann are the reverse; the game forces confrontations, and they're immune to any non-lethal damage. Naturally, players immediately started finding ways to spare them (but the game acts as though JC killed them anyway).
* Ann and Mark was possibly an attempt at one of these that led to Mark written off. Mark's only notable traits
* Anna only refers to Elsa as a "stinker" once in the film when she is talking to herself in the middle of the

* Anna Paquin, but her major scene was included on the Blu-Ray release as a deleted scene. A 17-minute longer "Rogue Cut" of the movie was later released on Blu-Ray, which restored her role completely, along with other changes added as well.
* Anna Paquin, film and television actress and the second-youngest Academy Winner ever. She came out as bisexual in 2014.
* Anna Paquin (where her character is a New Zealander who moved to Canada). Some of her most notable Fake Nationality roles include:
* Anna personally goes hunting for her missing sister Elsa, rather than commission soldiers to take on the task; Prince Hans, meanwhile, runs the kingdom for her in her absence. Of course,
* Anna Pigeon. After they lose their map, their trek through the forest with their hostages to the rendezvous point takes days longer than it should, as none of them have any survival or navigation skills. They start to fall prey to paranoia and infighting, which is exacerbated by Anna who is following them and playing mind games to keep them off-balance.
* Anna Pigeon, Anna is working with a fire crew during a wildfire. The crew is caught in a firestorm and retreat into their personal shelters. After the firestorm passes, one of the crew is found stabbed to death inside his shelter, meaning the killer has to have been one of those present when the firestorm hit. Then a rampaging winter storm descends, cutting the survivors off from civilization.
* Anna Pigeon, Heath has herself tied topless to a tree; the plan being that her exposed breasts will distract the kidnapper long enough for Anna to jump him and knock him out.
* Anna Pigeon's body to lure 'Mr. Big' into an ambush; propping it up against one wall of a building and having one of the girls manipulate his arm so he seems to gesture 'Mr. Big' to come to him, so 'Mr. Big' will leave the safety of his plane.
* Anna Pigeon, the first murder is made to appear to be the work of a mountain lion.
* Anna Pihl had an episode concentrating on the Danish "casual" subculture: violent football hooligans modelled after the English firms, also connected to racist crime.
* Annapolis depicts life in the US Naval Academy, although its portrayal is particularly inaccurate.
* Anna pushes Matt into a flour sack which bursts, covering him in it.
* Anna Ripley is also difficult to talk about without revealing that Percy sparing her during the Briarwood arc had major consequences, with her coming back later on seeking the
* Anna Russell, in which her character introduces "that magnificent pianist, Miss ... er ... Miss Hamburger."
* Anna Russell's "A Practical Banana Promotion" included not only "Eta Banana," a parody of the Chiquita jingle, but also "Alas, What Should I Do," which sounds like just a rather mushy ballad when played the first time, but with subliminal advertising supposedly included. The song is repeated to reveal many contemporary (1950s) commercial jingles and slogans.
* Anna Russell's coloratura aria parodies "Canto dolciamente Pipo" and "O gentle bird with feathered breast" end with cadenzas that are obviously going to end on notes high above the staff, except that, after a few seconds of breathing (and, in the case of "Pipo", with an audible mutter of "Oh, the heck with it"), she instead sings her final note two or three octaves lower.
* Anna Russell's "How to Write Your Own Gilbert and Sullivan Opera" spoofs (along with every other G&S trope) the tendency of "the liitle man who sings the patter song" to end up with "the big fat contralto". Dandelion (the aforementioned "big fat contralto") even sings about it in the final number, although it appears it will come as a surprise to Claude Billy Bunion ("the little man who sings the patter song").
* Anna Smith, a head maid, falls in love with and later marries John Bates, the valet to the Earl. He is about two decades older than her. He is troubled by his past, but they are both very happy together. In one scene, one of the ladies asks Anna about their marriage, especially if their age difference causes any problems.

* AnnaSophia Robb but did the surfing scenes herself. It is convenient to have a one-armed surfer playing the part of a one-armed surfer.
* Anna spent most of her childhood playing in the halls and imagining talking to the pictures. So she recognizes Mattias from them easily.
* Anna's song "The Next Right Thing" shows her overwhelmed with grief, yet finding the strength to carry on with the mission one step at a time after
* Anna's Story. Alternatively (and a bit more generously to Anna's friends, who were mostly guilty of little more than naivete and inexperience), if you're going to take drugs, make sure you and the people you're with know what the potential consequences are and what the best course of action to take in case of something going wrong is.
* Anna. The latter has spent years double dating with her best (and, she later admits, only) female friend while wondering why she hates all her bestie's boyfriends and can't ever make it last with her own. Things click for her towards the end of the game.
* Anna Torv. Considering that she shares scenes with one of the Largest Hams known to mankind, which is sure to emphasize any poor attempts at more subtle expressions in others. She's gotten a bit better with it though.
* Anna tries climbing a rock cliff all by herself with no gear, all the while bickering with Kristoff. After much effort, she asks "Please tell me I'm almost there!" and the camera cuts back to show that Anna has only managed to get five feet up. Thankfully, that's when Olaf returns telling them he's found a staircase to Elsa's ice castle.
* Anna und die Liebe and get a British-style cab right to heaven or you can just on your way to the cab turn your head to your loved ones and then stay on earth for eternity with invisibility and teleporting powers which would grant you unlimited freedom. Even when you are bored with that you would only need to find another ghost who is about to go into his cab to afterlife. The only downside is that this seems to be reserved only for people that would go into heaven, as when the only evil character died there were only stairs down to hell in a bright room with no escape.
* Annawake Fourkiller, the merciless Cherokee attorney from the novel
* Anna Williams, the former being the second-in-command of G Corporation and the latter commanding his army.
* Anna would give up being an angel for being human. He's not totally swayed by her reasons, but he agrees that sex is pretty cool. Castiel also thinks humans are okay, and considers each of them to be works of art, being created by God. Also, because angels and humans were created by God, he considers the idea that humans are inferior to be close to blasphemy.
* Ann Cassandra. The main characters, Kizaki and Nanaki, strive to prevent the predictions of calamity they have from occurring. In particular, Kizaki knows that he is predicted to die at the age of 20, which drives him to disrupt predictions in the hope that doing so will enable him to avert his own death when the time comes. At the same time, Kizaki takes advantage of his destiny by running all kinds of risks in the course of his quest, confident that he won't die until he turns 20 in three years' time.
* Ann Coulter levels of slang and dating black men exclusively, her whole campaign is just a ruse to get money and attention.
* Anne") a brief trip to hell reminds her of her purpose, and she returns to Sunnydale. This after getting kicked out of her house and killing her boyfriend in the Season 2 finale, at the start of the episode she is hiding out in LA waiting tables.
* Anne a hammer and a sickle - a long-standing Communist symbol, of the workers uniting and rising up against those exploiting them.
* Anne and Bowen were murdered. After the car was returned, it had 417 additional miles on it. This was the exact distance, round trip, from Groom Lake to the location of the murders. Eric tells the police of Erickson's supposed involvement and he is arrested as an accessory before the fact. This clears the way for Eric to take over the project.

* Anne and Gilbert". In fact, this observation is considered as unremarkable as more mundane truths like "dogs bury bones" and "preachers talk a lot".
* Anne and the main Plantar family do not appear in episodes focusing on Sasha and Grime ("Prison Break", "Toadcatcher", "Barrel's Warhammer").
* Anne Bishop half-brother Lucivar who is about Daemon's age and marries a woman who appears to be only about 300 years old.
* Anne Bishop novels have a Landscape called the Den of Iniquity. Described as a "carnal carnival" it's actually not a bad place, and the villains aren't welcome there.
* Anne Bishop series features the Blood, powerful magic-users who effectively rule over the world, including the non-Blood (called landens). The Territory Queens, supported by their Courts (mostly male), control kingdom-sized areas, with the smaller areas (provinces, cities, villages, etc.) being controlled by less powerful Queens who answer to the Territory Queens. The quality of governance ranges from enlightened to vile corruption.
* Anne Boleyn reflects on this during her time in the Tower of London in
* Anne Bonny and developed a close relationship with Anne Bonny, adds another interesting wrinkle to their story.
* Anne Bonny, Jack Rackham, and Max have a threeway relationship beginning in Season 2.
* Anne Bonny, pirate famous for being a woman disguised as a man. This was rather awkward to say the least. Although it's alternately claimed that Bonny knew all along that Read was a woman, and only Bonny's lover (and captain) Calico Jack Rackham was fooled.
* Anne B. Walsh are known as "the Pack" or "the DA" (the Dangerverse Asylum).
* Anne, Duc de Montmorency (1493-1567), Constable of France and one of the great Catholic military leaders of the Wars of Religion.
* Anne Elliot is courted by William Elliot, her distant cousin who is her father's heir. Mr Elliot knows she loves her home and tries to use its charm to woo Anne, saying he hopes her name might never change. Anne's godmother and friend Lady Russell also brings it up and says she would
* Anne Frank is famous for being a lively chatterbox, much to the chagrin of her math teacher, who punished her by making her write three essays about being one.
* Anne Frank often wrote about having nightmares of her friends imprisoned in concentration camps while she felt safely hidden. Now consider that Frank's family did end up in those camps eventually. Now go a step further, and remember that her father survived, but she did not. Nor did anyone else that was in hiding with her. Nor any of their friends or family who didn't escape before the German occupation.
* Anne Frank: The Diary of a Young Girl, claiming in the rejection slip, "The girl doesn't, it seems to me, have a special perception or feeling which would lift that book above 'curiosity' level." (The name of this publisher has been lost, and more than likely, he kept quiet about it.)
* Anne Frank: The Whole Story. Anne does kiss Peter, but it's a very light mouth kiss and she quickly backs off.
* Anne Frank: The Whole Story. The SD officer who arrests them does show some mild deference when he sees Otto's old war equipment, ordering the other soldiers to wait outside and telling him he can take his time to gather his family's belongings.
* Anne Frank: The Whole Story. When announcing the D-Day landings, the BBC assures those living in occupied Europe that "1944 will be the year of your liberation!"
* Anne gave herself the name Chantarelle to sound more mysterious. She later gets extremely embarrassed after discovering that "Chantarelle" is a type of fungus.
* Anne Geddes photographs of babies dressed as flowers and vegetables.
* Anne hadn’t appeared in the credits at the beginning. For extra irony, the credits are a character montage, so even people who didn’t know the actors name still saw the character would come back.
* Anne Happy every student others than the five main characters are drawn without face.
* Anne Happy, Hibiki has one of the worst senses of direction ever. On several

occasions people have pointed out a destination that's in her sight, and she thanks them, turns around and runs in the opposite direction; she then later blames the people who gave her directions for getting her lost. She always gives herself at least three hours to get to school on account of this.
* Anne Happy: Hibiki swallows water at the beach and loses consciousness, requiring Ren to provide mouth-to-mouth resuscitation. Naturally, it's clean, Hibiki makes a full recovery with no long-lasting injuries, and the focus is on Ren giving Hibiki mouth-to-mouth in the first place.
* Anne Happy is that if she tries to buy something from a vending machine, it will dispense something completely random and gross instead.
* Anne Happy: Main character Anne Hanakoizumi, a.k.a. "Hanako" is incredibly unlucky, to the point that her "luck" measures in the negative. Despite, or possibly because of this, she very frequently experiences surprisingly lucky, even miraculous, events. For instance, her luck class's first assignment is to carry an egg for a day without it breaking. It was expected that, since everyone in the class was unlucky, no one would succeed. However, not only did Hanako succeed, the near-expired store-bought egg hatched a healthy chick in the middle of class.
* Anne Happy that can literally attract females of any species, no males seems to be interested in her so far.
* Anne Happy: There is nothing perverse or sexual about it given her personality, but Ruri is in love with the mascot found in construction sites safety signs.
* Anne Happy to the point that female animals are constantly drawn to her, and thus is often seen followed by cats and dogs or with little birds landing on her shoulders.
* Anne has this effect on people, but not on everyone she meets, and in fact she undergoes great
* Anne Hathaway initially was going to gain ten pounds, but then was told to lose that amount. And she was padded for Andy's pre-makeover scenes.
* Anne Hathaway: Just hours before the ceremony, she found out her dress looked too similar to the one worn by her co-star, Amanda Seyfried, and thus dropped it for another dress that ended up getting her criticized left and right.
* Anne Hathaway that insists that the cause of the crash was pilot error and not mechanical failure. This is because he blames himself for not being at his post and being distracted when the engine caught fire.
* Anne Hathaway which she filmed after). She refuses to say precisely what she did to lose weight because she knows it wasn't safe and she didn't want to risk fans emulating her methods.
* Anne Heche claims (or at least once claimed) to have multiple personalities. Celestia was an embodiment of God, writing essays on love and inventing a
* Anne herself starts out as one; though she winds up with Matthew and Marilla Cuthbert by accident since they wanted to adopt a boy, she improves their lives by being a vivacious handful and they come to love her as their own.
* Anneke Wills, who played the First/Second Doctor companion Polly, says she only realized what she was really a part of when a little girl came up to her and asked her what it was like living inside the TARDIS and if she was scared of the Cybermen.
* Anneliese van der Pol - "Cute Boys with Short Haircuts", from the musical of
* Anne-Marie, English singer who revealed she was attracted to men and women in 2018 but doesn't like to identify herself as bisexual.
* Anne McCaffrey. After the main character gets over her fear of travel she plans to pay a surprise visit to her boss, teleporting into his office. When her second in command tells the boss he arranges to switch off the security that would otherwise fry her the second she arrived (she's not the only teleporter).
* Anne McCaffrey, after the miners take in a little alien girl they institute this, just because they don't want her learning those particular words.
* Anne McCaffrey allows them to end the threat without wiping out the entire species.
* Anne McCaffrey, because the Red Star's gravity (another planet in Pern's solar system) is whats dragging the flesh-eating fungus into their atmosphere.

* Anne McCaffrey began as a short story and took on a life of its own. "One million words later, I'm not allowed to stop!"
* Anne McCaffrey being airless and cold, and if you don't find your way out, you suffocate/freeze).
* Anne McCaffrey books, the Rowan/Afra/Jeff triangle gets resolved in favour of Rowan/Jeff, and Afra is subsequently paired with their daughter Damia.
* Anne McCaffrey. Despite taking place 2,500 years after Pern was colonized, rhymes and puns still work in English, the entire planet speaks one homogenous language and ancient documents from the original colonization of the planet are completely readable by the modern characters. Additionally, a trip back in time several hundred years reveals no linguistic difficulties whatsoever. However, it is noted in later books that both the dolphins and AIVAS have trouble understanding/being understood. Also, Robinton is distressed to discover the language has altered at all, saying that it's the job of the Harpers to make sure the language doesn't change. Oddly, he and other characters assume that the dolphin's grasp of the language is closer to the old form even before checking with AIVAS.
* Anne McCaffrey explanations for the telepathy, teleportation, and telekinesis that let the massive dragons fly with wings too small for their bodies.
* Anne McCaffrey fall from the sky every so often kind of threw a wrench in a few plans....)
* Anne McCaffrey for communication that she used to survive in the slums as a messenger. At one point, it's mentioned that she can speak 93 languages like a native.
* Anne McCaffrey, human settlers on a new world encounter a village of intelligent cats. Both species assume the other is pre-sentient due to the primitive living conditions in each other's colonies. The aliens decide the humans are intelligent based on a child's ability to play games.
* Anne McCaffrey is a popular classical musician of the future. Singing in his style is banned on some planets, because it's too persuasive.
* Anne McCaffrey is a world without religion. The expressions "Jays" and "by all that's holy" are still in use, but only as swears.
* Anne McCaffrey is similarly clueless about the significance of the hero's use of the possessive 'my lady' in addressing her. However on his planet marriage really is just that simple - though equally easy to get out of - not that she wants to.
* Anne McCaffrey, it was first thought that Prime level talents suffered from debilitating vertigo (known as Travel Sickness) if they attempted interplanetary travel. Then along comes Jeff Raven, an untrained Prime from a frontier colony who could bounce around with no ill effects. It was later discovered that the only one of the six known Primes that did have that condition was Siglen, who had an inner ear condition that really did cause her to fall ill. Siglen's giant ego ascribed this to "the burden Primes must bear for their power," rather than have herself checked out. Since Siglen trained or trained with all the rest of the Primes, she mentally pushed her condition on the rest. The Rowan was the only one of the original five young enough to train herself past her conditioning. And then, preferred staying on her home base of Io, Jupiter's moon, unless she had to travel.
* Anne McCaffrey, Larak Raven (younger brother and closest relative of the title character) dies when he absorbs the brunt of a psychic attack meant for another. A good amount of the book is spent establishing that Larak is coming into his own as an adult, contrasting the conflicted, unsatisfied life of his sister.
* Anne McCaffrey, many pre-cogs manifest their powers in their sleep. Unlike most predictions, these can be averted if only you identify the situation. This can be interesting because while they actually see the event, they see no more than a person standing there would; they must work back to identifying locations, people, times, etc.
* Anne McCaffrey. Near the end of the book Killashandra's boyfriend Lars Dahl is given a computer-controlled trial for kidnapping her as well as other charges. She has forgiven him and wants him to be acquitted, but the Judicial Monitor computer's equipment reads her heightened vital signs, misinterprets them as her being afraid of him, and finds him guilty of one of the charges. Eventually he's cleared of the

charge and he and Killashandra get back together.
* Anne McCaffrey-obsessed space ship crew find a planet where magic seems to actually work. Then they discover there's a powerful weather control system built into the planet that can be operated through gestures and "magic words", which the inhabitants have just about broken through their overuse of it as a weapon and source of cheap magic tricks.
* Anne McCaffrey paralyzed, in fact, that he was able to discover his powers by telepathically calling for aid.
* Anne McCaffrey predict a barely averted crisis was because people guessed it might happen and took countermeasures to avert it without the need for precog.
* Anne McCaffrey says that humans always had the ability, but it was only able to be objectively established and properly studied once science produced a "Goosegg" test that measures the relevant brainwaves.
* Anne McCaffrey series are cybernetics carried about as far as possible, with human brains implanted into and in complete control of entire space ships and space stations. It's implied that the human body is still there, but only as a life-support system for the brain.
* Anne McCaffrey series, as multiple characters are shown having more than two children without any difficulty, presumably because practical interstellar travel has solved the crowding/resource issues that made the population control laws necessary in the first place.
* Anne McCaffrey series features the titular sentient planet that communicates via echoes and lightshows in caves, and changing the climate/topography of the land when it's so inclined to benefit its inhabitants or drive off bad guys.
* Anne McCaffrey series has "Looking GLASS", the Galactic Library All-Search System.
* Anne McCaffrey) series. In an advanced interstellar society, psychics with telekinetic powers are used to teleport starships from one solar system to another.
* Anne McCaffrey series is about "shellpeople" who control starships as if they were their bodies, and several of the protagonists are female.
* Anne McCaffrey series: Most of Petaybee's population over a certain age had been modified by the planet, itself, to live comfortably on the planet's sub-Arctic climate — with the nasty drawback that, once so adapted, any prolonged absence from the planet's surface (as little as a couple of days) ends with complete organ shutdown and death. Sean Shongili was further altered to be able to transform into a seal-like creature. (The reason why isn't really explored to any depth.)
* Anne McCaffrey series, the brainship will serve as a mission control for their mobile "brawn" partner when they leave the confines of the ship.
* Anne McCaffrey series, the Catteni come from the planet Catten. One of the characters lampshades this when they discover the capital of the planet is called Cattena.
* Anne McCaffrey series, the Mrdini have a limited ability to manipulate human dreams. This works out quite well for first contact betweeen humanity and Mrdini: they're able to communicate through dreams until they learn enough of each other's language to do so verbally.
* Anne McCaffrey series, the planet used as a relocation camp is named "Botany" by its population, which includes many Australians.
* Anne McCaffrey series, there are "loo-cows" that have six legs in order to constantly pound the ground at night and keep the monsters that live underground at bay.
* Anne McCaffrey short story "Rescue Run" rapes his three daughters to produce grandchildren. Then he rapes his daughters/granddaughters, as do his sons/grandsons.
* Anne McCaffrey's works feature a character named Johnny Green, in memory of her real life close friend of the same name who was tragically murdered.
* Anne McCaffrey's works feature a character named Johnny Green, in memory of her real-life close friend of the same name, who was tragically murdered.
* Anne McCaffrey (Tai) or romantically unfulfilled (Moreta). In-universe, non-dragonriding women can sleep with who they like until they marry, while men

(particularly Lord Holders) retain this privilege even after marriage.
* Anne McCaffrey, that the Center is never abusive. FT&T gets a little exploitative (it's structured more like a for-profit corporation, this was inevitable) but never badly.
* Anne McCaffrey. The gist of the story is a small town doctor notices that a large number of his male patients are having odd symptoms like nausea, weight gain and unusual cravings. The men have nothing in common but visiting a "house of ill repute". After running every test he could think of the doctor finds out the men are pregnant and that the "ladies" have vanished along with the house they were in. It was done with very little horror.....given the subject matter....
* Anne McCaffrey: The planet on which the Cades are working at the opening of the story is a Mars-type planet with an atmosphere that humans can't breathe, but which can support other types of life. Unfortunately. Decontamination procedures are required whenever someone comes in through the airlock. Readers are treated to some graphic depictions of what can happen when decontamination procedures prove inadequate or aren't followed properly.
* Anne McCaffrey; the second is a compatibly sentient species impressed by our ability to defeat the first and trying to ally with us against them.
* Anne McCaffrey, the villain is part of an ambassador's family, and claims diplomatic immunity when the police try to arrest him. The ambassador, on hearing what he's been up to (child trafficking), chews him out and then tells the police to go ahead and arrest him.
* Anne McCaffrey, they also have to eat meat due to their altered metabolism.
* Anne McCaffrey to the technological state which saved them, when they found AI which gave them access to all the tech the colonists planned on having, but lost.
* Anne McCaffrey trilogy, once you've been infected with the symbiotic organism that allows you to live on the planet where they harvest crystals that allow warp-travel, you can't leave for very long, or you start going insane and then die. Some can leave for two or three years, others as little as a few months.
* Anne McCaffrey when negative work is done (for instance, teleporting an object from orbit down to ground level), although simply being the conduit for such large amounts of energy can still place enormous stress on physical systems.
* Anne McCaffrey, when one brain deals with the problem by commissioning a remote-controlled full-sensory human body, opening up the same possibility for other brains.
* Anne McCaffrey, wherein the protagonist is a girl who dares to perform and even compose music in a fishing village of a practical and pragmatic (and repressive) sort. In the course of the novel, Menolly injures herself cleaning fish, and her own mother deliberately stitches her palm up wrong, crippling her hand so she can barely perform routine household tasks (making her even more despised), let alone play any instrument. Meanwhile, the Master Harper Robinton and his faithful have been searching for the "anonymous" author of the fine music mailed to him by a rural harper, and take her away from all that to make her as much a star as a Medieval setting permits.
* Anne McCaffrey, where Tarvi didn't tell Telgar he loved her until she was about to die... and they had been married for years and had several children.
* Anne McCaffrey, where the Linyaari are openly baffled as to why human spaceships only come in one color. Slightly subverted in that Linyaari ships are, to human eyes, painted in loud and garish colors.
* Anne McCaffrey who will enslave and/or kill the inhabitants of a colony world, then settle their own people on it. Hence the name of the trilogy.
* Anne Murray), and Rosanne Cash's 1989 hit "I Don't Want to Spoil the Party." Cash's hit was, by the way, the only time a Lennon-McCartney song reached No. 1 on the Billboard Hot Country Songs chart.
* Anne Murray concerns a woman who tears up when she encounters a former lover.
* Anne "Ninon" de l'Enclos: "The lover you are pursuing is your mother." Ninon burst into tears and held her son to her heart, and the Chevalier — who could not bring himself to utter the name 'mother' to the one whom he felt such a burning passion for — trembled, stared longingly into her eyes, and fled into the

garden with a deep sigh. Ninon followed, and beneath the starry sky, the image before her was that of her son weltering in his own blood, shed by his own hand for his love for her. His dying eyes turned toward her and still shone of ardent love for her, and he passed while still uttering words of endearment.
* Anne of Avonlea, Anne befriends an old man even though his parrot repeats his less-than-neighborly comments about her every time she comes around. He tries to rectify it by saying nicer things when he sees her coming, but apparently the parrot likes getting him in trouble.
* Anne of Avonlea between Anne and Gilbert. It deeply affects Anne, who jerks away quickly after a few moments and makes an excuse to leave. Up until that point, she'd been oblivious to both Gilbert's feelings for her and her own feelings for him. She still remains oblivious to her feelings for him for a few more years.
* Anne Of Avonlea. He got Ginger from his brother, a sailor who used a lot of coarse language. Mr. Harrison is used to Ginger's bad language, but it really embarrasses him when the parrot swears in front of company.
* Anne of Avonlea, one of Anne's students introduces himself on the first day of school as "Jacob." Only later does Anne learn that he's actually named St. Clair, and his mother is very insistent that Anne call him by that name. Anne and her student soon reach a compromise: she, as his teacher, is allowed to call him St. Clair - but if any of his classmates uses the name, he'll beat them up.
* Anne of Cleves highest ranked woman in the entire kingdom. She was invited to all the events at court, provided with a household and income by the crown, and was very close with both of Henry's daughters, even participating in the procession when Mary I became queen.
* Anne of Geierstein is supposedly the source of opals having bad luck; its protagonist dies shortly after her opal necklace is tarnished by holy water. The legend says that the book was popular enough that sales of opals dropped 50% in England after the book was published, and the market was only corrected after a large black opal influx from Australia. In fact, there is little contemporary evidence to support this claim.
* Anne of Green Gables (1939) - over a decade after their predecessors, and three decades after the first book.
* Anne of Green Gables and seen Kevin Sullivan's adaptations have a hard time reading the series again without imagining the movie cast in their book roles, especially Megan Follows, Jonathan Crombie, and Colleen Dewhurst as Anne, Gilbert, and Marilla, respectively.
* Anne of Green Gables, and the cordial is in the cellar. Anne herself never drank any of it, so she couldn't tell.
* Anne of Green Gables anime to this day (a classic from the 70's and a 2009 prequel) and are heavily referenced in other Japanese media.
* Anne of Green Gables: Anne, especially as a teenager. She has an overactive imagination as it is, but add in a hopeless romantic streak and one too many romance novels, and you get some of the funniest moments in the series. As she gets older, however, her idealized notions of who she wants as a partner and what being in love is supposed to feel like start working against her. She is oblivious not only to Gilbert's feelings for her, but of her own growing feelings for him. She suffers a painful reality check near the end of Anne of the Island, when she realizes she isn't in love with the man who fits her ideals, and is in love with the man she rejected for not fitting her ideals—the same man she might lose forever.
* Anne of Green Gables: Anne Shirley has one of these, having spent her childhood in and out of orphanages and foster homes. She is so lonely that she invents imaginary friends, to Marilla's horror.
* Anne of Green Gables, Anne Shirley was always Gilbert Blythe's First Love since that moment she cracked a slate over his head, and he faithfully waited for years for her, hoping she would realise his love.
* Anne of Green Gables, Anne Shirley was played by... Anne Shirley (which was the actress's stage name). The actress, née Dawn Evelyeen Paris, adopted the stage name as a consequence of being cast in the movie. She had been previously

acting as Dawn O'Day.
* Anne of Green Gables, Anne starts a writer's club. She writes a story in which two women fall in love with the same man, and the man falls in love with one of them. The other woman gets jealous, and eventually pushes her friend off a bridge into a river. The man they were fighting over jumps in to rescue her, but he can't swim, and both of them drown.
* Anne of Green Gables book, Gilbert finally confesses his love to Anne and asks her to marry him (someday). Anne basically tells him she can never love him and crushes his heart to bits.
* Anne of Green Gables books, Anne has expressed this mentality from time to time regarding her characters. Diana is mystified as to why a writer can't kill off one of their characters if it would serve dramatic purposes.
* Anne of Green Gables books, Anne's friend and neighbor Leslie has blonde hair down to her feet, which she keeps pinned up except when she's just washed it.
* Anne of Green Gables, chicken was served as a special meal for important guests, and "eating chicken with salad every day" was a part of imagined upper-class life listed among diamond jewellery and silk dresses.
* Anne of Green Gables drunk as a result, and this incident makes Diana's mother forbid Anne from being friends with her until Anne redeems herself by treating Diana's little sister when she's ill with croup.
* Anne of Green Gables, Emily Starr first meets Dean Priest, a distant relative who went to school with her father, when he is 36 and she 12. On that first meeting, he explicitly tells her, "I think I'll wait for you," though Emily doesn't understand what he means. In the second book, Emily Climbs, in which Emily is an adolescent, a local man tells Emily that Dean is "just biding his time till ye get old enough for coorting," an idea Emily finds ridiculous with someone old enough to be her father. In the final book, Emily's Quest, they are engaged when Emily is about 20 or so, though she breaks it up when she realizes her feelings for her childhood friend Teddy.
* Anne of Green Gables film, a waltz piece is used for the BGM. When it segues to the next scene, the same tune is playing on a phonograph.
* Anne of Green Gables for the company. Anne is mortified when she finds out about the ad, even though everyone in town is proud of her for it.
* Anne of Green Gables gets this as she grows older, fielding off around 5 marriage proposals by the 3rd book.
* Anne of Green Gables: Gilbert Blythe is the epitome of the second variation. He makes a badly-timed comment about Anne's red hair and falls for her the instant she smashes her slate over his head in retribution. However, Anne holds this grudge for five years or so, in which time he tries valiantly to convince her he's not the jerk he originally came off as. Once they're friends, he gently implies at times that he wants to be more than just friends, though since Anne is oblivious to both his feelings for her and her growing feelings for him, it goes over her head. He continues to try and be her friend even after she shoots down his marriage proposal and after she dates another man for nearly two years. It takes a near-death experience for Anne to realize she's in love with him, the poor guy.
* Anne of Green Gables, Gilbert Blythe publishes a bunch of "notes" in a local newspaper, heavily implied to all be deliberate and amusing falsehoods. One implies that a neighbor, Mr. Harrison, is engaged. Mr. Harrison's very indignant wife shows up as soon as she reads this. Anne points out that none of this would have happened if he hadn't pretended to be unmarried.
* Anne of Green Gables. Gilbert is very happy, Anne… not so much.
* Anne of Green Gables has a subplot regarding the writing of these on the schoolhouse wall. The children refer to each Sweetie Graffiti as a Take Notice (as in "Extra Extra! John likes Jane!"). Note that said children are about twelve, thus they are hovering between cooties and dating; thus reactions to the Sweetie Graffiti change as they mature. As the narration puts it, you'd rather die than be featured in a Take Notice, but it's embarrassing knowing there's no danger of it ever happening.
* Anne of Green Gables has Matthew sing a song called "The Words," which is

reprised by his sister Marilla near the end. However, an alternate song is provided with the book for amateur productions to use as needed if they want to buy more time for a wig swap for Anne in the next scene. Productions that use "When I Say My Say" instead of "The Words" often keep the latter's reprise intact without any context to what it's supposed to be alluding to.
* Anne of Green Gables has the long, braided pigtails hanging down variant.
* Anne of Green Gables in love with Gilbert, but she is convinced he is engaged to another woman. Luckily, the engagement turns out to be just a false rumor.
* Anne of Green Gables is composed entirely of Anne's letters to Gilbert while they are separated.
* Anne Of Green Gables, now set in World War II as a middle-aged Anne reflects on her life before the events of the first movie. Fortunately, except for the animated film which has fallen into obscurity, the frequent revisits to Avonlea to Sullivan's credit are generally critically lauded and popular with viewers (if criticized by Kindred Spirits—the Anne equivalent of Trekkies).
* Anne of Green Gables of brown sugar before giving up and asking a female friend to obtain one for him instead.
* Anne of Green Gables of brown sugar from the baffled clerk before finally managing to whisper "I need a dress... With puffed sleeves... For Anne."
* Anne of Green Gables seemed to make a habit of this. She finally gave it up when she threw a party intended to bring a couple together... except the party was a complete disaster and it turns out the couple were already engaged.
* Anne of Green Gables series, Anne is constantly telling people that she and her childhood-enemy-turned-friend Gilbert Blythe, are just friends. She's not in love with him, does not harbor any type of feelings for him other than friendship, etc. etc. etc. Anne really does have feelings for him, she is just unaware of them. This question is never posed to Gilbert, since the entire town already knows he's madly in love with Anne.
* Anne of Green Gables series, Anne's House of Dreams, the titular Anne meets a woman named Leslie, whose past is a tragic one. To make it worse, her once cruel husband, Dick, is now a helpless, brain-damaged man after coming home from a sea voyage, forcing her to have to take care of him for 11 years. You learn later in the book that he has a cousin named George that he looks exactly the same as, because their parents had been two sets of twins who married one another...
* Anne of Green Gables series revolve around the adventures of Anne and Gilbert's children.
* Anne of Green Gables series, though he is a minister and not a professor. He is so absent-minded that he doesn't notice when his children bring home an orphan that stays for a fortnight, or that his daughter rides pigs through the town. He once went to marry a couple and started to recite a funeral prayer instead of the marriage service. When the groom calls him on it, he rectifies his mistake, but the narrator notes that the bride never truly felt married from that day on.
* Anne of Green Gables series, Walter, the poetic, sensitive, whimsical second son of Anne and Gilbert, is killed in action during World War I.
* Anne of Green Gables, she becomes friends with Captain Jim (who is in his seventies) and Miss Cornelia, who is fifty.
* Anne of Green Gables She grows the most in the first book, and the last book is a Coming Of Age of her daughter, Rilla.
* Anne of Green Gables. Slight subversion: Anne mentions that the staff meant well, and she wasn't abused, but it was a cold and dreary place where no one was loved. For Anne, though, the orphanage was often the better option than living with some of the many families she grew up with. Not only was she only "adopted" to take care of other people's children, but often these families didn't have enough to feed and clothe themselves (let alone Anne), and a few of the fathers were implied to be mean drunks.
* Anne of Green Gables, so she tries to prevent him from confessing his love, afraid to ruin their friendship.
* Anne of Green Gables stories young Davy is full of malapropisms and unique opinions that could make you smile, but it's his opinions on religion that push

Anne over the edge...
* Anne of Green Gables: The Animated Series teaches kids how to solve problems.
* Anne of Green Gables - then her kids take over. A popular "boxed set" of this series includes only the first three books.
* Anne of Green Gables: The picnic scene has Mr. Phillips and Prissy entering stage with him plucking bits of straw off her back.
* Anne of Green Gables until she confesses. Finally, Anne tells an elaborately detailed story of having worn the brooch outside and lost it in a pond. But soon afterward, Marilla finds the brooch and realizes she misplaced it herself: Anne then admits she only confessed so she would be allowed to go to the picnic she had been looking forward to.
* Anne of Green Gables Warm, friendly Gilbert is the Fire to Roy Gardner's mysterious proper Ice as they both court Anne.
* Anne of Green Gables, when she goes off to Queens College. "She'll be gone so long, she'll get terrible lonesome".
* Anne of Green Gables, when she sees Anne being carried home by Mr. Barry after breaking her ankle, not knowing that Anne's injury was minor.
* Anne of Green Gables when she's swept up in a current during her character's death scene.
* Anne of Green Gables which is simply a path in the woods where a couple can walk around and be alone for awhile (it, like many of the other locations around Avonlea given names by Anne and her friends, was named more for the sake of giving it a suitably romantic-sounding name than for any other reason).
* Anne of Green Gables, who has a tendency to spout monologues lasting for more than a page. She stops this in the later books.
* Anne of Green Gables, who was sought for but declined the role of Marilla), and the director Kevan Sullivan wanted to cast her. However, it was ultimately decided that Anne shouldn't be played by an American actress, so the Canadian Megan Follows got the role, while Schuyler Grant played Anne's best friend Diana.
* Anne of Ingleside) deliberately dumps the cake she is told to take to a church picnic because she's under the impression that it's disgraceful to be seen carrying a cake. She then feels very foolish when she runs into her much-admired Sunday School teacher bringing her own cake to the church.
* Anne of the Indies. Her crew even notes that she is passing up perfectly good targets to pursue Pierre, where there is no profit.
* Anne of the Indies. It is especially obvious in the fight between Anne and Blackbeard; although this perhaps justified as this friendly sparring between two friends and not intended to be deadly combat.
* Anne of the Indies: Molly (played by Debra Paget) is abducted and held prisoner by pirates and suffers nothing more than some decorous damage to her dress. Later she is marooned on a cay with her husband. Despite the fact she should be suffering from exposure and dehydration, her hair and makeup remain perfect.
* Anne of the Indies, Pierre is flogged as a spy when he returns to the pirate ship after disappearing in Nassau.
* Anne Of The Island series, Anne is having a sleepover with her friend, Jane Andrews, who proceeds to propose to Anne on behalf of Jane's brother Billy, who is too shy to court Anne much less ask her to marry him. Anne, having never thought much about Billy at all, refuses. Jane is unsurprised (having told her brother it was a long shot) and assures Anne that Billy will be fine since he likes Nettie Blewett (another local girl) almost as well, so he'll probably just marry her instead. Anne is wryly amused, and when she later hears of Billy's engagement, wonders if he managed to propose in person this time or if he asked his sister to do it again.
* Anne of the Island when Gilbert is invited to join a fraternity. For his hazing he was told to spend a day walking around the business district in an apron and sunbonnet. However, this backfires as he takes it in good grace and humor instead of fear and embarrassment.
* Anne of the Thousand Days, Anne considers that, though Henry is having her executed on trumped-up charges, she herself has sent men to equally unjust deaths.

* Anne of the Thousand Days, Anne recalls that there was only one day when she and Henry both loved each other.
* Anne of the Thousand Days begins with Anne awaiting execution while Henry steels himself to sign her death warrant.
* Anne of the Thousand Days, feels free to pursue Anne Boleyn because his marriage to Katherine of Aragon was made to cement a treaty. As he put it so succinctly: "I do not love that woman. I did not marry her. That was a marriage of state: England married Spain."
* Anne of the Thousand Days for Best Picture because of its negative reception; the organization had already stopped accepting bribes by then.
* Anne of the Thousand Days, Norfolk remarks on the lack of clamor in the streets for Anne's wedding and coronation. Cromwell says that one thousand apprentices were paid one groat each, which was obviously not enough:
* Anne of the Thousand Days, the French-educated Anne looks down upon Englishmen as barbaric, lacking in culture, and too secretive on the subject of sex.
* Anne of the Thousand Days, who confides to Smeaton that his sexual advances have never been refused. Anne distrusts him when he first starts making passes at her, because he's already had his way with her married sister.
* Anne of Windy Poplars, Anne stopped the town's dominant family from trying to destroy her career by accidentally sending them their revered grandfather's diary, in which was detailed how he committed cannibalism when he was shipwrecked.
* Anne of Windy Poplars than in having a girl pushed at him, but had feared that his daughter would end up being too spineless to go through with it. With the matter finally settled, he promises to "grudgingly come around" in a suitable period of time.
* Anne Of Windy Poplars when the girl's mischievous siblings start implying to her would-be fiance that their father is responsible for all manner of over-the-top abuses ("what would you think of a man who...") while the man himself listens in increasingly infuriated silence. What finally pushes him past the limit of his tolerance? When his wife, in a desperate attempt to defend him, declares how beautifully he crochets.
* Anne only realizes that she's in love with Gilbert when she learns that he's come down with a severe case of typhoid fever and might not make it through the night. She bitterly regrets not recognizing her feelings sooner, thinking he will die never knowing that she loved him. Fortunately, Gilbert recovers and they get engaged.
* Anne Ramsey was suffering from throat cancer when she played Momma in
* Anne Rice. After she saw the film, she issued an apology and praised his performance. Though she did insist that Lestat's hair remain blond in the film.
* Anne Rice and letting her rabid fans take care of the rest — and then condescendingly claiming she was only helping a small blogger get more page views.
* Anne Rice books get stronger as they age. Even after doing nothing but sleeping for hundreds of years, they wake up stronger than they were before. Drinking the blood of an older, more powerful vampire can also add to their power. They also obtain new abilities with age, or "gifts" as they call them, the most common one being the Cloud Gift which enables flight. Interestingly, no vampire is ever comfortable with flying, realizing how unnatural it is (even for a vampire), except for Akasha and Lestat (who gained these abilities after drinking her blood).
* Anne Rice, did not appreciate the wacky name that her parents gave her and started calling herself "Anne" on her first day of school. She did use the pseudonym "A. N. Roquelaure" for some erotic novels, in order to distance them from her supernatural books, though current editions have both names right on the cover.
* Anne Rice famously bans all fanworks, a stance that got even stricter when she found Jesus and cited the commandment "Thou shalt not steal" to justify her stance.
* Anne Rice features some steamy mummy/human sex scenes, facilitated by a magic elixir that brings mummies back to life.
* Anne Rice is not full of paranormal activity as such, but full of people who study it.
* Anne Rice. It's not clear whether she will change her methods with the

introduction of reliable paternity tests.
* Anne Rice, Lasher, the spirit that haunts the Mayfair family for centuries, is originally conjured by a woman in a small Scottish town. When the locals attempt to burn her for a witch, she unleashes Lasher on them, who wrecks the town and kills the inhabitants.
* Anne Rice levels, being a wealthy painter in Renaissance Venice who just happens to keep a sort of harem of pubescent boys. Gabrielle, while spending most of her immortality wandering around in jungles, was a marquise and the only literate member of her provincial noble pre-Revolutionary French noble family.
* Anne Rice-like adventure. Only it is a setup by the Body Thief to keep his immortal body.
* Anne Rice — is forced to wear her hair in braided pigtails that start near the top of her head, to make her look even younger than she is.
* Anne Rice, newly-turned vampires usually just carry on pretending to be regular citizens for as long as reasonably possible. Older ones are shown to use a complex web of lawyers, front companies and multinational bank accounts to allow them to openly own property and engage in similar affairs. Of course, most supplement their income with assets taken from victims. Armand amasses a huge fortune very quickly by slaughtering drug smugglers in large numbers and then having the cash he takes laundered. The fact that they possess telepathic powers also goes a long way in enabling them to maintain the upper hand in dealings with mortals and modifying any memories as needed. Lestat selects his first attorney based at least partly on the fact that the man's mind is very easy to read.
* Anne Rice page, Rice now claims that the film is a "mutilation" of her work.
* Anne Rice. Richard very formally asks his best friend, Marcel, for permission to court Marcel's younger sister, Marie. Marcel bursts out laughing at the awkward formality of the situation, then immediately gives his permission since "You're a lot bigger than me, you know!"
* Anne Rice series does this accidentally. After living several hundred years, he decides to commit suicide by flying into the desert sun. As vampires can't stay conscious during the day, he passes out during the attempt, and wakes up, severely weakened, submerged in sand where he fell after passing out. Although the experience nearly kills him, his body heals into the appearance of a man with a deep, permanent, suntan.
* Anne Rice, set in the same universe) involves summoning and commanding spirits.
* Anne Rice's legal given name is Howard Allen O'Brien, because her parents thought it would be cute to name a girl Howard. Apparently, she didn't agree; on her first day of kindergarten the teacher asked for her name, and she answered "Anne". (Remarkably quick thinking for a five-year old.) Her mother witnessed this but chose not to correct her.
* Anne Rice's vision of vampires as lacking sufficient bloodflow to get it up.
* Anne Rice. The titular mummy, like Imhotep above, doesn't fit the trope himself, but Cleopatra kinda-sorta does, at least at first.
* Anne Rice trilogy, 13-year-old Mona Mayfair has a list of the male cousins she intends to sleep with and gets a considerable way down it before going on to other things.
* Anne Rice writes her "dark romance" vampire novels under her own name, and wrote non-supernatural adult fiction under the name Anne Rampling. In addition, she originally published the S&M themed "Sleeping Beauty" series under the name A.N. Roquelaure.
* Anne Shirley asks this of her when she shoots down his proposal, saying she could never love him. Given they'd been dating two years, Roy was understandably upset.
* Anne Shirley has a jarring love epiphany when her longtime friend and rejected love interest, Gilbert Blythe, is dying from typhoid fever. The description in the book ("Anne of the Island") is a borderline
* Anne Shirley is offered shelter under a handsome stranger's umbrella in
* Anne's House of Dreams. Anne notes that telephones have finally reached Avonlea (it's around 1890, telephones have only been around in Canada for about ten years at this point). Of course all of the busybodies listen in on calls. Anne recognizes

the sound of a clock in the background during a call, a clock that she knows belongs to a busybody that's listening in. She asks if the person she's calling has a new clock, cue the click of the busybody hanging up.
* Anne's House of Dreams, Gilbert gives the newly engaged Miss Cornelia the rules his mother was told to manage a man. The second is "Feed him well." She immediately responds "With enough pie."
* Anne) show her as being far more independent, to the point of taking care of at-risk children.
* Anne Sullivan, Helen Keller's teacher and lifelong guide, was reportedly haunted by the memory of these words from her tubercular brother James, who was shut up with her in the
* Annet Futatabi series) takes place in Renvrandt, a small country in Eastern Europe.
* Anne Timson, the little old biddy who beat up six sledgehammer-carrying robbers. With a HANDBAG!
* Annette Crosbie was mostly known for highbrow drama, until she was cast as Margaret Meldrew in
* Annette Funicello had to assure him there "wouldn't be anything that would offend." Walt Disney did personally ask Annette not to expose her navel on camera.
* Annette is scatterbrained and clumsy but also obsessed with learning magic, and an early sidequest with the Blue Lions involves giving her some herbs to help her be calmer and more careful.
* Annette von Droste-Hülshoff (1797 - 1848): Well-known German author, most famous works include
* "Anne vs. Wild", which ends with an ultimate discovery out of Anne's sight, is placed in between "Dating Season" and "Contagi-Anne".
* Anne" when the Scooby Gang are hunting vampires while Buffy's out of town and encounter a newborn vampire who hands them their asses in this fashion. When Xander, pissed-off, demands to know how the hell he learned that stuff, Oz recognizes him as a former classmate who used to be captain of the gymnastics team.
* Anne with an E: Anne copes with her loneliness by speaking to her reflection in a mirror as though it's a friend.
* Anne with an E books on which it is based and is set in the mid-to-late 1890s.
* Anne with an E's version of Aunt Josephine is a lesbian who was in a longtime relationship with a woman named Gertrude.
* Anne with an E: The show has several episodes and plot lines dedicated to educating kids and young teenagers about societal issues faced by marginalized groups and why diversity is worth celebrating; this sometimes results in a slightly corny, "PSA"-like tone that might make older viewers roll their eyes. At the same time, and probably as a consequence of this, the show presents a remarkably grounded and even cynical view of the world and doesn't stray away from dark topics such as discussions of suicidal ideation, PTSD and abuse, which some might find are a bit too depressing for some younger viewers. The writers do their best to balance these aspects to produce a show that can be enjoyed by the whole family, and they mostly succeed, but there are stretches of runtime that will alienate at least some part of its viewers.
* Annexation Bill of 1866, which would have authorized the U.S. president to, subject to a future agreement with colonies of British North America, annex British North America and turn it into a series of states and territories, buy the lands still under the control of the Hudson Bay Company, and lavish the colonial territories with money for infrastructure improvements, along with subsidies, and assume their debts. The bill received no serious contemplation in Washington and was never even voted upon in the House of Representatives (it never even reached the Senate). It was mainly introduced to appeal to Irish Americans, many of whom supported the Fenians (Irish Nationalists who desired an independent Irish state). How the bill would have been received had the U.S. seriously pursued it is anyone's guess.
* Ann has a body fit for a model, but it's because she won the genetic lottery and doesn't need to do anything to stay in shape, so she subsists on soda, junk food,

and fast food. In gameplay, this results in her having high luck, but even if it's not immediately apparent, she's still unhealthy because of her poor diet and lack of exercise, so she's the party's
* Annick Obonsawin to a tee. The characters she voices are her cheerful and excitable fangirly voice is definitely the genuine article. Especially when she is playing Sierra from
* Annick Obonsawin (voice acting example, but also has live-action credits to her name)
* Annie (1982), Grace is meeting with Miss Hannigan to discuss adopting an orphan, and Annie is eavesdropping on the conversation. She silently nudges Grace into asking Miss Hannigan specifically about any ten-year-old red-headed girls on the premises.
* Annie (1982), the entire abduction attempt takes place on a single set, with the villains being exposed and captured almost immediately.
* Annie (1999): After Miss Hannigan catches the orphans in her office singing "You're Never Fully Dressed Without a Smile".
* Annie (1999) features an interracial couple during a time period where it may not have been illegal there in New York City, but it certainly would have been frowned upon. Daddy Warbucks was a chairman on many boards and worked with the president. An interracial marriage could have caused him political and financial ruin.
* Annie (2014), a few large dollar bills to the social services woman is all it takes to speed along the process for the paperwork for Annie's temporary adoption by Stacks to go through.
* Annie (2014) has a clever way of referring to someone as a prostitute, which flies right over the heads of any kids in the audience.
* Annie (2014). Unlike Grace, he never tries to get to know Annie for herself. He only sees her as points on the polls for Stacks, to the point of treating her almost like she's not even human at all.
* Annie and Abed have one in "A Few Paintballs More". Subverted in that he drops the persona like a hot potato when they "die", and doesn't seem affected by it in the slightest.
* Annie and Kat are close friends despite being complete opposites personality-wise. They also metaphorically represent two opposing forces (the forest and etherical things for Annie / the court and technological things for Kat).
* Annie and Mitchell headbutt when Annie is about to leave through her door in S1 and they're saying a tearful goodbye. Used as a bit of
* Annie, Andrea McArdle, the star of the original Broadway play, has a cameo as a theatrical ingenue during a musical number.
* Annie and Reynardine, who are, respectively, a quiet young girl and a fox god. Reynard has killed at least one human and a dragon via glitched
* Annie Bovaird is a voice actress best known for being the third voice of
* Annie breaking Paul's legs gets even more horrifying given then—13-year-old Thad Phillip's 1995 ordeal at the hands of Joe Clark—kidnapped and held prisoner for 43 hours while Clark broke the bones in his legs. Phillips finally escaped by throwing himself down the stairs and dragging himself to a phone, by which point he was within two hours of death from internal bleeding. He survived, but needed numerous surgeries and walks with a limp to this day.
* Annie but in the screen versions the romance is definite. The 1999 version even has them become engaged.
* Annie can interact and pick things up like a living human, but her visibility rides up and down the scale with her confidence. She can also teleport.
* Annie Christmas is a tall tale heroine who has gotten that treatment. She's a African American giantess who captains a keelboat. Most scholars believe she is one of the many "fakelore" characters created as Expys of Paul Bunyan, but that hasn't stopped some voodoo practitioners from believing she is a Loa.
* Annie confirms that underneath her cold exterior, she's an "ordinary girl".
* Annie doesn't cover up her distinctive back tattoo when robbing the grocery store where she works, causing the manager to realize who she is.
* Annie does this in the radio station scene, where Warbucks accidentally reads

"drop page" when going to the next page.
* Annie during "Tomorrow" imagines a lot of people as playing with happy children; the shot returns to show that most are carrying/working with something else.
* Annie Get Your Gun, and thus reworks the true story of sharpshooter Annie Oakley to have her future husband Frank Butler refuse to be with a woman who's a better shot than him, so she ends up throwing a contest between them and retiring, when in real life it was actually Butler who gave up his sharpshooting career to support hers. It also features some horrific portrayals of Native Americans, with the reveal that they're not just mindless savages intended to be played for surprise laughs, and the song "I'm an Indian, Too" which brutally mocks their naming style. A 1999 revival heavily revised it to fit contemporary attitudes, cutting the insulting Native material and having Butler catch on to what Annie's doing and throw his own shots to end the contest with a tie.
* Annie Get Your Gun, Annie sings, "Any note you can hold, I can hold longer," and then proves that, yes, she can.
* Annie Get Your Gun is built around this, with each claim being met with "No you can't", "Yes I can" until one shouts the other down.
* Annie Get Your Gun originally had Tommy Keeler and Winnie Tate as a juvenile secondary couple. The 1966 revival eliminated their parts, along with their two song-and-dance numbers.
* Annie Get Your Gun, Sitting Bull and Charlie walk in on Dolly messing with Annie's gun. When they begin to question her about it, she indignantly replies, "No matter what you do to me, you'll never get me to tell you I was going to fix Annie's rifle so she'd lose the match and go away so I could have Frank all to myself again! My lips are forever sealed!"
* Annie Get Your Gun to a Masochism Tango-style song in the space of two minutes.
* Annie Get Your Gun when she's wearing her red dress. She runs into and out of the camera to show that she's crossed the showground.
* Annie had Rooster say "You goddamned kid" to deliberately avoid being rated G. This is on top of the title character herself being put on a perilous situation not unlike the original comic strip it was (loosely) based on.
* Annie Hall, Alvy and Annie are arguing and he focuses on a pretentious school course she's taking:
* Annie Hall, Alvy Singer (Woody Allen) is constantly having trouble with his relationship with Annie. Seeing a random couples in the street, he asks them their secrets to a good relationship. The joke is that they not only answer, but give him impossibly specific and detailed advice about his individual relationship.
* Annie Hall, Annie cracks up like mad as she tells what's supposed to be a true story about a narcoleptic who died abruptly. It serves to show a stark difference between her and Alvy.
* Annie Hall: "A relationship is like a shark. It has to constantly move forward or it dies."
* Annie Hall from Alvy, and tens of thousands of dollars' worth of cocaine are scattered all over the room.
* Annie Hall's character thinks that a record store owner was making an anti-Semitic joke by mentioning that he was having a sale on Wagner
* Annie Hall: the shock experienced by Woody Allen's quintessentially Jewish-American character when meeting Annie's stately WASP family, and the contrast with his own relatives, are poignant.
* Annie Hall, which is a medical term for the inability to feel pleasure.
* Annie. He has the dig on for Ms. Hannigan and is persistent about it. He eventually wins her over.
* Annie is the child of the leaders of the Grey Order — a group who broke off from Noxus because of its evil and
* Annie is the Female Titan. The only other female with blond hair in the military (Krista) was present during her attack, and her face was similar to Annie's. Even before the Female Titan was introduced, you could tell by Annie's
* Annie it was based on has in common is the title character, Oliver Warbucks and Sandy. Writer Thomas Meehan initially did some research on the character by re-

reading all of the comic strips available at the time, but since he couldn't find anything worth adapting, he instead invented a wholly different continuity with a different cast of supporting characters, and moved the setting to Depression-era New York.
* Annie Jason Masmajean, "Mama Jason" to her family, the protagonist of
* Annie Lennox from the Eurythmics got some heat over looking a little more masculine than some would prefer.
* Annie Lennox's "Love Song For A Vampire", she was sitting down and wearing an Empire-style dress throughout.
* Annie Leonhart nearly effortless tosses both Eren and the much larger Reiner on their asses. Eren is amazed at how strong she is, but Annie explains that she is not that strong. She uses techniques that can turn an opponent's superior size and weight against them.
* Annie Leonhart, Reiner Braun, and Bertolt Hoover are revealed to be
* Annie Leonhart, Reiner Braun, and Bertolt Hoover it has become harder as they've come to understand the reality of their actions.
* Annie: Little orphan Annie makes Daddy Warbucks' life much better through song and dance.
* Annie Murphy developed Alexis's distinct vocal fry and hand gestures after watching youtube clips of the Kardashians and other such celebrities for hours.
* Annie Murphy, had a chart hit in 2020 with "A Little Bit Alexis," which was #21 on the dance charts. Since she is primarily an actress, it is unlikely that she will hit the charts again, in or out of character.
* Annie Nightingale is a rather legendary presenter on BBC's Radio 1 and, as of this writing, is 73 years old. The genre she specializes in?
* Annie Oakley. Legend has it that she could pin an ace of hearts card to a tree, walk twenty yards away, then shoot the heart right out of the center.
* Annie of the 1999 version. This produces several other changes, such as Miss Hannigan running a foster home instead of an orphanage.
* Annie, Oliver Warbucks did this for his radio appearance, where he reads "drop page" and "Warbucks interrupts".
* Annie. One of the musical's most famous songs, "It's the Hard Knock Life", is all about this trope.
* Annie on My Mind. Liza didn't have any particular interest in dating until she met Annie. She quickly fell for her and realized she was gay.
* Annie on My Mind, Liza mentions wanting to grow old with Annie with a bunch of cats in Maine.
* Annie on My Mind says that she'll eventually come around and accept them as a couple, though.
* Annie Parisse had a one-off role a few years before becoming a regular as ADA Alexandra Borgia.
* Annie Potts that Connie falls head-over-heels for him. Connie was also previously involved with a rather homely furniture salesman named Ira Rosenbloom (played by Richard Kind).
* Annie Proulx, a childless Wyoming couple transfer their affections first to a piglet, then a chicken, and finally to a sagebrush they fancy to have the appearance of a child. It is tended and protected, and even fed bones and stray scraps of meat from their dinner-table. Even after the couples' passing, the shrub—now grown to the height of a fair-sized tree—is used to human attention, and meat. It consumes livestock, then soldiers, then a local medico, railroad men, surveyors, and most lately a botanist come to investigate its unusual height and luxuriance.
* Annie: Set in Depression-era New York City, an orphan is taken in and eventually adopted by a millionaire.
* Annie Social changed much in the four five years between her WEW debut and the rise of new all women's promotions
* Annie starring Aileen Quinn, Mr. Warbucks gives out a long list of orders to a bunch of his staff when he begins the search for Annie's parents. His last order is, "And Sanders — get me a drink!"

* Annie, stated in an article in 1996 that he refuses to acknowledge the film. However, unlike other instances of this, Charnin goes on to state that it's his own fault that the movie turned out the way it did, as, in his own words, he, composer Charles Strouse, and librettist Thomas Meehan, failed to secure any degree of creative control over the film when they signed away the film rights.
* Annie states that her father was fiercely devoted, and raised her for the purpose of serving their homeland. He realized his horrible mistake too late, and her final memories of him were him weeping and pleading for forgiveness.
* Annie teases one between Oliver Warbucks and his secretary Grace Farrell, who become surrogate parental figures to Annie.
* Annie tells Corey "There is absolutely nothing weird about Princess [that is,
* Annie that's just loaded with double entendres — most of which are astronomically accurate!
* Annie, the children playing the other main orphans were runners-up for the part of Annie.
* Annie, the musical: Shortly after Annie's attempt to escape from Miss Hannigan's orphanage, a woman arrives and announces that she has been sent to talk to Miss Hannigan by the orphanage's board of directors. Miss Hannigan is in full self-justifying flight before the woman has a chance to explain that actually she's just come to see about borrowing one of the orphans.
* Annie then proceeds to sing about how she has no idea how Christmas works. With her intelligence dropping throughout the song. She dresses in a
* Annie, Trinidadian actor/choreographer Geoffrey Holder played Warbucks' Indian bodyguard Punjab.
* Annie Warbucks. The title change was partly because Miss Hannigan was written out of the show, but also necessitating changing the lyrics to one of the songs: "Above the Law" originally had the punny refrain "You can be Annie, too!"
* Annie was shocked merely by observing two kissing Merostomatozons ("very distantly related to eurypterids and xiphosura").
* Annie when he tells Annie that he's going to start looking for her parents:
* Annie would start to develop, many did this in order to avoid being fired from their roles.
* annihilated in every Super Bowl they've lost, never losing by less than 17 points. This includes the largest margin of defeat in any Super Bowl, a 55-10 creaming by the San Francisco 49ers in Super Bowl XXIV.
* annihilated with such brutality their fate entered British history textbooks as a cautionary tale.
* Annihilation (2018) are "stuck in a continuous mutation". Everyone who enters the Shimmer is affected in this way, as the area refracts light waves, radio waves, and even biological matter like a prism.
* Annihilation (2018): As Lena and her teammates explore an abandoned building within the mysterious "shimmer", they find the grotesque remains of a member of a previous expeditionary force in a drained swimming pool. The man's legs project from a mass of what looks like fungal material growing along the side of the pool, while his skull and torso are suspended from similar growths that have taken root further up.
* Annihilation (2018). Kane won't tell his wife Lena where he's been deployed by the US military—only that he's in the same hemisphere. Lena laughs at him for thinking that she looks up at the skies while he's gone and wonders if he's doing the same. The fact that she'd mock him in this way is a sign that her affections have been straying.
* Annihilation (2018) monsters out of the wildlife. And it's left entirely vague whether or not it is a malevolent entity seeking to destroy everything out of irrational hatred, or if it's so utterly alien to the point it doesn't even comprehend it's own existence, making it essentially an oversized cancer cell.
* Annihilation begins with something coming out of it - a large, unstoppable army.
* Annihilation: Conquest: As they plan to infiltrate and destroy the Phalanx Babel Spire, Peter Quill gives a dramatic speech to his team about whether they're a bunch of badasses ready to storm the place. Then we see everyone's staring blankly

at him.
* Annihilation: Conquest, who is in prison for getting a Kree woman pregnant. The Kree are absolutely serious about their "genetic purity".
* Annihilation earlier in the expedition finds Lena, Josie, and Ventress where they've been bound and gagged by their increasingly unhinged teammate Anya. The bear circles the three captive women, and has an opportunity to get up in everyone's face and terrify them as its mutations allow it to mimic its previous victim's dying screams.
* Annihilation had this exchange between two romantically involved cosmic super women.
* Annihilation: Just before infiltrating the Babel Spire, Quill gives one of these to his team... only to be met with blank looks, before muttering "thought not" and moving on.
* Annihilation. (one is a dilapidated London overgound station, the other an impressive underground one)
* Annihilation seems incapable of feeling empathy and has absolutely no verbal filter. Numerous characters remark on how incredibly bizarre this behavior is for an 11-year-old girl.
* Annihilation spaceborne weapon called the "Harvester of Sorrows" which destroyed entire worlds and consumed the remains. What was left of the organic life was separated out so the crew could enjoy it.
* Annihilation: Thanos tears off Moondragon's ear and mails it to her father Drax to lure him into a trap. Fortunately for Moondragon, the scientists of Titan are able to grow a new ear for her.
* Annihilation The footsoldiers of the Wave are giant bugs from the Negative Zone, raging from human-sized, to kaiju sized. Not surprising that after everything is over, Richard Rider has a serious hatred for bugs.
* Anni Hilator, the minion of Coyle Commander, has to PAY to work for him in
* Annihilator where a newspaperman has to save the world from humanoid killer robots, one of whom is made to look like his girlfriend.
* Annika-709 is from an arcology that held the entire population of Greater Germany — "the builders had to fill in the North Sea just to provide parking space." Unfortunately it was so depressing that the residents voted to commit mass suicide.
* An-Nil: "The Nile", which is just like the above except for Egypt. Since the Revolution of 2011, it's been rather confused, as they seem to be the last to know who's actually in charge of the country at any given moment.
* anniversary), and then the 50th anniversary of becoming the Astros in 2015.
* Anniversary Brawl, and That Chick With the Goggles all were beaten up plenty. Most notable was when the Critic asks Goggles if she was on his team or not and, when she said she wasn't, he promptly punched her in the face.
* Anniversary's "Blow Me Away" were replaced with the original compositions "Follow in Flight" and "Breaking the Covenant", respectively. However, "Blow Me Away"'s intro can still be heard during the Mombasa tunnel sequence.
* Ann Landers. "Dear Abby" continues to this day, now written by Pauline's daughter Jeannie; "Dear Ann Landers," however, was permitted to die with its writer by the mutual wish of her daughter, Margo Howard, and the publishing syndicate.
* Ann Landers did a series of letters from couples who had experienced this trope.
* Ann Leckie sacrifice is even moreso, and can empower a deity to make major miracles happen in return. Most willing sacrifices are worked out well in advance by contract, with the deity being obligated to provide a miracle in return for the death of one of its followers.
* Ann Leckie who came into existence before humanity are the subject of superstitious awe even from other gods. The Strength and Patience of the Hill's earliest memories are of an ocean filled with trilobites, which have been extinct for 250 million years on Earth; after continental drift deposited it on land, it came to enjoy watching the slow revolution of the solar system around the galactic core.
* Ann-Margret turns into a vain, decadent woman after she becomes rich, sporting

excessive mascara on her eyes. She also wears a ridiculous amount of costume jewelry, which her son rips off of her after
* Ann-Margret was injured during a performance, and facial surgery left a scar on her forehead; since then she has worn long bangs or her hair brushed over one eye to hide it.
* Anno 1404, especially once you have a lot of them (triggering all their "extra" needs).
* Anno1404 if adequately convinced it is what God wishes her to do: including destroy the homes of innocent people she's been lead to think are heathens.
* Anno 1404 was a bag of natural almonds. Seriously. Three years after you get tired of the game you can enjoy a nice nutty topping on your cereal. That's nice of the marketing department, isn't it?
* Anno 1701 series, the militia men wield a pistol and a sabre each (strange thing though, that that those pistols are able to fire after every second sabre thrust - so once every three seconds... in 1701!!)
* Anno 2070, the futuristic spin-off of the series, takes place in time where global warming has gotten so bad that people were forced to settle on what were formerly mountains, and the game revolves around colonizing these small pieces of land.
* Anno Domini includes lots and lots of naval battles. But Anno 2070 specifically also includes submarines, courtesy of the Tech faction. Very few submarines are useful for attacking other subs while underwater, and most of your sub kills will probably come from surface ships but it IS possible to encounter this trope in-game.
* Anno Dracula after Dracula defeats Van Helsing (who, with his offsiders, are revealed to be less virtuous than Stoker depicted them) and goes on to marry Queen Victoria.
* Anno Dracula and when her eyes are shot out with silver bullets they regenerate seconds later. Additionally, she can breathe out deadly swarms of vampire butterflies and grows bigger as she eats more enemies.
* Anno Dracula, a quasi-independent vampire community that the warm authorities have to tolerate due to Christina Light's influence.
* Anno Dracula, Charles says this line to Kate Reed; she has actually become a vampire since the last time he saw her.
* Anno Dracula: Christina Light expertly uses her beauty and sexuality to seduce men into joining her anarchist cause while caring nothing for their lives.
* Anno Dracula during their set, trying out the shape-shifting capabilities conferred by the drug; the drummer tried to generate horns on his head, but only succeeded in blowing his head apart. The stage manager laments that there is nothing but a big mess to clean up, while if he'd done it onstage it would have made a brilliant ending to their performance.
* Anno Dracula gets her PI license in the 70s. Granted, this is after centuries in which she's been a mercenary, a physician, a coroner, a spy, and damn near everything else, so she was bound to get there eventually.
* Anno Dracula is originally known as "Silver Knife", after the weapon he uses to kill his vampiric victims.) It is speculated that the silver content in photographic media prevents vampires from being clearly photographed.
* Anno Dracula. It, in turn, ended with a scene that was tied to the climax of the novel, but mostly involved a completely different group of people facing an entirely seperate villain in another country. The first indicated "Christina Light's story will continue", the second "Now that the Christina Light story is over, here's what we're going to do next".
* Anno Dracula — there's descriptions of vampirized people who had syphilis in life still showing the symptoms and, oddly, tubercular vampires still coughing blood. The same novel has a scene where Genevieve attempts to perform this on a friend who has been fatally wounded in an attack, but the friend chooses to die rather than become a vampire.
* Anno Dracula novels, implying that those are just another branch-off universe as well.

* Anno Dracula, one of the patrons of the dodgy bookshop where the Council of Seven Days meets reacts with horror to Kate Reed entering. She asks if it's because she's a vampire, and he replies "Worse, a woman!"
* Anno Dracula, the Baron himself leads a squad of German fliers who are all vampires and aces, much like the real life Jagdgeschwader 1 the Baron led. Except not only are they vampires (making them excellent night pilots) to match up to the Allies' slightly better squad of aces (which includes Expies of The Shadow, Biggles, and Captain Midnight, along with real-life British ace Albert Ball) the squad is modified by science and elder vampire blood into giant bat fliers wearing machine-gun rigs.
* Anno Dracula to call himself that. Jeperson reflects that he's so used to making that speech, it hasn't occurred to him that the guy with the guns can call himself whatever he likes.
* Anno Dracula universe has "drac", which is made of powdered vampire blood and temporarily gives humans vampire abilities.
* Anno Dracula, where German experiments allow the Baron to fly planeless.
* AnnoDracula, which she parks in a bad neighbourhood in Baltimore in order to give detectives her opinion on the crime scene. When she returns, there isn't a mark on it, no missing hubcaps, no broken windows, but a fresh pool of blood spreading underneath the front end. This is stated to be an effect of the car's security system, but we are not told exactly what it is.
* Anno Dracula would be killed to uphold the masquerade if they went public, by some mysterious cabal of powerful elders known as the Number (nobody could agree what the actual number was). Afterwards, of course, it was pretty clear that if the Number existed, it didn't care.
* Annona, which has been described as a small, star-like thing with tentacles and a room-chilling aura.
* Anno, set after a massive global warming event, has city ruins occasionally located on underwater plateaus. They can be harvested for building materials.
* Annotated Pratchett File v9.0 a penis would be far more troublesome than its coloration.
* Announced by Spock in one episode, while sirens whoop and the camera rapidly zooms in and pulls back repeatedly on a flashing red light.
* announced in January 2021 that they would be cracking down on any fan content that contained sexual or racist content- especially Youtube or gaming streams. The announcement indicates that they will only allow any fan content that respects official canon & approved marketing materials.
* announced on international television that he is the Prince of the Grimm, Yang is his fiance who is pregnant with his child, and he'll destroy Atlas if she's not released.
* announced that they would stop "shouting" at viewers to start using mixed cases back then, but unsurprisingly for a government agency, it took them an extra twenty years to completely phase out the old equipment that only accepted teletype.
* announcement ad characters. When Goofy suggests just walking over and introducing themselves, Buzz scoffs "nobody likes a nosy neighbor."
* Announcement supposedly heard at the beginning of a flight (insert name of
* announcement trailer were in the actual movie because the story was rewritten several times.
* Announcer Chatter: Announcers in video games can be funny, but also annoying.
* Announcer Don Wilson would interrupt sketches to shill the sponsor’s product, to the characters’ annoyance. In later years, when the program was sponsored by Lucky Strike cigarettes, Don would get the Sportsman Quartet to shill the product in song
* Announcer Marv Albert in particular has a distinctive "Yes!" He even guest spotted on
* Announcer Scott Stanford has yet to sound not monotonous even when he's annoyed.
* Announcer's first episode, "Sonnie's Edge", doesn't seem too perturbed by the fact that he's standing in a tiny arena between two huge monsters. Then he flickers and the tiny robots floating around him (who merely looked like a flying

microphone) flies upward making the announcer disappears.
* Announcers often say this during awesome high-risk spots. Don West was a frequent offender.
* announces her arrival at Loguetown by attacking Luffy, only to get interrupted by Nami who demands they not use haki in their clash, lest they destroy the town.
* announces), keeps track of the score and launches the killstreak rewards at the players' request.
* announce that they have names and are instantly cured. One also reveals her last name, the other says he is saving his "for an emergency."
* Announcing boss fights with a loud siren and a screen-wide warning is a hallmark of the franchise.
* Announcing your target — either to focus fire or avoid overkill in a gunfight. "Contact" makes people aware that you have spotted a target, to be followed by instructions regarding the target's positioning; "Tango down" (or its phonetic alphabet equivalent in other languages) makes people aware that your target is dead or incapacitated, and that they should find a different target. "Fire at will" essentially tells people to choose their own targets and fire as quickly as they can, though this should only be done when the risk of friendly or civilian casualties is minimal.
* Annoyed by loud lawn mowers on the weekend? It's possible to make them much quieter, but then they don't sell because people think the louder ones are more powerful and do a better job.
* annoying and insulting rodent covered in spikes that acts just like steroids when eaten.
* Annoying Arrows: A main character gets shot with arrows but is not killed or seriously injured even when they should be.
* Annoying Arrows. This slows down the unit somewhat, but it has the effect of turning the Legion using it into a walking meat grinder, stabbing enemies from behind a shield then crushing them underfoot. It is so effective that it still finds use with riot police today.
* annoying, but as a vampire, she is a cruel murderer. But it is speculated that the circumstances of her transformation have driven her crazy.
* annoying heist, they're all armed with Cold War-era AKs and grenades in late 19th/early 20th century Russia.
* annoying. It also largely contributed to his uneasy Master-Apprentice relationship with Anakin, who was very emotional and rather unstable.
* Annoyingly, she could still have taken that picture. With the lens cap on, there would have been no light - meaning no exposure. Being that the while movie is 40's retro technology, that was probably a manual camera. If she didn't advance the film, she could have taken the cap off and shot that frame again.
* Annoyingly, when you're The Law, it's up to you and you alone to stop the racers.
* Annoying Patient: An ill character makes life for their caregiver miserable
* Annoying Patient: A sick character is really annoying to their caretaker.
* Annoying Patient when he hires Elliot for his private practice precisely because she stood up to and disagreed with him (though it's implied he still went with his own diagnosis), because he has too many lackeys like the one he brought along.
* Annoying Video-Game Helper: A video game has an NPC who is supposed to be helping the player, but they tend to bug the player by giving useless tips, giving hints the player has already figured out or repeatedly reminding them to do stuff they haven't taken care of immediately after being informed it needs to be done.
* Annoying Video-Game Helper: The character helping you play the game starts to get annoying.
* Annoying Younger Sibling: A character has a younger sibling who often gets on their nerves.
* Annoying Younger Sibling: A character's younger sibling is a pain in the ass.
* Annoying Younger Sibling: A child who irritates their older sibling.
* Annoying Younger Sibling as s/he becomes a teenager, develops more "grown up" interests, and becomes absorbed in his/her own adolescent moodiness and coming-of-

age process; but when they're both mature adults, they can become close again.
* Annoying Younger Sibling at best, is essentially worshiped by the fans, declaring he be deserving of all the hugs. God knows how many Klaus fanfics there are.
* Annoying Younger Sibling: I enjoy making my big brother/sister's life difficult for them!
* Annoying Younger Sibling: I'm the little sibling and I can annoy my big brother/sister whenever I want to!
* Annoying Younger Sibling in fanfiction and sociopathic tropes have been shoehorned onto her entry on the character page multiple times.
* Annoying Younger Sibling Michelangelo gets these from Raphael on a regular basis.
* Annoying Younger Sibling mode). He's highly intelligent, much more mature than his sister, and manages to charm quite a few ladies over the course of the series (both older and younger than him).
* Annoying Younger Sibling than potential love interest) and that roughly 98% of the fans hated the pairing with a passion, the whole idea was called off and never progressed past her having a slight crush. The casting sides for Jo actually included the words "sparks are flying" in the notes though. Yikes.
* Annoying Younger Sibling when someone suggests they could be a couple.
* Annoy-O-Tron is especially infamous for this in-universe, to the point that the gnome who invented it was banished from the eastern kingdoms.
* annoy the underworld so much that your deal gets nullified simply to get rid of you.
* An NPC in Skingrad mentions that she can't return to her homeland... and then casually asks what the fine for necrophilia is. When you tell her, she reacts with enthusiasm at how lenient the fine is compared with what she's accustomed to.
* An NPC living in the heroine’s hometown mentions that the events of the prequel happened two years ago, then adds, “has it really only been two years? It feels more like six.” referencing the sequel’s lengthy development time.
* An NPC named Nigel can be found looking for someone named Gavin, another NPC which appears nowhere in the game. While it's likely a reference to
* Ann Perry. His wife, Charlotte Pitt, is a well born lady who sometimes uses her social status to assist her husband by investigating parts of upper-class female society that are not easily accessible by police officers.
* An NPR interview with a book critic went down some strange roads. The critic passionately defended
* Ann Putnam Jr. was also a major player in the Trials, with some historians even believing that
* Ann Radcliffe novelist, loved this. Most of her books have a big section in the denouement explaining how each and every seemingly-supernatural element was really just trickery. Or the wind. This is especially interesting because the supernatural was a hallmark of the Gothic genre, and Ann Radcliffe was one of its foremost writers.
* Ann's maternal grandma Misayo didn't approve of the marriage of Ann's parents Miwako and Masahiro as it also meant moving from Miwako's home village to Tokyo, but she couldn't stop them. She still doesn't like Masahiro when he sees her again post-Miwako-death.
* Ann Takamaki is also a victim of the volleyball coach, who would regularly make sexual advances toward her. After rebuffing his advances for long enough, the coach turned his attentions towards her best friend, who later attempted suicide.
* Annual #5 had all the artists on the regular comics switch places:
* Annual: Car or light truck kit that was updated yearly to reflect the latest version of the kit's subject. Usually based on the same tooling as a promo.
* Annually Retentive which shows both a traditional panel game and the (fictional) behind-the-scenes backstabbing that happens behind it. As far as the celebrities are concerned, it's a 'proper' panel show, and only the host and captains act in the behind-the-scenes bits.
* An number of interactive game shows on Australian TV did this, with questions such as "Who is the Prime Minister of Australia? A) Daffy Duck, B) Kermit the Frog

or C) John Howard." This is parodied by
* Annyseed: Charlotte Peechi decided from the moment she first met Anny that she would forever be her inconvenience.
* Annyseed: Count Tarrorviene is never seen without the lovely ninja Tabria watching over him.
* Annyseed desperately wants to be human again. Or at least feel like part of the human race.
* Annyseed is hooked up to a blood machine which he is dependent on for survival. He also keeps his most capable servant at his side all the time, rather than sending her out to accomplish tasks that are difficult for his lesser servants, because he's incapable of defending himself and fears for his safety.
* Annyseed On page 19 we see that the sinister Coldsteem has adopted a hooded costume.
* Annyseed: Uncle Tarkwin's mansion is known to be haunted. Perry Elliot, the ghost, frequently visits the library, and, (though he would like you to believe otherwise) Anny's bedroom.
* Annyseed uses a love potion in order to deter someone from her, rather than attract someone to her. Winston, you're a genius! Mmwa! Page 61.
* Annyseed: Why does Count Tarrorviene have red scabby rings around his eyes? And how come Uncle Tarkwin doesn't have them, yet is the same age and species as Tarrorviene? Also, just how did they get that conveniently designed blood machine into that castle keep, and manage to plug it into his shoulder blades whilst he (most likely) fought for his very existence? It doesn't matter, it's creepy, so let it be.
* A noble time elemental can age a creature by 1-20 years once per day.
* An obligatory parody had Meg race a man on a horse-drawn carriage. The man loses control on a sharp turn and crashes through the guard rail. The carriage bursts into flame and the horse lands upright, notices what happened to the carriage, and flashes a nervous look to the viewer just before he too explodes.
* An Oblique Approach the three men who "had enough sense not to volunteer."
* An obscure 1980s country music band called Bandana produced two examples: lead singer Lonnie Wilson became a session drummer and songwriter, while guitarist Tim Menzies had some songwriting successes. Drummer Ray Johnston's son, Jaren, became a popular songwriter and the lead singer of The Cadillac Three in
* An obscure British comics hero named Dolman fought crime using remote controlled mechanical puppets. The puppets had no minds or autonomy of their own whatsoever, but Dolman would frequently use his ventriloquism skills to throw his voice and hold conversations with them,
* An obscure Christian rock band called White Heart produced several famous
* An obscure game called "Truth Detector" consisted of cards with questions for the players to ask each other, and an electronic device which claimed to detect levels of truth. The small print mentioned that it actually detected conductivity of the body, which had some semblance to reality, because liars tend to sweat more.
* An obscure one during the final chapter. You will find yourself in a scenario similar with the Red Bones way back in chapter 1. Doing nothing, instead of being kicked out of the room like the last time, you’ll sink to the floor. You’ll be warned by your partner. Failing to follow the advice, your partner will warn you again, with more urgency. Ignore the warning one more time, and you’ll meet your end.
* An Observation Record of My Fiancée - A Self-Proclaimed Villainess happens with the antagonist, Heronia, who tries to follow the Stations (and botches lines when she references events that don't happen as if they did) and gets very upset when they don't work in her favour.
* An obsessive stalker (the genders change with every telling) sets their sights on a target they're supposedly
* an obsolete trope. And that's just the gross amount of data our brain can store, by the way. It doesn't account for any the brain's methods of data compression — which are impressive in their own right, seeing how trivially we take trains of thoughts that would fry top-of-the-line computers and compress them into

simple sentences. This could mean that people don't forget standard things on arbitrary days because their brain is unable to remember them, but rather that the brain considers those things not important enough to bother keeping. It could be a question of priority rather than capability.
* An occasional variant has a character, upon realizing their situation, desperately start scrambling
* An occasion has Keitaro and Kitsune sneak in Naru's room to discover her real feelings and use invisible tutes created by Su. The power potential is invoked by Keitaro and realized when Naru enter in the room and start to strip.
* An occasion in Season 2 has Tsukune do this to Kurumu's mom twice. The first made by she herself for tease him, the second accidentally when he fall on her and Mizore's mother.
* an occasion of intense rivalry, Barely two weeks later, the previously reluctant British Parliament, which had defeated a previous motion along the same lines two years before, voted to extend air strikes against ISIS to their heartlands in Syria and RAF bombers were in the air within the hour. They may bicker incessantly, but if you go after one of these countries, you'll face the immediate vengeful wrath of the other — and since both are still among the most powerful nations on the planet, this is not a fight you want to pick.
* An occurrence from the last book of the manga: Mousse, Ryōga, the Jusenkyō guide and his daughter Plum are spying on Ranma and Shampoo through a wall, Mousse using the old trick of putting a glass against his ear. When he hears Ranma asking for Shampoo to take off her clothes (a ploy to steal some of the Phoenix people's magical eggs, but Mousse doesn't know this), the glass between Mousse's fingers cracks.
* An Octave Higher has Sorcer, in which two sorcerers compete in a hexagonal arena to break any two of the other player's three crystals using magic. You can also win by knocking the other player unconscious.
* An Octave Higher in the kingdom of Overture and that they run the gamut from drinking fountains to kitchen stoves to flying cars and everything in-between, it should come as no surprise that Magical Mechanical is very powerful and employs a vast majority of Overture's proletariat in its factories.
* An Octave Higher that run off the other four Traits are abundant, Compassion magic cannot be used on inanimate objects. A scientific attempt to disprove that last limitation is what sets the plot in motion.
* An Octave Higher to cast spells, you can't even take a shower because the water is being summoned via magic.
* An odd and annoying inversion of the trope occurs with the constant use of the Italian phrase
* An oddball aversion is occasionally used when someone is trying to confuse a meeting. Consider the following: "All in favor, say 'Aye'." (Those in favor do so) "All opposed, same sign." (e.g.
* An odd bit of folklore claims that kissing one's own elbow will cause a person to change sexes. (Did you just try it?
* An odd case is Thomas Logan, the biological father of Wolverine. When he was alive, he didn't care about James (it's unclear if he knew Wolverine was his child) or Dog, but when Wolverine ends up in Hell, he meets Thomas for the first time. Thomas gives him, of all things, a
* An odd case was Velez herself saying this to the older, more established wrestler
* An odd case with Prishe, during her EX mode she equips Destroyers, which on her original title are inferior to both the weapons used for her unique level 90 (Sphairai) and level 100 (Glanzfaust) weapons on Dissidia. However the Destroyers were the best weapon a Monk could realistically obtain for a long time. (See the Relic and Mythic entries under
* An odd double example with The Boys, three of the Heterodynes' Jagermonsters. When the last of the Heterodynes vanished, the remaining Jagers were compelled to join up with Baron Wulfenbach for wages and protection. However, they felt an obligation to serve the Heterodynes and search for a successor. As a compromise,

Maxim, Oggie, and Dino were "detached" from the Jagers, releasing them from their oath to Wulfenbach and leaving them free to hunt the lost Heterodynes. In turn, this meant the other Jagers were free of their commitment to the Heterodynes and could serve the Baron.
* An odd double-subversion happens in the episode where Him brings the Rowdyruff Boys back stronger and immune to the Girls' kisses. The Girls are clearly visibly hurt and wounded from the brutal fight... But the wounds strangely vanish as soon as they manage to turn the fight around.
* An odd example comes up when ADA Cabot orders Stabler and Benson to search a house for evidence in a child-molestation case, saying that she has a search warrant. It turns out that she lied. The evidence is still ruled admissible, as it wasn't the suspect's house that was searched, but the judge tears Cabot a new asshole over this.
* An odd example comes with Anchovy, since the manga was released before the anime showed her match with Oarai. In the anime, Anchovy's competitive but fairly good-spirited, and after losing, invites the Oarai crew to eat with her and the people who set up the match. In the manga, she starts off by accusing Miho of having a "weak" way of tankery, and at the end, accuses Miho of costing her old school the championship by abandoning the flag tank.
* An odd example for 2012: Billy asks to go out as a specific character, "Tactical Sergeant Tarkus from the Blood Ravens 4th Company in
* An odd example for the French dubs: Anais Delva speaks and sings for Elsa in the European French dub. The Canadian French version dubs Elsa's
* An odd example is Ollanius Pius, who dates back to the oldest fluff. This
* An odd example is the Tennessee Valley Killer's posse, made up of a cow doctor who bred roosters for illegal fighting, and one guy who wanted to eat said roosters. Their case was dramatized in an episode of radio drama
* An odd example occurs in the movie. While the majority of the combats in the series make it look like a big boss rush, the final battle in the movie is against a group of identical mooks that even carry "Mass Production" in their names.
* An odd example of this is how the art and animation of the average episode went up during the post-war arc. Although the "war of the best" had a lot of short but sweet animation, the average episodes fell short of the post-war arc's in terms of the art and animation (this was despite the fact that the post-war arc hardly had any "great" animation).
* An odd example of this version of the trope was a Cabbage Patch Kids ad for the Fun Bubble Baby line-up, which had two versions of the commercial:
* An odd example: On Danish television channels from the early ages of TV till the 2000's, when the channels were off air, they would display the technical difficulties screen with a loud never-ending beep. Around 2007-08, due to TV stations getting better equipment, it's rare to see a single channel have it during the off-air hours. Now they are replaced with a slideshow overview of the next day of broadcasts with the TV-station's radio counterpart playing music in the background. This has mostly been because of the technical difficulty screen having next to no use, even when technical difficulties are happening, mostly with how easy it is to fix them and how it's faster to have the TV-station's narrator to explain what's up.
* An odd example: The best remembered version of "Land of 1,000 Dances" is neither the first version (by Chris Kenner) nor the highest charting version (by Wilson Pickett), but a low-charting version by the otherwise obscure band Cannibal and the Headhunters — which was, significantly, the first version to use the "na-na-na-na" chorus.
* An odd film example comes in a flashback scene at the beginning of
* An odd instance of this trope occurs in Chapter 4, where Moon dies after delivering a fatal, explosive
* An oddity considering that it's completely CGI, but the opening scene of
* An odd Jewish story/joke has a dead man turned away from Heaven on the grounds that he's
* An oddly disturbing example is found in the titular protagonist of

* An oddly provincial advert for broadband Internet informs us that a
* An odd one indeed: Hork-Bajir. A rather peaceful race, despite the tough-as-nails name. Except they have blades EVERYWHERE. But they wouldn't hurt a fly. Until the Yeerks got hold of 'em.
* An odd real-world version exists in combat sports when regarding titles. Often, champions will walk away from organizations or be stripped for not defending their titles (due to injury or, some say, ducking competition). Also some champions have lost fights in non-title bouts. This has led many fans of boxing and
* An odd side effect of both the use of recycled vinyl and the Dynaflex scandal was that kids growing up in the 70s abandoned vinyl like rats fleeing a sinking ship. The popularity of cassette tapes and, later, compact discs is directly linked to the fact that there was a time when you couldn't buy a vinyl record that didn’t either skip or warp right out of the sleeve. Even today vinyl acceptance is at its lowest among older Gen Xers.
* An odd subversion in the case of the Banks house was that, while most versions of this house are much larger than you'd expect the family to inhabit given their supposed income, the Banks' home had a surprisingly
* An odd take in the episode "Can't Bayou Love", where Jambalaya Jake lures Darkwing into wet cement mixed with
* An odd variant in the second book. By now, the Nantucketers have adapted to a largely 19th-century tech base. But when the Island is attacked by
* An odd variation in "Chrysalis" where we get the the typical police reaction without the actual death. Garibaldi is shot
* An odd variation occurs when Dende uses the last wish on Porunga to wish everyone off of Namek save for Frieza and Goku. Not only did this screw Frieza out of his immortality like in canon, but this was the same exact plan King Kai was going to use, only Dende beat King Kai to the punch and did it solely to piss off Frieza.
* An odd version of this trope turns up in the anime film adaptation of Osamu Tezuka's
* An odd version that sets off the episode's main plot happened in an early episode of
* An odd version, where Vaarsuvius is saved from a death knight by the severed head of a zombie dragon falling on it. Also the eternal fate of the
* An odd zig-zagging with relation to UK-produced TV series that air in the US as part of
* A No Death run is a self-imposed challenge, as you can sacrifice basically any units other than Lords or mission-specific characters. It's not really
* Anodyne gives new protagonist Nova a vacuum. Nova was created to shrink down to microscopic size and purify the corruption of the various characters by vacuuming up the evil dust.
* Anodyne Liniment is a medicine that relieves aching muscles and is meant to be rubbed into skin, not taken orally. In
* An off-course balloon knocks the Nelson statue off of Nelson's Column in Trafalgar Square.
* an offensive against Casterly Rock, to help deprive Cersei of her wealth and power along with inflicting a blow to Lannister morale. Unfortunately, he’s working from out-of-date information, as the Rock’s gold mines have long been dry and the Lannisters have only left a small garrison to defend it. The Unsullied take the Rock, but it’s a Pyrrhic victory.
* An Offer You Can't Refuse an offer, it's one that cannot be refused without dire, dire consequences.
* An Offer You Can't Refuse: An offer where the choices are "Accept or die."
* An Offer You Can't Refuse: An offer where the choices are, "Accept or die"
* An Offer You Can't Refuse— An offer where the choices are "Accept or die".
* An Offer You Can't Refuse: Where the bad guy forces the good guy into doing something via threats, kidnapping or blackmail.
* An Offer You Can't Refuse: You don't have a choice here! Either accept my demand or it's curtains for you!

* an offhand comment we leave Cybertron and pick up with the three of them and see where they went, why they left, and what kind of adventures they're getting into right now.
* An Officer and a Gentleman around, there'd be a damn good movie in there.
* An Officer and a Gentleman centers on a cadet at an Officer's Training School. The school in this film is an example of a school that commissions aviators but does not provide undergraduate academics.
* An Officer and a Gentleman iconifies this trope and inspired countless parodies.
* An Officer and a Gentleman, Mayo has to clean the floor with a toothbrush at the end of his weekend of hell after he refuses to DOR.
* An Officer and a Gentleman, officer candidates continually refer to Gunnery Sergeant Foley as "Sergeant". Navy OCS candidates refer to their Marine drill instructors as "Sergeant Instructor" (followed by proper rank and last name if referring to a specific instructor rather than the one yelling in your face). In addition, while the United States Army allows the use of "Sergeant" for any NCO from E-5 to E-8, Marine Corps etiquette insists on referring to non-commissioned officers by proper rank, and even though the Army doesn't require them to be called anything by sergeant, E-8s are often referred to as "Master Sergeant" anyway.
* An Officer and a Gentleman. "Only two things come from Oklahoma: steers and queers. And I don't see no horns, boy."
* An Officer and a Gentleman, Paula confesses to Zack that she loves him because he reminds her of her father, a Navy aviator.
* An Officer and a Gentleman plays a bit with the trope. The Navy Aviation School is situated in Pensacola, Florida, but the film was made at an abandoned Air Force base in Washington State. There are, however, no attempts made to make Washington look like Florida, and a lot of things, including local slang, are slightly altered to make us believe and feel you can become a Navy Pilot on an island west of Seattle.
* An Officer and a Gentleman: Rachel kept having to go back for stuff, so in the end, Ross just dumped her on the couch.
* An Officer and a Gentleman, right down to the "steers and queers" line.
* An Officer and a Gentleman song. "Love lift us up where we belong, where the eagles fly on a mountain high..."
* An Officer and a Gentleman up in her arms while "Love Lifts Us Up Where We Belong" plays in Vietnamese.
* An Officer and a Gentleman, when Sgt. Foley has to administer CPR on one of the recruits after an accident with a crash landing simulator.
* An Officer and a Spy dramatizes the "degradation", the formal ceremony in which Capt. Alfred Dreyfus, unjustly convicted of treason, is stripped of his rank insignia and has his sword snapped in two.
* an officer back on the ship disobeys orders and fires on the planet in an attempted assassination.
* An officer does suggest using nukes, only for the governor to firmly state that no one is going to drop an H-bomb on his state.
* an Officer Jenny episode "Stealing The Conversation" who carried around a bowling ball and used it on criminals like this.
* an officer risen from enlisted ranks and incompetent as an officer (e.g. he didn't know how to read maps). In the aftermath of My Lai, both officers were drummed out of service, and Medina barely avoided prison.
* An officer who has so many medals nailed to their uniform that one would expect them to be a ranking general-grade officer, but they turn out to be only a field- or junior-grade officer. And yes, they earned them all
* an official enquiry called after the show was cancelled, they stated their official policy with guests who aren't happy with the material is to "leave the stage". The statement ignores that guests who tried this over the years quickly discovered that the backstage area was a nigh-incomprehensible maze, filled with confusing corridors and a monotonous office layout that quickly tripped up fleeing participants. Made even worse that Kyle would constantly call them out on their behavior ("Are you going to make me do a runner?") and would chase them backstage

to antagonize them some more. Participants continually did this throughout the show's run, unaware that it almost never works.
* An official Jurassic World "guidebook" of sorts entitled "The Park is Open" (though it's marketed as a children's sticker book), which also comes with Jurassic World visitor passes.
* An official Nintendo of America strategy guide called the baseball-throwing Chuck a "Confused Chuck".
* An official one, the Donkey Kong Country Competition Cartridge, was made as part of a Blockbuster video game competition. 2,500 copies were made, and after the contest ended, Nintendo Power mailed copies to subscribers. To date, it’s one of the rarest video games ever made.
* An official online multiplayer game for the books was announced with much fanfare and given a 2010 release date. It allegedly got as far as early beta testing, but never came out, without any word as to what happened.
* An official statement of the Vatican can basically be boiled down to, "There is no current proof of whether or not alien life exists, but the Bible does not strictly speak against it, so it's still possible. Should we encounter alien life in the future and they wish to join the Church, we will gladly offer them baptism." Cue outrage and hate from various other denominations and "more orthodox" Catholic parishes.
* An official title given to St. Joseph by the Catholic Church is "Terror of Demons".
* An off-screen race elsewhere in Andromeda apparently worshiped the Remnant as well. The kett took all their scientists to try and get that information for themselves.
* An offshoot called Darling Pet Munkee was dedicated to mail order ads found in comic books. Part of the concept is for the lyrics to stick to the hyperbole of the ad copy, as the actual product was usually disappointing in comparison. The "darling pet monkey" ad they named themselves after really
* An oft-cited justification for the increased militarization of American police forces is that
* An often obscured argument in the old "dub vs. sub" wars is that some audience members prefer a character they
* An often-overlooked bits is that even Yuyuko and Youmu are Church Militant of a Buddhist esoteric order. Their stages are heavily based on the concept Pure Land, and their spellcards based on teachings of Buddhism (notably the aforementioned Pure Land esotericism).
* An often overlooked but crucial detail is that X and Zero (and Axl) give them a choice. They always come asking for cooperation or surrender
* An often overlooked example, in the original tale, King Midas was able to support the weight of his daughter after she was turned into a solid gold statue. Gold is very heavy, so no human being could possibly support a solid gold statue by themselves.
* An often-repeated and likely-apocryphal tale from the Vietnam War involves a US Navy frigate, usually said to be the USS Barbey or USS Bronsten (the former is unlikely, as it wasn't commissioned until 1972), patrolling the Gulf of Tonkin off the North Vietnamese coast during the war. NVA shore batteries and patrol boats sometimes attacked US ships near the coast, which invariably resulted in a
* An oft-parodied self-defense video from the Facebook page "Las Vegas Gunfights". An old man is approached by a mugger with a knife, and then begins to clutch his chest as if he's having a heart attack. This is actually a ploy to stall the mugger so the old man can draw and aim a gun he had stashed in his coat pocket. What really sells it is the old man's accompanying dialogue:
* Anohana: The Flower We Saw That Day, after false rumors spread about Anaru going into a love hotel with an older man, resulting in an argument between Anaru and her mother, she considers not going to school. Jintan, who's spent a lot of time skipping school due to being traumatized by the loss of Menma, advises Anaru not to do so. Anaru notes that it's hypocritical of him to say this, and Jintan acknowledges it, but says that the longer you skip school, the more difficult it is

to come back; Jintan had tried to go back in an earlier episode, but hadn't been able to follow through. Anaru ultimately accepts that Jintan has a point.
* Anohana The Flower We Saw That Day: Five friends who have fallen apart after the sixth friend died five years ago are brought back together and decide to work through their trauma after her ghost appears to one of them. By the end, they're all at least on the path to healing and growing up.
* Anohana The Flower We Saw That Day for being the one who Jintan liked rather than her, since Menma was always very nice to her and a really good friend when she was alive. She later admits she feels horrible about having felt relieved when Jintan called Menma ugly.
* Anohana The Flower We Saw That Day in the whole series is a single Jerkass upperclassman who tries to take advantage of Anaru in episode 5.
* Anohana: The Flower We Saw That Day. Menma suffers a tragic death right after hearing Jintan deny having a crush on her. In reality, he returned her feelings while she was alive, and still liked her even when she was a ghost.
* Anohana: The Flower We Saw That Day (plus a movie that's half recap footage)
* Anohana: The Flower We Saw That Day revolves around a group of six childhood friends who drifted apart after one of them (Meiko aka Menma) dies and years later, Menma appears as a ghost asking Jintan to have a wish granted, but she doesn't know that wish, so he gathers around his old friends to help solve his problem.
* Anohana: The Flower We Saw That Day! Since the lyrics were essentially the same, this means that the song has been used in at least two shows!
* Anohana: The Flower We Saw That Day that she cannot remember before she can actually pass on.
* Anohana: The Flower We Saw That Day - The NIS release was sub-only, but Aniplex USA re-released it in 2017 with an English dub. The recap/sequel movie has yet to be dubbed.
* Anohana: The Flower We Saw That Day. They both blame themselves for Menma's death, have inferiority issues (Anaru, in regards to Menma; Yukiatsu, in regards to Jintan), and are "kindred spirits" in unrequited love. This is why Yukiatsu saw Anaru as a possible back-up girlfriend, too.
* Anohana: The Flower We Saw That Day trying to rest in peace sort of.
* An Oh Henry ad showed a hungry university student seeing his English Literature professor as a giant Oh Henry bar... and chasing said professor down the hall.
* An Ohio congressman, John Scott Harrison, was the victim of grave robbers in 1878.
* ''Ano Hito no I ni wa Boku ga Tarinai'', they fall in love, and he joins her on her quest to consume other Eldritch Abominations.
* Anointing of the Sick, and the hospital chaplain isn't a Catholic priest, s/he can contact a local priest (or even the patient's priest) to perform the ritual.) They may also facilitate bringing different types of worship services onto the school/hospital/prison campus.
* A Nokia ad for their Lumia 1020 has the following from a Samsung User to an iPhone user: "2007 called. It wants its cameraphone back."
* An old adage among comic book fans is, "There are only three people who
* An old ad for a 900 number that gave sports scores and whatnot: 900-976-1313! Done as a
* An old ad for Capital One features a family complaining about their credit card service not offering them free airline miles for purchases, so the dad invents a machine to teleport them to their vacation destination. The father enters the destination as
* An old advert for Guinness ran with the quote "88.2% of statistics are made up on the spot", attributed to Vic Reeves. Most (95.639055252364%) of these will have ridiculous precision. (Source unknown)
* An old advert for Smash (which was basically powdered potato starch) had robotic aliens laughing at humans for the time-consuming way they prepared mashed potatoes - including "they peel them with their metal knives" and "they boil them for twenty of their Earth minutes."
* An old advertisement for the Seattle Mariners baseball team showed the "Lou

Piniella school of therapy." (Piniella was the team manager at the time, and a very good manager was he.)
* An old and odd variation in the story of Sodom and Gomorrah, where Lot's wife is reduced to salt particles after seeing the divine destruction of the cities.
* An old animation trope was to draw all babies with eyelashes to make them look youthful and innocent. This can be seen in many shorts from the early-to-mid 1900s but has gone out of style since. This is why Tweety from
* An old anthology from Marvel comics had a scientist build a device that used electricity to induce immortality. Unfortunately, the twist ending involved a second hit undoing it just as he suffered a fatal wound. Another had a man develop a serum that granted immortality but also cause deforming mutations into a durable monster.
* An old artwork for Poliwhirl/Poliwrath shows it wearing a crown; in Generation II, the crown-like King's Rock gives Poliwhirl access to the alternate evolution Politoed.
* An old Australian television ad for insurance had some average Joe walking along the street, narrowly avoiding accidents. One of the accidents he ducks (literally) is the
* An old Australian television ad for insurance has some average Joe walking along the street, narrowly avoiding accidents. One of the accidents he ducks (literally) is the Plank Gag. He drops the coin he is flipping and bends down to pick it up just as the workman with the plank turns around, the plank passing harmlessly over the top of him.
* An old British comics character named Disaster Des caused trouble wherever he went without meaning to. He had a habit of singing to himself, but instead of "dum dum dum", he always sang "doom, doom, doom".
* An old BUPA advert had a sports presenter telling a man in a pub that he could get treatment from BUPA for his medical condition.
* An old cartoon had two Inuit outside an igloo while missiles from the USA and USSR fly overhead; one says to the other "Looks like the end of the world as they know it."
* An old cell phone commercial has a dad being more concerned about his kids running up their phone bill than he is about them getting an A on a test or accidentally backing the car into the garage.
* An old children's joke is to place a hand on the head of another child and undulate the hand, and ask, "You know what this is? ("What?") A brain-sucker. You know what it's doing? ("What?") Starving."
* An old Chinese legend contains a variation. It tells about a bell which did not come out right during the casting. The ruler said the person who made the bell would be killed if he failed again. His daughter was foretold that a young maiden's blood needs to be added, so she jumped into the molten metal. It worked.
* An old comic from the classic horror days had a parasite that masqueraded as the hand puppet of a popular entertainer. When the 'puppet' is voted in as president, due to people deciding to protest against the current choices, the truth is revealed. But, before it can be stopped, its brethren all come flooding out of the swamp they're shown to be hiding in. Now that one of their own has been made president, they graft themselves to everyone conquering the US, if not the world.
* An old comic started with Hitler having a man with wild long hair and dirty torn clothes raving about how it was all happening again, and how Hitler need to stop it. Hitler had him executed, and somewhat casually wondered where he had come from. His aides told him the Allies were nearly there, so he went down into his bunker, where a scientist was finishing work on a stasis chamber. Hitler killed the scientist so that
* An old commercial for Clearasil had a guy's younger brother doing this to him after explaining why he wanted to use Clearasil on his face instead of soap.
* An old commercial for Maaco auto re-painting shows car owners shrinking to 3 or 4 feet tall out of embarrassment because of the shameful condition of their car.
* An old definition from the Oxford English Dictionary, as quoted from
* An old drug PSA used the tagline of "Be An Original". How does doing what the

commercial tells you to do make you an original? They probably meant: "Don't be like all those drugged-out kids out there, because you're morally superior to them." Not only an arrogant point of view, but pretty cynical as well. (Later ads evoke the same theme, with their "Above the Influence" slogan.)
* An old druid game is "Aerial Chicken", which consists of flying really high, dismounting, and the one who re-mounts first (or splats into the ground) loses. Bonus points for convincing non-druids (who cannot re-mount while falling) to play.
* An old editorial cartoon from the 1980's satirized the justice system of the Soviet Union by showing the KGB arresting someone while reading them the "rights" of "You have been set up, you have the right to remain set up. Everything we say can and will be used against you in a sort-of law. You have the right to an executioner. If you cannot afford an executioner, you will be executed anyway and your family will be billed for the bullet." The "billed for the bullet" bit was
* An older comic involved a witch capturing a mermaid's friends and family,
* An older episode does something similar—Barbara Streisand is trying to get Cartman's ancient mystical artifact, and she persuades the kids to go for a ride in her car. Kyle briefly realizes that they're not supposed to go into cars with strangers, but Cartman curtly replies by saying "not if they're giving you
* An older man is found dead of an apparent heart attack dressed in a leather gimp suit → the nanny of the dead man's children was accused of killing her abusive father in a similar way → turns out the dead man was a child molester who sexually abused his older son; the older son poisoned his father to prevent his little brother from being abused, and tried to frame the nanny.
* An older one involves Lois quickly changing the subject at hand to her aunt coming to stay with the Griffin household for exactly one week. One flip cut later, they're standing at the door waving goodbye to Lois' aunt and then returning to the previous plot.
* An older promo has the tagline "Making the First Amendment seem like a bad idea".
* An older strip had Slick dress Squigley up as a fangirl of his, to impress women. Bonus points for the squeeing
* An older version of the song has the initial impossible request come from the guy, and everything else is the girl's response- demanding him plough land between "salt water and sea strand", reap the crop with a
* An old example: "To Anacreon In Heaven" was written by John Stafford Smith for the Anacreontic Society, a group of amateur musicians in 18th-century London to which he belonged, for their convivial gatherings involving music and song. It was dedicated to their namesake, the jovial Greek poet Anacreon, and
* an old-fashioned rugby scrum" to describe a chaotic mess with players piled on top of each other, or even an outright fight. However, a rugby scrum is structured and tightly regulated. Rucks and mauls, on the other hand, are a different story.
* An old folk remedy people used to use in Japan (and possibly other places) involved sticking a spring onion stalk or
* an old friend, and Spike follows along to make sure the reluctant Starlight follows it to the letter.
* An old friend of Han Solo's sets him up to be captured by Boba Fett in
* An old Harvard anecdote tells of a Theology professor nearly getting run down by a truck driver.
* An old horror comic had a man buried alive in a coffin with a telephone in it. Desperate to call for help, the man tries contacting the operator again and again, even as his air runs low. When the man finally makes a connection, the operator instead lectures him on tying up the phone lines as the man suffocates and dies. The operator's not just being a sadist, though -
* An old hunter's joke: How do you tell the difference between a black bear and a grizzly bear? Climb a tree. If the bear climbs up after you and kills you, it's a black bear. If it knocks the tree down and kills you, it's a grizzly bear. And if there's no tree in sight, it's a polar bear.
* An old idea going as far back as the ancient Greeks and Chinese, this could be considered a subversion on Earth. A world government would on paper be interested

in very different, more global issues from the countries contributing to it and would likely look much more like the UN than a traditional country covering the whole world. Whether such efforts will, or should, ultimately result in a universally recognized world order, let alone what kind it would take remains a matter of much debate.
* An oldie but goodie: An eagle eats a worm and takes off flying. The worm suddenly pops out of the eagle's asshole and asks "How high are we?" The eagle says, "About 1,000 feet in the air." The worm says, "You wouldn't shit me, would you?"
* An old issue showed the gang as cave people, given presents by Santa: Modern clothes in the sorts of boxes high-end stores once used. They find the modern clothes useless but thank the strange red guy for the wonderful gifts - the immensely useful boxes.
* An old Italian saying: "Vedi Napoli e poi mori" (See Naples and die) plays with this trope. It can mean that after seeing beautiful Naples, you can die happily. Joke is, it can also mean "See Naples and then Mori" (Mori is a town in northern Italy). Naples is also an Italian euphemism for Hell. So it can also be interpreted as something along the lines of "See Hell and die." (Va fa napoli, or something very close, is essentially the Italian bowdlerised version of Go to Hell.)
* An old Japanese legend tells of a man who started off with a single piece of straw, and traded up until he was rich. This was referenced in two video games:
* An old Japanese myth says that if two star-crossed lovers commit dual suicide, they get reincarnated as twins.
* An old Jell-O commercial from the 50's shows a Chinese baby trying to eat Jell-O with chopsticks while the narrator speaks Japanese Ranguage. This is a good demonstration of the trope applied to Chinese accents: all the R's become L's, but the L's are untouched (it's not Jerr-O).
* An old Jewish guy runs through the station, trying to catch his train, but the train drives off before his eyes. "Ha, you missed your train?" some laughing idiot asks him. "No," he says, "I chased him away."
* An old Jewish guy tries to cross a frozen lake, but suddenly collapses into the ice. At that moment, a wise guy walks by the banks and shouts, "Hey, you! Did you fall through the ice?" "No!" says the old guy, "I went for a swim, but then winter surprised me."
* An old Jewish story tells of Reb Eisele Charif challenging all the young yeshiva students with a difficult Talmudic question, declaring that the one who answered correctly
* An old joke about a man who married an undead girl and is very deeply in love with her. Not because of her beauty (she's a rotten corpse) or kindness (she's still a flesh-eating ghoul), but because of the worms that he plucks out of her body. Although, of course, only a fellow
* An old joke: A child is born without ears. Every family member comments on it, until the exasperated father promises himself that he'll knock out the next person to comment on it. Cue another relative arriving and remarking "Oh dear. I hope he'll have perfect eyesight." "What? Why?" "Well, how the hell is he going to keep his glasses on?"
* An old joke: A man and a young boy are walking through a forest. The boy says "I'm scared". The man replies "
* An old joke around this trope; a man living in an apartment building has fallen into the habit of dropping his shoes on the floor when he gets home and takes them off. This causes his downstairs neighbour to complain about the frequent noise. One evening, the man comes home, takes off one of his shoes and drops it, but then remembers his neighbour's complaint and places the other one quietly on the floor beside the first shoe. Hours later, he's going about his thing when he suddenly hears an anguished cry from downstairs:
* An old joke: "Be alert! Your country needs lerts!" Response: "No, be aloof — we've got enough lerts."
* An old joke (generally seen on t-shirts and bumper stickers) plays with this: "Filthy Stinking Rich? Well, Two Out of Three Ain't Bad."

* An old joke goes: there was a boy who never spoke. As he grew up, his parents took him to doctors, specialists, healers; there appeared to be no physical reason for his silence, but no one was ever able to make a dent in it. Finally they gave up and accepted him for what he was. One day when he was 13, the family was eating dinner, and the boy suddenly spit it out and
* An old joke: Grab someone by the head and start moving your hand up and down then say "This is a brain-sucker... and it's starving."
* An old joke: I do not smoke, do not drink, and do not swear... Shit, I dropped my cigarette into the cognac again!
* An old joke is "Cowboy coffee". You toss a horseshoe into the pot. When it floats, coffee's ready.
* An old joke revolves around this: Schwarzenegger has a long one, Richard Gere has a short one, Cher doesn't have one, and the Pope has one but never uses it. What is it? Given this article, it is obviously: a last name.
* An old joke states that the reason women are attracted to a man in uniform is very simple:
* An old joke tells of a man who has to pick between three women and hands them each a sum of money to see what they do with it. One does herself up because she wants to be his ideal attractive woman; the second spends the money on gifts for him; the last invests the money in stock and returns to him the portion he gave her. So after all of this, who does he go for?
* An old joke tells of an old woman who regularly attends a church where the pastor regularly condemns various perceived and real social evils and sins. She responds to all of them with a hearty "AAAAMennnn!!" and a generous dip of snuff. Until one day when the pastor starts in on snuff-dipping, whereupon she simply says "Wouldn't you know it? He's stopped preaching and started meddling!"
* An old joke (to be used with a phone): "Hello? You don't say. Hello? You don't say. Hello? You don't say. Hello? You don't say."
* An old joke: two friends are trekking through the jungle and set up camp for the night. At one point, one of them sits bolt upright and says "Listen! I heard a sound. I think it's a lion." The other simply gets out of bed and starts putting on a pair of shoes. The first friend looks at the second friend incredulously and says "What on Earth are you doing? You can't possibly outrun a lion." The second friend looks the first right in the eye and says: "I don't have to outrun the
* An old joke / urban legend involving a supposed radio communication between two crews on the ocean revolves around one of these exchanges. The first vessel, a major battleship (usually, in modern tellings, belonging to the US Navy) notices the second getting closer and orders them to change course to avoid a collision. The second (usually Canadian or Irish) radios back to retort that they're not moving and the battleship is the one that has to change course. This carries on, often involving increasing amounts of arrogance, belligerence, and frustration on part of the battleship, only to be met with the same contrary response each time. Eventually, the commander of the battleship gets on the radio, lists the powerful capabilities of the battleship/fleet in painful detail, and promises swift and violent action to be taken if the second group does not instantly change course... leading to this response:
* An old joke: What's worse than finding a worm in the apple you're eating?
* An old joke with many variations goes something like this: Little Billy screams out, "Dad! There's a monster under my bed!" The dad comes in, shoulders slumped, and said, "Son. There are no monsters under your bed. The real monsters are a wife who doesn't respect you, a boss who abuses you, a job the dehumanizes you, and waking up to realize that's it for you, and no one will care when you're gone." Dad turns and walks away. Then a voice under the bed says, "Damn, is he OK, Billy? Go check in on him."
* An old lady who is the head of a notorious criminal gang has become a stock character in many comedies, comics and cartoons, including
* An old Lee jeans commercial had this happen to a father, whose jeans button popped off and ricocheted around the living room before eventually finding itself caught in the mouth by the family dog.

* An old man is telling this: "An attractive young woman asked me once, 'What do you prefer: breasts or legs?' I told her what I really liked was a well-shaved snatch. Apparently, I am no longer welcome in any KFC establishment from now on."
* An Old Man Visited a Town who has an emaciated face and sunken in yellow eyes. The narrator notes how he wobbled around as if he did not have feet.
* An old Marvel horror comic has "Joe the Invisible Goon", a creature which obeyed a guy's literal commands (To the point where it caused his girlfriend to have a heart attack when he yelled at her to drop dead), which took the form of his shadow most of the time.
* An old Mexican joke tells us that Pepito used to play pranks on his family. He would go to his relatives and say with an evil smirk, "I know
* An old music program at Czechoslovak Radio started with the following announcement (a parody of the time signals): "It is exactly the time that it is right now. If your watch reads more or less, it is not our fault, because we always start on time."
* An Old Navy commercial from 2006 had a woman blow a bubble that lifted her into the air, and people started forming a human chain to make sure she doesn't float away. Said bubble eventually became the size of a house and the chain had at least 15 people wearing denim jeans.
* An old Nintendo 64 commercial featured a man swinging around an N64 controller (which is very large, two or three times as large as the PS2's controller) by its cord, until he wound up hitting himself in the testicles with it.
* An old one in the US: "In America you have the right to be tried by twelve people who couldn't get out of jury duty."
* An old one liner from a stand up routine: Our house is so messy, the cockroaches tried to have us exterminated.
* An old Pepsi commercial had five bears emerging from the wilderness to terrorize a small town by spelling out "Pepsi" in a distinctly "YMCA"-style dance. After the townspeople fearfully comply with the beasts' request, a man remarks, "Heaven help us if they ever learn the Macarena." Coca-Cola, on the other hand, is famous for its commercials with lovable, cute polar bears. A serious subversion.
* An old Pepsi commercial had two kids with a pet goldfish who would play dead, where it was given a drop of Pepsi that the fish would jump out of. When the father thinks the fish is dead, he flushes it down the toilet by accident.
* An old Playboy cartoon has an attractive young lady , just married to a wealthy older man, saying "now that we're married I have something about my past to tell you". Visible on her buttock is a tattoo saying "Property of Hell's Angels" (used by the gang on young girls at the time).
* An old Rice-a-Roni ad campaign featured creepy anthropomorphic singing potatoes urging the viewer to "save a potato" by eating thankfully non-sentient Rice-a-Roni.
* An old schoolyard joke goes that the food in the cafeteria is so bad, the flies need medical attention.
* An old sketch show had "the world's oldest joke" delivered by two guys dressed as cavemen. They speak only in nonsense "oooga booga!" language but it is translated as this:
* An old Soviet joke runs something like this: a communist (and thus staunch atheist) died. However, he had been a good man in life, and God was willing to forget his unbelief, provided that he spent an equal period of time in Hell and Heaven. He served his first year in Hell, and Satan said to God: "Take this man quickly - he has turned all my demons into Young Pioneers! I must restore order!" After spending a year in Heaven, God took him back to Hell, where he had this conversation with Satan:
* An Old Spice commercial has a poker game where a man not wearing Old Spice is holding a royal flush, but it's then subverted because the guy somehow is pressured into folding on a literally unbeatable hand.
* An old standby for people making a journey — "We're not lost; I know exactly where we are..." This is related to
* An old story. A very early prototype of what would eventually become the automobile was steam powered and could reach a top speed of

* An old story of Alexander the Great and Aristotle has it he teaches Alexander that love is a weakness: Aristotle advised Alexander the Great not to love Phyllis too much, as too great a passion corrupted the reasoning faculty. Phyllis resolved to make a fool of the philosopher, and so wooed him. She then entreated Alexander to hide himself and watch secretly as she induced the old man to allow her to saddle him and ride him like an ass. Alexander laughed heartily at Aristotle until the philosopher countered: "You see—if passion can so humiliate an old man and one accounted not the least wise, what could it not do to one younger and less experienced?" And so Alexander honored Aristotle and held the more by his teachings.
* An old story revealed that Spidey's parents Richard and Mary had been secret agents who had been killed in action by a supervillain, then framed as traitors as a final insult. Spidey then went on a quest to clear his parents' names.
* An old strip featured a short engineer named Les, who was defensive about his height. This led to the following conversation.
* An old strip has Linus getting all set to watch a certain program, but then Lucy comes in and insists on watching something else. Linus then goes to Charlie Brown's house to watch his show, but finds it's already over by the time he gets there. Disappointed, he goes back home...where he finds out that Lucy had ended up switching to his show after all.
* An old superhero with a large torso sucks in his belly to appear buff & fit, but then breathes out, returning to his normal physique.
* An old tale tells of a farmer who gets three wishes. Excitedly, he wishes for a string of sausages and runs home to tell the wife. She gets mad that he wasted one wish and accidentally wishes for the sausages to be attached to the end of his nose. They have to use the last wish to remove them from his nose.
* An old technique was to shoot TV commercials that featured audience members who had just seen it raving about it.
* An old tradition in the South of France: people who lose a game of
* An old urban legend had it that a starving coyote wouldn't eat a dead Mexican, because the residue of a lifetime of chili peppers would burn the creature's mouth. This is utter biological nonsense, but gullible gringo tourists were regularly fooled by this equivalent of "free-range haggis" or "
* An old Vaudeville joke involves a man who thinks he's found his long-lost friend. The straight man says nothing except "I'm not Rappaport", thereby giving the joke its name. It also inspired a successful play in
* An old Ventriloquist training set had this joke between two puppets that was a variation on the trope:
* An old vodka (Smirnoff?) advertisement has a woman who is "1 part card shark, 1 part cheat, 1 part exhibitionist", where in a mixed-gender game of Strip Poker she
* An old wives' tale says that a person who has had a concussion shouldn't be allowed to fall asleep or they could fall into a coma or die. This an oversimplification of the truth. People who've had a concussion shouldn't be left alone, sleeping
* An old woman and her grandson are at the beach when suddenly, the grandson goes way too far out in the ocean. She says to the lifeguards, "Please, save my son! He can't swim out that far!" So the lifeguards save him and give him CPR, but the grandmother says to them, "He had a hat."
* an old woman, and old man, and a child when each one comes to her door asking for charity. The fourth visitor is Jesus, who tells her,
* An old woman dies and a funeral is held. The pallbearers pick the casket up and carry it out of the church. On their way out, the casket accidentally bumps into a wall. All of a sudden a moan is heard from inside the casket, followed by a surprised, "Oh my God!" Turns out the woman was still alive. She lives for another 10 years and then dies (again). Another funeral is held. When the pallbearers pick the casket up, the woman's husband yells out, "
* An old woman...sitting on a tombstone...of the husband she murdered.
* An old wrinkled troll-like hag, wearing a "babushka" (a grandma headscarf) tied below the chin. She may have moustache hairs and heavy eyebrows too. Usually she is

crooked, searches twigs to make a fire and mumbles in herself. In some cases she may even be a
* An old Yellow Pages commercial shows a Chinese shopkeeper describing a robber to the police sketch artist. He gives a reasonable description. The artist finishes and asks, "Is
* Anomalisa hums the Flower Duet from the opera "Lakmé" under the shower.
* Anomalisa left the film to die by releasing it on less than 500 screens, which made it impossible for the film to make a profit.
* Anomalisa, when Michael is on the brink of a nervous breakdown during his conference speech, the mic produces a feedback.
* Anomalocaris and the Burgesstoma traps, when summoned as monsters, are unaffected by the effects of other monsters.
* Anomalocaris, an early marine arthropod, was known for decades only from fragmentary fossils. Its mouth was mistaken for a whole jellyfish, and the arms directly above the mouth were thought to be headless shrimp.
* Anomalocaris animals tended to be measured in a few inches, it certainly was at the time.
* Anomalocaris, largest predator of the Burgess Shale fauna, had a tough constricting ring for a mouth, lined with bony prongs.
* Anomalous Cognition: Term used by parapsychologists to reference awareness of information without having to specify or theorize a particular means by which that information was transferred.
* Anomaly (Series) Frisk calls them out on their views, calling them Nazis.
* Anomander Rake. He was the first son of the goddess that created existence. (Well, except for the warren of chaos and the
* Anomander Rake, one of the most badass Ascendants in the world, calls the human Whiskeyjack his "friend," something he has almost never done before with any mortal or god.
* Anomen's romance plays this trope straight; to successfully complete it, a female Charname has to help him deal with his anger problems and
* An ominous shadow falls across the floor. Aang, Katara and Sokka hide, fearing that it's an enemy firebender. It turns out to be
* An omniscient database is often an implicit background element of investigations in all the
* A non-action but still nail-biting suspense scene involves Bond's escape in
* A non-advertising example happens sometimes on Japanese networks whenever a major earthquake
* A non-animal example in "Bart Gets Hit By a Car": When Mr. Burns gives his testimony which he twisted to make himself look good, everybody in the court glares at him. Especially Smithers, whom he vilified during his retelling.
* A non-beer related one happened in "El Viaje Misterioso de Nuestro Jomer (The Mysterious Voyage of Homer)" when Homer was trying Wiggums' "Insanity Pepper" chili, managing to counteract the spiciness by pouring wax in his mouth and swallowing the peppers whole. However, the effects of the peppers take hold and he finds himself having a strange vision, with a talking coyote urging him to find his soulmate. When he comes to the next morning, he finds himself on a golf course in the middle of a sand trap.
* A non-biological case with Randor and Skeletor since they were raised as brothers. Skeletor wants to kill and torture not just Randor, but his entire family while Randor originally wanted to reason with him before he sent Adora to Despondos, at which point whatever love he had for his adoptive brother died.
* A non-Black Dragon example: Kotal Kahn from Mortal Kombat X has this as a fatality as well, with added squishing of the heart, dripping the blood in his mouth.
* Anon: Candace and Ryan's storyline started out very similar to how Candace's mother Chelsea's storyline was at the start (Chelsea/Candace caught between nice guy Kyle/Ryan and troubled bad boy Tucker/Logan).
* Anon: Candace is known for being a terrible liar. When she returns home the morning after she stays at a hotel with her boyfriend, her father questions her

whereabouts, she gets flustered and claims she spent the night at her friend's house watching "that one Leonardo Di Caprio movie". Her lie quickly unravels when she's unable to specify a movie.
* Anon: Chelsea and Tucker take a photo in a photobooth of them kissing, which ends up on Chelsea's wall for the remaining four seasons before the timeskip. After the timeskip, Candace, their daughter, has her own photobooth picture with her boyfriend Ryan.
* Anon: Chelsea can't stand Tucker for the first half of Season 1. By Season 2, they're an official couple, and by Season 5 they're married.
* Anon: Chelsea's go to solution for any hardship she faces is to get drunk, unfortunately it almost always leads to her verbally or physically assaulting whoever's closest to her.
* A non-comedic example appears in The Microphones’ “You’ll Be In the Air”, where Phil Elverum exceeds his vocal range in an emotionally charged bridge.
* Anon: Connor beats the absolute shit out of Ryan for his jerkass reaction to Candace's pregnancy.
* Anon: Connor is heavily disturbed by Vivian's massive crush on him, which went to lengths as far as her sleeping in his bed in a bikini while he was out.
* Anon: Dani and Mia were originally the main characters in another series by the creator, called Faux, before crossing over to the main show.
* Anon: Dani's father has never appeared on screen, but it's implied that he lives in a trailer and is outright stated the only time they talk is on her birthday.
* A non-deadly but still depressing example: The Nazis did not take power unopposed. In the final vote that would give Hitler the power to make laws on his own (thereby eliminating the last legal barrier to his total control), the communists had already been rounded up and sent to prison or worse. The parties of the center-right had made deals with the Nazis (or so they hoped). The last party that wanted to say something against Hitler and was still present to do so were the social democrats. Otto Wels (1873-1939 in exile in Paris) held a speech culminating in the words "
* A non-deleted scene mentions that when Niccola Murray (whose husband has been revealed to have ethically questionable business ties) gets manipulated into smiling and thumbs-upping in front of a sign that says "I AM BENT" (it actually reads LIAM BENTLEY but the shot has been zoomed-in and cut), someone forwarded her a video on YouTube of her humiliation coupled with some sort of dance mix. Her complaints aren't merely about the fact that someone did it, but that it isn't even funny.
* A nondescript name, such as "Joe's" or "Franky's Diner." May occasionally be called "The Greasy Spoon" for self-aware comedic effect.
* A non-dog animal variant of this is Laboon, who's been waiting over 50 years for the pirate crew he made friends with to get back from their trip around the world. And in keeping with the trope, it turns out all members of the crew are dead. Good news Brook's Devil Fruit powers aren't going to let that get in the way.
* A non-dominant individual who has a submissive or masochistic partner almost has it worse than a dominant with a non-sub partner: most people will put up with a certain amount of non-extreme discomfort to make their partners happy, but it can be extremely difficult to talk your partner into inflicting pain or humiliation on you when they're not into it.
* A non-elevator variant: later on, Matt, Luke and Jessica are riding the subway to get back to Midland Circle. Jessica grabs a passed out homeless guy's beer and chugs the entire thing down in one gulp while Matt, Luke, and the other passengers on the train give her silent looks of confused amusement.
* Anon, especially in Season 6. His sexual health advice to teenage son Connor is especially awkward. Don't be silly, wrap your willy.
* Anon: Evan has gone through the revolving door many times, going from being in love with Chelsea one minute to plotting how to destroy her life the next.
* A non-evil chancellor wouldn't be much use to the Overlord, would he?
* A non-fatal example: we are initially introduced to Emma Hampton and Team

Challenger and are led to believe that they are going to be the main protagonists (with
* A non-fatal hit-and-run, a panty-snatching and the theft of a noodle stand led to a murder where
* A non-fatal variant is discussed when Krillin asks Chichi what she would do
* A non-fatal version happens in one Scrooge McDuck story; A robber gets into Scrooge's office and holds him at gunpoint. Rather than getting upset, Scrooge is seemingly impressed that this hoodlum made it that far and happily gives up so many (Very heavy) bags of loot that the crook is buried under the swag. Scrooge then phones the police that he's "Got another one."
* Anon features a lot of cameos including characters from the creator's other works, notably Cheyenne and Alice from Faux becoming recurring characters on Season 2.
* A non-food example happens in the episode "Trains", where Mr. Rude's collection of instant sponges ended up being wet and caused Mr. Persnickety being stuck in the cabin.
* A non-funny example comes from an Australian domestic violence PSA. A man hears his neighbor beating his wife in the next apartment, so he
* A non-gaffe example would be his coining of the phrase "noun, verb, 9/11," during a moment of snark at Rudy Giuliani.
* A non-gay version was done by undercover FBI agent Joseph Pistone AKA
* An ongoing character arc between Gilgamesh Wulfenbach and Tarvek Sturmvoraus in
* an ongoing crossover fic, and the author has a tumblr blog dedicated to the pairing. Both shows share much of the same crew and talent, such as Aaron Ehasz, so while these two characters being shipped is suprising, the two shows being crossed over is not. Initially done as a crackship, and still often played for humor, the author plays the romance fairly straight and offers in-depth character analysis on why it works.
* An ongoing plot detail is that Dr. Phlox's race, the Denobulans, practice polygamy: he has three wives, each of whom also have two other husbands, and so on. They also have looser standards of "marital fidelity" than humans. When he notices that one of his wives is sexually attracted to Trip, he is openly encouraging about it, much to Trip's discomfort. That being said, Denobulans have fairly mature attitudes about sex, so he's not overtly promiscuous either.
* An ongoing theme of SHINE end of year shows starting ar 23, where Mia Yim wore red and green, Leva Bates
* An ongoing war between Renegade and Imperial Daleks drives the main plot of
* A non-good example of this is Redcloak, high priest of an evil god who has a plan which will either end with world domination or world destruction. He is a well-developed character with deep personal motivations for his cause, a complex relationship with the lich who
* A non-graphic example to boot. In one of her Spring Air ads, Vanna White decides to go the
* Anon has a LOT of potty-mouth characters, but Chelsea Clark is a whole other level to the point her children seem to inherit it, Kyle even outright states that "fuck" and "shit" are Chelsea's favorite words to use.
* Anon has Chelsea Clark, who tends to be horribly clingy with both Kyle and Tucker. When she dated either of them she treated them like shit, and then after the breakup would find herself overcome with jealousy if they moved on and would normally sabotage the new relationship or at best complain non-stop. Chelsea even openly admitted to her daughter Candace that one of the main reasons she ended up with Tucker is because he showed her the most affection, which was all she ever wanted.
* A non-heroic example is given with the Baroness, who ends the series
* A non-human example is Cher Ami, a pigeon who saved many lives in World War I. She was thought to be male, and her gender wasn't discovered until after her death. She's still referred to as male sometimes, however.
* A non-humorous example: the primary source for Angarak sacrifices to Torak are the Thulls. Pregnant women are not sacrificed. If a Thull woman wants to keep her

heart inside her body, she does everything (or should that be every
* A non-Imperial example: the Orks of Bloodaxe Clan imitate Human uniforms and military paraphernalia, believing them to be extremely powerful magic charms. This includes Nobs sporting looted
* Anon implant is hacked to change his perception of the world in real time, causing him to hallucinate various things, such as a different flight of stairs in front of him, or the hallway outside his apartment being on fire. Because we're frequently seeing these events through his eyes, the viewer shares in his confusion.
* A non-Jeff example is when Steve talks to Jane's psychiatrist Jill. She thinks that he's nervous because sometimes what she does makes people nervous in a social context. Believing her to be Jane's girlfriend, he tells her that "you girls" have got "the best of both worlds." When pushed to explain what he's talking about, he uses a metaphor Jeff brought up earlier in the episode:
* A non-Kilgrave example: Pryce Cheng wakes up with wet trousers after being sedated by Jessica for a longer time after he tried to kill her mother.
* Anon-kun. As per their origin, most stories are written live with the audience discussing the current state of the story in a chatbox.
* A non-lethal but still devastating Cryonics Failure takes place in
* A non-lethal example occurs in the Lorelei Interlude. During some exhibition battles, one of the trainers has his Electrode use Self-Destruct to try and take down Lorelei's Dewgong, but fails.
* A non-lethal example occurs with a megaphone in "The Day The Earth Stood Stupid", Fry shouting uselessly into the conical end and getting blasted with an amplified pigeon noise as the bird inspects the microphone end.
* A non-lethal example: The first game had a mugger that beat you up and
* A non-lethal knockout venom exists that is the exception: It has no worse side effects than "unconscious for 2d4 hours", and the books specifically mention that even paladins could use that one with little moral quandary, provided the intention is to knock someone out rather than kill them (like capturing a criminal for courts). Of course, in a fine bit of
* A non-lethal variant, after watching Batman make a coin logo fall on Two Face (a villain who often flips a coin to make decisions),
* A non-lethal variant occurs when the gate deactivates moments before a traveler reaches it (hopefully before partially entering it and suffering a
* A nonlethal version during the Companions questline. You set out for the Tomb of Ysgramor with Aela the Huntress, Farkas, and Vilkas to
* A non-lethal version takes place at four (or possibly eight) year intervals in the United States when a new Administration comes in. Unlike most of the other Western Democracies, the US has a high portion of partisan political appointees in agencies and the civil service, many of whom get turfed (or resign) when the new president who is a member of the other party comes into office.
* A non-LGBT related example from the series had Mona and Caleb. In order to make A (then thought to be Melissa) think Mona broke up Hanna and Caleb as she was told, the two then make out in public for Melissa to see.
* Anon: Lilly seems like a harmless wallflower at first, but then goes on to reveal her hobbies of stalking popular students on social media and impersonating her former best friend online in an attempt to make everyone hate her.
* An online advert for Schick — "ridding the world of irritation" — depicted a lab technician angrily shooing away a fly... until it lands on a mirror. The technician smugly pulls out a can of shaving foam and sprays the fly into oblivion.
* An online advert for the Renault Clio car brand. Two women are driven around in a Clio as children, hug and kiss as teenagers, and drive around in their own Clio as adults.
* An online article about what alphabet books used for "X" in the days before xylophones and x-rays includes "xany" (a misspelling of "zany"), as well as "expensive", "extinct", "exit" (written as "Xit" and also including "Xtremely" and "Xquisite"), and "extraordinary".

* An online game named after it, coming alive to panic before being stepped on.
* An online retailer temporarily pulled a listing for a two-pack featuring Hawkeye and
* An online senior dating service has at least six different, very short commercials, and CNN once chose to air them ALL IN THE SAME COMMERCIAL BLOCK, back to back.
* An online video exists of someone shouting duck and then ducking himself, only for it to show his friend holding a duck. He laughs sarcastically, only for a flying duck to crash into him.
* A non-mammary example: Patrick has a noticeable navel. Navels only exist in placental mammals; they are scars left behind by umbilical cords, so only animals whose gestation requires placenta have them.
* A non-military, but still famous example, is Shackleton's treatment of his men when they were marooned off Antarctica.
* A non-military example is the Leas Cliffe Hall in Folkestone, Kent, a 700-seater theatre/performance venue and conference center. Built in the 1920's, the only obvious sign of its presence is a modestly sized pavilion and cafe on the promenade. However, go inside and follow the steps down. The theatre complex is actually built into the cliff — a westerly extension of the White Cliffs of Dover — and occupies several underground levels, with bars and terraces overlooking the English Channel. Elsewhere on this stretch of coast, the greater part of Dover Castle is a network of underground galleries and strongpoints built into the White Cliffs proper; it served as a major command centre in
* Anon, Miranda calls Candace self-centered and egotistical all while bragging about how amazingly humble she is.
* A non-murder elimination method is to frame the rival for being a delinquent and get them expelled. Ways to do this is planting contraband, stolen goods, or answer sheets in their desk, or steal their phone and take panty shots with them to make them look like a pervert. Present enough 'evidence' to the guidance counselor, and the rival will be expelled.
* A non-murder-oriented mystery is "solved" in this fashion at the end of the first trilogy of the
* A non-murderous variant occurs in "Murder v. Opportunity." A rich man named Simon Clode is conned by a
* A non-naughty but amusing one comes from the early days of the crossword puzzle in the U.S. Margaret Farrar, a prolific editor, once clued "Make ___: succeed." She intended the answer to be A GO OF. Unfortunately, because there are no spaces in crosswords, this looks
* A non-Niven story set in Niven's world mentions an abortive Kzin visit resulting in myths about particularly nasty tigers.
* A non-OL example: Swamp Thing cuts off Poison Ivy's connection to the Green, reducing her to a normal woman.
* A non-parental example: Mr. Kowchevski (Lindsay's grumpy and hard nosed math teacher) served in Vietnam.
* a non-playable summon. If played well, she can potentially destroy two or three turrets in one mighty push.
* A non-police variant for truckers CB codes occurred in "Maximum Homerdrive".
* A non-portal example in another episode involves a device which lets its wearer pass through solid matter. It works by
* A non-romantic and non-animal invocation of this trope was a cartoon by Herblock that ran when the Pathfinder and Sojourner robot probes stopped reporting from Mars. The cartoon shows Sojourner holding up a sign toward Earth, reading, "I'll wait for you."
* A non-romantic but still important relationship moment killer happens in this history play. Prince Hal for the first time expresses that when he becomes king, his friendship with Falstaff will end. Before Falstaff can properly answer that, the sheriff arrives to arrest Falstaff.
* A non-romantic example also occurs, as it turns out that the guild leader Kanbe
* A non-romantic example between Thoth and protagonist Peter Stone in

* A non romantic example in the 2015 Divas Revolution storyline. Three stables were formed in the women's division. Team Bella's formation made sense, since the
* A non-romantic example is likely the tendency in both the Classic and New eras to partner Sarah Jane Smith with K-9 (see
* A non-romantic example is Sebastian watching Ariel fall asleep in the palace and softens a little, having previously been very disapproving of her various antics.
* A non-romantic example is seen between one-off character Ms. Pink compared to
* A non-romantic example: the Fourth Doctor carried everyone in his arms, since at 6'3 he was almost always bigger than them.
* A non-romantic example with allies Xenilla (a.k.a Spacegodzilla) and Destroyah in
* A non-romantic example with the champion Kindred, the Eternal Hunters who are actually
* A non-romantic moment occurred when three guys shared the same glass...because they couldn't afford two more drinks.
* A non-romantic version between Ritsu and Teruki makes up the entirety of Chapter 17 of
* A non-romantic version of this is apparently a big cause of Breeze's friendship with Clubs in
* A non-romantic version of this (similar to Galadriel's under Lord of the Rings above) serves as the main motivation behind
* A non-romantic (we really hope) version also occurs, with Puru briefly attempting to murder Leina Ashta, because she wants to be Judau's little sister and is well-aware that Judau cares for Leina more than he does her. Judau manages to talk her out of it by promising that all three of them could be a family together after the war was over.
* Anon: Sam and Roxy are so distracted by Tucker and Kyle during their kidnapping attempt that they leave their gun unattended, leaving Chelsea and Hunter to figure out exactly what to do next.
* Anon: Season 4 gives us the hostage situation that involves Hunter tied down on the floor, Tucker bound to a chair, and eventually Kyle being captured too when he stumbles on the scene.
* Anon series has a LOT of these storylines. With Chelsea (Archie), Kyle (Betty), and Tucker (Veronica) in the earlier seasons, as well as Dani (Archie), Ian (Betty), and Hunter (Veronica). The later seasons also has Ryan (Archie), Candace (Betty), and Miranda (Veronica), and this is even later flipped where Ryan becomes the Betty to Candace's Archie, introducing Damian as the Veronica.
* A non-sexual example, Flonne also falls afoul of Thursday's sensors. After telling Laharl that "He's the worst-!" before being cut-off by another character, the party is suddenly intrigued by what the mild-mannered Flonne was about to say before being interrupted. Thursday somehow
* A non-sexual example of this trope: The Imperium's citizens are encouraged by the official state religion, the Ministorum, to hate, fear, and persecute psykers, even though the Imperium could not function at all without them
* A non-sexual one occurs in "Bart vs. Australia," where Evan Conover (a representative from the U.S. Department of State) shows the Simpsons a slideshow of America's love affair with Australian culture in the 1980s. The last slide shows Fidel Castro seen through the crosshairs of a sniper rifle with the words "Plan B." Conover calmly snatches the slide, says, "Oops, let's pretend we didn't see that!", and swallows it.
* A non-sexual-orientation-related one comes from the dinner scene in
* A non-sexual variant with the Hound: he's quite pleased with Arya's killing skills.
* A non-shipping example would be the fight with Pain. Several characters, even Kakashi, end up dying in the fight (with the latter even meeting his father in the afterlife), then Hinata gets a chapter that plays out like
* Anon sub took advantage of .mkv files' ability to have multiple subtitle tracks to release a video with both a normal
* A non-supernatural but still creepy example would be the French colonel Henri

Lafutsun de Lacarre during the French cavalry charge at
* A non-supernatural but still creepy example would be the negotiator sent by the Romans to the Germanic chief just before the battle at the beginning of
* Anon: Sure, Tucker pretending to be in love with Sam to sleep with her when they were teens was a dick move, but it certainly didn't warrant the twenty years of stalking and constant kidnapping that followed.
* A non-Team Rocket example. Faba was pitted against Ash in the Alola League and decided to cheat by having his Hypno use Psychic to pull Meltan into battle. Unfortunately, he didn't take into account that Meltan eats metal, nor that Hypno's pendulum happens to be made of metal. He suffers a
* Anon, their daughter Candace even states she wants a relationship like theirs someday.
* A non Treehouse of Horror example is the Screamatorium, a very low budget and pathetic ghost ride that features cheap ghosts stuck to the walls, a coffin containing nothing but a spring, and an old woman telling people about the "ravages of age." It then becomes hilarious when there's a skeleton that goes hee-haw like a donkey!
* A non-TTC example in Toronto is the Toronto Zoo Domain Ride, a people mover (typically and erroneously called a monorail) that operated from 1976 until 1994, when an accident prompted its closure. The trains are long gone, but the stations and much of the concrete guideway are all still in place. May become an aversion with the proposed introduction of a Maglev system for the zoo.
* Anon: Tucker and Kyle have all had most female characters thirsting after them. Unfortunately for them, they all seem to be the crazy ones.
* Anon: Tucker. It's hard to ever distinguish what's true and what's false with almost anything he says.
* Anon: Twin brothers Tucker and Hunter are part of a VERY shady crime family and are notorious for their lying and manipulating ways, but they also have nearly almost every female character thirsting after them, including the two main female leads and a considerable portion of the fanbase.
* Anon: Two women appear in a single scene to have sex with Sal, then disappear. Another couple of women appear topless and making out before being murdered.
* A non-urban version is lampooned in Alan Jackson's 1994 hit song "Gone Country", although the song is often misinterpreted as being in favor of such a masquerade.
* A non-verbal example happens early on, when Carla tells Diane a shocking secret, causing Diane to take a large swig of the
* A non-verbal example occurs later; Darth Vader tries to convince Luke to join him in ruling the galaxy. After a few minutes, Luke lets go of what he's holding, letting himself plummet into the abyss.
* A non-verbal example, Roo has also bounced a couple of characters just like his idol, Tigger.
* A nonverbal variation when Elaine tells Jerry about her new job with the J. Peterman catalogue: he gives her her trademark "Get out!" shove, but without the line.
* A nonverbal version of this occurs in Chapter 6 of "Nyx's Family". When Roller Reel's parents and grandfather begin complaining and arguing about him, in front of Shining Armor and
* A non-video game example exists in fanfiction that uses elements from
* A non-video game example: In the 90's and up until the 2000's, it was pretty common for children's programming imported from other parts of the world to be repackaged for North America instead of being shown as their own individual show by adding new segments to the original show to extend the runtime or creating an entirely new show, which would be the
* A non-villainous example occurs in season one when an old herbalist hermit with only her ancient cat as a friend tells Aang to make his friends suck on frozen frogs to cure their illness.
* A non-violent and somewhat humorous variant occurs sometimes in Japan. When one person gives another a gift, it is often considered
* A nonviolent political version happens in the Reach, between the Florents (who

were made Wardens of the South by the Baratheons) and the Tyrells (who want their position back).
* A non-voting example: in the lead up to the 1988 vice presidential debate, there was a general expectation that the Republican nominee, Senator
* A non-warrior example occurs in the Russian children's song "The Vaccine", which is about a kid boasting that he's not afraid of getting a vaccine because clearly, only a coward would be, right? Naturally, come the time of the actual vaccine,
* Anonymoose's Monster Girl Saga. As the story progresses, he experiences flashes of his original life.
* Anonymoose's Monster Girl Saga who thinks she's a sentai hero (despite being in a fantasy medieval setting), a former assassin for the Order who was originally sent to kill the previous three, and a centuries-old demon who acts like a little girl.
* Anonymous), and actually make a point of having a lot of fun in the process. That being said, they are only a tiny fraction of Anonymous' real bulk, most of which seem to treat the Chanology protesters like a drunken cousin dragged around town, singing obnoxiously. 7chan in particular now bans anyone referring to the Chanology incidents and treats them like pariahs. This said, 7chan has possibly one of the most toxic group dynamics known to mankind (assuming that heading even applies anymore) and it tends to crash more often than Polish Presidential flights.
* Anonymous and James I, respectively, portrayed here as wicked, self-interested schemers who torpedo Elizabeth's chosen successor in order to safeguard their own power.
* Anonymous Author: A pseudonym that's used instead of the author's real name.
* Anonymous Author: The identity of the person who wrote the story is unknown.
* Anonymous Author: The narrators often don't reveal their name, or are known only by their forum handles.
* Anonymous does this with Guy Fawkes masks whenever there's an organized protest...
* Anonymous is launching one of its "hacktivism" attacks in response. An Internet filtration system was later put officially in place. The government says it's in place to protect children from viewing pornography, but it can (and probably will, as many protesting Turkish citizens fear) be used to censor anything the government doesn't want its citizens viewing.
* Anonymous is often depicted as a hollow tuxedo or black business suit.
* Anonymous Killer Narrator: Some sections of a story are written from a murderers' POV, though without giving away their identity.
* Anonymous Killer Narrator: When the serial killer is the narrator of the mystery story.
* anonymous kink memes there lives and breathes yaoi - though het and yuri are around, the yaoi by far outstrips it on just about every single kink meme.
* Anonymous Rex is that any humans who stumble onto the fact that humanoid dinosaurs are alive and living incognito in the modern world are to be killed for fear of backlash or persecution against the dinosaur races if mankind at large ever found out their existence. That dinosaurs are vastly outnumbered by humans gives them legitimate amount of concern, however, even the main character doesn't seem to have much of a problem with the morality of this policy.
* Anonymous Rex novels, where the whole premise is that dinosaurs are still alive, just disguised as humans. Using very complicated latex costumes. Egad.
* Anonymous Rex series of novels, mysteries based in a world on the premise that the dinosaurs didn't die out and are living among us in secret. Starring Velociraptor sleuth Vincent Rubio.
* Anonymous Rex - Vincent, a velociraptor, is naturally much smaller than his friend and colleague, Glenda, a hadrosaur. At one point, Vincent steps onto Glenda's shoulders to reach a high drainpipe, noting that he felt "like a young son sitting on his mother's shoulders to watch a parade."
* Anonymous riffs on the Men in Black motif. One of their insignias is a black-suited man with a question mark instead of a head. Some members will often wear black suits and a Guy Fawkes mask when making a public appearance.
* Anonymous's are all done in Robo Speak, so as to speak for all Anonymous and also

to avoid retribution from the Church of Scientology.
* Anonymous's plays. Aside from how that theory has little to no actual proof behind it, the movie has no grasp of chronology, presents Queen Elizabeth as having multiple bastard children (she's known as the "Virgin Queen" for a reason), and generally presents everyone involved in such a way that if they had any living descendants, it would be grounds for a defamation suit.
* A non-Zimmy example happens in the chapter "A Ghost Story". Annie has to counsel a ghost—and since the ghost doesn't realize he's dead, he unintentionally creates a shared hallucination that symbolizes an event from his old life.
* An Oor Wullie comic has the main character being asked to play hooky with his friends. He refuses, because he wants to go to art class instead. However, once at school, he gets mocked for the goofy smock he is wearing. The lesson he learns? Next time he should just play hooky. No "stay in school" here!
* An opal necklace seen in the second book has a placard claiming it has killed a dozen previous owners. In the sixth book it's
* an open arrangement when they don't, or the person who says they're separated and beginning divorce proceedings but the divorce isn't final yet...when they're not getting divorced at all. Most other cheaters will hide it, but some will blatantly say they're cheating because they're unhappy or bored with their partner.
* An Open, Emotional Personality and may prefer dramatic or romantic media over action-oriented media. May also be "motherly" or take on a kind, nurturing role that is more traditionally attributed to girls.
* An opening cutscene for Tails (he originally just started the game straight on Angel Island)
* an opening with poor camera focus, an off key opening song, incomprehensible plot, terrible special effects, and all sorts of flagrant errors in production.
* An operation to go after an international arms dealer kicks off the plot of
* An optional class feature for the ranger class introduced in the 3rd edition sourcebook
* An optional late-game dungeon has some areas with lots of dead bodies all cocooned up, the handiwork of either phase spiders or carrion crawlers.
* An optional plane in the core cosmology is the Region of Dreams, which intelligent creatures routinely visit every time they fall asleep. Dreamers create their own dreamscapes that fade away when they wake up, though the rare lucid dreamers (or spellcasters with the right magic) can exert control over their dreamscapes, or travel to other creatures' dreams. The plane is usually harmless, as "dying" in a dream world only results in a
* An optional rule takes this even further, so that discarding the carnivorous plant provides a bonus vegetable, discarding the golem provides a bonus gold, and discarding the ghost provides nothing. And then restates that there is no thematic reason for this rule. Nope. Definitely not.
* An optional werewolf template is an uncontrollable problem triggered by the full moon. They're very hard to kill but curiously don't have any special level of strength like most werewolves.
* Anoraak normally does minimalistic synthpop, but "Long Distance Hearts" has a more trancy sound.
* Anora herself states that her marriage to Calian was an arranged one, though they grew to
* An orange, crazy, genetically modified marsupial doesn't exactly sound like this trope, but
* An Orange Haro which co-pilots the Dynames, and by extension Cherudim;
* An orange juice ad featuring the skyline of New York aired in the United Kingdom during the transmission of
* An orc has been introduced with the same problem, but speaking Callanian. Apparently he learned from Donovan. The orc in question was under the impression that the Callanian phrase for "hello" was "Be afraid! I am very dangerous and I am going to kill you!"
* An orchestra conductor is known for being exceptionally terrible at his job. One day, he finds a guy and kills him. He's found guilty of murder and sent to the

electric chair. But when his execution comes, he survives the electrical charge. Deciding this must be a sign from God, the authorities release him. However, he goes on to commit worse crimes, is arrested for each, sentenced to the electric chair, and survives each time (this can go on for as long as the listener is willing to listen). Finally, the executioner asks him how he keeps surviving the electric chair. He replies "Didn't you hear?
* "An Ordinary Couple" had Maria and Captain proclaim their love for each other, then decide to get married. The film had a new song, "Something Good", fill this purpose instead.
* an ordinary guy we've never seen before who couldn't hear Jay because of his headphones.
* an ordinary human girl, she has to accomplish her task using only her leadership skills and her knack for repairing broken friendships.
* An Ordinary Miracle by E. Shwartz, the mother of the heroine (who is a princess) died when said princess was "seven minutes old".
* An Ordinary Wonder by Russian Yevgenii Shvarts. There is a wizard in the play, who tells his wife near the end: "But alas, I am immortal, so I will spend the rest of eternity missing you."
* An ordnance which is fired in anger but has failed to detonate is called a
* Anorgasmia or difficulty reaching orgasm. Yep, a pill meant to deal with your depression actually makes it less enjoyable to have sex with your partner.
* An Oriental Alphabet Primer, is a dark horror story... told through the medium of a cheerful word-learning book for schoolchildren, which uses excerpts of a supposed horror novel (fragmented, and in a more-or-less random order) as short usage examples for the words it's teaching.
* An original idea that inspired a lot of 'ancient ancestor' settings. The original humanoids found that their home galaxy (not just one quadrant) contained no life that was like them. Their own extinction fears drove them to seed the Milky Way and as a result encourage humanoid life to develop. The code was like a signature for them — they wanted the Milky Way races to find out their origin to encourage cooperation.
* An Ori shield generator absorbs the orbital fire directed towards it and uses it to expand.
* An Ork map describing the known space around a particular area included the
* an Ork needs a good enemy by the Ork and has devoted his life to hunting him down and killing him by any means. In fact, for Orks, "favorite enemy" is the closest term they have to "friend".
* A normal glomp may be bad enough, now just imagine what it must be like for the glompee when the glomper has
* "A normal-looking guy with a funny name." (His name: "Creamy Goodness")
* A Normal Lost Phone, transgender, gay, bisexual and queer supporting characters, LGBT youth, coming out story, transphobia, homophobia)
* A normally formal character resorting to profanity due to intense circumstances (see:
* an orphan, and has to distance herself from people because she's magical.
* A Norscan marauder goes berserk and starts butchering anything and anyone he meets, enemy, allied, and civilian, until Jon kills him.
* A Northern Dragoness, but he is far more devoted to Naerys and Daeron than his canon portrayal ever was.
* A Northern Dragoness. Jonnel has many more reservations about the matter.
* A North Korean propaganda cartoon features anthropomorphic potatoes destroying anthropomorphic diseases with kung fu, then happily going off to be cooked.
* A Norwegian ad featured a woman finding a sleeping hobo with a newspaper as a blanket. The headline at the newspaper was
* A Norwegian ballad describes the Vagina Dentata. A boy is surprised when his hand is bitten by his lover. He asks her how many she has bitten; "first she bit a bailiff, then a priest, then she "
* A Norwegian folk tale involves a king who offers his daughter's hand to anyone who can make the all-too-serious girl laugh. A peasant boy is nice to one of those

ubiquitous old ladies, and is rewarded with a goose that can trap anyone who touches it (or touches anything already trapped) if he says "Hang on if you want to come along!" He uses it to catch the entire palace staff, and the princess falls over laughing when she sees it.
* an ostrich's foot, and you'll see where they were coming from. Their Greek name, in particular, comes from the Ancient Greek words for "sparrow" and "camel".
* A notable aversion came in one of the DC/Marvel crossovers, when the JLA went up against the X-Men. Batman, the most popularity-powered character of them all, sprang a surprise attack on
* A notable aversion: If you were a slave in the antebellum South, the swamps of Florida were home to
* A notable aversion in Year 2, when Alice joins the Subtlety class. Professor Pendleton absolutely refuses to show her any kindness or support and constantly tries to convince her to give up, since the class is completely outside of her skill set. Even when she does prove her skills, he threatens to throw her out for cheating. The only reason he doesn't is that
* A notable aversion is the Reserve List, a list of over a hundred cards (all of them first printed in 1998 and earlier) that Wizards has explicitly stated that they will never reprint directly or functionally (meaning a mechanically identical card with a different name) as a nod to those who purchase cards as collector's items. Most of the cards would never be reprinted anyway because they're either a
* A notable case are the pterosaurs, who convergently evolved many similarities with birds of today, such as ones that sieved food from water like a flamingo, or ones with throat pouches like pelicans for catching fish. The azdarchids, a group of very large pterosaurs adapted for moving around on land, filled a niche very similar to that now held by cranes and herons, just scaled up to the size of a giraffe.
* A notable conclusion to angels lacking free will is that angels are literally unable to rebel against God. As a result, there is no such thing as a
* A notable early aversion is when Malfoy throws a racist taunt in Hermione's direction, and Ron tries to retaliate with a slug vomiting curse without bothering with the formality of an incantation (in the film version, he screams, "EAT SLUGS!", but that's used as a threat he intends to follow through with, and not an incantation).
* A notable example among land monsters is the Nargacuga, who is usually fought at night and whose eyes glow bright red. They glow more intensely when the monster is enraged, leaving trails as it moves around. This is mitigated somewhat if you break its face, which has the result of
* A notable example from the first game is Reuban, an outright psychopath who murdered his entire family with a hedge trimmer. If put on the same team with Ivan for even a short while, he will eventually pull out a weapon and attempt to kill Ivan. He will also leave if not allowed to kill a sufficient number of enemies each day. There are several other characters with these traits, including Skitz, Postie, and a few others.
* A notable example from the heyday of the genre is "Kingpin", a sketch from the 1974 album
* A notable example is "Clint Eastwood", which ends with almost a full minute of 'My future is coming on, is coming on, is coming on, is coming on, is coming on, is coming on..' repeated over and over.
* A notable example is found in the episode Cure Te Ipsum, in which a doctor appears to be a potential victim given her habit of going to nightclubs despite her busy job. When she attracts the attention of a man who has previously commitedd a date rape, it appears that her life is in danger. In truth, she knows exactly who he is and is planning to kill him.
* A notable example is Seymour Skinner, obsessed with being the "perfect son" for his mother Agnes and not capable of say NO to her. One episode even had him win an award for being the biggest doormat in Springfield and was represented in said scene with a doormat with a picture of his face on it.
* A notable example is Staff Sergeant Sarkis E. Bartigian of the the 43rd

Bombardment Group (Heavy), whose artwork on B-24 Liberators would cover much of the plane. His best-known work, 44-40973
* A notable example is the third season finale, at the end of which Jack has called a boat that appears to be coming to rescue them, the Others have been largely defeated, Ben is a captive, the Rousseaus have been reunited, and everyone is cheering and ready to leave forever. This seems like a good time to end the season and perhaps even the series (massive unanswered questions notwithstanding). But there are still 4-5 minutes left in the episode, just enough time for one final flashback revealing the episode's flashbacks have actually been flashforwards to a time when Jack and Kate have been rescued, and Jack desires to return to the island.
* A notable example of characters trying to subvert this and failing: in the Cell Saga, when Cell finally achieves his
* A notable example of forcing the culprit to come clean after being caught in a misstep is in one case in which a person is murdered in a cabin during a blizzard. The culprit's alibi is that they were buying snacks, but did not buy ice cream because they were "sold out". And why would anyone be sold out of ice cream in a blizzard? The culprit could have just as easily lied and said she didn't get ice cream because it would melt due to it being a blizzard (Thus requiring the car to have the heat on, and the trip up being slowed.)
* A notable example of the ubiquity of curved CRT screens in the future is
* A notable example of the Vong armor is the one that the Sith lord Darth Krayt wears in the Legacy comic book series. The fact that it is eating Krayt alive is the source of much angst on his part and his frantic attempts to find a cure.
* A notable example was Hera's harassment of Leto, mother of Apollo and Artemis. While Leto was still pregnant with Zeus' progeny, Hera cursed Leto so that no land would accept her and set a serpent to stalk her in the oceans. Zeus had to set an island adrift so the serpent would finally stop chasing her.
* A notable example was the use of a different creature as a flash source. Its light caused psychological visages of its subjects thoughts to pop up in the picture.
* A notable exception to the normal tendencies of Sublimation are the
* A notable mention is Buzz's first flying sequence in the original movie.
* A notable near-swallow is the bat getting in the mouth of a Quarray Eel in May The Best Pet Win.
* A notable non-magical technology is the "clacks towers"—a continent-wide network of semaphore towers that is often used to parody telephones and the internet. Explored in detail in
* A notable occurrence was in a late 2006 edition of Smackdown when Undertaker and Kane, known as the Brothers of Destruction, wrestled as a tag team for the first time in five years against newcomers Montel Vontavious Porter and Mr. Kennedy. MVP and Kennedy tried to walk out and get counted out, only for Theodore Long to restart the match with no countouts. Shortly after, they got themselves disqualified, leading Long to restart the match again with no disqualifications or countouts. From then on, it was a one sided match with Undertaker and Kane utterly destroying the heels, to the massive approval of the audience.
* A notable one comes from the Sternritter Robert Accutrone in Chapter 603 when he realizes that
* A notable one is Fusionist, a Fusion monster (requiring three cards to get out) that actually has
* A notable one is Uther Pendragon: he has top-level endurance, a Dragon Affinity that boosts that endurance even further as well as protects against status-lowering effects, a Rank-A
* A notable "reverse Streisand effect": In 2017, the city council of Charlottesville, Virginia voted to remove a statue of Robert E. Lee due to his support for the Confederacy. A rally that August by a group of white supremacists against the statue's removal ultimately ended in a vehicular attack that killed one woman. The uproar over this death led to a movement to take down more memorials of the Confederacy, with a statue in Durham, North Carolina being toppled over by

protesters and Baltimore removing four monuments during the middle of the night.
* A notable showing of this occured when retailers jumped the gun before
* A notable (though minor) exception was his role as the villain Breathtaker in the movie and TV series
* A notable tribute appeared at the 2014 Academy Awards. Camera assistant Sarah Jones was hit by a train on set in February. At the Oscars in March, her name flashed onscreen after the proper segment had finished.
* A notable victim of Billboard's policy of placing Christmas songs on a separate chart in the 60s and 70s was "Snoopy's Christmas" by The Royal Guardsmen from 1967. Still a seasonal favorite in America, it could well have been a Top 10 hit had Billboard allowed it on the Hot 100 (it reached the Top 10 in Billboard's main competitor Cashbox).
* an otaku movement seeking to create a law barring female seiyuu from dating or marrying, even demanding that they be virgins..
* A not dissimilar saga was that of Nightcrawler's biological parents. He had been told that he had been found as a baby next to his dying father (or mother, there were conflicting accounts). It eventually turned out that he is the son of Mystique and Azazel (although
* A note about who was supposed to receive some calendars couldn't have been written by a math teacher because it says "divide the calendars by 1/2", which would actually be multiplying by 2, because math teachers never make mistakes in grammar or use common English-language phrasing fallacies outside of the context of the classroom.
* a notebook left behind by a dead soldier in which the soldier reported that a Titan tried to talk to her.
* A note found in the Remnant city of Khi Tasira is essentially "yes, we know the weather systems aren't working. Stop bugging us about it." Not the sort of thing you expect to find in a
* a note Fred left to himself breaks a memory block on George and himself. (George was affected as well because as magical twins they have a soul bond.)
* A notepad late in the game has a list of some Deus Ex tropes, despite
* A note should be made about the new Ant-Man (Eric O'Grady): he does try to take advantage of his proportionate strength to punch out a guy (to impress a woman), but doesn't realize that his punch is more like a bullet than a hammer.
* A noteworthy instance of witness tampering from Season 4 of the original series is in the episode "Old Friends," where a witness commits perjury while testifying against a member of the Russian mob, then later refuses to testify to the truth because she's been threatened. She eventually does tell the truth,
* A not exactly uncommon method of execution, especially in Christian martyrologies of all times:
* Another 19th-century criminal, Edward Rulloff, could not be prosecuted for the murders of his wife and daughter according to the laws of the time because their bodies were never found. But he could be tried, and was sentenced to 10 years in prison for the
* Another 2007 titan set, Lesovikk, contains the only Toa to use the Piraka eye/brain piece instead of the usual Toa piece.
* Another 2012 edition contestant is Spain's Pastora Soler, whose note is
* Another 28 years later, the Imperial Fleet is confident in their victory and launches another offensive. The Battle of Shandarua is such a devastating defeat that, almost a century later, the Imperial Fleet is
* Another 40K example featured a psychic war between two Space Marine Librarians.
* Another 40K example is Sarpedon of the Soul Drinkers, who nearly led his Chapter into the clutches of the Dark Gods... and has
* Another 4e example would be the battle between the God of War, Bane, and the God of Savagery, Gruumsh. Bane is a strict, disciplined soldier who believes in
* Another AAA case was Butterfly, a spear counterpart to Princesa Sugeith
* Another Achilles Heel turned out to be their uniforms. Each piece of their clothes — shirt, pants, and shoes — turn into their uniforms. Lose any part of it and you can't transform, as Jun finds out.

* Another ad features a bunch of people stranded on an island after their plane crashes. One of the crash victims walks up to the rest of the group and announces that she has found the plane's radio equipment and believes that they'll be able to be rescued....only for the group to ignore her in favor of the man who has found the plane's beverage cart, full of Bud Light. Apparently calling for help and
* Another ad (for laundry detergent or another product) has a woman giving her baby a play-by-play on how to fold laundry at a laundromat, then asks the child if pants go on their heads to teach them.
* Another ad for Pine-Sol had a daughter arguing with her mom about her boyfriend.
* Another ad from about the same period, for a cologne called "Bacchus," pretended this cologne was the real secret of the Roman army's victories: they arranged to splash the stuff on the men of enemy towns, who are then mobbed by their own (all very beautiful) womenfolk. "Because when a man is irresistible to women, he has more interesting things to do than fight a war."
* Another ad from the early 2000s depicts dealing with peer pressure. It shows a kid walking into a room and getting offered some weed by a laid back stoner. The kid makes up an excuse, and the scene repeats several times with the kid walking into the room again, each time offering a different excuse. Finally he tells the stoner, "It's just not for me." to which the stoner simply shrugs and replies, "It's cool." The ad certainly portrayed the stoner as much more relaxed and laid back than the uptight other kid.
* another ad had a masked and machete-totting maniac barge in on a cabin full of partying teenagers, who are unable to emit anything louder than forced whispers because they've been saving their screams for the Much Music Video Awards.
* Another ad implies that a man would submit to a chest wax for an original flavor Klondike bar, or to a bikini wax for a dark chocolate Klondike bar.
* Another ad pulls a similar stunt: it's a brief promotion for a new offer. And then the
* Another ad seen during the local ad insertions is an ad for Mark Albert Herder's bankruptcy offices. This ad has Beethoven's 5th Symphony in the background, and this ad has apparently been around for about 6 years, yet it can still be seen today. Like the flu shot one, this ad is commonly played on local ad insertions and can also be seen on the local stations in the area.
* Another advantage of kinetic weapons is the ballistic trajectory, which allows you to arc projectiles over obstacles (which is how mortars and artillery are used). Beam weapons fire straight, meaning you can't target things behind obstructions or at extreme long distances due to the curvature of the Earth itself. This has also been used to great effect by snipers who have, using bullet drop and the environment's wind speed, actually
* Another adventure had the reading of the president's last will and testament. Given that the president was a millennia-old dragon, even though it's hilarious, it's almost impossible to read all in one sitting just from raw length.
* Another "Adventures" segment sees Bill and Mike constructing a children's playground, marked by a "KIDDIE AREA" sign. The two are
* Another adversary was left on a deserted island. After eating everything on it, he starved to death. Then came back. And starved to death again...
* Another advert for a car plays with this trope. Earlier an elderly gent is on a massive yacht with two attractive young ladies, when he sails by two people windsurfing and the wake knocks them off balance. Later, one of the guys windsurfing is driving home sees the gent and pair of lovely, erm, ladies walking by a massive puddle. They recognise each other and the gent looks on with horror as the car speeds up only for the man to avoid the puddle.
* Another advert had two guys working at an aquarium. However, one of the guys had one of his hands bitten off by a shark, while the other guy watches. The second guy asks about the incident and the first guy responds "Talking about your bad luck" in a calm matter.
* Another advertisement featured the grim reaper getting kicked out of a house
* another advertisement that also fits the bill, although it makes slightly more sense considering they're running a dancing contest for 2012 Olympics tickets.

* Another AEW performer, Luchasaurus (formerly Judas Devlin in NXT and Vibora in Lucha Underground), has a master's degree in history, with his specialization and thesis being in medieval literature.
* Another Age, the Orbit weapons were actually introduced as an unlockable inside part. Unlike its future incarnations, it did not expend energy upon usage though it was otherwise stationary.
* Another alien species recovered the body of a human test pilot from one of the early failed Jump Space tests. The preserved it for several centuries until they made contact with humanity and could return the body to Earth.
* Another all-screaming version with the title character chasing one of the bad guys armed with nothing but a sword... until the bad guy's friends show up (similar to the above
* Another alternate reality Dick had a costume problem - the Dick Grayson of the pre-Crisis Earth-2. His first costume was
* Another alternative to the 65-episode rule during the 80s was cutting a show off after 13 episodes. Examples include
* Another alternative to the military salute is the raised fist, which for instance was used by Republican units in the Spanish Civil War.
* Another American example would be Benjamin Butler, a influential lawyer-turned-Civil War general. While a brilliant lawyer and debater (for one, he coined the term "contraband" for slaves escaping to Union lines, providing a legal excuse for freeing them when slavery hadn't actually been abolished), he was an incompetent commander; however, his political influence protected him from a sacking until Lincoln's second term. In an improbable run of bad luck, the Union would continually transfer Butler to quiet sectors, only for that area to become suddenly important; whenever Butler was the highest ranking officer on the scene (which he usually was), disaster soon followed.
* Another amusing one: Meilin storms out angry at Syaoran to which she says "Syaoran you idiot." Cut to Syaoran sneezes.
* Another amusing way groups bypassed the dungeon in the original was to completely skip the dungeon and merely steal the doors, 1000 cu. ft. of solid adamantine and mithral, probably worth more than all the treasure in the tomb itself. Also fixed in the 3.5 remake by having the doors merely by magically hardened steel that loses its magic once removed.
* Another ancient legend of China retold is the story of a fisherman who finds himself in the Chinese Faerie kingdom and marries the queen there. After about 50 years of staying with the Queen, he returns to the real world... and finds out that 200 years had passed since then. Talk about time flying...
* Another and it shows in the usage of F-15Ks and T-50 fighter jets. It stars Korean superstar/heartthrob Rain as the main character, who after wrapping up filming, immediately enlisted in the military to fulfill his two years of mandatory national service.
* Another, and possibly funnier, exchange occurs when you accept a male hooker's invitation with Bethany in the party, but decline when she protests
* another)... and then goes back and stops the belt just before the mooks get sliced into pieces.
* Another anecdote concerns Genua (a city pretty much on the opposite side of the continent from Ankh-Morpork) inviting General Tacticus to become their new king. He accepts, and, upon taking the throne, reviews their strategic situation and decides to promptly declare war on their most dangerous enemy... Ankh-Morpork.
* Another angle to the situation for the series is that there seems to be a loose "odd-even" configuration to the fandom. It's not uncommon to find fans of both
* Another animal example is rattlesnakes. Since they're snakes, and have no legs, male rattlesnakes fight by wrapping their tails around each other and butting heads. When people see them, they frequently assume the snakes are mating, not fighting. (A mated pair of snakes are entwined, but lie on the ground; a fighting pair usually rear up.)
* Another animal that's often considered to be a terrifying sea monster are Giant Squids, but even they're preyed on by the largest predator alive (possibly ever),

the Sperm Whale. The only animals larger then it are the filter feeding baleen whales.
* ANOTHER animated Titanic movie with mice, he scrapped that one and had a few helicopters airlift one roughly the size of a house.
* Another anime-exclusive episode has the Sailor Senshi, Haruna-sensei, Naru and Umino having a picnic under the cherry blossoms, as a part of the cherry tree watching tradition. Then, they're captured by the cherry-tree-themed
* Another answering machine has both Strong Bad and the King of Town trying to impersonate each other in order to accuse the other as the prank caller. Both do an absolutely terrible job as sounding like the other
* Another anthropomorphic personification of England or Great Britain, especially in political cartoons, is John Bull.
* Another anti love song by Led Zeppelin is "Your Time Is Gonna Come", in which the singer tells his lying and cheating ex-girlfriend that one day she's going to reap what she sows.
* Another arc has Kyubey tasked with watching over a pet monkey, whom she proceeds to give an
* Another Archbishop of York to take up the sword was William Melton, albeit without much success. In 1319 a Scottish army threatened York, and in particular Queen Isabella of England who had taken up residence there. While the Queen was smuggled out of the city by boat, Archbishop Melton hastily raised a rather small, ragtag army of York residents, which involved a large number of priests and monks from the region. Unsurprisingly, in the ensuing "battle" at Myton-on-Swale they were massacred by the Scots. The sheer number of clergy and religious men involved on the English side led to the battle being nicknamed the "Chapter" of Myton.
* Another arc rips apart the premise of "The Cold Equations"; fortunately, Quentyn happened to be passing by and saved the girl before she asphyxiated. So she was able to testify at the shipping company's trial.
* Another ARG was launched before season 4 called "Find 815." Another one launched at Comic-Con 2008 called the "Dharma Initiative Recruiting Project". Both of these were closer to simple online stories with minigames included than true ARGs, and the latter was so plagued with delays and had so little apparent purpose that it was aborted before the end.
* Another article brings up this point as well, and also states that this is why guns are such a huge risk factor for suicide: it's pretty hard to fail at suicide with a gun.
* Another article said that children are universally opposed to children's health care, with responses to the question "Do you want to go to the doctor?" ranging from "NO!!!!" to "inconsolable crying," but no children in favor.
* Another artifact does the reverse, negating any creatures' immunities to magic.
* Another artifact from the Book of Artifacts, The Apparatus, is frequently destroyed (by enterprising heroes) and recreated. (It can do horrible things like tear apart and combine souls and bodies, and is generally used by people who are completely mad. The expected setting is, of course,
* Another Artifact of Doom associated with Vecna is the Sword of Kas, a weapon he made and gave to his
* Another artificial variant appears in a joke about a businessman showing off his robotic secretary, explaining her built-in features (printer, stapler, tape dispenser, etc.), then letting a coworker borrow her to test her out. Upon hearing a bloodcurdling scream from the next room: "
* Another Ascension Perk, "Galactic Wonders," lets you build even bigger constructions, from a Science Nexus that provides unparalleled research output, to a Sentry Array that when fully upgraded allows you to see everything in the galaxy, or even megastructures like
* Another Asian movie where it's background music and not played for laughs: In
* Another Asimov story involved a robot designed to operate a mining laser getting lost and being found by an ordinary man. The robot then builds a mining laser out of various junk found in the man's toolshed. The only named part is a flashlight. When the robot turns on the laser, he takes out a nearby mountain. The human orders

the robot to destroy the machine and then to forget everything. When the owners of the robot find it, they are outraged — the robot had somehow managed to build a laser strong enough to take out a mountain that was powered
* Another aspect that is open to debate is how Lelouch first had to reach the
* Another attempt at re-coding the site was announced in early 2014, an open-source project called
* Another attempt by Cobra Commander was to use a love potion to allow
* Another attempted example would be the artificial Devil Fruits (called SMILES) used by the Beast Pirates. In theory it gives the crew a huge amount of users who gain
* Another attempt is made in season 5 when Oliver (in civilian outfit, not as Green Arrow) tries talking down a guy who attacked the mayor's office after he was pissed off about his wife dying.
* Another attempt was done when Kodos creates a portal which sends an army of aliens to Earth; it was thwarted by the U.S. Army which easily slaughters all the aliens, since they only have weapons like swords or spears.
* Another Australian example is Rivers advertising their crocs, saying things like "Now the whole family can look ugly together".
* Another Australian example — the Picnic chocolate bar. The main slogan was "Deliciously Ugly" — because it is delicious but, to be frank, looks almost exactly like a turd.
* Another author mentioned by Aldiss in the essay is R C Sheriff, whose novel
* Another aversion, a similar case like the Toon Monsters above, Yugi first believed that Noa/Noah is violating the rules when he introduces Spirit Monsters. Noa explains that the Spirit Monsters are legal cards that are secretly created by Pegasus, but since nobody has ever heard of them, they are a completely new type of Monster Cards in this game.
* Another aversion: The accordion is a staple instrument in the genre of Zydeco. It's a blend of Blues, R&B and Creole folk music that, far from being considered stodgy or dorky, is practically synonymous with a rollicking good time in southeast Louisiana.
* Another aversion was Carroll Spinney, who retired a year before his death, though several segments he recorded would not air until afterwards
* Another aversion would be the death of Vinnie, which comes right out of nowhere. Mostly killed off so that the actor, Reece Shearsmith, could
* Another axis along which soccer styles differ is the emphasis on physical prowess, "fighting" and team effort as exhibited by Germany roughly between the 1950s and early 2000s and a style much more focused on individual class, pretty play and outsmarting, rather than outfighting the opponent, traditionally associated with South American nations, mostly Brazil. When Jürgen Klinsmann and later Joachim Löw changed the German style from the traditional
* Another backstory example is Emperor Pelagius the Mad. Born Thoriz Pelagius Septim, he briefly ruled the Third Tamriellic Empire from 3E 145 to 3E 153. Infamous for his eccentricities, he certainly lived up to his nickname. He suffered from extreme weight and
* Another Bad Creation, a New Jack Swing group composed of five children, had two hits in 1991 with "Iesha" and "Playground" before fading into obscurity.
* Another bad habit of the show is its tendency to have the main characters' Pokemon take
* Another Bajoran crewmember (originally a cadet of the flight team) is apparently not allowed to wear the earring.
* Another baseball Godzilla Threshold is using a pitcher as a pinch-hitter or a defensive replacement for a position player. With the exception of the rare "two-way" player and a small handful of pitchers who have not-entirely-horrible hitting skills, such a maneuver is only done if there have been an unusual amount of injuries or the game has gone on so long that the manager has run out of replacements.
* Another Batman villain of lesser renown, the Great White Shark, lost most of his face (including ears, nose and hair) after being locked in a freezer and has since

filed his teeth into points. As a result, he's
* Another bearded villain on the show (who appears more frequently) is the candy pirate Stickybeard; as
* Another Beatles song, "Back in the USSR", was originally written as a tribute to a
* another, because the extreme conditions play merry hell with anything more mechanically complicated (specifically, automatic and semi-automatic weapons are known to freeze up and jam in weather that cold). The only reason the No. 4 was replaced at all was that spare parts were running out.
* another been detached as usual. So when molten chunks started flying past his window, he thought it was his heat shield coming apart...
* Another Beethoven example is the second movement of his final sonata in C minor (No. 32), written 5 years before he died. After the dramatic first movement ends with the Picardie third leading straight into the second movement, this movement starts off with a much calmer theme that highly contrasts with what you just heard. The first few variations on that theme gradually get more intense until finally bearing a resemblance to modern boogie-woogie, immediately after which it quiets down and maintains a serene, lonely, ethereal quality throughout the rest of the movement right up to the end. What's more, Beethoven never wrote a third movement for this sonata (because he felt no need to, not because he died before he could finish it), so the entire sonata is over at that point, and the feeling persists. The feeling is intensified by the juxtaposition of the fact that, by this point in Beethoven's life, he was almost completely deaf and did not have long to live, and this is one of the last piano works he has ever composed.
* Another began when Roger tricked Jeff into being carried off into space at the end of "Naked to the Limit, One More Time", which led to Hayley coming to terms with his loss in "Spelling Bee My Baby" and "The Missing Kink" before we focus on Jeff's attempts to return to Earth in "Lost in Space" and "The Longest Distance Relationship". He finally returns in "Holy Shit! Jeff's's Back!".
* Another begins to brew up in the Riverlands, between those who follow the Old Gods and the resurgent Faith Militant.
* another being entirely has apparently been in contact with him as well.
* Another Bemani artist, Takayuki Ishikawa, better known as dj TAKA, also uses different aliases for different styles, such as Lion MUSASHI for house music, D.J. Setup for psychedelic music, and D.J. Amuro for classical music.
* Another Bender example: "I'm so excited I wish I could wet my pants."
* Another big ambiguity that is touched on occasionally but never truly addressed is whether Haruhi is a god or not. It's one of the early theories that Koizumi presented, and a large number of fans assume it to be the case, but even Koizumi himself doesn't know if it's true or not. He says it's just the worst case scenario that his Organization is acting on. Or at least that he
* Another big example occurs in book five when Kreacher (already established to hate Harry, Sirius, and all their friends) tells Harry that Sirius is being held captive by Voldemort. Hermione even points out that Harry has a "saving people thing" which is clearly being exploited, but Harry insists on going anyway.
* Another big one is the Blade of the Immortal, a relatively weak weapon that is forged
* Another big part is that a lot of the humour is based around transplanting modern stereotypes about European countries to their historical equivalents - jokes about Belgian tribesman eating mayonnaise and Corsicans having switchblade swords are funny if you're a continental European, but nonsensical if you're American. Even nations that Americans do have stereotypes about (France, Germany, Britain, Italy, Spain, Scotland) get treated from the French point of view, or from an unusual angle to avoid
* Another: Bill Nye the Science Guy getting called in as a consultant, and the criminal was someone completely unrelated.
* Another Billy Joel example is "Movin' Out (Anthony's Song)", where he decides he would rather move out than live with his crazy mother.
* Another bit is the fear in Christopher Guest's performance when he faces down

Inigo. Patinkin actually had accidentally injured Guest in a training exercise some time beforehand.
* Another bit of evidence that suggests that alignment was originally intended to be more "tangible" is the concept of alignment languages. It's not as stupid as it sounds—they're more along the lines of code words and phrases used in secret societies devoted to particular philosophies or religions (such as the Cynics or Pythagorians) than real, living languages. For example, they're described in the 1st Edition Dungeon Master's Guide as being useful for such things as conducting philosophical discussions appropriate to the alignment, or identifying impostors (which was why Assassins are able to learn Alignment Languages other than their own) but being pretty useless for, say, buying a loaf of bread at the local market.
* Another bizarre occurrence is that typically less well-received seasons of
* Another blatant one in TFT where Tyrande and Furion sail to Maiev's aid against Illidan. Illidan and Tyrande have dialogue if they meet in battle, but no matter how many times Furion and Illidan are in sight of or attack each other, Illidan is astounded to see his brother during the ending cutscene.
* Another blooper mocks the perennial fandom debate over whether or not Lindon would ever split his core again.
* Another blues singer, Tommy Johnson, is also said to gone to the crossroads to sell his soul. He is the blues singer depicted in
* Another Bob Hope moment - in "Road to Utopia" he orders a lemonade in a Yukon bar - noting the reaction of everyone around him, he snarls "...in a dirty glass!"
* Another body is found on the tracks in "Risk" and the team must determine if it was suicide, a murder, or if he died while "subway surfing."
* Another body was disposed of in a sealed barrel, leading to the corpse turning into
* Another book described how the Yeerk Dracon Beams were descended from Andalite Shredder weapons, but were altered to cause as much pain as possible. Shredder weapons set to full power vaporize targets almost instantly and painlessly. Dracon Beams set to full vaporize victims slowly enough that they can feel their molecules explode.
* Another book from that series has a brainship who had gone through a terrible traumatic event; in therapy a counselor had her channel her emotions and frustrations into art, and eventually had her create a self portrait. He expected her to paint a projection of herself as a human, if she hadn't had the genetic defects that landed her in a brainship, but she painted her shipself with some anthropomorphic elements.
* Another book has a girl named Alita wearing a t-shirt of Battle Angel...
* Another book in the Elder Scrolls series, The Wolf Queen I, briefly mentions that Prince Antiochus, son of Pelagius II and brother of the titular Potema, had a "secret stash of
* Another book makes reference to one Acolyte Grendel, a figure who has reached near-folk hero status among WH40k fans for being the most combat-ineffective character possible (a fat scribe with a knife) who just so happens to have God-Emperor-given luck with damage and critical rolls that can one-shot even major Daemons and Ork Warbosses. The nod happens to be an
* Another book refers to the "Montgomery Sears catalog," if anyone remembers old Montgomery Wards
* Another book, the Light Prognosticus, was written later. Unlike its darker cousin, this one predicts Mario & Co. stopping the end of everything.
* Another book was based around a woman trying to abduct Alice Wakefield, "steal" her face by way of impossible technology and then kill and replace her as revenge for being bullied by Alice and her friends when they were at school.
* Another boomerang can be launched in Year 2 by examining a cabinet in Toto Santos's scrimshaw parlor, which causes Toto to note that he should remember to restock liquid nitrogen. In Year 4, Manny steals a bottle of the chemical from Toto in order to freeze the gelatin covering a booby trap (long story). After that, near the very end of the game
* Another borderline example is in "It's Time" where Father Time is shown to be

frustrated with Mordecai for
* "Another Boring B-Side" by Morris Minor and the Majors (the b-side of "Stutter Rap"):
* Another boxing example: Arturo Gatti and Micky Ward beat the everloving bejesus out of each other, both sustaining incredible amounts of punishment, yet hitting each other just as hard and often in their twelfth round as their first. They ended up fighting
* Another Brazilian song, "Eduardo e Mônica", written by Renato Russo and recorded by his band Legião Urbana, brings the titular couple: they have different ages (she's a few years older than him) and tastes (her tastes are more sophisticated, while his are much simpler). Regardless of all differences between them, they build a solid relationship, living together and
* Another Brian d'Arcy James example: few people seem to remember that he originated the role of King George III in
* Another brief example occurs in the episode "Once More, with Feeling", with the gang's reaction to Anya's theory that bunnies are causing the problem-of-the-week. With actual cricket sounds to boot. Indoors. (The episode revolved around people singing and dancing to music coming out of the air; we can give the crickets a pass.)
* Another brief story arc in the strip saw Calvin placating the monsters under his bed by feeding them garbage, according to Watterson himself, a testament to how he sometimes felt in writing the strip.
* Another British channel, The Wrestling Channel, went through financial troubles during its five years on the air. Its named was shortened to TWC, and was changed to TWC Fight! before it became The Fight Network after being bought out by the Canadian channel of the same name. That wasn't enough to save it, and it was shut down in 2008.
* Another British comedy to feature the continual use of salutes is Garth Marenghi's
* Another British example, a car advert has a couple enjoying an improbably sexy dinner followed by aborted bondage on the stairs. He is left cuffed to the bannister staring at a piece of paper which reads "Ask before you borrow it."
* Another British example. Back in the 1970s, there was a very popular series of adverts featuring Joan Collins and Leonard Rossiter, which always ended with the advertised drink being poured all over Joan. The catch? Everyone thought they were advertising Martini & Rossi, when the ads were actually for a different but similar drink.
* Another British incompetent was William Elphinstone, as depicted by George MacDonald Fraser in
* another British music/video/games retailer, Fopp, used to deal in flat prices and adopted the practice before any of the other franchises did. Unfortunately, due to bankrupting and being bought by HMV, only 8 Fopp stores still exist. Zavvi has also gone into administration selling off a handful of stores to HMV.
* Another Broadway tune, "Step to the Rear", was given new lyrics by the University of South Carolina's head football coach and athletic director at the time, Paul Dietzel,
* Another Brook example from the Dressrosa arc. He's facing Giolla, a demented woman whose Devil Fruit lets her turn anything into abstract art, and she's imprisoned Nami, Chopper, and a new ally of theirs named Momonosuke in a sculpture that will kill them in ten minutes' time. Brook only rejoices, claiming to see the beauty in her art, and volunteers to do a song for the occasion. Giolla eagerly reverses her power over his violin and bow…but it turns out his bow was his cane, which was his sword. One
* Another brother and sister, Jeremy and Tiffany Reinbolt were respectively Schroeder and Sally on
* Another B-series module, "Palace of the Silver Princess", takes place in a cursed palace where the rightful inhabitants have all succumbed to this trope.
* Another BSG example: the "webisodes" that were produced during several of the hiatuses primarily focused on supporting/minor characters.

* Another Buffy episode, "Him", has Buffy, Willow (who by this time has come out as a lesbian), demon Anya and teenaged Dawn falling for a high school boy, to the point where they are each trying to kill perceived rivals (or in Willow's case, work a spell to turn him into a girl) for his affections. The boys manage to work out that the boy is unwittingly wearing an enchanted letterman jacket which causes women to fall madly in love with the wearer.
* another bungled convenience store hold up where the would-be robber forgets to bring the axe he was meant to be threatening people with.
* Another, but earlier, working name that crossed the minds of the creators was "
* another bystander. It's sometimes an option to avoid conflict by letting a town kill itself.
* Another came when they cast Kyoko Zeppelin (Asuka's mother). Asuka is often seen as a
* Another Canadian of Scottish descent, Alan Young, was the voice of Uncle Scrooge in
* Another Carly Simon example: in the late 1970s-until at least the mid-late 1980s
* Another car-related one says, "You said you wanted a jaguar for your birthday", and on the inside it says, "But they roar a lot and it's dangerous to keep a big cat, so I got you money instead."
* Another cartoon, " A Jolly Good Furlough," had a brief rationing gag in which Olive Oyl's car was shown to have old shoes mounted on the wheels instead of tires.
* Another cartoon depicted a woman mooning to retaliate against a male flasher.
* Another cartoon depicts a beetle couple at home, with the wife looking at the neighbours' house, which is entirely dark except for two large glowing spots from the window. She tells her husband that the fireflies across the street are mooning them.
* Another cartoon features a group of angry clowns arguing with each other at a negotiation table; the caption reads, "At the strategic pie limitation talks".
* Another cartoon had a butter knife doing a stand-up act in front of an audience of flatware. The caption read, "...and the waiter said, 'That's not a soup spoon!'
* Another cartoon, "Sufferin' Cats!", has Jerry being chased by Tom and another cat; by running around both of them, Jerry managed to tie both of them into a knot.
* Another cartoon, "Triplet Trouble", has Mammy Two-Shoes take in three kittens who then make mischief the moment she leaves the room. Tom and Jerry have to
* Another case alluded to was when the ex-CEO of a company committed suicide and tried to frame his former business partner, only to be found out by Conan's father Yusaku. Years later, his son
* Another case. During Ed and Al fight with Scar, Ed tried to call Scar out about
* Another case features Rokumichi Hado, a once very popular male idol who is about to return to the musical scene much to the joy of the press and his fans. But then Rokumichi appears dead, his corpse hanging in the middle of a theater stage, and Conan and Amuro must deduce whether the killer was his manager Kanae, the
* Another case from Austria was that of Gottfried W. He imprisoned and sexually abused his two daughters for forty years. The abuse was so bad, that today both are severely emotionally disturbed.
* Another case from ROTF: During the battle in Egypt, Mixmaster starts shelling the human troops.
* Another case from the book had a murder take place at a country club wherein someone was pushed down a hill and broke his neck in the fall. The tennis player who reported it was apparently the murderer because he had a grass stain on his shoes and of course, tennis players would have different shoes for tennis than walking around in the grass. Yeah, you'd have a point there, since many tennis players keep a separate pair of shoes specifically for tennis the way people do for a lot of sports, but apparently, the grass stains
* Another case happened when Kari, Grant and Tori were setting off explosives in a quarry to create a wave... and silence. The bomb squad then spends several tense minutes carefully fishing the tons of live explosives out of the lake to find the problem. A similar situation has happened to Jamie and Adam at least once. This is one of the most dangerous malfunctions a bomb squad can encounter because of the

chance of a delayed explosion while someone is investigating the problem.
* Another case happens to Monk in "Mr. Monk Is Up All Night": Suffering from insomnia, Monk is wandering through the streets, and happens to pass by a diner kitchen where he hears an argument going on. He peeks through a window and sees a drug deal going bad, with the dealer and customer debating if a third man at the deal, an Asian, is actually a cop or not. Suddenly, the Asian pulls a badge and gun and declares the other two men under arrest. Monk looks away as the drug dealer attacks the undercover cop, only to hear a gunshot. He looks and sees the drug dealer has shot and killed the cop (and blood has splattered everywhere). The dealer hustles the customer into a waiting car that speeds away. But when the police arrive, however, the kitchen (which was destroyed in the fight) is spotless and immaculate, and there is no evidence that a murder happened, not even a body to prove a thing, and no cops have been reported missing. Monk later finds the supposed "undercover cop" at a train station, but he denies ever having been to the diner. He also locates the customer, a coin dealer, who denies ever having been there.
* Another case has Haledjian declaring someone's alibi faulty because the person identified the tune a band was playing as "God Save the Queen" rather than "My Country, 'Tis of Thee" (which has the exact same tune), and so knew about a British performing troupe being in town. Many American
* Another case has MI5 investigate an assassination attempt on a novelist by
* Another case involved a man who was in a relationship with an old friend who didn't want to commit, so he broke up with her. Years later, he got engaged to another woman. The first woman returns and has gone full psycho bitch. She's threatening to send photos of them while they were dating and pass them off as if he were cheating.
* Another case involved an ikebana exhibition, where the artist in charge had received more than one threat. The
* Another case involved Moon Knight trying to protect two businessmen from a trio of assassins called Gun, Fist, and Blade. In a twist, the assassins turned out to be the good guys, the businessmen were millennia-old cultists who had to regularly sacrifice children to keep their immortality.
* Another case involved the murder of Michiko Oosawa, a young actress who played the role of Venus in an aquarium show. She was supposed to emerge from a huge shell-shaped prop and when it opened during a rehearsal, her lifeless body was released instead.
* Another case involves a young man accusing his coach of molesting him when he was a boy. It initially appears that his crimes are outside the statute, but when they learn that much of his abuse was committed while they were traveling to games (including out of state), Cabot determines that they
* Another case is something of an inversion. An undercover police officer tries to turn a peaceful student rally into a riot, but is caught and kicked out immediately because they realize he's much too zealous and dressed like too much of a stereotype to possibly be real.
* Another case like this is at the end of the first game, where John tells Abigail and Jack to "run and don't look back" before
* Another case of a parent who never ceases to embarrass her daughter is Lwaxana Troi, whose flirtatious and forceful personality causes endless grief for her daughter Deanna. Whenever she comes on board the ship, she's likely to condescend to Deanna every chance she gets, butt into other people's affairs, and try to score with an equally-irritated Captain Picard. She's supposed to be an telepath who reads thoughts and emotions.
* Another Case of Milton Jones, Annette, daughter of camping tycoon Mr Millet, complains of having an overbearing dad.
* Another case of this happened with Meowth, who is best known as being voiced by the late
* Another case of this is Genosha. Prior to the 2000s, this island nation depended on brutally enslaving mutants in order to exploit their powers, which one Genoshan justifies with the logic that if mutants were allowed to live as free people, they

would exterminate the humans of Genosha. When
* Another case of this is in the Punk Hazard Arc, where the Straw Hats and allies find out that they've been captured in a cage by Caesar. Here, everyone is awake besides Franky, who is sleeping soundly in Robin's lap.
* Another case seems to have occurred since the release of Alchemy at the end of the second game, judging by the map for
* Another case that either related to the regulars or the player, will almost always throw back to the plot point in the aforementioned first case and usually has something to do with some kind of dilemma the regular in question has, solving it by the end.
* Another case that puts a twist on this idea is the Spider Queen mystery. Two men are killed and it's revealed that they were smuggling drugs in the doll-repair business they were running. This also seems to be the reason behind one of the guys'
* Another case that supports the trope is a mission to stop a capital ship whose engines are stuck from colliding with asteroids in an
* Another case that would be anachronistic is justified: while military units were not fully racially integrated until 1948, the
* Another case where it switches back and forth: while on a job, cat burglar
* Another case within the old laws fits here perfectly. Matsumoto is
* Another casualty of the New 52 was Lian Harper, the daughter of Wally's teammate Roy Harper and the assassin Cheshire. Though Lian had already been killed off prior to the reboot,
* Another category of error regarding the depiction of tanks can be seen in the cover art of Major John Foley's
* Another cause of runaway trains can be the failure to properly connect the brake pipes when trains are being formed, leading to part of the train being unbraked (in extreme cases the entire train other than the locomotive). A simple error is to connect the pipes but to leave the isolating valves closed. To guard against this a brake continuity test should be carried out to make sure the brake is correctly operating along the whole train. This is done by opening the brake pipe at the back of the train and observing a reduction in brake pressure at the front. In many countries, drivers are also required to carry out a running brake test to make sure that the brakes operate as they should, usually whenever a driver takes over a train (also allows them to get a feel for the brakes on the particular train).
* Another cause of this syndrome is a "Foundry" or similar system that lets players create their own content. Some will create easy "farming" missions that grant plenty of experience points with little "experience". This is especially prevalent in the aforementioned
* another CBI team had been called to the same house to investigate a body found inside. Fortunately, they recognize each other before anyone actually gets hurt.
* Another Century's Episode franchise to debut with its plot resolved).
* Another Century's Episode says "I guess that means we're going to be rivals, then" and Mikhail responds "I suppose it does", both of them with smiles on their faces the whole time.
* Another Century's Episode, where Hikaru completely annihilates Bodolza.
* Another Century's Episode with a grand total of ten machines, half of which are Lancelot variations pilots by Suzaku or C.C
* Another Century's Episode would fall under the heading of their base machine and therefore only count as one, meaning they can fit in more playable while still maintaining the whole "three per series" idea.
* Another chance for the player to pick up this trope: if you play as the United Earth Federation officer in
* Another chapter had a horse's brain put in a man's body to incriminate his owner's killer.
* Another chapter had Ayane tied up by her sister Machi as a quick gag. By the time Machi
* Another chapter had him deal with Henchman Union organizer Sid the Squid, with Maxie Zeus making book on the Sid vs. Phil showdown.

* Another chapter has him try looking around Nanba to show how dark and serious the place has become, only to find everything as wacky as it usually is. Again he gets bummed out, but just like last time, the end of the chapter proves him right.
* Another chapter opens with sucking and slurping sounds coming from a girl with her head between a guy's legs, and then it turns out she's a vampire, and was sucking his blood, not his penis.
* Another character appears: they will either be questioned and then
* Another character attempts to use this trope. When Arthur asks his name, he says "My name is not important." After some cajoling, he gives Arthur his name.
* Another character complained about the use of this trope in an unaired TV commercial, especially since it depicted a
* Another character, Dodgson or Ludlow, depending on the version, is eaten by a family of
* Another character does in fact keep journals; when that character experiences amnesia, the journals prove to be very helpful.
* Another character even comments that while yes, many good/innocent people will die during this ordeal, they will just go to heaven when they do. So is it really that bad?
* Another character from that show who qualifies is Moosk, one of the few adults that Numbuh One befriends.
* Another character has been trying to avoid her son's questions about what happens after you die, even though his father was a fire-breathing demon with horns and wings and the kid may be
* Another character hires them later in the series to do the same for him, because he was born with so many crippling deformities that he's spent his entire life in a fluid-filled jar — even the air is poison to him. A bit closer to the original trope in that they clone someone else for him to transfer his mind into, but also a bit more different in that when the process is done, the clone kills the original, with his full consent.
* Another character is a (supposedly talented) poet who borrowed money from
* Another character remarks on being eaten alive in the same tone most people would note their shoe is untied.
* Another character tells the story of the time they wound up locked out of their quarters and were discovered in this state by their (previous) commanding officer, widely believed to have
* Another character, Veronica, goes by Ronnie. According to Elliot, the former was trying to copy her.
* Another character who took off in an unusual way is Tad Strange, after a character with that name was said to be voiced by Cecil Baldwin of
* another character will jump in, powers to demonstrate what he got wrong.
* Another Chefboyardee example: Back when they made fun pasta shapes of every popular character, it made
* Another children's book has a character named Susan who changes her name to, well, the title says it all:
* Another Chips Ahoy commercial features four anthropomorphic cookies joyriding in a car and singing along to Human League's "Don't You Want Me" as a giant hand reaches in and grabs them one by one. The last finally realizes the others are no longer singing, and falters as he looks behind him, just before being grabbed himself.
* Another Christmas ad shows a father recounting all the cool stuff he got his kids, then asking, "And what did Dad get? [
* Another Cinderella Story, and Mary loses her Zune, which Joey retrieves and uses to find her. The plot continues after he discovers who Mary is, as the stepfamily continue to conspire against her and ruin her new relationship and dancing aspirations.
* Another Cinderella Story: Joey Parker gives Mary Santiago his jacket when they are outside and it is really cold.
* Another Cinderella Story, Joey Parker sets up a booth to find the masked girl he met at the dance. A few boys get in the line.

* Another Cinderella Story the male lead is teaching a dance class and the female lead is following along on the other side of the one way mirror. At one point they both lean into the mirror in the same exact spot and appear to feel something from it, even though he doesn't know she's there and they haven't properly met yet.
* Another civil war erupted in "Smurf Vs. Smurf" where the North Smurfs and the South Smurfs fought over the correct use of the word "smurf" in compounded words and phrases (or however the language division was portrayed in non-English versions), which led to Papa Smurf seeking the reluctant help of Gargamel to straighten the whole mess out.
* Another claim was that Harry would be definitively paired with Ginny Weasley, before stating that Harry would date other people, then eventually saying that he'd 'written himself out of a corner' on that score and Harry and Ginny wouldn't be dating at all.
* Another classic example is the hammerfore, which has also been spotted in a Keebler cookie commercial.
* Another classic flyting is the exchange between Thor and Harbard the Ferryman (actually
* Another classic, Jon says that Garfield can have one bite of the roast chicken. Garfield proceeds to shove his mouth around
* Another classic Marvel case is Lyja, a Skrull spy who got married to Johnny Storm, the Fantastic Four's Human Torch, in the shape of the Thing's former girlfriend Alicia Masters. The marriage was anulled after the truth came out, but since Lyja actually fell in love with Johnny, she later dated him again in a different human shape as "Laura Green". When she finally wanted to admit the deception he told her already because only one person kissed him like that. Awww. Unfortunately
* Another classic Sesame Street story had the Cookie Monster about to clean his teeth and as he squeezes the toothpaste tube a genie appears and states that he's been trapped in the toothpaste tube for "three and a half weeks" and so he'll give Cookie Monster three wishes for squeezing him out of the toothpaste tube. Cookie wants a million cookies, but he realises he has no way to carry them, so he wishes for "a truck" and the genie gives him a tiny, almost matchbox-sized toy truck (aka a utility vehicle, with a two-person cab at the front and a load tray at the rear). Cookie realises that he needs a bigger truck so he asks for "a bigger truck" and gets another toy truck which is about one foot (30cm) long. Cookie then decides to wish for "the biggest truck of all" and finally gets a full-sized vehicle. Then he asks for "a million cookies" only to have the genie explain that there are "only three wishes to a customer" and Cookie has already used up all three wishes. Cookie comes out ahead though, because he's an
* another classic Supergirl story, Parasite grabs Supergirl's cape and spins her around before slamming her face into a railroad track.
* Another classic tactic is to set a lot of fake campfires when your army bunks down for the night, so your forces look much bigger than they really are
* Another classic that promised a never-to-appear sequel like the previously mentioned
* Another clip has a kid who can recite all the names of the planets, but points out that it's best not to mention Uranus, since everyone starts laughing when you do.
* Another clue was the father completely stepping out of the house to shake his hand instead of doing it over the threshold, a big no-no in Russian culture.
* Another CMLL group was Rudos del Ritmoa, evil dancers Kung Fu, Búfalo Salvaje, Gran Apache, Ari Romero, América, Mario Prado, Halcón Negro...of which Estrellita was the only woman.
* Another CMOF: when Sheridan spaces a teddy bear, which is later encountered by Keffer.
* Another CM Punk example came from the Second City Saints vs Prophecy feud when BJ Whitmer interrupted Punk and
* Another Coca-Cola commercial had ice cubes that were happy about being put into a glass of Coke (as opposed to other drinks that were in the kitchen).

* Another Code "Another I" unit was actually the prototype of Another II — of course this was only revealed in the second game. Whilst it technically isn't considered a weapon (because it wasn't intended as one) there are some very bad people out there who would like to use this as one. Despite them being untested and in development, the first time they're used, they work perfectly.
* Another Code: Ashley Mizuki Robbins may solve all the puzzles, figure out the sub-plots and spend her games pulling her dad's fat out of the fire, but when it's time to confront the evil mastermind, she just kinda stands there and talks a bit. It's forgivable in that she's a teenage girl with probably little combat training facing down a gun-toting maniac whose anger is more with her father than her.
* Another Code: Ashley Robbins tends to lean forward slightly and tilt her head to the right when speaking to people.
* Another Code, as you have to help D regain his memories to get the best ending. In the sequel, this will also show up near the end of Matt's sub-plot as well.
* Another Code didn't really get much attention. Her character is more fully fleshed out in the sequel, with her backstory making up a good chunk of the main plot.
* Another Code game in which the story would have been resolved, but the company went bankrupt before anything could be put into place.
* Another Code games. Her dad is this for the first game while her mom takes the second.
* Another Code games kick off with Richard attempting to reunite and bond with his daughter, Ashley. They both end with a lot of family secrets revealed and someone nearly getting killed by a third party.
* Another Code game. When she makes reference to D, whom she met when she was thirteen and going on fourteen, she calls him her first real friend.
* Another Code is the mystery of Matt's father and what drove his business into the ground. While the bulk of the mysteries surrounding it are solved and tie in well to the main story, the final fate of his father is unresolved. It was supposed to lead into a separate game where Matt would resolve this plot, but Cing (the developers) went under before such a game could be produced.
* Another Code lost his memories when he kicked the bucket and his desire to get them back keeps him from moving on.
* Another Code spends much of the sequel filled with animosity towards her father both for the initial abandonment of a decade and the fact that it nearly happened again when he got a new job to get his life back in order. It takes near the end of the game before they're on better terms with each other.
* Another Code. The second game provides additional messages expounding on the history of Lake Juliet.
* Another Code, where the Trace device has this as one of its functions as a memory control machine. The intent was for it to be used to help remove particularly traumatic memories from people like soldiers or victims.
* Another Coheed example: he offers to "cut the throats of babies" just for you. Aww...
* Another coincidental example: Tommy Pender as Tom (AKA: Thomas) in
* Another collective example for Vimes: one of the books has him infuriated at a party of human nobles for making speciesist remarks against trolls and dwarfs. His wife points out to him that
* Another college-related one for Discover had parents give a boy a credit card, citing it "only for emergencies". He thinks nothing of it till a party where they run out of pizza which he cites as an emergency. However he quickly abuses the privilege by buying all sorts of things like clothes, stereos, etc. Not surprisingly his dad visits him as he's in scuba wear and angrily shows the credit bills he's been racking up.
* Another comedic usage, usually to illustrate how ridiculously old a character is.
* Another comes from Doc suddenly returning in season 13 after a teleportation accident vanished him halfway through season 11, with nobody seeming bothered by his disappearance. Doc is very angry to discover that the people he considered his

friends never bothered to try and find him. In the process, the long-missing character of "O'Malley" also returned, after a much longer absence of about 8 seasons. (The Omega AI he was birthed from appeared, but O'Malley is somewhat distinct from Omega.
* Another comical example from the Enies Lobby arc. When the Straw Hats and Franky manage to make it to the heart of the bad guys' lair to rescue their kidnapped friend, one of their adversaries, Fukuro, shows up to inform them that their friend is wearing Sea Prism Stone handcuffs, which are not only unbreakable but serve as a
* Another comical, over-the-top example is Chancellor Trample from the
* Another comic depicts a pet store with a piranha in a fishbowl and a cat sulking nearby with two wooden forelegs, implicitly the aftermath of attempting to catch the piranha.
* Another comic gives us a scene from "Return of the Nose of Dr. Verlucci".
* Another comic had Archie continuously putting off writing a paper due the next day, on any topic of his choosing. After putting off the paper for pointless distractions like putting up pictures of Betty and Veronica, playing with his old train in the attic, going for snacks, etc. he wakes up the next morning and writes a paper about the ways teenagers put off doing their homework.
* Another comic had Beartato ask Reginald if his soap smells like updog. Reginald subverts it when he asks "What's...
* Another comic had Jughead getting several detentions. It turns out he found being in a quiet classroom a perfect chance to do his homework.
* Another comic had the "heroes", while in a volcano, encounter a "Fire Dragon (possibly a guardian) of Doom (probably ours)".
* Another comic has an eagle successfully nab Pixie while Brutus is napping.
* Another comic has Dilbert and Dogbert fleeing in terror of villagers armed with pitchforks and scythes; as they escape, one villager says "Did anyone remember to tell them about the Harvest Festival?"
* Another comic has the Devil offer a choice to a damned person, between grinding their face-off with a power sander or doing
* Another comic has two demons arguing over a steady drop in temperature and snowfall in Hell, which is revealed to be caused by Frank working up the courage to ask Brandy out.
* Another comic involved an old woman calling her neighbor on the telephone. "Hello, Mabel? It's Ethel, from up the street...fine, thanks. Say, I wonder if you could go to your front window and describe what's in my front yard." At her window is a humongous eyeball.
* Another comic is a chart of different fruit on an XY graph showing how good they taste (according to the author's subjective opinion at the time), and how difficult they are to eat. The
* another comic, Jon sees Garfield carrying a bucket of water back and forth. Deciding to investigate, he opens the door Garfield has been going through, and experiences this. Garfield then complains about him turning his water collection loose.
* Another comic on the same page shows a Canadian finding his wife with another man. All three immediately start apologizing to each other.
* Another comic parodies the "dumbass fratboy gamer" stereotype by giving two such individuals a game review show. Every level of their grading scale is a normal word appended with "bro", culminating in a perfect score being labeled "Broseidon, God of the Brocean".
* Another comic points out that the observed mortality rate among humans is only 93%, overthrowing most "100% of people who do X die" statistics.
* Another comic revolves around a man who is secretly given a serum based on dinosaur DNA by his upstairs neighbor, a
* Another comic series produced in Belgium for the West German market was
* Another comic showed the White Spy tricking the Black Spy into launching a missile at him. The missile then broke apart and fired a rocket right back at the launcher.
* another comic, Supergirl uses herself as a shield to cover Batgirl from gunfire.

* Another comic taking place at Christmas involved a bitter old business owner buying pine trees to make toothpicks with. Said businessman's name
* Another comic was based on Scrooge being forced to pay Donald "a thousand thanks". Initially Donald wanted it as money, but when it was brought to court, it was ultimately ruled that Scrooge had to thank Donald a thousand times.
* another commercial, a little girl brings Puffs tissues to her class, and all the other children's noses fly of their faces and go to hers.
* Another commercial featured a boy and his girlfriend sitting on the couch across from his parents. They talk casually until one of them takes out a stick of "Big Red" The boy and his girlfriend proceed to start making out. We cut to a short explanation about the product and how good it is. The final scene of the commercial features the same kids making out but this time
* another commercial for Best day that is similar only with a boy instead of a mother.
* Another commercial for Guinness uses the same premise; two parents tell their adult son he's their least favorite child, to the point that he's not only under his siblings but also the dog and their fine china. But they buy him a case of Guinness to make up for it.
* * Another commercial from the late 70s has a gentleman recruited to tell what he thinks of the product, which he does in forced niceties, only to be cut off short. He then tells what he really thinks—"It works, but it tastes crummy!!"
* Another commercial had an overweight guy waiting for an elevator. Someone comes up to him and says something to the effect of
* Another commercial has a kid in the bathroom, but he can't unbuckle a complicated belt until it's too late.
* Another commercial has Red M&M singing about doing anything for love-but then it turns out there are a lot of things he won't do...
* Another commercial has the brown M&M clearing up a misunderstanding by explaining to some humans at a party that her shell is brown, so it only looks like she's naked. The red M&M sees her, think's it's "that kind of party" and tears off his own shell.
* Another commercial has the Rabbit win a box of it in a figure skating contest. Sure enough, the kids come by and take his Trix AND the trophy he won (even though he entered the contest and competed fair and square).
* Another commercial in the series showed a woman swimming underwater in a giant fish tank in a restaurant had the disclaimer "Do not try this at home. Unless you are a mermaid."
* Another commercial, similar to the Trix commercial mentioned above, has Barney steal the cereal from Fred's dreams.
* Another common artifical sweetener, Saccharin (brand name Sweet'n Low), was once linked to bladder cancer in the 1970s, and in the United States was forced to carry a warning label. Revisits of the studies that led to that conclusion resulted in the warning being rescinded in 2001.
* Another common complaint is that Shepard only can survive in the Red Ending if you do everything
* Another common example is that a crucial piece of evidence being acquired illegally. Generally-speaking, rules against illegally-acquiring evidence are meant to prevent the police from conducting illegal search and seizure, and there are many exceptions to these rules. For example, in the United States, evidence acquired by a private citizen and turned over to the police — even if acquired in the process of breaking the law — is admissible (
* Another common false cognate is "exit," or "salida" in Spanish. Somebody saying "Estoy buscando el éxito" is looking for "success."
* Another common fan wank on the Jusenkyō Curses is adding the secondary effect of actively attempting to induce the transformation rather than simply making it possible. This is typically done by making the victim a
* Another common historical tactic was to dictate a treaty, in the words of Steven Decatur, "
* Another common joke in the camera department is to send someone for a "box of T-

stops". The T-stop is the rating of
* Another commonly-mentioned claim was that the Juicero could press with up to four tons of force. This is because the Juicero had a pretty massive design flaw: the press it uses is very wide, and it distributes the force evenly across that press. If it pressed down over a smaller area, it would need only a fraction of the force to get similar results—hence why people found they could press juice out with their fingers. Essentially, they were advertising the fact that their device was so inefficient that they needed highly expensive custom-machined parts just to squeeze out a cup of juice.
* Another common misunderstanding in English arises when a yes/no question is asked using the negative form (e.g. "You don't want cake?"). Answering yes can either be taken to mean "I want cake"
* Another common one was the old "Is your appliance running? Better go catch it!" as well.
* Another common punchline gives her a reason to sleep with the writer...because she'd heard that
* Another common rumor around the time of the game's release, likely due to their on-screen chemistry, was that
* Another common rumor that there are aliens, UFOs, and other extraterrestials in the game, which are partly true, sort of. Two of the Truth's missions have some interesting content that may or may not be caused by aliens
* another common soundchip in unlicensed toys. Some toys feature a variant with altered lyrics about dancing at night.
* Another common source of mercenaries during 17th and 18th centuries was Ireland. Most European Catholic nations during this period had a few units of Irishmen in their armies. This was actually encouraged by the British as every young Irish male with military skills remaining in Ireland was a potential rebel! Descendants of these Irish mercenaries would become heads of states in France (Patrice de MacMahon) and Chile (Bernardo O'Higgins) even before there was an independent Ireland.
* Another common strategy is to keep a weaker player around as your sidekick; he's easy to win against in the finals. Later seasons seem to take this to a larger scale, in that there seems to be an unspoken agreement not to vote out the
* Another common tactic is to try and quantify things that aren't quantifiable. For example, a shocking amount of graphs use "gun control" as an axis point. Gun regulations are laws and it's impossible to turn into numbers. Which is why the results of these graphs change so much depending on who makes them. Even trying to compare on countries regulations as "more strict" than another is a bit difficult given the idiosyncrasies of law.
* Another common use is to have everything neatly wrapped up after the main game, and throw that in to doubt upon getting
* Another common variant, as seen at the top of the page, involves using a cynosural field to allow friendly capital ships to jump directly from another system to your location. A Titan can even send subcapitals.
* Another common view is that the franchise became a directionless mire of unresolved storylines, inconsistent characterization,
* Another company similar to Epik that accepts sites like 8kun on a free basis is
* Another competitor tried to make a "Breakfast milkshake" out of ice cream, maple syrup, and donuts. The result is compared to drinking pure sugar though he is praised for his creativity.
* Another concern for their friendship, that many elves remark upon, is the fact that
* Another consequence of the ability to turn in place is the carousel maneuver, which requires some very carefully timed thrusts but essentially allows you to almost orbit the enemy ship, facing them the whole while.
* Another consonant that frequently causes problem with East Asian languages is F, which often winds up being rendered as "H" or "P". Interesting too is that F/P divergence also took place in the evolution of European languages
* Another contender is the description of the Nutri-Matic Drinks Synthesizer's

output as "almost, but not quite, entirely unlike tea". This might be one of the few rare cases where the dissimile is understandable, since Arthur had asked for tea.
* Another contest was held for the 100k subscriber milestone. This time, fans submitted their concepts and ideas for avatar profile pictures, with multiple winners.
* Another controversial marketing choice, likely connected to the above-mentioned
* Another corollary that the toylines seem to imply is that any given character from any given universe/continuity has a counterpart out there in the others. This is exemplified by respective
* Another Country has apparently seduced anyone and everyone at that college, and probably their brothers too.
* Another Country when Rupert Everett's Russian spy character uses the quote in a conversation with a young female reporter. She does not recognize the lines, highlighting the differences in age and education between the two. Also, the trope is inverted or at least used with some irony because "band of brothers" here refers to members of the Guy Burgess traitor ring, a.k.a. the Cambridge Five.
* Another Country, which was made into a film of the same name, a boy at secondary school is deeply in love with a boy about a year younger and nobly protective of him.
* another couple") made the news. Even more similar to the real Bonnie and Clyde, they were both killed in a shoot-out during their last robbery: he was shot by the police, she committed suicide.
* Another couple of episodes feature Wicked Witches. One that features
* Another couple stories center on Umpty, candy that tastes so good it causes cravings. Overlaps as
* Another Cracked article referring to a supposedly haunted bridge where dogs commit suicide, gives us this gem:
* Another creative one is in the Enies Lobby Arc as Luffy begins his siege on the World Government fortress. He knocks a few guards away before punching at the scene which segues into the "To Be Continued" screen.
* Another creature from the same film, this one a female shapeshifter, is a subversion of sorts, as she finds herself unwilling to go through with her mission of killing the main character and gets quite a sympathetic speech before the
* Another creature starts out with four legs when young, but the hind legs atrophy as it matures and its hind
* Another credit card commercial had an Australian tourist approaching a French policeman to ask directions to the Eiffel Tower. He's placed under arrest after saying, "I wish to
* Another cricket example happened at the Adelaide Test between Australia and the West Indies in 1993. For the preceding 16 years, the West Indies were the top cricketers in the world - never losing a Test series for all of the 1980's to
* Another criminal duo got a bunch of Judge uniforms to carry out a robbery as well, but
* Another crossover to adults: Twix used to have "Two For Me, None For You." Basically, the message is: "Hey, just because we were stupid enough to put two units one one pack, that doesn't mean you should share it. Quite the contrary!"
* Another Crouch Jr. related plot hole is that there is no mention of him getting the Dementor's kiss. The movie states he will be sent to Azkaban. In later movies, Voldemort frees all the Death Eaters, but Crouch Jr. never appears alongside them despite playing a major part in Voldemort's return. He likely should be
* Another curious example, Church's second robot body is seen only speaking French, yet Church speaks English in his normal voice when inhabiting it, inverting the Lopez example.
* Another curious example occurs in the song "The Street Where You Live", when Freddy sings the line, "People stop and stare, they don't bother me / For there's nowhere else on earth that I would rather be". The rhyme would completely fail in American English, where "rather" rhymes with "gather". Fortunately, Freddy is singing the Queen's English, in which "rather" rhymes with "father". They rhyme

* Another customer variant is to refuse to listen to information that will actually save them money, and insist on paying a higher price because everything an employee says is
* Another cutaway in the episode "Hefty Shades of Gray" shows what it was like for Chris to get off sugar; when Peter asked him for the syrup at breakfast, Chris violently ripped off his head in response. Meg laughs at Peter in this state, and in retaliation, he commands his body to throw mashed potatoes at her. At the end of the episode, Lois also rips Peter's head off when he tells her that the Griffins are joining the Trump administration.
* Another cutaway shows what the family would be like if they were stereotypical high-class gentlemen. Halfway through the scene, Peter spontaneously combusts and calmly says "Oh dear." then describes it in an incredibly casual manner.
* Another cutaway spoofed this with a group of Jewish men "flying away from danger" in the midst of a confrontation between a Black woman and an Italian-American man
* Another cut-less example when Ziva worries about Tony feeling down after
* Another Dark Brotherhood assassination gives you the option to push a statue onto a target. However, the
* Another dark example was in the murder of Tina Isa, a Muslim girl who rejected her family’s culture. As her father was killing her for dishonoring they family she begged her mother for help. Her mother instead joined in and killed her.
* Another Dark Hunter, Conjurer, can steal his opponent's powers with his Rhotuka spinner. He's in a coma after trying to use it on a Makuta (members of the species have
* another daughter of Asclepius, is the goddess of recuperation from illness. She's not invoked in the Oath;
* another daughter of Asclepius, is the goddess of the healing process. She's not invoked in the Oath;
* Another Day Another Nightmare. Every time she reached a plot hole, or suffered from writers' block, she killed someone off. In increasingly imaginative ways, including a flock of exploding pink parakeets. We really wish we were kidding. Apparently, the (as yet unpublished) sequel(s) contains more of the same, to the extent that the author has stated she can't write another in the series because everyone with unresolved plot has already been killed off...
* Another Day in Misterland chapter "A Party for Little Miss Fun", a picture of a penguin in a wedding dress sends Miss Giggles into a fit of hysterical laughter.
* Another DC story states Krypton used to be tidally locked, with early civilisations from both light and dark sides warring over scarce resources from the habitable twilight zone. Eventually both decided to have one last battle with elected champions to determine who would have sole rights to the land. At one point both warriors became disarmed, their weapons of unique metals in contact with each other. They interacted to generate a force that rotated the boulder they rested upon. Duly inspired they reported this phenomenon back to their people, who then mined as much of if not all their respective metals as possible and dumped them together into a chasm. This had the desired effect of causing Krypton to rotate, shifting the ecosystem to something more hospitable for everyone.
* Another death scene shows Fritz cutting off Lance's scalp with his sword or razor blade, making it fall off and exposing his brain.
* Another deconstruction shows up in "Why So Blue"; Lapis tries to talk two other Lapis Lazulis into stopping their attack on another world. In the end, they double-team her, and it looks like she might be in trouble... until she loses her temper. One TOTAL
* Another defector, Viktor Suvorov, wrote in his semi-autobiographical book how during the invasion of Czechoslovakia, his unit came across an alcohol plant. Next day, all the soldiers were a bit drunk. The commanders conducted a search, and everything that could hold water turned out, naturally, to be full of alcohol. They poured it all out, yet soldiers kept turning up drunk. No one could figure out where the alcohol was... until Suvorov bribed one soldier to reaveal that
* Another deleted scene has the 1955 Doc finding a handheld hair dryer in the 1985

Doc's suitcase, explaining where the "Ray Gun" used by "Darth Vader" came from.
* Another deleted scene shows Anakin fighting a young Greedo which explains why Qui-Gon was treating his wounds in the next scene.
* Another deleted song, "Making Good", is referenced by Madame Morrible in the intro of "The Wizard and I", the song that replaced it.
* Another Demona example: in the episode "Vows", Demona and Goliath travel back in time, and past-Demona
* Another describes how victims of rape and torture will retreat into a catatonic state from which they cannot WAKE UP. In their minds, they live in a fantasy world just like the real one, except they're safe, until they find notes in the imaginary world, telling them to
* Another describes in depth the process of making a steak appear appetizing. The final touch is apparently to soak a tampon in water, microwave it, and then put it under the steak to create those lovely wafts of steam.
* Another development across word sports was the "Silver Goal" (although other sports use different terminology). It is a variation of Golden Goal where the instant win condition of scoring any point in extra time is removed to allow the opposition team a certain amount of time or plays to equal or better the opposition. In Association Football this Silver Goal period was one half of extra time. When used in American Football, the team who have been scored on get one drive to match or better their opposition result, which can lead to a team scoring a field goal, then losing because their opposition scored a touchdown.
* Another device that was trying to get funded at the time of the Juicero disaster, was "
* Another Dilbert strip had a co-worker asking him what excuse he was planning to use to get out of jury duty. When he says that he intends to serve, the co-worker says, "Insanity. That's a good one."
* Another Dimension — Technically directions, such as left/right, up/down, and forward/backward. Some people say past/future, or time, is another one. Some also say the direction perpendicular to past/future is to different universes, hence over time "dimension" has become synonymous with "universe".
* Another DimensionAnother universe, which is what subspace and hyperspace often end up being.
* Another Dimension blasts as a result. Because a portal only as small as a finger is enough to wreck buildings, she almost never can use her full power; in fact, her already high level actually understates her true strength.
* Another Dimension called Fluidic Space, which seems to be some sort of organic area in of itself, which the Borg attempted to conquer. They found it backfired on them because Species 8472 is impervious to their nanotechnology, which meant the Borg had no way to either assimilate or analyze their biology on their own.
* another dimension, especially when the victim is of unknown nationality? (Prometheus' secret ID has never been cracked.) Even if jurisdiction is being asserted on the grounds of 'well, Oliver Queen is a US citizen and nobody else has any jurisdiction over this entire mess as it happened in territory claimed by no sovereign nation', that should still have landed him in US District Court.
* Another Dimension from where ghosts originate. Winston describes it as a place full of spirits, demons and souls of people that couldn’t reach other realms. The look of it varies from episode to episode (justified as it’s said by Ray that it is the size of our universe), but it’s mostly shown as a huge wasteland with floating boulders and mist.
* Another Dimension: Hindu cosmology contains several universes and planets.
* Another Dimension of the caster's choosing. Even if the destination Plane isn't immediately lethal, like the Plane of Fire, that still leaves the target to find their own way back.
* Another Dimension, since it was closer to the life they were used to and they now had some friends there.
* Another Dimension who exchange forms of energy like humans would precious minerals. They're name is commonly evoked by magic users like Doctor Strange, as a mutually beneficial exchange of energies.

* Another Disney comic has Donald Duck trying something similar. Scrooge tells him that he bought all properties in Duckburg and thus now owns most of the city. Before he can finish his story Donald gets an idea and runs away. Donald then buys old money from collectors, is sent into past by Gyro and buys all properties before Scrooge does so. He then returns back to the future, but instead of him being the owner of town, Scrooge still rules. Donald goes back to his uncle and asks him to tell the whole story. Scrooge says that someone had bought all properties, but then disappeared.
* Another Disney Comics comic had occasional character, Dimwitty Duck, while standing in front of the Magic Mirror from the Snow White story, ask who's smarter than he is. The mirror replies with "Would you like them in alphabetical order?" then proceeds to list everyone who is smarter than Dimwitty non-stop for two entire days, including throughout a wild storm and while being shipwrecked on an island.
* Another DnD monster with this kind of ability: the cadaver golem, which can take bits and pieces of people to absorb their skills. It's a
* Another documentary-to-series came about when the History Channel aired a documentary called
* Another "dog chasing Garfield" strip ends with the reveal that they were actually both trying to chase an ice-cream truck, not chasing each other.
* another dog to kick. In the book, while not the sharpest knife in the drawer, she knows enough magic and is smart enough to play subtle tricks on the witch.
* Another doll by Playmates, Amazing Amanda, asked for her potty at random times. The feature was notable for being one of the only ones available if the doll didn't recognize you as her "mommy". However, some of these dolls don't recognize their potty and only had accidents.
* Another Domino's commercial joked about trying to cut down on delivery time by cooking the pizza in the delivery vehicle, with a comical demonstration of how difficult that could be to actually do.
* another Donald story result (Daisy leads an empty life married to Gladstone; Gladstone thinks that Daisy is way too controlling; Scrooge is contemplating putting Huey, Dewey, and Louie in juvenile hall, etc.). And before you ask, no, this was not a fanfiction.
* Another downplayed example from the same creators as the above is Ruby, (almost) titular character from
* Another Dr Pepper jingle: "I'm a Pepper, he's a Pepper, she's a Pepper, we're a Pepper, wouldn't you like to be a Pepper, too?" This was famous enough to be parodied by
* Another dub of the same scene turns "Dickless" into "Wally Wick." Unusual to say the least. "It's true," cuts off there without a punchline.
* Another Dutch nursery rhyme called "Little lawyer went out" sings of the death of said lawyer, all in a happy tune. The lyrics translate to something like:
* Another DVD extra is an in-universe news broadcast about the opening stages of the
* another dynamic entry by sending a shipment through the new hole in their roof.
* Another earlier example in "The Last Roundup": When Applejack started working at a cherry farm and won't tell the others why she won't return, they decide to send Pinkie Pie in to ramble on and on about random topics until Applejack finally caves in.
* Another earlier villain chuckles to himself in a completely normal manner. Since he is laughing about the hero's imminent doom, it still feels very evil.
* Another early episode, "Coming of Age," finds Wesley testing for admittance to Starfleet Academy. He encounters a "pop quiz" where he encounters a Zaldan. But he knows enough to answer the Zaldan's accusations with hostility, which actually calms him down. This is because Zaldans believe in laying one's emotions bare; they view courtesy as a facade and consider it insulting.
* Another early example is Lake View Store in Morgan Park, Minnesota, which had the overall idea of "stores on an enclosed walkway" in 1915. But the first mall that really resembled a modern one, in terms of having an enclosed walkway ending in an anchor store, was Valley Fair in Appleton, Wisconsin in 1955. Many early

suburban shopping centers also claim to be the "first mall" (such as Northland Center in the Detroit suburb of Southfield, or Bellevue Square in Bellevue, Washington), but they were open-air and did not become enclosed until later. The first suburban mega-mall that
* Another early example was the Sinclair ZX80, which in addition to an (allegedly) barely usable keyboard had the design flaw of not being able to display anything whilst a key was being pressed (making it unsuitable for anything like games,
* Another early film fighter ace is von Rauffenstein (played by Erich von Stroheim) in
* Another early innovator was Wild Bull Curry, who won the Texas Brass Knuckles Title belt 20 times during his career. The belt was eventually changed to a straight hardcore title.
* Another early Kanto arc example is in "The Punchy Pokemon", where Anthony convinces Brock to throw in the towel when it's clear Geodude vs. Hitmonlee is a mismatch. Anthony himself does the same when his daughter Rebecca nearly gets herself seriously injured protecting his defenseless Hitmonchan.
* Another early Killer App for PBS was coverage of the Watergate hearings, which created enough demand for in-depth news programming that PBS created
* Another early story (1960s) features a school presidential election race between Archie and Reggie. Archie and Betty are handing out balloons when Mr. Weatherbee confiscates them all because he feels Archie is getting carried away with campaigning and ends up getting carried away himself, until Jughead pops them with a slingshot and drops the principal into a conveniently just-finished cement sidewalk.
* another early strip, Jon wakes up to see Garfield grinning widely at him. "Oh, great," he says to himself. "Garfield ate my toothpaste again..."
* Another early strip shows Jon on vacation in the South Pacific. He tries to sweet-talk a Polynesian-looking woman in a sarong by calling her "my little
* Another Earth simply walked into a local prison claiming to be a yoga instructor, and then walked out again before anyone had time to realize that she wasn't, while the director filmed it all from outside.
* Another easy-to-miss example is the apple-peeling machine on Badger's desk in the pilot. At first glance, it's just a weird instrument, but in the light of this trope and Badger's character,
* Another Eden; the "Beyond Time and Space" part is because the game involves time travel, and there does turn out to be a cat involved but that's another spoiler.
* Another element common in adaptations that isn't in the original is the
* Another element of "feralization" in ghouls is socialization or general willpower/mental fortitude. Those that don't immediately go crazy may still decline over time if they're weak-willed or hide away in isolation and slowly go crazy.
* another emerged from the pollution of the Thames in precisely this manner in 1961 (according to "Cold Snap", immediately after Zenf's death).
* Another Encyclopedia Brown story has someone getting shot in the foot by a BB gun. One of Bugs' friends shows up, and Encyclopedia tells him to run to the kid's house and get his shoe. The kid grabs the correct shoe, and Encyclopedia points out that unless he was the one who shot him, he couldn't have known which shoe to get.
* Another ending has the same character feign shock at the number of people rallied to defeat them, then subduing them all with ease.
* Another ending has your character accidentally breaking the resident witch's china cat and being cursed to pick up the pieces for all eternity, complete with
* Another End Of The Empire Mogrash who is told the following prophecy:
* Another Energizer advert features the same gag. Only this time the parents are desperately trying to change the channel because the nature documentary on screen is graphically describing the mating habits of rhinos in front of their two kids.
* Another energy sword shows up on Chorus later in the series, which is bound to Doyle,
* Another entry for the toys is the dreaded "Inika build", named after the Toa Inika sets from 2006. Almost all Toa and various other canister sets released between '06 and '09 followed the same general body-plan, using mostly the same LEGO

pieces, while earlier series tended to variate the builds every year or so.
* Another ep had Shelby try to identify a suspect in a smuggling case by the sound of his whistling a particular tune. She told
* Another episode about the murder of an Eastern European mail-order bride implied that while most matches and marriages were good, some women often stayed in bad relationships, knowing that divorce meant that they would be sent back to poverty-stricken conditions in their native country.
* Another episode addresses it more directly and then plays with it, without even using vampires. Buffy—working at a fast food place called "Double Meat Palace"—notices that the managers are extremely secretive about the meat making process, and that some of the more troublesome employees disappear without question or concern. She comes to the conclusion that the meat is actually human, but when she investigates it she finds out
* another episode, a drug dealer gives him a whiff of some new exotic drug, that causes Barry's molecules to vibrate to such an extent that he passes through a brick wall (Although as noted above, this was a standard trick of Barry's in the comics).
* Another episode, aired not even one year after Josef Fritzl was arrested, had Sam and Dean come across the incestuous descendants of a man that imprisoned his daughter in the cellar and raped her. Dean even comments that "this sounds like something out of the Austrian newspapers".
* Another episode, appropriately titled "Drive-Thru", has Mr. Krabs turn a large hole in the Krusty Krab's wall into an extremely cheap drive-thru window. This leads to several issues: SpongeBob struggles to fit the food through the window and spills it on a customer, Pearl uses a megaphone to shout her order as a prank, and the ridiculous length of the drive-thru causes lengthy traffic and overwhelms SpongeBob and Squidward.
* Another episode, "A Stop at Willoughby", features an advertising executive who is stressed out by his life and dreams about getting off a train at a quaint town from the 1890s that he keeps seeing in hallucinations.
* Another episode ("Baby Talk") featured the ashes of the late Herb being kept by Harry. Problem was that Art mistook the label for herbal tea and used it to test the coffeemaker, leading to the hilarious line, "Art, this wasn't herb tea! This was
* Another episode, "Bad Little Boy", shines focus on some more gender-swapped characters.
* another episode, Bart pulls this prank on Homer during dinner. Homer doesn't want to give Bart the satisfaction, and tries to finish his meal with all the salt included.
* Another episode, based on the Natalee Holloway case, pairs this with
* Another episode begins and ends with them hiding in a building on the course, apparently there are regular paintball games pitting different university teams against each other. This time it includes an
* Another episode begins with Matthew jumping out of the fridge to scare Mr. James, who goes into a fit of laughter, clutching his chest. Cue ambulance.
* Another episode begins with our heroes eagerly speeding across London to investigate a case involving an unconscious woman in a bikini.
* Another episode, "Best Friends Forever" has a demon manipulate a Republican speaker into supporting the extended life support of Kenny, even though he was stuck in a vegetative state, so every time he spoke the Republican would repeat what he just said. However, his tendency to speak in snarls had the Republican repeat that too, then he complained about how he wasn't supposed to say that, only for the Republican to repeat that he wasn't supposed to repeat that.
* Another episode, "Big Wanda", has Timmy and Cosmo overhearing some fairies talking about "taking Wanda out", and that they were going to use a butcher and it was going to be expensive. At the end, it's revealed that the fairies were just taking Wanda out to dinner at the butcher's restaurant, where the food is expensive.
* Another episode called "Monster Movie" is filmed to resemble any of several old

horror movies. The end card is "The End...", with a question mark appearing after a moment.
* Another episode called "The Tale Of The Mystical Mirror" features another
* Another episode centered around Major Weems and his visit to the camp to visit his wounded men. He always visited his engineers after getting clobbered in combat and tried to work deals with doctors to get them sent home.
* Another episode centered around Quark trying to get Major Kira's holoimage so he could make an explicitly pornographic holosuite program of her for a shady client. Kira gets one over on him so the resulting program has Kira's body and
* Another episode centers on David being creeped out that he had an erotic dream about
* Another episode, "Citizen Joe", features a barber receiving psychic flashes of Jack O'Neill's missions and writing them as short stories. He submits them to literary magazines, all of which turn the stories down. However, one can easily tell which episode he is referring to, because his titles, like "Holiday" and "Hathor" are the same as the titles of the episodes all those seasons back. At the end of the episode, the cast realizes that O'Neill has spent the past few years having psychic flashes of being a barber. When asked why he never told them, he answers, "It was relaxing."
* Another episode concerned a Klingon plot to place mines around the Bajoran system. Near the end of the episode the minefield is detonated, and they are shown to have been placed in a shallow ring around the system. Neither the Klingons nor the DS9 crew seem to realize that it would've been easy enough just to fly over or under the mines.
* Another episode covered an event held in support of House Majority Leader Tom DeLay when he was being investigated for money laundering and other ethics violations (he was later convicted). They played clips of people making speeches about the media trying to dig up dirt on an innocent man, including a woman who
* Another episode, "Dark Harvest", plays this trope straight. Zim, in pursuit of human organs to improve his human disguise, replaces a secretary's brain with a can of soda. Nothing happens immediately, but when the phone rings, she holds it up to her face and foams out the mouth.
* Another episode deals with a victim possibly killed in this manner, but the team have to figure out how many gunmen and who the victim was. It might have been JFK.
* Another episode deals with a woman with erotomania who kills the wife of the man she's obsessed with. That she's otherwise incredibly intelligent, cogent, and calm leads the police to believe she's actually having an affair with the man and that they conspired to kill his wife.
* Another episode dealt with a female fighter pilot (on trial for murdering her lover), and allegations that the Navy was holding her to a lower performance standard to keep her as a recruiting tool.
* Another episode dealt with a white racist who needed a heart transplant, but the donor heart that comes available is from a black teenager. The man dies because
* Another episode dealt with a woman whose son was accused of pushing a heater into her bath, and though the water was cold, there were candles and the tub was full. She, of course, is electrocuted, and while they try to decipher her murder they find out that
* Another episode dealt with part of the crew ending up on the Bellerophon, an ancient generational ship launched by Earth centuries ago to
* Another episode displays some homeless people as zombies in a parody of 2004's
* Another episode does this, after Link tells Navi why he named his horse Zelda:
* another episode, "Dread And Breakfast". They seem to like this trope.
* Another episode ended with all the lead characters hung-over and wearing sunglasses. Manny had also hurt his leg so was walking around with a white cane. When a person comes around collecting money for the blind, she was a bit shocked.
* Another episode ends with Andy deciding not to be a storybook cowboy (since Spike was a better one). The final scene shows Andy as rides by the Teddy Bomber's prison wagon in full samurai regalia. The final line this time is "See you... space samurai".

* Another episode ends with Cleveland and Quagmire tied up in the basement of a building, forced to watch the DirectTV Help Channel on a continuous loop.
* Another episode ends with one; as the crime in question was a subway bombing with multiple victims, the list consists of the jury being asked "on the count of murder in the first degree of ____, how do you find" and answering "guilty" many times.
* Another episode examined it with Malcolm becoming infuriated with his family's and everyone else's comparatively low intelligence and meeting Leonard (
* Another episode explained that the reason Peter can afford to do all the expensive stunts he pulls off in the show is because Fox pays for it ahead of time.
* Another episode explains that Richmond was moved from his executive office to the IT department's server room during the culmination of his transformation from Yuppie to Goth, at which point he showed up at the funeral of Denholm's father wearing a creepy goth outfit (Complete with face paint), and gave Denholm's grieving mother a Cradle of Filth CD.
* Another episode featured a couple with a walking transplant baby who was intended to save his twin sisters with leukemia. When he turned out to have only enough cord blood for one sister, the parents were asked to
* Another episode featured actual professional wrestling and a real wrestler getting angry that they were getting more publicity. He eventually outdoes them when people think he's creating his own narrative.
* Another episode featured a doubting priest who began having visions of Jesus, stigmata, and other "prophetic" style symptoms. Eventually, House proved all the physical signs were merely the symptoms of a disease.
* Another episode featured a father who killed his son's hockey league coach for not giving his son enough time on the ice.
* Another episode featured a former teammate of Stephen winding up in the hospital of an apparent heart attack despite being in great physical health (
* Another episode featured a Jeweler's variation of the trope. When Klinger accidentally throws Margaret's engagement ring in the trash, Hawkeye and BJ help him replace it when they find it was a dime-a-dozen cheap ring sold by local merchants to begin with. The ruse is up when the custom inscription on the ring comes back reading "Over Hill. Over Dale. Our love will ever
* Another episode featured an alien whose language was so out-there (bordering on
* Another episode featured an incredibly sexy babysitter hired for the boys, who turned out to have been an old classmate's of Francis'. Francis calls them from military school, and we see his image of her as an obese, awkward nerd.
* Another episode featured an M.D. making a snide remark about academics being people who couldn't do the "real" doctorate after Brennan said her doctorate was a PhD. Brennan herself, however, is quite proud of her doctorates and never shows envy towards medical doctors.
* Another episode featured a nuclear powered grill that through the magic of radiation was able to bring piles of snot to life (and melt the polar ice caps). Well it was sort of a dream, but it took up the entire episode and given the setting...
* Another episode featured a serial killer taking out homeless people, prostitutes, and other such generally-ignored people. Like the real-life Robert Pickton case, most of the authorities are convinced there's really nothing happening. Alluding to real life criticism of the Pickton investigation, Derek Morgan called out the authorities on their apathy, insinuating that because the victims were vagrants was the main reason why the authorities took so long to take action.
* Another episode featured a Shen Gon Wu called the "Emperor Scorpion", which actually served as some sort of mind-control device.
* Another episode featured a soldier, Corporal "Boots" Miller, who really was nuts. He talked to his shoes and socks and conducted man-on-the-street interviews in the mess tent with a ladle. One night on guard duty, he began shooting at imaginary gliders with his rifle, which disturbed Klinger so much he said, "If they offered me a Section 8 right now, I'd give it to

* Another episode featured a store devoted entirely to last-minute gifts.
* Another episode featured a woman with very well-controlled Schizophrenia who appeared perfectly normal until you brought up texting while driving ("Satan sends messages about who to kill to his minions to their cell phones while they're in the car,
* Another episode featured Bart answering the rhetorical philosophical question, "What's the sound of one hand clapping?" (By hitting his fingers on the palm of that hand.)
* Another episode featured Benson and Stabler going up against the FBI when one of the key participants in their case was revealed to be in the Federal Witness Protection Program as a witness to a key Federal case. Subverted, in that Benson and Stabler's interference in the Federal case merely ended up getting the guy killed and screwing up both the FBI and NYPD investigations.
* Another episode featured Cobra Commander hiding a secret message in a small town's 6:00 news report, by putting one frame of his message into every 20th frame of the news report.
* Another episode featured Dr. Cox deliberately "passing out" and falling backwards after hearing half of the first sentence of a "boring" story:
* Another episode featured Kira and Bashir arguing because the former was carrying Keiko O'Brien's baby, and the procedure to make that happen had been performed by Bashir. Visitor was
* Another episode featured Leela posing as a man to enlist in the military (and keep her friends alive like she always does). However, the only error she made was slapping her CO for a congratulatory butt-pat. Most of the situation's humor came from Zap Brannigan's "feelings that are
* Another episode featured "magician" and professional poser, Criss Angel. When the team suspected him early on, it seemed obvious he wouldn't be the killer. However, by the end of the episode, he had performed almost all of his signature tricks. Oh, and killed two people.
* Another episode featured the digital copy of the mind of a now-dead computer industrialist being brought back on line and trying to do this to the grandson of his original body. In the process he pulls a variation on Batman himself, taking over the cybernetic suit and forcing Terry to beat him on his own, without the aid of the super-suit.
* Another episode featured the puzzle BARBECUE SPIT, with the P not yet revealed. At one point, a contestant guesses "H" ... and then a buzzer sounds. Pat: "Happily, no" (to audience laughter).
* Another episode features a "1992 La Toura", some vague French car, as a running gag (oddly enough, modeled on a 1975 AMC Pacer) which barely works (justifiable in being a thousand years old).
* Another episode features a box of Krusty-O's brand cereal that comes with a free jagged metal O at the bottom. Bart accidentally eats it and wins a court settlement from the company, which he then spends
* Another episode features a character suffering progressive brain damage, and having their brain supplemented with computer implants. Once their organic brain is almost completely destroyed, the doctor just lets the character die because nobody sees any point in keeping them alive, despite the fact that in-universe the character is still a sapient, sentient being with all of his original memories. However, the character in question didn't feel like himself with the implants and wasn't really interested in living a shadow life, believing that if the last part of his cerebrum were artificially replaced (even with his memories intact via the positronic implants) the result would simply be an android copy of him rather than actually
* Another episode features a children's edutainment franchise built around a character called Flotter T. Water, with Naomi Wildman having a holodeck story in the setting. Janeway mentions that she also loved the character as a child, establishing it as a long-running series.
* Another episode features a confrontation between Jack and Christian at Christian's AA meeting; the fight pushes him off the wagon.

* Another episode features a man who received a head injury in a car crash that damaged his visual processing, and he went around killing his co-workers and parents because he believed they'd all been replaced by impostors.
* Another episode features an accidental hair tonic made by the daughter experimenting with paint. It works wonders, but has the nasty
* Another episode features a rather fearsome robot nanny that shouts in a seemingly angry monotone, "Sleep, little dumpling! I have replaced your mother!" Leela says, "Aww!"
* Another episode features a running gag involving a fictional Spanish-speaking singer named Cilantro. One of Cilantro's songs plays during an action sequence and the song consists of
* Another episode features a world where all people or a certain age are considered potential organ donors, whether they want to or not. Each receives a non-removable tracking bracelet that activates when a compatible organ is needed. Then a special police unit arrives to take the "donor" into custody. The doctors behind the program are shown to be corrupt, often using the system to get what they want (i.e. if you don't do what I say, I'll activate your bracelet and take your heart or liver).
* Another episode features Cartman asking Santa Claus to bring Christmas to Iraq and they end up shooting him down and kidnapping him, so it's up to the boys and Jesus to rescue him. The ending features Jesus and Santa blowing away many terrorists with machine guns, but Jesus ends up sacrificing himself so they can escape and to save time Santa turns the terrorists' weapons into toys and candy so they can't shoot them down.
* Another episode features Didi encouraging Lou to eat healthy, which he downright refuses, but when a video depicting the importance of heart healthiness that he is suggested to watch gets accidentally played in front of him, it convinces him well enough to change his eating habits, which starts out with Lou deciding to chow down on a dish of soybean casserole that Didi cooked for him. Considering how old Lou is, it must have been pretty serious.
* Another episode features Elliot herself trying to get around this trope while chatting up an attractive patient.
* Another episode features Fry winning the Robot Devil's hands. When the Robot Devil stalls for time, Fry impatiently says, "Stop being such a baby and cut off my hands."
* Another episode features Gill staying with the family after losing his job on Christmas. He stays for months and defiles the house to the point where Marge can't take it anymore and decides to stand up to him. By that time, Gill had gotten a new job, so Marge
* Another episode features Jerry dating a doctor who constantly talks about how rewarding saving lives is. When he finds out she's a dermatologist, a field he regards as utterly worthless, he is outraged. Next time they are out on a date, he angrily chews her out for daring to call herself a lifesaver... only to be interrupted by a man who thanks her profusely for saving his life. He had skin cancer.
* Another episode features Porridge, who looks exactly like Chowder except that he wears glasses and his fur is in a different shade of purple.
* Another episode features Stewie actually playing Pictionary with a family who had moved into the Griffins' house. The husband of the family keeps shouting, "It's a jackal! Jackal! It looks like a jackal! Jackal!", much to Stewie's irritation once time runs out.
* Another episode features the judge berating the jury for their decision to award a ridiculous amount of money to the plaintiff in a dubious fraud lawsuit, before exercising his power to reduce the amount. The attorney and clients accept that without much protest (they were pretty stunned when the verdict was announced), though the client does ruefully admit that when he first heard the jury's original verdict he immediately started imagining his brand new boat.
* Another episode features the Power Plant in danger of meltdown and Homer tries to work out which button he must press before it happens. He presses a button

and...cut to black!
* Another episode features Zack lying to Maya about how he'll attend her poetry reading even though he intends to be at a video game night with Cody, Woody, and Moseby. His efforts to be in both places at once predictably fail, but Maya takes it pretty well, all things considered.
* Another episode finds the Crane brothers attempting to replace Martin's ratty old recliner with an expensive leather massage chair. Once they turn the massager on, Martin's response is, "That's disgusting!"
* Another episode finds the Ricardos and Mertzes running a diner together. When an argument erupts over which couple should greet guests and which should work in the kitchen, a dividing line of this sort is placed in the middle of the establishment (and across the middle counter stool). It gets more interesting when their sole customer decides to sit on that middle stool, and both couples outdo themselves trying to serve him.
* Another episode focused on a guy who kidnapped multiple women. He treated each one of them to a romantic evening that would go well until she rejected him when they got to the bathtub part. Then things got ugly...
* Another episode focuses on Eugene finding out that his favorite superhero, "The Abdicator," is just an actor (with a stuntman doing the major heroics) and goes on a
* Another episode focuses on Robbie and Spike happening upon a plant in the forest which they eat, and become high. Robbie brings it back home and soon Earl and Charlene get high on it, and Earl brings it to work where everyone
* Another episode from season 13, "Bad News Bill" when Hank realizes that a little league coach's encouragement techniques were giving Bobby false hope and ultimately humiliating him.
* Another episode from the Advanced season, however, had him fall in love with a girl...who was actually Ash cross-dressing as her as part of a ploy. Ironically, the previous time Ash had been forced to cross-dress, Brock wasn't attracted to "her".
* Another episode gives us "The one you call Milhouse is gone.... He went to his grandma's place while we're spraying for potato bugs."
* Another episode, "Guess Who's Knott Coming to Dinner", has detective Homer Pipsqueak (
* Another episode had 21 sneaking in at night to capture Hank and Dean while they were sleeping, only to discover that Dean had one of these when he pulled off his blanket.
* Another episode had a Buckwheat impersonator, portrayed by Murphy (who had spoofed the character to massive critical acclaim until
* Another episode had a cashier who didn't react at all to SpongeBob running and crying in and out of the store as he kept coming back for more nightlights.
* Another episode had a comedian who died just after a performance in a nightclub.
* Another episode had a copycat serial killer taunt the squad with puzzles just as the original killer had.
* Another episode had a couple PIs who carried NYPD badges to scare people off. After they had been found out they tried to pull the "undercover" bit on
* Another episode had a cutaway about Brian on one of these. Turns out it was a disappointment on both sides. Brian was disappointed that his date was a rather dull-looking middle aged woman (she claimed the photo was old), and she was disappointed
* Another episode had a cutaway to a man in Hiroshima having a very bad day on August 6th, 1945. He stops in his tracks when he sees something falling from the sky and heading straight toward him....a monkey that lands on top of him and mauls him.
* Another episode had a demon inhabiting a cavern underneath an oil refinery. Any vehicles that had gas from the refinery put in them became possessed, and changed into monsters.
* Another episode had a dentist who sedated and raped his patients including his own niece.

* Another episode had a dying Italian winery owner who invited his daughter's latest boyfriend, who he knew to be a Mob hitman, to the house in hopes the hitman would kill him and his death would make the family work together. Unfortunately, the plan went wrong and the vintner killed the assassin.
* Another episode had a follow-up to the earlier "Mini Mimi" gag where the woman she hired for the prank reveals that she kept the look afterward because it gave her Mimi's
* Another episode had a gag involving a rectal thermometer someone put in their mouth.
* Another episode had a gangster with a Kryptonite-powered printing press. The advantages to it being Kryptonite-powered were never explained; again, it seemed to be there purely so Clark couldn't beat the guy up until the plot wanted him to.
* Another episode had Ai's bodyguard having a team search a lake for a kappa, but instead found "600 catfish, 1400 minnows, a Loch Ness Monster, Penny's sister Caitlin, and 500,000 copies of Eddie Murphy's "Party All the Time".
* Another episode had Aku travelling to an alien planet and enlisting some of its inhabitants, a
* Another episode had a legendary supervillain group come out of retirement, and the girls convincing the heroes who opposed them to do likewise and save the day. The problem being that they're just a bunch of geriatric old men (which is why they got involved in the first place; Blossom refused to attack the elderly villains), and the hero and ex-sidekick spend most of the time arguing with each other. The whole affair ends with all the old characters in the hospital, and everyone glaring at Blossom for her part.
* Another episode had all four Turtles attending a Channel 6 costume party as themselves and giving out pseudonyms. Some people compliment them on their lifelike costumes — except Vernon,
* Another episode had a man and wife try to fake his death in order to collect the life insurance, but she turned on him and tried to kill him off for real.
* Another episode had a man try to pass off his mistress' death as a kidnapping gone wrong.
* Another episode had a moment where Bender exploded; after he put himself back together, he walked in with a triumphant "Good news, everyone!" The Professor was thrown for a loop.
* Another episode had a Navy programmer die, and while searching for the boyfriend as a suspect, he's found in exactly this situation.
* Another episode had a near miss as Ranko the head of a rival cosplay club and the defending champion cornered Reika in a storage room and began to molest her.
* Another episode had an elderly father and former serial killer come out of retirement over 20 years later. His son assisted him by bringing home women for him to brutally torture and murder. Later in the episode, it's revealed that the first victim he helped his father kill was his mother, though he never realized it until this episode. Another episode has a young boy pretend to be lost in order to lure women into his home as victims for his father.
* Another episode had an interesting twist. Daniel, who is out of phase (read: invisible), is talking to his grandfather, Nick. Nick starts talking back, thinking that Daniel is a hallucination. Daniel continues replying, thinking that his grandpa is just thinking out loud. Eventually, it turns out that Nick can see Daniel. Yes, they managed to have a conversation
* Another episode had an old woman crash her car in an attempt to have her son get the insurance money as well as get payback on the HMO that denied her money to have her cancer treated (she had tried to crash the car into her offices but she punched in the wrong address on her GPS and crashed into a restaurant instead).
* Another episode had a one-off joke where Pud'n crashes into the school janitor and they fly through a window, showing that the school is now suddenly on top of an extremely high cliff, and it zooms out a few times to show just how far they're falling, until the characters are just specks in the distance. Further, when they started falling, it was daytime, but as they fall, the sun sets, and by the time they hit the ground, it's night.

* Another episode had a pair of alien naturalists abduct Courage's human owners so they could use them to create antibodies to help neutralize a disease infecting their race that causes their multiple arms to relentlessly beat themselves up.
* Another episode had a race across Liverpool to the Liver Building between James in a new Peugeot and a pair of
* Another episode had a rather cruel example. The characters land in a world run by the Russians and help the Resistance in one of their operations. During the pull out though female protagonist Wade Wells is shot and mortally wounded. The other main characters start to grieve for her till she suddenly appears right behind them alive and well.
* Another episode had a scene in which Consuela, the Hispanic maid, was watching a Spanish infomercial. So naturally, "Cinco cinco cinco, cinco cinco cinco cinco!"
* Another episode had a small robotic mouse walking back and forth repeating "Come out and see me some time". This was a reference to
* Another episode had a spy inserted by Major Hochstetter that averted most of the blunders that other infiltrators in the series usually commit: he knew the correct codephrase, didn't fall for any bluffs, was up to date on minute details of Americana, had an impeccable cover story and had trained himself not to respond to German. The ruse is only exposed when, during a visit by Hochstetter to Stalag 13, Hogan sees one of the Major's SS goons snap to attention as the spy passes by, as they are trained to do for SS officers but would never have done for a POW, regardless of rank.
* Another episode had a teacher admitting to having sex with one of his students but claimed it was consensual while said student accused him of raping her. They never quite tell us if it was a case of Hot For Student or a mutual attraction, and ended it just before the verdict is read. This was intentional to show how ambiguous these cases are when it's only he said/she said (The episode went out of its way to include evidence for both sides and gave both of them moments that made them untrustworthy). They later held an on-line poll to see how people would have ruled if they had been on the jury: Not Guilty was the winner.
* Another episode had a trial in an airport after a member of the National Security Agency was retained there for "inadvertently" leaving the country in possession of a USB with data from his job. In the real life
* Another episode had a variation where the victim didn't know he was about to die (in fact, the attack kills him instantly), but his last words do lend a clue to why he was killed. He's a Lithuanian ambassador who steps into an elevator, says what sounds like "She's gone meatless now.", and gets shot to death along with his bodyguards. Monk looks into his main political rival who has an alibi, but can't make sense of the message either. However, his companion says he was likely speaking a Lithuanian dialect and actually said what translates to
* Another episode had a victim's brother using a flower delivery to get into Casey Novak's office to beat her up (since she was the one who'd convinced his sister to come forward about her sexual assault, he felt
* Another episode had a woman chopping up her victims' organs in a blender and eating them.
* Another episode had a woman who claims to be able to see the dead. It turned out she had ergotism.
* Another episode had Bart rubbing his ear industriously and acting sick so that when Marge took his temperature (through his ear) it would come out to 103 F and he could stay home. She says the only way to be sure was to use the rectal thermometer. It still came out to 103. When Lisa asked, Bart says she doesn't want to know.
* Another episode had Bart shout "Testing" through 10 megaphones. The sound was so loud not only did it cause windows all over Springfield to break but also shattered every bottle of Duff beer Homer had in the fridge.
* Another episode had Batman clear Mad Hatter's maze made of giant cards by climbing up and
* Another episode had Benny bragging about a place he likes to stay called the "Juniper Breeze", even though it sounds like a dive. Eventually it turns out he

only stays there because the initials on the towels and bathrobes match his own.
* Another episode had Brendon filming a cautionary warning about putting marbles in your nose, which led to a rash of kids (and one teacher) putting marbles in their noses — of course, it had a metal song in it with the lyrics "Don't put marbles in your nose/Put them in there/Do not put them in there!"
* Another episode had brief flashes of Det. Fusco protecting a supermodel from Albanian gangsters. His story is unrelated to that of the main characters and we only see glimpses of him doing some extremely heroic things. It demonstrated that while Fusco might be the
* Another episode had Butt-Head ask Beavis to hit him so he could see that hot chick in the nurse's office again. He agreed to hit Beavis too so he could also see her. It didn't go over as well as planned.
* Another episode had Cornelia accidentally take up the others' powers, turning her into a super-Guardian, forcing Will, Irma, Taranee and Hay Lin to figure out how to keep fighting without their powers.
* Another episode had Dexter trying to improve his eyesight by giving himself laser eye surgery. Everything goes
* Another episode had Double D playing background music where the Eds open up a hula school, and he is lassoed into setting the mood by playing traditional hula music on his steel pedal guitar; once Sarah and Jimmy interrupt the lessons, he then switches the mood to sound more like the show's style of music scoring, that is until Eddy shouts at him.
* Another episode had Eliot become a hockey player, trying to protect a punch-drunk enforcer who could die if he gets another concussion. And in yet another episode, he was an underground MMA fighter.
* Another episode had Eric saying this repeatedly in a restaurant while hanging out with a very annoying girl. He can't take anymore, Eric screams, "CHECK! For the love of God, WILL SOMEONE PLEASE BRING ME A CHECK!" The waitress in question, who was only a few feet behind him at the time and taking another order, jumped about a foot in the air.
* Another episode had Father Mulcahy and Winchester visiting black marketeers to try and negotiate for medical supplies.
* Another episode had Fozzie doing the "banana in the ear" gag with Avery Schreiber.
* Another episode had Fred Savage doing so, impersonating Rush Limbaugh, Michael Moore, and other celebrities through the use of full rubber bodysuits, in an attempt to show his career as the world's greatest actor.
* Another episode had George making up a charity called "The Human Fund" to avoid having to give actual Christmas gifts to his coworkers. After his boss gives George a large sum of money to donate to this fund, George contemplates starting it for real and becoming a philanthropist.
* Another episode had Hank acting very off-put around a black man who'd arrived to fix his water heater, and Ladybird, picking up his hostility toward the stranger, attacked him. Everyone assumed Hank was racist, performing church songs in front of his house to "cure his intolerance," and Peggy got him to do some humiliating things to "learn to overcome." Even Hank started to get worried that he was subconsciously a racist. Eventually, when a new, white repairman came, Hank and Ladybird acted the same way. Hank doesn't hate black people. He hates
* Another episode had him forget where he put his nametag. So he repeats his morning routine ad infinitum,
* Another episode had Homer attend bodyguard training, where he was tested for this. Attendants were marked on the effort put into their "
* Another episode had Homer bring Barney to a meeting and then claim that he didn't want to go over and make coffee because taking twelve steps wasn't worth doing. Cue him waking up in the bushes outside having possibly being beaten unconscious.
* Another episode had Homer short on money and needing a second job. An advert for a limousine driver job immediately plays on TV. It's lampshaded when Homer and Lisa realise neither of them switched on the TV (and it isn't even plugged in...), which

is just
* Another episode had Homer sitting in his hammock, singing and blindly throwing items over the fence at Flanders. After he intentionally throws something else at him, it prompts him to say:
* Another episode had Homer trying to tip a bellboy with a Grammy, only for the bellboy to reject it and drop it off a balcony, and it gets thrown back by a guy who calls it garbage.
* Another episode had Ivanova trying to negotiate with the Lumati, an alien
* Another episode had Jack claim he was married. Over the course of the episode, Jack uses Terri, Janet and a CPR dummy (long story) as his "other half".
* Another episode had Jack insist on taking the case of a missing black foster child, telling his foster father that despite the lack of evidence of foul play, his case would grow cold in the hands of the local authorities.
* Another episode had Jim claim to be married while undercover to fend off an advance from a thief. This let to some funny moments when Blair phoned Jim minutes later and Jim dropped affectionate terms like "sugar" and "honey" into the conversation.
* Another episode had Joey needing to be hidden from Ross when he was checking up on Rachel. Monica and Chandler, in the adjacent room, pull him in while Rachel's back is turned. The result is similar to a
* Another episode had John Redcorn, desperately trying to be a part of his son's life, take Joseph on a Native American
* Another episode had Kim successfully bribe a black market dealer with a chocolate bar. Though in this case, it's implied that the chocolate was a serious
* Another episode had Klaus get a new human body (that of a black man) and he flushes his goldfish body down the toilet. Later, his human body is injured so the Smiths buy a new fish looking exactly like Klaus' old body for him to be in.
* Another episode had life-size dolls made from silicone. One was mistaken for a witness because it was "looking" out of a window above the crime scene.
* Another episode had Lisa pretend to be part Native American. When she confesses her fraud during a Native American conference, almost everyone there reveals they were faking their ancestry as well, including one guy who was
* Another episode had Meg join the Baton Squad in school, after being rejected as a cheerleader. The squad contains all unattractive girls...and one perfectly acceptable looking one. Meg asks her why she's in the group, and when she opens her mouth a super-long tongue rolls out.
* Another episode had Michelle Kwan come to present an Athlete of the Year award. Everyone assumed Francine would win, including herself. To their surprise, Jenna won instead. The shock of the announcement took a while to sink in for Francine, who stood up and thanked everyone anyway.
* Another episode had Milhouse's face on the carton before it was pasted over with a picture of Mr. Burns' bear Bobo.
* Another episode had Mr Burns releasing the hounds, where the usual procession of vicious guard dogs is followed by the elderly and obese "Crippler", who has apparently been around since the Sixties.
* Another episode had Mr. Burns taking over all the TV stations and putting on his own stupid shows to blackmail Homer. Every single line had canned laughter after it, even though nobody was telling any jokes.
* Another episode had one where Pumbaa saved a magical whale by throwing it back into the ocean. Telling Timon this, he gets him to go back and forth to make his three wishes, trying to be specific as possible, but all backfiring because Pumbaa didn't say it EXACTLY the way he asked it. The best example would be his final wish, when he wished for a fancy castle and just for kicks, a magical fire-breathing monster (which he expected to be a dragon and not a chicken) he can defeat. Pumbaa instead said "can't", so the episode ends with the duo hiding out from their fire-breathing fowl fiend.
* Another episode had Peter shooting a parade balloon of Brian after the latter becomes the new Pawtucket Patriot mascot, causing everyone on the ground to talk like this.

* Another episode had Ricky and Fred trying to get Lucy and Ethel to stop gossiping by making a deal where the first pair to spread gossip would have to serve the other pair for a day. Ricky baits Lucy into spreading a rumor about a neighbor's wife and the milkman having an affair by pretending to talk in his sleep. After catching them gossiping by listening through the air vent, they later see the neighbor chasing the milkman after catching him in the act.
* Another episode had Ross lying about taking care of Ben, setting up a
* Another episode had Ross' monkey Marcel change the language on Monica's TV, so they are forced to see all their shows in Spanish.
* Another episode had Ryan accidentally banging his head, with Drew joking "
* Another episode had Sam as the third wheel when, dateless on the night of a dance, seeks out Carly and Freddie only to be dejected to find them having a romantic moment together. Whether or not that was this trope or
* Another episode had someone confess to having shot and killed the victim of the week, with it quickly being established that the victim was already dead at the time of the shooting.
* Another episode had Steve and his friends hold a party for "unincluded" people which had the future versions of him and Snot travel back in time and tell them how great their future is, though they warn them not to become cool with the unpopular kids as it will destroy their promising future. Steve falsely thinks Snot broke their promise and went to become cool, but he didn't, and Steve accidentally becomes the cool one of the party. However, while he ruined their friendship with Snot in the future and made said version of him fall from grace (becoming even worse as the episode went on), Steve's future version gets much better to the point he has daily sex and is ripped.
* Another episode had Steve react to a trigger that compelled him to assassinate a certain government official, as a throwaway gag.
* Another episode had Stewie finish a time reversal device just as Peter learned a valuable lesson about not taking Lois for granted, thus eradicating the whole ordeal from existence. It takes him a near-death experience to relearn that one.
* Another episode had Stewie show Brian he was missing an ear because he was walking home with a bag full of burgers and "a lot of hungry deer were walking around this time of the night". A deer bit off his ear and Stewie mentions he was able to pull the ear out of the deer's mouth and put it into a cup with some ice he got at a 7-Eleven.
* Another episode had the bomber using the "someone else starts the car" to his advantage. He was a police chief who wanted to kill his wife, so he left his car in the driveway so that his wife would have to move his car to get hers out, activating the carbomb that was supposedly left for him.
* Another episode had the department demoted to working in the bargain basement (long story). When they arrived at work the next day, as they were supposed to arrive early to help move everything down, they instead all gave Mr. Rumbold the "V" salute and closed the lift.
* Another episode had the four attending a Yankees game. When they take a visit to the locker room afterward, one unnamed player is seen wearing jersey number 9. The Yankees retired that number for Roger Maris.
* Another episode had the Janitor acting as a sign language interpreter between Turk and JD and a deaf father and son.
* Another episode had the Magic Man turns Finn into a foot after Finn gives him a sugar cube in order to teach him a lesson. In the end, Finn tells the Magic Man he's learned his lesson that he shouldn't have hesitated when he gave him the sugar cube. Magic Man still keeps Finn as a foot, prompting Finn to say "You're a jerk"- which turns out to be the actual lesson that the Magic Man was trying to teach him.
* Another episode had the narrator consider the plot of said episode to be so idiotic that he flat out refused to do his job. At one point, while Freakazoid is battling a monster, the narrator is
* Another episode had the narrator just not bothering to start the regular spiel and he walks off without a by-your-leave. DM and Penfold wind up doing the opening.
* Another episode had the new Dark Bunny video game, being hyped as the state of

the art. It turns out to be a very crappy
* Another episode had the owner of a barbecue restaurant murdered by his wife and cook. They disposed of the body by cutting it up, cooking it and serving it to the customers.
* Another episode had the parents checking into a hotel to celebrate the wife's pregnancy. At the check-in desk, the husband impulsively shares his news with a random woman, who gives him a congratulatory hug. Sure enough, someone sees this and leaps to the wrong conclusion.
* Another episode had the residents of the old folks' home try to cheer up Grampa with a stripper in a cake, but she died while they were wheeling the cake to him.
* Another episode had the sisters unwittingly enter a distorted version of their reality. It
* Another episode had the then-boyfriend of Catherine Disher, aka Natalie, as a guest star.
* Another episode had the town drunk's daughter visiting, and he had told her he was in charge of Fort Courage, leading them to make it look like he was, including getting Capt. Parmeter drunk to get him out of the way.
* Another episode had Tim and Graeme run in, cheering, chanting, and dressed in red-white scarves and woolly hats:
* Another episode had Timmy freeing the town mascot, Chompy the Goat, from captivity and Vicky getting blamed for it. She is locked in a stockade and given 'an extremely bad hair day until she talks' in the form of a balloon being rubbed against her hair to make it puffy.
* Another episode had Tom Servo starting his own multi-national billion-dollar corporation that
* Another episode had Turk and Cox making a bet as to whether a patient would live or die in surgery. The patient lives, and Turk wins the bet. However, this gives Dr. Cox to give a nice
* Another episode had two members of Dewey's special needs class running against each other in a school election. Realizing that the campaign was costing their friendship, one of the kids tried to throw the election by deliberately triggering his
* Another episode had various husbands and boyfriends in line to (unwillingly) see
* Another episode had Walter trying to remember a long-forgotten password, and his
* Another episode had WW2 submariners locked in with their captain who was infected with the black oil.
* Another episode has a cement truck backing up, again into the kitchen, spilling the wet cement all over.
* Another episode has a couple who own a pawn shop coming across a genie, who gives them four wishes. The first wish is to fix broken glass, the second is to have a million dollars, but it's all gone after giving it their friends and a visit from the tax collector. The man uses the third to be ruler of a powerful country and can't be elected out of office, wherein he becomes
* Another episode has a cyborg Stan from a thousand years in the future coming back in time.
* Another episode has a demon. He makes a human woman pregnant because he wants a human baby, but all his children are also demons, even if the mother is a human. This episode also shows a female demon who wants to have a demon child, but when she pairs with humans, her children are also human. But at the end of the episode she gets a child of the male demon.
* Another episode has a different variation. After Homer accidentally loses all their money investing in pumpkins but stupidly hanging on to the stocks well after Halloween, he can't bring himself to tell Marge and in desperation ends up getting a loan from his hated sister-in-laws, who use the loan to extort Homer into letting them abuse and humiliate him in return for keeping quiet.
* Another episode has a flashback about the gang (minus Joe who hadn't moved to Quahog yet) hanging out at the Drunken Clam in the '70s, '80s and finally in 1999. They all wear stereotypical clothing in the '70s and '80s, such as Cleveland having a huge afro and bellbottom pants in the '70s, Quagmire wearing a

* Another episode has a gag where Lois removes Meg and Chris' hats, revealing that they're Lego headgear and leaving their bald pegholes.
* Another episode has a giant clam snatch Mr. Krabs' millionth dollar, with Mr. Krabs sobbing until SpongeBob and Squidward decide to help him get it back. After trying to fool him with a different dollar, Mr. Krabs starts sobbing again, only for Squidward to say that it won't work again (Mr. Krabs decides to resort to more drastic measures instead).
* Another episode has a group of girl bullies doing this with Lisa's shoes. They end up throwing them completely out of reach, forcing Lisa to walk home barefoot, causing a social worker
* Another episode has a hulking, hungry for junk food Ron take a bite out a giant donut sign, knock it over in a fit of rage when he discovers it's fake and then chase it down when it rolls away.
* Another episode has Alan dating an older woman, which leads to Charlie making a ton of these jokes at his brother’s expense. At one point he describes her as "richer than God. Which she probably knew since he was
* Another episode has Alec Baldwin use this line (in reference to Homer). When Kim Basinger and Ron Howard just look at him, Alec says, "What? He has our underwear!"
* Another episode has a Mafia agent being killed in a car-bombing shortly after a trial against him collapses. The first suspect is an old man with a previous conviction for bomb-making and ties to an Asian crime family that have a rivalry with the Mafia; but when questioned, he points out that he's blind and has tremors in his hands, which would make building a bomb impossible now. Mark notes, however, that he could still be connected to the case, since neither of his disabilities prevent him from teaching bomb-making to someone else.
* Another episode has a man confess to stabbing the victim with a screwdriver, but Jessica quickly determines that the victim was already dead at the time, making the man guilty only of
* Another episode has a metallic piece of cereal (which also has sharp, jagged edges) in Bart's Krusty-Os. A particularly nasty case of appendicitis results.
* Another episode has an on-the-spot Good Cop/Bad Cop routine in a chop-shop. The girl playing the role of "bad cop" threatens to call on the talents of the crooks' blowtorch. They crack pretty fast after that.
* Another episode has an orphaned punchline compounded by the fact that it's also altered. Potter is about to drop the punchline of a dirty joke (which the audience hasn't heard) when he sees Mulcahy standing there and quickly sanitizes said punchline. So not only is the setup of the joke missing, the audience doesn't even hear the proper punchline.
* Another episode has a Peeping Tom making his way through the neighborhood, peeping at everyone but Peggy. Al seeks to restore her self-esteem by disguising himself as the peeper. Unfortunately, it gets him caught and beaten up by the gang of vigilante women who've been spied on.
* Another episode has a scene illustrating the spread of a bedbug infestation in Springfield, a deliberate
* Another episode has a sniper leave behind paper dolls cut from images of paintings that point toward his next target.
* Another episode has a suspect in a rape case be described as a young black man "wearing a hoodie."
* Another episode has a TV repairman asking to test if the VCR works, and the first tape he grabbed by random is gay porn. As Paul explained, why waste fifteen minutes of tape space after
* Another episode has a variation on this, where House bets that Chase will do well in speed dating simply because
* Another episode has a woman (who's made a fortune telling people what bullshit woo is in vogue this month) do this to apparently cash in on healthier kinds of milk. The problem is she goes with "Beef Milk", which is milk... from cows.
* Another episode has a world where magic is real, so the cops are afraid to touch powerful sorcerers.
* Another episode has Barney trying to vicariously perform "plays" on women

through Ted, feeding him lines through an earpiece. Barney, being, well,
* Another episode has Barry question everyone just returning to the status quo after a night's hijinx had lead to several deaths.
* Another episode has Bart doing this to Principal Skinner in a home and garden show.
* Another episode has Bender incinerate the entire Earth by lighting a single cigarette.
* Another episode has Billy Quizboy get kidnapped, thrown in a bag, forced to do surgery on a pair of old supervillains, carried around in the bag for a while, and eventually knocked out. He wakes up in a bed and yells for his roommate to come listen about the crazy dream he just had, before realizing his roommate is not there, but a half-naked pedophile with a thing for Billy's
* Another episode has Bobby deserting the football team for the soccer team, to Hank's dismay.
* Another episode has Bonkers and Jitters as part of a ski patrol. As the two of them are on a bobsled, Bonkers suddenly screams "duck!" and ducks to avoid being hit by one of the flying birds. Jitters then screams, "Another duck!," but this time rather than another fowl it's actually a tree branch they have to avoid.
* Another episode has Brian required to retake the DMV test to renew his license, and Stewie makes a "driving safety" video in the style of the old scare-em-straight gore fests, except with himself poorly edited into playing all the roles. If that wasn't bad enough, most of the video is just the characters talking about getting oral sex while driving.
* Another episode has Brian's new girlfriend give not-so-subtle hints that they should start having sex; namely, by hiring an air traffic controller and installing runway lights in her apartment, both of which point to her in a suggestive position.
* Another episode has Bridget suggesting that teachers and senior students get valet parking with the Driver's Ed students doing the parking. Later in the episode has Cate listing reasons to start working at the school and finishes off with "I heard a rumor they're going to get valet parking".
* Another episode has Buffy kill a vampire by switching his glass of water with holy water.
* Another episode has Chuckie get sprayed by a skunk. Tommy's Grandpa Lou suggests soaking Chuckie in mud in order to get rid of the stench. It doesn't work, but instead seems to have made him smell even worse.
* Another episode has Clemont's robot Clembot getting blamed for a rash of incidents in Lumiose City (the culprit was a second Clembot built by another roboticist).
* Another episode has Colonel Potter becoming afraid of being shipped back home to be a desk jockey.
* Another episode has Col. Potter trying to bring a meeting to order when Hawkeye makes a lame joke. Potter, laughing, says "Pierce, sometimes you can be very amusing," and then abruptly stops and says "And then there's now."
* Another episode has Crichton in a coma, envisioning the dilemma he's trying to solve in the style of a
* Another episode has Danny trying to locate a priest who he suspects of this. When the parish finally decides to let him talk to the priest, he turns out to be an exorcist instead; the runaround is explained by the church not wanting to publicize the fact that they still do exorcisms. Danny apologizes.
* Another episode has Dexter trying to get DeeDee out of his lab once and for all by completely sealing up every possible entrance to his lab there is. They get quite ridiculous.
* Another episode has Dr. Kelso order two large drinks in a tropical bar. JD thinks, incorrectly, that he's going to be given one of them. "Can I at least have the fruit?" "Go away."
* Another episode has Duffman retire due to injury, so Duff Brewery runs a reality show where the winner becomes the new Duffman. At the end, it's down to Homer and a guy we've never seen before. The guy we've never seen before wins...until he takes

off his shirt to change into the Duffman costume. It turns out that he has the logo of a rival brewery tattooed on his lower back and is disqualified. Homer is then crowned the winner.
* Another episode has Earl give Dodge's girlfriend a fake break up note to cross something else off his list. When the girl starts crying, Earl hugs her and says "Don't tell anyone about this. It'll be our little secret." A woman, who happens to walk by and overhears, yells "Pedophile!", kicks Earl in the crotch and blows a rape whistle.
* Another episode has Eddie and Waldo trying to make sense of a snowmobile —
* Another episode has Eustace's mother be involved in human experimentation for various hair related products. The twist here is that their method DOES work, extremely well in fact, causing people to grow huge amount of hair to be used in experiments. At the end, after Courage has freed Muriel from her unwilling participation, Eustace returns to the farm, now
* Another episode has Frank Burns setting up a boxing match to settle a dispute between Klinger and Sgt. Zale ("End Run").
* Another episode has Garak enjoy the fable of "The Boy Who Cried Wolf" but he did disagree with two points. First he thought the Aesop was incorrect (rather than "If you always lie, no one will believe you when you tell the truth" should be "Never tell the same lie twice") and that while it has merit as a story, the fate of the boy makes the tale
* Another episode has George chasing after a motorist that he thinks flipped him off. When he catches up with the guy, Costanza finds the guy couldn't help it: His broken hand was in an unfortunately crafted cast.
* Another episode has Ghastly surgically attach Boskov and Skarr's arms to each other, but they find out that they can still control them — even on the other's body!
* Another episode has GIR's programming accidentally transferred from his own robot body into the computer brain of Zim's base, giving him control over the whole complex.
* Another episode has Helga give herself a makeover, in order to make herself look more girly for Rhonda's party. When her mother opens the bathroom door and sees the finished product she gasps and faints, causing Helga to say "Maybe I should've gone a bit lighter on the eye shadow."
* Another episode has her stuff her bikini top for a pool party. Ginger knows that some other kids are planning to steal her top, and the fact that Courtney stuffs is treated as at least as humiliating as the possibility that she could wind up flashing everybody what she
* Another episode has him deduce that a man must be cheating on his wife because his phone had a waterproof case, reasoning that because he didn't have the tan of a man who works outdoors, that must mean he takes his phone into the pool with him, which must be because there's something on it he wants to hide from his wife, which must be text messages from a secret lover. Because apparently there's no other possible reason to take your phone into a pool.
* Another episode has him worry that the relationship between his father and Marge's mother will retroactively lead to their kids becoming inbred "freaks with pink skin, no overbites and five fingers."
* Another episode has Homer and Grandpa return to their old family farm while touring the state as
* Another episode has Homer contemplating infidelity. Like most of us, he turns to the TV for advice. Cue a commercial full of beautiful women working out, panting heavily, and showing off their assets before breathlessly saying "Just do it!" Homer screams and runs out of the room, while the commercial finishes with the woman sexily delivering the line "Have yourself examined for ringworm."
* Another episode has Homer dismissing jazz as "Making stuff up as you go along" before trying it himself. He ends up singing "de"s to the tune of "Mary Had a Little Lamb". When called on it, he tries again, only doing it again with "doo". Caught again, he shouts,
* Another episode has Horatio stopping an armed robbery of a bank truck. When

going over the cash, a tech discovers the money is actually Iraqi dinars washed out and printed over with real-looking U.S. currency. The robber can't believe someone swapped the cash for fake before he got to it.
* Another episode has Hutz get so fed up of hearing the words "objection" followed by "sustained" that he announces if he hears it one more time he'll scream.
* Another episode has Jack Donaghy look out Liz's window, prompting him to say, "Wow, that man appears to be making violent, passionate love... to himself." Followed by "You have to admire his stamina," and "Is he in a board meeting?"
* Another episode has J.D. suspect a patient has SARS. He doesn't and everyone gets angry at him for suggesting this because the hospital gets quarantined so no one can leave.
* Another episode has Joey attempting to intentionally set Ross up on a terrible blind date. However he selects an intelligent woman he once dated who loves puzzles and foreign films.
* Another episode has Johnny and Dukey turn into female rollerbladers to win a roller derby.
* Another episode has Kahn, a Laotian immigrant, note that his American-born neighbors probably couldn't recite all of the presidents, which he learned for his citizenship test.
* Another episode has Kerry Weaver doing one of these in an ambulance that has crashed due to a torrential rainstorm.
* Another episode has Kino visiting neighboring countries who used to constantly be at war. When Kino asks how they achieved peace, she finds the opposing countries have made their battles into a game in which both countries see who can slaughter the most inhabitants of an adjacent defenseless village. And just to twist the knife further, the "innocent victims" in that village have taken to senselessly murdering travelers, simply as a means of venting their frustration.
* Another episode has Lapis Lazuli explain her art project ("Meep Morp") this way:
* Another episode has Lashina and Stompa, Mongal's female enforcers. (In the comics, Lashina and Stompa are the names of two of Darkseid's Female Furies.)
* Another episode has Lincoln drinking what he thinks is root beer, only for Clyde to reveal that is in fact Dr. Peabody's Onion Elixir from 1812! Cue a
* Another episode has Lisa read a letter from her pen pal who lives in a country about to be taken over by a dictator. The letter goes from a desperate plea narrated by a child to self-glorifying propaganda narrated by a grown man.
* Another episode has Lister spend days crossing the ship in order to fetch some tomatoes. His reason for doing so is that tomatoes make him sneeze, so now he can
* Another episode has Marge having a flashback, and Homer asking her why she thought he'd be able to see it.
* Another episode has Marshall reading a letter he wrote to himself when he was a teenager, and mentions he wore farmer-style suspender overalls because he thought it was cool. Lily states that had he still worn that in college, he would not have gotten laid as fast as he did.
* Another episode has McKay try to use a device to generate unlimited energy by getting it from an alternate reality. Unfortunately, this ends up nearly destroying an inhabited universe, so the alternate McKay uses the "bridge" to cross over into the "main" reality. At the end of the episode, they send him back.
* Another episode has Michael once again triggering an alarm while already having gotten what he wanted inside a high-security building (specifically, a
* Another episode has Moe Szyzlak hiding his poetry magazine behind a copy of
* Another episode has Monica and especially Chandler worrying whether their adopted child's natural father is an academic college student/football player- or someone in prison for killing his own father with a shovel.
* Another episode has Monk investigating the murder of an immigrant cab driver and start dating a woman of the same nationality. After a crucial piece of evidence is uncovered, the woman confesses, but Monk is not entirely convinced she did it.
* Another episode has Mr. Krabs being sued again, this time for knowingly selling rotten patties at the Krusty Krab (
* Another episode has Mr Pool announce he'll teach the Biology class about human

reproduction. It then cuts to the end of the lesson with a class full of wide-eyed teenagers.
* Another episode has Munch and Fin track down a convicted rapist who is now out of prison, because a recent crime matches his previous MO. It turns out that he was attacked with acid in prison and is no longer able to, in his words, "rape a frigging ant."
* Another episode has Ned Flanders say that his denomination of Christianity (The Northwest Branch of American Reform Presbylutheranism) split off from the Catholic Church several centuries ago over the right of worshipers to come to church with wet hair. He then sheepishly admits that his denomination has since abolished that right.
* Another episode has Nelson laughing at a freakishly tall man driving a car small enough that his knees are by his ears.
* Another episode has Nicole cleaning out the boys' room, which includes some food. She asks them what was in a glass she found and is told it's milk. When she turns the whole thing over, it slowly slides out as one piece, with Gumball
* Another episode has Niles upset because his ad for his practice misprinted "Jung specialist" as "Hung specialist", making the followup "Servicing individuals, couples, groups. Satisfaction guaranteed. Tell me where it hurts!" especially irritating.
* Another episode has one of two Mystellar Alien brothers, fleeing from an intergalactic war ravaging their home planet. The older of the two brothers definitely qualifies for this trope, going as far as to rescue a human child early in the episode, and then finding out Goh Hideki's true identity as Ultraman Jack, but choosing not to expose Jack in public as a favour.
* Another episode has opposite sex versions of the whole crew, where Rimmer's female double (
* Another episode has Peter accidentally bringing home another baby and leaving Stewie behind at the park.
* Another episode has Peter, after learning the elements of cold reading, become a "psychic" and assisting the police with finding a missing kid attached to a bomb. Unsurprisingly, it doesn't end well...
* Another episode has Peter and his friends attempting to make a six
* Another episode has Peter, Joe, Cleveland and Quagmire stuck on a deserted island. Following cliche, they decide to have an orgy. Realizing they aren't attracted to each other they try to disengage but are too tired to move. Naturally a cruise ship sails by; the tour guide describes the scene in English and Spanish.
* Another episode has Peter refusing to wash his hands after shaking it with someone in a Boo Berry costume. Eventually his hand grows so disgusting he spontaneously develops the ability shoot off the filth like Spider-Man, with tiny life even beginning to develop. When the guys trick him into getting his hand washed some of it flies off in a rocket ship.
* Another episode has Peter wearing a Middle Eastern costume at the toll booth, with the guard checking his skin tone whether he's "Okay".
* Another episode has Piglet running away and getting covered in snow. He crawls out from underneath, leaving a Piglet-shaped snowman that the others mistake for the actual Piglet and take inside. They become concerned when the snow Piglet melts into a puddle.
* Another episode has Pikachu being possessed by the Blue Orb and Archie being possessed by the Red Orb.
* Another episode has pirate Don Karnage send his two main henchmen,
* Another episode has Quagmire being asked which celebrity he'd have sex with,
* Another episode has Quagmire condemning the idea of cheating on one's wife, saying that marriage is a sacred bond between two people, which is why he will never marry.
* Another episode has Quinn trying to convince people to donate money for her plastic surgery. When she tries to convince a goth girl that her beauty will be something everyone can share, the girl replies "and you're not even the least bit afraid that there may be a Hell?"

* Another episode has Ralph Wiggum put Play-Doh into his mouth and pretend he's a Play-Doh activity center. It comes out of his mouth and nose... and eventually his ears.
* Another episode has Randall team up with Menlo to blackmail the rest of the playground with various embarrassing things such as secrets, knowledge of them having cheated or taken advantage of errors for their advantage, or knowledge of their parents.
* Another episode has Robbie Rotten obtain a genie and wish for all the healthy food and exercise equipment to disappear from Lazytown. It does! ...Too bad he
* Another episode has Salem get stuck in a pet door after he's been overeating.
* Another episode has Sally talking about doing the repairman version.
* Another episode has Sharon repeatedly expressing her annoyance at how Randy and seemingly everyone else are so concerned with
* Another episode has Simon breaking through his handcuffs after hinting that he'd been working at them long enough to cause metal fatigue. Mike advises his captor to change his cuffs more often.
* Another episode has Simon's friend Nigel say that there's a desirable girl in his class who could have picked anyone to be her boyfriend and she picked him. Come to find out that she's black like him.
* Another episode has SpongeBob joining a gang of sharks and worrying they could be thugs.
* Another episode has Stewie afraid of the Tooth Fairy, and decides to capture him. He states that, "to find a fairy, he has to think like a fairy". Brian then gives an
* Another episode has the body discovered by a pair of father and son deer hunters, with the son being more preoccupied with worrying about making it back in time to watch a
* Another episode has the characters disposing of electronic waste on "the Third World" (of the Antares system).
* Another episode has the characters trapped inside a van, with some
* Another episode has the cops eating at Krusty Burger; Lou says that while he was in Shelbyville, he went to McDonald's, and instead of being called a non-dairy partially-gelatinated gum-based beverage he is surprised to hear it's called a "shake". This is, of course, a spoof of the "McDonald's in France" scene in
* Another episode has the crew complaining over seeing Isaac's aunt in a horrible play. When she joins on a trip, Isaac gets them to talk about how great she was so as not to hurt her feelings. It takes his aunt declaring she's quitting her job to find fame in Hollywood for Isaac to break the truth to her.
* Another episode has the defendant dismiss his lawyer and represent himself
* Another episode has them end up in a post-apocalyptic world where crazed priests execute anyone who has "tech" by throwing them into an atomic pit of some sort.
* Another episode has them find a talking parrot on the island that keeps mentioning jewels. Believing it belonged to a pirate who buried treasure on the island they spend the whole episode trying to find out where the treasure is. Only to learn that its former owner fed it "jewel" brand crackers and it had been giving its version of "polly want a cracker" the whole time.
* Another episode has them finding a women frozen in ice in Antarctica, supposedly predating humans on Earth. She woke up when thawed. She was an
* Another episode has them going on a tour of the newspaper industry. The tour guide leads them to a chamber where they store Dear Abby and Ann Landers in jars, keeping them in suspended animation except for one hour per week to dispense homespun wisdom.
* Another episode has them meet a man, Chuck, who has written trashy novel versions of all the episodes. When it's not
* Another episode has them picking for paintball teams. Stuart is shown praying "Pick me" and is overjoyed when selected. He's also the last person, but is happy just to get picked anyway.
* Another episode has the new gym teacher respond to anything with a dodgeball to the face. "Bombardment!"

* Another episode has the opening fight end with Kim caught in a hot steam blast. Quick cut to Ron desperately asking how bad it is, and Kim's mom pronouncing the situation hopeless. Pull back to reveal that they're talking about Kim's torn pants.
* Another episode has the opposite: a world where there are no illegal drugs, and being an addict is mandatory. Cops walk around with tranq guns to calm down those who have gone off meds, until they can get an implant that allows easy injections directly into the bloodstream.
* Another episode has the Patient claiming that the abrasions on his knees are from playing flag football. They are in fact, rug burns, from the carpet of the motel where he was shagging his mistress.
* Another episode has the plot kicked off when BoJack and Diane find a dead body in a pool, and BoJack has to clear his name (though it's the body of an Orca).
* Another episode has the team investigating a skeleton found in a slave ship wreck.
* Another episode has the team realize that the victim was a transgender woman.
* Another episode has the Warner siblings abducted by aliens, at one point Yakko enters a room and finds Elvis together with Amelia Earhart, Bigfoot, and Jimmy Hoffa.
* Another episode has this dialogue between network execs and Krusty:
* Another episode has Timmy wish for 24 hours of pitch darkness so he can get some sleep. Unfortunately, if Fairies spend too much time in darkness, they turn into horrible monsters called Scary Fairies, which we get to see glimpses of throughout the episode.
* Another episode has Turk and JD chasing each other around the hospital, attempting to meet for a hug after Turk's return from his honeymoon. They each end up in separate rooms, just next to each other. Then, somehow, JD ends up in the same room, one floor up.
* Another episode has two black guys get offended when Elliot had trouble telling them apart; they assume it's because she's racist and thinks all black people look alike and not because they are
* Another episode has Viserys telling a handmaiden the history of his family's fall from grace and the last of the dragons...while they sit naked in a tub of hot, steaming water.
* Another episode has Willow offer to kill Anya so Spike can feed off her. Buffy seems tempted and needs a moment before rejecting the idea.
* Another episode has Winter trying to get "Cold Heart/Hot Love" in the library
* Another episode included Major Kira explaining why the Bajoran Resistance wasn't interested in Federation-made phaser rifles, instead opting for the Cardasian disruptor rifle. While the phaser rifle has all kinds of cool, neat gadgets and add-on features, in the field (when you don't have proper maintenance facilities and spare parts and the like) that's just more things to go wrong with it. A Cardasian disruptor rifle only has stun and kill settings, but you can lean it against a tree and leave it for ten years and it'll still work without trouble.
* Another episode included Robin desperately trying to communicate to Lily that she should not open the gift Robin brought to the Bachelorette party in front of all her family. Lily
* Another episode in Season 1 has a trio of corpses recovered from the Twentieth century which were frozen immediately after their death. Reanimating the dead and repairing what killed them is a very routine matter for Dr. Crusher once they're thawed out, even replacing the heart of one such patient. For that matter, Picard has an artificial heart as well, with medical technology keeping him alive after he was stabbed in his original one.
* Another episode in the original series, named 'The Empath' uses this tropes as the entire PLOT. A race of aliens named the Vians subject both Kirk and McCoy to physical torture to see how an alien named Gem (who's race is able to cure the physical injuries by taking them on themselves) will react. It turns out the Vians have the power to save Gem's dying planet, but will not do so unless she is willing to sacrifice herself for victims, proving her race compassionate enough to save. No

prizes for spotting the hypocrisy in this scenario.
* Another episode in the prison arc has Glen, who has been in and out of prison many times, since "before he knew what swear words were." While in juvie, he gets a tattoo on his back that reads "
* Another episode inverted it. Abagail is in the back of Buzz's cop car when suddenly he's knocked out and the episode's villain gets in the
* Another episode inverted the idea. Due to a shortage of Princes to turn into frogs a witch finds a frog and turns him into a prince. In the end, the princess who falls for him ends up turning into a frog so they can be together without sacrificing his happiness.
* Another episode invokes the above urban myth with Otto telling Lisa a story about a someone doing this. He ends up terrifying her into screaming at the top of her lungs when he tells her that he was the maniac.
* Another episode involved a man who shot himself outdoors with a gun attached to helium balloons. The gun floated away but did eventually come down to earth and was recovered.
* Another episode involved Bilko promising a Bing Crosby concert to the troops. Unfortunately Bing was late to arrive so Bilko tried to placate the troops by passing off as Bing a soldier who happened to be a lookalike. The double couldn't sing, however, with his only talent being that he can recite Longfellow's poem "
* Another episode involved Bogus chasing after an ant that had stolen his special piece of cake. The ant manages to elude Bogus for a while by painting a rock to look like a piece of cake in order to fool Bogus. When Bogus bites into the rock,
* Another episode involved Bruce Wayne and a bunch of rich people being hypnotized by a magician called The Mad Maestro.
* Another episode involves a 14-year-old boy who's been raping younger kids, completely unaware of the harm he's inflicting. He's imitating what he's seen on TV and thinks that everything, including his victims' protests, is just part of a script; it just somehow doesn't click for him that what he's doing is hurting the other kids. He ends up being acquitted because he literally couldn't understand that what he did was wrong.
* Another episode involves a bouncer stuffing an annoying homeless man inside a duffel bag, and dumping him (to his death) down a hill. The Nevada desert heat, as well as several months of decomposition, give the cadaver the consistency of chunky soup. Never mind the stench, the bag
* Another episode involves a serial rapist giving trophies from his victims (usually, jewelry) as gifts to his wife. He would ask her to wear the gifts during sex. She thought nothing of it until presented with all the evidence of the rapes. She agrees to testify but is forbidden from giving any details regarding what her husband would have her do with the gifts, as the defense attorney argues that giving gifts to a spouse counts as private communication and is inadmissible as evidence. The prosecutor is limited to asking only details as to when and which gifts were given. During the trial, the wife gets upset that she's not being asked more and breaks down, revealing the truth. The judge declares a mistrial, and the husband goes free, until
* Another episode involves Clark and Lionel Luthor switching bodies. In order to lure Lionel-in-Clark's-body back to the prison to reverse the process, they manage to convince him that the change will be permanent if he eliminates his old body. In order to do this, he stages a
* Another episode involves Morgan accidentally playing over the air that she intends to quit the radio show because it's too much stress, and
* Another episode involves people from a world where everyone, by law, must wear a mask (with a distinctive pattern on it, unique to each individual) and is absolutely prohibited from removing it in the presence of anyone else. One young man, the son of one of the leaders, wants to end this practice. At the end of the episode, he removes his mask and Buck is astonished because he's a handsome, normal-looking human. The subtle horror is revealed when his father and the guards remove their own masks... and reveal that everyone on their planet
* Another episode involves Phoebe finding a benevolent Genie in a Bottle, whose

only desire is to be wished free so she can escape a demon planning on using her to raise a city of evil. But once free, the Genie is revealed to be a badass demon, and Phoebe is transformed into a Genie herself, forced to take her place.
* Another episode involves Phoebe trying to convince a room of jurors that a magician didn't kill his wife and that he only knew where to find the body and the weapon was due to a premonition. The jurors grow increasingly skeptical, so what does Phoebe do? Cast a spell to summon the dead wife.
* Another episode involves Quagmire returning from a vacation in Mexico with a large number of "illegal" fireworks smuggled in up his rectum...even though fireworks aren't illegal in Rhode Island.
* Another episode involves the eponymous space station receiving a distress call
* Another episode involves the Howells believing they'd gone broke. Mr. Howell attempts to throw himself off a cliff followed by the both of them when they feel they can't survive as regular people. In this case, it's their dialogue and how exactly they're reacting to it that turns the situation from sad to silly.
* Another episode involves Timmy wishing to have no emotions, which resulted in the emotions flowing out of his head in the form of colorful little characters(such as a white square for Common Sense, a pink heart for Love, and a green thing for Envy).
* Another episode involves Will & company getting cursed after he insults a medium. After Jazz and Hilary
* Another episode, in which the emergency damaged the ship computer's memory banks, had the computer announcing:
* Another episode is about Janeway and her crew trying to determine who killed a
* Another episode is named 'Inter Arma Enim Silent Leges,' the Roman term meaning 'in times of war the law falls silent.' In it the Federation again uses morally dubious means to ensure continued Romulan support for the war effort, including the framing of an innocent woman.
* Another episode ("Julia and Suzanne's Big Adventure") cranked the discomfort up further. The Sugarbaker sisters were stuck sharing a Japanese capsule hotel room (think
* Another episode justifies this, and actually the cat and the dog are the most ashamed: Bart sold his soul, and animals have a sharper perception about this, apparently.
* Another episode "King-Sized Homer" had Homer gain weight so he could be considered morbidly obese enough to work from home. But then he decides to go see a movie, leaving a drinking bird in charge of the computer...which fails, and he has to go to the plant to stop the meltdown.
* Another episode lampshades the trope by having one of the papers be named "The Spinning Times".
* Another episode later in the series has Michelle try to set Danny up with her kindergarten teacher because she wants a mommy and the two both have a fondness for cleaning.
* Another episode later involves Martin trying to do something nice for Frasier and Niles by buying them artworks and wine-racks that Martin likes but that Frasier and Niles find hideous. (In the case of the artwork, Martin thought Frasier liked it because he claimed he did while buttering up the maitre d' at a restaurant where it was on display).
* Another episode, "Marge on the Lam", had him trying to give his current position to another officer over the radio.
* Another episode mentions that once Earth belonged to the interstellar Arkanian Empire that built
* Another episode, "Military Justice", pulls a hard subversion of this trope. Detective Amaro gets his ex-wife to poke around unofficial channels for information on the perps of the week, who are military. When he presents the information to the squad, ADA Barba freaks and immediately tells Amaro to stop talking
* Another episode, "Mind Over Murder", the homely, burly 'man' Peter punches turns out to be an incredibly ugly and
* Another episode, "Mr. Monk and the Bully", has Monk and Natalie follow another

client's suspected cheating spouse - he suspects it based on her clothing. They follow the spouse, and catch her in a bar with someone else. The next day, he turns up dead. In the end, it turns out that the spouse was not cheating, and Monk and Natalie were following her identical twin sister.
* Another episode, "Mr. Monk and the Three Julies", had a character who
* Another episode, "Music Day" has a cartoon where Li'l Sneezer practices his trumpet in the basement while eating limburger cheese during lunch, causing assumed flatulence. When Plucky blames Hamton, Hamton shrinks to the size of a mouse and hides behind a milk carton.
* Another episode of CSI had organs being taken from dead bodies that were processed in a specific crematorium.
* Another episode of note is "Tall Tales", where one college campus starts experiencing a number of urban legends coming true at the same time.
* Another episode of SVU is about a music teacher who happens to have a popular kids show, where he discovers who is talanted enough to compete for a music deal. It establishes that he is a gay man, and is accused of molesting little boys when one in his class comes forward, along with his friend, and both claiming his favorite molesting spot is the boy's bathroom at school or his music room. Soon, many other boys come forward and it looks like a big scandal is happening. The teacher is fired from both his jobs, some of his family disowns him and he is charged for multiple underage rapes. However, Detective Rollins has doubts from the beginning based on a gut feeling. Sure enough, when she is able to talk to the boy alone in the bathroom at his house, she discovers that the same description he used for the school bathroom is the same one at his house. Rollins gets Benson who was interviewing his older sister, and the two soon discover that the boy was lying all along and his older sister and her friend put him up to it as part of a revenge scheme, because the music teacher rejected them years ago from the competition. The charges against the music teacher are cleared,
* Another episode of the anime features Konata and Nanako having an argument that soon cuts to a
* Another episode of the anime has, quite surprisingly, Happōsai himself telling a swimsuit-wearing female Ranma to put some clothes on, or else she could catch a cold — instead of, say, jumping her and groping the exposed female flesh as you'd expect. This is
* Another episode of the original series involved a Decepticon and an Autobot ending up with each others transformation cogs. They had to be precisely adjusted in order to work properly (having only allowed unstable, partial transformation before the adjustments), which conforms to the idea that they function similarly to organs.
* Another episode of the series featured an AI that totally controlled every feature of an apartment building with the purpose of looking after the complete welfare of the residents. This enabled the tenants to live without any other human contact. After an elderly resident died of a heart attack while the other tenants ignored her cries for help and the AI's alerts, the AI seemed to malfunction, invoking what looked like an
* Another episode of the series had a complete maniac of a Civil War re-enactor (and quite the perfect example of an
* Another episode of Voyager had them discover a race of robots who were dying out because their creators, the Pralor, had gone extinct and the robots themselves lacked the ability to construct more of themselves. After the crew do some digging on the history involved, they discover that the robots are soldiers constructed to fight a
* Another episode opened with lab tech Archie sorting through a suitcase full of cocaine, documenting all the packets of coke. He lifts one up, and BOOM, a pressure-triggered bomb goes off, killing Archie. Turns out, it was the first in a series of scenarios in Hodge's prototype board-game, "Lab Rats".
* Another episode opens with a cleaning woman getting a fright from a panicked cat... just before finding the victim of the week. The cat scared her much more than the corpse.

* Another episode opens with a slow pan across a trashed room, accompanied by the sounds of passion and breaking objects, ending with Spike and Buffy lying post-coitus under the carpet.
* Another episode, "Past Tense", has several of the characters going back to pre-
* Another episode pitting Bill Gates and Steve Jobs plays it straight. They take shots at each other, but compared to other episodes these two had the least animosity between them in their raps (more of each one's raps was building themselves up rather than tearing the other one down). Jobs would
* Another episode played with the trope: when a friend of Duncan's shows up on his doorstep with police right behind her she claims it was because she was in the same hotel as a VIP that was killed and afterward the police had realized that her paperwork didn't check out and have been following her since. The truth is that, haunted by her failure to assassinate Hitler and potentially save many lives, she has taken it upon herself to go around assassinating would-be dictators and
* Another episode plays it straight, when the Cranes while on a road trip end up taking Daphne into Canada without realizing that her working visa doesn't permit her to cross the border. When they get pulled over by customs on re-entering the United States, everyone's guilty-trying-not-act-guilty appearances immediately convince the customs official that something's up, leading Martin to reluctantly reveal the truth... he doesn't have a permit for Eddie (the dog) to enter the country. On learning that Martin's an ex-cop, the customs official is satisfied with Martin's explanation and lets them pass without ever learning about Daphne.
* Another episode plays the trope for laughs. During a story told by a psychic of Peter's ancestor, who founded Quahog, he was married to a woman who resembled Meg, but when his first/true love (who looks like Lois) finds him again, he had to divorce Meg via the "complex, extensive divorce procedure required by 18th century society..." cue cutaway to past-Peter shooting his wife with a musket behind the house.
* Another episode plays with it; a girl is kidnapped and murdered, and a previously convicted rapist is arrested for the crime. The girl's mother brings a gun to court and shoots him at the arraignment. Everyone supports her and is lenient to her, because she's killed the man who killed her daughter — until it's revealed that she and her lover actually
* Another episode, "Rarity Investigates", has an antagonist set up Rainbow Dash for a crime he committed so that he can preserve his flight speed record. He is exposed by Rarity for his frame up and is immediately stripped of his position and retirement benefits.
* Another episode, "Red Rocket's Glare", had COBRA buy out a chain of
* Another episode, "Relativity Theory", involves a human ship landing on an Earth-like world and encountering a group of seemingly primitive aliens. The scientists are keen to make contact and study the locals, while the military types want to wipe out the locals to make room for a future colony. It turns out the "primitive locals" were the equivalent of Boy Scouts on a camping trip and weren't even from that world. When they call for help, a powerful alien ship shows up, downloads the human ship's navigational charts, destroys the human ship, and heads straight for Earth to exact revenge.
* Another episode reuses that same sequence but offers a minor punchline change with England having rebuilt Busby's Chair to test on the Axis, only for Russia to sit on it and make it explode. And yet another episode reuses the footage to replace the whole setting of one of the Christmas strips from the manga.
* Another episode revealed that Joy has a "tramp stamp" with her kids' names and birth dates on it. Darnell reads it to show that Dodge and Earl Jr. really
* Another episode revealed that Steve was insured for a million dollars, and Marcy didn't even try to hide that she planned to kill him to collect the money (as it's a gag nothing comes of it). When Peggy tries to get Al insured to pull the same scam, he is saved since his job as a shoe salesman makes the chances
* Another episode reveals that Charlotte Pickles acted like her daughter Angelica when she was her age.
* Another episode reveals that Michael regularly had Erin spin him around in his

chair.
* Another episode reveals that old people are used to create energy, just like in
* Another episode reveals that Omicronians' testicles are located in their horns. And Lrrr warns the crew to escape to a safe 500 meter radius when he starts getting frisky with Ndnd.
* Another episode reveals that the vain spaceship captain Link Hogthrob wears a girdle.
* Another episode revolves around a girl about to use the Hell Correspondence to punish an evil old woman who's holding her dogs and the puppies one of them had hostage (and has already killed one of the dogs) in exchange for making the girl her slave. Meanwhile, Hajime tracks her down to try and stop her from doing so. In the end, the police storm the woman's house and arrest her, and it seems like Hajime succeeded...until the girl discovers that the old woman had killed the second dog and all of the puppies, and pulls the string on her curse doll anyway, damning both the old woman and herself to Hell.
* Another episode saw a large number of Bang Babies kidnapped and drained so
* Another episode saw MacLeod asking for Amanda's assistance in retrieving the Cross of Saint Antoine from the house of the Evil Immortal of the Week. The EIOTW kept the cross in a big glass case in his foyer.
* Another episode saw Mulder buy pirated alien autopsy footage. Scully comments that
* Another episode's "Circle" sequence has Fez drinking chocolate syrup
* Another episode sees Al after a seeing a fat woman's underwear at the shoe store.
* Another episode sees Catherine and Grissom making a bet over whether two murder victims' deaths were related or not. At the end, it turns out they were both right, and Catherine rips a bill apart and hands half of it to Gil after the very heavy conversation, this is a tension breaker when Grissom reminds her that doing that is a federal offense.
* Another episode sees Frank Burns forcing two enlisted men to box. They dance around each other for a minute then both "accidentally" punch Burns in the face. He goes down hard.
* Another episode sees Milhouse crushed by an actual parade, featuring an endless number of marching bands, parade floats, elephants, etc.
* Another episode sees the sisters trying to save demon children from their ice cream truck prison.
* Another episode sees three homicides in the same room over a period of a few weeks.
* Another episode self-parodies this, with JD telling Turk and a patient
* Another episode set at Christmas revolved around Sgt. Boydon helping out a guy who eventually disappeared into thin air, with the definite implication being that he was a ghost.
* Another episode set near the end of the war has a New Meat soldier named O'Keefe assigned guard duty alongside Perconte who chews him out for his over-eagerness for battle. To Perconte, an "easy" post with warm meals and a bed to sleep in every night is the best thing to ever happen to him throughout the whole war. Later, he does show comfort to O'Keefe when they find
* Another episode set on Valentines Day has Homer desperately looking for a gift for Marge, and Apu offers him a heart-shaped box of chocolates... for $100. With no other choice, Homer pays but angrily vows to never shop there again. Apu, realizing that if Homer finds the much cheaper store across the street his business is doomed, offers him a small discount on damaged canned food, and wins him back.
* Another episode showed Adam and Jamie trying to be the first to find a needle in a haystack. At the beginning, Adam predicts that in a few hours, Jamie will still be searching while he'll "be kicking back, sipping mimosas in the shade." When he's unsuccessful a few hours in, he predicts this will happen right before it does.
* Another episode showed a similar mob set to burn Principal Skinner at the stake for insisting that the earth revolves around the sun.
* Another episode showed Peter's caveman ancestor inventing the wheel, but it

doesn't sell until Cave-Brian has Cave-Lois stand next to it while wearing a
* Another episode showed the team going through a more advanced simulation where the bad guys are played by
* Another episode shows a commercial for Pawtucket Patriot beer with the tagline "Pawtucket Patriot, If you buy it hot women will have sex in your backyard." Lois scoffs at the crass display of the typical male fantasy —
* Another episode shows Bender does indeed dream...of ones and zeroes. It quickly turns into a nightmare when a 2 appears.
* Another episode shows Hardison getting very excited to get access to high tech government security hardware "which I know nothing about because that would be treason and wrong."
* Another episode shows Moe, during a montage of suicide attempts, putting a gun to his head and pulling the trigger. A flag that says BANG! comes out of his ear on the other side.
* Another episode shows that the entire town of Springfield has a parent-wide conspiracy regarding
* Another episode shows them reenacting the Trojan War. At its culmination, Buford has Irving get into a trojan platypus. Phineas doesn't fall for it, but it proves to be a decoy as the war takes a turn into
* Another episode spoofed it with a scene in which Ramón Valdes portrays
* another episode, Stan has a classic line about this, after he abuses an anti-terrorism law to seize the house of any neighbor who doesn't like him:
* Another episode starts with the set-up for an execution (by firing squad, for a nice change of pace). As the condemned is being positioned and the shooters are raising their rifles, the executioner gets a phone call... telling him there
* Another episode, "Streaking" from the first season contained one. Donna doesn't want to go with her parents to a presidential rally for
* Another episode subverted this when Homer tries this trick and finds an
* Another episode subverts the trope. Homer claims to be Mr. Burns to recover a letter filled with angry attacks on the old man. When the postal worker asks for his first name, all he can come up with is: "...I don't know."
* Another episode subverts this. When Homer becomes head of the Indian branch of the power plant, it looks like he's set himself up as a god, but it turns out he was such a
* Another episode subverts with little subtlety — in an episode of Police Chief Wiggum becoming determined to be a good cop (
* Another episode takes it up a notch when Stewie and Brian fighting in the time machine causes the flow of time to go in reverse. The reversed flow of time threatens to have Stewie (and possibly all life) become unborn, though Brian manages to fix the time flow at the last minute.
* Another episode takes this trope to its logical conclusion when Zed's brain is removed, and the disembodied brain talks with Zed's voice.
* Another episode takes this trope to the extreme with Cletus, his pregnant wife, their children and their unborn child throwing away their bottles of alcohol in quick succession after seeing a bizarre train (actually the personal train of
* Another episode that hilariously parodied this trope was "Acts of Sacrifice" with Susan Ivanova having to deal with the Lumati ambassador whose decision to open relations with Earth was crucial. Thing is, he expected to have sex with her to seal the deal as sex is considered just a salute in his culture equivalent to shake hands. Considering that Lumati are incredibly ugly, Dr. Franklin's advice was “put a pillow on his face and do it for Babylon 5”. Despite this she cleverly
* Another episode that sidelines Kim and gives Wade and Ron a chance to show how effective they are without her is the half-episode "Overdue." While Kim is stuck in library detention due to an overdue library book, Ron runs from villain hideout to villain hideout while accompanied by Wade using a remote operated robot to find the overdue book since Ron doesn't remember where he lost it. In the process, they stop several villain plots before they can get started.
* Another episode, "The Big Flub", centers around a new gum Gyro invented

involving helium so that blown bubbles could float the gum-chewer like a balloon.
* Another episode, "The Lying Game", had a case leading the team to a company specialized on making fake alibis (based on the real life
* Another episode, "The Odd Couple", has Timmy intentionally pulling this on Vicky's new boyfriend Ricky to get him to break up with her when Timmy couldn't wish for him to disappear due to the "true love" rule preventing him from doing so. Timmy hooks Ricky up with Dolores-Day, who seems to be a rich and attractive teen beauty queen on the dating site, but in reality, she is
* Another episode, "The Tale of the Photo Finish," crossed over with
* Another episode, "Timeless", is set 15 years into a future in which Voyager’s attempt to use an experimental quantum slipstream drive resulted in the ship crashing into an icy planet. The entire crew was killed, save for Harry Kim and Chakotay who were aboard the Delta Flyer at the time. They have a plan give a new set of phase corrections to Seven of Nine in the past so the drive works correctly. The corrections don't work, but Kim figures out a new set of corrections which collapse the slipstream instead, saving everyone aboard. Along with the corrections, the future Kim sent a message to his past self explaining what happened, but if he's seeing this all that's changed.
* Another episode took place at a Rennaisance Faire. As a busty woman in a low-cut dress walked by a row of men in armor, each one emitted a clanking sound...except for
* Another episode uncovered the fact that a lab technician falsified fingerprint evidence that sent two men to prison. One of them had been murdered in prison by the time the episode takes place. The survivor is later exonerated (the lab tech could be charged with
* Another episode uses a similar gag when the Griffins go to Quagmire's lake house. Peter sits in a chair as Lois flips a light switch. This makes a nearby lamp spray Peter with knock-out gas, rips off his clothes, spreads his legs, and
* Another episode uses the "rephrase the question" version. Sheldon is in the dining car of a train, and the waiter asks "Any questions?" Sheldon, being a train enthusiast, asks a very detailed and technical question about the car itself. When the waiter clarifies that he meant questions about the food, Sheldon responds "Is this food being served on a car which..." and repeats his previous question.
* Another episode uses the trope: A man hires private security to find his stolen loot. The FBI is also on the case as people were kidnapped during the theft. The private security guys barge in as the FBI is about to arrest the kidnappers, which allows them to escape. Don immediately has both men arrested as accessory to the kidnappers, and warns their employer that if he sees any more of his employees following FBI agents around, he'll have him arrested under the same charges.
* Another episode uses this montage when the gang is trying to find Hyde a girl.
* Another episode was based on the case of Peter Porco mentioned in the
* Another episode was later devoted to this, showing a future where Daniel received the knowledge of the Goa'uld, and also their evil.
* Another episode when perfectly healthy Grandpa Phil thinks he will die on his 81st birthday believing it's a curse that no one in his family ever reached pass this age. Until realizing in the end that his ancestors died at 91 giving him another 10 years to live.
* Another episode when Spunky after eating too much grows steadily fatter until eventually his feet don't even touch the ground. At the end, he's given liposuction becoming slightly slimmer than usual. This episode focused more on Bloaty and Squirmy.
* another episode where the exact same thing happens, this time with the story of Rumpelstiltskin. Even Roy and Wade get in on the act.
* Another episode, where the kids plan a strategy with the gun shop owner to defeat the bullies with water balloons, has a
* Another episode where Timmy wishes for a radio station has Timmy running in circles as an angry mob approaches him in his treehouse. At the end, the trench is almost as tall as Timmy.
* another episode while Dean is chowing down on a burger. Dean keeps telling him to

shut up, but eventually finishes the burger just to show Sam he's not affected.
* Another episode with the same shtick had Jerry get coated in flour, thus rendering his invisibility useless.
* another episode Wojo arrests a man for trying to kidnap another man (Wojo saw him trying to force the second man into a car), only to be told that the man arrested is a Soviet diplomat attempting to stop another Russian from defecting. Capt. Miller is forced to let the would-be kidnapper loose.
* Another escalation of the Japanese war in China start with a Japanese soldier peeing in the woods. Seriously - he missed role call after training while taking a leak, and his commanding officer challenged a nearby Chinese patrol, thinking the man might have been abducted or attacked by the Chinese. Tempers flared and somebody (from which side is not known) opened fire. Things were nearly smoothed over by the local commanders, but the Japanese Army high command refused to de-escalate as they had been looking for any old pretext to expand into more of China anyway.
* Another especially bad example involves a bratty kid demanding a lawyer before he talks to the cops. His father refuses and basically threatens to beat the crap out of him if he doesn't tell the cops what he knows. The Rangers stand there looking downright smug and amused at the whole thing. Never mind that they just violated the rights of someone who, as rude as he is, explicitly asked for an attorney. In
* Another especially convoluted example would be Redd Foxx (born John Elroy Sanford), playing Fred Sanford in
* Another, even more controversial incident occurred when two members of Arrow Gaming, Kok Yi "ddz" Liong & Fua Hsien "Lance" Wan, bet really expensive items (Arcanas, Whaleclaw Hook, Golden Immortals, you name it) against their own team in their match against CSW, which again was a match that Arrow Gaming was heavily favored to win but would have no bearings on the standings. Come the match and the team - but particularly those two - made really questionable plays, such as intentionally pursuing against five heroes, and even teleporting right in front of them to feed even more. Once the match was over and Arrow Gaming had lost, controversy arose when organizers discovered the betting scandals, and only intensified when the team
* Another even more striking example comes from the episode "Time Will Tell," involving
* Another evil magician among Diana's rogues gallery is Thomas Asquith Randolph, the White Magician. He was once a hero but ultimately became obsessed with gaining power. He was defeated by Diana with help from her fellow Amazon
* Another evil ninja abducts her and puts her under his mental control by drooling on his fingers to lubricate them.
* Another example: After Fred and Barney go behind Wilma's and Betty's backs, quitting their jobs, opening their own drive-in restaurant, and hiring cute waitresses, neither Wilma nor Betty lets them live it down, and embarrass them by re-enacting the waitresses' song-and-dance routine at dinner, causing Fred and Barney to shrink in humiliation.
* Another example: a kid yanks the bottom can of a stack and the whole store collapses.
* Another example appeared in the script of "Mirror, Mirror" and the James Blish novelization but not the episode. In this version, Mirror Chekov hit on Uhura, not Mirror Sulu, and when Uhura got home, Chekov Prime suffered her displaced irritation,
* Another example appears in several instances. One example would be Uldaman. At the end of the instance, the group would find a chest of one or two gear pieces that they take. However, your avatar seems to ignore the fact that there's large piles of gold right next to the chest. Perhaps the ultimate example is Utgarde Pinnacle, where the
* Another example are B4-D4 and T1-N1, from the Czerka office. Both are uncannily similar to 3PO and R2, except for being quite sociopathic.
* Another example are the deliberately terrible special effects in the machinima

portions for the sake of comedy, where various objects have quite obviously been added in after the fact. Of special note is that certain additions (Donut's housewarming gift, the pile of stuff Blue Team won from the Reds, etc.) originally looked too good and had to be made worse!
* Another example are the Hyperians, who are Space Egyptians although much more brutal and animalistic. One of the Hyperians
* Another example at Armageddon 2004, where two wrestlers involved in a Fatal 4 Way match talk backstage:
* Another example came from Katey Segal's first pregnancy. The writers fully embraced it as material for that season and had Peg in-show getting pregnant as well. Unfortunately, this plan did not materialize as perfectly as the writers hoped. Right before the predetermined birth, Katey suffered a miscarriage. This forced the writers to give the season an
* Another example came with him, portraying the All-American Babyface against Alexander Rusev's
* Another example: Coleene, Fry's polyamorous love interest from the second
* Another example comes at the end of the FAQ Section on Chapter 2: Life, revolving around the author refusing to explain to aliens what creationism is, despite "billions of people" believing in it as the origin of life up until the end.
* Another example comes during the Resurrection Ship arc. Starbuck shuts down the engines on her stealth ship and flies it right through the Resurrection Ship on thrusters alone. She goes completely unnoticed until she powers her engines back up again, at which point she's jumping out anyway.
* Another example comes earlier on, when Gary, in 'disguise' as Ahmed, is sat in a fleeing jeep with some terrorists, who have turned around and started driving towards Gary's teammates:
* Another example comes from "Poppa's Got A Brand New Badge", where Homer creates his own security agency. He implores customers: "don't dial 911, dial 636...
* Another example comes from the reveal of the mother's name. In an early episode, Ted has a conversation with a stripper named Tracy, joking to his kids that this was their mother. The mother's name really is Tracy.
* Another example comes from "Treehouse of Horror II", where Homer's brain is placed in a robot and the robot proceeds to sleep and drool oil.
* Another example common in America: within a week of New Year's and the Fourth of July, in the rural areas of the Great Plains, there will suddenly be a massive number of tiny wooden booths set up in cornfields by the roadside, where you can buy any number of supposedly legally obtained fireworks over the counter from someone who always appears to be either a mechanic or a farmhand. After a week (if not exactly, then almost so), they will disappear without a trace. Occasionally, if you're very lucky, you can see the dark, faded, carved-out husk of one of these little shops of joy standing empty in the middle of a cornfield in August, looking
* Another example could be the Mercury Grand Marquis, a large luxury car. While it was intended for older, more conservative (and admittedly white) buyers, it is very popular among young African-Americans.
* Another example, during the Black Fleet Crisis, rejected Tenn Graneet's application to join the Republic military because he came from an Imperial planet. The main thing this earned him was
* Another example for The Legend of Korra is alternative starting points for Korra and Asami's relationship. In season 1, Asami's father is an Equalist, an anti-bending revolutionary. A popular fanfic origin is one in which Asami fully serves them rather than turning on her father and siding with Korra. This generally involves Asami attempting to seduce Korra. A similar situation occurs with Korra having been captured by the Red Lotus as a child, at which point she and Asami are on opposite sides for a different reason, until they inevitably find each other.
* Another example for Todd is, of course, his part of "The Ballad of Sweeney Todd".
* Another example from 3, after Joker finds out that EDI has installed herself into a female body.

* Another example: from 'A Bird In The Hoof', Princess Celestia meets Twilight's friends for the first time in person. She's been told about them and what they do. When Fluttershy is introduced to Philomeena, Celestia merely asks Fluttershy "Isn't she lovely?" Cue the bird losing a few feathers off of her already near-featherless body and making a horrible hacking cough as though she's dying
* Another example from Angelus was the psychological torture he inflicted on Drusilla before he turned her that drove her crazy. After this, Drusilla is quite a fan of inflicting torture on people as well.
* Another example from Arrival has an achievement called Last Stand, earned by
* Another example from Batman's rogue gallery: no matter how many times poor
* Another example from Enterprise is Shran. They run into him several times, and he tends to take the focus when he does appear, because he's always got his own problems. He even gets to
* Another example from Farage, who on the day of the 2015 general election was quoted as responding to accusations of being a sexist, racist, homophobic former banker as saying that he "was, in fact, a former commodities trader."
* Another example from Futurama is the toy kitty-cat doll Farnsworth invented, QT McWhiskers, which was then redesigned by Mom to be 16 feet tall and shoot lasers out of its eyes. She was turning it into a military robot, but she did the same with his previous one, turning it into a "colossal Tammy Tinkle doll". One cannot begin to hazard a guess as to the needs of that one.
* Another example from Germany: the 1984 Herbert Grönemeyer song
* Another example from may be the record's other single, "Spit It Out". While it's faster and longer than "Wait and Bleed", it's one of the band's few songs that has out-and-out rapping, causing them to often be pegged as
* Another example from Sharon, dating back to the 60's - Captain America is called in because Sharon has been captured by the Trapster. Upon reaching her, Cap finds that the Sharon captured by the Trapster is a robotic double and that Sharon was never in danger.
* Another example from Shining Armor's story: Private Ranger is asking around for advice for his next date with Sunset. He gets some good advice from Shining and Ellis, but when he asks
* Another example from South Carolina: During the pregame at home football games, the Gamecocks enter the field to the "Dawn" section of
* Another example from that game might be the octopus Ultros. Ultros isn't really that threatening, truth be told, but he's a
* Another example from the beginning of the movie: the Romani woman Frollo kills presumably cracks her head open against the steps of the cathedral, but no blood is seen, despite the lyric that follows — "See here, the innocent blood you have spilt on the steps of Notre Dame."
* Another example from the franchise is Clark's next-door neighbor Gary. In "Time Ryders", the second Linear Men story from the
* Another example from their song, "Yeah, The Deranged Millionaire": "And people from miles around were miles away."
* Another example from the same part occurs when Josuke is able to track down the minor antagonist Yuya Fungami, after spending all day being chased by his
* Another example from the same series (8) was the very expensive effect of blowing up Starbug in the first episode, which they ended up using noticeably way too many shots of in the opening credits.
* Another example from the same series are the MECH troopers; aside from their leader Silas (whose entire head is plainly visible), all of them wear full face masks with built-in goggles that conceal their identities.
* Another example from the same series is villain Prince-Admiral Delak Krennel, who has designed his own uniform.
* Another example from the same series was when Misaki grabbed Kuuga to threaten him into stopping flirting with her and leading Sakura on.
* Another example from the same show is Lionel's father Rocky and his lover Madge, who get married in their eighties.
* Another example from the third game involves a massive stone lantern with

upside-down bloody writing on it. Gumshoe voices the results of his special Gumshoe investigation: At the time of the murder, the stone lantern
* Another example from the United States Marine Corps would be Gunnery Sergeant Carlos Hathcock, who served as a sniper in
* Another example from this film is how Young Spock salutes the Vulcan Council.
* Another example from WWII was the analysis the RAF performed on aircraft returning from combat. They studied the battle damage sustained by their aircraft, made a graph of the various parts of the aircraft, and resolved to reinforce the areas that seemed to be shot up the most. Then one bright fellow said they had it completely backward. Since those areas were found the most on returning aircraft, it was deduced that they were actually the least critical. Areas that needed reinforcement were actually the areas that were lowest on the graph, as the aircraft receiving damage there did not make it home. This was followed and survivability increased.
* Another example: Gulliver's love interest Darcy, who follows him to Lilliput, is a giantess compared to the Lilliputians. Despite this, she's pretty much a
* Another example had a competition between Luann's brother Brad (Betty) and Dirk (Veronica) for the affections of Toni.
* Another example had the portal open halfway in a building with two of the heroes ending up inside and two outside.
* Another example happened in a Battle Frontier episode, where May meets an old woman at a run-down train station waiting for her husband to return. The woman's granddaughter reveals that her husband wanted to leave to become a Pokemon Doctor, but she didn't want to leave because she was pregnant. She wanted to tell him before he left but was unable to catch up to him. Her husband died in an accident a year later, but she
* Another example happens at the start of the fifth season, when Jazz comes to visit, complaining about why he's the last to know Will's back from Philadelphia before asking who's playing the mother that season. A boy comes out to tell it's the same actor confusing Jazz who he is. Will reveals it's Nicky who was last seen as a baby in the previous season. While Jazz looks on bewildered, Will looks to the camera and makes a "growth spurt" motion.
* Another example happens in his first encounter with The Hulk. He throws his hardest punch and not only does he hurt his own hand but the Hulk doesn't even blink.
* Another example happens in the main game in Will, a random bandit patrolling the Tundra Express area. The ECHO he drops turns out to be a
* Another example happens in the Trial of the Crusader raid, where an NPC starts congratulating the players on completing the Trial....and is rudely interrupted.
* Another example has the devil appearing in a town and challenging the inhabitants to bring him a clock he cannot fix. No matter the state of the clocks they bring, the devil is able to fix them, even making missing parts appear out of thin air. Finally, one person brings him a clock that works perfectly, which means there is nothing for the devil to fix.
* Another example has you asking a gang leader what he has observed about a paramilitary operation in his territory.
* Another example in "A New World" when Connor confronts Angel while Tyke and his gang have them at gunpoint. The LAPD storm in and show no interest in trying to make the arrest, instead choosing to execute everyone, shooting Angel and trying to kill a fleeing Connor. Compare and contrast the Buffy episode
* Another example in D&D comes from Keith Baker's presence on the official Dungeons and Dragons forums, where he goes by the handle HellCow. As creator of the
* Another example in the DC Animated Universe, much earlier on, is Batman's own master; Yoru Sensei, who quickly immobilizes Kyodai Ken, just shortly after Kyodai beat Bruce Wayne in a sparring match. Given that Kyodai was less than half Yoru Sensei's age, and Yoru Sensei himself looks like the man in the example picture, he definitely qualifies.
* Another example in the DLC. Akoth's not kidding when he says that Cirith Ungol's in bad shape for a siege. The allied captains under him are all in the low-10's in

level and have
* Another example in the same news clip, though with no reporter and instead implied death of the cameraman. The camera shows the Queen of Blades walking down a street, she then snaps her head to the side and looks right at the it. The camera goes cuts to static immediately after.
* Another example in the same storyline involves a sign reading 'Brie Meighsaton', (the name of one of the ghosts trapped in the house) being damaged, and Torg puts the M back upside-down. "Brie Weighsaton". Riff says "Not cool!", Torg asks what a ghost is going to do about it, and she scares him into hiding under his bed.
* Another example involves Belkar getting cut from a noose, only to fall on Elan.
* Another example involving Jen comes in the episode where she goes on a little
* Another example involving Nelson was where he messed Bart's science project - a model of the human digestive system - causing the entire school bus to overflow with goo.
* Another example involving the Springfield mafia occurs in "Mayored to the Mob", when, during a poker game, Louie declares a hand of six Queens, only to be beaten when Fat Tony declares seven Queens.
* Another example in war gaming, you may have heard about concerns about diesel powered submarines being able to stealthily (since they can go completely silent) ambush super carriers. Well there have been a few criticisms of the war games that have been used to collect this data, namely in how the sub marines find the carriers. In real life it would be hard to find the carriers since the ocean is a big place and diesel subs are rather slow (especially when submerged). However these war games often force submarines to spawn within a certain distance of the carrier. The sub commanders can then use the rules for sub spawning and their own locations to reverse engineer the most probable position of the carrier, resulting in a confrontation every time.
* Another example in which the Buffalo Bills were a victim came near the end of the 1999 AFC wild-card game against the Tennessee Titans in what became known as "The Music City Miracle". With seconds left, Steve Christie hit a 41-yard field goal to put Buffalo up 16–15. Then came the kickoff, which was a squib kick first fielded by fullback Lorenzo Neal, who handed the ball to tight end Frank Wycheck. Wycheck then threw a controversial lateral to receiver Kevin Dyson, who took the ball 75 yards for a touchdown (which was confirmed after instant replay showed that Wycheck had not thrown an illegal forward pass), resulting in a 22–16 win that led to the Titans march to
* Another example in which the storyteller, rather than the child, derails the story: the short story "Little Green Riding Hood". The grandfather telling the story keeps trying to change it (replacing the wolf with a giraffe, for instance) and the child keeps correcting him. Finally the grandfather manages to get out of telling the story by giving the child money to buy chewing gum.
* Another example is after Jadeite fails Queen Beryl too many times. She puts him in what she calls "Eternal Sleep", which is essentially this trope.
* Another example is an episode where a dog had apparently mauled a woman to death. The bite marks on the woman's body matched the dog's teeth exactly, but the owner claimed the dog had died before the apparent attack.
* Another example is an Irken named Zeke, who self-publishes magazine articles about various shady activities carried out by the Empire.
* Another example is a Scottish man who is not sure whether the door sign represents gents or ladies, due to the skirt also being represented as a
* Another example is Attea in “Vilgax Must Croak.” Ben tries to make a truce with her and form a deal concerning their mutual enemy Vilgax. Attea flat out refuses because she still wants revenge for Ben imprisoning her in stasis jail, and promptly attacks him, leading Ben to immediately rescind his offer and fight back. Therefore, making Attea’s mission even more difficult than it already. Surprisingly, none of her mooks lampshade her incredibly stupid and petty decision.
* Another example is contained in "The Great Outdoors", where Stimpy decides to go skinny-dipping and has to talk Ren into stripping.
* Another example is Dee's friend/housemate. He has dark skin, but unlike Tajel or

Prof. Khumalo, he has no name or any distinguishable ethnic features to determine his background.
* Another example is Diego, who was in love with Jeanne (The Ghost with the Sword mentioned above) while she was alive. Any of the court robots (the originals were built by Diego) will respond to "Jeanne" with "She died and we did nothing."
* Another example is Dr. Wondertainment, which may or may not be a title passed down.
* Another example is "Energy Vampires" by Peter Hammill, which describes various incidents and encounters involving some of his more loony fans.
* Another example is episode "The Secret of Easter Island" of the animated adaptation of
* Another example is found in the First Age. There the Solar Queen K'tula twisted herself into a fundamentally inhuman cephalopod horror to the point that many of her Solar charms ceased to function properly (because she was no longer remotely human), but her Exaltation lingered because she was still unmistakably alive and mortal (in the sense that her lifespan wasn't infinite).
* Another example is found in the short story "Reports of Certain Events in London", which is about
* Another example is from the novel's famous opening line: "The sky above the port was the color of television, tuned to a dead channel." As TVs back when the novel was written showed gray static when tuned to a dead channel, this description was meant to evoke
* Another example is from "Tuesday the 17th", when Gus reaches into a dryer and pulls out bloody clothes. He then wipes it on his pants, which turns out to be a big clue for Shawn that it's just red food dye, since he knows Gus faints at the sight of real blood.
* Another example is Gao the Greater, another high-ranking member of the same syndicate.
* Another example is Gilberto Simoni, who won Giro d'Italia twice during his career and never finished higher than 17th in Le Tour, usually dropping off in the early stages.
* Another example is God the Nightkin in Dead Money. He's a massive jerk and will often threaten to have you dismembered. Depending on how you treat him, he can
* Another example is Hatori blaming himself for putting Kana through so much heartbreak and pain.
* Another example is how Calvin acts like he knows how to fix a leaky faucet despite never doing so before. Predictably, he winds up flooding the bathroom instead.
* Another example is in a flashback when Lois is pregnant with Reese and he kicks so hard that it's clear that he already has a nasty violent streak.
* Another example is in "Masterpiece", the killer turned himself in to police after kidnapping five people, saying they'll die if not found in a few hours. The team finds where they're being held and leave, except for Rossi, who continues interviewing the killer. At this point, the killer reveals that the location is a trap, and launches into a full-on motive rant, revealing that Rossi had arrested his brother (also a serial killer) and he'd wanted revenge. Cue Hotch calling to tell Rossi that the trap was right where he'd said it'd be, and all the victims are fine. Rossi'd guessed the trap, but intentionally triggered the motive rant to get the killer to admit to his other killings on tape.
* Another example is in "Pangs" which opens with a handsome fresh-faced youth with
* Another example is in the 1937 short "Rushin' Ballet", where after Spanky and Alfalfa incur the wrath of the neighborhood bullies, Butch and Woim. They manage to hide in the basement of a ballet studio disguised as mannequins, and while the two bullies are looking in the laundry basket for them, Alfalfa sneezes and almost gives them away, but
* Another example is in the episode "Sacrifice" where he gives a very depressing and drunken monologue about life in the aptly named "old Forgetty's Pub" and then antagonizes everyone inside the bar so much, that he drives them all away.
* Another example is in the second season when Harry returns from his rehab and

lets it slip that the reason he left was to recover from his addiction and not a vacation. Flash is, not surprisingly, pissed that Harry was juiced during his time on the team, because that would mean they'd lose the football championship he busted his leg for. Later in the episode the trophy is taken away and the coach informs them they have to wait for the investigation. Everyone assumes Harry was the one who came clean, only for Flash to step up and admit he was the one who told the coach, saying there was no point in having it if they didn't win it fair.
* Another example is Jimmy Aleister, who personally mentored Van Helsing in the latter's entire career to the point where both lost their families for their service. In a very ugly turn of events, he is revealed to be an irredeemably twisted criminal mastermind who killed his own family and Van Helsing's all with his own hands, purely for the sake of trying to traumatize and
* Another example is John Cleese's Drill Sergeant Nasty who trains new recruits how to defend themselves against various kinds of fresh fruit.
* Another example is Jonas Quinn. He was created out of whole cloth as a replacement for Daniel Jackson after Michael Shanks decided to leave, and stayed as a member of SG-1 throughout the sixth season. Then, after Shanks changed his mind, he was written out, came back in one episode of the seventh season, and after that, was never seen again.
* Another example is Meleager, who was fated to die young, specifically when a log of firewood burned out. His mother took the log and hid it away, and Meleager grew up to be a well-respected hero. But during the Calydonian Boar Hunt, he murdered his uncles in a rage after they insulted his martial prowess. His mother was furious and threw the log into the fire, and Meleager died.
* Another example is Michelle Jenneke's pre-race dancing. People remember that who couldn't tell you her name, nationality, the event she was racing in, and the outcome of the race. (Jenneke's Australian and she was racing in the 100 meter hurdles race at the 2012 World Junior Championships in Athletics in Barcelona, Spain. She finished in fifth place and American Morgan Snow won the event.)
* Another example is Newton, and appropriately named technocratic planet.
* Another example is Onyxia and Nefarian from Classic. They are brother and sister Black Dragons, working to create the Twilight Dragonflight. They get along swimmingly, since of course they have the same goals for much the same reasons.
* Another example is (probably) Augusta Longbottom. We never actually hear what she's a master of, but she's incredibly powerful.
* Another example is Rando: he was a demon that could perform and even improve upon special abilities after seeing them used. Prior to his battle with Yusuke, he had already acquired up to 99 of them. However, he does not have complete mastery of his stolen techniques and doesn't understand their weaknesses. He gets done in because he didn't know that his chant technique can backfire if his victim can't hear him.
* Another example is Redcloak, whose entire character is based around hypocrisy. He says that paladins are unnatural abominations due to their magical lack of fear. He refers to himself as a "100% all-natural goblin" during the
* Another example is Shuma-Gorath. Most people know him more from the
* Another example is Spain and Romano, who actually did live together for a while. Despite Romano constantly referring to Spain as a 'tomato bastard' the two do look out for each other.
* Another example is "Squidward the Unfriendly Ghost". Spongebob and Patrick accidentally melt a model of Squidward that they mistook for the real one, and while they were panicking about saving it, the REAL Squidward comes out of his bathroom, covered in white powder from fixing himself up, and naturally, Bob and Pat freak out and vow to do anything for Squid's "ghost" in apology. Eventually turns into
* Another example is Sugar, the drug dealer from downstairs. He gets himself a quick
* Another example is Team Catastrophe. Originally three down-on-their-luck losers from Satellite, the Three Emperors of Yliaster gave them two
* Another example is that a quorum (ie a majority of the chamber's members) must

be present to vote before any law can be passed. However, the rules of the House and Senate both presume that a quorum is always present unless a member demands a quorum call to actually count the members, or a roll call vote is held in which each member's vote of yes or no is recorded. Thus, if nobody shows up to a session to oppose a bill and demand a quorum, it can be "unanimously" passed by voice vote despite far less than a quorum having voted. This infamously happened with the so-called
* Another example is that Mr. Belding was originally conceived as being black and over 50yrs old. Dennis Haskins won the part despite being neither.
* Another example is that you can't just make stuff with magic and expect it to stay around. It'll be gone within minutes. Unless you happen to have mastered the First True Magic that is, or you're
* Another example is the "3 Ton Tank" M1918. It was build late in WWI and based on the Renault FT-17 (the American copies of these were known as the M1917 or "6 Ton Tank"), but put on such a strict diet that it lost its turret in favor of a forward gun with limited traverse. This was to be a machine gun in all cases, while part of the FT-17's had a 37mm cannon. 15 of these "tanks" were build before the war ended. As much of what the designers skimped on was space for the crew, tankers of those days may have been pretty glad it never really entered service.
* Another example is the Anonymous Raw GM. After a month or so period where the Raw GM position consisted of
* Another example is the beginning in "Minecraft Speedrunner VS 3 Hunters FINALE REMATCH.", where the usual process of Dream running away with
* Another example is the big guy-little guy team of Bulkhead and Bumblebee. They've been close friends ever since attending Autobot Boot Camp together, and are usually seen watching each others' backs on and off the battlefield. The two have even developed their own variation on the Fastball Special utilizing Bulkhead's wrecking ball hands and Bumblebee's smaller stature.
* Another example is the bridge from 'Motivation', in which Deryck sings a mouthful of words at an
* Another example is the case of the blacked-out photograph in Kazuaki's route. Kazuaki tells the protagonist that the subject of the photograph is someone he loved dearly, but who he lost.
* Another example is the death of Kama, the god of Love, because he interfered with Shiva's meditation. His wife pleads with Shiva who promises her that he would be reincarnated. He is reincarnated as
* Another example is the fight between him and Danny Cho/taekwondo martial artist and stuntman Mike Moh. The scene is both relevant
* Another example is the Gunge product line, consisting of delicacies like the Slime Sauce, Bacteria Soup, Maggot Steaks, Black Widow Spider Wine matured for a week in an old boot, and Mould Jam. When the initial release sparks huge protests, the Justice Department outlaws Gunge, buys the factories, blends the foodstuffs together until it is indefinite mush, and re-releases the products under an artificial brand.
* Another example is the idol group Rummy Labyrinth, who is sometimes called "RummyLaby" for short.
* Another example is the Klingon Bat'leth; a number of functional (read:
* Another example is the Kodoku spell: Naraku locks a bunch of demons in a pit and force them to fight. The winner assimilates the body parts of the fallen, ending up in a giant, grotesque beast.
* Another example is the landscape painting in a different room. Every so often, a dark, vaguely-human figure appears on the horizon. It's subtle enough that most people don't notice.
* Another example is the Norfolk & Western Railway and the Southern Railway merging in 1982 and becoming the Norfolk Southern Railway.
* Another example is the panda. About half of all panda pregnancies result in twins. The mother will then select one to care for and abandon the other, which dies of starvation.
* Another example is the players summoning themselves. This happens on a fairly

regular basis.
* Another example is the product "Third and Third and Third" in the episode "I second that Emotion", a parody of "Half and Half."
* Another example is the recurring Job Class of Dragoons, which originally came out in
* Another example is the relationship between Agni, the god of fire, and Brillith, his summoner. Since Agni is effectively immortal, he knows he's setting himself up for this, and worse, keeping him summoned is only shortening Brillith's lifespan.
* Another example is the Russian invasion of Venus. The fleet goes there the hard way, without alien tech, and when Rhodan finds out he just swoops in and shoots all the landed rockets. On the way bck he also destroys half of the second wave by accident. The survivor split into 3 groups, the ones who just want to settle, the ones who want to capture the fort they were sent to capture and the ones which want to rule over the rest with the helis and tanks which the second wave had. The Rhodan comes back, and flies low over one of the camps. That group is now mostly destroyed, and some guy who happened to be on patrol is now the leading officer.
* Another example is the sewing challenges. There will always be at least one or more challenge per season that involves creating a look from scratch, plus the makeover challenge. This has been a
* Another example is the Spurned Graduation Gift. A son is about to graduate from high school or college and has a rich father. He makes it clear that he wants this expensive
* Another example is the Thanos vs Darkseid battle. Thanos is invited into Darkseid's home dimension and learns the hard way that the Infinity Gauntlet won't work outside of his own universe and he can't outright give Darkseid's true form the Snap. Darkseid puts Thanos through the Omega Sanction where he'll be subjected to fates and deaths each more humiliating than the last, starting with Deadpool making out with Death and shooting the Mad Titan dead with a common gun.
* Another example is Tombstone. He was one as a teenager, and only got worse as an adult, becoming a hitman by trade, where his tendency to bully people weaker than himself is still obvious.
* Another example is Toph (who is blind) crying when she and Sokka are hanging from the airship. With only Sokka's hand for contact - and her grip slipping - she cannot see a thing, and only knows she's high in the air.
* Another example is Two's former roommate, Dee, whose formal speech matches a formal upbringing. She also apologises at a frequency that approaches a verbal tic.
* Another example is uu, who persistently pesters Dirk to draw filthy hardcore porn for him... of people acting out totally normal, nonsexual romantic actions such as kissing or hugging. In fact, one picture Dirk drew where one person was copping a feel was outright rejected. (
* Another example is when Arnold met his favorite author who became bitter and angry after years of writer's block, but Arnold's faith to her despite her cruel treatment of him brought her back to writing.
* Another example is when Homer is put in charge of the Nuclear plant outsource in India. Mostly we see his
* Another example is when Spongebob spends most of an episode looking for his ID badge, and it turns out that it was on his shirt all along, and he didn't notice because it was on backwards.
* Another example is when Ten gets furious at his clone for wiping out the Daleks in "
* Another example is when the Straw Hat Pirates raided Enies Lobby and defeated CP9, who have never failed a mission,
* Another example, is when they were at the hot Springs and Keiichi was trying to cover up his nakedness. Belldandy was totally unaware of Keiichi's embarrassment at being nude in front of a group of girls and thought that Marller had hurt him. Both Marller and Urd considered her complete obliviousness to be scary
* Another example is when two assassins use shape-shifting amulets to impersonate a pair of knights and enter a tournament. After they are killed, Gaius removes the amulets

* Another example is where it appears that Sheila has come to her senses after Kyle reasons with her, but decides to ignore it, and guns down Terrence and Phillip.
* Another example is with Sheryl Goodspeed in “Descent Into Darkness”. She teams up with Todd Watson to help get revenge on her son, Gary, in exchange for Todd helping her find dimensional keys. This is especially despicable because even though she successfully steals the key, her primary goal, she still tries to appease Todd and capture Gary anyway, threatening him and Nightfall with a laser blade. This really says a lot, considering all the things Sheryl did not keep her word on...
* Another example is Yami Yugi / The Pharaoh, who was in the Millenium Puzzle and
* Another example: Jessica has to save an old Irish cop friend who is set up by a career criminal dying of brain cancer. He used a hollow wall and a stone to drag the gun out of view.
* Another example: Karl believes that snakes and spiders like hiding under rocks. The Earth is essentially a giant rock, with Australia underneath. That's why there's so many snakes and spiders in Australia.
* Another example: Leave your weapon unattended? Do a series of Iron Mikes to 'buy' it back. Fall asleep in a class session? Stand at the back of the room, holding a canteen, looking through the loop that holds the lid on (playing sniper it's called.) Get caught watching the TV in the mess-hall? You get put on your elbows and toes to 'watch TV', and occasionally change channels. Caught doing something in the chow line you aren't supposed to? Stand outside the line reciting EXACTLY what you did so that other recruits don't repeat the mistake. It's safe to say that since the days of a Drill Sergeant beating the snot out of you ended, it just encouraged them to get creative in the HOW they punish you and your whole unit.
* Another example lies with the first ranked A-Class hero, Sweet Mask. Gradually throughout the series, he proves himself to be just as bad, if not even worse than Tatsumaki. At least Tatsumaki's sheer arrogance is backed up by how she legitimately
* Another example: Los Angeles Unified School District has a policy of 'housing' teachers accused of being unfit for their jobs - placing them on indefinite paid leave, as opposed to firing them or putting them in non-teaching duties (this is based upon management's interpretation of the teacher contract, and, well, not wanting people to do jobs they aren't qualified for). A 2009 case involved Matthew Kim, a former Special Education teacher with Cerebral Palsy, who had been on the payroll for seven years since being removed from teaching over a sexual harassment accusal, costing the school district $2 million in salary and legal fees over that time without either teaching or otherwise performing work for LA Unified (though, to be clear, much of that figure comes from the murky results of the lawsuit Kim filed alleging he had been specifically targeted because of his handicapped status). Of course, the counter-argument is that
* Another example: MARCO POLO SHIRT (Before & After). At one point, everything but the R was showing on the bottom word. When R finally was called, Sajak said, "Thank you!"
* Another example. "Ndovu's Last Journey" had a fight in an elephant graveyard. A villain falls and we see (from his point of view, no less) him fall towards the business end of an elephant skeleton tusk. The view cuts away before impact, but we do hear a rather nasty sound effect and see other characters flinch.
* Another example occurred during the Albanian road trip. The three hosts were to test high-end luxury sedans allegedly for the Albanian Mafia, except Bentley pulled out in providing their Mulsanne saloon car at the last minute, leaving Jeremy without a car. Luckily he said he had made some "
* Another example occurs earlier in the series, when Kinoshita overhears what he interprets as Azuma sexually assaulting Tsukino. Turns out she was just upset by him soaking his dough. And that's not a euphemism.
* Another example occurs in "Dr. BrainChill", wherein Dr. Brainstorm and Jack chat idly while a fight rages on around them.

* Another example occurs in the episode ‘Chimdale’ where Stan is revealed to be bald and wears a wig to hide. At the end of the episode, it’s revealed that the family knew all along, with the exception of Steve, who has been trying to expose Stan’s baldness. According to Roger, they never told him because they believed he might overreact.
* Another example occurs in the Third Doctor story "Inferno". This concerns a project to drill through to the Earth's core, with the Doctor accidentally traveling to an
* Another example occurs when, if you gave Tali the geth data during her personal mission in the first game, you can use it to prove it's really you when you meet her again in the second.
* Another example occurs when Jake finds some old home movies from back when he was a kid and is eager to see them despite Helen's failed attempts at reminding him that his childhood wasn't that great. The truth comes rushing back to him once he watches them however. Helen later lampshaded this tendency in Is It College Yet.
* Another example of a black sheep hit from him is "Remind Me", a duet with
* Another example of a collector's edition: The Collector's Edition of
* Another example of a general pulling this would be Zhuge Liang, who crafted a plan which required every other general to follow posthumous orders to the letter, along with a couple of alternatives in case things weren't going as planned, as he was growing too sick and knew he would not last the entire engagement. Rumours circulating about his death were quashed when his units began to move in a formation he commonly used and namedropping him numerous times when orders had to be shifted. The intended gambit was that Sima Yi believe the rumours are false and that he is still in control, even from his deathbed. The
* Another example of an accidental lobotomy was Phineas Gage, a railroad construction worker who had a metal rod driven through his skull while directing the demolition of a rock. According to his family and friends, he became much more short-tempered and impulsive after the accident. In modern times, however, it has been suggested that the personality changes he suffered were exaggerated, since there are little accounts of what he was like before the accident and he was much more stable in his later years before
* Another example of an aircraft with downward-ejecting seats is the Boeing B-52 Stratofortress, but only for some of the crew. The B-52 has an enormous double-decker cockpit and the navigator sits on the lower deck, directly below the bombardier and electronic systems operator. Thus having him eject upward would be impossible, and his seat simply drops through the floor when ejecting. If time and altitude allow, the other 4 crew can climb down a ladder and bail out through the hole where the navigator's seat was, as this is less dangerous than being launched upward at over 12G. And if any observers are along for the flight, they would do the same as they'd be sitting behind the navigator without an ejection seat.
* Another example of an "alien spacecraft" that looked vaguely birdlike, it could never be a bird because "no bird has a
* Another example of benevolence leading to jackassery is found in the German 2010 version of the Grimm tale "Das blaue Licht". The Genie (smoking pipe, not lamp, but it amounts to the same) evidently must have worked at a hotline in an earlier life and bombards the wisher with loads of trifle questions and pointless alternatives concerning his wish, peppering the deal with snarky asides about stupid wishers. Can get very annoying, for example if you are about to be hanged.
* Another example of bizarre weapons on the Allied side is Walther Christie's ...unconventional...
* Another example of Cleaned Up for TV - in the original story ("Arena" by
* Another example of it actually working would be in episode 13, when the viral angel attacks Nerv. When one of the Simulation Evas reaches for the Pribnow Box, an emergency shatter-and-pull mechanism blows the arm off, protecting the crew in the Box. The makers probably only allowed that because dying that way is not painful enough in Hideaki Anno's twisted, twisted imagination.
* Another example of keeping children away while the grownups get down to business: in rural Sweden, back in the good old days, a child, deemed too young to

witness the slaughtering of a large animal, would sometimes be sent to the neighboring farm for some non-existent tool that the adults claimed to need before they could start. The neighbor, being, of course, in on the joke, would send the kid even further away, and so on until somebody decided that the poor kid had been running far enough and confesses that the tool isn't needed. When the child gets home, all the gory and icky stuff has already been taken care of.
* Another example of language drift occurs with Westron (the "common tongue," represented by Modern English in the books). It's noted in the Appendices that Westron as spoken by the Hobbits lost the formal mode of address (i.e., in English, "thou" was the familiar while "you" is the formal. Modern English has since lost the familiar, so only "you" is used today). The form of Westron spoken in Gondor, however, continued to use the formal mode. Therefore, when Pippin converses with Denethor, his Hobbit dialect is much more familiar than would be proper for a commoner when addressing a lord as powerful as Denethor, making him come across as Denethor's
* Another example of McDonald's exempt from this rule is the handful of restaurants whose original franchise agreements were with the McDonald brothers themselves (rather than Ray Kroc), such as the 4th location in Downey, California, currently
* Another example of rather unique zombies from Amonkhet, are the eternals. They are Amonkhet's greatest warriors who were killed by one of their brainwashed gods and zombified by Nicol Bolas. They are coated with blue metal called lazotep, they are stronger than they were in life, as smart and have the same skills as before, and follow Bolas's command.
* Another example of songs from the very same album: "Born to Be Wild" and "Faster Than the Speed of Life".
* Another example of the finishing move arms race occurred during the Von Erich/Freebird feud in WCCW. In the first match, Kevin Von Erich used the Claw to win. In the second match, a second member of the Freebirds ran in, and Kevin used the left-handed version of the Claw on the second Freebird. In the third match, he had the Claw on two Freebirds, and when the third Freebird ran in, he used a leg scissors, so he had all three in a hold and wasn't touching the ground. A subversion occurred when the heels of the WCCW figured out that they could block the Claw
* Another example of the Glee fandom, CP Coulter (author of the famous fic
* Another example of the Pemalites' power is shown when the Animorphs and the Yeerks fight for control of the Pemalite ship that brought them to Earth. The Animorphs are on the losing end when Erik activates the ship's anti-hostility countermeasures. The ship promptly freezes everyone in place, regretfully informs them that they have to leave because of the ruckus, and politely, peacefully, harmlessly kicks everyone out.
* Another example of this are Reavers, warriors who ritually drink dragon blood to gain the ability to drain the lifeforce of others to replenish their own, among other things. Oddly enough, despite skirting very close into the same territory, becoming a Reaver is
* Another example of this comes in "Mental Hen" — the penguins encounter an evil hen who is able to predict their every move. Kowalski's solution? Perform a strangely suggestive song-and-dance routine where he shakes his bottom and flirts with her while Rico switches her bowls.
* Another example of this comes in the form of Zugzwang: a situation in which any move the player makes will lead to a disadvantage (either material or positional), and the best possible action would be not to move at all - which is forbidden.
* Another example of this has a Controller growling to you a chilling warning (
* another example of this. He protests the order, does it anyway, and is subsequently ejected from the tournament. For his part, the kid apologizes profusely as Daniel is carried out of the ring.
* Another example of this is Shults Ford, a Ford dealer located in Pittsburgh, Pennsylvania, who has a radio ad consisting of a guy saying the name of the store, which speeds up. After this, he says "YEEHAW!" in the worst voice imaginable.

* Another example of this is the Korean War Veterans Parkway in Staten Island, New York, where it was supposed to connect to the Staten Island Expressway on another part of the island. Due to protests from residents and environmentalists, the construction project was canceled and the parkway ends at a dead end with grass growing over the unfinished portions of the road, directing traffic to the side streets as drivers reach the highway's end.
* Another example of this on the show also regards Rogelio. This time with his co-star Fabian, and they were initially close as Fabian was a fan of Rogelio‘s. They fell out because Fabian was dating Jane and Jane broke up with him. Their feud becomes difficult to handle, so the producers came up with the solution to kill off either Rogelio or Fabian’s character.
* Another example of this trope is Harry Dresden and Wanda Maximoff, who warns
* Another example of this trope is in the parallel between the victorian guild and the modern cast. Colonel Venture = Dr. Venture (both are related), Eugene Sandow = Brock (muscular bodyguards to a Venture), Samuel Clemens = Pete White (both have white hair and dress in white),
* Another example of this trope occurs during episode 5 "A Date with the Health Inspector". Ed Wuncler III and his friend Gin rob a store ran by people of Middle Eastern descent. A police officer happens to be there who in a parody of the Iraq War and the status of whether Saddam Hussein had weapons of mass destruction or not is asked by Ed if he sees any weapons on the Middle Eastern man. The police officer refuses at first but then agrees not wanting to get on Ed's bad side, as it turns out the Middle Eastern man
* Another example of traditional media outlets failing during the zombie apocalypse comes from the
* Another example of water proving fatal to aliens: the blob-like energy aliens in
* Another example on the show is Barney Gumble, Homer's barfly of a friend, who has proven to have a lot of talents when he isn't drinking. In fact, a flashback showed that he was Harvard-bound as a teenager until Homer introduced him to beer on the night before they had to take the
* Another example, Osada and Yoshito kicked Yuu's legs until he could not use them to support his weight. Yuu later learns to use it himself.
* Another example refers to a philosopher who moonlights as a writer of "cheap, disgusting pornography", including something called
* Another example reiterated in a comedy routine. Man lights bonfire. Man sees mouse. Man throws mouse into bonfire. Burning mouse runs into man's house. Man has no house.
* Another example: some extremely powerful attacks in the games have this trope as an explicit side effect. Such as Draco Meteor, which reduces the user's Special Attack and thus can't hit as hard the second time, or V-Create, which lowers defenses and speed so that the user is left wide open to being hit for massive damage.
* Another example that isn't quite as strong, (we think), is Franky of the Straw Hat Pirates. He wears a speedo, he once led a mob, he looks like
* Another example: The Oceanic 6 spend 3 years lying about the time they spend on the Island and the fates of people that they left behind, believing themselves to be protecting their friends from Charles Widmore. This causes most of them some serious guilt issues. However, it is later revealed that Widmore performed an off-screen
* Another example: the presence of Danzo Shimura and his organization "Root", only introduced as of Part II/
* Another example, this time in the "wrong destination" area: Buddy's young delivery boy delivered the wrong cakes
* Another example, told by Londo: "...and then he says 'goulash'! Get it? Hahahaha!"
* Another example was a cereal with a jagged steel letter 'O' in it. It was supposed to be a prize, not eaten, but the regular cereal was not much better. At the end of the episode, Bart reveals to Lisa the new and improved Krusty cereal: "Flesh-eating bacteria in every box!"

* Another example was during the Tuchanka arc, where's the team needs to distract a Reaper in order to release the Genophage cure. That distraction comes in the form of Kalros, the biggest
* Another example was in the New Years' special, when Telly runs away screaming after Oscar scares him straight with lies on how bad New Years' is.
* Another example was the dwarf planet Ceres, called by its discoverer Guiseppe Piazzi
* Another example was the period in the mid-to-late 70s. Under pressure of having
* Another example was when a girl comes to the shop, terrified of her house since strange sounds are heard throughout, unattended things are moving around and sometimes she is touched by the presence of people when no one was there. Yuuko asks her if her wish was that "[her] house was not frightening", which the girl said yes. Yuuko grants her wish by
* Another example was when the Fang Gang goes to Pylea, Angel discovers that the dimension's sun doesn't harm him, allowing him to operate during the daytime.
* Another example went the opposite way, this time involving Wolverine. In
* Another example, when Archie's superhero persona Captain Pureheart meets
* Another example, when Ned Flanders and Edna Krabappel are dating and they knock on the Simpsons' door:
* Another example, where the interruption is due to enemy action — in
* Another example with Ariel is with her half-sister Kalki, who goes so far as to
* Another example with Aslan is their taste for ornate decoration for weapons of all kinds including more modern ones.
* Another example, with men of different nationalities react to walking in on their wives in bed with a lover:
* Another example with the two is when Hyeon tells Benedict that his pet squirrel can't just go and find something weird just because
* Another example would be Chase Young, who is very similar to Omi, and was once even a Xiaolin warrior before turning to the Heylin side.
* Another example would be Chi-Chi, who stuck by Goku, despite his having ditched her and Gohan (and later Goten) to go have fun, in multiple years-long stretches. He
* Another example would be Clovis who, during his ridiculously short screen time, is seemingly well-received, by the Britanians anyway. He was very media savvy if nothing else.
* Another example would be Curtis Manning only four episodes into season six (the fact that he was billed as a guest star, as opposed to a regular was a painfully obvious indicator that Curtis wouldn't be around for the long haul that season).
* Another example would be Eitrigg, an Orc who left the evil Horde as he saw that they have abandoned the
* Another example would be Ford Prefect's explanation of the origin of the universe, describing a situation where one would fill a conical ebony bathtub with sand, pull the plug and film the sand falling down the drain, then watching this film in reverse... which, he then states, has nothing at all to do with the origin of the universe, but is really fun to watch. Of course, he was
* Another example would be in "Seahorse Seashell Party", during the time when Brian is tripping on 'shrooms.
* Another example would be Josee Trembley and Remy Kim of v4, who suffer from a
* Another example would be Krysta's adopted son Twink, who suddenly appears with no foreshadowing in
* Another example would be Marv protecting people while on parole. This often means lots and lots of violent things happening.
* Another example would be most of the city of Troy; it was pretty obvious that the Trojan Horse was a trap. In fact, some residents of the city were
* Another example would be Rhymey and Fluttershy, as well as Celestia to the Grand Ruler, in the latter half of the story. Their romances are never developed, it's just said that the couples are in love with no real meaningful interaction or development.
* Another example would be Rose who, in season one, refused to believe her husband

had died in the crash. Come season two...
* Another example would be Sally and Linus, though Linus just seems to get annoyed whenever Sally calls him her "sweet babboo".
* Another example would be Simon Gruber's unit of East German Special Forces from
* Another example would be Tenri's goddess, Diana. Since Tenri is too shy to come forth with her feelings for Keima, Diana tries to push her towards him and eventually falls for Keima herself.
* Another example would be the Aes Sedai, whose internal ranking depends partly on how strongly they can wield magic.
* Another example would be the sea train in Water 7, the original one, Rocket Man, is WAY faster than its successor, but it wasn't used as the city's train since its extreme speed, lack of breaks, lack of steering controls and lack of momentum (if it crashed something it wouldn't lose speed but it would be sent flying in any other direction) was a high risk to safety for something meant to be a civilian train.
* Another example would be the "Thermodynamics" skill description: "Also gives you the ability to frown in annoyance whenever you hear someone mention a perpetual motion unit."
* Another example would be the Tollan. Their homeworld was ravaged by a disaster caused by sharing technology with the inhabitants of a neighbouring planet, who promptly weaponized it and blew up their world, throwing off the orbit of the Tollan homeworld. And the characters that turned up on earth had never seen any animals before. They move to somewhere nicer.
* Another example would be the Ulduar encounter with Thorim; where some of the raid will have to go into a gauntlet and meet back up with the others to force the boss into the arena. Doing this quickly will initiate Hard Mode.
* Another example would be the various mad scientist-cum-mages who feel the need to have you fight a pet monster of theirs rather than kill you outright. Predictably, it always fails.
* Another example would be when Jesus curses the fig tree, causing it to wither and die. This is the only time that He is shown to use His gifts/talents/powers in a way that does not cause life and healing for the recipient (certain Apocrypha notwithstanding). Doubles as a moment of
* Another example would by the hanar, who cannot speak as humans do at all; their translators/synthesizers render their bioluminescent language into spoken words. Furthermore, all their translated speech is exceedingly polite, avoids reference to personal pronouns like "I" and they will rarely use their names unless introducing themselves, preferring "it" or "this one", i.e. "This one hopes that we will converse again soon." They have two names, in fact; a Face Name (for public use) and a Soul Name (for family and very close friends). You can ask them about it and they will say that they consider it extremely rude and egotistical to use the first person with somebody they know only on a Face Name basis. Hanar who interact with other races have to take special classes so as to learn not to be offended. The hanar believe that they were taught language by the Protheans; in
* Another example would include the time when Akane tried to get Ranma to eat some magical sakura mochi that could tell whether or not they were destined to marry. Because he doesn't want her to find out that he's going to actually try it, he takes one when she's not looking then goes to eat it in peace. Unfortunately, he forgets himself when he sees Ryoga happily skip away after giving Akane flowers...
* Another example would probably be Jenny herself. She’s a powerful crime-fighting robot who’s only weakness is
* Another experiment involved the SCP working out a deal with a mentally disabled man, with the price being the man's prized stuffed rabbit toy. While the deal was straightforward and went through without a hitch, much to the dismay and grief of the man, an audio recording after the deal was struck captured a "
* Another explanation offered was that the Kessel Run was between multiple points that were moving apart from each other, starting from Kessel. The implication was that to visit each point with a total traveled distance of only twelve parsecs was quite fast indeed.

* Another extermination war with even less information available is that of the Forkrul Assail against the followers of the god best known as the Errant. It reduced the Errant's power drastically and himself from the local top god to skulking the shadows. And that's pretty much all that is known about it. Other than that he is still smarting tens of thousands of years later.
* Another extreme example from this cosmology is Bahgtru, the orcish god of strength and the son of Gruumsh, the chief god of the orcs. Bahgtru is known for
* Another extreme example is Jake, who develops a crush on Aranea...after seeing her in a dream bubble for just three seconds.
* another ex-wife joins her, and looks flat-out horrified at the realization that the two are friends.
* Another facet of her power is explored when she and Ichigo search for Rukia throughout the Soul Society after the battles have ended. She has her Rikka search for her, too, showing that she not only has the rejection powers, she also controls six faeries that can run certain errands for her.
* Another factor beefing up Starfleet's ship count is the fact that the Starfleet Corps of Engineers are an in-universe cross between
* Another factor in the sinking was that the watertight compartments that were equipped with doors leaked like sieves because they hadn't gone through air testing for leaks. Another stellar example of why doing this is a bad idea.
* Another factor is that each additional character costs an extra dollar a month. Still, due to gear and items taking up ungodly amounts of space, most players have alts solely to be mules to store their excess gear and possibly to check different auction houses on demand.
* Another factor is that the IRS (along with the Secret Service, which was originally created to deal with counterfeiting crimes and still does to this day) are some of the most successful law enforcement agencies in the United States (most Federal level law enforcement agencies are ridiculously successful). In fact, the reason the Secret Service has its most famous job of Presidential Protection is because they were ridiculously good compared to other federal agencies when they were looking for the agency for the task. The US government puts a lot of investment into making sure it isn't getting cheated out of its money... except by people wealthy enough to be writing the laws.
* Another factor that made the Carthaginians lose is that they counted on Rome's allies to defect after suffering so many defeats. Rome's policy of extending citizenship to (the elites of) their allies and refraining from demanding tribute made their allies very loyal and thus Hannibal didn't find many friends during his 15-year long pillaging of Italy. In general, while Rome could be very brutal, its willingness to grant outsiders political rights was a long-term strategy that made their empire possible.
* Another 'fact' states that director Edgar Wright's eyeballs exploded during post-production.
* Another fail in the same game also has him try and sneak by some other guards while disguised as a snowman. Too bad it also doesn't work, albeit for a different reason...
* Another Faiz tries this to Geiz the next episode, and fails at it as well, due to Geiz keeping space.
* Another fake advertisement in the same episode starts the same way. This ad is for the Baby Death Trap, which apparently exists solely so the manufacturer can sue people who call the earlier product a "death trap" - not for libel, but for trademark infringement.
* another, falling into a pot of boiling chocolate, and getting baked inside an oven.
* Another false cognate: 'excitado' does not translate to "excited," it means "aroused."
* Another famous bit, Filmation kept a library of scenes from previous productions. One of their later shows was to feature a dinosaur attack. Word came back, "we don't have any dinosaur footage, can you use elephants?" (Presumably from Tarzan)

* Another famous case from China is Zhao Kuo. His family, after failing to convince the king of Zhao of his incompetence, made the king promise he would not punish them should the man fail, and the king kept his word... even after the guy's inexperience
* Another famous example, in "Kamp Krusty", Bart and Lisa are at camp for the summer, which proves to be hell. They were forced to live in shoddy cabins, fed imitation gruel, and make Gucci wallets for export. Bart kept holding on to his (fleeting) sanity with the promise that Krusty would eventually show up to the camp, but in the end, it turned out to be
* Another famous example would be the People's Commissariat for Internal Affairs (
* Another famous "Move Match" was the "$15,000 Body Slam Challenge" between Andre The Giant and
* Another famous parody, this time with Charlie's brother Emilio Estevez, is in
* Another famous Renaissance-era group of mercenaries were the German Landsknechts, who were modeled after and considered the primary rivals of Swiss mercenaries. The Landsknechts used a combination of halberds and pikes, much like the Swiss, but also employed a comparatively larger number of early firearms and artillery. They were also famous for the
* Another famous video, the Greatest Freakout Ever: At least 3/5 of the comments were "Boy, this is what
* Another fan artist, Dishwasher, noted for drawing the RWBY cast with a robot \
* Another fanfic had Applejack comment that accidentally tearing her
* Another fan wrote not one but two original songs, one based on Arya's slaughter of the Freys in the original timeline and another based on House Tully's vengeance post-Remembering, which were then inserted into the canon by the story's author.
* Another Father Brown story, "The Mirror of the Magistrate," invokes a mirror scare. Police investigating a murder found a full-length mirror broken in the victim's front hall, but the man was actually murdered in his garden. They theorized that he'd struggled with the killer, breaking the mirror, and then fled into the garden before being killed. Father Brown realized that
* Another favorite "Caution: Only bring cheap watches/credit cards you weren't planning on using anymore near magnet."
* Another favorite in the theme of Christianity is to make everything that's too obviously not an allegory of a Christian theme into a post-facto allegory for a Christian heresy, and therefore a
* Another favorite is "destoryed" (or "destoried") instead of "destroyed". Now
* Another favorite: the equipment they need is available at their clearance level for once, but
* Another favorite, when he tries to trash-talk his opponent in a robot competition: "I'm given to understand that
* Another featured a back-room poker game where one player raises the stakes by betting his car with the exchange ending with "I can't take that bet."
* Another featured a galley slave complaining to the whipmaster about getting jabbed with a splinter.
* Another featured every man in an entire city ripping off their clothes and dancing erotically because they just
* Another feature of Erfworld is that all non-fatal injuries completely heal at the start of your side's turn. BDSM can get a lot more hardcore when the only limitation is "don't
* Another feature of the Challenger II which only a tanker might be able to appreciate is its track tensioning system. Tank track tension has to be routinely checked (usually pre- or post-mission) so the vehicle does not throw a track and lose mobility during missions, and adjusted if the tension is inadequate. In most tanks today this involves fooling around with grease-guns to pump the necessary fluid into the hydraulics controlling the system, which like most other things involving maintaining tanks, can get quite tiring and messy; in older vehicles this often involves most of the crew leaning on a large wrench to adjust a large screw connected to the idler wheel. Both of these procedures are done outside the vehicle, which means doing it in foul weather is yet another aggravation. The

Challenger II has hydraulic track tensioner rams which can be adjusted by the driver using knobs at his seat, meaning he doesn't even need to leave the tank to adjust tension. This feature has been known to make British tankies the subject of mild envy by coalition armored forces deployed alongside them.
* Another features a man in "The Sneezing Song". Throughout the whole song, whenever he sneezes it causes a building to collapse until he covers his nose. After he comes back home, his pet dog sneezes and his house collapses.
* "Another fella told me/He had a sister that looked so fine/Instead of being my deliverance, she had a strange resemblance/To a cat named Frankenstein"—Sam Cooke, "Another Saturday Night"
* Another female driver is responsible for the disaster in "City of Fire" when she crashes a car in the garage of the world's tallest building.
* Another female example in Ms Zorski from the high school episodes. Unlike her
* Another female example is Russia, who hasn't managed to remain as dominant as the Soviet team was. Unlike Brazil, they did win the World Championship, twice even. And yet in the Olympics, it's at most two silver medals (including three straight quarterfinals exits!), they never won the World Cup, and haven't won the Grand Prix\Nations League since 2002, or even medaled since 2015.
* Another female example: Princess Zelda is shown in such a capacity in the flashback sequence of
* Another female example: The dance team coach (even wearing a T-shirt with the words "Coach Hartman") in
* Another female example was Director Jenny Sheppard, whose relationship with Gibbs was complicated by the fact that he had seen her in stocking suspenders, the two having had an affair.
* Another feminine-gendered Latin examples are the Foretellers, who are named after the (all feminine) Latin words for the
* Another fic consists of a list of things Misato is no longer allowed to do. Most are
* Another fighter who could be considered a competitor for the title of the best fighter on Earth is Bucky Barnes. As the Winter Soldier, he is regarded as HYDRA's deadliest fighter, capable of taking down entire squads of trained soldiers and numerous of Thanos's alien goons and easily defeats Black Widow and Falcon, two members of the Avengers, and puts up an incredible fight against Captain America himself, who is widely considered the best soldier in history. Even after redeeming himself and losing his old ruthlessness, not going all-out and not trying to kill, as well as being unable to make use of all of his skills, his natural fighting abilities alone is still more than deadly enough to handle himself against Iron Man's faction, helping Steve defeat Iron Man while coming close to beat him in a one-on-one fight, and Black Panther while not trying to kill them and ends up being an effective support to Steve in beating Stark, even coming close to besting him by himself, while he has Black Panther on the ropes until he ends up losing due to being unwilling to kill him, and in
* Another figure of note is Deadpool himself. Though he was always considered a comic relief, this adaptation makes him a great deal
* Another filler episode features Ryōri-nin, Cooking Ninjas, who were a type of ninja created to cook filling meals on missions for the very reason that food pills weren't nearly as satisfying as a proper meal. The problem with this came when the cooking ninjas became too good at their job and subsequently caused entire ninja teams to become obese and unfit, putting their ability to do their missions in jeopardy.
* Another film affected by the coronavirus pandemic is Disney's live-action remake of
* Another Fine Myth, it's revealed that the merchant Frumple is banned from Deva, home dimension of the Deveels, master bargainers.
* Another Fine Myth must stop drawing upon his parents' or mentor's strengths for his confidence, and find it in himself instead, to finally light a candle with his magic.
* Another Fine Myth to be Dreaded when masquerading as a fellow demon hunter to the

knight Quigley.
* Another first-season episode: Nick Fury is rather upset with Coulson for destroying a
* Another flashback episode pokes fun at this, with Marge setting up a flashback to six years ago with "
* Another flashback reveals that she lost her other arm under similar circumstances, having refused to let go of her husband as he was being killed by a cave-in.
* Another flashback shows Kara floating in a liquid-filled transparent cylinder while Zor-El is correcting alleged genetic flaws.
* Another flash-forward episode features a fun lampshade hanging, where we meet the future versions of the rest of the family, but it seems Maggie is still a baby. Then it turns out this is actually Maggie
* another fleet wiped out by the UED, he gets thrashed by the UED once more on Korhal, and at last Kerrigan mercifully wipes him and his men out in a surprise attack after the UED have been driven off Korhal again. Suffice to say, his track record after joining forces with Mengsk was a bit spotty.
* Another foe of Ultraman, the yeti-like Woo, is named after the title character of the original pitch by
* Another Foghorn Leghorn cartoon has Daffy Duck as a salesman, selling traps to both Foghorn and Barnyard Dawg in what turns into an escalating prank war. Daffy gets sloppy however in the end when he sells both same kit. Upon seeing each other setting up the same trap, they quickly realize Daffy's game, and team up,
* Another food fight breaks out in "Return of an Old Friend Part 2", after the parents are freed and returned to the Parents' Day party. A pie misfire by Bulk and Skull hits Jason's dad, which starts off a chain reaction of the
* Another footy example is the Celtic side that won the 1967 European Cup (today's Champions League) in Lisbon against heavily favored Inter Milan. All but one of their 15 players were born within 10 miles of Celtic Park, Glasgow, and in that same season they also won 4 other trophies - including the three main Scottish competitions. Their nickname? The Lisbon Lions.
* Another forgotten ability was Sailor Moon's disguise pen. It was commonly used early in the series, but forgotten during R and appeared only once later off screen, to explain why Venus was disguised as Moon. This may have been due to the lack of need for Usagi to actually use her disguises in later storylines as she gathered a team of fellow heroes and many of these disguises often appeared superfluous to the plot anyway.
* Another former member of Arma Angelus, bassist Tim McIlrath, became the lead singer for the popular punk band
* Another former TOS writer, John D.F. Black went under the credit of Ralph Willis for "
* Another founding member, Lamar, left in 1987, came back in 1999, and will
* Another four hundred years later, the local Earth government has created
* Another Frauds Division episode involved a scam artist claiming to be representing the LAPD's Widows and Orphans Fund. Donations supposedly meant you could just tear up any traffic tickets and ignore them. That one got Friday seriously pissed off because it meant people distrusting the department when
* Another French writer, Pierre Ponson du Terrail, pulled a "Doyle" when he killed off his pulp hero
* Another frequently cited quote of Martin Luther King is when he said "Riots are the language of the unheard", using it as proof that he supported riots. The whole speech is actually about how riots are evidence of social unrest and unhappiness and as such, they are understandable, but at the same time they are self-defeating and socially destructive and he always stood for non-violent protests.
* Another Friends example: in one episode Joey asks Ross (a paleontologist):
* Another Froggy Evening", when the frog's latest victim is thrown to the lions and tigers, the last feline in the pack is a cameo of tuxedo kitten Pussyfoot from the Marc Anthony shorts.
* Another from Kennedy: "My fellow Americans: ask not what your country can do for

you — ask what you can do for your country."
* Another from Ted when he wanted to comfort Robin and she didn't want any...
* Another from the season eleven episode "Savior." A young prostitute goes into premature labor and her baby is put on life support. The mother then runs away, giving power of attorney to Olivia, effectively giving Olivia the choice of whether the baby lives or dies. The episode ends with the baby needing immediate brain surgery and the doctors hammering Olivia for a decision that she never gives. Neither the mother nor the baby are ever mentioned again.
* Another Fry and Laurie sketch paused in the middle for a "contest" where viewers could phone in their suggestions for the punch line, with the winning entry being performed at the end.
* another full house (another strong hand, per the trope), with his three kings beating Harry's three tens. The trope is also played straight with Barney and Harry being the last players with cards after the other players have folded.
* Another fun (and plausible) one is that the castaways represent the Seven Deadly Sins. Gilligan is Sloth, the Captain is Wrath, the Professor is Pride, Mr. Howell is Greed, Mrs. Howell is Gluttony, Ginger is Lust and Mary-Ann is Envy.
* Another Fun In Funeral moment: after Juanita's suicide, Titus and Erin visit her lawyer for a will reading. According to the will, Titus and Erin have to eat apples for dinner should Juanita die. Not
* another funny farm animal, but the bovine rebellion gets some surprise air support from chickens in choppers.
* Another funny moment is when Randy arrives in the nick of time to give the sword to Stan... but doesn't know how to give items.
* Another fun thing for dorm dwellers: resonance. A typical dorm floor is a row of identical rooms with the same spacing between the walls. That creates an echo chamber for the one isolated sound frequency that has a wavelength equal to the size of the rooms. That part will rise out of a song and become louder all by itself. If the rooms are about two and a half meters wide the magic number is 140 hz, a nice low note somewhere in the fat part of a bass drum's range. You don't even get the whole song, just the least subtle part of the drum line, and a few snippets of the bass here and there. Worse, notes that low usually aren't
* Another fun thing to do? Start a new game, get God mode going, get the HEV suit, then use
* Another future episode when Homer puts Grampa in a cryonics facility to prevent a disease from killing him. The cure was discovered, but he kept him frozen because it's cheaper than a nursing home and Grampa has constantly been rude to him.
* Another gag is that whenever a family member is put on hold, the music that plays relates to whatever problem they have, causing them to break down in tears. Examples include Marge calling the mental institution to which Homer has been committed in "Stark Raving Dad" and having to listen to an easy-listening version of Patsy Cline's "Crazy", or Homer calling the missing child hotline after Maggie runs away in "Homer Alone" and being subjected to Player's "Baby Come Back".
* Another game breaker is the "½ Car" tags. There are two on the Wheel in the first three rounds, and they are replaced if one is picked up. It's not too difficult to pick up both, solve the puzzle, and win a car in the $15,000 range.
* Another game show example was from the first (1981-82) run of the short-lived
* Another Gaming Comic is obsessed with fire and his standard attack is to cast fireball centred on himself.
* Another Gaming Comic: Subverted when Joe tries to play Poker. He claims to have used his math skills to completely analyze the game minutes after first seeing the rules, but he still ends up firmly in last place.
* Another Gaming Comic villain has magicked said robes to alert him and all of his other cultists to the fact.
* Another Gaming Comic, while the grenade's in his mouth. (This character has total immunity to fire and concussion, so this is not as stupid as it sounds).
* Another Garek example (after he's been exposed to a psychotropic drug)
* Another Gay Movie, comes out to his mother, who just responds, "Duh! What took you so long?"

* Another Gay Movie was between the nerdy Griff and the athletic Jarod figuring out their feelings for one another.
* Another Gay Movie, where it's the boy with a collection of oddly shaped vegetables.
* Another Gay Movie with Andy masturbating with vegetables; a later scene where he is caught having sex with a quiche, with a gerbil up his ass.
* Another GEICO ad appears to be an ad for a superglue called "Wonder Glue", that is until the salesman says it won't save money on car insurance.
* Another Geico ad features the Gecko changing mid-ad to promoting Helzberg Diamonds. Berkshire Hathaway owns Helzberg as well.
* Another gender-inverted example is good-looking, popular athlete Calvin and bookish, frumpy Meg from
* Another general example is that several film series with a bad case of
* Another Genesis example of this trope is Benjamin, youngest son of Jacob, at the time of his family's relocation to Egypt. His birth takes place before his older brother Joseph is sold into slavery, which should make him at least twenty-two at the time of their Egypt reunion. Yet throughout that later part of the story, his father and brothers still refer to him as a "lad," shelter him and barter over him as if he were a child. And yet the subsequent list of Jacob's sons, grandsons and great-grandsons who traveled to Egypt includes the names of Benjamin's many children. It seems likely that two different versions of the story with different chronologies were combined.
* Another genre this is prominent in is anime based on arcade card games, especially those of the
* Another German example for forced vague sexualization: Decades ago you could hear kids playing catch, shouting "Krieg mich doch, Eierkopf!" (Catch me, egghead!) Also dictated by rhyme, today it degraded to "Eierloch" (egg hole). Which doesn't make sense at all. But he said hole, Butt-Head, hu hu.
* Another gesture that has resulted in unfortunate misunderstandings is the fact that in the Middle East people engage each other in conversation by leaning in very close to show that you are giving the person your full attention. Unfortunately, in the Western world this is taken as an
* Another giant character is eventually introduced: Hagrid's full-giant half-brother Grawp who, at first, is violent and uncontrollable (even towards Hagrid) but over the course of a few years, becomes "civilized" enough to wear a suit and sit at a funeral and is no longer mindlessly violent. By giant standards Grawp is quite small, being only 16 foot.
* Another girl that owned a Bagon had stylish icicle goggles that told an opponent's health and fighting morale.
* Another gnome from a completely different universe/game (and a definite case of
* Another good case of this is "Mr. Monk Goes to a Rock Concert". Monk and Natalie accompany Captain Stottlemeyer to a music festival to search for his son. Monk comes along because of
* Another good example are the American Volunteer Group (AKA the "Flying Tigers") who flew P-40 Warhawks for
* Another good example is after Marco rescues Ax from the Blade Ship they escape and plummet 2 miles up from the air, Marco freaks out until Ax reminds him that he could morph into a bird in midair.
* Another good example is at the climax of "The Forgotten", which has Batman taking down some evil gold miners who have been enslaving homeless people. In a startling aversion of
* Another good example is Book 20. It came right before two of the darkest books so far and right after
* Another good example is Merlin himself. John Boorman said something to the effect that the actor was capable of inflecting every vowel sound possible into a single syllable.
* Another good example is Ser Gregor Clegane, the Mountain Who Rides. He is an eight-foot slab of muscle and psychopathy who wields a zweihänder the way most men wield a dagger and is perfectly capable of bisecting people and breaking a pike

wall single-handedly. His greatest claim to fame is the rape and murder of a defenseless woman and her infant son, so everyone knows that in spite of his title he is nothing more than a hatchetman and most people hold the muck under their boots in higher regard.
* Another good example is the savage Werewolf Fenrir Greyback. He is an ally to the Death Eaters who revels in his bloodlust. Voldemort used him as a weapon to intimidate people into doing his bidding. If people refused, Fenrir would be sent to attack their children.
* Another good example is when the police are in pursuit of a pair of thugs who killed an off-duty cop and kidnapped a limo driver. They catch one of the pair, but with no idea if the limo driver is dead or alive McCoy is forced to give him a very advantageous plea deal (including any "related crimes") in exchange for the whereabouts of the driver. Of course, the driver was already dead and the police later find the guy's partner also dead. McCoy can't get out of the deal, so he charges the living perp with murdering his partner on the slippery theory that the partner's murder was not established as a "related crime" when the defendant took the original plea bargain. This leads to the quote at the top of the page, the plea means the original perp essentially walks for killing a cop, but ends up drawing a lengthy prison sentence anyway, for killing his accomplice.
* Another good example would be Freed the Brave Wanderer (who would later become Freed the Matchless General). His appearance as a Duel Spirit in the anime shows his
* Another good example would be Samantha Malcolm of the Season 5 episode "The Uncanny Valley". Mentally unbalanced after prolonged sexual abuse by her father — and countless rounds of electroshock he subjected her to so she'd never rat him out — Samantha only wants to recreate the dolls she loved as a child. Unfortunately, she does this by abducting women, keeping them paralyzed with a cocktail of drugs, and sewing them into dresses and wigs to resemble her beloved toys. She has no real idea that what she's doing is wrong, and Reid points out that her intention isn't to kill the women she takes, to the point where she actually takes relatively good care of them. She just keeps them paralyzed for so long they eventually die of overdoses.
* Another good one in "Tracy Does Conan": Kenneth is sent to pick up Tracy's pills from a pharmacy to assuage the apparent psychotic break he's having in time for him to go on TV. During the frantic ramp-up to the moment Tracy has to go on, there's the expected cut to Kenneth anxiously peering over people's heads from the back of a really long line...
* Another Goofy cartoon, "How to Be a Sailor", was pretty straightforward but then went on a war theme in the final scene with Goofy in the Navy. In true Goofy style, he ends up launching
* Another Gordon Korman example: Rudy Miller from "I Want to Go Home!" At summer camp, he claims that he "doesn't do [insert sport here]" for half the book...until it's revealed that he's insanely good at everything athletic.
* Another Grandpa example was in "Cape Feare", when the Simpsons go into
* Another great example would be the Warlock's Imp minion. It only has long-ranged attacks, which do huge amounts of damage (compared to the other demons at least), however has very low defense and relatively low health. A non-caster could easily kill one in three or four whacks with their weapon.
* Another great line from Carlin (when describing the removal of a growth): "This was a part of my head a minute ago! But not anymore; I pried the bastard off with paint thinner and a Phillip's-head screwdriver."
* Another group of Icteridae members, the Meadowlarks hardly look like a real lark (of which there is only one species, the Horned Lark, native to North America; Europeans call it the Shore Lark)—but it sings like one.
* Another group of "mistakes" from the Grineer cloning process is the self-named Kavor, Grineer defectors who decided to leave after being unable to stomach the numerous atrocities the Grineer commit on a daily basis. While capable of defending themselves in their
* Another group of Titans who were closer to each other than they were to their

own families were the "Core Four" of
* Another group of tribbets entirely, the handfishes, shorten their forearms but lengthen their fingers instead, eventually turning their individual fingers into separate limbs themselves (becoming hexapedal with the former wrist becoming a double-shoulder joint).
* Another Gumball OC that turns up pretty often is Lexi Watterson, a pink cat and
* Another gut punch in the movie is the opening scene, where Shinji reaches his
* Another guy named Agustiyn Alanis broke that record some weeks later, watching
* Another Gym Leader who went through this is Sabrina, a creepy girl with a permanent
* Another had Adam Baldwin as an FBI agent looking for a mob killer and protecting Brennan from a hit man.
* Another had a Luxembourg captain missing and presumed dead when he suddenly rises from his post-op bed in bandages and cast when he hears his national anthem.
* Another had a man vetoing literally every single name his pregnant wife suggested for their soon to be born son, insisting that the kid would be subjected to these kinds of jokes—"Hey Harry, where are the Henderson's?"
* Another had Chris selected for a police line-up because he 'fit the profile' along with several other black men who look nothing alike. Chris comments that he knows how profiling works, and the scene cuts away to a man giving a detailed description of the perp there looking for, and then the scene repeats again to reveal that all the officer heard when the man mentioned he was black, was the word black.
* Another had Hal and Reese trying to figure out what's causing a horrible smell in the fridge. They go through rotten cheese, bacon, and finally a carton of milk with a dead rat inside, presumably the school rat Dewey was supposed to take care of last summer. Still not it.
* Another had him be a man who blamed Jesus for the loss of his son during the Slaughter Of the Innocents by King Herod, and when Jesus was sentenced to death, he bribed a Roman soldier just for the chance to torture him. As punishment, he was cursed to wander the Earth til the End Times.
* Another had Mal finishing a joke with, "So the Companion says to the Shepherd, 'Well, a good goat'll do that.'"
* Another had Patrick watching the news announcing that a ride which Spongebob is on has broken down:
* Another had pictures of locomotives (and the writing "Have you seen me?") on milk cartons; the comic caption was... "Runaway trains".
* Another had SpongeBob help his friend Patrick submit a song which is shown to be so awful that it killed the band recording it and causes pain to everyone else within hearing distance. He plays it first with Spongebob by using a giant stereo that is so loud that it demolishes his pineapple. After Patrick asks him eagerly to give him his most honest opinion, Spongebob stares at him solemnly and moves his mouth as if to insult him.
* Another had the "Biotic Games" implying an entire range of sports using biotics.
* Another had the pile of junk resultant from Veronica's spring cleaning ending up in an art gallery.
* Another had Timmy's scout troop escape from a pack of hungry coyotes by using Chester as a distraction. The mauled Chester sarcastically tells the troop he'll be taking his "Eaten by Coyotes Badge". Later in the same episode, Chester runs into the coyotes again and tells them they're about to earn their "Beaten by Chester Badge".
* Another half-joking reminder: You may drink to drown your sorrows, but they can swim.
* Another Halloween story has Homer killing Death, and we then cut to Fat Tony and his goons trying to shoot a man, but he keeps on living.
* Another hammer that can be obtained is Grant, a huge hammer wielded by Paladin Leeroy, it's less of a hammer though and more of a huge chunk of stone on the end of a stick.
* ANOTHER handwave in a Don Rosa story... he swam in his money and it got easier

and easier...
* Another happens in version 3, this can be best described as 'Bobby Jacks vs.
* Another has a back-and-forth switch with Roger, the unseen barkeep:
* Another has a bunch of vampires at a party. "Hank! You're reflecting!"
* Another has a fly who's fallen into a soup bowl, while another shouts to her from the rim: "Tread soup, Deborah! I'm going to get help!"
* Another has a girl finding the name Terry on her boyfriend's cell phone. After the Twix Time Freeze thing happens, he casually claims that Terry is his boss. The commercial doesn't say that cheating is okay, but doesn't say anything about it being wrong in any way, either.
* Another has a 'life insurance' policy that offers to replace your dead spouse with a beautiful young immigrant who will behave impeccably sweetly out of gratitude for their nice new life
* Another has a man approach a suicidal woman whom he asks for a BJ before she jumps. After the act, he asks why she was going to jump. Turns out her parents disowned him for dressing up like a woman.
* Another has a man confess to a fatally hitting a girl on a bicycle so his daughter, who was really driving, wouldn't be charged because he wanted her to finish med school.
* Another has a man who's quite upset to learn on his deathbed that the man he thought was his devoted husband for the past forty years is in fact his butler, and the woman he thought was an incompetent maid is his wife.
* Another has an extension system for when the Brain rides a motorcycle.
* Another has Archie spill salt and Jughead advise him that he should toss some over his shoulder for luck. Archie does it, which hits a fairly big fella right in the eyes, and he punches Archie in the mouth.
* Another has a whale doing the old "fake harpoon through the head" gag.
* Another has a woman caught with her hands inside another woman's chest making stabbing motions and a bloody wooden stake is lying beside them. Turns out, the woman was a chronic sleepwalker and was trying to revive the other lady by massaging her heart, which she'd seen done to her son. Unfortunately, the technique hadn't been successful with the boy; the trauma of his death is what led to her condition.
* Another has a woman going to one for co-dependents after finally being forced to admit that her husband is a sex addict and that she's enabling him.
* Another has a woman who's been kidnapped by a rapist, who takes her to the woods, forces her to strip and ties her to a tree. A hunter appears to scare him off, and the woman is elated and thanks her rescuer...
* Another has Bobby and Joseph join a youth rodeo, which Hank is very proud of him for doing. But Bobby is more interested in being a rodeo clown than a cowboy and keeps it a secret from his father. Hank is initially disappointed when he finds this out but changes his mind when Bobby's performance saves Joseph from being gored by a bull.
* Another has Calvin's mother telling him that the grains of rice in his soup are really maggots, and another time she claims they're having spider pie for dinner.
* Another has him putting on Jimbo Jones' clothes to try and convince Skinner to give the oil well to Burns. Skinner easily sees through Burns' pitiful attempt to pass as a teenager.
* Another has him sitting under a peach tree, wondering what he can put in his cheese so kids would eat it. "Maybe something sweet," he says, as peaches start to fall around him. Then he exclaims, "I've got it!
* Another has him suggest what would be the most effective punishment of unruly juvenile delinquents: listening to their parents sing. Hey, it worked with Billy Joel's kids.
* Another has Hobbes simply deconstruct Calvin's attempt at a punny comic strip and leave him scowling with a
* Another has Jonesy start an auction where the highest bidder goes out on a date with him. All's well until the bid gets so high that the only two still bidding are the

* Another has Nanase thinking about Tedd followed by Tedd sneezing and lampshading this trope by remarking he feels that that sneeze foretells doom.
* Another has Ralph get an idea. And because it's Ralph, it's a candle. But for Ralph, it's a
* Another has the kiss-cam, only with some rats and two straight guys.
* Another has the whole world in chaos where everything with a microchip goes haywire because of the
* Another has two bears observing some picnickers, and one says to the other:
* Another has two boys attempting to siphon gasoline out of a parking lot, only to be caught by the very irate driver, who douses one boy with gasoline and sets him on fire. The burning man crashes the party next to the parking lot and causes a panic before he dies.
* Another Hatchling' reaction to the idea that Ridley might have been interested in mating with her:
* Another Havenite example was Amos Parnell, the former head of their space navy. Thought executed, he was discovered and rescued from a prison planet, and despite having every reason to utterly hate the current government of Haven, refused to provide intelligence that would directly assist the Manticorans in battle against Havenite forces. However, he does testify about the coup and helps destroy the new government's prestige.
* Another Heart-to-heart that changes depending on story progress is "Legendary Lands". If viewed before reaching Elysium, Rex, Zeke, and Morag will debate on whether or not Elysium actually exists. If viewed after reaching Elysium, they discuss if that barren wasteland was really Elysium.
* Another heated one with the GNOME desktop project. When it was revealed that GNOME 3 was going to take a page out of Windows 8's book by doing away with a start button metaphor for a start screen metaphor designed for both desktops and tablets, a subset of the developers were understandably miffed as Microsoft's design was universally
* Another Hebrew take on the apple is the "golden apple", i.e. the orange ("
* Another Heinlein passing comment is that eliminating Hitler was what led to Nehemiah Scudder's fundamentalist theocracy in the USA.
* another He proceeds to successfully screw that minor destiny and adjusts the plan to try a new approach for the grand destiny.
* another, he realized he wasn't dead because he felt a burning sensation all over his body; fortunately he wasn't on fire.
* Another hermit mage, namely Cucuvea, is believed by the Illuminati to be one of the oldest living creatures
* Another 'hero' is Peter Wisdom a.k.a. Regulus Black, Agent, later Director, of MI13 - Her Majesty's Spooky Secret Service. He's completely onboard with the idea of torture, oubliettes for disposing of politically inconvenient persons, blackmail, manipulation of all and sundry (including a young Warren Worthington who he successfully manipulates into becoming exactly what he feared his metal wings would make him - a killer), using morally ambiguous combinations of technology and magic to
* Another hiatus ensued in mid to late 2012 due to an injury sustained to his drawing hand.
* Another hidden spell immediately summons a boat if the player is facing water... except in Castle Hall, where a message of "We do not tolerate that here!" appears instead. This is because, in prior versions of the game, players were using it to
* Another highly inspirational, heartwarming example with the story of
* Another high-profile fork in the open-source community was the FFMPEG/LibAV schism in the software project that underlies nearly all video-related open source applications. Emerging from political turmoil within the FFMPEG project, the effects of the split the sent shockwaves through the broader open-source community, particularly Linux users, due to Ubuntu (one of the most popular distributions) initially siding with Libav.
* Another highway example: Freeways were often built in segments, and after a particular segment was completed, it would often be shunted onto a nearby side road

to provide smoother traffic transitions. Such an arrangement would exist until the next leg of the freeway was open, at which point the "shunt" would generally be abandoned (or less commonly, incorporated into something else).
* Another hilarious, though wince-inducing result from a crushing injury (don't remember exactly where it was) was "Blow to
* Another hint of this from Tali shows up at the conclusion of the Rannoch arc, if Shepard is unable to broker peace and chooses the quarians over the geth.
* Another historical example, this time from 12th century England, concerns King Stephen threatening to hang the small son of one John Marshal if he didn't surrender his castle. John replied, rather crudely, that he still had the hammer and anvil to make even better sons. In justice to John, King Stephen was a coward and everybody knew it. Little William Marshal was
* Another horse, Little Vic, is galloped cross-country to warn campers of an oncoming flash flood in
* Another huge example from Arabic Mythology is our world resting on the shoulders of Kujata, a colossal bull, who is then standing on the back of Bahamut,
* Another hugely popular Concerned Children's Advertisers spot was about
* Another human-elf pairing that didn't work out was that between Imrazôr, a Númenórean who settled at Dol Amroth, and Mithrellas, a Wood Elf who got totally lost in the mountains when her people fled from the Necromancer in south Mirkwood. He and his folk sheltered her and they got married, but after having two half-elven kids she just...got up and left him. Elves aren't inclined to marry people they don't love, and there's no suggestion that he married her against her will, so maybe she just didn't want to watch Imrazôr and the children die of old age.
* Another human trait is vindictiveness. Like all creatures, we don't like ourselves, our
* Another humorous example, this time from a B-Movie on a planet of killer robots:
* Another idea discredited by germ theory was that of the "four humors", which was developed in Ancient Greece and lasted over two thousand years. Humorism held that illness was caused by imbalances in the four humors (blood, phlegm, yellow bile, and black bile) and health could be restored by restoring that balance. This is tied into the prevalence of bloodletting, as this theory held excessive blood to be one of four possible causes for disease. Some modern English words come from the "four humors" theory. For example, excessive blood was believed to lead to excessive cheerfulness, which is why "sanguine" means both "bloody" and "cheerful". Similarly, black bile was believed to be the cause of depression, hence the word "melancholy" literally means "black bile". There are also numerous references to the four humors in the works of
* Another idea Ian had was to reboot the whole TU New World of Darkness-style, with a corebook outlining the setting, then supplements on playing Novas and Psions (Daredevils could have been included in the core or given their own supplement). This actually got greenlit by White Wolf, but it didn't come to anything due to their merger with CCP.
* Another Immortal, a Nazi, was "killed" with a pitchfork, wrapped in chains and tossed into a river during World War II. It took him 50 some years to free himself and come back for revenge.
* Another immortal blames Duncan for leaving him to be burned at the stake. He then proceeds to graphically describe the feeling of his skin and organs burning and regrowing.
* Another implication could have been that either that: the soldier was a
* Another impressive example of an existing natural nanomachine is ATP synthase, which makes both the electric motor
* Another improvised version in "RAM". Root turns on the gas, then stuffs a newspaper inside the grill of a heater and sets the timer.
* Another - in 1998, the year the story takes place, the "extra" is assistant homeroom teacher Ms. Mikami, aka Kouichi's aunt Reiko.
* Another in an episode in which Chris is caught spying on girls' dressing rooms, and Peter goes to talk to him about it. When he gets to Chris's bedroom door, he

hears the unmistakable sound of
* Another incident happens with another woman named Tamar when she is raped by her half-brother Amnon. After the ordeal is done, she demands that she
* Another incident occurred during the 1985 AFC Divisional Playoffs. After the top-seeded (at the time) Los Angeles Raiders lost to wild-card (and eventual AFC representative in Super Bowl XX) New England, Millen got into a scuffle with Patriots general manager Pat Sullivan (son of team founder Billy).
* Another incident occurred when Peter, Quagmire, Joe, and Cleveland were watching Lois with police surveillance equipment. Things get fuzzy and Peter turns up the dial, somehow turning Audio listening technology into
* Another incident where the Ark manifested its dangerousness was when the Philistines succeeded in capturing it. Every town they took it to was struck with a horrible plague of rats and tumors/hemorrhoids. (Bubonic plague?) The terrified Philistines sent the Ark back to the Israelites along with five golden rats and five golden tumors to end the plague. It worked.
* Another incident with a note pad happened when she was drawn into the case of a Zodiac Killer-expy and wrote an entire letter in the killer's code. Things got worse after the code "bled" into the real world.
* Another incident worth noting—just after Magneto took over Genosha, he mused to Xavier that he didn't think a mutant nation was enough; he hoped to find "a more... definitive solution". Xavier suggests the word he was looking for was "final". Cue defensive rant.
* Another incredibly useful exploit: Reload your weapon and immediately perform a sideways roll to have your weapon be instantly-reloaded without having to wait for the reload animation to complete.
* Another Indian example is the President's Bodyguard, the seniormost regiment in the country's army. They're trained as cavalry and paratroopers, and maintain some
* Another indirect example occurs when Alexander Sterling calls the ones smearing his business practice liars without first finding out who it is, thinking it's Jaune Arc. Instead it's Weiss Schnee and he's just directly insulted the Schnee family who own the largest
* Another infamous episode of Steve's show featured a woman who'd molested her daughter orally and offered to make child pornography of her.
* Another (in)famous example is the Tet Offensive of 1968, where a massive sneak attack managed to breach the perimeter at some of the "safest" places in Vietnam.
* Another infamous soccer example was the 1998 Tiger Cup (former name of the soccer competition of Southeast Asia). Thailand and Indonesia were in the same group and, going into the final game of the group stage, both nations were guaranteed to progress. Whoever topped the group would face hosts Vietnam, while the runners-up would face Singapore. Both teams thought that Vietnam would be the tougher opposition so they played rather half-heartedly, neither wanting to win. In the final seconds, with the score at 2-2, Indonesian player Mursyid Effendi scored a deliberate own goal to give Thailand a 3-2 win and the unfancied tie against Vietnam. Sure enough, Vietnam won that game 3-0...
* Another in-line example comes when an unexploded bomb lands in the compound. Hawkeye, Trapper, and Frank draw straws to see who has to go out and check the bomb for any serial numbers and see if the bomb is still active. Frank pulls the short straw and promptly faints as he's walking out the door.
* Another inmate, Lorna Morello, was also engaged to a man prior to her incarceration but got involved with fellow prisoner Nicky Nichols — until she breaks up with her out of guilt at being unfaithful. It was implied, however, that Morello is kidding herself that her engagement is still on, as her fiance has not visited or otherwise contacted her since her third week in prison
* Another innovation of the Toughs is the 'Very Dangerous Array', a wide ranging network of independent missiles that doubles as a powerful sensor array, able to detect and retaliate against incoming hostiles at the same time. (With the logical drawback in that being used as munitions decreases its ability as a sensor array.)
* Another inorganic organic ingredient spotted in the wild - corundum. Yes, some cosmetics firm apparently thinks rocks are organic.

* Another instance also involves Tom: at one point he mentioned that Kate, the show's most desired woman, was "not his type". Immediately fans began a running joke that he was gay. The actor heard about it and liked it, and started playing Tom that way (albeit subtly). Eventually the writers put it in the script.
* Another instance comes up during the battle against Murray, where Nappy gets a huge amount of damage on Murray's Pokemon. When Pokemon Center comes up...
* Another instance features Calvin making a fool of himself while trying to catapult a large snowball from
* Another instance has a caller claim there's a party at Ghost's house with "free beer, a mountain of cocaine, and girls under 18". Ghost's response is "I don't do cocaine!". Knowing him, one would think he'd react to the "girls under 18" part.
* Another instance has Mandy insulting Sperg by... talking nicely about
* Another instance in a Simpsons adaptation of Hamlet. Prince Hamlet (Bart) is trying to get his uncle Claudius (Moe) to confess that he killed King Hamlet (Homer):
* Another instance in Hassan Salvador O'Leary's backstory, where he drove a herd of wild boars through a fancy restaurant and they ate the chef.
* Another instance involves the gang of four in the alley, where Bill is wearing dark sunglasses to conceal a black eye he received in a domestic dispute. Bill gives a poor excuse to Dale, which he describes as a "very interesting story", that he received it by accidentally walking into a door. Dale responds, "Hey, wait a minute..." An out of character moment where Dale actually figures out a cover-up is subverted when he concludes, "How was that interesting?"
* Another instance is during Gym class when a submarine emerges from under the floor, right directly under Saru. He gets knocked around so hard that everyone nearly forgot about him laying in a corner with his soul raising up from his mouth.
* Another instance is "I'm going to this girl's house and we're going to make juice," to which the cab driver responds "Nice."
* Another instance is when Mike was assisting a family of goat farmers castrate the young male goats they didn't want reproducing. WITH. THEIR. TEETH. The goat farmers then had to spend the next five minutes (likely much, much longer was left out of the episode) trying to convince Mike this was very standard procedure for all goat farmers and that they were not raving sociopaths.
* Another instance: Ken's coins. When trying to see the view from the church tower, Ken tries to get rid of some loose change by paying the entry fee of five Euros. He comes up short by 10 cents, so the annoying Belgian cashier refuses to let him enter. Later on, Ken throws the coins off the tower
* Another instance occurred with Nova who used jet boots to fly onto a Wave Road after he inadvertently caused Dark Giga to shoot a Wave Station by messing up his aim.
* Another instance occurs earlier in the episode, when after watching a news report about Chip's fans rioting in his absence, Timmy says "I've gotta get Chip to the concert before all those women—
* Another instance occurs in "Designs on Jerry". When Tom's Rube Goldberg mousetrap drops a floor safe on Tom (not Jerry, who'd sabotaged the blueprints while Tom slept), the safe door opens, and
* Another instance occurs when you first enter the city of Solitude, for a man who aided
* Another instance of the BBC not allowing product placement was duly mocked in an episode of
* Another instance of the creepy attentions Violet received in the first book is when The Hook-handed Man approaches her in the tower, telling her, "I'm so glad you're here. I was just thinking how much wanted to see your pretty face."
* Another instance of this (between the turtles and the Kraang) occurs in
* Another instance of this happens a few chapters later, when Twilight calls Jewelius out on his
* Another instance of this is when Vegeta turned Super Saiyan against Android 15, prompting Trunks and Goku to realize that they can simply turn into a Super Saiyan and does so during the fight against 14 and 13 respectively.

* Another instance of this trope concerns the true reason why Mycroft
* Another instance of this trope in regards to Cowboys QBs has to be Tony Romo, who was the team's starter from 2006 to 2015. After a series of HORRIBLE starting quarterbacks after the injury-induced retirement of legend Troy Aikman (Chad Hutchinson, Quincy Carter, Vinny Testaverde, and a washed-up Drew Bledsoe), Tony Romo burst onto the scene in 2006, showing incredible talent and drive and reigniting a fizzled interest in the Cowboys franchise, with a decent ability to scramble, a Favre-like gunslinging style of play, and a strong arm capable of deep passing plays. However, the crucial moments of each of his starting seasons (sans 2010, which he missed most of due to a broken clavicle) ended with heartbreaking losses due mostly to blunders on the part of
* Another instance of this were statues in one of the endgame lairs. These statues were immune to all damage types, and shot lasers out of their eyes when approached, which the player had to use a mirror to reflect back at the statue to destroy it to progress through the lair. However, characters who had
* Another instance that is flagrant in hindsight: early in the game, the main characters come across
* Another instance, this time when Liz is having a fake argument with
* Another instance was in "Miss Dimmesdale", when she blackmailed the Mayor, one of the judges of the Miss Dimmesdale pageant, with an
* Another instance was when Nodoka overheard Negi and Asuna's talk about activating Pactio cards.
* Another instance was when two big strong tough guys tried to mess with Rick, only to discover that hanging out with the people he had, and his general experience, made him a
* Another instance, with better in-universe justification, occurs in the second part of "Heart of Steel."
* Another instant was when Homer was returning from France and sees Marge hugging Flanders (she had invited him over for a family dinner). Subverted in that Homer knew that it's probably not what it is. Semi-
* Another insurance commercial is similar to the Fiat ad: a man has a gigantic infant whom he washes, protects from harm, etc. Then we see that "his baby" is actually a sports car.
* Another interesting aspect to this is that Midoriya has a hard time just trying to partner up with anyone because of the target that will be on his team's back. He ends up recruiting Ochaco Uraraka (who thought it would be perfect to team up with a friend), Fumikage Tokoyami (who was impressed with why he was chosen) and Mei Hatsume (who figures this would be the best way to showcase her Support Gear.)
* Another interesting case is Sweden (again, how appropriate) and Finland, in a strange inversion as Sweden is trying to be kind but Finland keeps interpreting his actions as malice. Ends up played somewhat straight since despite being (accidentally?) kidnapped as Sweden's "wife" Finland seems to end up liking him anyway.
* Another interesting feature is that if a rogue AI faction meets another faction that has AI, there is a chance that faction's AI will also rebel.
* Another interesting incident happened during testing of Season 9 on the TRIBBLE Server: players had accidentally found out that you could shoot inside the newly redesigned Earth Spacedock (it's usually disabled) and people decided to have fun with doing so. Cryptic's response? Drop an army of
* Another interesting point is that if we reverse the roles, then Mina herself clearly fits the
* Another interesting real-life example of this trope was at Europride 2005 in Oslo, Norway, during a lecture on homosexuality and fetishes, Svein Skeid, the late leader of ReviseF65, came in to put on the lecture
* Another interesting thing to note about Dunbar's Number is that maintenance of personal relationships takes time; he noted in his original paper that maintaining ties to 150 people via "social grooming" would take nearly half of your time, and believed that language arose as a "cheap" substitution for social grooming, relative to the amount of time which needed to be spent on it. In other words, many

people are unlikely to even approach their limit because of time constraints — they're likely to spend their time doing other things.
* Another interesting twist from the setting are that humans are the Ancient Astronauts to other species. The Tau are one of the few species this happened to and who still exist; the ancient technology that the Tau found? A
* . Another interesting use of this trope is with Corah, who carries a scythe.
* Another intergenerational friendship existed between O'Brien and Bashir, who were in their forties and twenties respectively when the show started. Bashir's naivete and O'Brien's occasional world-weariness meant that the age gap sometimes seemed a lot more.
* Another interpretation is that it's related to Moorcock's "Eternal Champion" above, and on top of being all these figures, he was also the lead character of
* Another interpretation might be "be appreciative of your co-workers doing their jobs; they are people too and deserve to be treated fairly", since Ralph's problems come from the Nicelanders treating him like dirt just because of his
* Another interpretation notes it as a case of exact words, as one of the listeners was the apostle John, who would later write the Book of Revelation, in which he describes "seeing" the
* Another interpretation was that Doctor Thirteen's disbelief in magic is so strong that he causes magic around him to not work so well. Heck, he even dated Zatanna for a while, assuming she was just an extraordinarily talented magician.
* Another interview with the cast, and that Ojo was going to be a bear named Jojo, whose design and name were different. This is why the latter doesn't appear in the first few episodes, as her name and design were changed at the last minute.
* Another in the series randomly replaces the revision section at the bottom of the page with advice on how to make Penguin (sorry,
* Another in the unusual cases where a character's originator passes away and is recast — in this case, Gladys Kravitz. When original actress
* Another introduced Lisa, who now had a son with a suspicious resemblance to Dean, born about the right time after he knew her.
* Another in-universe example, also played for laughs, comes when Doctor Evil plots with his henchmen for holding the world at ransom, where he will then demand...
* Another In-Universe example in “The Quest For Ratings:” the boys host the school's news program, but Craig's show
* Another in-universe example (used as a game mechanic no less) is pro wrestler Beowulf from
* Another in-universe example with The End, the Cobra Unit's centenarian sniper, who multiple characters call the father of modern sniping.
* Another in-universe example would be Data as the only Android of the Starfleet (and one of the very few Androids of the whole universe).
* Another inversion is "I'd Like to Teach the World to Sing" which appeared in the famous "hilltop" commercial for Coca-Cola. It became so popular that a second version was recorded (minus the Coke references), and released as a popular single.
* Another inversion is the urban legend of celebrities entering lookalike contests of themselves and not
* Another inversion occurs when a kid wants to hire Reese to help get revenge on the murderers of the kid's brother. The kid offers Reese all the meager cash he has on him but Reese gives back all except a quarter. Reese was going to help the kid for free but realized that the kid was about to do something very stupid on his own. By agreeing to be the kid's 'employee', Reese could get the kid to stand down and let a professional handle matters.
* Another inversion: veteran British actor Eric Sykes went deaf in the early 1960s and was registered blind in the early 1990s (his distinctive glasses had no lenses, and were a bone-conducting hearing aid). This didn't stop him from appearing in post-2000 films like
* Another Inverted example occurs when Dutch is investigating a routine shooting, and asks three suspects for gunshot residue tests to see if they've fired a weapon. Two of the suspects refuse, and the third agrees. Turns out, the third guy did it.

He didn't refuse the test because, "Well, you said it was a government test, right? I figured...how accurate could it be?"
* Another involved a set of lights that were so bright they cut through a thick Michigan fog and let a circling plane safely land.
* Another involved Chief Carver and his nephew, who had killed his abusive mother in desperation. Mac does have to have the boy stand trial for manslaughter, but it's likely he won't get prison time, and Carver is just forced into retirement and stripped of his pension, rather than being tried as an accessory.
* Another involved eight people (four teams of two) but not only is the person holding the bomb but the people next to the bomb holder also are taken out till either the partners are left or if only two opponents then the bomb only takes out one.
* Another involves a construction company buying out an old lady who likes mint with the new mint flavored Layers.
* Another involves a merchant that intended to use gasoline to burn the buildings of her people, she scares her into spilling it on herself and uses a slow moving army of beetles carrying lit matches toward her as she desperately tries to get away.
* Another involves a pair of conspirators who shot a man just for the thrill. Their defense tactic is to have both of them point fingers at the other, only one person actually shot the victim (only one bullet was fired) and the evidence proving conspiracy was thrown out. The jury can't convict them both, and since they're unsure who did it, they would likely acquit both. However, McCoy tricks one of the lawyers into getting the trials severed. The result, both defendants will now face separate trials for the
* Another involves Lich expressing complete disappointment in his son and wondering if he really was his, but he knows for sure because he used freaky undead mind control powers on the boy's mother...
* Another, involving an elderly woman crashing her car into a cafe, turned out to be murder-suicide on the part of the woman.
* Another Iranian dynasty, the Sassanids, managed to top the Achaemenids for a brief moment during its war with the
* Another is about a Bolo with its weapons stripped so it can be a tractor/digging machine... which still manages to save a colony of humans.
* Another is "EMERGENCY IN SECTOR 3" that plays from when you are leaving Sector 5 until you reach the Navigation Room.
* Another is Nemesis and She-Beast — She-Beast's father, Dr Diabolik, attacked a city and ended up killing over a hundred people, one of whom was Nemesis' grandfather. Nemesis blames Jadis personally, and Jadis' only response to her declaration of war was 'Take a number and get in line, bitch.'
* Another is rated TV-14 on DVD, but TV-MA on Anime Network's online service (it retains its TV-14 rating on video-on-demand).
* Another is Shirou's erotic dream about Tohsaka in the same route. It's implied that this is something related to Rider and Sakura when we see Tohsaka's eyes, as they are the same as Rider's real ones. Also, he awakens with the same drained feeling as when Sakura has been leeching his magical energy. However, it's merely played as something to embarrass Shirou and never comes up again after talking to Tohsaka the next day.
* Another is Sir Mordred who was actually the main contributor to the end of the Golden Age of King Arthur's Reign, the one that led a coup while the King was away and brought about the final battle that fatally wounded King Arthur and saw every knight of the round table killed.
* another issue) and in which the sheriff is a sincere member of the Klan, two "White Raiders" who have come to lynch an old black man and his granddaughter die—one by falling off the roof and the other by being stabbed in the back by the granddaughter. The granddaughter is not only not convicted of murder or manslaughter—she never even gets ARRESTED. It seems that Patterson forgot that self-defense is a plea the defendant makes in court, not an excuse for the cops not to arrest someone, and racist, Klan member cops would be especially

unlikely not to.
* Another issue had drugrunners tensely arguing over the best Sondheim musical.
* Another issue has a Projector for Dematerializing Any Matter for One Minute. Perry White uses it and an
* Another issue has Betty give Archie a parrot trained to repeat "BETTY COOPER!" over and over again to effectively "brainwash" him into being infatuated by her because of constantly hearing her name.
* Another issue is the fact that SEGA's mandates are so restrictive in some areas that there is little that even
* Another issue is when a screenplay nomination goes to the credited screenwriters, which, because of the arbitrary nature of the Writers Guild rules and appeals process, may not always reflect who actually wrote the screenplay. The Original Screenplay award for
* Another issue that came up in this decade was changing the appropriate gender marker in the legal documents (i.e. passports, birth certificates, driver licenses, photo IDs) for transgender individuals after transitioning. Some states in United States require transgender individuals to undergo expensive Sex reassignment surgery, or will not alter the gender marker in legal documents at all
* Another issue that's overlooked is the way armour plates work, as in real life, the plates are designed to
* Another issue the hosts bring up frequently is the fact that police precincts never speak to one another regarding local crimes, which causes killers to go on longer than if they just pooled information. This is understandable in the case of drifter killers whose crimes take place entire states apart or in times when long-distance communication was not the norm. It's less so in the case of the Boston Strangler in the 1960s when police and district attorneys
* Another is that Ahab can only be killed by hemp. He assumes this means he will only die if he is hanged. Not, say, that he should be careful around rope in general. And in fact, rope does him in, tying around him and dragging him under when the whale submerges.
* another is that it's impossible to tell if someone's an expert on literary criticism or mocking them with gibberish.
* Another is the end of every installment of Monster Clubhouse, as the Goodbye Song ends.
* Another is the interminable description of Achilles' new shield forged by Hephaestus in Book XVIII, with its silver strap and gold facing covered in embossed scenery.
* Another is the Quantum Mirror from "There but for the Grace of God" it is used a few seasons later to introduce an alternate universe Carter and
* Another is to introduce some superior technology or art, available to the small group but not the larger group, that evens the odds (think the armies of Saladin vs. an M1 Abrams Tank). If stealth specialists are forced to fight head-on heavy hitters who excel exactly at this job—which is usually the case with the "ninja" form of the trope—it's a bad strategy, and heavy losses are expectable, too.
* Another is Vincent, who is quickly ditched by Cloud when he doesn't support Cloud's plan to kill Sephiroth. He comes back
* Another is when Kryten has been turned into a human and asks Lister how his new "equipment" works. (For instance, the socket for the recharge cable seems to require an adaptor, as the lead keeps falling out.) Lister quickly corrects him, but then Kryten hands him two Polaroid photos. Lister squints a bit, rotating them to try to make sense of it, till he puts them together. His face is a picture.
* Another is when Roland Pryzbylewski pistol-whips a fourteen-year-old boy in the face, blinding the kid in one eye. This goes so far beyond the pale that even Herc and Carver (who are responsible for a
* Another Itchy and Scratchy cartoon featuring the cat and mouse fighting Hitler is a stylistic homage to the
* Another item is a drinks vending machine that gives you anything you ask for, but has a strange sense of humor. A requested "cup of Joe" led to a cup of suspiciously

non-coffee liquid and a co-worker named Joseph landing in the infirmary with bits missing.
* Another: It has 12 episodes, but also has a (somewhat spoiler-filled) OVA which even uses the same opening and ending credits. Since it chronologically happens before and during the events of the first episode, it could in some regards also be looked at as a 13-episode anime.
* Another Japanese example comes from Pachinko (パチンコ) parlors with the パ burnt out on the sign, leaving チンコ, meaning "penis".
* another jarring change between the old hand-painted cel animation to the newer digitally-colored animation.
* Another Jem'hadar example. In "By Inferno's Light", the Jem'hadar basically line up to fight Worf in a
* Another Jerry Jeff Walker song, "Trashy Women", was a popular hit for Confederate Railroad.
* Another jet-powered hammer is the Halikar, which can be thrown to disarm targets (and this can be used against you, so beware.). Unlike the other hammers on this list, it's a one-handed weapon.
* Another joiner on this particular bandwagon is Santa Cruz Organic Peanut Butter, which is 100% made from peanuts and has the label highlighting that it is "gluten free". Even brands of peanut butter that aren't 100% peanuts generally don't use gluten-containing products. While there is certainly an opportunistic advertising element to all of these examples, it's also a bit Truth In Television. To legally declare a product "gluten free" you have to do gluten testing, maintain separate production facilities, etc. Gluten contamination can occur before the product even exists — for instance, oats growing in a field where wheat was once planted.
* Another joke also illustrates this, where a speaker is announcing a plentiful harvest. First he tries to say the food is enough [for everyone] to eat (g
* Another Joke: "Boy to girl: Do you like Kipling? Girl to boy: I don't know, I've never kippled." Guinness reports that the most popular picture postcard ever printed had essentially this joke on it. See
* Another joke has a guy walking up to a housewife, slowly coaxing her to undress herself for massive sums of money, before convincing her to sleep with him for an even larger sum. She agrees because her husband's business is apparently in dire financial straits. When her husband comes home later, he asks her if anyone came over. When she denies, he curses "that lazy employee of mine" for not delivering the cash money he ordered him to earlier that day.
* Another joke has a man boasting that he could "carry a mountain across the town on his back". When challenged, he asks for the mountain to be placed on his back, because he only said he could
* Another joke has a man getting fire insurance on his home. After he signs everything, the agent reminds him that he can't set fire to the place and try to claim insurance on that. The man mutters that he should've known there was a catch.
* Another joke has an old woman get three wishes from a fairy godmother. Her first two wishes are to be rich and a young, beautiful princess, respectively. The fairy godmother grants them somewhat nicely, though she only makes the woman rich by making her rocking chair solid gold. The last wish is for the woman's dog to be turned into a handsome prince. The dog is turned into the "most handsome man anyone had ever seen", and the woman is immediately smitten with him. But then he whispers in her ear, "
* Another joke involves someone entering a music store for the first time, wanting to start learning to play music, looking around the store to find some interesting-looking instruments and deciding that they want to try learning several of them and going to the cashier, stating that they want to buy "that blue clarinet, that white harmonica and that red trumpet". The cashier replies "I can sell you the thermos and that radiator hasn't worked in years so you can have that as well, but I'm afraid that we're required to have a functioning fire extinguisher on the premises".
* Another joke is about a college student asking his bearded professor if he

sleeps with his beard above or below the covers. The professor shrugs and says he has never thought about it. The next day, the professor comes to class with bloodshot, baggy eyes and grabs the student: "What the hell did you do to me? Now I can't sleep. It's uncomfortable either way."
* Another joke is about two math professors sitting in a restaraunt: one of them claims that ordinary people do not understand mathematics at all, while the second one argues that they do. While the first one is in a restroom, the second calls a young waitress and asks her to give the answer "one third x cubed" when he asks her a question (in some versions, he even gives her a tip for this). She is apparently baffled and struggles to say it, muttering to herself: "one thir — dex cue", "one thir dex cuebd". Then the first professor returns from the restroom, and his friend asks the waitress what is the integral of x^2 to prove his point. As expected, she replies: "One third x cubed", the professor is shocked, and his friend is triumphant... and then, turning over her shoulder, she smiles and adds: "Plus a constant".
* Another joke offers this trope as the explanation for the trip from Egypt to Canaan following the Exodus taking 40 years.
* Another joke: "Sir, the bad news is that my scalpel slipped while I was performing surgery on your upper thigh. The good news is that your health insurance plan seems to also cover accidental castrations."
* Another joke, told by a comedian, suggests trying to pay for an Extra Value Meal with a fist full of $2 bills if one would like to see a whole
* Another joke was "if you take an infinite number of monkeys on typewriters and give them an infinite amount of time, sooner or later you'll have a room full of dead monkeys. Turns out monkeys need feeding."
* Another joke with the Pope involves His Holiness asking the Popemobile's driver to let him try the car. The Pope proceeds to break as many traffic laws as he can. A cop pulls them over... and then calls the HQ: "We have an important lawbreaker here. I don't know who he is, but his driver is the Pope!"
* Another Journey: Dante and Pride serve as Father's most loyal and trusted subordinates. Pride is the eldest and most powerful homunculus created by Father, watches over the tunnel Sloth digs around Amestris, and reports back to Father any discovery he finds with his shadows. Dante serves as Father's primary human ally, locates and prepares alchemists to become potential sacrifices for Father's Nationwide Transmutation Circle, and is even able to command the homunculi's unquestioned obedience.
* Another journey of ultimate challenge in the fantasy world of Hyrule.
* Another Judge Dredd example is the Rubber Richochet bullets used by the Judges. Mostly used by the big JD himself to pull off "impossible" shots. Nothing hilarious about these babies. Justified in that real life rubber bullets (intended to be non-lethal) have
* another juju, which could be used to defeat Lord English when Vriska manages to yank the narrative back to her perspective and dumps the thing on the ground so everyone can see what it is. Unfortunately, it remains unclear how it works.
* Another Keiichi is occasionally the victim of these, which Satoko can summon with the mere snap of her fingers.
* Another key skill for these pitchers: learning the hitters. Every hitter has pitches they can do very little against. Additionally, every hitter must anticipate what's coming and try to keep their timing on with incredible skill. As long as your control and ability to keep the hitter off-balance hold up, a pitcher with excellent knowledge of the opposing line-up can be a terror.
* Another KFC slogan, "Finger-Lickin' Good," was translated as "Eat Your Fingers Off."
* Another KH2 example, when Sora, Donald, and Goofy are about to be overwhelmed by
* Another killer left his victims frozen in various poses, even standing up.
* Another killer made a heart with his victims (well, with a little imagination it's a heart)
* Another Kind Of Magic, Trixie has a nickname for each of her friends ('Hayseed', 'Diva', 'Hummingbird', 'Wet Blanket', 'Neon Sign') while her best friend Twilight

labours under several. She only does it out of affection, however, and genuinely loves them all. This does not mean Twilight isn't horrified when Trixie refers to their shared mentor, Celestia, as 'Princess Overrated' (and later refers to the royal sisters as 'Bright Light' and 'Night Light').
* another kind of means which was good enough for the purpose as no local prince had much of a navy.
* Another King example is in the story "Summer Thunder", when the narrator adopts a stray after a devastating nuclear war. The dog's death of radiation poisoning, combined with the narrator's own symptoms developing, triggers his suicide.
* Another Klingon character, B'vat, is obsessed with keeping the war with the Federation going because without it, the Klingons will descend into internecine conflict. His actions are atrocious, but given that this
* Another Koontz example is Moonlight Bay in his Christopher Snow books, where the authorities are cooperating with the military to hide a massive, civilization-destroying secret.
* Another laptop issue: The "Fn" key on some laptop keyboards is placed in the lower-left corner of the keyboard, where the Ctrl key, now slightly over to the right, is traditionally located. Generally, investing in a USB keyboard can alleviate this.
* Another large-scale engagement happens in the Season 2 finale, where the
* another last-second win. Loyola's run not only made them the fourth 11-seed to get to the Final Four, but also turned their team chaplain, 98-year-old nun Sister Jean, into a national and even international media sensation.
* Another later episode has the guys trying to convince their wives nothing sordid happens in their local nudie bar "The Jiggly Room". Jefferson tries to hide he's there
* Another later mascot — two guitar players asking 'how much people save' with something inane and stupid in the beginning. Such as 'Happier than a Witch in a Broom Factory'.
* Another, later story shows what would have happened if the FF had to fight
* Another legendary weapon from the first campaign is the Hammer of Ironfist, the
* Another legend has it that he didn't need an interpreter for that: he learned the curse words himself (the only words he knew in the English language).
* Another legend says that Telemachus marries Nausicaa, a princess who at least had some
* Another Legion member, Wildfire, is really a sentient ball of energy and his body is a humanoid-shaped HAZMAT suit which contains him.
* Another lesser example is when George Michael plans a surprise party for Maeby. This causes her to
* Another lesser-known NFL ownership example: The government of Harris County, Texas (home to
* Another, lesser known version of the story was that Pheidippides was tasked with the mission to gain Spartan help for the Battle of Marathon but failed, because the Spartans refused to help the Athenians in time. But he managed to get all the way to Sparta and back to Athens in time to warn the Athenians they'd get no help
* Another less-known example is Carmilla and her fledgling, Laura. While not explicitly stated, it's implied that Carmilla was a tender and loving creature around her. Laura herself didn't
* Another less-than-competent example is Kyle Broslovski's lawyer father, Gerald, who nonetheless proceeds to help Eric Cartman and a number of other
* Another level of irony also exists here, when you contrast this with another scene in the book. Beverly's father is portrayed as an abusive, overprotective, borderline psychopath. When he learns that Beverly has been playing with boys, he insists — violently — on
* Another Life (2019): Zayn, who serves as the ship's medic and has a hard time dealing with the new diseases they encounter.
* Another "life-sucky thingy" is whatever the MCP uses to de-rez (kill) errant programs in
* Another likely candidate for the Abrahamic God is Logos, Titan of Logic, Reason

and Order. It is highly likely that the material World was created due to its power and the gods never bound Logos since it was considered to be a highly benign Titan.
* Another literal example can be found in "The Unspeakables", an entire team of wrestling
* Another: "Little birdie flying high / Dropped a message from the sky / 'Oh,' said the farmer, wiping his eye, / 'It's lucky that my cows don't fly.'
* Another Little "No" happens in a similar context - situated in the Think Tank, the entire group experience
* Another living God would be Phantaminum, being a man-made God who can't be interfered with by any other than his equal. Just like the relatively less powerful
* Another living location is Spragg the Living Hill—it was a hill controlling people's minds.
* Another Lizzie here: Saint Elisabeth of Hungary, said to have gone into a huge
* Another lobster cartoon, with the lobster saying "…three wishes? Did I say three wishes? Shoot, I'll grant you FOUR wishes!" The chef looks particularly unamused.
* Another long-lived one is the equally self-descriptive "One City Challenge": win the game as a
* Another long running campaign was for Cadbury's Flake bars, which featured various young ladies enjoying the sensual pleasure of crumbly chocolate in private. "Only the crumbliest, flakiest chocolate, tastes like chocolate never tasted before." Recently brought back, with Joss Stone.
* Another long-time LA news stalwart, Hal Fishman, played the studio news anchor during the climactic scene of
* Another Lord Huron song, "The World Ender", is written from the perspective of a character who has returned from death to avenge their own apparent murder.
* Another lottery commercial has an equally old lady watching herself on the same device get a ticket because someone grabbed the last of the candy bars she wanted. She comments to her robot butler she never thanked him properly, to which the butler replies "
* Another made it look like he had killed the victim (a fairly accomplished swordsman) in a swordfight by cutting up the room (cutting way too much and too randomly while purposefully leaving a certain statue intact to implicate another suspect) and leaving a sword clenched (the wrong way) in the victim's hands. This was also done in an attempt to hide the dying message left by the victim while his back was turned.
* Another main character, Brianna, also fits the trope pretty well. Like Moana, she has a kind personality and proper manners. She does get angry on some occasions, and she freaks out several times, first shown when
* Another main character example is Naofumi Iwatani, the titular character of
* Another main theme in this show involves saving the Earth from danger. When episode 5 premiered, most affiliates displayed
* Another major difference from your archetypal dwarf is Azeroth's dwarves have historically had pretty good relations with elves. The Wildhammer Clan were close allies with the High Elves, and the remaining High Elves in the Alliance are still reasonably good allies with the Ironforge Dwarves over a shared love of history and scholarship. The War of the Ancients novels implied that dwarven ancestors helped the Night Elves prior to the Sundering. Whatever enmity dwarves may have with Blood Elves has more to do with them being Horde, rather than being elves.
* Another major difference is relation. Unlike other fiction which tends to put humans and elves as kin, revelations some humans and gnomes were capable of the same "turn your skin into metal or stone" trick dwarves could and further elaboration about each races' histories as the descendants of titan creations showed humans, dwarves, and gnomes had common ancestry. When a human time traveled to before elves knew of humanity, he was mistaken for an extra tall dwarf.
* Another major factor that increased interest in the game was its portrayal of series
* Another major innovation is the totally unmanned turret. This was long toyed with all around the world, but it is the first time it appeared on a production

tank. This feature allows the designers to isolate the potentially volatile ammo storage from the crew, a traditional weakness of previously very compact Russian tanks, that have long suffered from most penetrating hits cooking off the ammo, often together with the crew. A problem might be large blasts that damage the electronics and penetrating shots could be difficult to repair.
* Another major reason (also having to do with modesty) was that stretchy materials like spandex did not exist at that time. The feats performed by athletes and strongmen caused a lot of stress on the existing fabrics and had a high chance of tearing their costumes. So, to avert a rather embarrassing
* Another major reason why this trope is in effect is that Speedy Gonzales himself is not the offensive (or the most offensive) portion of his cartoons. Instead, what's offensive is the fact that the cartoons go out of their way to paint all the OTHER Mexican mice as lazy and gullible as possible.
* Another major subversion is not only Hancock stronger than Luffy, it isn't his 'manly' traits that attracted her to him in the first place. It was his empathy, chastity (being able to resist her charms), and his general affability. In this case, it was more like all Amazons end up with Hercules because they're the only ones capable of surviving long enough to show they're not complete dicks.
* another major telecom company in various support groups such as mythological creatures, chronic liars, etc., to imply that the rival company is not being truthful with their customers.
* Another male example, one of the potential love interests for a female player character is Thane, who has a lung disease somewhat similar to Cystic Fibrosis which is slowly killing him.
* Another manga chapter dealt with a pair of twin sisters named Linda and Rachika. The
* Another manga chapter has Negi cramming a month of training into about 3 days using a device similar to Eva's resort. Then he uses a magic scroll with a
* Another man is sucked down the drain of a sink in homage to the original 1958
* Another man lost his mentally handicapped ward's savings in a casino and tried to fake getting stabbed in the back.
* Another Mansion example. For years, fans thought that a small circle of metal embedded in a brick outside the ride's exit was either Master Gracey's or the Bride's wedding ring, which was thrown from the attic window (in Gracey's case, he tossed it before committing suicide, while the Bride was said to have hurled the ring out of grief for losing her husband). The real explanation was far more mundane—the metal was the remnant of an old post used to keep guests in a line—but the theory became so pervasive that when the Mansion's queue got a massive remake, the Imagineers included a small wedding ring hidden in one of the bricks.
* Another man steals his friend's lungs. While the victim does catch the thief red-handed, it's not until after his entire ribcage has been forced open.
* Another Man's Terror: A character goes through the experiences of a dead character
* Another Man's Terror: A character relives the end of another character's life.
* Another Man's Terror: Having a better understanding of another person's death by experiencing the circumstances of their demise firsthand.
* Another Mantis example. He was the captain of The Arcane Horde (himself/
* Another man was poisoned via a poisoned wet napkin while eating sushi.
* Another marathon, that was simply dubbed "Looney Tunes Marathon", aired on November 15th from 1:00pm-7:00pm to celebrate their return to the regular schedule after being off for 5 years.
* Another Marge example come from "Lemon of Troy" when she finds out that her lesson to Bart on pride for his town
* Another Martian Knight, Count Mazuurek, marvels at a simple compass, remarking that it could never work on his homeworld, which lacks Earth's magnetic field.
* Another Marvel example is the Controller, who constantly attempts to betray and overthrow his boss
* Another Marvel subversive group, Advanced Idea Mechanics, started as the Elite

Mooks of HYDRA (aka THEM), being its super-science division; AIM itself mass-produced synthetic soldiers like its "chemical androids" and Adaptoids.
* Another massive feat of engineering came at the Battle of Alesia. In order to besiege the high-walled city, Caesar's army built their own wall around it to cut off all supplies and prevent a breakout, all within a span of a couple of days. Then, when Caesar learned of a Gaul relief force coming to break the siege, he had a
* Another Mathnet episode also involving a kidnapping has them recieve a call of touch-tones — they're given twelve tones that don't correspond to any phone number in service. But thanks to George using the power of combinatorial analysis (i.e.: George putting the letters each touch-tone represents vertically on little sticks and moving them up and down until they make out words) they determine the real meaning of the touch-tones:
* Another McBain movie in "King Of The Hill" has the hero jumping onto a jet in mid-air, tearing open the cockpit and breaking the pilot's neck. Marge, upon watching, chuckles and says "Now that's what I call
* Another Meat Loaf single, "I'd Do Anything for Love (But I Won't Do That)" was used humorously for a Dr Pepper commercial in which a man does increasingly unmanly things to please his girlfriend as the lyrics play. She tries to take a drink of his Dr Pepper just as the chorus begins. And he leaves her.
* Another medical example of this trope, albeit not a barcode either, is to tattoo important medical information such as blood-type and any significant allergies, usually on the side of the body below the left arm (assuming the patient is right-handed). This type of tattoo is known among military veterans as a "meat-tag".
* Another medieval example was England vs. France in the Hundred Years War, pitting the former's
* Another Mega Drive game Psygnosis chose not to release was Digital Illusions' all-but-finished
* Another Meg related one happens when she calls to be picked up from the skating rink. Peter and his friends head to do so. But decides to stay awhile and skate. Eventually they head off..but forget to bring Meg with them.
* Another Me: In a creepy example, Fay's twin Lila starts taking her place, with no one except her aware of it until later (they don't believe this either, as she's not known to have an identical sister).
* Another member of the Ala Rubra, Jack Rakan, said to know no bounds with women, even going so far as to remove one of the enemies'
* Another member of the Canting Crew is Altogether Andrews, who has several split personalities, none of which is named Andrews. This is never brought up.
* Another member of the guardians is Aura Bella Fiora a tomboyish dark elf,
* Another memorable aversion is the final duel between Loran and Ghingnham: Ghingnham throws Loran a sword and asks whether Loran ever fought with a real sword before. Loran replies in the affirmative, the two charge at each other screaming... and Loran unleashes a furious barrage that breaks Ghingnham's sword in about three seconds, then Ghingnham gets scooped up by a berserk Moonlight Butterfly. Talk about anticlimactic...
* Another memorable bit has a suicide bomber asking his handlers what he's going to do afterwards, and their (failed) attempts to explain the concept to him.
* Another memorable example was in "Burns' Heir," when the evil Mr. Burns hired three actors to portray Homer, Marge, and Lisa to fool Bart into thinking via a hidden camera that the family does not love him anymore. While their disguises were physically flawless, they performed with
* Another memorable line is Peter telling Lois "Ok, but remember our agreement, I go to this thing and tonight I get anal. No matter
* Another memorable moment has the King of Swamp Castle actually managing to subvert the typical Disney Death and
* Another memorial episode is "Jus In Bello" where the brothers could easily have stopped any more deaths just by allowing Ruby to sacrifice one virgin girl, who was prepared to be the sacrifice. Even for Supernatural, this episode has a
* Another mention in "The People vs. Martin Sugar" when Jeff is forced to quit

smoking pot cited it's for his medical condition. Jeff hides in different places and gets caught by Francine.
* Another Merlin example, the famous Wizard has a Magic Duel with a Dark Fairy Goddess at the end of the
* Another meta example. Fans were concerned that the Critic really would be given up for good in
* Another meta-example is the various incarnations of the Doctor in Classic and New Who. The most popular Doctor in their respective eras (Four and Ten) get replaced by the youngest actor to play the role at the time (Five and Eleven) and their replacement is a Doctor designed to hark back to the earlier, darker side of the Doctor; played by
* Another method for developing tank destroyers was to mount the most powerful guns available in a tracked vehicle chassis. Either the vehicle would be lightly armored and possibly equipped with a fast-traversing turret to make them
* Another method involves starting a topic with a double meaning, with one interpretation (usually the more obvious one) being highly shocking or offensive, but the actual post being about the more mundane interpretation. For example, starting a topic with the title "I HATE FAGGOTS", only for the post to actually be about
* Another method of countering vehicles is to simply block the path with a sufficiently solid object. This might range from giant caltrops to heavy objects like concrete planters (the latter has the added benefit of being more pleasant to look at once you put some plants in them). This is often used to protect areas from car bombs while still allowing pedestrians to travel freely in public areas.
* Another method used is for the other two members to say "not it!" before the third even finished explaining the myth.
* Another military joke where you [insert branches of choice here]. Three officers (in different units, say Army, Navy, and Marines) are arguing about whose soldiers are the bravest while standing on a building/ship. The first two each call up a private/seaman/other "grunt" and tell him to jump off. The soldiers say "Yes Sir!" and jump. The last officer smiles, calls up a private from his unit, and tells him to jump. The private stands up straight, salutes, and says "Fuck you" before leaving. The officer turns to the others and says, "That, my friends, is true bravery."
* Another Miller Lite Commercial, "Miller Lite Presents 'Full Contact Golf'" shows a bizarre golf game where a golfer has to successfully play a hole while a football defense tries to stop him.
* Another Mind universe: humanity is at the early 21st century development level and comes under attack from space.
* Another minor example; Cersei seems impressed by watching Gregor carving up prisoners, since it means he'll be more than capable of dealing with anyone Tyrion nominates as his champion for Trial by Combat.
* Another minor example in Episode 19. When Zim is wrecking his house in a rage over
* Another mission gives the PCs an ever-expanding authority role over a project driving all of Alpha Complex toward mass starvation. Near the end, someone may notice a
* Another mission has the SAS rescue mission a captured informant. Fortunately,
* Another mission involved taking off while your airbase was under attack and fighting off the enemy planes.
* Another mission involves a rogue robot using a similar procedure to induce chemical amnesia. The Troubleshooters
* Another MLB example: The spitball was banned in 1920, but pitchers who specialized in throwing spitballs were allowed to keep doing so for the rest of their careers. The last spitballer was Hall of Famer Burleigh "Ol' Stubblebeard" Grimes, who retired in 1934.
* Another MLS stadium that just can't seem to get approved is the one for New York City F.C.,
* Another MMA fighter Kazuyuki "Iron Head" Fujita's entire fighting style seemed

to revolve around getting kicked in the head until the other fighter was too tired to continue fighting. He infamously won a bout against Ken Shamrock when Shamrock had heart palpitations after dominating the entire fight. To put it another way: he tanked a beating so vicious the
* Another moment has him reveal that merely reciting the teacher's copy machine code makes his butt feel warm.
* Another moment is when he hijacks the starting ceremony at the Sports Festival. Riley brings the entire festival to a grinding halt for what basically amounts to shilling Hatsume and Izuku's equipment and a joke at Endeavor's expense. While Riley tries to justify it that the UA students are kids trying to have fun, that's not what the students are here for, they're here to concentrate on moving forward in their careers as heroes by trying to obtain an internship at Hero Agencies through how well they perform in the Sports Festival.
* Another moment leads to Bart's accidental mooning of the US flag causing him and his family to be branded as traitors to the country in "
* Another moment where Sanji suffered a Game-Breaking Injury was during the
* Another mom gets called by a charity who received a pledge for $100... from her nine-year-old son, without anyone's knowledge or permission. While the charity rep is embarrassed that they didn't verify the age of their donor before taking the pledge, Mom decides that if he made the pledge,
* Another monster card that stands out is Parasite Paracide. Its International artwork looks normal, but its original Japanese artwork features it
* another monster do a direct attack to the opponent's life points afterward, just as long as it's not a Blue-Eyes.) Kaiba was also quick to make his signature combo the Ultimate dragon split which means that on direct attack, it can deal 13500 direct damage to any player, a one turn kill.
* another Monster Krabby Patty, only this time his arms pop off when attempting to flip. However, this time he is able to laugh it off.
* Another Monty Python Record has an audio version of their documentary on the Piranha Brothers crime family end when mobster Luigi Vercotti walks in and informs the sound engineer that he should quit the sketch. When the engineer balks, there's a large scratch and Luigi says "Awww, sorry, squire, I scratched your record!/orry, squire, I scratched your record!/orry, squire, I scratched your record! etc. etc.
* Another Monty Python Record has Norman St. John Polevaulter, who contradicts people.
* Another Monty Python Record, where side 1 of the record ends with an argument about whether to continue the current sketch, which ends with "Oh, sorry, squire, I've scratched the record" with the record grooves arranged to make this line repeat indefinitely.
* Another more affectionate nickname is "Zucaritas", which is how Frosted Flakes are called in Latin America.
* Another (more amusing) interpretation is that the player remains in the
* Another more game-breaking variant existed for a brief period when the Mindspike staff was introduced. What was normally a very early level item that was meant to facilitate unlimited elemental runes albeit a very low statted weapon it came with a special attack that would deal weapon damage to an NPC... any NPC, including those which did not have any combat stats or health leading to the deaths of such NPCs as Bankers and many quest-starting NPC which would take quite a while to respawn naturally.
* Another, more humiliating, incident happened to the Bills during their September 16, 2018 game against the Los Angeles Chargers. After being picked apart by the Chargers 28-6 in the first half, linebacker Vontae Davis got so fed up with the Bills' mediocrity that he
* Another, more low-key case would be the disappearance of several Earth-based fantastical elements, such as the
* Another more minor (but even weirder) example, involves Tsubasa Kurenai, the
* Another, more obscure nowadays nickname is The Merry Marvel Marching Society.
* Another, more obscure story had Donald getting annoyed at the book's seemingly infinite wisdom and asked the Woodchucks about who the author was. Cue panic as not

even the top generals know. They then had to keep Donald tied up so he would not go to the newspaper with the information that "the Woodchucks follow advice that could as well be made up". In the end
* Another (more painful) example might be someone who rides a bike with regular gears, and then try to ride a fixed-gear bike. Many new fixed-gear riders (including a lot of would-be thieves) quickly find out that no, the bike they are on does not coast like their regular one. Many spills have happened because of this.
* Another more straight example is when they enter a TV show to win a house and when a woman asks their names:
* Another, more successful attempt, is done at the end of the game between the main party. Fang and Vanille, however, are unreachable and perform a
* Another, more unfortunate subversion of this is in the teacher/student relationship between Harry and Molly. Harry met her when she was still a kid and cares about her a lot, but really wants to maintain a purely platonic relationship and seems to think that's the case. After several years, a number of people finally point out to him that she is obviously still carrying a huge torch for him. He isn't happy about it.
* Another mortal, Haskill, is also known to have taken on the role at some point. Sheogorath tells the player that the title "gets passed down from me to myself every few thousand years." It's unknown whether other daedric princes work in the same way or if it's unique to him.
* Another mother-daughter variant — the main character's mother in
* Another mother in the episode is a downplayed stage mom. She's pretty caught up in the pageant scene, but she doesn't seem to be trying to live vicariously through her daughter (as her pageant career was a successful one) and is a more affectionate parent than the victim's mom.
* Another movie Martin and Emilio star together as father and son is
* Another movie that Comedy Central adored back then was the 1988 film
* Another, much older version has God in mortal disguise ask for food and lodging at a rich man's house and being turned away. He goes next door to a poor man's house and is welcomed with open arms. The next morning He reveals His divinity and says the couple can have three wishes. They make two simple wishes (good health and daily bread, and a guaranteed spot in Heaven) and God asks them if they wouldn't like a nice new house. Soon after, the rich man sees the new mansion and putting two and two together, rides after God and begs Him for three wishes as well. Surprisingly, God agrees but warns him to be careful. On the way home, the rich man's horse starts to act up. "Stupid nag, I wish you'd break your neck!" Strike one. He then starts to lug the expensive saddle home, thinks of his wife who's probably having tea and cake in the shade, and bitterly wishes that the saddle was stuck to her ass. Strike two. When he gets home, his wife is rather insistent that he use the last wish to get the saddle off her ass. Strike three.
* another, much stronger, Galvatron from a different future who came back in time to kill Unicron. He abandons this plan when he accidentally changes history and realizes that, since he continued to exist, he was just in an alternate timeline. This is a slight justification to Galvatron not caring about the fate of a universe that wasn't his own though; he's a bit of a jerk and more than a bit mad.
* Another music-related example is the electronic music collective Gescom's Minidisc, which has 88 tracks ranging from mere seconds to few minutes. The record is supposed to be played on shuffle, with a different hour-long consistent piece being played each time. (At the time of its release, only the obscure Minidisc format allowed gapless playback between tracks.)
* Another mutant from the Legion books is the hero Ferro Lad (or just Ferro, in the post-Zero Hour version) who has the power to turn his body into steel.
* another mutineers took over the island, subsequently becoming integrated with the New South Wales colony, and Australia upon Federation.
* another mysterious hermit, the nature spirit Mosul, claims to be older than the mountains of Transylvania.
* Another myth had a fairy cursed to remain as a human because the guy who’d

captured her said her name. If she was ever hit by something made of iron, she would return to her own people forever.
* Another Nail ring, which she uses to give Scott an energy construct body, but for much of the story his mind remains in Big Barda's armor. He implies at one point that he enjoys the situation; while his mind is in Barda's armor, he is in constant contact with her body.
* Another Nail) was slowly but surely eating all of existence, starting with the more basic forms of energy, moving up to cosmic power, magic and the like and eventually proceeding to matter and ultimately spacetime itself. Adding insult to injury, far from being a villainous predator, the only sensation this practically mindless cosmic amoeba felt was the vaguest inkling of satisfaction at sating its hunger.
* Another naval tradition was to go to the engine room to get a BT Punch...a BT being a Boiler Tech...
* Another Nazi failure was the planned demolition of Berlin to build, among other things, the
* Another NBA player, Enes Kanter, has been effectively stateless since 2017. Born a Turkish citizen,
* Another nemesis is Rosalyn the baby-sitter, who is the only person Calvin actually seems to fear.
* Another New Berlin is also a Federation colony on the frontier. New Manhattan, New Providence, New France, and New Paris are also mentioned briefly. The
* Another New Bunny is about the damage-control Warner tried to do when people rebelled against the plans for Loonatics. That is, to try and update the characters, while keeping them the same at the same time.
* Another (newer) ability is actually called Smoke Bomb, but it's mostly unusable for escaping, rather creating an area that can't be targeted into from the outside by enemies. It's practically an inversion as it forces you to stand still if you want to be covered by it and could be used to get
* another new faction who were apparently the worst of the lot, blew them up and announced that the war was over and indeed had never happened (even though several events that were a direct result of the war clearly still had). Uh-huh?
* Another news anchor in 2018, February 20, started of her segment with "President
* Another new song that didn't last the Broadway preview period was "Tales of Wonka", which was replaced with "Charlie, You and I".
* Another news story:. He only lasted 15 minutes. (...because he had things to do and 20 hours is a long time.)
* Another New World of Darkness example is the Tolltaker Knighthood from
* Another. Nobody, not even the "extra" themself, remembers their death or that they shouldn't be on the class roster, but since their presence means there is one too many people in the class, the universe tries to balance things out by killing members of the class (and their family and friends) in increasingly improbable and gruesome accidents. The class in turn try to stave off the calamity by selecting one member of the class and pretending they don't exist for the duration of the school year, a countermeasure which is dubiously effective at best.
* Another non-canon example where a time traveling Spark from the distant past gives another variation of the expression.
* Another non-cereal example can be seen in Eggo commercials; everybody, from the child to the mother to the
* Another non-christmas example occurs when Tim and Wilson get into an argument over Wilson wanting to build a greenhouse in his backyard.
* Another non-comedic example: A man murders his twin, then takes over his twin's life on
* Another non-comedic villainous version is the (always capitalised) List used by the Decepticon Justice Division. It's a list of
* Another non-hive example is the starscrapers of Extremis Six which housed the population of the mining world. They were toppled by Chaos Titans using Sonic weapons killing billions.
* Another non-horror example: in G.I. Joe episode "Skeletons in the Closet" the

figure in a painting of one of Lady Jaye's ancestors
* Another non-human example: Kabang, a female hero Aspin (dog) in the Philippines, saved two young girls from being run over by a motorcycle, only to have her face disfigured. This, for the dog, is a
* Another Non-humorous example pretty much sets up the entire plot of
* Another non-lethal example in the Hiker Interlude. The title character loses half his team to
* Another non-Method actor who had to be one for a specific role was
* Another non-romantic example from the same series: Kincaid and the Archive. The latter is a young girl with the sum of all human knowledge and the former is her bodyguard (who's almost as tall as Harry), leaving them with a weird 'father'/super-intelligent daughter relationship.
* Another non-romantic version is in "Restoration" when Felicity patches up Oliver. Instead of their usual
* Another non-straight example: many animals - especially deep sea animals - have what
* Another notable example is glass-breaking girl Maddie who can control glass with her mind.
* Another notable example is Hathor, who even without her seduction drugs was supposed to be irresistibly attractive.
* Another notable example is Manfred von Karma. All he cares about his his perfect trial record. He doesn't care who he hurts, or if he might be putting innocent people in prison for crimes they never committed.
* Another notable example is the former Sindalian Empire, which liberally bombarded planets known or suspected to harbor resistance - which was a large part of the reason that rebels rose up to tear it apart.
* Another notable example: Janemba messed up with the Living World and Other World, causing that the killed villains invaded earth, including the
* Another notable faction is the secretive group known as the Seekers. Commonly thought to be nothing more than outlandish tomb raiders, their goal is to use Ancient technology to help humanity reclaim the world from the various monsters and hazards. They are at odds with the Empire at the point the games take place, despite some initial common ground.
* Another notable instance was when Sango was unconscious and Miroku needed to rouse her via CPR. However, she recovers just as he is about to apply lip service. The result was the scene pans out a good distance and a slap is heard, and the camera then returns to the two — Miroku's face is bright red from the impacting slap.
* Another notable Irish fairy is the Gancanagh. A handsome and vain male, the Gancanagh is your basic
* Another notable mailing address example that most '90s kids could probably still recite to this day: Scruff
* Another notable Oreo knock-off is the Egyptian one made by that country's cookie giant BiscoMisr, whose "Borio" cookies
* Another notable pandemic interruption was the May 8, 2020 one, as it had interrupted the
* Another notable World War II example was the Battle of Ortona, known as "Little Stalingrad" or "Italian Stalingrad," in which the Canadians dislodged the Germans from the town of Ortona which anchored the north end of the Gustav Line (the same line as Monte Cassino). The Canadians made use of (and named) a technique called "mouse-holing" in which they would use antitank weapons to blow holes in the shared walls of Ortona's houses rather than risk moving through the street.
* Another not actually a twin example, the wrestling team "The Killer Bees" often donned their masks at the end of a match so that they could swap without using a tag and not have the referee realise the wrong man was in the ring.
* Another Not Always Working example is when an employee is so used to having a customer ask for something for free that they keep trying to "explain" to the customer that they can't, for instance, get a free replacement phone because water damage is not covered by warranty, not registering that the customer has said they

don't want a
* Another (not completely different) sketch had a round-table discussion on customs enforcement with a duck, a cat and a lizard. The duck, cat and lizard were obviously played by wooden models, so their inability to respond to questions is unsurprising.
* Another Note, but isn't by the original mangaka, and several things in it appear to either be outrageously untrue (such as the third world war having happened in a world mostly similar to our own) or otherwise clearly inconsistent with the anime and manga canons.
* Another Note last victim, apparently to make the crime scene more confusing to investigators. This may be a subversion of the trope, as it is not known what he did with it.
* Another noteworthy example is Reiner's young cousin, Gabi Braun; she was raised repeating the anti-Eldian propaganda by heart, swearing to wipe out the Eldans at Paradis, and following on Reiner's footsteps to become the next Armored Titan. When she and Falco
* Another noticeable use of recycled animation happens in the fourth season episode "Synchronized Swimming," opening with footage of Arnold and the other kids playing and swimming in the city pool taken from "6th Grade Girls." This results in
* Another novel starts with Anita finding a Naga that's been skinned alive by that story's
* Another NPC who reacts to emotes is Sir Tiffy in Falador. Saluting to him is required for one of the Falador achievements, but you can give him the "Goblin Salute" from the cave goblin quests instead, and he'll remark on it.
* Another nuclear physics example (though slightly stretching the idea of grey goo): a true vacuum. If our universe is a metastable false vacuum, then at any time a true vacuum could spontaneously appear, and expand out at the speed of light. It would turn everything it envelopes into new forms of matter (and of course destroy everything in the process). Right now we can't rule this out, and perhaps a true vacuum is heading towards us right now...
* Another number cut shortly before the London previews began was "Just Like That", an ABBA song that was never released in its entirety. The number was going to be a duet between Sky and Sophie telling how they met, and was going to be sung before "Money, Money, Money".
* Another obscure Cole Porter song, "Make A Date With A Great Psychoanalyst," summarizes the plot of
* : Another obscure line of action figures that was centered around canine-human hybrid super-soldiers. The premise was very similar to G.I. Joe.
* Another obscure mid-80s country band, The Wrays, charted four singles but never put out a full album. After they broke up, group member Bubba Wray (real name: Floyd Elliot Wray) decided to take on a solo career as
* Another occasion had us told about the debacle of Frasier's greedy and scheming agent Bebe's attempt to marry an elderly tycoon:
* Another occasion has them talk about what they would do if the world ended. Tom would drive cars off of cliffs all day by putting cinderblocks on their pedals. Crow would wear football gear and jump through windows.
* Another occasion where "missus and the ex" is invoked in almost those terms is "
* Another occurrence is in the first season episode "Talent Night", where Dot nearly kisses a very shocked Bob in front of the entire city. Of course, she ends that one herself by putting a hand on his face and pushing him to the ground.
* Another occurrence of this is when Ben is about to shoot Penny but is stopped when her young son walks out of the boat and hesitates just long enough to get soundly thrashed by a very irate Desmond, who he had just shot right in the groceries.
* Another occurs as Azaria is stood up for her meet-the-online-boyfriend-in-person-for-the-first-time Valentine's Day Date. But he has a good reason. She's just a little too upset to hear him out...
* Another occurs during "Ancient Walls" as your squadron launches from the
* Another occurs when Harry and Lloyd are stranded when a tour bus rolls up and

they're offered the chance to work for a
* Another occurs with Ra's al Ghul's section of the game, where yet another unreal battle takes place in a theme park Middle Eastern fantasy world before jumping right back into post-Dark Knight grim-and-gritty Gotham
* Another odd case with Vince occurred in 1999, where he was a heel going up against "Stone Cold" Steve Austin and the
* Another odd variant is used in "App Development and Condiments". Jeff's comedy routine is all about how "Twos", "Threes", and "Fours" act differently from each other.
* Another of Blurry's incarnations, the Bishop "Nico" (an elderly man who appears in the videos for "Jumpsuit" and "Nico and the Niners") also sports the color scheme, in the form of a
* Another of Cuddly Ken's programmes replaced the London buildings that made up the Thames logo with
* Another offender from the dairy industry: A mother is urging her two kids to drink their milk so they can grow up strong. The children scoff, "Mr. Johnson next door doesn't drink milk, and he's fine," they say. And coincidentally, Mr. Johnson is next door in his yard, doing some yardwork. He waves hello to the kids, and they wave back. Then Mr. Johnson leans over to pick up the handles of his wheelbarrow, but when he straightens back up, his arms rip off at the shoulders. "Oh, dear, that's not good," he says. The kids and mother all scream in terror, grab their glasses and start power-chugging their milk.
* Another offender would be Victor Vonfogg, who is just about as smart (but more prone to stereotypical
* Another of Heracles' opponents, Antaeus, was the son of Gaia the earth goddess. He was incredibly strong, but only while he is touching the ground. After battling him to a standstill for a while, Heracles figured out his secret and defeated him after lifting him.
* Another of her songs, "All-American Girl" also expresses this trope, instead as a father who has a daughter instead of a son. But it's said that he still loves her throughout her life anyway.
* Another of his Doctor's quirks was that he was into martial arts, particularly 'Venusian aikido'. Pertwee was a highly-skilled martial artist and tried to do his own stunts whenever possible (although a lot of the time the fight scenes aren't much more elaborate than running up to someone, lightly touching their arm and yelling 'hai'). Sadly his back was starting to get the better of him during his final year, and being no longer able to do his own stunts was one of the reasons he left the show.
* Another of his games is an MMO that apparently contains elements of least three races' mythologies. Which your robot companion is an avid player of.
* Another of his great sci-fi series starred the Family d'Alembert, a circus troupe of Heavyworlder secret agents and
* Another of Iizuka's controversial claims is that the reason the moon seems fine in later games despite Eggman blasting it with the Eclipse Cannon in
* Another of Pratchett's footnotes describes Unseen University's several volumes of sex magic, one of which must be kept in a room full of ice. Humans can't read them without being driven a
* Another of Proposition Joe's nephews is Drac, the talkingest motherfucker ever heard on a wiretap. He is so incompetent that he doesn't even speak in drug slang ("COCAINE, NIGGA!"). The Major Crimes Unit even contemplates busting a dealer higher up the chain in hopes that Drac gets promoted. When Burrell asks Daniels why he thinks Drac will get promoted even though he's a knucklehead, Daniels replies, "
* another of several genres, realism wasn't high on their list of priorities.
* Another of the alternate endings did something very similar except, instead of being a dream, the whole series was an
* Another of the Ciaphas Cain (HERO OF THE IMPERIUM!) novels has a scene very reminiscent of the
* Another of the difficulties of the novel is that at some points Quixote and his squire are merely listeners to someone else's story. A number of secondary

characters narrate at length their own past experiences and adventures, which often have nothing to do with chivalric romance at all. They are Cervante's takes on other genres.
* Another of these is demonstrated when Mao makes a hot pot in competition with a guy swearing vengeance on his master. The entire sequence is an analogy, as not only does his dried seafood (which like his revenge, has been preparing for years) backfire by overpowering the lobster (being in turn a sign that a person who is consumed by revenge has let it destroy their feelings), but Mao's dish uses paper to filter out the bitterness of the vegetable stock (like a person willing to forgive can remove the bitterness of misunderstanding).
* Another of these million names is Drimble Wedge, the deadpan pop sensation that Spiggott performs as to frustrate one of Stanley's Faustian wishes.
* Another of the show's animations has a house roaming about the countryside, gobbling people up through its doors, until it is found by "The House Hunters" ("These are house droppings... fresh ones, too!") who
* Another of unknown origin argues, "There are only three certainties in life; The laws of physics,
* Another of Zeus' mortal lovers who was achieved godhood was Semele; here however it was largely because of the intervention of her son Dionysus who went down to Hades to bring her back. As an immortal her name became Thyone. Semele's sister Ino, who had acted as Dionysus' nurse, also became a goddess under the name Leucothea.
* Another old bar joke: This bald guy is at an office party, and his boss comes up to him and starts rubbing his head. "Damn, Jenkins, your head is smooth as my wife's butt!" The bald guy starts to rub his head himself, and exclaims, "Well, sir, so it is!"
* Another old but non-military Chinese example, the Butterfly Lovers: Zhu Yingtai, who disguised herself as a man to pursue education. She fell in love with her slightly clueless roommate Liang Shanbo and arranged to have him marry her 'sister.' Unfortunately, the villain of the story, Ma Wencai, used his wealth and power and forced her to marry him, which results in Liang becoming fatally ill out of grief and dying. In the end, some magic happened, Liang's spirit came back and took Zhu with him, and they both became a pair of inseparable butterflies. TV adaptations of the legend tend focus on the hilarity that ensues Zhu as a young woman having to live among men, how she tries to devise a way to sleep "safely" with Liang, and how Liang is so naive, borderline stupid but in an adorable way, around this oddly feminine and beautiful "best buddy" of his.
* Another old chestnut involves a judge questioning three people in a disturbance at the zoo. The first two said, "We were just throwing peanuts at the elephants." When the judge questioned the third person (who had a cast on his arm and was on crutches), he answered, "I'm Peanuts!"
* Another older cartoon has Daisy Duck trying to protect her boyfriend from harm while he's sleepwalking.
* Another old joke: a man and his fiancee have dinner at his future in-laws' house the week before their wedding. Complaining of a headache, the fiancee leaves early to lie down. Her parents also turn in early, leaving the man alone with his fiancee's beautiful younger sister. The younger sister confesses that she's always had a crush on the man, and tells him that if he's interested in a wild night of no-strings-attached sex before he becomes a married man, to follow her up to her bedroom, and if not, to go home and she'll never bring it up again. The man walks out the front door to find his fiancee and her parents waiting for him; his fiancee and future mother-in-law hug him and his future father-in-law shakes his hand and says, "You passed the test. Welcome to the family, son." The moral of the story?
* Another old joke: (usually said to a small child who hasn't heard it yet)
* Another old pre-siren alarm used on Civil War-era ironclads was a gragger, which was a large ratchet-type device where a board attached to a rotating mechanism would be spun by a coiled spring around a large ratchet gear which would be static and attached to a post on the deck, producing a loud clacking sound as the board moved over the gear's teeth. If you've ever heard a gragger, you know that even the

small ones can be
* Another old radio episode (possibly Lights Out or a similar show) had a chemistry student who dreamed of creating miracles invent a
* Another old series episode, "For the World Is Hollow and I Have Touched the Sky", where the world is a hollow asteroid.
* another old sketch, Ernie drowns the radio out by turning a vacuum cleaner on.
* Another Omnitrix-wearing version of Gwen shows up in Omniverse. Since she's only a year older, most of this Gwen's aliens don't appear much more physically developed, with the exception of Wildvine, who possesses noticeable breasts despite being a) eleven, and b) a
* Another one, a bit older and not quite mid sentence. More like mid speech.
* Another one about a man donning a realistic bear costume and harassing a family of bears, going so far as to get near the cubs, leaving Nash to have to explain why the
* Another one: a convicted murderer escapes custody and kills four teenage girls, with the father of one of the girls standing close enough to hear the shots. The father later kills the convict; after he refuses a plea bargain, McCoy takes him to trial and is able to secure a conviction despite the circumstances (by pointing out that an acquittal would be an inherent endorsement of vigilantism). The creepy part, though? The killer's
* Another one after they've run out of gas in the middle of nowhere, and all but the main three are thinking of just giving up -
* Another one, again acknowledged by Joss Whedon, is the nature of Angel's curse at the hands of gypsies. Angel's soul is restored, and his conscience along with it, forcing him to live the guilt of having murdered thousands of people. Great so far, but the clause about losing his soul again if he ever experiences a moment of happiness - with potentially centuries to millennia in which to happen upon such a moment - just ensured he'd eventually resume his body count. Not only that, but their contingency plan involved two gypsies who were nowhere near in Angel's league in terms of combat. This is actually addressed in the show when it's revealed that uncover gypsy Jenny Calendar is not fully sold on the idea, to which her uncle tells her that they don't make the rules and they worship vengeance as a concept that is arbitrary and inscrutible in nature. This has its own share of problems. For one, if this form of gypsy-ism is still an active religion, it's reasonable to assume it must have ceded enough ground to contemporary attitudes that the gypsies would use their magic to give Angel a
* Another one appears in "Demonstration of Affection", where she screws (both literally and metaphorically) with a human sorcerer stupid enough to send himself to hell in search of power, before returning him to Earth with his soul intact.
* Another one appears in the 3rd game if you brought Javik to Thessia.
* Another one by Coulton is "That Spells DNA," with it's chorus "And DNA, baby, that spells DNA."
* Another one by the US government: the Tuskegee syphilis experiment, a notorious real-life example of
* Another one concerned judicial nominees after the death of a Supreme Court Justice, and the declining health of the Chief Justice. Although all the characters were unhappy that they couldn't get the nominees they wanted confirmed, it wasn't until Donna told Josh the story of how her parents got their cats (they went to an animal shelter, and they couldn't decide between two, so they got both) that he has the idea of letting the Republicans name whoever they want for the open seat, if they will accept the Democratic nominee for Chief Justice.
* Another one concerning the Funhouse - Monokuma lured the students inside by promising to provide ship parts which might allow the students to escape the island.
* Another one crops up later with Takada (A) seeing both Mikami (B) and Light (C) but Mikami is also VERY loyal to Light...
* Another one depicted Calvin having a dream involving lots and lots of water. It ends with Calvin waking up and running to the bathroom.
* Another one depicts a very short man showing a very happy face, exiting a porn

store after purchasing
* Another one ends up being injected to all civil servants and government officials instead of the annual flu vaccine, leading to the entire Whitehall speaking nothing but the truth with hilarious results.
* Another one, entitled "That's My Lunch", is about a little girl named Suzy Woozy leading
* Another one featured Ernie and Bert with Shola, also a young girl. In one short,
* Another one features Davan laying out his plans for his own funeral, where he will be dressed in a smoking jacket and propped up in a chair so that people can have their photos taken with him. There will be attractive cocktail waitresses (to make sure Jason attends) and marshmallow roasting on his pyre, after which Aubrey will be given his skull to mount on her wall.
* Another one features Marshall's bachelor party, with plans to watch a boxing match. Thanks to Barney, they are late, but think they can still make it for most of the fight. Cue them turning on the radio and hearing that the fight just ended with a moment that will be talked about for decades to come.
* Another one for Consort Jing — she realizes her maid was part of the enemy's plot to cause mistrust between Jingyan and Mei Changsu when the maid makes sure to tell the story of Mei Changsu's supposed capture of her to the prince. They couldn't leave such a crucial part of the plot (making sure Jingyan heard the story told their way) to some unrelated person.
* Another one for Downpour focused on getting a special series of outfits that mimicked Harry's clothes, James clothes, Vincent's clothes, Henry's clothes, Travis's clothes, and Alex's clothes. You would have to finish every sidequest in the game in a single playthrough while also not dying at any point. While this is very doable, it doesn't give any rewards mentioned.
* Another one for Eva is when Albi... ahem, Colonel Sanders proposes to Negi to be his apprentice. Hilarity ensues and it turns out the Colonel was just trolling Eva; though you have to admit he made some good points on why Negi should be his apprentice....
* Another one for Jonathan, when he and Andrew are in jail. Jonathan is scared and talks about how one of the inmates keeps looking at him.
* Another one for North Italy, though this one is a bit weird. When N. Italy and Romano were little kids Spain was an adult already. Spain said he would marry N.Italy when N.Italy grew up (and gay marriage was legal), then Romano got upset wondering what would happen to him if they got married. Spain than says he'll marry both of them. Centuries later, Gay marriage is legalized and N. Italy doesn't remember his promise to Spain, so Spain dejectedly tries to ask Romano. Romano doesn't say no, but he doesn't say yes either. And it's never mentioned again.
* Another one for the long list of industries likely to hurt your fingers — if you're a crafter and work with a hot glue gun, be very, very careful with it, because getting your fingers burned by one hurts
* Another one from Chi-Chi in episode 59 when Goku makes Gohan fight Cell.
* Another one from G'Kar: "There are things in the universe billions of years older than either of our races. They're vast, timeless, and if they're aware of us at all, it is as little more than ants, and we have as much chance of communicating with them as an ant has with us. We know, we've tried, and we've learned that we can either stay out from underfoot or be stepped on. [...] they are a mystery. And I am both terrified and reassured to know that there are still wonders in the universe, that we have not yet explained everything."
* Another one from O'Rourke, writing in Car and Driver magazine about Hawaiian cuisine: "Poi is a taro paste that tastes like paste made from taro."
* Another one from SNK is that they can't seem to know how to write "capoeira" (the Brazilian martial art style, which is used by Richard Meyer and Bob Wilson in the
* Another one from that dub is back in the Syrup Village arc, when Jango, confident that he's not going to fall for the Usopp Pirates' tricks, literally falls for a tripwire. Right before he hits the ground:
* Another one from the original manuals: while the Doom 1 manual correctly states

that the berserk powerup lasts for the whole level (or until you die), the Doom 2 manual incorrectly states it only lasts for a finite amount of time, which is especially unfortunate as the powerup was already horribly counterintutive to begin with (specifically, it makes your view get all red tinted for about 20 seconds, leading most players to assume it only lasted until the red went away.)
* Another one from the same game: The gameplay only takes place on the island of Dereth, which, while big for a game world, is still only about as big as Ibiza, while the whole planet Auberean was about the size of Earth. The whole reason players are confined to Dereth? When the Olthoi (a race of killer insectile creatures that the Empyreans summoned by mistake, resulting in them leaving and Asheron sending out his call) invaded, most of the world was infested with
* Another one from the U.S.A.'s Founding Fathers and the Declaration of Independence.
* Another one goes like this: "American and Russian submarines run into each other in the Pacific. They surface to give salute. American submarine sonar operator hears yelling from Russian sub: "Who threw a boot on the controls? Who the fuck threw a boot on controls?" American Captain tells Russians: "In the US we would never have such problem!" Russian Captain replies: "There is no such thing as US no more, WHO THE FUCK THREW A BOOT ON THE CONTROLS?!"
* Another one had Abby, wearing a cute hat she'd cut from a clean room uniform, present a similar hat to Kate, and ask her to try it on. She does—and McGee gives Abby twenty bucks. He leaves, despondent... and Abby gives Kate her ten-buck cut.
* Another one had a Captain Morgan expy staring down a scope at a beach as his parrot flies towards it... and instead of seeing his parrot land on a beer stash,
* Another one had a caveman in an overcoat, showing another caveman a campfire.
* Another one had a victim killed by having a heavy clock dropped on his head, and there were two murderers. All three suspects claim it was most likely an accident. Person #1's alibi was that he was watching a TV show at the time of the murder. Person #2 hears something fall to the floor from down the hall and runs to investigate, and person #3 was out smoking, then walked in and simply found #1 and #2 standing over the body. The detective says that Person #1 and #2 are guilty for several reasons. One, the clock stopped at 8:51 and no TV show ends at 8:51. This is an analog clock (the stories were written in the '70s) and evidently, there's not the possibility that it might have been simply
* Another one had Judy pretending to be Doug's sick cousin Melvin to cover a lie he told Patty. It was eventually reversed, though, when Judy took "method acting" to the next level and
* Another one had two balls (one white and one red). The white one holds the yellow balloon while the red one holds the orange balloon. A bird suddenly pops the yellow balloon and makes the white ball sad. Then another bird gives the white ball another yellow balloon and makes the white ball happy. Voiceover by Emilio Delgado (AKA Luis). First seen on episode #2477.
* Another one happened in Vienna in December 2017 when a young woman tried to take a selfie and ended up falling six stories onto a parked van. She survived with comparatively minor injuries.
* Another one has a couple praise their new house, but note that there are ants. Cue several aunts inspecting the house.
* Another one has Anthony waking up finding and X on his back and screams once he sees Ash is carrying a knife. Ash also screams while explaining that she's imitating
* Another one has a woman named Allison describing cigarettes as if they were an obsessive but clingy boyfriend ripped straight from a lot of female fanfiction.
* Another one has Bob running a hot peanuts stand, recognizing a customer and his friends as a band of supervillains, and
* Another one has Chandler finding out that Monica hasn't told her parents about their relationship because they don't like him. Eventually he finds out that years ago Ross lied and told them that Chandler had smoked pot in his room. When the truth is revealed, they immediately warm up to him.

* Another one has him catching more and more stuff, even a 'car', and then he says "Now there must be nothing else left", and he is right, there's no more water.´
* Another one has SpongeBob reading from a book for a seance, but is actually reading the ingredients for a bottle of mustard.
* Another one has two boys playing catch with what appears to be a teddy bear...
* Another One Hit Wonderland, "Funkytown", is downright described as an earworm in the episode description, has Todd doing an
* Another one, in a short story collection, had a character switched into the Doctor's body actually
* Another one included Robin being forced to become more responsible and save Batman's life as Poison Ivy's toxin slowly kills him.
* Another one in "Grudge Match" shows Black Canary, Vixen, Hawkgirl, and Huntress in a cage match to the death... against Wonder Woman. They are all, rather appropriately, pants-wettingly terrified.
* Another one in the backstory involved a betrothal between Ned's elder brother Brandon and Catelyn Tully. Sadly, that betrothal failed when Brandon was executed on the orders of the Mad King, which led into the above arranged wartime marriage between Ned and Catelyn.
* Another one in the episode "New Kid On The Block", where Bart falls for Laura, the neighbour girl next door; upon finding out that she already has a boyfriend, he has a dream sequence where she says "I have something wonderful to tell you: I have a boyfriend!" then grabbing his
* Another one in the same series features a little boy being allowed to play with a toy truck... for about five minutes. Then the truck gets taken away and replaced with a piece of cardboard cut roughly in the shape of a truck, which, had he read the fine print he had no reason to believe was on the bottom of the first truck, he would recognize as the deal he agreed to when he started playing with the first truck.
* Another one invokes the trope in the title, and featured a boogeyman knocking his head on the top of the door frame while trying to sneak into the kid's room.
* Another one involves a girl who fell into the wrong crowd and was indirectly involved in a big theft that resulted in the suicide of the person who was burglarized. This caused her to hit the
* Another one involving Marsellus is the bandage on the back of his neck. Ving Rhames has a scar that they were unable to cover up with make-up, so they put a bandage on it instead. Of course, the bandage ends up standing out a lot more than the scar would have, and it's led people to think that it's meant to show the spot where his soul was ripped out, his soul being one of the guesses for the contents of the briefcase. It's a mystery as to why the cast even went through the trouble of covering it up, since it certainly wouldn't be unusual for a mobster to have scars.
* Another one, in which Londo Mollari pokes semi-bitter fun at his own people's nostalgia for their past:
* Another one is an ancient demon similar to Naraku and born in the same fashion, now sealed inside the Shikon Jewel.
* Another one is a tree that grows fruit identical to human corpses hanging by the neck, which were at first mistaken for suicides.
* Another one is Dick Passwater, also born as Richard, but went by Dick.
* Another one is found on the floor of a storage room at the drilling site.
* Another one is George Lucas's pretension that he had some grand artistic vision, broken like a butterfly upon a wheel by
* Another one is in a fort occupied by bandits and you can actually see wolves fighting when you enter the room where the fighting takes place. It’s also revealed later into the fort that the bandits’ cook has been killing the wolves for meat to feed the bandits, who refuse to eat anything but meat.
* Another one is issued to Laurence, complete with restoration of his rank, in
* Another one is Princess Syrane (incidentally the sister of the aforementioned mysterious man named Galathorn), who tries to bed Thorgal before he leaves her city

to return to his wife and children. After he turns her down, she has her men cut down the mast of his boat to leave him wandering in the middle of the sea. Unlike Shaniah,
* Another one is Slick Johnson. Slick was nickname, as his given name was Julius Johnson, which is innocent.
* Another one is sort of implied for dragons, or at least dragons who prefer to stay in humanoid forms rather than their natural state (such as song dragons). When they revert, they're going from an average humanoid to a giant dragon with claws, wings, armoured scales and very, very sharp teeth.
* Another one is the Great Maker. On most worlds (including Earth), he or something like him is the One God in monotheistic religions, but on Centauri Prime, he's worshipped as the head god and there is empirical evidence of him showing up to teach the Centauri the basics of civilization...and attack the Xon, the other sentient race of their homeworld, blasting them with "hands of wrath".
* Another one is the lucky locket, which is featured in a three episode trilogy. The locket shows visions of the future when it is opened, but the protagonists discover that this will lead to their doom because in the future some bad guys will steal the locket from them and use it against them and they can't simply prevent this future by destroying the locket to keep it from ever being stolen because no matter how badly they try to destroy it it always repairs itself.
* Another one is the Ypotryll, described as having a camel's body, an ox's legs, a snake's tail, and a boar's head — theorized by some to be a garbled description of a hippopotamus ("ypotame" in Middle English).
* Another one is when a building is on fire. Disregarding the fact that they're underwater, the audience can accept this one. But then SpongeBob grabs a bucket, sweeps it through the "air" and collects a bucket of water to put out the fire. Hmmm...
* Another one is when Clara learns that it's bad to keep your roommate sick by force feeding him an entire bottle of drain cleaner... because then if the sink gets clogged, you'll have no way to unclog it.
* Another one later in the same episode when, after O'Neill is unable to get the Stargate to a safe altitude with the X-302, he realizes that for these purposes the unstable hyperdrive is just as good as a fully functional one: it doesn't matter
* Another one like Han Solo; Tharan Cedrax, one of the Consular's companions in
* Another one-man Guild, the Guild of Victims, consists of one guy who serves as a stand-in for people who pay the Thieves' Guild to mug them at a specified time and place each year, thereby getting all their year's share of crimes taken care of when it's convenient — so, yes, he's paid to get beaten up and robbed. The Guild of Thieves are worried that this makes the whole thing look ridiculous.
* Another one occurred back when Loki was still favored by the other Norse Gods. The story goes that Loki was mouthing off about how the Sons of Ivaldi were great craftsmen and that the other dwarves could not create anything beautiful or useful. A Dwarf by the name of Brokkr, who was in Asgard at the time, declared that his brother Eitri could indeed do better and had bet his head as part of the wager. Loki agreed to the bet and needless to say lost. When Brokkr came to collect on his wager ("Betting your head" was slang in Old Norse for betting a large sum of money. Brokkr meant it
* Another one occurs in Frobisher's story, when Ayrs laughs at the idea of having sex with Frobisher;
* Another one of his big hits, "Shame on the Moon", managed to get enough airplay at country radio to make #15 on the country music charts. It was even written by critically acclaimed country singer-songwriter Rodney Crowell. It, too, is a (less blatant) departure from his usual sound.
* Another one of Jiraiya's novels about a battle against a rogue ninja, serves as an inspiration to
* Another one of Natalie's early episodes put an interesting twist where the plot involves an
* Another one of the cave of convenience scenarios comes with Guts and Casca from
* Another one of the enemies of Stronghold, Duc Truffle, "The Pig", is a less-

notable example. While he has a love of combat and violence and is not at all cowardly, he's an incredibly dimwitted glutton and usually lets his commanders and the other Ducs do the thinking for him. What he does have is lots of money, lots of food, and a very well-fed, well-trained army that

* Another one of the main variants is that Cain murdered Abel over a woman. When the brothers were born, they were each part of a set of twins and had a twin sister. Since intermarriage was unavoidable, but direct relations marrying seemed inappropriate, Adam decided that the brothers would each marry the other's twin. Cain was unhappy because his own twin was prettier and refused to allow Abel to marry her. Adam proposed that they offer a sacrifice to god and let him settle the matter. Abel had a better and more righteous nature than Cain, so his sacrifice was accepted. From there, the story pretty much follows the two above. In yet another version of the one involving their twin sisters, Cain blamed Adam for praying to god on Abel's behalf for his success and confronted his brother in the field with the intent to murder him. Abel rebuked him and told his brother that he should be more concerned about making his heart right and renewing his relationship with God than marriage. God had blessed Abel with a pure and compassionate heart, so he told Cain that he would let him kill him if it would make Cain feel better, but also begged his brother to not do it, as Abel feared for Cain's soul should he become a murderer. Cain attempted to kill his brother but found himself unable to do it. At a later time, Adam got worried when Abel was late coming home from his work, so he sent Cain to find him. Cain's anger was rekindled and he proceeded to confront Abel again. Abel repeated his initial warnings but, this time, Cain was intent upon killing his brother and attacked him. In one version of that version, Cain clubs his brother to death with an iron rod. In another version, Abel lays down on the ground and offers his neck to his brother and tells him "Do with me what you will." Cain proceeds to attempt to strangle his brother to death but fails. The Devil appears to Cain and asks him if he really wants to kill his brother. When Cain answers yes, the Devil instructs him to crush his brother's skull with a rock
* Another one of the most painful things that a human can possibly experience is cluster headaches, which feel like being stabbed on one side of the heard around the eye, only way, way worse. People who experience them often commit suicide, and the only drugs that seem to be really effective at treating them are illegal hallucinogens.
* Another one of the rare snake species that gets attention as cute is the hognose snake, which has big eyes, a short upturned nose (hence the name) and some fun-to-watch behaviors like rattling their tails and puffing out their necks to scare predators away, or
* Another one of Theseus's villainous victims was an elderly bandit, Sciron, who lived on a cliff-side path. Sciron demanded, because of his apparent age, that everyone who passed by must give him his due respect by washing his feet. Of course, when the schmuck bent over to do so, Sciron pushed them off the cliff, where the corpse would be eaten by his partner in crime, a monstrous sea turtle. Guess what happened when he tried to pull this schtick with Theseus.
* Another one of the urban legends in Japan is about Okiku, a traditional Japanese doll. In 1918, the doll came into the possession of a young girl who shortly after died of a cold. Her family made her a shrine and added the doll to it. Then the doll's hair supposedly started to grow, causing the family to conclude it held part of the girl's spirit. The family moved away some decades later and left Okiku with the local Mannenji Temple, where it's still on display. The doll isn't dangerous and likes being maintained by the monks.
* Another one plays it for horror, in that the protagonist, a guy who wants the attraction of a particular girl, makes a pact with an
* Another one pointed that there was a problem with the power supply. He killed him as well.
* "Another One Rides the Bus" features percussion provided by beating on an accordion case.
* Another oneshot, Copycat Ken was a paparazzo who stole martial artists' techniques by becoming them and using all of their moves against them. The only one

he couldn't copy perfectly was Happosai because he was just too perverted. So he trained Ken. He ended up with so many copies that he started mixing them up and became unable to change back.
* Another one shows a bus full of campers all eating ice cream. Then the bus hits a pothole, causing all of the ice cream to fly off the camper's cones and onto the ground,
* Another one shows a stock picture of a wolf-man and a woman hugging. "A date between
* Another one shows ducks standing around, when one yells "Chicken!" and they all
* Another one subverts the standard pep-rally version, by having members of the audience question the standard "we're the best" slogans and invoke matters that make the upcoming game fade into insignificance.
* Another one, Tenome, wears its two eyes on the palms of its hands. And yes, the Pale Man from
* Another one that follows Doug and Carol's life in Seattle has her discovering that she's pregnant again on the cusp of them celebrating their 15 anniversary.
* Another one that is repeatedly experienced by the Quarians as a whole: due to the fact that they can only eat dextro-amino proteins, and space in the fleet being at a premium, the Quarian fleet is a
* Another one that shows how well WWE creative team can plan stories in advance is the character of
* Another one that sort of adds a little uneasiness, in the mission where you save someone from a gas station, you can see the prices. At the time it may have represented something far off, as gas prices were on average about $1.20 and the game depicted gas prices at $3.58, for regular.
* Another one: The US Army has tested using networked first person shooters for infantry training. No, they aren't training to blow up demons and mutants but getting soldiers used to the idea of communicating with each other while on the move and in combat.
* Another one, this time for Labour, resembled a movie trailer for the trainwreck of a final term for Harry Wilson, with the slogan "Labour is... never bothering to say
* Another one was "augmented reality goggles that allow me to see a realistic simulation of your naked breasts" and then basically the same thing again, only with "celebrity nipples," down to the subsequent claim by the goggle wearer that telling them not to do that infringes on
* Another one was done on the cover of "Big Book of Bart Simpson", with Milhouse. He was not amused.
* Another one was during an awkward moment with the Forman family, when Donna, cups her ear, and yells "What's that, Dad? I'll be right there!" and runs out of the kitchen as fast as she can.
* Another one was during the Majin Buu saga (episode 251) when Goten and Trunks first tried to fuse seriously in front of everyone. The first attempt resulted in a very chubby Gotenks. As Gotenks tries to jog in his newly fused body he stops moving for a second... then starts heaving in exhaustion, giving up.
* Another one was used by a teacher to explain racism to her class called the brown eye/blue eye experiment in which she told her class that one group of people with a specific eye color was superior to the other and she was shocked about how quickly the children started believing it and even came up with their own slurs.
* Another one where a Dark Eldar sculptor created amazingly lifelike statues out of crystal. In fact, his victims were
* Another one where it's the parents keeping the kids from getting the cereal: UK commercials for Nestle Oats & More, which started off with the dad lying to his kids about the cereal and insisting they wouldn't like it, and eventually escalated to him building a secret room for it under the kitchen.
* Another one, where Lois suggests that Brian join up with PETA, which sounds exactly the same as the way she pronounces Peter's name in her thick New England accent.
* Another one where Stewie chases after his assumed father who looks just like

him. He enters an elevator with another guy who is on the phone, who keeps asking the same question to the caller, irritating Stewie. Once Stewie makes it to the upper floor, it's shown he murdered the guy out of annoyance.
* Another one will give you a bonus if you can make the death look like natural causes, by secretly poisoning the already ill victim's medicine supply.
* Another one, with a woman and her estranged husband, but the husband would get a tenfold of the first wish. She wished for a great fortune, vast beauty (which her husband got tenfold) and a slight heart attack. Subverted, or played straight, in that she didn't survive the slight heart attack, but the husband got a heart attack that was a tenfold lighter, so he got legendary hotness, almost unlimited wealth, and inherited his dead wife's wealth.
* Another one with Jet occurs in "City of Walls and Secrets". This time his opponent is the firebender Zuko, whom Jet is trying to out as a Fire Nation member. Since Zuko is trying to keep his cover, he fights using only swords. Jet comments that he is tiring out and will have to use firebending at some point. Fortunately for Zuko, the police arrive and take Jet away for disturbing the peace.
* Another one would be a guy reaching up over a railing on top of a mountain and pulling the nearby guard over the edge.
* Another: On her death bed, the Sheriff's wife confesses that she cheated on him three times, but swears it was always for a good reason. He asks what happened, and she says, "Well, the first time, remember when Dr. Smith said he we couldn't afford the operation, and then he changed his mind and did it for free?" He says yes, and forgives her. "And the second time, do you remember when our boy got a DUI, and the judge let him off with probation?" He says yes, and forgives her. "And last, do you remember when the polls had you about a hundred votes shy of winning the election for Sheriff?"
* another on their original employer, for vengeance and/or to get the stolen goods back to their rightful owner.
* Another opener has Jeff commenting about an overreacting airport security
* Another optional rule, in GURPS Thaumatology, makes curses easier to cast and/or harder to resist if the caster announces them beforehand.
* Another option was to have a soul-shard happen across the recently deceased and make a deal. This one got them brought back better than before, as one of
* Another Oracle-related one (well, what do you expect, with future-prediction?): the Test of the Heart, which one must undergo to reach the Oracle (a simple health check) was instituted after someone came in for a prediction, which was that they would have a heart attack right after being told they were going to have a heart attack.
* Another "Original Six" team, the Boston Bruins, were this for even longer in a slightly shorter drought of 37 seasons. While on the longest playoff streak ever (29 seasons, 1968-96), after winning the 1972 title, the team had legends such as
* Another Ork warboss stole a gun from himself. He did it by traveling back in time and killing his past self. Orks aren't big on subtlety and don't care about your time paradoxes.
* another over the summer, symbolizing trying to reclaim her identity. As the comic still hasn't moved past summer break, it's to be seen if she changes her hair again.
* Another Pabu example from "The Terror Within". He notices the Red Lotus sneaking in to kidnap Korra twice; once when they're on their way to her room, and the other when they actually managed to kidnap her. While he shrieks both times, he only manages to wake Bolin up the second time, though.
* Another Packers example is Brett Favre ripping off his helmet and running off the field after throwing a touchdown pass in Super Bowl XXXI on Green Bay's second play from scrimmage.
* another pair of crooks for the real cash. The captured thief can't believe he's going to jail for killing a man over a pack of fake cash.
* Another pair of DCU examples - Niles "the Chief" Caulder and Steve "Mento" Dayton of the
* Another pair of photos showed how much better your house would look with new

shutters — and new paint, and new landscaping, and a photo taken on a sunny day.
* Another Palmolive ad had a family of hands arguing about who would get to do the dishes. There was even a dog, also played by an animated human hand.
* Another Panther cartoon has Big Nose (as a bank robber) getting hit by a player piano after numerous attempts to get rid of a horseshoe which is bringing him bad luck instead of good.
* Another parodied the "I ♥ NY" bumper sticker with a sticker responding: "So did I until someone ♣'d me and stole my ♦s".
* Another parody is "The Toxic Waltz" by Exodus, in which the dance is just violent moshing. Good friendly violent fun in store for all!
* Another parody of the same concept from the same episode has the Cat test Lister's proclaimed divinity by asking him the ultimate question which could supposedly only be answered by the
* Another parody was the series of "Sassie" radio PSAs from around 2010. When "Jimmy" would get in whatever predicament he found himself in (including finding himself in a well), Sassie would run off to tell people... about the benefits of adopting a dog from the local shelter.
* Another partial monkeywrench is the Prairie Witch, a forties-era villain created by James Robinson in
* Another (particularly appropriate) Dave Barry example is "A tropical storm called El Niño (Spanish for "The Little Neen)".
* Another particularly forced example is "Shadow", which features a generic double homicide. SVU is only called in because it looks like it
* Another Pate is the royal whipping boy and gets flogged for bad deeds by the Princes (or just when Cersei wants to teach her son a lesson).
* Another peaceful planet topped that. It was hard to successfully invade given the inhabitants have the ability to mentally control tectonics and the weather.
* Another Pepsi example is from 1992, when they decided to phase out their "Generation Pepsi" slogan in favor of a new one. They filmed an elaborated series of commercials to be broadcasted during first quarter of that year's Super Bowl, which started with trucker crushing into a Pepsi billboard, clipping off old slogan from it. Naturally the crash place soon becomes a festival, and new Pepsi slogan becomes a piece of everyone's mind, with celebrities and television personalities all weighting in. Their new slogan?
* Another Period are flamboyant and obviously in a relationship despite being married to women but no one notices. Or probably, no one cares.
* Another Period Bellacourt. In a later episode, head butler Peepers threatens to re-dub her "Water Closet" if she doesn't toe the line.
* Another Period, Garfield the valet is pushed to the ground and "ravished" by an older dowager and almost everyone dismisses his trauma; his boss Peepers even goes so far as to tell him that he should feel proud.
* Another Period has two, both in the servants' quarters at Bellacourt Manor:
* Another Period. Peepers threatens a woman by threatening to harm her baby. She agrees to what he says but he didn't think she would and accidentally threw the baby anyway. The baby stops crying and both are horrified but Peepers picks him up and says he's okay and the baby starts crying again.
* Another Period. She's great at math despite being illiterate, has an amazing opera voice, and can discuss ethics and politics quite well. A season 2 episode revolves around her being able to show her smarts off but she ends up choosing to continue acting dumb.
* Another Period takes the tropes of Kardashians-style reality TV and transplants them to circa-1902 Rhode Island high society.
* Another Period to molest him. Peepers say that he always worried about Garfield and boys.
* Another Periphery state to avoid this trope is the Taurian Concordat, a loose confederation of planets (most of whom are representative democracies) allied together. The Concordat's common interests (defence and foreign policy) are controlled by a constitutional monarch whose decisions are subject to judicial

review, and freedom of speech, press and association is guaranteed every citizen by their constitution. Being (unfriendly) neighbours of the Federated Suns (and just a bit too big to be easily conquered), the Taurians take it as a point of national pride
* Another perp lives in the now-closed funeral parlor where his mother was the mortician. When the team show up to question him, they enter through the front door and find everything covered in dust.
* Another perp's home address was the Police Academy. One even had the gall to use the business address for One Police Plaza as his address. Sometimes, criminals
* Another persistent rumor states that the town of Tumbleweed is haunted. There are certainly strange things that go on in that area (and that area only), but nothing has ever been officially confirmed.
* Another piece of stock footage that has been reused is an anime-original sequence of
* another plane fell victim to a flashover (a type of explosion that occurs when oxygen is suddenly introduced into a previously oxygen-starved fire, causing the fire to suddenly expand) after the doors of the nearly airtight plane were opened to begin the evacuation. Sadly, in this case, half of the 46 people on board did not make it off, although part of this was due to difficulty and inefficiencies in evacuating (Air Canada 797 was one of a few similar disasters that led to the development of the aforementioned standard, as well as new safety features to aid in an evacuation).
* Another plan is a variant on the theme. He reasons that the logic of his previous plans was their flaw (since a failure at any one step meant the whole thing fell apart), so he devises a plan utterly devoid of logic; that way, even if one step goes tits up, it didn't actually have any connection to the next step, so the plan as a whole coan soldier merrily forward regardless.
* Another plant example is Micropropagation — that is, taking a single cell of a host plant, putting it into some special goo (essentially extremely sugary jelly), and letting the cell clone itself a few thousand times, all through a process called Tissue Culture. It's difficult to do, being extremely expensive and time consuming...
* Another platonic example (and a very unusual one) is Tiatkin and the war droid Giza from the
* Another player who became infamous for this is defensive tackle Ndamukong Suh; he ranks slightly below Burfict on the noteriety scale because he wasn't
* Another playing of that game gave Ryan the role "Witch who entices the beast to her magic sleeping stool so she can break the magic spell and turn him into a prince". Again, the players made a number of jokes about the length of the suggestion.
* Another playing of the same game has Colin listing the choices under A, C, C and D. Ryan does not let this go without comment.
* Another play on the trope happens when Holly and Henry borrow Val's car without permission and
* Another plot hole regards the age at which Claire manifested her healing powers. When Claire reunites with her birth mother, Meredith Gordon, and later, her birth father, Nathan Petrelli, it is revealed Nathan and Meredith believed their 18-month old daughter, Claire, perished in a fire. Claire's grandmother, Angela Petrelli, reveals she has protected Claire from the Company (see above) since Claire's infancy and knew she survived but allowed Claire's father to believe his daughter died in the fire. Claire assumes she survived the fire due to her
* Another plot relevant case was when the crew ended up on Earth. All the aliens could understand the humans, but not vice versa. John had to serve as one-way interpreter.
* Another point. However, Doom has kept this look since the 1960s, and it's unlikely to change because it's so iconic.
* Another point in the series, John had to jump from a ship that was being destroyed (
* Another point is that the Twilight, the source of magic in the series, is

capable of taking its own steps to restore equilibrium, should one side hold too much of an advantage.
* Another politician cameo: King Abdullah of Jordan made a cameo appearance back when he was merely the Crown Prince.
* . Another pony slaps him, whereupon Shining says "Ow" - and then carries on screaming.
* Another poop of his, "DW Is Addicted To Surfin' Bird!", ends with DW, who is a preschooler,
* Another popular character who was only seen in a single episode is DTZ, the
* Another popular excuse to air marathons is snowstorms, with channels adding a few extra episodes of their most popular show to entertain people who are trapped inside their homes. Some examples include
* Another popular fan theory is that Matt wears long sleeves and gloves to hide evidence of
* Another popular joke involves escaping from a room with no doors, no windows, and only a table
* Another popular one for the ladies recently is to build up a female tag team and then split them up to feud.
* Another popular one: "Love/happiness is a bunch of chemicals in the brain". True, but so is every other emotion (such as bitterness).
* Another popular race are dutch angel dragons, a species with traits of dragons, horses, and several other animals. The very first dutch angel dragon character ever created is Telephone, who is one of the most popular fursonas in furry fandom due to their overwelming cuteness.
* Another popular ship inside of the Joestar family tree, even though it boils down to being a
* Another popular tactic amongst inexperienced players is a form of blitzkrieg, attacking any target of opportunity that presents itself. While often unsuccessful at winning the game, the random movements make it difficult (if not impossible) for the opponent to accurately predict what move will be made next, making a counterattack difficult to formulate.
* Another popular theory states that the first seasons of the show actually happened — but eventually, Homer dies, and the remainder of the adventures are a
* Another popular type is a mission in an area with obscene amounts of anti-air firepower, requiring you to fly through a canyon (complete with ground strikes and
* Another popular urban legend is that gangs on the west coast of the US, particularly Los Angeles, will drive at night without their headlights on. If any one blinks theirs to tell them their lights are off, they have to kill them as part of an initiation. The myth so prevalent that California's Highway Patrol had to make an official statement about it.
* Another popular variation on this theory claims that Arya died in "
* Another popular women's feud WWE always have success with is the concept of a 'Beast vs Beauty' - featuring an intimidating
* Another possibility in the same game (this one's optional, whereas Sigurd and Deirdre automatically become hitched) is the hook-up between Prince Jamke and
* Another possibility is that since it's ambiguous whether Dracula (at this early stage of the book) is genuinely
* Another possible candidate for the Ur-Example of the Slasher Movie would be the 1932 film
* Another - possible - case of alien abduction was that of Cabo Valdés, which occurred in 1977, near the border between Chile and Bolivia.
* Another possible example is the relationship between Commander Shepard and Thane Krios. One of the first things that Thane tells Shepard is that he is dying of a terminal disease and has only months to live. The fact that Shepard/the player can choose to pursue this relationship anyway, fully aware of this, puts it in this category. In the third game
* Another possible instance is in the episode, where Stewie and Brian are playing Chess in the back of Quagmire's RV, while he is having sex while driving. When

their chess pieces get knocked off due to the reckless driving, they argue when they try to put the pieces back, causing Stewie to snap and knock the pieces off the table again.
* Another possible origin is a tendency of programmers to prefer text-based interfaces (such as Unix shell) and to use text printout for debugging (often in cryptic format, to conserve resources and minimize impact on the running program).
* Another possible origin of this is seen in the 1777 Code Duello. If one person insulted another but then apologized, then fighting a duel was dishonorable. But if one gentleman struck another, then no verbal apology would be sufficient, and a duel would be necessary. Therefore, striking a person with your glove was a way to
* Another poster calls the others out on their Eurocentrism and asks why no one ever tries to kill other, arguably worse tyrants and murderers.
* Another post posits a quite different ending and follow up. This post would claim that
* Another, post-Soviet one: "We always knew everything we were told about Communism was a lie. Only when it was too late did we realize everything about Capitalism was true."
* Another 'pressure' variant of lethal water - in maintenance of industrial hydraulic systems, pinhole leaks can actually produce a jet of fluid so thin and high-pressure, it can break skin and inject the fluid into you. For actual water, this mainly just hurts like hell, but can still cause damage at the injection site. For hydraulic oils and other toxic materials, this process will start rapid necrosis of your cells, and you will literally burst open and die from within unless the affected body part is immediately amputated. Do NOT Google pictures of "Hydraulic Injection" without
* Another prime example, the Crack Fox rather terrifyingly shushing the audience.
* Another prime offender in Stargate is Naquadah and its various sub-forms which can somehow turn a normal nuclear bomb into a continent buster among other insanity.
* Another Prime Porky Cut, just to make his own creative mark on the record-making process.
* Another Princess Story (and in the case of the rider, her sharp teeth).
* Another prison escape myth (can salsa be used to erode through the bars) had Adam making a very noisy drill from a vacuum he "
* Another problem is that the show is quite predictable on most occasions. Patient comes in -> House thinks he's figured it out -> House is wrong -> Patient has another symptom -> House has a crazy theory after an epiphany from an argument with his staff -> Nobody believes him -> House is right -> Everyone is surprised! This happens
* Another problem they had was that the world continued running in the background at all times. So one plot that required you to talk to a drug dealer always failed, because the drug dealer was
* Another problem was the control room was equipped with more than 120 separate dials, alarms, and gauges, making it very difficult to isolate the root cause when the accident triggered virtually all of them at once.
* Another problem with the crampness is the Christie Suspension, which, while good, eat up a lot of space, further excaberating the above issue, and is hard to service. While the T-34M (which would replace the Christie suspension with torsion bar, amongst other improvements including turret for 3 people) never got into production due to outbreak of the war, post-war Soviet tanks pretty much abandon Christie suspension due to that reason.
* Another production had a Johanna that was clearly a brunette, yet kept the Wigmaker's Song and all references to yellow hair, much to the audience's confusion.
* Another project which would overhaul the UI has seen similar delays, first announced in 2007, having mock-up previews released in 2009, and finally setting a deadline of Summer 2011 for completion, which didn't happen. Dozens of other planned features have gone through similar treatment.
* Another prolific stuntman was Stuart Fell, whose small size meant he often

doubled for the Doctor's companions, including
* Another prominent example is the existence of the Helmeted Author. Originally it was meant to be the normal Author character who was now wearing a helmet because it was impossible to render a helmetless sprite in certain positions. However, Dave later accidentally put both the normal and Helmeted Author sprites in one holiday comic. As a result, the Helmeted Author went on to become not only a separate character but a major recurring villain.
* Another prominent example is the planet Tegalus, separated into the Rand Protectorate and the Caledonian Federation. Like Kelowna, Tegalus is in a state of Cold War. However, the arrival of SG-1 causes the Cold War to go hot. In a later episode, a Prior of the Ori arrives to Tegalus and offers the Rand Protectorate the means to destroy the Caledonians in the form of a powerful
* Another proposed Exalt type for 3E was the Chosen of the Depths, who were intended to be a conceptual take on the undersea. When the writers started discussing the Chosen, they found they were pretty much Exalted pelagothropes (human
* Another PSA has a man working in his living room and standing unsteadily on a ladder while his wife comes by, carrying both their infant daughter and a cup of tea, and warns him to be careful as she leaves the room. The next scene is of the wife crying in the hospital at someone's bedside
* Another PSA started out looking like a perfume commercial with a lovely model in a fancy house with beautiful music playing. Then we see the bottle of perfume which rotates to reveal its name: Breast Cancer. The model is visibly shocked and the announcer even apologizes for getting your attention this way.
* Another Puerto Rican organization, WWL, which Carlito has also worked for, has gone
* Another Punisher fan lady shows up, going to far as to take his clothes and seek out revenge on those who wronged her, before beating one of them to death, naked, in front of Castle. She then
* Another punishment that was much more gruesome and popular would be
* Another Pythonic version of this trope was a short animation by Terry Gilliam of Rodin's
* Another Quailman story had a villain distributing free samples of shampoo which gave users a bad hair day so that everybody in the city would be too embarrassed to go outside so he could easily take over. What the villain didn't plan for was the shampoo also turning all the hair that had washed into the sewers into a giant hairball monster.
* Another Queen song, "It's A Hard Life", makes a nod to the opera Pagliacci in the opening notes.
* Another question offers this as an answer choice: you are hallucinating, because it is impossible for the swing not to have gotten taller as the tree grew.
* Another quote like the above "A certain house-hold fabric could kill you! Find out after the break!"
* Another Rainbow In Another Sky: It's mentioned that there's a civil war between the Dream Valley (G1), Friendship Gardens (G2), and Ponyville (G3) ponies. After years of absence, Paradise and Wind Whistler seek out Megan for help. The story ends with Megan, Kim, and the ponies riding off to Dream Valley.
* Another Rainbow In Another Sky, Megan talks about Firefly, a pony she knew as a kid, in her sleep.
* Another Rainbow In Another Sky when Wind Whistler compliments a now-adult Megan after having not seen her since she was a child.
* Another rare animal example: for unknown reasons, spotted hyenas are capable of growing a longer fur coat for winter when in zoos, despite cold weather being very unlikely in their native range. The extra fluff does help make them look less ugly.
* Another rare heroic case, though not at first. While not a photographer, 1930s nigh universally maligned celebrity reporter Walt Winchell stunned the US by taking on his publisher, William Randolph Hearst, then using his precious little radio time to do something almost no other reporter had done...
* Another rare heroic example: Before Bruce Banner became the Hulk, he semi-

accidentally killed his abusive father, Brian. In their final confrontation, his father was trying to kill him and he had killed Banner's mother; Bruce lashed out as Brian got ready to attack him, sending Brian crashing into the gravestone of Bruce's mother and cracking his skull.
* Another rarely seen weapon was, essentially, a double-edged, simple sword blade on a stick, exactly like the below-mentioned swordstaff. For the looks, think of the Beast Spear from
* Another rather blatant example is the differences between South Korea and its neighbor North Korea. North Korea is sandwiched between South Korea and China, two industrial nations with healthy economies and cutting edge technology. In comparison, North Korea has almost zero electricity usage and infrastructure, and outside the capital, you'll only find farmland and military bases. To put things in perspective,
* Another rather common Pokémon to fall under this has to be Gardevoir. While it's true that Gardevoir has a really high Special Attack stat, according to the PokéDex, it can
* Another (rather extreme) example occurs at the end of season five, where
* Another rather innocent thing. A local news station had an anchor who was feeling sick to his stomach, but
* Another Ray Stevens song "Shriner's Convention" featured some spoken lines where Bubba the Illustrious Potentate is scolding a Shriner named Coy over the phone. Several Noodle Incidents and implements are mentioned:
* Another realistic giant baby, but with a full-body, appeared as a gag in an early episode coming from a normal-sized and typically cartoonish designed mom, no explanation was given.
* Another realization hits Austin when Mickey tells him he's been listening to the same song for too long. He checks a cassette from the neighborhood for
* Another real-life example is ENIAC, the first well-known (room-sized) computer. When photographers and TV crews arrived to film the super-exciting, brand-new machine in 1946, they complained that there wasn't anything happening. So the designers rigged up
* Another real-life example that surprised some people in the graphic design community: Adobe buying Macromedia.
* Another real-life judge, Isaac C. Parker (who in real life was actually nicknamed "the hanging judge") has a role in the album
* Another, really freaky example from the world of nuclear physics is the
* Another Realm, Krogan, especially Krogan biotics, tend to do this to anyone they hit. Broken bones and a concussion are typically a best case scenario for the person hit. Cieran requires cybernetic repairs and sub-dermal armor to keep his ribs together after his fight with Ganar Yulaz where he was seriously struck once.
* Another reason behind Vista's botched launch was largely that the new Aero interface required a fairly high-end
* Another reason for American DSN can be that not all of them are there voluntarily, at least in the Army. Getting DA-selected (chosen by the Department of the Army) rather than choosing to become a Drill Sergeant can have a drastic influence on one's behavior in that position.
* Another reason for needlessly spectacular movements came from applying
* Another reason for so many capital crimes was that, until the 1820s, Britain didn't have a formal police force, meaning that the chances of catching a criminal were small, so the punishments for the few caught had to act as a deterrent.
* Another reason for the last point might be that Hentai Doujinshi in general are counted as "parodies" that are 100% separate from the franchise that they're depicting, therefore cannot be confused as "official material", and most Hentai fanworks
* Another reason "Genesis" is considered a particularly bad episode (in addition to the
* Another reason is that he already has a girlfriend, January McAndrews, who is from the future and works with him in the Time Police and is thus kept secret.
* Another reason it is not showing on the Hub could not only be the Derpy scene,

but that particular episode had Pinkie Pie
* Another reason the N2 mines weren't used was because they'd incapacitate the Angel...
* Another reason the V masks have taken off is that, while Guy Fawkes masks have been worn for centuries, they were typically home made and no one really standardized a design and thought to mass produce them until V for Vendetta came around.
* Another reason they look the same is that they need to be compatible with all the existing airport equipment.
* Another reason this tactic worked was the fact that the American line was in an orderly retreat, rather than a disorganzied rout, and were reloading on the move. Under those particular circumstances, halting and reversing the line again was simply a matter of issuing the orders.
* Another reason why there aren't any other relics from the "Dark History" is because
* Another reboot in the transition to Gen III is the way Pokémon are coded. It underwent a complete overhaul that made Gen III incompatible with the previous games, essentially resetting many a fan's collection of Pokémon.
* Another recurring enemy are Lakitus, who throw Spinies down at Mario while
* Another recurring enemy is Lakitu, who hangs from a floating cloud and throws Spiny Eggs at the playing character.
* another recursion, only this time with half the starting time of the last instance. And this plays out until the players retrieve the Omen that started the haunt, or run out of time.
* Another recursive reality occurs when, for a brief period of objective time, two versions of Johanna Smith-Rhodes exist on the Discworld as the result of Sheldon Cooper's unwisely applied enthusiasm. Both go around the same time-loop together and this causes double-takes in Ankh-Morpork.
* Another refers to "Lockheed-Volkswagen" - referred to in the context of rental spaceships, but considering the component companies it probably manufactures ships as well.
* Another relates the story of a kid being adopted into a family and the subsequent murder of his family members by an unknown man, except for himself, who turns out to be a dog.
* Another relatively iconic challenge is the "No Flying Challenge". Try to get through the game as if it was a normal platformer, i.e. using the float ability only when necessary.
* Another religion has taken hold in the land and sees the other religion as competition, often leading to the other religion being declared evil and fit only to be wiped out.
* Another remarkable example of a natural nanomachine capable of manufacturing stuff is a ribosome. These are the things that actually assemble proteins according to their encoding in DNA/RNA and are a vital component of all natural replicators such as bacteria or eukaryotic cells. They self-assemble from their component proteins, so they can trivially replicate themselves. They're also hackable; viruses propagate by injecting their own DNA or RNA into cells, and awaiting the ribosome-based production line to unwittingly start making copies.
* Another R.E.M. example happened not with an LP release, but a cassette one: early cassette releases of
* Another rendition of this for military children in Japan is "On top of Mt Fuji, all covered with sand, I shot my poor teacher, with a rubber band."
* Another revival was announced by TBS in 2008, but beyond being mentioning in subsequent press conferences, nothing has been heard of that series ever since.
* Another riddle involves the murder of a wealthy man who is killed on a Sunday. Upon being questioned, all of the servants give various alibis: "I was polishing the silver," "I was mowing the grass," etc. The "killer" is the one who claims to have been checking the mail, because mail isn't delivered on Sundays—because apparently, it's impossible to forget that and just check every day out of habit. Or to have forgotten to check on Saturday, and instead get the mail the next day.

Or to receive a newspaper that is delivered on Sunday. Or to get mail delivered by others than the Postal Service (how uncommon this is may vary between countries, but that's especially erroneous in the US, since the USPS will deliver letters on Sunday for an extra charge).
* Another ridiculous example is in the Old Chateau and the Canalave Library in
* Another ROH example with Adam Cole, the former "leader" of The Kingdom, the promotion's primary opposition to
* another room, making for a perfect killing machine (unless there's interference).
* Another rope-related glitch is the classification of attached objects as one object. Basically, if you attach two objects together via rope, they can pass through each other, meaning that you can attach a starite to a gate and then have it fall through to the other side of the gate.
* Another, roughly concurrent civil war in California sees that state split. The Hispanic-dominated southern part is apparently annexed by the Mexicans, whereas the north becomes a transhumanist, culturally homosexual Silicon Valley state.
* another rule that required any protest of this type to be made within 30 days of the closing ceremony and provided evidence that the objections leading to Thorpe's disqualification had not been raised until after the 30-day window had already passed. It worked; Thorpe's medals were reinstated in 1983, 70 years after the initial disqualification.
* Another rumor fixated on a supposed cut character by the name of Fasty, whose name could be found by datamining the Japanese version of the game. Adding to the rumor was a picture done by
* Another rumor that persisted in the early days of the game's release was that of "Sparky the Dog". The rumor was that Sparky is a hidden 6th Animatronic that either appears randomly, or if the player performs some form of various convoluted step-by-step instructions. Sparky is then said to appear in the "parts and service" room before vanishing. It turns out that Sparky doesn't exist in the game and is merely a fancharacter someone photoshopped into a screenshot of the game.
* Another rumour was that if you beat the final level without giving Mr. Potato Head back any of his missing body parts after collecting them, you'll unlock a secret level named "Potato Head Island" wherein you have to fight a giant Mr. Potato Head seeking revenge on Buzz for stealing his body parts. Once again, this level does not exist. The final level can be beat without giving back Mr. Potato Head's parts, but in order to complete the entire game, the parts need to be collected in order to obtain every single Pizza Planet Token.
* Another Runaways story by the same writer, "It's Not Lupus", ends with Molly and Klara cuddled up after a long day of
* Another running gag for Peggy is for her to take a very general or well-known fact and tack on, "In my opinion," such as, "The day after Thanksgiving is, in my opinion, one of the busiest shopping days of the year." Her
* Another running gag was to end a sketch by having a policeman come in to arrest someone. In the third series a policeman came on and arrested the entire show for overusing this gag — and then he was arrested by another policeman for the same reason.
* Another run of strips had Dogbert as the charismatic leader of the vegetarian lobby. Since this was clearly a bit of an
* Another same-sex version occurs with Louis and Angel in John Connolly's
* Another San Diego business, Corky's Pest Control, is known for their
* another sapient species (even though the latter isn't technically cannibalism).
* Another scare chord was played during the appearances of Mr. X in the second scenario.
* Another scary one is the Na'ka'leen Feeder, who, unless you provide him food, will chase you everywhere to
* Another SCA story; A group wanted to hold fight practice with functional replica weaponry. This required a few permits and a change of venue from their regular park. There was one available, but the police warned them that the local motorcycle gang considered it their turf and may not take too kindly to strangers. Seeing no other options, the SCA risked it. Sure enough, the motorcycle club showed up and

started hassling the re-creationists. Seems that the battle pikes and other implements that were useful for removing mounted knights from their horses worked just as well for taking riders off their hogs.
* Another scenario has them swap sexes every time they fart. The other two hosts of the episode both take full advantage of it, with Barbara using it to scare off cat-callers and Blaine getting a job at a strip club
* Another scenario has the traitor making voodoo dolls of the other players. If they win,
* Another scene features some soldiers gleefully abandoning their positions with a woman on one arm, and bottle of booze on the other, while small arms fire echoes through the streets of Berlin, and artillery blasts buildings into rubble offscreen.
* Another scene features the name "Aaron A. Aaronson" being made up when talking about going through every name in the phone book.
* Another scene from that movie features Brave Sir Robin heading down a road which had three signs marked "Certain Death" pointing in the direction he was travelling, several slaughtered knights skewered on the same lance and stuck into a tree, all leading up to the easily avoidable encounter with the three-headed giant, described in the Album of the Soundtrack of the Trailer of the Film as "the fiercest creature for yards around!"
* Another scene had Patch inventing a hula hoop — about 100 years in advance of the fad — and being told
* Another scene has him holding a baby dinosaur in his hands. "What species is it?" he hisses to a nearby geneticist. "It's a
* Another scene has Russell giving both middle fingers, despite Deadpool seeing it coming and urging him
* Another scene has the characters admitting they can't come up with a name for Billy Batson's alter ego, a reference to the fact that the Captain Marvel name is not be confused with Marvel's Captain Marvel.
* Another scene later on has Sean riding shotgun as Neela drifts up a mountain road, and their ensuing conversation about being an outsider.
* Another scene shows Phoebe walking through the halls of the school with a latte nearly as large as she is on a dolly. When asked about it, she replies 'Some days a venti just won't do.'
* Another Scorsese example would be Travis Bickle's bloody and unglamourised shooting of the pimp near the end of
* Another Sears commercial begins ... until they crash into a bunch of refrigerators.
* Another Season 1 episode "Fruit of the Poisonous Tree" mentions that the genie is from Agrabah, which was meant to be
* Another Season 1 episode sees Manny feeling romantic connection with a woman in her 20s, due to both of their love of vampire fiction.
* Another season 2 episode, "The Internet", features a character whose been working in tech support since the 1980s. This is evident when he tries to help Gumball and Darwin with their computer as he's unaware of how to block pop-up adds and sends Emails through the disk drive, and even tries to delete the Internet by deleting the web browser before throwing the whole computer away in the trash. The fact that the character is a floppy disk reinforces this trope.
* Another seemingly forgotten "power" is the ability for a character to rebuild itself (since they're
* Another segment focused on a man who was grave robbing his brother after
* Another segment focused on two thieves in New York in the 1920s. They hijack the pneumatic tube system banks used at the time to transport money, but pressure builds up in the blocked pipe and it explodes, bombarding them in shrapnel.
* Another segment has a voice over actor recording lines for an NDP attack ad on the Liberals, and constantly screwing up. The line was supposed to be something like "The Liberals may have their bag of money, so let's give them the boot", over a graphic of a bag of money being kicked by a boot. Some of the screwups include:
* Another segment in the same episode is completely dedicated to this trope, with

the art constantly shifting to styles such as silhouette animation and
* Another segment was about an ex-con who was tasked with community service wound up working for a moving company, he steals a diamond flower ornament and puts it in his shirt pocket, but when the van moves he falls out and a cabinet falls on top of him, and the ornament pierces his lungs.
* Another segment was about two women who posed as relief workers for Hurricane Katrina but were merely there to steal valuable items. After robbing a church, they go into its flooded basement, turned on the faulty improperly grounded lights, stepped in, and were promptly electrocuted.
* Another (semi-)anthropomorphic variant in the episode "The 87 Cent Solution!": Manny the Headless Man-Horse sides with Huey and everyone else who sees that Scrooge has gone insane from illness, also putting on a surgical mask over the face of his statue head.
* Another semi-recent spin on this is the "Purist/Rebel" alignment chart, where two axes are compared with both being Purist, Neutral, and Rebel but the first parts are changed depending on the subject. To give two examples;
* Another Sensodyne product hypes its use of "Liquid Calcium" to fill dimples in the teeth or something. Somehow they have 'achieved' this without the paste having to be above 300 Celsius.
* Another (separate) Pokémon introduced in Gen II is Umbreon, while based on the
* Another (separate) rabbit Pokémon, Sylveon, is based off the
* Another sergeant in the unit (in an internal monologue) reveals that he is nearly psychotic, showing that he sees the enemy, civilians, and his own men as merely things he hasn't killed yet. The end of his chapter is the sentence "I HATE EVERYTHING THAT IS NOT IN ME."
* Another series by Applegate that ended with the readers left hanging was
* Another series came out later, but still ultimately plays into the trope, as it is about their pregnancy, and ends with the birth of their son. It also uses time travel to double up on which parts of the trope it fulfills, having one of the heroes who has been covering for Mark while Abby is in labor turn out to be their son from the future in disguise.
* Another series of Levis ads, some running over a minute long, consisted of nothing but unrelated snippets of young people partying outdoors, accompanied by a reading of Walt Whitman's
* Another series of Truth PSAs involve two or more people briefly (and rather quietly) mentioning some evil facet of the tobacco company, sometimes followed by the tobacco company's justification for it, followed by an elaborate song and dance about how they must have been mistaken. At the end of the song, they very quickly realize that their justification makes no sense. The part of the commercial that inevitably stays with you is the big song and dance that tobacco companies were in the right. Note also that the last bit happens so quickly at the very end that it's often cut off by local stations trying to return to the show on time.
* Another series with dog mounts was Mike McQuay's painfully sucky duology of
* Another serious example is "The Ship" in which Sisko and the others successfully capture a Jem'Hadar warship but at the loss of five
* Another set of clearcut examples of this trope are battleplates. They have their own commercial sectors and shipyards, due to their intended purpose of defending planets against
* Another set of human characters makes their way from Florida all the way to Hong Kong by way of a hemisphere spanning mag-lev Hyperloop tunnel built by the villainous
* Another set of youths had to read classic lit., and write book reports.
* Another Sexy Losers strip has one guy get a pregnancy scare from his girlfriend ("I'm not on the pill"), only for her to reveal she used to be a man.
* Another SG-1 example: the protagonists create a virus that will render a Stargate nonfunctional, and they use it on the Stargate of a planet owned by Ba'al. Demonstrating amazing knowledge of the Stargates' programming, he modifies it to spread throughout the whole Stargate network, shutting down every 'gate in the

universe before they manage to reverse the effects. Then, a number of episodes later, they need to get an Ancient super-weapon working to wipe out the Replicators (who threaten to consume all matter in the galaxy), and it comes up that they need to figure out how to dial every Stargate in the galaxy simultaneously.
* Another Shakespearean example is Mark Antony's clumsy drawn-out suicide in
* Another Shakespearean instance, which proves pivotal to the plot — the eavesdropping scene in
* Another Shakespeare example: the uncannily realistic statue of the late lamented Hermione in
* Another Sherlock Holmes example: This trope was discussed and averted in the
* Another shining example would be Stefan Amaris. In the Inner Sphere, Amaris is remembered as the man responsible for destroying the Star League and ending humanity's
* Another short features a variation: Tom gets his muzzle snapped in a mousetrap, and after he pulls it off, it's flattened to the point that it snaps back into a roll like an old-fashioned window blind.
* Another short had Leo pretend to be sick to get treatment from Cancer, Virgo, and Sagittarius, only to bolt and make a Leo-shaped hole in a wall when they prepare to operate on him.
* Another short, "Hot Cross Bunny," has Bugs escape a mad scientist by ducking into a room that he belatedly realizes has a full skeleton in it. After a beat, he exits the room visibly nauseous and stammering incoherently.
* Another showed that all his internal organs are like this while also demonstrating his pancreas as uniquely feral. When he passes out from their absence they all re-enter his body with a short song and dance,
* Another shows a band of Vikings returning from ransacking a village; one Viking's dog, leashed to the longboat,
* Another show set out to recreate sci-fi themes tried to create a lightning gun. While they were able to create a rudimentary one using ionized gas, it was large, clunky, short ranged, and could only be used in a specially conditioned room.
* Another shows him and his wife at home about to sit down and enjoy some drinks when they are interrupted by
* Another shows the patient with mouth agape and full of instruments, while the dentist says "Just out of curiosity, we're going to see if we can also cram this tennis ball in there."
* Another shows what happens when a cockroach gets one, causing it to panic and all the others to scatter.
* Another Side, Another Story: After beating the game, you get to play a parallel storyline with another character or plotline.
* Another Side, Another Story is officially called "Reverse/Rebirth" mode in English. Both words are pronounced and written the same way in Japanese, and both are thematically-appropriate, so the English translators decided the only way to keep the meaning was to have them both in the title.
* Another Side, Another Story, until he crosses paths with Corvo midway through the second episode. Obviously he survives, meaning that if the player chose to kill Daud when Corvo had the chance to during the "other side" of this scene in the main game, this is rendered non-canon.
* Another side conversation reveals that outside of Moscow, the area is habitable, but still very dangerous and nothing like pre-war Earth.
* Another side quest, "A Brush With Death," is a textbook example; painter locks himself inside the study. His wife uses the only extra key to check up on him after he doesn't emerge for several days to find he is gone.
* Another sidequest has you help a Goliath escape from Pandora. His plan involves stealing a beacon for a Hyperion Moonshot container (a giant shipping crate fired from their space station in orbit that impacts...
* Another sidequest in the same location has you investigate a murder that was made to look like an accident, though in that particular case, the murderer was a complete idiot and it was painfully clear that the victim's death was anything
* Another Sight. All the other characters at least interact with each other and

take time to explain what they're doing there, but Debussy shows up playing a piano, transports Kit to a giant organ in the middle of nowhere, teaches her a tune, rambles on about the Node, and then dissolves into nothingness.
* Another sign of a more merchandise-driven approach was a move towards artwork that replicated the miniatures, detail-for-detail, rather than focusing on exploring the setting beyond the tabletop like in the past (although this may also have been due to an increased reliance on freelance artists). However, recent information about the art direction of
* Another similar being, Michael the afterlife architect, is fascinated by human errata such as paperclips and frozen yogurt.
* Another similar complaint involved the leeched neighbor password-protecting their wifi, and the leeching neighbor calling the ISP to ask them to help him bypass the password protection.
* Another similar example is the North American P-51 Mustang, which saw various rebuilds and upgrades, including the
* Another similar joke had the KGB hear that a parrot is flying on the streets shouting things like "Down with the Party!" "Give us freedom of speech!" "When will the Soviet Union fall already?!". They chase it, and see it fly into a window. They enter the flat in question and start asking the owner. The latter states he does have a parrot, but one that would never say anything like that. As proof, he opens the freezer, takes out the parrot, and the bird starts shouting "Hail Lenin!" "Long live the Party!" "There is no better country than the Soviet Union!" The KGB people assume they must have made a mistake and leave. Once they're out, the man looks at the parrot and says "Well, pal, looks like you've got a taste of what
* Another, similar plague has since hit some types of vintage computing and A/V equipment, particularly Macs from the late 1980s and early 1990s. These machines all used Panasonic surface-mount electrolytic capacitors, which were state-of-the-art back then, but since they were the first generation of a new technology, they haven't stood the test of time well — they've started leaking and destroying circuitry in much the same way as the bad caps of the 2000s.
* Another similar problem occurs with modern trains. Many have none fail-safe electrically operated brakes, backed up by a failsafe direct system. If these are left unattended with just the electrically operated brake in use, a failure of this can cause a runaway. Drivers must therefore always use a failsafe method of securing the train whenever they are leaving them unattended.
* Another similar reference, as well as a subversion of sorts, actually occurs in the same case as well. The meal that Dhurke has prepared for Apollo is a plate of sushi, which the localization keeps as is, and it's also revealed that Apollo used to quite regularly eat sushi during his childhood. This is mainly due to him having actually lived for most of his childhood since birth with his Asian adopted family, in the Asian country,
* Another simple scene was processor-intensive: when the costume is chucked in the garbage can at Edna's and slowly slides in from the edge; it was incredibly difficult to simulate.
* Another simple version in "Oceans Unmoving": When Kada finds and plays a recorded message left behind for her by Makz, who betrayed her earlier, the recording anticipates her first reaction to seeing him being to swear and call him names: "Now-now, Kada, your "fregs" bounce off me for this is commonly referred to as a "recording"."
* Another Simpsons Clip Show episodes, only with occasional new dialogue spliced over them.
* Another Simpsons Clip Show when after the full elaboration of all the work done by a ton of people, David Mirkin notes that the very final step is when the fans declare it the worst episode ever.
* Another Simpsons Clip Show" when Bart and Lisa watch an Itchy and Scratchy cartoon that we as an audience have seen in a previous episode, causing Marge to ask them 'how many times they can watch that particular cartoon'? They lampshade by answering that it's a new episode made from stock footage. This is also selfreferential comedy because the entire episode itself is made from stock footage

from previous Simpsons episodes, only with occasional new dialogue spliced over them.
* Another Singapore Navy ad encourages viewers to "stop dreaming" and join up. Apparently Singaporean viewers dream of office skyscrapers cruising into the sea to do battle with other, foreign office buildings...
* Another singer/raconteur in similar vein was Scotland's Ivor Cutler.
* Another Sinnoh example, Maylene, the fighting type gym leader, goes from another game-based obstacle to a miserable wreck thanks to Paul pulling a
* Another situational example from the climax of Act 4, just when everything seems to have been fixed, Sayori drops
* another situation has sprung up while the agency which would normally deal with it is fully occupied with the first incident.
* Another skeleton was found by hikers in October 2019, buried under some rocks in Mount Williamson, California. Family DNA identified him as Giichi Matsumura, a fugitive from a WW2 Japanese-American internment camp in Manzanar. As it turned out, Matsumura was known to have died in a snowstorm after escaping Manzanar, but his burial site had been lost.
* Another sketch as the owner of a halberd, confirming the fandom theories about him being an axe user.
* Another sketch featured a company asking their employees what they could do to make more money. The employees who answer their questions get increasingly goofier, like a mounted tiger head and a gigantic turkey sub.
* Another sketch features Atilla the Hun (John Cleese) as a dad in a typical cheesy sitcom, giving his delighted kids a present - a severed head. "I want you to get
* Another sketch from the early 1990s had four friends attending a Billy Joel concert, with one of the characters being stuck behind the one person in the crowd who would rather stand out of her seat and dance, thus blocking the character's view of the stage. After several failed attempts at trying to look around the woman and asking her politely to sit, the character admits defeat and decides to be content with having to miss seeing most of the concert. The segment ends with another song beginning and
* Another sketch had a boss demanding an employee give him several copies of his ass. And to try to keep his balls off the glass this time.
* Another sketch had a woman, a gay man, and a black man called into their white male boss's office to help him review a speech to make sure there was nothing in it that could be mistaken as offensive. They take issue with practically every single word out of his mouth before he even
* Another sketch had a woman wearing slacks go into the "pants" restroom, and a
* Another sketch had the hipsters arguing about whether a piece of art was avant-garde or surrealist. A cleaning woman then sweeps up the scrunched up piece of paper.
* Another sketch has a Georgian nobleman explaining that if you are rich, you can buy all kinds of luxuries inside a Georgian prison; such as no manacles, good food, comfortable furniture, and even pets in your cell. But that this lasts only as long as your money does.
* Another sketch has a man beset by a werewolf, which he shoots. The werewolf tells him he should have used silver, but the man picks up a gatling gun and blasts the wolfman to mush. It doesn't end up working — he should have, in fact, used the
* Another sketch has Fry interviewing Laurie, who claims to have been an old friend of Richard Burton, Elizabeth Taylor, and, in fact, "absolutely everyone." Fry starts asking Laurie about people with obviously made-up names such as "Maureen Limpwhippypippydodo"; Laurie claims to have known all of them. In the end, Fry asks about:
* Another sketch inverted this trope: A mother tells her little girl that Grandma's bones are brittle "like peanut brittle". The girl immediately tries to eat Grandma, assuming Mom was talking about her bones' flavor.
* Another sketch inverts it by having the participants of the sketch realize that

neither knows the punchline. They go to ask the BBC executive what it was, who reads the script in his hand, laughs to himself while remarking "we could make a whole series out of that" and then tells everyone that the sketch has run too long and they need to cut to the next one.
* Another sketch involves Laurie's character attempting to convince a psychiatrist played by Fry that he was mad. To Laurie's annoyance, the psychiatrist refuses to believe that he's anything other than eccentric, and he announces that he'll be writing a very stiff letter to the Daily Mail about this.
* Another sketch involves Mickey trying to ban mixed species Disney couples, which eventually gets into a pretty obvious metaphor for homophobia. It's funnier when you remember
* Another sketch, "Sex With Black Guys", has the duo overhear a pair of white women chatting about black people and what they must be like. Some of their assumptions, like that
* Another skit from that film was "Conan the Librarian." In this skit, Conan slices a man in half for bringing in overdue books. Unlike most bloodless examples, the insides weren't even red.
* Another skit has several nerds give Kel Mitchell a wedgie to celebrate him becoming one of them.
* Another skit parodied the usual commercial side effects announced when taking these drugs. It stated that among the side effects would include hallucinations, in which it then described EXACTLY what type of hallucinations you would have: a horrifying surrealist nightmare ending in a choice between two doors. The wrong door leads to hellish misery, but the right one to eternal joy... and a moist, itch-free scalp.
* Another skit shows an infomercial for the "Timecrowave," a device that sends TV dinners back in time simply to heat them up. When (
* Another Slappy segment, "I Got Yer Can", where Slappy feuds with a neighbor who takes offense when she tries to dispose of a can in the neighbor's recycling bin, is also based on something that happened to one of the writers.
* Another, slightly more villainous example: Mirage, Boom's kid sister, also has the power to create illusions. Unlike Anansi, she received her powers from the Big Bang that gave all of the other show's metahumans their superpowers. Slightly villainous because her heart's not in it at all, and there's something
* Another, smaller, example is the Death Curse, which is the ultimate
* Another, smaller goof is that Indy is at one point seen with an Inglis Hi-Power, a Canadian variation of Browning's design that didn't begin production until 1944. Even having the original FN Hi-Power, like he does in the bar shootout,
* Another small panel had a situation where cats are used as guide-dogs for the blind. Said cat leaves the unwitting man on the ledge of a many-story building.
* Another small-scale example: One reason pilots (and especially test pilots of experimental aircraft) are trained to deliver all information in a
* another Snowball Lie by the part of the Barclay family: Bourdin neither looked nor acted like Nicholas (which Bourdin excused with a ludicrous explanation of being kidnapped and experimented on by a ring of child molesters) and yet the Barclays insisted that he was Nicholas even as an independent investigator figured out the truth and pointed out the inconsistencies. When he finally confessed, Bourdin claimed that based on the insistence as well as the fact that Nicholas' mother and half-brother treated him oddly and coldly, they had actually murdered Nicholas, pretended he had gone missing, and thus kept up the charade with Bourdin once he showed up. The investigator actually agrees with Bourdin but the case has gone cold after Nicholas' half brother suddenly killed himself.
* Another Soft Machine alumnus, Robert Wyatt, has gone on to a respected solo career.
* Another soldier, trying to get a Titan's attention, threatens this (the Titan's expression when it turns on him would almost suggest that it even understood).
* Another solution was based entirely on the supposed 'fact' that roosters
* Another Sondheim example would be most of the main characters from
* Another song called "Sailing" (no relation to the Christopher Cross song) that

is best remembered as a hit for
* Another song inspired by the Happy Land fire was "Happy Land" by seminal New Wave/punk rock musician
* Another song is about "superstars sucked into the supermassive", with huge riffs and piano's that would make an appropriate soundtrack to
* Another song of his asks him to have the lyrics in alphabetical order, and for bonus, after reaching Z, heading backwards. The lyrics ended up being "A zebra, aah!".
* Another song of his, "I Can't Watch This", invokes this trope literally while decrying the state of modern television: "It's about as much fun as watching paint dry!"
* Another song, "Slime Creatures From Outer Space", just screams b-movie.
* Another song that gets only an instrumental cameo is "N.Y.C.", which appears as the underscore in the other mayoral candidate's campaign video.
* Another "Sonic Sez" segment about cheating involves Dr. Robotnik and Dr. Quark racing each other. Sonic disqualifies them both for cheating; the former for throwing a
* Another 'sort of' situation arises with Nanase/Elliot/Ellen. Elliot and Nanase were dating when the series started. She pretty much liked everything about him, but wasn't attracted to him because she was a lesbian in denial. After a series of incidents with a transformation gun and a magic diamond, Elliot now has an opposite gender clone/sister/daughter, Ellen. It didn't take long for Nanase and Ellen to fall in love and get together once Nanase fully accepted her orientation.
* Another source of immortality in the series is the Water of Life, drunk by Master Roshi, his sister Baba, and his rival the Crane Hermit, allowing them to live for hundreds of years. Since all of them appear very old, it's unknown if this method allows some aging or whether they were already old when they drank it.
* Another Soviet survivor, a WWII bomber pilot named Ivan Chisov, bailed out from his disabled plane at ~7000 meters (about 22,000 feet) but lost consciousness before opening his chute. He landed on the slope of a ravine, that managed to slow his fall (estimated at ~150 mph), and, though suffered a broken spine and pelvis, managed to recover enough to fly again.
* Another spacecraft buried beneath the sands of a desert is what kick-starts the plot of the first
* Another special edition came with a pip-boy alarm clock that could actually be worn. (for those wishing to emulate the Vault Dweller)
* Another special mention should go to Wedge's eldest daughter, Syal Antilles, who manages to fight Luke Skywalker to a standstill in a dogfight.
* another spell failure, given that the game rolls percentage to determine the effects of wild magic, the odds are fairly slim.
* Another spell is Heartclutch. The caster just "holds forth his empty hand, and the still-beating heart of the subject appears within it." The victim dies in 6-18 seconds.
* Another Spider-Man Example. In fact, another Harry Osborn example. In the
* Another Spider-Man villain, introduced in a crossover miniseries with Black Cat, is capable of remotely teleporting minute liquids. Not generally useful, but good for a drug lord whose clients have no marks to worry about being found out. He can weaponize this by remotely drugging victims to death and first discovered his powers when he teleported a cup of mouthwash into his foster mother's heart. His brother eventually kills him by teleporting inside him and bursting out of his body, he later tries to fight off Spider-Man by teleporting Black Cat's mask into his neck.
* Another Spider-Man villain with this gimmick was Buck Mitty aka Humbug. Originally,
* Another Spidey example: In Spectacular Spider-Man, there was an arc called
* Another Spock example is that somehow in all his discussions of cultural differences it never came up that he grew up with a
* Another Spoof Aesop appears at the end of the strip where Calvin gets sent to bed after spending all Sunday getting his chores done, following Hobbes's advice

that it would give them more time to goof off:
* Another spoof occurred at the end of the episode "Eat My Cookies," where Ren and Stimpy join a girl scout group. The head baret girl (voiced by Rosie O' Donnell in a guest appearance) says they will now share their biggest secret, and the girls proceed to unzip themselves to reveal old businessmen underneath. Then
* Another sports narration moment was an NHL game where the announcers commented that a player was hit in the
* Another sportswear brand followed suit, using another name from the same mythology, Pallas. Like the aforementioned Nike, Pallas is more known for being a shoe brand rather than the name of a deity.
* Another spotted-in-the-wild example of gluten fever: gluten-free shredded coconut. And, in the same shop, gluten-free lentils. Not even a grass, people.
* Another SS-like force are the Kaled guards led by Security Commander Nyder in
* Another standout element is the Doof Wagon, which is basically a stage on wheels with speakers galore, holding a team of six Taiko drummers in the back and a Warboy, the eponymous Doof Warrior, shredding on a flame-spewing electric guitar on the front. Not only is it completely fucking awesome on its own, it's also practical; Immortan Joe uses the music as a morale booster for his army, as well as a way to relay his orders, akin to Civil War era drummer boys.
* Another Stan Lee and Jack Kirby cameo appears in an early issue of
* Another Star Wars race that are almost never depicted in a positive light are the Hutts. Every Hutt seen in the movies—and most of the ones in the
* Another stealth version can be seen just outside Paris, where the home stadium of
* another Stewie example — he, Chris, and Brian are in a car, and Chris was claiming not to be responsible for getting caught with some alcohol at school (it really was his friends). Stewie orders the car pulled over. Cut to him relentlessly spanking a sobbing Chris and demanding, "What do you say if your teachers ask about your bruises?" "I got hit with a baaase-baaall."
* Another sticking point is whether Excalibur is the same as the Sword in the Stone, or if they are two different swords.
* Another still is used to reverse her binge-watching a whole TV series in one night and getting too little sleep.
* Another story about Weiner; shortly after he moved house, when his daughter was still a little girl, his wife made him write down the new address. He then used the paper for calculations, threw it away once he'd finished and - unable to remember the new address - walked back to the old house. He saw a young girl there and started to ask her if she knew where the Weiners had moved to. She turned out to be his daughter, who his wife had sent there in the expectation that this would happen.
* Another story arc introduced Dan the Illogical Scientist, who was a practiced hand at this sort of thing.
* Another story by Turtledove subverts and plays with this. "The Road Not Taken" involves humanity discovering the universe is full of spacefaring alien races. Thing is, everyone else has a technological level several hundred years behind humanity in every field
* Another story featured wannabes hanging around hoping for the day of their Origin and one relating how one guy decided to stop waiting and shoved a fork into a toaster. While the guy he's talking with starts rattling off possible powers, the answer for what he got was 'electrocuted'. Destiny doesn't like it when you try and cheat.
* Another story, "Georgiana and the Dragon" features the titular princess rescuing a prince from a dragon.
* Another story had a burglar sue Archie's family after he injured himself tripping on Archie's skateboard
* Another story had a man who is a horrible shot, yet his girlfriend won't marry him unless he becomes sheriff. Feeling he can't live without her, he puts the gun against his head and fires.
* Another story had a pair of rollerskates stolen from Encyclopedia while the

latter was at the dentist. He asks his main suspect (a kid who had a doctor's appointment in the same building) if he was in Dr. Vivian Wilson's office. The kid claims "I never heard of him until you mentioned his name" and that he didn't go near Wilson's office because he "had a sprained wrist, not a toothache". In other words, despite supposedly never having heard of him, the kid not only knew that Dr. Wilson was a dentist but that he was a man despite his

* Another story had the protagonist being locked away for years by her mother because she was "too pretty". Though the mother's boyfriend broke her out and escaped with her.
* Another story has Archie fret over a huge zit on his forehead and goes out of his way to cover it up. His attempts to hide the zit ends up attracting
* Another story has Buggy defeat the far more powerful Trafalgar Law since he can control the pieces of himself that Law separates from his body.
* Another story has him and Donald lost in the Australian desert. Running low on rations, the two try to live off the land until they can find civilization. However, thanks to Scrooge's talent at finding riches, instead of food and water they keep digging up and stumbling upon priceless minerals and such, and nearly die of thirst and hunger until Huey, Dewey, and Louie can find them.
* Another story has him overhearing Miss Grundy talking about Jughead's test scores and suggesting he didn't belong in his grade. He's utterly depressed at the thought of getting sent back a grade until she tells him he's been testing super smart and should be moved up a grade. (He opts to stay where he is, with his pals.)
* Another story has it that she was Amelia Earheart's daughter, and inherited them.
* Another story has Magica de Spell convince Scrooge and his family that they've been transported to an alternate, fantasy iron-age universe where gold is worthless due to being soft and unfit for weaponry, unlike iron, which is used as currency. It's a bid to convince Scrooge to sign a contract to sell her all the gold in his possession in exchange for an equivalent volume of iron.
* Another story has Veronica being given the more traditional treatment. In this alternate reality where she wasn’t born, her parents never had kids of their own, so they never saw the need to move to nice suburb-town Riverdale. Without Lodge Enterprises creating jobs with its vast variety of businesses and factories, Riverdale’s economy is awful, with everything closing down, from the movies to the mall (and it doesn’t help that compulsive shopper fashionista Veronica isn't there to spend all her hefty allowance on their merch). Without Veronica, Cheryl becomes the princess that Archie drools over, and she constantly chases Betty away from him, while Veronica often shares Archie with Betty because they’re best friend. Betty’s BFF in this universe, Midge, has to move and leave behind her friends and boyfriend because her dad got a job out of town, because of Riverdale’s poor economy, and Dilton transferred to a different school with a bigger science budget (Mr. Lodge also funded Riverdale High science lab). But the biggest change is Jughead—without Veronica around to turn him off girls, woman-hating Jug is actually a womanizer!
* Another story implies this. Two women came to King Solomon, each claiming that they were the mother of a particular baby. The king thought about it for a while, and then came to the decision that the baby should be cut in half. Naturally, the woman who protested was the real mother, and while the other woman didn't think half a child was fine, she simply said basically that if she couldn't have the child,
* Another story in the same comic, "The Tryst," was based around a man being extremely possessive of his much younger
* Another story involved Archie very nearly destroying several of Mr. Lodge's treasures, only to have Jughead catch it at the last second every time. The story ends with Mr. Lodge forbidding Veronica to go on any more dates with Archie unless Jughead accompanies them.
* Another storyline had Jason, wanting to butter his mom up so he could get a new computer, writes a mushy card meant for her. Unfortunately the notes ends up in Eileen Jacobson's hand.

* Another storyline, Morlun's introduction, had Spidey inject himself with radioactive material so that if he died from Morlun's feeding, Morlun would suffer a lethal dose of radiation.
* Another storyline revolves around Sid trying to get around an audit by pretending to be Ernie, his nephew. It turns out Ernie is owed several thousand dollars in refunds by the goverment.
* Another story mission requires you to infiltrate a party to locate a target, so your character goes disguised as someone of the opposite gender.
* Another story of Newton: once his servant had to go out for errands while needing to hard-boil an egg for Newton, so he set an egg timer and told Newton to put the egg in the pot of boiling water when the timer was done. The servant came back to find the egg on the counter still uncooked and the
* Another story of the Terror tells of a commoner who was being tried and faced the guillotine. Assuming he was a nobleman, the court called out for him to stand, adding a "de" in front of his name. The prisoner stood up and testily replied : "Je ne suis pas ici pour qu'on m'allonge, mais qu'on me raccourcisse" (translation : I'm here to be shortened, not made longer). Reportedly, the judge liked his wit and answered "Eh bien, qu'on l'élargisse !" (lit. "very well then, let him be widened !", but in French legalese meaning "
* Another story plays the "anabiosis + interest money" scheme completely straight.
* Another story shows that Duckburg's city bureaucrats were astoundingly lazy and unmotivated workers who'd leave the office to laze about or go shopping and
* Another story simultaneously subverts and plays this trope straight. A music student is required to write a symphony as a final exam and finds an assignment turned in by a previous student (sometimes the professor himself). The student then copies the symphony but reverses it. He turns in the assignment, then gets it back with a failing grade and the message "Why did you turn in Beethoven's Fourth?" (The subversion applies to the previous student who did the same thing and apparently got away with it.)
* Another story taking place when Homer was a kid had Homer find a mean genie who tried to pressure Homer into making a wish and point-blank telling him that he intends to grant his wishes so that they have negative consequences, such as having Homer's wish for a million dollars result in Homer getting the money illegally and his father getting mad at him for it.
* Another story tells of a monster called Cabeça-de-Cuia (Gourd-Head). He was a man who killed his mother accidentally and was cursed to become a giant-headed monster haunting the rivers. To break his curse he must kill and eat seven young women named Maria (thought according to the tale he generally kills them first and asks names later, so no one is safe).
* Another story tells of a student who stopped by the professor's office to find him missing. He then stole a copy of the next exam. The teacher found out the exam had been stolen, but not by whom. So, he cut half an inch off of the other exams and the cheater was discovered as the one with an exam half an inch too long.
* Another story tells of Spooner preaching a sermon about St. Paul, but substituted the name Aristotle. When he finished, he came down from the pulpit, paused, went back up, and told his bewildered congregation: "Did I say Aristotle? I meant St. Paul."
* Another story tells of the nobleman Xanthus who, while drunk, bets all his lands and his fortune on the notion that a single man could drink up the sea. Once sober, he realizes his error and goes to Aesop for help; the storyteller jerks him around for a while, but eventually concedes to help him. In order to get out of his wager, Aesop advises him to make use of this trope: He said he would drink up the
* Another story with a forgotten title involved an immensely long-lived alien recruiting a team of humans to travel to another planet and help advance the civilization of a sentient species who exist in a blur of speed and whose lifespan is measured in
* Another straight example is Indra's incarnation Amano and her avatar Kai, with Amano barely reaching Kai's chest.
* Another straight Vocaloid example is MAYU, who has an actual yandere theme

rather than just a fandom-based one.
* Another strange example are the El-Aurians, Guinan's people. Their hat is supposed to be that they're great listeners, but Guinan is the
* Another strategy doesn't get a card in their hand, but get them in the Graveyard. For example, the most notorious use of this card at one point was to use it to summon the incredibly powerful
* Another strip (#191, August 17, 2009, NSFW) has Matt wearing one for Sandra, though the badminton racket might be a partial motivator there too.
* another strip and they start making rude noises. Elly gives them a brief lecture about how jokes like this are stupid and not funny. Then she goes into the kitchen and starts laughing her head off.
* Another strip, but this time without the scene showing. However, it's possible to make a link between the original statement and the after-comment.
* another strip, Dilbert enters a stand up comedy competition which has the mandatory categories "Dan Quayle, Flatulence and The Warning Labels on Mattresess".
* Another strip featured a milk carton with a picture of a many-eyed alien, again with "Have you seen me?" written on it.
* Another strip featured a pair of sharks staring befuddled at a bottle of leaking ketchup, with one of them remarking: "What the—? Ketchup? We followed a
* Another strip features two boogeymen frightened by the possibility that there may be something lurking on
* another strip, Garfield literally gets a "Kick Me" sign on his back, courtesy of Odie.
* Another strip had a chicken couple confronting each other at their home's threshold: "Oh, I see! You return covered with
* Another strip had a dentist father keeping a chair in his house's basement so he could give his son an "appointment" as punishment.
* Another strip had Binkley asking his father what he meant by "winding" a watch.
* Another strip had Calvin jump up screaming in pain after a fish bit him on the bum. It's the page image for the
* Another strip had Calvin make a snowball and set his sights on hitting Suzie with it. She gives him fair warning not to and after contemplating his choices, throws it at her anyway, yelling that it was worth it right before Suzie chases Calvin down and throttles him.
* Another strip had Dahlia taking Davan Christmas shopping... and fully taking advantage of the fact that she'd mounted her motorized electrical chair with a cow catcher.
* Another strip had Dogbert get Dilbert to discuss a marine biologist relative of his, who won awards for breeding sea anemones, but had little time for a social life. Dogbert wisely gets out of slapping range before delivering the punchline:
* Another strip had him extending his lips like a vacuum attachment to suck up the lasagna in the kitchen.
* Another strip had him napping in front of the TV, and waking up just in time to hear the newscaster announce, "...are the three things which have been
* Another strip had Paige getting ready to eat a sandwich only to find Peter staring at her with an evil grin. She proceeds to bombard Peter with questions about why he's smiling and if he did something to her sandwich (specifically spitting on it) only for him to constantly shoot her down. Paige then dares
* Another strip had Peejee sending a wreath to the funeral of a female supervisor who'd spent the last few weeks sexually harassing her (and was threatening to sue her when she was killed by a Canadian Trapdoor Alligator). Unfortunately, the floral service screws up the order... and a giant "You'll Always Be My Valentine!" wreath shows up instead.
* Another strip had Peter and Paige again asking Jason if he wants to go on a snipe hunt.
* Another strip had Roger pour himself a cup of coffee, which began vibrating wildly (as in, bouncing up and down on the table). Turning to Peter, he remarks, "I can always tell the mornings when you have to cram for a test."
* Another strip had Tycho and Gabe expressing terror at the concept of playing a

game of baseball outside because there are bears "outside".
* Another strip has a man diligently washing and waxing his car. Above, a single bird sits on a wire, thinking, "You are mine. All mine."
* Another strip has a man's own stomach thwarting his dieting attempts by sprouting legs and going on midnight fridge raids.
* Another strip has a pair of children visited by a blue-clad Santa who
* Another strip has Calvin play a joke on Hobbes by warning him that a big, ugly, fuzzy, caterpillar (Hobbes' tail) is about to chomp on his bottom.
* Another strip has Calvin trying to invoke this so he and Hobbes could be cool.
* Another strip has Charlie Brown getting ready for a baseball game and explaining to Sally that he has to put his left sock on first.
* Another strip has Connie punishing Jeremy after he lets it slip that he's going to play beer pong with his friends. As Connie rants to Walt about it, Walt casually quips that Connie did the same exact thing when she was Jeremy's age, causing Connie to sheepishly grumble "I knew I should've hidden my trophies better!"
* Another strip has Hawthorne telling Sherman to do this when the health department comes to his tattoo parlor. In the next strip, Hawthorne discovers that it's been shut down. Why? Well...
* Another strip has Jason and Marcus running through fields covered in poison ivy in an attempt to escape from Peter after they shot him in the face with superglue-covered suction darts. In this case Jason and Marcus
* Another strip has Jason camping out (on his computer server) to get tickets to see
* Another strip has Jason planning on laying letters on Paige's back while she tanned to spell out "KICK ME", but his mother stops him.
* Another strip has Jeremy and Pierce meet someone from the robotics club. The club member tells them that his robot, which has a five-fingered hand, can toss frisbees and play the drums. Pierce was not amused by the latter, so he asks to bend all the fingers except the middle one.
* Another strip has Jon struggling to solve a Sudoku puzzle and giving up, then Odie examines it and solves it very quickly, to Jon's surprise.
* Another strip has Peter looking for a replacement for Thor when the latter goes to hunt raptors. Volunteers include
* Another strip has Peter singing "Heartbreak Hotel", with the rest of the family gathering outside the door to complain:
* Another strip has Satchel wishing Bucky a good Saturday morning, to which Bucky replies that Saturdays are made up by greeting card companies to make money.
* Another strip has some of the other characters discussing Helen and Dave's relationship. After Helen wanders by, one of them comments "I'm pretty sure that was actually Dave..."
* Another strip has the elephant hiding behind a fairly small piece of furniture while the homeowners search for him.
* Another strip has the entire family pile into the pickup to head to town and see the newly-installed traffic light, with Garfield commenting about how they'd reacted the same way about a place that got indoor plumbing.
* Another strip has Tycho catching Gabe coming out of the bathroom dressed in his bed clothes, a t-shirt with
* Another strip inverts it as well, where his mother tells him that the stuffed peppers she's making are actually "monkey heads."
* Another strip lists the medical capabilities of the party, which includes:
* another strip, Odie frames Garfield for hiding all of Jon's shirts, then, when Garfield is thrown out, Odie looks on while wearing one of Jon's shirts with an evil grin on his face.
* Another strip plays it perfectly straight: A white passerby asks Lemont if he knows any restaurants that have good ribs. Lemont launches into a rant about how racist it is to assume that he would know that just because he's black, and then cheerfully recommends Roscoe's Rib Shack.
* Another strip references this trope: two haggard-looking men in a life raft, with one telling the other that he doesn't want to make the situation worse but

he's really close to
* Another strip shows Elizabeth retaliating after Michael puts soap on her toothbrush. When she tells him she used his toothbrush, it doesn't faze Michael in the slightest. Then Elizabeth tells him she didn't use it for her teeth, but for
* another strip, the Wizard sends a bird to deliver a message. However, the recipent fires on the bird before he can deliver it.
* Another strip uses one of the real versions to illustrate Joyce's upbringing, when she observes that some board game geeks at a party are playing "some kind of secular version of
* another strip, when cast on a dragon, at least the first time; instead it's stunned and singing "the wheels on the bus go round and round..."
* another strip when Jon yells "FIRE!" to test his pets' fire drill knowledge. Both run straight through the wall — or, rather, we assume they did, thanks to the hole.
* another strip where he thinks he's dreaming about being locked outside without pants.
* another strip'," while Roger, from the ceiling, said, "Funny, I wouldn't think my fingers could grip like this..."
* Another strong example is the contrast between war buddies Robert Baratheon (warrior) and Ned Stark (soldier). Robert truly loved war and fighting, while Ned just saw it as a grim task and clearly does not have fond memories of it.
* Another style shift that disappointed some of his fans was his switch from
* Another subject of Buddhist debate is animal intelligence and extraterrestrial life. Whilst modern Buddhist understand animals as in the scientific sense (which excludes, for example, bacteria and microorganism which is why in Buddhism taking medicine to kill micro organic life is not a problem) some animal forms like Polifera do not correspond with the traditional definition of animal in the Buddhist sense as it outright said that animals, in Buddhism, refer to sentient beings who have a mind, even if much limited when compared to humans. While animal sentience is undeniable in most species, specially of vertebrates, a Sponge have no brain and thus no mind, and thus is not an animal in the Buddhist sense. Also the fact that some animals are capable of limited reasoning like crows and apes is a no surprise for Buddhism as mythological sentient creatures like Nagas are traditionally considered be part of the animal realm and some Nagas are thought to be Buddhists
* Another subplot involves the deaths of Police Captain Tommy McGrath and his girlfriend Edita. The main suspect is disgraced cop Terry Howard, but Cross notes that Howard was never a particularly good shot, and the killing shots were done with near perfect precision.
* Another subspecies, the Denisovans, is more represented among some parts of the modern human species, mainly those of Micronesia. Again, they were basically absorbed by the Cro-Magnon population during the last Ice Age and, like Neanderthals, made a minor contribution to the current human genome. It's just larger among the Micronesian population at up to 6% of their genes.
* Another subtle example earlier (the season 3 episode "The Abandoned") when a baby
* Another subversion comes in a scene in which the pilots are sitting in their planes ready for the order to take off.
* Another subversion, considering that the race that is arguably the closest to being the "Good Guys" (or,
* Another subversion: Hawkeye and BJ put Margaret's fiance Donald Penobscot in a full-body cast as a prank. As the couple is leaving on their honeymoon the guys try yelling that the cast is a fake, to take it off. Over the chopper Margaret yells back "Taking off!"
* Another subversion in a more recent episode — a Chatroulette-like program alerts the CSIs to a murder before it's discovered (allowing them to be assured that they'll get the best possible evidence); Mac and Jo both experiment with the program and find it to be interesting, rather than harmful. Jo even uses it to show New York to a serviceman in Afghanistan.

* Another subversion is "At the Hop" by Danny and the Juniors, which simply talks about "a dance sensation that's sweeping the nation at the hop!", although a number of different dance moves are mentioned throughout the song. The song was originally written as "Do the Bop", but
* Another subversion is 'Clearing an Isekai with the Zero-Believers Goddess'. Elves have a life expectancy 5 times as long as humans but are just as fertile. One of the main characters is the descendant of a legendary elven hero who married over 50 women and fathered hundreds of children. Even Lucy has over 50 siblings through her elven mother.
* Another subversion is in "The Adventure of the Blanched Soldier", written by Sir Arthur Conan Doyle himself. A soldier who made friends with another younger soldier in the Boer War hires Holmes when he thinks the younger soldier's parents are keeping him imprisoned on their family estate. Holmes indicates that there could be three possible explanations for his staying hidden there, one of which is that he's being held there because he's insane, and another one of which, upon which he settles, is the correct one. It turns out
* Another subversion is Uncle Martin's name; a much more personal example of being named after your planet. Martin is so in the first episode. Tim O'Hara stumblingly introduces him as a Martian, before correcting himself and callinf him "Martin". In the episode
* Another subversion occurs in one mission of Alpha Gaiden, where the dinosaur empire has created a special squad of mechabeasts whose sole purpose is to stay between the getter machines and prevent them from combining. However, they were ultimately unable to stop a much higher speed, and therefore more dangerous, version of the combination mechanism.
* Another subversion occurs in "Water Way To Go", where Darkwing and Launchpad think they've fallen into quicksand. Instead, it turns out to be a hidden entrance to Steelbeak's lair.
* Another (sub?)version of it appeared in Private Eye when financial crisis hit Greece:
* Another subversion was what appeared to be an extremely deranged person pleading it, appearing to be actually insane (voices in his head, erratic behavior, violent reaction to loud noises, etc.) only for the court psychiatrist to see that his symptoms were
* Another such case where she and Susie are competing against each other in various events and she
* Another such chain is narrowly subverted only because Olivia does something very stupid and thus actually avoids the final danger that would have killed her.
* Another such character could be the Drive-Thru Whale, a disembodied drive-through speaker that spouts nonsense like "Sever your leg, please, it's the greatest day," and "Pour gravel on your stump please, ma'am." (over a bunch of static, naturally).
* Another such example which can even be contrasted with a female is that in Season 7,
* Another such explanation are the result of a cosmic being's influence, and that "themed" beings are naturally drawn to each other. This also counts as One-Shot Revisionism, as the idea's never been acknowledged by other writers; of course, since this was in Quasar, it's likely no-one knows about it.
* Another such level is triggered by a stream of flickering, bare code before the floor breaks and you drop into the level. The trashcan bonfires float, the train conductor is missing half his face because it disappears into code. The train itself — one car is upside-down and another has an evershifting floor.
* Another such tale includes the righteous stepmother of Qi. When her son and stepson were found by a murdered man, and both confessed in an obvious attempt to shield each other, she said they should execute her son — both because her husband had particularly put her stepson in her care and because it was the place of her son, who was the junior and therefore inferior. (For this devotion to duty, both men were
* Another such weapon is used to protect a society of pacifists in "Volcano". They

threaten to detonate the device if any aggressor attempts to land on their planet.
* Another suggestion is that the alignments reflect how the Servants see
* another Supergirl story, a massive boulder is about to crush a village. Linda/Kara charges right away at it, spinning around at super-speed and becoming a super-drill, pulverizing her way directly into the rock core to stop it and drive it away.
* Another superhero, Bucketman, got his powers from radiative materials stored in a bucket that landed on his head. Problem was, he couldn't get the bucket off, and his blind attempts at heroism were often...
* Another supernatural twist, but similar to "Ghosts with Teeth," comes in
* Another super-team example is the "Decency Squad", especially Johnny Polite. The Decency Squad was apparently formidable... back in the 1940s. Now they're a bunch of mostly washed-up
* Another surprise comes out in "Might and Power": a ray gun that turns groups of Evronians back into spores. It's devastating enough that Earth's militaries, previously not so effective against the Evronians,
* Another suspect didn't hire a lawyer, but he refused to speak with the police or otherwise cooperate with them, also refusing to take a DNA test. Both of which are well within his rights (unless they have probable cause to compel the test), but Vera took this as definitive proof of his guilt and as such, relentlessly hounded the man until the DA needed to warn him to back off.
* Another SVU episode, "Parasites", had the DA's office managing to get immunity rescinded when the detectives found overwhelming evidence that he had murdered a woman.
* Another Swedish comedian, Ronny Eriksson, wrote a song in the late eighties that parodied racism. The song, titled "
* another Swiss mercenary company, so national loyalty was apparently more important than money in this case.
* Another tactic is "tainting the suspect". The suspect is "accidentally" brought into a room where a bunch of evidence is on display and left there for a few minutes before taken into the interrogation room. When the suspect is then finally brow-beaten into confessing he can mention the key detail mentioned above as "proof" he is the real thing. It's also common to feed the suspect crucial information during the interrogation that they can repeat back as if it were their own. Thankfully interrogations are often recorded now and this can be shown.
* Another take on them: One's a devoutly religious Catholic who believes in chivalry. One's a rational atheist who believes in gender equality. They Fight Crime!
* Another take on this trope has an airlock tunnel between two spacecraft being torn loose as one vessel suddenly blasts off, killing those inside. This happens in the episodes "Space Fall" and "Gold".
* Another take on this trope is alternate histories with their own alternate fiction.
* Another tale involves a Pole who attempted to get a lion to bite him. It bit off his arm.
* Another target is their annoying tendency to leave all the studying for several weeks before exams.
* another Team Rocket group, Butch and Cassidy. Jessie and James hate Butch and Cassidy too much to ever work with them, but they are technically all on the same team, so usually Jessie and James will attempt to sabotage Butch and Cassidy's plans and steal the credit/spoils, while both groups are in opposition to Ash & co. and sometimes the local authorities.
* Another technique is to have the cash storage embedded in the (usually concrete) floor, and separately secure from the ATM. Even when in a brick wall, an ATM could still be ripped out fairly easily with something like a front-end loader.
* Another technique transforms a person in a walking puppet of the controller and transforms the puppet body to match the master. These copies are only as strong as the amount of energy the controller transfers to them. When they are killed, the bodies revert to their true forms.

* Another techno example; "Techno Vocals" by Marc Houle is about the style of vocals used on techno tracks: "Why are the vocals pitched down so low, low, low, low?/This is the way we make techno!"
* Another telenovela example is Arturo Peniche's character, Governor Fernando Sánchez de Moncada, from the recent
* Another term associated with the berserkers in the Old Norse sagas is Úlfhéðnar (literally "a warrior clothed in wolfskin"). These ancient Germanic and Norse warriors were reported to having wore wolf pelts in battle and fought with unprecedented and animalistic ferocity, giving off the impression that these warriors were shape-shifters that became the animals whose skins they wore.
* Another Terminator leaves at least one minor character alive because, as the audience sees through the Terminator's vision, the character has a threat level of "none".
* Another that occurs off-screen with Niles storming out of Maris' mansion after an argument, and his failed attempt to close the massive front doors.
* Another: the man's first two wishes are a nice mansion (with a large garden and a swimming pool etcetera), and a dozen Playboy bunnies to be around all day. Seeing that his wishes are granted correctly and his arch-enemy is granted exactly double what he got, his last wish is to have one testicle amputated.
* another. Then, it tells Fozzie that his problem is "You are much too generous." (Fozzie gets angry, to which it responds "You also have a rotten temper." and starts strangling him.).
* Another, the only way for the dead classmate to be found is for them to be killed, as even they don't know their true identity. They do, however, have an ace up their sleeve, as Mei Misaki can use her doll's eye to see "the color of death." It is in this way that they find the dead classmate was in fact not one at all, but the protagonist's aunt and classroom teaching assistant. Their being the same person is not an example of this trope, however: it's only a surprise to the viewer. The fact that she was dead? No one saw that coming, not even her.
* Another theorises that The Great Tomb of Nazarick with its various bars and shops inside it might have been designed with an arcology in mind.
* Another theory cites two specific events in the late '80s and early '90s as the reasons why audiences started tuning out:
* Another theory has it that the British intentionally sabotaged the operation by giving the Canadian troops whose poor luck it was to carry it out two weeks pay and 48 hours' leave right beforehand,
* Another theory has surfaced that they didn't get proper clearance for the episode's
* Another theory holds that the events of the series are real, but V is imaginary - his background either an elaborate fiction or borrowed from someone else. In other words,
* Another theory is that at least some of these mutilations were carried out by people who had some vendetta against the rancher owning the cows in question. Then they conveniently stayed silent when people thought space aliens were doing it.
* Another theory is that he actually did draw a cross, and was attempting to draw one of those Jesus Fish, as well, in some sort of Satanic
* Another theory is that Rose wasn't given the power directly from the Horrorterrors, but instead inverted her Aspect, Light, which usually symbolizes knowledge. Sburb being Sburb, deviating from your fate doesn't tend to end too well for you, as showcased by Rose.
* Another theory is that the D. stands for dolls, which was a potential name for the manga, Gray refers to the fact that people are neither white (good) or black (evil), but gray, and Man refers to humans.
* Another theory suggests that marriages between siblings and half-siblings were about money. These marriages made sure that family riches couldn't be shared or claimed by outsiders.
* Another theory, that popped up when it was clear Mars lacked largue bodies of liquid water, is that the dark spots (albedo features) that can be seen there with

a telescope, formerly considered as seas, were areas of vegetation changing its extension as Martian seasons progressed. The late
* Another: There's nothing safe to anyone. Elevators have smashed people, umbrellas have pierced eyes, windows have exploded to stick every glass fragment in a person, boulders will fall randomly from mountains to kill you, even just standing in your room will get you killed when a car with a wrecking ball falls down the street. Nobody and nowhere is safe.
* another, they soon began dating and eventually married). Subverted with Pamela Dare's attempt to win his affections, as he has no romantic feelings for her, but instead cares for her as a friend and student.
* Another thing about Ned Flanders is why he talks the way he does (saying nonsense words like "diddly" and "okely-dokely"). In "Hurricane Neddy", his therapist, Dr. Foster, thinks it was because of him suppressing his anger towards his parents because both the suppression and the nonsense talk started around the same time. Then again, he still talks that way after getting treatment for the suppression, he's been heard talking that way when he clearly isn't angry (in fact,
* Another thing he is a big fan of is military hardware in general, and infantry kit in particular. Many of his stories, particularly
* Another thing Jezza was fond of doing was using "torque" without specifying what unit (pound feet, newton metres, etc) he was giving the torque figure in, and instead treating the word "torque" as a unit of measurement in and of itself. He would also pluralise the word "torque". "This new supercharged doodad has over 500 torques!"
* Another thing people tend to forget these days is that before the year 2000, basic cable was both more prevalent (to the extent that roughly half of the households that even
* Another thing pretty close to literal is modern science's experiments on various animals, including dogs, for the sake of medical research. Whether you consider it justified or not, the reality is, many of the medical procedures that save lives today would not exist without experiments on animals, and if it weren't animals used as test subjects, it would be humans.
* Another thing that makes humans special in real life is language. Sure, many animals can communicate in a limited way, but not a single other species has our capacity to recursively apply a limited set of communication cues to express absolutely everything imaginable. Even primates who get taught sign language never develop this capability to spontaneously make
* Another thing that many laymen fail to consider, is that many modern propeller engines (the aforementioned turboprops) are in fact a jet turbine engine being used to turn a propeller. The main difference between those and "old-fashioned" piston-driven propeller planes is the use of a turbine instead of a set of pistons to produce the torque to turn the propeller. And of course, piston-engine design continues to advance as well, so even the piston-driven propeller planes are more advanced than the ones of previous decades.
* Another thing that Remnant seems to be lacking in is certain advanced weapons like fighter jets. In this case, it's because Remnant weaponry is specialized around fighting the Grimm, which are naturally-occurring
* Another thing that trips Aspies up is when a person keeps saying "It's ok" or something in that vein just to be nice, and the aspie thinks that the person really means it. It makes the eventual blowup seem to come out of nowhere and come off as a form of
* Another thing that was weird is why Killface does not murder Phil, given that we routinely see Killface murder people who annoy him over petty thinks and here Phil is doing far worse. This was confusing, but accepted as some bizzare part of Killface's gentlemanly demeanor.
* Another thing to consider is that the uranium dioxide fuel itself is an extremely poor conductor of heat. During ordinary operation, the outside of the fuel pellet can reach several hundred degrees Celsius, while barely a centimeter away, the center of the pellet can be hotter than the surface of the sun. Even if there is no more fission taking place, the cooling systems have to keep operating

for days before cold shutdown is achieved.
* Another Thin Man, a matchbook leads Nick to the "West Indies Club", which leads to a vital clue.
* Another Thin Man Lois is with Nick and Nora when the Colonel's shot goes off, so she is believed to be innocent. It is revealed that with her hoodlum boyfriend Phil's help she set up an elaborate timing mechanism in which she first killed her father, and then rigged the gun to go off five minutes later, after she'd left.
* Another Thin Man, Nick and Nora are at a night club. Nick asks the waiter for a bourbon, then looks at his wife and says "uh, two bourbons." Nora says "The same."
* Another Thin Man, some of Nick's hoodlum friends decide to throw Little Nicky a first birthday party, and bring all their own kids. One of them has to rent one to attend. The villain of the story, after being revealed, attempts to get away by claiming to have kidnapped Nicky. Nora goes to check and sure enough, there is another kid in his place. Turns out the villain was bluffing. Nick's friend had grabbed the wrong kid when he left, and the villain happened to notice before everyone else. The friend soon returns with Nicky, clearing it up.
* Another third-party scenario had an airlock that sucked the player out and killed them by
* another! This is justified by the Federation being a demiltiarized, peacetime society; the Klingons, Romulans, and Cardassians on the other hand are explicitly races of conquerors, yet their standing navies are consistently treated as equal to or smaller than to Starfleet.
* another, this one released in 2018 in the Netherlands, that's about two teenage boys who consider themselves "just friends" until they come to terms with their sexuality.
* Another thresher maw example. The first two games make us believe that the krogan are Tuchanka's strongest beings. However,
* Another time a defendant who was employed by the Nigerian embassy, and thus enjoyed diplomatic immunity, tried to use it to get out of his involvement in a drug smuggling ring. His embassy revoked it, but then reinstated it halfway though the trial, allowing him to flee back to his native land. When a furious Ben Stone demands an explanation, he's informed that the man will be tried in a Nigerian court for his crimes, where the penalties for drug smuggling are even
* Another time after attempting to resurrect the title character's mount and instead
* Another time, after Daffy goes off at Tina for not telling him about "her" baby;
* Another time, a member of a Soviet swim team contacts him for help in defecting, but he can't remember her name and has to spend a while figuring out which team member she is (
* Another time, a member of a species the Empire had contacted fifty years earlier
* Another Time, Another Place has an internal example with Glaswegian actors Phyllis Logan and Gregor Fisher putting on fake northeastern accents.
* Another Time, Another Place has an offscreen PoW camp that houses some of the prisoners working in the village.
* Another Time, Another Place, Janie falls in the love with the new and exciting culture that the Italian POWs bring to her austere village.
* Another Time, Another Place rejections gracefully and he doesn't browbeat her about it.
* Another Time, Another Place see each other by practically begging him to tell her that he loves her. He says he does, but he doesn't sound very convincing. He doesn't even seem the least bit cut up about leaving her.
* Another Time, Another Place where she imagines herself naked with all the prisoners leering at her.
* Another Time, Another Place, which deals with the protagonist's childhood.
* Another time, Arachnobot nearly had the Troopers beaten, but Doom Master himself killed Arachnobot out of jealousy. Thankfully for his sake, he thought it was the Trooper that did it, not Doom Master.
* Another time Arcane is using an insect-hybrid body. Arcane is exploded, burned, and falls from a great height. And Swamp Thing goes down to check because this it

the third time Arcane came back from the dead. Yes, that body is dead, but is that the end?
* Another time, a starving man wandering a desert encounters a hilariously out-of-place ice cream truck, only for the driver to inform him he's sold out.
* Another time, BADD cited an increase in suicides corresponding with a major Dungeons and Dragons release. Again, however, there's no evidence that's not simply a coincidence, as similar statistics can be used to prove that the release of a
* Another time, Braves manager Bobby Cox visited him on the mound, with Maddux facing runners on second and third with two outs. Cox suggested an intentional walk; Maddux refused, giving him a rundown of his next three planned pitches, ending by telling Cox, "And on the last pitch I'm going to get him to pop up foul to third base." The third pitch resulted in a pop-up to third base that was caught barely inside fair territory.
* Another time Bruce made fun of a couple guys playing a TCG in the cafeteria, while wearing his LARP costume.
* Another time Calvin broke his dad's expensive binoculars, and burst into a hysterical confession at the dinner table when his dad hadn't even found out yet.
* Another time, Calvin comes home chattering to Mom about how he has to make a desert life diorama in a shoebox for school. Mom, suspicious, asks when the assignment is due. Calvin tells her, "It was due today, but I told the teacher I wasn't quite finished."
* Another time, Calvin complains about having to go to bed and says that he would rather stay up and do "something fun, whatever Mom and Dad get to do!" The next panel shows that Mom and Dad have fallen asleep on the couch.
* Another time Cameron and Chase are making out in a janitor's closet. House opens the door suddenly and simply tosses his garbage out before leaving.
* Another time Dexter is forced to inject himself with his own syringe and goes down almost instantaneously.
* Another time, Dwight is convinced that Jim and Pam are blinking in Morse Code in order to talk about him behind his back. When he calls them out on this, Jim responds by pointing out that they are working parents of a newborn baby and asking if Dwight honestly thought they would pay money to hire a babysitter so they could learn an outdated skill just to torment Dwight.
* Another time Eustace lost his head was in "Mega Muriel the Magnificent", where Courage's computer temporarily takes over his body and accidentally hits a wall while running, causing Eustace to collapse part-by-part. His disembodied head then spends the remainder of the episode watching the possessed Muriel's death-defying stunts on TV, oblivious to the fact that he no longer has a body.
* Another time, Grace forces Karen (who has just gone on a several-thousand-dollar shopping spree) to cut back on her spending habits by threatening to cut up part of the sweater set she just bought.
* Another time, having accidentally broken up with Marzipan via answering machine, Homestar quickly replaces the tape with a fake he recorded. In the fake messages, he does horrible impressions of several characters, including
* Another time, he commented that Putin was banning food imports from all major countries and Norway.
* Another time, he had a cold and pointed to his speech bubble, saying "Loog, eben my thoughts are stuffed ub."
* Another time he mentioned he wasn't as into a franchise as others and said, "This is where the big nerds get to pick on me" with an illustration of a hulking figure with big coke-bottle glasses and nerdy incisors picking him up.
* Another time he pretended not to believe that he wasn't in the Army or in Korea. He was so convincing Colonel Potter started to fill out the discharge form. Even as Potter asked him for details for the form Klinger pretended not to know he was letting him out of the army. Then the colonel asked his ranks and he replied "Corporal".
* Another time, he set up a snow cone stand. This might sound mundane at first, but the Light Warriors noticed something strange about the aforementioned snow-cones, leading to this exchange:

* Another time, he thought he got up in the middle of the night and ate some jawbreakers, only to find that his marbles were missing.
* Another time he used time travel to invest his parent's "secret" money stash, collecting a fantastic amount of interest in the far future...except the stack of bills he gets is in the future currency, so Doraemon has to find a collector to exchange it for modern bills. The result is that he only gets a modest increase (but enough for Nobita to get a bump in his allowance).
* Another time, he went strip-hopping and wrote his own dialogue for
* Another time, his adopted son Kristoff (standing in for Doctor Doom), dusts off one of Doom's old plans and corrects the fatal flaw which allowed the Fantastic Four to escape destruction the first time it was used. Needless to say, the Four come up with a
* Another time, Homer declared, "I never apologize for anything. I'm sorry, that's just the way I am." It's played for
* Another time-honored method of fucking with the new guy, especially in rural areas, is the Firewatch. The FNG is posted outside after dark, possibly on the roof, but always in the open, and ordered to keep watch for any fires on the horizon. The new guy may or may not have been warned about Chupacabra or other possible dangers, and the rest of the crew may or may not sneak around making ominous noises while the new kid freaks the fuck out.
* Another time, inside Olivia's office, Miles has trouble coming down from a light fixture on the ceiling, and when Peter tells him to just try and do what he does to relax, Miles starts poorly singing Post Malone's "Sunflower", to Peter's chagrin. And when he finally gets unstuck in the middle of a verse, Miles botches the landing hard.
* Another time, in "The Bob Next Door", the words "Bart Simpson will die" are written all over Sideshow Bob's prison cell.
* Another time in the pilot they were in atmosphere and using the ship's nuclear fusion drive to
* Another time, inverse to the above, Beetle annoys Sarge by letting him know he's hiding behind a pole that can hide him because he's so much thinner. (Kind of played straight, sort of accidentally, in that the pole doesn't
* Another time involved a hunter making his suicide look like a hunting accident for very similar reasons — in this case to allow for a generous life insurance payout to his wife.
* Another time involved an amusement park island with Pokémon-shaped automatons that were several times the natural size of the critters they emulated - and the cast was stuck ON the island for the duration of the episode.
* Another time is when DX had a bounty on them all night, Triple H has to use the bathroom and has Shawn watch his back. When HHH enters the stall, Chris Masters is seen waiting for him. We don't see what exactly happened other than it ended with Masters unconscious.
* Another time is when Krusty the Clown owed lots of gambling money to Fat Tony and instead of paying escaped through the bathroom. (You can actually hear a car take off, and then a
* Another time, it momentarily appears that this happens to Bun-bun's informant, but then it's revealed to have been a cut to where the bad guys who were supposed to kill that informant are killing the wrong guy who was just about to reveal someone the location of a rave.
* Another time it was expressed as equaling the IQ of the dumbest member, divided by the number of members.
* Another time, Jason decided to take up baking, and mused over whether the 350 degrees he had to set the oven at were in Celsius, Fahrenheit, or kelvins.
* Another time Jason put a subliminal message into a magic eye pattern. He got his father to give him money.
* Another time, Johnny, Carl, and Susie were traveling in the woods and Carl
* Another time, Legs manages to get past the machine and speak to someone useful by conference-calling a suicide hotline. Poor thing was on the verge of pulling her own plug.

* Another time Miyami Yuuna asked Kazuki to "make [her] a woman". The camera then showed Kazuki taking her hand and directing it toward his pants... where Kazuki was holding an eel that Yuuna was trying to work up the courage to touch.
* Another time, Paige is seen angrily knocking bits off of a snowman and insulting it in a manner that leads Peter to ask her if she's pretending that it's Jason. The punchline then reveals that Jason is inside the snowman, and he pleads for Peter to help him.
* Another time Patty gets a Z minus and complains to her teacher, who raises it to a Z.
* Another time, Peter basically steals Lois' position as director of a play. The morning of the play, she accuses him of lacking creativity, to which he responds:
* Another time Phoebe talks about walking from Central Park to the Central Perk coffee shop, then stops and adds, "Hey, that's the first time I got that joke."
* Another time Pinky gets trampled by a team of racehorses and starts singing "There's baloney in our slacks...", a line from the
* Another time, Pinky responds to "Are you pondering what I'm pondering" with "When am I ever pondering what you're pondering?" and explaining that the odds that he was this time weren't very high. Which, it turns out,
* Another time, Ranma accidentally broke the traditional doll that gave a very famous inn its name. He hastily reassembled it into something of a frog-shape, incurring
* Another time, Rocko gets an eye exam at the DMV. The doctor sneaks up on him, in order to induce an
* Another time Ron got into the control room of a powerful laser beam and proceeds to call it a precision instrument, before repeatedly pushing every button and lever on it, intentionally overloading it.
* Another time, she stops a generator from overloading by pulling the power plug. She stops a GENERATOR by UNPLUGGING it.
* Another timeskip would have followed after the end of Season 6 (which was left unfinished due to cancellation, unless the revival has something to say about it), giving the impression that the three periods of the show take place in each year of the war.
* Another time, the nanites that lived onboard the SOL at that point wouldn't complete repairs for a week after they went on strike; only until nanite strike breakers came in did the repairs proceed. It's implied the strikers eventually won since in later appearances they were treated as stereotypical union workers who "don't go to the john without a work order".
* Another time they had a murder victim who was involved in construction. Van Buren snarks, "Construction. You've got fifty suspects before you do your first interview," alluding to the mob's involvement in that business.
* Another time, they tested what would happen if a truck was traveling at 60 miles per hour and a ball was ejected from the back of the truck at the same speed. It fell vertically from the point where it was fired. The forward motion of the truck and the aft motion of the ball-launcher cancelled each other out.
* Another time, they tried to build their own electric car and subject it to a series of tests. One of those was an endurance test where The Stig's environmentalist cousin will drive it around the track until the battery and the generator fuel run out. At some point, the exhaust hose for the generator comes loose and the exhaust fumes asphyxiate The Stig's cousin.
* Another time they were trying to get out of little league by losing, but the other teams were better at that until they rallied Stan's dad to get them disqualified by fighting.
* Another time this happened, Motoko casually strolls right past the security at the front door of a corporation. One guard asks if it's ok to just let her through without checking who she is, but his superior asks how he doesn't recognize
* Another time this is used is in Day 5 when Jack is set up for the murders of
* Another time, three guys open a mummy's sarcophagus and, instead of making a dramatic, ominous threat, the mummy casually says, "Ok, that's a curse on you, a curse on you and a curse on you."

* Another time, Tony tries to slap McGee; he dodges it while Tony gets one from Gibbs.
* Another time travel episode has another subversion: In this episode, you can only travel
* Another time, two head-carrying ghosts wander through the lads' flat and accidentally drop their heads, forcing the bodies to stumble around picking up round objects ("No, that's a grapefruit!") in search of them. Later, the ghostly heads are seen arguing about whose body is whose, and even
* Another time when Peter Parker was caught removing his Spider-Man mask on camera by Spencer Smythe's Spider-Slayer robot, Parker was able to later fool Smythe by appearing on camera again as "himself," and then
* Another time when Xykon is incapable of joining his minions in a hearty laugh (though in this case, with no crickets available, a demonic cockroach has to provide the cough).
* Another tiny nation that doesn't feature in the games is the Maratelli Free Cities. The Maratelli are a league of seven culturally-distinct cities, but their major commonality is that all Maratelli love the arts (and parties). This might imply their kinship to Renaissance Italy.
* Another Titan with parent issues, Roy Harper knows absolutely nothing about his mother. Literally nothing, other than he had to have had one. He knows his father died in a forest fire, but his mother was just never mentioned or never alluded to anywhere. The lack of information actually helped Roy break out of a
* Another TNA example was when Orlando Jordan's valet, Brittany, who turned out to be a fangirl of
* another to charge the club owner, so the father decides to kill the man and then gets shot himself.
* Another Tolstoy example might be Count Aleksey Nikolaevich Tolstoy, a distant relative of Leo Tolstoy. He fled Russia after the Revolution, but embraced communism and returned to the Soviet Union where he became one of Stalin's favorite authors and made major contributions to early science fiction.
* Another Tom, Tom Reagan, is the right hand of Leo, chief of the Irish mob in
* Another took a fancy to a handsome young man. After whisking him away to show him to another genie, she dropped him in Damascus, far away from his own home.
* Another took place on Smackdown in the summer of 2002, when Molly (still in her
* Another TOS episode, "A Piece of the Action", features something in between this and
* Another TOS episode, "The Mark of Gideon", had Kirk kidnapped by a vastly overpopulated planet who wanted to use germs in his blood to drop a Depopulation Bomb on
* Another tradition for honourable Souls PvP combat is to greet your opponent with a gesture, rather than attacking immediately. A player who begins their invasion with a courtly bow or friendly wave is likely to be there for a fair fight, as opposed to an anything-goes maulfest.
* Another trance master with many names: Lauren Veronnez, aka Airwave, Cloud 69, Cosmic Junkie, Green Martian, Lolo, Magnetix, Sagittaire, etc.
* Another Transformers: Prime example, "Steve/ST3V3 The Vehicon" was a nickname given to particularly unlucky vehicons across the course of the show. In the comics for
* Another trap is that in Japanese, you can add "so" to some adjectives to mean "it looks ..." For example, "oishii" means "delicious" and "oishiso" means "it looks delicious." But "kawaii" is an exception as "kawaiso" means "I feel sorry" or "pitiful" rather than "it looks cute."
* Another "Treehouse of Horror" episode ends with Homer being teleported to the real world with no visible means of returning. Thank goodness for the healing power side of
* Another "Treehouse of Horror" opens with the Simpson family cast as
* Another Treehouse of Horror segment had Homer accidentally invent a time machine whilst trying to repair a toaster.
* Another trick is to advertise how little fat/calories/etc. the food contains

* another trope quickly came into play when the brothel was attacked by anti-mutant extremists and all the workers but Stacy were killed.
* Another Truth campaign emphasizes the dangers of vaping and discusses how much more dangerous it is than smoking regular cigarettes. It's not hard to conclude that you might as well smoke cigarettes.
* Another twist is that the conflict is sharper and more personal between Kim and
* Another type of Brute that pops up occasionally in professional wrestling is the most physically imposing member of a heel
* Another type of finishing move has more flash and substance, and people would often question if the move actually hurt or not, although in the days where suspension of disbelief was strongest, these were often accepted by the audience.
* Another type of format like Treehouse of Horror so it's not even canon) introduces Grandpa's brother Cyrus, with dialogue to this effect (paraphrasing):
* Another UK advert aimed at soldiers returning from duty features the Grim Reaper—here he is portrayed as a 20-something man who is dressed in black modern clothes, is foul-mouthed and smokes cigarettes. In the advert, he first shows an elderly woman who has died and an obese man who is going to die and collapse after overdoing it while exercising. The advert then cuts to Iraq with a young British soldier called Tommy who later survives and comes back home, with the Grim Reaper stating how Tommy has got into the mindset that he is "indestructible", as he has survived Iraq. After watching him nearly have a collision with another driver (a woman with a baby) due to being on his mobile while driving (the grim reaper is unseen by Tommy or anyone else), the scene then cuts to later that evening when Tommy is out with his mates after drinking at the pub. Driving away with the music blaring, the Grim Reaper shouts "You're gonna die!" Moments later, the car veers off the road and smashes into a tree. As Death looks at the aftermath of the impact, he sees Tommy now dead on the ground and states, "Turns out he wasn't so indestructible after all." Checking out the wreck, one of Tommy's mates is still alive. The Grim Reaper states he will have to live out the rest of his life in a Wheelchair—"although it's better than nothing". Leaning against the wreck, he then looks at the camera and breaks the fourth wall, stating, "What about you? Fancy your chances?" The advert then warns that soldiers are twice as likely to have an accident as civilians, adding, "You may be tough, but you're not indestructible."
* Another uncomfortable topic to bring up in a religious discussion is that modern humanity is already sufficiently advanced to do things that would have seemed miraculous in the past, or at least, we have rudimentary technologies that demonstrate the possibility of that with a certain amount of development. In the 1800s finding naturalistic explanations of miracles was actually regarded as an *affirmation* of the Christian faith specifically, though the practice rapidly fell into disfavor again once churches realized that it sort of negated the need for a creator deity altogether.
* Another unfortunate diver, Yuri Lipski, was diving at a blue hole in Red Sea when something went horribly wrong and he uncontrollably sank to his death, his camera recording
* Another unintentional example is in "Club Spongebob" where Spongebob and Patrick say that Squidward can't fit in their club. Turns out they meant it literally.
* Another unintentionally hilarious example is in the earlier novella "What the Dead Men Say", in which it is commonplace for the dead to be frozen an held in a "mortuary" where a certain number of times they can be partially revived enough for friends and family to interact with their thoughts. As fascinating as his ideas may seem, it might seem a bit jarring to modern readers when the characters refer to telegraphs and electric typewriters.
* Another unique Game Over occurs if you die during the training mission:
* Another uniquely human trait is our ability to throw things with a reasonable balance of distance, accuracy, and power. It often gets overlooked because
* Another unique type are among the Tailies. They would've been alive at the start of the series, but are dead by the time any protagonist meets the Tailies. Such as Goodwin Tailie, who debuted as a corpse, then went on to guest star in 4 episodes

after that, each one in a flashback taking place earlier than the one before it. The only other dead Tailies named are Donald and
* Another unique variation had Dr. Cox and his ex-wife's brother Ben Sullivan almost kiss, with Cox breaking away with less than an inch to spare, Ben declaring "I am the king of gay chicken!"
* Another unit patch related nickname is the 1st Infantry Division. It's called "The Big Red One", because
* Another unmade episode that has yet to be named was about Batman infiltrating Blackgate Prison to stop a crime boss called Mr. Big from raising an army from inside the prison; in the end, Riddler would have saved Batman, saying that "as long as he can help it, a few lowly jailbirds won't defeat the Dark Knight."
* Another, unrelated, comic had two alien students spend the equivalent of spring break to tamper extensively with Earth's development - both humanity's progress as a species and the formation of the planet's landmasses. Why? So that, when humanity eventually takes their step into the galactic scene and officially joins the other races, the image of the planet would be shown to everyone - an image where the continents were shaped to spell out a rude and immature joke at the expense of their professor's wife. The aliens decide to outright
* Another unusual example from the Air Force can be found within some RED HORSE
* Another unusual immunity many bosses were given led to a tactic referred to by players as "belly-casting." Many named enemies and bosses were completely immune to all spells unless they were cast at point-blank range (belly-to-belly with them). This was particularly cruel when you take into account that most of these bosses also use powerful point-blank area-effect attacks.
* Another unwritten rule seems to be that the Avatar should learn the elements 'in order', starting with their natural element, air, water, earth, and fire. Aang tries to learn Firebending second, but that doesn't really work out, he also learns several elements at the same time, otherwise the rule is followed by Aang.
* Another urban legend claims that some men would avoid being drafted by sitting on a bottle. This would make them look an
* Another urban legend tells of a man who insured his cigars, and then claimed the insurance under the grounds that they were destroyed in a series of small fires (he smoked them). The insurance company paid...but then had him arrested for arson, since he deliberately set them on fire.
* Another urban legend tells of how, after mistranslating the phrase "finger lickin' good," KFC ended up advertising its chicken as resulting in the eater biting his own fingers off.
* Another urban legend was about a $100 book that told you how to make $50,000 in no time! The only thing written inside is: "Sell 500 of these books".
* Another U.S. attempt at policing the Internet "for the children" was the
* Another US DARPA project, the Pulsed Energy Projectile, used a "low" power pulsed laser beam to vaporize a small portion of the target's surface, causing a small explosion capable of knocking the target down. One side effect noticed in testing was that the EMP generated by the plasma that the laser impact produced stimulated pain receptors, and work was underway to amplify this effect.
* Another U.S. East Coast, detailing the various countries and the species that live there. It's nearly as complex and detailed as the one above — Canterlot, Ponyville and Cloudsdale are all rubbing shoulders in a tiny patch of the northwest of the map.
* another used to fill out its huge world, instead greatly increasing content density and variety within the smaller worlds. Other changes of the course of the series include: armors and outfits becoming less and less modular and customizable, spells and enchantments dwindling in numbers and variety, abandonment of mechanics like birthsigns (which granted passive bonuses and railroaded the status growths into a class archetype).
* Another use is the relationship between refined Roman tribune Marcus Aemilius Scaurus and his
* Another U.S. Vice-President who engaged in this was Spiro T. Agnew. He also liked alliteration. Instead of calling the naysayers 'naysayers', for example, he

called them 'nattering nabobs of negativism'. Many of these locutions were the product of the mind of his speechwriter William Safire, who would later go on to write the "
* Another 'utopian' example, is the city of Diaspar, the last bastion of humanity, in Arthur C. Clarke's
* Another v3 example is one that involves Lenny Priestly, holding Heath Trennoby hostage, has a gun pulled on him by
* Another variant: "A friend will visit you in jail, a good friend will bail you out, but a bro will be sitting beside you going 'Damn, that was fun!'".
* Another variant: A Scotsman visits Canada and is astonished at the sight of an enormous animal with a hump and antlers. "What sort of creature is that?" he asks. "That's a moose," his Canadian friend replies. The Scotsman is silent for a moment and returns, "If that's a Canadian moose, I dinna want to see one of your rats!"
* Another variant came when they realized that their initial suspect was being framed by her husband. Since both were lawyers, they couldn't inform the ADA without both the wife and the culprit finding out. This results in the detectives lying to the wife, the real suspect,
* Another variant found in on the East African Coast where the local Bantu culture is heavily influenced by Arab Muslim culture involves paranormal beings called "djinni" (English genies). The story typically takes the form of a beautiful girl who is picked up by cross-country truckers who are looking for some way to stay awake on their long journeys. At some point the truck driver will look over at his beautiful passenger and discover to his horror that she has goat's legs - like the god of mischief Pan. At this point the girl or djinni laughs and disappears, although in the worst case scenario, the driver is so shocked that he causes the truck to crash, which was the original intention of the djinni.
* Another variant happens in "Mr. Monk and the Magician." Monk's claustrophobia prevents him from getting into
* Another variant happens when a person gets "yes" when asking for a permission but is so afraid of being scolded for it by
* Another variant has a doctor's brain and a lawyer's brain asks the second person to guess which costs more. Depending on which side is the butt of the joke, the replies are, "Of course, because it has something useful inside." Or, "of course, because it has never been used."
* Another variant in Croatia is that a thief breaks into the house, and suddenly hears "God is watching you, God is watching you!". He looks around and sees a parrot. He asks parrot for a name. "Anđelko, Anđelko.". "What a silly name for a parrot!". A parrot responds: "God is a silly name for a Rottweiler.".
* Another variant in "Read it and Weep" when Rainbow Dash was running from the pursuing hospital security and comes to a river. Since her wing was injured, she couldn't fly and had to swing across on a vine. She runs, thinking she got away with the river separating them, until the pony security simply ran across the bridge nearby.
* Another variant involves a woman being woken up at night by an odd sound. She reaches toward the foot of the bed, where the sound originated, and when something licks her hand she decides it's only the dog and goes back to sleep. The next day,
* Another variant involves summoning the NCOs and officers above some prospective corporals or sergeants, and having the highest ranking one order the prospects to dig a trench five feet wide, ten feet long, and six feet deep. The orders get passed down and become six inches deep. The correct answer is to verify the orders from one's immediate superior, then shut up and execute.
* Another variant, in which the reporter has already been hit: In "The Big Snit", a short cartoon sponsored by the National Film Board of Canada, a breaking news report on a nuclear holocaust is delivered by a skeleton.
* Another variant is presented as part of the "Dark Fantasy" option in
* Another variant is "spark plugs for a KamAZ" (a diesel truck that does not have any spark plugs in it).
* Another variant is that the devil (or some trolls) has to complete the work before the rooster crows. Cue waking the rooster just before the last stone is set

in place.
* Another variant is the Green Dragon shot: espresso mixed with matcha. (You could add hot water to dilute it, but as it tastes utterly vile, you want to down it in one go.) Coffee has a fast burn - the caffeine enters the user's system rapidly, peaks sharply, and drops again, causing the user to crash. Matcha, which is whole green tea leaves in powdered form, has a gentler absorption curve and a longer-lasting effect. Thus, with a Green Dragon, the user gets a quick high from the espresso, a sustained effect from the tea, and a less-harsh come-down. A similar, less disgusting variation is dirty chai, a chai latte with espresso added.
* Another variant is the guy who's selling vacation homes by screaming "GET OUTTA TOWN!" at people.
* Another variant is the Mime, who can repeat the last action taken by an ally, no matter what it was, with no MP or item cost.
* Another variant— The character Kurt Hummel is so named because the actor who plays him,
* Another variant of this is "Go To I Know Not Where, Bring Back I Know Not What."
* Another variant of this is three drunken men stumbling around on railroad tracks: the first one complains "these railings are way too low", the second one adds "and these steps are way too far apart" and the third one finishes with "it's OK, judging from the noise, the elevator will be here shortly".
* Another variant of this is used later on, where there is a large, seemingly empty room in a factory filled with snipers, however the snipers won't spawn until the player is close enough, preventing the player from clearing out the room from a distance.
* Another variant on the "frozen" parrot story has the preacher coming to dinner and the bird letting out a whole bunch of dirty words right in front of him, so the man of the house decides to teach the bird a lesson. He puts it in a sack and shakes it up a little. When the parrot comes out it says "Wasn't that a hell of a storm!"
* Another variant on this uses the French term "Je ne sais quoi", which means "I don't know what".
* Another variation comes when Spider-Man has to deactivate Kang's time portal. JARVIS tells Spidey that the machine relies on Kang's "intuition," so Spidey decides to use his
* Another variation had Moe telling Lisa to go home in "Lisa The Skeptic".
* Another variation has the doctor tell the patient to put the suppository "in his back passage." The punchline is the same but suggests the patient left the supp on a table just inside the back door of his house.
* Another variation has the man have two brothers, Manners and Trash (a more kid-friendly version calls them Shutup, Manners, and Poop). Trash falls down on the side of the road, and while Manners is helping him up Damn You goes for help. After going through the routine and getting asked "Where are your manners?", he replies "Out on the road, picking up Trash!"
* Another variation: Idaho was never a full member, but played Sun Belt football during the same periods as NMSU.
* Another variation is that several men from some organization (usually the FBI) are each told to kill their respective spouse. The first few men can't but the woman goes through the whole chair-beating thing. An episode of
* Another variation is the elimination tag, where both members of a tag team must be pinned, submitted, etc before the match ends, with the first team to score a submission gaining a numerical advantage over the opposition.
* Another variation is used earlier. One of the bad guys says to Aeryn "He's
* Another variation is Western Athletic Conference football. The WAC had been a pretty good football league until an ill-advised expansion to 16 schools in 1996 led to more than a decade of turmoil, culminating in the WAC dropping football in 2012 after losing all but two of its football-playing members. The WAC managed to hang on to life by the skin of its teeth, and eventually picked up two new football schools moving up from Division II. The conference then started looking for more football schools, with a view to restarting its football league, this time in the

second-level FCS. It hit paydirt in January 2021, announcing that five schools with FCS football would join in 2022, at which time the WAC would reinstate football. But then they decided to move the relaunch of football to July 2021 once the Southland Conference, which had been home to four of the five new arrivals, kicked its departing schools out a year ahead of schedule.
* Another variation occurs in a late manga story revolving around the
* Another variation occurs in "Ping Pong at Sea", where Baboon travels to the ping-pong game by going into his small TV and coming out through a camera on the ship.
* Another variation occurs in the episode "It May Look Like a Walnut:" After a horror movie gives them both nightmares, Rob and Laura flip through the channels trying to find a show to calm them down:
* Another variation occurs with Maya, who (as Moroha's roommate) granted herself the title of his "body pillow". She's very protective of that status and is upset if Moroha sleeps beside anyone but her.
* Another variation of the joke gives the man the choice between a torture chamber with hot pokers and a room with a group of people enjoying a cup of tea while standing in knee-high excrement. The man chooses the latter option and steps into the room, expecting to be handed his cup of tea. Just then, the leader yells, "Right, lads, tea break's over. Back on your heads!"
* Another variation of this occurs in any episode involving capital punishment since there is no death penalty in Illinois, the state the show is set in
* Another variation on the trope — Hertz has been speculating about
* Another variation replaces the wife with the man's hated boss. The final wish: "I wish my boss's wife would fuck me half to death."
* Another variation takes place later in the novel. That same character, Anathema, has file cards with all of the prophecies from the Book printed on them and another character realizes that since the writer of the Book was such a perfectly accurate seer, they can just pull out a card at random and it'll end up being exactly the prophecy they need for their current situation because the writer predicted what card they will pick.
* Another version comes from Londo stating early on that, due a prophetic dream, he
* Another version didn't include the ostrich constantly agreeing with the guy. Instead, the guy was also accompanied by a cat who constantly refused to pay for anything; apparently, the guy had wished for a bird with long legs and a tight pussy, and to always have the exact amount money he needed.
* Another version: Garfield says he looked into Jon's closet and saw that two hundred moths committed suicide. Jon is regularly stated to still be a fan of
* Another version goes that everything was going smoothly until the shrink asked him what he thought was the value of a human life, to which Feynman responded "64". When asked why he picked 64 and not, say, 72, he replied "
* Another version had the condition that she be allowed to be alone, locking herself in her room, every Saturday or Sunday till noon, and the knight would never try to look at or visit her then. This was because she was cursed -by her mother!- to turn into a serpent from the waist down during that time, and did not wish him to know. All of her children were born with some slight deformity, but were otherwise brave, good, and fortunate. But the whispers that the children were deformed because they were not his became too much for the knight, and he spied on her. When she found out, she left him, never to be seen again.
* Another version has his wife decide for him that he will quit drinking: but she neglects to tell his brothers to quit drinking as well.
* Another version has it being a farmer's wife, and the Devil has to give her back to her husband for reasons not explained in the song. His response to this is "What will you give me to take her back?" Eventually, he gets his entire family protected permanently from the Devil.
* Another version has Santa Claus, an honest lawyer, and a talented country musician.
* Another version has the professor standing on a chair declaring that if God

exists, he should knock him from the chair. Followed by a student bodily tackling him and
* Another version has the same thing done with dramatic piano music that hits a bad note as soon as someone says something insulting, at which point the camera shows us that a person was playing the piano in the background.
* Another version involves only the genitals being fused together, and the boy is so traumatized that he throws up in the girl's mouth.
* Another version is that he had this code in a sealed envelope inside his capsule and he wasn't supposed to know it beforehand. Two different people told him the code on the launch day. Bonus points for the second one telling him the code just minutes before sealing the ship.
* Another version occurs in the episode "Blob's Incredible Plan", when Zordrak finds out that Blob, Frizz and Nug stole Urpgor's Mole-Mobile:
* Another version of Atlantis exists in ancient Greece in the original series. This one has the followers of Atlantis make April wear the amulet that makes her queen and resurrect Atlantis from the sea.
* Another version of mash-ups uses the sound from one trailer and the footage from another trailer/movie/TV show. An excellent example would be
* Another version, often told at Tanabata, is the lovers were banned from seeing each other for a year, since they were not getting their work done due to overly-enjoying each other's company. They were promised they could see each other, if rain didn't block off the bridge of stars. When it did, the magpies formed the bridge of their wings so that the lovers could be together for that one night. Tanabata, rainy or not, tends to be the only night they may spend together.
* Another version of the above myth has Balor's eye bashed out the back of his head, casting its deadly gaze on his own army. Needless to say, they didn't win.
* Another version of the story has the man break into laughter when someone asks him to give a ride with the bike, thus proving that he is not insane.
* Another version of the trick has the crook selling the "money making machine" to a sucker (answering the
* Another version of the US has this almost happen to it, with a popular Presidential candidate spouting slogans like "America for Americans" and advocating for the removal of all those who don't fit the American "genetic standard" (ironically,
* Another version of this story from another part of the US (possibly upstate New York) involves the ghosts of a young boy and a young girl who dart out in front of cars at night, trying to cause accidents.
* Another version of this story had Clairol attempting to market a product called the 'Mist Stick'.
* Another version placed the entire US retaliatory arsenal on Orion-powered ships operating as far out as the orbit of the Moon. At such a distance, it would be impossible to launch a surprise attack on the retaliation capacity and on targets on Earth (the missiles would take at least one day to reach the ships, which would be immune to any anticipated strike by a single warhead, since they could simply take the hit on the pusher plate and sustain no damage). In the even of an enemy first strike, the ships would proceed to make their attack runs to launch their own warheads in retaliation, secure in the knowledge that if they had received incorrect information, the fact it would take about one day to get into launch position would give plenty of time for the error to be detected and corrected (preventing an accidental first strike).
* Another version replaces the pastor with a gym trainer, and the woman with an attractive gym buddy and sexual favors... and also replaces Lena Hyena with a very large man, who is
* Another version says that the horse "counted" by hitting the ground with its hoof and stopped when its owner made a small nod — often without even realizing it, relieved that the horse had got the "right" answer. When the horse was put to count in a room without his owner, he kept on counting.
* Another version shows up in an episode where a young officer asks Colonel Potter for advice on writing a letter to the family of a soldier killed under his command.

Potter notes that he's written too many such letters himself and it never gets any easier.
* Another version that explains is that he got third because, while the mannerisms and looks were perfect, he didn't have a costume. (The contest was to be his Tramp Character. He was wearing his street clothes.)
* Another very common example is being driven to steal food and other necessities because you have no other way to get them. Given the choice of breaking the law, or death, most will prefer to break the law, and society is often responsible for the person's predicament in such situations.
* Another very important aspect of the magic is that in order to use magic you have to believe that what you are doing is right, which is why killing someone with magic is such a terrible thing—you have to believe that you have the right to kill them. This creates a psychological effect on anyone who uses magic to kill or tamper with the free will of another human, which inevitably leads to
* Another very influential and popular anime of the 2010s created by him,
* Another very literal example was with the Invenusable Flytrap. He literally
* Another viable strategy: using all the hardware space in your 'Mech's arms for
* Another victim, a teenager with a chromosomal disorder that makes her look like a young child, applies for emancipation to get out from under the thumb of her father and grandfather, who insist on treating her like a child even though she's almost eighteen. She eventually proves that she's smart enough to take care of herself, and the emancipation is granted.
* Another victim died when her murderer induced semantic satiation on the word containing her last name, and then asked her to sign an important contract. (The poison was carefully applied to the edges of the dictionary that the victim would touch upon looking up the word.)
* Another victim of the Ultramarine codex, Cato Sicarius, finally got redeemed in
* Another victim who deserves a special place is George Caron, the secretary to the Minister of Justice and Eva's earliest known
* Another video game example or five... any gaming wrestler who uses the Giant Swing is guilty of this too.
* Another video had Arin mention a friend who, when they were children, was given an assignment to write a joke to share with the class. Having blown off the assignment, he had to come up with one at the last minute. He wound up saying gibberish in the
* Another video has two people try to stage an intervention for Larry, who keeps doing this. He obliviously keeps doing it.
* Another video of the same author advises, in much the same manner, not trying to juggle a soccer ball while walking the tightrope between two skyscrapers.
* Another video shows multiple local news stations owned by Sinclair Broadcast Group saying the following phrase in unison. Not surprisingly, this inspired multiple conspiracy theories.
* Another villain from the same manga is Terunosuke Miyamoto and his Stand, Enigma. It allows him to store anything, from objects to people, into paper that he then folds up. Opening or ripping the paper allows whatever is trapped in it to escape.
* Another villain, Megavolt, is either insane or an electrical empath (both have been implied). He considers all electrical devices to be sentient beings, and many of his crimes revolve around "rescuing" or "freeing" his electrical brethren. He also gets rather upset when he goes through all the effort of setting them free and they just sit there doing nothing.
* Another was confined in a hidden room slowly filling with cold water in a
* Another was Grant and the kids bedding down in a tree, with Grant promising to stay awake and watch for dinosaurs.
* Another was that there are "ghost cars" that spawn in some precise locations and drive around without a driver. These "ghost cars" are just abandoned, wrecked cars that the game spawns in hilly areas. Since new cars don't spawn with their parking brakes on, they'll sometimes just roll down the hills.
* Another was the inspiration for the series SWAT had a detective put in charge of

the SWAT team making more and more mistakes, getting someone killed and eventually having a complete breakdown during a crisis. He then came back in another assignment.
* Another was the St. Louis Rams against the Tampa Bay Buccaneers. This color combination (Rams in bright yellow, Bucs in bright red) was dubbed the
* Another was used by Denethor, who was apparently unaware of the limitations and had Sauron manipulating what he saw through it. This drove him to madness and almost led to the loss of Gondor.
* Another way for a name to become popular was to have it be the name of a character in
* Another way for a planet to have extreme seasons is to have a highly eccentric orbit. This means variation in temperature that, in extreme cases, can be
* Another way of using a design students' orgasm on your album cover is by literally using an actual iconic painting or statue. Since many of the artists have been dead for centuries you have the advantage of not having to pay any copyright.
* Another way this could apply in college football during the pre-overtime years was for a huge underdog to claim a moral victory with a tie. The craziest case of this has to be the 1983 rivalry game between Oregon and Oregon State. It was the final game of the season and neither team had a great season (Oregon was 4-6, OSU was 2-8), but Oregon, the home team, was still placed as a 13.5 point favorite by oddsmakers. Oregon State managed to hold the Ducks scoreless. One problem, though: Oregon held the Beavers scoreless as well. The game was played in a heavy rainstorm and was an absolute comedy of errors for both squads. They combined for 11 turnovers, 16 punts and 4 missed field goals. Still, the 0-0 game was an odd triumph for OSU, all things considered. The game, now nicknamed "The Toilet Bowl" because of the excess water and lousy performances, was the last scoreless tie in FBS history.
* Another way this could potentially happen in real life is a detonation caused by a sufficiently large georeactor (a natural nuclear reactor inside a planet's core) exploding. One (fringe) theory as to how the moon formed was that such an explosion was what blasted the moon's mass into orbit.
* Another Way to Die does this with the lyrics crawling across the bottom of the screen.
* Another way to distinguish erotic films from porn is that most erotic films have some serious drama involved. The eroticism is meant to be enjoyed or provoke thought about relationships in general. Alternately, it can be meant to make some sort of an artistic or dramatic statement and can be served up alongside severe
* Another way to do it is to simply shut down the generator and casually stroll past it, though admittedly this makes for a less dramatic moment.
* Another way to read it is as a deliberate parallel to the Nazi party: everything from Palpatine being chancellor before assuming absolute power, to the name "stormtroopers" (the meaning of
* Another weak-heeled one was Talos, a giant bronze man who guarded Crete from invaders and was defeated by losing the nail in his heel that acted as a plug for the one vein in his body and promptly bled out.
* Another weapon that frequently shows up in odd places and times is the FN P90. Its futuristic looks see it, or weapons that are clearly based on the design, in the hands of plenty of far future armies, despite the weapon itself having been developed in the late 1980s. It also lands in the hands of an inordinate amount of terrorists and mercenaries, despite almost exclusive sales to special forces units, police SWAT-style units and presidential bodyguards.
* another, Weasel Boy tries to defuse a nuclear bomb in mid-air, only to find that all the wires are blue. Fortunately, the bomb crashes through the roof of a candy factory and lands in a vat of caramel without detonating, and with little incident other than the creation of a fairly amiable caramel monster.
* "Another Wedding Song" was originally written and performed by David Shire at his own second wedding to actress Didi Conn.
* Another, weirder instance had Mr. Garrison trying to describe the escaped lab mouse that was

* Another weird instance is Tyrande. The female Night Elf player model stands a few inches shorter than a male. Tyrande is nearly twice the height of the normal-sized Night Elf women standing near her.
* Another weird object that might exist in the universe are naked singularities, which basically is a core of a black hole, but without the "black" around it. If such an object is possible, physicists would be very interested in finding them because they could answer questions about how the universe works since they would be easier to study than a black hole.
* Another weird one was that a plot point in one of the Lije Bailey novels revolved around the incredible idea of robots with interchangeable parts. Then there was concern about robot brains controlling starships (especially warships), because it wouldn't occur to them that other ships contained humans.
* Another weird variation is that some black magic rituals get weaker, the more often they're used so the
* Another well-deserved (and expected) one Shinji gets occurs after he gets back to Asuka after
* Another well-known example is the guy promising to reveal the secret to never lose at betting on horse races. Of course, the rube receives a sheet of paper with the instructions, "Don't bet; then you can't lose."
* Another well-known example on Solomon Island is the Franklin Mansion. Over the years, it's had a long and sordid history of owners dying violently, often as a result of someone getting a good look at the original owner's occult library. However, despite all the ghosts in residence, the mansion is actually the safest place on the entire island, if only because the local monsters refuse to cross the threshold into the property.
* Another well-known typo was referring to "Minions of Set" as "Minionions of Set." Eventually,
* Another werewolf, Sergeant Angua, has a romantic relationship with Carrot, dwarf-raised human (and, in the eyes of his family, a dwarf himself). The books mention that relationships between humans and werewolves are usually extremely difficult, but they manage to make it work.
* Another: What's the difference between incest and necrophilia? Incest is relatively boring; necrophilia is dead boring.
* Another when Steve said to his friends he's dating an older woman (she's 80).
* another. When Superman walks into the Oval Office he exposits "Even this wasn't enough for you, Lex. You had to have it all. Now we're on the brink of a war that could destroy the whole planet." Lex—who appears to still be in a state of shock about his mysterious plans backfiring—ignores Superman and babbles to himself "Could have been so perfect! Paradise!" Then the conversation spirals out of control, and the scenario described in the above two paragraphs comes into fruition.
* Another when Videl saves a bus of senior citizens from a hijacking before "Great Saiyaman" arrives.
* another where the family escape by a bi-plane but somehow Meg get left behind. When Brian points this out, we see her fall over into the water with poison needles in her back.
* Another, while Akazawa does blame Misaki for causing the "calamity," which resulted in the deaths of their teacher and several of their classmates, because she didn't do her role as the "non-existent student" (someone no one can speak with or even acknowledge) well enough, Akazawa also takes responsibility for what happened. In the original novel and manga, she not only scapegoats Misaki, but also takes Sakakibara to task.
* Another "who's the father" plotline involves Gwen Stacy's children from the
* Another who uses slurs as a weapon to break people emotionally can say much about how insensitive or callous they are at their core and also hint exactly to the sort of failing they have. Someone who swears to a select group of people may be a racist/bigot. Casting slurs while in a position of power might be a sign of corruption of the person (or the entire institution!).
* Another Wild West example: Isaac C. Parker, a U.S. District Judge, presiding

over the U.S. District Court for the Western District of Arkansas for 21 years. He was actually nicknamed "The Hanging Judge" since he sentenced 160 people to death by hanging (156 men, and 4 women), 79 of which were indeed hanged. Time/Life treats Parker in a favorable light, claiming that he brought peace to a lawless territory, and, among other things, treated Indians as fairly as whites. According to Time/Life, the only reason he hanged so many people was that there was an excess of
* An otherwise forgotten 2019 Netflix film was responsible for bringing 2017's "Truth Hurts", and therefore
* An otherwise ordinary, inexpensive 1980's vacuum cleaner (complete with a tube connecting to a wide floor brush attachment) has autonomy and makes rounds in the house where Susie is staying in Japan, in
* An otherwise unkillable character (at least, at that point in the game) is intended to be escaped; throwing him in the water neutralizes him just as easily.
* Another Wodehouse example is "Corky" Corcoran, who lets himself get dragged into all sorts of schemes by his friend
* Another woman accompanies him on an endurance race in one episode. She is shown to have a past with Joe and is a pretty assertive and confident lady, showing off her skills with her
* Another wonderful moment of Screw You, Elves! occurs later in the second episode of the series. The Thundercats rush towards an army of lizards, who are wielding traditional medieval weapons, just like the cats: swords, bows, arrows, etc. The cats are dominating the battlefield... until the lizards bring
* Another Wonder Woman example: In '"The Once and Future Thing, Part I", Green Lantern, Batman and Wonder Woman are transported back in time to
* Another word, this time on US Tank Destroyer doctrine as used in WWII. A
* Another work which uses the sixteenth-century departure tradition is Kipling's
* Another World, but Interplay went ahead and made a sequel without Chahi's involvement, where you play as Buddy, and Lester, the original protagonist, dies near the end.
* Another World Does this to you in various forms throughout the game. You end up trapped in a cage early in the game, your gun runs out of power shortly after you find it and during the final moments of the game, you've been injured so badly you can only crawl on the floor.
* Another World has an example from the first moments in which you take control. If you leave the protagonist standing in front of the deep pool he was teleported into (and swam out of to avoid multiple tentacles belonging to an off-screen monster), you'll notice something appearing behind him. If you do not move despite this, the tentacle will grab him and drag him to a watery death.
* Another World in some countries) featured a computer whose monitor consisted of a volumetric display, and had cubic windows floating in its confines.
* Another World: In the game's intro, the protagonist, Lester, walks through the camera after he exits an elevator.
* Another World, Rachel Davis (late 20s) met and fell in love with Mac Cory (early-mid 50s). They were married three times each until Mac's death in 1989. Mac was even around the same age as Rachel's mother Ada Hobson.
* Another World, tentacle monsters with mouths embedded in the rock, falling rocks... Pretty much the ONLY thing not trying to kill you is your alien buddy.
* Another World, This happens to Lester's lab in the intro. The particle experiment goes awry, taking Lester and a sphere of space around him to a distant planet. This leaves exposed piping and missing wall and floor in his lab.
* Another World to deduce the correct order in which to push them in order to activate the vehicle's escape pods, though it's much easier to just hammer on every single button (which also activates the vehicles' mounted laser cannons) until the scene ends.
* Another World War II example, depending on who you ask: Patton's breakthrough at the Battle of the Ardennes (the Battle of the Bulge) is widely credited with rescuing the trapped 101st Airborne Division dug in around Bastogne. Of course, you'll get an argument from the 101st that they never needed rescuing in the first place...

* Another World was updated a few times already. These updated versions include:
* Another worship song: "Set a fire down in my soul that I can't contain, that I can't control. I want more of You, God. I want more of You, God." That's it for the whole song.
* Another would be the Miami Dolphins without Dan Marino, and the Buffalo Bills without Jim Kelly. The San Francisco 49ers managed to avert this after losing Joe Montana due to Steve Young proving to be a worthy successor, but became a straight example once they no longer had Young or Jerry Rice.
* Another would see one of the Stooges, when ordering food, ask for rotten eggs and burnt toast. When asked why, the answer would be "I've got a tapewoim and that's good enough for 'im".
* Another WoW example: One of their April Fools' Jokes was to introduce the Bard class, and depict him as a hair-metal guitarist whose abilities you invoked by playing notes on a
* Another wrestling example (albeit not as dramatic) was the strange incongruence of the voices of
* Another wrestling example is Wrestling Society X's Matt Classic (actually
* Another WW2 example, Operation Bertram. In the desert campaign, the British wanted to launch an attack against the Germans in the North while convincing the Germans they were actually attacking from the South. To this end, the British built a large number of fake tanks (disguising tanks as supply vehicles) while also disguising a lot of supply vehicles as tanks. However, the British knew to make the Germans really believe the British's fake attack from the South was, the British had to be caught making a deception plan that was attempting to hide the real attack that was coming from the South. To this end, the British set up a bunch of fake artillery pieces in the South made sure the fake artillery pieces were fake enough to be noticed as fake by the Germans but not so fake that they were obvious. Before the expected German attack on the fake artillery, the British swapped out the fake artillery pieces with real artillery pieces to drive back the attack. As expected, the Germans attacked the seemingly undefended position, were repulsed by artillery, and thought that the fake artillery pieces were really a cover for the real attack coming from the South, and prepared for a Southern attack. However, the British attacked from the North, which the Germans were unprepared for, winning the following battle as the Germans fell for the British double bluff.
* Another WWII example: A fairly anti-semitic Polish policeman, known in his town for arresting lots of Jews, was sweeping an abandoned ghetto with other policemen and the Nazis, looking for any hiding Jews. Seeing a ladder leading up into an attic, he climbed the ladder to find a Jewish mother and her children hiding there, picking them out with the light of his lantern. He could have gotten massive rewards and a promotion. But when the SS officer in charge called to him from below to ask if he had found anything,
* Another WWII example: The St. Nazaire Raid involved loading an obsolete Royal Navy ship with delayed-detonation explosives and ramming it into a drydock in occupied France. The ramming didn't go quite as expected, with the detonation not taking place at the expected time. Later the next day, while being interrogated, one of the captured sailors was told by a German officer that the damage inflicted by the ramming was minimal and easily repaired. Cue the massive explosion and the grinning sailor's reply of "We're not quite as foolish as you think!".
* Another WWII story tells of a soldier who tried very hard to pass as a civilian while in Europe. He got new clothes, a new hairstyle, learned the local language, etc. One day, while waiting on the curb with two bags of groceries in his hand, a German walks up and basically greets him with, "Hi, Soldier!" The reason? He had two bags of groceries in one hand, because the military ingrains the habit of keeping your other hand free to salute.
* Another xkcd strip land. Every day, Beret Guy drops by to chat: Cooper demands help getting down, Beret Guy asks if he's going to return his loot, Cooper refuses, and Beret Guy shrugs and continues his daily walk.
* Another X-Men example in Hellion. When he realizes he has a crush on Shark-Girl during

* Another X-Men example with Hellion, though he mellowed out considerably in the wake of Stryker's attacks on the school following M Day, after many of his friends were killed.
* Another X-Men mutant, Locus (this one a villain) likes to do this, or at least threatens to do it a lot (not sure if she's ever done so "onscreen").
* Another years, more than long enough to determine many of the rules that govern the curse. For instance, the curse only takes effect within the school's town. The one time a death appears to be an exception the actual cause of death was an injury that occurred before they even left.
* Another youkai giant is the Tearai Oni (no actual relation to traditional
* A notorious example occurred in January 2021, when GameStop was one of the most shorted stocks, particularly by hedge funds who were certain of the chain's collapse. This was noticed by a number of
* A notorious one is the "30 Day Rule", where a reigning champion must defend the title at least every 30 days. At this point, WWE has pretty much abandoned it, but it tended to only be enforced when
* A notorious tactic is the "scry and die", in which the player characters use divination spells to locate the
* A not-quite-as labor-intensive version was the fatal flaw/clue in a
* A not-so-PG advertisement — lingerie company Agent Provocateur had a handsome secret agent donning his L'Agent sunglasses and
* A not-so-rare real-life example is the infamous practice of getting a lover's name tattooed since it has a nasty habit of jinxing the relationship. Most artists have strict personal policies of what names they'll do (i.e. only the customer's children, pets, or a dead loved one) because they don't want an irate customer returning later and blaming them.
* A not uncommon condition. Many addicts, particularly alcoholics or gamblers can dress up and go to job which they lost months ago.
* A not-uncommon feature of nightmares, where the monsters often cannot be fought or defeated in any way — after all, it wouldn't be a nightmare if you actually
* A not very common, but not exactly unheard way to execute Christians, whose victims included: Saint Daria (apparently a former Vestal priestess) and her husband Saint Chrisanthus, Saint Paulina and her mother Saint Candida, Saint Irene of Egypt and her brother Saint Athanasius, Blessed Maria Dolorosa van Brabant, Saint Andronik of Perm,
* a not-very-smart crook steals cocaine from a courier, then asks around for someone willing to buy it. He's sent to the man whom the courier was working for, who finds it very interesting that he's being sold the exact amount of coke that's just been stolen from him...
* An Outcast in Another World are almost uniformly silver. Having non-silver hair color, such as Tarric's brown, is indicative of possessing Human ancestors. As Humans are despised in Elatra, this is not seen as a good thing.
* An Outcast in Another World are unnaturally dark and signify that you really, really shouldn’t go there.
* An Outcast in Another World between all nations eventually becomes The Scouring as both The Humans and the Allied Forces commit too many atrocities against each other for either side to back down. The Humans lose, although they go out with a cataclysmic bang.
* An Outcast in Another World: Elves, Dwarves, Dragonkin, Merfolk, and Harpies live in the continent of Elatra. Humans... well, they used to, anyway, before they all died.
* An Outcast in Another World first arrived in Elatra, everything tried to kill him. The indigenous fauna tried, the food tried, diseases tried, and the native locals tried. Things have gotten better since then after he made allies, but most things are still trying to kill him.
* An Outcast in Another World functions under these rules. A world with stats, Levels, Skills, and a system is all its inhabitants have ever known. Rob thinks it’s weird as fuck.

* An Outcast in Another World gets destroyed in the beginning and ending chapters of Book 1. In the latter instance, he ends up unwittingly giving some fanservice to women who were passing by. He doesn’t particularly mind.
* An Outcast in Another World have glowing red eyes which brighten when they come across as enemy – which is anything that breathes – or when the Infection spreads further in their bodies. Considering their horribly mutated forms, it’s by far the least-horrifying thing about them.
* An Outcast in Another World in defiance of the shit hand that life has dealt them.
* An Outcast in Another World is an exceptionally strong spellcaster for her age, but she hasn’t bothered boosting her HP or Stamina very much.
* An Outcast in Another World is ruled with an iron claw by the Dragon Queen. The world of Elatra is a borderline example of this, as while each race and nation is ruled by one of their own, none of them can truly go against the Dragon Queen if she puts her foot down due to how monstrously strong she is.
* An Outcast in Another World is somewhat normalized in Elatra, at least compared to Earth. Due to the RPG Mechanics the world is governed by, power is gained through killing, and that's trickled down to society at large. It takes Rob a while to come to grips with this.
* An Outcast in Another World is so strong that her whims shift international policy, as very few are able or willing to tell her no. The leader of the Elves admits that every leader of every race attacking at once might not be enough to beat her.
* An Outcast in Another World. It’s even worse coming from her, as she’s someone who outwardly dislikes him, meaning that she wouldn’t be offering advice at all unless it was for a very important subject that he absolutely needed to know about.
* An Outcast in Another World might interpret her as this. In truth, she’s as emotional as anyone, but her facial expressions are naturally subdued and subtle.
* An Outcast in Another World, most of the people in The Village survive the invasion by The Infected, but the area is turned into a Blighted zone that will kill them if they stay in it any longer, forcing them to relocate.
* An Outcast in Another World. Only affects animals, and horribly mutates them. The longer an animal has been affected, the worse, the mutations get, to the point where they become borderline Eldritch abominations.
* An Outcast in Another World. People that shunned him before even start to respect and/or suck up to him, which – while an objective improvement to his previous situation - leaves a bitter taste in his mouth.
* An Outcast in Another World, Rob is forced to fight a massive spider that’s continuously spawning smaller variants. As an Arachnophobe, he takes a savage glee in murdering it with excessive firepower.
* An Outcast in Another World. Rob notes that no analogue to the Geneva Convention exists in Elatra...which is part of the problem.
* An Outcast in Another World series that focuses on survival, characterization, and plot progression. The main character is kidnapped and struggles against horrible monsters and societal exclusion, determined to triumph over both.
* An Outcast in Another World snowballs into this for numerous reasons. Is an example of this trope being carried out successfully. This is an example where the trope succeeds, as the Humans lose the war, get pushed to the brink by the rest of the races in Elatra, and decide they'd rather take vengeance on everyone else then fade into the night. They proceed to
* An Outcast in Another World tries to go this route, begging Rob to kill him so that he can end his suffering and atone for the crimes he committed during The Scouring. Rob refuses to follow through, telling Kenzotul that true redemption would come from living despite the pain and working to make the world a better place.
* An Outcast in Another World wants to kill all humans out of anger and grief for when they murdered her family. The Elven Seneschal wants to prevent The Cataclysm from ever happening again. Many other people are just grief-stricken and need an

outlet for their sorrow.
* An Outcast in Another World was a magic spell that essentially launched hundreds of magical nukes across the continent. The results weren’t pretty.
* An "outer" character - who they appear to be to most other characters, and who they
* An outright heartwarming inversion of this is seen shortly before the climax of
* An OVA revealed that earlier in her career, Shana stole the identity of Junko Ogami when she suffered a
* A novel by Arthur Herzog portrayed global warming (well before most average people understood it at all) as rapidly transforming the entire planet into a desert, nearly boiling off the oceans before some
* A novel by Barrington J. Bayley included a weapon which worked by eliminating all of the electrons in a star, thereby rendering fusion impossible. A star hit by the weapon would lose about 0.05% of its mass and instantly go out. In
* A novel or two mentions a food-taster who has ingested so many poisons that he's not only immune to them but can recognize them by taste (very handy). He can also tarnish silver by breathing on it (not so handy). He reputedly eats a toad a day to stay in practice.
* A novelty song by the Glencoves from 1963 is "It's Sister Ginny's Turn To Throw The Bomb," which details an Irish family of
* A novel was planned that would have explained the humans as arriving through time and space from a troubled future Earth, but the project was scrapped before release. The
* An overeager and friendly saleswoman sees Hank and Peggy, thinks they finally have another child on the way and comments to Peggy that she's showing! The average built and athletic Peggy is not amused.
* An overgrown Little Italy. Everybody seems to know somebody who knows somebody who is "
* An overly-complex vocabulary was the major character trait of William Harper "Johnny" Littlejohn in the
* an overstimulated child", but he does have an excuse, based on both his 'birth' and biology.
* An overwhelming amount of electronic dance music (house, trance, techno, dubstep, etc.) contains intros and/or outros of just the percussion, which are primarily there for DJs to use for mixing. These intros/outros are usually removed for an artist's album and their appearance phases in and out of use based on current trends: as of 2012, many producers are reducing or removing their beat intros altogether.
* An overwhelming majority of animated series suffer from this trope, with those that aired in syndication or on children's networks more often than not quietly airing their final episodes, especially if the show wasn't one of the network and/or production company's more popular series.
* an overwhelming sense of jealousy. Her obsession with control, the past, and her inability to understand the responsibility she holds in her own life all stem from being jealous of someone else. On numerous occasions, she's given the opportunity to change, and fails to do so because of perceived slights towards her.
* A now-banned TV advert for sanitising mouthwash shows a hungover man, very much the worse for wear, coughing, gagging, and then vomiting up a very alive and very scruffy dog - the message being that morning-after breath is not nice to smell. The ad was discontinued after protests.
* A now-defunct British satellite channel that made heavy cuts to archive programming was ironically called Granada
* A now-defunct British telecoms company gave their employees computer user names consisting of their surname followed by their initials. They
* A now-discredited theory held that the Earth spun so fast in its early days that a globule fissioned off, forming the Moon.
* A now infamous episode in the fourth series involved comedian Kevin Bridges claiming he once
* Anpanman air on that network. The channel it actually airs on is Nippon TV.

* Anpanman are food-based characters, any character with a food theme of prepared food or meal is the master of making that kind of food. Multiple episodes are themed around two of these characters arguing about who's food is the best. However, the number one supreme chef in the series is Uncle Jam. His baked goods win over everyone that tries them, and the head of Anpanman himself is the tastiest food in the series thanks to him.
* Anpanman, despite their appearance compared to the other characters (especially in a world full of animals and object-headed characters), characters like Uncle Jam, Batako, and Dr. Hiyari are actually NOT humans, and are instead fairy-esque creatures. However, humans do exist in the Anpanman universe, only none of them are in Anpanland themselves.
* Anpanman died in October 2013 of congestive heart failure. However, the anime still continues being broadcast with new episodes to this day.
* Anpanman, Dokinchan, Baikinman's second-in-command, has a (very large and very obvious) crush on Shokupanman, one of the members of the breadheaded superhero team. He's a bit too conceited to notice her crush, though he treats her with a level of kindness that he doesn't show any of the other villains...besides Dokinchan's little sister, Kokinchan, who ALSO has a crush on Shokupanman (though hers is a bit more of a childish one, and she's treated as less of a villain by most of the cast).
* Anpanman edutainment OVAs, Horrorman rides through a department store in one, using a broom as an oar to push him around. He stops when he crashes into a fruit and vegetable stand, bringing down both him and the produce.
* Anpanman gets sustenance out of the red bean paste inside his head. However, when he was a child, he mentioned eating a good amount of food from a picnic lunch he had earlier.
* Anpanman has a head made of anpan, sweet bean bread. While he mostly fights crime in the usual fashion, he also flies around the world breaking off chunks of himself to feed starving animals and children. He's baked a new head by his kindly baker/creator/father figure every night.
* Anpanman has a head made of bread, which is his weak point. If he breaks of too many pieces of it to feed others, or his head gets wet, dirty, bruised up, or moldy, he loses his power. Once a new head is put on, he gains all the energy he needs again.
* Anpanman has had a couple racing episodes (one was a half-hour special, the other a theatrical short). Some vehicles were go-karts (by most of the racers, even the super heroes. Baikinman dressed as a mysterious racer in both episodes until his cover was blown), a few had bike pedal-powered cars (Creampanda, but he's a kid, so he can't drive. The Donburiman Trio, on the other hand, had Tendonman winning a bet, so the car gets to look like him, and he doesn't have to control it, while Katsudonman and Kamameshidon are forced under the kart controlling it), and even steeds (the cowboys using their horses/grasshopper (in Arinkokiddo's case)). Both times involved Baikinman using Dokinchan (and Horrorman at one point) to help rig the race.
* Anpanman has Omusubiman and Komusubiman, two rice ball-headed characters that travel througout the village, doing random good deeds when needed. Komusubiman's still a kid, so he still has a lot to learn from Omusubiman.
* Anpanman has the main villain Baikinman, a weird devil and fly amalgamation meant to represent an alien germ. His popularity has caused this hybrid design to become an ultra-common shorthand for germs of many varieties, including computer viruses.
* Anpanman has Uncle Jam's... thing... and Shokupanman's van, both of which can do, well, all sorts of things. Shokupanman's van has wheels that are basically extendable legs, and both vehicles can punch and jump.
* Anpanman himselfs gets this, either if Baikinman successfully punches him back, or just an inverse from flying.
* Anpanman himself will happily give pieces of his own head to the hungry, some characters aren't that willing. The Donburiman Trio, three characters with rice bowls for heads, have their contents basically as their brains. Baikinman, a big fan of donburi, will happily capture them and scarf down their contents. Luckily,

this only disorients them, leaving them weak, yet still functioning, and their heads can easily be refilled. Still, it's very unpleasant for them, so they avoid this at any chance they get.
* Anpanman is a golem made of bread (his head is made of bread, anyway... the rest of him is never explicitly explained).
* Anpanman is a living lipstick tube that loves to give the girls of Anpanland makeovers. Unfortunately, the dresses she gives them are a bit too flashy for everyday wear, and the makeup is this. However, at times, she can give an appropriate and beautiful amount of makeup with a less showy outfit (like she did with Dokinchan to make her look like a princess).
* Anpanman is an adorable wolf pup at all times. However, the full moon turns him into a gigantic monster that makes him go berserk. He never has recollections of what happens when he's in this form, only the damage that he has done. Various items can trigger this state, too, such as headlights or a picture of the moon.
* Anpanman is an alien germ that looks more like a human-esque fly. Because of this, he has two tiny wings on his back that he sometimes buzzes around with. As soon as the weapons on his UFO were fully established, he never used his wings again...until the episode "Baikinman and Baikin Castle", where, stuck on top of his fortress, he starts to panic...until he realizes "Oh yeah, there's that." when he sees his wings, as he flies off...but he comes back down when he's guilt tripped into saving the others.
* Anpanman is designed to have a simple and all-loving personality, so the characters he interacts with are able to shine through. Heck, most of the episodes featuring two characters interacting mainly only have Anpanman in it to get the two introduced and to end up saving them from Baikinman at the end.
* Anpanman — A series of animated children's films based on the long-running anime of the same name. 30 films since 1989.
* Anpanman, Rollpanna is already a superheroine, but with two hearts: a good one and an evil one. Being under the influence of Baikinman or being near Anpanman triggers her evil heart, which powers her up even more, but she can break out of it when by her younger siblings, Melonpanna and Creampanda. Sometimes, Baikinman uses dirty tricks to completely remove her good side, turning her into Black Rollpanna, a ruthless fighter that is even more powerful than when she has both hearts, and nothing stops her, not even her siblings, until both hearts are together. For these reasons, she prefers to wander the earth alone, in fear of her evil heart being triggered.
* Anpanman suffered hatedom as seen across YouTube videos. It's likely due to the shame from the older adolescent anime fans who want to redirect its popularity among others to other mainstream anime series'.
* Anpanman theatrical short, Uncle Negi, having left his basket full of green onions (which also contains his Naganegiman costume and sword) at the bottom of Princess Doremi's castle grounds, uses his scarf as a zipline...and promptly crashes face first into a tree at the bottom.
* Anpanman: The Baikins, despite being called "alien germs", are more insect-like than anything else. They have antenna (most have only one, some have two), most of the males have mandible-equse teeth structures, and a few of them have tiny fly-like wings that they can buzz around with. Their smaller minions, the Kabirunrun, look like vaguely bug-like blobs, having four arms and antenna.
* Anpanman, there's the Donburiman Trio. Because their heads are rice bowls (with the donburi contents acting as their power source), they can be refilled with different ingredients when their original ones are drained, which can change their personalities and powers, though they only last for one episode. Some examples include Tendonman being filled with tempura soba (giving him the samurai abilities that Katsuobushiman has), Katsudonman being filled with natto (giving him Nattoman's never-give-up attitude and agility), and Kamameshidon having tuna sashimi in his head (giving him Tekkanomaki-chan's ninja-like skills).
* Anpanman, there was a shot at the end credits showing off every character that had appeared in show since then. However, the cast has expanded to so many characters (and now holds the world record for most named characters in an animated

series!), that the amount seems tiny compared to now.
* Anpanman throws plain, uncoated mochi at her enemies. Thanks to having no coating, it's horribly sticky, sticking enemies (and sometimes others that attempt to copy her ability) to each other and gumming up Baikinman's robots. Since Sakuramochi-nesan's made out of mochi (and has very quick throwing reflexes), she can handle and launch it without any consequences.
* Anpu's eyes start glowing red just before he delivers an impressive
* An RAF pilot flying during the Battle of Britain found himself on the tail of a German fighter but out of ammo. As they were now flying at treetop level, the RAF pilot maneuvered his aircraft directly above the German's. Seeing the belly of an aircraft virtually within arm's reach above him, the German pilot reflexively tried to dive away to avoid a collision, and in doing so plowed into the ground.
* An recurring sabotage was making an entire prep/cook station out of a shopping cart. So not only does the chef have to do their prep work on/in a shopping cart, they have to cook on it too.
* Anri reveals that she may be Midako-sexual too, and this love isn't influenced by a Yandere
* Anri Sonohara is an inversion; the most notable thing about her is her
* Anri was a commoner, and it's said that Artemis cursed the Fire Emblem before dying, calling it 'the end of war, but also the end of love'.
* an ROH legend, you'll actually get to see it... he went back out the door after four more dates but it was nice while it lasted.
* Ansaksie plays with this trope: she has a body count competition with Iji, except the goal is to keep the numbers as low as possible.
* anschluss, and very nearly led to Scotland seceding in 2014. In practice, Northern Ireland tends to copy-paste most laws directly from the English and Welsh equivalents as the English/Welsh and Northern Irish legal systems are broadly similar in most important aspects; whereas Scotland tends to make a few more changes due to having a more diversified legal code.
* Ansei", and the forces of the Yokudan Emperor, Hira, who was attempting to consolidate power by eliminating the Ansei. After urging from his son and fellow Ansei, the legendary Frandar Hunding reluctantly led the "greatly outnumbered" forces of the Ansei against the corrupt Yokudan Emperor Hira. Frandar and the Ansei were victorious, but were considered "red with blood" by the citizens and chose to self-exile to Tamriel following the conflict. (Yokuda itself would be "sunk beneath the sea" not long after.)
* Ansei, or "Sword Saints",.) While the Ansei came with the Redguards to Tamriel, their numbers dwindled over time. There hasn't been a known Ansei warrior since the 2nd Era, and by the 4th Era, they are considered a myth.
* Ansei when he finally fell in battle against the giant goblins of Hammerfell.
* Ansel's penthouse is "Uptown, way uptown". Literally, by taking the subway that leads uptown, way uptown.
* Ansem in the original game: you defeated him as a boss at the end of the original game? Sorry,
* Ansem Retort abusive beatings that he jumps at the chance with Yuffie.
* Ansem Retort, after Aerith gets drunk during her bachelorette party and almost cheats on Axel, Axel, Zexion, Darth Maul and Larxene hijack an airplane and crash it into the cheatee's house. The aesop?
* Ansem Retort and Axel and Zexion's 'Spock diet' consists of force feeding blended babies to Sora.
* Ansem Retort and Jesus, so any minor plot hole pretty much means nothing.
* Ansem Retort Ansem Retort. She was killed off in the first season and replaced by Aerith, who more people associate with the show nowadays, especially since her wedding was broadcast on it.
* Ansem Retort, author Duke said that his least favorite character in the strip to write for was Xemnas. Xemnas was a straight laced villain who didn't seem to realize he was in a comedy webcomic, and that made his dialogue very difficult.
* Ansem Retort became increasingly more popular in Ansem Retort, to the point that Season 3 revolved entirely around him. Nearly everything in the comic ends up

focusing on him and/or Axel
* Ansem Retort can be played, and there is apparently no real way to beat her. However:
* Ansem Retort declared that if he slit his wrists right then, it'd be "the tastiest suicide EVER."
* Ansem Retort. Everyone in the series has figured out that he's gay, and when he finally announces it, the only reaction is being told that this is less interesting than Seinfeld re-runs.
* Ansem Retort explains most everything with "It's supposed to be insane, stop thinking about it, it doesn't make sense, don't even try to reason it out." This seems to be working somehow.
* Ansem Retort fits this trope, big time. The fact that she's also addicted to crack, PCP, crystal meth, and nearly every other illegal drug in existence makes it worse.
* Ansem Retort. For the most part, backgrounds for that game are used for scenery. There are two instances of a background being repeated:
* Ansem Retort, frequently typos and, unlike some other webcomic writers, never goes back and corrects them. Not all but quite a few of these are of the Rouge Angles of Satin type.
* Ansem Retort. Granted he doesn't fight with a medical motif, but he is a heartless killer, so he counts.
* Ansem Retort hit by this so frequently and so heavily that at this point his brain makes pumice look solid.
* Ansem Retort involves Axel burning down an orphanage, then a courthouse.
* Ansem Retort isn't outright enthusiastic about an act of violence.) He may be a mass murderer who will kill you sooner than look at you, but dammit he loves his wife.
* Ansem Retort kills a random passer-by right after being told he has diplomatic immunity. Subverted when Namine lectures him for immediately abusing it; Axel hadn't even heard, he just wanted to kill someone.
* Ansem Retort: Larxene. She's a homicidal version of this, once nuking Disney World because she couldn't get free Funnel Cake.
* Ansem Retort neither character has left the comic. Hell, Axel's forgotten sometimes that he has mind bullets.
* Ansem Retort, of all people, has a big book of war and is considered one of the greatest tacticians in history. When the characters open up the book, here's what they see:
* Ansem Retort stopped updating during what seemed to be the climax of Season 8.
* Ansem Retort talks this way so that people will be under the impression that she knows martial arts.
* Ansem Retort. The next time we see them, they've... resolved their tension.
* Ansem Retort: The team time travel to find Jesus for the hangover cure when they get drunk.
* Ansem Retort, when Axel is about to begin training for a Murder-off.
* Ansem Retort when Xemnas revealed that his manipulations in time moved the Nazi occult experiments from 1940 Germany to 1831 Rio de Janiero. When Red XIII asked why they didn't just go to 1940 Germany in the first place, Xemnas realizes that he made his plan unnecessarily complicated.
* Ansem Retort, where it can't affect anyone else and is effectively neutralized. Anyone that could be considered "white" usually ends up killed or, like Sora, incapacitated.
* Ansem Retort, Zexion, after being cornered by two werepires, proudly declared to Sho that he banged the Contessa, flipped them off, and said: "I shall die as I lived: a complete and utter tool". Granted, Axel intervenes and Zexion survives, but still.
* Ansem Retort. Zexion almost quoted the trope name verbatim when Axel decided to kill everyone that didn't tell him where Larxene was quickly enough.
* Ansem Retort: Zexion made a new heart for Riku out of bendy straws and a Hot Pocket.

* Ansem Retort, Zexion named his penis "The Torrent". Axel named his Jack the Ripper. He also named his testicles Slashy and Stabby.
* Ansem Retort, Zexion used the "you're a towel" strategy against Cid. Aerith noted it was the rich man's "your mom" joke.
* Ansem, Seeker of Darkness, aka Xehanort's Heartless, is in fact a Heartless himself, but retains all of his human intelligence and selfhood; the real Ansem the Wise theorizes that this is because Ansem/
* Ansem, Seeker of Darkness is a played-with villainous example. While he doesn't have the lack-of-health-and/or-defense you typically see in characters of this trope, he still favors hit-and-run
* Ansem/Xehanort's Heartless introduces himself: "It is I, Ansem, Seeker of Darkness."
* Anshin in Japanese (kanji: 安心). This is why they only make defensive/healing products like shields and the health packs.
* Ansige Karamba The Glutton", Ansige eats an extraordinary amount of food at each sitting. One day he eats a young goat by himself and then tries to steal the chief's sheep. On other days, he eats enough roasted corn and millet dumplings for twenty men and still wants more. Nothing ever satisfies him for long.
* Ansige Karamba The Glutton", when his long-suffering wife Paama finds him in trouble, Ansige crossly tells her not to act as though she didn't know him. At the end, she refuses to return with the words, "Don't act as though I didn't know you."
* ANSI Standard Broadcast TV Schedule - What US stations typically broadcast
* Anson MacDonald, Caleb Saunders, John Riverside, Leslie Keith, Lyle Monroe (
* An SUV commercial touted its 5-person capacity by showing two couples and one single guy on a camping trip, with the guy pretty much isolated from every activity the entire time. It came off as slightly depressing, rather than being cute or funny.
* An SVU episode had this happen to a boy that had accidentally shot a classmate when he was trying to kill some gang members that he thought were about to try and kill him. When the real story comes to light, he's acquitted and forgiven, but another kid kills him because "You can't just kill a sister and get away with it", in his words.
* Answer 1: He's a normal Breakthrough, an ordinary human who gained extraordinary powers in a
* Answer 2: A dying villager had a Breakthrough in his last moments and created a physical manifestation of the guardian
* Answer Cut: A character asks a question, and the next scene shows the answer.
* Answer Cut - A character asks a question or makes a statement, then the scene shifts to the answer.
* answer her riddle before letting them continue on their journey. If they failed, she ate them.
* Answering a riddle wrong in the contest of wills with the mind trapped Rakata will also lead to the screen going black
* answering machine outgoing. Later in the episode, Jerry, who tried calling George but got the machine, found himself singing the song while unloading his car.
* Answering the question your boss gives you in the beginning (whether to kidnap the ugly queen or the princess) wrong (as in, "we'll kidnap the queen") 64 times will lead to a female thief storming into the room to tell you to stop messing around already and answer the question correctly.
* Answers to the Name of God: Someone with a high opinion of themselves assumes that a person exclaiming "God" was referring to them.
* An Tachibana is a more straight example, trying to slap males twice to call them out on their behavior. The first time, Atobe catches her arm and
* Antaeus is the son of Poseidon and Gaia. Gaia is Kronos's mother. Kronos is Poseidon's father. Truly, Greek myth knows no limits.
* Antagonist Abilities: How or where you get your powers determines your morality.
* Antagonist Abilities: Villains tend to have much more raw power than heroes, forcing the latter to get creative.
* antagonist and would lead hell's army against humanity. While a turned Gordon

(says he) planned to kill himself after killing Sam, along the way he killed to feed, killed newly-made vampires, killed the hunter he was working with, nearly killed Dean, and turned a young woman as a distraction.
* antagonistic brother Zeldris, who both share similar stature. He's in love with a taller vampire named Gelda.
* Antagonistic Governor - A governor (or the universe's equivalent) that serves as an antagonist in the story.
* Antagonistic Governor: An evil, corrupt politician who's in charge of running a provincial or regional government.
* Antagonistic Governor: The corrupt leader of a sub-national (provincial/regional/state) government.
* Antagonistic Offspring, is completely scentless, rendering his legendary sense of smell useless.
* Antagonistic Offspring: The villain is the hero's own son or daughter.
* Antagonistic, with both characters trying their level best to out-intimidate the other.
* Antagonist in Mourning after the entire town he tempts is exterminated by the Nazis. He ends up trapped without future victims, as his evil depends upon luring people away from good, making completely evil people of no use to him.
* Antagonist in Mourning: A villain grieves a hero's (real or apparent) death.
* Antagonist in Mourning: I may not like you, but it's sad to see you die.
* Antagonist in Mourning: The bad guy feels sorry for the hero's death.
* Antagonist in Mourning: The villain feels sorry for the hero's death.
* Antagonist in Mourning to honour a Foundation agent that he considered a worthy opponent after the agent had died.
* Antagonist is a high decorated marine officer trying to get justice and recongnition for men fall in blacks ops under his command.
* antagonists in the main story. Nobby and Colon are "old-school" coppers. Their preferred method of policing is to pick a bridge or a large stone building and guard it for the duration of their shift so no-one can steal it. Their entire approach to police work is Seinfeldian.
* Antagonist Title. The Knight even tells him how stupid that plan is.
* Antagonist Title: The title of the work also happens to be the name(s) of the villain(s).
* Antagonist Vlad Masters amassed his entire fortune primarily by using his ghost powers, largely
* Antagonize a member of a faction (by petty theft, trespassing, pickpocketing) in
* Ant and Dec and accused of trying to copy them. Ironically, many of the comparisons aren't by Ant and Dec fans, but by people who dislike them and therefore conclude that anyone remotely similar to them is exactly like them.
* Ant and Dec and gave her a box of chocolates... which they'd already eaten. Then turned down a second date with her.
* Ant and Dec in 2013. A week later it was Number 1. It only managed Number 9 the first time round in 1994.
* Ant And Dec resembled Big Ant And Dec interviewing somebody in a faintly rude fashion.
* Antarctica 88 escaping from an underground room and fighting his way through an ice tunnel. Chapter two flashes back several hours to show the events leading up to that.
* Antarctica 88 finds an axe near the start of the game. It can be used to chop through the boards covering a hole in the side of the garage, as well as enemies (though it take a few swings).
* Antarctica 88, only they stand more upright, and their mouths have four flaps as opposed to five.
* Antarctica 88's father Vladimir Efimov was doing research at before everything went silent.
* Antarctica in its prehistory was actually quite the strange place. It was lumped with Australia to form Gondwana and boasted some truly unique forms of prehistoric life. In some ways, it was akin to a real-life

* Antarctica Online and Aleksandr Gromov kicks off with the continent mysteriously swapping places with a number of islands in the Central Pacific. Interestingly, the authors are less concerned with the cause of the "jump" than the consequences, both ecological and political (mostly, the latter).
* Antarctica. So many things make this place this. From four month summers and four month winters, places that look similar to Mars, hurricane winds that constantly happen with category 5 winds happening once every winter, green lights constantly appearing, it is one weird place.
* Antarctica, that appear to have traces of fossilized germs in it. While not proven, it is possible that some life on Earth is foreign based, and if there is life on other nearby planets and moons, it could be Earth based. This idea is called panspermia and some extremophiles (resilient bacteria that go into "hibernation" when stressed) could be living on other planets such as Mars and moons such as Europa or Enceladus.
* Antarctica world, secret communities in Antarctica are carrying out piracy and environmental terrorism in order to discourage mining and oil exploitation.
* Antarctic bases tend to use the time zone of the places their supply flights take off from. So some of them use daylight saving
* Antarctic Journal clearly wants to be an Apocalyptic Log, but since the guys who find it don't really read much of it, and the pictures are vague, it fails in its attempt.
* Antarctic Press they presumably fell out of sync with each other, and the crossovers effectively stopped.
* Antares believe that it is impossible for two sentient species to coexist, so they save time by attempting to exterminate the humans on contact.
* Antares is set on a planet of the same name, orbiting the star of the same name.
* Antares novels. Apparently, most settled planets are homogenous - either they all came from one region on Earth, or they blended after a while. The only planet that is not homogenous is Earth itself. That said, different planets will have different dominant racial types. Altans and Sandarians are white, because their ancestors were mostly European, but other worlds have different ancestries. There is almost certainly one planet that is all black.
* Antares novels by Michael McCollum, the Ryall aliens refer to humans as "Monsters".
* Antares novels have the Antares Nebula - a highly radioactive supernova remnant. After two years of research (not to mention a lot of money), the good guys develop a radiation shield that can handle it, enabling them to transit the nebula.
* Antares novels is probably the antimatter projector, which fires a continuous stream of antimatter. Not only is it pretty much unbeatable, but it's standard armament for both human and alien blastships.
* Antares of these against Sandar. The purpose is to overwhelm planetary defense computers — oh, and to cause destruction on an untold scale.
* Antares series practice arranged marriages, befitting a monarchic society like theirs. Crown Prince Philip was betrothed at the age of three. Fortunately, he and his fiancée have fallen in love by this point.
* Antares, The Ryall are a subversion. They attack the human race on sight, clearly intent on genocide. Yet when captured, the Ryall do not seem evil. They are not driven by any sort of religious dogma. They simply believe that it is impossible for two sentient species to coexist peacefully. The root of this belief is that, on their homeworld, they fought and wiped out a species of sentient amphibious sharks.
* Antares trilogy are a classic example of the instinct-motivated Xenophobe: throughout their early development, they were preyed on by another sentient species, until they went to war and wiped the egg-eaters out. They see other intelligences only as competitors and feel a deep need to kill them all.
* Anteaters, aardvarks, sloth bears, echidnas, regal horned lizards, throny devils, armadillos, woodpeckers, frogs, toads, sloths, sloth bears, and pangolins are this trope for ant and termite "cities". As hilariously pointed out
* Anteaters tend to have mouths at the base of their snouts, instead of at the tip. Their snouts will also be flexible like an elephant's trunk. Anteaters will

also be portrayed with large ears, possibly due to being confused with aardvarks.
* Antebellum America: The uproar over U.S. immigration authorities removing migrant children from their parents has been compared to the separation of slave families, one of the issues that turned public opinion against slavery in the run-up to the Civil War. Progressives decry a Supreme Court decision on racial issues.
* Antebellum America, where many preachers and lay Christians became radical anti-racists and abolitionists and played a key role in setting the stage for the end of slavery in America. John Brown was the most famous, repeatedly carrying a Bible and a gun, and marching for abolitionism until his doom at Harper's Ferry. Notably Brown was so firm in his convictions he refused a Chaplain's service in his final hours when he learned that said Chaplain supported slavery. Unfortunately, the pro-slavery forces were in many cases equally militant about being Christians.
* Antebellum but then the protagonist's story of doing exactly that (long enough into the plantation's existence to make it seem like a whole different world) could never have happened.
* Antebellum grabs her from behind and starts throttling her before knocking her unconscious by slamming her head into the window.
* Antebellum inside the burning shed—the building used to cremate the bodies of the slaves—and then lights the fire underneath it.
* Antechinus to raise the next generation of females and sex-suicidal males.
* Antediluvian, with significant cost to themselves, with neutron bombs and orbital mirrors when all the other groups failed (though they did weaken it enough for the Technocracy to do so).
* Antelope qualifies. She is described as having a list to port, ragged sails, leaks badly enough that the pumps have to be run all the time, and her cannons are described as being both cracked (indicative of being poorly cast) and having a low shot weight (4 pounds in an era when even small warships often carried 12 or 18 pound guns).
* Antena 3, Spain's second biggest network, tends to use Thursday nights as its particular death slot, largely due to having given up on competing against rival Telecinco's highly-rated reality shows (and also against TVE's
* Antena 3. The situation eventually calmed down; now they "only" show two hours.
* Antenna Adjusting: Due to improvements in television transmission and reception, especially if your country's made the switch to digital media, TV antennas are both obsolete and utterly useless.
* Antennae are less common than horns, but they sometimes act as this. They’re more justifiable than horns as erogenous zones, given that antennae actually are sensitive.
* Antenna TV classic TV digital subchannel. Digital subchannels like Antenna TV have sparked a resurgence of interest in over-the-air TV programs, particularly among "cord-cutters" trying to avoid paying through the nose for satellite and cable TV programming.
* Antepiece: A small piece of level design that is not in itself very challenging but gives players a clue about how they should respond to a bigger challenge that's just around the corner.
* Antero Vipunen, is for two to don their Fu Manchu Mustaches and play out "a traditional Chinese good day's greeting", after an announcer has informed the audience of how very very polite Chinese people are, and how meeting an equally polite fellow Chinese can lead to prolonged... situations. The point is to go as long as possible, one-up each other at every turn with ever more flowery phrases, and bow constantly very deep. (The book is from the 1930s if not older.)
* Anteverse kaiju ended up on the receiving end of this — in addition to the Jaegers, they also had to deal with various other human mecha, in addition to all the heroic kaiju in Godzilla's faction. The couple of examples we're shown reveal that the Anteverse bunch didn't stand a chance.
* A.N.T. Farm, Angus, introduces himself to her as her boyfriend. She may have lost her memory, but not her mind, so she doesn't fall for that one.
* A.N.T. Farm: China Anne McClain, Sierra McCormick, and Jake Short appeared in every episode of the show. Carlon Jeffery missed many episodes of Season 1 and 2

before leaving the show. Stefanie Scott missed a few episodes as well. Aedin Micks missed three episodes during his tenure on the main cast in Season 3.
* A.N.T. Farm: China does this after being "accepted" into the cheerleading team in "ParticipANTs".
* A.N.T. Farm curly fries." Cue Fletcher sitting next to her with a tray of curly fries.
* A.N.T. Farm: Darryl takes a job as Mall Santa to spy on Roxanne and figure out what she got him for Christmas so he can know what to get her, as well as appointing Cameron as his elf. They both end up fired when their cover is blown, and the manager later hires Lexi as the new Santa and Paisely as the elf. While Paisely seems to enjoy the job, Lexi finds her Santa costume to be her worst nightmare.
* A.N.T. Farm episode, "MutANT Farm", while the older students are humans, all of the ANTs Are Monsters:
* A.N.T. Farm episode "the ANTagonist", in which Fletcher's initial attempt at filmmaking turns out to be one of these films.
* A.N.T. Farm friend Paisley says she has to deliver an invitation to someone named " iX37" and assume its a robot. When Lexi sees the name, she realizes that Paisley had the envelope which says LEXI turned upside-down. When she tells Paisley its addressed to herself, Paisley replies, "I didn't know my best friend was a robot!"
* A.N.T. Farm Happens on the episode entitled "ClairvoyANT" to Cameron, Principal Skidmore even sets it up by saying this person has waited patiently through ceremony while everyone else won at least one trophy. But instead, it's Skidmore herself who wins the award.
* A.N.T. Farm has Fletcher immediately liking Paisley whenever the latter notices him. Examples are in the episodes "TransplANTed" and "ManagemANT", but luckily, Chyna doesn't seem to mind. Doubles as a "just for his adorableness" pedophilia in Paisley's part.
* A.N.T. Farm: In one episode, Cameron has to make a 1000-words essay about his father's job, so his father drives him with his police car. Cameron finds the job boring until his father catches a criminal, to which he exclaims "Wow, my dad is a hero!" Cameron thinks this sentence doesn't contain enough words for an essay, but his father says that a picture covers 1,000 words, so Cameron takes a picture of his father with the criminal for the essay.
* A.N.T. Farm in the episode "TranplANTed", when Chyna wants to get her lunch from her locker and eat in the cafeteria, and Olive tells her its not safe for them out there.
* A.N.T. Farm in the second to last episode. They did go on a date in "SignificANT Other", however.
* A.N.T. Farm in this episode, is very quick to recognize him as an imposter and unmasks him.
* A.N.T. Farm of course it's unlikely that their talents alone would allow them to skip grades. The ANTs are teen geniuses in their individual specialism but not in a more general sense.
* A.N.T. Farm: Olive (who is wearing a black outfit) and Fletcher (who is dressed as a cat) both do this when they, along with Chyna, are caught by Chyna's dad.
* A.N.T. Farm: Paisley, who sometimes forgets that her name is Paisley.
* A.N.T. Farm skipped several grades due to his artistic ability, but he thinks snow angels are dead snowmen.
* A.N.T. Farm: Someone with the name Dorian Bannister works at Z-Tech.
* A.N.T. Farm sports pigtails as a part of her little girl disguise on the episode "FraudulANT".
* A.N.T. Farm) - the nickname for Chyna-Fletcher shippers. Olive-Fletcher shippers are called Folivers.
* A.N.T. Farm uses Webster High for the setting of most episodes. Justified as the premise of the show is gifted middle school kids attending high school. It has lockers, one main hallway with a large staircase and at least a couple of minor hallways. It also has a science lab classroom, Home Ec, the Ant Farm (which is where the Ants spend at a lot of time), and what looks to be a makeshift

auditorium. Only a few episodes take place entirely outside of school and that was during their summer vacation.
* A.N.T. Farm when Chyna talks about how entertainments like movies and shows have to pay to use the song, and stops Olive from singing it and tells her that she knows how it goes. Lexi also does this to Paisley later on in the same episode.
* A.N.T. Farm, which implied that she wished she wanted to get a chance of fully loving Fletcher. More worse considering it's the 2nd to last episode, but luckily averted in the finale where Fletcher and Olive (her friend) broke up as well as Fletcher stays in New York, but even then, Chyna still never gets a chance to love Fletcher.
* A.N.T. Farm with Chyna (China Anne McClain). Justified because her character is a musical prodigy.
* Ant/Giant-Man and the Wasp at around 3.66 meters (12 feet) tall, and Wasp was still her usual 163 cm (5'4).
* Anthem (2019), humans use several-story-tall robots both inside and outside of Fort Tarsis.
* Anthem (2019) plays Amal, the bartender, and Joe Lo Truglio plays the town gossip Neeson.
* Anthem books are becoming increasingly common in the U.S., especially in Red States.
* Anthem Legends: Exodus" serves to highlight the number of samey open-world games being made, often with identical systems, gameplay, and story.
* Anthem of a Reluctant Prophet describes a few of these from a first-person perspective. It turns out that when the titular prophet foresees a death by gunfire, he actually feels the bullets. Ouch.
* Anthem reducing Dixie Carter's sharings to 5%, literally reducing her influence in the company, after finding out, along with
* Anthem: The house the protagonists find in the mountains is largely untouched by the centuries since the Unmentionable Times. Not only are the glass windows intact, but so are the previous owner's clothing and library.
* Anthologies of children's songs can be particularly egregious offenders. So you've got 2-3 minutes of song to fill, but your verse is only 10 seconds long? No problem, just sing it again, and again, and again... No need for alternate verses or even variations in the music. Then repeat the process with more songs until your disc (or worse, multi-disc set) is full.
* Anthologies of Ullord starts off with her father effectively selling her to Shadi to pay off his debt. Shadi then becomes her guardian and raises and protects her (despite her having been a teenager when they met). And a few years into her adulthood, her friend/servant-like relationship to Shadi becomes romantic and sexual after she presses for it. And they remain a couple afterward.
* Anthology: A collection of stories that follow the same genre or theme but are otherwise unrelated.
* Anthology and they can inherit his house. He discovers the truth when he finds the freshly-dead carcass of his dog, which they'd secretly killed and claimed had been "put down" months ago.
* Anthology Comic joins the original four super-powered schoolchildren after the strip has already been running for a few weeks.
* Anthology Comics the characters often read the comic in which their strips appear.
* Anthology Comic which consists of normal English but with words replaced with "um."
* anthology, contrasting with the supernatural monsters in the other segments.
* Anthology Film are framed as stories being told by an uncle to his young nephew who refuses to go to sleep otherwise.
* Anthology Film includes a segment called "The Toothbrush", about a killer electric toothbrush.
* Anthology Film snow demon, appears and is watching the woodcutters as they stagger through the blizzard.
* "Anthology of Interest I": A giant Bender is attacking the city, so Professor

Farnsworth enlarges Zoidberg to fight it.
* Anthology of Interest II", Human!Bender starts off naked. There is an above-the-waist shot of his body, and Hermes rushes to cover Bender's crotch just as a lump starts growing.
* Anthology of Interest II" This precedes his request to see what it would be like if he was human.
* Anthology of Interest II", when Leela comes to after the Professor knocks her out pulling a lever on the What If machine, it's revealed that he planned to harvest her organs while she was out cold but she woke up before he could. Hermes insists that he can try again next year.
* Anthology of Interest, Leela murders Hermes, and is trying to dispose of the corpse using the food disposal. Bender enters, leading to the following line:
* "Anthology of Interest" which asks the question "What if Leela was more impulsive?" she actually murders every member of the cast (except Fry, who she seduces) starting with Farnsworth, who she throws to his man-eating anteaters.
* anthology series shows a family of monsters getting together to watch the eponymous show on television.
* Anthony "A-Log" Logatto; A-Log gained notoriety for his commentaries on Chris-Chan's videos, and would also wish harm towards Chris for, among other things, "giving autistics like him a bad name". Despite this, there has been no indication by Chris as to knowing who A-Log is.
* Anthony Anderson as the Burger Shack employee who... makes the special sauce extra special.
* Anthony, Antimony's father, is so quiet and reserved that he comes off as rather cold. Around his best friend Donald, however,
* Anthony Bault took up the reins of a (relatively) well-known Fan Verse called Arcadia. It's loosely based off the "Captain N: The Game Master" theory, that all the game universes (
* Anthony Boucher from the future, who seems to have the idea that Earth had a single unified language, so his sentences are nearly unreadable mishmashes of English, French, Latin, and who knows what else.
* Anthony Boucher's story "Barrier" has an entire future society that speaks "Farthingized" English, named after the author of the (in-story) book "This Bees English". All irregular verb forms have been eliminated, as have articles, and pronouns no longer indicate case. Same thing haves happened to other remaining major languages. It bees actually illegal to speak irregular English, enforced by police ("Stappers", from "Gestapo" ... story beed written in 1942).
* Anthony Bourdain and Andrew Zimmern have both swallowed beating snake hearts on camera as part of their Travel Channel shows. (See below.)
* Anthony Bourdain. He once told a cheftestant that his dish "tasted like a head shop."
* Anthony Bourdain — at the end of his shift he would take the whole lot home with him.
* Anthony Bourdain often caused a bump in business from non-locals for a restaurant he praises.
* Anthony Bourdain's Hungry Ghosts: "Deep" stars a Kappa that kills a chef sexually molesting his apprentices.
* Anthony Bourdain's Hungry Ghosts involves a wealthy Russian billionaire hosting a banquet for his rich friends in New York. After dinner is finished, the guests and the billionare's disgruntled kitchen staff play Hyakumonogatari Kaidankai, a Japanese parlor game where they all tell horror stories by a mirror and one-hundred candles, blowing out a candle for every finished story.
* Anthony Bourdain's. She'll appreciate it." One final rant, and then she gets the clapboard in front of her face. Once the clapper comes down, she's her normal smiling self again.
* Anthony Burch revealed that "Handsome Jack" was a placeholder name for the main antagonist until he'd figure out something better, but the voice acting sessions used this name, so it stuck as well.
* Anthony Burgess combines Cyrano's best friend Le Bret with his Captain Carbon de

Jaloux in his adaptation of
* Anthony Burgess', heterosexuals are discriminated against while homosexuality ("It's sapiens to be homo!"), self-sterilization, and eventually even cannibalism are responses to overpopulation and limited resources.
* Anthony Burgess's short stories, Shakespeare and Ben Jonson are discussing the new King James version of the Bible. Jonson mentions that the initial choice for translator thought Genesis should begin with "In the initiality of the mundane entity the Omnicompetent fabricated the celestial and terrene quiddities."
* Anthony Burgess was his first wife Lynne's beating by a gang of drunk American servicemen stationed in England during World War II. She subsequently miscarried.
* Anthony Carmine (whose name is a shade of red) is a rookie squadmember who is the only main character to wear a helmet which covers his face. He's also the first squad member to die in the game (and actually one of the only two characters who die), shot in the head by a sniper after the first couple of levels. His Redshirt status was
* Anthony Clark people say we don't suck!" and "Oklahoma: Trees are made of wood!"
* Anthony Colicchio, one of the Western District cops in Carver's Drug Enforcement Unit squad beginning in season 3. He enforces drug rules by brute force, eschewing any subtlety or understanding of the streets, and sports the soldier's mentality that Major Colvin decries as detrimental to good law enforcement. He increasingly goes off the rails in seasons 4 and 5, becoming more brutal and aggressive. The final straw is when he attacks a school teacher who is just politely asking him to move his patrol car out of the way so the teacher can get to work. Carver is disturbed by Colicchio's complete lack of remorse and refuses to cover for him, writing him up for excessive force and conduct unbecoming a police officer.
* Anthony Collichio is a Western District plainclothes officer who takes the soldier's mentality to policing that Bunny Colvin decries as detrimental to the job. He's played by Benjamin Busch, who is a United States Marine Reserve Corps officer.
* Anthony Daniels' voice for C-3PO got a bit higher pitched following
* Anthony Daniels was originally intended to only be C-3PO's suit performer, but his performance was so charming that he was allowed to also do the voice. Remarkably, decades later the same thing happened with Ahmed Best's portrayal of Jar Jar Binks.
* Anthony Eden insisted the UK was not at war with Egypt and was merely in "armed conflict".
* Anthony ended. Part of the surprise came because the strip (unlike the rest of the comic strip examples) was drawn by a woman.
* Anthony Hope, despite Rudolf's unhappy ending, this trope is hit on for another character:
* Anthony Hopkins and a murder plot. He comes out of it all pretty well.
* Anthony Hopkins gave up drinking in 1975 after waking up in a hotel room in America with no idea how he got there.
* Anthony Hopkins. He knows all about survival, but only from books, and finds himself having to put his theoretical knowledge to use when his plane crashes in the woods. It serves him surprisingly well.
* Anthony Hopkins in the BBC TV show, during the climax, was mostly like this.
* Anthony Hopkins last for roughly fifteen minutes. It is an iconic villain role that made him famous and spawned a sequel and a prequel with the actor.
* Anthony Hopkins play Californios (Hispanic Californians), a father and daughter.
* Anthony Hopkins, respectively) despite bearing little resemblance to the real man.
* Anthony Hopkins revealed in 2017 that he was diagnosed with Asperger syndrome, but "high-end."
* Anthony Hopkins was so in awe, he couldn't bring himself to call him Tony, and insisted on addressing him as Sir Anthony throughout the shoot.
* Anthony Hopkins, who specifically demanded to be given the full picture of his character as a condition after he was initially sent scripts with a lot of blacked out lines.

* Anthony Horowitz, an old lady uses a sat-nav to lure delinquents to her factory where she makes them into meat puddings to sell. It's implied this is an extremely profitable business.
* Anthony Horowitz has a woman struck by lightning and killed while using her mobile phone. The phone's next owner, a teenage boy, soon starts receiving calls on it from beyond the grave.
* Anthony Horowitz novels by actually making a fictionalised version of himself the titular detective's sidekick, accompanying Hawthorne on his investigations.
* Anthony Horowitz series, Scarlett, has powers over the weather, including the wind. This first manifests itself when she unconsciously brings down an awesomely powerful hurricane onto the Necropolis and, with concentration, is able to lead her friends through it unscathed.
* Anthony Horowitz's when he is introduced to Logan Fairfax, who is to teach him the finer points of automobile racing in preparation for his next assignment. He ends up with neither woman, who instead pair up and leave for America together at the end of the first act. Somewhat of a downplayed example; it's clear James' and Pussy's relationship has nearly run its course, and while there is certainly some mutual attraction between Logan and James, she is extremely hesitant to pursue a relationship with him. Consequently, the degree to which either woman could really be considered James Bond's "suitor" is up for debate.
* Anthony Horowitz. The first thing Alex does in space is bang his head after getting up too quickly. At one point he gets stranded in the middle of a room and has to throw his shoes to propel himself in the other direction (equal opposite reaction etc). Later he throws a hammer at an enemy, expecting it to drift slowly - instead it zooms across the room and hits the guy very painfully on the shoulder.
* Anthony Julius handled a libel case for her that she later hired him to handle her divorce as well. The story goes that when Julius tried to tell her he was a libel attorney and this would be his first divorce case, Diana replied, "That's all right, this will be my first divorce."
* Anthony Kiedis revealed in his autobiography that the music video for "Jungle Man" was shot on a $200 budget of their own money, composed solely of footage of the
* Anthony Laciura, who plays Eddie Kessler, is a voice instructor and opera singer. He displays his talent in "What Does the Bee Do?" and "All In".
* Anthony Lane at the New Yorker has a strange talent for looking at action movies and seeing endorsements for fascism. Take a look at his reviews for
* Anthony LaPagila was the producers' first choice to play Capone but couldn't due to schedule conflicts.
* Anthony Marston, a young, carefree, attractive man, ran over two children in his car. He's the only member of the group who actually directly killed an individual, though he did so unknowingly; the murderer kills him first because Marston himself isn't haunted by guilt, and the killer
* Anthony "Master" Le was a fitness consultant who started building his own
* Anthony Montgomery (who played Travis Mayweather) was a fan of the
* Anthony Padilla and Ian Hecox of Smosh fame voice them in the original version.
* Anthony Perkins much more shocking. Alas, this gambit was so successful that Perkins ended up being typecast as Bates for the rest of his career.
* Anthony Price, does manage to fit in a theme of series protagonist David Audley acknowledging it may be time to pass the torch to the younger generation, but a lot of ongoing plot threads — in particular, Audley's ongoing rivalry with the Russian spymaster Panin, and a story arc about a possible highly-placed Russian sleeper agent — are left dangling.
* Anthony Price's thriller novels form a sequence set in the present day (i.e. the 1970s and '80s, contemporary with when they were written), but four of them are prequels set in the 1940s and '50s, exploring the roots of the main sequence protaonists and the organisation they work for.
* Anthony Quinn—which is appropriate, since his character is a brutish lout that abuses her.
* Anthony Quinn played Greeks, Portuguese, Arabs, Ukrainians, Jews, Englishmen,

Italians, Latin Americans, Eskimos, and just about everything else you could possibly think of. In reality, he was a Mexican with significant Irish ancestry (hence the name).
* . Anthony Rogers is exposed to radioactive gas in a coal mine and remains in suspended animation for 492 years. When he wakes up he discovers that America has been invaded and conquered by the Han.
* Anthony's Hitmonchan does this to Ash's Pikachu when Ash attempts to capture him before finding out he belonged to Anthony.
* Anthony's, is portrayed as being a needlessly vindictive harpy toward Liz, openly expressing discomfort whenever Anthony even tries to speak to her for a few minutes. Her rudeness seems bad, except... well, it's obvious to anyone reading between the lines that there's still latent attraction between the two, which is confirmed when Anthony asks Liz to "wait for him" when the marriage seems to be going south. Unusual among examples in that Lynn Johnston later devotes a few weeks to strips explicitly making her sympathetic — it's in these that we find out that Anthony and her parents pressured her into having a child when she really didn't want one, and that she had suffered from post-partum depression after the birth.
* Anthony Stewart Head and how despite him playing a supernatural expert when preparing to host the show realized he had next to no knowledge of the topic, so conducted research to do a better job.
* Anthony Stewart Head in order to incorporate the character's mild stutter. This was such a hassle that Head declared he would never play a character with a speech impediment again.
* Anthony Sullivan is a fan of Jaboody Dubs and enjoys the parodies of his infomercial, even making a cameo appearance in one of Jaboody's non-dub videos. According to him, Billy Mays originally hated it because he thought they were making fun of him but over time, came around and enjoyed it once he realized that it is supposed to be affectionate.
* Anthony Swofford, the protagonist (and autobiographical author) of
* Anthony Trollope) is portrayed as more pitiable than creepy. She isn't into it, though, and ends up with a guy closer to her own age.
* Anthony Trollope Melmotte fits the stereotype, but the definitely Jewish Mr. Brehgert is arguably the most honorable character in the book.
* Anthony Trollope overheard some people discussing the latest installment of his novel, which was being published a chapter at a time in a magazine. One reader said, "I wish he'd kill off that horrible old woman!" Trollope interrupted to say, "That's an excellent idea. I'll kill her this afternoon!" (The same story is told about Charles Dickens and some other popular authors of the day.)
* Anthony Trollope series (long) was adapted into a twenty-six episode miniseries (also long) only to be novelized again in a single volume (very, very short).
* Anthony Trollope, the elderly hero's daughter marries the secondary hero. At the beginning of the second book, he's died and left her with a baby-and enough money to be pursued by multiple suitors.
* Anthony Trollope, this is the main problem for Ayala's sister Lucy and her suitor Isadore Hamel, a sculptor who refuses to compromise his principles to make money, despite the attempts of Lucy's uncle to convince him to do so. He's ready to marry her despite his lack of money; though Lucy's sensible uncle prevents this until Ayala's suitor gives him some money and he achieves some more success.
* Anthony Trollope used the omniscient observer voice. However, in one novel, he interacted with the characters slightly by declaring that he once caught one of the characters fibbing.
* Anthony was also this with Thèrése, a lovely and cultured French-Canadian woman.
* Anthrax album by noting in an interview that "The bottom line is, everyone in this business is in it to make money. Myself included."
* "Anthrax" by Gang of Four features two vocal tracks. One is a typical set of anti love lyrics. The other is (largely) this monologue:
* Anthrax, complete with the twelve-string acoustic and the tortured bridge that

were stereotypical of the hair bands of the time. There was a line in there about "I didn't mean to hurt you / or sleep with all your friends..." and it ends with the couple reunited just before she gets hit by a truck, to which the singers start mock-sobbing and asking for tissues.
* Anthrax has a version with their "A" interposed with the pentagram (though their typeface is much better known);
* Anthrax, is an obvious example, given that it's a tribute to Judge Dredd. The trope's name is cited in the lyrics:
* Anthrax. Joey was resistant to prodding from the others to alter his vocal style for the album; Scott Ian said, "I hated what he was doing and at the same time it was like we were pulling teeth to even get that out of him."
* Anthrax, opens with a fake emergency broadcast alerting listeners that the bodies of the dead are rising from their graves and attacking the living. A message eerily similar to the intro of the song was delivered by pranksters when the EAS was hijacked in Montana in February 2013 and used to deliver a fake message stating the same message as in the intro of the song.
* Anthrax's "Caught In A Mosh" includes the line "Shut up shut up I don't want to hear your mouth."
* Anthrax. When small but dedicated minority managed to score an unusually high amount of votes for "Lone Justice", it was included in the album...as a hidden track. And they placed it after the final track and the reversed version of "Lone Justice".
* Anthro debuted in #74 (May, 1968). He was supposedly the first Cro-Magnon boy born to a
* Anthropic Principle: Scott Perry is a ridiculously perfect husband and father: kind, wise, patient, and loving to his wife, his large and diverse brood of children, and his close friends. So naturally he dies of a terminal cancer in the pilot episode. Of course, his death is the central premise of the show: his three closest male friends come together in the titular Council to help his wife and children however they can. It would seem that he was so perfect that it would take at least three normal men to replace him...
* Anthropic Principle would just happen to be around to solve the incredibly byzantine murder that someone's committed close by, but if he or she wasn't there you wouldn't be able to enjoy watching him or her solve the mystery in the first place.
* Anthropocentrism is this trope as a philosophical belief. It holds that human beings are the most significant entity in the Universe and that the well being of humans should come before everything else. Environmental Ethicists often criticize it for the root cause of environmental disasters, but Anthropocentrists argue that protecting the environment is in humanity's best interest as well.
* Anthropologist Kate Fox describes English complaints as falling into three mostly ineffectual categories: griping to someone who's in the same boat as you; shouting abusively at someone who isn't really responsible; or going home and writing a strongly worded letter to whoever's in charge.
* Anthropologist, poet, sculptor and Mexico scholar Robert H. Barlow got started in these interests as a child, isolated and homeschooled in the Florida swamps. He is probably best known as a friend (and literary executor) of
* Anthropology 101 is that "all men are monsters who crave young flesh".
* Anthropology: Although long-extinct in Equestria, human society and inventions greatly influenced pony society — almost every tool and device used by ponies was first developed by humans, and consequently Equestrian society is filled with things that don't make sense for horses to use (such as round doorknobs, or string instruments almost impossible to play without fingers) that exist as holdovers from the previous human culture.
* Anthropology, Discord turns Lyra back into a pony. However, this allows Lyra to use the necklace Princess Celestia gave her to return to Ponyville and gather the Elements of Harmony.
* anthropomorphic and bumbling into doing his evil deeds. They ironically seem to be the only villains to meet their demise at the end of the film.

* Anthropomorphic Animal Adaptation: The adaptation changes human characters into anthropomorphic animals.
* anthropomorphic crackers. One of these cracker characters is named Xtreme.
* Anthropomorphic Food, which is a dark, cold place littered with the remains of half-eaten food and zombified corn coming out of turds. This dark, cold place is no more than the pavement of a central street in a busy city so human locales are just as amplified in the eyes of food as humans themselves.
* anthropomorphic fox-like's short story "The Stone City". They are constantly telling protagonist Holt that they will find him a berth on a ship and allow him to leave the planet "next week" (they seem to take sadistic pleasure in denying him). Finally he meets one who tells him he can get a berth on the ship he arrived at Grayrest on immediately...provided he can get a signature from his missing and presumed dead captain. This infuriates Holt so much that he strangles the dan'lai to death in a fit of rage and has to go into hiding in the titular Stone City...
* anthropomorphic frog form) hits his head on a tree branch while dodging one of Ganon's magic blasts and is knocked out cold. Instead of finishing him off directly, Ganon summons two giant Deeler spiders to do it before taking Zelda to the Underworld without waiting. But when Link wakes up shortly afterwards, his newfound frog instincts unexpectedly take over and he eats them, much to his disgust.
* Anthropomorphic Personification against Discord for over five hundred years because she and those blessed with her power (namely the Changelings) are the only ones capable of effectively fighting him.
* Anthropomorphic Personification: A humanlike sapient being (often a deity or spirit) that acts as a living embodiment of some sort of concept in human society or the natural world.
* Anthropomorphic Personification by forcibly ripping out pieces of The Book of Destiny (which, basically, is Destiny in book form; the book contains everything that has or will happen in Creation) and burning it.
* Anthropomorphic Personification circles, humanity tends to get personified as... a human. This gets a little awkward in situations where concepts on a larger scale get turned into people like planets or countries, leaving the personification of the very source of their form to be a little out of place (and often having the larger scale personifications wondering what they're supposed to be based off of).
* Anthropomorphic Personification Fate and The Lady (i.e. Lady Luck), so the position on the scale largely depends on who's winning at the moment.
* Anthropomorphic Personification included deifications of concepts such as joy, plenty, order (Ma'at) and the king/Pharaoh's false beard.
* Anthropomorphic Personification of dreams and storytelling, is obviously aware of it, although perhaps more in an academic sense than anything else.
* Anthropomorphic Personification: Of greed, winter or cannibalism, depending on who you ask.
* Anthropomorphic Personification of the nothingness before Creation. It is not only older than the universe, it is older than the universe before that and the one before that, stretching back to the Beginning.
* Anthropomorphic Personification of Time, although Susan is one quarter anthropomorphic personification by adoption herself. Said anthropic personification of Time is also the son of a different anthropic personification of Time with a human man.
* Anthropomorphic Personification of Time is described as old, not for humans, but old like darkness and stars.
* Anthropomorphic Personification: Rare but not unknown to appear; personified Fates and Months can intervene.
* "Anthropomorphic personifications" and "gods" overlaps; one god even complained that to live on Dunmanifestin, you'd have to be an anthropomorphic personification (which is obviously not literally true, but maybe it often applies). In addition, there's really no evidence of non-god personifications like Death having more power than a real god or even equal to one, although they can probably always do their job no matter what it would require. The real distinction, if any, is that while

gods may phase in and out of worship,
* Anthropomorphic Personifications depending on their actions during creation. (Some myths state that the Aedra come from the mixed blood of Anu and Padomay, while the Daedra come purely from the blood of Padomay).
* Anthropomorphic Personifications in an animistic world, this comes up constantly. The corebook also discusses an infectious laugh (it spreads to anyone who hears it, and makes them keep laughing until they pass out from lack of oxygen), and one of the supplements contains this little gem:
* Anthropomorphic Personifications of death and rebirth, and the knowledge of how the afterlife works may give them a radically different perspective on the whole thing.
* Anthropomorphic Personifications of key universal concepts, such as Eternity, Infinity, Oblivion and Death, could arguably qualify, since they always exist so long as the universe does and when a new one comes along will exist in that one also, so though they do ultimately die when it ends they may also be reborn. Each of them are aspects of identical entities who operate on an even grander multiversal scale.
* Anthropomorphic Personifications of time, seem to be like this, taking the form of large floating heads, though Father Time has been "seen" more often as a disembodied voice.
* Anthropomorphic Personification. So it is the personification of Evil, or at least discord, destruction and chaos, and destructive impulses.
* Anthropomorphic Personifications, only after being reminded a few times, and can't remember any of the details, but is fine with it, since she doesn't care, anyway. She simply wants to do what she always does—play, fly around, and pick fights to see if she'll win. Downplayed somewhat in that she's relatively young at less than a human's lifespan, as well as more intelligent than the average fairy. Simpler fairies have absolutely no sense of self-preservation whatsoever.
* Anthropomorphic Personification's Philemon, who empowers the protagonists and sets them in the path to fight against the darkness. Mind, he's no saint himself...
* Anthropomorphic Personifications to maintain the balance of the universe. Partially subverted in that since the Time Lords are themselves SAA's, the Guardians are not wholly beyond their comprehension. The Doctor and Romana refer to the Key as "Guardian technology" and the Doctor is seemingly able to keep the Black Guardian at bay by fully-activating the defense systems of the TARDIS.
* Anthropomorphic Personification strengths and weaknesses. Strife agreed, and the two nations ended up signing a peace treaty.
* Anthropomorphic Personification to come in and take over, just by acting like the sort of person who would be running a huge conspiracy.
* Anthropomorphic Personification to meek little girl and Billy up to a bully (though he's still stupid). She later decides she doesn't need the nerve and returns to her usual state while making the nerve vacate Billy's brain.
* Anthropomorphic Personification, wears the classic Grim Reaper outfit, a black robe with a hood. So does Death of Rats (at rat size, naturally).
* Anthropomorphic Personification who has no intention of letting her prey escape, and she knows that she is far more powerful than any mortal, but she at least fights battles personally instead of wiping her foes out instantly, because she believes every being has the right to prove itself and fight for its survival. When she's not being an antagonist, her usual duty is to help populations survive by engineering situations that force them to improve and grow stronger. She is disgusted by beings who wantonly kill without giving the victims at least a chance at survival, saying that spits on her Concept.
* anthropomorphic pig proudly displaying a roasted pig's head. Both the cook pig and the pig head in his frying pan wink at you.
* Anthropomorphic Transformation: A normal animal is turned into a more anthropomorphic form.
* Anthropomorphic Typography: Anthropomorphic letters, numbers, music notes, and other typography.
* Anthropomorphic Vice: Addictive substances are personified or anthropomorphized.

* Anthropophagus — Splatter series. 2 films and a pseudo-sequel since 1980.
* Anthros And Dungeons, Mickeal the anthro white male bear and the male gray wolf drink from an enchanted pool and switch to females.
* Anthro where the title character is just lying back and eating a drumstick while he watches two prehistoric girls fighting each other over the right to marry him.
* Anti-Advice: It's best to do the opposite of what this person tells you to do.
* Anti-Air as antiship missiles since the Talos in the 1950s, and in fact used Standard missiles in such a role during the Tanker Wars in the Persian Gulf. Effectively, this means that any enemies within 50 miles or so would face a barrage of dozens of supersonic missiles. While such missiles have relatively small warheads, modern warships tend to be relatively unarmored.
* Anti-Air attempt to destroy the radar stations quickly would only warn the Iraqis that the Coalition was attacking. So Coalition leaders elected to send a force of attack helicopters at very low altitude across the desert to strike the targets.
* anti-air capability (the Zerg Queen and Protoss Sentry being closer to vehicles and much less expendable).
* Anti-aircraft artillery are not necessarily rapid firing machine guns. Once miniaturized radar systems were developed, it was possible to put proximity fuses in pretty much any cannon shell turning any fast-traversing high-angled, long-barrel, high velocity cannon into a potential AA device. The US and UK deployed many warships with 5" and 5.25" dual purpose guns, every bit at home with shooting down bombers and blowing up enemy warships. They also used huge batteries of 20mm, 40mm and, late in the war, 76mm automatic cannon to tear up kamikaze aircraft that came too close. Large caliber guns are still used today for an AA role.
* Anti-aircraft shells are designed to avert the trope as described in the top-of-page example. Because AA gunnery in the
* Anti-Air forces. Against anything that wasn't a tank or a particularly solid fortification, Vulcans and other rapid-fire cannon systems have proven devastatingly effective, provided they are allowed within a few miles of the target.
* Anti-Air gunners and fighters did their damnedest to shoot them down. And once you released the torpedo, there was no guarantee that it wouldn't malfunction, sinking into the water, drifting off target, or even striking the target directly and failing to detonate at all. Torpedo designs were improved considerably by the end of the war, but the days of dedicated torpedo bombers were numbered with the introduction of the first anti-ship missiles in 1944.
* Anti-Air), performing patrol flights to assist border patrol personnel and to keep an eye out for forest fires (the US's woodlands were considered a strategic resource, and fighting wildfires required manpower and resources desperately needed for the war), as well as providing cargo flights for small but important cargoes between bases or factories.
* Anti-Air protection, and the Brits began parking additional planes on their flight decks, having adapted their strategies based on wartime experience.
* Anti-air techniques are so strong in Pokémon that Flying-types are rarely seen in competitive play, although the ability Levitate is seen frequently as it's not subject to the same anti-air rules as the Flying type.
* Anti Anti Christ: A character who is destined to end the world, but does not want to.
* Anti Anti Christ: The evil being's spawn has no interest in ending the world or being evil.
* Anti-Antichrist: The offspring of the personification of evil has no interest at all in ending the world or even being evil.
* Anti-Antichrist to use your powers for the good of others rather than commit evil.
* Anti-Armor. Their main purpose is to destroy armored vehicles such as tanks, armored personnel carriers, and self-propelled guns, but they also have high-explosive rounds capable of destroying "soft-skinned" vehicles such as trucks and jeeps.
* Antibiotics. Without them, many people (often children) would die of bacterial

infections, women would
* Antibodies, gives a number of these to the detective trying to get information from him. The goal is to get him to start questioning his only moral convictions.
* Antibodies have cockpits in their crotches, covered by a long, narrow strip of armour that extends when the pilot wants to climb out.
* Antibug", Marinette does this as she enters a hotel and sneaks into a kitchen to get cookies for Tikki.
* Anti Bunny are a species born from escaped lab rabbits exposed to "U-cells." This caused them to rapidly evolve, becoming their own distinct species of sapient rabbits known as Lagosapiens. Almost no one knows about this. Every so often one of them also develops psychic powers.
* Anti Bunny draws heavily on Film Noir in its visual and storytelling style. As a call out to the visual style in Chapter 5 of The Gritty City Stories Pooky cynically narrates "No one gets film noir these days anyway."
* Anti Bunny has been running since 2006, but fortunately isn't too difficult to get through as it started as a twice-weekly, and is currently a weekly since one of the storylines has finished. Deciding whether to read in order of events, or order of publication is an entirely different matter as the story jumps around the timeline, and two side by side stories ran for a while that occurred 2 years apart.
* Anti Bunny: The NBK-2.5 shrugs off several rounds of 9mm to the face, jumping off a building, and getting hit by a semi truck.
* anti- but they're all too quick to act like they're the innocent victims of a hateful conspiracy.
* Anti-Cavalry weapon, have proved to be rather effective against most vehicles using air-filled tires. They can even be dropped over roads by bombers to stall enemy vehicles trying to travel in the relative safety of darkness, leaving them stuck on the road when the bombers return to bomb them by daylight.
* Antichamber as an antagonist (the black cube/ghost), but doesn't really do anything visibly bad.
* Antichamber has some rather weird locations. Some examples of loops include a pair of stairways that both lead back to the same room and a series of T shaped rooms where many of the ends lead back to the start.
* Antichamber in 2019 utilizing a variant of the same trick, ending less than a tenth of a second off the theoretically fastest possible time at 43.12 seconds.
* Antichamber Interpretations of what the Black Ghost represents vary wildly.
* Antichamber. It floats around emitting darkness wherever it goes, and tends to show up right as you get to gun upgrade rooms. What it is, what it is doing, and why it tends to pass by the block guns is never touched upon at all. However, it's a prominent moving thing doing something, so it's worth investigating.
* Antichamber. Many things change ever-so-subtly (or perhaps not-so-subtly) when you look at them a certain number of times, when you look at them for a certain period of time, when you're looking at them from a certain angle, or even when you're not looking at them at all!
* Antichamber: The color of the blocks used in any given room hint at the gun required to solve that puzzle.
* Antichamber: The final area before the end is a really soft and rounded area in what up to that point was a very blocky, angular game.
* Antichamber. There is only ambient sound and no soundtrack, and it uses primary colors in simple fashion.
* Antichamber will allow you to retain the black gun. This is a cheap trick to get you sent back to the starting chamber when you're about to win. You can turn your gun black this way, but it gives you no special abilities aside from leaving black cubes; when you restart the game, your gun will be red again.
* Anti-Christmas Song by Dutch comedian Youp van 't Hek, is one of the most played songs on Dutch radio in the holiday period.
* Anti-Christmas Song, escalating to knives and shotguns being picked up, and finally the cops arriving to find a massacre.
* Anti-Christmas Song go: "It's Christmas time and I'm in trouble/Got too drunk at the company affair/Sat on a copier, wore no apparel/Did it on a dare."

* Anti-Christmas Song "Merry Christmas You Suckers" (1962) includes a verse relating to this:
* Antichrist reveals that it is God who gave Nicolae the gifts of beauty, wisdom, intelligence, and personality, dismissing the idea that it all came from science.
* Antichrist Superstar is about a revolutionary figure named The Worm, who fights the establishment of his society, rising up from nothingness into a hero, before becoming sickened by the very people he is fighting for and their adoring and sycophantic nature, and turning on them, becoming the titular Antichrist Superstar and destroying all of reality.
* Antichrist: The epilogue features Willem Dafoe's character being surrounded by a large group of faceless female spirits who walk through the forest, ignoring him.
* Antichrist. Those animals? According to the talking fox, chaos reigns.
* Antichrist, where he says that the "man of sin", the "son of perdition", will exalt himself above all that is called God or is worshiped, so that he will sit as God in the temple of God, "showing himself that he is God".
* Antichrist: With the exception of Händel's "Lascia ch'io pianga", used in the prologue and conclusion, the soundtrack consists entirely of drones.
* Anticipated and lampshaded by Mowgli, who dissuades the love interest from taking the treasure with a comment along the lines of, "To take this gold is to take death." It's also implied that he's seen the snake.
* Anticipated by Rimmer in "Back To Earth"; After telling the creator to create for him a beautiful, adoring girlfriend, he quickly adds that she should NOT turn out to be his long-lost sister.
* Anticipate teleportation) while not blocking it, delays teleporters' arrival to allow ambushing them.
* Anticipating Weight Watchers' hungry little monster, Sultana biscuits gave us
* Anticipation: “I’m going to kill you because I killed your brother.”
* "Anticipation" by Carly Simon, used by Heinz to advertise the thickness and richness of its line of ketchups in
* Anticipation is essentially this. They resolve positively by definition.
* Anticipatory Breath Spray: A person uses breath spray in anticipation of getting a kiss.
* Anticipatory Lipstick: A character applies lipstick in an attempt to kiss a (usually unwilling) target
* Anti-Cliché and Mary-Sue Elimination Society, is taken over by the Sues in "Insert Red Skies Twilight Here".
* Anti-Cliché and Mary-Sue Elimination Society started out as simple fans of the Society before deciding to join.
* Anti-Cliché and Mary-Sue Elimination Society. The Society's two-and-a-half year absence is because Divinity sent the entire Library Arcanum into stasis in Development Hell.
* Anti-Climactic Parent in which a character spends the episode getting the cast in an uproar about a parental visit.
* Anti-Climactic Unmasking: Someone rips off a superhero's mask, expecting someone extraordinary, but they get someone ordinary.
* Anti-Climactic Unmasking: Someone rips off someone else's face-concealing costume (such as a mask, visor, etc), expecting someone extraordinary, but they get someone ordinary.
* Anticlimax Boss: A boss is easier to beat than expected vs. a mook is harder to beat than expected.
* Anticlimax Boss games. If a boss must be fought, and players can be optimized for something other than combat, then the boss must be beatable by the weakest character who can reach the fight.
* Anticlimax Boss. It doesn't matter if you brought in a fully-loaded rocket launcher or fuel rod cannon, they're useless here. Luckily, the laser has infinite ammo, so you don't have to jump off the edge when you run out of charge.
* Anti-Climax Boss (normally stolen from you in the prologue) and combine it with a couple of other items to reduce most of the boss fights (including the finale) to a

few seconds of damage-spamming.
* Anticlimax Boss (the level before him more than makes up for it in difficulty, though).
* Anti-Climax Boss, the Metal Overlord comes out with such gems as "This victory shall soon turn into DESPAAAAAIIIIRRR!!!", "IT'S! TOO! LAAATE!!" and, of course, "BUUURRNNN! TOOOOO DEEEAAATTHHH!!!", complete with voice echo! What's more, he is ACTUALLY eating the ship while he's on while doing so (implied). What's more, he gets worse after he takes off!
* Anti-Climax Boss: Your final opponent fails to put up much of a fight.
* Anti-Climax: Suspense is killed when it would normally be at its highest.
* antic master", though Hitler found his antics amusing rather than annoying.
* Anti-Cosmo also wanted Timmy to join him in taking over the universe, as he desires an evil godchild to mold in his image.
* Anti-Cosmo and Anti-Wanda. Possibly also a subversion, as Anti-Cosmo doesn't seem to be particularly happy in the arrangement.
* antics effect the lives of workers at a Star Wars fan film festival.
* Antics said "if I ever draw a window, you better believe something is about to bust through it".
* Antidae is the scientific name for the duck family, which Larson describes as "a joke a dozen ornithologists got, and everyone else just went 'what the hey?'"
* antidermis, it causes his muscles to grow, but the effect wears off after a short while. Later on, he absorbed liquid antidermis, and the effect became permanent.
* Anti-diabetic drug Metformin, marketed by Merck under the Glucophage brand, is also known to induce soft, oily stools, and promote the intestinal gas production, though not to the same extent as Orlistat. It is also frequently taken off-label as a weight loss medication because it reduces the absorption of the carbohydrates, but it pales in comparison with its side effects — which,
* Anti-drug ads. That is, the ads are considered so stupid and lame and insulting to one's intelligence, that people who watch them will want go use drugs simply out of spite. This is far from their only problem, however.
* anti-drug ad. The ad itself isn't so bad, but after watching it, how many people associated "drug use" with "Rachael Leigh Cook in a tanktop and tight jeans"?
* anti-Elven came to power within the Alessian Empire. At their height, the Order held nearly as much power as the Emperor. However, the extreme severity and strictness of the Order eventually led to the fracture of the Alessian Empire. To note:
* Anti-Escapism Aesop: Reality is better than fiction, so don't get too invested in an imaginary world (including this story).
* Antietam: The Union held the field at the end of this bloody battle, but suffered greater losses than the Confederacy. Despite this, by claiming the battle as a victory Lincoln was able to issue the Emancipation Proclamation, which changed the whole character of the war in the Union's favor in a couple of ways. On the immediate strategic level, Antietam was a victory because it stopped a Southern invasion of the North, forcing the invaders to retreat and preventing them from taking Washington. In that respect, it is very much comparable to the Peninsular Campaign and Seven Days Battles before Richmond earlier in 1862, and to the later Gettysburg campaign in 1863. In both cases, the defending forces forced a retreat on the attackers while sustaining greater losses themselves. Had the Army of Northern Virginia succeeded in taking Washington in the Antietam campaign, that would have made it much more likely that France or Britain would have recognized the Confederacy as an independent nation while also dealing severe damage to the Union's war effort. Politically, Lincoln's issuing of the Emancipation Proclamation also made it untenable for Britain or France to recognize the Confederacy going forward because doing so would have been implicitly supporting slavery, meaning the South would have to win this war on their own.
* anti-evolution make sense in a Linnaean paradigm, but in cladistics it doesn't since there is nothing that defines "mammal" besides being genetically a mammal (which monotremates are).
* anti-evolution make sense in a Linnaean paradigm, but in cladistics it doesn't

since there is nothing that defines "mammal" besides being genetically descended from the common ancestor of all mammals (which monotremes are).
* Antifanfiction is a small board that, despite the name, is very pro fanfiction with a horde of members, RPs, fanfiction and original fiction.
* Antifasc are self-appointed anti-fascist vigilante anarchists who attack far-rightists wherever they find them.
* antifascist rebels hiding out in the woods, who are portrayed sympathetically.
* anti-French sentiment, as well as the 2019 Notre Dame fire and subsequent outpourings of worldwide sympathy. It wasn't just Americans and Brits, France took over both countries in the soft power index as a result of Macron's victory.
* Anti-Frustration Feature allows the player to push past characters that may be in the way. Attempting to push the desert casino bouncer out of the way will result in him not budging and saying "Nice try."
* Anti-Frustration Feature and they also possess the Echo. Just like the player, defeating the group has their Echo kick in and makes them stronger in the exact same way as the player.
* Anti-Frustration Features: A video game has features to prevent failure and inconveniences from angering the player too much.
* Anti-Frustration Features: They'd never make sense storywise, they're just there to keep the player from getting frustrated.
* Anti-Frustration Feature to each other as accidental collisions between allied ships are surprisingly common.
* Antigeos by Paul Capon (also serialised on radio by the BBC) are set on the counter-Earth Antigeos.
* Antigone and Haemon. Of course, Antigone's mother is also her grandmother, so being into Haemon seems almost normal by comparison.
* Antigone, as Antigone, Haemon and Eurydice kill themselves in sequence.
* Antigone: before the beginning of the play's action, Eteocles and Polyneices, two brothers leading opposite sides in Thebes' civil war, died fighting each other for the throne. Creon, the new ruler of Thebes, has declared that Eteocles will be honored and Polyneices disgraced. The rebel brother's body will not be sanctified by holy rites, and will lie unburied on the battlefield, prey for carrion animals like worms and vultures, the harshest punishment at the time. Antigone and Ismene are the sisters of the dead Polyneices. In the opening of the play, Antigone brings Ismene outside the palace gates late at night for a secret meeting: Antigone wants to bury Polyneices' body, in defiance of Creon's edict. Ismene refuses to help her, fearing the death penalty, but she is unable to dissuade Antigone from going to bury her brother herself. Tragedy ensues.
* Antigone. Both start out as kings on top of the world, but their stubborn pursuit of their goals despite the advice of those around them causes their entire lives to come apart. However, whereas Oedipus is motivated by the pursuit of justice and the well-being of his people, Creon is interested mainly in protecting his own power.
* Antigone, by the time Creon realizes he was being an asshole and Antigone should go free, she's already killed herself.
* Antigone. Coming from that family, marrying a cousin must've seemed positively conservative.
* Antigone has a messenger who spends a long time trying to avoid giving Creon bad news out of fear that this trope will be played straight, even pointing out that Polyneices was only technically buried. In the end Creon merely threatens to torture him to death. By the standards of ancient Greek tragedy, the scene is very funny.
* Antigone, has been left unburied by the king Creon so that his soul cannot go on to the underworld, in punishment for his rebellion. His sister Antigone takes it upon herself to do so.
* Antigone her brothers unconditionally even when they [Eteocles and Polyneices] were mortal foes.
* Antigone. Naturally it all ends in tears, what with him forgetting that the Gods are more important than kings.
* Antigone: The children of Oedipus and Jocaste didn't fare much better.

* Anti-Gouki Project fullgame project made by a Chilean M.U.G.E.N. creator.
* Anti-Gravity in a military context, unlike the hover-tanks of the Tau and Eldar.
* Anti-Grav Unlimited are rods that act like "gravity magnets". Through experimentation, he not only manages to create a perpetual motion engine for his van (by welding two rods perpendicular to each other so that they're always being pulled up on one side and down the other), but also manages to rig rods such that he can make the van fly.
* anti-handling devices are devices attached to bombs, mines, or traps to kill or injure anyone who tries to move or disarm the main trap. For instance, some mines may have a second pull-fuse underneath them; while a deminer may disarm the primary fuse, the pull-fuse will detonate the mine if they lift the mine without disarming it as well.
* Anti-Hero, actually takes the offer. It backfires, but he still tried.
* Anti-Hero: A hero who isn't squeaky-clean and willing to do questionable things to defeat their enemies and accomplish their goals.
* Anti-Hero: A hero who lacks moral uprightness vs. a hero who doesn't.
* Anti-Hero: A hero who lacks the qualities of a hero vs. a villain who lacks the qualities of a villain.
* Anti-Hero. And she's treated as The Hero over Buffy even before she saves the world.
* Anti-Hero are all contenders for the first deliberate example of This Very Wiki's definition as "they are good guys, but has flaws to work out."
* Anti-Hero at best, but his mother was the only person he knew for the first few years of his life since she had to keep her bastard son hidden from her husband, who eventually finds out and kills her. Wismerhill repays him for this (and the abuse he suffered at the lord's hands) years later by hacking off his fingers and letting him fall to his death.
* Anti-Hero at one point, but well before he got the Voltekka sprinklers).
* Anti-Hero being explicitly attracted to Wolverine, Dante, Gambit, Phoenix Wright, Ghost Rider, Frank West, Iron Man and Chris Redfield.
* Anti-Hero, but always proves to be morally better than the villains.
* Anti-Hero but he is a brave man in a fight and willing to make an effort to take in his prisoners alive.
* Anti-Hero counts as an anti-hero varies depending on the writer and portrayal, with him being a more traditional hero in many incarnations.
* Anti-Heroes and besides having characters in the same style has some fairly similar characters:
* Anti-Heroes and saying "Look over there!" Naturally, this is completely ineffective, but Kaal counts it as a success.
* Anti-Heroes, and uses a similar stick-figure style as well as medium-aware gags, and even a few breaking-the-fourth-wall-references to Burlew's style. The overall plot and universe differ significantly, though.
* Antiheroes extraordinaire who seems to view committing crimes as a way to stroke his own ego, and constantly betrays his own allies.
* Anti-Heroes: Kaalinor can ride in a cart as long as he's not thinking too much about it. But since he's a ghost, once he starts questioning it... the moving cart goes right through him.
* Anti-Heroes, Kaalinor proudly states "If you're trying to get inside this tower, you'll have to go through me first!" Brave of him, true, but since he's a ghost and his opponent a lich, Finx has absolutely no trouble just walking through Kaal's incorporeal body.
* Antiheroes, specifically a powerful fiend and an equally powerful celestial. The in-laws were not happy.
* Anti-Heroes, the backstory of Aldran, one of the main characters, is revealed in a strip entitled... Military Brat.
* Anti-Heroes: The chief protagonist and the chief antagonist are the Krylorn twins, children of an archdevil and a celestial falling in love.
* Anti-Heroes. The paladin can't even notice the secret door until it slams in his face.

* Anti-Heroes when Keriss, said tailed tiefling, comes closer. Then she confirms to Kaal that yes, Frank is right about the whole tail thing.
* Anti-Hero. Even in casual clothing, his style has shifted to favoring monochrome, flattering looks.
* Antihero for Hire acts as this for Shadehawk. Though she gets her hands dirty on occasion, both online and in person.
* Antihero for Hire almost certainly qualifies. However, it is worth noting that they have had a good amount of infighting. It would seem that one Corrupt Corporate Executive is not loyal to any other one.
* Antihero for Hire. He claims he gets to do whatever he wants because he's an elite, although he actually goes down easier than most of the regular ones.
* Antihero for Hire. He tells Wrench he has a plan, almost explains it to the enemy, but stops when he realizes the folly of doing so, then actually does explain it after implementing it.
* Antihero for Hire in order to wake him up. It's not enough. (Or maybe he shot it in his sleep? It's hard to tell because of the composition of the panels.)
* Antihero for Hire) only wears them for Cool, since he operates at night.
* Antihero for Hire: Shadehawk claims his martial arts prowess comes from watching lots of kung-fu movies. Baron Diamond responds by saying he prefers game shows, and tells Dechs he's won a car...by throwing it at him.
* Antihero for Hire, the main character is up on a space station prison where there is a turf war between the orange-shirted prisoners and the blue-shirted prisoners, for no other reason then the differences in their shirts. They admit that they're doing this because there's not much else to do.
* Antihero for Hire, when the main character is describing the battle between him and his enemies.
* Antihero for Hire. While the protagonist wears a Mantis Agent's outfit, which conceals the individual from head to toe, the Mantis use electronic and DNA based identification systems, and is immediately recognized as an intruder.
* Anti-Hero goatee. And epic chest hair. And his scalp catches fire when he does awesome things such as beating the crap out of mechas with his bare hands.
* Anti-Hero had a huge prominent squared-off jaw and was unquestionably a hero in the Ancient Greek sense.
* Anti-Hero has made something of a habit of this. But then, sneaking up and scaring people is part of his MO.
* Anti-Hero", he's using the Liberator to sneak up on a Federation pursuit ship.
* Antiheroic examples exist through Severus Snape and Sirius Black, as well as a heroic example in Harry himself.
* anti-heroic series, in which arguably the most useful tools in Garrett's arsenal are his Water Arrows, which he uses to douse torches and lamps, thus creating shadows for him to sneak about in.
* antiheroic, she deliberately avoids wearing makeup or feminine clothes and retains a fairly pudgy figure in order to strengthen her barrier against Riesel's shallow lechers.
* Anti Heroic with Shana being raised with sole motive of becoming a Flame Haze.
* anti-heroine, knocking down his use by a solid margin. This mostly applies to the anime and the novels.
* Anti-Hero involved between the two. Ragna does eventually come around and starts to reluctantly, play this straight.
* Anti-Hero is an exiled Indian prince continuing to fight the Sepoy Mutiny.
* Anti-Hero: It doesn't matter whether they are in an idealistic or a cynical setting, this hero fervently believes that the world they live in is one where morally dubious methods are the only way to get the job done.
* Anti-Hero, keeps the corpse of his ex-teammate Parademon stuffed and mounted in his room and has extended conversations with it. The fact that Parademon died in an explosion and that a number of pieces could apparently not be recovered for the taxidermist in no way improves the situation.
* Anti-Hero, literally makes up everything he does as he goes along, making him completely unpredictable.

* Anti-Hero Loki noting that not trusting him is like thinking that the sky is green.
* Anti-Hero Omar Little has a thin scar running from over his left eyebrow to his right cheek, (which is an actual scar that actor Michael K Williams has) with a similar diagonal scar across his chest.
* Anti-Hero or have really, really poor decision-making skills leaning towards unnecessary destructive tendencies.
* Anti-Hero, or they realize that one word has always defined Wolvie: stamina. Even at his ugliest, he looks pretty good for 113!
* Anti-Hero) possesses a huge scar across his chest from his first bout with Mihawk (which he tried to poorly patch up by himself at first). Later on, he gains scars on his ankles from his attempt to cut his feet off to escape a villain's trap.
* Anti-hero protagonist Richard Sharpe and his ally William Lawford are sent by the British Army to infiltrate the rebel stronghold of
* Anti-Hero) seduces him and takes his virginity and kicks him out of her home after sex. Later, when Xander tries to reason with Faith about her wrongdoings, she sexually assaults him before she starts strangling him, causing Angel to intervene.
* Anti-Hero, seems totally incapable of going a single page without cursing.
* Anti-Hero. She hates the Irish and isn't afraid to show it. She's also made racist comments regarding blacks and the Japanese; when she shoots a Yakuza member in "Drift Problem", she shouts "that's for Pearl Harbor!"
* Anti-Hero, spends the majority of the franchise looking like he'd rather be anywhere else, but is forced into situations where he needs to escape or break free:
* Anti-Hero story where we get Marv's POV as he tortures a man for information.
* Anti-Hero Substitute: A ruthless anti-hero takes the place of the pure hero.
* Anti-Hero Substitute: The hero's successor is less scrupulous than their predecessor.
* Anti-Hero, takes the mook's uniform and gas mask, and gains entrance to the bad guy's office.
* Anti-Hero: The types vary, but romance novel leads can tend towards bad boys (ready to be reformed) instead of a clean-cut, straitlaced fellow.
* Anti-Hero: They're heroic, but are willing to do not very nice actions to save the day.
* Anti-Hero wears a Guy Fawkes mask. In the movie, the mask is such a powerful symbol, it overshadows the hero himself up to a point where it's hard to tell who's wearing whom.
* Anti-Hero when his attempt to rescue Mokuba fails, requiring Yugi to bail him out.
* Anti-Hero (which also included dinosaurs fighting robots and Donut burning down a water park).
* Anti-Hero, which covers the time period it would have happened equally strongly implies he remained a virgin (there is a girl, again a lover of Caramon and there appears to be budding mutual affection but... well read it yourselves).
* Anti-Hero which shows heroes and villains can have traits that would be vilified or glorified respectively if they were applied to the opposite side, making it harder to know who to root for.
* Anti-Hero, who seems to keep an unsettlingly large number of knives on his person at all times. Considering he has a Red Lantern ring on his finger, one wonders why he does so.
* Anti-Hero with an extremely elaborate and manic shriek of laughter that takes an entire page to describe.
* Anti-Hero with the closing scene, where Nomi thumbs a ride to Los Angeles with the exact same man and pick-up truck. She shrieks, "You stole my luggage!" and resumes slashing at him while he's driving.
* Anti-Hero: You're a hero who doesn't have the moral qualities of a pure hero.
* anti-hero, you take what you can find and there are hammers everywhere.
* anti. He was a tragic figure, a loving father who was tradition-bound to kill his cherished daughter for having romance with an English boy. Chaney dressed and made

up with extreme care.
* Anti-Hoarding: Gameplay mechanics that discourage hoarding up in-game resources.
* Anti-HoardingGameplay mechanics that discourage hoarding up in-game resources.
* Anti-Humor, "A man walks into a bar" jokes have plenty of bait-and-switch subsects:
* Anti-Humor version by saying, "Your momma's so fat she should be concerned because diabetes is a serious problem."
* Anti-Idle: The Game feature lets you plant trees that generate Yellow Coins that you can harvest.
* Anti-Idle: The Game has the Printer, which prints "illegal" Coins. Subverted, in that these Coins are functionally the same as "honest" Coins.
* Anti-Idle: The Game, with "Doom" enemies and equipment "of DOOOOOOM" as drops.
* Anti-Idle: The Game, you can choose to start over at level 1 with all of your Feature progress intact. After five Ascensions, you're granted the option of a "Hard" Ascension, which wipes your Feature progress and makes certain Features more difficult. The "Impossible" Ascension, done after several Hard Ascensions, takes this to another step.
* Anti Idling: Ways to discourage players from being idle during gameplay.
* Anti-Intellectualism, etc.) and the Senators sheepishly admitted they hadn't. The investigation ended shortly afterwards.
* Anti-Intellectualism: For when knowledge and education are undesirable.
* Anti-Intellectualism: Negative stereotypes about educated or intelligent people.
* Anti-Interference Lock Up: A character is locked up or restrained to keep them out of the way, often resulting in temporary isolation.
* Anti-Interference Lock Up: A character is restrained or locked away somewhere, to get them out of the way.
* Anti-jokes rely on this by providing a setup to an obvious punch line but instead giving something completely different or a
* Antikythera mechanism is an example of a real life aversion, an analog computer containing gearing more complicated than anything which would be seen for over a thousand years thereafter. The Greeks never did anything more powerful with it, potentially in an enforcement of technology levels as they lacked many intermediate technologies we take for granted, and the technology was lost and reinvented later on.
* Anti-Life Equation that he is constantly after. If Darkseid finally finds it, it would make him gain knowledge to make everyone lose hope and become his slaves.
* Anti-Life Equation, you kiss your wife. And maybe the Speed Force does something, too.
* Anti-Love Song: A love song parody, often one that instead describes the singer's animosity towards the person they're singing about.
* Anti-Love Song, in that the singer is overall quite relaxed and happy about breaking up with his girlfriend since the relationship has apparently been unhappy for a while.
* Anti-Magic Academy: The 35th Test Platoon, every girl has their own personal arc where they bond with Takeru and deal with their tragic pasts as they struggle to overcome their problems with Takeru's support. They're all treated as invaluable members of the team and Takeru will do anything to protect all of them.
* Anti-Magic, and discovers that he's more than her match without any aid of sorcery.
* Anti-Magic as humanity proceeded to rain fire and death down onto Equestria. Twilight finally surrendered after Celestia was rendered comatose due to using the last of her power to protect everyone from a brutal aerial assault.
* Antimagic clouds in the series prevent any spells from being cast within (or directly into) them.
* Anti-Magic doctrine not only removes the person's magic, but will also render their children exempts from their respective species.
* antimagic field. These are area-effecting, preemptive dispelling zones. Notable for it being possible to render them permanent, making playing a "pure" caster with no non-magical combat or utility abilities something of a gamble even when dungeon-

diving. Getting arrested at a high enough level by a protagonist faction pretty much guarantees anti-magic in your cell.
* Anti-Magic, he realizes he still has the gun and pulls it out, but is never able to shoot anyone with it.
* Anti-Magic in the bag. Unfortunately, it turns out that while he can't hurt her directly, he's fully capable of, say, summoning a giant air elemental and telling it to pick her up and drop her. She winds up having to goad him into breaking the rules (which counts as a forfeit) in order to win.
* Anti-Magic). Kalki is driven by her resentment for being abandoned and treated like a tool no matter how much work she puts into being Snadhya'rune's attack dog.
* Anti-Magic or its equivalents in a setting where magic is used frequently.
* Anti-Masonic Sentiment for antisemitism (Spain's Jews had largely been forced out in 1492 and Franco deemed it a bit silly to have antisemitism without Jews - his regime was even willing to look the other way when Jews used Spain to escape to some other, third country) but after the war when the Franco regime transformed from openly fascist to a weird mix of vaguely hyper-traditionalist Catholic and technocratic neoliberalism the Anti-Masonic rhetoric was dialled down in order to not offend Western Democracies.
* Anti-materiel rifles are also considered BFGs. Keep in mind the name means it's supposed to be used against enemy equipment, meaning most things weaker than tanks can be put out of commission with a shot from these. A good sniper can incapacitate light vehicles and even grounded airplanes with one of these things, and they're generally overkill against human targets. It's come full circle with Serbu, a firearms company, naming their heavy sniper the BFG-50.
* anti-materiel rifles aren't a whole lot of good against modern armored vehicles, most military vehicles have minimal or even no armor, making these weapons thoroughly effective at taking them out.
* Antimatter Dimensions. It adds ton more content including 2 more prestige layers and several more mechanics. The mod page also has several more mods of that game, with many possible combinations, but some can break.
* Antimatter Dimensions' mobile port has an option in the shop to watch an ad to 2x antimatter dimensions for 5 hours, with further ads extending the effect's length.
* antimatter for fuel. In the case of antimatter, you can use only positive or negative particles and keep them in one place magnetically, which wouldn't work for a "universal acid" because normal nuclear matter is pretty much neutral.
* Antimatter Generator generates much more power for less fuel but requires much more "control" than fusion.
* Antimatter. Metal or Mass is stored in the form of... well, matter. As you may know, when matter meets antimatter, there is an explosive reaction. Can you spell "containment breach"?
* Antimatter particles and radioactive rays are legitimate powers in
* Antimatter shells only. On the other hand, their homeworld being mostly covered by sea with a single supercontinent means they're the only ones with a dedicated oceanic fleet, with their carriers being able to fly if necessary;
* anti— he has barely a single hitpoint of health left, they're poised over him with a knife, he's helpless to stop them killing him... and then:
* Antimemetics Division on the person. If the person is still alive, no one will hear their pleas for help. If the person is dead, people will step over their rotting corpse without even noticing it's there. The same effect can also be applied to buildings and locations, forcing people to unknowingly make detours around acres of land that they don't even realize exists.
* Antimony Carver has an ambiguous relationship with Kat and Jack, and, if what Zimmy
* Antimony Carver learns in Chapter 31 that Surma, her mother, acted as the Court's
* Antimony herself the original marriage of man and elemental must have been.
* Antimony's father is stated to have a dislike of anything that can't be explained logically. His friends include a half-fire-elemental, a magic-user, and
* Antimony's maternal bloodline, a human father, labors for years without success

to prevent this.
* Antimony spent her childhood, up to about age eleven, wandering Good Hope Hospital while her mother was bedridden. Her only company was her parents
* Anti-Mutiny forces caught wind earlier than expected and dragged the fight out long enough to prevent the traitors from killing both them and the unrelated Loyalists at Istvaan V before word spread of the betrayal.
* Anti-Mutiny: Insurrection against a captain or a commander who has chosen to defy their original orders.
* Ant in a Glass Jar that wrote it as a child attached with drawings she made from the conflict.
* Anti-Nepotism: A character treats their family members coldly at work to avoid committing nepotism.
* Anti-Nepotism: Characterizes the doer as an honest authority figure intent on avoiding the appearance of political corruption, while giving the recipient a reason to dislike the doer.
* anti-piracy PSAs, which compares "stealing movies" to robbing and murdering an old lady. This succeeds at scaring Jazmine into fearing movie piracy.
* Antipodes. Only a narrow strip of land known as the Temperate Zone can support ponykind.
* Anti-Police Song: A song specifically protesting against police/law enforcement.
* Anti-Police Song which criticizes corruption and misconduct by law enforcement.
* Anti Poop-Socking: A video game discourages players from playing too long by reminding them to take breaks after playing the game for a while.
* Antiquated Linguistics due to how much time she spent out of touch with civilization during her imprisonment as Nightmare Moon, it is likely she still struggles somewhat with learning the modern Equestrian vocabulary.
* Antiquated Linguistics, much like Spock Speak but with an old-fashioned feel.
* Antique Bakery is a manga/anime which depicts the lives of four men who work in a small bakery.
* Antiques Roadshow had a few of the appraisers inspecting the "antiques" with a jeweler's loupe, or as they call it, a "thingamajig that jewelers use".
* Anti-racism advocates often argue that focusing on past advancements in race relations (often mockingly summed up with the statement, "
* Anti-racist activist Tim Wise is known for saying that if you're going to be racist, at least be consistent: "I just don't want a moving target." For example, if you're going to say that Mexicans are lazy, don't also complain about illegal Mexican immigrants taking all the jobs.
* Antiracist Baby by Ibram X. Kendi has had a rather divisive reception because of this. The board book design and colorful illustrations would make one assume that the book is intended for toddlers, but it uses vocabulary and discusses concepts that are well above a toddler's reading level and understanding. Even if one were to assume that the book is intended as a parenting guide to teach one's children to not be racist, adults have criticized the book's messages on racism for being either vague or oversimplified.
* Anti-Radical is the most violent and bloodthirsty of the centrists, even threatening his own teammates for taking action he considers "too extreme".
* Anti-Rage Quitting: Ways in which developers discourage players from leaving multiplayer games early.
* Anti Red Shirt, where he's not minor, it doesn't apply, but in the movies, it does.
* Anti-Role Model for fangirls, it's only fitting that Critic's stalker (Hyper Fangirl) shows this off. Critic's threatened to kill her a load of times for not leaving him alone and it just makes her more attracted to him.
* Anti-Role Model: Not the trope as a whole, but a specific image of it—the juvenile delinquent and gang member wearing leather jackets, hasn't been taken seriously since the late '80s/early '90s, since law abiding citizens are now allowed to wear leather jackets as well and it no longer carries the bad boy image that it once did.
* Anti-School Uniforms Plot: A group of students protest a newly installed rule

requiring school uniforms.
* Anti-School Uniforms Plot: A school tries to implement school uniforms and the students try to protest.
* Anti-School Uniforms Plot is made the rule for one episode before being abolished.
* Anti-Semitic blood libels and conspiracy theories. These carry unique significance because they inspired the Holocaust itself.
* anti-Semitic (notably blaming 9/11 on the Jewish people), which pretty much put a damper on his legacy.
* Anti-Sneeze Finger: Putting a finger to one's own or somebody else's nose to prevent them from sneezing.
* Anti-social and people hating Sasha Hunter grows to appreciate the bond she shares with her team mates in
* Anti-Social", Lynn Sr. posts on SwiftyPic a picture of young Lori during her "awkward stage", in which she used to wear nerdy glasses and braces. Lincoln thinks old photos are harmless, until his father posts a picture of him as a baby from when he was potty training.
* anti-social personality disorder, he seems to really care about his son Justy, so his highly impulsive, borderline-sociopathic personality is probably due to his drug addiction.
* Anti-Sue but doesn't have common traits of one/has rare traits of one, vs. character has traits common amongst Mary Sues and Marty Stus and may or may not be one themselves.
* Anti-Sue — The original Mary Sue wasn't designed with traits that Mary Sues typically don't have. Quite the opposite, in fact.
* anti-tank Blades On A Stick. The Avatar of Khaine also can bring a spear into battle.
* Anti-tank guns, which were prevalent during WWII. These are artillery pieces specifically designed with penetrating tank armor in mind, achieving this by firing special armor-piercing shells. Normally, these were towed into position and set up, but both sides figured ways of putting these guns on the chassis of various tank destroyers, both turreted and turretless.
* anti. The drinker tends to say something like "ow oof ouch my bones ow".
* Anti-Time.. When the Eighth Doctor is infected by Anti-Time he becomes psychotic and takes Zagreus' name.
* antitribu — because he's supposedly the husband of the Biblical Ruth, whose death is mentioned in that verse.
* antitribu to be the clan proper, and will take any indication that they aren't extremely poorly.
* Antitrust through multiple crimes, up to and including murder. The good guys, upon exposing him, release the source code online, accompanied by an e-mail saying, "Human knowledge belongs to the world".
* Antivan Crows practice. To get close to a target, one must be willing to do anything and everything.
* Anti-Villain. Aang agreed to turn himself in if Zuko left the village alone, and even though he breaks out and two villagers helped him, he doesn't do anything for revenge and just leaves.
* Anti-Villain: A bad guy with noble qualities and traits, and possibly even heroic goals.
* Anti-Villain: A villainous character that is in a moral grey area, sometimes overlaps with this trope.
* Anti-Villain: A villain who is mature enough to realize what they're doing is wrong, but doing it anyway for noble reasons.
* Anti-Villain: A villain who is sympathetic due to their motives and intentions not being evil.
* Anti-Villain but for one reason or another the work treats them as a straight villain (this is more common in adaptations and Fan-Fics, but not exclusive to them).
* Anti-Villain, but it's not unusual for Deathstroke to be carrying pistols,

assault rifles, submachine guns, sniper rifles, etc... all at the same time.
* Anti-Villain. Darkhell eventually betrayed him, and Rasga sided with the good guys for the end of the battle.
* Anti-Villain for his pursuit of the Silmarils tries to make up for his wicked deeds. This may be seen when Celegorm has Elflings Eluréd and Elurín abandoned in the forest to starve, at which Maedhros tries to find them but is unable to.
* Anti-Villain for ironic purposes. Badass to the end, he opts for the latter and spends his final moments laughing at and taunting Father and the other homunculi.
* Anti-Villain from the public. (Can also be an Idealism Trope, depending on how it's written.)
* Anti-Villain. Greed is cornered by Envy and Sloth, and declaring that he wouldn't be stupid enough to fight two homonculi at once, jumps to a convenient boat below carrying his minions.
* Anti-Villain; Her fundamental goal is safety for herself and whomever she considers "her people", to the extent that she originally planned to be a hero. In the end, she tends to come down on the side of murder and mayhem because it seems to be the most pragmatic means to those ends, and her 'virtue' is almost always a matter of stopping because she's already won, not doing something because it would be counterproductive in the long run, or doing something 'good' because she and her gang benefit overall. Even her power and its uses are focused primarily around logistics more than anything else.
* Anti-Villain: If the "anti" part is emphasized more than the "villain".
* Anti-Villain if the King should die) and stray comments by King Louis suggested he'd grown tired of her.
* Anti-Villain Menardi has loose blonde hair at least to her hips, probably farther.
* Anti-Villain nature and being a total badass than anything negative.
* Anti-Villain. One of his main objections to independence is that a bunch of ill-trained militiamen has no chance of defeating the British armed forces, then the strongest in the world. It's a very good point, really.
* Anti-Villain on Manhattan. He's still using his Steel Clan robot minions, but they now inexplicably have Riker's beard.
* Anti-Villain over that eye/general area and has lost all of the hair on his head, and has visible scars on his head and face.
* Anti-Villain recruitable. (There are a few other characters in the game who fit the archetype and can't be recruited, but Perceval is by far the most blatant.)
* Anti-Villain rival Moordryd, and even then only after Lance was attacked. Other than that, people only refer to him as short. Clearly the standards are different in Dragon City.
* Anti-Villain that any Solar players would love to hate. This is the guy who spends every day manipulating everyone and everything just so he can tell himself that Usurpation was the Right Thing. He doesn't care about how many Fair Folks / Death Lords / Third Circle Demons you slaughter, to him he's always right and you're always wrong. And he's got 50 or so fate-ninjas to shut you up, even though said fate-ninjas really should be directed in helping you save the world.
* Anti-Villain: The villain has noble and sympathetic motivations, especially the fact that they lack villainous qualities.
* Anti-Villain to enter any of the guest rooms. Danny had also promised Hallorann he wouldn't go in there, so some of his problems might have been avoided if he'd behaved.
* Anti-Villain urges all you people who watch IWA Mid-South to help retarded children! He even brought vests to spread the message!
* Anti-Villain very rapidly built up a reputation for murdering State Alchemists. Scar is a greatly sympathetic example (to the point of being given a Face turn), as the State Alchemists are an elite formation within Amestris's army, and were crucial in annexing Scar's home country of Ishval (and massacring a large portion of the population). Scar's reputation is so fearsome that State Alchemists tend to transfer en masse out of areas where he's known to be operating.

* Anti-Villain: Villains are not always pure evil; they're also humans with redeeming qualities, even if they're antagonistic. Could be a Cynical trope depending on how it's handled.
* Anti-Villain was a sweet, if lonely, kid years ago. However, years of being ignored have taken a toll on him and made him bitter.
* Anti-Villain, where the Wolkenritter keep their gathering of Linker Cores to complete the Book of Darkness and save Hayate's life a secret from Hayate, knowing that she would not approve. She eventually finds out about what they were doing during the final battle; the Wolkenritter apologize and Hayate forgives them.
* Anti-Villain with a magical sword who tends to come across as haughty and sanctimonious at times, and answers to the Pope in his oppression of RKS and the magi. She never doubts her views of justice and will stop at nothing to punish what she considers to be sinners and heretics alike. Pamela claims not to be a magus and instead claims that her power was nothing more than a gift from God himself.
* Anti-Villain with compelling backstory and motivation to the point where many fans don't even know she's an antagonist.
* Anti-Villain with heroic traits like courage and determination, who has descended past the point where he cared whether his goal was still noble, becoming consumed by revenge. He considers himself a monster (made by monsters) and lives only for revenge and hate. After raising Connor, he tells Angel that he has let that hatred go and learned to live on paternal love instead. But even this is a lie, he sacrifices his life and his adopted son's happiness (and mental stability) for a final chance at revenge on what's left of the demon that took his family (namely, Angel).
* Anti-Villain: You're a villain who doesn't have the traditional qualities of a pure villain.
* Antiviral takes place in a world where celebrity worship is such that fans are willing to shell out serious cash to eat the cloned tissue of big stars from licensed, mainstream "meat markets." The company "Astral Bodies" is one such provider, selling items like sausages, bacon bits, and "1st Grade Stem Cell Meat" taken from movie star Hanna Geist.
* anti-virility drug, designed to prevent unwanted boners, like when driving your daughter's cheerleading friends home from practice.
* anti-war message. The music video has the band play the role of soldiers who are fighting a deathball of tanks, fighters and weapons.
* Anti War Movie, starts with a scene showing German, French, and British schoolchildren reciting propagandistic poetry in front of their respective classes, to give the viewer a sense of how nationalist and militarist all the European powers were at the time and how all their societies used to brainwash boys into becoming "good soldiers". (The poems are transcribed and translated on the movie's trope page. The British one is so horribly xenophobic it almost makes the German one seem justified.)
* Anti- where Bender gets killed and haunts every machine Fry comes across eventually driving him to live on an Amish planet to cut himself off from all technology. When Fry is in danger of being crushed by a runaway spherical structure Bender jumps into the Robot Devil (the only living robot there) to push Fry out of the way. At the end he gets sent to Robot Heaven, where he jumps into Robot God and makes him beat himself up until he sends him back to Earth.
* anti-Zeppelin The 9 TB fighters built never so much as CAUGHT a Zeppelin, much less destroyed one. So for the Blackburn, it really WAS an Airstrike Impossible.
* antlered creature has a very human face and an eerie, bony, three-legged, centaur-like body.
* Antlered Man, often believed to be a representation of the Celtic god Cernunnos.
* Antlers Colorado are each assigned a specific color on the cast page, and these tend to carry over into the bonus art and chapter banners. It's not unusual for each character to be illustrated with a halo of their respective color.
* Antlers Colorado confirms that Austin's dreams are often premonitions, so it shouldn't be too much of a surprise when they end up predicting later events.
* Antlers Colorado happens unexpectedly just as her and Austin start to become

friends, and it seems that she's becoming more of a main character.
* Antlers Colorado in Chapter Two requires a blood sacrifice twice a year to stay dormant.
* Antlers Colorado in his third POV section of Chapter Two. His plan works, though it's mentioned in subsequent Landis POV sections of Chapter Two that his tongue still hurts and he has trouble talking.
* Antlers Colorado is a horror/supernatural serial about a young medium who runs away from home and ends up solving mysteries with the sheriff's department in a weird small town.
* Ant-Man, a guy is at a Baskin-Robbins (which serves ice cream) and tries to order a burger, then a pretzel, and finally, "whatever's hot and fresh."
* Ant-Man and later Scott Lang can summon and they have a good relationships with ants of kinds, they often go underground to hives and take rides on them. Though they’re not above sacrificing hundreds of ants in kamikaze attacks or making a makeshift raft with them drowning heaps of ants.
* Ant-Man and tells him that Hank was right about the Starks. On the other hand, this is the first time Tony has ever met Scott and he has no idea who he is or what he's talking about.
* Ant-Man, and the other half is the regular standard heist techniques that Scott and his fellow criminals do anyway.
* Ant-Man and the Wasp, and also earned higher domestic and international box-office grosses.
* Ant-Man and the Wasp and eases the constant pain. Like her comic counterpart, she can become temporarily invulnerable.
* Ant-Man and the Wasp, battling each other for possession of the miniaturized Pym Lab and the technology inside it: The heroes, Sonny Burch and his men, and Ghost. The FBI also gets involved outside of the chase, trying to arrest Hank and Hope and bust Scott for breaking house arrest.
* Ant-Man and the Wasp, Bill Foster has Scott, Hope, and Hank Pym tied up while he explains his plan to draw energy from the quantum realm to stabilize Ava's dimensional phasing before she phases out of existence altogether. Bill tries, unsuccessfully, to continue his ever-so-important speech despite getting interrupted several times by a ludicrous quacking duck ringtone as Scott's daughter Cassie tries to call him.
* Ant-Man and the Wasp for possession of the shrunken-down Pym laboratory.
* Ant-Man and the Wasp: Ghost got her intangibility powers as a young girl from the quantum energy accident that killed her parents. This means that when a group of firefighters found her among the wreckage, one of them tried to comfort her with a hug, only for his arms to phase right through her.
* Ant-Man and the Wasp had his reputation destroyed, simply out of wounded pride and the latter claiming Starr was a traitor. It's ultimately never made clear what he did or how justified Hank's response was.
* Ant-Man and the Wasp had informed him of who she is, and he tries to convince her to do business with him. When Hope refuses and proceeds to wipe the floor with Sonny’s goons in her new suit, Sonny then tries to go after Hank, Hope, and Scott Lang but quickly gets shoved to the side by Ghost. And when he persists, Sonny is ultimately taken out by Scott’s friends by the end of the movie, who weren’t even taking him seriously when Sonny was trying to interrogate them for Scott's location.
* Ant-Man and the Wasp: Hank and Hope are on the run because Scott used their technology to violate the Sokovia Accords, even though he did it without their knowledge or permission.
* Ant-Man and the Wasp, Hank Pym briefly dons a San Francisco Giants cap when he's trying to avoid being recognized in public.
* Ant-Man and the Wasp happened somewhere during the middle or latter part of the decade.
* Ant-Man and the Wasp. However, Sonny reveals that he had found out what they had been doing, and wanted a cut a deal to sell the Quantum Tunnel along the black market, but they refuse and have to take the last part that they need by force.

* Ant-Man and the Wasp. It's never conclusively determined which of the men is right.
* Ant-Man and the Wasp, leaving Scott trapped with no idea what's happening and Ghost's fate (snapped or left to die without the particles) unknown.
* Ant-Man and the Wasp: Made in 2018, a handful of flashbacks are set before and after the disappearance of Janet van Dyne in 1987.
* Ant-Man and the Wasp, near the start of the movie, Hank shrinks his lab and gets in the van with Hope and Scott. As they drive away, Ghost materializes, clearly watching to see where they're going.
* Ant-Man and the Wasp occurs, vaporizing the entire Pym/Van Dyne family and leaving Scott stranded in the Quantum Realm with seemingly no way out.
* Ant-Man and the Wasp: Old man whose car is shrunk by an errant disk fired by the Wasp.
* Ant-Man and the Wasp's character watches his car shrink down to shoe-sized and makes this remark:
* Ant-Man and the Wasp, Scott has no recollection of it. At first he reacts as if no time went by, and then he gets confused about how they left the control room and why Hank Pym is holding his hand.
* Antman And The Wasp Scott Lang goes on house arrest, and Hank Pym and Hope van Dyne on the run from the FBI. However, because he had an encounter with Janet van Dyne while in the quantum realm, Scott finds himself working with Hank and Hope again while fooling the FBI into thinking that he’s still in his house.
* Ant-Man and the Wasp: Scott's ex-wife Maggie tries to argue about this in defense of Scott, but the FBI genuinely doesn't need one since Scott is under house arrest.
* Ant-Man and the Wasp, she too reflexively calls him "Cap", causing her to share a embarrassed grin with Scott.
* Ant-Man and the Wasp: Sonny Burch and his associates are last seen being arrested by the FBI.
* Ant-Man and the Wasp: Sonny Burch has an FBI agent who feeds him inside information. Eventually, he's killed by Ghost while trying to steal Hank Pym's lab to deliver to Burch.
* Ant-Man and the Wasp so no-one will see Scott leaving, and some curious pigeons are checking them out.
* Ant-Man and the Wasp's son Langston playing the younger version of his character, Bill Foster, in a flashback.
* Ant-Man and the Wasp, the FBI manage to arrest Hank Pym and Hope Van Dyne. To get them out of custody, Scott uses Hank's ant colonies to sneak them disguises. Hope dons her Wasp costume and shrinks down, while Hank disguises himself as an FBI agent, with no one being any the wiser.
* Ant-Man and the Wasp, villain Ghost was made into a young woman played by Hannah John-Kamen. Since John-Kamen is half-black/half-white, Ghost's parents (shown in the flashback where she got her powers as a girl) were a white man and a black woman.
* Ant-Man and the Wasp, was just a little girl when her father's invention went off during a S.H.I.E.L.D. raid, causing her to become permanently intangible, and at risk of falling apart every day she's still around. Everything she does in this movie is to try and save herself from dying, in contrast to the vengeful and angry comics version.
* Ant-Man and the Wasp, when Hank Pym’s lab has been stolen, he goes to his old colleague Bill Foster, who suggests using a defractor to track down the lab. However, since the newer suits don’t have defractors, but the old ones did, Scott reveals that he didn’t destroy Hank’s old suit, and hid it in a trophy that Cassie had given him. When Scott calls Luis to find the trophy, only to reveal that its not there, Scott realizes that Cassie had taken it to show and tell when he told her not to.
* Ant-Man and the Wasp which shows an empty San Francisco, including Scott's house...except the giant ant used as decoy for Scott is still there.
* Ant-Man and the Wasp, who felt that Hope should fight with elegance and femininity that little girls would love.

* Ant-Man Ant-Man of the Marvel Universe. Many would say they prefer Scott even aside the controversial stuff involving Hank, if only because he's a more down-to-earth guy and relatable as someone who's an average Joe without the suit.
* Ant-Man: Ant telepathy plus the ability to drastically shrink and grow things makes the control of gigantic insects one of Ant-Man's tricks of the trade.
* Ant-Man broke out of the ghetto as well, despite many predicting it would become the MCU's first ever failure for being notably more comedic than the rest of the franchise. In fact, the comedy elements were praised, while the film's low points were the dramatic ones. It grossed $500 million worldwide and earned an 80% rating on Rotten Tomatoes.
* Ant-Man Darren Cross. Also, there is police officer Jim Paxton, who tries to arrest Ant-Man due to his criminal background and having escaped incarceration in the film after being arrested for allegedly relapsing to his criminal ways.
* Ant-Man: Darren Cross does not seem to care at all that he killed a number of his own employees trying to kill Scott, and even less that completely innocent people would likely die as a result of him selling the Yellowjacket to HYDRA.
* Ant-Man doesn't listen and immediately tries to take him into custody, which leads to a battle between the two.
* Ant-Man features Scott Lang being interviewed by a news program concerning the vandalism that landed him in jail. Although he tries to explain away his reasonings (a demonstration against corporate corruption), it turns out that the news program is controlled by said corporation and so the interviewer makes every effort to ensure that the corporation remains above reproach.
* Ant-Man finds out). Then he ends up working as a thief for eccentric billionaire Hank Pym, thus starting his superhero career.
* Ant-Man first shrinks himself to take down Black Widow and puts her into a hammer lock by running across her back while holding one of her fingers. He later reduces himself to sneak into Iron Man's armor and do his usual shtick of sabotaging from the inside, disabling the repulsor on his left arm before he's flushed out.
* Ant-Man. Given how grossly such a statement oversimplifies the incident in question and the fact that neither the writers nor the haters ever shut up about it, this is rather understandable.
* Ant-Man Hank Pym Pym took to riding Korr, his flying ant companion, after Janet's flying power made the catapult superfluous.
* Ant-Man: Hank Pym's motivation for being a scientist is this. Since he was a child, scientific work was the way he expressed his creativity and imagination. He's basically an artist that expresses himself through science.
* Ant-Man has this in a scene during which Scott Lang watches Hank Pym as he reveals to his estranged daughter Hope the manner of Janet Pym's (Hope's mother) death. Heartbroken, Hope asks why Pym never told her, to which Pym replies that he was trying to protect her. They seem to reconcile and are on the verge of tears, but are interrupted when:
* Ant-Man. He didn't take this development well because when he first became a superhero Captain America expressly warned him to avoid this trope.
* Ant-Man; he's the original Ant Man and is the leader of the heroes. He has his own flashback story and the strongest connection to the villain. His daughter Hope van Dyne is being set up as the deuteragonist in general considering the name of the sequel.
* Ant-Man, Howard Stark winces and closes his eyes not for his sake, but for that of Mitchell Carson, who just callously invoked the death of Hank Pym's wife to Hank's own face. Sure enough, Carson gets his face bashed into a table moments later.
* Ant-Man in a scheme to take control of it and sell space in it to the highest bidder. Unfortunately doing so would compromise the uploaded mind of Bill Foster already in there, adding even more urgency for Hank to get it back.
* Ant-Man. In fact, this is how Hank lost his beloved wife Janet. At the climax, Scott breaks his regulator to save his daughter and shrinks to sub-atomic size before managing to save himself with another gadget, returning to normal size and

provoking Hank's suspicions that Janet could be saved from her fate.
* Ant-Man. In quick succession, Scott enters the Avengers HQ, defeats Falcon in a one-on-one fight, and escapes to reveal he successfully completed the mission. Being able to hang with Falcon proves his mettle as a superhero on par with the Avengers.
* Ant-Man. In the beginning flashback, when Hank Pym resigns from S.H.I.E.L.D. upon discovering that his superiors are trying to replicate his shrink formula, Howard Stark has said that his resignation will be rejected. However, Hank leaves anyway.
* Ant-Man is described as looking like "Apple made an Ant-Man suit." This is in contrast to the suit worn by the protagonist, which was developed in the 60's and therefore looks rougher and more leathery.
* Ant-Man Janet writhing in pleasure, apparently all by herself, naked on her bed... only for a miniature, and equally naked, Hank to emerge from the shadows between her breasts and announce "Your turn."
* Ant-Man last job for Scott. That said afterwards he becomes a full-fledged superhero anyway so despite firmly jumping across the thin red line, it definitely didn't end up being the end of his exploits.
* Ant-Man, Luis tries to excuse himself for being in a restricted room to a guard by saying the boss ordered him to. The guard who he's talking to is the boss.
* Ant-Man made her an ill-fit for a public superhero team who regularly fight cosmic or world-threatening dangers.
* Ant-Man: Made in 2015, prologue set in 1989 plus a brief but important flashback to 1987.
* Ant-Man, near the end of the film, Hope, Cross and his guards are all training guns at each other. Lampshaded by Carson who moves backwards out of the firing line.
* Ant-Man, not even his criminal history and lies is enough to deter her affection to her mom's exasperation. In turn, Scott cherishes his daughter and she motivates him to turn his life around and when she's in danger he willingly traps himself in the subatomic realm to save her.
* Ant-Man, on the other hand, improved upon it greatly with tighter pacing, more entertaining dynamics between the main characters, connections to the MCU that came across as far less forced, and a more interesting, fun, and unique plot that featured a compelling, sympathetic antagonist in the form of Ghost.
* Ant-Man: Part of the estrangement between Hank and Hope comes from the fact he sent her to a boarding school after her mother died.
* Ant-Man, rather than one crafted "organically" from the swarm itself.
* Ant-Man's abs before remembering that she is there to tell him that Hank wants to talk to him.
* Ant-Man Scott for most of the movie because her father chose this random dude to be his successor and not his own daughter.
* Ant-Man. Scott lands on a taxi at the end of his first outing with the Ant-Man suit, but since he's miniaturized at the time it only causes a small dent. And then he returns to normal size, puzzling the driver.
* Ant-Man, Scott Lang gets fired from his job running the counter at a Baskin-Robbins because of his criminal record. And that was the best job he had been able to find after getting out of jail, despite having a post-graduate degree in Electrical Engineering.
* Ant-Man Scott Lang is chosen by Hank Pym to take up his role as the titular hero, and combined the super suit's shrinking powers with his thieving skills in order to steal back Pym's stolen research. Hilariously lampshaded by this exchange:
* Ant-Man: Scott's goal is this, as he wants to be a good role model for his daughter. He does prove willing to risk it when circumstances conspire to keep him from the child support he needs to see her, though.
* Ant-Man, Scott sics a bunch of bullet ants on one of the guards. The guy reacts as if he's been stung by a bee, rather than collapsing into a quivering mass of blinding pain and muscle spasms. The sting of the bullet ant is more than 100 times as painful as a honey bee sting and is about as painful as getting hit by a bullet. Maybe if the man had acted realistically, it would have seemed too cruel.

* Ant-Man' second week during its first week and staying at the top in its second.
* Ant-Man since the miniaturization process preserves the subjects density. The effect is the same as if a toy train hit a full sized human and the train just bounces off.
* Ant-Man stealing a can of refreshing Coca-Cola from Dr. Bruce Banner's lab. The Hulk chases Ant-Man down the streets of Manhattan, causing severe property damage.
* Ant-Man: Subverted by Hank Pym, Scott Lang, Janet and Hope van Dyne. They have red lenses in their Ant-Man or Wasp helmets, but they're quite a nice bunch.
* Ant-Man that the only thing Scott has to say by the end is "...What."
* Ant-Man the helmet itself only facilitates breathing when shrunken. Ant commands are issued via a small device worn over the ear that translates thought waves into an olfactory signal the ants can act on.
* Ant-Man, the police "lose" some of the paperwork connected to Scott's latest arrest, tainting the case against him and making him once again a free man.
* Ant-Man. There's only one Yellowjacket suit, but Pym makes a point of having the mission to steal it include wiping the servers at the facility that built it and completely demolishing the building itself so that Cross won't be able to reconstruct his research without starting completely from scratch.
* Ant-Man: The shrinking technology is combined with C4 explosive to create a form of compression bomb, utterly destroying a research facility and any information inside while avoiding collateral damage (the staff has been evacuated).
* Ant-Man: The Wasp got her powers through being genetically modified by Hank Pym.
* Ant-Man, the weapon could be dangerous in the wrong hands. Cross shuts him down and promises to talk about it later. In true Bond villain fashion, Cross then follows him into a restroom and uses an unstable shrinking ray to do away with him.
* Ant-Man (though Pym is still present as the inventor of Lang's gear).
* Ant-Man to marry him in this state knowing that he was normally too shy to do it despite both of them wanting to. While Janet believed she was helping Hank, he would backbite and hurt her emotionally during their marriage until the incident when he slapped her led her to call it quits.
* Ant-Man, to the point where this is almost what the two are most famous for.
* Ant-Man tried to include Wasp as part of the team, but had to write her out of the script.
* Ant-Man: Unsurprisingly, Hank Pym uses ants carrying micro-cameras to spy on Scott (before recruiting him as Ant-Man) and to follow him on missions (afterward).
* Ant-Man, using his tiny size to hide so he could watch women shower without their consent.
* Ant-Man-verse, his maximum height was designated at 59 feet, 11 inches; any bigger and his body would collapse under its own weight.
* Ant-Man version) every couple of years when something bad happens to Jan and/or Ultron does something horrible that he blames himself for.
* Ant-Man was promoted with tiny billboards carrying the film's name that were placed in a number of cities in Australia and several other countries as well.
* Ant-Man, when Darren Cross uses an imperfect shrink ray to reduce an intransigent investor to a tiny glob of fleshy goo.
* Ant-Man, when Scott — an ex-convict — turns up uninvited at his ex-wife's house for their daughter Cassie's birthday party.
* Ant-Man When Scott shows up at his daughter's birthday party (that he wasn't invited to) he brings along an incredibly ugly and slightly terrifying rabbit toy that says "I love you". Later scenes show Cassie being honestly fond of the present.
* "Antmusic" by Adam and the Ants is about how they have a whole new beat, and why you should "unplug the jukebox" and listen only to Antmusic.
* Antoine calls Sonic egocentric and does not play well with others which is sometimes true, but Antoine isn't any better. He himself had an ego for a time and in all honesty Sonic has earn the right to brag about himself. Considering he runs head first into battle against tyrants that put him as number 1 on their shit list and never backs down or is intimidated. Antoine can only dream to get that far.
* Antoine D'Coolette. He's very chivalrous and proper and an expert swordsman. This

culminates in issue 234 where he grapples with Metal Sonic and nearly dies all in the name of service to the king.
* Antoinette Frank, a New Orleans patrol officer, encountered a local drug dealer named Rogers Lacaze and found herself madly in love with him. The two became partners in crime, pulling people over and robbing them in Frank's squad car. They eventually committed a violent robbery of a Vietnamese restaurant where Frank worked off-duty as a security guard, in which Lacaze shot and killed Richard William, another NOPD officer moonlighting as a security guard for the restaurant, while Frank shot two of the owners' family, and tried to kill a third before other police arrived. Frank was convicted for her role in the triple-murder and was sentenced to death. After she was sentenced, it came to light that she'd killed her father about a year before the robbery and buried his body under her house, but the authorities chose not to prosecute her since she was already on death row.
* Antoinette Tuff with the gunman, showing him compassion, opening up about her own troubles, and gently persuading him that shooting up a school wouldn't help him overcome his own demons, and to put his weapon down and turn himself in. No one at the school got hurt, not even a police officer. Needless to say, Ms. Tuff was instantly hailed as a hero all over the country.
* Anton Chekhov are ostensibly comedies, and they are still considered comedies in Russia. However, many other cultures tend to miss the unsentimental amusement Chekhov takes in his myopic characters and their future, and consider his works much darker, even tragic.
* Anton Chekhov, continues to work for the family after the abolition of serfdom and even denounces the emancipation as the worst evil that could have possibly befallen Russia's serfs. More generally, it is itself practically a trope of late nineteenth century Russian literature to depict the serfs as having been better off before emancipation. Chekhov again features wonderful examples in his short story "Peasants."
* Anton Chekhov than nothing happened). After Ibsen, the living room and people's houses became the center of battle for stage. The problems of everyday people became the stuff of high drama, no less grand and capable of arousing pity and fear as the Kings, Demigods, heroes and schemers of Greek and Elizabethan Theater.
* Anton Chekhov was a famous doctor and considered literature something more of a hobby.
* Anton Ego in the film, and he while he may be vicious in his criticism of substandard food, when presented with genuinely great work he is completely honest about it.
* Anton Ego's bone-chilling grin as he places an order for Linguini's heart roasted on a spit.
* Antonia also accomplished the infamous feat of making Ramsay vomit with her Mardi Gras Gumbo, only this time Gordon forced the other contestants to taste it as well and they all looked to be within an inch of throwing up themselves.
* Antonín Dvořák initially fell in love with Josefína Čermáková, though she did not love him back and ultimately married another man. Dvořák ended up marrying Josefína's younger sister, Anna.
* Antonia Forest's "Marlow" books (published between 1948 and 1982) featured schoolgirl characters, who only aged a few years throughout the series, experiencing post-war rationing, colour TV and punk-style make-up. Her comment in an interview was similar to that of the
* Antonia's Line, a character known only as the Protestant bangs on the ceiling with a broom whenever the lady above him, Mad Madonna, howls at the moon.
* Antonia's Line: Danielle's daughter Therese says "I'm a child prodigy," and she is, having been able to do arithmetic since she was three and being able to figure out squares and square roots of four-digit numbers while she's in grade school.
* Antonie Van Leeuwenhoek tested his microscope on pondwater, spoiled milk, and semen (his own, in fact.)
* Antonio Banderas co-starred — the film was also dumped on DVD without a theatrical release (it was however the top-renting movie the week it was released

on DVD, giving sort of a happy ending for the film).
* Antonio Banks's catchphrase was "Read Between The Lines!", which he usually said while holding up three fingers.
* Antonio Brown's NFL career looked to be on ice after a rash of the off-the-field issues, including rape, sexual assault, and nearly hurting a 22 month baby as he was throwing furniture from his Pittsburgh apartment onto the sidewalk. But Tampa Bay took a chance on him and he appears to have cleaned up his act and helped Tampa Bay win their second Super Bowl.
* Antonio Cesaro about his response to the negative reaction Cesaro's victory seemed to inspire in the audience. The audience, who hadn't been showing much reaction at all, immediate started booing, almost as an afterthought.
* Antonio Cesaro, after months of her distracting Santino to help Cesaro.
* Antonio Cesaro being added as a tag-team partner in a stable known as The Real Americans. Hilarious in that, even in Kayfabe, Cesaro is a naturalized citizen, not a native-born American.
* Antonio Cesaro catches Tyson Kidd's real life wife Natalya like this after she was standing on the side of the ring and he accidentally knocked her off. He just threw her aside when he saw his partner was being counted for the three count however.
* Antonio Cesaro even has these as a heel. While generally not used strung together, he does these 4 moves every match: superplex from apron, giant swing, pop-up European uppercut, Neutralizer.
* Antonio Inoki, a consummate professional and one of the "living legends" of Japan, was also given the heel tag in the US. However, given that he (beat) fought to a draw with Muhammad Ali in an exhibition match during Ali's "Take on all comers" world tour, he probably deserved it.
* Antonio Inoki did in United States. Many martial artists unrelated to pro wrestling, like judokas, karatekas, amateur wrestlers and MMA fighters, have confessed being sucked into the martial arts world during their childhood by watching Inoki or Tiger kicking and grappling evil foes in the ring. The same can be applied to United States as well, given that many a sport wrestler can tell he begged to join the school club out of love for the WWF.
* Antonio Inoki in general garnered this reputation in Inoki's efforts to prove professional wrestling the strongest style in the world and his particular brand of strong style the strongest of all professional wrestling. The NJPW dojo would attract and open its doors to any fighters who disagreed, then shut its doors on them and have the best guys in their locker room beat them up.
* Antonio Inoki: Served two terms as House Councilor from 1989-1994 and 2013-2019.
* Antonio López de Santa Anna, President of Mexico, famously traveled to Texas to personally take charge of the military's efforts to put down Stephen Austin's rebellion. Of course, had he not done this,
* Antonio Salieri was a 18th and 19th century composer who was very famous during his lifetime, but faded into obscurity in the decades beyond. In 1984 he suddenly became more famous again, thanks to
* Antonio Salieri, which flopped right off the bat and, along with the changing politics in Europe at the time, convinced him he no longer had the drive to continue to write operas.
* Antonio threatens Grace in order to compel the protagonist to cooperate with his "game" against Diego.
* Antonio Vivaldi) is Discipline, while the "invention" (the fanciful, programmatic passages) is Harmony, in the sense of this trope.
* Antoni Van Leeuwenhoek: This Dutch biologist did a lot of microscopical research that helped people's understanding of how the human body works and how illnesses operate. Humanity owes a lot to his man in the fields of medicine.
* Anton Jr. (Vincent's younger brother) turns out to be something like this as well. The audience doesn't get to know him very well, but he's definitely the Ace in their father's eyes, and seems at least a little Broken considering his issues with the fact that his non-engineered brother beat him in a swimming race
* Anton Karas, a single release of which reached #1 in the US and became the first

record to sell half a million copies. His other compositions are almost completely unknown outside a few devoted zither players.
* Anton Lesser auditioned for the role of Maester Luwin. He later played Qyburn.
* Anton's begins with him being declared Duke of the Griffin Duchy and outlawing any religion except the worship of Elrath, the Dragon of Light. This upsets the orc tribes who live in the lands bordering Anton's Duchy, who prefer ancestor worship over organised religion, and Baron Djordje, who maintains temples to Elrath's brother Ylath, Dragon of the Skies, in his lands.
* Antony affably taunts Brutus for giving a speech "too cerebral for that kind of audience".
* Antony and Cleopatra, a messenger tells Cleopatra that Antony has remarried, so she threatens to more or less play football with his eyeballs, among other nasty things.
* Antony and Cleopatra - Antony is forced to marry his comrade's sister, and his betrayal of that in favor of the Egyptian queen leads to a misunderstanding where he thinks she's died and then kills himself. She likewise suicides in the climax of the play.
* Antony and Cleopatra, as shown in the exchange at the beginning of this page.
* Antony and Cleopatra. Before one of the battles, Mark Antony gives an incredibly depressing speech ("Haply you shall not see me more; or if,/A mangled shadow: perchance to-morrow/You'll serve another master.") This is the only battle in the play that Antony actually wins.
* Antony and Cleopatra. Caesar, Cleopatra's previous paramour, was accused of letting his love for the Egyptian Queen cloud his judgement.
* Antony and Cleopatra, Cleopatra suggests playing a game of billiards, a game which wouldn't exist until about 1000 years later.
* Antony and Cleopatra has Caesar order respectful treatment of the eponymous characters' corpses after their mutual suicide.
* Antony and Cleopatra similarly allow their obsessions with one another to override any sensible political judgement, so that they needlessly make an enemy of Octavian.
* Antony and Cleopatra, the two nations of Rome and Egypt play foil to each other, with Rome with a superego, duty before self set of ideals while Egypt is far more hedonistic and leans towards the id.
* Antony and Cleopatra when their affair starts a war and turns all their people against them.
* Antony and Galen in the second and third books, respectively, of Marie Brennan's
* Antony and the Johnsons: Former lead singer Anohni, now a solo singer-songwriter, is a trans woman.
* Anton Yelchin confirmed in July 2016 that they will not recast the role for the next film.
* Anton Yelchin Russian, but came to America as a young enough child that he didn't normally have a Russian accent at all when speaking English. He was also doing it in homage to Chekov.
* Antony previously had pretended he was appalled by this trope, but in his usual insincere but lovable fashion he was only using stealth puns or indirect insults.
* Antony Starr downright have people shocked at how just putting glasses makes Starr a totally different person!
* Anton Zilwicki and Cathy Montaigne just keeps the proportion. He is about 5'6" (168 cm) tall and just as broad; she's about 6' (183 m) tall and
* Antopia is about a young ant named Buzz Lightbee. He begins as a naïve high school boy trying to impress his crush, Princess Samanta, to saving his town from certain destruction.
* ANTR uses some stock footage itself, from the 1943 Nazi propaganda film
* Antryg is Ugly Cute, with a thin and gawky build, a peculiar face where every feature looks too big for the bone structure, a huge beaky nose, a scary
* Ants and other insects are a classic example. While actually weak compared to say humans under a strict application of the Square Cube Law, they easily trump a linear interpretation of size to strength. Ants can

* Ants can be grown to human-size without ill effects, or even a containment suit, and retain their proportional strength.
* ants can combine this trope with, creating a bridge with which they attack a wasp nest.
* Ant Simulator was an ant simulation game in development that ended up being cancelled. The lead programmer resigned after claiming the game's Kickstarter funds were being mismanaged.
* Ants In Your Pants" by Eric Nagler & Friends to Eric when his head levitates from from his body and then rolls away.
* Ants, such as army ants, will often attack a larger creature's soft spots in order to bring them down or drive them off. People being attacked by army ants can expect — in addition to painful bites and blisters — to get ants in their mouth, nose, eyes and ears. There have been a few cases where ants have killed infants and small children by
* Ants talk by releasing pheromones into the air. I will leap to say it's like if we farted to each other to speak!
* Ants will swarm over their unfortunate prey, and tear them apart bit by bit.
* Ant to Erik Larsen, Mario Gully attempted to produce a new comic starring a nigh-identical character called "Bugg".
* Antz, at the start of the fight with the termites, a soldier ant grabs Z and drags him to the screen as we zoom into his mouth.
* Antz, Azteca is denied her rations for a day after standing up to the foreman on behalf of her new co-worker, Weaver.
* Antz before chasing the protagonists down with a beam of sunlight. They get away, but end up hopelessly lost in the process.
* Antz elite; and the flies and other bugs in "Insectopia" are free-willed hippies.
* Antz everything he dreamed of — but in the end he voluntarily leaves because he decides that saving the colony is more important than selfishly living out his days in idle luxury.
* Antz, General Mandible offers this to Princess Bala, but she calls him crazy. He believes historians will beg to differ.
* Antz has a lowly worker ant pretending to be a soldier to impress a princess. It's also inverted with a female worker ant who forms a relationship with a member of the soldier caste.
* Antz in this case. Ever try to kill an itty bitty ant with a flyswatter? It's not easy.
* Antz, just a worker impersonating one, and he got dragged into the war) survives through sheer luck.
* Antz replaces "High Hopes" with a soft piano version of the main theme.
* Antz: The ant army of the colony does this before the Queen and her generals as they're being sent off to fight the neighboring termite colony to the death.
* Antz. The Queen has an enlarged abdomen and gives birth every ten seconds, though Princess Bala does not yet look any different from a worker.
* Antz, the termites are completely non-anthropomorphized. However, despite being portrayed as monstrous creatures during the war scene, they do seem capable of intelligence, as General Mandible and the Queen discuss earlier peace negotiations with the termite colony.
* Antz wasps). Chip is referring to Muffy as "Cuddly Widdles" and "Wattling Kiddles".
* Ant Z when protagonist Z appears to have drowned before being resuscitated by Bala.
* Antz, when the Mega-Tunnel is opened and the water flows through, everybody goes nuts despite the Queen trying to calm them down.
* Antz when Weaver meets Azteca. The camera switches to his perspective as Weaver checks out her legs… which are four completely alien-looking limbs that don’t even look remotely attractive to humans. She then directs his attention back to her eyes.
* Antz who deliberately sends thousands of soldiers loyal to the queen to their deaths in an attack on the termites, so that he can then wipe out the rest of the

colony, and start his own colony that consists of nothing but soldiers in it.
* Antz who wants to exterminate the "weak elements" of the ant colony.
* Antz, Z is the only survivor of the war between the ants and termites because during the midst of battle he fell into a hole which was then covered by a dead termite when he awakens he finds that everyone including his friend Barbetus have perished in the battle.
* Anu and Padomay are the personifications of the primordial forces Stasis/Order/Light and Change/Chaos/Darkness, respectively. Their interplay in the great "void" of pre-creation
* Anubis arrives in "Homecoming" and renders their internal conflicts moot.
* Anubis at one point fires a superweapon at Abydos. He detonates the stargate itself causing a massive explosion killing everyone on the planet. It's unclear if the planet was destroyed, but it was certainly left uninhabitable.
* Anubis,Cheap Trick, and Milagro Man go one step further, and are parasitic, causing negative effects to the User.
* Anubis II, by the same company. It states that you can throw bombs by moving the Wiimote in a throwing motion while holding A...which would be fine, except that bombs do not exist in this game.
* Anubis sends a message to the President of the United States (by projecting himself right into the Oval Office) to "surrender Earth", the President acknowledges that the U.S. is only one of many countries.
* Anubis's mothership over the capital of Kelowna on Jonas Quinn's homeworld of Langara. Less suspenseful for the viewers, as there no doubt that Anubis wants to invade, but true for the people of Kelowna, who have never seen a
* Anubis the galaxy and he only manages to use his semi-ascended knowledge to further his goals for two reasons: first, he's really great at subverting the rules and finding loopholes; and second, he's being kept around semi-ascended instead of sent back entirely as a way to punish the person who helped him to ascend in the first place.
* Anubis; the guy tricks himself into ascension, the Ancients are ticked off at this and pretty much kick him out of ascendedness, but leave him as an unkillable energy being with all the knowledge he had gained. Granted, he had some limitations on what he could do, but he could pretty much run over anyone in his way.
* A nuclear bomb core is a small dense ball. It would likely remain intact if hit by a conventional anti missile explosion. At worst, it would be broken into a few large chunks.
* A Nuclear Error — not common factual inaccuracies about nuclear weapons appearing in fiction.
* A Nuclear Error nowadays, and the latter might in turn be substituted for the former. This would really only work if North Korea were portrayed as much more powerful than it really is, but Hollywood doesn't seem to have a problem with that.
* A Nuclear Error: Where a work takes creative liberties regarding nuclear weapons and nuclear weapons policy.
* A nuclear weapons-worshipping civilisation turned up in one issue of the Dutch comic
* Anu, ending Padomay's threat to creation "forever". From the intermingling of their spilled blood came the "et'Ada", or "original spirits", who would go on to become either the Aedra or the Daedra depending on their actions during the creation of Mundus. (Some myths state that the Aedra come from the mixed blood of Anu and Padomay, while the Daedra come purely from the blood of Padomay).
* A Nuisance Though Thou Art novel variant, when Sibenar learns about Maia's guardian suddenly dying and immediately starts to spout guesses about suspects and killing motives. His sister has to yell at him for making him stop.
* A nuke hitting a unifield shield is dangerous, but can easily be handled by competent technicians.
* A number of A and B-list heroes fall into this. Notable examples include:
* A number of Abyssals would also qualify, mainly the ones who take the title "deathknight" literally.
* A number of action-adventure shows over the years have attempted real time or

near-real time in relation to some critical event, usually a bomb.
* A number of alien extras have been seen using parts of previous monster costumes. One of the most noticeable was in "Dogged", where a guy on Gruumm's ship had
* A number of Al Jaffee's wacky inventions have actually managed to become a reality in spite of the intended silliness of them:
* A number of armor pieces for players, as well as some for NPCs fall into this.
* A number of artists have made songs with intentional backmasking, to poke fun at the phenomenon and/or cheese off
* A number of auxiliary units have a history of just being civilian amateurs doing a job when their expertise is needed by the military and then being given uniforms and being put into the command structure e.g.
* A number of background elements seen when the Crystal Gems visit old Gem locations on Earth hinted heavily at
* A number of Barney shows are exclusive to international markets, notably Asia and Latin America.
* A number of "beat the Enderdragon in Hardcore without doing X" challenges have become popular. Possible limitations include: no mining, no crafting,
* A number of Bitmap Brothers games in the late 80s and early 90s use music from Rhythm King artists:
* A number of books allow the player to choose the gender of one or more love interest (Rory Silva in
* A number of box sets shrink this again, with an entire season's worth of episodes on between four and six discs, squeezed into a thinner-than-VHS-sized case.
* A number of British comedy panel shows seem to have begun using this, examples including
* A number of British writers have also done this, some (like Brian Clemens and Leigh Vance) more successfully than others (like Dennis Spooner).
* A number of cards can be used to banish a card facedown, which is more or less this - it's been ruled that, since it's facedown, that means it can't be identified by other cards, so any attempt to bring back a specific card that's been banished facedown won't work. Only cards that return
* A number of cards use this in the mechanics, but don't play it for comedy.
* A number of character-driven RPGs give characters compulsions to act in certain ways and require expending resources to ignore them, effectively making Out-of-Character a form of
* A number of characters could be said to be this, but none so much as the Winter Soldier, of all people.
* A number of characters from this comic have been treated in such a way they can resist the effects of
* A number of characters have special ways they refer to the player character: some of the first-years call her some variation of "nee-san", Natsume calls her "Koneko-chan", and Rei and Kuro both call her "Jou-chan".
* A number of characters — including Carmilla, Diamondback, Scald-Crow, Elle Ruud, and Glow — killed during their origin stories. Sandra, Grainne, and Elle were each acting in self-defense, as was Carmilla for the most part (the exception being a
* A number of characters prove to be recurring when we thought they'd only be of the one-shot variety. Most of the characters (the named ones, anyhow) in the series have a series of overlapping relationships, and so show up in multiple contexts. Lady Marianne receives several different interpretations,
* A number of characters which were supposed to be the next generation of heroes. Among them
* A number of characters who join up with the crew are mentioned or shown in flashback a significant time before they do so. For example, Nightbeat makes a minor appearance in a flashback during season 1 before joining the cast as a major character in season 2.
* A number of combat flight simulator games featuring missile-armed jets fiddle

with this trope.
* A number of commentators said this about the fledgling Formula E championship, an all-electric top-level racing series, after a major accident on the last lap of the first official race. The incident, between Nico Prost and Nick Heidfeld, generated buzz about the series in a way that simply talking about the fact that it was the first all-electric motorsports championship never could, though it probably helps that neither driver was hurt in the incident.
* A number of competitive racing series have contestants racing in nigh-identical vehicles in order to level the playing field, so that teams without millions to throw at aerodynamics research can stay competitive, though most allow
* A number of conservative factions in Germany supported Hitler because they thought they could control him.
* A number of daimyos and other samurai lords can fall into this trope, usually because they're some combination of
* A number of "default" deities not specific to any one setting include a number of these:
* A number of democratic countries have systems where if candidates die during election campaigns, their names remain on the ballot and their parties can select a new person to fill their positions if they win. The most celebrated recent example was in 2000, when Missouri governor Mel Carnahan, who was killed in a plane crash three weeks before, won the US Senate election against the incumbent senator. This marked the first time that a sitting US Senator was defeated by a dead person. His widow was appointed to fill his seat.
* A number of demons, such as armanites and bulezaus, are vicious fighters who eagerly attack anything they encounter and turn on each other if no better target presents itself. More powerful demons find them useful as shock troops, as they're often brave to the point of insanity and terrifyingly savage.
* A number of Dinamic games end on the promise of a continuation, including
* A number of dinosaurs are portrayed with "fur", which, at the time, was a very unorthodox idea. As
* A number of driver's education films, especially the 1950s but as late as the early 1980s(!), were rife with this. Usually, these were teenaged boys who were hot-rodders and depicted as rebellious and reckless drivers. Prime examples were
* A number of early Clan 'Mechs are possible composites of preexisting 'Mechs, especially the various "Unseens" affeted by the Harmony Gold case. The
* A number of early promotional images and even an action figure depicted
* A number of enemies are recolored for stronger versions. Most apparent in the enemies based on the playable classes like the sorcerer or ninja as there are many versions of them that show up.
* A number of episodes have battles with COBRA that take place in winter or arctic conditions. One episode features a
* A number of episodes involve Bajoran collaborators with the Cardassian Occupation of Bajor:
* A number of episodes of (especially the longer TV specials) involve some criminal leaving a trail of clues—either because they secretly want to be caught and stopped, or because they're just
* A number of episodes such as "Overnight Success" and "L is For Love" were banned in countries like Greece and Russia for featuring Clyde's
* A number of episodes that don't feature the whole family will focus on a specific set of characters, meaning there's no one character to appear in every episode. For example, the aforementioned "Uptown Funk" doesn't have an appearance from Adelaide's older sister Sid.
* A number of fairy tale protagonists are orphans or in the custody of a wicked stepfamily: "
* A number of famous characters appear in the background at the Summit, including
* A number of famous football (soccer) players and coaches have achieved near-godlike status in the eyes of their fans, and in the case of the very greatest, in the eyes of
* A number of fans and critics decried Burton's film for the unforgivable

"alteration" of making the other children's fates known to the viewer. There is a widespread perception that the classic film left their ultimate endings ambiguous, even implying that they all died. Not only is this not an alteration from the original text (there's an entire chapter called "The Other Children Go Home"), it's not even an alteration from the first film, where Wonka tells Charlie the other children will be fine, but hopefully a little wiser.
* A number of flying aces, such as Mick Mannock, James McCudden, Eddie Rickenbacker, Tommy McGuire and "Ace of Aces"
* A number of flying mounts exist as well, including the biomechanical rasters and the xi-drakes.
* A number of foreign volunteers served in the Rhodesian security forces during the 1970s.
* A number of former Soviet soldiers now run training seminars dedicated to self-defense and firearms instruction in America and Canada. Two of the most well-known examples are Saulius "Sonny" Puzikas and Maxim Franz. They appeared on the "Green Berets vs. Spetsnaz" episode of
* A number of friendly fire incidents have happened in Afghanistan during
* A number of German military, German civil service, and Nazi Party officials at the IMT/Nuremberg and other trials post-
* A number of giants and related creatures appear as semi-megabeasts, rare and powerful creatures that periodically attack fortresses and can destroy buildings but which are more common and less dangerous than true megabeasts like
* A number of goddesses avert this though: Amphitrite doesn't shower Percy with affection, but she doesn't go out of her way to make his life unpleasant. Similarly
* A number of Hitchcock's heroes fall into this, but especially Roger Thornhill in
* a number of injuries she's sustained from various historical events.
* A number of Inquisitors can also lay claim to this trope. Notably, enough Inquisitors have disguised themselves as
* A number of international markets had not yet aired the end of the third season of
* A number of Jack Nicholson's friends had early roles in films where Nicholson was the star, including the well-known
* A number of Jacobite songs focus on this trope since many were either exiled or refused to live in a land that no longer seemed their own. Two standards of this type are
* A number of large chain department stores and others have a retinue of "codes" to use for announcing (pseudo-secretly) that something serious is going on... "Code Adam" is a missing kid, "Code Blue" is a medical emergency, "Code Gray" is someone with a gun, etc.
* A number of later versions have a further chapter in which both the mother and the older sister return for revenge with a
* A number of Laura Branigan's hits ("Gloria" and "Self Control", for example) were covers of Italian pop songs.
* a number of law-enforcement support services from detainment of suspects to handling prisoner transport.
* A number of major railroads and subway systems have these in the central control center, computerized to indicate where trains are on a simplified version of their network so that if an emergency occurs they know where it and the other trains in the system are and can get right to work on how to reroute everyone.
* A number of Marvel stories deal with and take place in these; appearances of the heroes in other media also fall under this category. Most prominent (and
* A number of mascots are designated monkeys in this regard (see also
* A number of mass-market American beers don't get off lightly either, sometimes being described as
* A number of medicines may, as one commercial put it, cause men to develop female breasts.
* A number of men fall all over themselves to sing paeans to CJ's sexiness.
* A number of Mike Birbiglia's stand-up routines center around how he's geeky, weird, and not a very good comedian. One routine, in particular, tells how he was

brought in as one of the celebrities for a celebrity golf fundraiser. He was assigned to a group of golfers, who innocently wondered who their celebrity would be. It took Mike a minute to realize that
* A number of modern countries previously existed as smaller entities before fusing into one larger state:
* A number of monsters have innate toxic gas attacks. The two best known ones are iron golems, which can produce a Cloudkill-like cloud of gas around their bodies, and green dragons, whose breath weapon is a cloud of poisonous chlorine gas (except in 3rd Edition, when poison didn't deal hit point damage so their breath weapon was a cloud of
* A number of MP3 players, as well as some media players such as VLC have controls to allow the user to intentionally repeat segments of audio or video. Some of them even allow to increase or decrease playing speed. Some
* A number of multiplayer maps, particular in the early games, have portal networks. However, those portals can't transport weapons fire.
* A number of Obsidian Order agents (with even their own memories of home wiped from their heads) pop up in
* A number of opera plots draw heavily on fantasy themes, making this
* A number of organizations and companies are now seriously looking into the feasibility of building an actual
* A number of other characters get together over the course of the story. Dragon and Defiant get one that occurs mostly offscreen.
* A number of other female characters play this up too, such as the assassins
* A number of other ghost enemies appear in various games, such as Lantern Ghosts draped in burlap sacks and Duplighosts who can mimic Mario's form.
* A number of other heroes and villains like Thunderbird, Pyro and the Swordsman are also still alive in this universe.
* A number of other pranksters exist in the parodies. Aside from Fegelein and Himmler, Traudl is occasionally shown performing antics. The Stalin Parodies see
* A number of people have been sued for plagiarism and have managed to defend themselves by showing either that the story is
* A number of people have discovered to their dismay that air ducts and suspended ceiling grids are intended to support air and suspended ceiling tiles respectively, both of which are
* A number of people support the Titans over the Olympians. A case of
* A number of popular image macros make fun of this trope, such as the Cunning Black Strategist with the caption "You've activated my race card" or the "That's racist!" gif.
* A number of Precursor races created World Ships, vessels so big that they had to be constructed as spheres to keep them from being crushed by their own gravity.
* A number of professions have stealth insults for annoying clients. Apparently, doctors will sometimes refer to patients as suffering from "fecal encephalopathy", also known as "coporophagic encephalopathy", AKA "crap for brains". Hysterical patients who just need to be quiet and go away are labelled PRATFO (Patient Reassured And Told to Fuck Off.)
* A number of promotional games make use of your webcam and AR cards to play special content. There was a Lord of the Rings trading card game web-based AR special that made use of a
* A number of quiz shows from the late 1960s and early 1970s — including the
* A number of radio edits tend to feature local shout-outs. If not a local city, then the local sports team or even the name of the station.
* A number of random world encounters include members of two opposing factions battling one another (
* A number of reality shows implicitly or explicitly reference the trope when they dedicate an episode to comparing the capabilities of the katana versus other swords and its own mythology:
* A number of real-life scientific apparatuses (used in fields from chemistry to nuclear physics) are actually referred to as "disintegration chambers". Needless to say, none of them much resemble any of the science fiction examples listed here.

* A number of rock and pop musicians are very talented despite being unable to read music.
* A number of RPG campaign settings have their own book series set in them.
* A number of Russian sci-fi novels portray future Russia as a restored monarchy with a prosperous economy. Despite being a monarchy, civil rights are still enforced. This likely stems from the idea that Russian people need a single strong ruler who gets things done and doesn't get bogged down with politics and bureaucracy. The same novels will often portray the US as an
* a number of scenes situations taken seriously in the first film are largely played for laughs.
* A number of Scooby-Doo fans have also decorated their vans into the Mystery Machine livery.
* A number of Screamers (videos that encourage the viewer to watch and/or listen intently, only to be interrupted by a loud scream and shocking imagery) pretend to be this. One of the earliest even ended with the message
* A number of shark species are harmless to humans because it is simply implausible for a human to ever share their environment, like the goblin shark which occurs at extreme depths, or the Greenland Shark which lives in frigid arctic waters. Although it's probably pretty good that the Greenland shark does so since some research will find them capable of giving humans nightmares. Such as the one who
* A number of spells allow characters to control arthropods and other vermin, such as
* A number of spells, such as Gust of Wind and Wind Wall, allow casters to control wind and air.
* A number of stadiums are noted for their particularly intimidating atmospheres, in which the fans become 'the twelfth man'. Particularly notable examples are:
* A number of stage magicians in the early days claimed in advertising and/or in performances that their powers were derived from supernatural forces. Interestingly, the first book discussing what we now call stage magic was a book entitled "The Discoverie of Witchcraft." Naturally,
* A number of Stephen Foster songs that most Americans think are "folk songs" (such as "Oh Susannah", "Camptown Races", etc.) were originally performed in 19th-century minstrel shows.
* A number of stories will occasionally make use of current events. This ranges from corporate fraud to slavery to even the then ongoing War on Terror. Usually so writer
* A number of sunken civilizations have been mentioned in passing over the series, most notably the former inhabitants of Holy Wood and the original homelands of some
* A number of supposedly true short stories about Soviet border guard sergeant "Allur" have been circulating Russian websites since the late 1990s. In one story an inspecting major enters a weapon storeroom, then a gunshot is heard. The sergeant and a private rush in and see the major and another private
* a number of supposed Muggleborn are informed they were the product of rape. One anonymous witch is extremely bitter about her parentage in her written reply.
* A number of surfaces which basically look the same, but have something a different colour (such as a row of tiles on a wall) use an internal palette change to provide more graphical variety without needing to include more textures.
* A number of television commercials in the UK for HD TV sets use this trend, using "arty" graphics over a white background. Usually in slow motion and with a calming acoustic guitar soundtrack. The tag line usually being some variation of "look at this amazing image and how detailed it is in HD". Which is fine...unless you are watching in standard definition in which case it is no more detailed than any other ad.
* A number of the actors who played the Doctor have said that they went into acting specifically because they wanted to play the Doctor. Fifth Doctor
* A number of the classic Hulk's foes had Freak Lab Accident origins involving nuclear power and nuclear radiation (originally, anyway). One of them was a janitor exposed to nuclear waste.

* A number of the Doctor's companions leave the TARDIS by choosing to stay somewhere they visit on their travels (though not necessarily
* A number of the generals are this until you beat some sense into them. Many of them still profess loyalty to the emperor even as they join you, but find themselves in opposition to the country's direction under Windy. Most of them rejoin the reformed government.
* A number of them had a surprisingly prominent presence in the story. Though none were immune to being
* A number of the Shatter toys also depicted her with a battle mask that she doesn't actually wear in the Earth portions of the film (aside from when she briefly confronts sector 7), another holdover from earlier concept art.
* A number of titanspawn are... updated. The Centaurs are a biker gang
* A number of toy and model kit manufacturers over the years have released older items in current packaging, designed to remind one of the old packaging. Hot Wheels Redliners are still available in some places, Matchbox once released a series of diecasts in modern blister packaging but with a little box similar to their oldest form of packaging included, and Round 2 Models, who own a few of the older brand names of model kits known to older Americans, often use the original box art for kits first released in the 1960s, unless there are legal issues to work around (such as losing the licence for
* A number of transvestites appeared in "Jupiter Jazz", an episode of
* A number of unauthorised Harley-Davidson crate motors and engine parts such as those from Alan Sputhe and S&S Cycle are of equal if not superior craftsmanship compared to the real deal, sometimes even improving on what Harley did especially with hot-rodded and those so-called "stroker" bikes with larger engine displacements than what Harley usually offers. One such engine part is a gear-driven cam assembly for the Twin Cam, whose chain-drive cam assembly is notorious for being an engineering failure due to the chain tensioners wearing out over time and fouling the oil pump.
* A number of usages of "You Are My Sunshine" in certain fandoms are this, and place emphasis on the "Please don't take my sunshine away" line.
* A number of video game commentators have pointed out that the most common interaction with settings in video games is violence, by far. Even in games where the player's character can't attack entities directly, like
* A number of video games have film grain among the video options, as an homage to older movies:
* A number of viewers and critics deride the Filipino television station
* A number of voiceover-over-slide-show video series have followed Yahtzee's lead, including former
* A number of weaponised stink agents exist, the most recent one the Israeli
* A number of weapons resembling hammers have been used historically.
* A number of well-known classical composers — especially of the
* A number of White Flayers craft are nothing but spinning sawblades with engines.
* A number of women fall all over themselves to sing paeans to Josh's sexiness.
* A number of YouTube videos expand popular videos spoken in vernacular to long-winded pseudo-intellectual conversations backed with classical music, e.g.
* an unabashedly queer and Satanic-themed music video, with the ensuing controversy highlighting its staunch support, earning Nas X his second #1 hit.
* a nun and a Buddhist, specifically Mother Teresa and the Dalai Lama.
* A nun and a priest are camping in the middle of nowhere, but the nun keeps getting cold and asking for blankets. Eventually, the priest says, "Seeing as no one's around, I think we should act as though we're married." The nun agrees, and the priest says, "Get your own blanket, you cow!".
* An Unattractive Vampire they became immortal abominations, they're far more skilled in combat too. Six Elder Vampyres cut through sixty modern vampires like wheat.
* An Unattractive Vampire they become immortal abominations (the traditional way to become a vampire is to just be "too evil to die"), so they are much more experienced in combat.

* an unbelievable source of information: It could be psychic powers, time travel from the future, super-powered senses, or a secret nation-wide spyware A.I. in a world where those sorts of things are widely believed impossible.
* an unbelievably cool black longcoat in the tenth movie. As if he wasn't badass enough.
* An Uncle Scrooge story has Scrooge and his nephews trying to buy famous landmarks from all over the world. Everybody just angrily tells him no, until he gets to "buy" the Cheops pyramid from a local huckster in Cairo.
* An uncommon take in that we get to see everything from his point of view, so we know what decisions he makes to make him appear as
* an unconscious expectation of military prowess, especially in noble bloodlines. Oh, and due to the whole 'living for over 5000 years' thing, it can be a little difficult for them to get the significance of a decade here and there - which Harry, who's 13 at the start of the story, and has abandonment issues, is not pleased about.
* an Undead Alternate Universe Robot Clone. Incidentally, the other UAURC, Wodan Ymir, manages a similar look by losing half of his mask in his final scene.
* An undercover cop arrests a man for selling drugs... who turns out to be
* an undercover investigation where he was posing as a teenager with bad acne. Later, Randy pays Dr. Polanski a visit so he can take the pictures back by prying them off the wall with the receptionist's pen, only to knock a number of other pictures down and ultimately rip the picture in question off with a piece of wall plaster still attached.
* An "underground" game allowing you to encounter other players, and set harmless "traps" for them. There's also a mini-game within the mini-game that's somewhat similar to Battleship. Both of these parts are encouraged, to achieve 100% completion.
* an underground subspecies of humans who would do anything for the good of the society.
* An underpopulated world in which the Depopulation Bomb only affects humans (or only primates, only mammals, etc...) justifies a return to hunter-gatherer or other primitive lifestyles that can only support relatively small (non industrial-level) populations, thus solving the issue of how the characters feed themselves. May be part of an
* an undertaker believed that one of the local operators was routing calls to her husband, his competitor.
* An underwater version of this is seen in the wreckage of the USS Montana in
* An underweight failing newborn was saved by a hug from her tiny twin sister in
* "An Unearthly Child" — Za, an older established leader in way over his head and willing to resort to brutality to keep his leadership, and Kal, a young outsider trying to sow dissent and usurp Za — with the struggles between the Doctor, an old time traveller in way over his head and willing to resort to brutality to survive, and Ian, a young outsider trying to save Susan and Barbara from the Doctor and take control of the situation.
* "An Unearthly Child", has the TARDIS land on another planet and the radiation meter rise without the TARDIS crew seeing.
* "An Unearthly Child" is a good example of this — the episode marks the point where Ian and Barbara do something about it.
* "An Unearthly Child": This was the Doctor's justification for kidnapping Barbara and Ian. Couldn't have them revealing the existence of advanced aliens, after all.
* an unexpected ace up his sleeve still kicks in as each story-within-a-story unfolds.
* An Unexpected Journey, one of the gargantuan stony giants has its head knocked off by a boulder flung by another such giant.
* An Unfair Comparison Between the Javelin and the Mustang." And boy, was it unfair: anyone could look at the huge, detailed photos of each car and see the Mustang was more attractive and better designed. Which worked out badly for the makers of the Javelin, who placed the ad.
* An unfettered is allowed to have multiple goals and still qualify as Unfettered,

as long as he can still prioritize ruthlessly between goals. For this reason, Unfettered are rarely devoted to more than one person at a time, since they must be willing to sacrifice others regardless of how much they love or admire them. Somebody who is willing to list his
* An unfettered may appear to do things that run counter to their objective because they understand and can manipulate entities that
* An unfortunate characteristic of nationalism in many countries in the past. Virtually every country, usually with force, has behaved this way toward ethnic minorities in some manner. To what extent remains a very contentious subject even now.
* An unfortunate controversial commercial in the 1990s for the Holiday Inn sees a business man hitting on an attractive woman in the restaurant where their high school reunion is taking place, only to recognize her as his old coworker and friend then known as "Bob".
* An unfortunately common portrayal of Sailors Uranus, Neptune and Pluto in a lot of
* An unfortunately famous example was an episode of the French comedy shorts
* An unfortunate young man, after a pub crawl, ducks into a curiously tatty and ill-lit Tube station and boards an oddly dilapidated train in one of the short stories in
* An Ungentlemanly Act after they see the building where their father is being hit by tracer fire and grenade explosions.
* An uninintentional, yet still funny (if not for the intended reason) example happens in the
* An unintentional but still viable strategy when it comes to dealing with ambushes in
* An unintentional example comes to mind in the slogan "The eggs are from real chickens. The milk is from real cows. The sausage is from Jimmy Dean."
* An unintentional example in a Russian novel, where two Russian cosmonauts somehow end up in the past during the decline of the Roman Empire. One of them gets captured by barbarians, while the other one ends up becoming a Roman legionnaire. Eventually, the latter becomes the primus pilus (senior centurion) of a Roman Legion and is determined not to let the Empire fall, while the other manages to become the chieftain of the Germanic barbarians who captured him. You can see where this is heading.
* An unintentional example in "The Pyramid at the End of the World", where a pair of scientists are running routine tests. Unfortunately, one of them had her glasses accidentally broken by her husband, and the other one is suffering from a bad hangover from the night before. The latter ends up
* An unintentional example is in the Dressrosa arc: as Dellinger was about to kick Luffy with an attack, Zoro causes him to divert the attack right into Machvise's ass. Because Machvise is a very
* An unintentional example, perhaps a subversion, occurred in 1973, when he announced he had done "the last show we’ll ever do." A lot of fans thought he was retiring, but what he actually meant was that he was retiring the Ziggy Stardust character.
* An unintentional example, related in Michael Binyon's book about ordinary people and life in the Soviet Union,
* An unintentional example: The Land Raider is a ginormous uber-manly
* An unintentional one on Scott's part which he admitted, but his episode on the
* An University of Minnesota student has get into trouble Lawrence Limburger, who supposedly bears a resemblance to Chinese president Xi Jinping.
* An Unkindness of Ghosts: After Cassidy Ludnecki's death, his brother Seamus offers his identity to a white-passing black man who wants to attend medical school.
* An Unkindness of Ghosts: Aster has an extremely fact-focused mind and struggles to parse any sort of figurative language. When Theo asks, "What have I done but keep you safe?" she says, bewildered, "Do the meals you take keep me safe? Your baths? The books you read? I'm sorry, I'm afraid I don't understand."

* An Unkindness of Ghosts, Aster is put in the brigbox, a cell too tiny for her to stand up or lie down, just sit with her knees curled to her chest.
* An Unkindness of Ghosts: Aster's notes look like they were written by a two-year-old. Giselle is the only person who can read them, including Aster herself.
* An Unkindness of Ghosts: At age twelve, Theophilus Smith reinvented the polio vaccine, becoming ill himself and losing part of his leg in the process. At age thirteen, he invented a better artificial heart than the one that already existed, saving Sovereign Nicolaeus's life.
* An Unkindness of Ghosts bangs or taps against things as she moves to synchronize herself with the ship's rhythms, which calms her.
* An Unkindness of Ghosts. We never learn what happened, especially since plant life and at least some animal life has survived.
* an unknown illness She is notably very different in that she appears more like an angel than a ghost.
* an unknown student draws a mustache and goatee on an unconscious Umbridge.
* An unlucky cow got 80% of its face torn off after colliding with a train, with the remaining half landing just a few feet away. Still alive, it continued to stand and walk. A
* An unnamed Ancient died and was buried in the ancient dwarven capital, Heart of the Mountains. The dwarves built a Crystal Gate in the city to tap into abyssal energy. As the Crystal Gate went haywire, the abyssal energy flooded the city, causing said Ancient to rise as a powerful undead creature.
* An unnamed assailant attacks Shizuri Mugino, mocking her by saying that she was once one of the most awesome villains, but now that she's fallen in love with Shiage Hamazura and pulled a
* An unnamed clone of Spider-Man first appeared in October, 1975. He would be reworked into Ben Reilly two decades later.
* an unnamed evil-doer slaughtered his village and kicked the collective asses of him, his teacher, and all of his friends when they tried to defeat him.
* An unnamed female couple is displayed quite prominently as part of the audience on the band's home planet in
* An unnamed girl who appears in flashbacks in Chapters 102 and 104 and whom
* An unnamed hiatus from August to September 2012; famous for starting the trend of
* An unnamed Iraqi terrorist group hatched a plan to use sarin gas on the London Underground system, akin to the 1995 attacks on the Tokyo Metro subway system.
* An unnamed Medusan native who wandered into the human enclave on the planet and ended up dead due to a drug overdose was responsible for much of the
* An unnamed office boy debuted in November, 1938. He was eventually given a name,
* An unnamed war that ended with the ancient Hiigarans being banished to Kharak,
* An unofficial 3rd Edition splatbook discussed the concept in regard to the dwarves. Normally, practitioners of arcane magic (i.e. wizards, sorcerers and the like) are shunned because they go against the grain among Dwarven society. The closest they come to accepting the idea is the "Raver", a dwarf wizard who was driven insane when his latent magical talent manifested, and is essentially treated as a mentally ill family member. However, if a Raver wanders off and leaves the burrow, nobody's exactly hurrying to bring them back (though they do feel guilty about feeling this way).
* An unofficial version exists in 21st Century America. In some locales, after a convicted sex offender has served their sentence, they're still forbidden from living within a certain distance of schools, playgrounds, and other areas frequented by children. Depending on how large that distance is, and how many areas are designated as off-limits, a sex offender may find that there is literally no place in a given city where they're legally allowed to reside.
* An unrelated cartoon series distinct from the above but sharing the same name, was produced in the mid-1930's by the
* An unspecified spy service apparently at least once modified a flute to fire a single pistol round. The instrument was still fully functional for musical purposes.

* An un-squicky variant from the same Verse would be the Tran practice of breathing in each other's faces, to share precious warmth on their inhospitable
* an unstoppable favorite championships, with barely any competition most years, or Floyd Mayweather amassing an undefeated record despite his recent fights being criticised and compared unfavourably to a "love story" i.e. excessive hugging), or outright mixed reception (The modern-day New England Patriots with Bill Belichick and Tom Brady).
* An Unsung Song: In "The Place of White and Gold", Licinius plans on doing more gloating, but still gets some in.
* An Untitled Abridger's part-way through the anime continued communicating with everyone else exclusively through pre-recorded messages he had left behind along with instructions to play them at certain times for the rest of the entire series. He also had a barrel of unused winning lottery tickets left behind in his apartment, though that was just to show off.
* An untitled ClayFighter 2016 game would have been a megamix of all three games like
* An untitled short story recounts how one particular alien species developed a ravenous insect designed to destroy ecosystems and commonly used it to extort other alien species by threatening to release them on their home planets. When they come to Earth, they transmit the data on their insect to humanity with the intention of intimidating them. The humans, meanwhile, mistake the communication as some form of data exchange and send back a catalogue of every bug and insect living on Earth. Suffice to say, the extorting aliens immediately leave and never come back.
* An Untitled Story and its soundtrack were originally sold for money before Matt released them as freeware.
* An Untitled Story has almost all of its areas directly connected to each other with next to no transition. MountSide and BlackCastle are an exception, as the only way to reach them is through teleporters (if one has to believe the map, one is located under DeepDive, while the latter is buried under LongBeach).
* An Untitled Story is an area where the screen swings left and right. It gets more severe the further you get.
* an untraceable murder, which threatens to create problems much like those associated with the darker aspects of the modern Internet. On a lighter side, one popular use of "logics" is to rewatch past episodes of TV shows and/or cartoons. Video streaming, anyone?
* An unusual and almost literal variation of this occurs towards the end of
* An unusual and ingenious case is with marine Markowski in the Polish dub version of
* An unusual and politically charged case: losing a final at home turf by the hands of your
* An unusual case in "Angels". A man who kept two boys captive and violently abused them is murdered in retaliation for the abuse. However, the killer is himself a pedophile who was sexually abusing a boy of the same age; he believed he was different because he wasn't violent with his victim the way the man he killed had been. Stabler is quick to call him on it.
* An unusual example can be found in the city-state of Besźel, one of the titular cities in
* An unusual example in a serious anime is the sinister Kazundo Gohda (or Gouda) from
* An unusual example in that the character in question is actually a key
* An unusual example, in that this was a ending-the-universe danger, but never actually crossed the
* An unusual example occurs with Amethyst. The process of making Gems involves sucking life away from the ground around the Gem, so mass productions of Gem can wipe out entire planets. Amethyst was made after Gems came to Earth and attempted to colonize it, with the Prime Kindergarten destroying all life in a canyon. After emerging 500 years late, Amethyst grew to think that the other Gems resented her for being the product of a project that would have destroyed the Earth, and developed deep self-hatred issues as a result. It wasn't until "On the Run" that

all of this came to light with both the audience and the other Crystal Gems, and Pearl finally told Amethyst that she considered her to be the one good thing that came from the attempted colonization.
* An unusual example of this came in "Not Daniel Bryan" heat, whereas anyone who got scapegoated for WWE's bad booking of Bryan (by either squashing him in a match or being essentially a
* An unusual inversion happens when Flora has a chance encounter at the grocery store with a young raccoon named Talitha
* An unusually intelligent and benevolent example from the Happiness Stan cycle on
* An unusually violent (by the standards of the trope) No Change example: in "Die Hippie, Die", Mayor McDaniels attempts suicide by shooting herself in the head. Just before she pulls the trigger the "camera" pans to the side, we hear the gunshot and see blood and bits of brain matter hit the wall. Later in the episode she turns up alive and completely unfazed by blowing her brains out, with only a bandage wrapped around her head (with bloodstains on
* An unusual Star Trek Next Gen example features an alien, deaf interplanetary conflict mediator/peacemaker who reads lips but has a chorus of interpreters who speak for him. When without his chorus, he uses what is clearly American sign language, though it is stated to be another form of sign language that he learned. Fridge Logic comes in when you realize that whatever universal translators they use wouldn't change the shape people's mouths are making, so how is he reading lips in languages he has never learned? Since he's a telepath, however, that may be the solution, but then why does he need to read lips?
* An unusual variant in the form of Ki Rata, the most dangerous martial art in the universe. Described as the martial arts equivalent of a weapon of mass destruction by comic author Abaddon, its basic tenet is
* An unusual variation comes in "Unstable", in which the critical death is not the innocent man, but the man who actually committed the crime. The innocent man remains alive, but with the real rapist dead, there's no way to prove his innocence, and he will have to serve out his sentence.
* An unusual version: a Leviathan ship destroys a far larger Peacekeeper Command Carrier by going into starburst while docked inside it — essentially
* An Unwelcome Quest: Gary demonstrates, in detail, his technique for moving around without making noise. The rest of the group gets it, but asks if they have to repeatedly whisper "Silently" while doing so like Gary did.
* An Unwelcome Quest. The blacksmith who forges the Mobius Blade is a video game character programmed by the Todd. He forces the heroes to watch the forging scene, and certain aspects are performed in great, dramatic detail, with a lot of showboating. Others are done with generic hand-waving motions. The protagonists note that Todd must have only done partial research on the process of forging weapons and only bothered scripting the parts he found interesting.
* An unwritten rule in British PSA films of the 1970s through the early 1990s was that at least someone must die, no matter how trivial the situation is. And in the creepiest way possible to avoid
* An up and coming one seems to be "is water wet, or does water make things wet."
* An update added in Stealth Drag, who is basically another Drag Racer, Rocket, who is basically a faster Drag Racer, and Power Tractor, who has a very slow turn.
* An updated version includes a sign reading "here be hippogriffs" next to Mount Aris, alongside a picture of a flying hippogriff, and a narwhal swimming in the ocean next to the Great Iceberg Barrier.
* An updated version of Operation has received a low reception due to
* An updated version of this sort of theory is the idea that the landmass below the ice in Antartica was the original Atlantis.
* An update has made the Master Sword's Sealed Skill Evil's Bane no longer exclusive to the Master Sword: You can pick up a randomly dropped weapon with a 25,000-KO Sealed Skill.
* An update tells you which lane you need to be in if encountering a fork or intersection and the secondary routes along the way with a change in ETA if you decide to take that route.

* An update to the original version of the game (provided you have the
* an update was done. This is as of mid-63, and is available in poster form.
* An upside-down cake, put judiciously in the path of a troll, produces a
* Anurag Dikshit, former programmer for PartyPoker and former billionaire. His last name is actually pronounced "dixit", though.
* an urban legend about a construction worker who comes home during the middle of the day to find a gorgeous new convertible parked in his driveway. When he looks in the window, he sees his wife talking and laughing with a younger man. Believing that he's being cuckolded, the construction worker proceeds to pour wet cement all over the car's interior, not realizing that A) the younger man is actually a car salesman closing a deal, and B) he's just ruined the new car his wife bought him as an anniversary gift.
* An urban legend about the groom catching the bride cheating. He goes through with the wedding, up until he distributes a special gift to the guests — an 8x10 picture showing the unfaithfulness, while leaving the expenses for the bride's family. Example:
* an urban legend about the L'Enfant Plan, the master plan for the city that produced its unique layout. The legend goes that Pierre Charles L'Enfant, the engineer who designed the city, laid out the streets with the intention of confounding any army that tried to attack it, leading them down avenues that didn't bring them to their targets. In truth, the squares and circles that the city was built around were originally supposed to be the home of "embassies" for each of the states, an idea that, in practice, was soon abandoned as the states were uninterested. (Washington, D.C., like most master-planned cities, was actually built to be fairly open and easy to navigate... by the standards of its day, anyway.)
* an urban legend about the trial of a man accused of murdering his wife, though no body was found. The defense attorney said "You can't know she's dead. She could walk through that door right now!" and pointed with at the courtroom door with such energy that everyone in the room turned to look. The prosecuting attorney responded that he saw every head turned — except the defendant's. "He knew she wasn't going to walk in. He killed her."
* An urban legend claims that a black man is depicted at the signing of the Declaration of Independence on the back of the American $2 bill. It turns out that the man is Robert Morris, a white financier who later became a Pennsylvania senator. His face appears dark because it is overly shadowed in the bill's picture, which is an engraved copy of a famous painting. In the painting, Morris is unmistakably white.
* an urban legend) for an elf, gnome, goblin, or other fantasy creature, or sometimes a statue thereof, which they keep overnight in a closet. When they wake up the next day and find out they have a frightened child on their hands, they turn the child in to the local police. Sometimes, they face criminal charges, other times they receive a cash reward for returning the missing child.
* An urban legend implies that it is a classic prank for a student give a teacher brownies or cupcakes with containing laxatives or by spiking their morning coffee with eyedrops. This is usually stated to be revenge against a particularly nasty teacher or as a way to get out of an assignment.
* An urban legend states that flies won't touch margarine because it's "one molecule away from plastic." (Also a case of
* An urban legend tells of a college journalism professor who promises his class that he will never give an unannounced test. He also tells them that they are required to read the daily local newspaper every day from cover to cover. One day the students arrive in class and most of them are surprised to find out that there will be a test. They protest that the professor promised he would never give them an unannounced test. The professor informs them that the test was announced...by a classified ad in the newspaper that they were supposed to be reading cover to cover.
* An urban legend tells of a woman pulled over for speeding. She offers to buy some tickets to the policeman's ball, but the cop responds with "Sorry ma'am, state

policemen don't have balls." After realizing what he said, he tears up the ticket and walks away rather than have to face her in traffic court.
* An urban legend tells of how a vain person sat in a hot tub with jeans on in order to shrink them into skintight-ness, unfortunately, the jeans shrank so much that it ended up killing the person from loss of circulation. The
* An urban legend that's been making the rounds online and can be read on
* A Nurse Joy that worked for the Pokemon League Inspection Agency also did this in the episode "Showdown at Dark City," as she went undercover with a trench coat, fedora, sunglasses and a scarf over her face. (She even attempted to drink her tea through the scarf!)
* A nurse's husband is visiting, but she's in trouble, so they create an elaborate scheme that creates more potential for being caught than doing something simpler and more straight-forward.
* Anu's kitchen might want to pick a better name for their restaurant.
* Anu. The roles and players are interchangeable, even in the midst of an enantiomorphic event.
* An utterly bizarre example. A girl on a biking tour stops to ask two locals if they speak English? They both reply, in perfect English, 'No, I'm afraid I don't." The girl responded "Oh I was going to ask for directions" to which the local replied "Well that would be wasted on me, as I don't speak English". This continues for a while (with the girl even trying in German with the locals replying that they don't speak German in German). At the end the girl leaves, and the two locals laugh about how they actually speak perfect English.
* An utterly bizarre example occurred with the death of the two last
* An Utterly Impartial History of Britain (or 2000 Years of Upper Class Idiots, both by John O'Farrell.
* anvilicious, but sf in the early 1970s still had some gender issues.
* Anvilicious got hold of the short, and Mike, Bill, and Kevin act as if they're as disgusted by the idea of a boy with a doll as some of the characters are.
* Anvilicious has Lucy called up for jury duty, reacting like most people would while her husband chastises her for not wanting to drop everything for this. The defendant turns out to be her ex-boyfriend, and she's excused on account of this. She has kind of a freakout begging for a chance to serve on a different jury.
* anvilicious in the part in which the protagonist's mother tells him about their past: When he was a newborn baby and his father was away on a trip she started an affair with an electric appliance repairman. Later she divorced the protagonist's father and married the repairman, who turned out to be an alcoholic, wife-beating child abuser.
* Anviliciously in the song "One Tin Soldier". In it a town has a "treasure" hidden under a mountain, which a valley kingdom covets. They invade, kill everyone, and find the "treasure" is just a plaque which says "Peace on Earth". Worse, when they first demand it the mountain people make a vague offer to share their treasure with their "brothers" instead of just telling them the truth.
* Anviliciously mode, referring to humanity's religious era as "the dark ages of superstition and ignorance and fear." Afterwards, an away team goes down to the planet to explain how irrational it is to believe in gods, saying that they never show up or tell believers what they want, and that believers are left putting their faith in what other mortals tell them.
* anvilicious. Major players are referred to with garbled names such as "Dick Chaingang", "Condi Pasta", and "Osama bin Hiden".
* anvilicious respect Klingon values by authorizing an incredibly risky, experimental surgery to reverse the damage despite her belief that Worf should receive futuristic physical therapy instead (which would still leave him basically crippled).
* Anvilicious: Subtlety is your worst enemy when it comes to arguing. The harder we hit the audience over the head, the better it will stick in their minds.
* anvilicious takedown of these tactics in "My Future Self 'N Me." Town parents hire actors to fake being "future" drug addict versions of the kids, scaring them away from ever trying drugs.

* Anvilicious - the viewers (much like the friends and family members of gender-fluid people) had time to adjust, so Alex doesn't need to mention it all the time.
* anvilicious to the point where Chekov has to declare himself "acting Science Officer" rather than his normal position as chief of Security.
* Anvilicious, tries to drive a car after failing his license exam, guilty of the classic cliché, "I did it to look cool and impress my girlfriend"- and promptly wipes out half the front entrance of the Winslow household.
* Anvilicious. While certainly not condoning police brutality, the episode briefly explores another side of this trope, when Gunn tells a drug-dealing acquaintance of his that it's people like him that can make police think they have to cross the line. It also notes that before the zombie cops were brought in, the neighbourhood had one of the worst crime rates in the city... but it had plummeted since.
* Anvilicious: Your story fails to deliver its message in a manner that is subtle and doesn't piss off people who may disagree with the message.
* Anvil is taller and even more muscular, but still attractive enough to get hit on by the resident
* Anvil on Head used straight, but used strictly in the context of parody and homages to the films that kicked off the cliche in the first place.
* Anvil Studio uses Ctrl+ S not to save (like every single other Windows program), but to create a new audio track.
* Anvil, who made a few rather careless errors: A. He decided to roll the fat kid for laughs, and B. he broke the cardinal rule that 'What happens in the sims
* Anwan Glover auditioned for the roles of Marlo Stanfield, Fruit and Drac before being cast as Slim Charles.
* A.N. Wilson is known for his non-fiction works, including books about religion and biographies. He's also released two
* Anxiety Dreams: A character dreams that something they worry about happens.
* Anxiety Dreams: I just had the worst nightmare about something I feared in real life!
* anxiety in the dreamer's waking life (and, you know, people sleeping either completely pantless or in very loose-fitting pajamas). For instance, people preparing for a wedding often report such dreams.
* anxiety tendencies tended to endear her to people with similar personalities. The largely internet-based fandom also tends to greatly enjoy her overt nerdiness.
* An X-Man finally snapped in a 2016 storyline. A serial killer in Germany had been murdering what he had hallucinated with contagious sentients. When
* Any 007 games are placed in their own continuities from the film series.
* Any 1v1 map that has the Flak Cannon and loaded with bots. Instant, fun, chaos.
* Anya, a former vengeance demon who was alive during the actual Salem witch trials, notes that real witches could use their powers to escape. "So, really, it was only bad for the falsely accused — and, well, they never have a good time." This was shown in "Gingerbread" when the only qualified witch
* Anya also did these several times to Negi... until he decided not to let her and reality ensued, showing him to be
* Anya and Xander discuss death and life right after sex. In fact, it was the sex that prompted the conversation.
* Any Abyssal who learns the Charm Immortal Malevolence Enslavement gains this at the cost of losing a point of Essence when they die, as they forge a connection directly with the Neverborn.
* Anya Christina Emmanuella Jenkins (Lame-Ass Made-Up Maiden Name)? She even goes to high school after losing her powers! Although she
* any adapt to is more limited than Nimrod, so anything that beats a Sentinel through brute force will usually still work.
* any additional water. It's not recommended (unless you're a desert tortoise), but you won't die.
* Anya developed into this, first as a consequence of being a former demon with limited knowledge of humans. Later it was revealed that she had
* Anya first played it straight and then subverted it. She was introduced as a vengeance demon, playing the antagonist for two episodes. Then in Season 4, she

became Xander's love interest there to provide comic relief and rarely get episodes of her own. When Xander left her at the altar, she became a demon again and still had a role in the plot beyond their relationship.
* Anya had great fun with this. She creates a heart-eating monster when an upset girl wishes that some frat boys find out what it's like to have their hearts ripped out. On the other hand, when asked to turn a cheating lover into a frog, she turns him French. In "
* Anya, in her days as a demon, was known as the Patron Saint for Women Scorned. When a woman was heartbroken, she would appear to her and grant her a wish, usually to torture the man in unimaginable ways. One time, a girl wished the guys who played her along, broke her heart, and humiliated her knew what it was to have their hearts ripped out and broken.
* Anya interrupts Xander (during "I'll Never Tell"). Anya also interrupts Tara during "I've Got A Theory" to sing "The Bunny Song."
* Any aircraft model actually deployed on the board is doing this. Even dive-bombers would normally only spend a very short time so close to their targets, and most aircraft are at least partly fighters or even spaceships. Being so low and slow that they can be represented on the board and shot at by ground troops is extremely unusual. Obviously this is a case where
* , Anya is far too willing to offer commentary and translate Angel's Gaelic cries while is trapped in a shared hallucination where he's having sex with Buffy (Buffy experiencing the other half of the encounter in a house that is now sealed), such as observing that Angel must both love Buffy a lot and be extremely flexible to attempt a certain sexual position.
* Any a-lifes and virtuals can have virches with vastly different physics, and so in their worlds, their biologies can be even stranger than the strangest xenos.
* Any. All of this means Clerics can be very good at one or two things and just okay in everything else.
* Any allusions to religion or classical literature is greatly appreciated by AnthonyC.
* Any all-woman promotion David McLane was involved in, whether it be
* Anya meets the same fate in the final episode. Not from the groin up, though.
* any and actively delivers presents to a large fraction of the world's children, yet the vast majority of adults do not believe in him. Review the situation: mysterious packages show up under Christmas trees that Mom and Dad certainly don't remember buying. Little Sally in the hovel next door ends up with an expensive doll in her stocking despite her parents barely being able to afford necessities and keeping the doors locked for fear of burglars. Yet despite these otherwise inexplicable occurrences, people dismiss Santa as a fairy tale or "stuff for babies."
* Any and all actions that a sentient being performs directly feed the forces of Chaos. Fighting against the Champions of Khorne, for instance, empowers Khorne because that just increases the violence. Not fighting just means you will die, which also furthers Khorne's goals.
* Any and all apologies which are: "sorry I offended you" or have a "but" justifier in the middle of it!
* Any and all dark Creturians who attack the protagonists in the web fiction serial
* Any and all pack-hunting predatory animals. Be it hyenas, wolves, Harris Hawks, Deinonychuses...they're all awesome.
* Any and all "sex tapes" scandals. Whether or not the person is at all notable is irrelevant, as is the fact that it is indistinguishable from amateur porn, famous people having sex is
* any. (And if you're making a video game, good luck justifying the time or budget for hand-lettering every sign at a realistic scale.)
* any and the former being factually untrue since any child they have with humans would be a human too.
* any and who carefully trained others to treat the subject matter carefully and diligently.

* any angry at whoever put them there. (And even worse, might be insane; the longer a prisoner remains in it, the greater the chance of that happening.)
* Any animal species that was once rare but makes a comeback from near extinction, but this is a unanimously good example of this trope.
* Any anime or manga which quotes the ancient Japanese poem "Tooryanse"; the melody is known for being used at a lot of intersections, but the lyrics either talk about getting blessings for your child when it turns seven — first stanza — or burying it on its seventh birthday — second stanza.
* Any anti-drug PSA inevitably backfires for the same reason as above. The biggest risks are
* Anya Oliwa = Gretel Grosse, but with the weapons of General Fettgesicht
* any Arab country in a live-action movie is actually Morocco. It has a big enough desert to build sets in (far enough away from major cities), while being secular enough that nobody will come and arrest your actresses for not wearing burqas.
* any are the preferred method, but killing all witnesses is an acceptable alternative. Rin always hated this rule, so she was careful there were never any witnesses she had to eliminate.
* any as a target). However, he was considered to be relatively harmless, as his rants cost him his credibility and, eventually, his license to practice law; with more important people making threats against video games, Thompson was merely the most visible and possibly the most entertaining.
* Anya seems to like the robot better than the regular Buffy, particularly after its greeting of, "Hello, Anya. How is your money?" Anya replies with a happy, "Fine! Thank you!" apparently glad that someone now cares about the money as much as she does.
* Anya's first two appearances have her as the (or one of the) villains of the episode.
* Anya's Ghost: A girl with self-esteem issues falls into a hole in the middle of nowhere and meets the ghost of a girl who was supposedly murdered, promising to help her find out who did so.
* Anya's Ghost does have a feminine name, it's a very obscure Irish one, and she dresses in a male school uniform, complete with necktie, for the entire story. She isn't even referred to with female pronouns until well past the halfway point of the book.
* Anya's Ghost. Elizabeth Standard is one of the prettiest, most athletic girls in school, dating one of the more popular boys, Sean. Everything about her seems to be perfect, and despite how jealous Anya and the other girls are of her she appears to be a nice and carefree girl. Then at a party, Anya learns that Sean is a creep who sleeps around with other girls (even his friend's girlfriend) with Elizabeth not only knowing but keeping watch; Anya, who come to the party to steal Sean from Elizabeth, couldn't bring herself to sleep with Sean and hurt Elizabeth. Before Anya leaves the party, she asks Elizabeth why she lets Sean treat her like that, and Elizabeth tells her that while she appears happy, she really is miserable and insecure, and the only person that makes her really happy is Sean. Because she loves him, or as she admits, thinks she loves him, she's willing to do anything to keep him in her life, even though his cheating and her covering for his cheating is hurting her.
* Anya's Ghost has one about her and Sean, as she prepares to impress him at Matt's party.
* Anya's Ghost. Most descriptions and her appearance in the story state she was a "little girl" at the time of her death (which was in 1917 if the story is set in 2011), while most (readers and Anya) assume her to be around Anya's age. Either way, her age isn't clear.
* Anya's Ghost struggles to deal with highschool life and becomes a more mature person, with goals beyond impressing boys or looking cool.
* Anya, Spike and Cordelia are the usual embodiments of this, though others have their moments.
* Any aspirin commercial from the 1960s or earlier. Interestingly enough, most of the medicinal effect of aspirin occurs at the site of injury, the drug prevents

inflammation (which causes futher pain) and the release of pain-signalling molecules. But any claims that a non-conscious drug molecule can actively seek out sites of pain is just silly.
* Anya's power center necklace. When she turned demon again, it seemed she never needed it. You'd think, when Buffy decided she had no choice but to kill Anya to keep her from massacring more fraternities, someone might have pointed out that turning Anya back into a human would have limited her carnage potential.
* Anya's relationship with Willow is meant to be like this; despite being thousands of years older than Willow, she's more naive and immature, which Willow is frequently annoyed by.
* Anya suffers from frequent loss of memory, having gaps of time where she has no idea what she did.
* Anya takes it She was also an example of this herself as she turned her philandering husband into a troll, an act that caught the attention of the demon that offered her the role of vengeance demon.
* Any athlete, medical practitioner, or *ahem* murderer will tell you that blood actually is a pain to get off your hands when it dries. It's very sticky and requires some scrubbing with good soap, and forget it if it gets on your clothes. There's a reason that detergents brag about being able to get blood stains out.
* Any athlete who is the son or daughter of a sporting legend will be compared to their parent. This is subverted (or even inverted) by kids of athletes who outshine their parents in their sport, or even in another sport. Examples include:
* Any attempt at bleaching dark skin usually has this effect. Instead of a natural caramel or honey complexion, the cream washes out
* , any attempts at asking him if he's prepared for the Tri-Wizard Tournament dragons are met with slaps to the back of the asker's head and reminders to relax and let things happen as they would.
* Any attempt to eat more than one Devil Fruit is supposedly fatal. When a character does so and instead gains the power of the second Devil Fruit in addition to his existing one, this is a shocking event in-universe and years later (both in
* Any attempt to make a stealthy B-52 would be pointless, as the combined changes would have resulted in an entirely new aircraft with nothing in common with a B-52.
* Any attempt to market renewable energy will be contested by at least one outraged skeptic who believes that fossil fuels are the lifeblood of their respective nation's economy.
* Any attempt to use Canadians or Mexicans for cheap Foreign Wrestling Heel heat has never lasted. The Hart Foundation,
* any authority figure (Dumbledore is the only professor at Hogwarts he actually fears and/or respects), and he frequently antagonizes characters who can't defend themselves, like Neville. His pranks also tend to be less harmless than Fred and George's (several mentions are made to him throwing dungbombs, which imbue the target with a hard-to-get-rid of odor, over the series, and on one occasion he is seen unscrewing a chandelier). It's worth mentioning that Peeves seems to have a mutual understanding with Fred and George, and they generally exempt each other from their pranks - this is most notable when Fred and George order Peeves to "give [Umbridge] hell" after they leave Hogwarts, a command Peeves seems to take to heart.
* Anya wasn't the sharpest knife in the drawer in her early years and often got confused by social cues, although she's shown to be very good with math.
* Anya was responsible for the 1905 Bloody Sunday Massacre in St Petersburg, which was a precursor to the Russian Revolution.
* Anya was unknowingly Riley's beard, and then Fiona took the job when she figured Riley was gay.
* Anya was very much one of these characters. She was a 1000-year-old demon trying to learn how to be a passable human. At least, at first it was that simple; later on, it was revealed that she was born human (1,000 years ago in Sjornjost). Still later, it was shown that she'd
* Any "background pony" probably has a story or two, if not several dozen, written about them. Even if they only showed up for a few seconds

* any Bajoran who collaborated with the Cardassians from ever returning to the homeworld.
* any bastard!". (AI players can research building planets, but are unable to use the fruit of that research.)
* Any being who gets erased gets separated into their Light of Existence and Shadow of Existence. The Light returns to Fauna Luster and the Shadow inhabits Oblivion, the realm of Entropy. The Shadow of Existence has the memories and personality of the original person, but nobody can remember them except the Gods, people
* any be put to great use by Jess and her ability to replenish fuel and ammo with her CO Power.
* Any best-of-seven playoff series in which one team has won the first three games is generally considered an assumed win, because the team with the 3-0 lead almost always wins the series.
* Any big soccer event, be it the UEFA Champions League, the World Cup or any other hyped matchup is bound to draw "fans" who will ask what offside is or who was playing again. One can't help but wonder what they are actually doing there. The fact that many games are now shown on big screens in public has only made this worse.
* Any blade made from Valyrian steel, as the forging secrets (long since lost) allow them to keep their edge way longer than regular steel.
* Anybody following a vegetarian diet is going to become one. High-fiber vegetables and beans create a lot of gas, while sulfurous foods such as eggs and onions make it smell (fitness-minded people have said that the gas from hard-boiled eggs is a special kind of hell). Nopales/nopalitos (prickly-pear cactus pads, de-spined and eaten as a vegetable) are less infamous for this, but no less effective.
* anybody he becomes infuriated and will hunt them down for attacking his 'subjects'.
* Anybody paying attention to the lyrics of the Everly Brothers' song Wake Up Little Susie might have a
* anybody) to groups that deliberately bomb crowded civilian areas, and then have secondary bombs planted for the purpose of killing the first responders.
* anybody uses the Stone. To break free of this curse, the Dragonkin have created corrupted versions of themselves called dragons to act as bodyguards. These dragons have caused massive loss of property and life.
* Anybody who attempts a hurricanrana, seated senton, monkey flip, or mounted punches on
* Anybody who eats a "Devil Fruit" gains some kind of fantastic power, such as an elastic body — at the cost of gaining
* Anybody who's cracked open a radio control car magazine at some point has probably come across a full page ad for
* Anybody who's ever had to deal with a bug or rodent infestation in their home or workplace has fought one of these or at least tried to. Exterminators make a career out of this, gassing and poisoning pests by the thousands.
* Anybody who's ever worn glasses for years and then suddenly switched to contacts (or vice versa) knows that you can look like "a whole different person." Glasses come with a very specific set of cultural stereotypes, which are completely destroyed when you get rid of them.
* Anybody who volunteers to go on the block is guilty of this. It doesn't matter if you have the votes. It doesn't matter if the
* Any Bonds Today?, where Bugs, Elmer and Porky sing and dance to promote war bonds.
* Any book about bodybuilding or martial arts, will be manly to some degree.
* Any book of Catholic exorcism prayers to be used by exorcists will have very strict and severe warnings that laypeople and even priests not authorized by their bishops to perform exorcisms should never attempt to use the prayers or even read them. The reason is that in Catholic theology, these prayers directly address demons and command them to leave. Attempting to deal with demonic forces on such a direct level without training could lead to serious spiritual harm.

* any boy a girl considers to be like her brother and is usually used effectively to kill unwanted romantic/love interests. The ramifications of an Indian girl trying this with a Japanese boy have yet to be explored.
* any branch of law isn't all too good, and some episodes heavily imply that he hasn't even passed the bar exam.
* Any British action-adventure children's book from the 1930s or 40s can be relied upon to use the word "revolvers", almost invariably carried by the villains (whereas if the good guys use guns, they're typically rifles or shotguns) - for example, several books by
* any building project will take longer than you expect even if you take this principle into account.
* Any (but see Exceptions below) is rife full of this - most of them even use the same laugh track.
* Any can be set up to explode upon impact. Yes, even street signs, rocks, and buildings.
* any carapacian including AR and the agents and some of the more minor trolls. Vriska did.
* Any carrion-eating animals (vultures, ants, maggots) will do this, which is why
* Any cartoon that is targeted towards adults tends to have a Periphery Hatedom among deeply religious individuals, as well as those who just find the cartoons distasteful or offensive. Examples include
* Any case of a parent warning their children about the consequences of their actions. Like eating too much confectionery and getting cavities. Bundling up before playing in the winter to avoid catching a cold. The list goes on. Many a teenager or young adult will acknowledge this and often say they wish they'd listened to their parents.
* Any cat training in, or being trained by a member of, the Dark Forest. The readers know it's bad news, and the characters eventually find out that they're being trained by evil cats who want to use them to destroy the Clans. Notable examples include
* Any celebrity who appears drunk or high in public and then goes on the record assuring everyone they were NOT drunk or high. It leaves very few options for the public than just assuming that said celebrity is just an idiot as their natural state.
* Any Chaos Lord ever. Chaos Space Marines are superhuman genetically-engineered warriors with centuries (or even
* Any character guide can potentially look like this, with slots for not just "wand" but "Patronus" and "Animagus form." Certainly
* Any character in the series who wholeheartedly believes all witches should be killed, or simply kills witches for revenge, is clearly painted in the narrative as being a
* Any character is capable of delivering a Coup de Grace to a "helpless" (i.e. immobilized or unconscious) opponent. It counts as an automatic critical hit, and even if the opponent survives that, he still dies unless he makes his saving throw.
* any character is capable of doing this if their pieces are still intact and they know the secret of how to rebuild themselves, as most beings in this 'verse are mechanical with only some organic tissue. One of the most memorable instances is in the teaser for the planned game that never made it out, showing Onua spill out of his canister in pieces and assemble himself. Had the game been finished we would have gotten to see such a sequence for each of the original six Toa.
* Any character or creature with a high Strength and Intelligence score will be an example by default.
* Any character voiced by Richard Steven Horvitz will chew the scenery given half a chance.
* Any character who isn't not Sam, Dean or Castiel will die permanently while those three will keep coming back to life. Many recurring characters, villains and heroes alike, get killed simply to either cause angst or show how badass the boys are just as they are getting character development or interesting story lines (a cause of frustration to fans due to the sheer amount of

* Any character who uses the Berserk skill gains a similar effect as the weretiger transformation, but the downside is
* Any character with Dragon Wings (a 1st-level only feat that requires having a bit of dragon blood) is this. Dragonwrought kobolds (
* Any character with high scores in the Jump, Tumble and Climb skills can do some impressive stunts, especially at epic levels.
* Any chess game where the winner gets checkmate or otherwise wins in only five or so moves, possibly even fewer (sometimes with
* Any Chinese, Japanese or South Korean period drama, especially ones set in the palaces.
* Any city attacked by the Simurgh is quarantined once she's driven away, because the Simurgh uses a combination of future sight, telepathy, and induced psychosis to turn people she interacts with into
* Any class-specific items belonging to a dead PC will likely be handed over to the next person of that class the heroes come across. From a metagaming standpoint, this makes perfect sense (since it's the dead PC's player's new character); in-character, though, it's pretty weird.
* any cleaning kits, and the casings were packed with the wrong kind of propellant. All this combined with the harsh conditions soldiers had to drag them through led to a slew of reliability problems.
* Any cleaning product, cooking recipe, weight loss or childcare commercial, EVER.
* Any clone that bears completely white armor would be dead by the end of the episode.
* Any college student living in a dormitory has had to deal with this.
* any color you want to be along with casual plastic surgery are also common. Louis Wu dyes his skin chromium yellow and gets epicanthic folds for his 200th birthday. He's specifically stated to look like "a comic-book Fu Manchu".
* Any comic book universe with alternate timelines throws the door wide open for any number of AU fics.
* Any common phrase more obviously derived/lifted from other languages gets this treatment, especially when it's spoken more often than written. "Per se" is often spelled "per say" for this reason.
* any comparable situation in Terran history, and it is shown that just by cutting them off from Junction access, Manticore can bring the 1000+ star system Solarian League to its knees.
* Any competitive reality game show that forces people to work together will always have at least one person being the control freak of the group that pisses everyone else off to no end.
* Any controversy over stars apparently having their online accounts hacked, and revealing or indiscreet photos being publicly released. The difficulty is that while most faked photos are crudely done composites and can be easily spotted as such, the very best are works of art. Doubt prevails.
* Any copies acquired by your coworkers may be used in ways detrimental to your promotion prospects (although if your superiors can recognize your specific rear end, they probably weren't that great to start with).
* Any cop show will eventually feature this. An example of the trope being referred to by name is in an episode of
* Any corrupted character in the Warcraft franchise really. Sylvanas retrieves her body, now wearing the exact same outfit as when alive but in black. Illidan grows demon horns and hooves. Alexandros Mograine ditches his blue-ish armor for a dark grey and red one, and even his sword "Ashbringer"'s gemstone becomes a skull, which goes back to its old look upon purification.
* any could come off as a Love Martyr, as all of them honestly try to open their heart to the person they love, but none of them receive any attention from the person they desire. Even Ranma and Akane have no real clue whether or not their feelings for each other are reciprocated.
* Any country in the world has overly patriotic individuals that state with pride that everything came from their country. The amount that believes so corresponds inversely to the number of people that are educated.

* Any country worker (cowboys, charros, huasos, gauchos, etc.) who uses a lasso is
* Any couple living together will sometime hear the "Hey!" or "Oi!" from their bathing or showering partner as they exit the bathroom and reflexively switch off the light.
* Any cover song R.E.M. recorded for their studio albums qualifies as this. Also of note is "Strange", originally recorded by UK punk band
* Any current NFL fans or people hip to pop culture are hereby invited to look up "Tim Tebow Jesus" under any image search engine.
* Any damage Bergamo takes causes him to become bigger and stronger. However, there is a limit to how much he can take. When it is exceeded, he reverts to his original size.
* Any Dane or Norwegian who didn't sleep their way through school knows this classic example from Ludvig Holberg's 18th century comedy
* Any dark-haired elf would qualify and there are many, particularly in
* Any data file of crucial importance will be padded to 1.45MB in size.
* Any Day Now, Collier asks his eventual wife Mary Elizabeth to go to the local movie theater with him to see the new Elvis Presley picture, and Collier's friend Tully chants the rhyme at them.
* Any Day Now has M.E., on the advice of her big brother Johnny, giving Collier a foot massage. After learning that it was a hoax, however, she then pinches one of his toes in response.
* Any DC story involving Brother EYE, with the most prominent examples being
* Any dead animal left out in most environments on Earth will eventually succumb to this.
* Any dead star- white dwarf or neutron star- is basically a sun-sized nuclear bomb sealed in a can. They'll go about their happy un-lives for as long as you please, spinning, radiating, doing the things dead stars do. Until something big enough hits them. For white dwarfs, this is usually the matter from an orbiting "normal" star or another white dwarf; for neutron stars, it's usually another neutron star. When that happens, the resulting explosion can be felt across a galaxy.
* Any dead thing brought back (or not completely dead/outliving its normal life/becoming immortal) in the
* any defense, up to and including energy shields and massive sheets of armor.
* any delay between the button press and the system responding, without a visual or auditory response, it's not immediately obvious that the button-press has been registered, and many people - especially savvy computer users - don't trust the computer to actually be doing what they asked it to do, so they'll press again, which starts the process over.
* any. Dem humies (stunties, skinnies) just rilly cawn't kil us ladz all, can dey?
* Any denizen of the Internet knows about demotivational posters. On the other hand, the kind of motivational posters they're based on aren't nearly as well-known, especially outside the USA.
* any, depending on the historical moment), so they were the ones that were harder to kill off.
* Any depiction of a culture that's more than a little different from the culture producing the work, and whether that culture is "superior" or "inferior"
* Any depiction of dolphins or other whales mating for life. A nice romantic notion in its day, but it turns out they're promiscuous breeders at best and into sexual harassment or
* Any detailed, candid diary writing by a person in the grips of depression or similar can read like one of these. Things are going great, then one starts going downhill. For example, the last words Kenneth Williams wrote in his diary before his apparent suicide in 1988 were, "What's the bloody point?"
* any device with a digital countdown and the hero is just putting his plan into operation.
* Any diplomatic mission meant to travel beyond the sphere of a given ruler's sphere; to chase an interesting rumor, for instance, or to begin relations with a previously isolated people. These were usually sent for utilitarian rather than

scientific purposes and some behaved quite brutally. Yet in fact they were a first contact team and may have been the inspiration for this Trope.
* Any discussion of dogfighting or aerial combat will inevitably bring up the Red Baron, with his famous 80 shoot-downs. In dogfights, pilots live and die by the rulebook he wrote.
* Any discussion with Malcolm Tucker is usually filled with insults, but even he has his limits:
* Any D is the Hero Of Another Story. Ace is the most notable, with an arc driving about a third of the series. However,
* Any. Ditto dinosaurs. Any illustrated dino encyclopedia published more than a decade ago should be considered of historical value only.
* Any documentary that displays mass battles — particularly those made by the History Channel. The two four-episode-each Barbarians series,
* Any doll that has a function (most commonly crying) and being given to someone without being warned about it will cause distress and alarm in the unsuspecting recipient.
* Any drawn pictures will manage to combine bad witnesses with misleading or missing facts. So of course
* Any drow who has a relationship with a Vel'akar, or a sentient demon from "beyond the veil".
* Any Dutchman will tell you that Gouda that isn't made in the Netherlands is crap and tastes like plastic.
* Any edible product endorsed by Krusty The Clown is likely to make you sick. It's also likely to contain ingredients that aren't technically food.
* Any Eldar Exarch has been lost on an Aspect Path is this - doubly so, because that's what distinguishes squad leaders. Their battle commanders ("Autarchs") are Eldar who went down an
* any electronic game. Plus, after concerns that establishments would just hide their slot machines in a secret room to get around the ban, it was made to apply in private places as well (although the government said they would only only enforce the public ban). The law was partially repealed after complaints, although games are still banned from internet cafes.
* any emotion in his soulless state. Safe to say, Irenicus loves his creepy glassware.
* Any empire with Ethics that forbids them from using slaves can do this in
* any enemy unit. Five to seven turns later, barring utter annihilation of one player, these games just about always end in draws.
* Any enemy with a specialisation, whether Berserker, Assassin or Arcane Warrior, was always going to be one of these.
* Any episode by Ben Steed in preference to the soulless machines that Servalan has surrounded herself with, and even smashes a computer at the end of his speech.
* Any episode involving the Rat King also tended to involve this, since he kept hundreds of rats as pets in his sewer home.
* Any episode or movie where time is shown to be mutable. When something goes wrong in the past, the crew usually tries to fix it or make it better, however, that leads to a couple of nagging questions, such as "how do they know they're in the
* Any episode that Lauren MacMullan (probably best known for her work on
* Any episode where Marge considers leaving Homer only to take him back. A memorable incident is "The War of the Simpsons" when they go to a marriage retreat and Marge has a
* Any episode where the plan to capture the monster is spoken out loud will be ruined, usually by Scooby and Shaggy's incompetence and at times because of Daphne foiling it, though it will invariably succeed in a different way because of this.
* any, even if they were just described in text, was far beyond anything else at the time.
* any evidence of a race like the "Oceans of Fire", despite the movie's claim that it was an annual event with a "1,000-year history" and was supposedly held as recently as the 1890s.

* Any Exalt with Charms dedicated to disguise can be this. Solars, in particular, can convincingly disguise themselves as anything up to and including a decently powerful local deity.
* Any exclusively dedicated religious group or organization really has the same problem. They rely on others to support them, so something as simple as an opposing idea gaining prominence can cause an entire religious hierarchy to collapse or reform into a new version.
* Any exothermic chemical processes are liable to this. The only way to stop a runaway exothermic reaction is to cut the feed immediately. Nitration is an especially dangerous exothermic chemical reaction, as it is
* Any exposure to the contraption is capable of driving people into obsessive fits simply by its ambiguity. It somehow inspires two scientists to try and kill one another, the one that lost having their blood poured into the device only to get the same baffling results as before. Corin in particular spends over a month set on learning what secret it's holding and points out how terrifying he finds it.
* Any Fairy tales that fall under #900 of the Aarne–Thompson classification system including
* Any fan-books, photo-guides, or biographies that proudly announce that it is "100% Unauthorized". Meant to imply that it'll have juicy details that celebrities don't want you to know, more likely it's that the publishers didn't want to pay any residuals that might allow them access to any information or pictures not available through stock photo companies, while at the same time being inoffensive enough not to draw any actual legal action.
* Any fanfiction that gets abandoned by its author for some reason or another.
* Any fears over the lack of a certain product/resource is easily an example of this. It goes like this: People get afraid of a lack of certain commodity. They then buy them en masse to stockpile a supply. Because everyone has the same idea, this causes the demand to eventually overcome the supply. This results in the lack of the product in question. Examples include the water shortage of the
* Any female character, really. If she's important enough to be included by name, she can hold her own against 99% of the populace in raw furycraft or swordswomanship.
* Any female leader in a matriarchal animal society counts... especially if it's an elephant Mama or Grandma.
* Any fighter that specializes in a sword will get a bonus to attack and damage while using a sword, turning him or her into, essentially, a master swordsman.
* Any fighting game series with multiple character endings will fit this. Examples include
* Any film depicting the Armenian genocide (which, according to the government, never happened), anything critical of the military, and any newspaper, book, or film made by an ethnic Kurd or Armenian can have its creators charged under the article 301 of the penal code for insulting the Turkish identity. This is what happened to Hrant Dink, a Turkish-Armenian journalist based in Istanbul. He was murdered in 2007 for his views, and
* Any film or TV show that plays a song that catches on with the masses usually has
* Any film that depicts Armenians in any positive light is banned. This even includes a film by
* any find it agonizing, and is considered one of the worst punishments that an insubordinate can receive. In other words, surviving three years of it is the perfect test for one who wants to join the ruling class of Hell.
* Any Finnish woman who has graduated from RUK (Reserve Officer Academy). The Finnish armed forces are notorious in the respect that it gives absolutely
* any Firebender who slays a dragon is given the title of dragon Dragon).
* any footprints on the plowed earth for some twenty feet or so from the tree.
* Any form of touching, for that matter. Even in the United States, there are cultures and societies that forbid even holding hands until marriage.
* Any fourth wall that may have remained is completely obliterated in
* any fresh air when he's using the barbecue. The same strip and others also imply

that Roger's grilling attempts usually are bad enough to have NASA or the EPA call him. Roger also doesn't like it when he cannot cook a thing on the grill after he, in his own words, nearly killed himself trying to light it. At one point, he's met with that exact dilemma due to Andy apparently forgetting to shop for burgers, hot dogs, and the like. The final panel has Jason being reluctant to eat his spaghetti with Roger being irate at his having spaghetti himself, implying that he was forced to grill spaghetti after he pitched a fit at Andy.
* Any Friday the 13th is seen as King Friday's birthday, as that is when he was born.
* Any full-fledged space marine (they tend to take some decades training and proving themselves before they become a Devastator Marine and can later hope to graduate to Assault and then Tactical Marine, so any Tactical Marine is probably quite past a normal man's prime) Chaos Space Marine, Necron, Eldar, or Titan princeps. A
* Any functioning studio facility, creature shop, props workshop or film school tends to be a bit like this trope — even when there's
* Any gambling that gets promoted with slogans like "you'll never win if you don't play", which is is trivially true for
* any game at all, so if you actually have anything nice to say about any of them then you must work for the company that made it and are trying to trick people into buying your shitty game. It hasn't helped that there have been trip-code users of the board who have admitted to being hired as viral marketers (including a supposed EA employee called 'Andromeda'). It's gotten so bad now that "viral marketing" has become a filtered word, and complaining about viral marketing is a bannable offence.
* Any game that has Mons and a collecting mechanic will be considered a
* Any game that is played through a web browser is almost unanimously referred to as a "
* Any game (with the exception of SA 2) in which Tails or Cream (who both have the ability to fly) is playable; also Knuckles to a lesser extent (he can't fly but he can glide and climb walls).
* Any gift exchange/white elephant will have at least one of these, often something re-gifted from a similar event.
* Any Given Sunday, after all) where-in he simply reminds these players of their shared commitment to being the better team.
* Any Given Sunday. Hall of Fame running back Jim Brown plays one of the Sharks coaches.
* Any Given Sunday, Quarterback Willie Beaman, wins the crucial playoff game by diving into the Endzone during the final play of the game.
* Any Given Sunday, spoken by the team coach (Al Pacino) just before their playoff game.
* Any Given Sunday, to demonstrate the violence of football, in one scene, someone's eye is torn out and is lying on the field. While on the surface, this might seem to be a subversion of this trope, the eye itself is actually completely undamaged other than being removed from the socket (e.g., it's not crushed or even bloody). It's packed into a resealable plastic bag for (presumably) re-attachment.
* Any given Transformer tends to have at least one gun and one melee weapon, though often more and typically achieved through being a
* Any good panto will leave a pause for the regular jokes. "I didn't come here to be insulted!" (pause) Audience member(s): "Where do you usually go?" If the audience doesn't say the necessary line another cast member will.
* Any Goosebumps title that features Slappy, Night of the Living Dummy onwards.
* Any great leader fits this trope. No leader can be great without it.
* Any gruesomely tiring or injurious match can be turned into one of these for the WWE Champion thanks to the introduction of the Money in the Bank briefcase. The briefcase can be cashed it at any time for a WWE Championship match, even if the champion is too worn out to properly defend their title. Notably, this is how the first cash-in went, with
* Any guild-aligned card in Ravnica block (in the guild's combination of colors,

in one color with an ability in the other, or using the guild's unique ability) had a transparent version of the guild sigil (except the Izzet card Hypervolt Grasp, which has the Gruul signet by mistake). Likewise, "snow" permanents in Coldsnap had a transparent snow-mana symbol (a snowflake).
* Any guy that wants to date any of the female students better be prepared to fight for it, because they'll have to
* Any guy who pairs up with Oboro, who's been enamored with her friend and lord Takumi for a long time.
* Any guy with Taiwan (who is 150 cm/5'0 in the old height chart). This makes
* Any Harry Potter WIKTT (When I Kissed The Teacher) fic. They revolve around Hermione and Severus.
* any has lasted an astonishing thirteen seasons (with more on the way), making it the longest-running live-action comedy of all time.
* any. He'll constantly zip around the stage taunting you saying, "I'm over heeere!", "Zaaap!", "Where's the party?", "I'm over here now", "Puddin pop!", "Bloooow the man down!". Let's just say...if you're playing a game with Storm Spirit, end it fast, or shut the voices off if you don't want to be hearing it.
* Any Hero character created in plastic comes to life when placed in a specific chest.
* Any Hero character who "dies" disappears in blue mist before reappearing inside said chest.
* any: Hey boys, / Hey girls, / Start DJin'... / HERE WE GO! (now keep repeating those same lyrics over and over)
* any hierarchy except that of professional competence, and are thus more likely than any other nationality to tell an erroneous captain what he's doing wrong.
* Any high-explosive or fragmentation weapon, from a simple hand grenade to a bunker-buster, can turn a human being to red paste. The more powerful the explosive, the thinner the paste...
* Any highly competent person who gets hired for a job they have no talent for. Meriwether Lewis was a highly competent explorer and a very poor governor.
* Any highschool-back history book you read will passingly mention the Middle East, India, Africa, and Asia while focusing on Europe and its struggles. You don't read 1200–1800-era Chinese, Arabian, or African authors too often, nor do you discuss non-European empires from those eras. Also, North America didn't exist until 1492. Hence why it's the "New World", regardless of how old it actually is. Can you think of any major events in Native American history before Europeans came over that doesn't have to do with doomsday calendars? Or of major scientific inventions and philosophical innovations outside of Europe that don't have to do with algebra, limestone batteries, or gunpowder? Let's just say that if you respond "There are none," you've successfully proved this trope correct.
* any hit with the weapon (in addition to its normal damage) against those that the weapon was dedicated to slaying. In fact, in the original D&D rules, this was the main power that Chaotic special purpose swords had against the Lawful beings that they were designed to slay - Lawful special purpose swords, in contrast, paralyzed Chaotic beings they were specialized against.
* Any humanoid-like being produced by the Holodeck qualifies, although most don't seem to be sentient.
* Any human rocketship from the First and Second Doctor eras, in the '60s.
* Any human with a severe food allergy. Peanuts are a frequent culprit here, with some unlucky folks unable to be in the same room as peanut products without going into respiratory shock. Diabetics have a similar reaction to sugar.
* Any imitation of Count Dracula (and often of vampires in general) nowadays is a reference to
* any Imperial Guard regiment raised from a Hive World, and it will probably be this trope. It's even mentioned that one possible way to raise a regiment from a Hive World is simply sweeping through the Underhive, herding the street gangs onto a space ship, summarily executing the ones who make too much noise, and replacing the old gang colors with uniforms.
* Any infomercial relating to phonics, such as Hooked On Phonics or The Phonics

Game, was fair game on children's programming during the 90's.
* Any inhibition about sexual relationships within the military is usually
* Any injury or condition that damages the nerves badly enough, such as leprosy mentioned above or third-degree burns, will result in this.
* Any instances of strange behaviour, anachronisms other than those required for the plot or
* Any instrumental mix of a song which remains credited to the original singer, even when that person had no artistic input beyond their singing in the first place (which, of course, no longer appears!) Examples might include
* any "intoxicants" such as alcohol, tobacco, drugs or sometimes even coffee.
* any is this to the hilt. Special mention goes to the aforementioned Laurent, Gerome, and, in Cynthia's case only, a male Avatar.
* any. It is actually noted in the story that relationships built on love have caused quite a bit of suffering and sorrow for the realm, and even then, you could probably count the amount of love-based relationships on one hand, perhaps two.
* any, it is sealed away in the vault. Neither the monks, nor the villains (who raid the vault every six episodes or so) ever take or use this supreme Shen Gong Wu ever again, presumably because it would make the show very boring.
* any Japanese villain (if not any character) in wartime Golden Age comics.
* Any jokes or misunderstandings of Tommy getting a brother or Chuckie getting a mommy in early episodes of
* Any jolly sailor worth his salt will brag about his encounters along the Seven Seas (actually oceans), and brave adventurers in the
* Any junkie cousin because he thought his original plot — that they were trying to get him into rehab — was implausible.
* Any kid that just joined a cadet corps/squadron is usually seen (and feels) like this.
* any kind is considered intimate and reserved for the spouse, so a simple friendly hug is considered as romantic as a kiss on the lips.
* any kind of cop. Tony indignantly asks, "Did you just physically assault me?" After Gibbs says he thinks Tony is too good to waste, Tony replies, "Don't make a habit of doing that."
* Any kind of dweomer working leaves the 'sorcerer' hungry. The bigger the working, the more ravenous the worker.
* Any kind of expert employed by someone who is not an expert in the same field can become this because of the principal-agent problem. Experts exist to know what their employers do not know. If your employer or supervisor does not understand your work, then they cannot effectively hold you accountable for your mistakes. Because of this, it is very easy for paid experts to rationalize away lack of due diligence when their work is not vetted by their peers. That is why scientific papers need to be peer-reviewed before they can be published, and why physicians are regulated by governments and medical associations.
* Any kind of lupine or canine character, upon being aroused, will stamp a foot and howl.
* Any kind of research into creating a stable "omega particle." Theoretically, a stable omega particle would be very useful (for doing... something or other), but an unstable one can screw up warp travel in a wide area for years afterward.
* any kind of roller skates, not necessarily Rollerblade-brand inline skates.
* Any kitchen implement that "cleans up in a snap - a quick rinse and you're ready to go!" is probably not dishwasher-safe. If it were, they'd say "just stick it in the dishwasher and you're ready to go!" One review on
* Any Korean songs must not include an Japanese word in its lyrics. For example, KBS
* Any large breed with short hair and a big head will inevitably be called a pit bull by most people who aren't familiar with dog breeds. This includes boxers, bull terriers, bulldogs, rotweilers, and English mastiffs.
* Any large dog raised from an early age with cats will often develop catlike mannerisms. This can be distressing when your 60-pound-plus dog forgets how big he is and decides he wants to sit in your lap or climb up on furniture and tables.

* Any Last Words?: A character about to be killed is asked if they have any last words. They use the opportunity to turn the tables on the person who was about to kill them.
* Any league with a salary cap essentially forces this as any team with a surprisingly good year is forced to get rid of half their players since they're now demanding pay raises, especially if they win the championship. Aversions happen in teams that are centered around a few key players or have excellent general managers.
* Any levels with normal objectives after the 1.7 update of the game (with the exception of not losing any lawn mowers starting on version 1.9 and planting on Dave' mold colonies when its objective text was changed on later updates, and on certain circumstances, exceeding the plant limit), when failed, will display the objective description in green text above the screen and will become lowered as the screen goes black. However, like any some other losing screens, the brain is still displayed when the player loses, plays the game over music of a specific world and the generic
* Any level where a Cucco will appear and follow the player around, as it seems to exist solely to discourage the use of wide attacks. Or, for that matter, any attacks if you don't know exactly where the chicken last moved to. The general consensus is that it's not a question of if you'll hit it enough to trigger its rage, but when. Some of the other Cucco events (guiding a baby Cucco to its mother and two Cuccos fighting in a keep) are also hated, but the one that follows the player is particularly hated.
* Any list of US Armed Forces slang will include the terms "recto-cranial loopback" or "anal-cranial inversion". If you can't figure it out, both refer to
* Any live broadcast can suffer this with closed captioning, which has to be created on the fly either by a human operator or a speech recognition program. Naturally, this leaves virtually no time for proofreading, though occasionally the caption will back up for retyping if a recent typo is spotted quickly.
* any location. It's introduced and done away with in Season 1, but returned to the heroes in Season 2. Despite that Dojo can sense the location of any newly active Wu, the heroes never decide to have Dojo use the Claws to warp there, instead of flying there slowly enough to let the villains reach the Wu.
* Any love interest (except for Lady Elizabeth) for the hunky father and sons, and hot daughter, of the knightly Grey family on
* any loyalty; he just does whatever he thinks will net him the most money/enjoyment.
* Any lummox knows that this was perfectly handsome 18th century slang!
* any lyrics beyond that would realise that it's a much darker and more downbeat song than that.
* Any M7M is fully capable of singlehandedly leveling sectors, but the ATF's entry, the Skirnir, takes it
* any machine/user interface in Warhammer 40K, which certainly is 'unusual', if not exactly in the manner described by the trope.
* Any mages caught casting any form of magic are imprisoned and horrifically tortured for the rest of their lives. Or simply murdered, as in the case with the player character (unless you manage to just keep on killing Cowled Wizards until they give up).
* Any magic trick that posits the idea that someone can be bisected, decapitated, or generally distended with a few quick strokes of a blade. Then again,
* Any major character from the show who isn't SpongeBob, Patrick and Plankton in
* any major Chicago landmark is liable to suffer collateral property damage when Harry's around, sooner or later.
* Any major gaming tournament, such as Evolution 2K. It's most obvious in 2D
* any, makes regionalized remakes of every Colombian and Argentinian popular soap since the Nineties.
* Any Malay-language movies and movies from Malaysia are not allowed to be shown in Israeli cinemas due to Israel not being recognized by the Malaysian government, instead favoring for Palestine's legal recognition, largely due to the Gaza Strip

Crisis.
* Any "male enhancement" product. (Well, if it's a vacuum system, one could say that it
* Any male Warden who romanced Morrigan has this occur prior to end-game. The entire plot of "Witch Hunt" has the Warden attempting to track down Morrigan
* , any man who hears the naked men singing about walking down the road has an irresistible urge to join them.
* any Marine, General James "Mad Dog" Mattis seems to fit the bill, due to his combination of erudite oratory and ruthless honesty regarding the central theme that death has in the profession of arms.
* Any massive crossover, especially if the author tries to put every character from every source that is being crossed over. One insane example is
* Any match that has more than two wrestlers (or two wrestling teams) will commonly have a mixture of Faces and Heels, which can add to the drama while getting around the the problems of the crowd not having anyone to root for.
* Any material that is non-compliant with Australian law are automatically refused classification.
* Any member of the crew acting as the commanding officer in Picard's place will use his catchphrase "Make it so."
* Any member of the military or police in their dress uniforms. In fact, it's worth pointing out that among the
* any men in tight pants this trope is almost guaranteed to happen at least once on stage. Usually far, far more often than that, although it's almost always desired to show off.
* Any merc or arms dealer worth a damn can at least speak English plus one other major language. Current favorites are Russian followed by Spanish. Being able to speak the same language as your coworkers and associates means that you are far more capable of pulling your weight when things get tense, y'know, with being able to actually know what's going on and give info to your guys. It also helps protect you against getting screwed, especially if the guys who want to backstab you don't realize that you speak their language and have been taking a keen interest in what they've been saying to each other... Also, guys like border guards and security personnel are unlikely to speak anything but their native language well, so a versatile tongue makes dealing with these guys tons easier. Lastly, more language skill equals more people you can communicate with and therefore more business opportunities.
* Any military action movie featuring pilots is bound to have this, both because it is
* Any military Special Forces unit with a roster that isn't quite large enough to qualify as a
* Any mission on Solar, which has the team flying far too close to either a really hot gas giant or a fairly cold star.
* Any mission that involves the Eclipse or Blue Suns mercs tends to have com chatter from their bosses getting more and more freaked out as Shepard and co. effortlessly end everyone in their way.
* Any modern combat flight simulator when an enemy locks onto your fighter.
* Any monster classed as a Beast-Warrior type has a high probability of being a Monster Knight. A good example is
* any monster that intends to fight a human and hopes to survive, due to their incredibly weak souls and even weaker bodies. The only advantage a monster brings into battle is its attunement to magic.
* Any mooks that don't have prebuilt variations can just be made into Elite Mooks by the DM by adding class levels or templates, seasoned to taste.
* anymore... and slightly torn over a petty fight over who pilots the Gummi Ship later on.
* anymore. While driving around in the Nomad, the sound is greatly muted, helping to add to the eerie experience.
* Any movie involving nuclear missile submarines will have at least a reference to missile launch drills.

* Any movie that comes from Ghost House Pictures will be more associated with
* Any multi-part episodes that were originally scheduled to be released Direct-To-Video tend to look outstanding, with the Hunter's Moon trilogy standing out.
* Any murder overseas by (insert person from insert home country here). Even if the murder was filmed on video and the foreign murderer confessed to doing it at the scene, expect the murderer's home country's media to get a year (and a TV movie) out of it as they call it offensive that the foreign police would arrest their countryman for a heinous crime.
* Any NASCAR race can turn into this, especially the restrictor plate races at Daytona and Talladega where it's not uncommon for large packs of cars to be taken out in the Big One due to the cars being bunched up together.
* any nation can fall into this trope in fanworks that equate all forms of international relations with the sexual kind.
