* Any nation who was ever responsible for raising a nation in their childhood falls into this. Currently in fandom, England's the biggest bait for this. Having had the largest empire in history, and having the most ex-colonies appearing in the series, it's not that hard to put him in this position. Evidence:
* Any nation with compulsary military service for a large majority of citizens, especially if there is a powerful and hostile neighbour. The stress and anxiety of those left behind after a major deployment is intense.
* Any naval aviator who voluntarily "turns in his/her wings" is considered to have permanently quit Naval Aviation for good and is also grounded for life.
* any nerfs to make them more tolerable couldn't rescue them from the scrappy heap, and they were eventually removed entirely from the standard game with no one mourning them.
* Any new partner characters, second-string villains, or "B" plots in the
* Any newspapers you see will always be either the cover or a single page with a story relevant to the game, even if they're supposed to be random pages blowing in the wind.
* Any New Town generally, and the town of Zeerust in South Africa, which inspired the Trope Namer, in particular. While not actually a New Town, it was heavily expanded in the 1960s under the old Apartheid Government as an example of how wonderful the Republic of South Africa was (for White South Africans). Now looks a bit run down and odd in places, like most New Towns.
* Any Ninja Village worth their salt now has a competent Ninja Academy in
* any, no questions asked, as a form of "reward." However, the kicker is that now, they have to risk their lives fighting witches for as long as they live, this being the work for that one "reward." Played straight as no matter how much they work in slaying witches (either for their own reasons like Kyouko or as a from of duty like Mami), their efforts would not be recognized nor even be known. As Homura puts it, "...dedication has no reward."
* Any North American expansion team is bound to be a terrible squad, being players the other teams considered expendable and maybe a few rookies. The
* Any Number Can Die: Just as the will is about to be read the lights go out and when they come back on the will is gone. However it is immediately revealed that Hannibal, the detective, has it. He grabbed it before anyone else could. It later ends up missing anyway.
* Any Number Can Win: This French film is about the elaborate plan of criminals to rob a casino in Cannes.
* Any number of Kung Fu B-movies, which often featured characters (usually villains) who knew a special technique that could kill people (or otherwise take them out of a fight) instantly.
* Any number of old-school pantheons. Quite a lot of stories about the lesser gods in
* Any number of place names in North America are this. New England, which has towns/cities named New Bedford, New Britain and New London (among others), itself is named after England. New Orleans is named after Orleans, France.
* Any number of real military forces have had this happen to them. Either because of surprise or defeats on the battlefield, the defenders find themselves fighting

in their own front yard. At the end of the war, this may be combined with a
* Any number of superstitions regarding behavior of mythical creatures that "haunt" people are internally consistent. They make sense if you know from what leaps of logic they spring. For example, salt keeps evil spirits at bay. Salt keeps food preserved, rot is caused by unclean spirits, ghosts are unclean spirits, therefore salt = no ghosts. Where it gets complicated is when you combine several internally consistent systems, i.e. cultures. Similar things from different cultures and times can sometimes result in a lot of mythological mashups. The result being many different rules that were consistent becoming inconsistent because they're being applied to each other.
* Any objections people had to the reinterpretation of Dr. Jonathan Crane in
* Any object that's "to die for" will involve someone who already did die for it or actual mortal peril for anyone who seeks it.
* any of Calvin's musings to Hobbes on the nature of existence and reality during any given 'sledding' strip should tip even the most casual reader off that the kid's a freaking genius; it's just that school bores him senseless.
* Any of Jim Henson's works involving the Muppets, but the effect was not handled the same way in every case. In
* Any of Mr. Ray's students who had speaking roles in the first film are silent, aside from Kathy the Chicken Fish
* any of sisters were shown in most of the Casagrandes episodes at the start of season. 4.
* Any of the above can also be combined with transparency or the ability to become invisible.
* Any of the big console shooter franchises draw plenty of flak from players who dislike
* any of the bosses in the game can easily become this. Many players have come up with ways to AFK every boss in the game, most of which can be done before even fighting the boss properly.
* ANY of the commercials in this campaign ("show us your Disney side") seem to imply that for adults, showing off their Disney side equals acting ridiculous, inappropriate, and immature almost to the point of mental illness.
* Any of the crazy visitors, such as Grace Zabriskie or Mary Steenburgen, or the circus people.
* Any of the Einherjar killed in Hotel Valhalla will simply resurrect a few hours later. Naturally, they regularly abuse the crap out of this during their training, fighting to the death every single day. However this trope only comes into play in Valhalla. If an Einherji dies in any of the other eight worlds, it's permanent.
* any of the endings where the whole facility goes up in an explosion.
* Any of the flips (Trinity spinning like a rabbit on a spit; Neo escaping Smith in the train station; Neo and Trinity dodging bullets in the building lobby).
* any of the known gambits, and thus fell for the most obvious one of all.
* Any of the Kolossus' attacks : it is so big any of it's attacks (whether it's his arm-sword or him crushing someone) instantly sends you back in the scanners.
* Any of the living, active Paruns in Ravnica (A parun being the founder of any of the ten guilds) counts, given that by the time of the first Ravnica block story, the guilds have been around for 10,000 years. The only survivors are Niv-Mizzet (the
* Any of the "medic" characters, like Ratchet or First Aid, would qualify for "maintaining" robots. As
* Any of the men on the pilgrimage could have murdered the children in
* Any of the Mexican wrestling films of the 1960s and '70s, starring real wrestlers like
* any of them have died, the story describes the activities of two and then refers to "the remaining two" (there are 5 at this point). When they are removed from the chamber, one is already dead, one is killed during the struggle to remove them, and one dies on the operating table, yet the story continues as if three are still alive, not two.
* Any of the NCR Rangers. They have spies everywhere, even at all the Legion

bases. You even meet a
* Any of the old 1980s commercials featuring Vince and Larry the Crash Test Dummies (at least ones where they actually drive), and they don't wear seatbelts either (seeing as they're supposed to encourage you to wear them by acting like morons).
* Any of the Sailor Animamates from the last season. Sailor Animamates were the servants of
* Any of the various outlandish interpretations of the lyrics of "Come Together", such as what "toe-jam football" is.
* any of the whole series. And that includes body of water, glass of water, pot of water, etc.
* any of those powers in-game, and her loyalty power, Slam, which you unlock after the mission, is considerably less impressive.
* Any of your potential love interests should you pursue the Way of the Closed Fist in
* Any Old Diamonds. The protagonist notes that there are other women who married into the nobility after careers as dancers and actresses who are now well-accepted after the initial classist hiccups, because they're actually nice to people.
* any Olympic medal, and so was touted as a champion despite coming in second. What made things even funnier was that her last name literally means 'bronze' in Hebrew, so the joke was that she actually exceeded expectations by one medal.
* anyone (and eventually used this when he took a break from the league).
* anyone and everything fandom, this was inevitable. Gender-bent versions of Dave, John, and the Midnight Crew are particularly popular though.
* Anyone, anywhere, who watched a lot of kung fu flicks and thought they could fight by imitating what they saw. Of course, nowadays, replace "kung fu flicks" with "
* anyone, assimilating them into itself and gaining a measure of their intelligence, power, and... uh, fashion sense. However, it is eventually revealed that this had an unintended side-effect: giving Buu the intelligence to regulate his power and use it in the pursuit of goals. The smarter the individual, the cleverer Buu becomes, shown when he becomes a canny tactician after absorbing Piccolo. When Goku and Vegeta free his victims, Buu reverts to his original form; while Super Buu is stronger, Kid Buu is basically a rampaging animal with the power to erase planets ...which he does as soon as he manifests.
* Anyone banished by the Golden City is given one night to get out of city lands before the Outlaw Hunt, a pack of stone dogs that are tireless and incapable of losing a trail, is released to tear them apart. The trick is that the lands are so large, there's no way for even a mounted man traveling at full gallop to exit the lands in a single night, let alone an outlaw on foot.
* Anyone But Me, Jonathan, Vivian, and Sophie are all late to class. Their reactions?
* anyone can be an effective salesman as long as he works hard at selling. While working hard is indeed predictive of success in sales, other factors, like market fluctuation, the economy, selling the right product, and most especially learning proper sales techniques, also factor in in a major way.
* Anyone Can Die a handful of the survivors will suffer from PTSD, depression, or other such problems in the years following the war.
* Anyone Can Die: A story shows that death can happen to anyone, no matter how powerful or important that character is.
* Anyone Can Die: Important character gets killed off vs. only nameless extras get killed off.
* Anyone Can Die is the platonic love affair between the Rule and Realism
* Anyone Can Die. Neither series wimps out about very graphically showing people dying, whether they're ten, fifteen, thirty, or sixty.
* Anyone Can Die: Not even the main protagonists are safe from mortal doom.
* Anyone Can Die: Obviously, nobody is safe from the death by the hand of the slasher killers.
* Anyone Can Die. So if a recurring character has a particular focus in a story he

may well get killed.
* Anyone Can Die, some characters can't die until certain parts of the story. Sam and Mike, most notably, have their respective Plot Armor last the longest, as the only time they can die is the final cutscene.
* Anyone Can Die: The thought that anyone and everyone we know and love could die when we least expect it is depressing to think about.
* Anyone Can Die throughout the series, there is generally plot armor within a single book. If a character goes through significant plot development—especially if they're newly introduced—chances are they'll be among the few who survive the inevitable Honor Death Ride toward the end of the book.
* Anyone can pile on armor and anyone can be good at dodging and have a high Body stat, but Mages have to spread their points thinner, though, because they have magic to spend them on. And non-mages can afford to pile on cyberware and bioware that can give substantial defensive bonuses.
* Anyone can practice magic in their spare time, but it is also the subject of substantial research by
* Anyone can purchase the Magery advantage and Spell skills quite freely; however, unless you have a lot of character points to build with, it's difficult to build a character who is both a powerful spellcaster and a mighty warrior.
* Anyone Can Whistle Fay and Cora lapse into this at the end of "There's Always a Woman."
* Anyone Can Whistle, Hapgood confesses to Fay that being this was what made him functionally insane:
* Anyone Can Whistle is a first-class scene-stealer who even succeeds at interrupting one scene change so she can get ready.
* Anyone Can Whistle, Schub's use of the word "loonies" is the trigger for an indignant and lengthy speech by Fay Apple.
* Anyone Can Whistle, the patients from a local insane asylum infiltrate a line of pilgrims waiting to see a "miracle" set up by the mayoress and her cronies. To keep from being exposed, they call on the asylum's doctor, who sends his recently arrived assistant, J. Bowden Hapgood. Hapgood promises to separate the sane from the insane using "the principles of logic," and has an entire 13-minute musical sequence that is full of this kind of "logic".
* Anyone capable of making Mutsumi look convincingly enough like Keitaro to pass muster in a Furo scene wearing only a
* Anyone carrying a weapon that has full-auto capability will always shoot on the auto setting. They will also fire
* Anyone caught within the radius of the principal's bombs will be blown up into pieces.
* Anyone could enter a supermarket or drugstore and prefer its cheaper brand of cotton swabs over Q-Tips®, & yet they'll habitually identify them as Q-Tips.
* Anyone dated by the Zombie gets turned into a zombie after the next night, and they can infect others as well. If all the other players get infected by the end of the game, it triggers a
* Anyone doing any sort of planning will often resort to this. It is most common with members of the military, or people doing military simulation of any kind, to just grab sticks, rocks, or anything they can find to create their plan. The military also takes this a step further when creating sand-tables of the battle area by using children's toys (typically plastic army men) to represent everything the soldiers will see in the field, and then use strings or sticks to show directions.
* Anyone doing a "thru-hike" on a really long hiking trail is more or less doing this. Though a lot of it is in wilderness, hikers often diverge into local towns along the way for provisions. The Big Three of American Hiking are the Appalachian Trail (~2200 miles), the Continental Divide Trail (~3100 miles), and the Pacific Crest Trail (2653 miles). Any one of them takes roughly 6 months or more to complete.

* Anyone dosed with Angel Dust becomes functionally this. They will eventually die, but unless it's a headshot it will take a while, and in the meantime they'll kill you. And not even a headshot is a sure way to kill them on the spot.
* Anyone eaten by Neo falls under this trope. Everything, that Neo eats completely disappears from this world, breaking the law of conservation of energy - in other words, he consumes things without leave behind any energy or matter. This includes soul energy, which means, that even abovementioned spirits, that can constantly reincarnate, permanently die, if Neo eats them. And on top of that, his bites also can't be regenerated, because
* anyone else. Trixie mentions at one point that Lina has a spell that sells her soul to a demon god or equivalent local entity. Lina can use it as much as she wants because she knows there's no demon strong enough to threaten her. In fact, they are so unspeakably powerful that they have to be careful not to get any stronger, or their entire home universe might crash from their mere presence.
* Anyone fluent in the languages that the gangsters use in season 1 can tell that James Wesley
* Anyone found guilty of crimes against the occupation are shipped off to "The Factory", which is eventually revealed to be a forced labor camp
* Anyone freed from XANA's control forgets everything he did when xanafied.
* Anyone from Austria will tell you, if you write them a letter, you have to list the country as "Austria/Europe" (it even says that on people's business cards), otherwise your mail may very well end up in Australia. Austrian gift shops have embraced this by making shirts that say "No Kangaroos in Austria" available.
* Anyone from Las Vegas, Nevada knows that Glen Lerner is the way to go. (
* Anyone going against 17 or 18 needs to be massively stronger than them, or they'll find themselves falling at their favorite tactic: simply
* Anyone growing up in the US in the last 50 years will be more likely to recognize the name of Martin Luther King, Jr., than the name of Martin Luther, whom Dr. King was named after. This is the fault of American history books and classes, which mention Dr. King years before mentioning Martin Luther.
* Anyone hit by a fire attack games, except for Pyron, who'll just look like he was hit normally. Some of these animations are downright comical.
* Anyone holding one of the Pieces of Eden becomes one of these in the
* Anyone, however, tend to depict them as a corrupt, Orwellian shadow cabal that manipulates society, outright enslaved Hawks to be their puppet hero (and sometimes other children like him), use institutionalized discrimination to control the masses and ruthlessly crush any heroes who refuse to toe-the-line.
* Anyone in a panic, pain or flooded with stims/adrenaline can be this.
* Anyone in emergency medicine. When you're seeing humans or animals that are near death multiple times a day, all you can do is shut down your own emotions because they only get in the way. These people definitely care — they wouldn't be practicing medicine for a living if they didn't. But there's no time to cry over a dog that got hit by a car when in the next room you have a cat with a shredded leg at risk of amputation.
* anyone inside or outside government to take them seriously, and they quickly lost support even among their own followers. That would probably have happened anyway, given the trends in Canadian politics during the 1980s, but their decision to abstain from what is the most important vote a parliamentary body can take led to them being delisted as a party in federal elections by the middle of the decade as they could no longer field enough candidates.
* Anyone in the cast might be expected to appear as a disguised version of someone else. Zenigata has even disguised himself as Lupin!
* Any one intro lines, but especially "You too have known loss... and that loss torments you still! You hope hatred... might someday replace the pain! But it never goes away!"
* anyone listed here, who was able to go from being a poor kid raised by a single mother (who would later marry and provide Clinton with a stepfather and his younger stepbrother Roger) to becoming a Rhodes Scholar and a successful lawyer, eventually becoming Arkansas governor and then president.

* Anyone living in a foreign country or merely visiting one either on vacation or for business purposes can feel like this at first.
* Anyone living in San Diego during the 2000's and 2010's will remember constantly seeing the ads for
* anyone, man or woman- and there had to be two independent witnesses to both penetration and ejaculation. So if you didn't have sex in front of two onlookers- or found some other activity to perform- there wasn't much the law could do, although some men were convicted of the lesser crime of 'assault with sodomical intent'. The more general law on 'gross indecency'- which could cover more or less any sexual activity- was passed in 1886, after this period ended. On the other hand, it's quite hard to get privacy on a tallship...)
* Anyone, not just an Exalt, can channel virtue into actions to increase the chance to success, even if they fight the frickin'
* Anyone of Coon and Friends that isn't Mysterion is just a kid in a lame costume. Mint-Berry Crunch in particular is presented as having a really vague and lame gimmick involving mints and berries.
* any one of him probably has an alibi, and even if he doesn't who's going to believe that the terrorists are a clone army
* Any one of the mechas Godzilla fights or fights alongside can count as this.
* anyone, only to learn that that was video of the very crash he was recovering from.
* Anyone on the internet that posts questionable content (as in controversial topics or posting subjective quality artwork) will usually get a lot of backdraft from trolls or the
* anyone on the show. She's seventeen years old, traumatized and brain damaged, and the extent to which she improved after the events of the movie is unclear.
* anyone playing Y", is popular among sports fans and has many regional variations.
* Anyone Remember Pogs?, but still in force for more recent dead fads.
* Anyone seeing a nymph is permanently blinded. If the nymph is nude or removes her clothing, the viewer dies, since 1st/2nd edition
* anyone's heart. You'd think he'd be N's perfect companion were he not introduced a generation later.
* anyone, so it's prudent to attack everyone in sight with your weapon of choice.
* anyone, some people will act in ways that mirror the behavior of drunk people because that's what you do at parties: you go wild and get crazy, even when you're stone sober.
* Anyone speaking negatively about SCP-PC-007 "The Witch-Queen of Bogal Mountain" while in the Corbenic afterlife will have their flesh turn to stone.
* Anyone, such characters tended to be thinly veiled copies of Holmes.
* Anyone that has ever got used to vim surely has filled lots of files opened in other editors with "jjjjjjjjjjjjjkkkkkkkkkkkkk" trying to scroll down. Another sign that you're a vim user is typing either ":wq" or "ZZ" at the end of documents opened in other editors. (Both those keystroke sequences are ways to save-and-quit in vim). For those gVim users out there? Don't get too used to using Ctrl+s to save your files, even though gvim gives you the option. Because one day, you'll be working in regular vim in a PuTTY session and you'll hit Ctrl+s to save all those awesome changes you've just made, and...
* Anyone that joins Deoxys' crew is offered immortality. Even after traveling to the far reaches of the Omniverse and living for millennia they still enjoy it.
* anyone that Tony killed a captain without having a reason, the entire organization would turn against him (Some made men even talk amongst themselves that Silvio Dante, Tony's closest friend and confidant, would be the first person to kill Tony in that case). Tony calls Christopher, who is his nephew and dependent on Tony's patronage to survive in the mafia, to help him chop up Ralph's body in the bath tub and then dispose of his various parts across several different states. When tensions with the New York Lupertazzi crime family heat up soon after, Tony manages to capitalize on the friction by blaming them for Ralph's disappearance.
* anyone that took even one slightly solid punch to the head. Many of his winning fights involved tanking blow after blow until he saw an opening and concussed the

one responsible.
* anyone. They were acknowledged by the world's leaders as early as the end of the three-part pilot.
* anyone. This was one of the reasons for the decline (and eventual abandonment) of many of Newfoundland's tiny outport villages: kids went away to school in larger communities, and after working and living there for a while had no interest in returning to an isolated existence.
* anyone to be a form of idolatry, which was far worse so than the taboo on depicting the Prophet Muhammed.
* anyone to beat, even Master Oogway. This is justified by Kai having stolen the chi of many well-known kung fu masters.
* anyone to be crazy enough to march over the Alps, and certainly not for it to work. He did lose half of his army and most of his war elephants doing it, but he had Rome on the run for nearly 15 years.
* anyone to notice him before he told his classmates he was a mecha pilot. He must get it from his parents, who were both lusted-after by multiple coworkers.
* anyone to wear until the bombed out industrial plants could get back into operation and foreign aid from the Allies began to filter in.
* Anyone trapped in the demonoid realm loses all their memories and is slowly transformed into a demonoid.
* Anyone trying to construct a technological Gadget in an Occult Workshop (or an Occult Artifact in Gadget laboratory) took a large penalty to their chance of success.
* anyone turn up alive in the comic continuation add fuel to that fire.
* Anyone under the influence of the Black Blood would do this. Crona and
* Anyone using an artifact which could make the wielder a danger to the Foundation if they defected is fitted with an explosive collar before being given the artifact, with the collar being removed once the artifact is returned. One example is
* Anyone who assembles models that need to be glued together will have experienced at least one incident of gluing pieces of the model to themselves, gluing their fingers together, gluing their fingers to other parts of their body, or gluing themselves to the table or workbench they use.
* anyone who attempts to change the Status Quo, most of the time the evillest side loses.
* Anyone who becomes one of the 7 Swordsmen of the Mist is this by default as well, particularly Zabuza, who probably has the most
* Anyone who bought Dion's sentimental, patriotic 1968 hit "Abraham, Martin & John" and flipped the record over suffered a huge case of
* Anyone who can drive in the Monaco street circuit at top speed, barely centimeters from the walls qualifies.
* Anyone who catches greyscale is at risk of becoming a feral, still-living, Plague-type zombie, or "stone man", as they're called. How infectious they actually are is up for debate, but the disease does seem to be waterborn, if of a generally low-frequency rate of infection.
* Anyone who ever talks about the unlicensed NES game Caltron/Myriad 6 in 1 will justify its low score on the sole basis that all the games on the cartridge are total rip-offs of other games.
* Anyone who falls in love with Starbuck better gear up for some serious abuse.
* Anyone who genuinely falls in love with Usagi tends to die a lot. Mamoru/Endymion how many times now (though he always gets better). Prince Diamond/Dimande/Demand. And even Seiya is killed in the
* "Anyone Who Had A Heart" and "A House Is Not A Home", originally by Dionne Warwick.
* Anyone who has been exposed to popular media in the last 20 years knows that the title character is a serial killer who will later be known as "Hannibal the Cannibal". Part of the drama in the series is when and how Will Graham will figure it out.
* Anyone who has been to CERN in Switzerland can attest that it feels like this

trope — instead of being a shiny place for high-tech physics research, it is better described as "urban decay and sprawl", "general disorganized clutter", and "mostly abandoned offices". It's been around since the '50s, after all. That said, some of the newer buildings are shinier. Any actually
* Anyone who has eaten a Devil Fruit has two, related Kryponite Factors: The ocean, which causes power leeching and an inability to move due to weakness, and Seastone, also known as
* Anyone who has ever done a job internship — regardless whether it's a bank, a newspaper, the local TV station — will find themselves doing more of these menial tasks than anything else (one can be lucky if they ever get REAL work to do). Quite frustrating.
* Anyone who has ever struggled to separate two Lego bricks that were connected with the equivalent bonding strength of arc welding will agree that this trope is still very much played straight in the game.
* Anyone who has ever worked in a casino will tell you that if someone is caught counting cards while playing, they will simply be escorted out of the casino and blacklisted, not beaten to a pulp. This is because card counting isn't even illegal, while battery sure as hell
* Anyone who has ever worked in a customer service job can probably tell you that you could have a huge sign on the front door that says "Closed" with the hours of operation listed below, and someone will still try to pull the door open and bang on it furiously wondering why nobody is letting them in.
* Anyone who has ever worked in a well-stocked academic library will quickly realize that there is a scholarly journal on every discipline, every subdiscipline within the discipline and so on down the line for a few dozen iterations, rounded out with a few interdisciplinary ones.
* Anyone, who has heard that really good joke the other day, and now remembers it when they are in public, waiting for the bus or walking down the road. Cue every other passerby staring at them as they try to hide a sudden inexplicable burst of giggles and/or grinning.
* Anyone who has spent time around people routinely in dangerous situations (police, firefighters, paramedics, and soldiers) will have seen this. (Compare
* Anyone who has subscribed to MLB.tv (Major League Baseball's online streaming service) knows how horrifically the company abuses ALL FOUR of these themes. In fact, in the course of a single baseball game, lasting around 2 hours and 40 minutes, there are somewhere around FORTY commercials (of two varieties) for the same service that you were already using to view the game! Add in the fact that there are only about three distinct commercials to go around, and you get the idea.
* Anyone who has worked in a call center likely has many stories of these. Remember when making your voicemail: random strangers asking for money will hear it.
* Anyone who is exposed to radiation is scrubbed down. Instructions for emergency workers after a nuclear accident involves shampooing hair, removing and burying all clothes and jewelry, scrubbing with a rough brush. This is to reduce the damage done by fallout and the radioactive dust and grime that might be covering you. It's one thing to be exposed to radiation for 2 minutes. It is another to have a bit of radioactive grime in your hair bombarding your skull for hours and hours.
* Anyone who is uncomfortable with what we're doing, leave now" speech.
* Anyone who knows anything about their religion knows how stupid this is.
* Anyone who lived in Ontario around 1998-2000 while in grades one and two was probably scared shitless by the Ontario Hydro Diorama. Essentially, it was a little model town filled with kids doing various stupid things with electricity, such as flying kites too close to hydro lines or jamming forks in toasters. The presenter explained the obvious danger in the below situation before pressing a button that caused the kid to light up like a Christmas tree, spew sparks, and let out an indescribably horrific zapping sound. There was also a similar version brought to 3-5th graders by a electrical company in Maine, depicting things like kids being killed via electrocution when trying to retrieve a soccer ball from a power plant.
* anyone who lives in a time zone significantly different from your own. Watch

people say "Have a good night" to someone before saying "Off to lunch, bye!" and everything else.
* Anyone who lives to collect his pension after spending their adult life deep-sea fishing in the northern latitudes probably qualifies by default.
* Anyone who manages to wake up after spending a long time in a coma or vegetative state.
* Anyone who possesses the three Deathly Hallows is said to become the "Master of Death". Many people theorize that this means giving their owner some sort of immortality. The various people who undertake the search for the Hallows believe as such, including Xenophilius Lovegood, Gellert Grindelwald, and a young Albus Dumbledore. Only later in life did Dumbledore realize that "mastering Death" doesn't mean conquering death and becoming immortal, but
* Anyone who puts on the helmet of Dr. Fate gains incredible magic power, but runs the risk of having their body stolen permanently by the Lord of Order, Nabu, who is tired of being stuck helplessly in the helmet while the forces of chaos have their way with the world. Wearing the helmet is considered an absolute last resort, but even so it's worn by three different members of the team, each time because it was clearly the only viable option.
* Anyone who says the Poles went down without a fight has never heard of the Battle of Wizna. Anywhere from 350 to 720 Poles vs
* Anyone who's been in a LARP group knows that inevitably a newcomer to the group
* Anyone who's changed their name will have this happen to them occasionally with their old name.
* Anyone who's done any sort of delivery service such as UPS or pizza delivery eventually encounters a gate requiring a code. Oftentimes, they'll be given a list of gate codes for their area or are allowed to ask. Thing is, now they have the code and can give it to anyone they want, including burglars, solicitors, or even just hacks who want to harass the people behind the gates. This is why most gates have "call" features these days which serve a dual purpose: keep the code safe, and also provide a convenient way for the person to reach a given address should they not know the code or another vehicle isn't driving in that they can just tail behind. The homeowner will only let people in on official business, and since they already know you're coming and have official business it isn't an issue...theoretically speaking, as the homeowner may be out and about, either having forgotten about the delivery or assumed the driver will somehow finagle their way in. Or the delivery is not under any name on the directory.
* Anyone who's eaten a Devil Fruit gets amazing powers, but they all share one weakness; the inability to swim.
* Anyone who's ever been a patient in a hospital can attest that, while the doctor might check in on them for anywhere from five to thirty minutes a day, the bulk of their care, all day, every day, is delivered by three or four nurses on various shifts.
* Anyone who's ever been in a silent classroom - perhaps doing an exam or having to work without speaking.
* Anyone who's ever done any extensive work on miniatures for Tabletop Gaming (either Role-playing Games or Wargaming) can tell you: Xacto knives are
* Anyone who's ever done live theater can attest to this. It's not that something is funny, it just
* Anyone who's ever had a surgery under general anesthetic will remember being asked to perform a task along the lines of counting backwards from ten, and will usually not remember getting much further down the list than "Seven" or maybe "Six". Of course, this does involve a specialist calculating the correct dosage for the patient, administering the drug intravenously, and the recipient of the sedation being compliant throughout; said specialist then has to stay around for the entire procedure to monitor for any complications, such as the dose being a little bit off, or perhaps a sudden and potentially fatal allergic reaction... The comedy musical duo Amateur Transplants (comprised of two doctors) poke fun at the perception of the job among other medics in their song
* Anyone who's gotten any part of their body waxed can tell you that it is

actually quite painful, especially if you take into consideration how, unlike shaving (which is just cutting off the top part of the hair), waxing is pulling the hair out by the root (which causes it to take longer to grow back).
* Anyone who's seen enough YouTube Poop videos featuring the infamous
* Anyone who starts to fall asleep in class while still trying to take notes has probably ended up with this.
* Anyone who's worked in any kind of office environment is likely to recognize them, or at the very least take a closer look to see if it's a demotivator or the real thing.
* Anyone who touches the Cane of Aging can be aged 20 years. If used as a weapon, any creature it hits can be aged 10 years.
* Anyone who tries to get an introvert or a shy person to open up by forcing them to be social. To them, it is trying to help someone out of their shell. To the person they are trying to help, however, it can come off as them being forced into something they are
* Anyone who wants to can usually kick off an arc, and several plots sometimes run at once. Fortunately, this doesn't seem to have become too confusing.
* Anyone who willingly works with Unicron also counts. This list includes:
* Anyone who works in a place with animals as a heavy focus (pet store, zoo, animal shelter, etc.) can tell you that a sign saying "Do Not Tap On Glass" or "Do Not Put Fingers In Cage" is bound to be ignored by children and adults alike, much to the annoyance of employees, the stress of the animals in question, and possibly the pain of the offending fingers.
* Anyone willing to undergo the trial clearly had a lot of reasons to back out if they thought they were guilty, since they believed God would know the truth and they knew many people were spared but many others were not.
* Anyone with a dry sense of humor or who has a reputation of being serious probably can relate to the pain of a joke falling flat because nobody can tell if he/she is joking or not.
* Anyone with a freshly pierced tongue, lip, or cheek tend to talk like this until they heal, as will anyone who's just had dental work and still has numb lips from the anesthetic.
* Anyone with a mic in an online game falls into either this, actually trying to play the game, being an idiot, being a douche, mic spamming, or being drunk/high. Loons are generally the best ones to encounter.
* Anyone with an aftermarket car stereo knows how easy it is to set off entire blocks just by driving down the street with the bass turned up.
* Anyone with a reasonable ability to read people spots that Vimes is used to more serious command than being "Sergeant-at-Arms John Keel" in
* Anyone with even the tiniest bit of knowledge in basic botany or zoology would know that Pandora's flora and fauna primarily evolved to look visually impressive to moviegoers. How would a giant species with impenetrable armor plating and no apparent predators not quickly overpopulate? Why the extra legs and bio-luminescence when they serve no function and could even be a liability? Cuz' they
* Anyone with knowledge of cuisine would understand that American Chinese food is far removed from "true" Chinese food, which is why it was a notable risk for
* Anyone with physical access to a safe will be able to open it with 100% success given enough time and the proper tools. As such the security of physical devices are rated in "Minutes" that an attacker with unfettered access to the device will need to defeat the security measures. Surprisingly the
* Anyone with the Herbalism skill used to have access to a haste-increasing ability which caused flowers to sprout around them.
* Anyone with the Time Gem (and, of course, the completed Infinity Gauntlet) in the
* Anyone with the title Sire is a lesser evil: Sire Uri (ambitious and officious), Siress Bellaby (greedy and lustful, Sire Bogan (manipulative).
* Anyone with the Will of D in the series always has a wide smile on their faces when faced with death.
* Anyone working in a hospital emergency room will tell you that this is

* any on this trope, and the most common complaint of fans of the series is that the game ends all the same.
* Any Orc or Olog grunt that kills you will be promoted to a Captain, and will remember their humble origins as a grunt. An Orc slave that kills you will remain bitter since their slave brand will prevent them from being taken seriously despite being a captain.
* any or just not being featured enough. You will find many IWC fans putting them over on message boards and saying they deserve pushes etc and how much they should be treated better than how they're being used right now. The wrestler gets a push - they're not underrated anymore so cue large amounts of haters and complainers bashing them.
* any Orlando Magic, and Reggie Miller's Pacers, to name a few of the more prominent examples.
* any other girl a swimsuit out of a particular bolt of fabric. Turns out Betty used that fabric to make swimsuits for a bunch of guys.
* any other physical traits) and Masters of Life can do this for others. However, living bodies naturally resist magical influence, so the spell needs to be periodically renewed.
* any other value at all will be interpreted as "True". Weakly-typed languages try to help you, the coder, get the job done quickly, and they work great — right up to the point where they suddenly don't.
* Any page on food-shaped vehicles would be remiss if they didn't mention the granddaddy of them all, the
* Any pair of young, male presenters on British television will be compared to
* Any paleontologist watching. That said, the real animal still probably looked drastically different than the film monster with a feathery body and wings to resemble a sort of flightless eagle, as many scientists believe dromeaosaurs had feathers and they definitely lacked probated wrists.
* Any pantomime or stage play featuring characters Setting Out into the World to Seek Their Fortune will include a bindle stick. Especially
* any part of his anatomy?", eliciting "oooooh"s from every woman in the background.
* Any part of the Constitution can become this, not just amendments. In fact the whole point of amendments, really, is to have this option to rewrite part of the Constitution if need be. For example, U.S. senators were originally elected by the state legislatures (as specified in Article 1), but that was changed in 1913 to direct popular vote by the 17th Amendment.
* Any part played by William Zabka during the late 1980s. He seemed to have made a career out of playing pretty-boy bullies who thought nothing of acting as crappily as possible to anyone not as handsome, rich, and self-important as himself (the characters he played in
* Any PC multiplayer game that requires all the participants to get matched up with each other ahead of time and
* Any people that didn't fight in a formation would learn to do so upon encountering an army who did, one way or the other. They would either copy the enemy's tactics on their own, the better to resist them, or be conquered and added to their foes army.
* Any perfectionist will not see the finished work afterward because it will make them notice the flaws that still went through, as noted by
* Any person who tried to make a deal with the Earl to bring back their loved one, which would only end badly for both parties.
* ANY person who was involved in the Ishvalan war and isn't one of the bad guys. Especially
* Any physical damage suffered by those brought back to life with Impure World Resurrection is reversed by the pieces coming together like an object made of ash crumbling in reverse. Hence the term "
* Any pilot/aviator who is described as playing by his own rules and disregarding authority would not be put in the seat of a multi-million dollar jet.
* Any place with a sufficient concentration/accumulation of dead bodies in the New

World of
* Any player character). This is lampshaded in the first generation games and their remakes: the waiter on board the S.S. Anne refers to the player as "Le Strong Silent Type", but yet despite his lack of speech in future games and the above comment, in the games he is playable in he has several lines of internal thought, and a NPC even parrots his apparent dialogue at one point, which is revealed to be surprisingly fluent and casual. (The NPC, however, is known to have made dialogue up at least once.)
* Any Pokémon under the effects of Attract can be seen making a fool of themselves in the middle of battle. This becomes an
* Any Pokémon with the move Overheat, though most notably Ash's Torkoal, could only use it once at full power. This has its roots in the games, where, while the move can be used multiple times, it cuts the Special Attack by half whenever it is used.
* Any popular self-help person gets this: Tony Robbins, Deepak Chopra, Wayne Dyer, Steve Pavlina, Abraham Hicks, Eckhart Tolle are several. It's enough that a "self-help guru" with sycophants is a standard image, a
* Any post of on the Web that appears to lead up to something titillating will often turn out to be this, teasing the bait long enough to hook in viewers before employing some form of
* any prepared meal, and is in fact one of the most nutritious items in the game.
* any price in order to save them. At least she sets her priorities straight.
* Any prince that shows up in a fairy tale might be rolled up into one for convenience, usually depicting him as a
* Any product that is mass produced can also be made with different colors. Cars and electronics are a big example of this.
* Any professional skydiver, martial arts practitioner, horseback rider, or ice hockey player will get a lot of bruises, breaks, and cuts over time.
* any (pronounced Skoon) because it was held in Scone Abbey, Perthshire. They also practically monopolize the cosmetics industry, most likely because they have real chemistry instead of alchemy.
* any public office, led chants of "Run! Run! Run!" When he started his own U.S. presidential campaign, supporters chanted, "Run, Jesse, run!" and "Win, Jesse, win!" In his 1988 campaign, the chant was "Keep hope alive" (which he still uses).
* Any questions about plotholes are actually taboo in the BnG community.
* Any Questions For Ben?, an Australian film, Ben is sitting up in the stands with the father of one of the Wimbledon tennis players, whose performance is not up to scratch. Her father keeps pressing Ben, asking if he had sex with her, he keeps denying it, until finally he yells "No, I did not have sex with your daughter!". A slight echo sounds, and everyone is looking at him, thanks to an unfortunate boom mic.
* Any race car driver's skills are fairly easily transferred to street cars, be them open-wheelers or modified production cars. Therefore, pretty much all competent race car drivers are capable of badass feats behind the wheel. One example of such a driver showing off on
* any racist connotations since they are depicted as a race of bloodthirsty cannibal raiders that steal from others rather than creating anything of worth, and the males' favorite pastime is to capture women from other races, mainly the Red and White Martians.
* Any Ranger team that returns for a team-up with the current one will qualify as this.
* Any rapper who says "Get it" or similar after dropping a punchline.
* Anyr are often dubbed horses, but have large donkey-like ears, unicorn tails, and
* Any ratite bird would count for the fact of being flightless and perceived as quite
* Any RC modellers will experience this at least once. On an RC controller, left stick Y-axis is throttle, while X-axis is yaw. Right stick is roll/pitch on X/Y-axis, respectively. Enter the Playstation.

* Any reactor design that allows for a cook to have access to the primary cooling loop to clean his pans was a
* any real flavor, it's automatically bad) and decor. Ultimately, though, they convince the citizens of Canterlot to reject Zesty's strict, cookie-cutter ideas of what a fancy restaurant should look like.
* Any Reaper tech can act like this. Even the seemingly disposable Dragon's Teeth can brainwash nearby people into impaling themselves on the spikes, thus transforming into Husks.
* Any reasonably competent pilot with a dash of aggressiveness and enough tactical savvy can score aerial victories in a plane designed for dogfighting. A very talented few (Rudel, Vejtasa) can score victories in a dive bomber. Adrian "Warby" Warburton of the RAF scored five aerial victories while flying a
* Any relationship with Fenris will have tones of this. Even at his most charming, he's still rather dry and bleak. A relationship with Anders has tones of this as well. In both cases, the dynamic is reversed temporarily after
* Any remaining elements of this are thoroughly thrown out the window in one the anime's filler arcs, where all the Zanpakutou spirits are materialized in humanoid forms and wreaking havoc.
* any road-legal car (with the exception of some really high-end supercars) going faster than about 80 mph is subject to this trope; no crumple zone or airbag could possible dissipate that amount of energy, and weight considerations (which is why trucks are safer) aren't quite as relevant when you're hitting a solid object, which is usually what happens.
* Any robot with a flywheel too. They're very devastating weapons, but also very heavy too, usually taking up 20%-25% of the robot's weight allotment. Designers, forced to shed weight to ensure it's light enough to compete, often go for shedding armour first. Flywheels also tended to have enormous recoil when they struck something,
* Any rock band that has enjoyed significant mainstream popularity will have one of these. In particular, bands like
* any rooms instead of their own, hoping that they would mess their rooms up. Instead, they yelled at each other through the air vents. They were actually quite amused at how it backfired.
* Any room utilized as a dressing room for a theatrical production while it's being used for that purpose. It's a fact that anyone who is involved in acting and skilled at it is at least a little bit crazy, so what else would you expect when you set up these rooms where multiple actors will be crowded together in various states of
* Any roughly humanoid Muppet like Scooter or Dr. Teeth falls into this category. While Kermit, Fozzie, or Piggy may experience special or unfair treatment due to being animals, there's never any indication that "human" Muppets are not simply short, goofy humans. The
* Any Russian character appearing on the show had a 99% chance of being killed, unless they were female. Even recurring character Colonel Chekov eventually bites it after gaining command of the first Russian starship. Which is promptly destroyed.
* , any scene featuring both him and his child self will refer to him as Vader to avoid confusion.
* Any scene with Kuranosuke's uncle, the PM, lusting after the cross-dressed Kuranosuke.
* Any school or college team trying to pull this off would be out of luck, anyway. The animal would have to be enrolled as a student.
* Any seemingly-critical photograph taken of the crime will turn out to be entirely misleading.
* Any senior officer appointed by the High Ridge government, with the one exception of Khumalo.
* Any sensational record in any sport. At the 1968 Summer Olympics, Bob Beamon set a world record for the long jump with a jump of 8.90 m. Prior to this, the world record had been broken thirteen times since 1901, with an average increase of 6 cm;

Beamon's jump bettered the existing record by 55 cm. The defending Olympic champion Lynn Davies told Beamon, "You have destroyed this event." The record stood until 1991. Beamon himself never won another Olympic medal.
* any series. If he tries to turn into a bug that sprays sticky gunk, it'll work every time. If he tries to turn into the Ultraman pastiche, he'll probably get... the bug that sprays sticky gunk.
* Any series that maintains a solid internal consistency can be subject to this. It becomes easy to find how a throw-away remark or the viewpoint of an isolated character becomes supported by all the other elements of the work, even if the author never intended or agreed with such statements.
* Any Servant with an anti-fortress/city phantasm counts, as their phantasm is specifically designed to annihilate a fully-defended castle in one shot. Heck, even an anti-army phantasm probably would count (though on the low end of the scale, being designed to kill hundreds of
* any's fighting style seems to consist entirely of cutting enemy guns in half and then body tackling people. And doors. The man really hates doors. And walls. And ceilings. And support columns. Really, just architecture in general.
* any show). Also, the kitchen is right next to the front door, which helps shorten Kramer's frequent journeys from one to the other. This however is more common to television apartment sets, and somewhat true-to-life.
* any show, any non-human character who doesn't explode goes out this way instead.
* Any show (Hanna-Barbera or otherwise) that involves a travelling musical group (e.g.,
* Any show that has Japanese elements is immediately not allowed for airing in the country due to strained Japan-Korea relations. In fact,
* Any similarity between Morbo, Horrible Gelatinous Blob, and Lrrr, RULER OF THE PLANET Omnicron-Persei 8 is just your imagination. So the voice actor insists. And indeed, if close enough attention is paid, there are major differences. The Blob's voice is more guttural than Lrrr, and Morbo's is deeper. Where exactly Mr. HGB and Lrrr fall on the evil spectrum depends on the episode.
* Any smart prosecutor would make the deal dependent on her telling the full truth, with the agreement being that it was invalid if she didn't. In the USA, the prosecutor can do this. Such agreements can be worse for the guilty party than otherwise, because they can allow the prosecutor to then use any statements made prior, as well as set aside statutes of limitation.
* Any society where the population is divided into several ca can fall victim to this trope.
* Any soldier who was insufficiently eager to escape from an army hospital and rejoin the effort was viewed with suspicion. If you didn't buy a ticket home with genuine infirmity, then you belonged on the lines, dammit.
* Any song featured prominently on TikTok would qualify, with the crowning examples being ILOVEFRIDAY's "Mia Khalifa" (
* Any song that hasn't been featured in an album is potentially a song cut from the comic, even if they've been included on albums. Inversely, songs that Andrew Hussie hadn't been able to use before might fit into a later flash, either the song itself, a remix, or included as a theme in a medley.
* Any song written before 1970 with the reference of gay meaning jolly, fun, etc. is perfectly acceptable
* Any sort of family with a military tradition, where members volunteer for the military even without a pressing national need to serve.
* any sort of technology accomplishing, such as how Jesus rose Lazarus from the dead, simply by telling him to get up and walk out of the cave, from outside the cave, and considering the fact that Laz had been dead for several days and had already started to stink.
* Any species that can perceive radio signals as sound or sight would be driven blind or deaf immediately, if not completely insane.
* Any spell from the Invasion block with a kicker cost had either all or a part of the Invasion symbol on it, depending on the color of mana in said cost.
* Any sports team has a series of codes and signs to alert teammates to the

intended play; American football even has the huddle time period to plan out the exact move.
* Any stage that allows you to roam around in one way or another supplies you with many little sweets, some dialogue, and some actual animations:
* any star in the Alpha Centauri system, Sol would be a respectably bright star (about as bright as Vega looks on Earth) in the constellation Cassiopeia.
* Any state, with the consent of its own legislature and Congress, can change its borders or have new states carved out of it. (E.g., West Virginia.
* Any store with a specific shirt color or outfit combo (like Kinko's blue shirt and khakis or Pizza Hut's Red Polo) can cause inattentive shoppers to pester other shoppers who happened to be wearing the same color under the belief that they are workers.
* Any sufficiently advanced technology is indistinguishable from magic.
* any sufficiently real-looking gun is dangerous; for this reason, there are actual laws in the U.S. and U.K. that demand that any and all toy guns be made in bright, unrealistic colors, and you cannot buy realistic-looking toy guns, even if they're explicitly hooked up to arcade machines or video game systems. Countries that allow otherwise realistic-looking toy guns still demand they all have a bright orange muzzle tip, even if the gun is already painted in bright colors, and removing said tip counts as a criminal offense. In some jurisdictions, using a toy gun with the orange tip removed in a robbery is considered the same as using an actual gun. This is an ongoing issue, and is only one of the issues toy guns have been subject to:
* Any suicides or homicides from being shot in the face or head. In severe cases, the face and head can be turned into hamburger meat or pushed into the skull. If extremely lucky, the damage can be repaired and the person can survive, but probably with at least
* Any supermarket ad which mentions a specific product you should buy there. Or a product ad which adds that it's available at a specific supermarket. (In the UK Tesco is particularly prone to this.)
* Any surviving ruins or items from Azlant or its splinter colony Thassilon, which were destroyed by Earthfall;
* Any sword fight that has rules to prevent injury or that is scored as a competition is a downplayed version of flynning almost by definition; the only question—and it is a controversial question—is to what degree it does or doesn't simulate a real sword fight. Obviously, even students training for real combat cannot learn or practice under the same conditions as an actual bloody fight, or else they would get maimed or killed before they even attained proficiency. You have to watch their practice and make sure they aren't trying to kill each other, that they learn to respect the blade and aren't doing things like eye-gouging and biting. In that sense, the first defense against injury is voluntary restraint and control. Blunt and foiled swords were the first compromise in equipment to improve safety, and already this creates a huge difference in how the fencers will behave in sparring, because they will be a
* Any Tabletop RPG in which the DM is in the habit of giving players extra XP for roleplaying can have examples of this.
* any tailless or short-tailed cat is a Manx, when in fact several breeds feature reduced or absent tails, and even mixed-breed cats can have this trait. To further the confusion, plenty of Manx cats have normal tails, as breeding two tailless cats can result in even more severe spinal issues.
* any target any player who makes an aggressive action in their sight. This comes to a head when you're defending yourself against an aggressive player who has killed you multiple times, where the cops, who are most likely there because of your death, start attacking you because you shot back. Even worse as of "Gunrunning" with the advent of weaponized personal vehicles, as destroying a player's personal vehicle results in 'Bad Sport' points and a hefty insurance payout to the vehicle's owner. This combines to make a situation where a player being attacked by one of these missile-and-minigun-armed vehicles who does manage to destroy it loses money for destroying it, risks being labeled a griefer by the game, and probably gets the cops called on them by nearby NPCs.

* Any teacher in a given children's school may have to plan like this. There's always
* any team. More often than not, they were forced to sit out on the rest of a playoff series or missed the playoffs entirely.
* Any "Team _____" other than "Rocket" is mostly ignored by those outside of the fanbase (the
* Any team playing the New York Yankees, but specifically, the Brooklyn Dodgers.
* Any team that was led to success by a standout athlete has trouble after he goes away - best example being the
* Any team where fans only follow them when they're on a winning streak or in a championship game.
* Any technology of the 21st century when compared to even a few decades ago. We have robots, lasers, and we're working on holograms and energy shields.
* any, the level cap, the epic gear grinding, will be dismissed as just another unimaginative WoW clone.
* any, they've decided to treat Parson as if he has hired them in this way.
* anything about it, as the thing rolled over cars, barricades and such without slowing down, and shrugged off anything the police had. The police were in the process of requesting aid from the local military to destroy it (an idea no one was happy with, given it would be difficult to limit collateral damage), but then the tank got stuck on a highway divider, allowing a couple of daring cops to yank the hatch open and shoot the madman.
* anything - a disclaimer at the bottom of the screen stated "Spoiler: This is a dangerous amount of nutmeg. Like seriously, a dangerous amount. Do not eat this much nutmeg ever."
* Anything Although, the entire Donati clan may disagree that it was quite so funny.
* Anything and everything done by Joseph Joestar in his various appearances. While he gets plenty of memorably memetic lines in
* Anything and everything that is taller than it is wide is a phallic symbol. No exceptions. The same goes for anything that is famous for being larger than its peers. And if it's shorter than it's wide, you just turn it on its side...
* Anything and everything to do with cutie marks and the degree of reliance the ponies have towards them,
* anything. And scream in 27 languages. He's also saved the Disc multiple times when running was no longer an option. At one point, when two head wizards almost go nuclear, another realizes that the last time that happened, the Disc was almost destroyed and Rincewind stopped it with a half-brick in a sock. He looks around and sees Rincewind putting his sock back on.
* anything and simply slump to the ground, unmoving). Thankfully, Muriel's "Happy Plum" recipe proves an excellent cure.
* anything. And the Marquis is stopping short of actual villainy; while circumstantial evidence threatens an innocent man close to Lord Darcy with a murder conviction, and the Marquis is far too intelligent for his professed satisfaction with the current investigation to be genuine, if pushed far enough he wouldn't really let this stand. The never-stated issue here is entirely who will do the work and whose pocket the expenses of investigation will come out of. Thus the quote.
* anything at all, even talk with proper syntax. Once he is able to relearn how to make a Krabby Patty, he returns back to normal.
* anything at the duration and volumes reported would cause sleep deprivation and other problems, though; the Sesame Street songs may have been good choices (they were certainly good choices if making people take the technique less seriously was the intention) but even a song you want to listen to isn't one you want forcibly played to you all night at unreasonable decibel levels.
* Anything built by the Protoss comes with a deflective shield that wears off after absorbing a certain amount of damage; although these shields slowly regenerate over time, the player can use Shield Batteries for a quick recharge. The Terrans also have a special skill, the Defensive Matrix, that surrounds a unit in a mostly impenetrable shield (the unit still takes a little bit of damage).

* Anything but That!: A character pleads that they'll accept any punishment or torture except for this particular one.
* Anything But Typical blinks his eyes, sometimes one at a time, and flaps his hands.
* Anything But Typical, Jason wet his pants while playing video games on the day he was diagnosed with autism.
* Anything can become this when you think about it the right way. The mouth for example? It's a hole in your skull lined with exposed bone (teeth), housing a exposed muscle that is detached at one end (tongue) that people touch with their exposed muscle for pleasure (kissing), and used to put various things inside you (food). Common examples are the heated-with-fire muscles of animals (cooked meat), flower heads (broccoli), the ejected and empty "womb" of a bird (eggs), and bug puke (honey).
* Anything connected to the Elder powers will also require sacrifices. In a large-scale example, a minor ritual is used to trigger a monster invasion of a town. The dead of the invasion, numbering in the tens of thousands, are the actual sacrifice.
* Anything contaminating he comes into contact with is likely to cause a Game Over in short order, such as the mutating goop from the fifth game.
* Anything created by members of the Baha'i Faith is banned in Iran. One newspaper was suspended in 2009 because it had an Indian tourism advertisement featuring a photo of a Baha'i temple. Unfortunately for the newspaper, one of the most prominent symbols of modern Delhi, and the photo in said ad, is
* Anything done with a mail merge system, like stock emails, letters, etc.
* Anything elemental fluorine touches, other than an already fluorinated compound like Teflon, bursts into flame as it strips electrons from more stable atoms. This includes things like
* anything else. The Cadian way of fighting war is pretty much the Imperial standard.
* anything, even a piece of cloth, into a deadly weapon. She manages to get needles into her mouth and break her restraints. Though her escape attempt fails, she kicks a lot of ass in the process.
* anything for doing so, all Whirl asks is that Chromedome stop hugging him.
* anything for her beloved king, and she is resigned to the fact that he will never return her feelings. (Brienne believes that Renly's lack of romantic interest is due to her ugly looks and lower social status, not because he's gay).
* anything for the first four to six months of their lives. This makes caring for orphaned primates especially challenging, as they will try to keep a death-grip on their human caregivers 24/7.
* anything for the first time, it generally takes a few tries or some time to work out the kinks and bugs and what-not.
* anything from firing. It's doubly bad for ranged units that can handle themselves in melee, like heroes and lords, since they won't fight back if attacked even if they'd handily win. This ironically means that something designed to ostensibly protect ranged units from being attacked makes them much easier to attack. It's also enabled on all ranged units by default. Most veteran players will immediately disable that, only re-enabling it on very specific units.
* Anything from syndicator Litton Entertainment will inevitably get this, regardless of what they put out (Jack Hanna being an occasional exception due to
* Anything from the list of things that do qualify, but it's something that's
* Anything from the list of things that do qualify, if it's not common or severe enough to significantly bother fans of the work every time it comes up. Giving a reason why the misconception is so common is a good way to make sure your example doesn't fall into this (as well as avoiding being a
* Anything Goes almost entirely ends with one. Ms. Evangeline Harcourt loses her dog during the first half of the first act, and spends the next act-and-a-half looking for it all across the boat. At the end of the show, the Purser brings the dog to her, saying it was found in the swimming pool.
* Anything Goes and be hiding a spontaneous wild side. He marries Reno, Billy marries Hope, and Billy's boss marries Hope's mother.

* Anything Goes. Even worse, her whining is horribly indecisive, with her frequently alternating between crying about how she wants to marry Billy and crying about how she doesn't want to see Billy again.
* Anything Goes). He helps a stowaway, Billy Crocker, pose as Public Enemy No. 1. At first, the two of them are treated as celebrities but when Billy's true identity is learned, they're both thrown into the brig. The greatest disappointment of his career is finding out that he's no longer a wanted man.
* Anything Goes included a ballet after "All Through The Night" in which Gaby Duval imagines her Broadway starring turn.
* Anything Goes is a perfectly harmless gangster who genuinely tries to help the hero and also smuggles a tommy gun on board... just in case.
* Anything Goes, Mrs. Harcourt's dog goes missing throughout the entire show. At the very end of the show, he is returned, saying he was found in the ship's pool. When Mrs. Harcourt asks what he was doing in the pool, everyone, right on cue, says, "The dog paddle."
* Anything Goes. Note, however, that the 1962 version involves no sexual or romantic tension between Billy and Reno.
* Anything Goes. Reno Sweeney dresses up as a Chinese woman and pretends to have had Lord Evelyn Oakleigh's lovechild, so that he can break his engagement with Miss Hope Harcourt (who is in love with Reno's best friend, Billy Crocker). Reno and Evelyn do eventually get married (in a double wedding with Billy and Hope), which possibly subverts this trope. But Reno was in love with Lord Oakleigh before she agreed to play the abandoned lover. It was the reason she agreed to do it in the first place.
* Anything Goes this trope by telling Reno Sweeney that "[his boss] hires and fires me every eight minutes."
* Anything having to do with the dragon or Nemesite civilizations in
* Anything having to do with the Nazis — even if it portrays them in a bad light (there are some exceptions, but not many)
* anything, he just throws them off and shunts them to the side while destroying every object in his path. The only thing that stops him is reinserting the healthcare chip. And with it, he will not let others stop him from helping people who are hurt or otherwise distressed.
* anything. Her Pokemon have never fainted once in battle due to either her opponents being Team Rocket or being accompanied by a stronger trainer or dumb luck, while the showcases never conveyed her as losing without a serious folly by one of her team, her act always considered the most popular up until the finals.
* anything. If you run in front of a truck on the freeway, you can fly like a ragdoll superman across the island and slam into a building, only to float somewhere else at 90Ks/h, bonus points if it's back into another truck on the freeway.
* anything in the bar was made in America. Moe points his shotgun at them and says, "Just this." It immediately fires backwards into his own face.
* Anything in the entertainment industry will involve starting off at the "bottom rung": most crew members for film and TV start as production assistants moving furniture and passing out clipboards, while most actors start in professional productions as extras who may do little more than sit at a table in the background (probably unpaid) while still working the same long day as everyone else. Aspiring musicians may start as roadies and guitar techs, hauling gear and making sure everything's in tune while the band gets the credit. Someone who desires to work in the lighting department in a theatre will often be apprenticed (officially or otherwise) to an experienced tech who sends the new guy off to hang heavy Fresnels and plug stuff in. Being in these positions allows for excellent observation of everything that goes into making movies and music and everything else, and helps teach them the discipline and patience to work long hours in demanding jobs. If someone can't handle a 14 hour day of hauling stuff around or passing out release forms to extras, they probably can't handle the more glamorous job they want.
* anything in the game will survive if a single piece of roof is dropped on it.
* Anything involving a living creature being inflated (usually due to

* Anything involving a primate is going to involve lines like "monkeying around", "making a monkey('s uncle) out of someone", "going ape", and "monkey business".
* Anything involving honey, molasses, maple syrup, etc. will be described as a "sticky situation".
* Anything involving Pyramids, or simply Egypt, will be dubbed a "pyramid scheme" at some point.
* Anything involving queer sexuality/identity, and whether it's depicted positively or negatively
* anything isn't really one of these until his son tells him this in a desperate attempt to get him to marry his mother and thus ensure his existence.
* anything is possible on this sea, the notion of an "island in the sky" should not be dismissed, especially when it's true. This is later explained as being a deconstruction as their disbelief in Jaya and the story of the island in the sky comes from their disdain, to put it mildly, in the romanticism of the Pirate Age; laughing at things like dreams and wishes and instead focus on the plunder and materialistic worth of things.
* "Anything is possible when your man smells like Old Spice and not a lady. I'm on a horse."
* anything it seems to be following this trope. That's what you get when you have 22 characters and every single one of them is a murder suspect.
* anything itself. Their aesthetics have since taken ruthless advantage of this principle.
* anything kicks in when you realize that if Bruce had simply insisted on continuing to listen to his radio his parents would've stayed home with him and they wouldn't have died in the first place.
* anything. Later, Ed tried to bring back his brother, his 'right-hand man', and lost his literal right hand.
* Anything made of paper or wood, since they both originate as trees.
* Anything more than a few drops of many eyedrops formulas, including Visine, will cause death by shutting down the nervous system. Nothing more is necessary. See the Visine example below in the Real Life section.
* Anything not in the Azeri language, including Russian and even Turkish programming was banned from television in 2009. Russian was common as Azerbaijan used to be part of the Soviet Union, and Turkish is very similar to Azeri anyway, so a lot of TV was in those languages; the government felt that this would undermine the prevalence of Azeri language and culture.
* anything of all people. This motivates her to find a job at Stile in the first place—she wants the money to study abroad. This likely has something to do with the fact that she comes from a very traditionally Japanese family.
* Anything of the sort would require a great deal of testing, which could be morally dubious as it would by its very nature be
* Anything possessed by Dark Matter usually ends up with this trope applying in some manner. Most famously, King Dedede sprouts an eye on his stomach (which occasionally transforms into a mouth because... reasons?) and in Kirby 64, a Dark Matter-possessed Waddle Dee grows an eye that covers his entire face, making he look like a Waddle Doo minus the beam ability.
* Anything related to Cole after his heel turn. Just talk to anyone of his "Cole Miners" and see how quickly they keep reusing anything Cole has said over and over again.
* Anything related to the Abyss and the Dark will often be weak to Fire, seeing as Flame and Dark are opposites in
* Anything remaining from the nonhuman kingdoms of the Cyclopes and Serpentmen, whose fall predates Earthfall;
* anything said by the Commandos. "Real tough guy! That was left-handed! I've got a present for ya! Keep 'em comin!" etc, etc.
* Anything showing America or another Western country in a positive light was banned. American works that
* Anything smaller than a capital-sized vessel will look like a generic large, medium, or small-sized piece of sparking space-flotsam, depending on the size of

the destroyed ship in question. Capital-sized ships, however, look like actual wrecks: they retain the appearance of the original ship while being scorched, hollow, and dark, with several sections of the outer hull missing.
* Anything: something to the effect that when a person is dreaming, they create every person, event, and object in that dream. While Lynch may have very specific meanings in mind about certain things he puts into his films, he has also admitted that sometimes images just strike his fancy, and he puts them into his films without trying to assign any meaning to them.
* anything tends to riddle whatever she ends up building, which is just the way she likes it.
* Anything that came from an animal can be reanimated by a necromancer, including things like its empty pelt. This is an
* Anything that creates fire will ignite the flammable materials in the Vineyard and the Dry Forest.
* "Anything that doesn't take years of your life and drive you to suicide hardly seems worth doing."
* anything that happened to be immediately available. This lash-up desperation vehicle had more than a look of the Heath Robinson device about it, and was utterly useless for any sort of combat. The Semple tank was scrapped when better purpose-built vehicles were made available.
* Anything that just says "target" doesn't care about side. This allows Absolute Zero to use some of his attacks on himself to heal up, or allows heroes to trigger Kaargra Warfang's titles or shift their health to trigger a specific Wager Master card by hitting each other.
* Anything that makes no sense in One Piece is often due to a very simple explanation.
* Anything That Moves: A character who will have sex with almost anyone.
* Anything That Moves) and Pantalone (abusive of Eddie, his Arlecchino, hints of a relationship with Columbia.)
* Anything That Moves members of both sexes, although "bisexual" is not equivalent to "promiscuous".
* Anything That Moves. She's also a lovable (or annoying, depending on your viewpoint) ditz who does things like mistakenly enlisting in the wrong army in an attempt to follow her brother, agree to have sex with Tucker on the battlefield so he won't "die a virgin", and hold raves in an empty military base.
* Anything That Moves: Someone may have sexual preferences between gender or species but seems to find all humans their orientation matches sexually attractive.
* Anything that's stored or transported under high pressure is potentially this, even if it's something like sand that's otherwise totally inert — because it's not the substance that's the risk, it's the pressure. It's safe as long as the pressure containment is intact, but if it's breached or punctured in any way, the pressure differential can cause the pressurized unit to explode violently. This is one of the reasons why decompression of an aircraft can be so catastrophic — the force of the depressurization is enough to tear out critical control systems.
* Anything that's touted as a way to remove "toxins" from your body will let you know.)
* Anything the Finnish Navy can throw in. Their ships are crammed with oversized guns and missiles, and outfitted with minelaying equipment, but have no armor whatsoever — they rather employ hiding in the archipelago as their defensive strategy. It helps that Finland has one of the most diabolical archipelagoes and littoral waters in the world. There is always a small island behind which you can hide.
* Anything the Necrons build as well. It's pretty uncommon for anything to slip by Cadia and Ultramar but a bunch of necron frigates snuck through half the Imperium controlled galaxy unnoticed and managed to land on Mars, one of the most heavily defended planets in the setting that has about half the imperial navy in orbit at all times with a considerable nextdoor on Terra as well.
* Anything the Orks build or salvage will be the alleged buggy, but thanks to the crude-but-effective nature of Ork tech

* anything. The ratio could be something like an hour outside for the colour blue inside.
* anything the user wants it to. A Node's Operating system could very well just look like a library, with each book representing a program. There's no limiting the weirdness.
* anything to end the strike. He does this obviously hoping for Sinclair to use military force and to crush the dockworker union. Sinclair decides to resolve things by moving funds from the station's military budget to meet the dockers' demands instead, which he couldn't do until the negotiator invoked the Rush Act.
* anything too, which gives you a better way of controlling your surroundings.
* anything, two omniscopes were successfully linked for long-distance "video conference" communication purposes.
* anything" under the Others' control using "voodoo"-style, necromantic means. They haven't actually been explicitly mentioned to eat flesh, but they do kill the living to create more wights in a very zombie-like way using any natural weapons they happen to have. Which, naturally, does include biting... and clawing (very effective in the case of a wighted bear), punching, bashing, bludgeoning and so on.
* anything unless someone is willing to cough up some bits for it. Not even if lives are depending on it. Gilda is actually the only good griffin shown in that episode.
* anything until they were finally able to meet up with the French Resistance and secure passage back to England.
* anything, where the name duplication among the nominees is very plot-relevant.)
* anything which is the Finnish version of Kinky Friedman's 'Jerk from Johannesburg'. It at first sounds as an extremely bad taste bigot song, but actually is a very cruel satire of the Apartheid era South Africa.
* anything will have a devoted fanbase, but special note can probably go for vintage advertisements. Whilst people back in the day probably saw advertisement to be just as annoying as people do today, the entertainment factor may lie in the artwork and/or outdated slang.
* Anything with a +5 modifier is essentially this. The crafting system (accessed through Cespenar in the
* anything with bones that isn't already dead can be turned into Dem Bones through application of the Skeleton template. This includes everything from normal humanoids, to dragons, to bizarre aberrations with bone structures such have never been seen by mortal eyes.
* Anything within the Tomb King's army labeled as a "construct" falls into this. While it's implied they did use the bones of long-dead creatures, they're still largely constructed out of wood and stone. The Sphinxes are the extremes, impossibly tall animated statues, some of which are capable
* Anything with Spawn, Implant, or Create Attacks; for example, the Slaad and the Marrash.
* Anything written by Bob Budinsky. Unlike many writers he always makes sure that absolutely no sound effects are present in space scenes. This even played a role in the plot of a
* Anything written from the Old Ehlnofey language uses all capital letters. The Ehlnofey were the
* "Anything You Can Do" begins with a Mountie taking control of Murdoch's investigation on the grounds that the victim is a suspect he's been pursuing.
* Anything You Can Do, I Can Do Better: Character who is on your tail whenever you make a statement, prepared to respond with something they've done twice as better.
* "Anything You Can Do..." opens with Murdoch, his father and a Mountie in an abandoned building being shot at by several people (the exact number is the subject of some debate among the characters). Then the action shifts to some days earlier when Murdoch is called to a suspicious death on his home turf and meets the Mountie, Sgt. Jasper Linney. From there, the story goes back and forth between events in Toronto and the situation in that abandoned town, which proves to be in Linney's jurisdiction.
* Anything you can do with four-wheel driven car with studded tires on ice.

* anything you put inside your or someone else's butt that is not strongly attached to another human being should have a flared base — which will ensure the base stays outside the body.
* "Anything you say may be used against you in a court of law," And that's not getting into all the different ways that "acting like someone who is innocent" can translate into "showing no remorse" with the right prosecutor.
* anything you want down there, from pirated video games to child porn to hitmen for hire, legality be damned.
* Anything Yukon Do, I Can Do Better", partly because he has to, partly to warm up a little. Cody, who's in the water with him, is horrified and can barely outswim the yellow stain.
* Any throwaway comment by George Lucas pertaining to the original two trilogies is accepted as canon, regardless of how ridiculous it is. See: Admiral Motti's first name and the true home world of Obi-Wan Kenobi.
* Any time a car radio is on in a 60s or 70s TV drama, chances are good that an EBS test is being broadcast. That's because the text of the EBS test is a work of the federal government and therefore in the public domain, so producers didn't have to pay royalties or license fees if they used it. Eventually, though, Washington asked the networks to cut down on the practice so that prime-time TV viewers wouldn't become overly used to the noise and simply tune it out.
* Anytime a cartoon character eats a watermelon, expect this trope to play out. This was a recurring gag in 1930's and 1940's cartoons, done in a manner and with an intention that makes them very uncomfortable viewing today. This sight gag played on the association of watermelons with black Americans.
* Anytime a champion of Slaanesh fights someone is almost always guaranteed to be this, as unearthly beauty is a common gift of the Chaos god of excess (especially in 40k, where anyone who can fight a champion alone is likely a scarred and grizzled veteran whose face is as much bionics as it is flesh). The notable exception is Lucius the Eternal, who started as a bishonen but whose face is now a network of self-inflicted scars.
* Any time a combatant is non-white, Peter and Lloyd will always bring in a guest star of the appropriate ethnicity. They also
* Any time a demon possesses a businessman. Crowley, like Castiel, gains bonus points for his own
* Anytime a group of superheroes decide to have a "friendly" game during their downtime then eventually they break out the superpowers and violent
* Any time a Halloween costume store opens up, chances are there'll be someone in one kind of costume or another dancing around with a sign out front.
* Any time an army besieges Israel, they will inevitably encounter that one farmer still on good terms with the Almighty. This brings about many an epic
* Any time a new fossil species is discovered that falls within an established clade of organisms, yet its traits stretch the boundaries of what that clade was previously presumed to have been like, it's this trope for paleontologists, kicking off controversy and bickering until its significance is either debunked or embraced. Particularly noteworthy is
* Any time a song, album, musical artist, or musical genre inspires a movie, musical, etc. a soundtrack album is inevitably produced. For example:
* Anytime at some ordinary concert, when a drunken heckler says yelling, "Play some
* Any time confetti cannons were hidden during room searches as a means of distracting contestants.
* Anytime Ed's Automail arm breaks or gets destroyed counts as this, as it prevents him from using Alchemy. Mind you, he's still pretty tough, and more than capable of kicking ass with only one arm, but... well, in this series, you need every advantage you can get in a fight.
* Any time electricity is involved, you know someone will quip about a "shocking" situation.
* Any time Frank Drebin parked his car, he would hit another car or some garbage cans. With every episode, the number of garbage cans he hit at once would increase.

* Any time Franziska gets offended by someone she cannot whip, she immediately whips someone nearby, often Phoenix, Edgeworth or Gumshoe.
* Any time Harvs and Batsy are within a hundred feet of each other in
* Any time humanity has eradicated an infectious disease. Though, of course, as of 2016, this has only happened twice: smallpox and rinderpest. We're currently trying to eradicate three others:
* Anytime in the sequels when he gets overly excited about his villainous plans, he exhibits features such as glowing eyes, an inhumanly-wide grin, and hair standing straight up.
* Any time-lapse footage of city life is likely to be a reference to
* Any time Money in the Bank is cashed in right after the Champion had already won a hard-fought title match. Notable examples include
* Any time Nightcrawler used his natural mutant teleportation ability offensively against an enemy in combat.
* Any time one of your injected chems stop working, the screen will get the same excessive blur and oversaturation to indicate the feeling. Another screw effect occurs if you become addicted to a chem. Nearby explosions makes the view shake and glow more than if you see the same explosion from a distance. And more regularly: Getting shot causes the view to get a very brief blur and occasionally some slowly-fading and very blurred blood spots to appear.
* Any time scientists mention either the death of the Sun and Solar System and/or the universe.
* Any time Seaman "Fatso" Johnson was about to inadvertently spill the beans on CPO Pertwee's latest scheme, Pertwee would quickly silence him with a sharp and loud
* Any time somebody wins a title, then loses it again the same night.
* Any time someone has a "security team," they will invariably get run over by their protectee's nemesis.
* Any time someone very conspicuously says "I don't have a racist bone in my body" or something along those lines, you can guarantee it's a load of crap.
* Anytime something embarrassing happens to Hank, Peggy will tell anyone who will listen about it to the point that random strangers will give him advice. Imagine her reaction if he did this to her. In another example, Peggy got a job at the Alamo Beer company during a time where there was no stock of Alamo in their local supermarket. Peggy told Hank exactly how to get his favorite beer without telling him that it was tainted. Despite this, Peggy claimed that Hank betrayed her trust while continuing to allow him to drink the tainted beer.
* Any time Sting would partner with "face" Ric Flair, the eventual betrayal could be seen a mile away. Actually, nearly anyone Sting partnered with in major storylines was going to turn on him, including
* Anytime the Barbarian starts to rage. Doubly so if they're a Frenzied Berserker.
* Any time the director, producer, and especially, they were completely trolling everyone with a straight face.
* Any time the question of why Ankh-Morpork doesn't have a king anymore comes up, it's likely that a past monarch's habit of appointing trees, flowerpots, and decapitated bodies as Privy Councilors will be cited as a reason.
* Any time there are reasonably knowledgeable alien lifeforms in the show, we wait eagerly for them to realize that this is
* Any time there is an unintentional announcement of a future video game,
* Anytime there's a long trip with somebody who is young, dumb, and/or snarky there will be some variation of the
* Any time there's a peanut butter jar or a labelled peanut container that says "Warning: May contain peanuts." If it said 'contains peanuts', that would be one thing. The real headscratcher is that it seems to suggest that
* Any time the Stooges or someone around them insisted a gun wasn't loaded, it was. In "Even as I.O.U." Curly gives a baby a pacifier. When Moe sees that it's a revolver, he reaches in to get it, but is stopped by Larry, who warns that the kid might pull the trigger. Curly insists it isn't loaded, and seeks to prove it...by cocking the hammer and thoughtlessly discharging it in an enclosed space. Pretty

much every rule of gun safety is blithely disregarded.
* Any time the villain is the victim of a bully, as bullies tend to make such good
* Any time the writer has tried to demonise a specific group of people and included the villain from among this group. Acceptable and unacceptable targets both work, because these characters become symbolic of lack of proper media representation.
* Any time two extremely different characters, usually one good and one evil,
* any time your meter is full, a special icon denoting your win by super move, or a dramatic background flash.
* Anytime you see a real police department being featured in a movie or TV show, just note that the police cars featured generally are not real patrol units but special cars painted in the regular police department paint job, with some differences so as to make clear that they're not actual patrol units (typically in the form of having a fictitious district or precinct number assigned to them):
* Any time you see a small, lesser-known team playing a powerhouse in college football. Bigger programs pay smaller teams to be a punching bag for 60 minutes and sell tickets while the smaller team often gets more money for a single weekend than their program would for the entire season. Sometimes it backfires, though. Ask any
* Any time you see a viral clip headed "SHOCKING VIDEO", it's odds on that it will be an example of this.
* any To prevent the device fro waking up, you'd have to either turn it off completely and wait 30 seconds for it to boot, or press the power button until it announced sleep mode, release the power button, and then flip the keylock on within the roughly three seconds it gave you.
* Any training in first aid and basic life-saving will emphasise the need to keep any injured or sick people warm. As the one giving care, one is usually in good shape and mobile, unless the poor person is on the ground.
* Any {{trope}} belonged that index if the description is written as though the description itself is an example.
* Any truck driver in Durham, North Carolina stupid enough to try and drive their giant trucks through
* Any TV or movie production filmed in Texas is this, especially when the local anime dubbing talent pool used by
* any Two of his songs that did chart higher, "Yikes" (#8) and "Follow God" (#7), while newer than all of the aforementioned tracks, aren't on the same level as them.
* any type of file on them as long as there's room, and a 1080p video could be only a few dozen megabytes if it's short enough. Ironically, nearly all of them are formatted in FAT32 (the only format that every OS natively supports), meaning they can only hold files that are less than 4GB each, so you probably couldn't put a whole HD movie on one no matter how big its total capacity is.
* any uniform, be it museum security guard, modern combat fatigues or particularly his signature Roman centurion outfit. In "A Christmas Carol", he's dressed as the last one for his honeymoon, so clearly his girlfriend/wife Amy loves it too.
* Any vampire LARPG player who's just gotten a new set of fake fangs tends to lisp slightly until they get used to the elongated canines.
* Any vampire of a sufficiently low generation can develop the Elder's Thirst: they can only feed on other vampires. Their capacity for holding blood can be ten times that of a neonate, so when they're running on empty it takes a lot to fill them up. Luckily for them, vampire blood is much more filling. Most vampires in the setting live in fear of
* Any vampire with Blood Potency 7 can only feed if they're willing to drink the blood of another vampire. There are drawbacks: addiction and the risk of being mind controlled by the victim. They can also get addicted to soul-eating other vampires through diablerie. Usually, any vamp getting this high a Blood Potency either ate his way up or existed for a very long time, both of which tend to make you extremely powerful. In the case of the former, they also tend to be quite psychotic due to diablerie eating away at your
* Any variation of, "Nothing is stronger." Drugs measure their effectiveness with

two different measurements; efficacy and potency. Efficacy measures the strength of an effect, so drugs with the same efficacy will do the same maximum amount of whatever they do. Potency details the concentration of the drug needed to reach maximum effect. Confounding these words makes for some easy spurious claims.
* Any ventriloquist dummies that are actually voiced by competent ventriloquists.
* Any version that has Cathy wander the moors through wind and rain searching for the runaway Heathcliff is drawing on this film. While she does spend the night out in the rain in the book, she stays seated on a wall by the road watching for him to come back. The 2004 ballet adaptation and 2009 miniseries both give her rainy moor-wandering even more importance, by moving it from Heathcliff's initial running away to his elopement with Isabella years later,
* Any video game for which a publisher outsources development to a studio in a different country - which is many these days.
* Any video game with an in-game encyclopedia can turn into an Archive Binge. Notable examples include the codex section popular in
* Any villainous character could learn Patron Powersets, all of which have at least one summon (with the exception of the variants for Masterminds). Some have an additional pet or pseudopet as well (for example, Leviathan Mastery had Water Spout, which was effectively the same as Tornado in Storm Summoning).
* Any vinyl record with the audio extending into or too close to the run-out groove will end this way on turntables with auto-stop/return if the mechanism kicks in too early. This tends to happen more often with 7" records due to their smaller inner groove/label area.
* any want to hear them, because they don't want to have to fire the professors mid-year; this is for the sake of their students' education.
* Any war before WWII, when antibiotic drugs were invented. Before antibiotics, gangrene was almost unpreventable when wounds got infected. In fact, the civil war hospital where a guy gets a shot of whiskey and a block of wood to bite on while they saw off his legs should be a trope of its own. Considering the effect that .75 caliber Civil War-era bullets would have on an arm or a leg, you could get shot today in the most advanced hospital available and still lose the affected limb.
* Any war film with flamethrowers, napalm, Molotov cocktails, or some other form of incendiary weapon will likely feature this trope
* Any warrior ranked Number One of their particular era is this by default; the status of being ranked at the top is even noted to being considered 'the absolute figure of that age', which is a pretty hefty title on its own.
* any war, up until WWII and the advent of antibiotics. And even then shortages were still common, especially in poorer countries.
* Any water than the Earth), especially if they are so nasty they don't have friends inclined to help them.
* Anyway decades later the same mindless/yet sentient robots now in even
* anyway (if everybody's still clear of 100 HP after a fight with a Balor, you've probably passed the level at which Balors are meant to be a challenge).
* anyway, to get rid of an incompetent puppet leader who not only can't control their own people but is only furthering this unrest.
* Any weapon can harm werewolves, but silver is especially lethal. Even a scratch from a silver blade will cause a werewolf to die almost instantly (and very painfully), and just touching silver will burn werewolves even in their human form.
* Any weapons or combat sport class will drill into their students' heads that they have an obligation to use their skills and tools in a safe and responsible manner. As noted in the
* Any weather reporter or meteorologist has to be prepared for this, especially in the media. Be kind to them. The same goes for any journalist in general.
* any when Reavers are encountered. Given what they do to those whose ships they take, it is very, very justified.
* anywhere, because they're old enough to predate human history, or they've just been created.
* Anywhere But Here. The heroes, a married couple, take off for space, going to planets that are already colonized and have people and aliens living on them.

However, once the navigation system on their camper truck (yes, a converted camper truck) goes haywire, they quickly end up on a series of planets that aren't on the map. There's one very short stop at a planet filled with some kind of unbreathable (for humans) gas. They get stranded for a few days on a planet with breathable air, but everything melts like plastic when exposed to fire, including some of the rocks, and is inedible. The local water isn't good for them either.
* Anywhere but Their Lips: A person is kissed anywhere on their body except their lips.
* any where he explains to Lefou that "it's the ones who play hard to get that are always the sweetest prey".
* Any, where the shooters are constantly and horrifically tortured psychologically and physically by their classmates.
* Any which feature the players fighting wholly mortal servants of some monster often at least imply this.
* Any who cannot learn to hit a man-sized target at 10 meters will be used for target practice.
* any, who knows full well that leaving clues at his crime scenes and leaving a difficult-but-possible escape method in his deathtraps is just going to land him back in Arkham Asylum. By his own admission, he quite literally cannot help himself.
* any wife and that starting an all-out genocidal war to avenge her makes no sense.
* ANY will give it much more traction and give you similar "perfect" results. In fact, it's the oil that's the key to the curve of a bowling ball: The slippery oil prevents it from curving until it gets to the dry part of the lane, where the ball then grips the lane and curves. The reason bowling balls aren't made of rubber is that they're more elastic (read: bouncy) than the current standard (plastic or polyurethane), thus actually harder to get a consistent curve, even on a smooth surface.
* Any win in a work that either involves tabletop, card, or board games, like
* any, wiping out dozens of enemy soldiers and collectively taking on groups ten times their size without taking a single casualty.
* Any with axes and Faith as a secondary focus. Special note goes to Marianne, who is her class's desginated medic but also has a rather offense-based Faith list.
* Any wizard can bypass SR if they're properly prepared, and there's a ton of spells that ignore SR anyways. But those tricks will not affect the Golem's immunity, which works off the original text. And in 3.0, Golems were flat out immune to ANY SPELL not listed in their entry, even new invented spells.
* any word, I mean any, starting with "yo" (including loanwords and mispronounced "ya" words), can be a euphemism for "yobana mat'". But religious curses are never "hecked", they are considered very mild by themselves.
* Any work with anthropomorphic animals, short of tortoises and parrots (unless it assumes
* Any wrestler in the WWE who tries to convince themselves that they are the
* Any wrestling fans who've heard of Chris DeJoseph most likely know him best as the head writer of
* any, you name it, if the main character is eleven, they will do these things.
* Any Zebetite barriers destroyed by the player will remain destroyed, even if the player dies or has to reload the game with a password. Since the act of destroying Zebetite consumes a lot of missiles and leaves the player vulnerable to a constant onslaught of turrets and Rinkas, it is very merciful of the game developers to not force players to repeat the process every time they die to Mother Brain.
* ANZAC Girls exist) occasionally wind up under their care as patients, the nurses do not start relationships with anyone they first meet as a patient.
* Anzollo on his own engines to successfully disable a couple of dozen pursuing ships.
* Anzu Mazaki (Khaos always uses her Japanese name), like in canon, has her two pairs of platform sandals and the associated thigh-highs. More colors for the platform sandals exist in the Khaosverse (pink and amethyst in particular are described), and some individuals have been shown wearing pants and frilled ankle-

socks instead of the fully-shown thigh-highs.
* Anzu Sugiura, the Ultimate Waitress, was also suspected of a murder and secretly recruited as the Ultimate Poisoner. Her wrists are handcuffed behind her back and her legs are tied together with rope, like she did to her victims, and she's force fed poison while being attacked by poisonous animals.
* Anzu uses mostly female monsters or angelic creatures. The monster Maha Vailo, which she uses in the virtual world, has an
* AOA: A good chunk of the dance unit members in the "Short Hair" MV (police woman, car mechanic, air stewardess), but it's all in good fun.
* AOA, depending on which fan you ask. Their company FNC seem to agree to either.
* AOA has a song called "Short Hair", which is mostly about getting a makeover and haircut after moving on from a previous relationship.
* Aoba, however, experienced only a multitude of naked Reis, implying there was no-one he truly loved.
* Aoba Seragaki has the ability to control other people and enter their minds
* Aoba Yamashiro is a minor Konoha jonin who blabs about Itachi's return to Konoha within earshot of Sasuke. Sasuke would run off for revenge, suffer a
* Ao E, and works normally regardless of whether or not enemies have defenses. Overload gives her the ability to remove shields on multiple enemies or as a multipurpose anti-synthetic skill with enough points in it.
* Ao E heal that additionally scaled with AP, the Speed/Slow was doubled and her shield added a nuke equal to the shielded damage plus [b]80%[\b] of her AP. She was very dangerous at low levels of health, being both a strong combatant and capable support.
* Ao E shield for allies surrounding the shields target, also granting them movement. The longer the fight goes and the more damage she can dish out, the more use can be made of her.
* Ao E, while being essentially untargetable due to extreme tankiness (targeting a Singed instead of a squishy damage-dealing carry is tantamount to suicide).
* Aogiri, given the task of dismantling human corpses for later consumption by the organization's forces. It's just as gruesome and disgusting as one would expect.
* Aogiri Tree member, while extremely sharp, also causes her to rapidly run out of stamina. Over the years, she has gained enough skill with all kinds of quinque types to be a serious match for even experienced Investigators.
* Ao Haru Ride has one in chapter 25 when Kou confronts Futaba for avoiding him.
* Ao Haru RideShuuko gets her own side story in volume 3, an Origins Issue that describes her life in middle school and first meeting with Tanaka-sensei.
* Aoharu × Machinegun started playing airsoft to pay a debt. But later, she got hooked on the game and started playing it more seriously, aiming to be the best in Japan together with her team.
* Aoharu × Machinegun that usually comes out when she is angry or getting excited in a fight. The comparison between her sweet side and bloodthirsty side can be jarring.
* Aoharu × Machinegun. The fight scenes are normally the best things in the show while other scenes suffer for it.
* Aoi and Manami are given diplomatic protection by the Catians after they helped rescue Eris from the CIA. This prevents retaliation against them for that act, but the protection is never used to allow them to commit further crimes. The Japanese government was happy to do so since the Catians were willing to overlook the fact that the member they'd sent to make initial contact with Earth had been kidnapped and nearly murdered on Japanese soil.
* Aoi Asahina: The Ultimate Swimmer. Her execution has her locked in a glass box full of water as part of Monokuma's magic act, but before she can even try to escape Monokuma summons
* Aoife Wilson, video producer for Eurogamer and head of video, is openly bisexual.
* Aoi House features a panty-obsessed (presumably non-sapient) hamster.
* Aoi House has an arc where everyone goes to Hatsu-Con, and meets the rival Uri House.

* Aoi House in the second half, despite Morgan's crush being infantile at best and Alex ignoring her for most of the series.
* Aoi Mitsukuni thinks he's an ordinary high school student until he learns his mother is really
* Aoi Nishimata makes a lot of ero doujins. She's an eroge artist so that's not surprising. What is surprising is when she made an incest rape doujin using her own characters from her own non-adult series
* Ao initially isn't the best at standing up for herself, as she admits that she hadn't even considered
* Aoi Shiro: All routes (assuming you don't succumb to a bad end first) have the option to abandon the training camp due to deteriorating weather. While the protagonist survives the main plot remains unresolved.
* Aoi Shiro doesn't help, though it's more obvious when the story is related from other characters' point of view.
* Aoi Shiro has five heroines, each with their own set of bad/normal ends and one good end. Reaching the unlock points scattered throughout those routes unlocks the Grand Route, at the end of which (the 56th ending) everyone teams up, solves all their problems, and survives.
* Aoi Shiro, this is treated as the right way to go, always. The few times Syouko can take the decision to not save Yasumi or Nami and she does (which she notes how it's out-of-character for her), things always end badly.
* Aoi Shiro, who was there during the age of the gods (i.e. at least as old as Sakuya, above).
* Aoi Zaizen the main female lead is cold and distant towards her schoolmates, but as Blue Angel, she is a cheerful
* Aojiru in Japan featured the tagline, "Horrible! I'll have another one."
* Aokana: Four Rhythm Across the Blue, Hinata and Rika's bedrooms are right next door to each other, mere feet apart. As a Running Gag, Hinata keeps running into his new neighbor while she's changing clothes in her room. Queue the simultaneous screams.
* Aokana: Four Rhythm Across the Blue spans four islands of flying citizens, set in an island paradise.
* Aokana: Four Rhythm Across the Blue: Thanks to anti-gravity Grav-shoes, the game of Flying Circus becomes popular. Players score points by hitting their opponent's back or tagging floating buoys at the points of a diamond, similar to running the bases in baseball.
* Aokana: Four Rhythm Across the Blue, yet has never heard of them before. This is graduate-level cluelessness, so everything gets explained to the audience through her.
* Aoki Densetsu Shoot: The second Goal Keeper of Kakegawa High's soccer team is quite inexperienced and thus Team Kakegawa is in trouble when their number 1 Keeper Kenji was mistakenly arrested right before the match in the semi-finals. When Kenji arrives on the field at the nick of time, he blocks a penalty shoot-out that the benchwarmer wouldn't be able to get, especially when the benchwarmer himself is injured.
* Aokigahara forest at the base of Mt. Fuji in Japan is one of the country's largest suicide spots. There's even a gate on it with the number of Japan's version of the Suicide Hotline, and forest wardens often have to oust campers who are on the fence about going through with it. The forest is strung with survey tape, which people bring along as a lifeline in case they change their minds.
* Aokigahara forest in Japan is most famous for the numerous suicides that have happened there. However, many people have also gotten lost and never returned. Aokigahara was a popular location for suicides long before, but the
* Aokiji. Post-Enies Lobby, when he came across an island hosting a big pirate brawl, he decided to halt the whole thing with an Ice Age...
* Aokiji was horrified at Akainu's massacre of the Oharan civilians, even though he had a point, and later on
* AOK", Kermit does this to Fozzie when the latter continues making inappropriate jokes about Miss Piggy dying from complications in her hip surgery.

* Aomine isn't the only one. Back in the day, after the other four members of the Generation of Miracles developed their talents, Akashi gave them the permission to skip training like Aomine and do what they want as long as they play the matches. The only one who continued to train was Midorima. After entering high school, Kise declared that he would skip training when he joined the basketball club, but Kasamatsu forced him to stay and keep training like everyone else regardless of how talented he is. And in the case of Murasakibara, while he's still extremely lazy, he doesn't skip training because
* Aomine, the Ace of the Generation of Miracles, was originally this, encouraging Kuroko to continue practicing and he was overall a very friendly and happy individual. Then he felt
* Ao mostly wears her blue hair in pigtails, and her personality is consistent with the quiet, demure girl type.
* Ao moving away proposes that Ao try to talk her parents out of it, resulting in the following exchange. That said, Misa apologizes, saying she was exaggerating, but is entirely serious about her suggestion that Ao should tell her parents how she feels.
* A, once again, dark room with a large, circular table in the middle, a la
* A once-cheery line gets repeated after all the good and hope that it once represented has disappeared. For example, Bob might say that he and Alice will always be friends. After Bob's
* A once-popular English music-hall song "All the Nice Girls Love a Sailor".
* A once-popular fad that might have receded by now was making cubes ("squares") out of flavored gelatin. When Knox-brand gelatin was used, the cubes were affectionately called "Knox blox."
* A once-popular method of suicide that still occasionally comes up in fiction is sticking one's head in the oven. Young people might see this and get confused ("Is he going to
* A one dollar bill, a five dollar bill, and a twenty dollar bill all die and end up lined up in front of St. Peter, who will decide if they get admitted to heaven or not. The one dollar bill goes up to St. Peter, and St. Peter says, "Oh, you've lived a good life. Go ahead and go into heaven." Then the five dollar bill goes up to St. Peter, and he also waves him into heaven without hesitation. Then the twenty dollar bill goes up to St. Peter, but this time St. Peter looks askance at him and starts typing into his computer. The twenty dollar bill says, "What? What? I've lived a good life! I should be allowed into heaven." St. Peter replies, "Oh yeah? I never saw you in church!"
* A one-episode version of this occurs in the penultimate episode of Book One of
* A one-handed sword/one-handed gun combo is one of several possible stances in
* , a one-man-army demon-slaying warrior, being friends and hanging out with one-another in their respective games.
* A one-man project armor, that while not fire-proof could have potential use for fighting forest fires. Or the vengeful, hellfire-fueled ghost of Smokey the Bear.
* A one-off character's collection of about two dozen hardback books was used as an
* A one-off character who acts as a basketball rival for Will talks about how while he's willing to use a scholarship to get into college (since his poor background makes it the only way for him), he's meticulously planning out his education, since he already understands how low the odds of being picked up as a professional athlete are, and wants to have something to do afterwards even if it happens.
* A one-off episode features Christian having a threesome with a mother and daughter, who regularly pick up men to sleep with together. He eventually gets just a bit too squicked out by their relationship and kicks them out of his apartment.
* A one off joke horrifically subverts part of this concept. All Red Mages believed the world ran on RPG rules. Because they considered themselves scientists this had to be tested empirically. Sadly they began by trying to determine hit points and ended up slaughtering each other
* A one-page gag has an office worker feeling dismotivated with his work, so his

boss tries to cheer him up by telling him how great it felt when he had rowdy sex with his wife a week ago, and
* A: One person will seem to actively hinder the investigation. He'll drop the radio, breaking it just before a description of
* A one-shot character's face was not drawn for most of the chapter in
* A one-shot comic also has Batman putting special effort into solving a murder and catching the killers, because the victim, Matthew Akins, was a childhood friend of Bruce Wayne, something that
* A one-shot comic titled "The Fattest Girl in Metropolis" saw Lois Lane witnessing a murder and subsequently being tracked by the culprit. To help, Superman decided to go with the unconventional method of making her immensely fat with the help of a "growth ray," reasoning that this way, the killer won't be able to recognize her. After the criminal is captured and the growth ray reversed, Lois
* A one-shot joke implied that he loved his long-time (no pun intended) mistress more than he did his own wife.
* A one-shot Li'l Jinx featured the titular character pestering a mall santa about a letter she got.
* A one-shot page in a furry comic had the Godzilla fight going on outside a skyscraper window coming to a halt while they ogle the female skunk in the room as she's disrobing and presenting them with a perfect view of her backside in the process.
* A one shot videogame/Filler villain used an automail arm with a double barrel gattling gun, he heavily implied that he had them cut off and replaced intentionally to be a more effective soldier.
* A oneshot (well, two-shot) character, a girl named Duplica, was also a quick-change master, even able to impersonate Ash, Nurse Joy, and Officer Jenny in a flash. Her Pokemon of choice was, of course, a Ditto, and loosely based on Copycat Girl from the video games.
* A one-sided example came with Niles and Maris (starting about late S2 and finishing in S6). She manipulated him, dominated him, you could very well say that she was emotionally abusive and she put him through torment during their divorce. What's interesting is that Niles seems to go for or even cause these types (due to his submissiveness when it comes to women); His emaciated pet was Maris in dog form, Mel might have treated him better but was still dominating and even Daphne became shriller and bitchier after they got together.
* A one-sided example during this scene is a good page image candidate.
* A one-sided example is used as a plot point in Episode 148. Stumpy and Mr. Cat feel that Quack Quack has been spending too much time with Eugly, so they try to
* A one stop journey on the Piccadilly Line between Leicester Square and Covent Garden takes only about 20 seconds and measures only 260 metres (280 yds), the shortest distance between two adjacent stations on the Underground network. The stations are so close that if you stand halfway between them on Long Acre, you can see the roundels for both tube stations by simply turning your head around. The proximity means that the standard £4.80 single cash fare for the journey between these two stations equates to £29.81 a mile, which is more expensive per mile than the Venice Simplon Orient Express.
* A one-time special event can also create a temporary wormhole for a ship/fleet in transit, letting them finish their trip at the start of the next turn, regardless of how long they would normally have had remaining.
* A-One was a Russian music network oriented at heavy/"alternative" music mostly within rock and metal boundaries. This sort of music remained the core of A-One's programming despite the definition of "alternative" expanding slightly. Then the network fell into the hands of Alexander Tolmatsky, who decided to
* Ao no Fuuin to end up looking like a shaggy dog can lead to some hilarious expressions.
* Ao Oni, a group of teenagers decide to explore an old abandoned house and end up being chased by big purple monster. Most of the versions, only the protagonist survives. (There are versions that gives the player the option to save some of their friends.)

* Ao Oni. All we see is a smattering of blood on the glass before the game cuts out.
* Ao Oni and hides in a cupboard (usually Takeshi), and there's always a character who refuses to move from the room they're hiding in until the end, a requirement has been met, or they die (always Mika/Megumi). Also, the jail cell and rope ladder cutscenes.
* Ao Oni. And yes, he's right behind you when you return to the normal map.
* Ao Oni, complete with plentiful references to the series with characters saying catchphrases from the show and rats eating the corpses of any of the characters who die.
* Ao Oni expect him, such as when you've just discovered a vital item or clue, and when you're just wandering around his house. Typically, you can survive by outrunning him, or trying to hide in a cabinet... though it's not a good idea to try that while he's in the room.
* Ao Oni with them as part of a 'welcoming ceremony' to their new school. While they just intended to scare them, things start going wrong when they all find themselves locked inside...
* Ao, possessed by one of Danzo's men, encounters the Mizukage and Chojuro, apologizing to the latter for getting into a position in which he needed help, then asks the Mizukage to remove the seal on his eye. She then points out that Ao would not apologize to Chojuro, and he'd know the sealing tag could not be removed, then punches him when he calls her.
* Aor, 1971), but he was also the youngest composer ever featured at the Opera back then.
* Ao's greeting texts, answered them using an impersonal, business-like tone she took from a business letter guidebook. This "cold" reply is taken by Mira to mean Ao doesn't like her anymore.
* Aoshi's cream trenchcoat (always unbuttoned, with the wide belt hanging/blowing in the wind dramatically) in
* Aoshi's "mentor" Okina, wields a pair of tonfa (which is of course justified, see above).
* Aoshi who specializes in copying the sword techniques of his enemies and gets a psychotic joy out of killing opponents with their own techniques. It appears to be working and the guy seems to have the edge on Aoshi until Aoshi suddenly kicks him right in the face and informs him that as a martial arts master, using swords is only a part of his repertoire. (And the copycat can't copy Aoshi's kenpo skills). The angry copycat then tries to go through with killing Aoshi with his techniques, but Aoshi correctly anticipates the moves the copycat will use, comments on how dumb it is trying to kill him with moves that he knows inside and out, and then promptly breaks the copycat's swords and beats the crap out of him.
* Aoskar, the god of portals, tends to be mentioned a lot. Centuries ago, he tried to usurp the Lady of Pain's control over Sigil, and eventually she killed him, destroying his temple (which became the Athar's home) and presumably then stating her edict that deities were no longer allowed in the Cage. Since that time, while many have challenged her rule, none come close to succeeding.
* AoStH fare) had a one-page joke story with Sonic arguing with himself... over the phone.
* AoSTH having wild takes is no shock, considering that some of its lead animators were veterans of
* AOT: Wings of Freedom Treasure Box Edition includes a soundtrack, artbook, art cards, and six badges.
* Aoyama’s lasers are very powerful, but he's got no endurance. During their fight in the U.A. Sports Festival Arc, Ashido takes him down with a single punch once she evades his lasers and gets close to him.
* Aoyama always has a close-lipped smile on his face, even when annoyed or scared.
* Aoyama Pharmaceutical demolishes Sayara Yamanobe's secret lab soon after it is compromised in the first episode.
* Apache Chief's power to grow in size is directly related to the other thing that grows in size, and can be involuntarily activated like that. In fact, when hot

coffee was spilled on his crotch, he lost the power to grow larger altogether for a while. And he got his power back when he got "excited" by an attractive lady.
* "Apache" is associated either with Danish jazz guitarist Jørgen Ingmann (in the U.S. and Canada) or with U.K. instrumental rock group The Shadows (in the U.K. and most of the rest of the world). Or in some circles with The Incredible Bongo Band, whose version provided a
* Apache: Massai attempts to use this argument to dissuade Nalilne from accompanying him: telling her that wives are for men who do not have to keep looking over their shoulder. Nalilne ignores him and just keeps following him until he gives in.
* Apache, Massai refuses to surrender when Geronimo does, and escapes to wage a one-man war against the US Army. He regards himself as the last Apache warrior, and even refers to himself as "the last true Apache" at one point.
* Apache Maven (a build manager for Java projects) uses a file called
* Apaches has one of the children fall into a slurry pit [a pit full of liquefied cow manure] that basically works in the same manner. The boy sinks under and drowns the same way as if it were quicksand. Which is an accurate depiction of how slurry works.
* Apaches, this happens when Sharon, who had unintentionally swallowed weed killer earlier that day, wakes up in the middle of the night in excruciating pain, screaming and crying and calling out for her mother.
* Apache that flying the gunship is like (paraphrased) trying to play an Xbox, and PlayStation, and a Grandmaster in chess at the same time, while riding a rollercoaster. The sheer amount of incoming data from the Apache's complex systems demands that a pilot train themselves to shift focus between the eyes and ignore the unfocused one completely - essentially learning to shut eyes off without closing the eyelids. Here's an unconfirmed, yet very credible quote about it:
* Apache: The shackles on Massai's wrists when he is being transported have enough length of chain between them that he is able to throw round Weddle during his escape; pinning Weddle's arms to his side. Massai then draws Weddle's gun from his holster and shoots the shotgun guard. He then uses the chain to choke Weddle into unconsciousness.
* Apache vs. Gladiator: Used to lethal effect at both medium and close range by the Apache.
* Apache") who waged a campaign of terror across the US southwest on the late 1880s, and he was pursued by Al Sieber, Chief of Scouts for the 6th Cavalry. However, most the events of the film — including Massai's attack on Geronimo's surrender, and the mawkish sentimental ending — are complete fabrications.
* A Pack of Lies at the end shows that the entire book up to that point has been a story being written by a lonely young man who inserted himself into it as a Canon Sue.
* A Pack of Lies is a short story collection by Geraldine McCaughrean. It contains eleven short stories, each in a different genre and style. The twelfth is the frame story, in which a mysterious young man starts working at a secondhand shop and sells objects to unlikely buyers by telling intriguing tales about their origins.
* A page is dedicated to Randy Waterhouse thinking about his love of breakfast cereal and the creation of a spoon that would repeatably create the perfect bite, where the cereal is introduced to the milk at the very last moment. It humorously establishes how he sees the world.
* a page, Julia and the employee at the armor store drop a lead helmet on her foot, causing her to hold it while yelling.
* a page. Of course, since neither of them can actually talk, one wonders what she's afraid of.
* a page whilst Tanna and Rolan are hiding in the temple, an elf is brought in severely wounded. No blood is shown on the floor, but a trail of blood drips is splashed across the comic page between the broken-up panels.
* a pain in the ass. To defeat Viscidus, he must be frozen; naturally, he can only be frozen by Frost-based attacks, such as Mages' Frostbolt or Shamans' Frost Shock.

Once Viscidus is frozen, then everyone in the raid must melee him (yes, even the healers need to). If melee'd enough times, he will shatter. All while attempting to freeze and shatter Viscidus, the raid must survive near-constant AoE Poison damage. Ouro is a fight that most Alliance guilds would skip in favor of C'Thun because A) he offered better loot and B) killing C'Thun at 60 was a significant achievement for raiding guilds. (Horde guilds would run him over due to Poison Cleansing Totem.)
* A Painted House is an exception, but it fits here as well. The narrator is a young boy growing up on a cotton farm in the American South. Grisham is very familiar with this kind of life because his father was a cotton farmer in Mississippi.
* A Pairing Of Souls deviation persona when he starts spouting insults and sneering at Luo Binghe and Liu Qingge (respectively "beast" and "brute").
* A Pairing Of Souls deviations instead and no one would have suspected anything.
* A pair near the end of the first game talk about their families, the one's daughter's piano recital, etc, and how
* a pair of battlecruiser cannon lesser extent, the Allies), Albert Speer realized how idiotic both projects were (no matter how heavy the armor is, a "land cruiser" would inherently be a large, slow target that Allied air power could just keep dropping bombs on until the thing died) and canceled them.
* A pair of characters portrayed by Billy Crystal and Christopher Guest on
* A pair of commercials (can't remember what for) try to depict the spokesmodels in it as rebels, shaking up people's preconceptions. The narrator even refers to said spokesmodels as "you" to make the viewer identify with them. And what are these
* A pair of cops are asked by a couple to find their missing dog. They think it's just a waste of time only to find the dog among others being used for an illegal dog fighting club by some rich guys who the cops immediately arrest. The detectives are then called in as one of the dead dogs has a human finger in their stomach, leading to a murder committed to cover up how a multi-millionaire has been selling "rare" wine that's actually quite cheap.
* A pair of crooks rob an armored car, killing one of the guards. One is killed himself by the cops while the other is caught. It's then discovered that the money was actually fake as the crooks just happened to pick a shipment that had been swapped by
* A pair of crushed glasses found at the scene of a murder become important evidence in the first case of the second
* A pair of fighter jets are seen buzzing a Soviet freighter that made it past the
* A pair of Golden Lion tamarins (a very endangered species of primate from South America) at a zoo had ceased mating. The Zookeepers felt it was because the male of the pair had ceased making mating calls to the female. The zookeepers rigged a stereo near their enclosure to play pre-recorded mating calls of other male tamarins. The male of the pair, upon hearing other males, started making mating calls himself to warn them off and the two tamarins started mating again.
* A pair of incredibly beautiful twins of Mexican and Italian ancestry:
* A pair of kids are apparently living with their single father (who we never see — he's in the shower) and one tells the other that "Dad says breakfast's in the toaster". A moral that
* A pair of lantern archons resorts to this kind of excuse when the Monster in the Darkness
* A pair of men are picked up for raping and murdering a child when one of the cops claims to smell marijuana in their van and they find the victim's shoe. The technicality this time is that the search was illegal because there was no marijuana present in the van to justify the search. The reasoning behind this one is what drives Hardin to join the secret court.
* "A pair of party pony planners in Ponyville?! What can be more perfect?!" ponders Pinkie Pie.
* A pair of police officers in Queensland fit this trope to a T. He's 6'9", she's 5'1".

* A pair of possible moves is called 'miai' if it doesn't matter which one is played, because the opponent will make the move the other choice would have prevented (often at the same place), and the outcome will be the same either way. This often turns into a bit of a
* A pair of random pedestrians in the first episode, as Fry goes flying out of the transport tube and hits a building. The couple in question are both wearing what looks to be laminated plastic, fully clear except for the black stripes covering their inappropriate parts.
* A pair of red boxing gloves are available as a community weapon in
* A pair of scales fuzed to a sword is apparently the symbol of the Seers' Village Courthouse.
* A pair of strips had the exact same idea about Peter telling one of his parents saying that he doesn't want to rake the leaves until they have all fallen, so it's more efficient. The parent says they're all bare, and Peter says that there is still a few leaves on one of them, which he turned out to have attached with adhesive so they would never fall, and so he would never have to rake the leaves. The only differences are that he was talking to Roger in one and Andy in the other, he used duct tape in the Andy one and super glue in the Roger one, and in the Roger one, Peter's comment was changed from a nervous "Heh heh..." to "Jason, you were supposed to hide the ladder!".
* a pair of students in the US to steal an exam paper in the middle of the night. The air duct bit worked, but the tutor was working late.
* A Pakistani scientist had proposed using the power of the djinn to solve the
* A paladin robbing a mansion or paying for gladiatorial combat between slaves? No problem, your status won't drop (in the Forgotten Realms, paladins get their powers from a deity and they lose them if they betray their vow) unless you get caught and kill the guards, thus losing enough reputation.
* a paladin, specifically Astolfo, the twelfth paladin of Charlemagne.
* A.P. (Alan Patrick) Herbert's "Albert Haddock", defendant in numerous preposterous law cases in
* A Pale Horse Named Death has the song "Devil in the Closet", where the Devil lives inside of a child's closet, and threatens to take his soul every night.
* A Pale Horse Named Death is about a man who murders his girlfriend and buries her in a nameless grave.
* A Pal for Gary", Gary saves SpongeBob from Puffy Fluffy, only to get scolded again.
* "A Pal For Gary" is definitely Gary's episode, with SpongeBob acting as a
* A Pal for Gary, SpongeBob's new pet becomes so aggressive he tries to eat Gary.
* A palindrome on the second half (too easy) or, more masterful, do this, referring to the well-known Panama palindrome:
* A Pallid manages to kill someone by ripping their head off — with their bare hands, no less.
* Apama - The Undiscovered Animal hippie chick who runs a cult-like commune in the forests outside of Cleveland. She's spent the past four decades preparing for the return of the Apama so that she and her followers could fight him.
* A panel featuring these exact words appears in volume 4, after Scott discovers
* a panel had them redoing one episode of as Blake, Samantha Ireland as Jaune and Jen Brown as Ren.
* Apantomancy: Taking meaning from chance encounters with animals. Saying you will be lucky when a black cat crosses your path. Aztec mystics took the flight of an eagle carrying a snake to be a good omen and Mexico City was born.
* A Papa Murphy's commercial for heart-shaped "Heartbaker" pizza (seen
* A paparazzo once decided it would be a brilliant idea to sneak into
* A paper-pusher Rainbow Dash is hassling does it, with the narration mentioning that most Equestrian bureaucrats learn this sooner or later.
* A parachute instructor instructs a nervous trainee before his first jump:

* a paragon run through a big conspiracy involving your allegedly-lawful organization UNATCO, and discovering how it was actually controlling the Gray Death

spread and selecting which civilians and VIPs were important enough to stay alive and vaccinated with Ambrosia. All under the designs of the Majestic 12. Ironic, isn't it?
* A paranoid Bosmer (Wood Elf) suspects his neighbors are plotting against his life and asks you to investigate them. If you go into his basement, you may find the notes he's been keeping about your investigation - including his belief that
* A Parcel of Patterns, among other works, tells the true story of a Derbyshire village called Eyam whose inhabitants voluntarily quarantined themselves for over a year when the plague reached them.
* a parent commits a crime, their children have to walk the walk of shame. In "Ain't No Magic Mountain High Enough", Jackie is volunteered to sit as the target in the water balloon carnival booth, in a bikini, being pelted with cold water by people who hate her.
* a park in Kansas City, Missouri named after its most iconic feature, Penguin Park.
* A Parliament of Rooks. Also, they aren't really related to Eve, who may or may not have ever been a real person to begin with, let alone whether or not she was really human.
* A parody account on Tumblr titled "didyouknowstevenuniverse" would troll fans by posting clickbait-esque facts about the show, such as saying Pearl and Lapis would be killed off. The blog runner shut down the account when some fans thought the "facts" were real and began harassing the show runners. The blog runner later reopened the account with a disclaimer ensuring that the posts were meant to be jokes.
* A parody occurs in webcomics that use a "Gold Foil Embossed Collector's Edition" as a
* A parody of Chick Tracts has Jack Chick meeting his Maker, and God is not impressed:
* A parody of sparkly '90s Christmas ballads begins with a woman rummaging her closet for a present for a co-worker she barely knows, deciding upon a cheap unused candle. The second verse reveals that the recipient of the candle gave it away to her son's girlfriend, then
* A parody of the Council of Reeds from Marvel Comics, the Citadel of Ricks in
* A parody of the page image is also seen in the game, replacing the words "the Great War" with "Siege of Columbia".
* A parody of the Rorschach line features Rorschach completing the line, as well as Wolverine and Sabertooth add their own endings. Wolverine's is "Sorry, darlin", while Sabertooth asks about the quality of the whores.
* A parrot in Romania was overheard reciting jokes making fun of the eldest son of
* Apart from Alistair, the general value of Templars in Ferelden ranges from "utterly useless" to "more harm than good" — despite having trained to kill abominations, maleficarum, and demons, the Templar garrison in the Circle Tower exists mostly to die and/or become possessed when things go to hell, meaning that when the Warden actually comes through to kill everything that moves, the only Templars who influence your success in any way are the ones who are being used as body gloves by demons and so are
* apart from), and has become more so with the addition of Synthetic Skin. This has reached the point that, where once it was obvious due to mechanical limbs, it's only the antennae that really distinguish her as an android anymore.
* Apart from being a bit more shy and overtly affectionate than the other males of the series, Jamie has no stereotypical traits.
* Apart from being a showbiz-obsessed cartoon duck, Count Duckula fits the trope in
* Apart from her being a "little girl," Dorothy's age is never made clear. The original illustrations for
* Apart from Meowth, very few other Pokemon are capable of using human speech and even then, most of those use telepathy. These telepathic Pokemon also mostly appear in the movies (usually as the stars of their movies). Only a select handful of other Pokemon that are capable of talking have appeared in the anime proper. These

include a Gastly (physically talking), a Lapras (Telepathy), a Lucario (telepathy), Slowking (talking), a Ralts (telepathy), and
* Apart from Number 10, which issued a statement saying: "Those who have made the regrettable decision to strike may be assured: Executions are not government policy."
* Apart from Part 8's Josuke, whose series is still ongoing, every Jojo, save for Giorno, has been shown dying at some point in the series. Jonathan died at the end of Part 1, Joseph died fighting DIO (though he was brought back shortly after), Jotaro was killed in one time loop caused by Bites the Dust and was later
* Apart from the backstory of aliens crashing on Earth, the United States in
* Apart from the infamous 2016 Le Mans incident, Toyota's other racing programs also had the misfortune of having been on the receiving end of this
* Apart from their winged hussars, Polish-Lithuanian nobility, who claimed a descent from the ancient Sarmatians, also liked a good scale armour. It was more expensive, heavier, and offered worse protection than regular armour, so it was good only for parades — but it just looked
* Apart from the jumps, spinning without jumping is also an important element in figure skating. The record for fastest spin was set by Olivia Oliver from Canada. Figure skaters who were known for their spins include
* Apart from the names of the leagues themselves, this is relatively rare in British football, with the notable exception of the former
* Apart from the obvious, literal example of many characters (who do indeed occasionally narrate) being vampires,
* Apart from the usual Castle track, Bowser also has Neo Bowser City (Koopa City in PAL versions of the game), though it can also be associated to Metal Mario.
* Apart from this, the popular belief of societies and cultures becoming more liberal with the pass of time has been defied in a few occasions. It can be pointed out that the higher push for "decency" in the 2010s can be linked to the extreme liberalism of previous years. The 1980s "conservative revolution" is arguably a better example of this.
* Apart from Touma there is Wataru, a man who can defeat massive groups of armed gangsters with his bare hands and martial arts skills, Komaba Ritoku who fought against 2 higher ranked espers and nearly won, Amata Kihara who nearly killed
* Apart from "Under the Bridge", none of the other three singles from their classic
* apartheid regime and even banned from entering her own country. As a result she became a vocal critic of her government and did a lot to draw international attention to South Africa's apartheid's regime.
* A partial answer for all of this can be found in the D&D novel/module/CRPG "Curse of the Azure Bonds" and its sequels. Alias prefers to wear a chainmail bikini in lieu of proper armor because of the high-level enchantment on it; the skimpy mail has a higher AC then her platemail due to the enchantment. Magical armor can be less about actual armor and more about magical force fields with the strips of metal/leather serving as something to bind the magic to. Of course, this doesn't apply to nonmagical armor...
* A partial aversion: In 2017, the Bulldogs women's basketball team made the NCAA finals, only to lose to SEC rival South Carolina. However, State's fans will undoubtedly look back fondly at this team, considering that in the semifinals, the Bulldogs beat UConn... the same UConn that had won the last four national titles and was riding a
* A partial ban is in effect over most of the world; across most of the Westlands,
* A partial example is Haku: His father killed his mother once he found out about their
* A partial example, since the shared background wasn't established until after the performer's death:
* A partial issue in Wally West's fights with the mystical villain Brother Grimm; since Grimm can sense other-dimensional energies like the Speed Force, he can counter and predict every move Wally makes when he moves above normal speed, so Wally has to restrict himself to normal speeds when facing Grimm.

* A partial Twitter trailer example: The release of the first trailer for
* A particular example is the Jellyfish Imagin; its contractor wanted to find the time capsule he and his deceased fiancée buried a year before, but the Imagin simply finds some random time capsule and tries to claim it's good enough. When the man refuses, the Imagin starts physically attacking him and yelling at him to open the damn box. In this case, it springs from the Imagins' agenda: when they successfully complete a contract, they can then open a portal to the past using their contractor's strongest memory (in this case, the day the man and his fiancée buried the capsule), at which point they go on a rampage and try to alter history.
* A particular example would be the episode "Anschluss '77" where she is kidnapped by Nazi agents, handcuffed and taken to an abandoned mine shaft. After refusing to answer their questions, they leave her tied to a beam and place a lit package of dynamite near her. Diana's quick thinking allows her to utilize a
* A particular incidence of note is when the pair hit on the idea of finding and selling golfballs and Butt-Head declares "We need to get more balls", prompting Beavis
* A particular Inner Sphere example belongs to the mercenary outfit known as the Grey Death Legion. The Legion was the first to use power armor extensively, not only for infantry combat, but for getting close
* A particularly amusing example comes during the initiation process for the Remote Viewing Division thought, in which your character begins to decide he has psychic powers ("You are a special man, and you are definitely not imagining it"). La Revacholiere, the
* A particularly amusing example is the fan character Deffboss. Because Orks do not die of old age, continually growing until they die in battle, Deffboss, the sole survivor of the original batch of Orks bioengineered by the Old Ones to fight the Necrons around the time of Earth's Cretaceous period, is now the size of a planet. He has an entire civilization of normal-sized Orks living on him who operate the various weapon emplacements and hangars built into his armor.
* A particularly amusing example is the two Leos that Sandrock bisects in its first appearance. One is a command type with shoulder cannons. The only other time you ever see this variation fighting a Gundam is... every other shot where Sandrock does that specific move.
* A particularly annoying example (because the name is significant): In
* A particularly annoying example in a Kindle ad attempted to demonstrate the Kindle was easier to read on than an iPad...an iPad with the brightness turned all the way down.
* A particularly arbitrary example is Batman's second post-Crisis encounter with Bat-Mite. In the first encounter, he understandably assumes his momentary glimpse of the being is his imagination. In his second, a
* A particularly awesome (or frustrating, YMMV) one was in the finale, when Jack and the Man in Black faced off in the rain on an actual cliff. Just as Jack charged at MIB, it cut to commercial.
* A particularly badass example is seen in the second episode. Scarlet, almost always seen with an uptight bun, lets her hair down before demolishing a team of elite super-mafia aliens.
* A particularly bad example in the case of the anime-exclusive villain Valgaav from
* A particularly bad example in X and Y, where when defeating a pair of Mooks when searching for the entrance to their secret base, one of them loudly talk herself hoping that you don't find a secret door hidden in the room, while another loudly talks to himself hoping you don't figure out the password
* A particularly bad example is the radio ad campaign for South African Airways Business Class. For some reason they thought it would be a good idea to end each ad with this: "So, fly South African Airways Business Class. Business Class: 'For Business'."
* A particularly bizarre example in the Pez Batara, a mecha specifically designed to ram. It mounts a giant beam axe blade down its middle and attacks enemy ships by

charging at them. However, the official profile notes that it has a low survival rate and pilots aren't expected to come back.
* A particularly blatant example is Spike's special resilience to the sunlight. No-name vampires are seen immediately disintegrating the moment they're pushed into the sunlight, but when Buffy takes off the Gem of Amarra from Spike's finger during their fight in the broad daylight and he remains without protection, he has just enough time to run into the shadow. Other times he can walk during daylight if he just wears a rug over his head (or in season 9 comics, a hat).
* A particularly brutal example occurs when Sam and Dean are facing off against an unimaginably powerful demon named Abaddon. They shoot her in the head with a bullet that has a Devil's Trap carved on it.
* A particularly chilling case happened during the Second Intifada, when a boy was interrogated for having
* A particularly chilling example occurred in 2002, at the Tri-State Crematory; they used
* A particularly chilling example of this occurs in the 1979 horror novel
* A particularly chilling example of this trope occurs in the autobiography
* A particularly cliched example used in Filipino soaps: when a character is about to die in a scene, there is a quick cut to his (or a close friend's) house showing a
* A particularly clunky example occurs in a second-season episode of
* A particularly common variant has two characters get accidentally "bonded" (in
* A particularly complicated example from the Hong Kong comic-book movie
* A particularly cool real-life example is Ioannis Metaxas, the prime minister of Greece during World War II, who answered the long list demands of Italian ambassador Emmanuelle Grazzi to allow Axis troops into Greece or face war with a simple "όχι" (
* a particularly crappy one, he asks the salesman what country it was made in, only to be told that said country no longer exists. This was more of a specific jab at the Yugo than at foreign products in general, though.
* A particularly dark one that later becomes a plot point from Roose Bolton before he slays
* A particularly devastating example of this trope in action is the Elemental Lord of the Wind, Cybuster, and its "Akashic Buster" attack. Often used in the various anime adaptations against an opponent trying to invoke this trope...suffice to say, the Cybuster's ramming is superior every time.
* A particularly devious method is standing next to the door while holding a bunch of (seemingly) heavy boxes, or folders, etc. Not only will people be willing to help you, but will most likely assume you have the card and just can't reach it. Many places where card access is given to people who haven't had any kind of security instruction have large signs actually instructing you to close the door in front of the next person. They don't work, of course (the real solution would be to actually train people). Most companies very specifically warn their employees against this, but people rarely cooperate. No one wants to be the
* A particularly disturbing example came up in "B.O.T.", an old episode of
* A particularly disturbing example happens in the Shaw Brothers film,
* A particularly disturbing one happens in Season 4: at the end of Tyrion's trial by combat, Cersei's champion the Mountain crushes Prince Oberyn's head into a bloody pulp all the while boasting how he raped and murdered his sister before killing her children. Pan to Cersei, who looks as happy she ever does.
* A particularly domineering heel will often have a non-wrestling male attendant whose job is to help them cheat and to get beaten up by the face so that
* A particularly dramatic case of this happened in the Brazilian second division in 2005, known as
* A particularly egregious example can be found in Michael Crichton's sci-fi novel
* A particularly egregious example is "brose", which is a herbal concoction drunk by the Nac Mac Feegle in
* A particularly egregious example is the way in which Juliet's speech "Oh Romeo, Romeo, wherefore art thou Romeo?" usually has a spurious comma added after the

"thou", completely changing the meaning. "Wherefore" actually stands in the same relationship to "therefore" as "where" does to "there"; it doesn't mean "where", it means "why". Juliet is not wondering where Romeo is as commonly supposed, but is speaking to him and asking the reason for his name. (Sounds weird the first time you hear it, but it becomes clear what she means: "Why did the man I fell in love with have to be Romeo Montague, probably my father's last choice on earth of son-in-law?")
* A particularly egregious example of just how bad things where for Brock was when he was in
* A particularly egregious example reaching near sacrilegious levels occurs in
* a particularly epic map. See that small green country near the lower right corner? That's Equestria.
* A particularly extreme case of this is in the first two TARDIS teams, which had four characters deliberately representing a different demographic of the "family" audience. There is a teenage girl (Susan or Vicki) representing the older child audience, mature adult male and female characters who work with children (Ian and Barbara) representing the dads and mums, and a grandfather-figure with eccentric
* A particularly extreme example is given with Spydra, the main villain of
* A particularly extreme example occurs when Mercenary Tao is enraged because Goku's Kamehameha
* A particularly extreme one happens in "Ren Seeks Help", where Ren's eyes become huge and bloodshot and his lips flap back and away from his mouth to reveal gums studded with small, misaligned pointy teeth.
* A particularly famous example of this trope: The first third or so of
* A particularly fierce example occurred in the backstory. A nasty noble married Mercedes' mother, because she had a Crest and having an heir born with a Crest
* A particularly flippant example from Megan Trainor's "All About That Bass":
* A particularly fun moment where Joe's language skills came in handy was in Assassin's Code. Joe tries to bluff an Iranian Major that he was a Russian agent so as to disguise American involvement during that mission. The Major attempts to call the bluff by insulting Joe's mother in Russian. Joe not only understands the insult, but replies in Russian that the Major's "father dallied with little boys and ate pork during Ramadan"
* A particularly funny example from World War One also combined with
* A particularly funny example happened in the finale of series 4 with Mel, Sue, and Mary(!) scarfing as much of Frances' asparagus as they could while Frances was busy elsewhere in the tent.
* A particularly funny example shows up when Hayate is about to use a sword technique whose name starts with "
* A particularly funny fanfic has Naruto going around and asking all the adults in the village what sex is and keeping a journal of the info he gets as they all either brush him off or give him lewd advice. "NEVER GO INTO ANKO'S HOUSE! She has a bunch of weird equipment and she's hard to get away from when she gets her clothes off."
* A particularly good example is when he figures out the evil plan in Future 5.
* A particularly gory episode, "Woodland Critter Christmas", had this with a pregnant porcupine, bringing a whole new meaning to
* A particularly grisly variant is found in Thai folklore, where it is believed that a tiger can gain human intelligence and/or become a
* A particularly groan-inducing one: Two muffins are baking in an oven. One turns to the other and says, "Boy is it hot in here!" The other looks at the first and says, "Oh my God, a talking muffin!"
* A particularly heartbreaking example: Lorne's speech about Fred in "A Hole in the World".
* A particularly heart-wrenching example when resident tough guy Tsume breaks down and openly weeps after
* A particularly high-stakes version occurs during the finale of Volume 6. Ruby tries to invoke
* A particularly hilarious example occurs in Arnold Schwarzenegger's

* A particularly hilarious outtake is, in typical Working Designs fashion,
* A particularly horrible example are death marches, where prisoners are made to march through a desert or other harsh environment until they die of thirst or fatigue.
* A particularly iconic example is the Throne Drei 'stealth' unit, which releases a tremendous and visually striking cloud of
* A particularly impressive example (played for laughs) appears when a knifeman for a local drug cartel blithely insists to Castle and Beckett that his severe injuries — otherwise consistent with a very bad beating — were sustained during a fall. And that his horrifically swollen and near-useless black eye was injured when it connected with a door during the fall. And his mangled hand is the result of him putting his hand out to stop his fall, only for it to get caught in a grate. What makes this a particularly impressive example, however, is that Castle and Beckett actually
* A particularly infamous example is thalidomide, a medication used nowadays in cancer and skin condition treatments. It also used to be prescribed over-the-counter as a treatment for anxiety and morning sickness... until it turned out that, in this case, Side Effects Include causing
* A particularly infamous example is the rothe, which is a semi-literal Underground Monkey
* A particularly infamous image board has instituted something called the
* A particularly keen example of this is in the Time War; many sources have the Doctor — in his Eighth and War incarnations — feel personally responsible for the conflict between the Time Lords and the Daleks in this war, as he could have prevented the conflict if his fourth incarnation had just destroyed the Daleks in "Genesis of the Daleks" rather than delaying their evolution.
* A particularly long-running take on the above occurred in the Eclipse comic
* A particularly magnificent example is the song "Foil". At first, it appears to be a simple song about preserving leftover food in aluminum foil (which would be right up Weird Al's alley). But then halfway through the song, it suddenly veers into conspiracy theories and alien mind-control rays. What makes it particularly noteworthy is that it comes
* A particularly memorable ad featured the Trix rabbit, in a live-action and realistic setting, claiming victory in buying Trix (which the cashier recognizes is for kids) from a grocery store (in a human costume), an emotion which soon turned to sadness as he forgot to buy milk.
* A particularly memorable example: "A ninja jumps off from a window and lands over the roof of a car passing at 50 mph. If his enemy throws a rock at him, How much force (in Newtons) and speed would the rock need to hit the ninja?".
* A particularly nasty example of this trope occurred in 16th century France. At the time, marriages among royalty were arranged, and some of the unions were less than joyous. As a result, someone got the
* A particularly nasty, not bomb-related, takes place in electrical circuits that have three phases plus neutral to provide power to devices that use single phase (thus lower voltage). If the latter is cut or disconnected while having single-phased devices connected, those will suffer higher voltages and have a
* A particularly nasty variant happened in the Renaissance. A few scholars put forth the idea that the five hundred year or so period between the fall of the Roman Empire and the "high middle ages" was a time of absolute ignorance where there was almost no development of civilization and science. They dubbed it the Dark Ages. When evidence refuting this theory was discovered they not only ignored it, they
* A particularly nasty version of this is part of Dr. Mann's backstory in
* A particularly neat little parody is when Homer eats too many spicy chilies and has a vision of a coyote (voiced by
* A particularly nightmarish variant of this is a staple of the daemons and sorcerers of Tzeentch. The demon gods grant gifts, usually in the form of mutations. Once you gain enough, there are two options. The first is a good one: badass daemon prince. The second is insanity, many eyes, and general fun and games.

You live off grubs and act as cannon fodder. Fun. A common psychic power for Chaos Sorcerers in 40k, the ironically titled "Gift of Chaos", lets them immediately transform anyone, friend or foe, into a Chaos Spawn. Various editions of fantasy have also included various Chaos Magic spells that transform the victim into Chaos Spawn — some Tzeentchian spells instead allow the warlock to turn their victim into a Horror of Tzeentch.
* A particularly notable card is "Lust for War", which has your opponent's creature go all Leeroy Jenkins, and whenever it taps (which it usually does when attacking), it does three damage to its controller. Red is generally the color of rage.
* A particularly notable daemon blade is the Kinebrach Anathame, which directly lead to the Horus Heresy and creation of the Chaos Space Marines.
* A particularly notable example comes around exactly every two years. The Royal Mail alternates its Christmas stamp designs between secular and religious and has done so for decades. Nevertheless, every time the new designs are released in a secular year the exact same letters are printed about the 'War on Christmas' with only the names of the authors being different.
* A particularly notable example: in one episode, the narrator sets up a
* A particularly notable example would be the song "Save the Last Dance For Me". Its composer, Doc Pumus, suffered from polio and was inspired to write the song after watching his wife dance with other people at their wedding.
* A particularly noteworthy example of this is Lord Willy Tybur, the head of the Tybur family and the
* A particularly noteworthy scene involves protagonist Rudy's friend and advisor Deck waking him up in the middle of the night with no explanation, and taking him to the scene of a horrible accident: a riverboat sank and the police are retrieving bodies from the water. The police announce to the crowd that they've identified the body of a particular person, causing a wail of despair from the deceased's family.
* a particularly obscure one with "that is A, amazing; B, depressing; and C, amazingly depressing."
* A particularly obvious example of this kind of forced monster toyeicism is the Dalek
* A particularly odd case is the Hard Rain campaign of the second game. In the second half of the campaign, the area is hit by storms. When the storm is at its peak, visibility is reduced, and voice chat between the players is heavily muffled.
* A particularly pronounced example was the Siege of Orgrimmar. At face value this would be a devastating setback for the Horde and a decisive, even potentially conflict-ending win for the Alliance. But of course, the game must maintain its balance of relative power, so you quickly realize that very little real damage can or will be done to the Horde. In fact, the necessity of letting Horde players themselves paradoxically lay siege to their own capital resulted in a storyline that gave more immediate political and military benefits of the battle
* a particularly rich Collector has become rich by finding ways into the Dustmen's own crypts, essentially robbing them of their own charges and re-selling them back. The Dustmen will not
* A particularly shining example of that were Russians letting the French have Moscow in 1812. Napoleon's troops marched into the city, and Russian guerrillas set Moscow on fire from all directions. Soon the French survivors of the fire were saddled with a half-burned, non-defensible husk of a city and a humanitarian catastrophe.
* A particularly sick version of this happens in J. N. Williamson's "Two Floor Generals and the Sweetheart Dance." Basically, one of the stars of a small-town high school basketball team tells an unpopular and unattractive girl that the narrator, a fellow star, will take her to the Sweetheart Dance on Valentine's Day. On the night of the dance he hands the narrator a candy box to give her. When she opens it, it turns out to contain
* A particularly significant example came during the Mabel-Savio Vega tournament final at WWF
* A particularly significant one was a speech from Giuseppe Garibaldi during the

Italian Wars of Independence: "Follow me, ye generous souls who abhor oppression and the chains of slavery. Follow me. I cannot offer you ammunition nor barracks; all I can offer you is hunger, cold, sun, battles and death. If you love your country, follow me."
* A particularly strange example occurs early in the Android Saga. Dr Gero/Android 20 has the solitary goal of eliminating Goku, for his role in destroying the Red Ribbon Army. When Goku is weakened by a heart virus, Android 19 has the opportunity to finish him off. Vegeta intervenes, and when Yamcha flies away with Goku, Dr Gero decides that Goku is suddenly not worth his time, and can be finished at a later opportunity. This is despite how his entire existence has been devoted to killing Goku for the past 20-odd years. Some of this is because he wants to save the best for last and he truly believes Android 19 overpowered Goku, not knowing he only won because Goku had fallen ill.
* A particularly strange time loop appears when the archmage, while falling to his death, is saved by his future self. This future self gives him some extra powers and instructions and after what can't have been more than a few hours sends him off to save what now is his past self.
* A particularly tacky example: in the 1980s, the Illinois State lottery reportedly put ads in some of the poorest Chicago neighborhoods simply saying "This could be your way out."
* A particularly tragic case involves Chrysalis, whose first loop Awake was a variant in which she was married to a nonAwake Shining Armor. The Looping Shining Armor is, as per
* A particularly tragic example occurred when comedian Lou Costello, of
* A particularly tragic runaway train accident was the Armagh rail disaster in 1889 where a train carrying children on a Sunday school outing stalled climbing a steep hill. The decision was made to divide the train and take the front portion forward, collecting the rear portion later. Although the train was fully braked the brakes were not failsafe so once the locomotive and front portion of the train were uncoupled the rear portion would be unbraked and roll down the hill. As no handbrakes were available either, the crew secured the rear of the train by placing a number of stones behind the wheels. This was effective, but sadly as the front portion started to move it rolled back into the rear portion with enough force to crush the stones, the rear of the train then rolling free down the hill until it collided with a following train. 78 were killed, 260 injured, including children. This accident caused such shock and outrage that it led to massive changes to rail safety in the UK, requiring continuous automatic brakes on all passenger trains, and also improvements to signalling. The accident is seen as the beginning of the modern era in UK rail safety. It remains the worst railway accident ever to occur on the island of Ireland.
* A particularly tragic version In the end, Jim shows up on time, and when Hanyou doesn't, he thinks that he's been stood up.
* A particularly unfortunate example is the German freight shipping company PAKi Logistics. They were very upset when they were banned from registering their name as a Europe-wide trademark due to its British English meaning: a very, very, offensive racial insult for a South Asian person, on the same level as "the n-word" in the USA.
* A particularly unlucky version is the fate of Father Feodor, the bumbling rival to the main characters from
* A particularly unusual use of this is in "Showdown at Teeter-Totter Gulch," when Belinda crawls into the camera, her laughing mouth filling the screen with black, and it wasn't even transitioning to another scene.
* A particularly vile defendant offers a plea bargain that essentially lets him get off scot-free, and the prosecution refuses it.
* A particularly well-done and tense Mexican Standoff is done in the latter half of
* A particular notable episode is the season 5 episode Damnatio Memoriae, when Liam pulls Hayden off a cliff and into a ravine. Hayden's scream as she gets yanked downward transitions chillingly into the theme song.

* A particular take is someone coming across something harmless that they find scary, like a rat or cockroach, and then screaming while grabbing at another person.
* A particular well-thought-out one was where the woman pointed the gun at herself from above and in front of her chest and shot herself through her clothes. A woman who commits suicide by gun
* A Partilha (based on a play) has a woman writing a "diet control" list. One of her three sisters gets it, and the four read and laugh seeing all entries have Diet Coke. One even mocks it:
* "A part" means to be part of a certain something. "Apart" means being separate,
* Apartment 1303, Mariko is telling a ghost story to her friends. This story features the ghost of a woman in a kimono, who stands by the elevator doors on the 13th floor. Her face is concealed, as she hangs her head and faces away. Whenever someone goes to use the elevator, the ghost first asks them if they are currently on the 13th floor. When they respond "yes", and start to move towards the elevator, the ghostly woman grabs their arm and reveals her face - pale, sickly, and with the eyes covered in bloody bandages. She then demands for the person to "Give me back my eyes", before the bandages suddenly fall away - to reveal an eyeless face.
* Apartment 143: Caitlin's psychic issues come to a head, leading her into a mental breakdown. She's taken to a hospital in hopes of treating her, but then the cameras pick up the real ghost.
* Apartment 3-G from China. For bonus points, the reporter mentions the name of the man who accompanied him — Margo's erstwhile fiancée.
* Apartment 3-G when Blanche mentions wanting to see the latest strip.
* Apartment Gensokyo, we get Baka, who, true to his name, isn't known for being very bright, and as such, comes up with some pretty questionable ideas, one of which was trying to get an air conditioner and a sofa up to his apartment through a window using a rope. Unsurprisingly, this goes as well as one would expect as, while Yukari doesn't die, the incident does land her with a very damaged spine.
* Apartment Life installed, is to be offered a blind date. Accepting the offer will summon a date of the preferred gender with maximum chemistry.
* Apartment Wrestling used to be a fairly private phenomenon done by house wives until Stanley Weston convinced Bill Apter that money could be made by showing photos of their matches in his magazines. The most famous photos from the "apartment circuit" came from
* Apartment Zero have an unspoken, but mutual attraction that lasts throughout the movie.
* Apartment Zero sleeps with several of the neighbors. The ones he doesn't sleep with wish he did.
* Apartment Zero the neighbors are leery of Adrian, but when they hear about a series of murders plaguing Buenos Aries, they become outright suspicious of him. They try to subtly test the waters, just to see if they really need to be worried. It doesn't go well.
* Apartnement Gensokyo, we have Yume Ni, otherwise known as "Yu", and she is aptly called "Yu the Bully", especially the case chapter 59 and the kids were terrified of her. Sakuya also noted that she is comparatively worse than Reimu.
* a part of Clayface in the first place. Emerging weakened from his most recent defeat, he had shaped part of himself into the semblance of a young girl, detached "her," and sent her out to scout the area to make sure it was safe for him to emerge. Because of their shared weakness, "Annie" promptly got amnesia, forgetting not merely "her" mission but "her" identity. Clayface didn't so much eat "her" as re-integrate a rogue portion of himself. He wanted the knowledge "Annie" had gained while apart from the larger Clayface, so her memories survived.
* A part of Leyte Gulf, The Battle of Surigao Strait, has the distinction of being the Final Battle ever engaged in between battleships, in the war that saw the end of the battleship as a primary weapons platform, and the cessation of all construction of that class of ship.
* A part of MUDs, where the people making the rules would often screw them.
* A part of wedding traditions in some cultures. During the dinner, bride and

groom feed each other, sometimes with cake or the main course. Suffice to say, both are usually so nervous that they can barely eat anything.
* A Party, Also Known as an Orgy: All wild parties that are not meant to be orgies lead to sex.
* A party of Viking raiders are waiting outside a "Small Defenseless Village" that has designated plundering hours, patiently waiting for the time to arrive.
* a party that is basically an orgy, except then almost everyone there gets blown up.
* A Passage for Trumpet", Joey Crown discovers that he does not have a reflection when he looks into the mirror at the cinema. It is later revealed that this is because he is a state of limbo between life and death.
* A Passage to India an illusion. If I say, it becomes whatever the answer a different book. And even if I know! My writing mind is therefore a blur here, i.e, I will it to remain a blur."
* A Passage to India: During a trip to the Marabar Caves, Adela accuses Aziz of attempting to assault her. Aziz's trial, and its run-up and aftermath, bring out all the racial tensions and prejudices between indigenous Indians and the British colonists who rule India.
* A Passion for Revenge. She repeated this prank later, this time seducing him until he stripped then taking his clothes and leaving him naked on her spa.
* A Passion Play is apparently a straightforward example, despite having the same structure.
* A passive version is Gilaine and the other Misfits in the Druid’s camp. The Druid is rebelling against the Council but is if anything more fanatically opposed to Misfits.
* a past conflict between Odin and Thor that ended when Thor broke the shaft with a strike from his hammer Mjolnir
* A patch added an Act Select to the main menu to make accessing Ticket hotspots easier.
* A patch has actually made it so the only way to get a permanent item is the completely luck of the draw "Fumbi shop" which is far more likely to give you a random item you don't want for seven days. Because of this, you have to constantly rerent your items. Weapons aren't so bad as their timers only go while you use them, but clothing items have timers that are always running. To their credit, you can win weapon/clothes/pet capsules in a free daily loot box with random drops (the drops change every month), you probably won't get a permanent in your first week
* A patch introduced a full-fledged Last Stand game mode, where heroes from each faction
* A Patch of Blue, has his character befriending and then falling in love with a blind white teenager.
* Apathetic Citizens: Someone's hurt and homeless...and we don't care.
* Apathetic Citizens: The average person either knows or cares very little about politics and other important social issues.
* Apathetic Citizens: The citizens can't be bothered to care when something bad is happening.
* Apathetic Citizens: There's a disaster happening, but none of the citizens seem to care.
* Apathetic Citizens. These often involved exaggerating actions of the other side, accusing the other side of trying to do this to gain their sympathy, disguising as Germans or Russians and ransacking villages, or just spreading nasty rumors.
* Apathetic Citizens: The townspeople must be real idiots if they don't care about the danger right in front of them.
* Apathetic Citizens: We got better things to do than to help save some homeless people.
* Apathetic Clerk - Bored cashier who cares little for his job and even less for his customers.
* Apathetic Clerk: Clerk or cashier who is ambivalent towards their job and everything that goes on around them.
* Apathetic Clerk: I don't care about my job and don't you dare ask me to do it.

* Apathetic Clerk: I don't care if it's my job, I'm not going to work.
* Apathetic: Finally, we would have these who became stone-hearted because of their work.
* Apathetic Student: I don't give a crap about school. Just let us go home, man!
* Apathetic Teacher: A teacher who doesn't give a crap about how well their students do.
* Apathetic Teacher: A teacher who doesn't give a damn how well their students do.
* Apathetic Teacher: I have no desire to teach my students. Who cares about grades anyway?
* A Path to Greater Good has just a white, plain expanse for a face under that mop of black hair.
* Apathy and Other Small Victories, protagonist Shane is the sort of guy who blows off going to his co-worker's funeral so that he can go and get drunk and steal saltshakers. He's a jerk and utterly proud of it.
* a patient at San Francisco General Hospital dies in a very underutilized stairwell.
* a patient or someone close to them having lied about some fact which turns out to be vital for a diagnosis. However, in the episode "DNR", no one lies, and the team eventually just figure out the right diagnosis.
* A patient who refuses life-saving treatment or has a Do Not Resuscitate order may get AMFYOYO written on their charts (
* Apatosaurus, she's still a predatory dinosaur that killed several of Love's kind during her rampage, but Love shows no fear with walking up to Elise.
* Apatosaurus slipped in, otherwise we would be calling him "Manospondylus gigas".
* Apatow's wife Leslie Mann has been in all four of his movies so far. Their two daughters in three.
* A patron at a Bobby Flay restaurant asked the waitress to recommend a bottle of wine since he had no experience with wine. She pointed out a bottle and said it cost thirty-seven fifty. When the patron got his bill he found out that it was $3,750, not $37.50 as he expected.
* A Patryn's magic is centered around the heart-rune on their chest. As long as their rune-tattoos are active, they are nearly unkillable demigods. If the heart-rune is damaged or compromised, however, their entire being will begin to fall apart.
* a patsy used by L to denounce and threaten Kira and the FBI. Along the way, he coolly manipulates the feelings of both people and shinigami. Repeatedly stating that he plans to become the god of the new world he is trying to create doesn't help matters, either.
* A pattern of bullets hits the ground between the target and the strafing aircraft and moves toward the target.
* Apay a Pinatayda ni Naw Simón (1935; Ilokano-language, regarded as the country's first proper detective/espionage novel)
* A Paycheck: The second you ship for Basic Training, you start getting paid, with an expected paycheck twice a month.
* A Payless Shoes ad from the 2000s has a group of cheerleaders form a pyramid so that one of them can peek through the window of a gym, presumably to
* APB (1987), an Atari game about a rookie police officer: The player, who controls the protagonist officer's police car, must avoid – among other things – a train. Getting struck by the train simply takes time off the clock.
* APB are these in the city limits of San Paro, thanks to a law enacted by the mayor.
* APB had one of these. You ALWAYS had to stop at the train tracks (unless you were fond of getting hit by the train that's always coming by).
* APB have this as a staple method of acquiring a vehicle for Enforcers. The civilians offer little resistance beyond sarcastic and snide comments, probably due to the fact that your character is likely packing enough heat to fight a small gang war, and likely on his or her way to do just that.
* A.P. Bio get knocked off, causing her to immediately fumble around the ground groping for them. Since they're far-sighted glasses, she should have stepped back

to accurately locate where her glasses fell to first.
* A.P. Bio, Jack Griffin the AP Bio teacher regularly bullies his own students always forcing them to work hard to build up his career into becoming a best-selling book writer and philosopher who is very popular with women or else he'll give them F's. Though when his own students get bullied, he goes after those bullies himself.
* A.P. Bio, Jack is obsessed with destroying Miles Leonard, the man who got the coveted Harvard job Jack had long wanted. In a phone conversation, it becomes clear Miles has absolutely no idea Jack hates him this much and even considers them friends while the series revolves around Jack's plans for "revenge."
* A.P. Bio: Stephanie, Mary, and Michelle have a game they play called pizza slap where they take pizza slices and hit each other in the face with the cheese side. Calling this a sport (or even a game) is a bit of a stretch though.
* A.P. Bio the main character Jack finds himself attracted to the single mother of one of his odder students, who is only okay with it in the hopes of making his father jealous. The relationship doesn't last long as the student's more annoying quirks make dating difficult.
* A.P. Bio was cancelled after its second season by NBC, only to be revived for a third season by NBCUniversal's upcoming streaming service a couple of months later.
* APB, Officer Nicholas Brandt mentions in "Risky Business" that he used to be in the military. "Pandora's Box" mentions that he was an ex-Ranger.
* A PBS Documentary on Prohibition also touched on this, with an allegory from the son of a bootlegger... Whose uncle happened to be an undertaker. When a raid was going to happen on their house they'd get a tip the day before, have his uncle drive up with a hearse, and load all their booze-making supplies into the back. His uncle would then drive the hearse into Arlington cemetery until the raid was over.
* APB Strangely enough, driving your car to a gas station can repair it, even if it is on fire and moments away from exploding.
* APCs were more or less lame, being light, wheeled boxes, armed with a 14.5mm machine gun and a 7.62mm machinegun - true to the APC standard of "battle taxi". The most recent variant, the BTR-90, fixes all that, having heavier armour, better speed, full NBC protection, and a BMP-2's 30mm automatic cannon in place of the 14.5mm. It has proven rather popular with crews.
* A Peaceful Afterlife: All over the place. Justified, in that demons can regenerate from just about anything given enough time, and therefore tend to regard things like dismemberment and decapitation as inconvenient. It's telling that Angel is more peeved about blood on his favorite top and his hairdo being ruined than he is about losing an arm.
* A Peaceful Afterlife: Angel Dust's 'wine'. Is actually grape juice and rubbing alcohol, but demon physiology allows drinkers to withstand the poisonous elements and merely become profoundly drunk.
* A Peaceful Afterlife: As times goes on, Kira slowly but surely develops attachment to the others in the hotel, eventually becoming outright affection. Fittingly enough for Kira, this newfound regard for the feelings and wellbeing of others is initially met with confusion and annoyance, though he comes to grudgingly accept it as a positive change.
* A Peaceful Afterlife. Kira turns his money into a bomb and annihilates the thug.
* A Peaceful Afterlife the only way he could get decent food was to make it himself.
* A Peaceful Afterlife: Very few things can permanently kill demons, as they'll eventually regenerate. It's to the point were decapitation is seen as a valid way of restraining someone.
* A peaceful example from the Cold War is the Space Race. The Soviets put a satellite into orbit and get a man into space and back in one piece, so the Americans ramp up their space program and eventually get men onto the moon. Eventually, there was
* A peak modern example would be Baron Corbin. He hasn't been pushed hard enough to quite be a creator's pet, but he's always on television, always has a major role in some kind of storyline or other. He's not very good in the ring and isn't over.

He gets tons of focus. When he couldn't get over as a monster heel, he was made into the Smackdown General Manager. He was
* Ape and bear characters, just as Francine (ape) and the Brain (bear), cause problems with fans. A lot of fans also just think ape characters are
* Ape and Essence and plant diseases of all kinds. Some areas of the world, including New Zealand and Equatorial Africa, survived due to being too remote to be of any strategic importance; elsewhere, the increasingly mutated survivors refer to the catastrophe only as "the Thing."
* Ape and Essence calls "the death, by suicide, of twentieth-century science."
* Ape And Essence in a desperate attempt to ward off the extinction that will surely happen in a hundred years.
* Ape and Essence made them lose belief in any deity but a malevolent one.
* Ape and Essence was fought with Super-Tularemia and Improved Glanders, among other non-conventional weapons. The lives of these scientists who created these horrors are described ironically.
* ape are like this - precisely why or how a ghost got into your video cassette/mobile phone/microwave oven, or why this should cause demented ghost like creatures to stalk you until you die is never explained and, when you think about it, is probably a pretty daft idea, but nevertheless, the films can still be exceedingly creepy.
* A Pearl for My Mistress, Eugen von Frenzel is a rather mundane example. He is hardly an ardent National Socialist; however, he panders to Nazi ideas in his research and writing in hope to advance his own academic career.
* A Pearl for My Mistress, it's averted with Eleanor. Despite being an "Honourable Miss", she is the sweetest cinnamon roll around. Played straight with... pretty much everyone else.
* A Pearl for My Mistress, which is set in 1934, Lady Lucy's family regards her journalistic occupation to be this. Lucy herself actually enjoys both the job itself and the independent income it allows her.
* A Pearl in the Forest's purges were well underway, features as its villain a Mongolian State Sec officer and Buryat tribesman. He has led his fellow State Sec thugs to his own village to hunt down ethnic Buryats who have escaped from the Soviet Union and taken refuge in Mongolia.
* A peasant who makes fun of Cersei gets a taste of this from Gregor smashing the poor bastard's head to the wall.
* A Peccatis keeps switching unpredictably between police procedural and political conspiracy thriller.
* A Peccatis thing mentioned. Also please note that unlike the caution, this one is to be recited upon arrest (or when the suspect wakes up from all the stunning spells), not interrogation. It reads as follows:
* A peculiar case concerns GameStop customers, who tend to also be fans of the burger chain Smashburger due to
* A peculiar form has been adopted for years by Italian toy company Giochi Preziosi. Often they made commercials that were supposedly for a particular piece of merchandise (mostly for their themed school apparels, but it also happened with actual toy commercials) that also in the while featured appearances by multiple other toys and pieces of merch from that exact same licensing brand.
* a peculiar type of brain-wave pattern found in some humans. People capable of so-called "epsilon-wave sleep" will find that things they have dreamed about come true.
* A peculiar version of this was employed by Khutulun, a granddaughter of
* A pedantic note; female fighters of the samurai class were not unknown in medieval Japan, although the term "samurai" was never used: the term "onna-bugeisha", which can loosely be translated "lady of war", was employed.
* A pediatrician working for Indian Health Services is assaulted by one of his patients → multiple allegations of pedophilic sexual abuse by said pediatrician, a certain Stanley Patrick Weber.
* Ape Escape 2 and 3 had alot of extra stuff. You could go to a town-like hub world and purchase either cookies, extra lives, or for the sake of completion: The games

soundtracks and cutscenes. In the 3rd one it had different skins for the RC Car and a survival mode (which had the player with a full stock of abilites and equipment, but started of with zero lives, going through levels and capturing enough monkeys to progress while trying to earn 1ups to make sure they didn't fail).
* Ape Escape 2 has the soccer mini-game which could well be its own game trying to win against the other team.
* Ape Escape 3), and then found themselves enjoying the cute monkey game that came free with it.
* Ape Escape, a deadly remote-controlled car and a deadly roller coaster ride.
* Ape Escape banana gun which fires real bullets. You also have a banana boomerang which can attract the monkeys and fetch items, a remote controlled car bomb, and more.
* Ape Escape, but for whatever reason, one cutscene played with the original PS1 audio instead of the new voice acting. As a bonus, the difference in performance is obvious even to someone who never played the original version.
* Ape Escape evil genius simian antagonist Specter is seldom seen without his levitating chair. In the first game, he even fights the first half of the final battle in it. It doesn't appear to have any weapons of its own, but it does teleport and apparently give him mind-control beam and energy blast attacks, so it's pretty cool.
* Ape Escape game after capturing all the remaining monkeys, Freaky Monkey Five included. Yumi thinks this is legit and steps forward to capture him, but just as Kei warns his sister, Specter reveals his façade and captures them instead.
* Ape Escape games have been released in the UK with a different English voice track than North America.
* Ape Escape games is a bright red boxing glove mounted on an extendable lattice, called the Magic Punch.
* Ape Escape. In the third game, she changes her image and tries to break out again... and once again pulls out the psychokinesis when you ruin her show.
* Ape Escape is generally considered to be one of the PS1's indisputable classics. Ask fans how they felt about the two follow-up games, and most of the time the response you'll get will be somewhere along the lines of "They made sequels?"
* Ape Escape: Monkey Yellow is a good example of this looking much more like a rubber duck than a monkey. And he (she?) considers himself (herself?) the best-looking character in the series.
* Ape Escape series had this. Pressing L1+Start on New Game after capturing all the monkeys and beating Specter, would start the game in New Game+. You played as Spike, the player character in the first game, started out with all the gadgets and a secret version of the Monkey Net accessed by pressing R1 on the net in the Gadget menu. You could also get things from the Gotcha Box that you would have to beat several levels before being able to receive in a normal game. (Such as the minigames.)
* Ape Escape series, one of these, called the Magic Punch, is the final tool given to the player in each game.
* Ape Escape's gadget inventor Aki, whose hairstyle can only be described as "puffy".
* Ape Escape, Specter and Dr. Tomoki have a tendency to do this in FMV cutscenes, making them look like mad puppets.
* Ape Escape, Specter does this on a global scale to enslave all of humanity through mindless TV shows.
* Ape Escape, Specter's taunting message to the heroes is interrupted by Dr. Tomoki's overdramatic posturing. When Specter loses his patience, the screen briefly cuts to a "Technical Difficulties" card showing a sad monkey.
* Ape Escape. The names of the monkeys, in the UK localisation at least, often reference people in the movie industry (there's monkeys called M. Clayderman, D. Elfman, Ricky Ger V, and Culkin, for just a handful of examples). Not only that, but some of the Simian Cinema shorts have a 'clean meaning' that the kids will find funny, and a 'dirty meaning' the older demographic will find funny (the one with the nude monkey telling the other nude monkey 'the ancient secret to keeping warm'

before flossing between her legs with a towel as demonstration comes to mind).
* Ape Escape was one for the DualShock controller, being the first game to explicitly require it due to utilizing both analogue sticks. Because of that, it was acclaimed as being one of the most revolutionary games on the platform, and to this day is still considered to be one of the best games on the PlayStation.
* Ape Escape, when, if you choose the male protagonist Kei, he will give Kei a choice between fighting him...or going out on a date. This scene was censored in the US version, but remained intact in the Japanese and UK releases.
* Ape Escape, when you realize apes are technically monkeys or simians.
* Ape Escape, you can view some flavor text for each monkey you catch, and for one of the monkeys from the Ice Age set of levels, one of the monkeys is listed as being particularly grumpy because he ate some yellow snow.
* A Penadinho storyline has Frank trying to remember why he tied a string around his index finger. When he finally gives up and undoes the knot, his finger falls to the ground, reminding him that the string was only there to keep the severed limb in place.
* Ape Nation. The premise is that the Tenctonese slave ship was sucked into a black hole and arrived on the ape-dominated Earth in the future, landing in the Forbidden Zone. Caan, the captain of the Newcomer ship, has conquest in mind and is opposed by his brother Danada who enters into an alliance with the gorilla General Ollo and a human named Simon, who has the ability to speak. Another major character in the miniseries is named Heston.
* A penguin is out driving in the desert when he hears a pop and his tire goes flat. He manages to pull into a gas station to have the mechanic check it out. As he's waiting, he notices the convenience store is selling some ice cream, and he decides he could do with some good cold ice cream. He goes in and buys his favorite flavor, vanilla, then goes out and sits on the curb to eat it. Being a penguin and lacking opposable thumbs, he has a lot of trouble scooping it out with his flippers, and being in the middle of the desert, the ice cream melts very quickly. Eventually, he's almost completely covered in white, sticky goop. The mechanic comes out at that point, looks at him, and informs him, "Well, looks like you blew a seal." The penguin cries indignantly
* a penguin) with the latter shot's camera peeking out from behind a rock. Another transitions from the exterior of a Mesoamerican temple to the interior of an Egyptian temple. This is accomplished when a painted pillar wipes the screen to the left and brings another scene with it.
* A Pen-Knife in My Heart's movie, the plot was close enough so that Day-Lewis had to make some last-minute changes in order to avoid a lawsuit from Highsmith's publisher.
* A Penny for Your Thoughts", Hector B. Poole spends half an episode reading people's minds before realizing that no, they're not talking out loud while somehow keeping their mouths closed.
* a Pentagon job' — somebody around here is bound to have that name and rank". One guess who that turned out to be....
* A People's History of the American Empire uses a lecture by historian Howard Zinn as a framing device to tell about several controversial and often ignored parts of American history from the end of the Civil War to 9/11.
* Apep (or Apophis) is the monstrous serpent that tried to eat Ra every night and wasn't so much worshipped as worshipped
* a pepper grinder. Cuddles then lets out a really loud sneeze that causes Lumpy to lose his hearing, setting off the plot for the episode.
* A Pepsi Max commercial starts off with a couple on a first date. The woman asks herself the usual questions of marriage and children, whereas the man constantly thinks about sex with her.
* A perennial subgenre is the teenaged ensemble comedy. Examples include:
* A perfect aversion in R2 last episode: Gino's mecha is so damaged that it automatically shuts down. We hear Gino begging the engine to move again; actually, he is editing the mecha's low-level settings, removing all safety features so the mecha can at least walk and move its arms.

* A Perfect Circle as recognized as their debut single, "Judith", which reached #4 and #5 on those charts respectively. The lesser-known "The Outsider" also beat "Judith" by one spot on mainstream and tied it on alternative. "Weak" and "Outsider" were their only Hot 100 entries, with "Judith" falling short at #105.
* A Perfect Circle: founded in 1999 together with Billy Howerdel, released three albums between 2000 and 2004, fourth album released in 2018.
* A Perfect Circle ("The Nurse Who Loved Me", originally by Failure) fits with the overall theme.
* A Perfect Circle they're easily forgiven, but the singer has a more critical viewpoint.
* "A Perfect Day" focuses on the murder of a child. It revolves around a family of four, parents and twin girls. The father was a cop and a domestic abuser. The mother tried to take her daughters and leave with her boyfriend, a good man and also a cop. Her husband intercepted them, tried to kill them all and
* "A Perfect Day": Not for the primary case, but it's revealed through the course of the investigation that an abusive husband
* A perfect example is an exchange involving Worf, Riker, and the eponymous Romulan admiral in the episode "The Defector":
* A perfect example of this is the soul-metal band King's X, which, despite
* A perfect example would be in the first part of Episode 3, when the wolf ghost
* A Perfect Getaway, where a honeymooning couple tries to enjoy their vacation amidst troubling tales of serial murder. Paranoia and self-preservation run high, and anyone could be waiting to slit their throat while they sleep. Except the main characters were the serial killers from the start.
* a perfectionist who is obsessed with victory and does not admit failure, and two, that Joichiro had long moved on and found happiness again in running a humble diner with his wife and son.
* A perfectly respectable but still lower-than-their-usual grade (see
* A perfect Real Life example of this trope would be a condominium complex in Ocoee, Florida hit by a tornado during an overnight storm in 1998. The complex — consisting of large single-story condos — was completely leveled with the exception of a single condo on the edge of the complex's property. Not only did the couple living in this condo not even
* A Perfect Spy claims to have been tortured by the Gestapo while working behind the lines.
* A Perfect Spy) involves him walking offscreen, then we hear a gunshot after a long pause, and then a gory shot of his body.
* A Perfect Spy'' was about a spy whose father was a professional conman-just like Le Carre.
* A Perfect World by Al Steiner depicts a future where all STDs have been eliminated, people are infertile until they decide they want to procreate (at which point they just go to the doctor and tell them they want their fertility activated), and open attitudes toward sex are the norm. As a result it's very common for people to "get acquainted with each other" by having sexual relations (sex in public places is legal, and nobody even bats an eye when it happens), and monogamy is considered a primitive and outdated concept.
* A Perfect World, Kevin Costner plays a jail inmate who escapes and takes a little boy hostage. Gradually they develop a father-child relationship, to the point where the boy voluntarily stays with him.
* A perhaps even greater example of this are the Lambent. Once something is exposed to Imulsion, the series' fictional fuel, it starts mutating into a horrible beast, twisting, shifting or even mummifying... but every single Lambent to date (that has eyes, mind you) has had glowing eyes. Seeing how the Lambent want to consume everything and every time you kill them, they explode, this trope is pretty justified.
* A Period of Silence: The PH Device traps you in another world and uses your deepest fears against you, to the point where one character even dies of a heart attack after being exposed to it. Even though it's never spelled out in the story, according to Word of God PH stands for "Personal Hell".

* a permanent resident of the dreambubbles is having one really bad day/week/million-billion years.
* A permanent sex change is also one of the possible results of a Wild Mage's spell failure. While it's possible to reverse the process with
* A perp claims to have been on the bottom floor of a building when the crime was committed, yet when he went to the elevator, he pressed the "up button." Encyclopedia deduces that the perp was probably not on the very bottom floor, because the perp wouldn't have had to distinguish the button as the "up button" because there wouldn't have been a "down button." Of course, an "up button" is always an "up button" whether or not there's a "down button" along with it. The actual name for them is "call button", but it's rarely used outside of technical and legal documentation. Besides, plenty of call buttons still have the appropriate arrow on them even when they're on the top and bottom floors.
* a Perpetual means that his ability to resurrect is explained in-universe, no one in the setting actually knows he's a Perpetual, leading to them being confused, elated, or resigned (in Corvus Corax's case) when he repeatedly keeps coming back to life.
* A perp is accused of stealing something that belonged to Encyclopedia's client, and riding away on her bicycle. She claims that she hasn't ridden her bike all summer, before she takes it out of storage and starts showing off on it. Encyclopedia declares that she's lying, because if she hadn't ridden the bicycle like she claimed, the tires would have gone flat. (Because it's impossible that the girl or her parents could have kept the tires inflated in case she ever decided she wanted to go for a bike ride.)
* A perp tries to kick Murphy in the balls while resisting arrest. Since his entire body is covered in metal armor, obviously this doesn't work.
* A perp who's trying to frame Encyclopedia for claiming ownership of the town clock and charging people to use it to set their watches is "proved" as a liar because he used his left hand to set his own watch, because of the "fact" that when you set your watch with your left hand, you're holding it upside down. (Because it's impossible that a person could simply be more comfortable using their left hand, and compensate for it when setting their watch, or that one could buy left-handed watches specifically to avoid this problem, and ignoring that watch faces are quite easy to read upside down.)
* A persistent belief among some fans, due to an alleged "leak" from an early screening, is that
* A persistent piece of graffiti on the suburb sign for Cook in Canberra, Australia (which is in white letters on brown wood) involves blacking out part of the second O; thereby informing motorists that they have just arrived in the suburb of COCK.
* A persistent theme throughout the franchise; no matter how many times you die, no matter how badly the world has suffered, no matter how hopeless the given situation is, there is still some glimmer of resolve to draw strength from and carry on with,
* A persistent theory about Tsar Alexander I — who talked about giving up the throne and living as an ordinary man at several points in his life — is that his sudden death in the remote town of Taganrog was staged and that he spent the rest of his life as a wandering hermit named Feodor Kuzmitch.
* A personal account where a person noted that the floors and ceilings act as amplifiers for sounds from adjacent apartments, making it very easy to hear the bed scooting on the floor and the headboard banging against the wall. After 5 minutes, it was funny and kind of embarrassing. After 10 minutes, it became annoying. After 15 minutes, it was frustrating as it was preventing them from sleeping. After 20 minutes, it was kind of impressive.
* A person asks for a song about hot girls, he gets one involving flame-throwers and microwaves. Someone else asks for a song in which every word has an "o" in it, and he gets a song that's completely instrumental, except for the end, when he says "potato".
* A person becomes incapable of lying, though still fully conscious and otherwise

able.
* a person being in danger and having enough of these moments can trigger morphogenetic fields, essentially allowing telepathy. Junpei gets possibly the best one, so Akane can contact him.
* A person goes to the doctor complaining that they are unable to stop farting.
* A Person in the Rain but set in an American grade school. The teacher notices (and moves) a desk belonging to a deceased student, who begins to haunt her for messing with it.
* a person or group that's considered unpopular by the majority of voters
* a person's consciousness body. Interactive touch screen, speaking computers are commonplace.
* a person's ringtone that seems to exist only to gloat about the fact that the phone it's on is an iPhone.
* A person undergoes traumatic transformation into something non-human, but instead of angsting they celebrate because they didn't like their former life anyway;
* A person walks up to a same-sex couple and asks "Which one of you's the man/woman"?
* A person who is surrounded by and exemplifies the savage joy of battle, whose life partner is a person who is surrounded by and exemplifies loss and regret, with the two eventually giving the world a prodigious child
* A person whose brain's lobes have been separated makes for interesting experiments. Essentially, each eye now reports only to half of the brain and each half is operating somewhat independently. Show one eye a card telling the person to do something (get up and get a Coke, say) and the person will then do so with no memory of having read the card. Ask why he did that and (presuming it's the other lobe controlling the mouth) he'll begin inventing more and more fabulous explanations for why he did so, even when he's shown the card with both eyes. Freaky.
* (a person who was given a 'cure' for the illness, which killed them, leading them to go insane as their spirit was left to wander for all eternity) however, they killed and fused with a horse beast and several other trolls and spirits, giving them the appearance of the mythical horse, Sleipnir, leading fans to name them after it.
* A person wrongly convicted of murdering their spouse, escaping from custody, determined to track down those responsible, pursued—and eventually aided—by an equally determined lawman played by
* Aperture founder Cave Johnson embraces willful ignorance in the belief that all scientific discovery occurs by accident, which would be hindered by competence. Does his deliberate stupidity make him more evil or does such a belief make him more stupid?
* Aperture Hand Lab. The player is required to shake their fist back at him to progress. And then he threatens with a double-shake, and the player is required to do the same.
* Aperture Hand Lab when this happens, with the cores reacting in annoyed/offended way.
* Aperture Science may use human guinea pigs and have created the most malevolent, twisted AI in the history of their Earth, but it has been made painfully clear that they suffer from such staggering stupidity and way-out
* Aperture Science themselves seem to have prepared accordingly for this type of scenario.
* "Aperture Science/We do what we must because we can/For the good of all of us/Except the ones who are dead."
* Aperture Scientists, they deliberately messed with his personality so that the part of him that produced terrible ideas would be dominant and would override other aspects of his personality in a crisis.
* Aperture's insane founder, Cave Johnson, tends to say insane things that tend to be absolutely hilarious.
* Aperture Tag: The Paint Gun Testing Initiative, Nigel's job is to walk the player

through testing protocol from his office. He doesn't help with test solving, beyond basic controls, but he'll often inform the player of goals that might not be obvious, particularly when outside testing areas.
* Aperture Tag: The Paint Gun Testing Initiative this and comments that the test subject's file notes they don't talk much.
* a perverted sex hound (Quagmire), but without them, some damn Hawaiians might move in."
* Ape Shall Never Kill Ape: A group of people who won't act maliciously towards each other, but will be malicious towards everyone else.
* Ape Shall Never Kill Ape: A violent group sees it as immoral to be violent toward one of their own.
* Ape Shall Never Kill Ape: You should treat the rest of our kind with proper respect... but you shouldn't be so generous to outsiders.
* Ape Shall Never Kill Ape: You won't harm anyone who is like you but will cheerfully harm everyone else.
* apes have been known to mess around with the humans watching them for their own amusement.. Indeed, you'll find many videos of apes playing harmlessly with viewers, such as knocking on the glass back at people who knock on it at them, but you'll find just as many videos of apes trolling people.
* Apeshit takes this about as far as it can go. Immortality means surviving everything from splattered brains to being sodomized with a kitchen knife.
* Apes of Wrath, in which a drunken stork delivers Bugs to a gorilla couple, ends with said stork giving Bugs his own "baby": Daffy!
* Apes that often drop barrels for no real reason other than a homage to
* A Pet into the Wild: A domestic animal leaves home and starts living in the wild.
* A Pet into the Wild: A domestic animal who lived with humans becomes a stray, and now has to fend for itself in the wilderness.
* A Petty Nuzlocke Challenge, the Geodude family of Pokemon explode as a form of asexual reproduction. Part 2's Broseph the Geodude is a fragment/spawn of Part 1's Broseph the Graveler who detonated himself in combat.
* A petty thief named Dario Brando abused his only son and treated him like crap. Imagine for a second; if this petty pick-pocket, a nobody in the grand scheme of the universe, had instead been a
* Apex Legends, Bangalore's tactical ability is a smoke bomb (even name-dropping the trope name when doing so), obscuring herself from the vision of enemies at a distance to allow her a quick escape.
* Apex Legends due to its high damage and good accuracy, although its 4-shot magazine definitely means there's a learning curve.
* Apex Legends has Rampart who runs a weapons mod shop. She's often working on the big guns literally!
* Apex Legends has the city of Olympus. First teased in Season 4 cinematics, the city appeared as a new map in Season 7. According to the game's lore, it was originally a utopia for intellectuals in arts and sciences until an accident at a research facility created an unstable Phase Rift. As the rift became more unstable, the citizens and visitors evacuated, and the city became a new battlegrounds for the Apex Games.
* Apex Legends overtime, for being supposedly inferior to other weapons of their class. True their damage outputs aren't entirely game-breaking, but don't laugh too hard, for in the hands of a skilled player. It will be they who will laugh last.
* Apex Legends, she has a hardworking attitude that makes up for her personality. Unfortunately it was her arrogance that led to her shop getting burned down.
* Apex Legends the game came out, EA did advertise in the form of a wide variety of sponsored streams.
* Apex Legends where a character named Forge did an in-series interview presenting himself as the new entry in the Apex Games before Revenant killed him on-camera. In the leadup to this trailer, the developers leaked fake concept art and made up references to Forge in in-game code in response to actual leaks about Revenant a few months earlier.
* Apex Security Group is a security firm in the US that only hires law enforcement

officers.
* Apflickorna in English), after Emma and Cassandra instantly hit it off and spend an entire afternoon chatting with each other, two guys try to enter the conversation. Cassandra gets them to leave by pretending to accept one of their phone numbers.
* A Phantom Hero In Metropolis: Danny's reaction when Barbara Gordon tells him why she started the food fight.
* "A Pharaoh to Remember" features a brief gag where we see what look like a pair of modern-looking architects on an
* Aphelandra of the Kuja Pirates. While the others, being Amazons, are taller than average, she is at least
* Aphex Twin and 'Avril 14th'. Most people don't even know it's by him but they know the song.
* Aphex Twin any part of them. He's probably not the only remixer who's done this, but most wouldn't admit to it. If you enjoy Aphex's work then it probably isn't going to make much difference to you whether he uses any of the originals or not.
* Aphex Twin consisted entirely of songs he downloaded from the internet that had been mislabeled as Aphex Twin. See also Glorious Subversions below.
* Aphex Twin, falls in this category. Whether it's the often robotic vocal effects, out-of-tune melodies, or bizarre and often frightening lyrics, we guarantee that you won't be sleeping for days. Oh, and the music videos.
* Aphex Twin has also used his own face to play this trope on a few of his album covers, such as in the
* Aphex Twin) has used several different aliases such as AFX, Blue Calx, Bradley Strider, Caustic Window, DJ Smojphace, GAK, Martin Tressider, Polygon Window, Power-Pill, Prichard D. Jams, Q-Chastic, Tahnaiya Russell, The Dice Man, Soit P.P., The Tuss and user18081971.
* Aphex Twin is telling the truth he was already creating his first album by 14.
* Aphex Twin, it's nothing short of lightning in a bottle it managed to chart at all). Averted in America, where "Daddy" and "Window" are his only charting songs on any Billboard chart (if both on separate charts - "Daddy" on the Heatseekers chart (#137), "Window" on the Dance Singles chart (#15)). "Avril 14th", a song of equal or maybe even greater popularity than the previously mentioned two, was never even released as a single.
* Aphex Twin? It was released by Power Pill... seems like a case of this trope, right? Except that Power Pill is a pseudonym of Richard D. James— who's better known as Aphex Twin!
* Aphex Twin's Come To Daddy EP, you hear "Come To Daddy" as the opener, a hardcore, drill n' bass song where Richard D. James screams that he wants your soul. Then, suddenly, you hear "Flim", a soothing instrumental, and then a more calming nice mix of Come To Daddy. It goes back to the percussion-filled hardcore in "Bucephalus Bouncing Ball", of course.
* Aphex Twin's "Come to Daddy (Pappy Mix)" would certainly qualify. And generally, any track he has where the beats go so blazingly fast they practically fall all over themselves, which was a lot in the late 90s and early 2000s.
* Aphex Twin's Music Video "Come to Daddy", the demon that came out of the TV turn around and screamed at the old lady who was horrified at this moment.
* Aphex Twin's music video for the track "Windowlicker" features around four minutes of this trope in action.
* Aphex Twin song "Equation" there is a tone which, if you run it through a spectrograph, forms a picture of (Aphex Twin sole member) Richard D. James's face.
* Aphex Twin's "Rubber Johnny". In fact, Aphex Twin has played this trope for Surreal Humor and Surreal Horror (sometimes both at the same time) in most of his music videos.
* Aphex Twin supplemented his ambient and breakcore albums with techno releases under the name AFX. Years later, he returned to producing acid techno under the AFX name.
* Aphex Twin). The man has retrospectively admitted that he did overdo it.
* Aphex Twin: The man loves messing with the audience and anyone who tries to

interview him. For example:
* Aphex Twin video features a deformed wheelchair-bound kid in a dark basement.
* Aphid colonies mostly consist of asexually-produced clone sisters which are easily replaced. The aphids on the edge of a cluster will sit there and allow predators to pick them off without resistance, essentially serving as living shields for their siblings at the center of the colony.
* Aphids (the little white insects you sometimes see eating your rose bushes) are literally born pregnant.
* A Philippine gag show did a(n intentionally inaccurate) skit about
* A philosopher set to wrestle a bishop to settle the issue of the existence of God (who exists, by two falls and a submission) is described as having written a book with the trope name as its title.
* A philosophical and metaphysical concept that more or less is what makes something what it is. Both people, animals, and even inanimate objects have this. It's not usually directly named or addressed in fiction but a lot of stories reference it indirectly. Especially when related to magic systems that draw power from souls (or maybe even elements and nature). It's a connection with Essence that basically gives people the power to draw power from things because it defines what something can do and can become.
* A Phione tried to challenge Ash's Pikachu to a fight over Dawn's Buneary, only for Buneary herself to defeat the Phione. Pikachu was confused about the whole thing.
* Aphorism. Got thrown off the roof to die by his friends such that he could recover from his not quite fatal injuries.
* Aphorism has the power of revivability. He is frequently used as a scapegoat by his friend to dodge an attack.
* A photo from "Dog of Death" shows Homer strangling Santa's Little Helper.
* A photograph exists of a pyroclastic cloud tumbling down Mount Unzen in Japan. On the road in front of the cloud is a fire engine, in front of THAT is a single man running for his life. You can see
* A photograph that has gone viral in spanish-speaking communities shows a window repairing service that reads "Bidrios" instead of "Vidrios". The slogan underneath says "We wrote it wrong, but we place them right!"
* A photon drive fits our definition; photons do exert pressure, and they are massless. A photon drive only consumes power. Unfortunately, a photon drive is horribly inefficient.
* a photo of a Hong Kong man sitting in a Starbucks flooded due to heavy rain.
* A photo of a supermarket shelf stripped bare of everything except vegan food
* a photo of Big Bird looking gloomy and holding a "Will Work For Food" sign became a quick hit on Twitter.
* a photo of herself. Stumpy decides to shove it up his ass just to spite her, but she stops him before he does.
* A photo of the inaugural piano drop at MIT in 1972 appears on the cover of ambient musician Tim Hecker's 2011 album
* A photo seen on the internet, captioned "43rd Annual Ninja parade" — showing an empty street, of course.
* a photo was taken of all the players kissing their wives/fiancees/girlfriends..
* Aphra finds herself being used, but points out that with the weapons being used against them she'd only be good for one shot, so her captor had best concentrate on shooting while she gets them out of this mess.
* A phrase often associated with the series is "This must be the work of an enemy Stand". This was never said in the series. The only thing close was in chapter 321 (Chapter 56 of
* Aphrikan (African) magic is less direct and mostly about manipulating magic that's already in things. While this means it uses less power than the other two styles and can achieve different things than them, it also has less of the straightforward effects the other styles have.
* Aphrodite and Ares are often portrayed as lovers but sometimes termed man and wife. However, more usually it was said that Aphrodite was married to Hephaestus,

so it became pretty funny when he would catch them in the act with an unbreakable iron net.
* Aphrodite and Hephaestus are treated as such just like in mythology, though whether they're still married or not tends to depend on the writer, also just like mythology.
* Aphrodite appears to have been a war-goddess in some of the very earliest references to her, with Cythera (seat of the eldest temple of Aphrodite)
* Aphrodite eventually reveal themselves to be the spirit of the planet Paradise, capable of influencing its weather and, to some extent, geography, as well as able to perceive all going-ons on its surface.
* Aphrodite goddess of beauty was extremely promiscuous, proud of it, and well-liked for it. Several of her temples were art, charity, and sex houses at the same time.
* Aphrodite had her moments, despite not being the most faithful herself. She cursed Eos with insatiable lust for sleeping with Ares, who was Aphrodite's lover at that time. According to some myths she also instructed Nessos to have Deianeira soak a robe in his poisoned blood and present it to Heracles, causing his painful death. All for seducing Adonis, another one of her lovers.
* Aphrodite has a bad habit of doing this whenever there's someone who made a
* Aphrodite in Greek Mythology. As much a goddess of lust as of love, encouraging people to get it on as much as possible whenever and wherever they can, which is how she started
* Aphrodite in particular is considered to be the product of smashing together
* Aphrodite is another Greek goddess who was born an adult: she was created when Kronos
* Aphrodite resents not being given this option and feels trapped in her
* Aphrodite's own son Eros, who finds love at first sight with Psyche.
* Aphrodite, the goddess of love, sex, and beauty, was associated with doves and swans.
* Aphrodite. Theseus prayed to Poseidon to punish Hippolytus and Poseidon, apparently not using his preternatural powers to fact-check first, sent a sea monster to spook Hippolytus' horses so that they killed him.
* Aphrodite was the goddess of beauty and love, and the most beautiful goddess of them all, yet a lot of really beautiful women or demigoddesses were frequently compared to her and proclaimed to either equal to her or even surpass her. For instance, there is Psyche who charmed Eros, Aphrodite's son, or Helen, Zeus's illegitimate daughter, whose beauty exacerbated, if not caused, the Trojan war.
* Aphrodite went from being the most popular fledgling, High Priestess-in-training, dating the hottest guy at the House of Night to being friendless, completely powerless, and spending her meal times sitting out in the courtyard eating alone.
* A Phule and His Money is, among other things, a galaxy-class accountant. By the end, the tax agents admit that they owe Phule a refund.
* A physicist, a chemist and an economist are stranded together on a desert island. Their search for food turns up nothing more than one can of soup, and they have no can opener. The physicist proposes smashing the can with a rock. The chemist avers that building a fire and heating the can would be a better first course of action. Finally the economist suggests his own proposal. "Assume that we have a can opener," he begins.
* a physique guaranteed to make just about any woman happy to be its focus He's not above what most would consider outright sexual harassment, however... as long as the girl seems amused by it.
* A pianist who is learning to play keyboard accordion would feel familiar with his right hand... but not that familiar when digging deeper. Not counting the light key touch and smaller keys, the major accordion feature is that its keyboard is upright. Turning your muscle memory ninety degrees is not as simple as you think. Also, the left-hand layout looks nothing like piano's left hand
* A Piano in the House", the drama critic Fitzgerald Fortune is a cruel, callous man. He takes delight in humiliating his much abused wife Esther, his friends Greg

Walker and Marge Moore and his butler Marvin by using the piano player to force them to reveal their most private thoughts and feelings. The tables are turned when Esther uses the piano to force Fitzgerald to admit that he is essentially a frightened little boy who lacks emotional maturity.
* A piano's model name is "Musica Ficta". "Musica ficta" means "fake music" in Latin, and is also a term for any pitches added during a live musical performance.
* a picture of a lightning bolt on each one, and a few others), roughly half the size of standard flippers.
* A picture of a standing woman smiling. She's surrounded by sitting, depressed people... In a Nazi Death Camp.
* A picture of a thin smoke trail leading out of the Capitol building, and Kent Brockman saying, "... leaving the Vice-President in charge," preceded him talking about how a local house (the Simpson house) had a faulty foundation that made it slant.
* a picture of her in her swimsuit, Maou and Lucifer both pass out and Alciel throws up. Alciel later tries to use the picture as a weapon.
* A picture of Starfire appears in Dick's cellphone, with her face obscured by a text message. While she'd have a voice-only cameo in
* A picture of the scene itself can be seen at the museum in the Rust-eze Racing Center.
* Apidya is a discarded, naked, straw-filled doll. There's no reason given why she's alive, but she's one of several objects that are. She has laser eyes, a hand on a spring, and a spit attack.
* a piece of bubble wrap that was to be taped over his real hand and dyed green with washing-up liquid.)
* A Piece of Cake, half the squadron's aircraft are grounded for want of essential spare parts. An unhelpful stres depot will not issue them unless the correct paperwork is filled in properly. The squadron does not have the official forms to requisition spare parts. The Air Ministry maintain these have been sent out and you're not getting any more. A new CO mounts an armed raid on the deopt and takes what he needs at gunpoint. The enraged bureaucrat catches up with the squadron in France and threatens court-martials. A killer pilot is sent to strafe his car to destruction, which is later blamed on the Luftwaffe.
* A piece of flavour text that pops up during the boss fight against Muffet which informs you that the nearby spiders are clapping along to Muffet's boss music.
* a piece of junk in most incarnations. Note it isn't so much a matter of the Doctor being bad at piloting it, more so that it was designed to have six people control it at once. Although River Song seems to manage a smooth ride just peachily on her own, while simultaneously implying the Doctor is a crap driver who "leaves the brake on".
* A Piece of Rebellion slaps Bad Cop so hard for insulting the Master Builders that his face spins all the way round to Good Cop.
* A Piece of Resistance leader is captured, and the protagonist is told by his superior that he must be freed or, failing that, killed as he knows the identity of hundreds of Resistance members. It turns out the only person he knows is the superior, who's just protecting his own skin.
* A Piece of Resistance so her partner could attack the agent. Ironically at the end of the novel the same woman is stopped by police and bites down on a suicide pill she's carrying in her mouth — it turns out that her papers were in order and it was simply a routine check.
* "A Piece of the Action" showed the ship's phasers could stun people on the ground and could even exclude the building in the middle of the stun area. Never seen again.
* A Piece of the Action when Kirk, Spock, Bones and even Scotty have to deal with cliche gangsters, curious local customs and slang, and the enigma of manual transmission.
* a pie chart. The amount of fun had by the toddler with the actual toy is much, much less than the fun had with the box it came in.
* A pie chart tracks how much pie the notebook's original owner had eaten.

* a pig in a chef's hat smacking its lips while it holds a rack of ribs over a fire.
* A Pig Named "Porkchop": An animal is named after the meat, food, or other animal products that could come from it.
* a Pikachu who stays outside its Poké Ball, start off as jerks before warming up to their trainer.
* a pile of "whatsit". His reaction is "Uh-oh, this is about to get a whole lot more unfortunate..."
* A pillbox is basically a tank featuring extremely strong armor and high firepower, but no mobility. Depending on construction methods they can also be fairly inexpensive.
* A pilot and scientist just went rogue to help two prisoners escape (those are the good guys, by the way.) He pauses just long enough to tell everyone "Masks on" before booting open the atmospherically sealed door, striding into the hangar and opening fire on the fleeing aircraft. After a total of about 45 seconds of taking careful aim, firing, and then looking angry/disappointed that they left, he's FINALLY handed a mask and it's shown that he was holding his breath the entire time while looking focused, if not placid.
* A pilot appears to have been balancing two women at once and killed one girlfriend to prevent her from telling his fiancee. It turns out the "girlfriend" was a stalker who he killed in self-defense when she attacked him in a rage.
* . A pilot by the name of Stanton panics, which leads to Bison killing him. He turns to the next in the chain of command, a pilot named Amy Redding:
* a pilot episode taking the video down alongside Robert's original account, it ended up becoming the pilot after it finally reuploaded on his new account in April of 2020.
* A pilot was flying alone in his plane around the world, and his supervisors kept asking him where he was, and to know that, he had a technique, put his arm through a hole below the plane, and touch things with his hand.
* A pilot who turns in his wings is permanently disqualified from ever flying again.
* A pimp beating one of his hookers while a crowd looks on indifferently.
* a pinball machine based off the series, were big fans of the series proper.
* "A Pinch to Grow An Ed" after Lee kicks one of the springs that support Eddy's tall boots, the Eds fall back to Earth, and Ed's nose fills the screen.
* A Pink Planet By the time Steven is born, gems from yellow and Blue's court are lining up to be transferred to Earth.
* A Pink Planet have led her to have massive reserves of self-doubt and a pathological fear of disappointing others.
* A Pink Planet, one of the Coral Research Site's many innovations is the creation of incubation chambers, allowing humans and human/gem hybrids to be bred artificially. Thanks to this, Pink was able to have Steven without giving up her physical form.
* A Pink Planet, the Coral Project Site is a research station commissioned by Pink Diamond as a means of finding ways to incorporate organic life into gem-kind's colonization. While activities in Coral is meant to be kept a secret, two thousand years of activity and the increasing population of humans living near the site have led to such secrets leaking. By the time Steven is born, gem-human hybrids (a product of their research) are well-known, with the other Diamonds eventually finding out about it.
* A Pink Planet: While there are multiple "Diamond Palaces" constructed all across the Earth, Pink Diamond, Steven, Pearl and Greg all live on the Moon Palace, located in the center of Moon City.
* A Pinky and the Brain, The Brain once tried to take over the World by posing as a Mall Santa. Given his diminutive size, it did not end well.
* A Pinky and the Brain, the titular mice are at Santa's Workshop, as part of their scheme. They're found out by an elf. How does Pinky divert him? 'Look! A decoy!'
* A pioneer in spending an entire film sending up his public persona is
* A Pirate 400 Years Too Late: Anachronistic pirates from the distant past are

somehow still around in modern times.
* A Pirate 400 Years Too Late: Anachronistic pirates in the modern day.
* A Pirate 400 Years Too Late: The trope is about swashbuckling pirates in modern times; the Trope Namer is a song about a man seeing more years behind him than ahead.
* A pirate captain does this to Gargamel when he chases after a group of Smurfs sailing the seas in
* : A pirate organization which was secretly building its own fleet (in order to privately colonize territories on the other side of the Armistice Line) uses that fleet to evacuate as many civilians and military personnel as they can rescue during the destruction of the Colonies, then flees into space to find new worlds to rebuild on.
* A pirate seems to be whistling and dancing off the plank, only for the captain to grab him by the ear and say "Oh no, you'll
* A pirate themed two-part episode had Olaf send the main four on a dangerous treasure hunt and promise that he would reward them if they found the treasure. They manage to find the treasure and get back to Olaf alive. Just as it looks like Olaf is about to reward them, Olaf suddenly leaves with both the treasure
* Apis mellifera capensis the better known "killer bee." The Cape honeybees have a unique caste known as a pseudoqueen, which don't work like workers but don't reproduce as often as dedicated queens, which use mind control pheromones to trick the killer bees into killing their own queen and caring for the Cape honeybees. When the host colony eventually dies, the pseudoqueens fly off to find new host colonies and repeat the process.
* a pistol she really has to. ** Zenyatta is a buffer/debuffer that can also deal decent damage and whose ultimate is a massive AoE heal. Lucio can passively heal allies around him while his sound gun is good for crowd-control and potential environmental kills.
* A pitcher that rings up a lot of strikeouts is great to watch, but since strikeouts take at least three pitches, many hard-throwing strikeout artists tend to be less physically durable over the course of a season than a pitcher who's better at getting batters to hit groundouts and popouts (of course, the
* A Pittsburgh-area restaurant chain used this ambiguous slogan: "Winky's makes you happy to be hungry!"
* a pizza place called "Toni's Pizza," who laugh at him for wanting a pizza with anchovies.
* A pizza place commercial, aired on a Toronto radio station in the 1980s, satirized this with a reporter giving a play-by-play of a fictitious restaurant's thirty-second delivery, with predictably disastrous results. ("Oh no, there's tomato sauce all over the road! Someone get a serviette!") The commercial's concluding
* A pizzeria in Baltimore's Inner Harbor food court had this as a gimmick. You could buy a 1-gallon soda (which was basically a small bucket with a straw through the lid) and advertised free refills. By all accounts, a large portion of their business was tourists stopping in for their novelty bucket of soda.
* Apkallu Kibrat Arbat = Viceroy or equiv. Translated Archduke in Third Imperium
* A Place Called Here: "Here" is the prosaic name for the place where lost things go, including a community formed by missing and disappeared people who have become stranded Here. The main character winds up in Here herself while working on a missing person report, and as the story progresses things begin to disappear from Here as well — a process that the locals find extremely unsettling, as by definition nothing ever goes missing from Here.
* A Place Further than the Universe 2019, their respective official websites traded characters, editing the ones from the other show into their promo images.
* A Place Further than the Universe, after Mari "Kimari" Tamaki is put to work peeling potatoes on board the Antarctica-bound ship, she complains about her sister Rin discouraging her from bringing a potato peeler. The scene cuts to the Tamaki home, where Rin, holding the potato peeler, sneezes.
* A Place Further than the Universe, after the four main characters exhaust

themselves while doing training, Yuzuki realizes that she can't even lift her arms, and threatens to kill the others if they do anything to her. Hinata doodles "I'll kill you" on Yuzuki's head, which she frantically scrubs off in the bath.
* A Place Further than the Universe and needs to be politer, so she tries to say, "Please stop talking now." What winds up coming out is "Please shut talking now". Kimari and Hinata don't let her hear the end of it.
* A Place Further than the Universe involves the protagonists going on a civilian expedition to Antarctica, the "place" described in the title, which is also the title of Shirase's mother's book with the same name. Hinata even once describes it as a great place to get away from everyone.
* A Place Further than the Universe, it's revealed that Megumi lent Kimari her video game console... an original PlayStation that's almost a decade older than she herself is. (Everyone has smartphones, so it apparently takes place in the 2010s or later.)
* A Place Further than the Universe, Kimari, Shirase and Hinata head to Shinjuku, where some members of the civilian expedition to Antarctica will be meeting up, and plan on seducing one of the male members to get a spot on the trip. After Kimari fails miserably, Shirase vehemently refuses to try, but Hinata and Kimari shove her out of their hiding place, in front of the expedition members. Too late, they realize why Shirase refused- since she was the daughter of an expedition member who went missing (which is why she's so determined to go to Antarctica), and had tried to get into the expedition before, the expedition members recognize her.
* A Place Further than the Universe — Although it got a German dub.
* A Place Further than the Universe often ends its episodes this way, having scenes that foreshadow the next question in lieu of a preview.
* A Place in the Sun. As the gloriously sexy Angela sidles up next to George at a party, the champagne mini-bottle she's holding pops.
* A Place in the Sun falling out of the boat, but the fade to black leaves the viewer wondering if he might very well have tried to save her and simply been unsuccessful. In both mediums, the man was convicted of murder and sentenced to death.
* A Place in the Sun, George plans to murder Alice by throwing her into the lake and pretending that it was a boating accident. It doesn't pan out good for him.
* A Place in the Sun: It's definitely true that George took Alice out on the lake in order to murder her—he admits it. And it's definitely true that he did not hit her on the head or throw her in the water—Alice fell out of the boat accidentally. But the film cuts away, and doesn't show how hard George tried to save Alice, or if he did at all.
* A Place in the Sun. This is disastrous, as not only will it lose him his job (fraternization is forbidden at the factory), it will kill his budding romance with gorgeous, rich society girl Angela and eventually leads to the demise of both George and Alice.
* A Place of Silver Silence, not told how he died—by having his internal organs rearranged in an artistic manner. In a book listed on Amazon as 7th Grade and Up!
* A Place To Stand, a visual collage of life in Ontario, naturally had to include a shot of NHL hockey.
* A plague began (during the 40 years of wandering, still) when people of the children of Israel were lured away to Moabite gods. One man, Zimri, even brought one of the women back to show her off. Phineas, however, took a javelin, went after them, and thrust it through both of them, killing them and stopping the plague.
* A Plague Tale: Innocence starts out with Amicia and her little brother Hugo as the protagonists. While they remain the only player characters throughout the game, they gather a bunch of allies who help them during the game: first Lucas, the alchemist's apprentice, then the thief siblings Melie and Arthur, and finally the blacksmith Rodric.
* A Plague Tale: Innocence. The rat hordes will eat anyone who isn't close to a light source.
* A Plague Tale: Innocence they coat every surface with, that burns the throat.

This is called "rat nests" but resembles nothing so much as blackened meat moss, even having tendrils extending out from larger masses.
* "A Plain Shortage of Planes": Seeing Dick Dastardly fall, Muttley quickly sets up a water-filled inflatable pool, then snickers as this trope happens to Dastardly.
* a plane bouncing five times on the runway before finally staying on the ground, with variations in rank proportionate to the number of bounces.
* a plane crash that killed most of the Brazilian team, and due to the fact that the scheduling format for the South American competitions was changed in 2017 (as Sudamericana and Libertadores did not use to overlap), the possibility of any other team winning a continental treble became impossible because the tournaments became simultaneous.
* a planetary scale scorched earth tactic have liquefied entire surfaces of planets.
* A Planet Called Treason: In the backstory, a group of families attempted to overthrow the government of an interstellar republic and as punishment were banished to a planet without any accessible iron. Each family is given a teleportation device with the understanding that if they place something of sufficient value in it, they will be rewarded with iron. The story starts off when one of the families, now grown into a nation, starts conquering their neighbors using improbable numbers of iron weapons.
* A Planet Called Treason keeps the inhabitants on the surface while the rest of the galaxy profits from their otherwise advanced technology which is offered up for pittances of metal.
* A Planet Called Treason. The only way they can be detected is by moving in a faster relative timeframe (the trait of another tribe). It leads to some squicky revelations in regards to a prior encounter when the protagonists realizes that it wasn't a woman that seduced him.
* A Planet Called Treason: Variant of this trope on a planetary level, where each Region on the planet are Service providers, specializing in different areas: Biology, Theology, Genetic Engineering, and Acting, to name a few.
* A Planet for the President by Alistair Beaton has the A-plot, a B-plot of a character trying to uncover the conspiracy involved in the A-plot, and a comically odd C-plot (and a few other things). There's a very clear moment where the deadline for the A-plot looms, and so all the others are quickly cleared up to make way for the denouement.
* A Planet For The President, in order to put an end to the growing environmental crisis derived from global warming, the United States cabinet decides to infect most of Earth's population with a deadly virus, which the US inhabitants are vaccinated against. Thing is, the President is allergic to eggs, so his vaccine must be produced elsewhere. However, all the vaccines (save for the President's) turn out to be faulty, and the illness also affects the US population: in the end, the President is the last human alive.
* A planet has such a social structure. Often justified by having technological regression (but never further than medieval — not even to Roman times).
* A Planet Named Zok: Alien names that use rare consonants like "Z" and "X".
* A Planet Named Zok: Alien planets' names tend to be heavy on the z's, x's, k's and the like.
* A Planet Named Zok: Planets with rare letters from the Latin alphabet.
* A planet of robots has a B-grade monster movie where the monster is a human who is "impervious to their most powerful magnetic rays", yet can be
* A planetwide version happens offscreen, but sensed by Obi Wan Kenobi in
* A planned episode would have Buffy bringing Tara back to life with one wish. Needless to say, a lot of fans would have liked that over Willow's relationship with
* a planned invasion of the US eastern seaboard (but not Germany, since such a war was seen as being as unlikely as it was unwinnable).
* A planned new Quebec City team for the NHL has been in Expansion Hell since the early 2010s. Doesn't help that in 2018 commissioner Gary Bettman tacitly rejected

the Quebec City bid (or to some, was
* A Planters commercial is essentially nothing but meat-o-vision; a guy sees his shipmate as a giant sea-salted peanut — except that the shipmate gets drawn as Mr. Peanut, not an actual peanut.
* a plant in the audience who would fight the wrestler almost to a standstill, or even win occasionally, creating the illusion that it was possible to beat him. Any member of the public who got in the ring would be put in a simple submission hold, or "hook", for the three count and sent on his way. These could be considered "real" professional wrestling matches.
* A plan to make her the most famous crook in time by stealing the Roman Colosseum from Ancient Rome, deals with stolen miniature landmarks, ACME's first Chronoskimmer, a bust of a Roman leader, an electric magnet from the future, and Hannibal's elephants.
* a plan to unite the human governments, one that depends on having an idealist calling for unity amoung the various human-colonized worlds.
* A plant that was tainted among a corrupted forest by one of the titan's blood after it was felled by the gods is a gnarled tree covered in fruits with tormented faces on them that corrupts any creature that eats it, making the unfortunate victim willing to defend the tree with their lives. Some particularly vile cults and evil worshipers willingly corrupt themselves by drinking its juice.
* A platforming section on a scooter, while you're completely defenseless except for a charge attack. Most of the level is spent timing your sprints to jump over obstacles, or by progressing through a series of jumps.
* A platonic but no less emotional case is seen when Eclipsa tries to reason with
* A platonic but still quite adorable example occurs with Mimi and Scooter in episode 4 of
* A platonic example with Ivy's mother. She's pleased when it seems like her daughter is hanging out with her old friend Luna again, and urges them to spend more time together.
* A platonic example with Zuko and Sokka. They discuss their mutually poor track record with relationships to break an
* A platonic example would be Buttons. After Danny stands up for him against the typical ungratefulness of his owners, the large dog becomes friends with Danny and later tries to help him against Katie at the carnival.
* A platonic variant plays out when Ash has to choose between finding new Pokémon (Max) or stopping to eat (May).
* A platonic version is basically why the Straw Hats manage to make waves despite their
* A platonic version is that between Archie-3 and Hagan Lonovich, from
* A platonic version occurs in "Before and After". As Kes is dying of old age, the Doctor tells her "I wish I'd told you this before, but better late than never — you're the finest friend I've ever had." Kes then jumps back to an earlier moment in her timeline and mentions this incident. The Doctor is visibly embarrassed.
* A platonic version occurs in "Vertigo" when Thea Queen is being swarmed by reporters when she turns up for a court appearance. Oliver takes her hand with this trope as
* A platoon of American soldiers were looking for their transport to take them back to base and asked a local man where the convoy could be found. The man pointed to a hill and told them to go over the next hill where they found, instead of their convoy, an elephant grazing in a field. They went back to ask the man again and he pointed to the same hill where they'd found the elephant. Turns out that due to tonal differences, "Where is the convoy?" can be translated to "Where's the elephant?"
* A platoon of Marines equipped with laser weapons are dispatched into space to destroy Drax's satellite base at the climax of
* A played with example is Ron's one-time girlfriend Lavender dying during the Battle of Hogwarts in
* A player. If you were playing at a low level and someone picked this character,

you knew they hadn't even figured out how to choose a character yet.
* A player laughing so hard at a reveal that he fell out of his chair.
* A player swore Bob the Cat had spoken to him about some recipe or something that no one else ever heard him say. Jagex was coy about it and implied it was a hint at a later event in game.
* A player was caught using video chat to send explicit video to other players during a game of Uno. He too was banned until December 31st, 9999.
* A player wins a decisive advantage by killing their opponent's queen. This only really happens in beginner's games; in a game between talented players, a tiny material advantage or a slightly advantageous position would be enough.
* A playful version where both the friend and the lover are female appears in
* a playgirl who's letting a guy know that she's not into long-term monogamous relationships:
* A play on this trope is present when using the "Taunt" conversation option with NPCs. If you can successfully taunt someone into attacking you, you can kill them "in self-defense" without incurring a bounty.
* A Pleasant Surprise, both Fluttershy and Midnight have this reaction to each other, given that they haven't met in years. Fluttershy didn't expect him to have grown up to be adorkable, and Midnight had no idea that Fluttershy had gone from cute to amazing.
* A Pleasant Surprise when Fluttershy and Midnight confess their feelings for each other.
* A plot arc for Torisen in his relation to Adric Lord Ardeth in the same book.
* A plot element in the SF short story "The Dead Man's Coffee" by John Possidente is a dispute within a Muslim-dominated space colony over whether humans genetically engineered to be capable of photosynthesis are allowed to do so during Ramadan.
* A plot point early in an episode: Timmy's mom tries to make a pink soufflé, which collapses and turns grey (due to her poor cooking skills, rather than noise). Later, when Timmy makes a wish that everyone and everything were the same, the world goes grey-scale, and everyone becomes identical blobs. Cosmo and Wanda can't find Timmy until he recreates his trademark pink hat using another of his mother's collapsed soufflés, which was supposed to be grey.
* A plot point in one story; Reed Richards encounters an alien able to
* A plot point in the first case. Mia questions why would someone like
* A plot point that was lampshaded several times by the long lived laguz of
* A-plot, since the difficulty of it highlights how reclusive Reed is. Also, eh, some aliens attack at one point.
* a plot twist reveals that the present-day Lancelot has been Cora in disguise all along. She reveals she murdered him long before the events of the episode.
* apocaliptic, shattered the Space Force and the United Earth Government itself;
* APOC all have the Four Horsemen of the Apocalypse trapped within their bodies. Potential possession of the bodies haven't been looked into yet, but it seems like they share their minds, mental states and emotions with their particular Horseman, to an extent.
* Apocalypse adding Origins to the game, combining this civic with the "Void Dweller" origin allows the player to all but completely emulate the Marauders themselves.
* Apocalypse Anarchy: Once everyone knows that the world is about to end, society falls into chaos.
* Apocalypse) and has her image removed from all family pictures that were taken. Also, a fellow police officer who was a Christian was removed from any records of him prior to the Rapture.
* Apocalypse and wears a black bondage cloak instead of his usual, shabby trenchcoat.
* Apocalypse, at first plays it straight, but eventually subverts it. "Hybrids" start with mediocre physical stats in comparison to baselines humans but can, through training, eventually achieve physical stats on par with veteran humans, while also becoming mental gods.
* Apocalypse. Being an immortal mutant shapeshifter with access to alien

technology, he would claim to be various deities in order to more thoroughly dominate whatever group of people he was subjugating at the time.
* Apocalypse, breeding with Kinfolk (humans or wolves with werewolf ancestors) is encouraged, as it produces new healthy werewolves.
* Apocalypse can manipulate living beings, inanimate objects, and to some extent energy.
* Apocalypse Challenge": start with restrictions on everything, then have your Sims reach the top of all careers over the course of several generations, lifting the restrictions as you complete each career. There's also the bizarre "Disney Challenge", where each generation must be played out according to some fairy tale's plotline.
* "Apocalypse Cow": Bart names his calf 'Lulubelle'. Mary suggests he calls him just 'Lou' because he's a young bull. Bart likes it because it rhymes with Moo.
* Apocalypse Cult: A religious cult which attempts to help jumpstart doomsday through terror attacks on the public.
* Apocalypse Cult that became known for the Tokyo sarin attacks. He was totally dedicated to the group and its leader, and worked on both the actual weapons and technology handled and developed by the group and on the completely nutty ideas proposed by the guru.
* Apocalypse Cult: While investigating the legend of a mysterious group of religious people living in the forest, a local news crew becomes trapped in the grasp of a doomsday cult, who are about to execute their final act of devotion and biblical punishment.
* Apocalypse empires, so don't expect your reputation to come out of it unscathed.
* Apocalypse expansion also has a mechanized scorpion for Khornate Chaos Space Marines.
* Apocalypse film series are able to hack into the One Nation Earth television network feed with messages from televangelists such as T.D. Jakes and Jack Van Impe warning the people about the end times and pleading with the undecided to come to Christ.
* Apocalypse film series, Christianity is considered illegal to practice, as One Nation Earth actively hunts down all who do.
* Apocalypse fires green, fast-moving plasma bolts capable of doing serious damage. It debuts at the exit of the first level, right before the Tank boss, and can shred plenty of health away before it's depleted. The same weapon shows up regularly afterwards and it's one of the better weapons available.
* Apocalypse had hair in his youth, but as soon as En Sabah Nur went from slave to conqueror, his standard look became bald.
* Apocalypse has his own evil chancellor in Ozymandias. Old Ozy was cheated of his throne in Ancient Egypt by an upstart time traveler, and after an attempt at revenge made him an immortal living statue, Apocalypse took him on as an advisor and, frankly, slave. The twist is that while he's treacherous it's probably Apocalypse who's more evil.
* Apocalypse have a special rule called "reactor meltdown" which causes them to explode with an even bigger blast that's also strength D (auto wound or penetrating hit on anything in range). An exploding Titan can take every unit on the board with it!
* Apocalypse, having no regard for safety as they only seek to go fasta.
* Apocalypse How: All the various ways in fiction that a doomsday event can happen.
* Apocalypse How event. This machine was used, and, if not for the intervention and sacrifice of Optimus Primal, would have achieved its purpose. Additionally, this device was indeed in orbit long before the arrival of the Transformers.
* Apocalypse How of Nun will re-absorb the ordered cosmos, and of all life only the gods Atum and Osiris will remain in the eternal dark.
* Apocalypse How: Some videos deal with the world ending or transforming into something unrecognizable.
* Apocalypse How: There are many different ways for a doomsday scenario to happen, all of them varying degrees of horrible.
* Apocalypse How: This trope is for categorizing the scope and severity of the

"apocalypse" in question.
* Apocalypse in UPW, who was basically a stand-in for WWE's Kane. In
* Apocalypse is actually created for Warhammer 40K both to encourage the sales of rather obscure models (especially Forgeworld Models) as well as to get older players to dig out their full collection to play with. The game is large enough that most drawbacks are insignificant (normally you'd be afraid of your Grey Knights dying in droves, but that doesn't matter when most weapons can make
* Apocalypse is based on the Eye Of Providence pyramid design of the Great Seal of the United States.
* Apocalypse is fond of pyramid motifs, which makes sense as he was born in Egypt a few thousand years ago.
* Apocalypse is not in fact powered, but simply extremely light. Marsec Armor on the other hand...
* Apocalypse (just as the Khan envisioned), a number of squabbling successor states, an ordinary empire, or the Marauders may revert to their old ways and become simple raiders once more.
* Apocalypse Lane asks for yogurt... because it helps him think. Played straight in the next scene.
* Apocalypse learns the languages and layout just by touching a TV screen and taping into all the broadcasts everywhere.
* Apocalypse Len Parker when he sees that God has supernaturally protected the believers who were put into the incinerator and decides that he will deal with them himself.
* Apocalypse Maiden—unless she's the tragic type the hero is trying to save
* Apocalypse Meow. Vietnamese (North, South and Montanyard tribesmen) are all cats, Americans are rabbits, Soviets are bears, Chinese are pandas, French are pigs, and Japanese are monkeys.
* Apocalypse Nerd centers around two men, Perry and Gordo, who avoided getting nuked by North Korea by camping in the Cascade Mountains. While staying in the cabin owned by Gordo's friend, the owner comes back and holds Perry at gunpoint. Gordo kills him, and it becomes apparent afterwards that the owner was dying of radiation sickness, and Gordo keeps the man's gun for himself. At the end of the story, Gordo goes back to the cabin, now occupied by Perry and his pregnant girlfriend and tries to blackmail her into letting him stay, but she refuses because he, too, is dying from radiation sickness, likely from the stolen gun he kept in his pants. Just as Gordo's going to shoot himself, Perry kills him first, thinking Gordo tried to attack Midge.
* Apocalypse Nerd of the highest order, including survivors killing eachother over resources, killing eachother to eat their bodies, or just killing eachother for the hell of it.
* Apocalypse Not: After the supposed "end" of everything, society has somehow managed to sustain itself, either barely or impressively.
* Apocalypse no Toride, the main baddies at Shouran are all bald;Hitotsukabuto Kiyoharu and Nakazaki Hitoshi and Kyouichi.
* Apocalypse no Toride. The main characters are 4 boys who have so far survived the zombie apocalypse by being in a high security juvenile delinquency prison.
* Apocalypse no Toride. Using his voice, he's able to make the normally slow and mindless zombies contort themselves into a gigantic rock-solid mass capable of moving at disturbing speeds that can trample or tear apart enemies.
* Apocalypse Now, a bulletproof badass who surfs in warzones and enjoys the aroma of napalm like a nice cup of joe. In the Redux edition, however, he's taken down a peg after his surfboard is stolen and he broadcasts messages begging for it back.
* Apocalypse Now, a highly decorated officer (one scene has Captain Willard going over his dossier and marveling at Kurtz's accomplishments) who one day just snapped and went native, becoming as much a cult leader as a soldier, taking his orders from only the jungle as Willard says. However, Kurtz is a unique example, being quite aware that he is in fact a General Ripper. He thinks that if America wants to win the Vietnam War, it cannot afford to "play fair" — it needs "Rippers" to do the dirty work and is acting hypocritically by pretending that the war can be

won "cleanly" with nothing but a technological advantage over the enemy (and history tells us he was right, too). He basically gives his superiors two choices: either get the hell out of 'Nam or become as ruthless as he has become. His final actions indicate that he prefers they choose the first option, or at least doesn't believe they can afford to choose the second.
* Apocalypse Now, although this was absolutely not the original plan. Kurtz was supposed to be a robust and fit middle aged man, but Brando showed up for the role at least a hundred pounds overweight. Coppola compromised by keeping him in the shadows as much as possible, but it's often obvious how obese the man is. It actually works well as it highlights Kurtz has completely let himself go and his pretensions to being a proud soldier are so much wind, much like the Kurtz of the novel.
* Apocalypse Now and then accidentally swallows a bug, referencing an infamous outtake where Brando did exactly that.
* Apocalypse Now and unleash them on Vietnam, winning the war decisively with sheer quality, technological advantage and ruthlessness.
* Apocalypse Now, an initial sign of Kurtz's madness is, as a highly decorated colonel groomed to be a future top general, he threatens to resign his commission unless accepted for Special Forces training — ensuring he'd never make it past colonel (the Green Berets were, at the time, commanded by a brigadier general, and since have become a major general level command).
* Apocalypse Now. Captain Willard is badly hungover when soldiers turn up to escort him to where he's going to be briefed on his upcoming mission, so they just drag him into the shower and turn on the water full blast.
* Apocalypse Now, Captain Willard (Martin Sheen) alludes to Lieutenant-Colonel "I love the smell of napalm in the morning" Kilgore (Robert Duvall) as falling into this trope. Arguably he comes across as more of a Cool Uncle or Older Brother.
* Apocalypse Now. Colonel Kilgore "turning on the music" as his helicopters are about to attack.
* Apocalypse Now doesn't act like a normal man surrounded by gunfire and explosions. "I love the smell of napalm in the morning."
* Apocalypse Now: For some scenes of Benjamin Willard that were filmed after Martin Sheen was temporarily incapacitated in production by a heart attack, his brother Joe Estevez was used as a body double.
* Apocalypse Now for these and other bits of Wagner that you never knew you knew.
* Apocalypse Now goes AWOL and attempts to set himself up as a god among a group of locals.
* Apocalypse Now has an increasingly surreal and downright disturbing atmosphere throughout its duration.
* Apocalypse Now has a restored scene in which Willard and his crew steal Kilgore's surfboard, and Kilgore sends helicopters in pursuit for several days.
* Apocalypse Now having a heart attack due to the stress from filming, suspending filming of all his prominent scenes and making his brother double for him.
* Apocalypse Now: "I love the smell of napalm in the morning. Smells like victory."
* Apocalypse Now in the morning," but other than that the resemblance is, if not uncanny, at least enough to make one think.
* Apocalypse Now" is blasted over the speakers of the choppers as Kilgore's forces attack a village controlled by Viet Cong.
* Apocalypse Now. It comprises almost all the footage Francis Ford Coppola had shot in production, and can still be found circulating around the Internet (in very rough form).
* Apocalypse Now, it's why the Vietnamese are disciplined and committed while the American forces are falling apart. It's really hammered home in the Redux when Willard arrives at a vestigial French plantation who view their situation as this, because they arrived in Vietnam and set up a rubber plantation with the Vietnamese as labor, which they held for generations. As a result, they consider Indochina as their true home, as opposed to France.
* Apocalypse Now, Kilgore not only personally flies the lead helicopter into the attack, it's shown he's a pretty darn good pilot and an excellent shot.

* Apocalypse Now, Kurtz's monologue suggests he suffered a breakdown after Vietcong guerrillas came into a native village and hacked off the left arms of South Vietnamese children who had been inoculated against polio by Kurtz's special forces. This epitomized everything that was going wrong (in Kurtz's point of view) with the American war effort: over-reliance on science; cultural ignorance; blundering efforts at "humanitarianism" to win over the Vietnamese, which has the exact opposite effect. Nothing short of total destruction will work.
* Apocalypse Now" playing to intimidate the enemy, all so that they could surf on the beach for that day. Naturally the Vietnamese suffer plenty of fire from the helicopters and the men on the ground but the climax of the battle comes when Colonel Kilgore calls in a massive air strike that obliterates the opposition. As Kilgore watches this he famously expresses how much he loves to kill things with fire, even going so far as to reminisce about a massive air strike he witnessed during an earlier battle during the Vietnam War where he marveled at all the destruction that the bombs caused, remarking to Captain Willard and Private Lance:
* Apocalypse Now playmates rather than singers, and their presence causes a riot.
* Apocalypse Now saw the Photojournalist shot dead by Captain Colby (whose part was mostly cut, even in the Redux version), whom Willard kills via knife to the chest.
* Apocalypse Now's chagrin, that's all he did to prepare for the part. He was supposed to lose weight for the role of Kurtz, but he showed up extremely obese.
* Apocalypse Now series, were filmed in the Philippines, which has jungles, needs money, and most importantly, uses US military equipment. The Armed Forces of the Philippines often lent vehicles and aircraft such as F-5s and Hueys to the film makers in place of American military vehicles and airplanes.
* Apocalypse Now (starting at three minutes) about the German conquest of Kreta in 1941.
* Apocalypse Now-style narration in "Hearts of Twilight", one that shows him and his sibs on the hunt for a rogue movie director. Amusingly, Yakko describes his journey across the Warner Brothers studio lot as if it really is like war-torn Cambodia - and when his party reaches the director, his minions behave a lot like Colonel Kurtz's deranged followers.
* Apocalypse Now). The characters encounter increasingly primitive conditions the further upriver they go, to some extent becoming more primitive themselves.
* Apocalypse Now. The movie was released in 1979, ten years after Coppola conceived of it and forty years after Welles' initial plans to adapt the novel.
* Apocalypse Now. The two guys who get startled by the tiger still manage to get a chuckle out of the incident once they're back in the boat.
* Apocalypse Now, this is Willard's shtick in the military. He has a history of at least three assassinations, but is uneasy about having to terminate an American, an unprecedented task.
* Apocalypse Now through Vietnam and into Cambodia. The jungle is depicted as an active threat to the American characters' minds, although the only actual danger it directly poses is a brief scene in which they are stalked by a tiger, but manage to escape with no loss of life.
* Apocalypse Now throws "Death cards" with the emblem of his Air Cavalry Regiment around corpses to let the Vietcong know who killed them. As he complains to his XO, none of the kills are even notable enough to earn a jack.
* Apocalypse Now" to intimidate them and then they rain fiery death down upon them and as the helicopters land to let the men down onto the ground one of the helicopters humorously has "Death From Above" stamped on its nose. The battle goes well enough but Kilgore gets frustrated, that the enemy are being so persistent as he would just like to go ahead and surf the beach already, and decides to call in a massive napalm strike to end the battle. When all is said and done Kilgore temporarily forgets about the surfing and in the ecstasy of the moment notes how much he loves to watch explosions like that famously saying, "I love the smell of napalm in the morning (...) It smells like victory."
* Apocalypse Now: Willard comments that the members of the boat transporting him are this:
* Apocalypse Now, Willard is in a very similar state and mentions how he couldn't

adjust to life at home. Worse still, he's clearly not satisfied with living in the Vietnam War, becoming even more of a stranger to it by the end.
* Apocalypse Now with the playmates. Beneath the first impression of being a couple of pretty, braindead bimbos, one of them shows true enthusiasm for ornithology and the other has a deeply complicated and troubled personality... None of which the soldiers care about, as they're so tired, desperate and horny they'd much rather let the playmates babble about their lives while they dispassionately have sex with them.
* Apocalypse Now, with Willard reflecting that "(Charlie's) idea of great R&R was cold rice and a little rat meat." during a USO show. Also the scene in the Director's Cut where the main characters trade their fuel for some private time with Playboy models.
* Apocalypse of Mega-Primus against the extra-dimensional invaders. Meanwhile, the actual policing and all emergency services are handled by Megapol, a security company contracted by the city.
* Apocalypse of the Dead: These are runners created by a combination of the bubonic plague, ammonia and benzene.
* Apocalypse One Nation Earth logo, which is based on the Eye of Providence pyramid design of the Great Seal of the United States, tends to pop up everywhere during the Tribulation.
* Apocalypse real, but actually the power of the Antichrist working within the program itself.
* Apocalypse Rising", an undercover Sisko punches out a Klingon warrior after he brags about beheading the Tellarite first officer of a Federation ship, before ripping the Benzite captain's breathing apparatus off so she'd slowly suffocate. Sisko knew the captain personally.
* Apocalypse series, virtual reality technology is being developed, as demonstrated to the protagonist by Willie Spino, a computer whiz in a wheelchair. The Antichrist offers a form of the tech that makes the virtual real, letting the blind see in real life and letting Willie walk again if they turn to his side.
* Apocalypse's facial structure means he does this naturally, in fact the few times he does smile he looks creepy.
* Apocalypse showed that he would long outlive the X-Men and continue to ravage the world in the distant future. Even when he's apparently erased from existence he finds a way to come back. Since he only appeared once a season, however, this trope added to his appeal since he never suffered overexposure.
* Apocalypse, simply blowing up a building with demolition charges or chucking enough explosives at aliens will mostly always do the trick.
* Apocalypse's, killed so that he could steal the man's identity in order to get close to the Submariner.
* Apocalypse sometimes do away with this, but in the comics, it's as close to a constant as character traits in comics get.
* Apocalypse superweapon, though if you colonize it immediately afterward there will be a habitability penalty due to lingering radiation.
* Apocalypse that enhances his already formidable superpowers and possibly grants him new ones.
* Apocalypse that is wholly devoted to the Wyrm. The fetus doesn't necessarily damage the birth mother... at first. But having a baby with a Bane for a soul can inflict the worst case of peripartum depression ever, as the mother starts to suspect that her pregnancy isn't natural and there's something wrong with the kid. And if she should actually act on those urges and try to terminate the pregnancy, when the Ferectoi comes to term, it usually repays those sentiments tenfold, crippling if not killing the mother during birth.
* Apocalypse) that the rate of Garou births in their established families, one in ten, is the same as the oft-cited estimate of the percentage of gay people in the general population.
* Apocalypse. The agent relents when he senses the presence of a Christian (Eileen) in the room.
* Apocalypse, the crew uses this on their unsuspecting volunteer, Steven, to make

him think that a meteor strike is imminent.
* Apocalypse: The Haters, which is One Nation Earth's name for underground groups of persecuted Christians during the Tribulation in this film series.
* Apocalypse: The world's first mutant is originally from Africa (specifically Egypt, thousands of years ago. The Arabs didn't overrun Egypt until the Middle Ages.) His mutation, however, had as its first visible effect, abnormally pale skin. Later on, he also got some cybernetics and got betrayed, imprisoned, and mummified by his own followers.
* Apocalypse, Thorold Stone investigates a bomb explosion that killed a bus full of school children, believing it to be the work of the Haters (the One Nation Earth's name for the group of underground Christians that emerged during the Tribulation), but it turns out to be an inside job by One Nation Earth agents.
* Apocalypse. True to form for organizations of this type, they claim credit for a wide variety of historical disasters and upheavals.
* Apocalypse types, albeit smaller in size, but attacks in far larger numbers. One room even have tubes that drops spare robots after you destroyed most of them.
* Apocalypse was the in-universe inspiration behind several historical deities, including Set (Egyptian God of Disorder & Violence), Sauru (a demon from Persian Mythology), Huitzilopochtli (Aztec God of War & Sacrifice), and the Kali-Ma (a Hindu deity known as "The Dark Mother").
* Apocalypse when he isn't convinced that there is a God other than the self-proclaimed Messiah Franco Maccalusso, which he doesn't believe is God either. He later gets his sign from the real true God when he and several other Christians get sent into the furnace and are supernaturally protected from the flames.
* Apocalypse when inside the Day of Wonders virtual reality program is subjected to a virtual beheading, or in some cases another form of death like a lethal snake bite, which causes the victim to die in reality.
* Apocalypse, when young Eileen carves her name and those of her brothers Thomas and Calvin into a tree and then afterwards prays to God for the tree to continue standing as a landmark for when any of them would lose their way. Later on in the movie, Tom as an adult during the time of the Tribulation would find the tree still standing with their names still etched in it, and there meets up with his brother-in-law Jason Quincy who is also on the run from One Nation Earth.
* Apocalypse, which lets a commander roll three dice and choose which two to use for a Leadership test. The rules explicitly state that a commander choosing the two higher dice to fail the test is ordering his troops to withdraw.
* Apocalypse. While the first film is basically a rip-off of those, the three sequels' focus on supernatural elements (and C-list talents' performances) make them rather entertaining.
* Apocalypse World and Hardholder classes even have moves letting them use the same stat for exercising authority and kicking ass.
* Apocalypse World, every PC has a 'History' stat for every other PC, which indicates not their feelings towards that character, but rather how well they understand them. This stat is rolled against whenever a player wants to help (or hinder) another's roll. It's initially set by choosing options during character creation which determine certain feelings or past events, and after that is altered by how you act - if you heal someone you understand them better, if you hurt someone they understand you better.
* Apocalypse World (or four, with upgrades) that has its own stat block and can essentially be used as a weapon in high-speed combat.
* Apocalypse World, stunning everyone nearby and freaking the Faceless out.
* Apocalypse World with another character hits either top or bottom, it resets to almost neutral and you get experience.
* Apocalypse would've voiced an A.I.-controlled partner who assists the player throughout the game. The developers decided to ditch the original protagonist and simply turned Willis' character into the player character with the rationale "why would anyone want to be Bruce Willis' sidekick when they can be the man himself."
* Apocalypse Zero, Kakugo can't remain clothed, and will even strip naked to battle most of the enemies of the series.

* Apocalyptica is an angry song from the perspective of an ex-victim of one of these.
* Apocalyptica's "Anything But Love" doesn't even pretend for a moment to be a love song. lyrically the song details a female character talking to the man who is going to rape her. She essentially tells him to be as cruel and evil as he wants ("Go on infect me, go on and scare me to death.") and make sure she is traumatized and scared. Because she'd rather that than have him love her.
* Apocalyptic Gag Order: An apocalyptic event is on the way but the government denies it or keeps knowledge of it under wraps.
* Apocalyptic Gag Order: One or more world governments are aware that the apocalypse is coming, and they're trying to stop it—but no one else is allowed to know.
* Apocalyptic Index: Tropes about catastrophic events that result in tons of people getting killed, often to the extent that civilization as we know it is done for.
* Apocalyptic Jewish and Christian predictions often included Final Battles. The expectations of such battles often influenced the way actual wars were carried out.
* Apocalyptic Log: A diary, journal, or other records made by someone which details how something they witnessed went terribly wrong. It may even end just before their own demise.
* Apocalyptic Log and warn other travelers away. Naturally, they don't get to read or listen to the whole message until they arrive.
* Apocalyptic Log: Before a civilization is destroyed, someone leaves behind a recording detailing the events of the disaster before they meet their end.
* Apocalyptic Log: During or leading up to "the End", a character records their thoughts.
* Apocalyptic Log has a scientist, undergoing transformation into a zombie, muttering in his last log before complete zombification "God, why" about a dozen times.
* Apocalyptic Logistics can consistently get hold of effective weapons and what not after modern infrastructure is no more, but isn't it badass to see your favorite characters duke it out with some abandoned tanks, and manage to find just enough fuel for them too?
* Apocalyptic Logistics: The total loss of imported goods and resources (oil, clean water, etc.) is only a minor inconvenience for everyone.
* Apocalyptic Log: Pretty much every video of this genre inevitably turns into one.
* Apocalyptic Log: Quite a few creepypastas consist of a dying survivor describing a disaster that's killed everyone else.
* Apocalyptic Logs is from Bill McDonagh, a plumber hired for the construction of Rapture. After being paid to use cheaper tin pipe fittings instead of brass, he went ahead and ordered brass anyway and planned to pay the difference on grounds of professional pride: "Profit or not, no man bails water out o' privies built by Bill McDonagh."
* Apocalyptic Log: Someone finds a recording at a ruined area with no survivors that explains the cause of the death and destruction everywhere.
* Apocalyptic Log" somewhat inaccurate). Where they're plague-bearing is the fact that the toxin can be transmitted through saliva via a bite. This also begs the question of whether or not they're actually undead or just insane, crazy rotting cannibals.
* Apocalyptic Log to become mindless undead, and the account by the spectator mentions the champion and the prisoner cutting each other repeatedly with neither being able to die.
* Apocalyptic Montage: Montage of several landmarks leading up to, during, or after the world-ending catastrophe.
* apocalyptic movie (1961) the rising heat levels create a black market in water, and one character catches typhoid from it.
* Apocalypto, as Jaguar Paw knew it was there and could well have headed there intentionally.
* Apocalypto: Happens when the protagonist's jungle village is razed to the ground by Mayan slavers.

* Apocalypto has a similar feel to it. The main character is running scared through much of the movie, although by the end, he makes a stand.
* Apocalypto: "I am Jaguar Paw, Son of Flint Sky. My father hunted this forest before me. My name is Jaguar Paw, I am a hunter. This is my forest, and my sons will hunt it with their sons after I am gone. Come on! COME ON!!"
* Apocalypto in a Mayan city, he is also reunited with his wife and children. The problem? The Spaniards have arrived to Yucatán, and we all know that in a few years they will overrun the entire peninsula, subjugating any people they encounter.
* Apocalypto Jaguar Paw attempts to evade pursuit by leaping over a waterfall. His pursuers do follow, although one of them is killed in the attempt.
* Apocalypto Jaguar Paw is impaled on a javelin while running away from the Aztec city; he PULLS IT OUT, RIGHT THROUGH HIS BODY and carries on running.
* Apocalypto Jaguar Paw kills Zero Wolf by impaling him on a set of spikes originally set to kill a wild boar.
* Apocalypto. One of the captured villagers loves his wife so much, that he'll embrace Hell with a smile as long as she's not there to share such a fate.
* Apocalypto, Seven (who is trapped in a cave of sorts) physically shows the distress he is experiencing and reminds him to "come back" to her. When Blunted wishes Jaguar Paw to "journey well", Jaguar Paw responds with "I can't go now".
* Apocalypto, the jungle village of the protagonist gets razed to the ground by city Mayans, and its inhabitants are captured as slaves and human sacrifices.
* Apocalypto, the Mayan slavers play a sadistic game where they allow their prisoners to run away. The first few run in a straight line and get shot with arrows. The next few run in a zigzag, but get hit eventually. Jaguar Paw is the only one who escapes.
* Apocalypto the protagonist falls into a quicksand pit, but he manages to escape, signifying his prophesied "rebirth from mud".
* Apocalypto time: "I am Jaguar Paw. This is my forest. And I am not afraid."
* Apocalyptour, Meredith Stepien staying behind after the show ostensibly ends to sing "The Coolest Girl in the World" directly references this. Possibly Foreshadowing eventually producing a female-centered musical starring her and Lauren Lopez.
* Apocamon which are creatures from the Book of Revelation Pokémon-style.
* APOC, for a price. Sometimes she'll divulge information if she's feeling charitable, but that's a rare enough occurrence.
* Apoch and Astreal Ezrana have a reputation as being "the perfect shield and the perfect sword." Said reputation starts to become an
* APOC has black eyes. She's not sure how she got them, but they seem connected to be connected to hosting the Horseman of Death within her.
* A Pocket Full of Rye as the baddie, who starts off quite charming and apparently ill-treated by his father, so this may have been an intentional attempt as misdirection given his previous roles.
* Apocolypse Rising the character's attempting to prove that Gowron is a changeling mole, infiltrate a Klingon awards ceremony. Naturally this is a gathering place of heroes from another story.
* Apocrypha asks why they can't hide a downed UFO at Area 51 and the Cigarette-Smoking Man responds that it's too insecure due to "heightened public interest."
* Apocrypha expansion has given us a glimpse of some of the old technology which the precursor humans left behind: the sleepers. Ancient drone ships guarding long forgotten structures packed with technology that makes the most advanced player ships and weaponry look like we're using BB guns to fight enemies with nukes. The technology that has been scavenged so far has allowed the playerbase to build relatively small cruisers with the firepower and defenses equal to and even beyond battleships. It will be a terrifying day when we can finally build new kinds of battleships with sleeper tech.
* "Apocrypha" has a specific meaning in terms of biblical studies; it refers to Old Testament books present in Greek sources (such as the Septuagint) that aren't present in the Masoretic Hebrew Tanakh. It does not, however, imply any criticism

of the text, even from a religious perspective; indeed, some "Apocrypha," like the Books of Maccabees, are considered to be of great historical interest by those who leave them out of the canon, and in some cases there is not even a religious quarrel with the contents of the non-canonical text (for instance, neither Protestants nor Jews regard 1 Maccabees as having any objectionable doctrinal content—unlike 2 Maccabees, which they have numerous doctrinal quarrels with while accepting some of the historical details it preserves). It is further distinguished from the "Pseudepigraphia", a further set of books found neither in the Tanakh nor the Septuagint, but preserved by the Beta Israel (the Ethiopian Jewish community) and the Ethiopian Orthodox Church, whose historical information is debated, but whose religious content is consistent with Oriental Orthodox doctrine (the non-Ethiopian Oriental Orthodox churches, like the Coptic Orthodox Church of Alexandria, do not accept the "Pseudepigraphia" as biblical canon but are in full communion and doctinal agreement with the Ethiopian Church).
* Apocryphally a sting operation once used a machine that took in pieces of green paper and spat out perfect $20 bills. The secret, of course, was that the "green pieces of paper"
* Apocryphally, Lilith. The first woman created by God, made of dust (like Adam) instead of being made from part of Adam. She wanted to be treated as Adam's equal but her strong will caused a bunch of relationship troubles, so they got divorced and God settled for a more passive production-model woman in Eve who would be more supportive (and/or more subservient) to Adam. She's also something of a
* Apocryphally, this ended up backfiring somewhat when one Guantanamo inmate turned out to be a huge metalhead and took to singing along. Maybe they should have broken out a copy of
* apocryphal) story from the early days of the studio tells of a staff party where a cartoon was shown of Mickey and Minnie Mouse in an x-rated scene. Afterwards, Walt chuckled along with everyone else, invited the two guys who made the cartoon to come up and be recognized... and then fired them on the spot and ordered the film destroyed. Other versions of the story suggest that it was Snow White and her dwarfs having an orgy in the film which was shown at Uncle Walt's birthday party.
* Apocrypha No 25-26. Animals evolved among humankind ruins. The evolved civilization is fairly modern (although no advance tech such as computers are seen) and is slowly learning from the technology that humanity had left behind. Unfortunately, they are getting humanity’s bad habits and may go down the same road to destruction.
* Apocrypha one on one. Even assuming Reika and her Servant defeated the Black Faction, they'd have no way to claim the Grail since it's on the Hanging Gardens of Babylon, a mobile flying air fortress guarded with extremely powerful magic.
* A podcast interviewing Julianne Buescher, who pupeteered Denise, Kermit's new girlfriend in the ABC series
* A poem by Shel Silverstein has the pirate captain Jim say this to a young boy, who responds, "But Captain Jim, I cannot swim." The pirate captain tries to come up with other suitable punishments for the boy until he decides to make him a captain.
* A poem penned in the 4th Century by the Christian apologist and staunch anti-pagan Prudentius accuses the priests of the Magna Mater of bathing in bulls' blood in the rite of taurobolium.
* A "Poffin-making" game consisting of making circles with the stylus, adjusting the speed and direction in reaction to signals on the screen. The main purpose of this is to make your 'mons perform better in one phase of the contests.
* Apogee Software game featured a different take on their theme and logo.
* A poignant final line in his first (and, for over a year, only) appearance led a fair chunk of the
* A point of order has been brought before the court. While Adama mentions that the natives were tested for genetic compatibility before the "back up plan" was even possibly considered as an option, the sample size is not known. Further, any concept of informed consent for this is clearly an impossibility as the natives were faced with beings with powers and abilities far beyond their comprehension, all of whom likely took samples of blood and other bodily fluids. This means that

the Cylon and Battlestar humans' "master plans" of ending the war by stripping the Battlestar humanity of all technology and leaving them marooned on the back-water world later known as "Earth" not only introduced untold numbers of genetic defects when the inevitable cross-breeding occurred, but likely created all sorts of blood-letting cults and religions due to the mistaken belief that the "supernatural" entities that came visiting 140,000 years ago came solely for the purpose of harvesting their blood, organs, etc, and offering these body-parts up as a sacrifice would bring the "gods" back.
* A Pokévision of Things to Come!, this is lampshaded when Serena is charred black by Clemont's camera robot exploding, ruining her look for the camera and leading her to change into a new Fennekin-inspired outfit instead.
* A Poke in the Eye With a Sharp Stick with Sergei Nemirovich, the financial director of the the theatre. Nemirovich is a gorilla and keeps suggesting that Chekhov find some way to work a gorilla into the plot. A Type 3.
* Apokolips and New Genesis and Highfather gave each other their sons to ensure a truce, but it never keeps.
* Apokolips, where daily life for its billions of enslaved and brutalized denizens revolves around the endless, eternal worship of the resident despotic ruler and
* Apokoliptian New God Steppenwolf (and by extension, his master Darkseid) in
* A Polar Bear In Love: When Seal tries to escape from Polar Bear during his nap, Polar Bear immediately panics and violently slams his claw against the ice. It was unintentional, but it was enough to traumatize Seal.
* A Polaroid commercial sees a boy use the titular camera to try and prove that there's no monster under the bed. Turns out there is.
* A police investigator asks a New Russian: "Do you have an alibi?" - "Yes, I do. Can I pay in foreign currency?"
* A police officer, a group of police officers, or a police car are substituted for the jail to apprehend the villain.
* A police officer smacks a man around with a copy of the Yellow Pages in
* A police officer who was the leader of a British charity was replaced by his twin brother after he was killed in the line of duty.
* A police video, consists of a perpetrator arrested for a barroom brawl chanting "False arrest! False arrest! False arrest! False arrest! Victim assaulted! Victim assaulted! Victim assaulted! Yes or no? Yes or no? What is my charge? What is my charge?" etc.
* A Polish man named Jan Grzebski fell into a coma in 1988 and woke up from it in 2007, by which time Communism had long since collapsed. Of the experience, he said "When I went into a coma there was only tea and vinegar in the shops, meat was rationed and huge petrol queues were everywhere. Now I see people on the streets with cell phones and there are so many goods in the shops it makes my head spin."
* A political advertisement used the Historical Footage variation, starting with
* A political sketch on German TV featured a strange auction: prices went down. Punchline was that the unemployed bid on the payment for a job. This was decades before "My Hammer" and the likes. For "standard" jobs, the thought is still a satire, but turbo capitalism marches on...
* A political version for Americans. Get used to the post-2000 color schematic for presidential elections (red for Republicans and blue for Democrats). Now, go to any site which uses the pre-2000 schematic (blue for Republicans and red for Democrats), like
* Apollo 11 but not flown, from the Smithsonian for testing. There are no plans to fly the old engine but it will help the development of an upgraded version for use on the Space Launch System.
* Apollo 11. The montage is introduced with footage shot by the astronauts of their tape recorder floating in microgravity and playing a mixtape they brought with them, which transitions to a less crackly non-diegetic version of the song which plays over the montage. At the end of the montage, it transitions back to the tape recorder footage and diegetic music.
* Apollo 11 This 2019 documentary uses a lot of drones, especially in the section leading up to the launch. This may be to give a modern audience some of the tension

that would have been felt back in 1969. We know now that the mission was a success, but every step had a non trivial risk of death, and everyone involved would have been very aware of this.
* Apollo 13, after being told that Ken Mattingly is scrubbed from the mission two days before liftoff because he has been exposed to measles and might get ill during the flight, Jim Lovell doesn't react well.
* Apollo 13, after one of the NASA guys says this could be the biggest disaster NASA's ever experierenced.
* Apollo 13, after the astronauts have (with great difficulty) brought their damaged spacecraft around the moon and have detached the command module for reentry, they are able to make a visual inspection of the damaged service module and report what they see. At first this seems to be of only historical interest, since they've already discarded the service module and it no longer matters how much damage it took... until they realize the damage might not have been limited to the service module.
* Apollo 13, after they are too damaged to land on the moon and just getting back to Earth will be hard enough, flight commander Jim Lovell imagines himself touching down, leaving perfect tracks, running his fingers through the moon dust, and gazing at the distant Earth. He really wanted to be there (Lovell had been on Apollo 8, the first mission to orbit around the Moon; he is the only astronaut to visit the Moon twice but never land on it.)
* Apollo 13, almost. Plans for a burial-at-space, similar to a burial-at-sea, were made to be performed in case of a disaster, but fortunately, the crew survived. If the unthinkable did happen, they would probably have read out an edited version of the
* Apollo 13 American senator being shown round the Apollo assembly building.
* Apollo 13), and a good deal of the dialogue in Mission Control and in the spacecraft is based directly off the original recordings and transcripts. There is some dramatic license taken (such as an argument aboard the lunar module that never actually happened on the real flight), but the important points of the film stay very true to the actual events in real life.
* Apollo 13 as the crew's plight was a major news item at the time, with former CBS News Anchor Walter Cronkite providing the opening narration, which was in the form of a new clip (confirmed by director Ron Howard in the DVD commentary) and archive footage of actual news breaks was mixed in with scripted ones throughout the film.
* Apollo 13. At the beginning of the mission, the music was full speed, everyone was happy, and all was right with the world. By the time the tape recorder was running out of battery power, the astronauts were in serious trouble.
* Apollo 13 depicted zero gravity the hard way: by building spacecraft sets in the NASA zero gravity training aircraft (the Vomit Comet) and filming in it for a month. Far from all of the scenes inside the spacecraft were done this way; a lot of it was done with harnesses and bellyboards and careful framing.
* Apollo 13 discovered midway to the moon that a malfunction had occurred, requiring them to return to Earth immediately, through a terrifyingly narrow re-entry window. If the re-entry attempt had gone wrong, the astronauts would have been either burned alive or stranded in space.
* Apollo 13, during the astronauts' broadcast from deep space, pilot Jack Swigert casually mentions that he forgot to file his taxes before the April 15th deadline. Sy Liebergott comments, "That's no joke, they'll jump on him!" (Later in the film, well into the in-flight emergency, they tell him he got an extension to file his taxes because he was "most definitely out of the country.")
* Apollo 13, during the scene where Jack is reactivating the Command Module, we briefly glimpse a piece of paper over a panel in the cockpit, simply marked "NO!". When Lovell later asks him about this, Jack admits that he'd been getting "punchy" and put that on to keep himself from accidentally jettisoning the LEM (Lunar Excursion Module) while the other two were still in it.
* Apollo 13, Fred Haise has been using the cabin repress valve, which causes a sharp banging sound, to mess with the other astronauts. When the oxygen tank explodes and the entire ship starts shaking, he rushes in saying, "That's no

repress valve!"
* Apollo 13, Gene Kranz is the only flight director seen running Mission Control throughout the film. In real life, he was on rotating shifts with two other flight directors throughout the mission.
* Apollo 13 had barely enough power to run the instruments in the capsule, plus the explosion of one of the oxygen tanks may or may not have damaged the heat shield. If it was damaged, the ship would burn up on re-entry, and there was no way to get out and fix it. Plus, the crew was sleep-deprived, had spent four days in near-freezing cold, and one crew member was running a high fever due to a kidney infection.
* Apollo 13 has Marilyn Lovell lose her wedding ring down the shower drain. This actually happened to her in real life, but she was able to recover it.
* Apollo 13 has several moments where, after the astronauts and mission-controllers explain the situation to each other in their own jargon, they repeat it in simpler terms for the sake of the audience — usually in the form of an analogy.
* Apollo 13: "Houston, we are venting something out into space." All the frantic discussions in the spacecraft and Mission Control stop dead upon hearing Jim Lovell make that announcement.
* Apollo 13 include murder, and all three returned safe and free of CO2 poisoning.
* Apollo 13 includes some comments from Commander Lovell about this mission.
* Apollo 13 is a non-multiball example, with the pivoting crane being such a well-liked gimmick that many step up to the machine just to be able to hit the weight at the tip of the crane's arm again and again.
* Apollo 13 is included as supplementary material, with footnotes noting differences between the script and real life. One footnote says: [Here is how the movie departs from the actual mission: Jim Lovell's Corvette was actually blue.] It seems odd including Lovell's Corvette as an actual part of the mission.
* Apollo 13: Jack Swigert gets the call that he's going to the moon during what's obviously shower sex.
* Apollo 13: Jim Lovell's youngest son, Jeffrey, asks his father about his upcoming mission, i.e. how long it'll take to get to the moon and the function of the lunar module. Jim also explains what went wrong in the Apollo 1 disaster, briefly depicted in the beginning of the movie.
* Apollo 13 Jim Lovell/Tom Hanks relates a time when his airplane lights went out and he had to follow the trail of luminescent algae leading back to his aircraft carrier.
* Apollo 13, Ken Mattingly turns off his television just as the "Special Report" graphic appears. He goes to bed and misses the report on how the space mission is in danger.
* Apollo 13— he turns the TV off to go to bed and only finds out when NASA sends someone to his house (he'd also taken his phone off the hook).
* Apollo 13-mission briefing, where Gene Kranz calls together his teams to inform them to forget the flight-plan; all of their careful planning is in the toilet and they are improvising a new mission from scratch, the sole objective being the safe return of Apollo 13 to Earth. Naturally, the overhead projector he starts using to illustrate this shorts out, leaving him with nothing but a blackboard, a room full of brilliant engineers with severely conflicting ideas on what to do next, and his own determination: "Failure is not an option!"
* Apollo 13 of Apollo 13. His wife doesn't say a lot, but Jim talks about the differences between the movie and the events, and the similarities. If you are a space nerd, the commentary really makes you feel like a witness to history.
* Apollo 13 probably comes closer to this trope than any other film based on a true story.
* Apollo 13's best scientists must devise a way to keep a crew of three men alive with the resources to support two on the lunar module until their trajectory brings them back to Earth.
* Apollo 13 (set in 1970), Jim Lovell's wife Marilyn brings two of Jim's work buddies (who the audience hasn't seen yet) to watch over Jim's old mother Blanche, and distract her from the TV in case that reentry fails and Jim is killed.

* Apollo 13: specifically Jim Lovell, Jack Swigert, Fred Haise, Gene Kranz, and John Aaron. Surviving multiple life support system failures in space, jury-rigging a system to keep themselves alive, and managing a successful return landing with all aboard surviving.
* Apollo 13 takes place in NASA's Houston mission control centre, and, as in the real event, the operators there were just as much heroes as the astronauts were. The recreation was so good that one of the consultants, a NASA employee, kept forgetting it was only a set and looking for the elevator at the end of the day to leave for home, just like another "real" day back in Houston.
* Apollo 13, the explosion accurately depicted the real life event, except for the spacecraft careening about from said explosion. The venting of a leaking oxygen tank kept pushing them about for a time.
* Apollo 13. The flight surgeon at the control room freaks out when the astronauts' monitors flatline, but they hear their voices through the radios fine, and the director assures him that the astronauts simply took their medical leads off. "A little medical mutiny" because they've been under a lot of stress and are tired of hearing the operators fuss about their heart rates.
* Apollo 13: The service module is too damaged to fire for a direct abort, and the lunar module engine doesn't have enough power. Only a slingshot maneuver around the moon, assisted by the lunar module engines, can get them on a course for home.
* Apollo 13 the teenage daughter's radio was playing during almost every scene they showed Lovell's family, clearly to sell yet another late '60s/early '70s classic rock movie soundtrack.
* Apollo 13. This is much like real life, apparently, especially in the Mission Control of the 60s and 70s.
* Apollo 13, this is where Jack Swigert is when he gets the call telling him he's become part of the flight's main crew.
* Apollo 13 This time they aren't, and he's able to switch to polite-and-professional mode before answering. The first one actually happened, the second was made up by the film makers. Another, more serious live-mike mistake Lovell actually made on that mission: "Well, I'm afraid this is going to be the last lunar mission for a long time..."
* Apollo 13 uses Norman Greenbaum's "Spirit in the Sky" for its Jackpot theme.
* Apollo 13 was launched by NASA in 1970 as the planned third manned mission to land on the moon. An explosion in the oxygen tank of Apollo 13's service module rendered the spacecraft's core systems and main propulsion engine inoperable. Forced to rely on the limited power of the command and lunar modules, Apollo 13 used the Moon's gravity for a circumlunar return.
* Apollo 13, when the crew responds after entering the atmosphere. In the real event, they didn't because they knew they weren't out of the woods yet: The capsule still had to splash down.
* Apollo 13, which had been shut down following the explosion days before.
* Apollo 13, with Buzz Aldrin asking where they got such good stock footage of a Saturn V launch. One NASA technical advisor left the set one day looking for an elevator (the set of Mission Control was on the ground floor, while the real Mission Control in Houston is on the 2nd floor of the building it's in).
* Apollo 13. You already know how it ends. And you probably already know the gist of how three astronauts and their thousands of support staff on the ground cooperated to get a crippled spacecraft back to Earth. What the movie gives you is the chance to watch how they do it.
* Apollo 14 used a ram maneuver when docking with the lunar module en route to the moon. The first couple of times, the probe on the front of the command module didn't properly engage during initial contact, and it was feared an abort might be necessary. A last ditch method of coming in hard and faster than usual was tried, however, and that gave the crew time to engage the latches and manage "hard dock", the final connection of the two spacecraft, without having to worry about the usual softer initial dock at all.
* Apollo 18, all radio communication can be eavesdropped in by radio amateurs who just turn their receivers to the moon. Exactly this happened during the real moon

landings.
* Apollo 18-esque premise, is entirely portrayed as found footage from a 1970s space mission, with all the accompanying film grain and video artifacts.
* Apollo 18, one of the symptoms of the parasite infection is a red ring around the host's irises.
* Apollo 1, the crew of which died when a fire started in the cockpit during a test in 1967.
* Apollo 440's song "Disco Sucks", the singer runs into this at a disco club.
* Apollo 440's song "Liquid Cool" dealt entirely with using cryogenics, or "liquid cool", as a way of achieving immortality.
* Apollo 440's songs exhibit this trope, e.g. "Can't stop. The rock. Can't stop the rock... Come get down and dirty baby. Come get down and dirty baby..."
* Apollo and Athena. A magician in the second case mistakenly assumes they're a comedy duo practicing their "old married couple" routine when they were actually just conversing and interacting like they normally do. Apollo and Athena are both shocked that this is how they appear to others.
* Apollo and Klavier are this, starting the first time they encounter each other in court.
* Apollo and Starbuck are a looping On-Off-Couple/Friends. When the fleet reaches New Caprica however
* Apollo and Starbuck each have quite a fangirl following as well during
* Apollo and Starbuck have a secret relationship after Apollo is married to Dualla and Starbuck is married to Anders.
* Apollo and Trucy, the protagonists themselves, although they don't know they're half-siblings. They do have some similarities, but Trucy is optimistic, a little naive, and extroverted. Apollo, on the other hand, is more cynical, sarcastic, and is more reserved around people than Trucy is.
* Apollo being bisexual. Apollo states that he is also attracted to men.
* Apollo being the god of healing, his demigod children serve this capacity in
* Apollo carrying the sun. Which is also a ball of gas in the middle of our solar system.
* Apollo cracks a crack at himself when Trucy says that revealing a magician's secrets isn't very nice.
* Apollo Creed from the series initially fits this trope to a T. Subverted slightly in that while the guy does have an ego, it's partly played up in the ring as part of his flashy acts and openings, plus he gets plenty of
* Apollo Creed's, styled after the pair his father wore, to wear at his big match with the Creed name on the front and his birth mother's surname on the back. The present comes with a note from Mary Ann signed "Ma".
* Apollo Creed, the World Heavyweight Champion practically embodies America, has both
* Apollo Crews current gimmick a Nigerian royalty, he's billed from Benue State, Nigeria but he's born in USA and his bodyguard Commander Azeez was born in Poland.
* Apollo, despite being the younger twin, tricks his twin sister Artemis into
* Apollo died in Rocky IVwho is Tommy Gunn's manager in and just wants to make money out of him. Both Dukes are black.
* Apollo et Hyacinthus is based on a myth involving a gay love triangle (Apollo and Zephirus are both in love with Hyacinthus). Rufinus Widl, the librettist who adapted the myth for Mozart, didn't think this would go over well with an eighteenth-century audience, so in his adaptation Apollo and Zephirus are both in love with Melia, Hyacinthus' sister, while Apollo's just best friends with Hyacinthus.
* Apollo got into a music contest with a satyr named Marsyas. Apollo played the lute, while Marsyas played the reed pipes. In one version of the myth, Marsyas actually won the first round. Apollo responded by turning his lute upside down and challenging Marsyas to play his instrument upside down as well. Marsyas obviously couldn't do that and thus lost the second round. Apollo then
* Apollo, in-universe, actually used the All American Face gimmick in the
* Apollo is subdued and then raped by a member of a government-sponsored superteam

given the directive to neutralize The Authority. In a later confrontation, this same super is paralyzed from the waist down by Apollo, and the last we see of him is a look of horror on his face as The Midnighter, Apollo's boyfriend, stands over him with
* Apollo is the god of healing in general. In an example of duality, he's also a bearer of plagues, if you are stupid enough to provoke him;
* Apollo Justice: Ace Attorney also seems to be a frequent victim of this (rival prosecutor Klavier Gavin always calls him "Herr Forehead"), and there's even a scene where Apollo keeps getting the names of other characters wrong, prompting Trucy to say his name wrongly in the same way (such as calling him "Apololo" when he refers to Alita Tiala as "Alita Tialita").
* Apollo Justice: Ace Attorney, and learns that Kristoph was innocent of the crime that got him sent to jail in the first place.
* Apollo Justice: Ace Attorney, and promptly gets scolded by the judge and his mentor Kristoph: "Excess yelling can damage the judge's ears... and our case."
* Apollo Justice: Ace Attorney and the middle two cases are goofy and poorly written with unmemorable villains.
* Apollo Justice: Ace Attorney, Apollo actually watches someone die... and the victim says 'I'm cold... so cold' as he tells Apollo who the witness is.
* Apollo Justice: Ace Attorney, as it's clear each of those tones represents her voice.
* Apollo Justice: Ace Attorney bloomers. Understandably, he's not happy about it.
* Apollo Justice: Ace Attorney, but little about either case has consequences in subsequent levels.
* Apollo Justice: Ace Attorney Case 5: Turnabout Substitution dead: Judge Chambers. And the defendant is Robert Erlenmeyer, too. Good luck with that.
* Apollo Justice: Ace Attorney Case 5: Turnabout Substitution, Trucy somehow manages to steal Apollo's wallet when he had it that morning, and she had been on the other side of the planet for the past week!
* Apollo Justice: Ace Attorney catches himself doing one of these at one point — the Judge says "I'm not sure we could reasonably expect Mr. Justice to do anything delicately," and Apollo thinks "Hey! Why I oughta...take a deep breath and calm down."
* Apollo Justice: Ace Attorney Chairs, nail polish and reading are his only hobbies, and given the circumstances, this means he's doing quite well for himself.
* Apollo Justice: Ace Attorney claims to have been shot in an ambush, but he is soon revealed to be a Leeroy: "According to my sources... 'you ran in 15 minutes before the appointed time... by yourself.'"
* Apollo Justice: Ace Attorney constantly makes fun of the series' cliches. For example, Apollo gets told off for shouting out "HOLD IT!" too loud in court. Phoenix also reminisces on the times when he used to present evidence to people through the present button and how he would shout out "hold it" for no apparent reason just to scare people.
* Apollo Justice: Ace Attorney credits and the second at the end of said credits:
* Apollo Justice: Ace Attorney, decides to turn himself in after a conversation with Phoenix.
* Apollo Justice: Ace Attorney. Despite this contradiction, the player has to endure the entire case out while ignoring that fact, proving the culprit's guilt via more convoluted means. There's also an unskippable video the player must watch repeatedly throughout the case.
* Apollo Justice: Ace Attorney did was because they could not accept the possibility that Phoenix Wright could be a better defense attorney than them.
* Apollo Justice: Ace Attorney, due to her perky stage personality as a magician.
* Apollo Justice: Ace Attorney, Ema actually is quite competent and provides Apollo with helpful evidence-finding methods. She generally is really apathetic towards her job (which she never actually wanted), though.
* Apollo Justice: Ace Attorney employs the same tactic by running into a pitch black stage to take cover from an assailant.
* Apollo Justice: Ace Attorney ends similarly to Trials and Tribulations with a

drawing of Apollo, Trucy, and her puppet Mr. Hat done by Vera Misham, the defendant of the final case.
* Apollo Justice: Ace Attorney. Even in the middle of a crime scene she sometimes does nothing but munch her beloved chocolate snackoos.
* Apollo Justice: Ace Attorney features this in case 4. The trial which eventually leads to Phoenix's disbarment is one in which Phoenix is defending Zak Gramarye (real name: Shadi Enigmar), who is suspected of murdering his mentor, Magnifi Gramarye. During the trial, it's shown that Zak was sent instructions to kill Magnifi by Magnifi himself (who was already dying of cancer); however, it's revealed that Valant, Magnifi's other apprentice, also got the instructions and that Magnifi was testing his apprentices to see who was worthy of his inheritance. Phoenix proves that Valant manipulated the time of death, leading one to the thought that Valant is the murderer. However, after investigating, Phoenix learns that both Zak and Valant could not have committed the crime, leaving no other possible suspects. It's not until seven years after the trial ends that Phoenix finds out Magnifi committed suicide, as he had always planned to.
* Apollo Justice: Ace Attorney flirty towards Apollo. It's also mentioned that he personally writes all of the Gavinners' songs, one of which is called "My Boyfriend Is the Prosecution's Witness", though we never hear it so we don't know if it's written from his perspective or not.
* Apollo Justice: Ace Attorney for Dual Destinies where Klavier admits he's never felt this way towards a man before, and the DLC Quiz has plenty of friendly jabs at both Apollo and Klavier's orientation, even more so than Phoenix and Edgeworth. Also if you examine the detention center guard in Case 4 of Apollo Justice, Apollo notes he is winking at him.
* Apollo Justice: Ace Attorney Given the large number of cases of this, especially in the course of a single game, one has to wonder whether this is intentional.
* Apollo Justice: Ace Attorney had an almost identical mistake regarding terminology. The game introduces the "jurist system" to the series in the final trial where six jurists had the last word when it came to declaring a final verdict. The correct term for a member of a jury is "juror"; the term "jurist" can refer to a judge or an expert in the law, the latter of which is ironic considering the whole point of the "Jurist System" was to have common people decide verdicts.
* Apollo Justice: Ace Attorney, had a tendency to bite her nails a lot.
* Apollo Justice: Ace Attorney had the prime suspect of a poisoning case collapse while on the witness stand, having somehow ingested the same type of poison that killed the victim. This does not absolve her of guilt, as the prosecution claims that she attempted suicide out of remorse. As the suspect was still alive but in critical condition following the collapse, the prosecution insists that they finish the trial and come to a verdict before the suspect actually dies, since a verdict can't be assigned to a dead person.
* Apollo Justice: Ace Attorney has some pretty epic OBJECTION shouts, but Apollo is the king of them all.
* Apollo Justice: Ace Attorney has the Republic of Borginia, which is vaguely eastern European and has what are probably Romani and its language, Borginian, is written in dingbat characters.
* Apollo Justice: Ace Attorney, he somehow manages to take the leap from discussing someone being shot "square in the forehead" to "krypton particles are rare" among other things.
* Apollo Justice: Ace Attorney hidden in the handle. When the police come to seize the family's weapons, she refuses to part with it. And whenever she shows you the blade, her face goes from broad and smiling to a look that shows she knows how to use that thing to do more than clean. You don't want to mess with her.
* Apollo Justice: Ace Attorney, if you select "Refresher course, please!" when Kristoph Gavin asks if you want a refresher on cross-examinations, Justice will think "Better safe than sorry, especially this early in the game!"
* Apollo Justice: Ace Attorney. In fact, Apollo seems more shocked than she is. Towards the end, however, it's revealed that she is upset about it, she just avoids showing it to most people.

* Apollo Justice: Ace Attorney: In the flashback trial, after Phoenix is tricked into presenting forged evidence despite not having known it was fake, the judge asks him to explain himself, but is honest enough to admit he wouldn't hear him out. As a result, Phoenix ends up being disbarred.
* Apollo Justice: Ace Attorney is convicted of murder and sent to solitary, he still manages to receive presents, which include: a bookshelf full of novels, little artsy knickknacks, a bottle of the best nail polish on the market, and a comfy chair that's at least 10 times as expensive as the other chairs in the prison. Talk about connections.
* Apollo Justice: Ace Attorney. It's frequently mentioned by the main characters that calling him a pianist is an insult to pianists everywhere, and examining the seat by the piano in the bar he works for will elicit a comment on how it's the most painful seat in the house.
* Apollo Justice: Ace Attorney, Kristoph Gavin was the one responsible for disbarring Phoenix Wright and ushering in the Dark Age of the Law, where legal corruption runs rampant. But Phoenix himself implements a plan that ultimately gets Kristoph's corruption exposed and arrested for two murders he was responsible for.
* Apollo Justice: Ace Attorney making it seem like he died from a poisoned mug of coffee.
* Apollo Justice: Ace Attorney mess with him. On the plus side, he didn't get quite as much hostility from the prosecution... until Blackquill came along.
* Apollo Justice: Ace Attorney, never mind a teenager. Even though this fact is enough to prove Machi didn't kill Romein, the court only gets convinced of Machi's innocence once Daryan's breakdown exposes him as the killer.
* Apollo Justice: Ace Attorney (not even noting familiarity) even when the only difference is a goatee. On the other hand, Phoenix notices from the first meeting. The player, on the other hand, stands a chance of noticing at first glance, even without color.
* Apollo Justice: Ace Attorney: "Okay, Justice, time to take advantage of her... I mean, of her mistake".
* Apollo Justice: Ace Attorney, Phoenix and Thalassa decide it's time for them to know).
* Apollo Justice: Ace Attorney, recalls a professor saying, "At least you have good eyesight, Stickler. I'll give you that," and is dumb enough to think it's genuine praise.
* Apollo Justice: Ace Attorney, Shadi Smith conspired with crooked dealer Olga Orly to ruin Phoenix Wright's reputation as an undefeated poker player by planting a card on his person, then having Olga Orly deal five aces during one of their hands. The idea was to make it look like Phoenix had swapped out one of his cards for an ace, making him look like a cheater and thereby casting doubt on his previous wins. However, Phoenix managed to find the card planted on him and hid it in a grape juice bottle, so the plan failed.
* Apollo Justice: Ace Attorney's release, where the Japanese courts were switching over to a jury system.
* Apollo Justice: Ace Attorney starts off with three seemingly unrelated cases (a hit-and-run, a noodle stand theft, and a panty theft) before they all come together in—you guessed it—a murder.
* Apollo Justice: Ace Attorney takes place both in the game's present and seven years ago. On at least one occasion, you must find evidence in the present so you can present it seven years ago.
* Apollo Justice: Ace Attorney that she conveys her emotions via drawing on her notepad.
* Apollo Justice: Ace Attorney. The fact that his hair droops when he's upset/worried only makes the implications more obvious.
* Apollo Justice: Ace Attorney, the fact that the murder weapon was a .45-caliber revolver is a high point of contention, as the feeling is that it could only be used by someone with a large enough frame to take its recoil. It doesn't prevent the idiots from accusing a blind, frail 14-year old boy in the first place, mind.
* Apollo Justice: Ace Attorney, the first victim is killed with a glass bottle to

the forehead, leading to people to question why it didn't shatter, leaving it to be presented in court intact (made worse by the fact that the series is based on finding such contradictions, but asking this in game isn't an option and a previous game in the series featured a bottle that broke when someone was hit non-lethally). Glass is not as fragile as depicted in Hollywood, and the process used to make the bottle (of which there are several) and the quality and amount of material used are a factor. In fact, the non-lethal broken bottle from the previous game was likely a cheaper product, and was non-lethal because it broke, which absorbed a significant amount of the energy involved, while the unbroken bottle would have transferred more energy into the skull, thus causing more damage. The common misconception of Soft Glass exists because scenes where glass is broken don't use real glass — they used to use "sugar glass" (essentially, flat rock candy), and now just use a plastic "breakaway glass".
* Apollo Justice: Ace Attorney. The jury trial runs on reasonable doubt, which is enough to save the defendant.
* Apollo Justice: Ace Attorney, the reveal that the amnesiac singer Lamiroir and the long-missing Thalassa Gramarye are the same person should not be shocking to anyone once Thalassa's picture is first shown. Lamiroir might cover her face nowadays, but she didn't change a damn thing about her hair.
* Apollo Justice: Ace Attorney, the sound of some pyrotechnics and a gun going off are masked by the concert going on outside.
* Apollo Justice: Ace Attorney: The various "scientific investigation" segments were widely regarded as being boring and slowing down the game's story. As a result, the two Investigations games and Dual Destinies dialed it back to only having fingerprinting and luminol testing segments.
* Apollo Justice: Ace Attorney, the victim is a staid, upper-class doctor, whose dead body is found pulling a wheeled noodle stand belonging to his pauper neighbor.
* Apollo Justice: Ace Attorney. This is actually a plot point, as it's pointed out that the defendant, a 14-year old, wouldn't have been able to use the murder weapon without dislocating his shoulder.
* Apollo Justice: Ace Attorney. This was somewhat alleviated in the followup Dual Destinies, but it still doesn't cover that much. Spirit of Justice answered a lot more, making Apollo no longer an example.
* Apollo Justice: Ace Attorney titles would get mobile ports on December 2017 (although with the second title still unlocalized).
* Apollo Justice: Ace Attorney to use for her father because she sees how happy she is able to make him by practicing those talents.
* Apollo Justice: Ace Attorney. Trucy is the Tritagonist, with her original family being one of the main focus of the game.
* Apollo Justice: Ace Attorney: Trucy Wright, the adopted daughter of Phoenix Wright, adores her father. She even calls him "Daddy" immediately after Phoenix gives her the option to call him Nick or Daddy if she wants.
* Apollo Justice: Ace Attorney universe. At the time of the game's release, Japan was undergoing a similar process and having the first jury trials in decades.
* Apollo Justice: Ace Attorney was using his position to interfere with the investigation.
* Apollo Justice: Ace Attorney when he loses confidence, well...), Drew Misham's looks like half of its hair was frozen at an angle from its head, Wocky Kitaki has tricolored hair (an orange curl in the middle, two yellow spikes, and the rest is brown) and both Gavins' hair makes a G at the side while the lower part looks like a drill.
* Apollo Justice: Ace Attorney, when the witness is revealed to have been lying about the events of the murder and hiding a bold personality with a shy demeanor, players would suspect she was the culprit, only to find her to have not done it. Instead, it is the title character's mentor, Kristoph Gavin, who did it.
* Apollo Justice: Ace Attorney. When you perceive him in the fourth case, you get to see through them. What you see is incredibly unnerving...
* Apollo Justice: Ace Attorney, where Apollo's assistant Trucy is a practicing stage magician. However, it doesn't come in particularly useful. She does work out

a magic trick that's vital to solving the case very quickly, but refuses to tell you.
* Apollo Justice: Ace Attorney where, despite the events taking place around the time of the third game in the series, they use music from the first.
* Apollo Justice: Ace Attorney, which is particularly strange as despite being a Prosecuting Attorney (an antagonistic role from the protagonist's point of view), he's very much a good guy, which makes him fall squarely into this trope.
* Apollo Justice: Ace Attorney, while still managing to give Apollo and the new cast more development than they had in their debut game.
* Apollo Justice: Ace Attorney with Olga Orly. Orly is only pretending to be a Russian waitress (at a Russian restaurant known as the Borscht Bowl Club) in order to cover up her real job as a con artist.
* Apollo Justice: Ace Attorney, Wocky Kitaki, is the son of a Yakuza boss.
* Apollo Justice as well since almost everyone seems to put him down for being a loud rookie with two "horns"/spikes on his hair.
* Apollo Justice family. Casually hands out death threats. Wears a cute green apron with a cartoon fox on it. Opens up a bakery after he leaves the crime business.
* Apollo Justice has shades of this. While he's quirky like literally everyone else in the franchise, he goes out of his way to be exceedingly professional and serious on the job and is rather ruthless in court. He dislikes when people get off track and shows deep disdain for Klavier Gavin since Gavin doesn't act like a serious professional in court. He's one of the characters who is extremely dedicated to his job of finding the truth, regardless of what the answer will be.
* Apollo Justice; if you have no evidence to refute a testimony that is obviously false, chances are the witness is playing with her ring, or he's sweating profusely, or something similar; Apollo can "Perceive" these and call out these nervous twitches by way of an incredible talent to read people.
* Apollo Justice is never explained, even in the flashback showing the two meeting just prior to the first case.
* Apollo Justice, Phoenix is accused of being the murderer, partially based on being the only person in the room with the victim, who wasn't a witness. Justified in that, this reason isn't why he's on trial for the murder, but was simply something brought up in a argument.
* Apollo Justice's first trial, when the prosecution states that the victim was the winner of the poker game:
* Apollo Justice she reveals she ate them due to stress from being stuck in a job she hated, and now that she's got her dream job she's kicked the habit... until she has to testify against a friend, at which point she starts munching them again.
* Apollo Justice's Red Herring, as it turns out she did not witness the crime at all.
* Apollo Justice.) That doesn't stop him from giving you penalties, though - work is work.
* Apollo Justice there's a flashback trial that you know will end badly, because you've already been informed that it's the one that caused Phoenix's disbarring.
* Apollo Justice. This time around, it's Phoenix that's kind of phased out (he's still there, and playable for a good chunk of the game, but the plots are much more personal to the other two attorneys, with Phoenix serving more as a mentor).
* Apollo Justice winds up in possession of two sets of panties, one belonging to a fifteen-year-old girl and the other to a mob boss' wife. The judge is rather disturbed by this.
* Apollo=Kara Thrace, who dominated the skies and lived a life ruled by destiny.
* Apollo knows who to accuse but his case hits a wall when he lacks anything concrete enough to get the guilty party to admit to their guilt. The only way he can slam the book on the actual culprit is by having the defendant admit to his own culpability in a different but related crime. The other crime carries a harsh sentence in his homeland but not in Apollo's country, which makes it advantageous to him to confess now instead of being found guilty at a later time. In doing so, the murderer would be revealed as the two were co-conspirators on the latter crime. After threatening to blow the lid on the whole affair, the real guilty party loses

it and breaks down.
* Apollo offered Sibyl her fondest wish if she agreed to sleep with him. She held up a handful of sand and asked to live for as many years as there were grains of sand in her hand. Apollo agreed but Sibyl still refused him. In response, Apollo cursed her by giving her the years she desired...
* Apollo One Fire Timeline, the crew noticed the fire (by verbal report) at 23:31:04.7. The Command Module ruptured due to pressure at 23:31:19.4, less than 15 seconds later. During the investigation, they determined that had the repress valve been opened, it would have delayed the rupture by about one second. Even if they could have instantly flushed the atmosphere, the interior surfaces had foam padding that was going to be removed prior to an actual launch protecting bulkheads and side panels from being scuffed and dinged during ground testing. After having been soak in 2 atmosphere pure oxygen for 3+ hours, the foam would have burned like napalm in hard vacuum.
* Apollo. One of the earliest inceptions was informally named "The Bug".
* Apollo Program. Which may have been conducted through the ground, the astronaut, and into the mic. Solids are media too!
* Apollo saw the nymph Cyrene wrestling with a lion that had attacked her father's sheep.
* Apollo's entire life story. Born abroad to a magician and a musician, his father dies and his mother is unable to find him, eventually going back home and having another child with her colleague. He spends some time abroad with a foster family before somehow ending up in the American foster system, meeting his best friend. He then becomes apprentice to a distinguished attorney. Sounds normal enough, except fast forward fifteen or so years, and
* Apollo's Grove: Atollon, a priest of Apollo, at one point seduces a village woman using the same words his mentor had used to describe the sacred nature of Apollo's grove.
* Apollo's Grove is the story of the last Oracle of Delphi, who knows she is the last Oracle and whose mentor gave her the task of writing a chronicle of her temple and her faith so that people in the future would know both existed. She succeeds.
* Apollo's Grove, the Oracle of Delphi dies and is replaced by a woman named Lyssa, who comes from a formerly wealthy family that's willing to let her leave because she no longer has value as a marriage asset. Her father forcibly takes her back when he regains his wealth and Lyssa once again becomes an option for an arranged marriage.
* Apollo/Skylab A7L featured a fishbowl helmet. For moonwalks and spacewalks, astronauts wore an additional visor assembly on top of that.
* Apollo's ravens show up with less frequency than many of the other god's related animals but they are there.
* Apollo's Song might count, except his reaction is "violent revulsion and pathological hatred" instead of "fear". He had a history of killing animals he saw mating and clearly would have graduated go killing human couples if he didn't get institutionalized first. The godess Athena punishes him for all eternity by putting him in scenarios where he falls in love that end tragically. He certainly learns the value of human intimacy!
* Apollo Thirteen, in itself based on a real life incident, it's associated with the phrase: "Houston, we have a problem."
* Apollo to a music contest, flute against lyre. There are several versions (either Apollo made a new condition that made it impossible for Marsyas to keep up, like singing or playing the instrument upside-down; or the judge was Midas who declared Marsyas the winner), but both end in the same way: Apollo flays Marsyas alive.
* Apollo wears a purple shirt and pants with a pattern of Jupiter and a rocket ship.
* Apologetic prologue: Back when theatrical companies were usually managed by actors, it was common at the beginnings of plays for one of the company to deliver a prologue in verse apologizing to the audience for the entertainment they were about to present.
* Apologizes a Lot: "I'm sorry, I'm sorry, I'm sorry." vs "I never apologize!"

* apologizes, and then the two spend the rest of the "battle" commiserating until Disney shows up and buys out both companies.
* apologizes to a guy while he's having her gang-raped by his friends. She's apologizing because of something her father did to the gang-rapist's mother, which prompted the gang-rapist to attack Hatsumi as a form of proxy revenge. I repeat: she's apologizing to her rapist for something she didn't even do.
* Apologize, which isn't nearly as remembered (and actually finished three spots below "The Way I Are" on the year-end chart despite being a bigger hit at the time).
* apologizing, consider yourself deep in his inner circle. But he's a jerk with such panache that audiences can't help but love it.
* apologizing for putting Gohan through everything until then, explaining that he wrongly thought that fighting would make his son happy the same way it did for him.
* Apology Gift for not turning up for dinner like he promised. Unsurprisingly she mistakes this for a romantic overture and makes a pass at him.
* Apology of Socrates, but that time she answers a straight "No." Socrates, being who he is, is convinced it is some kind of sophisticated twist and spends much time and energy trying to understand it.
* Apology refuses to plead guilty, even under the risk of losing his life.
* apology video All of which drained his energy and made him stop caring through the next two seasons.
* a poor choice of words on the officer's part), but stopped when he explains he meant fire a real torpedo. Homer then unwittingly commits treason and nearly starts a world war. Par for the course.
* a poor decision in the long run, as Parker comes to fear that his sister might be driven back.
* A poor helicopter pilot has his head torn off and violently forced into a small water bottle by the stand Geb.
* a poorly animated yellow porcupine yelling in Russian until a loaf of bread lands nearby, at which point it starts laughing.
* A poorly-made, incorrectly assembled or worn-out firearm or excessively powerful cartridge loads can cause the bolt, part of the breech or — in the case of semi-automatic pistols — the slide to be blown back into the user's face. The
* A poor man lived with his barren wife, his blind, dying father and his brother who had lost an arm in a war. One day he encountered a genie who offered him a wish. He was torn as whether he should help his wife, father or brother. After some thought he came up with his wish. "I want my father to live to see my wife rock her baby in the cradle that my brother has made with his own two hands."
* A poor pilot's lungs explode instantly after his spaceship's hull suffers a major breach.
* A poor sod's memory of being tortured by someone and asked to bring along a message. The torturer is Ravel the Hag, and you can
* Apoorva Sagodharargal, the dwarf Appu tricks Sathyamoorthy into killing himself with a circus hand gun that shoots backwards.
* A poor woman comes across a genie's lamp and is offered the choice of wealth, power, or wisdom. She thinks carefully about her options and eventually goes with wisdom, figuring that money can't buy happiness and that power always comes with too many responsibilities. The genie grants the wish; after a moment, the woman looks around, realizes she's still poor and powerless, and remarks "
* Apophenia Plot: A character irrationally obsesses over random events in the belief that they're part of a conspiracy.
* Apophenia Plot: A character misinteprets a series of events and thinks they see a conspiracy where none exists.
* Apophenia Plot: A character obsesses over a string of random events, believing them to be part of a conspiracy.
* Apophenia Plot: A string of random events is misinterpreted as having some meaning, often in the sense of a secret or a conspiracy.
* Apophis exhibits this particular trope on several occasions, surviving his ship being blown up, a catastrophic explosion (both by ringing away at the last possible

second), and a star going supernova. He was finally killed when his mothership was about to explode, burning up in the atmosphere of a planet, infected by replicators, which were swarming over his personal shield. And he STILL managed to get guest spots in later episodes where he appeared in flashbacks and an alternate time line. For a villain who was really kind of bland and uninteresting, you sure couldn't keep the guy down.
* Apophis', his son Klorel is warned by the Jaffa that he has to leave immediately as he's in danger. Klorel believes it's because his father is finished politically after the attack, his failure to destroy Earth, and the failed invasion of the Celestial Empire. The real danger is that the millions of human slaves on the planet witnessed thousands of Goa'uld deaths and realized they're not gods, inciting them to rebel en masse.
* A Pop-Tarts ad plays this trope straight. Strawberry Milkshake is tricked into licking the North Pole, with predicable results- thanks to those mad children.
* A popular acronym for South East Asia Command in WW2 was Save England's Asian Colonies.
* A popular (and rather disgusting) practical joke is to throw a cake of yeast into an open latrine pit. Bread dough and wine actually lack the nitrogen nutrients needed for the yeast to thrive (that's the reason why moonshiners are often shown throwing the fertilizer into the wort), but the shit most emphatically
* A popular April Fool's Day joke on websites is to alter the front page to make it look like the site has fallen victim to internet vandals.
* A popular (at least, in modern Russia) conspiracy theory says that
* A popular bathtub soap game in Brazil which exploded through expansive daytime TV coverage in
* A popular brand of German chocolate-coated marshmallow treats is called "Super Dickmann's". While the German word "dick" quite innocuously means "fat" or "thick", the name is a frequent cause for amusement among English speakers, for obvious reasons.
* A popular (but questionable) etymology for the profane variant of the
* A popular challenge is to limit which units you can use. The most common are lord-only runs, but these can range from
* A popular challenge that originated in Japan is to form the shape of a "greater than" sign (>) as wide and tall as the playing field. It's popular enough that in the
* a popular character fans fell into grief at Neji's death. Shippers were especially distraught as their Neji pairings were now unable to happen.
* A popular choice for weddings is "Everybody Hurts", a song about toughing it out and not giving in to despair when life gets hard. Uplifting, but not particularly romantic.
* A popular class combination in is an honourable mention. Using the "Tactical Knife" pistol attachment (holding a knife and a pistol out at the same time to strike faster), the "Marathon" perk (to sprint forever), the "Lightweight" perk (to move faster) and the "Commando" perk (to be able to strike with the knife from farther away), you get a class that even
* A popular e-mail urban legend involved a customer being charged an exorbitant amount for a Neiman-Marcus cookie recipe, and in retaliation was distributing it for free over the Internet. Neiman-Marcus did not even sell a cookie at the time, but began to do so after the rumor started. And they give away the recipe for free. The urban legend was previously told about many other popular recipes, including a red velvet cake supposedly offered (it wasn't) by the Waldorf-Astoria Hotel in New York. William Poundstone wrote about the phenomenon in one of his
* A popular fan voice-actor popularized the word "nyeh" in association with Eridan,
* A popular humorous toast: "To our wives and sweethearts. May they never meet."
* A popular inspired the use of the word "yeet" to mean "to throw something with great force".
* A popular instrument for people wanting to invoke this trope is the cactus.
* a popular Japanese property was released in Japan a month before America.

* A popular joke is that he actually ran through a literal bus full of nuns.
* A popular kind of video he makes is trolling players who are hacking on his server.
* A popular legend states that former boxing Lightweight champ Roberto Duran once knocked out a horse with one punch.
* A popular line of T-shirts carried the slogans "I'll Procrastinate Tomorrow" and "Procrastinators Unite Tomorrow".
* A popular Marine prank involves asking a newbie to go somewhere where Marines might congregate and ask the guy in charge for a "stack of 0311s", whereupon everyone in the room will dog pile on the hapless newb. 0311 is the USMC Military Occupational Specialty Designation for infantrymen (aka everyone).
* A popular meme on some gaming websites involves doing some equations and ending up with 3, saying "
* A Popular Meme on Tumblr involves putting a character's (typically headcanon) sexuality on their shirt.
* A popular method by the two main powers during the Cold War was to support these as a way to replace a government they disliked with one who proved more cooperative. On the US side, see Brazil in 1964, Chile in 1973; on the Soviet side, see Ethiopia in 1974, Afghanistan in 1979. Africa in particular has been plagued by coups, counter-coups, and revolutions since decolonization began in the later 1950's, with both major superpowers playing roles. It seems that imposing a modern democracy on a population unused to it while surrounded by powers willing to send military aid does not produce a stable political environment.
* A popular Norwegian advertisement shows a mother awkwardly trying to explain to her son that his goldfish, Doffen, is
* A popular online parody that also appears in print (notably in some alternate newspaper markets), is
* A popular pastime for Sabbat vampires: take a shovel, find a grave with a failed inductee, dig them out, and try to kill them. Said failed inductees are usually mindless, Frenzy-driven maniacs, so it's a bit like wearing a suit made of steaks and walking through a tiger cage.
* A popular plot in action movies in general, though most tend toward the
* A popular qoute/aphorism about vikings goes something like "A viking was once asked what he believed in and he responded:
* A popular quote, often attributed to Einstein but possibly originating elsewhere, goes, "I do not know how the Third World War will be fought, but I can tell you what they will use in the Fourth — sticks and stones!" The implication is that
* A popular radio show presenter was dropped from commercial radio in the north of England. The reason was that he created an on-air persona intended to be the meanest, tightest, most close-fisted miserly person anywhere in the world. To reinforce the point, he brought together the two ethnicities universally most regarded as being, er,
* A popular radio sportscaster in New Orleans once said that if the Saints ever made it to the Super Bowl he would wear a dress. He died before he got the opportunity, so former Saints quarterback Bobby Hebert led a drag parade in memory of this trope.
* A popular saying among NASCAR fans is that "No one remembers who finished second in the Daytona 500". Which is ironic given that one of the things Earnhardt is remembered for is finishing second in the Daytona 500 over and over and over...
* A popular saying runs, "God made man, but Sam Colt made men equal." Prior to the revolver, handguns were expensive, inefficient, and inaccurate, but Colt managed to develop the relatively inexpensive revolver. The result was personal firearms becoming much more common.
* A popular screenshot shows Light's famous "Just as planned" line in
* A popular set of challenges are the 1@17, 2@20, 3@30 Diablo kills — basically, killing the final boss on a difficulty setting at the earliest possible level. To use the Hell entrance in Normal difficulty requires a character at Level 17, to access Nightmare difficulty requires Level 20, and Hell difficulty is

accessible at Level 30. Each challenge is to be attempted solo, though you are not required to attempt or complete any of the earlier challenges to attempt the coveted 3@30.
* A popular singer who died of heartworm, which is not normally fatal to humans. "Further investigation revealed that the singer was, in fact, two golden retrievers in a tie-dyed sundress."
* A popular source of convincing-sounding falsehoods and ridiculous-sounding truths in
* A popular stock trope of British children's mystery/adventure author
* A popular story among hunters is the tale of a man who shot a magnificent buck. He then set up a camera on the tripod, propped his rifle on the deer's antlers, set the timer on the camera and posed proudly in front of the body. The deer is still alive however, and when the camera goes off, the picture is of the hunter running after the deer as it gallops into the forest...with his eight hundred dollar hunting rifle still in its antlers.
* A popular tattoo spot for young women is the small of the back, often getting abstract patterns, animals, or...Chinese characters...right above the buttocks, but it's now thought of as a silly fad. It also paints a somewhat unflattering picture of the wearer, as evidenced by the fact that such tattoos often called "tramp stamps." In Germany, their popularity was singlehandedly torpedoed by Bavarian comedian Michael Mittermeier, who coined the term "Arschgeweih" — meaning "ass antlers."
* A popular theme in the 1950's. Showcased rather dramatically in this
* A popular theory — proposed by science fiction writer John D. Clark in 1956 (making this trope
* A popular trend on Facebook — most definitely played for satirical irony and laughs towards the whole Hipster culture — are "Hipster" versions of popular fictional (or otherwise infamous) characters. Hipster
* A popular type of prank in Germany is obscuring the "K" on the frequently found "Gas weg: Kinder" signs (meaning "Slow down for kids", usually placed near schools), leaving "Gas weg: inder", meaning "Slow down for indians". As those signs
* A popular variant on Australian tabloid television is to slow footage to ~6 frames/second.
* A popular variation is to pit a werewolf against a human armed only with a knife. After all, what fun is it without giving him a sporting chance?
* A popular way of dealing with members of a gaming group when they become too much of an
* A popular (well, often seen) riddle for kids goes like this: The detective is in a hotel room because the hotel's director told him that a famous thief is in the hotel. Then, someone knocks at the door of the detective's room. He opens, and there's a guy, who apologizes: "Sorry, I thought this was my room." The detective arrests him immediately, and guess what, it's really the
* , a Popuri/Karen oneshot, Karen has a character tic of sticking a strand of hair behind her ear.
* Aporia: Beyond the Valley are full of intact skeletons in various poses. Some appear to have carried on normal daily activities — eating dinner, manning market stalls, tending plants — right up to their last moment, while others clutch equally-skeletal children in their arms or lie, still clutching pickaxes and hammers, in front of the sealed doorways to shelters that they'd tried (and failed) to penetrate.
* "A PORKY PRIME CUT": cut by George Peckham, who did a lot of British records in the 1970s and 1980s. "BILBO" is Denis Blackham.
* A porn series has two guys fighting each other MMA-style. The winner has sex with a hot porn star. The loser gets "punished" with sex by a lesser alternative (mostly
* A port called Cockburn's Dry Tang got its name changed in Sweden because in Swedish, "tång" means "seaweed" (and is also a rather obscure slang term for vagina, which puts the dryness in a whole new context). It ended up being changed to the hilarious-sounding (in English) "Cockburn's Dry Cock", proving this trope

runs both ways. And this didn't solve the problem, because in Sweden, more or less everyone knows enough English to recognize the hilarity.
* A portion of Gene Shoemaker's ashes were placed on the Lunar Prospector probe that was deliberately crashed into the Moon in 1999, making Shoemaker the only human to be buried on another world.
* A portion of the playerbase first learned about Cygames and Shadowverse thanks to the global Steam release. Upon knowing of a highly-popular JRPG called Granblue Fantasy, these players migrated their playtime from Shadowverse into Granblue and might have spent a good amount of time and money in that game (given that Granblue Fantasy never runs out of events) that they might've also taken a break from Shadowverse. During those times, there were a lot of "Returning Player" posts where a former Shadowverse player returns into the game, eager to know the changes to the meta. When the Brigade of the Sky event hit, many of those who migrated into Granblue returned to the card game, thanks to the shared characters featured by the expansion. It goes to the point where some players admit that they play
* A Portrait of the Artist as a Young Man Stephen Dedalus as he tries to grow up and not to be shackled down by the political and familial situations he was born into.
* A Portrait of the Artist as Filipino, aiming to provide an alternative to the latter that is suitable for school educational viewings.
* A Portuguese expression for things going wrong is "the cow went to the swamp" — after all, when a bovine gets bogged down, it's
* A Portuguese government-in-exile is set up in Angola after a communist revolution topples the Estado Novo government.
* A Portuguese language joke: A man was telling a story of when he found three magic eggs that would grant wishes when they are broken, but while returning home he stumbled and one of the eggs fell into the ground, breaking apart. Frustrated, the man screamed "caralho!" (a curse word which literally means "dick") and them suddenly a lot of penises have grown into the grass around him, so he broke the second egg and wishes for all the dicks there to be gone. "And the third egg?", asked a friend who has listening to the story. "I had to break it to wish mine back", answered the man.
* A Portuguese TV channel aimed at kids, SIC K, frequently airs some less-child-friendly anime alongside the usual fare. They occasionally switch between
* Aposematism refers to the phenomenon of animals sporting bright colors as a means of deterring would-be predators by suggesting that they carry deadly poisons (see many species of poisonous amphibians, such as poison dart frogs). Bright blue, in particular, is an appetite suppressor, as no foods humans consume are naturally that shade (blueberries are coloured indigo) — and things that are blue are usually toxic. Dietitians will advise people wishing to lose weight to eat on blue plates, for example. Purple, being close to blue in the spectrum, shares some of blue's appetite-averting effects.
* A positive example: Howard Florey who had an important role in the making of penicillin had this to say about his motives: "People sometimes think that I and the others worked on penicillin because we were interested in suffering humanity. I don't think it ever crossed our minds about suffering humanity. This was an interesting scientific exercise, and because it was of some use in medicine is very gratifying, but this was not the reason that we started working on it."
* A positive example: In the aftermath of the October 2014 Parliament Hill shootings in Ottawa which were perpetrated by a Muslim extremist, three students
* A Positively Final Appearance confirms that the story did indeed happen. Guinness, however, states that the boy's mother dragged her crying son away after Guinness' request, and he never mentions actually giving the autograph.
* A Posse Ad Esse has an example similar to the Scanranger one above, which is then subverted:
* A Posse Ad Esse-style technique and wants to use it to create an inverse Lotus Eater Machine.
* A Posse of Princesses defends himself with this after revealing a major deception, but the protagonist will have none of it:

* A possessed Batman uses the Batmobile's ejector seat to launch Green Arrow into a river.
* A possessed member of the crew attempts suicide by ejecting himself out the airlock. He doesn't explode, but the whole thing is portrayed very messily. To the film's credit, he needs a lot of medical attention when he's eventually returned to breathable atmosphere. His small blood vessels rupture in the decompression, resulting in hemorrhage from his cavities. It's pretty realistic, though whether there'd be quite that much blood is anybody's guess. The dialog during the event even has the Captain telling the young crew member to blow all the air out of his lungs just before the doors open to prevent the pressure difference from damaging his respiratory system.
* A possibility in real life, if a person is shot while holding his finger on a gun trigger and jerks it back due to some combination of pain, surprise and instinct. It falls under the general umbrella term “accidental discharge”. This makes it dangerous to
* A possibility with Blackguard Aribeth and the player in the end of
* a possible bad future, observed during Aviendha's final tests to become a Wise One. It seems that her descendants become embroiled in a war with the Seanchan Empire, who have acquired gunpowder weapons, conquered Tar Valon and subjugated the rest of the world. Decades or centuries later, the once-proud warrior Aiel have been reduced to scavengers living off the refuse of the Seanchan and their vassals.
* A possible consequence coming from flying kites with strings that are made of thread covered in liquid glue and pulverized glass. This is intended to cut rival kites' strings in flying competences, but these 'covered' threads (known as "hilo curado" in Chile and "cendol" in Brazil) are
* A possible death for Adolf Hitler has you stomp on his head while he lies down to take a nap on the floor - he's a senile, seventy-something
* A possible deconstruction shows up in the episode featuring Gordo's grandmother. He previously remembers her as a conservative woman but she shows up now wearing kimonos, eating sushi and full of fun. Gordo finds this off-putting and wishes for her to be the way she used to be.
* A Possible Encounter for a Phantom a decade older than him. She's flattered but not interested in a hero younger than even her usual teen nemesis.
* A Possible Encounter for a Phantom and realizing there are two Danny Phantoms causes him to react this way out of refusal to believe this.
* A Possible Encounter for a Phantom: A recurring gag, whenever Danny and Kim start to grow interested and are about to kiss, something interrupts them and they move away from each other.
* A Possible Encounter for a Phantom, but she quickly states that's not what she meant.
* A Possible Encounter for a Phantom: Ember McLain reveals she's 16 and Skulker is 19 in human years, thus meaning it's technically legal for her to hit on and kiss Danny Phantom, who is 14.
* A Possible Encounter for a Phantom: In his series, Danny Fenton was able to hide his identity as Danny Phantom thanks to his eye and hair color being different and having a tan in ghost form. However, Kim Possible's villains, some of who actually encountered him, vaguely recognized him, something that he's surprised by.
* A Possible Encounter for a Phantom, she begins to grow interested in him.
* A Possible Encounter for a Phantom, who is 16 while he himself is 14. He's also shown to be attracted to Shego, who is likely a decade at least older than him.
* A possible etymology for "OK" is that it was an Xtreme Kool Letterz version for "All Correct": "Oll Korrect".
* A possible example, but heavily downplayed at best: Case doesn't have any cybernetics, but being online all the time gave him a deep contempt for his "meat" body and when he was cut off from cyberspace he became a ruthless drug dealer and user. The thing is, he seems to have developed a deep-seated self-loathing very early on in his life.
* A possible example in "Escape From The Pie Folk", where the Pie King claims that Festivia, the girl who Meteora was replaced with to become Queen, was originally

from Pie Island, making Moon and Star related to the Pie Folk. However, since the Pie Folk are known for being liars, it's unknown if this is really the case or not.
* A possible example is when Dr. Venture denies the Monarch's claim that if he dumped them in a river, fish called candiru would crawl up their pee-holes. It's not entirely clear if Venture is saying candiru
* A possible example of actual use of two guns firing at the same time is "Macedonian Shooting", practiced by Russian special forces. This evolved as a method of
* A possible example of this trope, but with robots instead of aliens, is the movie
* A possible explanation for Glinda's "Only bad witches are ugly." line in
* A possible explanation for this may be the increase in heartbeat when in the presence of someone you have a crush on, or maybe the fact that, for a good part of history, the heart was known as the "main life organ".
* A possible fifth universe is the POTA videogame based on the original novel.
* a possible future love interest, despite having the same nickname as Mary Jane Watson.
* A possible instance of this trope is Dar'khan Drathir. The way he speaks of the Lich King is...weirdly erotic. Though it might be less the Lich King and more the magical power that turns him on. Dar'khan betrayed his people, the High Elves, leading to an invasion and genocide. When your character shows up to kill him, he still apparently thinks the Scourge are going to help him: even though that prospect would not sound likely to any reasonable person at this point. Though again, he might just be extremely arrogant, it's a bit hard to say.
* A possible interpretation of the end of "The Most Toys" where Data apparently outright lies to Riker about whether or not he attempted to shoot Kivas Fajo: when Riker asks him about the transporter picking up a weapon's discharge (Data was beamed away just as he was about to shoot Fajo), Data replies "Perhaps something happened during transport". Something did happen, namely
* A possible interpretation of the story of Admetis and Alkestis - when Herakles descends into the underworld and brings her back to life, she has lost the power of speech until the correct sacrifices are performed. It's possible that whatever Herakles brought back wasn't actually Alkestis at all...
* A possible justification is that they used to be warriors. They were faced with a dilemma: keep making high-tech weapons to fight and wage war, or stop developing technology and become pacifists. They chose the latter, which worked out just fine until Phazon meteorites showed up. It's very possible that they could have become corrupted by Phazon and gone on to wreck the galaxy if they had not spent centuries as philosophers.
* A possible reason for this is that, while their histories have had their ups and downs, the United States has a
* A possible response during part of the Republic Trooper quest chain on Coruscant:
* A possible result of using the Tsurugi of Muramasa on human-size or smaller opponents in
* A possible subversion as we are treated to her nicknames prior, the Demon Hammer and The Crusher. Her name is also a transparent hammer reference. Then when she is unveiled she is shown to look identical to the short-handled Mjölnir. Then the view point pulls back and we realize she is tiny and toy-like. She only grows into a Tonfa when it is revealed that her power is contrary to most hammer wielders, speed.
* A possible third occurs when you click on Jaheira; one of her selection lines is, "Yes, oh omnipresent authority figure?"
* A (possibly apocryphal) extreme: when heavy fog prevented all traffic between England and Europe, one newspaper ran the headline "FOG IN CHANNEL, CONTINENT ISOLATED".
* A possibly apocryphal headline from an Argentinian newspaper reporting on a fatal accident: "Murieron tres personas y un boliviano" (three people
* A (possibly apocryphal) story has it that the founder of Netflix did so after

his outrage over a $40 Blockbuster late fee inspired him to start his own video rental service.
* A possibly apocryphal story holds that the Green Bay Packers have never lost at home below a certain temperature, and that the Miami Dolphins have never lost at home
* A possibly apocryphal story says that the late Kim Jong-il found the film to be hilarious, despite himself being the movie's villain.
* A possibly-faked viral image suggests that if you accidentally call her "Cortana" (the name of Windows's assistant program), Siri has a passive-aggressive tantrum about your other OS. (Her actual response is "That is like comparing apples and... not apples.")
* A possibly unique non-human example: Koko, the gorilla who could communicate using sign language, once ripped a stainless steel sink off the wall of her enclosure in a fit of temper. When her handler scolded her and asked why she had done it, Koko denied responsibility and
* Apostae seems like a barren world without an atmosphere until you find the gigantic hatches set into the ground. Managing to enter them reveals a network of tunnels absolutely filling the planet, as well as clues that the planet is actually a giant ship. Unfortunately, the tunnels are filled with malformed creatures resulting from malfunctioning cloning banks, ranging from vaguely curious to murderously hostile.
* Apostate Alchemicals have a Charm that physically tears off the Charms of other Alchemicals and bolts the stolen device to their own form. This cruel enhancement, known as Flesh and Steel Transference Mechanism, was nicknamed "Mega Man Method" during development.
* A poster on the Steve Jackson Games forum discovers TV Tropes for the first time.
* a post-fifth year Harry would rather be subjected to the Cruciatus Curse than spend yet another summer with his relatives.
* A post from the show's official Facebook page in March 2018 which broke later that month.
* A post-game quest deals with the various Scum Digimon (Numemom and Sukamon) declaring war on
* A post-launch patch added two more: a special autosave that's never overwritten after getting all the sigils needed for the main story, so you can watch all the endings easily, and a button to make the game go at double speed to cut down on travel time.
* apostles are cruel and sadistic, and some of them are also man-eaters.
* Apostles are fond of forcing their subjects to send them people to eat, such as the Baron of Koka Castle and the Count.
* Apostles are truly terrifyingly creatures, often consisting huge masses of eyes, teeth, tentacles, faces, and genitalia randomly strewn about their vaguely animalistic bodies. Their humanoid forms aren't much better, bearing anatomical proportions that only emphasize how inhuman they really are.
* Apostle, that also has moments that would fit right into a gory action movie.
* A postmortem Elmer McCurdy was a traveling preserved corpse of an outlaw who was featured in sideshows, funeral parlors, and spook houses. Over time, it was forgotten that he was a
* A post-mortem one. Early on, news reports talk of a superhero being murdered. The same superhero later turns out to be
* Apostolic women are mandated by their faith to never cut their hair. However, many of them have it in ponytails or buns.
* A post-revival episode introduces Dr. Banjo, an orangutan and creationism activist.
* A potential example would be Starfire, whose species can instantaneously learn any spoken language via
* A potential interpretation of events of the final Agni Kai. Zuko knows by now his father was a terrible person and might have some small clue that Azula was left worse off; but now she's a mad dog aching for a fight with her brother, and words aren't going to reach her.

* A potential result of overexposure to cobalt or indigo dyes during industrial processes.
* A potential solution for one of the missions involves shoving a witness into a furnace.
* Apothecaries carry a special pistol for just this purpose...and then they chainsaw open the chest of the fallen to get at his genetic material. With the utmost respect, of course; without those "gene-seeds", the many chapters of Space Marines wouldn't be able to replace their losses.
* Apothecarius Argentum, Argent was fed a number of poisons at a young age so he could be sold as a food taster/assassin. As a side effect, they also turned his blood into some kind of killer acid, and just touching him is enough to make his love interest, the princess faint.
* Apotheosis / Fight against the Big Bad (These are typically very closely related, often intertwined.)
* Apotheosis had downloaded, each of which is a blending of minds etc., this leads to people who are remarkably alike in personality, since everyone is a distillation of their ancestors, and a lot of people have overlapping sets of ancestors.
* Apotheosis (MHA)), with his goal being the complete restructuring of hero society. The thing is, he's entirely correct that society judges based off powerful quirks rather than one's personality and merits, (citing the abusive Endeavor and Bakugo as examples), most heroes aren't for the sake of helping others, but rather for the fame and glory, the quirkless and impractical quirk users are heavily discriminated against, and nothing has been done to improve things. Also helping is that his actions as the story progresses, Izuku never harms innocents, empathizes for those with similar backgrounds, extols genuine heroes, and is willing to reinstate "false heroes" if they atone.
* Apotheosis, miracles run on this. If a god's followers believe something, then (assuming the god is strong enough) said god will gain it as a new miracle.
* Apotheosis series, Nickolai Rajastan's homeworld considers the pursuits of the warrior to be holy religious observances. Nickolai is disgusted at his need to sell his holy skills as a mercenary.
* Apotheosis series, Residents of Salmagundi all have their minds uploaded into the Hall of Minds at or immediately before their deaths, for later downloading by their descendants.
* A Potion of Speed ages the drinker by 1 year. One side effect given in the article is for the drinker to age 1 year per hour until a Dispel Magic spell is cast on them.
* a Potions accident turns Neville into a tyrannosaur and he steps on Bellatrix Lestrange.
* a pot of yogurt. It communicates both by speaking and spelling things out in granola.
* A power common, in one way or another, to all supernatural beings in the
* a powerful EMP that, coupled with an identical suit, allows Phantom Blot to enact a massive scam to procure funds to build the equipment for his newest plan, including the 3.0.
* A power named "Flawless Pickpocket" whereby if you can touch someone you can steal anything from them.
* a power of two, with 256 subpixels to one pixel being a common ratio.
* Appa and Momo are very good at detecting malicious intent in humans. Appa growls and reacts defensively towards the sandbenders (who later capture him) and Momo hisses at the pirate captain and his weird bird thingy. In fact, it's Appa licking
* Appalachia. Each novel is split between a murder case in the present investigated by Sheriff Spencer Arrowood and a historical case with some parallel or connection to it.
* Appalachian Mountains left to form the Southeastern Conference (SEC). The SoCon, which still had 10 members, mostly large and public, continued to thrive. However, in 1936, it added seven relatively small private schools, leading to more than a decade of conflict between large and small schools.
* "Appalling Visual Puns #1", one of four. Did you get it before the caption?

* Apparatus Infernum, Gunwood, tells Mikani and Ritsuko that if they can't solve the case by a certain deadline, he'll have to replace them, even though he knows it isn't really their fault.
* Apparatus Infernum, Mikani has a long list of ex-girlfriends, none of whom lasted very long and almost all of whom are now on bad terms with him. His developing relationship with Ritsuko is a break from the pattern and is considerably more solid even though it hasn't actually gone nearly as far.
* Apparatus Infernum, Ritsuko wasn't set up with one specific partner but was given a list of choices who would not be unacceptable to her family. As of the start of the series, she has just given up on the last of them, which is within her rights but has left her family Very Disappointed to the point of ostracism.
* Apparatus Infernum there was, both of them were just wasting their time.
* Apparatus Infernum, the setting makes extensive use of magic and technology in concert — in particular, elementals (fire, air, etc) are harnessed to power steam-era technology like trains. The foundation of this magitek is shakier than assumed, however, and becomes directly relevant to the plot in the second book, when the elemental-based tech starts misbehaving and the protagonists have to find out why.
* Apparatus Infernum, they do reasonably well. This is noted to be unusual for Mikani, whose numerous ex-girlfriends seldom end up on speaking terms with him.
* Appa reflexively, creating a giant, destructive tornado from the desert sand - all while tears are streaming down his face. Katara manages to snap him out of it though.
* apparent addiction to lactose. His underclassman, Vorona, also has a liking for sweets.
* apparent bed-hair, as she is frantically apologizing for oversleeping at the Djose Temple. Much to her surprise.
* apparent death at Vader's hands. It's more a gesture of sympathy/comfort, but it still fits here.
* apparent death during a bombing of his AP photographer girlfriend in Chechnya, who later turned out to have survived and was actually a French spy forced him to confront what he had lost, for the first time in the series Casey openly warned Chuck about letting Sarah slip away, and openly showed support for his feelings for her.
* apparent flaws in his character, and the placement of this appalling subplot simply highlights Joseph's virtues all the more.
* apparent killed Batman, set up mob boss Rupert Thorne, and made a fool of The Joker.
* Apparently a chronic habit of the girl from verse three of C+C Music Factory's "Things That Make You Go Hmmmm". Either that, or she honestly doesn't know the definition of "virgin".
* Apparently, aged cells have shorted telomeres compared to new ones, which means that they won't be able to replicate as much as a "newborn" cell will over its lifetime. Besides that, DNA is unstable and only stays mostly intact when you're alive, so the extraction and freezing processes to preserve it actually damage it. Since the last Pyrenean Ibex died in 2000 and the clone wasn't made until 2009 (and even the first attempts was in 2003), there was little chance that the DNA would even be viable anymore. For this same reason, many biologists doubt that long-extinct animals like the wooly mammoth will ever be successfully cloned.
* Apparently, a heart that was two sizes too small was responsible for
* Apparently all Corellians find statistical analysis abhorrent, due to the method in which Han Solo told C3PO to shut up in
* Apparently all droids have a full set of male genitalia installed, because smuggler's
* Apparently all of Blake's books are smutty; Nora often blackmails her into doing stuff just by loudly describing the plot of whatever book she's reading at the moment. And while everyone knows Blake hides her smut under her bed, this is apparently to distract everyone from the other books she hides elsewhere, which are
* apparently a mindblowing experience, and then to explain Red XIII's father's

history to him. He later turns up to explain to Cloud what Holy is and the risks of unleashing it, which Cloud counters by explaining to him what Aeris must have been up to.
* Apparently Anakin Skywalker programmed his translator droid to do this. When the rebels are captured on Endor and are about to be eaten by the Ewoks. The only one not tied up is C-3PO (since he can't be eaten). Cue Han telling him to "Do something!". C-3PO improvises a
* apparently, and it's never quite clear if what he's seeing the result of the drug or what it actually looks like. He could be a deformed human, a human altered through some unusual methods, or a member of some other race entirely.
* Apparently androgyny is a racial trait, as V's spouse and children are also androgynous, and according to the translation, the Elven language does not have gender-specific words, referring to V as
* Apparently, Annie learned it from her father, Anthony, who spoke this way when he was her age:
* Apparently, a pile of shoggoth(s?) grew some tongues for the specific purpose of sticking them onto a glacier when teleported to the Antarctic by the Elder Things in
* Apparently Arnold Schwarzenegger had qualms about saying the historic "I'll be back" line, since he, as an ESL foreigner, would never use contractions. Fortunately, James Cameron recognized that "I will be back" just didn't have the same ring to it.
* Apparently, as clarified further in the novels, he tried to execute a Hikaru Genji Plan with
* Apparently, as it is all that it takes to derail a train in a fiery spectacular fashion.
* Apparently, as train wrecks are one of the more destructive wrecks one can be in.
* Apparently, at some point in the past, Old Heterodynes meddled with time itself, but while doing this they discovered something that terrified even them, the worst Spark overlords that the whole continent trembled before. They turned their back on all the power they could possibly gain because of this.
* Apparently averted at first with the Sniper, who still speaks with his parents. The only hiccup seems to be his father's disapproval with his
* Apparently averted with Haven, amusingly: when you meet their officers, very few get their jobs because of having relatives in high places (although to be fair, after two revolutions the people in the high places change significantly).
* apparently banished from the school because his fellows believed his methods were too sadistic.
* apparently because her beauty was legendary among both Jews and Muslims, or face imprisonment and torture. She responded:
* apparently being barren isn't just enough, they had to pull it halfway through a wormhole, then force it back in while the wormhole collapsed on itself. Cybertron, at least in this continuity, is pretty much erased from existence.
* apparently be reversed... by tracking down the individual pieces, a process which would apparently take millions of years.
* Apparently, "Blue 32" is the only play ever used in football, according to TV. In real life, colors and numbers are usually meaningless unless the play must be changed after the lineup because of how the defense lines up - more often, such callouts are used to get everyone on the offense on the same rhythm and count so that they can start moving at the precise moment they're legally allowed to.
* Apparently, Bone is absolutely okay with being pushed around and being shunned by almost everyone.
* Apparently, Buster Bumblechops possesses something called a "snore-o-meter".
* Apparently, but rather the thinking man's erotic manga. The author insists he's not lying.
* Apparently,, but the jury is still up on whether she'd succeed in attracting any audience to the "browser everyone loves to hate".
* Apparently, buying a Garmin gives one the ability to transform into
* Apparently, by the time before Arnold Rimmer caused Red Dwarf's fatal accident,

humanity had learned to create a form of gin out of marijuana. They called it
* Apparently CERN was responsible. They destroyed the Earth in advance just to be sure the LHC wouldn't.
* Apparently, Cesar now has its "Sunrise" line, with such ingredients like bacon, eggs, steak, etc.
* Apparently continued to this day, where a simple handlebar mustache and a baseball cap was all Mr. Cavill needed to not be recognized at a comic book store. Only three people noticed him.
* Apparently cows have been known to mount each other while in heat, so much so that someone once invented a device which was glued to a cow's hindquarters and which popped up a little flag when such mating had taken place, as a sign to the farmer that it was time to fetch the bull.
* apparently created a final, Timeline-4 in which things worked out - though the show was forced to end quickly with a truncated fourth season, and the showrunners insisted that he planned out a longer storyarc than that.
* Apparently cut out from the American version; Goku also pats Chi-Chi in that area with his foot when he first meets her, to confirm that she is indeed a girl. This, of course, leads to him being pushed off the Flying Nimbus by a very embarrassed
* Apparently Dan O'Bannon had a thing for working on films involving this sort of thing. Prior to doing special effects work for
* Apparently decades ago (in the current series timeline) a brilliant billionaire industrialist/scientist designed robots that perfectly emulated
* Apparently, Ed and Al used to have this in their childhood, fighting over who would marry their friend Winry, who wasn't interested in either of them. Eventually, Winry did develop a thing for Ed and Ed returned her feelings in
* Apparently Eric and Ernie objected to the original bed sketch precisely because of the
* Apparently, everyone saw different things, based on nightmares they'd had. Like a boggart from
* Apparently every single person in the film besides the band themselves has died by the time the commentary is made. A few times the person making this claim is challenged on how they know that, and the gag is even extended to when they visit
* Apparently, except for Mazer Rackham himself, nobody over 12 is competent to command in the
* Apparently existed as far back as 1691 in Japan: according to Doctor Engelbert Kaempfer, who visited the Dutch embassy in Japan and wrote about his experience: "They made us kiss one another, like man and wife, which the ladies (of the court) particularly showed by their laughter to be well pleased with".
* apparently far from humanoid. The suit serves both as environmental protection and a translator/speaker unit, as the Gaim are incapable of vocalizing most species' languages.
* Apparently for trolls, saying hello involves a firm smack on the head, while a friendly handshake is actually an severe insult to their mother.
* Apparently, found her too unpalatable to eat even when he was starving.
* Apparently genetic resequencing is allowed for medical purposes such as preventing birth defects, but forbidden for "cosmetic" or "augmenting" reasons. In the
* Apparently, German libraries have a long tradition of keeping locked rooms known as the "giftschrank" (literally "poison cabinet") which contained censored writings considered to be hazardous (heretical writings in the past, Nazi literature more recently). In some libraries, the doors have dual locks with keys held by two separate staff members to ensure that only authorized people can access the works.
* Apparently getting Batman to sing was something that they were trying to do from the beginning because the voice actor
* apparently going to happen Hisashi Midoriya, who has so far only received a passing mention in episode 1 (in which he wasn't even named).
* Apparently happened in the backstory between Captain Smollet and Benjamina Gunn (Kermit the Frog and Miss Piggy) in

* Apparently happens to Anna, the protagonist of the fictional story "An Imperial Affliction" within
* Apparently he didn't learn his lesson the first time, because Elias takes it to the extreme when
* Apparently he has warmed up to this. In later chapters he also does cosplay of his own webcomic.
* Apparently, he lied about being a Vietnam vet. Who knows how old he really is...
* Apparently, he really is sentient and cares for Doofenshmirtz. Or maybe it's just his super-suit
* Apparently Howard and Raj once got drunk at ComicCon and ended up in an intimate threesome with a three-hundred-pound
* Apparently Human MerfolkPeople who look human, but who can breathe and live underwater.
* Apparently, human spellcasting classes—some of them, anyway—in the
* Apparently if you are a Pittsburgh Penguins fan, you can't be a true pure fan because you only liked them when Crosby and Malkin came into the team. The same thing happened when Lemieux came over.
* apparently is his great-great-grandfather, Héctor's jaw drops so far that his eyes fall into his mouth.
* apparently, is that he was killed by such an astonishingly colossal dweeb.
* Apparently, it involves making sure the Don stays at the school, as he has a part to play in a coming Apocalypse-level event.
* Apparently, it is not okay for Chloe to protect Clark's secret from Lana but it is okay
* Apparently, it runs in the family. Apple Bloom is also a terrible liar. For example, when she was "explaining" that Granny Smith couldn't come to class because of a family emergency, she involuntarily gave a nervous smile and her eyes started shifting. Apparently, she can cross "poker player" off her list of cutie mark attributes.
* Apparently it runs in the family: in the episode in which George's dad appears, he points out a spelling error in his own obituary.
* apparently, it's common for demons to enjoy a 'Comedy Roast', an art form supposedly invented in the Bad Place that consists of insulting humans in cruel and humiliating ways, up to and including calling Jason dumb, saying Tahani's life was pointless and empty, mocking Chidi and Eleanor's complicated romantic situation, and hammering down her throat once again that Eleanor is a terrible person who deserves eternal torture.
* Apparently it's common for mad scientists to have a theme to their inventions. In fact, one of Penny's distinguishing features is that she
* Apparently, it's for the best that nobody looks into a Newfoal's mind in
* Apparently it's getting so bad you can't even doubt one's knowledge of
* Apparently, it's not unheard of for people to visit an emergency room after mistaking a tube of superglue for personal lubricant.
* Apparently it's possible to order one too, according to this Sears commercial.
* Apparently it wasn't just a temporary fix, because in all his subsequent appearances Cohen is still in the
* Apparently, Jango Fett gets this in his armor's gauntlet as well... which he used to try and disintegrate Mace Windu.
* Apparently, Julian Assange feels this way about his organization, which he more or less maintains total control over and runs from the top down. Telling quote:
* Apparently Kate Mulgrew is a pool shark. So at the post-climax scene they are in a bar on the holodeck where Tom asks the captain to play pool. She claims that's she never played before... right before cleaning all of them out.
* Apparently, Kazuya doesn't win the "Father of the Year" award either since he's willing to harm his own son, Jin Kazama. Granted, the Mishima family is cursed with the Devil Gene and Kazuya is very open in accepting his heritage as it makes him stronger.
* Apparently, Keitaro and Mutsumi are based on Akamatsu and his wife, even though the main heroine is Naru.

* Apparently, King David's ancestors Ruth and Boaz were another of these match-ups. In fact, when Ruth says that Boaz should marry her according to the local laws, his immediate response goes by the lines of "well, no matter what the law says, I'm an old man already so you shouldn't seek
* Apparently learning nothing from this, they proceeded to repeat the "you can't have a show without a villain"
* Apparently, Leoš Janáček thought the ending of his opera
* Apparently Lord Halifax, Britain's pre-WWII foreign minister, at a meeting with
* Apparently, Luke's overprotectiveness rubbed off on his student, Jacen Solo. It doesn't annoy his girl, Tenal Ka, as much.
* Apparently magic circles are actually of use, but don't require elaborate ritual: to prevent fallout from a magical duel Nanny Ogg uses the side of her foot to draw a big rough circle around them, confusing the apprentice witches who thought elaborate diagrams would be needed. Possibly subverted, in that the circle itself was meant to prevent the spectators from crossing into a zone boiling with magic
* Apparently, Manchester United assistant manager Steve McClaren had asked his boss Sir Alex Ferguson whether United would return to 4-4-2 (from 4-3-3) in extra time. Ferguson replied "We'll win it before."
* Apparently, most of the events did really happen but Lamminger died
* Apparently nearly every sentient race has developed a dish almost identical to Swedish meatballs. When G'Kar comments on this, his response is.
* Apparently nobody at the Boston Globe's advertising department bothered to listen to
* Apparently, not everyone in Canterlot lives the high life, and some live in rather dilapidated buildings, leaving open room for stories about class struggle in Canterlot.
* Apparently not, given that during the Peter Davison era and again in the Eleventh Doctor story
* Apparently, not just guys, but even disembodied spirits want sorority girls. In the ending of the first book of
* Apparently nudity is not so taboo in the future, as the main cast of
* Apparently, only a very good violinist can pull off playing badly for comic effect. A
* Apparently played straight as of the Advanced Race Guide, which includes character options for both elves and dwarves which divide up their favored enemy bonuses between the standard orcs...and each other, thanks to the usual ancient grudge. And according to the "Ask Merisiel" thread, the Iconic Rogue, Merisiel Sillvari,
* Apparently poppy seeds were used to great effect in Greece, as they had the additional benefit of putting the vampire to "sleep".
* Apparently Powerless Puppetmaster so that they can avoid being assassinated while still being able to manipulate events as they please.
* apparently) prefers to work in solitude and keep his distance from the others. But that's understandable since he is destined to live alone, guarding the Master Emerald.
* Apparently "Rae Sremmurd" (the name of a rap duo) is to be pronounced "Ray Shremmer". Why they thought this was cooler than "Ear Drummers" is uncertain.
* Apparently, Rick Moranis also ad-libbed a few of Wayne's scenes with Adam in
* Apparently, Saki became somewhat of a popular baby girl name back when
* Apparently, Satan likes! At another time he sets up his security to maximum, orders no visitors, etc. so that he can watch that show.
* Apparently several vengeance demons were very impressed by Willow's
* Apparently, Shadowhunters can also use magic to some extent, because Valentin was very experienced in the use of black magic.
* Apparently, Shakespeare wasn't the only Klingon on ancient Earth, for there has been
* Apparently shortly after the song first hit the charts, some higher-up in the U.S. Navy wanted to use it in recruitment ads, until someone filled him in on

* Apparently, singing the jingle in State Farm commercials can make State Farm representatives materialize into the area.
* Apparently, space bees explode whenever they hit something at high velocity.
* Apparently Spitfire, the no-nonsense leader of the Wonderbolts, knows no less than one hundred and twelve separate butt-related jokes.
* Apparently Stern was pleased with the results, as in 2012 they unveiled "The Pin" line of consumer-oriented bargain tables, sharing a common cabinet and playfield design.
* Apparently superfluous usage from episode "The List": Jaime and her partner, sneaking down a restricted corridor, see that a security guard
* apparently survived the battle-damage just long enough to get there and die smiling.
* apparently synonymous with being evil. Scylla and Medusa are both well known examples: women who were cursed for things that weren't their fault and became vicious and destructive as a result.
* Apparently? That anyone who wouldn't work with her, was obviously against her.
* Apparently the brand name is "Rich Chocolate Ovaltine" even though the "Rich Chocolate" is clearly
* Apparently, the cows die of natural causes, and very specific areas decay and get guzzled up by maggots first, often with scalpel-like precision.
* Apparently the Death World of Catachan is pronounced "cat-a-can". No idea why.
* Apparently the default state of quite a few authors, such as Australian fantasy authors
* Apparently, the designers of the Vaults figured that a pornstar's brain is a good choice to run a computer.
* Apparently, the Dutch Prime-Minister Gerbrandy was notorious for his bad comprehension of the English language, resulting in some hilarious incidents while the Dutch goverment was in exile in London during the Second World War. The most famous language mess-up supposedly happened between Gerbrandy and Churchill. The Dutch word for 'jump' is 'spring' and if a Dutchman were to ask someone to jump up, he'd probably say 'spring eens'. Which, when said quickly, sounds a lot like 'spring is'. So when Churchill commented to Gerbrandy 'Spring is in the air!', Gerbrandy replied puzzled 'Why should I, mister Churchill?'
* Apparently, the eruption of Vesuvius was caused by a Roman warlock named Zaccaria Innocenti when he launched a dance spell.
* Apparently, the fact that Sandra Bullock's character was pregnant at the end of
* Apparently, the Foglios were on a separate task for the university when they encountered Agatha, and Kaja, who had not yet picked a research subject,
* Apparently, the Heir of Slytherin at the time, Corvinus Gaunt, managed to interfere with the project enough to protect the original trapdoor and transfer its hidden-language wards to one of the sinks, which raises the question of how a teenager was able to do this, much less without anyone noticing, much less a member of
* Apparently, the intelligence-boosting microchip that Dr. Robotnik was researching in "Grounder the Genius" had only a one-in-a-million chance of being successfully created. Once that one was inevitably destroyed, his computer informed him that he'd be once again subject to that probability if he were to try to recreate it.
* Apparently their normal forms aren't entirely without taint either. When a band of human bandits approaches to rape Teresa, several of them turn off-screen and vomit upon seeing her begin to disrobe for it. Proof that they are already on the path of being ugly. Then again, the Organization does have to implant the Yoma flesh into them in the first place – that could have just been scarring from the operation that they were seeing.
* Apparently the Japanese navy knew they couldn't win, but asked to go on one last mission to
* Apparently, the lines "I feel like your roman candle / Do your stuff while the empire falls" mean that she's volatile, like a firework known for injuring its users, and her partner is unfeeling and sadistic, like the Emperor Nero who is said

to have played his fiddle as his city burned. And they revel in it.
* Apparently the main character's bathtub faucet is linked to a tense music cue (the resurgence of which leads the main character to remark "Damn faucet keeps turning on all by itself").
* Apparently the Marauders, especially James and Sirius, were prone to this during their Hogwarts days, being described as forerunners to the Weasley twins.
* Apparently, the MIB aesthetic was selected for its similarity to the stern, black-clad male cheerleaders used in the Japanese game
* Apparently the motivation for the founding of Shelbyville was a disagreement between Jebediah Springfield and Shelbyville Manhattan over whether to legalize cousin marriage. At one point Bart escapes a bunch of Shelbyville kids by
* Apparently the Playstation consoles and Xbox consoles had one of these according to
* Apparently, the process has been going on for a while. Shirl, a young woman, can only vaguely remember funerals as "a ceremony".
* Apparently there are several others, to the point that an exasperated She-Beast states that the last thing the school needs is another catgirl.
* Apparently the reference to Will being a eunuch was also an improvised line that was kept in the script, and expanded upon as a
* Apparently there's an old joke about how you can tell when someone from a deceptive species is lying. It's "whenever they open their mouth", and the species mentioned in that joke are Bothans, Hutts, and Humans.
* Apparently, there's a porn website named "Big Sausage Pizza" (which as discussed in the link there, has a really stupid premise).
* Apparently there's a Spanish business named "Servicio de Hosteleria Industrial de Terrassa" (Terrassa's Industrial Catering Service) that uses the acronym S.H.I.T. in its sign. Surely the English speaking tourists get a chuckle of it, but it probably is funny even for the locals, because although fluency in English is not widespread in the Spanish population, most of them know enough to understand what "shit" means.
* Apparently there's nothing as funny as the first time you see a waffle house with the w missing, but for some tropers it may be unclear why.
* Apparently the result of drinking "the perfect drink" as brewed by
* Apparently there were actual magic-workers on Gallifrey in the days before they were Time Lords, according mostly to supplementary materials that don't quite count. There was war between science and the magical regime, and the dubiously canon "genetic looms" on which Time Lords are made because they can't breed are necessary because of the old dictator's
* Apparently there were a surprisingly large number of people walking around in that area, in the 1st century, healing the sick. It's just that all the other miracle healers took the credit for themselves, as in "I did this", whereas the J-dude said that he was merely channeling a higher power.
* Apparently the same was true with Katniss' mother and father. Peeta first saw Katniss when his father pointed her out to him on the first day of school. He wanted to marry her mother, but she fell in love with a coal miner — Katniss' father. When Peeta asked why, his father stated that when Katniss' father sang, even the birds stopped to listen. On that same day, when Katniss volunteered to sing in front of the entire class, even the birds stopped to listen — and at that moment, Peeta was a goner. There wasn't going to be anyone else for him after that.
* Apparently, the Savoy Hotel in London has some sort of special allure for gentlemen who would check in, order the finest room service, then down an entire bottle of sleeping pills.
* Apparently the ships are so organic that the Manta fighter is about as intelligent as a smart dog based off of some text in-game, technically making it an
* Apparently, the TARDIS doesn't translate when another translator is in use. Case in point, Sil's translator in
* Apparently, the wrist-mounted cell-phone-like communicators ubiquitous among the main characters were a classified military technology and unavailable to the

general public.
* Apparently this also happened to Edward II's brother-in-law the Earl of Hereford, who when fighting Edward's forces at the Battle of Boroughbridge proceeded to get a pike from underneath said bridge. Though, some historians question the truth of this one as well.
* Apparently, this attitude is contagious. Keiichi starts to act this way (most likely as a joke) when confronted with Shion in
* Apparently this happens to the alcoholic Fun Bobby all the time. As Phoebe puts it when describing a typical Fun Bobby story, "So I wake up, and I'm in this dumpster in Connecticut..."
* Apparently, this is a common risk with anyone who bears the Curse of Achilles. You're more powerful and resilient in battle(barring a single weak spot that is a necessity for the curse to work), but it's basically accomplished by cranking your body
* Apparently, this is also the case with Shirogane, a working-class citizen and one of the "impurities" among Shuchi'in students, pursuing Kaguya, a wealthy girl who is heir to the powerful Shinomiya Group. His constant efforts to defend his first place in examinations and earn distinction as the
* Apparently, this is done to make it easier for a modern reader to understand. The Orcs in particular are said to be using a "degraded" dialect that the narration flatly refuses to render accurately.
* Apparently, this is what happen to humans coming in contact with the mysterious being
* Apparently this (literally) is the premise of a Finnish Swedish-language comic called
* Apparently, this runs in the family; his father is the bad-ass Admiral Aral Vorkosigan (the
* Apparently this was among the torture techniques employed in Roman Times until
* Apparently, to Mr. Rosewater, "futuristic" means "shaped like a 1950s CRT TV frame". For the quasi-medieval MtG, that
* Apparently, "to wed" (Or some form of marriage word) comes from the same roots as "gamble".
* Apparently used during training of British special forces personnel. Accounts of SAS trainees tasked with staying alert on a stake-out, often in a cold uncomfortable place where nothing really happens for several hours at a stretch, refer to women throwing off their outer clothing without warning — just as the incident happens they have been tasked with observing and accurately reporting on. If they are distracted by the sexy and fail to notice (for instance) the person they have been sent to observe leaving his home and getting into a car, or the handover of weapons/explosives — they've failed. And then learn that failure is not a desirable option.
* Apparently, very few people have been told about the existence of the
* apparently wasn't dangerous enough, even with the magical tooth caps that let him inflict lightning damage when he bites things, so a benefactor sends in a loot box that lets them fit his wings with chainsaws that activate when he flaps them. Because that will definitely end well.
* Apparently, whenever Harry outgrows a pair of glasses, he sees fit to replace them with a slightly larger duplicate.
* Apparently when the carnivores or "life animals" first encountered the herbivores or "nature animals", some form of magical "survival instinct" triggered causing the carnivores to view the herbivores as objects of protection, rather than potential meals even though the historical account just established that the carnivores would eat each other to survive. It remains to be seen how much of this account is factual versus mythical versus revisionist history but, needless to say, the current story flies in the face of established predator/prey behavior observed in nature.
* apparently with its fusion reactor and weapons still intact), then piloted the mech out to stop the raiders (who had mostly Industrialmechs with jury-rigged weapons, which was why he could take them on with a single Battlemech).

* Apparently wolves, like humans, have the potential to become sorcerers, who get functional immortality and
* "Apparently working" nothing. His family actually comes in at one point to see how things are going. When Phase calls for them to help, they ignore him at first and then quickly leave.
* Apparently you can make any gun fire backwards if you stick your finger in the barrel. (As the
* Apparent murders were discovered to be the results of suicide pacts in both "Blood, Sweat and Tears" and "What Schemes May Come."
* apparent the high speed clash in fake slow motion. Krillin and Roshi had a whole conversation, argument and rock-paper-scissors match in apparently nano-seconds.
* Appare-Ranman! found it hard to tolerate the angsty backstories and morals, and those who might have been interested in the characterization found it hard to take seriously because of the more out-there elements, and the series' sales suffered because of it.
* Appare-Ranman!: The premise of the story is a country race that spans from the starting line in Los Angeles to the finish line in New York City.
* Apparitional: Joel and Kate have been trying to have a baby for a long time, but haven't had any luck in doing so. Some person in a diner says it's because she has phantoms inside her body preventing it from happening.
* Apparition allows you to go virtually anywhere (Hogwarts building and grounds being a notable exception, although how easy it is to protect an area like this is never explained) but it's dangerous: you might leave body parts at your starting point. And there are charms that can prevent wizards from Disapparating as well. House elves have their own version of this which
* Apparitions is a six part BBC drama about a Catholic priest, who examines evidence of miracles to be used in canonization but also carries out exorcisms.
* Appa's Lost Days. Appa also encounters buzzard wasps, wasps the size of a condor with a turkey vulture's head.
* "Appa's Lost Days" explained where the main character's pet had been and who he met along the way since his four-week disappearance following his kidnapping.
* appealing to scrubs for trying to make VS mode more fair. The criticism only accentuated since its release: Both maps can take around 15 minutes each to complete and are a bit longer than a standard map that takes 10 minutes each. The finale is tougher than the other finales, which will cause restarts.
* Appeal to a pastoral — Much genre fantasy, of all genres, appeals to the pastoral ideal, one reason for the pseudo-medieval settings. Even urban fantasies will quite often depict cities as blots on the landscape, whose denizens are blinded to what really matters by material ephemera. There are some fantasies, however, which either deliberately take the opposite stance or present a more balanced worldview.
* Appeal to AudacitySomething is declared true because nobody in their right mind would make up such a ridiculous story if it were false.
* Appeal to Authority ago for whatever reason(s). Find the crank in a field when the consensus is overwhelmingly against you.
* Appeal to crank, discredited, or irrelevant sciences. Some healthcare products are currently appealing to quantum mechanics. They're not only getting the physics wrong but the physics they're invoking just doesn't matter when you move up from pions (not ions) to physiology.
* Appeal to Familial Wisdom: My relative told me this, so it must be right.
* Appeal to Fear: Be afraid of what will happen if we aren't in control/of those people we don't like/of us and what we can do to you.
* Appeal to Fear: I have to agree, because if I don't something terrible might happen!
* Appeal to Force against unfriendly forces without actually shooting at them.
* Appeal to Force Davos Seaworth that he did love his brothers and wished for their appreciation, he is saddened at their death.
* Appeal to Force: I'm in charge here, and you better follow my orders and agree with me or else I will hit you!

* Appeal to Force: Someone uses the fallacy that they can use force to get their way.
* Appeal to Inherent Nature: Excusing horrific actions with the reasoning that it is normal for you to do such actions.
* Appeal to Inherent Nature: That's just the way things are. It cannot and will not change.
* Appeal to Inherent Nature: You disapprove of the way we righteous people act? Tough; it's how we are, and you ought to get used to it, fool!
* Appeal to Nature: Anything that is natural is good, and anything that is not is evil.
* Appeal to Nature: It's good because it happens in nature and/or bad because it doesn't happen in nature.
* Appeal to Nature: Works claiming or implying it to be true generally fall on the side of Romanticism. If the fallacy is exposed instead, it is more in line with Enlightenment.
* Appeal to Novelty: The newness of an idea or belief adds to its currency, on the basis that knowledge accumulates progressively over time, and therefore current ideas are drawn from more accurate and detailed knowledge. Works claiming or implying this to be true are more common amongst the idealistic, Continental strains of the Enlightenment tradition. If the fallacy is exposed, it's more in line with Romaticism.
* Appeal to Novelty: The new way is how we should do things vs. the old way is how we should do things
* Appeal to Novelty, the old ways must be destroyed by any means available, and the old structures must die because they're evil!
* Appeal to Obscurity status for being obscenely difficult to spell), usually justifying such behavior by saying "I've been spending too much time here".
* Appeal to people's insecurities and fears. Bonus points if you can make them feel insecure or worried about something that perhaps they didn't before.
* Appeal to Pity: Attempting to make someone feel sorry for either the arguer or the subject of the argument, in order to convince them to accept the argument, regardless of its validity.
* Appeal to Popularity: How do we know we're right? Because there's lots of others who think just as we do! If we were wrong, somebody would have realized it by now.
* Appeal to Ridicule: Your arguments are not well-thought, which makes it worthy of being scorned and mocked.
* Appeal to Tradition: A flawed argument based on the premise that something is good as long as it's traditional.
* Appeal to Tradition: If we're right-wing, we say all modern thought and novelty is destroying society, and that only in traditional values and the past can we find security and truth.
* Appeal to Tradition, reviving dead titles, and past glory, rather than remain in the unified 7 Kingdoms. Daenerys Targaryen believes that the throne belongs to her by right of blood since her father's throne was usurped, and whose tyranny she is generally in denial about. Renly Baratheon believes that since everyone likes him, and since he commands a large force he should be King, law of succession be damned. Stannis Baratheon is Team Enlightenment, in that he seeks to restore rule of law, order and reform Westeros, wants the Throne because of his legal claim and duty. He also agrees with his Hand that, "A King protects his people, or he is no true King at all."
* Appeal to Tradition: There is nothing new under the sun, if it ain't broke, don't fix it, etc. More common in the conservative strains of the Romantic tradition.
* Appeal to Worse Problems? There are far worse problems in the world!
* Appeal to Worse Problems: Why should we care about your petty, First World misfortunes?! Don't you know children are starving in Africa?
* Appearance Angst: Many people feel distress over the physical changes brought about by the aging process.
* appearance. Can be justified by her growing during the time gap, though.
* appearance. He eventually becomes a card-carrying human. Not figuratively; he was

always human, he just now literally carries a card to prove he's human. In later books there's speculation he might be part goblin, and he's apparently fairly attractive by their standards.
* appearance, he's still constantly crying, but he's seen with an angry scowl more often.
* Appearance Is in the Eye of the Beholder: A being whose physical appearance differs depending on who is looking at them.
* Appearance Is in the Eye of the Beholder: How you look varies depending on who's looking at you.
* Appearance Is in the Eye of the Beholder: The physical appearance of a being depends on who is looking at them.
* appearance of eating in order to better fit in during socialization. Since he's a shapeshifter whose true form is a gelatinous liquid, he forms a cup in his hand (made out of himself) filled with a beverage (also made out of... himself) which he then "drinks", reabsorbing his own mass.
* appear brought the 13th Company back from the Warp to Fenris to help fight off a Chaos invasion.
* Appeared as an American soldier accompanying the Comedian in the Vietnam War scene of
* Appeared as a soldier/mercenary protecting the evacuation of the Capitol in the opening of
* , appeared at the 1992 Summer Consumer Electronics Show as a playable demo, but was never finished.
* appeared, due to circumstances, naked before Donna Noble. However, he was quite enthusiastic about it.
* Appeared in some comics of the 1990s, with some of Bruce Wayne's high-society friends still saying "old boy" and other faux-British expressions, even though it hadn't been fashionable to say such things since the 1930s at the latest. Of course, since Wayne is a
* appeared in the series proper. Due to budget problems, the producers often wound up using Stock Footage of the prototype model during the series. Take note of scenes were the familiar white spheres on the ends of the nacelles have disappeared with a pattern of holes in their place, as well as unlit frontends of the nacelles with spikes attached, both of which indicate you're seeing the prototype model.
* appeared on the radio talk show of fringe End Times conspiracy theorist Rick Wiles. After Wiles suggested that the head of a progressive religious freedom group be "met in a dark alley by a couple of special forces commandos and given an attitude adjustment," Starnes promptly chewed him out over his rhetoric and ended the interview.
* appearing as paperwork that they have to fill out. It takes Xander some time to realize that both are just how his mind interprets things rather than how they truly look.
* appearing in the real world. The game is quite old even in-universe: the arcade cabinet is covered in dust and was made before the fall of the Soviet Union.
* appearing more competent that he actually is. But then again, his real identity is Fethry Duck.
* appear painted in Nod Colors on-screen, but people still believe it's GDI. It's likely done because, in a world where you have space stations, it's fairly easy to Photoshop evidence, so they had to use actual witnesses.
* Appears again in the "Pandora/Linchpin" two-parter, where a genius (and slightly eccentric) economics professor discovers a possible catalyst for world war 3.
* Appears again in "Windbreaker City", in which the cops are invited to a terrorism training exercise for federal agencies only to be looked down on by everyone else present and discover that they're assigned to be the hostages. They eventually end up rebelling and freeing themselves, only to
* Appears and is lampshaded in another episode. After Joey's erotic dream about Kaiba, water is shown dripping from the end of a leaf in an extremely suggestive manner. How this was supposed to be interpreted in the original is anyone's guess.
* appears as an actual character collections, and got beaten up with a baseball

bat. He was even eaten by a "Ratterpillar" to end a recent wonderland arc. Also, any time there is a pun strip, it will typically end with one of the characters, usually Rat, threatening or otherwise mocking Pastis.
* appears at the end of each episode. His entire shtick is that he makes silly complaints while talking in a Swedish accent.
* Appears in "Another's Sorrow" when Mithian comes to King Arthur (now married to Guinevere) for help. It's handled quite maturely: Gwen never shows any jealousy or suspects that Arthur is acting out of feelings for Mithian and Mithian never tries to seduce Arthur or cause trouble for the marriage.
* appears. In some cases, it's actually considered a legitimate coping mechanism.
* Appears in some spam for "male enhancement products": "Present to the girlfriend unforgettable night! Make happy the girlfriend! Charge by sexual energy!"
* Appears in the short story "The Mangler". The victim has his hand caught by the eponymous machine and is slowly pulled in. Another man discovers that the machine cannot be turned off, so he lops the victim's arm off with a fire axe.
* Appears in Whiskey Wry Productions one-hour sketch comedy "A Sack Full of Coal."
* Appears most frequently in the third book with current villains' battle cries:
* appear, so their ability gets a lot of mileage. In Mokou's case the player gets to see it firsthand, as in her boss battle she dies and resurrects after each of her spell cards.
* Appears throughout Season 7 with the Potentials. When the army of Potentials storms both the winery and the Hellmouth in the series finale, they take massive losses.
* appears to, 52 weeks. Talking to a doula, OB nurse, or OB/GYN doctor, you'll find that at 42 weeks they'll start talking seriously about inducing labor, since at that point the length of the pregnancy is getting dangerous for mother and child.
* appears to be a completely unremarkable arming sword to the untrained eye, and completely unlike what one would expect from an incredibly powerful magic sword - something at which, remarkably, it succeeded. That's pretty darn cool.
* appears to be asleep". He could be faking sleep (which could be indicative of insomnia, anxiety, etc). The nurse would have no way of knowing if he really is asleep without hooking him up to a bunch of of unnecessary equipment.
* Appears to be happening with Marigold towards Angus, but subverted in the end for a different trope.
* Appears to be in the works, both as a straight and as a crooked subversion, in
* appears to be one, if the bleak island setting and numerous Lovecraftian abominations you mostly run away from or watch from afar helplessly are any indication.
* Appears to be Optimus Prime's primary function, explaining the writers' "it stands to reason" justification for the events that are already in motion or are about to follow.
* Appears to be played straight in the Benihana Christmas episode of
* appears to be the blog of a man named Lee Wilderson who turns into a woman.
* appears to be the coat, his coat being replaced by wings. It's possible his coat is supposed to be a visual reference to the wings he has in his true form.
* Appears to be the preferred unarmed killing technique of Cylons. Of course, they are stronger than humans. Examples include Caprica killing Boomer when the latter threatened Hera, Gina killing the guard outside her cell, and Boomer killing a Simon in the
* Appears to be true, and not just a House snark. At least we know from Cameron that he keeps his porn in the second desk drawer.
* appears to represent creativity and beauty based on the blue dream door
* appears to represent danger and self preservation based on the brown dream door
* appears to represent hard work and self reliance based on the red dream door
* appears to represent safety and neutrality based on the grey dream door
* Appears with aplomb in the Groggy Ring, a soccer/wrestling match with weapons banned. The referee is a crew member from the enemy team. Guess what happens? Eventually, Nami realizes that, if the bad guys can
* appear the event horizon, no change in time's passage is perceptible.

* Appear to fail to win in the most excruciating and humiliating way imaginable, and then come in first place.
* Appease the Volcano God: A group try to throw a character into a volcano to appease the volcano god.
* Appease the Volcano GodIsland natives try to stop eruptions by heaving human sacrifices into the volcano's crater.
* Appease the Volcano God: When it's done by throwing the sacrificial victim into a volcano.
* Appendage Assimilation: Regenerating limbs by stealing someone else's.
* appendix, the Shire celebrates an extra day named Overlithe, which occurs once every 4 years in the middle of summer (around mid-June).
* Appendix to the Handbook of the Marvel Universe, in 2004 he was hired for a version of the Official Handbook of the Marvel Universe, originally published in the 1980s and 1990s.
* Appetite Equals Health: Having no appetite means the character is ill, and being hungry again and starting to eat signifies they're getting well.
* Appetite Equals Health: Having no appetite means the character is ill, and being hungry and starting to eat means they are getting well.
* Appetite Equals Health: Not eating and not being hungry used to signify that the character is ill.
* Appetite for Destruction was first a painting by Robert Williams where a robot has just raped a girl. It was deemed too controversial and replaced by a shot of the band members as skeletons, painted by Billy White Jr.
* Appetite got the original idea for the comic from a dream she had where she was eating humans, including people she knew.
* Applause, Margo's number "But Alive" winds up in a bar in Greenwich Village, where she is acclaimed by the quite flamboyant and exclusively male clientele.
* Apple achieved success with the iPhone and iPad by deliberately avoiding the worst aspects of this trope. Both iProducts defeated more powerful and versatile competitors by offering
* Apple also doesn't have the rights to use the name "iPhone" in China, as it is a trademark for leather products there. Apple has been fighting a legal battle with the company that owns this trademark since 2012.
* Apple & Onion episode "Music Store Thief", the pair set up surveillance cameras at a music store to try and catch whoever is stealing all the instruments. Unfortunately, Apple aimed all the cameras at one guitar, the most expensive item on the store. When the cameras zoom out, everything else has been stolen.
* Apple & Onion: Falafel is a drop in landlord, often fixing the various objects Apple and Onion break. Falafel ends up becoming good friends with Apple and Onion, over their shared lack of family in the city, which explains Falafel dropping in to say high more frequently.
* Apple & Onion initially began as a miniseries before a full series was commissioned.
* Apple & Onion, when the duo is looking around Falafel's apartment for his key, they find some loose change and an expensive antique watch and throw them both out the window.
* Apple appears to be slowly moving away from this trope. They haven't introduced a new hardware product line with the "i" prefix since the iPad in 2010, and a software product since iCloud and iMessage in 2011.
* Apple. Apple has a category called "Unrestricted Web Access", which is mandatory. There's even a jump on the App Store, where infrequent/mild mature suggestive themes would give 9+, but frequent/intense would give 17+, which prior to the revamp, it was used for browsers.
* Apple, Ashton Kutcher followed a fruitarian diet similar to the real Jobs. At one point, he ended up being hospitalized for abnormal pancreatic levels (which is particularly unnerving considering Jobs had died from pancreatic cancer).
* Apple][, at one point you are locked in a room filled with gas (which the game presents by showing an entirely green screen). To get out without dying (and you have a limited time), you have to figure out the exit is on the southwest, a

direction atypical to text adventures at the time.
* Apple attempted to follow up on the commercial in the following year with an ad for the ill-fated Macintosh Office called "Lemmings", depicting a group of blindfolded office workers marching single file off a cliff while whistling "
* Applebee's also had a commercial with the implied message that eating at Applebee's was patriotic and all-American set to the first few lines of Creedence Clearwater Revival's
* Applebee's had a talking apple voiced by Wanda Sykes Hall. The character was discontinued after new owners took over.
* Applebee's once rewrote "Bread and Butter" to feature products it had on special. This was shortly before the chain changed hands...
* Apple Bloom appears in the very first episode, then doesn't appear again until episode nine. Twilight Sparkle completely forgets about AB's existence in the interim.
* Apple Bloom is more upset about not getting her cutie mark before she is (presumably) to be killed by Queen Chrysalis.
* Apple Bloom once steals Pound's diapers and puts them on, trying to remember her parents, who died when she was a toddler.
* Apple Bloom's cousin Babs frequently blows her bangs out of her eyes. Initially, because she had been bullied for her lack of a cutie mark, she would nervously cover her blank flank with her tail at the mere mention of marks.
* Apple Bloom's first appearance cemented her as a cute little sister. She has a big pink bow in her mane.
* Apple Bloom, Sweetie Belle and Scootaloo are three young foals who are members of the Cutie Mark Crusaders.
* Apple Bloom usually leads the Cutie Mark Crusaders as a charismatic leader, but Scootaloo can sometimes step up as a headstrong leader.
* Applebuck Season", Applejack keeps confusing ingredients, like potato chips instead of chocolate chips or fizzy soda instead of baking soda, for the cupcakes she is helping Pinkie bake due to sleep deprivation. What resulted is a town-wide food poisoning by "baked bads".
* Applebuck Season". Applejack tries to harvest all the apples in her orchard by herself, only to run herself ragged and cause chaos in town due to her sleep-deprived state. At several different junctures, Twilight Sparkle entreats Applejack to get some help, only to be rebuffed each time. Finally, after Applejack faints from realizing that she was barely half-done when she thought she was completely finished, Twilight begins another plea for Applejack to get some help, and Applejack agrees. Twilight, fully expecting Applejack to keep being stubborn, continues with "I won't take no for an answer," before she realizes what Applejack said.
* Applebuck Season" has a palette swap background pony from the same scene.
* Applebuck Season", her stubborn refusal to accept help after insisting she could handle her family's orchard harvest alone combined with her trying to meet obligations to help her friends ends in nothing but disaster all over.
* "Applebuck Season" of non-stop work). She finally accepts help when she assumes she was finished but finds that she only harvested about half the orchard.
* Applebuck Season She finally collapses from exhaustion after the revelation.
* Apple Cinnamon Cheerios - "It's Applelicious..." "...and Cinnamoncredible!"
* Apple][compared to its predecessor the Apple Lisa. The Apple I's obscurity is not entirely surprising, considering that only 200 were ever made and it was sold only as a build-it-yourself kit that didn't even come with an interface for loading software.
* Apple Computer got its start during this time too, although it wouldn't be a serious competitor to IBM until the mid-'80s.
* Apple Corps/Apple Records and Apple had a bit of an argument over their name, but since music and computers were distinct markets, both continued to use the trademark Apple. But when Apple Computer started selling iPod music players and distributing music through their iTunes store, Apple Records took them to court for stepping on their trademark. The Beatles wouldn't appear on iTunes until the

settlement nine years later, in which Apple Corps sold their trademarks to Apple, who re-licensed the marks back to Apple Corps.
* Apple created a linear actuator system called the Taptic Engine that simulates the "click" feel of a button when pressing down on something that appears to be a button or button like, such as the Macbook Pro's trackpad, the iPhone's home button, and the face of the Apple Watch. The feeling is very convincing that you're pressing a button. More bizarre, if you cover your finger with a cloth and try pushing the "button," it won't "click."
* Apple DIDN'T have the rights to use the name "iPhone" in Brazil. The Brazilian company Gradiente registered the name in 2000 when it planned to develop a cell phone with internet access ("internet phone"). Because Apple only wanted to register the name in 2007, the National Institute of Intellectual Property (INPI) decided that Gradiente would have the rights to use it since they asked first. In 2013, Apple and Gradiente agreed to co-own the "iPhone" trademark.
* Apple for Teacher: Apples and fruit are the gift most students give their teachers.
* Applegate Farms hot dogs has an ad where a bodybuilder dressed as a cow is applying to be made into hot dogs and eaten by a family.
* Applegeeks could probably qualify. She was originally built to be Hawk's "companion", but has plasma swords built into her forearms, and is ridiculous levels of strong. There's also her above-average fighting abilities, camouflage, and other non-standard items. Semi-justified because Hawk is the one who built her, and he is a gigantic nerd who would love nothing more than a robot girlfriend with the works.
* Applegeeks is a robot. She is also very innocent and very cute. "What kind of cat would you want?" "I want a lolcat!"
* Apple, Inc. headquarters is a framed Apple I motherboard with the caption "OUR FOUNDER".
* Apple is fond of saying "Mac - it just works". For people who have never had any troubles with Windows PCs, this is a reason Apple comes across as insulting and condescending.
* Applejack and Coloratura reflecting on their time in Friendship Camp. Prime fuel for writers who want to explore other characters going to summer camp now that it's canon in Equestria.
* Applejack and Rainbow Dash are great friends, but that doesn't stop them from competing against one another.
* Applejack, being the Element of Honesty, when she bluntly acknowledges how selfishly Rarity acted in "Rarity Takes Manehattan".
* Applejack brings it up very shortly afterwards, when they try to de-brainwash Rainbow Dash.
* Applejack calls her friends "Sugarcube", just as Rarity calls her friends "Darling."
* Applejack claims to be 50% less afraid than Rainbow Dash in "Castle Mane-ia".
* Applejack doesn't need Discord's help to be a bad liar — also in Party of One, she's perhaps the only one to have a decent, plausible, ready-made excuse for not attending the party (that being that she's busy harvesting apples). It still takes her a good few seconds of gazing over the acres of farmland, buckets of apples, and "um"ing and "ah"ing before she finally manages to blurt something out.
* Applejack does this to her little sister Apple Bloom in the "Sisterhooves Social" episode.
* Applejack ends up meeting Orangejack, and together they defeat their potential Nightmare-self, Nightmare Mirror.
* Applejack, Fluttershy, and Zecora are also mutants, though of a much less phenomenal degree than Rainbow. They possess the very common "Happy Tail" gene, and thus have
* Applejack gives one to Spike when he complains about the simple job Twilight does at the beginning of the episode, then tries to backpedal on his statement.
* Applejack gives Princess Molestia the following advise on how to increase her sex appeal:

* Applejack has a knee-length duster as part of her mahoushoujo outfit.
* Applejack has been paired with Grumpy Bear and Rainbow Dash with Funshine Bear in the surprisingly rare Care Bear/Pony crossover fan fictions.
* Applejack in "Pinkie Apple Pie" when she and her family plunge over a waterfall.
* Applejack is a less boisterous example, mostly. On a few occasions, Rainbow Dash can show shades of
* Applejack is annoyed at being referred to as a "Stallion" of Dedication, explaining she got stuck with the name due to ponies mixing her up with her brother.
* Applejack is down-to-earth and fairly simpleminded (she refers to French as "speakin' in fancy") but has enough business sense to run her farm without any economic problems.
* Applejack is on her brother Big Macintosh and motivates him with the
* Applejack is rather devastated during "The Last Roundup" when she fails to bring home first place in the rodeo championship, and the prize money to help fix town hall. Not helped by the fact that she had won the Ponyville rodeo ten times in a row but couldn't succeed when she tried to compete in Canterlot.
* Applejack is this for the Apple Family in Ponyville due to Big Macintosh's quiet demeanor.
* Applejack, one of the main characters, harvests apples by kicking the apple trees. She was originally to headbutt the trees, before Hasbro reminded the studio their primary audience is girls 6-10 years old.
* Applejack paired with one of the Flim-Flam brothers is also surprisingly popular. Usually with the former.
* Applejack picks one up when she has to go to Manehattan (again) in "Brotherhooves Social".
* "Apple Jacks" and "Cinnamon Toast Crunch" repeatedly has children mocking adults such as scientists, parents, life guards, etc. for being clueless and not understanding what the appeal of their cereals are. There was one Cinnamon Toast Crunch commercial where the adult guessed why kids loved it on the first guess, but the kids promptly ignored him.
* Applejack's brother Big Macintosh, which his younger sister Apple Bloom attributes to extreme shyness. In most instances, he only communicates by saying "Eeyup" or "Nope" in response to direct questions. At virtually all other times, his remarks are either similarly short and concise, directed at someone he's exceptionally comfortable talking to (such as Applejack in the beginning of "Applebuck Season"), or
* Apple Jacks commercials revolve around "No, it doesn't taste like apples... and this confuses grownups!" as a reason that kids should love it. For extra
* Applejack's cornfield spontaneously begins popping in the season 2 premiere of
* Applejack's hell was where she went home to a peaceful farm with all her family again, but began down the path of dishonesty when she had her own
* Applejack shows some of this — justified as she's never claimed to be a fighter. Though incredibly strong, fast and agile, she quickly gets into trouble when faced with the Changelings and
* Applejack slips into this for a couple of jokes. In "Sweet and Elite", she thought a garden party was about actual gardening.
* Applejack's little sister was originally named "Apple Butter". This name was likely the inspiration for the name of Applejack's
* Applejack's parents. Though they died in the human world, Applejack's mother is now a member of Soul Society as a Captain, and her father is still "alive" as the Fourth Espada.
* Applejack's regular voice is Benedetta Ponticelli, replaced by Renata Bertolas in the first season (except for her very first line in "Winter Wrap-Up", where Marisa Della Pasqua does the voice with Renata taking the role for her verse later in the song) and Maria Silvia Roli starting from Season 3.
* Applejack takes great pride in her cooking and it's generally well-received, though it seems to be
* Applejack uses a handy tree branch to catch up with Rainbow Dash in a race in

the episode "Fall Weather Friends".
* Applejack, who is very heavily implied (and as of "The Perfect Pear",
* Apple Macintosh had a "Boss" feature that brought up some fake correspondence that refers at one point to "Arkaholics Anonymous."
* Apple Macintosh). It was quickly changed to the industrial standard "OK".
* Apple Macintosh OS as opposed to the more modern, NeXTSTEP-derived Mac OS X/macOS, particularly those in need of a Digital Audio Workstation without the distractions and potential sources of latency that a preemptive multi-tasking OS would bring. It's for this exact reason that a late-model Quicksilver or Mirrored Drive Doors Power Mac G4 holds its value a lot better than the later Power Mac G5 - aside from the G5s being infamously prone to failure over the years, often a result of being ill-suited to dispersing the heat output of the PowerPC 970 G5, they cannot run the Classic Mac OS natively, and the Classic mode in OS X up through 10.4 Tiger (10.5 Leopard removed it) is not an adequate substitute.
* Apple Macintosh possess a chin nearly the size of the rest of his head
* Apple Macintosh's famous series of commercials featuring a hip, trendy "Mac" and an out-of-touch, dorky "PC" always ended with Mac having outdone PC, with PC usually none the wiser.
* Apple Macintosh the following year. While command-line interfaces would remain the standard for a few more years due their being computational expensive to use, the Mac put the writing on the wall saying that graphical interfaces were the future of how people would interact with their devices.
* Apple Music, a subscription music service. The iTunes application was also rebranded as Music.
* Apple of Discord: When an important object causes everyone to fight each other over it.
* Appleoosa is a 19th century American wild-west settlement, similar to those seen in
* Appleoosa's Most Wanted as the climax of a string of slapstick mishaps in his house.
* Appleoosa's Most Wanted": Most of the characters are convinced, erroneously, the Troubleshoes Clyde abducted the Cutie Mark Crusaders. When the sheriff and his posse arrest Troubleshoes, the fillies try to explain that he didn't abduct them, but Applejack cuts them off before they can.
* Appleoosa's Most Wanted", Scootaloo nudges Apple Bloom so that she'll ask her sister if they can participate in the rodeo events.
* Apple originally made a number of killer apps directly on the original Macintosh's launch — MacPaint, MacDraw, and MacWrite — that have been the gold standard ever since for WIMP GUI image editors, drawing programs and word processors. But it was the first WYSIWYG page layout program, PageMaker, that made desktop publishing possible and guaranteed the Mac's most lucrative niche. PageMaker was also a killer app for
* Apple owns the design for oblong-shaped electronic devices with rounded corners (though this one was invalidated in Germany).
* Apple Pie. Seven episodes were produced, but ABC only aired two of them.
* Apple's 2011 iPhone campaign stated that "If you don't have an iPhone.... well, then you don't have an iPhone."
* Apples are said by some people to have an effect similar to that of Welsh rarebit if eaten too close to bedtime.
* "Applesauce!" This is coming from Baby Herman, an old-timer in a toon baby's body. He uses euphemisms a few times in the movie. To be fair, "applesauce" was a common explicative in the
* Apple's bitten apple logo, which has gone through several color and shading variations, but has retained its distinctive shape since 1977.
* Apple's bitten apple, made a bit blander with the removal of its old rainbow coloration.
* Apple's business model seems to be built around trying new things and hoping enough things stick to keep them in business. While the company's history is littered with disasters (Lisa, Apple III, Pippin, etc.) they've kept going thanks

to some big hits: The Apple II lasted an amazing thirteen years, the iPod returned the company to prominence in the early 2000s, the iPhone has kept the company relevant as the personal media player market has waned, and the iPad caused the tablets to finally popularize. Their MacBooks have also risen in popularity since the mid-2000s.
* Appleseed. A heavily modified cyborg, Briareos is the only man to date that's proven able to handle his experimental Hecatonchires operating system that controls his cybernetics. Named for the legendary 100 armed giants of Greek myth, a Hecatonchires equipped cyborg could presumably operate an entire aircraft carrier by himself due to the incredibly advanced processing power it allows them. Briareos generally just settles for dual-wielding machine guns, or even quad-wielding when in his Landmate by holding two normal sized guns in his actual arms and two enormous rifles in the Landmate's.
* Appleseed and suspend the wearer in the torso of the armor. The Landmates' main outer "Slave Arms" follow the movements of the arms of the pilot, placed in smaller, form-fitting armored gauntlets which dangle outside the main body.
* Appleseed: Appleseed takes place in the 22nd century, after the non-nuclear Third World War has led to the destruction of a majority of the Earth's people. While countries like Great Britain, USA and China have difficulty maintaining order and power, international organizations like the "Sacred Republic of Munma" and "Poseidon" have been established in the aftermath.
* Appleseed are actually genetically modified human clones. They are identical to humans except for reduced capabilities to feel strong emotions and the lack of their cells ability to freely perform cell division. As a result they require regular injections to regenerate cells and lack the capacity to reproduce. Which is a good idea, as they are far more numerous than regular humans in Olympus. However Hitomi and Yoshi seem to be at least in a romantic relationship, though it's unclear if it is also sexual.
* Appleseed black — as in, the color of a car tire. In that movie, Briareos is more Asiatic than black, though - the artists wanted him to be a traditional pretty-boy, apparently.
* Appleseed engages a swarm of drones while wielding two large guns in his landmate's hands as well as a third, more conventionally-sized rifle in his own hands. The point of the Hecatonchires chassis is to be able to simultaneously juggle multiple weapon systems engaged with multiple targets at once.
* Appleseed is much less perfect and relies heavily on her much more level-headed partner/boyfriend Briareos. Yet she is still the only woman of the unit and by far the most badass officer on the force.
* Appleseed) is so dense with unexplained terminology and slang that the book is mostly known for the amount of work it takes to extract meaning from its text.
* Appleseed It is implied that Deunan thought she was fighting one of these before being brought to Olympus.
* Appleseed. Luckily, she has two extremely reliable guys with jetpacks as her backup.
* Appleseed (manga, 1980s anime OVA, recent CGI movies, and now a new CGI series)
* Appleseed manga, Alephia tries to hide from A-9 by covering herself in plaster, but nearly suffocates under it.
* Appleseed manga, this is made very clear since Deunan Knute (a human) and Briareos Hecatonchires (a full-body replacement) are known to have a physical as well as romantic relationship.
* Appleseed movies Deunan makes her dramatic exit by jumping out of a really tall building and apparently has her companions throw her 4m tall powered armor after her. She spreads out her arms and legs and lets the open suit land on her, seals the front hatch, and fires the jetpack about 2m before hitting the water below her. For no apparent reason, there was no hurry at all.
* Appleseed out. Unfortunately for him, his immunity got revoked, and he discovered that Giant Robots are somewhat vulnerable to flying cyborgs with tank cannons.
* Appleseed, several cyborgs bust through the stained glass windows of a church to surround Deunan. In the sequel film, Briareos does it. Twice.

* Appleseed that effortlessly jump through walls and reduce the battlefield to even finer rubble.
* Appleseed: The Elders of Olympus seem to view themselves as this, having seen man's propensity for war in the aftermath of World War III, which left humanity and the world with it in utter ruination. Deciding humanity must surrender its place on Earth to the Bioroids, the cloned race created with the absence of mankind's inherently flawed nature, the Elders conspired to render the human race infertile. Part of their plan involved convincing the city's primary AI, Gaia, that humanity had forsaken its worthiness; in a subversion of this trope, when Gaia concludes otherwise, the Elders choose to act alone.
* Appleseed the fight scenes in second CGI movie ("Appleseed Ex Machina"), which opens and closes with combat sequences that would make a Cirque du Soleil-trained Green Beret turn flushed with jealousy and admiration.
* Appleseed uses an implausibly large six-shooter as his sidearm... even when in the middle of a military formation where everybody else has assault rifles.
* Appleseed were created with DNA from several donors, including the father of heroine Deunan.
* Appleseed, where Hitomi takes down Bluebeard and his crew while they're busy trying to kill Deunan and Briareos.
* Appleseed, which was said to be conventional (after WWIII exchanged a number of cities for suspiciously round lakes).
* Appleseed. WWIV is always said to be "conventional" or "Non-Nuclear" (after WWIII exchanged a number of cities for suspiciously round lakes), and comprised several guerrilla conflicts and minor land wars before the start of either series.
* Apple's employee training program, "Apple University", reportedly compares a
* Apples Equals Cyanide Equals Light might have been for nothing, seeing how he became an almost immortal shinigami, pretty much unstoppable now.
* Apple's famous "1984" commercial do), the success of this tactic is ironic.
* Apple's iOS devices tend to start throttling their speeds as they age in, so as not to stress their ageing lithium batteries too much in theory. In practice, it makes their performance drop off, leading to complaints of both their battery lives and their general performance ageing badly. Apple, naturally, helpfully suggests that the best way to resolve this is to trade in for a newer model.
* Apple's "new" Liquid Retina display. It's just their new term for the liquid crystal display (LCD) that was in every iPhone before the iPhone X, and it's inferior to the newer OLED technology also used by Apple.
* Apple's "Think Different" campaign, which featured archive footage of pretty much every popular public figure in recent history.
* Apples to Apples has a metagame. It's vital to know your opponents, what kind of sense of humor they have, and what kind of matches that they like in order to win.
* Apples to Apples has these as flavor text on all of its nationality cards:
* Apples to Apples. You can match "Fuzz" to "Fuzzy" or "United States of America" to "American."
* Apple store developers will occasionally use odd methods to inflate a poorly-received product's score. For instance, the notorious
* Apple Studio recently released flash-animation videos of Beatles' songs.
* Apple takes this approach with their OS X line of laptops and desktops and their iOS line of mobile devices.
* Apple][, the killer app wasn't a game at all (though there were an awful lot of those): it was the first electronic spreadsheet, VisiCalc. And for the IBM PC, it was the spreadsheet program Lotus 1-2-3. Because 1-2-3 was written in assembler and used specific hardware tricks to run faster, it was a de facto test of clone compatibility.
* Apple Tree Yard theory this episode debunked the theory quite soundly.
* Apple TV+ admitted to doing this, along with taking drugs (thus explaining much of the "bad boy" behavior he was notorious for in his 20's) to cope with the pain of his mother's death.
* Apple TV+ and PBS wound up getting the rights to them ones since they were usually paired with an in-house holiday special, usually related to Disney or

Pixar. The only way to tell if the uncut version would be shown was if you checked TV listings or the list of holiday programming on ABC's website.
* Apple TV+ churning out what has widely been hailed as the best acting performance of his career. The show and Sudeikis proceeded to win several high profile awards and, as a result, the service pivoted towards marketing the latter show as its flagship program.
* Apple][. Unfortunately, this didn't work for people in PAL regions as PAL was widely advertised to be immune of artifacting (although in truth, it was simply immune to the NTSC method- it has it's own color-mangling problem as outlined below).
* Apple White's character arc has been analyzed as being an allegory for heteronormativity and compulsory heterosexuality. Apple has been raised with the goal of being the next Snow White and marrying her chosen
* Appliance Direct owner Sam Pak. The screaming and slamming, particularly, grates.
* Applicability: The creator of a work actively encourages audiences to decide what the theme is.
* Applicants to a position of a newsperson/secret agent are asked to deliver a sealed envelope to some other location. One of them is overcome with curiosity so he hides in a closet and opens the envelope. Inside there is a note saying: "Come back, you are hired."
* application and system software and was now finished (primarily by him lowering his extremely high expectations so he could say it was finished in his lifetime).
* Application Programming Interface of pre-built graphics functions that could run on any third-party graphics card that supported it (which was most if not all of them). Given that it was exclusive to Windows, it also had the side effect of largely killing off or decimating the gaming scene (to the extent that it still existed) on other computer platforms.
* Applications written for the Linux "KDE" desktop environment tend to be named with K's replacing hard C's (Konqueror, Konsole). Sometimes the "K" usage is a tad bit more... nonsensical, as with the name of the bundled golf game, Kolf. (Admittedly, Kgolf would've looked stupid.)
* Applied Cultural Anthropology: Lockhart to some students after his hair fell victim to the Weasley Twins' pranks. "Let me rephrase: Do you have any questions that aren't about the hair?" Hermione put down her hand, as did everybody else.
* Applied hilariously in "The Key to the Crime": After the Courteous Crook hits the Harper home, Thelma notices he cleaned up the bathroom and remarks, "I ain't gonna be able to sit in there again!"
* Applied in layers, where Itachi provides exposition about himself and
* Applied Phlebotinum... again, not that the actual heroes have the skills that they're given credit for, either.
* Applied Phlebotinum and Blaine's cells. Any longer risks Blaine's life and tires Mewtwo out considerably.
* Applied Phlebotinum, and they spend the next episode trying to escape from a far worse situation.
* Applied Phlebotinum and will only keep holding back if Seven of Nine rejoins her.
* Applied Phlebotinum at the heart of its science being an alien substance that annihilates with copper to provide huge quantities of power.
* Applied Phlebotinum from the Mayor that lets her pull this trick on Buffy.
* Applied Phlebotinum. He also made sure to shoot Dawn and prolong the fight in order to prevent the ship from being successfully piloted out of the event horizon, thus ensuring Dylan's trip into the future.
* Applied Phlebotinum in order to take the monster down once and for all.
* Applied Phlebotinum may be capable of mirror-reversing people or objects.
* Applied Phlebotinum — Radiation is a common choice of technical-sounding phlebotinum.
* Applied Phlebotinum not generally available to humans, it's unclear whether he made it to anything resembling the afterlife that humans experience (if there is one) in any case.
* Applied Phlebotinum, ring unearthed in Egypt that opens wormholes to other

planets.
* Applied Phlebotinum that includes (but isn't limited to) Bender inhabiting Amy, Leela switching into the Professor's body, and Amy switching with Hermes.
* Applied Phlebotinum the one safe spot in someplace like the world of fire. However, the operative word is 'instantly.' You'd better run if that tsunami is a mile off but moving at a rate that will submerge you in minutes, or if the sulfuric acid comes in the form of rain that's on the way!
* Applied Phlebotinum to prevent the (also invisible) driver from kidnapping his (the driver's) estranged daughter. The whole thing comes crashing past through an alley, leading a witness (who only sees Batman zooming along about four feet off the ground) to remark, "I didn't know he could fly..."
* Applied to data, this would make the USA's Utah Data Center one of the biggest
* Applied tragically with the Kings of Gondor. Valacar, the grandnephew of the King of Gondor at the time, visited Rhovanion and wed Vidumavi. Vidumavi was a princess of the Northmen of Rhovanion, and at the time of her marriage was much younger than Valacar. Vidumavi lived a very long time for one of her own people, but because she had no Númenórean blood, she grew old at a much faster rate than Valacar - she died before he ascended the throne. The Men of Gondor feared that their son Eldacar would not live as long, and this instigates a civil war in Gondor. (Eldacar inherits Valacar's longevity and lives to be 235 - only three years less than his father. He also inherits the fearless spirit of his mother's people.)
* Applied with increasing consistency as the series goes on, and even becomes a major plot point. Goku is the strongest, followed by Vegeta, then Gohan, Piccolo and the other half-Saiyan children, and lastly the human fighters, Krillin, Tenshinhan, Yamcha, Chiaotzu, and finally Videl. Vegeta's seemingly eternal role as second fiddle to Goku becomes an increasingly sore point for him as the series goes on; after his moderate
* Applies at some point to the first five games. The point at which this happens for someone tends to be entirely based around the point they consider the game quality to drop.
* applies dual-wielding techniques to the combination of a weapon and a bare hand.
* Applies especially to Mew, Celebi, Jirachi, Manaphy, Land Forme Shaymin and Victini, who have 100 in all stats. Arceus itself
* Applies to almost every squadmate actually. For example, Thane admits that he would've been killed by Nassana's guards had Shepard not been there,
* Applies to a number of the upper-class characters, and some not so upper-class, in the
* Applies to Bart, to the point that there was an episode starring practically
* Applies to Bolt's promiscuous love interest Mary in "The Wind," who among other things seduces four of the dogs who later rescue Bolt. Lampshaded by their female friend.
* Applies to Fate to some degree, too, as Precia had Linith skip over certain aspects of her training while teaching her how to fight in order to get her ready to search for the Jewel Seeds soon enough. While observing Fate and Nanoha's battle in Episode 7,
* Applies to Japanese manufacturers at Le Mans and as constructors in
* Applies to many (and more accurate to the book) film depictions of
* Applies to several of the other haremettes like Lala (who refuses all her suitors and see Ren just as a friend), Haruna (loved Rito since middle school), Run, and Yui (before Rito, she had no interest in boys).
* Applies to some degree to the Genie, even though he's a well-meaning
* Applies to Sora and Sunao, Yoru and Ran, and Shinichirou and Nanami in
* Applies to the Pre-War society as well. Even in 2077, with an abundance of futuristic technology at their disposal, America (and perhaps the entire world) remained culturally locked in the 1950s. An idealized 50s with full racial and sexual equality, admittedly, but still the 50s.
* Applies to the system as a whole. Since all abilities, from ability to fight to ability to

* Applies to the Washington DC metro area as a whole, with Virginia and Maryland surrounding and only a stone's throw away from the District of Columbia. Not to mention numerous local, state and federal facilities scattered throughout the neighboring counties.
* Applying for healthcare, insurance, and other similar necessities will have you pay your premiums based on your income and the type of services you get will also depend on your income. It's quite common seeing people who make too much money to qualify for getting health insurance for free and not make enough money to actually afford the medication and doctor visits.
* Applying this trope to animals is pretty much a given, as they do not have a set rule for how they should live like humans do. The simplest example would probably be the nature of poisonous animals being brightly colored; from a human standpoint, a creature like a poison dart frog is beautiful because of its bright, vibrant colors, and even people who know that the little critter could kill you with a single touch find them utterly adorable. Any predatory animal in the wild, however, would be
* Applying this trope to competitive multiplayer games gives you the
* apply the SOP nanomachines to every human on the planet. No hatred, no selfishness... and nobody to oppose their pointless Forever War sums it up best:
* Apply this concept to entire species, and you'll have an idea what life for the Eldar and Imperium of Man in
* apply this same logic to God as well, thus falling within the devil's evil grasp.
* Appointment in Samarra". Dean questions why some have to die and others don't, and Tessa replies that it's all part of a larger plan. Dean rejects this and goes on a tirade about destiny being nothing but a lie, but Tessa notes that he doesn't actually believe that.
* Appointment Television - A TV show so good you reschedule your life around it
* Appointment with Death section of this trope) but decides it's not as innocent as that.
* Appointment with F.E.A.R., the main character (who is a superhero) is approached by criminals who want to mug him/her. If you fight them, you out yourself and have to give up your career as a superhero, which leads to a bad ending (albeit one that's quite a bit less dark than the other bad endings); only by letting them mug you can you continue playing.
* appreciates male beauty in many different persons, but it's less clear whether his pursuit of Tsumiko (and the flirtation he employs towards it) is solely materially based in an effort to get his hands on her fortune—and Argent—or whether he is also attracted in any way to women.
* appreciation of the Kamabakka Kingdom, an island nation populated exclusively by incredibly ugly crossdressing men.
* Apprehended) will initiate a 'struggle' minigame, the Student Council will pepper-spray you into submission, and if you kill someone with four or more witnesses, they'll gang up on you and take you out.
* Apprentice Adept. Agape suggests Suchevane tell Trool her feelings, then offer her companionship to ease their mutual loneliness, until such time as he finds a more suitable mate. Agape assures her he won't look any further. (He doesn't.)
* Apprentice Adept and form a new Amoeban. Since the process pretty much eliminates the personalities and memories of the parent Amoebans, it's a case of "Mate and Die."
* Apprentice Adept books, Mach and Bane could communicate across dimensions, but only if their physical locations on their parallel worlds matched. Their kids, Flach and Nepe, could do it regardless of location.
* Apprentice Adept can choose two other shapes they can change into at will. Most of them seem to pick human and a winged form.
* Apprentice Adept influence of a unicorn circle). Anyone who can actually play the damn thing gains Adept-level magic. A master musician? Becomes stronger than all the other Adepts put together.
* Apprentice Adept: Most of the adepts are explicitly color-coded and are referred to only by their color. (Protagonist Stile is one of the exceptions.) Later on, in

the second trilogy, there are a few adepts that don't bother with the color dynamic at all.
* Apprentice Adept scheme (Don't worry, this is actually a good thing).
* Apprentice Adept series, Adepts' magic cancels each other out, on a one-on-one basis. Protagoinist Stile (the Blue Adept) finds this out when he hits Adept White with a series of near-spells designed to fizzle out immeditately, and White informs him that the real thing would not have done her any more harm. He's also informed that this is not the case should two or more Adepts gang up on him. He also realizes that this put an extra degree of mystery to the death of his Phaze counterpart, the previous Blue Adept; He should've been able to fend off the booby trap that ultimately killed him, but instead allowed himself to succumb.
* Apprentice Adept series, a sci-fi galaxy-owning dictator decides to begin conquering realities, because technology works everywhere, whereas magic doesn't naturally flow into many realities.
* Apprentice Adept series fits perfectly. The setting is one world split across two realities. One of them is called Proton, which is high tech, while the other is known as Phaze, where magic prevails.
* Apprentice Adept series: Lady Blue is introduced as a healer who would treat anyone who came upon her door, only turning away those beyond her power to help. (Those whose injuries were too old or severe for her own magic to fix)
* Apprentice Adept series, sexbots are just one of many purpose-built robots available to the Citizen class, though mostly those with specific tastes go for robots over the more easily acquired (and cheaper) human Serfs.
* Apprentice Adept series, understand human speech just fine, and can speak it when in human form (those that bother to learn, anyway). In their natural state, they use "hornspeak", communicating through musical notes blown through their horns. (In Phaze, unicorn horns are hollow and produce sounds similar to musical instruments.)
* Apprentice Adept, thereby avoiding a great many unfortunate complications.
* Apprentice Adept trilogy has The Game, where disputes between the Citizens are settled by wagering on games that are played by Serfs. As Serfs are considered quite valuable, and care is taken not to endanger them unduly, this is one of the few non-Blood Sport examples of this trope.
* Apprentice Adept with Fleta since [At least, first sight of her human form]).
* Apprentice and Pregnant. Her friend Greyclaw offered to act as her kit's father. The two ended up pairing up and, though their kits know their biological father is an unknown-to-them ShadowClan cat, they see Greyclaw as their father.
* Apprentice, but it still reads the design and puzzles as being a little more than halfway finished, with nothing mentioned about the software.
* ApprenticeEh vlog, they used movie, TV, and book titles but replaced all or part of a word with "vlog". This ended at the start of 2015 when they changed up their whole vlog format.
* Apprentice Postman Stanley Howler of the Ankh-Morpork Post Office in
* apprenticeship people walk (or drive, or sail) the Earth with their job and change often their employer: sailor, diver, oil rig worker, truck driver, miner, geologist.
* Apprentices may not become involved in Guild business without their mentor's or Guildmaster's consent.
* Apprentices of certain craftsmen would be put to various menial tasks in order for them to build the muscles or motor skills required for the craft. For instance, new chefs at a traditional restaurant typically spend a few solid months at the dish pit before actually touching a single knife. It teaches the importance (and inevitability) of cleaning dishes and cookware, as well as impressing the sense of urgency needed in being a cook.
* apprentices, we have Darth Revan, Darth Nihilus, Darth Malak, Darth Krayt, and many, many others.
* Approaching Denver from the west on I-70 are several signs warning about the steep grades and sharp curves. They all have huge letters and start with "DON'T BE FOOLED" and "TRUCKERS, YOU ARE NOT DOWN YET."
* appropriate clubbing costumes look like they require special engineering and a

lot of depilation.
* Appropriated Appellation: Character uses a nickname given by someone else as an actual name.
* Appropriate headlines were done when Apple switched to Intel processors.
* appropriately ended up unintentionally doing this themselves in regards to a legion that takes that as its MO is a bit of accidental fridge brilliance.
* Appropriately enough for the character, as in his comic book appearances, Spider-Man is a big-league jabberer in his appearance in
* Appropriately enough, this was Toshie Uematsu's response when she saw Nanae Takahashi crying over the fact Uematsu had chosen REM(Real Evil Makers) over the Dream Catches.
* Appropriately for a '30s-period setting, the flavor text fiction in
* Appropriately for a sci-fi homage/parody, Simon Pegg thinks this is how Paul is speaking English in
* Appropriately for a series where ancient ruins are one of the most populous level types, the
* Appropriately given the topic of the show, it invoked this amendment a few times, most notably the fourth-season finale, "Twenty Five". For added drama,
* appropriately insectlike, with inclusions of otherworldy whistling, whispering and rustling. The species' true name supposedly has 10.000 sounds in it.
* appropriately-monikered wears a creepy white mask with a black robe to conceal his appearance. He keeps the mask even after removing the robe and making his identity obvious to the player, only ditching it once he thinks the fight is won.
* Appropriately named the most powerful player-controlled superheroes and supervillains in the game.
* appropriately-named, who drinks a potion she invented that makes her exactly that. She eventually battles Batman, Robin, and Wonder Woman in this form.
* Appropriately, the chapter where you're first introduced to the crumbling remains of Old Aperture is called "The Fall".
* Appropriately, the fourth compilation book, which covers this storyline, is called
* Appropriately, the Khorne Daemonkin faction has this built into their rules; Khorne units are incapable of using psychic powers or sorcery, so to buff them the Daemonkin were given the Bloodtithe rule. Any unit with Bloodtithe generates a counter for each unit it kills or if it dies, and counters can be accumulated and spent to provide a variety of effects, ranging from buffing your army to
* Appropriately, this is how Twilight and Spike (and, by extension, the viewer) are introduced to Rainbow Dash in the series premiere.
* appropriately-titled is that they had bigger ideas for the ending, but didn't have enough money to realize all of them.
* Approval of God disliked them, however, because he felt they belittled the effort he put into his (superb) performance as Hitler.
* Approval of God: The creator of the original work praises content made by the fans.
* approved. But then he revealed to only have done to stick up for Arnold.
* approximations of Klein bottles: Non-metric topological manifolds may be considered ideal elastic objects, able to be bent, stretched, twisted, or deformed as long as nearby points in one space correspond to nearby points in the transformed version. However, Acme's Borosilicate Klein Bottles are physical instantiations of such mathematical concepts. As such, they should not be subject to transformations which substantially increase the material's internal stress tensors. Specifically, please recognize that dihydrogen monoxide has a coefficient of expansion which is negatively correlated with temperature near its freezing point, and thus expands when changing from liquid to solid. This increase in volume can cause stresses within a containing vessel. Borosilicate glass — such as that which Acme uses to manufacture its fine Klein Bottles — has a finite capacity to absorb these stresses and retain a linear stress-strain relationship. When a certain stress is exceeded, the intermolecular silicate bonds will delaminate, resulting in stress-induced fractures. In other words, "freezing water

expands and will shatter your Klein Bottle".
* A Practical Guide To Evil Akua Sahelian, main antagonist of the first three books and poster child for traditional villainy, will happily sacrifice entire cities or her closest allies for her goal to rule the continent, but she retains a soft spot for her father, to the point of nearly breaking down when he is taken hostage.
* A Practical Guide To Evil Amadeus' home farm gets destroyed by the Heir some time after Amadeus became the Squire, and his remaining family is killed. He remarks on it being inevitable, some way or the other, because Squires don't get a home to return to.
* A Practical Guide To Evil Catherine briefly muses about being a pioneer of "Lakeomancy" - the art of stealing other people's lakes with magic and then letting them crash down on an army as a tactical asset. Her magical advisor then points out that the proper word would be "Lacusomancy" and that this would only be a specific branch of manifestation magic, but approves of the possible uses of displaced lakes.
* A Practical Guide To Evil Catherine once screams in frustration and anger from the balcony of the Tower at the stormy sky after being outsmarted by her nemesis Heiress in court.
* A Practical Guide To Evil, Catherine, while on a party of the Winter court in Arcadia, steals another guest's armored glove and proceeds to rile up and then challenge the party's host to a duel in an elaborate plan to kill him and become his daughter (it makes more sense in context).
* A Practical Guide To Evil consists of fresh graduates from the War College. This is because their CO, Catherine, is the Squire, and the hand-picked protege of Black Knight, the most accomplished military leader in the Empire. Cat then picked her XO and staff officers from people whose abilities she knew and trusted from her time at the College. Within a year they've won three major battles, and proven that they deserve their rank.
* A Practical Guide To Evil has this occur when Catharine is approaching an army encampment after an extended absence.
* A Practical Guide To Evil has transferred her soul into an onyx cylinder at the age of 12 — so that when she is slain, she can possess a child that is in possession of her phylactery.
* A Practical Guide To Evil, he magically transforms them into glass eyes that allow him to see through his own head.
* A Practical Guide To Evil individuals can use these patterns to their advantage.
* A Practical Guide To Evil mostly pick ruling names derived from unpleasant traits. Examples include:
* A Practical Guide To Evil. Over time, however, she definitly commits enough atrocities to deserve being called a villain.
* A Practical Guide To Evil: Ratface is this for the Rat Company, and later for the fiveteenth legion of the Legions of Terror. He has business contacts with smugglers, can produce enough weapons to arm a squad in a city where carrying arms is forbidden, got nearly the double amount of goblin munitions for his legion, and always, always supplies his commanding officier with her favorite wine so she doesn't question his means of acquisition.
* A Practical Guide To Evil) rather than a dwindling remnant, are depicted at the height of their power with an empire that spans the entire continent of Calernia beneath the surface. All of their traditional negative traits are amplified — they believe that no one but a dwarf can actually own property and so dwarves travelling the surface customarily steal everything that isn't nailed down. Surface dwellers are generally too fearful of the power of the Kingdom Under to object, due to their habit destroying entire surface cities when vexed. They also lay claim to all the mineral wealth on the continent below a certain depth, regardless of whether or not they are actually mining it at the time.
* A Practical Guide To Evil revolves around Villains who make (relatively) sane, easy to implement plans in order to defeat their enemies.
* A Practical Guide To Evil, she doesn't even notice she is naked until after the

fight.
* A Practical Guide To Evil should have arrested him at the city gates.
* A Practical Guide To Evil: since the reforms some decades earlier, the evil Dread Empire of Praes is quite open in its hiring policy, allowing humans of all genders and ethniticies, as well as orks, ogers and goblins (as well as undead and a dragon) to rise in the ranks of the Legions of Terror. At the same time, the more traditional evil nobles still retain their racism, and on the side of good, some heroes openly regard orks and goblins as worthless monsters.
* A Practical Guide To Evil some evil nations, such as Praes or Helike, practice human sacrifice to fuel magic rituals, such as making barren fields fertile or letting fortresses fly.
* A Practical Guide To Evil. The cloak is now widely recognised and noted as an artifact in the making.
* A Practical Guide To Evil the Legions of Terror stamp out a basic mage who can heal, scry for communication and espionage and maybe ward against the same, throw a fireball and know just enough magic theory to not be caught totally off guard when the devils or the Fae show up. They're then incorporated into a specialist unit with ten mages and ten soldiers with large shields who protect the mages. A number of more learned or traditional sorcerers scoff at the half-trained, cookie-cutter Legion Mages, but having a consistent support ability and being able to concentrate firepower seems to be working out very well for the Legions so far.
* A Practical Guide To Evil, the Legions of Terror, the standing army of Praes, can regulary win against larger forces and are regarded as the finest army on the continent. Justified, because Praes is one of the few countries that has a professional army and not just conscripts, it is the only country with army mages, the soldiers get exhaustive training in tactics and combat, and there is a dedicated school for officers, sappers and military mages.
* A Practical Guide To Evil: the Lone Swordsman, together with half of his party and a good chunk of his rebel army, comes after a patrol of the Legions of Terror (the army he fights to get out of his home country). The patrol, seeing they are vastly overwhelmed, form tight ranks, sing a sort of funeral song for themselves, and then fight the rebels tooth and nail. They still all get slaughtered.
* A Practical Guide To Evil there is the "Five-Way-Melee", a war- game at the war college of the Dread Empire of Praes. Catherine, the protagonist and her company of cadets, face four other companies. Nearly all the companies go in with one or more pre-made alliances, and nearly all of these alliance get broken along the way and new alliances form until there are only two companies left in the field.
* A Practical Guide To Evil to attack her nemesis. That mission briefing is a failure, though, as both Masego and Indrani trust the other one to pay attention to the orders, as they are both preoccupied thinking about magic (Masego) or oggling their commander (Indrani) to actually learn what they should do, why, and to what end.
* A Practical Guide To Evil, villains are infamous for sometimes using- or at least trying to use- magical plagues.
* A Practical Guide To Evil: When Catherine first meets the Black Knight, he gives her the opportunity to kill two rapists. After that, she asks him if killing becomes easier with time, and he negates that. Scarcely two months later, Catherine is hardened enough towards murder and free enough from qualms that she doesn't hesitate to kill if it befits her goals, and recognizes Black's statement as a lie.
* A Practical Guide To Evil: When fighting against the invasion of the fae of the Winter Court, Catherine's main antagonist is the Duke of Violent Squalls. Notably, he is also antagonistic to the Winter King and all his predecessors on the throne: he thwarts every attempt to create peace between Summer and Winter and always clamours for war.
* A practitioner of the Ebon Shadow Style martial arts can temporarily transform into this.
* A Prairie Home Companion and "Guy Noir" adapted its current format, with Noir getting by on his wits alone.
* A Prairie Home Companion, and the show's signature "News from Lake Wobegon".

* A Prairie Home Companion, cowboys Dusty and Lefty come across "The Free-Range Chicken", which they then engage, and nearly lose to, in a gunfight.
* A Prairie Home Companion), everyone buys either Fords or Chevys, depending on religion. This is mandatory. In one case, someone who bought foreign couldn't get his car started the next day 'cause someone had stuck a potato up the tailpipe.
* A Prairie Home Companion, from Garrison Keillor's weekday morning public radio show in Minnesota, which he stopped doing in 1982.
* A Prairie Home Companion Garrison Keillor jokingly suggested that pump handles (and frozen objects in general) have the ability to hypnotize children to make them stick their tongues on them.
* A Prairie Home Companion: Lake Wobegon, where "all the women are strong, all the men are good-looking, and all the children are above average."
* A Prairie Home Companion out of your mouth like a piece of rhubarb pie!")
* A Prairie Home Companion the behind-the-scenes action of the rest of the movie.
* A Prairie Home Companion, the character of Guy Noir is a parodic example.
* A Prairie Home Companion: The "Guy Noir: Private Eye" sketches are a spoof of this.
* A Prairie Home Companion: The Joke Show goes through a lot of jokes in one sitting.
* A Prairie Home Companion. The old coots go out for the opening day of duck hunting season. There they are in the blind, and they have a toast for fallen comrades. The guy only gets a few names into the list before he breaks down. The unspoken sentiment is that there are now so many names, and it'd be disrespectful to forget any, so maybe it's time to give up on listing them all.
* A Prairie Home Companion. The sound effects man can, for example, simulate the sound of a song being quacked by a duck or played on a pneumatic drill.
* A Prairie Home Companion to the old radio variety shows that had prominent sponsorships. To wit: the show's house band is even named after a fictitious brand of shoe.
* A Prairie Home Companion-type story. A character would be on the brink of death when the story segues into a plug for Bebop-a-Rebop Rhubarb Pie or Powdermilk Biscuits (in the big blue box!).
* A Prairie Home Companion: When Garrison Keillor is the only writer, Sarah Bellum will be the only credited writer, referring to Gary's brain. Norman Conquest, Paige Turner, Natalie Dressed, Emanuel Transmission, Warren Piece, Guy Wire, Amanda Reckinwith, Hugh Jass, Pete Moss, and Sandy Beech have also been credited occasionally.
* A Prairie Home Companion where a self-help tape voiced by Mr. Rogers starts hitting on a woman and the woman tries hitting the power button.
* a prank, a police officer puts a submarine sandwich on the hood of a car he's giving a ticket to. Somebody else squirts what looks like bird poop on the sandwich and the people in the car watch in disgust as the cop eats it.
* A prank call is what brings Philip J. Fry to the cryogenics lab where he gets frozen, kicking off the plot of
* A prank puzzle called "The Inescapable Island". The teller begins with "imagine that you are stranded on a tiny little island", then goes on to describe with detail how the surrounding sea is vast and borderless and filled with hungry sharks and how the island is a bare spot of sand with thousands of poisonous scorpions and this and that. Once the situation is inescapable enough, the teller then asks the victim to find out a way to save themself. The only acceptable solution is along the lines of "stop imagining".
* A Prayer for Owen Meany: Anticipating his death, Owen does this to Hester towards the end of his life. Unfortunately, after his death, Hester's life spirals into wild abandon.
* A Prayer for Owen Meany, Owen Meany himself seems to base his actions on this principle; for instance, he repeatedly uses the loss of limbs in symbolic gestures
* A Prayer for Owen Meany: the impact of Owen on Johnny is a major part of his life, but Johnny hasn't really changed much since Owen left his life. In fact, he is much worse off.

* A Prayer for Owen Meany, the main character avoids the draft during the Vietnam War by cutting off his index finger. He later leaves for Canada.
* A Prayer for Owen Meany: The story is being told in 1987, but most of it is set in the tumultuous years of the mid-20th century, Johnny and Owen's youth. It sometimes dips back into the present day to highlight how much Johnny hasn't grown since Owen's death.
* A Prayer To Futility is written from the perspective of such an individual.
* A PR campaign for a new car from Lotus had faceless people turning up at public events in the UK.
* a preacher in Kuwait argued this about. He then goes on to say the series is a plot by the Jews to turn the children of the Middle East, as well as the rest of the world, into homosexuals.
* a pre-battle speech given to her students that is outright encouraging. It's a perfect time to be scared, but they can do this.
* A precocious kindergartener got bored reading "Dick and Jane", and
* A pre-Crisis story had an old pre-WW2 supervillain (despite the fact that this was Earth-1, where Supes himself was supposed to be the first superhuman) give up his life of crime to go star-hopping with his "alien friends". He comes back to Earth to see home again while he can but is a bit peeved that his tales of traveling in space are disbelieved and that he's mostly been forgotten in favor of Superman, so he gets his friends to rejuvenate him temporarily so that he can have one last splash of super-villainy. He fights Superman, who lets him win so that he can die in triumph.
* A precursor race is vaguely alluded to in episode 21, where Gendo points out to Fuyutsuki that "someone, who was
* A preference for the passive voice over active voice ("It is done" vs. "I did it")
* a pregnant Bellatrix Lestrange sings nursery rhymes while cutting strips of skin off Edmund Parkinson.
* a pregnant Harry eats a Belgian waffle with fried onions, horseradish, and chocolate sprinkles.
* a pregnant Harry has a bowl of lemon custard with peanut butter cups, Bertie Botts beans and candy cane bits.
* a pregnant Harry has a cheese, banana and chocolate sauce toasty. Lucius comments that he thinks he preferred Harry's previous craving - cucumbers dipped in lime ice cream.
* a pregnant Harry has an omelet with blue cheese, olives and pickles, topped with hot sauce. This is accompanied by a radish and onion smoothie.
* a pregnant Harry has an omelet with cinnamon, jalapenos, strawberry yogurt, relish and Nutella, with a side of grapefruit with hot sauce.
* a pregnant Harry has canned peaches, pickles and blood pudding covered in hot sauce.
* a pregnant Harry has tomato and potato croquettes dipped in orange juice and vanilla sundae.
* a pregnant Ranma turned back into a man says, "I don't want to think about that, and neither should you."
* A pregnant woman and her boyfriend deliberately stage an assault on her that causes a miscarriage so they can file a wrongful death suit. When their plan is uncovered, the DA brings murder charges, only for the boyfriend to smugly tell them the unborn fetus was too young to count as a "person" under the law, and therefore they can't be convicted. Stone instead argues that he believes they didn't know that particular technicality at the time of the crime and only found it out later when constructing their defense, thus they acted with the prerequisite intent that legally satisfies
* A pregnant woman was being followed by an armor-plated demon. Angel kills the demon but discovers that it was protecting her from other demons.
* A prehistoric, Stone-Age version called the Bone Chanter is in Osprey Publishing's
* A pre-human sapient species. The earth belonged to them once, and they hate us

for usurping it. Maybe they want it back, or perhaps just to harm us out of jealousy. Often they are forced by violent human ancestors figuratively or literally underground, earning them the name
* A pre-Islamic Turkic myth has the Turkic people fleeing into a valley surrounded by mountains of iron to survive an onslaught. Their point of entry collapses, effectively sealing them from their enemies and letting them stay there for generations. When they decide to leave, they do so by
* A premiere of a Miles From Tomorrowland episode accidentally bleeped out part of the theme song.
* A premium user can also buy an item from the store than when traded and used by a free account automatically converts it to premium. It can also be purchased from the Community Market, but it's much more expensive.
* A presidental address by Barack Obama pre-empted ABC's original December 1, 2009 airdate for
* A president is a chief executive; although some folk etymologies connect it with precedent, it actually has to do with "to preside".
* A press event on 23 March 2015 showed off more multiplayer maps and weapons and part of the single-player mode for the first time, which had critics even more excited for the game in their hands-on features.
* A pre-television family is sitting on and around a couch, all staring at a blank wall.
* A pretty common element of said parodies is also the idea of said heroes being
* A pretty common scam in a lot of countries. Cute girls find a foreigner (as all foreigners are rich!), invite him to a tea ceremony, and the final bill ends up being relatively expensive. The scammers pay as well (although they get their money refunded after the sucker leaves).
* A pretty crap version of this plays out during the Ori invasion arc. A storyline about Teal'c going to get some reinforcements from the local drug dealers, after much angst and wailing, the attack starts, but wait! The drug dealer guys come through. With 3 Hatak (which have been cannon fodder for about 6 seasons), 2 of which get promptly blown out of the sky.
* A pretty dark example of director wagging took place on the set of
* a pretty deep toward him. The sad part in this was that Guts was going to come back someday in the hopes that he and Griffith would become true friends. That would never to be.
* A pretty depressing one. Roger Smith, who the film criticizes for laying off 30,000 General Motors employees and devastating the town of Flint, Michigan, gives a speech on Christmas Eve on how the holiday brings out the generosity and warmth in everyone. We cut back and forth between this speech and a bunch of families being evicted from their homes on Christmas.
* a pretty good encapsulation of the social and political climate of America in the early-2010s, ran and won against Trump, albeit with slightly more progressive policies than Obama (largely due to the influence of progressives such as Sanders and Alexandria Ocasio-Cortez on the party platform).
* A pretty good example of why formations are so pivotal in battles would be how
* A pretty hefty portion of the humor in the series is this. For instance, "The Head Shackle" from Mockingjay.
* A pretty standard practice for up-and-coming boxers is to get ring experience and seasoning by fighting a spate of journeymen, club fighters and "tomato cans," typically squashing each one without much difficulty. This is why so many boxers have 20-0 records by the time they start fighting higher profile bouts.
* a pretty stranger on the deck. Walden sheepishly lampshades it by saying at this point, Charlie's eternal remains are mostly carpet lint.
* A pretty telling indicator is the fact that one of their run-of-the-mill "Host ships"
* A pretty tragic example to suffer continuous delays and eventually not be released (helps that while Cinder got some compensation from the label once they decided to terminate their contract, they did not want to buy the master tapes for $250,000). To add insult to injury, they DID end up releasing one song off the

album called "Soul Creation" which ended up charting and having a fairly popular video.
* A pretty young virgin with a fear of flying has to go on an important business trip where she has no choice but to travel by air. Despite her fear, she reluctantly agrees. While on board her flight, the captain warns them about some bad weather up ahead, and soon they're experiencing absolutely terrible turbulence. The poor young woman is terrified for her life, convinced she's going to die a virgin, and eventually she can't take it anymore. She stands up in her seat and shouts "My god, I'm twenty-three years old and still a virgin! I don't want to die without anyone ever having made me feel like a woman! Is there anyone on this plane who can make me feel like a woman." The other passengers stare at her in shocked silence, all except for one man, who stands up. "I can make you feel like a woman", says the handsome stranger, who's six feet tall with huge muscles and dark flowing hair, and starts walking down the aisle towards her. "Know how I can make you feel like a
* a prevailing idea of the author's generation, but later books include a few characters who seem to naturally swing that way, for whom the confinement is a convenience; however, all of this is deep subtext.
* A previous chapter had one for Yue, bonus points as part of the training montage involved actual flying.
* A previous episode features Donna wishing Jimmy was never born, and ends up having a day where Jimmy was never born at all. Donna finds that being an only child isn't all it's cracked up to be.
* A previously unnamed team of heroes, with mostly unnamed members, was used to explain a bizarre similarity in names. A volcano that housed the fire village and the
* A previous sequence of torturing the same zombie pirate head in the same quest involves you wiggling the zombie's nose, sticking your fingers in its ears, and telling
* (a previous SG-team killed the guy who kept it working) is an important part of the planet's society.
* A previous strip, published about five years earlier, Lampshaded this by doing a similar chart and having Zonker explain that this was being done because "most 19th century Russian epic novels have fewer characters than this feature." Since then, the cast has only GROWN (as this was before everyone started having kids.)
* Apricot Cookie(s)!: Both Moonlight Spritzer (introduced in chapter 3) and Princess Almond (introduced in chapter 5) can be seen in chapter 1 as figurines/keychains on Apricot's nightstand.
* Apricot Cookie(s)!: Cream Tea makes 4 successive puns when fighting the giant enemy crab in chapter 3. The others see her puns as bad etiquette.
* Apricot Cookie(s)! does this exactly once, to make fun of how ridiculous Magical Girl attack names tend to be:
* Apricot Cookie(s)! figure, puts on a dirndl and clogs thinking that's what all Europeans wear.
* Apricot Cookie(s)! has 2: Butter Punch with blue hair/eyes, and Jammy Smasher with red hair/eyes.
* Apricot Cookie(s)! in chapter 4's raffle. At first it seems that Apricot didn't win the raffle, but then it turns out that they just said her name wrong.
* Apricot Cookie(s)! is for Apricot to wind up naked, typically when she tries and fails to transform.
* Apricot Cookie(s)! less like an overlord and more like an office executive.
* Apricot Cookie(s)! pulls one when she's being angsty about her role:
* Apricot Cookie(s)!: Right after Jammy Smasher takes out her concealed bird to face the Director, he points out a sign to her that reads, "no birds".
* Apricot Cookie(s)!: The art style changes suddenly while Apricot is talking with Starlet's father.
* Apricot Cookie(s)!: The Director of Darkness buys flowers for his mom.
* Apricot Cookie(s)!: When the cast is going on a road trip, Apricot is offered the seat in the middle that has 3 different birds pooping on it.

* Apricot Cookie(s)! with 6 HDMI ports and 4K resolution, as though it were a plasma screen TV.
* A priest and a Rabbi are sitting on a park bench when the priest turns and says "Hey, I have an idea. Let's go out and screw some little boys!" Puzzled, the Rabbi replies "...Out of
* A priest disturbs Sam as he's performing a séance in the church basement.
* April 13, 2000: Jon is refused from ordering "Happy Burgers" because he isn't happy. The drive-thru attendant suggests that he get "Grumpy Burgers" and "Rude Fries" instead.
* April 1940", features three people in spacesuits, each wearing a bell-shaped clear helmet, with tubes in the back that connect to an external pack.
* April 1941 issue". In this image, a bunch of people on a space walk are wearing helmets as round as a fishbowl.
* April 1 is an infamously low-quality coloring book for the NES, and is considered by TASVideos to be a bad game choice.)
* April 1st, 2006, Blizzard had a "fired" employee "leak" patch notes to the
* April 2018 presented a rather infuriating example of this as well; Former contributors of
* April 26, 2012, didn't sit on it, and then explained he said it because Garfield was fat.
* April and Andy's house is worse; they don't seem to understand the concept of cleaning. What's worse was that they were living alone for only a week. When Ben moves in, he kicks them into high gear and they get better thanks to this.
* April and Casey were in the early stages of forming a relationship when he accidentally kills a teenage mugger during the
* April and Thérèse both flat-out accuse Anthony of infidelity for continuing his emotional loyalty to Liz through his marriage to Thérèse (including asking her "wait for me" after the above attack). These are dismissed because April is a teenager and Thérèse never wanted kids, and nobody ever offers any real counter-argument beyond considering it romantic. Thérèse takes a lover of her own later, but it's frankly hard to blame her.
* April and the Extraordinary World: After losing the Franklins, Pizoni is demoted from inspector to agent, and told that from now on he is not allowed anywhere near scientists. He is restricted to arresting tramps and vegetable thieves
* April and the Extraordinary World: After nearly falling off the statue of Napoleon III, Julius comments that he might need to change his underwear.
* April and the Extraordinary World: As the rocket blasts off, April has to run back to the elevator as the gantry gives way underneath her. The last section falls away before she reaches the elevator. As she tumbles into space, her outstretched hand is grabbed by her father. Then the camera pulls back to reveal that he is dangling almost completely out of the elevator and being held in by Julius.
* April and the Extraordinary World, Darwin runs at full speed and then dives, flattening himself out, to pass under the rapidly closing blast door of the rocket.
* April and the Extraordinary World, street urchin Julius is able to steal the food from the plate detective Pizoni is eating from while sitting in front of him and talking with him.
* April and the Extraordinary World: When April is being chased through the Paris Fair, Julius grabs her and kisses her, thus convincing her pursuer that this is not the girl he was chasing.
* April and the Extraordinary World. While not as bad as many other examples, he gets so caught up in his excitement in working out the flying machine, and the energy it runs on, that he fails to notice that the prison is flooding.
* April: "April Showers," raincoats and boots and umbrellas, or Easter stuff if it comes this month.
* April Cruel's Day showed pool houses among the locals Vendetta Pro's Vampire Billy Blade frequents when not wrestling.
* April Eagle/Marianne Louvre and Commander Eagle/Charles Louvre from
* April Fool, and talk in funny voices. According to the kobolds, "Every adventurer

fits cleanly into one of these categories, without any overlap."
* April Fools announced the unearthing of rope-and-pulley logic gates on the island of Apraphul.
* April Fools' Day 2012, where any music you play would elicit on-screen commentary from Hipster Jen or Hipster Otis. "I have this song on limited-edition colored vinyl." "I guess this song isn't TOO embarrassing." "This makes my mustache sad."
* April Fools' Day added a button that would turn the video you're watching into sepia tones, add jittering and scan lines, and replace the audio with jazz music. Its featured video that day was of a few of its most famous videos redone in this style. Even more brilliantly: if you were watching a video that used YouTube's subtitle functionality, the text would appear as intertitles as in a silent film.
* April Fools' Day, and the entire family laughs. Homer plays along by responding with "Me lose brain? Uh oh!" Everyone laughs again, until Homer interrupts them by earnestly asking "Why I laugh?" The rest of the family stops laughing and looks very concerned, and the episode ends right there.
* April Fools' Day, Arch is caught twice by a booby-trapped chair that collapses under him when he leans back.
* April Fools' Day as one of the rare catches the player can fish up. The chupacabras reappeared as enemies in the 2019 event (Idol Heroes), then as an opponent team in the 2020 event (Super Beach Volleyball).
* April Fools' Day cartoon, all the characters are replaced by "revamped for the '90s" versions of themselves with black outlines and exaggerated jagged edges, except Homsar who doesn't change at all. The final scene shows all the characters together, with Homsar obviously clashing with the rest.
* April Fools' Day detailed a supposed ultimate deck that "never allows your opponent to deal lethal damage" and "ends games quickly". It actually consisted entirely of ways to trigger a "you automatically lose" condition.
* April Fools' Day EGM described back in 1992. As for Sheng Long himself, the blog had this to say:
* April Fools' Day for their iPlayer service, presented as an actual piece of wildlife documentary footage... displaying flying penguins which emigrated to the rain forest during winter!
* April Fools' Day has a group of teens being picked off on their rich friend's island
* April Fools' Day. He lets go of one end of his bullworker, which spring upright.
* April Fools' Day only to accidentally send him into a coma. After Bart confesses to the prank, Homer wakes up and strangles him. This is just plain wrong, because Homer pulled some harmful if not potentially deadly pranks, including duct-taping Bart's eyes shut and putting milk in the fridge that had been next to a furnace for six weeks yet never apologized. He'd rather drink a beer than be father of the year, that's for sure.
* April Fools' Day, right next to a poisonous snake. Then an ominous pair of boots walk next to him.
* April Fools' Day special references this again by having Popuko and Pipimi briefly sing about how nobody gets the references they make if they go too hard — in the middle of a parody of "I Want to Love You Tender" by Armi da Jany.
* April Fools' Day. The actual Final Girl is shown in bed with her boyfriend and they nearly have sex in the boathouse the next day.
* April Fools' Day, the employees of the Frying Dutchman Restaurant do this to their boss, Captain MacAlister, as he's looking through a telescope. "From this day, I be requiring hairnets."
* April Fools' Day to or have any sense of urgency regarding the horrors around them, which fails to invest him in the characters, which in turn fails to invest him in the game itself. That on top of the characters being badly voiced and unmemorable. It was bad enough that he couldn't bring himself to finish the game, a first for the series.
* April Fools' Day (turns out babies shouldn't drink coffee). They even inverted the trope with "Muppet Elders", depicting the characters of the original show as elderly people living in a retirement home.

* April Fools' Day was described as "Guaranteed to make you popular... unless people don't like you!"
* April Fools' Day was the yodeling music from the game Cliff Hangers, which slowed down as the wheel came to a stop.
* April Fools' Day, which would insert "sponsored lines" at random intervals, and subscribers could turn them off.
* April Fools' Day: While the various couples are getting it on, Arch sits down with one of Chaz's porno mags to relieve his frustration; before falling victim to a booby-trapped chair.
* April Fools' Day with dozens of people contributing "information" about the new area. Though very few, if any, players fell for it, the prank was popular enough to turn the Airshark into a minor meme.
* April Fools episode "I Slap Floor" has everyone acting comically out of character, it works in a few jokes about the show at large amid the wackiness:
* April Fools' Plot involved the characters receiving packages which contained an outfit, an embarrassing photo of themselves, and a letter informing them that if they did not show up at a specific location while wearing the outfit, the embarrassing photo would be made public.
* April Fools prank leaves Homer in a coma. A teary-eyed Bart confesses that he pulled the prank, and as Homer's EKG beeps faster, the lines form the shape of Bart's head, just before he comes to and strangles Bart.
* April Fools special. Grandpa says this about Homer when he was in a coma. However, when Homer starts drooling, Grandpa freaks out.
* April Fools that the entire comic was all a dream of Historical Jesus, back in thirtysomething AD. This, of course, makes no sense on multiple levels but, hey, April Fools strip.
* April Fools who tries to convince him to write a lemon scene. The author complies, and writes one with Norman and Caroline... which he covers by repeating the word LEMON over and over again, only showing small bits in-between.
* April from the episode "I'm No Angel", who seduces Castiel as part of a plan to torture and murder him.
* April from the opening occasionally running by if you have Jennifer facing the camera. This sometimes serves as a reminder that the game's creepy as sin.
* April gets a special, but subtle mention. She would sometimes be prone to be mean towards the turtles if they do anything to upset or disappoint her. When her father was accidentally mutated into a bat and Mikey confessed they released the Mutagen canisters from a Kraang ship, which led to said mutation, she instantly accused them of mutating him on purpose, swore to never see them again, and even refusing to believe their claims that the whole incident was an accident. Fortunately, after a visit from Donnie and when Casey told her his story about how he lost a friend of his on an incident as they both remarked that some things can't be controlled, April not only realized her
* April herself ended up having a baby boy (with Jackson), who died at birth from brittle bone disease. Then, the day she finalized her divorce with Jackson, April found out she was pregnant again. This child, a girl, luckily survived.
* April Hunter did a commercial in Chiba for Toyota with Bionic J promoting a car big enough for two touring wrestlers to fit all their stuff in. Since
* April Hunter was born with pneumonia and later found out she had "chronic lung disease" when competing in an Iron woman contest lead to her needing an emergency inhaler.
* April in Paris has two couples like this form after a lonely 15th century alchemist Jehan starts magically summoning companions from other eras. Barry, an American philology professor who arrives from 1961, finds love with Bota, a Gallic girl from the Roman Empire, and Jehan himself with Keslk, an interstellar archaeologist from the 8th millennium AD. The whole point of the story is that the four’s loneliness and longing for love and friendship was so strong that it bent the laws of time.
* April is attacked by the Foot in the standard "dark and dirty" (and rather empty, as she just missed a train) subway.

* April is technically just a secretary to bureaucrats, but in matters concerning her job, she makes it her mission to do as close to nothing as humanly possible. Which makes her Ron's ideal personal secretary.
* April May, Dee Vasquez, Alita Tiala, Matt Engarde, Cammy Meele, Calisto Yew, and Daryan Crescend and deflect suspicion away from them.
* April once claimed that Elizabeth's boyfriend (and eventual husband), Anthony, was exactly like their dad.
* April Showers, April and Sean first meet during the theater group's initiation ceremony.
* April Showers begins with Sean learning who committed the school shooting, and then flashes back to show the events leading up to that point.
* April Showers school shooting, of which the writer-director was a survivor. It makes no pretense of actually being about Columbine (there's only one shooter, the school in question is called Jefferson High School, and so on), but it also doesn't make any attempt to hide that Columbine was the source of inspiration (the shooter shares the last name Harris with one of the Columbine shooters, some shots are stylized to look like security camera footage evoking the Columbine footage, the shooting pointedly occurs during the month of April, it was released on the 10th anniversary of the massacre, and so on).
* April Showers, the news media are all over the place in the immediate aftermath of the school shooting (they show up at an area where the injured are being treated and loaded onto ambulances moments after some of the students who just escaped the school do). One reporter asks his cameraman "Did you get it?" with a smile, referring to a wounded student lying on the ground surrounded by friends.
* April Showers, TV executive Helen Mann is shown to manipulate Jason (who has just survived a school shooting and seems to be developing PTSD) in service of getting a good story of a "hero".
* April Showers was written and directed by a survivor of the massacre, and heavily influenced by his experiences during and after it.
* AprilsInAbaddon Eastern American Workers' Army. In a slightly more literal sense, the Provisional Government of the United States controls two large but geographically separate blocks of territory (the Northeast and the Southwest).
* April Smith and the Great Picture Show have a song called "Drop Dead Gorgeous" in which the narrator acknowledges her love interest is incredibly gorgeous yet incredibly vapid, and if the love interest has no interest in getting smarter, then hell, neither does she.
* April Smith and the Great Picture Show's "Dixie Boy" is about a woman who will fist-fight any lady who tries to flirt with her boyfriend:
* April tries to get on with her life and pretend that mutant reptiles and aliens don't exist. She succeeds and meets the first normal human boy, Casey Jones, but she's sucked back into the crazy mess she was trying to avoid. However, April not only realized that she can't control her life but also come to terms with the excitement and adventure she has come to have.
* A primary reason for the development of the “fire and forget” Beyond Visual Range AIM-120 AMRAAM missile and its imitators such as the Meteor, Mica and AA-12 “Adder/Amraamski” is so that multi-role fighters such as the F-15, F/A-18, Eurofighter or the Su-35 can engage and down enemy fighters from a stand-off distance without having to jettison their bombs.
* A prime example is Cyric, who was a mortal who allied himself with the god of thieves, who had assumed the physical form of a sword. With it he killed the god of murder and the goddess of illusion and took over both jobs.
* A prime example is Yian Kut-Ku, one of the easiest wyverns in the game, which appears later on as the Blue Kut-Ku, a stronger version identical in every other way. Kut-Ku is one of the few cases where the alternate version doesn't have an appreciable difference in elemental weaknesses, body part strength, moveset or move frequency. For example, a normal(green) Rathian's head is her weakest part, and it will
* A prime example of this occurs when Seob-il and Prince Chang learn separately that the zombies only go dormant in the daytime when the weather is sufficiently

warm. In cold temperatures, they remain active all day and all night. Cue an undead horde descending upon the soldiers who had set up a blockade outside of Sangju and were just about to let down their guard.
* A prime example of this would be the critically acclaimed and fairly successful pre-
* A prime example would be Lord Hong, who was Grand Vizier of the Agatean Empire and probably one of the most powerful and dangerous figures to appear in the
* A Prince Among Men: Episode 3 gives us John the Murderer, who deliberately pushed his parents into the River Mersey. Understandably, Prince doesn't to be anywhere near the guy.
* A Prince Among Men had a brief gag in it's first episode where Gary Prince accidentally presses a button which causes his garage door to open- whilst his guard dog was tied up to it. Luckily, the dog survives and attacks Gary.
* A Prince Among Men has a rare mother and child only example. ‘Family Matters’ revolves around Gary’s attempts to reunite with his mother. He ends up being hit by a woman who he thought was his mother but was actually another old woman, arrested, let out, and then rearrested by his mother, who thought he was sending her death threats.
* A Prince Among Men has Gary's wife Lisel, who can speak in German and enough English to be able to work as a German to English translator. There is also mention of her knowing French, and some Japanese words.
* A Prince Among Men: Part of Gary Prince's backstory is that he was raised on an estate in the North before his talent in football was discovered. In the series' present day, he is a successful ex-footballer and entrepreneur and lives fairly affulently. Not that this has humbled him in any way.
* a prince) for a while. He has a (foster-)brother named Cassim who's a villain, as in the legend, but there aren't many similarities past that, the original Cassim being just greedy with Cassim in the anime being a revolutionary firebrand.
* A prince removes his more popular brother to become Heavenly Emperor. Tai Wei or Run Yu?
* A princess had three suitors, each one giving her a precious gift: a crown, a sword, and a jewel. She doesn't like either of them so she takes a third option via using magic to transform herself into the first tulip flower: the three petals symbolize the crown, the sharp leaves take after the sword, and the bulb looks like the jewel.
* A Princess of Mars, but at least the novelization included the original novel as an added feature in the back of the book!
* A Princess of Mars, Dejah Thoris doesn't admit to her attraction until John Carter rescues her.
* A Princess of Mars, Dejah Thoris is so offended by John Carter than she declares him unfit to clean the teeth of her grandmother's cat. Later, when he finds that she is crying, believing him dead, he talks with her companion, saying that Dejah Thoris is distressed that her grandmother's cat would have no one to clean its teeth.
* A Princess of Mars, Dejiah Thoris (princess of Mars) tries to appeal to John Carter (man newly-arrived from Earth), and fails.
* A Princess of Mars, John Carter becomes engaged to Dejah Thoris after she calls him "my chieftain" and he responds by calling her "my princess", with him not knowing what the exchange of those terms means. It takes him some time to work out why she becomes so upset with him.
* "A Princess of Mars", the prospect of Dejah Thoris's being thrown to the wild dogs in the arena prompts John Carter to secure their escape. She does escape, but he is recaptured and forced to fight beasts in the arena.
* A Princess of Mars ways. Even after he escapes, one of his former captors - the Green warrior Tars Tarkas - remains one of his most steadfast allies, and is a favourite among fans of the series.
* A Princess Tale states that this is how the main character earned her nickname, "Princess Ooh Look, a Kitty."
* A print ad from the 1970s for Camel Cigarettes — whose tag line was "I'd

walk a mile for a Camel" — had a picture of a man next to a jar of pickles and an empty box of vanilla ice cream, and in this case it was not that he had run out of cigarettes, which is why they usually had to leave. The caption at the bottom, "Start Walking", meaning in this case he had to walk a mile for a half-gallon of ice cream for his (presumably) pregnant wife instead of for his cigarettes.
* A printed ad for Admiral televisions in 1958 featured a live Arthur Godfrey interacting with
* A prior episode, "Where Silence Has Lease", does this with a Federation starship — or, more accurately, an illusion of the USS
* A prisoner named Henri Languille, condemned to the Guillotine, became part of
* A Prisoner of the Caucasus. Though the age difference was never specified, Zhilin was old enough to be married and Dina was stated to be about 13, this impliying a significant one.
* a prison he was allowed to design himself and staff with his own guards, he probably didn't mind too much. Eventually the authorities declared he had to go to a regular facility after he brought some people into his prison to be killed, and Escobar became a fugitive by just walking out the back door.
* A prison holds a sign counting the number of days since the last break out.
* A private committee in China established the "Confucius Peace Prize" in response to a Chinese dissident receiving the Nobel Peace Prize. The prize was proposed as a way "to declare China's view in peace and human rights to the world."
* A Private-Eye Monologue provides the narration for "The Deep Hereafter"; a
* A private eye wizard resurrected a tyrannosaurus, rode it through town, and used it to kick the ass of a zombie army to believe than the idea of undead dinosaurs.
* A Private Little War. Kirk is forced to arm the rival tribes similarly to restore the balance of power.
* A Private Little War": On the planet Neural the hill people and villagers are supposed to only have bows and arrows and not fight with each other. So how do the villagers have flintlocks?
* "A Private Little War". The Klingons are arming an Iron Age culture with increasingly sophisticated black powder muskets (rifled barrels were about to be introduced when Kirk and company intervene).
* a private organization with a lot less red tape and whose values are compatible with his own.
* A Prize for Three Empires about human courtship customs and the importance of touching as a sign of intimacy. As their conversation gets more intimate, they end up entwining hands.
* A Prize for Three Empires: After Carol falls unconscious during her brutal battle against gladiator Iva Kann in a Kree arena, she wakes up in the infirmary of a Shi'ar starship, surrounded by her friends.
* A Prize for Three Empires after they allow her rapist to walk out with her. Later she accepts they had no way to know she was being mind-controlled, and the fact they made a terrible error of judgement doesn't mean they aren't her friends.
* A Prize for Three Empires and her mother do their best to keep Joe Danvers unaware that his daughter is a super-hero.
* A Prize for Three Empires and tries to lead a normal life until she sees a villain beating Iron Man down on TV.
* A Prize for Three Empires as Phoenix and Binary, respectively, can zip across the cosmos under their own power.
* A Prize for Three Empires as she is teaching him about human courtship practices.
* A Prize for Three Empires because Mystique's lover Destiny foretold Carol would somehow harm Rogue in the future... which comes to pass because Carol was attacked by them in the first place.
* A Prize for Three Empires believes that loving someone makes you vulnerable, so she sticks to casual, uncommitted sex.
* A Prize for Three Empires, both of which are able to produce and manipulate cosmic fire.
* A Prize for Three Empires, Carol Danvers slaps Thor when he, still unaware that

Carol was raped, tries to commiserate with her for Marcus's death.
* A Prize for Three Empires, every team of super-heroes owns at least one starship with faster-than-light engines.
* A Prize for Three Empires' father Joe didn't take well when his daughter declared she was going to join the Air Force instead of becoming a housewife. He protested, but Carol didn't budge an inch and was backed by her mother, so he was left with no other choice but to accept it.
* A Prize for Three Empires has defeated the Kree champion, the Supreme Intelligence acknowledges it has been beaten and teleports away.
* A Prize for Three Empires has Marcus' palace, located in a dimension beyond physical space and time called Limbo. The walls are shifting and fluctuating, and different time periods flash around of the building.
* A Prize for Three Empires into the Limbo dimension and implant his "essence" in her in order to be reborn in the physical world and use his father's science to make a Golden Age on Earth. It never occurrs to him that his chosen mate would object to his actions.
* A Prize for Three Empires is a Kree warrior groomed since her childhood into becoming a killing machine.
* A Prize for Three Empires is having a heart-to-heart talk with her mother or one friend may be and often is followed with Carol fighting off alien soldiers.
* A Prize for Three Empires is to harvest her special DNA, but eliminating a hated enemy who has constantly thwarted their plans is a nice bonus.
* A Prize for Three Empires' jaw drops when she is introduced to the new Captain Marvel, Monica Rambeau.
* A Prize for Three Empires loses some loved one. Her lover Mike Barnett is beaten to death by Mystique, her dear friend and sometimes crush Mar-Vell dies from cancer...
* A Prize for Three Empires. Nonetheless, he gives her a second chance to complete her mission, making clear there will be not a third.
* A Prize for Three Empires reiterates she has her drinking problem under control. Yes, really! She hasn't even touched that whisky bottle she brought home with... Oops.
* A Prize for Three Empires, the Avengers, the X-Men and the Starjammers travel quickly between the homeworlds of three diferent galactic empires thanks to their ships' FTL engines.
* A Prize for Three Empires, the former wants to beat the latter to the ground for stealing her life, but she hesitates when she notices Rogue is perfectly willing to stay put while she is being punched.
* A Prize for Three Empires twice: she is depowered after her run-in with Rogue, and later she gradually loses her Binary powers after closing a joint mission with the X-Men.
* A Prize for Three Empires warns Iva Kann sooner or later her superiors will find a better soldier and get rid of her.
* A Prize for Three Empires was captured by enemy agents. Her bosses decided a rescue operation was too risky so they wrote her off. Wolverine and several more partners didn't agree, so they went and got her out.
* A Prize for Three Empires was raised by Ronan to be a soldier since she was a child.
* A Prize for Three Empires were partners during the former's CIA stint. They weren't a couple but friends who often slept with each other.
* A Próxima Vítima), the detective was called to solve another murder.
* A probably coincidental instance in animated series based on video games: The
* A (probably incomplete) list of foodstuffs routinely thrown over the contestants in
* A probably unintentional one, Creative Commons licenses have versions readable by "humans", "machines" and "lawyers".
* a problem in electric trucks and scout cars for the same reason, as such vehicles are quieter and stealthier than their gas-powered counterparts.

* A problem in the Southern US during the heyday of the Ku Klux Klan was that oftentimes a KKK member would be arrested for assaulting or murdering a black man, but would be acquitted despite overwhelming evidence, because the juries in the states where the KKK was most active usually contained KKK sympathizers at the very least, and potentially, actual Klan members. So the FBI then began arresting the KKK members for conspiring to violate civil rights, which is a
* A problem with this tactic is raised in the 1971 film adaptation of Alistair MacLean's
* A process exists to make cheap synthetic diamonds that are "synthetic" only in the fact that they were made in a lab and not dug up from the ground. These "synthetic" diamonds actually tend to be flawless, since they are pure carbon and lack the chemical impurities that occur in natural diamonds, and thus technically are "better" than natural diamonds in addition to costing far less than natural diamonds. Nevertheless, the international diamond cartels have managed to keep diamond prices high in part by portraying lab-produced "synthetic" diamonds as being somehow "lesser" than natural diamonds, and thus not suitable to their "elite" clientele who naturally would never think of buying "artificials."
* A production snafu with Reebok and UFC ended up creating several fighter jerseys going by the birth names of many fighters who normally go by other names personally and professionally, including Cub Swanson (who hasn't gone by "Kevin" since he was a young child) and Yoel Romero (born in Cuba as Yoel Romero Palacio per
* A production with a redheaded Johanna similarly removed the Wigmaker's Song and changed "yellow" to "fiery".
* , a product of the '90s that was essentially an at-home LARP for young girls. The game provided four player character roles with unique powers and responsibilities, various props, a list of NPCs and places to visit, a cassette tape that guided players through four different adventures, and a journal for recording the highlights of each adventure.
* A professional driver/hitman tries to kill Bob Lee Swagger's daughter by ramming her car off a mountain road in
* a professional voice actor who frequently turns up in the series or two in any major team-up.
* A professional work in which a canonical character already has the attributes of a
* A Professor and a Student, and Ash has no interest in changing that.
* A Professor and a Student has no problem admitting he lives in a world with time traveling onion fairies, storm causing kaiju fish, and talking Meowth, but humans with special abilities like Aura, Telepathy, and Telekinesis is where he draws the line and is adamant that they do not exist.
* A professor being forced into retirement takes solace in the fact that he'll have time to finish his screenplay. "It's like
* A professor is doing a chemical experiment with his students. Suddenly things start going wrong. The professor says:
* A professor of anatomy looks around the lecture hall for a victim and selects the most timid and virginal
* A Profile. As Masayuki's stepmother, she's very easily influenced, strong-willed and tends to have thought processes at right angles to any normal person. Thus, she is prone to brainwashing her children and any number of other odd things.
* A Profile at one point assumes that Masayuki refuses to hit girls. He's very wrong, as is proved approximately five seconds later. It's not that he doesn't hit girls, he just never felt like hitting the girl in question until then.
* A Profile. Be careful what you tell very serious people to do, Masayuki. They might do as you ask... and then you'll have them saying 'I love you' with a deadpan face during every pause in the conversation.
* A Profile give a hint to a possible Kaine/Miou relationship developing in the future. Before this, Kaine was alternately jealous of and angry with Masayuki regarding Miou because he felt that Masayuki broke up with her in a harsh way.
* A Profile is an anime and dating sim otaku, and quite open about it. Despite this, he's even more popular than the main character.

* A Profile is extremely jealous of Masayuki's stepsister Rizu after Masayuki broke up with her to repair his relationship with said sister. How she reacts varies by route, but the story goes out of its way to show that she does have a point due to the circumstances involved.
* A Profile, Masayuki gets a love letter that his friends immediately assume is a prank until he gets mad at them for instantly assuming bad will. Their position is helped along by the fact the sender forgot to include her name. The sender, for that matter, is annoyed with those friends later because she heard them laughing about it.
* A Profile, Masayuki questions his mother's use of a tilde in her sentence.
* A Profile never makes it onscreen, though she does have a line or two. Maybe. She sounds exactly the same as her sister, you see. Apparently, by the end, even Masayuki has never met her.
* A Profile's second route has Miku as the heroine, who is prone to asking Masayuki questions he really doesn't want to answer about his study habits and how he quit track. The answer that he doesn't want to admit is that he really misses being on the track field. Before this, people were too afraid to mention it in front of him.
* A Profile to him. Everyone knows, but mentioning it just won't turn out well. The first is subverted in the second route, however.
* A Profile was extremely clingy with Masayuki in the backstory. Though she's better now, she's largely responsible for screwing up a large amount of his relationships... and she knows it too.
* A Profile when confronted with the declaration that there's no way Masayuki is ever going to marry his little sister Rizu, Rizu and her mother Riko both react with the exact same sequence of nonsense syllables. For Masayuki's sake, let us pray that Rizu does not grow up to be like Riko in her endings.
* A prolific composer of Mormon-themed music, Lex De Azevedo, produced the 1967
* A prolonged war took place between the Charr and the surviving armies of Ascalon. Ultimately a peace accord was signed in the face of the common enemy, the Elder Dragons.
* A prominent example is with Cole Turner in Season 5. He repeatedly attempts to win Phoebe back and be good, but no matter what he did to try to convince her, Phoebe and her sisters adamantly refuse to accept him back and even try to kill him, stating that he will never be anything more than an evil demon. Eventually, Cole
* A prominent feature of the beast from the earth (commonly associated with the
* A prominent firm of libel lawyers in Great Britain who are renowned for their tenacity in pursuing cases — and fees — are called Carter-Ruck.
* A prominent non-nerd example would be the half an episode Sheldon and Howard spent arguing over what was the species of a cricket they found. They bet rare comic books on it, and even went and asked an entomologist... then included him in the argument when he disagreed with Sheldon.
* A prominent rebel leader during the Indian Mutiny of 1857, Queen Lakshmi Bai, held out for two weeks against the British general Sir Hugh Rose, long enough for 20,000 reinforcements to march to her aid. The combined force was almost immediately blown apart by Rose's cannon.
* A prominent story arc in season 3 revolves around a serial rapist on the loose at Veronica's college.
* A prominent surgeon is on trial for raping a floor-washing lady. They tell their stories:
* a promo about a superhero called Action Pig kept showing up before airings of that particular show.
* A promo clip for "World War Zimmerman" featured Cartman wearing his normal clothes, whereas the episode itself had him wearing a rapper outfit (which he wore in in the scene before it).
* A promo film for the 2017 Budapest FINA World Championship featured Olympic swimmer Katinka Hosszú as a colossal giantess, as well as other (male and female) swimmers in giant size, rambling around town.
* A promo for the finale of Total Drama World Tour says that Alejandro needs a

shirt four times in both English and Spanish.
* A promo includes, among other things, model sheets for a version of the
* A promotional copy of what would become James Otto's first album includes a song called "Gone". It was dropped from the track listing at the last minute because
* A promotional (we think) image has the cast flipping off the camera in costume, with Peter Jurasik (Londo) giving both barrels. It can usually be found as an
* A promotion for the Nintendo UK store offered, with a pre-order of
* A promotion will sometimes run a house show with C-List wrestlers in smaller (or new) markets, often as a test ground and/or to give the lower-tier wrestlers work; these will sometimes take place the same night that the promotion is running two (or more) shows, including the
* Apron de Choushoku wo, "house husband" Shirakawa capitulates under his partner's constant requests to wear a naked apron and proceeds to grant his wish as a birthday gift.
* A properly-fitting wetsuit tends to be like this. And you think tight jeans are hard to take on and off, try ones made of what basically amounts to a body-shaped non-slip mat.
* A prophecy made before Harry was born foretold his rivalry with Voldemort, and that one of them will end up killing the other. The exact terms could have referred to someone else (
* A prophecy twist example: "Thus the earth shall turn to ash"... which turns out to refer to Ash Ketchum in
* A Prophet: El Djebena becomes involved with the Corsican mob when he's in prison.
* A proportionally sized brain wouldn't fit on the way out, so infants sacrifice developing the neurological control of their bodies until after they are born in order to reduce their skull size.
* a proposal and focusing it into a particle beam to strike the planet, where it would react with local materials to form greenhouse gases (e.g. methane) and water. This would therefore warm up the planet and add water to it at the same time.
* Apropos Comics, but with more of a focus on lecturing his opponents about the legislative process and the Electoral College.)
* A proposed storyline for Season 5 was a romance between Paige and Cole. Both their actors found the idea disgusting and refused to go through with it.
* Apropos of not much, there was for a while an unofficial measure of laser power based on how many Gillette razor blades the beam could cut through. Between the fact that it was difficult to measure the power of the first ruby pulsed lasers, and the wonderful uniformity of Gillette razors, it was a natural measurement unit. Thus, proud scientists could brag about their 4 Gillette laser as compared to their colleagues' wimpy little 2 Gillette unit.
* A prospector during the gold rush found a mine, and immediately began working with a pickaxe and dynamite, getting deeper and deeper into the mine each day. However, as he failed with each excursion to find even a trace of gold, at last the prospector threw down his tools and left the mine, never to return. Many years later, a modern company with upgraded digging technology found the mine and immediately began to dig... and they found a rich gold vein
* a prosthetic glass eye from the corpse's stomach. It makes for a striking visual.
* a prostitute in Volantis imitates her appearance to get more clients.
* A prostitute laments that no man would want to marry her, because she's not a virgin. But when a man expresses a willingness to marry her, she flatly turns him down — on the grounds that she's not a virgin.
* a prostitute with whom Tyrion falls in love in this situation than someone driven purely by greed.
* A Protector's Pride concept of manifesting a Zanpakutou a step further: it's theoretically possible to manifest a Shinigami's entire inner world.
* A Protector's Pride of all people. His final words are to call her a fellow god and equal, warn her to be careful because others will want to kill or use her for her powers, and wish her good luck.
* A Protector's Pride, the main characters run out of class because of hollow

attacks going on outside. They yell various excuses as they leave.
* A Protector's Pride, Zommari arrives to tell Cazador (Hollow Ichigo) that Orihime is being held prisoner in Hueco Mundo. Cazador thanks him and then attempts to kill him. However, Zommari is too fast for him and easily escapes.
* A prototype of this joke had the logos appear as red holograms, seen
* A Proud Taste for Scarlet and Miniver, thanks to his work on the English judicial system, has actual lawyers arguing for him, but it takes a few centuries for enough of them to get into Heaven to make a case.
* A. proven guilty of murdering Elena's aunt without her husband's knowledge or consent.
* A Prowler piloted by Aeryn once appeared to fade away, ghost-like, as she said goodbye to John. It's not clear whether this was actually the (never before seen) effect of a Prowler's FTL drive, or an abstract effect meant to emphasize John's sense of loss and isolation. If it was the former, it was quite unlike the usual depictions of
* A pro wrestling example - In the eighties, Hulk Hogan used to enter the ring to Bruce Springsteen's "Born in the USA" - apparently the promoters were unaware the song is meant ironically, not as a paean to American patriotism!
* A PSA about domestic abuse had a child's drawing where the kid himself was a tiny figure with no arms and no mouth, and his father was a huge, monstrous figure with
* A PSA about drinking and driving shows a party where the guests are drinking alcohol. One of the guests puts down his glass and grabs his car keys. The hosts ask him if he is OK to drive. He says that he is fine to drive, which triggers a large inflatable elephant to inflate in a manner similar to a car's air bag. The message is not to ignore drinking and driving like the proverbial elephant in the room.
* A PSA for AIDS prevention had a woman talking about how her husband died from AIDS. She didn't realize he'd passed the virus onto her until their baby was born with it. As she reveals this last part, she walks over to an empty crib.
* A PSA from the US Centers for Disease Control and Prevention went viral with
* A PSA had a thirteen-year-old boy come home from school, only to find that his dad had set up a diagram to talk about sex. Dad gives the kid a choice: talk about drugs, or talk about sex. They decide to talk about drugs.
* Apsalus IIs meaning that if you don't kill them off ASAP, it'll just keep regenerating its HP while it keeps hitting you with beam weaponry.
* Apsalus upgrade over the course of 12 episodes. This one is justified by the Apsalus being an experimental new weapon in active development and testing — the first two versions were work-in-progress prototypes.
* A PSA showing a game show hosted by Caboose is similarly surreal to unfathomable levels.
* A PSA showing a glass of yellow fluid is captioned "Lemonade? Or paint thinner? If you can't tell, your kids can't either."
* A psychiatric hospital was once on trial over its practices and a doctor was asked what the term "FITH" stood for. After trying to dodge the question by saying it was highly technical, he was finally forced to answer: "Fucked In The Head".
* A psychic shard of the fallen angel Lasciel is able to help Harry perfect a piece of guitar music that he himself has written (
* A psychic will pick you up with mind powers, a physic will pick you up with energizing medicine.
* A psychologist could make an entire career off of Courtney: Despite her intelligence and numerous talents, she's very immature, self-centered, cares nothing about the wellbeing of others, betrays people at the drop of a hat, clearly craves attention, resorts to violence when she gets angry, and is a perfectionist with an obsessive desire to be in control of others.
* a psychopathic obsession with killing love itself, resulting in one of the single most cataclysmic events in the history of creation when she killed Cupid with it.
* A psychotic film-maker murders passengers and lives in an abandoned station on the Tube in Nicholas Royle's

* a psychotic, future version of Barry who is much more powerful than his present self.
* APT Comic uses these in a very literal way, you can access them by defying currently-existing canon (like the other plot hole definition) and pull stuff out at the cost of "Plothole Fairy Points."
* A pterosaur has been discovered that used its wings in a penguin-like manner:
* aptitude test after being fired for the Nth time and being told that he's best suited for doing the lowest possible jobs. Whenenver he gets one of these jobs, a disaster occurs which he then solves, prompting his superiors to promote him... and is forced to resign, to stay as low as possible. The story ends with his nephews congratulating him on being promoted several times despite the test stating that he would always remain in the bottom of the ladder... with Donald (looking like he's about to burst into tears) saying "Yes... but I couldn't even succeed in THAT!"
* aptitude -v moo: "There really are no Easter Eggs in this program."
* aptitude -v -v -v -v moo: "Okay, okay, if I give you an Easter Egg, will you go away?"
* aptly named as later on most of their schemes just became about trying to destroy JAKQ.
* aptly-named. Even when he was a lot smaller, his legs were a tiny portion of his height.
* aptly-named ships—each one mounts twenty-four box launchers capable of spewing up to sixty missiles each. Six of them participate in the attack, overwhelming otherwise-competent GARDIAN defensive systems with sheer fire volume.
* aptly-named, the Siege Tank often forms the core of Terran strategies, save for dedicated infantry users or more unconventional tactics. It can also be used on both sides of sieges, as its splash damage when in immobile siege mode is very effective against infantry charges.
* aptly titled "Toothache") the tooth has to be removed before it explodes.
* aptly-titled trilogy gains a reputation for having these, although she herself attributes them to the power of God.
* apt nickname.) However, recent space-based infrared surveys have confirmed that there is no such object within two lightyears.
* Apt Pupil, Dussander attends a parent/teacher conference at Todd's school, impersonating his grandfather, so they can manage to keep Todd's parents from finding out that his grades are in free-fall. The teacher falls for it at the time, but later decides that something's fishy when he realizes that for the entire conference, Dussander referred to Todd as "the boy" instead of by name.
* Apt Pupil has an A student get fascinated with the local hidden Nazi's old war stories. This eventually causes him (and the Nazi) to snap.
* Apt Pupil has a thoroughly twisted version with Todd Bowden and "Arthur Denker" (who is actually a former Nazi concentration camp commander named Kurt Dussander).
* Apt Pupil. However, by this time, he is a misogynistic, hateful monster, and he's only able to perform when he's thinking of rape and abuse; eventually not even then.
* Apt Pupil, Todd fantasizes about stabbing one of his teachers in the eyes with a pencil.
* Apt Pupil with fears of teenagers and other young people becoming radicalized by extremists they may have encountered in entirely normal places.
* APTX 4869, the drug that de-aged Shinichi Kudo and Shiho Miyano and turned them into Conan Edogawa and Ai Haibara, was still incomplete even after Shiho took over as the developer.
* A Public Information Film for Education Maintenance Allowance had a man painted to look like the school football pitch, an anatomy poster on the wall and hooks in a cloakroom to tell kids about the money they can claim if they stay on at school after GCSE.
* A public phone is seen with symbols for the fictitious 'QLD Connect' covering the real Telstra logo on
* A published adventure for 3rd edition has a character who greets the party and advises them that "while on the premises it would be unwise to use any...", then

lists everything offensive the party possess. Given how characters in this game tend to be the speech frequently fulfills this trope.
* Apu gets one in "Homer and Apu" when some gun-wielding maniac is about to shoot James Woods.
* Apu has also been positively received by first-generation Indian immigrants in the United States, due to him showing that a first-generation immigrant is capable of running a successful business and supporting a loving family in spite of his ethnicity and dialect, which is seen a quite significant form of representation by a group of people forced to keep track of multiple languages at once and redefine how they're viewed by the people around them.
* Apu, meanwhile, turns out to be so attractive (he owns his own business and enjoys interior decorating) that four women fight over him, then pool their money so that they can
* a punctured lung. overtime with said injury, winning the game for the Cowboys, and then proceeded to play out the rest of the season with the rib still cracked.
* a punny title By the end of the sketch, when the reporter is finished spitting up (or throwing up, depending on what he ate), usually the hosts of the show ask him if he spit up, and the reporter, rather than admitting his disgust, he first comes up with some kind of excuse, then he thanks the chef, and finally — without caring about the hosts asking for explanation — greets them too.
* A pun on the word "crap" or "shit" in a situation regarding poop or toilets.
* A Pupil of Mine Until He Turned to Evil: A student used to be loyal to their mentor.
* A Pupil of Mine Until He Turned to Evil: The villain used to be a student of the hero.
* A Pup Named Scooby-Doo after the villains are revealed, they will say the traditional, "And I would've gotten away with it too if it wasn't for you meddling kids." Many times, Scooby would have to remind them to finish by saying, "Oh, and that puppy."
* A Pup Named Scooby-Doo, and an image of it was often used in the title card for each episode.
* A Pup Named Scooby-Doo: A non-drool example occurs in "Horror of the Haunted Hairpiece", where Shaggy and Scooby are spying on the hairy monster Bigwig when they notice hair falling down on them and realize he's leering over them.
* A Pup Named Scooby-Doo can't get away with it?!" and the robot dog (revealed to work for the guard), that was trying to usurp Scooby with solving the mystery captures the kids and Daphne's parents, forcing Scooby to now fight the robot dog.
* A Pup Named Scooby-Doo despite him still voicing Scooby, although Welker would once again return to the role in the DTV movies that followed.
* A Pup Named Scooby-Doo does help with the impression. However, he's simply too ashamed to admit he likes comic books.
* A Pup Named Scooby-Doo Dr. Croaker spotting them and stealing their rare Commander Cool comic. The trouble is, everyone recognizes them anyways, notably Daphne...
* A Pup Named Scooby-Doo episode "The Sludge Monster from the Earth's Core" had Scooby use this technique with popcorn.
* A Pup Named Scooby-Doo episode title "The Computer Walks Among Us", Velma use this strategy to deal with her robot, the Dinkley 2000, which follows everything command until it gone crazy. The robot catches the gang off guard and grabs Freddie, Daphne, and Shaggy, and devours them, before moving in on Velma. After asking Scooby something, she gets an idea to stop the robot. She and Scooby ask the robot to do several chores at once until it overloads. Freddie, Daphne, and Shaggy then emerge from the robot unharmed. Velma explains that Scooby reminded her that the robot was designed to follow every command.
* A Pup Named Scooby-Doo, every suspect is listed... and the one character who isn't listed for whatever reason (too unlikely, had an alibi, or just plain the writers didn't feel like including them) is invariably the culprit.
* A Pup Named Scooby-Doo expy), and revealing it to be the owner of the Pervis Parker museum, Velma states she first became suspicious of him after he made a long

complaint to the kids about business being terrible, but when Daphne bought tickets to the museum, he was easily able break her large bill.
* A Pup Named Scooby-Doo, Freddy is a fan of a ridiculous tabloid called the National Exaggerator.
* A Pup Named Scooby-Doo. If you listen closely, you can hear what Velma's saying: "So here's what we're gonna do, okay?..."
* A Pup Named Scooby-Doo: In "Curse of the Collar", Scooby is distraught when a ghostly dogcatcher snatches his parents, and Shaggy tells him to stop worrying before he wears a hole in the floor... only for Scooby to find that he already has.
* A Pup Named Scooby-Doo in the former she was Velma and Wendy in the latter, her current status and whereabouts are unknown.
* A Pup Named Scooby-Doo is paused (along with the music) usually by Daphne who has to go shopping, fix her hair etc.
* A Pup Named Scooby-Doo, just before they revealed who the monster was.
* A Pup Named Scooby-Doo: Lester Leonard left the Critter Getters to start his own monster-catching business.
* A Pup Named Scooby-Doo liked to parody this by having Fred suggest it even when it made absolutely no sense. For example:
* A Pup Named Scooby-Doo: Scooby would also do this to tell the others about the monster.
* A Pup Named Scooby-Doo Shaggy makes popcorn by putting it in the microwave and setting the temperature to 8 million degrees for one second. It works: His house is instantly filled with popcorn.
* A Pup Named Scooby-Doo, "Sludge Monster from the Earth's Core", as a part of the gang's trap to capture the monster, Scooby was to spray the monster with a garden hose, but is tossed around when the hose is turned on and the plan fails.
* A Pup Named Scooby-Doo, the gang gets wedged in a doorway trying to escape from "The Babysitter From Beyond" (episode title).
* A Pup Named Scooby-Doo. They get zero points throughout the game as the opposing team gets every answer right until passing on the final puzzle. Shaggy gives the correct solution ("pizza") and earns 30,000 points for himself and Scooby, enough to win the game.
* A Pup Named Scooby-Doo, to which Shaggy and Scooby rush to turn the set off.
* A Pup Named Scooby-Doo, usually cutting to Velma making a note of what was just said.
* A Pup Named Scooby-Doo ("Velma said 'Jinkies!'" "It MUST be a clue!")
* A Pup Named Scooby-Doo when Fred and Daphne keep calling him Norville to tease him. Scooby joins in on the teasing as well.
* A Pup Named Scooby-Doo where, after going through the usual theories, the monster is revealed as "Someone we've never seen before!" This time, though, they know what's going on; this man was disguised as a woman that they met earlier.
* A Pup Named Scooby-Doo, where an actor who plays a vampire claims that the fake fangs he wears makes him speak in an accent when asked why he doesn't have an accent off-screen.
* A Pure Formality gets his foot trapped in a bear trap. He manages to escape by stripping off his gumboot.
* A Pure Formality is dead after committing suicide, but he only realizes this by the end of the movie.
* A Pure Formality makes a huge fuzz about being denied his phone call.
* A Pure Formality, the hero finds himself in a prison cell with walls full of scribblings.
* A purely aesthetic one, but still noteworthy mistake. Robin, who is 28 at her introduction, got her first bounty when she was 8, and when some Marines recognize her, we see the bounty poster with a picture of her 8-year-old self in an
* A purely diplomatic character, missing out on the experience from combat, will finish the game at a lower level, but have a much more powerful overall party. The maximum number of NPC followers can wield every
* A purely mathematically efficient use of space might have a detrimental effect on the mental well-being of the crew, especially if spaceships are out of port for

a very extended period of time. To give a more interesting
* A "purple crocodile" (paarse krokodil) is now synonymous in the Netherlands for unneeded bureaucracy
* A "purple nurple", the act of twisting a person's nipple until it turns purple (usually considered a school prank), obviously got the name by changing "nipple" into a "word" that rhymes with "purple".
* Apur Sansar: Apu abandons his baby with his in-laws after his wife Aparna dies in childbirth.
* Apur Sansar: Struggling young would-be author Apu hits on the idea of writing a novel about his own life.
* Apu's children were conceived and aged from newborn babies to kids old enough to walk and talk.
* A puzzle where you have to save the heroes from burning by undoing the ropes binding them. This is simulated by tracing the tangled, knotted rope. With a controller.
* A puzzle which involves deactivating an electrified floor by destroying its power supply using guided missiles. (previously featured in MG1).
* A Pyke Mystery turned private investigator, who works in the 1840s, at the time when the new railways are opening up Britain as never before.
* A Pyramiding Rage! when he battled Brandon and Brandon kept knocking out his Pokémon with no sign of his even taking damage.
* A Pyro with a shotgun is an average speed, average health class with the most commonly appearing stock weapon (four classes out of nine use it, with the next most common weapon only appearing in two out of nine loadouts), reaching to medium range and doing moderate damage. Obviously not what the class was
* a Q&A thread, though it could be said that lying was the only way to preserve any suspense when asked that question.
* Aqours World Love Live: Brand New Wave concert was interrupted after "Brightest Melody" to inform the audience of the 7.1 Ridgecrest earthquake and how the show was taking a break to check for damage from it.
* Aqua allows Kazuma to rest his head in her lap and suck his thumb after he nearly gets gang raped by a pack of amorous lady orcs.
* Aqua also gets some of the most flexible unique commands, which take her until around halfway through the game to learn with normal play even assuming the player knows the correct sequence of command melds. Upon gaining these, Aqua becomes able to curbstomp entire waves of enemies with single spells and can demolish bosses with much less fear of reprisal than Terra or Ventus. However, until she learns at least third-level magic she will generally have a much harder time of combat than either of the others, as the low-level spells lack the area of effect or base power to take advantage of her high Magic stat.
* Aqua and Toy-Box songs are frequently mistaken for being by the other group. To be somewhat fair, they are both eurodance-bands featuring a high-pitched female lead singer and a deep-voiced male co-singer.
* Aqua and Ven (but not Terra, as he's too slow) have a preemptive counter ability that lets them flash behind their current attacker and slash from behind. Ven just dashes very quickly around them before they can react, but Aqua teleports in a flash of light. Aqua ups this to leaving after images all over the place when she powers up to Ghost Drive mode. The command 'Time Splicer' also does this, but it actually prevents non-boss enemies from moving at all until your character decides they're done. Enemies Master Xehanort and Vanitas are also fond of it.
* Aqua at some point. Dance Dance Revolution fans are more likely to attribute all bubblegum dance to Smile.DK instead.
* Aquablue, in addition to their regular "exo-tanks", the Legion has brought some prototype walkers for field-testing, and the general explains this practice helped eliminate some flaws in an earlier generation. The most notable "flaw" in these ones is that since they're not field-testing weapons yet, they only carry props.
* "Aqua Buddha" ad Conway in the polls, with the ad being cited as one of the primary reasons why.
* Aqua (drinking water brand): Very common in Indonesia, and also a necessity

considering Indonesia's tap water is generally unclean to drink directly, to the point where all drinking water brands in the country are often simply called "Aqua."
* "A quadriplegic Swiss man on a pony." (He's lashed to it with ropes)
* Aqua features the line "What we do is what you just can't do" to remind kids not to try all the things they see their cartoon heroes doing.
* Aquagenic urticaria, an extremely rare form of allergy where contact with water causes the skin to break out in painful hives and welts. While taking showers, jumping in pools, and walking in the rain are a big no-no, some cases are so severe that those suffering the condition can't even drink, sweat, cry or even give birth without getting a painful reaction.
* Aquagirl really did die, and he really was genuinely devastated by the reveal of his true parentage, to the point where Wally isn't totally confident Aqualad won't end up becoming this for real in the end after all, especially since he's growing a genuine bond with his father, while becoming more and more detached from the team.
* Aqua: 'Halloween' features one of these at the beginning, setting the spooky tone for the rest of the song.
* Aqua is a water goddess with the power to cleanse impurities from any source of water and
* Aqua) is trapped within the Realm, and when she next meets someone from the Light, she's astonished to learn that ten years have passed outside. She doesn't appear to have aged at all.
* Aqualad, but those incarnations of the character are so far removed from the classic version that Barnacle Boy is based off of that the connection is likely still lost among viewers.
* Aqualad goes deep undercover to get closer to the Light. Nightwing helps Artemis fake her own death, so she can join him undercover. The Light gains a new ally in the Reach, who help them expedite the Light's covert experiments on metahumans. And the Reach themselves have a secret armada of ships waiting in the deepest part of the ocean.
* A Quality of Mercy", the battle-hardened marines have been fighting the Japanese for two years, which has made them war-weary. Andrew J. Watkins tells the gung-ho Lt. Katell that they have seen enough dead man to last the rest of their lives and that they aren't going to stand up and cheer at the opportunity to kill more. Sgt. Causarano later says that the platoon consists of "dirty, tired men who have their craw full of this war."
* Aqualung could be seen as two concept albums in one. The first LP side is a series of character sketches, and the songs on the second side have a pro-God, anti-Church message.
* Aqualung (scuba gear): Used in Russia, Ukraine, Belarus, Lithuania, Estonia, Bulgaria.
* Aqua Magna, the water planet (literally means "great/powerful water")
* Aquaman (2018), and surely they weren't gullible enough to fall for it...? No, they weren't, they just thought a war with the surface was inevitable, and if Orm was willing to organize one and set himself up to take the political backlash, they lose nothing by playing along.
* Aquaman (2018), Arthur and Mera lean in to kiss after discovering the last clue pointing to the location of the Trench. Then Black Manta and the Atlantean commando team he leads open fire and show up.
* Aquaman (2018), Arthur Curry/Aquaman easily shrugs off bullets, and getting shot with a grenade launcher only knocks him out for a few seconds.
* Aquaman (2018). Despite these weapons being extremely deadly and advanced in their current state, we get a scene of Kane pulling the technology apart, redesigning it, coating it in black spray-paint, and even being forced to design the helmet larger to accommodate the laser function he took out of the plasma gun and placed in the helmet lenses. And thus we get Black Manta.
* Aquaman (2018): Dr. Stephen Shin is dismissed by most as a conspiratorial loon for claiming that Atlantis exists. This of course ignores the fact that Earth has experienced two alien invasions already and has an Amazonian goddess living among

humanity. Shin also repeatedly points out Aquaman's existence, to no avail.
* Aquaman (2018): Gender Inverted. One of the main themes of this film is fatherhood, and most of the characters are seen to have close and loving relationships with their respective fathers.
* Aquaman (2018) goal, to unite the four remnant kingdoms of Atlantis and lead them in a war against humanity.
* Aquaman (2018) In their rematch, Mera advises Arthur to take the fight to his home turf, so Arthur forces them to the surface. Orm is not used to fighting on the surface, while Arthur is, allowing Arthur to defeat him.
* Aquaman (2018) is that he holds the surface world responsible for polluting the oceans and endangering his people. Not one character argues him on this, not even Arthur, but they feel that Orm's desire to wipe out humanity is far too extreme or that the ensuing war would cause devastation to both sides.
* Aquaman (2018) is the best warrior among the Atlanteans who had personally trained both Arthur and Orm, which subsequently makes him an even better warrior than they are, considering how the one time he is seen fighting, he utterly destroys Arthur in a spar, and how he is repeatedly acknowledged to be capable of defeating Orm himself, and he was also a collector of many intelligence and knowledge who had started their hunt for the Trident of Atlantis. In order to prevent him from single-handedly ending the conflict or at minimum providing some much needed assistance that would have helped the two in their quest, he is only given the role of telling them about the Trident and his character is that of a peaceful and non-agressive character who relies on diplomacy and doesn't retaliate even when pushed, along with also having Arthur's defeat of Orm necessary.
* Aquaman (2018) is the daughter of King Nereus and spends most of the movie helping Arthur and fighting; she's also an excellent pilot. Even Queen Atlanna is shown to be a competent fighter.
* Aquaman (2018): King Orm's Atlanteans obtain the surrender of the Brine Kingdom about 55 seconds after beginning their invasion.
* Aquaman (2018): Made in 2018, flashback to the eponymous protagonist's mid teenage years set in 2001.
* Aquaman (2018): Made in 2018, flashback to the eponymous protagonist's teenage years set in 1998.
* Aquaman (2018). Nereus sees through it immediately but goes along with it because he wanted to attack the surface world as well.
* Aquaman (2018), only for the comics to come up with a different answer while it was in production.
* Aquaman (2018): Orm intends to unite the Atlantean kingdoms under his banner in order to lead them in a war of conquest against the surface world and thereby forever stop the harm he sees humanity doing to the ocean and its creatures, which includes his own kingdom.
* Aquaman (2018) revels in this, emphasizing and working with the sillier elements of the Aquaman mythos to its benefit.
* Aquaman (2018) shows how Arthur's parents met, conceived him, and eventually separated. We get to see the young Arthur in an aquarium and later in the film through flashbacks.
* Aquaman (2018) That said though, the deciding factor is a rematch between Arthur and Orm, this time on the surface of the ocean aboard one of the warships.
* Aquaman (2018): The plot revolves around two half brothers and their mother.
* Aquaman (2018): The Trench creatures were once Atlantians or at least, far more sapient than they currently are before Atlantis sank. Hundreds of years of adapting to the darkest parts of the oceans took its toll on their minds and they devolved into monsters.
* Aquaman2018: This incarnation of Orm is, as megalomanical villains go, a pretty decent boss. He insists on paying Black Manta for his services even when Black Manta insists he doesn't want payment. When Black Manta decides to make an attempt on Arthur's life, Orm provides him with intel and cutting-edge Atlantean weapons and equipment at no cost. And finally, when Orm reveals he knows about Vulko's betrayal and even the audience would consider him fairly well-justified in having

Vulko killed, he refuses to do so, instead having the latter merely imprisoned.
* Aquaman (2018): Thomas Curry is shown to have found Queen Atlanna washed up on the shore unconscious and carried her back to the lighthouse. After that, they had a relationship and conceived a son together.
* Aquaman (2018), tridents and swords made of Atlantean steel can go through ultra-dense Atlantean flesh and even Atlantean power armour like it was nothing, to say nothing of tech made by surface-dwellers.
* Aquaman (2018): When Arthur is first confronted to the Karathen, all we see of the monster is its titanic squid-like tentacles trying to crush him. We see the full monster later, and it's quite colossal.
* Aquaman (2018), which Aquaman's mother being the Non-human (Atlantian) while his father is the human.
* Aquaman: A member of the royal family can challenge the king to a trial by combat for the throne of Atlantis.
* Aquaman and Aqualad headlined issues #30-33 (February-August, 1961). While the main character was already appearing in anthology series, this trial run established that Aquaman could work with longer stories. He "graduated" to his own ongoing series, starting in January 1962. His ongoing was published to 1971, was revived in 1977 and was cancelled in 1978.
* Aquaman and his fellow Atlanteans could not stay out of water for more than an hour without dying.
* Aquaman and instead looked like someone pulled the thing out of the forge too soon. The new suit was done away with after just one story arc.
* Aquaman and Ocean Master aren't just aliases, they're official royal titles; Aquaman being the title for the king of Atlantis and Ocean Master being the title for the supreme military leader of all of the underwater kingdoms, something similar to the title of dictator in Ancient Rome.
* Aquaman and, unaware of his nature, tried to kill him by holding his head underwater. This healed his injuries and strengthened him enough to turn the tables.
* Aquaman Annual #2, the first storyteller believes that Atlantis was a domed city on the surface of Old Earth.
* Aquaman Annual #2, the first storyteller believes that Earth was a desert planet, as is the case with his own planet.
* Aquaman Annual #2, two storytellers tell conflicting stories about Aquaman to determine which is better. He is a great hero in the first story and a terrible villain in the second.
* Aquaman: An unnamed Nazi commander who sent U-boats after civilians, and is killed via grenade at the end of the issue.
* Aquaman: Aquaman has to fight his brother Orm for the throne of Atlantis. Also in this continuity Mera is a warrior princess of the Atlantean tribe of Xebel, and groomed to become queen.
* Aquaman are examples of perfectly good superheroes who gained a reputation as losers with time. When your own sidekick turns out to be a cooler hero than you are, that's a bad sign.
* Aquaman Army after a misunderstanding of the names of the team colors (Aqua and Army).
* Aquaman: Arthur/Aquaman defeats King Orm in battle and deposes him, he's then taken into Atlantean custody.
* Aquaman, as could the destructive denizen of Sub Diego, the Eel. There's also his little buddy Aqualad, currently Tempest, whose magic powers grant him elemental control over water.
* Aquaman as LITERALLY 'King of the Seas' makes for a potentially fascinating badass backstory character, too. Imagine if he has access to enough military power to limit or stop oceanic cargo transport or interdict the movement of national navies.
* Aquaman: Atlanteans developed water-powered blaster rifles technology. David Kane adapts this technology into the helmet of an armor that he develops, becoming Black Manta.

* Aquaman, Atlantis was once a united kingdom hundreds of years ago. But then the place sank, forcing the survivors to adapt to the changing environment. Seven kingdoms rose:
* Aquaman, at one point Aquaman goes to Arkham Asylum to ask Jonathan Crane, AKA Scarecrow, for his insight into a serial killer stalking the city.
* Aquaman at the drop of a dime. However, Aquaman is mostly characterised as being a benevolent ruler.
* Aquaman at the end of Blackest Night. Post-Flashpoint, their relationship as fiancees was on more steady ground, but less certain on when they would finally consummate their relationship. That is, until they had a child and brought democracy to Atlantis in #65 of the Rebirth era.
* Aquaman before they'll let him make the movie. Which backfires even worse, because while Vincent may have accepted the problem if they had told him about it outright, the fact that they lied to him and sent him on a wild goose chase causes him to make an unreasonable demand of his own — thirty million dollars or he's not putting on the tights again.
* Aquaman begins by showing Arthur Curry's parents meet, then their years living together as a family and having a son. It subsequently skips to several years later, as Arthur displays his power for the first time. It doesn't pick up with his adult life until about 11 minutes in.
* Aquaman both of whom eschew contractions and slang despite the fact that the latter is a teen. Fellow Atlantean Lagoon Boy seems a bit more informal with his speech.
* Aquaman. Even its critical and audience reception is warm enough to invoke this.
* Aquaman, eventually defecting from Xebel and becoming a powerful heroine on her own.
* Aquaman film together. When Mandy's handlers find out about the relationship, they attempt to force an end to it because they fear that Mandy's squeaky-clean, good girl image will be damaged if the public learns that she's involved with Vincent Chase, who has a reputation as a womanizing party animal.
* Aquaman, forcing the Justice League into action, thus forcing Arthur to pick a side (he was talking both sides down). Afterwards, once Orm is imprisoned, they still don't particularly hate each other, but it's just the way it has to be.
* Aquaman get a lots of mileage out of the fact that the text-boxes are directly from the Atlantis Chronicles, but the events on-panel are what actually happened. This is generally played for laughs, but it turns horrific at the end of one volume, where the chronicler notes that the princess was reportedly frigid on her wedding night, and chalks it up to nerves (it being her first time and all). The reader, however, knows that she had been raped the previous night.
* Aquaman Golden Age origin story, this was played straight. He was a normal guy who learned how to breathe underwater and do everything due to Atlantean training techniques.
* Aquaman has a harpoon that he never skewers anyone on despite it being obviously pointy and often used in battle.
* Aquaman, he vows revenge against the people who claim to have killed him, the Crime Syndicate.
* Aquaman himself insisted on waiting until SDCC 2018 to release the first trailer as he wants to make it as faithful to the final movie as possible, especially given how previous trailers for DCEU movies have misled fans on the final product. The result ended up gaining positive reviews from critics and audiences, and the first film in the franchise to make over $1 billion worldwide.
* Aquaman Including microscopic ones. Combine this with a generous helping of comic book physics, and voilà, this trope!
* Aquaman, is no slouch but ended up missing for almost his entire childhood. When he finds her again shes an impressive warrior.
* Aquaman is, save for a post-Crisis period up until Blackest Night, the offspring of the human Tom Curry and Atlantean queen Atlanna.
* Aquaman is the King of the Sea(s). He's also been called "The Sea Sleuth".
* Aquaman: Justified. His skin is almost bulletproof and his costume is armoured,

so shooting him isn't going to much but annoy him and give him a little scratch. However, most people don't actually know how durable he is because, well, guns don't work underwater so he almost never gets shot. Therefore, some people do try and are pretty shocked to see the bullets just glance off him.
* Aquaman, King Orm blames humanity for the polluting the seas and harming Atlantis. As such, he decides to form an alliance with the Atlantean kingdoms to exterminate the surface-dwellers. As a prelude to his invasion, Orm creates a series of tsunamis that destroy several major coastal cities.
* Aquaman: King Ricou of the Fisherman kingdom believes war with the surface is not inevitable and that Atlanteans should educate the land-dwellers. Whether this belief was naïve is hard to say, but it was definitely naïve to think Orm would take no for an answer.
* Aquaman marrying Dolphin just because she was pregnant, but because they were in love, despite Arsenal's insistence on calling it a "harpoon-gun wedding".
* Aquaman meme is widespread even in-universe. What many of his opponents tend to forget though, is that he has super strength and speed, and happens to be one of the most powerful telepaths on the planet. Needless to say, people who underestimate him usually end up regretting it.
* Aquaman, Mera's father is named Nereus. In the comics, Nereus was the name of her betrothed before she fell in love with Aquaman instead.
* Aquaman movie, which provided the first look at Aquaman and Black Manta's new costumes. WB subsequently had the videos removed, but by that point the images had already been spread around the web.
* Aquaman, not as much as blinking. Seconds later Downpour throws three punches at Aquaman, who doesn't even flinch before knocking Downpour out cold with a single backhand.
* Aquaman: Oceanologist Dr. Stephen Shin appears on the news a few times trying to convince people Atlantis is out there and behind the recent tidal waves of garbage. He's completely ignored and insulted by the tv pundits... which'd be understandable if it weren't for the fact Aquaman's a public figure.
* Aquaman on the international market, with a significant chunk of the movie taking place underwater in the kingdom of Atlantis.
* Aquaman openly despises humans and openly whom he blames for the polluting the seas and overfishing marine wildlife. As such, he believes that the only way to preserve Atlantis and save the environment is to wipe out humanity. He is also a pureblooded extremist who hates his half-brother Arthur Curry for being the son of the late Queen Atlanna and a surface-dweller.
* Aquaman, Peter David described the "face" of the meteor that destroyed Atlantis. He meant it metaphorically, but the artist, working from a script translated into Spanish, took him literally and drew the meteor with a skull face on it. When he saw the art, David said "Keep it," reasoning that the only thing more terrifying than a meteor heading right for you is a meteor heading right for you WITH A SKULL ON IT.
* Aquaman: Several moments of dialogue are cut off by a huge explosion or attack of some sort.
* Aquaman's father in the film is played by Temuera Morrison (NZ Māori), who, alongside Māori characters, has also played a Hispanic boat captain in
* Aquaman's father is a human lighthouse keeper and his mother is an exiled Atlantean princess/outcast.
* Aquaman shows up wearing bright green board shorts and a bright orange tank top, Lois says that he looks like Flipper threw up on him. The show explains it, correctly if not perfectly truthfully, as being the University of Miami school colors.
* Aquaman's incredible strength and durability come from he and his fellow Atlanteans adapting to the "crushing ocean depths" is related to this trope.
* Aquaman's Lament which seems to be by a guy named Mark Aaron James... it's pretty excellent, anyway.
* Aquaman's nemesis and half-brother, Ocean Master, gets a trident which boosts his already-impressive magic capabilities. It's given to him by the demon Neron, in

* Aquaman spent most of his time keeping a low profile while providing aid for small oceanside villages and rescuing people lost at sea before taking on the mantle as King of Atlantis.
* Aquaman still takes time to fight for Truth, Justice and the _____ way when he's not busy ruling over Atlantis.
* Aquaman, the Others, have Joshua Cole, a.k.a. Operative, who has an Atlantean key that has the magic property of being able to unlock any lock.
* Aquaman up as a suicide strike, and his final action after being beaten is to trigger it, ensuring that the whole world follows him into death.
* Aquaman. Upon hearing his name, freelance spy The Operative and Soviet-engineered super-cosmonaut Vostok offer near-opposite different descriptions and opinions of him and his actions.
* Aquaman villain The Thirst drains water from his surroundings and people, putting Aquaman at a serious disadvantage.
* Aquaman, Vulko engineered the entire war to get revenge on Atlantis for exiling him and force Arthur to take the throne.
* Aquaman was based in Sub Diego: a portion of San Diego that was submerged in an attempt to convert humans into subaquatic beings. The population consisted of a mix of these altered humans and Atlantian refugees.
* Aquaman was co-created by Mort Weisinger (1915-1978) and Paul Norris (1914-2007). Neither man continued working in the series for long after the 1941 debut. The character rose to fame under other writers and artists. Their deaths had no effect on the character.
* AquaMan was heavily rushed for the game's release to be coincided with a launching volume of the Aquaman series from DC Comics, and its final results definitely show.
* Aquaman when Arthur and Thomas exit the pub, Mera can be seen exiting the water and walking towards them as they get on Thomas' truck.
* Aquamarine and Sara Paxton), she's the only one who's a professional singer - and the only one who doesn't sing on the movie's soundtrack at all.
* Aquam (water), Auram (air), Herbam (plant), Ignem (fire/light) and Terram (earth) spells.
* Aqua Necklace. The whole thing is over before she knows anything happened, and she doesn't even feel pain — at most, she has a vague suspicion that something happened.
* Aquanox series is basically a space combat sim underwater, involves a lot of dogfights, mostly using futuristic weapons, complemented with occasional torpedo launches. Unlike actual submarines, most subs featured in the series were all single-pilot with a cockpit. In a bit of realism, there was a way to instantly kill another sub by shooting out the thin cockpit glass with a sniper-like weapon, causing the other sub to implode. Strangely though, hitting the same glass with a much more powerful weapon would not necessarily have the same effect.
* A Quantum Murder, involves a murder commited via a laser mind-programming device (originally developed as a learning tool) and solved through a neurohormone that enables someone to look back in time. Alarmed by the implications of both devices, Julia Evans, the idealistic but powerful CEO of Event Horizon, arranges for the destruction of all records, and gives a generous job offer (of the accept-or-else kind) to the scientist who witnessed these events so she can keep an eye on him.
* A Quantum Murder. Teenage heiress Julia Evans sets this up deliberately by hiring a handsome swimming champion to coach her, despite the fact that she can swim perfectly well.
* Aquapazza moves much slower than the other characters and relies on long-distance zoning tactics.
* Aquapets. Google it. How this toy made it into production in its original form is anyone's guess, but when someone finally asked "
* Aqua Pigs has seagulls as the antagonists, who poop and if it lands on your pod, then it's game over.
* Aquapunk is often seen rubbing/stroking the scars around her wrists, which were rubbed raw from the heavy shackles she was forced to wear while in prison. This

tends to happen when she's deep in thought, anxious, or both.
* Aqua Regia, but still fits because they're using their military prowess to move their economy.
* Aqua Regia covering his left side of the face which has a huge X-shaped scar.
* "Aquarela do Brasil" ("Watercolor of Brazil") dates back to 1939, and gained initial success in the States via the
* Aqua Rhapsody's original concept came from a dream the developer had, but the final product ended up having some key differences.
* Aquaria advertises over 175 unique creatures to discover. This is a list of the ones that are harmless: small fish, some (but not all) eels, a couple species of jellyfish, macaws, and monkeys. Everything else hates you and wishes to feast upon your delicious, juicy corpse.
* Aquaria as she loses all interest in solving the mystery or exploring; she's so happy that she's not completely alone anymore that as long as she doesn't have to be alone ever again, the game could end right there for all she cares. She literally only continues along to find the answers and beat the final boss because there's a mouse cursor telling her where to go and what to shoot.
* Aquaria at the end. Do not play this level if you are planning to get any sleep that night.
* Aquaria) fish that happen to have hair, one short and blonde, the other long and black. Now, in case you didn't know before, one of the amazing features of this game was that it was made just about entirely by two men.
* Aquaria that can be swim through, the other ones are more in the background, at least one of them is from a creature that can also be encountered alive, and these creatures are indestructible, (for the player anyway) and quite gentle, so that makes it extra sinister.
* Aquaria variety in its environments, coupled with a diverse array of wildlife, both natural and fictitious.
* Aquaria, with a very useful third cooking slot as your reward for playing well.
* Aquaria without gaining the Sun Form (which gives you light) first. It might be even possible to reach the final boss without gaining the sun form at all.
* Aquarion Evol has a variant. When "transfer student" Jin can identify an attacking Abductor by name, Yunoha is able to make the obvious connection.
* Aquarion Evol has Sazanka, who is nothing but friendly and enthusiastic as she hawks suggestive photos of her classmates.
* Aquarion Evol is a yaoi fangirl and even has the ability to corrode things.
* Aquarion Evol: Mikono Suzushiro comes from a family of Element Users, but apparently was born without any powers. This turns out not to be the case; it's just that her Element power is rather subtle, and its effects aren't particularly noticeable as being the result of a supernatural ability.
* Aquarion Evol of whatever their power enables them to do, at the most boring and petty level possible. For example, the girl whose ability is patching holes in matter has to use a hole puncher on miscellaneous papers for hours...
* Aquarion EVOL" rants, Mix suddenly remembers that she had promised to meet up with Andy, whom she's been very obviously crushing on for some time, and runs off.
* Aquarion Evol that after a while, one girl derisively remarks that "he'll fly for anyone".
* Aquarion Evol. The series gives no development, characterization, or explanation of any kind as to what this girl's deal is.
* Aquarion Evol They're all smiling in the end, but the viewers can't say the same...
* Aquarion Logos literally the main power of the Aquarion San which threatens to erase Akira from existence to the point of nobody remembering him. The villains loyal to Nesta also use similar methods to destroy writing from the world. The Aquarion Logos Genesis, the final form of the titular mecha, has the power to erase concepts from reality and everything associated with them by default.
* Aquarium, a superior asks Suvorov whether he knows what a certain section of the intelligence department is dealing with. Turns out he does — since he never received any data from them, the obvious conclusion is that these are units which

only operate during the war. Combined with the available data about the section's officers, who are all very tall, that means these are recon and sabotage units. Well, the proper name for them is Spetsnaz, but of course that cannot be obtained by deduction.
* Aquarium: When he is recruited, Suvorov is shown a film of a traitor being burned alive.
* Aquarius Camus defeat his pupil (or student's pupil, in the anime) Cygnus Hyoga and literally creates an ice coffin for him so he can preserve the body for years, until Hyoga is ready to fight again. It takes a Golden Cloth's weapons and Shun almost dying to de-frost him and bring him back to the Sanctuary arc.
* Aquarius, Haise doesn't believe it at first having gone over the calculations thrice. Haise eventually figures out where his math went wrong — he only calculated for two people, i.e., he forgot Swigert, who on a normal mission wouldn't have been in the lunar module.
* Aquarius, while not being noted as having an out of the ordinary date, has the horoscope "Roger Moore will drop in for lunch, bringing Tony Curtis with him. In the afternoon a substantial cash sum will come your way. In the evening Petula Clark will visit your home accompanied by The Mike Sammes singers. She will sing for you in your own living room. Before you go to bed, Peter Wyngarde will come and declare his undying love for you."
* A quarry also pops up as the planetoid Kryten and Rimmer play golf on in a flashback scene in "Blue". And as the deserted planet that becomes "Rimmerworld". The asteroid that Starbug crashes on in "Psirens" also falls within this trope.
* A quarter of a century later, the Croatian football (soccer) team lost the 2018 World Cup final to France. While the team did look disappointed during the presentation ceremony itself, that soon evaporated.
* a quarter of the entire series) between Wolverine arriving on Madripoor and actually going to fight the Big Bad. These episodes were spent building dull and completely irrelevant characters, side-plots that are uninteresting and have little payoff, and a filler episode where Wolverine has to rescue Yukio.
* A quartet of 13-years-olds have had their homes destroyed by meteors, they're in the middle of some weird paradox land and given a mission nobody thinks they can complete, they have a much higher chance of dying than succeeding (and
* Aqua's "Barbie Girl", Dutch and Russian versions, have multiple misheard lyrics.
* Aqua's keyblade glider is some sort of cross between hoverboard and a scooter (hover-scooter?)
* Aqua's 'Lollipop' has music and lyrics fit because its genre is a super sugary brand of Eurodance.
* Aqua Teen Hunger Force after returning from another dimension with gigantic hands.
* Aqua Teen Hunger Force aimed at content dilution made more awesome with George Lowe giving an extended lesson on how making comedy family-friendly eventually makes for neutered television that pleases nobody.
* Aqua Teen Hunger Force alien that was controlling Shake, Frylock said he probably recycles his waste (he didn't). Therefore, one reason for anal probing may be that aliens lack anuses and are curious as to their purpose.
* Aqua Teen Hunger Force, a living murderous dummy cuts off Carl's fingers and keeps them by his side when pretending to not be alive.
* Aqua Teen Hunger Force, a mummy is discovered to be living in the team's basement. This is why, as Carl explains, their rent was so cheap. The mummy continuously bullies Frylock into buying him expensive gifts and meals, threatening him with "CURSE!" if he refuses. After a visit to the local library, Frylock learns that plagues are just an "Old Wives' Tale," and that a mummy's true curse is that it is a selfish, spoiled brat devoid of any social skills. With no prospect of magical retribution, they toss him to the curb for the trash pick-up.
* Aqua Teen Hunger Force, and antagonizes the rest of the characters for attention.
* Aqua Teen Hunger Force and begins displaying disturbing footage of them. When Meatwad says something's wrong with it, Frylock denies it only to see the TV gushing blood.

* Aqua Teen Hunger Force, and (B) they weren't constantly aware of their deranged ways.
* Aqua Teen Hunger Force and he's so drunk he can't reverse the effect. Gene also turned Carl tiny despite Carl's wish was to be invisible as well.
* Aqua Teen Hunger Force and was sitting right next to him bleeding out and begging for help the entire time.
* Aqua Teen Hunger Force. Anyone who ate the whole thing would be transported to another dimension where they would be axed to death.
* Aqua Teen Hunger Force are the least perverted, but not even they refrain from having sexual desires.
* Aqua Teen Hunger Force argument over Frylock denying that he killed them as the living room burns away.
* Aqua Teen Hunger Force (as we see sun, rain, leaves and snow fall while they continue "after you"-ing each other), driving both Shake and Frylock crazy.
* Aqua Teen Hunger Force, at a connivence store. The clerk tries in vain to tell them they don’t cash checks but they just think he’s refusing to cash it. They try again later by having Meatwad (badly) impersonate Carl to cash it. Which the clerk sees through but doesn’t care since, again, they don’t cash checks.
* Aqua Teen Hunger Force. At one point, it brings home some severed fingers. Frylock, Shake, and Meatwad decide to destroy it just because it wouldn't shut up. Turns out that the doll is immortal, and Carl (who's missing some fingers) got another doll that just says "Die".
* Aqua Teen Hunger Force because his company owns every time travel film and show they can think of.
* Aqua Teen Hunger Force: "Bigger than regular chicken? You mean...Mega-Ultra-Chicken? Ssssh! Is Legend!"
* Aqua Teen Hunger Force. Bonus points for actually trying to follow through on the idea.
* Aqua Teen Hunger Force, but in some cases, he may just not be able to help himself.
* Aqua Teen Hunger Force but occasionally it crosses the line into whacked out nightmares.
* Aqua Teen Hunger Force call and orders his minion Steve to "send the phone spiders", which emerge at the other end of the line to attack the caller.
* Aqua Teen Hunger Force can transform into a shape described as Samurai Lincoln (though he claims it's Wayne Gretzky\Richard Nixon)
* Aqua Teen Hunger Force, Carl, after being harassed by a murderous family of robotic cloudcuckoolanders, asks them to play "Count the Bullets". Then he whips out the minigun.
* Aqua Teen Hunger Force.) Carl also made "freakin'" into a lesser magic word.
* Aqua Teen Hunger Force: Carl has no problem with openly displaying his Porn Stash.
* Aqua Teen Hunger Force, Carl loses both of his arms, and attempts to call the hospital using only his tongue. The automated message refers him to a ridiculously long number.
* Aqua Teen Hunger Force Colon Movie Film For Theaters and being replaced with Stuart Snyder.
* Aqua Teen Hunger Force Colon Movie Film For Theaters... by muting the sound after the already-available first two minutes, shrinking the picture down to the lower-left corner of the screen and running occasional pop-up graphics over it.
* Aqua Teen Hunger Force Colon Movie Film For Theaters start up the film.
* Aqua Teen Hunger Force Colon Movie Film For Theaters: The movie begins with a parody of theater promos about the refreshment stall and theater etiquette.
* Aqua Teen Hunger Force Colon Movie Film For Theaters you'll be totally lost. It also gently deconstructs this a bit, pointing out that if you're jumping in this late and skipping all the previous episodes, you really have no one to blame but yourself for being confused.
* Aqua Teen Hunger Force). Courses take place on the Moon, in Hell, and in some

kind of bizarre drug-fueled hallucinoland, and some of the holes are actually kart racing. Also, you need to take a chainsaw with you while moving around the course, in case you are attacked by time-travelling robot turkeys, mummies, or machine-gun-toting flowers. Basically, its sole similarity with golf is that getting a ball into a hole is an important step.
* Aqua Teen Hunger Force crops. Of course in reality it's just a ploy by Ignignokt and Err to find suckers for their MLM scam.
* Aqua Teen Hunger Force, does have a brain, but it's just a rubber toy with a jingle bell inside. He was given it apparently because he felt deprived with no brain. When it's removed, he still becomes less intelligent, but this seems to be a psychosomatic effect.
* Aqua Teen Hunger Force, Dr. Weird has his lair and laboratory somewhere on the South Jersey Shore (in what was apparently once Belle Isle Asylum). In the first Dr. Weird short, his Rabbot escapes by smashing through a wall; this flaw causes him problems later, as his inventions sometimes escape or are stolen from his "IMPENETRABLE FORTRESS!".
* Aqua Teen Hunger Force end arbitrarily with little to no conclusion, the first being "Bus of the Undead".
* Aqua Teen Hunger Force episode, "Circus," Shake sells Meatwad to the circus for $2. Other acts include "Inside-out Boy," and the show does not go well for anyone, especially the audience.
* Aqua Teen Hunger Force episode "Dummy Love", the Aqua Teens get two murderous ventriloquist dummies and Shake uses them for a stage show. Unfortunately for him, Meatwad wishes them human, which leads to Shake getting pissed, trying to kill them and going to prison for attempted murder.
* Aqua Teen Hunger Force episode "Fightan Titan" opens with a news report on TV with the crawl saying things like "Celebrity gives baby stupid name", "Something bad happens in country most Americans can't find on map", and "Random person reads fake news scroll at bottom of cartoon".
* Aqua Teen Hunger Force episode "Interfection," Meatwad encountered a pop-up ad that had bikini clad women with men's faces.
* Aqua Teen Hunger Force episode "The Cloning", a possessed television used inappropriate laugh tracks in its efforts to scare the people watching.
* Aqua Teen Hunger Force episode "The Cloning" reveals that Frylock has been cloning the TV because Master Shake keeps breaking it, but the particles break down every time it's cloned, leading to it showing a vision of Frylock killing Shake, Meatwad and Carl.
* Aqua Teen Hunger Force episode "The Dressing", where the Aqua Teens deal with a robot turkey that says he's from the future. Near the end of the episode, Shake shows Frylock a newspaper, intending to show Frylock an irrelevant pantyhose ad, but the first thing Frylock sees is the article about a turkey robot toy recall.
* Aqua Teen Hunger Force episode "The", Meatwad's eyes become horribly obscured as a result of Shake using burned styrofoam and having raw chicken scattered around the house. After Frylock notes the damage his eyes have, Meatwad tries to casually claims he fell down the stairs, except Frylock immediately points out the house doesn't have stairs.
* Aqua Teen Hunger Force episode "Total Re-Carl" opens with Dr. Weird sending a telemarketer some "phone spiders".
* Aqua Teen Hunger Force episode "Travis of the Cosmos" had an alien taking over Shake's brain to communicate. Unfortunately, the alien only spoke broken Japanese. Frylock tried translating, but could only come up with a marriage proposal.
* Aqua Teen Hunger Force episode "T-Shirt of the Living Dead", Shake steals an ancient Egyptian T-shirt from the museum and absent-mindedly throws it into the washer with a full bottle of bleach and hot water. However, the hieroglyphs on the shirt's tag said that it should only be washed in cold water, so it shrinks to the point that only Meatwad can wear it.
* Aqua Teen Hunger Force episode "T-Shirt of the Living Dead." While he's generally a jolly fellow, he's understandably upset when he's summoned from his home in July as he was sleeping by Meatwad. Even more so when he's horrifically burned alive by

a monster summoned by Meatwad, as he makes his feelings known to Frylock, afterwards.
* Aqua Teen Hunger Force episode "Unremarkable Voyage", Meatwad forces Master Shake to cut his own tongue from his head with a chainsaw.
* Aqua Teen Hunger Force...except since they both used a shampoo that made them immortal, that means they're trapped in prison for eternity. Frylock begs a now elderly Meatwad to find Lambert (who's actually also immortal) to prove their innocence and get them out, while Carl laughs at the prison's attempts to execute him on the electric chair.
* Aqua Teen Hunger Force. Fat, balding, ugly, hairy, a slob, a perverted sleazeball, and beyond.
* Aqua Teen Hunger Force featured banjo-playing scorpion robots which were apparently intended as amusements at a children's theme park. They were armed to the teeth with missiles and machine guns.
* Aqua Teen Hunger Force featured this from time to time, especially in later seasons.
* Aqua Teen Hunger Force features star wipes in a flashback sequence. An echoing voice saying "Star" is even heard when the wipe occurs.
* Aqua Teen Hunger Force. Fortunately (for Meat Wad at least), neither Shake nor anybody else seem to really notice this effect.
* Aqua Teen Hunger Force: "Friends... relations... whatever the hell Meatwad is..."
* Aqua Teen Hunger Force from being able to air before the creators could finish it, leaving portions of the episode not fully animated.
* Aqua Teen Hunger Force, Frylock and Carl acquire this through magical "Ceaseless Shampoo". They become ageless and immune to pain and are able to control any severed bodyparts of theirs following mutilations and decapitations. They can also regenerate from puddles of blood.
* Aqua Teen Hunger Force. Frylock has just built a humongous mecha as a body replacement for Carl, who had been reduced to a disembodied head. Meatwad takes control of the robot, grabs Shake, throws him up into the air and blows him up with a barrage of missiles.
* Aqua Teen Hunger Force: Frylock in the episode "The Clowning", where Carl is slowly being mutated by an outer space clown virus, Frylock runs from the room saying he knows what he's doing. Out in the hall, he tells Meatwad and Shake, "I have no freaking idea what I'm doing."
* Aqua Teen Hunger Force: Frylock is forced to decapitate a zombified Shake.
* Aqua Teen Hunger Force, Frylock's eyes glow blue before he zaps you.
* Aqua Teen Hunger Force: Frylock spends one entire episode saying too much TV was bad for you. In the end, he purchases a brand new television set for the house, which leads to this exchange:
* Aqua Teen Hunger Force gives us the Moonenites, the Plutonians, the Jupiterians, Travis of the Cosmos, and the Frat Aliens.
* Aqua Teen Hunger Force had a contest sponsored by Burger King for the role of Carl in their live action episode.
* Aqua Teen Hunger Force "Happy Birthday Snake", the episode turns out to be VR simulation Meatwad put Frylock through to make Frylock realize he'd better listen to Meatwad or Meatwad will eat his brains.
* Aqua Teen Hunger Force has a pair of murderous ventriloquist dummies, who are only capable of saying "Kill" and "Die" respectively. Any and all attempts to destroy them only result in them reappearing good as new somewhere you can't immediately see them (to the point of parachuting in if need be). They fall in love after a knife standoff.
* Aqua Teen Hunger Force has Carl being sucked into a jet-powered toilet, leaving only his head intact. Frylock makes several attempts to construct a new body for Carl, including one made entirely of eyes from a website specializing in medical waste.
* Aqua Teen Hunger Force has Frylock creating a dog, accidentally made using Master Shake's DNA. The dog takes a... liking to Carl, who seems to be in self-denial at first (probably realistic for a self-proclaimed macho man like Carl), and as the

episode goes on, he seems to get more and more shellshocked.
* Aqua Teen Hunger Force, he agrees and doesn't express any pain because he's too drunk to feel it.
* Aqua Teen Hunger Force. He survives, but all of his skin burns off and he ends up in a skin graft made of soccer ball lids.
* Aqua Teen Hunger Force. His schemes range from desperate to disturbed.
* Aqua Teen Hunger Force. However, one Mooninite is named Cliff. Averted in the case of Emory and Oglethorpe, as they are named after colleges.
* Aqua Teen Hunger Force Indeed, Frylock and Meatwad have both had (whether implied or explicit) more successful sexual encounters than him.
* Aqua Teen Hunger Force in his lyrics. Said lyrics are about eating candy so his fans can come down to his place and use their hyperactive blood-sugar levels to power a drill into hell so that he can release demons for his global diet pill pyramid scheme. Averted, because very few traits aside from the fact he's a giant spider belong to this trope.
* Aqua Teen Hunger Force (in part by hitting him with the Foreigner belt's "Dirty White Boy" setting). Meatwad may or may not actually be underage, but he's certainly childish.
* Aqua Teen Hunger Force: In "Super Hero", Shake's "idea" to spread local awareness of his alter-ego as The Fume by committing arson to the city, immediately spotted by Frylock on the news.
* Aqua Teen Hunger Force in the court room, resulting in the case being dropped.
* Aqua Teen Hunger Force: In the episode "Grim Reaper Gutters" Master Shake asks when has Frylock ever saved him or Meatwad. Cue a rapid fire montage of Frylock saving them repeatedly. It turns out the Aqua Teens are watching a montage Fry created himself and set to rock music.
* Aqua Teen Hunger Force in the episode "Super Spore," a mouthless alien entity uses a proboscis to hijack Shake's body to speak. His native language is bastardized Japanese, but in the episode he's learning English from tapes that Carl has. He then begins spouting phrases like "Shut up bitch! I need mustache ride for me lawyer." Frylock's Japanese isn't any better however...
* Aqua Teen Hunger Force: In "The Last One", the Moonights kill Oog this way, throwing a bone outside the moon's protective dome so he will chase after it. He goes outside to grab it and explodes.
* Aqua Teen Hunger Force: In "Totem Pole", Shake and Carl visit a rock band performance and are used to build a troll pole, which ends up summoning hundreds of skeletons from the ground leaving them trapped in the building without anyway to escape.
* Aqua Teen Hunger Force: In "Vampirus", Frylock warns Meatwad to never let vampires in the house unless he invites them inside. Meatwad does exactly that, by asking them to come in just as a horde of them arrive outside the house.
* Aqua Teen Hunger Force is animated at about the level of a Flash cartoon. But when something is animated, it tends to be surprisingly detailed. Carl's walking animation is one example.
* Aqua Teen Hunger Force is often cited as an example of Postmodern humor. The show's episodes practically have no interest in telling anything resembling a plot, let alone a coherent one. Characters just do random things that lead to other random things, which rarely get solved or delved into because everybody is more concerned into being assholes to each other.
* Aqua Teen Hunger Force is surprisingly skilled at cooking Italian food, especially lasagna.
* Aqua Teen Hunger Force (!) is used for the city skyline in every episode (along with a few other recycled bits here and there); then there's fire footage recorded by the animators on a camping trip whenever burning is represented on screen.
* Aqua Teen Hunger Force is usually the straight man and voice of reason, but some of his more pathetic moments approach a Control Freak (especially when he's trying to entertain anyone).
* Aqua Teen Hunger Force is willing to kill, steal, or cheat for whatever reason the plot demands that episode.

* Aqua Teen Hunger Force!" Later Master Shake goes to an abortion clinic to have the alien spawn removed.
* Aqua Teen Hunger Force likes to flip the bird to anyone he doesn't like. His middle finger even extends for use when he's really displeased with someone.
* Aqua Teen Hunger Force Master Shake agrees to something or internet and the entire house gets flooded with holographic displays of internet advertising from the WWWYZZERDD. To the point where they can no longer function due to the enormous amounts of ads floating constantly over their heads.
* Aqua Teen Hunger Force, Master Shake has been impaled with an axe, beaten to death with a baseball bat, and eaten by piranhas. Carl has had his blood drank by a psychotic monster, been crushed by a giant chicken, and had the top half of his body removed by an explosive flaming arrow. And Mcpee Pants has been blown up, killed in a slaughter house, and crushed by Err. Yet all of them inexplicably return (save for Mcpee Pants) without explanation in the next episode. Along with that, Ol' Drippy, who was killed by a car, and the Wisdom cube, with the Dumbassahedratron, who were chopped to pieces by a helicopter still appear at the villains meeting hosted by the Mooninites.
* Aqua Teen Hunger Force, Meatwad attempts to explain why they need a new TV.
* Aqua Teen Hunger Force, Meatwad believes he is impregnated by Jesus Christ, when he actually has billions of spider eggs encased inside his body.
* Aqua Teen Hunger Force, Meatwad can talk to the dead through titular video game. Shake kills himself so he can haunt Meatwad through the game. Unfortunately for him, Meatwad had already grown bored of Video Oujia and moved on to Insult Master.
* Aqua Teen Hunger Force, Meatwad discovers what he thought was his brain is only a cat toy. Frylock tells Meatwad he is giving him a new brain, and after the brain is implanted Meatwad gains an interest in science and can do incredible feats of telekinesis. Later, Frylock reveals that the "brain" he put into Meatwad is the same cat toy with macaroni and glitter glued to it, and Meatwad subsequently reverts to his old "dumb" self.
* Aqua Teen Hunger Force Meatwad starts to tell a joke about "a prostitute and a person of the Polish persuasion" but is cut off before he can continue.
* Aqua Teen Hunger Force. Meatwad, the target of his abuse the most, is the only one to at least show relief.
* Aqua Teen Hunger Force movie, where the opening scene (set in Egypt) is subtitled: "Egypt, Millions of Years Ago, 3 p.m., 1492, New York."
* Aqua Teen Hunger Force Naturally, the Aqua Teens leave him on the curb once they discover this.
* Aqua Teen Hunger Force. Needless to say, all the characters are horrified, but Willie Nelson doesn't understand why they're so freaked out.
* Aqua Teen Hunger Force, not anywhere else on Earth, seemingly just because they lack the imagination to try anywhere else.
* Aqua Teen Hunger Force of Spacecataz. One last Dr. Weird cold opening appeared in Season 8 episode "Allen Part One".
* Aqua Teen Hunger Force often ends with characters being maimed or killed, the main characters' house being destroyed, etc.
* Aqua Teen Hunger Force, particularly when Shake is directing Meatwad:
* Aqua Teen Hunger Force points out, and when Master Shake is pressed for his reasoning, he just claims that he definitely remembers the movie had cliffs. (Going over the edge just injures him.)
* Aqua Teen Hunger Force probably takes the cake. Want proof? The mains are three giant, living fast food items.
* Aqua Teen Hunger Force propels his body to Phoenix, and one episode which featured bacteria that infect Master Shake for the purpose of performing bad theater productions in his brain.
* Aqua Teen Hunger Force puts a cat in the microwave. Meatwad and Shake stare at each other, and through sticky notes, talk to one another. Shake, being the idiot he is, forgets that he already microwaved Meatwad's kitten, and Meatwad has to remind him that it was his own.
* Aqua Teen Hunger Force putting the bite on Master Shake. Shake stands near

Frylock, helping him to make the letter even angrier.
* Aqua Teen Hunger Force references this trope in the episode "Spirit Journey Formation Anniversary," by having Shake commission Zakk Wylde to write a new, heavy-metal birthday song. It's all an attempt to cash in on royalties (expecting everyone to replace the traditional song with his new one and then pay him for using it).
* Aqua Teen Hunger Force regularly crash through the windows of the main trio's house whenever they arrive.
* Aqua Teen Hunger Force, "Robositter": The pink-colored uniforms Shake and Frylock have to wear at Slurp-a-Lunch.
* Aqua Teen Hunger Force. Said nuclear weapons are revealed to literally be the pillars of the White House's facade and the cupolas of Saint Basil's Cathedral.
* Aqua Teen Hunger Force season 1 episode "Cybernetic Ghost of Christmas Past from the Future", the titular character breaks into Carl's home claiming he's the Ghost of Christmas Past and comes to show Carl what Christmas was like for him in 1968. Carl reminds the Ghost that it's not Christmas at all, but in fact February. Hilariously enough, the episode actually aired four days after Christmas.
* Aqua Teen Hunger Force, Season 7 "Kangarilla and the Magic Tarantula", the trio meets a ghost who tells them he's from Smiley Junction. When Frylock asks him if he meant Three-Arm Junction, Meatwad asks what it is and then Frylock explains the history of Smiley Junction. When Frylock finishes, the disappointed ghost tells him that was his story and he was going to tell it.
* Aqua Teen Hunger Force, season 8 "Vampirus", Frylock tests to see if Master Shake's blood is the cure for the vampire-inducing virus when vampire zombies have taken over the city. When Frylock tests the cure on Carl, a lot of vampire bats starts biting Carl proving that Shake's blood isn't the cure. When Shake tries to splash the cure on Carl, the vampire bats transform into vampire zombies and they start tearing Carl apart to the point where we can see his skeleton.
* Aqua Teen Hunger Force several days before the theatrical release, so it wasn't meant to be the 'serious' television debut by any means.
* Aqua Teen Hunger Force sorta gives an origin to the phrase, but this is long after the show began; and like everything else, the canon erodes quickly into madness.
* Aqua Teen Hunger Force spoofs this. The show centers around a group of anthropomorphized beings and their sole human accomplice. However, unlike its predecessor, the characters in-question are half-fast food items, they live in a suburban slum, almost never fight crime/solve mysteries, the trio is almost entirely dysfunctional, and their sole human accomplice is a sleazebag who hates them.
* Aqua Teen Hunger Force "Sweet C", Carl angers a bunch of bees and hides in his pool before rising a reed, which the bees enter and tear him apart from the inside.
* Aqua Teen Hunger Force talking about MC Pee Pants's song "I want Candy":
* Aqua Teen Hunger Force. The Aqua Teens were originally portrayed as superheroes, with the opening having them fighting a giant space alien and foiling a bank robbery. After the first few episodes, the series focused more on their misadventures in their Jersey Shore neighborhood. Subverted by Season 2, at which point the series cut out their heroism all together.
* Aqua Teen Hunger Force.) The ATHF convince Talking Balloon!Hitler to stop hating Jews by pointing out that most of his favorite celebrities are Jewish, but when the Fuhrer starts hating on gays instead, Frylock decides he's had enough and literally bursts Hitler's bubble.
* Aqua Teen Hunger Force: The Cold Opening to the episode "Super Bowl" has Steve bursting out of Dr. Weird's chest for unknown reasons.
* Aqua Teen Hunger Force, the crappy clone of Master Shake made by the Plutonians is sent to Earth to "de-terraform" it. This plan is not well thought out. Not only does the clone not feel obligated to do so, it has no idea what "de-terraform" means, or how he'd do it, or if it is in fact a real word.
* Aqua Teen Hunger Force: The Cybernetic Ghost of Christmas Past From the Future does this pretty much every time he speaks.

* Aqua Teen Hunger Force, the recording just asks "Richard" to call the hospital directly.
* Aqua Teen Hunger Force the same size as him (he's a giant cup). He claims he needs that much soda on a daily basis.
* Aqua Teen Hunger Force. The show has an unnerving fondness for this trope. Characters have killed themselves numerous times.
* Aqua Teen Hunger Force: The "Spacecataz" cold openings that aired during the third season were, when put together, intended to be the pilot of a spinoff miniseries featuring the Mooninites and Plutonians; the idea never got off the ground, and the show dropped the cold openings before the short could be aired in its entirety (though it's available on the volume 4 DVD.)
* Aqua Teen Hunger Force), they suddenly find themselves tied to a horse-cart with a black slave driver cracking a whip at them.
* Aqua Teen Hunger Force threatens anyone who doesn't give it what it wants with a curse. However, the real curse is that the mummy is a socially inept spoiled brat with no manners.
* Aqua Teen Hunger Force to 67 years later where the Aqua Teens' house is being attacked by zombies who are being kept at bay by a laser turret defense system that they installed at some point.
* Aqua Teen Hunger Force to impersonate him, but is horribly deformed, calls himself "Major Shake", and loves to give blood (whereas Master Shake thinks donating blood is part of a pyramid scheme run by Dracula and his night slaves). Frylock pretty much immediately figures out that "Major Shake" isn't really Shake, and hilarity ensues.
* Aqua Teen Hunger Force to it. For example, at the end of "Kidney Car" Carl's head explodes out of sheer rage after hearing one of Master Shake's inane excuses.
* Aqua Teen Hunger Force to save Meatwad from the clams so he can get Frylock a new jewel by getting himself devoured by the clams.
* Aqua Teen Hunger Force to their spaceship, and use the "Universal Remonster" (a teddy bear with remote controls for arms and legs) to control it.
* Aqua Teen Hunger Force, to the point that MC Pee Pants's last exploit was to try to become a vampire to avoid going to hell.
* Aqua Teen Hunger Force tried to "deterraform" Earth in the episode "Bad Replicant". Except they have no idea how to do it.
* Aqua Teen Hunger Force. Truth be told, they're probably dumber than all life on Earth—human, food product, or otherwise.
* Aqua Teen Hunger Force typically associated with the Grim Reaper and isn't afraid to use it.
* Aqua Teen Hunger Force used the plot of the main characters being detectives to trick Cartoon Network's executives into picking up the show.
* Aqua Teen Hunger Force usually manages to avoid being injured by his roommates' stupidity, but he usually receives little to no gratitude for cleaning up their messes.
* Aqua Teen Hunger Force was 16 minute instead of the usual 11. Frylock was more robotic & subservient to Shake.
* Aqua Teen Hunger Force was dubbed for TV, although it's extremely rare to find.
* Aqua Teen Hunger Force was that it was too long to stand watching the characters.
* Aqua Teen Hunger Force were very over the top. "Send Carl to THE HOME!!!"
* Aqua Teen Hunger Force what motivates Dr. Weird. You can see it on the first season DVD.
* Aqua Teen Hunger Force: When Carl is trying to convince Meatwad to take him to the Super Bowl. From Meatwad's reaction this might be the nicest thing anyone has ever said to him.
* Aqua Teen Hunger Force when describing his latest invention or plan:
* Aqua Teen Hunger Force, when Frylock uses his cloner with a strand of what a museum claimed was Jesus' hair. He ended up with a very effeminate man in a too-short toga, who reveals he's actually Jesus' hairdresser.
* Aqua Teen Hunger Force when Meatwad watches the other characters in a "sitcom with a sci-fi/horror twist" on an apparently cursed television. It comes complete

with sitcom-style "Awwwww" from the audience, followed by a lame joke with laugh track. Meatwad appears to be the ideal television watcher, though, declaring "I identify with that!"
* Aqua Teen Hunger Force. When people talk about the general weirdness of the programming block, this show's usually the first thing they think of, and it's more or less the quintessential Adult Swim show.
* Aqua Teen Hunger Force when the Mooninites fire laser beams at ATHF. The beams move very, very slowly.
* Aqua Teen Hunger Force: When they cloned their television one too many times, it became evil.
* Aqua Teen Hunger Force: When watched every episode of Season 3 one after the other in order, the Spacecataz shorts at the beginning of every episode form a coherent story. Not surprising since this was a failed pilot for another show..
* Aqua Teen Hunger Force, which started in 2001 (2000 if you count the stealth airing of the first episode) and, after a few title changes, was cancelled in 2015.
* Aqua Teen Hunger Force while I walk!"), he was still a character on Aqua Teen, and it showed; when he was feeling the slightest bit unstimulated, he'd scream "OOG BORED!" and try to rip his own head off.
* Aqua Teen Hunger Force: While Shake is usually incapable of doing anything, he has been shown to be really good at cooking, making four-cheese lasagna, cheese-injected fried beef, and funnel cakes. Downplayed, since Shake will cook only for 'special occasions' like screwing up Meatwad's diet or torturing Carl.
* Aqua Teen Hunger Force...who interesting enough is the neighbor of the Aqua Teens.
* Aqua Teen Hunger Force with a doll that repeats over and over the word 'KILL'.
* Aqua Teen Hunger Force with its references to Brazilian history, geography, culture and pop culture; over the top dialogue, Master Shake's voice and explicit swearing where it is censored in the original dub.
* AQUA: The First Step backed him up, bribing people and pulling strings to keep him employed.
* AQUA: The First Step fic becomes partners with Amber at Beacon Academy, and they eventually develop this relationship. Amber even remarks at one point that she's Alexander's sister "in all but blood."
* AQUA: The First Step. Under his lead, the Jaeger Program is perverted and set up as an anti-Faunus assassin group, and all but Alexander are either killed after attempting to escape or commit suicide; Alexander himself personally kills him during their final rebellion.
* aquatic humanoid octopi race of Dreugh, are said to do this with their victims. Dreugh undergo a process known as "karvinasim" to become Land Dreughs, temporarily becoming terrestrial in order to breed. Land Dreughs leave their victims cocooned in this state to serve as food for their young.
* aquatic humanoid octopi. The Dreugh of early Nirn were still intelligent, but that diminished over time as their civilization fell and their intelligence devolved. Now, like the Falmer, their de-evolution from an intelligent, sapient race with their own civilization has included their souls becoming white, like those of animals.
* aquatic humanoid octopi (who also have a temporary land form), are immune to magical paralysis and poison, while also being resistant to many other forms of Destruction magic, with the sole exception of Frost.
* Aquatic Mook variant of the zombie that can spawn at day if the light level at the seafloor is low enough, or if a normal zombie is submerged in water for a bit of time. It surfaces to attack the player, and doesn't burn in sunlight easily since the water it tends to be in puts out the flames. Drowned may also spawn with a Trident, in which case it gains a painful ranged attack.
* Aquatic vertebrates have repeatedly developed a number of similar traits — in particular, sharks, ichthyosaurs and dolphins are habitually used in science textbooks to show convergent evolution. Similarly, the elongated primitive whale
* Aqua - "Turn Back Time", about regretting over a failed and unappreciated relationship.

* Aqua twice, first after he saves her from drowning and again at the café while she judges his fashion.
* Aqua Unit Patrol Squad 1 (and at the end of the first one), Shake awakens from a cryogenic lab to arrive in a strange new world. Every time someone does anything immoral, they are killed instantly by a bolt of lightning. Later, Shake discovers that the cause of all this is an alien named Allen (actually Alien, but the sign maker spelled it wrong) living in a tower in the Earth's orbit, sending lightning bolts from above.
* A queen of the high school reunion vote is held during an episode of
* Aquerna has squirrel powers, including being able to talk to squirrels and command them.
* Aquerna possesses the spirit of the squirrel. She can do a 25-foot standing broad jump. She's far stronger and quicker than any normal human her size. She has super-senses. She can talk to and command squirrels. And she's regarded as one of the biggest losers on campus.
* A quest chain in the Western Plaguelands has you helping to train a new druid. When you speak to the quest giver for the second quest in the chain, she mentions that the student's spells were so out of control she not only could see them from where she was, but she was using them as a marker to track your progress. To illustrate: said student was so incompetent that in moonkin form, he was spamming Moonfire on
* A Quest Giver Is You: When games let you send NPCs on independent side missions for your benefit.
* A questgiver NPC in the Eastern Plaguelands, Pamela Redpath, is a ghostly girl haunting the ruins of Darrowshire. She's friendly enough, and her quest line starts with a request to find her doll but eventually ends in players recreating the Battle of Darrowshire to redeem Pamela's father. The girl's plight struck a chord with many players ("
* A quest has you passing around a sample of beer to three NPCs. Two like it, the third says it tastes like engine degreaser.
* A quest in the Borean Tundra has you use one on a captured mage. The tooltip states that it 'inflicts incredible pain to the target, but does no permanent damage'. After the quest, you can get more of these, free of charge,
* A question in a review book for the AP World History exam a few years back asked "Why were the launch of Sputnik and the flight of Yuri Gagarin seen as so threatening by the west?" with one possible wrong answer being "Both Sputnik and Gagarin's spaceship carried advanced laser weaponry."
* A questioning person dating the same gender just to figure out their sexuality, without being honest about it.
* A Question of Sport has run for five more years overall and started twelve years earlier, it also spent seven years off the air). It has only had five regular presenters (Stuart Hall (1968-69), David Vine (1970-78), David Coleman (1979-97), Sue Barker (1997-2021), and Paddy McGuinness (since 2021)).
* A Question of Sport, which — since it typically features sportsmen — is generally regarded as more niche and less funny than its competitors (there were a lot of restrictions on how funny they could be when Princess Anne turned up). It's headed a bit more towards the comedic in recent years (ever since Sue Barker took over the chair), which meant that...
* A question worth $250,000 or more (or one of the last 3 questions in general) that is
* A quest requires you to steal attack plans from an ogre tribe. When you give them to the questgiver NPC, she remarks:
* Aquí no hay quien viva father can't do a performance due to illness, and asks him and Mauri to fill in for him. Neither of them is exactly brimming with enthusiasm over it.
* Aquí no hay quien viva in the series, as he keeps switching jobs and confusing the neighbors with his quick explanations of whatever they might have bought from the place where he was working at the time.
* Aquí no hay quien viva's first seasons, the people at Apartment 1B are a

gay couple that hides their sexual orientation (particularly Fernando, while Mauri is more willing to share the news). A couple of years into the series, Fernando gives a present to Mauri for their anniversary: reuniting all of the neighbors and telling them that they are together. Of course, they all knew already.
* Aquí no hay quien viva who steals the radio from Juan Cuesta's car. The neighbors are not too pleased:
* A quicker variation occurs twice in a row in the first "Mermaid Man and Barnacle Boy" episode, the first time being when MM and BB screw up putting their rings together, and the second time being when they succeed in the aforementioned action but MM briefly forgets to say the oath.
* A quick gag after "I Don't Need Anything But You" has New Yorkers watching the Stacks and Annie story unfold on the news. A man comments, "If he keeps up singing and dancing like that,
* A quick Google search confirms she isn't the only one. This little factoid made it hard to search off-
* A quickie has Wade panicking that he's sinking when he falls into Orson's mud wallow, until Orson picks him up by the head and flatly tells him "Try standing up".
* A quick look at Alan Davis's output shows that, after hitting a certain degree of acclaim in the early 2000's, he never stayed on any title for longer than six issues. His art is popular enough to boost sales, so he keeps getting work popping issue sales and putting out his own projects for DC and Marvel (mostly Marvel).
* A quickly resolved trademark dispute (apparently initiated by former promoter Jim Crockett) led to WWE briefly changing the spelling of
* A quick word of advice for those about to go to US Army/Marine Corps training, the 'something' does not include your helmet, or your rifle. Doing so will incur the wrath of your local
* A Quiet Place, deaf child actress Millicent Simmonds plays a deaf girl.
* A Quiet Place. Often these hidden creatures, who are blind (and apparently don't have a sufficient sense of smell) but hunt by sound and are very fast and near indestructible, home in and strike very quickly if you make a noise — but if you evade them, they'll still prowl around, listening very closely for further sound or movement, and not go away....
* A Quiet Place overwhelms the world within the first three months of 2020, and the film is set immediately after.
* A Quiet Place: The family learns the monsters' weakness and kills one of them, but two more are on the way. The mother and daughter prepare for them. Cut to black.
* A Quiet Place with the nail sticking out of the basement stairs, which Evelyn steps on. Later in the movie when the characters go back down the stairs, there's a closeup showing that the nail is still there and uncovered. However, it never comes up again.
* Aquila, able to see the evil in people's souls... and reveals there was a fourth one: locks, ropes and chains only hold him up for as long as he wants them to.
* Aquila and it's TV adaption is an alien escape pod that was found on earth.
* Aquila: Aquila and his "brothers and sisters" are cursed to walk the earth, hunting down the wicked to send their souls to their godly mistress The Devourer.
* Aquila: Aquila is a giant from Nubia who is so frightening that even his fellow servants of the Devourer fear him.
* Aquila as the boys press buttons on the titular craft with no idea of what will happen. There was once a whole episode focused around Jeff wanting to try out all the buttons just to see what happens... generally something odd.
* Aquila: During the revolt in Rome against Nero's misrule, Aquila and Felix try to find their ways through the sewers as the blood spilled from fights between the citizens and Nero's praetorians rains down on them.
* Aquila ended on the second season. after introducing us to a brand new character, the boy's falling out over Jeff's new girlfriend and the last thing they show the viewer is the characters finding a cloaked battle-cruiser in orbit. It was based of a book series and 10 years later the author did release a new book but it just

ignored the battle-cruiser cliffhanger.
* Aquila is full of them, or at the very least attempted bonding activities like swimming (a lot of swimming is mentioned) but perhaps the oddest one is where a father sticks wheels on the titular space-craft.
* Aquila: Locusta resurrects a swarm of zombie babies to serve as her demonic assassins.
* Aquila: Most of what Nero does is strictly for his own amusement. He even refers to torturing Christians with knives as 'playing' to Locusta.
* Aquila: Mrs. Murray discovers the ship and keeps the secret in the second season.
* Aquila proverb about truth being an elephant surrounded by three blind men, that he simply gave the boys a point of view not involving copious amounts of money.
* Aquila: Queen Boudicca's motive for her war against the Romans is to avenge her daughters being raped by Roman soldiers and her own person flogged in the square on the orders of Britain's governor.
* Aquila's nephew) is a total lunatic who spends most of his time having people tortured and crucified by the thousands to end his boredom.
* Aquila thousand years or so buried underground before being discovered by two boys - still in fully working order.
* Aquilia, a kingdom that eventually splintered into several dozen countries after the last member of the royal family drowned at sea a thousand years prior to the beginning of the saga. They built some truly impressive structures using the technology of the Demons, but seemingly forgot how to use it as the years went by (either that, or the technology stopped working and they had no idea how to fix it.) Duke Nobel claims to be a direct descendant of the royal family, but it's unclear if this is just part of his
* A Quincy's Fairy Tail" with a passion. Obviously, nearly everyone calls him that much to his chagrin
* A quintessential example: The Soviets caught wind the American XB-70 Valkyrie in the late 50s; it's a long-range, super-fast bomber intended to scream overhead and have landed before its bombs do. By 1970, they had created the MiG-25 "Foxbat" interceptor to catch it. The Foxbat is a brick with engines, and needs huge wings to keep it from falling from the sky, but
* A quirky subversion occurs when Ranma is sapped of his strength by a vengeful
* A quote attributed to C++ creator Bjarne Stroustrup: "There are two kinds of programming languages: those everybody bitches about and those nobody uses."
* A quote attributed to Gary Gygax goes something like "DMs roll dice because they like the sound it makes." This is referred to as
* A quote by German player Lukas Podolski "Soccer is like chess, only without the dice". (Actually, it was made up by a comedian about him, but he embraced it for the fun of it).
* A quote from a drug and alcohol counselor: "Do you know why people turn to alcohol? Because it works. People wouldn't drink if it didn't."
* A quote from Lulu after one too many explanations : " Are you sure it's not your brain that's the problem?"
* A quote often attributed to Mahatma Gandhi, and while whether he did say it is dubious, he had a reputation for being a
* AQWorlds of Gold for them though. And some of the best pets and trinkets are Guardian Only.
* AR-15 and M4A1 later joined their forces after very nearly being destroyed, thus "defying" their destiny.
* Arab–Israeli Conflict: that this was a way for the West and the Soviets to practically test the combat efficiency of their best kit without directly going to war with each other. Israel got American, British, and French materiel; their Arab opponents got the best the USSR had to offer. The after-combat reports furnished the opposing superpowers with the best possible information as to how well their equipment performed in combat, with minimal loss of American and Soviet lives in the fighting.
* Arab–Israeli Conflict, the Israeli ambassador opens up with a story about the Prophet Abraham going for a swim only to come out and find his clothes stolen

by Arabs. One of the Arab ambassadors protests that Arabs weren't around then to take Abraham's clothes. The Israeli ambassador agrees and starts the session with this point in mind.
* A Rabbit Among Wolves, Adam regularly speaks to Jaune in his dreams after the latter kills the former. While Jaune thinks it's just his guilty conscience and imagination, Adam's personality perfectly reflects the real one's and he occasionally hints at knowledge Jaune shouldn't have.
* A Rabbit Among Wolves. After a freak occurrence, Jaune ends up in control the White Fang and gains the reputation of a cold-blooded killer. Fearing what he might be planning, Ozpin plots to bring Jaune into custody.
* A Rabbit Among Wolves, after waking up in the lair of the White Fang organization she slandered, desperately and pathetically pretends to be a twin named "Laura". Everyone sees right through it. Justifed, in that she had to come up with it on the spot and is panicking in a life-threatening situation.
* A Rabbit Among Wolves call out the White Fang wannabees for not only being imposters, but for their tactical incompetence and pathetic attempts at seeming edgy.
* A Rabbit Among Wolves flirts with him and genuinely enjoys his company. Justified in that Jaune is only a terrorist in the loosest definition of the word, has slowly turned the White Fang into more of a freedom-fighting organization, and isn't at all antagonistic to Beacon. Coco herself is genuinely moved by his good deeds and impressed with his uncanny ability to manipulate public opinion in his favor.
* A Rabbit Among Wolves, he isn't bothered in the slightest, and keeps calling Jaune pretty.
* A Rabbit Among Wolves: Ilia presses Jaune about Sienna after the dance, asking for details about how how soft her skin is, how wild she is or if she used her fingernails... all while unaware that the woman in question is standing behind her. It seeing Jaune's stares for her to get the message.
* A Rabbit Among Wolves is a term his grunts use when expecting punishment. It is part of the reason why almost no one in the White Fang is actually upset when Jaune accidentally kills him.
* A Rabbit Among Wolves: Jaune unwittingly finds himself in control of a White Fang branch after accidentally killing Adam Taurus. While he's trying to reform the organization, he starts to acknowledge that the White Fang do have legitimate reasons for being angry.
* A Rabbit Among Wolves on him if he threatens Beacon or her friends, she doesn't despise him personally. She openly admires his attempts to reform the White Fang, dances with him, offers him some PR advice, and gives him a peck on the cheek.
* A Rabbit Among Wolves. She doesn't believe Jaune can actually reform the White Fang and make a difference, but she is moved enough by his sincerity that she sends him information about organizations that have oppressed Faunus. Once the resulting raid does make a difference, Lisa finds her passion for investigative journalism reignited, and drops the "Aloof" aspect entirely by aligning herself with Jaune.
* A Rabbit Among Wolves, surprisingly enough, takes this view. He sees most of humanity, not as malicious, but naïve about what faunus experience. Largely because they don't know what it is like to be seen as subhuman.
* A Rabbit Among Wolves: The White Fang want to bring about equality for Faunus. However, their past grudges and distrust toward humanity means they push away otherwise decent humans and moderate faunus with their violent acts.
* A Rabbit Among Wolves when the response to the White Fang terrorist faction under Jaune Arc doing charity work is a story about whether Jaune is a crossdresser. Lisa Lavender sends Jaune her original draft which was about whether Jaune was a villain or a victim of circumstance, but her editor refused to publish it.
* A Rabbit Among Wolves: Yuma has a bizarre fixation with the vending machine located in the White Fang building, which he calls "Vendi-chan." He goes into hysterics when Cinder destroys it.
* Arabela is the beautiful young daughter of King Hyacint, ruler of the Fairy Tale Kingdom. Her suitor Petr is a normal human student.
* Arabela: Princess Xenia is very fond of clothes, especially the modern ones worn

in the human world.
* Arabella by Richard Strauss. Impoverished Patrician Arabella falls for landowner Mandryka, solving her family's money worries.
* Arabella Figg represents a partial example. When Dumbledore listed her as one of his allies at the end of the fourth book, it didn't take fans long to correctly realize that she was the same person as the "Mrs. Figg" who had been mentioned as Harry's babysitter in the first book. During the "Three-Year Summer" between the fourth and fifth books, there was a great deal of speculation about Arabella Figg, nearly all of which assumed that she would be revealed as a witch. Instead, it turned out she was a
* Arabella, Richard Strauss), forced to dress as a boy because her family cannot afford to let her doll up like her big sister Arabella. She gets her man in the end, so all is well.
* Arabesque Gregory Peck tears open the side seam of Sophia Loren's tight skirt so she can ride a horse.
* Arabian Adventure" Rimmer (who's Canadian), and freaking John Ratzenberger in the cast.
* Arabian Adventures while under the spell's effect they become progressively more ugly (lose Charisma).
* Arabian horses are rather small in comparison to most of the horses traditionally used for war, and some are even born with fewer vertebrae than most horses, giving them a shorter back. However, due to their bones being exceptionally dense and strong for their size, Arabians generally have no trouble carrying the same size rider as larger horses. Trouble may occasionally arise with crossbreed offspring, however, if they inherit the Arabian's
* Arabian Knights episode "Sky Raiders of the Desert". Both Turjan and Bez slide down a stair banister to attack some guards.
* Arabian Nights account of his fourth voyage. He'd won over and wed the princess of a faraway kingdom, but when his bride died unexpectedly, Sindbad was sealed up in the catacombs so he could join her in death. (Not buying into this local tradition, he looted the burial vaults and escaped.)
* Arabian Nights: Adventures of Sinbad, beards are a staple of evil wizards.
* Arabian Nights: Adventures of Sinbad: Being a 52-episode series, this occurs a few times to the characters. Especially Shera. There's quite a lot of difference between episode 1's vision of her and her actual appearance in episode 47.
* Arabian Nights: Adventures of Sinbad bump into two: one inside a lamp and one inside a magic ring.
* Arabian Nights: Adventures of Sinbad: It happens to the trio of brothers who turned themselves into evil doppelgangers of Sinbad, Ali Baba and Aladdin. Our heroes manage to trick an evil wizard into turning them to stone by impersonating their evil counterparts.
* Arabian Nights: Adventures of Sinbad. Justified since she's a mynah bird. Apparently, the fact that she is actually a cursed human being also contributes to her high intelligence and talking skills.
* Arabian Nights: Adventures of Sinbad, Satajit and Balba argue as much as they work together.
* Arabian Nights: Adventures of Sinbad: Sinbad and his two friends Ali Baba and Aladdin all greatly differ in age, with Sinbad being a child, Ali Baba being somewhere in his twenties, and Aladdin being an old man of undetermined age.
* Arabian Nights: Adventures of Sinbad: Sinbad encounters quite a few of these. Three of them, a Wicked Witch named Tabasa and her two sons Balba and Satajit, are even recurring villains.
* Arabian Nights: Adventures of Sinbad: Sinbad's friend Hassan has three younger brothers, all of which can be quite annoying.
* Arabian Nights: Adventures of Sinbad, Tabasa the witch is terrified of mice, which Sinbad uses against her more than once.
* Arabian Nights and he would plausibly be able to check on whether his own uncle, aunt and other cousins had died.)
* Arabian Nights. An unusual example as the cloud is a reward, a permanent water

supply to the devotee in return for his piety.
* Arabian Nights - a poor man went to the Caliph (who had never eaten poor men's food before) with a cart of onions. The Caliph loved them, and rewarded the poor man by filling his cart with gold. Another poor man had the idea - "if the great Caliph was so impressed by onions, what will happen when I introduce him to garlic?" The Caliph loved garlic too, and ordered the poor man to be rewarded by filling his cart with the greatest treasure in his kingdom... onions. In much of the Middle East, water and arable land are both precious commodities. Vegetables might really be worth more than gold in some places.
* Arabian Nights, a tailor is blindfolded and led to a certain house where the protagonist is hiding. When Ali-Baba's men try to discover the house, they blindfold the tailor and he is able to find it again.
* Arabian Nights convinces the king to distrust the sage, and the sage is put to death. His head is able to speak after being cut off, reprimanding the king and eventually leading to the king's death also.
* "Arabian Nights" Days, that she saw a blue man in a cave, and Nisrin seems remarkably unfazed by this. Later Amy tries to tell the Doctor, who misunderstands who saw what and explains to Amy that Nisrin is of Scandinavian origin and the medieval Norse used "blue men" to describe the people of Africa. He's still explaining this when the actual blue man shows up.
* "Arabian Nights" Days would have already been covered over with sand by the medieval period, not still being worked on.
* Arabian Nights. Everyone in the story in turn assumes that if they're found with the hunchback's body they'll be accused of his murder, so they find some way of disposing of it in secret, only for the next person to find it. In the end, it turns out that he's not really dead.
* Arabian Nights fame. What else do you call a bird of prey that can carry off elephants and produce an egg big enough to be mistaken for an unusual building?
* Arabian Nights. Her husband, the king, was in the habit of serially executing his wives ... but she kept him entertained with stories night after night, and he couldn't execute her because he wanted to hear how the latest story ended... until a thousand nights had passed, and he finally decided she was too interesting to kill.
* Arabian Nights: In Arabian cultures it is taboo to eat with your left hand; one man who tries it gets it cut off by his dinner guest. In another tale this becomes an issue for a man who lost his right hand...
* Arabian Nights: In "Tale of the Trader and the Jinn", the trader in question has accidentally and unknowingly killed a Jinn's son. When he meets the Jinn a year later to die as punishment, he is met by three other men, who tell the Jinn their respective stories in an attempt to persuade him to spare the trader; in some translations, this is referred to as his agreeing to pardon the man for a portion of his crime if he finds their stories interesting enough.
* Arabian Nights: In the 2000 mini-series, the sorcerer who recruits Aladdin to retrieve the lamp for him has a raven as a familiar.
* Arabian Nights. (In universe, it can be considered a "straight" detective story, with Oedipus investigating the cause of the plague and trying to discover the murderer of Laius.)
* "Arabian nights, like Arabian days, more often than not, are hotter than hot, in a lot of good ways."
* Arabian Nights movie may feature some "harem girls" — possibly including the romantic lead — in this style of costume, by way of semi-justified, family-friendly fanservice.
* Arabian Nights or if it is as popular or beloved among Arabic speaking peoples as it is in the West (they generally look down on it, preferring poetry first and foremost, thank you very much).
* Arabian Nights: "Prince Camaralzaman and Princess Badoura" tells of a Prince and Princess whose beauty so captivates a pair of djinn that they argue over which is the most beautiful mortal alive. Their attempt to settle the question leads to the Prince and Princess falling in love. It becomes a plot point that the two are

almost identical, to the point where the Princess can dress up as the Prince, fool a cohort of her father's guards who are escorting them, and then fool a King and his daughter. Enough that the King proposes marriage and the daughter accepts.
* Arabian Nights reputed to cure all diseases — and not one person, not even Prince Ahmed who gave it to him, thinks to mention that he's already got one.
* Arabian Nights stops on an island on his first voyage and discovered the hard way that it was a whale. Then he found a huge dome and found out the hard way it was a roc's egg. This same beast, the zaratan, appeared in other Middle Eastern tales. Strangely, it was sometimes a whale, sometimes a crab, and sometimes a turtle, despite the name remaining constant.
* Arabian Nights stories have some examples of fathers offing (or trying to off) their female offspring after said offspring has been (falsely) accused of premarital sex.
* Arabian Nights story "The Prince and the Tortoise", the prince's tortoise wife and her soon-to-be sisters-in-law have to prepare meals for the sultan at their wedding feast. One of the sisters-in-law is not very good at cooking, so when she hears the prince boast of his wife's skill, she hides behind a tapestry in the tortoise's room to learn her secret. The tortoise notices her and exclaims, "Oh, I hope I have enough rat and pigeon droppings for my dish at the wedding!" At the wedding feast, the sister-in-law's dish is a disgusting mess of droppings while the tortoise's dish is delicious (and dropping-free).
* Arabian Nights sub-story "The Hunchback's Tale" who thinks about money when he hears a patient comes to visit, but is portrayed as a sympathetic character and a competent doctor.
* Arabian Nights tale of the Barber and his Brothers has one of the barber's brothers working in a glass shop, imagine himself opening successively bigger shops and getting rich, then attempting to court the Vizier's daughter and being met with the Vizier's refusal. He attacks the Vizier in his dream and wakes up to find he's knocked over his glass.
* Arabian Nights tale "The Story of the Slave-Girl Anis al-Jalis and Nur al-Din Ali ibn-Khaqan", Jafar (see Exceptions below) helps Harun al-Rashid take down an evil vizier who's preying on the king and people of Basra and persecuting the titular Nur al-Din Ali (whose father was a good vizier).
* Arabian Nights that according to each one of them contained an increasingly larger list of things. But the best Long List has probably got to be the list of food that one of the three ladies buys in the story of the Porter and the Three Ladies of Baghdad.
* Arabian Nights, though in that version the princes discover magic artifacts rather than having powers of their own.
* Arabian Nights, though there may be even older mythological examples that aren't on this page yet.
* Arabian Nights. To save her own life and stop the Sultan from killing more concubines, she worms her way into his heart with her beauty, her smarts, and her breath-taking stories.
* Arabian-style music wasn't present during Ancient Egypt times, yet it is constantly used as a background music when Egypt is depicted. At the moment, only the instruments played back then are known, but none of the actual music scriptures have been found.
* Arabic Arabic. Literacy was, at that time, considered a skill apart from fluency in a language). He was a patron of arts, architecture, and science, founded the world's oldest state university (University of Naples), and wrote an influential treatise on falconry. He was also a poet, writing in Italian (his father, the Holy Roman Emperor Heinrich VI, had also written poetry, in German).
* Arabic k and q are different sounds, but they're pronounced alike from speakers whose languages does not have them in their phoneme inventory.
* Arabic writing is backwards to Latinic or "western" writing too. Made worse that numbers are read from left to right. At least in Hebrew (where it's read right to left).
* Arab Labor, newspaper reporter Amjad finally gets his big break in TV...as a

children's TV host in a pink bunny suit. Later, due to a crisis, he winds up running out of the studio mid-filming...and winds up in the middle of a gay pride parade. His extremely conservative, traditionalist father sees his son on TV — in a pink bunny suit at a gay pride parade — and faints.
* Arab Oil Sheikh - Stereotypical Arabian aristocrat that got rich by selling oil.
* Arab Oil Sheikh visits the store and attempts to buy a pair of trousers in exchange for a goat...When the goat is refused by the sales assistants, the sheik then tries to trade a beautiful woman.
* : Arabus gets eaten by King Sombra, who comments, "A fate both ironic and poetic: The shadow-eater, eaten by the king of shadows."
* Arabus is a greedy and corrupt cloud wizard who likes to eat pony shadows, thereby removing the happiness from the pony in question. However, he is aided by a stupid and lazy zebra named Zeb.
* Araceli and Sherry. Araceli has a secret crush on Sherry, who is straight (at least as far as Ari can tell).
* A race of Implacable Men: the robotic Necrons, who can stand back up after anything — which in the
* A race of marsh dwellers referred to as "Grik-toads" combining lizard and froglike features are encountered on an isolated island in the
* A race of witches with their own land appears in the 2000s rebooted season of
* A race provides a ready-made plot structure, with preparation (rising action), the action of the race itself, and the goal of the prize and the glory of victory (and possibly consequences) for the ending.
* A racer named John Cleab has his racing career ended in a car accident, but it happened outside the race track. And to make it worse, he
* Arachne at the end of The Mark Of Athena to trick her opponent, as pride was her fatal flaw as well.
* Arachne claimed she could weave better than the Goddess of Arts (and most everything else), Athena. The story varies from telling to telling; in some she makes tapestries depicting the gods' faults and foibles, and in some she out-and-out taunts Athena after actually beating her in a weaving contest. Either way, her pride gets her beaten senseless and nearly killed by the angry Athena, who quickly relents and turns Arachne into the first spider as a testament to her skill.
* Arachne ends up making her a custom focus capable of playing nicely with her power.
* Arachne recieves this in her own story. When she claimed that her weaving could challenge the gods, Athena decides to come down and put that to the test. They both weave tapestries, and (in at least one version) when they have the people vote, they chose Arachne's tapestry. This is what doomed her.
* Arachne's creation of the Demon Weapons suggests this. We're not given an explanation why she put Eibon's work into practice, only that she did so. If Medusa does have a masterplan to deal with the Kishin, her enjoyment of her methods — and justification to Stein — rather suggests she is in part doing stuff for the scientific hell of it.
* Arachne was punished for hubris. She proclaimed that she was a better weaver than Athena. When you're dealing with the Greek pantheon, it's really not wise to make those kinds of boasts.
* Arachnia has prehistoric giant spiders awoken by a meteor as the main antagonists.
* Arachnicide: The main antagonists are a horde of giant, super-aggressive spiders made by genetic engineering to destroy a commando unit for a drug cartel.
* Arachnicide: The spiders are killed and the survivors are rescued, but some mysterious men take the spider corpses for their own purposes.
* Arachnid 24/7 so she wouldn't try anything funny. When Alice's sleeping, however, Gokiburi sweats a large amount of oil and slips out of the threads without them alarming Alice. She then murders Alice's friend Yoriko, but this detail turns out to be a nightmare and Alice wakes up to see... a sweaty half-naked Goki playing with her panties.
* Arachnid: After Alice brings Oki home, she dreams about the roach girl sweating

oil to bypass the sound detection of her thread and then shooting Yoriko to death. Alice wakes up to see that Oki really escaped from her with that bizarre method... but only to play with Alice's panties.
* Arachnid, Alice Fuji is made the target of such a game by an organization of insect-themed assassins. However, the reward for killing her gets increased for every assassin that dies, implying one purpose of this is to set them against each other and weed out the weak members of the organization.
* Arachnid all sorts of arthropods. Some of them have really unusual abilities for what appeared to be a mundane setting. Whenever one of the assassins does something, the narration goes on wild life documentary-esque tangents about how the characters' skills relate to the bugs they represent. This more often than not doesn't explain a thing about how, for example, Oki Megumi has cockroach superpowers or how Kabutomushi is immune to nerve gas and has her heart covered by steel armor.
* Arachnid and so Alice goes back to looking pristine. In fact, one chapter retcons away the slash injury Kabutomushi had suffered during the Arachnid Hunt.
* Arachnid Appearance and Attire, it is indeed quite ironic that he ended up "sleeping with the fishes".
* Arachnid assassin to the next, which can get rather exhausting and frustrating after a point.
* Arachnid confirms Alice's survival and reintroduces Gokiburi sometime later but conspicuously doesn't show Kabuto together with her.
* Arachnid has a gigantic alien spider giving birth to all kinds of other huge bugs. Sometimes it is required to lay the eggs inside a human. We never get any clue exactly what, if anything, it was mating with.
* Arachnid in a dramatic fashion, which was even foreshadowed beforehand.
* Arachnid is about a giant spider infestation on a small island near Guam.
* Arachnid is certainly one. She appears, instantly frightens the big bad and begins curbstomping established characters. When she finally loses, though, she suffers just as badly.
* Arachnids and other insects breathe through their skin, and there simply isn't enough oxygen in the modern world's atmosphere for them to get any bigger.
* "Arachnids in the UK" by eating garbage. The smallest are the size of dinner plates.
* "Arachnids in the UK" do this to their victims, as they are capturing food to save for later. The first seen victim, Anna, is said to have suffocated to death as a result. This is also implied to have happened to the two later victims, Frankie and Kevin.
* "Arachnids in the UK" grows so large that it can no longer breathe efficiently and starts to suffocate.
* "Arachnids in the UK": In a downplayed example, Najia Khan is fired from her job at a luxury hotel that's due to open soon after accidentally walking in on a sensitive conversation between the wealthy owner and his most trusted staff.
* "Arachnids in the UK" infestation happened because among several dead spiders thrown out with a biology lab's waste, one of them was still alive, and got dumped into an illegal landfill by a cheaply run waste management company, right into an environment where it could grow huge.
* "Arachnids in the UK" involves the Doctor and company having to deal with very large spiders, the largest being the size of a van. Pretty much everyone involved feels this way about them, especially the arachnophobic Ryan and Robertson.
* "Arachnids in the UK" Jack Robertson attempts to bribe the Doctor, her companions Ryan, Graham and Yaz, Yaz's mum Najia and scientist Jade McIntyre with enough money that they'll never have to work again so they don't reveal evidence of his shoddy business practices, but Najia shoots back that she likes working.
* "Arachnids in the UK" on to something with the garbage he'd been collecting, Yaz is annoyed, and Najia complains that she'll have to hear about him being right.
* Arachnids in the UK who can't be bothered learning the names of his staff.
* Arachnids of the UK": The Doctor says she eats danger for breakfast, before admitting she really eats cereal, croissants, or this Portugese fried—

* Arachnid, the country has become a dilapidated wasteland. Alice is still torn with grief and almost falls prey to the zombies, but as for new protagonists Chiyuri and Setsuna? Both have moved on from their traumatic experiences and happily work together to kill the zombies, with Chiyuri still being awfully carefree about being homeless.
* Arachnid. The epilogue shows Kabutomushi and Oki Megumi traveling through a city that's eerily deserted and in a state of disrepair.
* Arachnid the titular giant spiders aren't subject to it is unconvincing (something to do with the spiders being of extraterrestrial origin).
* Arachnid to spy on the ongoing battle royales. This is but a sample of the setting's fixation on bugs.
* Arachnodactyly, or "spider fingers", is pretty much this very trope in real-life, and a symptom of several medical conditions, notably the aforementioned Marfan syndrome.
* Arachnophobia, a funeral-parlor worker is eating a BLT when the photographer's boxed corpse arrives from South America. When the phone rings, he sets his sandwich down on the table normally used to prepare bodies, where a cat nibbles on it.
* Arachnophobia, both a cat and a dog can sense that the General is, if not technically evil, than certainly not to be messed with. A crow does not realize this in time.
* Arachnophobia gets tossed into some flaming debris at the end...and comes running back out and takes one last go at the protagonist, who needs to shoot it with a nail gun to put it down permanently.
* Arachnophobia has an entomologist named Prof. Atherton, who is usually referred to by John Goodman's character as 'The Professor'.
* Arachnophobia, no species of giant spider could possibly exist in the real world.
* Arachnophobia of the spider threat is played very seriously all throughout the movie however.
* Arachnophobia, the original jungle spider is picked up by a crow and carried across town from the funeral parlor to a nearby farm. The crow drops dead out of the sky, fatally bitten by its prey, and the spider crawls away unhurt.
* Arachnophobia: This film is a fairly subtle example. Take a good look at the moon on the poster/cover.
* Arachnophobia was a film about a group of hybridized spiders that invaded a California town and began killing the inhabitants that lived there.
* Arachnophobia: When Delbert, the local exterminator, first sees the size of the central spider nest, he realizes his homemade insecticide isn't going to be strong enough.
* Arachnophobia, where he's bitten by a spider and dies in a car crash. It was cut for pacing reasons.
* Arachnos Tarantulas were once human beings, doused in chemicals, and
* Arachnos, which is also the government and standing army of a Caribbean island nation, and has every kind of
* a racially motivated on-field assault against one of its football stars. Bradley left at the same time in sympathy with Drake. Both schools returned in non-football sports a few years later (Bradley in 1955, Drake in 1956), but Bradley never returned to MVC football (dropping the sport in 1970) and Drake football didn't come back until 1971.
* A racist bully is telekinetically slammed into a locker so hard he has to be hospitalized.
* A racist greengrocer won't serve food to Bret and Jemaine because they are from New Zealand. It's then revealed that he confused New Zealand for Australia and they bond over their hatred of Australians.
* Aradia and Sollux were paired before (if that concept makes any sense in the context) the events of
* Aradia gathered thousands of alternate selves to help fight the Black King in the troll session.
* Aradia is an interesting case, in that the trait that's been exaggerated is one she didn't actually possess at the beginning, but picked up after

* Aradia is an odd example; she certainly starts out as one, only being shown smiling twice (and one of those was in a flashback), but after
* Aradia's shift from using time-controlling music boxes to freezing Bec Noir in place with her mind, and that Rose had a similar sidequest involving "learning how to play the rain", a statement which never gets defined.
* a radiation symbol in the shape of the Scream face as a protest against nuclear power.
* Aradia, who admits she's taking a page from Doc Scratch's book, likewise never lies "
* A Radio 4 comedy series about "books you've never heard of, but which sound strangely familiar" opened with the story of a stand-up comedian who accepted a drunken bet to stay at every Travelodge in Britain, only to realize he was on a spiritual journey. Parody of
* a radioactive chain reaction which will slowly poison Earth, forcing the population to expand out into space.
* A radio add had The King talking of how he couldn't resist going to the supermarket to buy the advertised product, "...but people saw me and called the newspapers. So it's back to Pluto!"
* A radio ad for a local tea store featured a person's taste buds arguing over what kind of tea they wanted.
* A radio ad for Geico motorcycle insurance has a woman sitting close to a fan in her office because she misses the feel of the open road on her cycle; all her dialogue has that sound.
* A radio ad for Hewlett-Packard computers, touting their tech support lines, featured a parody phone tree that ended with "Your call is very important to us. If you believe that, please stay on the line, or press one if you think we don't give a— (
* A radio ad for Quick Draw from New York Lottery focuses on people waiting in line to eat the "muffgel", a hybrid between a muffin and a bagel. The only connection to the lottery in the ad is that it's a better way to bring people together than waiting for the latest food trend.
* A radio ad had a man typing a letter on a typewriter, with a well-timed pause coming at the end (ding! zip!) of every line. "Sincerely, your Son" (ding! zip!) ...-in-Law".
* A radio ad promoting Washington Mutual's "no fee" banking services depicted the telephone tree of a fictional competitor called "Disregard National Bank." The customer who dialed Disregard's phone tree listened to a lengthy list of options, all of which involved paying fees in some way. "To set up a fee payment schedule, press 2," "To pay a late fee on fees past due, press 3," and so on. The customer was eventually given the option to speak to a live person by pressing 5, only to have the IVR add as a postscript, "Please note that a fee will be charged for pressing 5."
* A radio advert had a tourist going into a travel agency in Hong Kong and trying to arrange a complicated flight while the agent just kept saying, "Yes...Yes...Yes..." in response to this trope. At the end it's obvious the agent hasn't understood a word. Unless you went to the advertised travel agency, of course, where all their travel planners spoke fluent English.
* A radio advertisement had The King returning to Earth to partake of the advertised product, "but then people saw me and called the newspapers. So it's back to Pluto!"
* A radio broadcast from Glastonbury about an annoying girl duo Daphne & Celeste being pelted with absolutely everything that came to hand: fruit, vegetables, mud, bottles, refilled bottles. They didn't seem to mind, saying the audience had been lethargic before and "they woke up to hate us!"
* A radio commentator said "Martina Navratilova has been beaten in straight sex. Sorry, sets."
* A radio commercial for Rent-A-Center has Hulk Hogan groan, "Oh, my back" after trying to move furniture by himself.
* A radio commercial for Wash-N-Dri (a cleaning towelette in a small package) had

a customer placing a chicken-with-the-works to-go order to a restaurant waitress who asks for numerous specifics. At the end, after the customer (who is getting flustered over making so many decisions) says he wants the Wash-N-Dri, the waitress calls out to the kitchen "One bird, loaded! And a soap-and-water to go!"
* A radio station in Troy, N.Y., once edited Jay and the Americans' "Cara Mia" so that the long note near the end stretched to over a minute. It's still a long note either way, though, and an incredibly high one at the very top of Jay Black's vocal range.
* A radio station several years ago held a "Hold your 'wee' for a Wii", challenging listeners to hold their pee in as long as they could for a change to win a Wii game. A woman took the challenge and subsequently died of water intoxication.
* A radio that changes stations and volume by itself and cannot be turned off is used by
* A radio, your number one source for white noise. Unless you have a TV.
* Arad's Stardust, either; in an early chapter, Lana finds a piece of fruit transmuted into an Equestrian apple to be extremely tasty. Reviewers have commented this could just be because Army food tends to be bland as a rule of thumb, so anything tastes better after living on it.
* Arad's Stardust finds a ballpoint pen, and is amazed by such ingenuity. She also displays wonder every time something modern is presented to her.
* Arad's Stardust: Twilight's attitude towards some of her more extreme magic, like transmogrifying living beings or the Want-It, Need-It spell. She will not hear of performing such magic for X-Com, citing it as too dangerous.
* Arad's Stardust weapons and devices. The author gets pretty much about as in-depth as is possible without a degree in physics when it comes to explaining the mechanics of magic.
* Arael and completely shattering the tentative peace between the main characters in the process?
* Ara Fell this trope, particularly as regards its long-term viability:
* Aragones' section based on the border control debate, one of the strips feature two friends at a diner, with one of them loudly talking about kicking mexicans back to their country while eating. Then they turn around and see both cooks are visibly mexican and are watching them eat with disturbingly smug smiles...
* Aragorn and Arwen are first cousins sixty-seven and seventy-four times removed, as Arwen's uncle also happens to be an ancestor of Aragorn's many, many generations up the tree.
* Aragorn and Arwen's son Eldarion beats them all; he has the blood from
* Aragorn and the other Rangers have a bit of this as well — in fact, it's implied that this is a good part of the reason why Aragorn and Gandalf are such good friends.
* Aragorn assuming Legolas was a ridiculously sexy woman was something of a
* Aragorn deliberately invokes this trope when he confronts Sauron in the Palantir in order to make Sauron focus on him and draw his attention away from Mordor where Frodo and Sam are sneaking towards Mount Doom. Purportedly, Sauron has a minor freak-out at the sight of both Isildur's Heir and the reforged Narsil.
* Aragorn has some elven ancestry a few thousand years prior to the events in the story due to him being the last heir of Gondor. This wasn't really mentioned in the films, however.
* Aragorn is an interesting case. He very clearly fills the role of The Hero and
* Aragorn leads a hopeless march against the gates of Mordor, to draw the orc armies out of Frodo's way. Fortunately, Frodo destroys the Ring before all the good guys are slaughtered.
* Aragorn never explicitly voices desire for the Ring either, though much like Faramir his eyes gleam and he stands up straight when he says he could get it for himself if he wanted to, alarming the hobbits. In light of the Faramir sequence above, he could also have resisted temptation at that moment. At the Council of Elrond, he denies that the Ring is his by right when Frodo suggests it.
* Aragorn puts out a flame with his bare hand during his first meeting with the

Hobbits in Bree in
* Aragorn says all of that again, with greater eloquence and impact, just a moment after he's done with the speech above; when he quietly says to the Hobbits "For Frodo."
* Aragorn's, while Frodo and Sam sneak in the back to kill Sauron for real.
* A RAID system with multiple hard drives is supposed to guard against hard drive failures by using redundant drives, but if all the drives are purchased from the same manufacturer that happens to have a bad batch, all of the drives can fail simultaneously. This happened to
* ''Araiguma Rascal''. Naturally, this one wouldn't have been obscure to Japanese kids who watched the cartoon, but since the show's theme was changed for international release, it went completely unnoticed even in other countries where the show aired.
* a ''rainbow'' appeared over Nintendo's Kyoto headquarters" to Heaven.
* A Raisin in the Sun: Beneatha's rich suitor refers to Walter as "Prometheus" to mock him for pretending that he knows more than he really does. He becomes even more offended than he would have been otherwise because he has no idea who Prometheus is.
* A Raisin in the Sun: Walter crushes a glass in his hand upon learning that his mother has put a down payment on a better house, rather than giving him the money to invest in a liquor store.
* Arakawa Under the Bridge episode 5, this trope is averted by Kou but played straight for P-Ko. Kou does not slip on a banana peel even after deliberately stomping on it.
* Arakawa Under the Bridge Nino and Kou and Jacequliene and Billy only have eyes for each other. Also Sister is very much Maria-sexual.
* Arakawa Under the Bridge (Nino retrieving the trousers), this is exactly what happened to Ric in the first chapter.
* Arakawa Under the Bridge. The man wears a nun's habit for day-to-day life and on one occasion donned a schoolgirl uniform.
* Arakawa Under the Bridge: The Mayor is one — NO, FOR THE LAST TIME HE ISN'T JUST SOME MAN IN A ILL-FITTING RUBBER SUIT!
* Arakawa Under the Bridge under pressure from Star and Ric's secretary.
* A Rake by Starlight admits to being a little bit defensive about not being the original, even though, legally, he is the same person.
* A Rake by Starlight isn't exactly the sharpest knife in the drawer, but he's smart enough to use this trope to make the most of what he has.
* Arak Son Of Thunder, the character of Valda is introduced in full plate armor. Arak doesn't find out her sex until he removes her helmet. Unfortunately, the cover spoils the surprise by showing her wearing her standard mail byrnie and no helmet.
* Arak: Son of Thunder, the preferred weapon of Arak (who is a Native American raised by Vikings) is the Viking small axe.
* Arak: Son of Thunder, Valda the Iron Maiden was the female knight of Charlemagne's court, and was regarded as the equal in bravery and martial prowess of any of her male comrades.
* Arak: Son of Thunder who frequently disguises himself as a monk as the robe concealed his goat's feet.
* Aral and Cordelia Vorkosigan to one another. Aral's history involves a loveless marriage and a secret male lover in extremely homophobic Barrayar, both relationships which end in tragedy. Cordelia talks circumspectly about an old relationship where she got left behind. Both find as true a love as possible in one another.
* Aral and Miles are closer in some ways, Aral having the "traditional" warrior prince personality while Miles seems to fit a bit awkwardly even though he is
* Aral and Miles play this trope to a tee. However, Aral's reputation as
* Arale demonstrating that purely robotic characters can be revived is never explained.
* Aralorn: The coralis tree attracts butterflies with its blossoms, then closes the petals above them and digests them.

* Aral "Sea" dried, remnants of a number of Medieval (9th-14th centuries CE) settlements were found on its bottom. If ancient chronicles are to be believed, there may have been several more cities there, possibly even older.
* Aral used to be even smaller, until Kazakhstan dammed away the Lesser Aral and limited its water consumption (for irrigating the cotton fields), so it started slowly filling again. So maybe those hulks on the shores of Lesser Aral may finally return to their element someday. The Greater Aral on the other hand might never recover, as it's largely in Uzbekistan which just doesn't seem to care.
* Aral Vorkosigan is attracted primarily to military trappings while being flexible on the subject of gender. His home planet of Barrayar considers the military a men-only profession, though, and also strongly discourages homosexuality, meaning aside from a political marriage his major relationships had to be conducted in secret. (Though they were something of an open secret among the high Vor.) His second wife Cordelia came from another planet where the military was open to all sexes, and so became a best-of-both-worlds opportunity for him to, ahem,
* Aral Vorkosigan pulls a clever reversal of this; he draws up a list of a neighbouring polity's top five requested diplomatic concessions and suggests it as an agenda for a summit. The diplomacy, in this case, is purely so that he can get his gunboat closer to where he suspects the action will take place. He's right, and it results in one hell of a
* Araminta Spookie book by Angie Sage, the main duo must traverse a series of cave-like underground passageways looking for a connection to a grotto on the beach. They are terrified the whole way, getting lost several times and mistaking a large mushroom for a dead body when one of them steps on it in the dark.
* Araminta Spookie: My Haunted House. She knows how to use it because one of her house's kitchens also contains one, connecting it to the dining room, and she has amused herself by riding up and down in it.
* A random boy confessed to Takatsuki once in middle school, and he got rejected.
* A random crook tries this, and Mac simply points out how easy it would be for them to prove that neither he nor Detective Flack could have injured him, so he hurt himself for nothing.
* A random guy on Twitter, the first serious competitor to the WWE ever since the end of WCW.
* A random monster then shows up and is asked about it. He picks astronauts because the question had already been answered in
* A random officer who's killed outside a burger joint...by another cop who claims it was an accident but might have had a grudge (
* A random Santa Claus can be seen wondering the streets of Dobuita late in the year in
* A random speaker construct gains intelligence from being left in a pool for fifty years, and once combined with the rest of the pieces Northstrider left behind, is able to finish the project and become a true AI. Apparently the missing ingredient was that the Presence needs a will of its own, even if it just wants to serve.
* Aranea about leprechaun romance, which is noted to be completely irrelevant to the story and shown to be pointlessly complex. She's interrupted in the middle of her speech because the rest of the cast is starting to get pissed off by the pointless romance.
* Aranea, guys! And if a few people get permanently killed or mindscrewed along the way, well, it's all for the greater good, right?
* Araneas are giant (4ft long, 2ft wide) spiders originally introduced in
* Aranea Serket is almost certainly a clinical narcissist. No matter how she spins it, Aranea's grand scheme for the universe ultimately revolves entirely around assuaging her own boredom and
* Aranea Serket is one of the most patient characters in the comic, dedicated to spreading knowledge to an almost unhealthy extent, but if you abridge something complicated down to one sentence or throw a gathering she's arranged into chaos for no reason, she will
* Aranea steals the Ring of Life to bring herself back to life and leaves Meenah

and Vriska behind in the afterlife without remorse, in order to enact a rather extreme.
* Aranea too, as well as Vriska. It's apparently a common trait among Light aspect players, which is fitting because Light seems to be about information.
* Aranea, Vriska's counterpart, uses a similar quirk, but in a much more subdued fashion: most of the time she uses 8's only to replace B's, and when she's upset she replaces the sound 'ate' with 8, but only where it's phonologically appropriate.
* A Ranger Colonel shows up to recruit Booth to train soldiers in Afghanistan. He immediately recognizes the Colonel as an army ranger, presumably due to the 75th Ranger patch on his right shoulder. Instead of a flag (argh!). Also, the Colonel is wearing a (deformed) black beret instead of the Ranger tan.
* A Ranger squad is preparing to secure a small hut bordering on a potential landing zone for their helicopters. They don't quite make the connection, but they know something's wrong when they hear a phone right just before they are about to kick in the door.
* A-ranks, who are agents in high-ranked teams capable of defeating a black trigger user.
* Aran Ryan (at least in the Wii version) is a complete psycho who breaks all the rules and is greeted with a chorus of boos from the in-game audience. He also happens to be one of the most popular characters.
* Aran Ryan is a frothing lunatic Irishman who went from his home game as
* A rape victim's stoic demeanor, along with some minor inconsistencies in her story, caused her account to be
* a rapper insert a rhyme or two into the song to make it seem edgier or cooler than it really is.
* A rare 35 year old male example of this would His Imperial Majesty Peony IX
* A rare actual example of this in a Western country: Canadian soccer player Quinn only has one name. Legally, Quinn is their last name, with no first name, as official documents show.
* A rare all-female example of the low-key yearning kind can be found in the
* A rare anti-heroic example: One tale has the Foundation putting Hitler into power to eliminate a disease that mysteriously only affects Jews, homosexuals, and Slavs.
* A rare aversion to Julia and Bob's team is that they go to find Pandora because of her, however that is where her focus and importance end. Their rival battle is only because of Bob and the focus of the team quickly shifts to how much of a ladies man and gentleman Bob is. Their ending sees Bob deside what will be done and much focus is made to how he refused her payment.
* A rare, but survivable birth defect in which a person is born without legs or pelvis can resemble this trope.
* A rare case of a singer In Name Only-ing his own song. Ike Reilly's "Duty Free" was covered by Cracker. Reilly then re-wrote the song, keeping only the opening line and part of the chorus the same for his album "Salesmen and Racists."
* A rare case of a villain with a Robot Buddy was Mule, an assistant to the
* A rare case of neither of them spotting it when they investigate the murder of a doctor who was a "Doomsday prepper" and invested several thousand dollars in a supposed high-priced bunker. Investigating it, Holmes and Watson quickly find out it's a scam to rob rich people. They meet a man who turns out to be a reporter about to expose the scam himself. He reveals he'd been doing a story on it and soon realized something was up as there was absolutely no paper trail for the hundreds of gallons of fuel and numerous supplies such a place would require.
* A rare case where it's actually valid involves a schizophrenic man who
* A rare case where the person who made the joke calls themselves out: Near the end of the
* A rare case where the woman is the older one. Aelita is ten years older than Jeremie, although because Aelita is
* A rare commentator example: Mark Madden. Although he was a heel, many fans found his unfunny jokes, shrieking, and general personality to be so obnoxious that they

despised him. To this day, it isn't hard to find comments on video clips featuring his commentary that list him among the reasons for WCW's demise.
* A rare creator variant: Andrew Norriss' son John played Carol's son Ben during Series 4 and 5 of
* A rare crossover example: Dan Moroboshi, protagonist and human form of
* A rare dramatic example appears in the short "Blue Cat Blues", in which Tom does abolutely everything, up to and including selling himself to slavery, to try obtain stuff to please his girlfriend, only to find out that the rich cat he's competing against topped him a billion-fold. Tom
* A rare Evil Stepfather example occurs in the story "The Speckled Band", which has Dr. Grimesby Roylott trying to eliminate his stepdaughters Julia and Helen before they have a chance to marry and inherit their share of their mother's fortune. Julia dies, but Helen manages to reach for Holmes before she perishes as well, and Roylott ends up having a
* A rare example involving movie theaters: Star Theatres opened the Gratiot 10 cinema in Clinton Township, Michigan (yes, the Detroit suburb) on May 11, 1990, and throughout the course of 1990’s, 11 additional screens were built, bringing the total number to 21 by 1998. In early 2018, AMC, which took over the theater in 2006, downsized the facility to 15 screens by closing off the 1998-built six-screen wing and filling in the emergency exit doors into the closed auditoriums with additional concrete blocks.
* A rare example of a film coloring perception of non-fictional persons is
* A rare example of a living toy in a horror film who is not evil: Rex, the stuffed dinosaur from
* A rare example of an adult male villain and a teenage female heroine can be found in
* A rare example of an English to English mondegreen-style Gag Sub can be found
* A rare example of an RPG speedrun that actually deserves the word "speed":
* A rare example of Arkham security working correctly: he's in a unique, hermetically sealed cell with no easy way for one person to open and warning signs clearly explaining the problem with its occupant. But if you can advance the plot (including optional parts) far enough, he'll stop pretending - not the disguise, just pretending he
* A rare example of sociology going horribly wrong is Joe Haldeman's
* A rare example of the trope being used as a compliment, let alone to oneself, occurs in
* A rare example of this backfiring is when Joe Garden, a former writer for
* A rare example of this being done by the original songwriter is "Unworthy of Your Love" by
* A rare example of this getting actual legal backing involved the 2012 SF action movie
* A rare example of this trope being handled tastefully comes from Wim Wenders' 1991 film (better seen as a trilogy)
* A rare example on the right side of the law (or right as it gets in this case):
* A rare example when a mediocre villain invoked much more disgust and ire than the major one. Unlike the Ur-Quan who, despite their omnicidal/totalitarian tendencies, retained a strict code of honor and had thorough and near-commiserable motivation, the Druuge were nothing but greedy heartless dregs.
* A rare example where the whole word comes out and then has to be converted retroactively — which only Marty McFly could pull off:
* A rare example who is desperate, dangerous, willing to commit crimes to stay on the run yet sympathetic is Sandor "the Hound" Clegane who deserted from the Kingsguard when a weapon triggering his
* A rare example without overtones of racism or outright cruelty: on
* A rare exception to the general attitude of Japanese companies to doujins was a doujin that involved Satoshi (Ash) turning into a werewolf and doing unspeakable things to Pikachu. Nintendo came down hard on that one. They also filed a cease and desist against Paheal,
* A rare female example is Jack, a.k.a. Subject Zero. Her entire outfit waist-up

is a leather strap covering her nipples. And tattoos. Lots and lots of tattoos.
* A rare female example. The Charmed Ones are three sisters who are the descendants of 17th-century witch Melinda Warren. Apparently, up until the birth of the protagonists, there never were three daughters per generation.
* A rare film example; the direct to video movie series "Josh Kirby, Time Warrior" had its first two story arcs switched before release. It is *painfully* obvious that the "Human Pets" arc was intended to be the first adventure in the series, with plenty of dialogue developing the new allegiance between Josh, Irwin, and Azabeth, the introduction of the "Codes of Kang", Doctor Zoetrope brainwashing Prism, and various other minor bits of continuity that continue straight into "Planet of the Dino-knights". However, at some point the decision was made to have Dino-Knights be the first story arc, with barely anything but a slightly reshot introduction scene for Azabeth used to cover up the difference.
* A rare (for the time) male example: Sir Ernest Cassel, a famous British Jewish merchant banker of the Victorian era, converted to Catholicism because of a deathbed plea from his wife. Decades later, when his friend King Edward VIII made him a member of his Privy Council, everyone present was astonished that Cassel insisted upon swearing his oath with a Catholic Bible.
* A rare Gender Flipped example comes when Robert finally has enough of Cersei's scheming. He smacks her in the face in a departure from his
* A rare good example: Pesmerga, Yuber's opposite number, who fights on the heroes side but is no less of a Black Knight.
* A rare heroic version occurs when Willow is kidnapped by Amy and Warren. She possesses Buffy to lead her to where she is imprisoned.
* A rare historical figure example happens with Erich Ludendorff from
* A rare incident occurred in San Diego where Shawn Nelson stole an M60A3 Patton and started to drive it all over the local town. Nobody could do
* A rare intentional and justified example can also be found when the gaang encounter a blood bender. As both Sokka and Aang are trying to avoid hitting Katara, it is not unsurprising that they both do this.
* A rare inversion with the short story "Obstinate Uncle Otis" by the great horror writer
* A rare Literature example is the German publisher Heyne, which included a soup advert in the middle of the text of
* A rare live-action example occurs in the final episode of the first season of
* A rare male example is Sie Kensou. Around KOF 96, Eiji Yanou changed his pitch to try portraying him as more
* A rare male version, played for laughs, occurs in the Franco-Belgian Comic-Book
* A rare non-actor version of this once occurred in the classic adventure strip
* A rare non-British/Irish example is the West Indies cricket team, who represent 10 independent countries (Antigua and Barbuda, Barbados, Dominica, Grenada, Guyana, Jamaica, Saint Kitts and Nevis, Saint Lucia, Saint Vincent and the Grenadines, Trinidad and Tobago), 3 Crown dependencies (Anguilla, Montserrat, British Virgin Islands), the US Virgin Islands and Sint Maarten (the Dutch half of St Martin) — 15 Caribbean "countries" in all, competing internationally as a single team. In fairness, all of these save Guyana, the US Virgin Islands, and Sint Maarten were all part of the
* A rare non-Fantasy or Sci-fi example: thriller writer Brad Thor created a "detachment" of all-female Delta Force members for his most recent Scot Harvath novel
* A rare non-fiction example is Mick Aston, an archaeology professor who co-hosted
* A rare non-military and democratic variation is the eternally intimidating Chief Whip (a party official tasked with upholding the agenda and whipping renegade members back into line) in
* A rare non-news example of this trope on Japanese TV: On one episode of
* A rare non-person-related from the pilot, in which Artie's description of the artifact Pete and Myka are looking for as "bigger than a bread box... or smaller".
* A rare non-weapon variant of this trope is present in the semi-realistic flight sim

* A rare one-man example is Julius Caesar, who proceeded to conquer Gaul despite the Roman Senate's protests that doing so was both unnecessary and illegal. He then went on to use his army to force them to appoint him dictator. Once Caesar had shown that power, not the laws of the state, determined who controlled Rome, he set the stage for the state of Roman politics for centuries to come.
* A rare real-life example is to be found in the animal world. Apparently, one species of ants uses a similar trick to gain slaves for their colony. After an attack on a neighbour anthill, a young queen remains on the battlefield, playing dead. Once the enemy carry her into their hive's food storage chambers, she 'gets better', kills and eats their queen, and copies her pheromone makeup, causing the entire hive to treat her as the queen. The ants are doomed to die out (for lack of a genuine queen) but until they do, they work in the fake queen's home colony as if it was their own.
* A rare serious example occurs when a Spanish woman was brought in with an overdose, and her husband said she was taking her prescribed medication as instructed. The instructions were only in English and said to take a pill 'once a day', but the Spanish word for 'eleven' is 'once', but with a different pronunciation.
* A rare ship-to-ship example: in "The Last Man", an alternate reality Carter rams a Wraith Hiveship with the
* A rare situation can occur in Advanced Edition if your ship has a clone bay: If you have the back up DNA bank augment which prevents you from losing crews in the clone bay when it's disabled, and all your crew members are dead and the clone bay is destroyed, then you are stuck since you will not see the game over screen as your crews are still in the clone bay but there is no way to repair it (unless you have a repair bomb) and you can only manually restart the game.
* A rare subversion of this trope for Elves is in the manga / light novel series 'Nidome no Jinsei wo Isekai de'. Here Elves are extremely long-lived AND just as fertile as humans. The Elven King (who's been around for a few centuries) is noted to have over 150 children, which makes the royal succession a nightmare.
* A rare toothless example, but fits the spirit of the trope nonetheless: in
* A rare two-for-one displacement: Most people cannot remember who Kelly LeBrock was, and not many will name Pantene when asked to name a brand of shampoo. But just about everyone in the United States who grew in the mid-to-late 1980s has said "Don't hate me because I'm beautiful" in a sultry British accent at least once in their lives.
* A rare variation where the person worrying this isn’t the parent happens in
* A rare villainous example: the aforementioned rabbit and Vanessa Gekko, PC's rival after they enter business together in their joint agency.
* A rare yellow-colored variation of this trope happens at the end of
* A Rasen-Fuma shield that halves explosion and fire damage, prevents theft of your items, cannot rust, slows hunger, increases your chance to dodge normal attacks, reflects magic, and returns half of any normal damage done to you.
* Arashi/Ohno fan ever. It probably helps that he's in the same company as the group as they inspired him to become an idol himself.
* Arastoo borderlines. Paj Vehdat is of Persian descent but American born.
* Arastoo implores a doctor to cut off his finger when he sticks it on a needle infected with a deadly virus on
* Arastoo is out fast when Cam injects a sedative into his IV. It *is* going right into his blood,though.
* Arastoo is terrified because his parents are old school and somewhat conservative and she’s Black, non-Muslim and a coroner. He argues with Cam and she’s reluctant to go. She does, but Arastoo thinks they’re rejecting her and they storm off before even eating. Fortunately they stop by later on to tell him they do accept Cam.
* Arastoo was exiled from Iran for his Farsi love poetry, which the officials saw as against the conservative Islamic society. He later learned though that the edict for his death was never actually released when someone threatens to make it happen if he doesn’t help solve a murder.

* AratаAmagi, the dreadnoughts are extremely slow and vulnerable to aerial bombing, and so top-heavy that any significant damage below the waterline will cause them to capsize.
* Arata Miyazaki, Super High-School Level Designer and culprit of the fourth case, is strapped to
* Arata Miyazaki, who freely admits he killed because he was tired of being around the others.
* Arata: The Legend and its debut cover page on the magazine it's serialized in would have you believe that Amawakuni Arata is the main character, but he isn't - it's Hinohara Arata, who's not even on said cover.
* Arata: The Legend are members of the Unemezoku, who can heal others' wounds, but not themselves, through direct body contact.
* Arata: The Legend are prone to this every now and then. Arata from Amawakuni tends to be complete oblivious about what he's doing or seeing, while Arata Hinohara acts like a typical, awkward teenage boy about it...unless he gets smacked by Kotaha for it.
* Arata: The Legend, a Shou is allowed to use the powers of the Hayagami of other Shou who have submitted to them.
* Arata: The Legend. Hinohara apparently forgot that Arata was just an image projected onto a rock wall or underestimated how hard it was, resulting in a comically injured fist.
* Arata: The Legend, Hinohara dresses Kotoha in clothing he imagined-to-life with Sarae. All of his attempts are bikini and cosplay outfits he's most likely into, much to Kotoha. This is played for laughs and oddly enough, a heartwarming moment.
* Arata: The Legend, Hinohara took it easy and tied with Kadowaki in a track meet after hearing of his problems. Kadowaki did not take the gesture kindly and ruthlessly bullied him in response.
* Arata: The Legend is a wanted criminal due to having been framed for the attempted murder of Kikuri-hime. By extension, Hinohara is this as well due to swapping places with Arata and having his image in the eyes of other people.
* Arata: The Legend, Masato Kadowaki is a fellow member of Hinohara's track team who becomes a Jerk Jock toward Hinohara after he lets them tie in a track meet, which Kadowaki calls him out on. He proceeds to ruthlessly bully Hinohara short afterward.
* Arata: The Legend, this is one of the first things that Hinohara receives from Kotoha when he first arrives in Amawakuni.
* Arata: The Legend, this is the primary element of Kugura's Hayagami, which is usually used to aid in his flight.
* Arata: The Legend, this is what Hinohara and his group need to do to make the 12 Shinshou submit, as they all live within their assigned fiefdoms in Amawakuni.
* Ara the Handsome". Anahit, usually a fertility and motherhood goddess, represented war in early times before that role was taken by the goddess Nane.
* Ara the Handsome and a Queen who obsessively falls in love with him, starting a war just to have him.
* A rather absurd version appears in the Wraith Squadron novels in which Lara Notsil's R2 unit Tonin manages to reprogram the toaster sized utility droids(the mouse droids from A New Hope) to sabotage the systems of a super star destroyer. As the droids begin the sabotage the crew begin stomping them to pieces with their boots.
* A rather amusing bit of the aired segment (near the end) showed them reading the box for the ingredients and nutritional information. Jamie asks
* A rather amusing one from the 19th century was the case of Emmanuel Domenech and the 'pictographs' he had found in the Bibliotheque de l'Arsenal. He thought he'd found native American artwork showing various things from their culture/history, but had actually discovered the misfiled notebook doodlings of a German school kid, complete with crude drawings of school life and sexual themes. It was also potentially an example of
* A rather bizarre example from a Swedish car commercial features two ladybugs engage quite wildly inside a car,

* a rather cheesy choir jingle based around their phone number, complete with DTMF tones:
* A rather chilling example were the black leather double-breasted trenchcoats worn by SS officers.
* A rather chilling instance of this in season 3, episode 2 ("The Accused Is Entitled"), when the killer is so disgusted by the fact that the "woman" he slept with was a man, he killed him in a violent rage.
* A rather common occurrence in college dormitories, where one roommate is in the shower sans key and the other, assuming the first gone, asleep, or otherwise with their key, leaves and locks the door... Quite common even where students don't share rooms if you happen to be unlucky enough to have room doors that lock themselves upon being closed. Or if you're in the shower when the fire drill goes off.
* A rather convoluted example: Country music fans know "Always on My Mind" as a song by Music/Willie Nelson, while pop music fans know it as a song by the
* A rather cute fanwank points out that as a celebrity TV-Critic in The Critic universe, there is nothing unusual about him guest starring as himself in the Simpsons. Had the actual episode replaced Jay Sherman with a guest starring
* A rather dark and non-comedic version of this trope is the song "Iron Man" by
* A rather darker example is Isaac, who thinks he can't paint the future without heroin.
* A rather dark example occurs when Faith uses a device given to her by Mayor Wilkins to swap bodies with Buffy, and uses it to her advantage to sleep with Riley.
* A rather dark example of playing with this trope occurs in Disney's
* A rather dark version of this trope happens in the 2001 HBO / BBC movie
* A rather different example than most: Bill "Pfutz" Pfutzenreuter and Barry Oursler, designers of
* a rather difficult relationship with his powers demonstrate an extraordinary degree of control (otherwise there'd be a lot of messy corpses and/or permanent brain damage).
* A rather distressingly detailed scene in the first book of Mercedes Lackey's
* A rather disturbing example with Tier Harribel's Fracciónes from
* A rather early example can be found in the intro of the 1997 game,
* A rather famous case once occurred in the DMZ between North and South Korea where a fairly important Soviet diplomat literally ran across the demarcation line asking for asylum with the NK guards shooting at him. He managed to make it and rather humiliated the Soviet Union with his actions.
* A rather famous one comes up at the end of the first arc of the original
* A rather funny example from episode 21: Mako tells Aikurou that she was able to remember Satsuki's plan so well because Satsuki had written every detail on her hands. Cue fan artists making a very intimate scene of Satsuki writing the instructions on Mako's hands.
* A rather heart-breaking anti-smoking PSA starts out as a trailer for a dramatic movie about a man who has to give away his daughter at her wedding. Near the end, the camera pulls back to reveal this commercial displayed on a television in a hospital room. The patient and his adult daughter watch with sadness. The implication is that due to the father's (apparently smoking related) illness, he won't live to give away his daughter at her wedding.
* A rather hilarious example... people apparently have short memories when it comes to difficulties in WoW. Heroics were just "Zerging" in Wrath and were complained about for being "too easy"... by people decked out in top-of-the-line raiding gear and alts used to being carried through by people wearing said gear. What happened about a year later in
* A rather hilarious example (which has been shown on several forums dedicated to Engrish fails) happens in one episode of
* A rather hilarious one is "château de marde", which translates into "shit castle". I shit you not.
* A rather horrific variation of this occurs in Florida's version of

* A rather horrifying example exists in the case of Staten Island teenager Jesse Shipley, who was killed in a fatal car crash in 2005. Sometime after his death, some of his classmates attended a school field trip to a morgue, where they encountered a brain preserved in a jar labeled with his name. What's worse is that it had been removed without the knowledge or permission of his parents, who later pressed charges. Shipley's body was later disinterred and reburied with the brain.
* A rather humorous exchange happened about a DotA 2 team named Starladder, where someone said "Darn Russians", and they were corrected with "They are Ukranian, not Russian". However, they were
* a rather humorous story (normally such an order would be declared invalid and thus ignored) by referring to the rulebook. Turkey vehemently protested (in the context of the game, it was clear the move was hostile to him). Eventually, Italy and Turkey were able to use that same rulebook against Russia to have the order declared invalid.
* A rather husky pirate gives one to the Straw Hat pirates after Luffy and Zoro let themselves be beaten up by some other pirates berating their ideals. The pirate assures them that dreams will never die no matter what others say or do, and aren't worth fretting over. That pirate was
* A rather interesting gender-flipped subversion occurred in the Filipino series
* A rather interesting variation (less "Meet Cute" than "Meet Morbidly Fascinated") happens in
* A rather ironic subversion is the evolution of the "casual" subculture amongst football hooligans in the UK during the
* A rather less tragic example from Word War II saw British Airman Nicholas Alkemade leap from his bomber to escape death by burning. He fell 18,000 feet without a parachute and suffered only a sprained ankle thanks to the cushioning of tree cover and 18 inches of snow.
* A rather lighter version is found with among young Dwarf engineers. An engineer who puts forward a design deemed too experimental and in-your-face can be cast out of the Engineer's Guild, and from the hold entirely. However, among a certain subset of young radicals this has become something of a badge of honour, and being thrown out and going to Nuln or Altdorf to study while working out the kinks in the design for a decade or two, before coming back and forcing the Guild to admit they were wrong by presenting a perfected design is more of a
* A rather literal example, but at the end of a fight against Aganos in
* A rather literal example is with New Taipei City, which is not the same city as Taipei the capital of Taiwan and in fact both completely surrounds it and is more populous. It was formerly known as Taipei County (still a separate legal entity from Taipei) but got upgraded to the status of special municipality in 2010 and took the current name so that
* A rather memorable variant happens in one comic: in trying to get out of the rain, Usagi comes across the swordswoman Inazuma telling her life's story to some of her friends. By the time she is finished, the rain has let up, so Inazuma bids them farewell and heads out. Usagi makes an aside about the story to one of the "friends"... only to discover that all four of them are dead — bounty hunters who had been trying unsuccessfully to kill Inazuma.
* A rather nasty example from colonial-era Australia: The Macquarie Harbour Cat. Not only was it made of leather, but the nine strips had their ends split into three, for twenty-seven tips to hit the victim's back. Worse still, those tips were coated in lead to add weight and make them hit even harder. As the name suggests, it was used in Macquarie Harbour in Tasmania. Macquarie Harbour was a site to which particularly troublesome convicts got reassigned to. Repeat offenders, particularly escape attempts, were the main victims of this monster.
* A rather negative example of this trope. Until Buzzfeed published an article about it during the fallout of the Harvey Weinstein scandal, this was the case with former
* a rather non-squicky example between Princess Kristina of Sweden (9) and Prince Ulrik of Denmark (28), who are betrothed by their parents, to be married when she grows up. Ulrik has no romantic interest in her and accepts the betrothal out of

duty and political necessity. As it happened, Kristina turned out to be
* A rather odd example being that a pack of girls’ underwear has images of Sweet Mayhem’s helmetless look on it.
* A rather odd example occurs when near the beginning of the game, Cloud has to engage in a contest with body builders, doing the most squats in a time limit without screwing up. He has to practice the motions first, then start the competition (and could possibly lose miserably.) Later, one might notice Cloud loves doing squats effortlessly, usually in flashbacks.
* A rather odd "monthly required test" one occured on the cable provider Altice, also known as Cablevision, on July 8, 2021. Unlike most EAS tests, this one lasted for an entire hour, and cable box functions were locked for the entire period.
* A rather one-sided Meadow Run (taking place in an office, but still using the slow-mo and romantic music) occurred at the end of a
* a rather pleasant guy to be around Nope. He gave them applications to prestigious boarding schools so that they could grow up into a successful life.
* A rather popular choice in shall we say adult content, most of the uniforms are either the standard fetish outfits or are near enough to the real thing, with actual police and what they wear...or take off, being fairly unknown compared to other, well, services that might be portrayed in such films.
* A rather popular joke is "There are no winners in rugby, only survivors".
* A rather ridiculous case when the two similar-looking characters in the rather ambiguous fighting game (within a webcomic) "
* A rather saccharine dimension where everyone is always nice and friendly to each other, there's no beer, and the main source of food is rice cakes,
* A rather specific example happens with Season 11's Silky Nutmeg Ganache, who made it clear in the season premier that she was gunning for a
* A rather strange case exists with Demon King Dabura. In the original it's actually pronounced "DAB-rah", with the "u" silent like it is in many actual Japanese names, because it's
* A rather strange example is "Back Where I Come From". Mac's version made #14 on the country charts in 1990.
* A rather strange example: there was an animated spin-off of this kind from the Colombian telenovela
* A rather terrifying example comes if you fail during the GCPD defense mission. You get a cutscene of Barbara and the cops in the lockup room, when suddenly the elevator opens and a minigunner starts firing, complete with audible screams.
* A rather tragic example brought on by real life events, the second episode of the arc ends with a
* A rather tragic version: Vega's parents, according to his backstory in
* A rather unconventional example as it's actually a sentient being, but Nydus Worms from
* A rather unexpected one from the Wikipedia page for the autoimmune disease Reactive Arthritis, formerly known as Reiter's disease:
* A rather unique twist on this form of possession is that The Other can possess multiple people at once, each being, essentially, a carbon copy of The Other. However, these copies do not share a consciousness or have a hive mind. Thus, they need to converse with each other in order to share information, for example
* Arawn after being abandoned and betrayed by all those he knew and losing the only woman he loved, being narrated by Arawn himself to one of his victims.
* Arawn after his friends and family's betrayal and the loss of the women he loved.
* Arawn and nearly every bad thing that happens can be traced back to it.
* Arawn: Arawn and Engus resemble wolves; Math and Kern resemble lions.
* Arawn: Arawn cut off Owen's head many years ago, but he's still alive and talking to him. This is because Arawn, as the Lord of the Dead, can render any part of a person immortal.
* Arawn as a superpower, with every surviving Huntsman becoming stronger whenever one is killed. They're more often used as fast moving strike forces and skirmishers.
* Arawn is hit with this trope again when he enters a duel and deliberately hands

his magic sword to his rival since the weapon is enchanted to not harm its owner. Unfortunately, the enchantment was removed and Arawn gets killed.
* Arawn of Annuvin, who died several centuries ago, is revealed to have existed centuries (possibly millennia) before that through various means.
* Arawn on its own right, since it manipulates all sides against the middle promising them ultimate power in exchange for sacrifices.
* Arawn: Siahm traveled to her son Math's castle when she felt the end of his reign was near on a giant eagle. It was killed right when she arrived by a hail of arrows.
* Arawn: Siahm was raped by Bran after he killed her husband Dag. She immediately killed him after freeing herself.
* Arawn: The Black Cauldron is constantly trying to pull this on its current owner, seducing a new one and then enticing them to feed it their predecessor's body and soul. Defied in the case of Owen after the Cauldron convinces him to resurrect Arawn as its new vessel: the Cauldron immediately tries to eat him but Arawn's loyalty to his friend forces the Cauldron to back down.
* Arawn: The Cauldron of Blood serves as one for the demon residing inside it. He can regenerate from any other attack, but the cauldron is his weak point. Sure enough, once Owen figures this out, he destroys the Cauldron with Math's Sun Axe to ensure that the demon will be vanquished for good.
* Arawn, the Sun Axe is Math's indestructible weapon, capable of shattering almost any weapon with its blows.
* A ray gun operated through an altered blueprint makes Bubbles and Talking Dog grow giant size in
* Arbeidsvitaminen), a music programme on AVRO in the Netherlands, is the longest running daily radio show in the world, having started in February 1946.
* Arbetets döttrar by Solveig Olsson-Hultgren takes place in 1903 and 1904. But it shows the time period mostly from the perspective of the working class and their dreams of more rights and better lives.
* Arbiter can learn languages exceptionally fast as part of her enhanced social intelligence.
* Arbiter Thel 'Vadam eventually gets his own custom Energy Sword with a knuckle guard, called the "Prophet's Bane."
* "arbitrarily deemed of lesser importance". She has no problem accessing highly classified information, though.
* Arbitrarily Large Bank Account: A character who has unlimited money.
* Arbitrary Augmentation Limit: A means of preventing your character from acquiring every trait enhancing or ability-granting upgrade in the game.
* arbitrary equality." Note that Vaarsuvius contributed more to the battle than the entire rest of the order together (except Belkar, who got hold of an at-will fireball attack), and V only fled after the battle was already lost and invisibility was the only spell they had left.
* Arbitrary Gun Power, so the effects of bullet wounds are abstracted.
* Arbitrary Gun PowerVideo game guns don't kill instantly. They do HP damage.
* Arbitrary Headcount Limit and much simpler damage typing rewards simply picking the "Counters everything somewhat" unit and dancing around with them.
* Arbitrary Headcount LimitArbitrary requirement that stops you from having too many characters in a party or unit.
* Arbitrary Headcount Limit during the final boss fight by requiring any team members that aren't part of your standard four-member party to stay behind to hold off the encroaching mass of Shadows.
* Arbitrary Headcount Limit who have little option against enemy artillery besides running away.
* Arbitrary Headcount Limit with regard to close quarters and stealth missions.
* Arbitrary Maximum Range — but that wouldn't make for gripping space battles and if it's in video games, system performance will take a big hit if it has to track that many objects that aren't in the playfield anymore.
* Arbitrary Mission Restriction a mission has optional extra conditions that can be fulfilled for a better reward than just completing the mission.

* Arbitrary Rules: could realistically find broader application with an artisan's approach to spell craft.
* Arbitrary Rules: or even be capable of genuine thought like, well, none are at present.
* Arbitrary Skepticism: Characters who deal with the strange and bizarre on a regular basis are skeptical when they run into something strange and bizarre.
* Arbitrary Skepticism: In a world with lots of weird stuff, this is so remarkable that one can't help pointing it out.
* Arbitrary Skepticism: Refusing to believe in something supernatural in spite of believing in or being aware of the existence of something equally supernatural.
* Arbitrary Skepticism to his show, then obviously the Straw Vulcan will be the first to call it hogwash.
* Arborea (Chaotic Good) is three flat layers: one an exaggerated realm of incredibly huge mountains and forests of giant trees, one infinite shallow ocean, and one dusty desert.
* Arbor Mist, until the men either did something so ridiculously impressive or hurt themselves, at which point the women would grudgingly concede that just maybe they'd allow the men to have some.
* Arby 'n' the Chief and it's predecessor Master Chief Sucks At Halo is a long running series about two Halo action figures that come to life and play video games and do hilarious things around the house. The fifth season even deconstructs the entire concept of Living Toys, with Arbiter trying to give his life meaning. Although this technically goes under good examples, Chief is one mean little bastard of a troll.
* Arby 'n' the Chief. At first Arbiter find Chief's hypocrisy funny, until he notices all the MLP-related pics Chief plastered all over the bathroom, and even a (poorly) handcrafted sexdoll of Fluttershy, is what creeps him out to the fullest. The trope then gets subverted when Chief finds Arbiter snooping and seemingly attempts to kill for it, ONLY to then sit Arbiter down and have him watch the show himself.
* Arby 'n' the Chief, Chief's initial reaction is to slowly crawl away from him, and then get out of dodge, but not without fumbling in the process.
* Arby 'n' the Chief. Colin is still alive, but thanks to Arbiter and Master Chief's intervention is now rotting in prison for a LONG TIME.
* Arby 'n' the Chief: Jon Graham has said his two favorite episodes are "Digital Fruitcakes" and "Cradle To Grave".
* Arby 'n' the Chief: Some see Eugene Black from Season 7 this way, due to his sister's condition and his father's abuse.
* Arby 'n' the Chief. The calm, mature Arbiter's dialogue with the juvenile Master Chief after doing so goes like:
* Arby's commercial someone who looks like George Costanza walking in slow motion with music as they nudge each other and cheer.
* Arby's ran an ad for its gyros, referring to them as "Mediterranean tacos!"
* Arby's simultaneously subverted this trope while playing it straight with
* Arcade: A virtual reality game begins taking over the minds of teenagers.
* Arcade Fire "Album of the Year" at the Grammy Awards. Neither of the two albums had any songs enter the Billboard Hot 100.
* Arcade Fire concerns a father pushing his daughter into the limelight so that he doesn't have to "work in a building downtown."
* Arcade Fire does touch on this trope a few times, especially throughout their album "Reflektor" and in the song "Deep Blue", with the ending making this plea to the audience:
* Arcade Fire, ends with the lines "Is it a dream, is it a lie? I think I'll let you decide."
* Arcade Fire's biggest hit on the alternative charts was the #12 "Everything Now", which was the lead single for their lowest-selling and least acclaimed album, and isn't as well-known as "Wake Up" or "Rebellion (Lies)" (neither of which charted). Also, their only Hot 100 entry was "Reflektor", which similarly, is not as well-known as "Wake Up".

* Arcade Game, due to its gameplay that has you driving a car and running down pedestrians for points. And did we mention this was in the '70s, and the pedestrians were represented as blocky, monochrome stick figures with no blood whatsoever? Amazing how standards change...
* Arcade Game has detached Fin Funnels which float around your RX-78 and fire straight left or right.
* Arcade Game is two-on-two basketball with no rules against fouls. The referee's only function is to call time.
* Arcade Gannon's past remains largely a mystery until the Courier earns his trust.
* Arcade is, in his own words, "crazy as a loon," but for the employees who can tolerate working for him, he's apparently quite generous. How generous? His severance packages include
* Arcade makes robots convincing enough that his appearances in comics usually end up being robots. He was so good at this that when he made a double of Nightcrawler, Mystique mistook it for her son and couldn't bring herself to kill it. (Had no problem vaporizing her daughter Rogue though.)
* Arcade) of his own devising. One wonders why villains don't just pay him to capture and collect their unconscious foes.
* Arcade-Perfect Port: Once the golden standard for ported video games when the difference in processing power between arcade and home was substantial.
* Arcade Perfect Ports was another well-done port, and popular enough that one of its sequels was console-only.
* Arcades in Japan are also known as "game centers" or "GeCen" for short.
* Arcade Spirits in order to do so. There's also an in-universe advertisment for a sequel to Fist of Destruction, while out-of-universe also putting forth the possibility of a sequel to Arcade Spirits itself.
* Arcade Stage 6 AA also adds a Prius, which doesn't belong in a game about drifting. AT ALL.
* Arcade Stage 7 AA X, the Suzuki Cappuccino, a vehicle which was previously the lightest and one of the fastest vehicles in the game (but balanced out with poor acceleration), received loads of nerfing in its speed, classifying it as a Joke Character.
* Arcade, teenagers are trapped inside a virtual reality computer game run by a malevolent AI.
* arcade ticket machine version of the game was more fun, if only because you actually slapped buttons for your choices instead of clicking on cases. And you actually get a tangible reward afterwards.
* Arcadia Bay—not as a real flawed human whose power doesn't define her. Upon seeing the 'real' Max for the first time, Rachel has no idea what to do or say.
* Arcadia carries a fair-sized fighter complement. In fact, it sometimes looks like at least half of her forty-one-man crew is out there.
* Arcadia Darell. When Dr Darell uses the EEG machine on them, it shows no evidence of Second Foundation tampering, and they have no memory of ever working with the organization.
* Arcadia (Lawful Neutral-Lawful Good) is two flat layers connected at their edges, resulting in a gradual downward "slope" as one heads deeper into the plane. On the upper layer there's a mountain where an orb that emits light on one side and darkness on the other spins on its axis, providing night and day.
* Arcadia", Mulder and Scully go undercover as a married couple and have to deal with this. Mulder, of course, goes into innuendo overdrive, but it's more played for laughs than anything else and he ends up sleeping on the couch anyway.
* Arcadia opens with the question " Septimus, what is carnal embrace?" Septimus, being unwilling to answer this truthfully, replies that "Carnal embrace is the practice of throwing one's arms around a side of beef." Of course, this comes back to his great discomfort later, when Thomasina informs her parents that "Septimus taught me all there is to know about Carnal Embrace."
* Arcadia or Bust, Jim's half-troll biology is given more elaboration. He has no discernible fingerprints, and his urine sample was so bizarre that the medical

professional thinks that he was either prannking them or was in need of immediate medical attention
* Arcadia or Bust. When Jim explains to Blinky how they were spotted by teenagers that thought they were conventioneers at a local Horror Convention, Blinky is quick to ask he killed them, only for a bemused Jim to affirm that he didn't.
* Arcadia Quest in one competitive map and then immediately against a cooperative fight with the dragons. Items do not carry between campaigns, and soon enough with a new game you're staring at the useless Starter cards from your beginning inventory.
* Arcadia Quest. Unlike a lot of other games, this is highly encouraged against other players.
* Arcadia Snips and the Steamwork Consortium. William asks Miss Snips for her belt, "struggling to be as polite as a gentleman asking for a lady's article of clothing could be," while standing on the top of a burning building.
* Arcadia takes place during 1809-1812 and also in "the present," with scenes more or less alternating between the two timeframes and advancing steadily in both.
* Arcadia Thomasina invites Septimus, who is in love with her, to come upstairs with her, but he declines, not wanting to ruin her reputation (he has just spent the play ruining lots of reputations and getting out of trouble on charm alone). Then, just to twist the knife a little bit deeper, Stoppard has Septimus hand Thomasina her essay on thermodynamics, light Thomasina's candle and tell her to be careful with the flame. Not a dry eye in the house.
* Arcadia utopias, a Romanticist utopia usually looks like a Garden of Eden untouched by civilization.
* Arcaea content fall squarely within this trope as neither of those games have yet to be released outside that area.
* Arcaea ended up being an unexpected hit at launch, causing the servers to undergo maintenance and thus preventing players from creating accounts or purchasing additional songs until the issue was fixed.
* Arcaea normally has some sort of chart designer credit for each combination of song and difficulty. Sometimes the chart credit is something specific to the song without giving any sort of hint to the charter's identity. However the charts for "Solitary Dream" do not have any sort of credit whatsoever.
* Arcaea, which has an international development team with none of its core staff based in Japan (although they commission and get licenses for a lot of work from Japanese creators), had a song debut in Japan first. During the event Comiket 92 in Japan in 2017, visitors to the developers' booth could play the song "Auxesia" about a week before it would be available to all players, as well as purchase an unlock code to unlock it on their in-game account early.
* Arcana had the hero Rooks coming into ownership of four genie-like spirits: Sylph, Efrite, Marid and Dao, representing wind, fire, water and earth, respectively. Their levels are tied to Rooks' and are mostly there to supplement the party's attacks with magical support.
* Arcana has your companions hold off one encounter within the last dungeon because there's not enough time.
* Arcana Heart and shoulder-tackling her opponent while wearing it. If Mei-Fang has enough for a second super attack, she could then follow it up with a blast from its shoulder canon.
* Arcana Heart, a pair of nuns who work for the Western Europe Spirit Sector. Elsa has a large cross used similar to a tonfa, as well as a gun, a whip, holy water, and other weapons for dealing with demons, spirits and the like. Clarice...doesn't need any of that stuff because she herself is a demon.
* Arcana Heart as it crawls around on the floor with its long-read hair splayed all over its face, trying to claw at Liese's opponent while shrieking and cackling.
* Arcana Heart, but other characters can use him) commands him to attack.
* Arcana Heart carries around has these as a side-effect of her dead sister possessing it.
* Arcana Heart: Dieu Mort, being the Arcana of Death, has the appearance of the traditional Grim Reaper.

* Arcana Heart has nicknames for practically the entire cast. For example, from the other newcomers, Weiß is "White" and Scharlachrot is "Red".
* Arcana Heart introduces us with Zenia Valov, whose ice-controlling default Arcana is in form of a giant penguin.
* Arcana Heart jacket worn over it. "Top part", as in just the collar and sleeves, to better display her assets.
* Arcana Heart — Only the first and third games were released outside Japan, and both kept the Japanese voices.
* Arcana Heart plan, which would destroy the world that she's trying to conquer.
* Arcana Heart. So much that one of them actually led to the rise of Yoriko's partner Mike.
* Arcana Heart. Will attack anyone who mocks him, anyone who looks at him funny, anyone he thinks mocked him or looked at him funny, and dogs.
* Arcana Magi, Alysia Morales is a magical girl under unfortunate circumstances.
* Arcana Magi are techno savvy. One dwarf is on the Board of Directors for Avalon Tech Enterprises as head of the metal works division. One dwarf works there in the technology department.
* Arcana Magi, different types of magical groups have different ways of drawing mana and casting spells. For instance, Alysia Perez and Megumi Miyazaki are Circular Magi, so all their magical powers come from Magic Circles.
* Arcana Magi, Mana is a source of energy akin to electricity, with kinetic and potential types. Avalon Tech Enterprises invents machines and magical items that uses Mana as its energy source to operate.
* Arcana Magi, Oryn Zentharis, Vyndor, and The Board of Directors of Avalon Tech Enterprises want to use the Sentinels to dominate the economy and control the world.
* Arcana Magi sprouts a pair of misty magical wings after becoming a Sentinel.
* Arcana Magi Zero, Alysia Perez and Megumi Miyazaki sprout a pair of wings after they transform into their magical outfits.
* Arcana Magi Zero, Alysia Perez and Megumi Miyazaki were both born on February 29th, 2000, which made Megumi wonder if she and Alysia shared a common greater destiny as Guardians of the Gate to the Shrine of Four Mythic Elements.
* Arcana Unearthed: "Akashic memory" is a variation on this trope where one can access the sum of all knowledge of all humanoid beings, or maybe even of everything intelligent.
* Arcane Ascension is asexual and seems to mostly lean toward homoromantic. Overall he appears to be romantically attracted to any human that he can have an engaging and intelligent conversation with.
* Arcane casters like wizards and sorcerers are proficient in only the simplest weapons. As magic users, they shouldn't be fighting with weapons at all and their meager weapon choices reflect this.
* Arcane Codex has at least a dozen playable races and more classes to choose from, with full-color artwork in scantily-clad detail, that's quite a lot of breasts. They'd probably put breasts on seahorses, if they could get away with it.
* Arcane Mysteries of Barsaive. The owner of the magic shield Bloodwall can perform a Deed to unlock one of its powers. If their attempt to perform the Deed fails, the owner cannot try to do so again until a year and a day has passed.
* Arcane talents (and apparently one of the rarest to manifest), granting the appropriate powers.
* Arc Angle of its "cone of sight" into holy bullets that home back in on the attacker.
* Arcania of Legend: Blood Magic deals with the topic of using physical pain and blood sacrifice - including human sacrifice - to power spells and placate cruel gods. The dangerous spell casting methods include self-harming, exsanguination, cannibalism and soul consumption to activate and fuel spells, enchant items and summon demonic entities. The themes of the book's spell list include pain, suffering, sacrifice and death. Several of the listed spells can inflict cruel and unusual deaths such as Boil Blood, which is self-explanatory; Haemoptysis, which causes the victim to begin coughing up blood; Heart Seizure, which induces heart

failure; and the Sorcery spells Extract Heart, which causes the victim's heart to literally leap out of his chest, and Transmute Blood, which turns the blood in the victim's veins into some other substance such as potent acid, ruby or molten iron.
* Arcanik exemplifies this trope. The key mechanic of the game, Ingenuity, is designed to encourage players to produce outrageous plans that could never work in real life (or even other game systems)... and then watch them happen.
* Arcanik. While Rule Zero still applies, players are capable of using the "Ingenuity System" in response to it. The system allows players to combine skills, attribute scores, and so on to create a ridiculously high skill roll that is almost guaranteed to succeed at whatever the problem is. The catch is that all of those numbers must be combined into a stupid plan that has no chance of working otherwise.
* Arcanine is renowned for its impossible speed, but its Speed stat isn't that high and easily beaten by other Pokémon. (Gen 2 did fix this somewhat by letting it learn the rare, increased priority move Extremespeed by level up.)
* arcanowave technology. Every time you use it, it sends bent magic into your system like a virus. If you use it too much, you start mutating into something horrific and run the risk of becoming an Abomination, one of the altered demons that the Buro, the government of the 2056 juncture where this technology hails, uses to fight its wars.
* Arcanum) and Stringy Pete (pirate king who claims he was manipulated, by the blade itself, into using the Scourge to slit the throats of his crew while they slept).
* Arcanum, and the more complex a given device is, the more likely having the laws of physics bent in its presence will break it. Result: most mages can only ride trains if they stay in the caboose for the safety of both mage and machine, and powerful mages have to learn to teleport or get used to walking. Likewise, attempting to use magic around a complex machine is a bit like sticking your hand in said machine; you'll break it if you're lucky, if not it'll shred you without missing a beat. Result; complex technology generates its own anti-magic field. Thus, spells are less effective against someone with a lot of high-tech gear, and becoming a technologist weakens your ability to use magic.
* Arcanum. As one character explains: "people have talked about info highways, web sites, and data blocks so much, some've begun to believe they physically exist. That belief became this pocket dimension."
* Arcanum deconstructed this. The reason that cities like Qintarra and Dernholm (the capital of Cumbria) have no advanced technology is because they rejected them in favor of using magic. Magic and technology do not work well together, so focusing on one or the other (or, as in Caladon, maintaining a careful balance between the two) is a choice a society needs to make. (For humans, focusing on magic to the exclusion of technology is a bad call; for elves, it's a necessity.)
* Arcanum: Fanciful illustrations can be found on the in-game world map, in keeping with the setting. Most of these pictures are of animals not found in that locale, or at all, but at least one provides a little hint of what you'll find there.
* Arcanum had it for a quest to pick up alcohol to a tavern in the really bad part of Tarrant's bar on the bridge. Unsurprisingly, there is an ambush waiting for you.
* Arcanum. He has enough dexterity to reliably hit things in combat, but his relatively low strength means he can't deal damage as quickly as a pure melee/dodge character. He has some skill with lockpicks, but there are other lockpicking characters in the game who will surpass him, and unlike those he doesn't develop his prowling skill so he's likely to be discovered if he attempts to pick locks for you. His biggest asset to the party is his magic, since he focuses on healing and can be invaluable for keeping your party alive during long dungeon crawls, without having any of the fancier tricks that pure mages who specialize in other colleges can have.
* Arcanum. He may choose to either run with it or not; however, those who do are in for a rude awakening near the end of the game, when they encounter the real Nasrudin who was alive all along.
* Arcanum of Gnomes who wanted an obedient and powerful race to serve as bodyguards

for them, and to that end, created a horrible breeding program that secretly kidnapped human and elf women, and forcibly impregnated them with Ogre semen. The births were almost invariably fatal for the mother, and the program went through countless of victims who gave birth to sterile hybrids before enough Half-Ogres who could reproduce were born to create a viable gene pool, at which point the whole program was covered up. Attempts were made to impregnate female Ogres with human DNA, but this almost never led to pregnancy. Worse still, the evidence of the conspiracy is stolen, and the player has no way of proving what they found.
* Arcanum: Of Steamworks & Magick Obscura 1880s, some dwarves exchange their armor for tailcoats, and dwarves are the most technologically-apt of all the races. Even so, however, this mostly manifests in dwarves being master smiths with an advanced understanding of materials science; traditional dwarves would never use a steam engine to replace the power of their muscles, and therein lies a large part of the game's plot.
* Arcanum: Of Steamworks & Magick Obscura, a game set in a fantasy world that is experiencing an industrial revolution, many NPCs claim that the last major war was won by the side with the guns. And we are all know the benefits of guns over swords and the like. However, in gameplay, a basic rifle is clearly inferior to a melee weapon like a sword for a number of reasons. Guns don't benefit from the wielders strength. Only a handful of enemies (including rats and the like) die to single shot or strike. On average, you get more attacks per turn with melee weapons. Guns are more scarce. And more expensive. And unlike sword blows, require bullets. Most importantly, you don't even have the benefit of distance since in the best scenario (good gun and careful positioning) you will get the maximum of two rounds of shooting against a single foe (w/RPG hp) before he manages to close in. Also, magick spells have many ways to enhance a melee warrior.
* Arcanum: Of Steamworks & Magick Obscura allows players to be gadgeteer geniuses, eventually building such things as steam-powered robots, staffs that shoot lightning and a device that can revive the dead.
* Arcanum: Of Steamworks & Magick Obscura allows the player to act as a Vaporizer (with firearms with enough firerate) and/or Type D (with a long range rifle or handgun, especially if you play in turn-based mode).
* Arcanum: Of Steamworks & Magick Obscura also fits: with a high enough intelligence and charisma, the player character can effectively avoid almost every fight in the game, and look good while doing it.
* Arcanum: Of Steamworks & Magick Obscura, and cut off his own trigger fingers to make sure he can never hold a firearm again.
* Arcanum: Of Steamworks & Magick Obscura and having an obvious motive (whether he had opportunity was not looked at).
* Arcanum: Of Steamworks & Magick Obscura and is made from a capacitor, snake venom and three different herbs.
* Arcanum: Of Steamworks & Magick Obscura, and tesla-staffs that shock the enemy with jolts of electricity are all available to technologically-savvy characters.
* Arcanum: Of Steamworks & Magick Obscura and the rise of steam and gunpowder is a major plot element.
* Arcanum: Of Steamworks & Magick Obscura. Coming off the crashed blimp, you have barely any money to buy your starting equipment, and your skills are lacking. It's hard to say at what point the game manages to pick-up, but you'll just suddenly realize that it did.
* Arcanum: Of Steamworks & Magick Obscura, consequently completely wiping out this civilization and setting back technology by hundreds of years.
* Arcanum: Of Steamworks & Magick Obscura dampens the horror of it — even if it is true, half-ogre bodyguards tend to be better treated, better educated, and achieve social status that no other half-ogres have access to. And it's suggested that stopping the violent and homicidal persecution of gnomes excused the callous abduction and rape of women early in the foundation of the program.
* Arcanum: Of Steamworks & Magick Obscura Dark Elf), which humbles Loghaire but-quick.

* Arcanum: Of Steamworks & Magick Obscura difference in price of the game, thus still qualified for a Feelies.
* Arcanum: Of Steamworks & Magick Obscura esthetics, a lot of the more technical language in the game is also influenced by outdated 18th and 19th century terminology and expressions (though not excessively and usually without archaic spellings).
* Arcanum: Of Steamworks & Magick Obscura, evil-aligned characters may ally themselves with the Dark Elves late in the game. To prove your worth to them, the first quest they give you requires you to kill the entire population of Stillwater Village. However, if you ask about the reasons, the quest-giver points out that the Dark Elves are inherently magical and their culture places a strong emphasis on magic. Stillwater, meanwhile, was primarily occupied by humans and dwarves, and adopting technology at a rapid rate. Since technology and magic in this setting disrupt each other, and Stillwater was on the border of Dark Elf lands, it was quite literally becoming a threat to the Dark Elf way of life.
* Arcanum: Of Steamworks & Magick Obscura had these in every graveyard in the game, with inscriptions like. "I told you I was sick!" "Here lies an atheist all dressed up and no place to go." "Quoeth thy Raven nevermore." "Hey who blew out the candle? Hello?" and "There was a light at the end of the tunnel, unfortunately that light was a train."
* Arcanum: Of Steamworks & Magick Obscura - has a Reaction score indicating how much he or she likes the PC, and this score can be changed depending on a number of factors; don't expect to be well-liked if you have a reputation for running naked through the streets of Tarant. Party members can be persuaded to remain just when they're about to leave in disgust by giving them a certain item (such as cakes or snuff tobacco).
* Arcanum: Of Steamworks & Magick Obscura has been called a "bad game" due to some difficult enemies at the beginning and some imbalanced game mechanics that are not always fair to your character build, such as a character focusing heavily on non-combat skills, though you can always reroll a character and select better starting inventory, save and reload often, play it safe, etc.
* Arcanum: Of Steamworks & Magick Obscura has magick being fundamentally incompatible with technology as its application makes complex mechanisms turn haywire — simple items like bows, swords of medieval suits of armor are fine however, even though technically bowyery or metallurgy still involve a level of technology. It can be presumed that such examples of technology are simple enough for magick to not interfere with their applications.
* Arcanum: Of Steamworks & Magick Obscura has the spell Read Aura, the only in-game way to see the stats of various non-party characters (the regular status window only displays percentage of remaining hit points and mana, race and attitude to the player). Its sister spell Sense Alignment is a lesser case of this.
* Arcanum: Of Steamworks & Magick Obscura here and there throughout the game; aside from the usual increase-speed or deal-poison-damage modifiers, some particularly cool weapons have a chance to summon woodland beasties or even the undead. Or a naked halfling.
* Arcanum: Of Steamworks & Magick Obscura imparts a strength penalty and endurance bonus on females (which can be negated by taking the "Tomboy" background) but otherwise does not question the idea of a female magician, a female inventor, a female warrior or a female sailor, nor does anyone complain about a female adventurer wandering the countryside with five men or delving into ruins and caves. Virgil will comment on the oddity of (male elf) Nasrudin reincarnating as a woman but has no problem with it otherwise. The times you're directly treated differently due to your gender can be counted on a factory worker's right hand.
* Arcanum: Of Steamworks & Magick Obscura (incorrectly called a zeppelin) was the first of its kind and on its maiden voyage, but was destroyed with stolen biplanes. Later in the game, succeeding on one quest and providing proof the biplanes flew insures their continued existence.
* Arcanum: Of Steamworks & Magick Obscura. Interestingly, the map was apparently made by the "Troika Cartography Associates", an in-universe organization

that shares a name with the company that made Arcanum.
* Arcanum: Of Steamworks & Magick Obscura is an example of the second type: all he knows is a gnome gave him a ring and told him to "Find the boy," but due to the conspiracy's repeated attempts to murder you, you eventually figure out their incredibly convoluted plans.
* Arcanum: Of Steamworks & Magick Obscura is partially based on this; an extremely science-oriented character is immune to magic because s/he does not believe such foolishness could have any tangible effect.
* Arcanum: Of Steamworks & Magick Obscura lampshades in conversation with a mage that specializes in it.
* Arcanum: Of Steamworks & Magick Obscura, Loghaire Thunderstone, king of the dwarves, posits the idea that this is the reason why humans develop technology so quickly, to the point of destroying the environment. He believes that humans are always dogged by the fear of death due to their relatively short lifespans and are driven to achieve as much as possible while simultaneously rarely living long enough to see the consequences of their own actions.
* Arcanum: Of Steamworks & Magick Obscura, many people are implied nay-theist, not bothering with religion at all. The dwarves, orcs, elves, and Bedokkan peoples still appear to worship their pagan deities, to some degree. As for the Panarri religion, it's demonstrated to be false during the main quest. Given that an optional, obscure, and a rather difficult sidequest involving making offerings at altars of the "old gods" will actually confer blessings giving significant bonuses to the player characters, it is rather odd that the worship of these deities has been abandoned.
* Arcanum: Of Steamworks & Magick Obscura: Ogres are speculated to be the descendants of a race of giants who lived in ancient times, but have since become extinct. Ogres are a good deal smaller than their ancestors (the average ogre is about 2m tall, the length of a giant's thighbone), and while giants were civilised and intelligent enough to use magic, ogres are savage and feral.
* Arcanum: Of Steamworks & Magick Obscura, one of the possible backgrounds for a custom human PC is Elven Ancestry, which gives them a higher magical aptitude at the start of the game.
* Arcanum: Of Steamworks & Magick Obscura, owing to the quicker and higher leveling potential of a solo PC. Even an unarmed build can solo more effectively than a full group that requires weapon maintenance and healing.
* Arcanum: Of Steamworks & Magick Obscura, people.) The protagonist will also usually inform the latest recruit that they're hunted by an ancient order of assassins who want them, and everyone associated with them, dead. This fails to deter anyone. I guess living in Dernholm must suck majorly if this is the preferred choice.
* Arcanum: Of Steamworks & Magick Obscura permits this combination.
* Arcanum: Of Steamworks & Magick Obscura, popular with dwarves and orcs. High damage, slow, but also capable of hacking open a door or stubborn chest without being damaged.
* Arcanum: Of Steamworks & Magick Obscura talking to them. However, if you do manage to recruit them like that and then let the Intelligence booster wear off, the character won't talk to you regularly, but for quest-mandated conversations, you'll have the usual custom dialogue.
* Arcanum: Of Steamworks & Magick Obscura, the Fine Revolver is the best all around weapon until mid-game. Best rate of fire, best damage per shot, best damage per action point. After that you'll need to rely on the Handcannon (sawed off shotgun), then the Elephant Gun (heavy rifle) before you reach your endgame uberweapon: Droch's Warbringer, a fast-firing and extremely heavy revolver.
* Arcanum: Of Steamworks & Magick ObscuraThe game manual mentions an unexplained event some 900000 years ago that caused the magickal energies of the world to suddenly skyrocket. Scholars call this time period in Arcanum's history the Epoch of High Enchantment. It is in this highly magickal time that the Elves and Giants evolved from humans, and many of the more fantastic creatures, that have since become extinct, came into existance by either transforming or merging

together creatures that existed at the time. It is implied that ever since then magick has been slowly draining from the world.
* Arcanum: Of Steamworks & Magick Obscura. The overarching story is fantasy epic, set in a more dystopian land that includes race and class conflict and the growing pains of an industrializing society as themes. Magic vs. technology is less a war than an ideological clash that can at least find common ground in its goals if not its practical methods.
* Arcanum: Of Steamworks & Magick Obscura. The player can convince the villain to give up and let himself be killed peacefully if they can poke enough holes into his logic.
* Arcanum: Of Steamworks & Magick Obscura) way: when you try to expose the conspiracy, you realize your proof was just, let's say, stolen. For added trauma, when you return to the secret facility where you found it, there's nothing, not even a brick.
* Arcanum: Of Steamworks & Magick Obscura will permanently penalize your character's charisma.
* Arcanum: Of Steamworks & Magick Obscura with a Fortifier chemical, which temporarily increases your damage resistance, but the withdrawal takes away a chunk of your health, and overdose cancels the positive effect and causes immediate withdrawal. You can make lots of it and inject several into enemies during a fight, causing significant damage each time. Note: do not give this to your followers or they will attack you.
* Arcanum: Of Steamworks & Magick Obscura works. Half of the parts used in making technology items can be found in a garbage bin. Some others must be bought, though. And all of the recipes can be assembled in a complete wilderness without access to any thing like a workshop.
* Arcanum: Of Steamworks & Magick Obscura, you are required to dig up 2 graves (1 if you know where you are going) to beat the game. You can also dig up various other graves.
* Arcanum, one of the first quests you encounter involves some bandits who wronged a priest, and as punishment he cursed their souls to remain in the mortal world and to never know peace.
* Arcanum: Ruby will gladly steal anything that isn't attached and won't be immediately noticed as missing, from money and jewelry to mundane things such as clean robes.
* Arcanum: Science and magic work by exploiting and breaking laws of physics (gravity, thermodynamics, etc.) respectively, so machinery fails in the presence of strong magic and magic fails in highly industrialized environments.
* Arcanum's High-Fantasy/Steampunk would be incomplete without clockwork mechs, and there is a nice variety for the tinker to build. Decoys that explode or illuminate, arachnids to poison enemies or heal your allies, and an automaton as heavy as a tank.
* Arcanum, the elves of Qintarra ask you to investigate a murder, and one conclusion you can reach is that the victim was insane and took his own life in the hopes of framing one of his enemies. The elves are horrified by this, believing it to be an abomination against nature that will deny his soul any chance of reincarnation.
* Arcanum, you can summon spirits of dead people. Some will have side-quest-relevant info, but most will only complain about the pain (which, as you discover later, is main-plot-relevant!).
* arc Brother Blood, sandwiched between the (dark) Terra arc and the (really dark) Raven arc. The fact that they had to make Brother Blood a large ham to give viewers a breather just shows off how nasty Slade and Trigon are.
* arc. Cannons are more volley weapons than direct fire but the fact that combat happens at close range only makes it more apparent that sitting for 210 years hasn't done it any favors.
* Arc: Common in still artwork of jugglers, this is when the juggler has his hands outspread with the props forming an arc between them. Arc does not use motion lines, leaving to some the impression of all the items suspended over the juggler's

head.
* Arcee, Chromia and Elita-1 were very similar in design as the requisite
* Arcee ends up with Optimus Prime, Abin Sur, Kilowog, and Mogo as her sources. The latter three using their Lantern Rings to interface with the cyberwomb.
* Arcee had a relationship with Springer in the Legends comic and the third season of the cartoon, an explicit crush on Hot Rod in the movie, and dated Chromedome in
* Arcee has seen countless death and destruction in the war with the Decepticons, but when her friends comfort her, she'll start opening up around them and surprisingly give off an innocent smile as a sign of friendship.
* Arcee is typically depicted as one of the more mature and sisterly Autobots. In the comics, she was originally a male Transformer who was subjected to inhumane experiments that turned her into a female. This resulted in her becoming
* Arcee one time to many. It gets to the point that Smokescreen, having finally had enough promptly leaves the base to "get some air".
* Arc-en-ciel to prevent her Rejuvenation Program from bringing it back.
* Arcen seems to be fond of this on the whole. The three alien races from the
* Arceus has been called a horse, llama, giraffe, and a goat by the fandom. Its actually a
* Arceus is heavily implied to be the creator of the Pokemon universe, if not at least the God of Pokemon as it is the original Pokemon that came before all others. A special event in
* Arceus is never referred to as a god, even though it obviously is. It's referred to as a "creator" and "alpha" Pokémon, but not directly a "god".
* Arceus shouldn't be used in anything below Uber competition). In fact, the tier system pretty much allows virtually all Pokemon to be played in a form of tournament - even though most low-tier ones don't get any support or analyses for usage in tiers they're deemed too weak/outclassed for.
* Arc Fatigue (characters would rather develop a romantic subplot than help save the world or stop the villain).
* Arc Fatigue: Fans get impatient with the current story arc taking too long to be resolved.
* Arc Fatigue year, not including issue #0) that led many to stop reading the series. People came back for Snyder's "Endgame" arc, which is also divisive for the weird attempt at retconning the Joker to be some immortal spirit... thing. Also, wordy.
* arc features a rich maniac who keeps a whole island set up for "sporting" manhunts.
* Archadia is a mesh of Imperial Britain and Imperial Japan, being a nascent superpower known for their airship superiority, innovation, and rapid conquests towards both their neighbors and faraway lands. The judges' armor are also based on samurai clothing.
* Archaeological Arms Race: Everyone is racing to get the technology from a lost civilization.
* Archaeological Arms Race. Several countries are gearing up for war and there are a great deal of powerful magical artifacts to uncover. Whether the trope is played straight is up to the DM, of course.
* Archaeological research has uncovered evidence that women fought in the
* Archaeologists found a piece of a human skull from the eighth century in Denmark. It had a hole that seemed to suggest a trepanation. Then they realised the hole had been drilled long after the person died. The runic incantations to Odin and other deities led to only one conclusion: Some guy had dug up a skull, hacked off a piece, carved runes and drilled a hole in it...and then worn it around his throat as an amulet.
* Archaeologists have analyzed a 3000-year-old prosthetic big toe that was found, still in place, on the skeleton of an Egyptian priest's daughter. Custom-wrought from hardwood, plant fiber and leather to replace an amputated digit, the prosthetic has multiple parts allowing flexibility, and shows signs of having been adjusted for a better fit at least twice. It would've allowed its wearer a normal gait and to wear the sandals typical of her New Kingdom culture.

* Archaeon the Everchosen is the most powerful Chaos Lord of the current generation, and Chaos Warriors life by
* Archaeon the Everchosen; the bastard son of a Norscan Raider, Diedrick Kastner grew up to be a Witch Hunter and a devout servant of Sigmar. One day he read about a prophesied Chaos Lord who would destroy the world, and his search to find out who this mysterious "Archaeon" was drove him further and further to the brink. Finally, he confronted an Arch Lector who stated that Diedrick himself would become Archaeon. Diedrick snapped, killed the Lector, and fled to the north, where he embraced his destiny and became one of the most feared Warriors of Chaos.
* Archaeopteryx is known as the Urvogel (first bird), though Archeopteryx's status as the Ur Bird has since fallen under dispute.
* Archaeopteryx lithographica — the fossil that provided the first strong evidence that birds are dinosaurs, named after the lithographic boom that led to its discovery).
* Archaia Entertainment, a 12-issue miniseries, finally arrived in February 2018.
* archaic humans such as Neanderthals and Denisovans, with Europeans and Asians carrying around 2% Neanderthal DNA on average.
* "Archaic" (real name Liam Pomfret) is webmaster of the other big-name
* Archaic Weapon for an Advanced Age: Weapons that should be obsoleted by the setting's technology prove not to be.
* Archaic Weapon for an Advanced Age, your enemies will use that against you.
* Archangel Gabriel before the pagan gods existed, allowing him to join them). Though it turns out many years later that he was just taking on the identity of the real Loki, who wanted to retire from his duties.
* Archangel Gabriel is this to Max, having been the one to give her her sword and offering her advice when she needed it.
* Archangel Gabriel: One of the archangels, usually a messenger depicted with a horn, and very important in Islam as he gave Mohammed his revelations.
* Archangel. However the Earth Alliance ships tend to have the same issue the Feds from UC faced but much worse. While the issue was kinda solved by adding MS catapaults the poor Drake-class still gets easily massacred while the Nelson only does slightly better. ZAFT and ORB ships tend to play the trope much better.
* Archangel is another example, recruiting a multi-species band of vigilantes to
* Archangel Michael and fire manipulation, but he's a scrawny wimp who goes down in one punch. Good luck getting close enough to hit him though.
* Archangel Michael and Satan, where the farmers of Quebec and their crops are the object of the bet.
* Archangel Michael, but the fact that a good Catholic girl is dating a foreign trickster god gets brought up more than once.
* Archangel Michael: One of the archangels, usually depicted with a sword and the element of fire.
* Archangel Protocol, access to the LINK (the virtual reality implanted internet) is reserved for members of a religion. And since the LINK is required for operating in society... Every government in the world (except for Russia) has a state religion, and citizenship is conditional on being religious. Essentially, the atheists got the blame for World War III, and this is the result.
* Archangel Protocol part of the LINK, and what remains of the old, unregulated internet. Comparatively low in bandwidth compared to the rest of the LINK, Russia's entire economy runs via MouseNET.
* Archangel Raphael: One of the archangels, usually depicted with a water flask.
* Arch Angels. At the time Persians and Hebrews got along very well, which lead to several Yazatas and the Amesha Spentas coming to be viewed as Angels. One example is the Yazata Sraosha became equated with the Angel Surush.
* Archangels qualify as a unit variation, being able to resurrect allies once per battle. First Aid tents with the appropriate skill can do so aswell, but they heal for meager amounts.
* Archangel's silver-and-dark-grey armor is also marvelous to behold.
* Archangels take it even further, as they can only be taken down by an archangel's blade. Not only that, but an archangel's blade doesn't work

* Archangel Uriel and other angels hint at the idea of this trope. Uriel is one of God's strongest and most dangerous servants. However, as his Duty is the protection of Free Will, then respecting the choices mortals make, even if they are crimes of horrendous evil or just stupid, must be respected. Uriel states he has the power to destroy galaxies, but when a mortal villain mouths off to him and flicks the angel's nose, Uriel can only stand still.
* Archangel Uriel: One of the archangels, the one that stands at the gate of Lost Eden.
* Archangel who causes loads of problems for the heroes in the first part of Destiny.
* Archaon, Chosen of Chaos fits the actual Nietzsche mold fairly closely, believing that human society is irredeemably corrupt, and that a new form of society most be built. Of course, he thinks this should be done by killing everyone and turning the world over to
* Archaon chose to sneak away rather than risk waking him up). Fortunately, the only thing that rouses them from their slumber are extremely powerful thunderstorms.
* Archaon, Lord of the End Times. Another subversion, they don't even have to be black. The colour of their armour varies according to their religious affiliations, varying from black to red to purple to green to blue. These colours actually symbolize which Chaos God they devote themselves to, with the colour Black suggesting that they worship the Chaos Gods as a pantheon.
* Archaon the Everchosen has racked up a fearsome list of aliases for himself, including the Lord of the End Times, the Kingslayer and the Three-Eyed King.
* Archaon the Everchosen, leader of the Warriors of Chaos, wants to burn the entire world to ash. Surprisingly, this is the exact opposite of what his patrons (the Chaos Gods) want, as destroying the world would cause them to cease to exist due to a lack of souls and emotions to feed off. Archaon continues anyway, destroying the world out of spite rather than any form of loyalty.
* Archaon was originally a devote Templar of Sigmar, however, he suffered a
* Archbishop Cranmer marries Grete, the niece of reformer Andreas Osiander, while ambassador to the Holy Roman Emperor. He smuggles her back into England when she become pregnant and reveals her only to Thomas Cromwell—Henry VIII, though broken with Rome, still doesn't approve of ecclesiastical marriages. Cromwell's reaction is basically
* Archbishop Laura Stuart's hair extends down her back all the way to her ankles... and then it loops back up to the top of her head again. And then it goes through a hairpin and goes down to her waist again. Her hair is about
* Archchancellor Ridcully has a similar lack as Granny, with the result that his jokes are one of many aspects of his personality that grate on the Bursar, who
* Arch Clements accidentally bit a chunk of someone else's ear off. He at least said he was sorry.
* Archconservative parents having radical-liberal children and vice-versa.
* Archdevil cosmology, definitely. Her mother was the consort of Asmodeus, the Overlord of Hell (her father, naturally), who was murdered by Levistus, the ruler of the fifth layer of Hell centuries ago (a treasonous crime that caused Levistus to become both the ruler and a prisoner of his domain). It's no secret that Glasya utterly despises Levistus for the death of her mother, and one of her biggest goals since becoming ruler of her own layer is revenge, possibly by finding enough evidence of Levistus' treachery (or planting some) to convince her father to eradicate him completely.
* Archdevils are unique beings and not part of lesser devil species. Dukes and duchesses are rank 12, and serve directly under the Archduke or Archduchess, rank 13, of each Hell.
* Archdevil whose body was stripped away and transformed into a cloud of flies by Asmodeus.
* Archdragon Peak, the bell can be heard throughout the area whenever another player decides to take a shot at the King.
* Archdruid Glaidalis in Darkheart Thicket has a unique voice line if there are

any druids in the dungeon group. He even has different voice lines depending on the spec of the druids in the group.
* Archduchess Sebille's personal cadre of swordsmen from Blackrock Island. Will notes that while other Meridian warriors train only enough to have a worthwhile skill, this group has dedicated their lives to combat.
* Archduke Franz Ferdinand tried to get medical attention to his wife after they were shot. They both died nonetheless.
* Archduke John (Johann) (1782-1859), who during the Revolution of 1848 was briefly appointed German regent (
* archduke of Hell maintains an army of devilish soldiers with its own distinct equipment and tactics, so the Iron Defenders of Dis are exceptional siege engineers, Baalzebul's Maladominaar are renowned shock troops, and so forth. The Nessian Guard, an elite force under the command of Asmodeus himself, is the only army that does not take part in the Blood War, since it's being held in reserve for an even greater conflict to come.
* Arch Enemies are the Thousand Sons, a Legion of Space Marines dominated by sorcerers who are considered some of the most powerful psykers in the galaxy.
* Arch-Enemy able to slice thru walls of solid concrete and whatnot. In game? He only has a limited ability to teleport, and a slash from his katana is not fatal at all (even his most deadly "Sword Stab" unblockable does a lot of damage, but it really doesn't kill in one hit).
* Arch-Enemy and ignore everyone else, or, conversely, never directly attack a particular party member at all.
* Arch-Enemy and shows no mercy whatsoever to pirates, no matter how honourable their goals. He also stops every now and then to help his subordinates and prevent civilians from getting hurt in the crossfire. He also grudgingly acknowledges Luffy commanding Zoro to rescue him when an underground tunnel is flooded with water (leaving him powerless due to his Devil Fruit), and gives the Straw Hats a headstart in escaping.
* Arch-Enemy arc, wherein Naugus has currently become the villain most equal to Eggman for the position.
* Arch-Enemy Baron Strucker, the leader of the terrorist organization HYDRA, also has repressed aging thanks to a serum.
* Arch-Enemy, because on one condition is that he can't use his power to do evil. In this case, killing Superman. To him, even godhood is meaningless if it means he must let go of his hatred towards the Man of Steel.
* Arch-Enemy. Drakken has tried to outright kill Kim Possible on several occasions, but he has also spent a great deal of time trying to publicly embarrass or bicker with her; Shego, meanwhile, is just as likely to take potshots at Kim's fashion sense as fight her to the death, and once stole a green leather jacket simply because Kim had her eye on it.
* Arch-Enemy extraordinaire who seeks to conquer Asgard and kill his heroic sibling. He is the father of various evil creatures as well as Hela, Goddess of Death.
* Arch-Enemy, Gais Claudius Glaber, is a headstrong leader who thinks he's also charismatic and a mastermind.
* Arch-Enemy - has Bowser as one of the protagonists and ironically depicts him at his manliest.
* Arch-Enemy, he warns Haley that Crystal will be after her when she leaves the thieves' guild, and when they meet again as opponents, they clearly have some mutual respect.
* Arch-Enemy Houston Astros. That was until players on the Reds (Brandon Phillips in 2010) and Brewers (Nyjer Morgan and Zack Greinke in 2011) started insulting the Cardinals. The fans became very aware of the rivalry after that.
* Arch-Enemy is Luther, a Photoner from an ancient civilization who specializes in the use of Techniques and has the ability to stop time, having stolen it from the body of Klariskrays I.
* Arch-Enemy is the Arc Villain for a very short time in Kersea's storyline, during chapters 6 and 7.

* Arch-Enemy). It championed itself as a reincarnation of the aforementioned early caliphates, which by all accounts worked; it was the last widely-recognized state to claim itself as a caliphate.
* Arch-Enemy King K.Rool is this depending on the game, sometimes he's the largest enemy, and sometimes there are bosses bigger than him.
* Arch-Enemy Kiritsugu Emiya. All other cases of "Say My Name" in this game are appropriate for the situations, but Kotomine loves going out of the way to say "Emiya Shirou" even when a simple "you" would do.
* Arch-Enemy, not truly lack of interest (his preparation for all opposing teams is exhaustively intense and informative) — Ryan is nothing more than the next entry on the schedule to him.
* Arch-Enemy of fear itself, and Sinestro was influenced by a demon telling him a prophecy that Korugar would destroy itself if order wasn't enforced.
* Arch-Enemy of one Honor Harrington for about four books. His pathological vindictiveness, cowardice, and utter inability to know when to cut his losses insured he was not around for book five.
* Arch-Enemy once again, but the thing is he wanted to CONQUER the planet, not destroy it. The Cadian Pylons were highly valuable and the entire reason he was attacking the planet in the first place. With it gone, he "won", but lost the reason he had spent so long waging war against Cadia to begin with.
* Archenemy piss the big guy off. By the end of the novel (and the later films in the franchise), it's personal on Ghidorah's side as well, given the damage Godzilla has done to him.
* Arch-Enemy slips her binds and conveniently falls straight into a Gump Taxi that passes by.
* Arch-Enemy the shiny object fascination, though, getting swatted by White in one episode for trying to grab an OSI agent's shiny, shiny gun.
* Arch-Enemy) to assist him. Later, Falcon has to beat both Black Shadow and Blood Falcon during the Grand Prix.
* archenemy, to be portrayed as a pro-human/anti-alien extremist who sees himself as enabling humanity to stand on its own two feet. While his position is ultimately self-serving, Luthor's argument that superhumans hold humanity back from truly excelling is one that resonates with some people in-universe and out.
* Arch-Enemy trace back to how one of his first encounters with the Punisher left his face horribly disfigured.
* Arch-Enemy turned necromancer who controls San Francisco's underworld.
* Arch-Enemy who can't understand what it's like to be denied something for the first time in his adult life.
* Arch-Enemy who went mad in his quest for ultimate enlightenment, and has also used other schools of magic to achieve his ends, including demon-summoning.
* Arch-Enemy "Why am I surrounded by such brainless morons?". Shredder once actually took the stupidity of his henchmen in stride. After inventing a new robotic weapon, he told Rocksteady and Bebop that he named it after them. He called it "The Knucklehead".
* Arch-Enemy: With the Egyptian gods Set and Horus, it's personal. Set murdered Horus' dad, Horus hacked off Set's balls, Set gouged out Horus' eye, and on and on...
* Arch-Enemy yet jumped at the opportunity at getting a football tournament when the previous hosts bailed out.
* Archeologist Daniel Jackson (Michael Shanks) becomes steadily more physical and cool as
* "Archeology Today, an interviewer (Michael Palin) pays more attention to a tall archeologist (John Cleese) than a short one (Terry Jones). Eventually jumping on top to become taller happens.
* archeopteryx more advanced than the megalosauroids (and was even jumping between being a coelurosaur or megalosauroid for a while).
* Archer 1999, Archer dons power armour and a massive gun to hunt down an unknown alien on the ship... and can barely move so he takes it off.
* Archer above if she were not only your mother but your spymaster as well.

* Archer, a computer virus infects the mainframe and threatens to upload all the spies' names to the virus' creator. They get the idea to just unplug the mainframe until everything can be sorted out, but it turns out the mainframe has a battery backup. Behind a nearly indestructible locked door. Whose lock is controlled by the mainframe.
* Archer after Cheryl and Cecil have stopped fighting at the end of "Sea Tunt: Part 1'' because he was trying to get her put under conservatorship so he could have her split of their parents' inheritance, he calls her "Beans" while he apologizes.
* Archer, after Sterling Archer's code name, but was changed just a few days before the opening sequence was finished.
* Archer after they start throwing food at each other. The scene cuts away to a Technical Difficulties card, and about thirty seconds later, the scene resumes with Alton finishing the dish, Archer’s newly remodeled kitchen destroyed, and Archer stuck head-first through the oven door.
* Archer. Also the cleaning staff had previously unionised but Malory had the elevator that they were in crash.
* Archer & Armstrong: Several of the conspiracies and Archer have the ability to tap into the Akashic Record, thus instantly gaining whatever ability is required at the moment. At the start of the series, Archer was "only" able to use it to become immediately proficient in whatever martial art or trained ability was needed at the time, but after an encounter with the HARD Corps, has begun making use of their psionic abilities.
* Archer & Armstrong speak like this. Even during a battle to the death they won't utter anything stronger than "goshdangit" or "flippin' bullcorn".
* Archer & Armstrong to sneak into Area 51. The costume fits fine, but she's still caught almost immediately, possibly because she has a hard time concealing her surprise when she runs into an alien.
* Archer & Armstrong villain General [Redacted] constantly does this, even to his own name.
* Archer and a sentient holographic anime girl (who he created himself) as his girlfriend.
* Archer and fail to protect him so that he could get away with it by pointing to how seriously he was taking the threat.
* Archer and goes off on a long tangent about actress Bea Benaderet. When Slater finally manages to finish his briefing, he asks "Any questions?'. Archer raises his hand, prompting Slater to add "That aren't about Bea Benaderet?". Archer puts his hand down.
* Archer and Lana are in the middle of a gunfight, both in their underwear, and Lana catches Archer
* Archer and nearly married an AI. When his use of company funds is challenged, he asserts "and the best part is, he's learning!"
* Archer and references to previous running jokes (such as Archer asking "why aren't we doing "phrasing" anymore?") or require long-time understanding of each character's foibles to get the full humor (such as Pam's history as an underground pit fighter/drag race champion). So while someone jumping in late in the show will have a basic understanding of what's going on, they may wonder what the joke is supposed to be when Archer keeps saying "danger zone".
* Archer and Rin (4'1) works with this as well, for he's about a foot (30 cm) taller than she is and 68 lb. (31 kg) heavier.
* Archer and she was just blacked out for the ceremony. Ray tries to correct her but Archer tells him it'll probably be easier for everyone if he just lets her believe it.
* Archer and Shirou also apply this. They subconsciously scan any weapon when they see it and analyze it down to its creation, its history, its previous usage, and the wielder's skill. By compiling all that information and using it to create a copy, they not only produce a projection significantly superior to that of other magi but can also tap into the skills of past wielders to use the weapon more effectively.
* Archer) a number of implied incidents with prostitues and his ongoing

relationship with Lana Kane which regularly results in her being physically or mentally hurt.
* Archer, Archer calls Lana out for staring at his ass in the crouch firing position. She tries to play it off, but the close up shot of his butt leaves little doubt to where she was looking.
* Archer. Archer eventually points out how odd it is they have so many on-hand.
* Archer, Archer is heard describing the so-called security guarding the ISIS mainframe, while a montage of him bypassing each section in turn plays. Subverted in that he is actually just describing the security to Cheryl, in hopes that she, as a front desk secretary, has the ability to make it easier for him.
* Archer: Archer is stranded in Canada without a passport and unable to take a plane or train home due to being on the "No Fly" and "No Train" list. He has to wait for Malory's boyfriend Ron Cadillac to pick him up and take him back home.
* Archer, Archer's best friend, trying to come up with what their names would be if they took each other's last names... while hunting Lana and Cyril.
* Archer arc, her singing voice was provided by country singer Jessy Lynn Martens.
* Archer Archetype, uses a bow, one of the only unnamed weapons of the protagonists in the series.
* Archer are besieging the mansion where ISIS are holed up. Problem is, the only weapons they have are Archer's PPK and Lana's TEC-9s, both of which are out of ammo. Cherlene leads them to a gun cabinet filled with ancient muskets and hunting weapons. Archer makes use of a Mare's Leg throughout the episode.
* Archer are constantly being abused (physically and psychologically) for the sake of comedy. While Lana receives a lot less compared to Pam and Cheryl, certain episodes put her through considerable slapstick, such as 'Pipeline Fever' where she severely scalds her hands on dry ice and is shot full of morphine, and the 'Space Race' episodes, where she continuously vomits and has her clothes destroyed, forcing her to run around in just her underwear and stickers on her breasts.
* Archer as confirming that the aesthetics and technology of the show are intentionally made anachronistic and asynchronous: a given episode might feature genetic engineering, memory altering devices, androids, and advanced laser weapons, and yet also display seventies decor and a complete lack of mobile phones—only for the following season to feature smart phones. Whether it's technology, architecture, or fashion styles, everything is an inconsistent mishmash of the last few decades with a dose of futurism mixed in.
* Archer asks what cancer is. Later in the episode, she still doesn't know what cancer is.
* Archer assuming that injecting her with an EpiPen would save her life no matter how much she ate.
* Archer, as well as the other characters, keep trying to shoot Barry, despite him having become a cyborg who is completely
* Archer as well, since he appears to kill a couple guards while escaping.
* Archer. At several points Archer appears to be delivering one of these only for the camera to pan out and reveal he's talking to a stray dog, a hobo, a prostitute and eventually just straight-up talking to himself because he's so tired and hopped up on pills.
* Archer attended several boarding schools in his youth, almost all of which were horribly traumatic experiences. He rarely had any friends, he was frequently forgotten there by Mallory, and in one episode, it's revealed he got pnuemonia from being swirlied in a toilet filled with pee.
* Archer: At the end of "Diversity Hire", Conway Stern stabs Archer in the back immediately after saving Archer from two Cuban hit squads.
* Archer at these. He usually winds up pausing and saying, "Wait ... damn. I had something for this." On one occasion when he was stumped he went with "Eat grenade, stupids!"
* Archer because nobody liked him and did not understand his motivations.
* Archer, Brett's primary character trait is "gets shot in the office regularly." As of Season 3 he seems to know this, after someone demonstrates a car's bulletproof shields and he gets hit by a ricochet:

* Archer brother, with only said brother, and an incredibly drunk Archer for backup.
* Archer) but includes just enough sci-fi elements (such as robot imposters, clones, mind-control chips, and futuristic space stations) to sit here comfortably.
* Archer, but plays it entirely straight with the rest of the main cast.
* Archer, but whether he actually understands them or just jumps to conclusions is unclear.
* Archer by becoming a Pirate King! But I guess that was too! Much to ask! So mother can keep! Her stupid ransom because I! Don't! Need her! What I do! Need! IS SOME FREAKIN CRAB! SHAMPOO!!
* Archer by Gillette, who says Malory cut money from the tracing program to pay for her new conference table.
* Archer by tackling evil cyborg Barry off a building. She dies, Barry is just fine, and Archer is in tears over this senseless tragedy. So is Doctor Krieger; they landed on and crushed his beloved van.
* Archer causes three agents' covers to be blown by calling them drunkenly. He called the first two were to convince women at a bar that he was a secret agent, the third he just asks if he plans on attending a work function.
* Archer cheated on Lana just as much when they had a relationship anyone else. In Archer's eyes, Lana is way too awesome to cheat on for anything except the best, which is as close to respectful as he's capable of being.
* Archer, Cheryl's family mansion has one of these in its conservatory. Ray kills it in a battle that costs him his right hand.
* Archer: Cheryl takes her shoes off often. A lot of the time it's when something bad is happening to someone else (that's a fetish of hers), which could hint at a foot fetish.
* Archer, Cheryl uses this tactic effectively to avoid jail time, instead being thrown into a mental hospital for ten months. She urges her friends to follow her lead in order to avoid getting arrested for trespassing.
* Archer, Christian Slater plays a secret agent version of himself who goes by Slater.
* Archer. Computers look like they come from the early '80s, and the KGB still exists. Cars and planes tend to look like they come from the '60s and '70s. Meanwhile, all the characters carry up-to-the-second cellphones.
* Archer considers himself neither a true swordsman nor a true bowman-indeed, Lancer claims his swordsmanship "lacks pride" — and deems himself a mage first and foremost, but this does not take away from the fact that his skills with a blade and bow
* Archer, cutting the green wire of a bomb speeds up the timer, because Archer misread the bomb's serial number to their bomb expert. M... as in Mancy?
* Archer demand to be tased after seeing Archer (deservedly) get a dose of the same. She gets her wish, and is quite happy about it:
* Archer did it with Burt Reynolds, who turns out to be just as much a crack stunt driver and world-class ladies' man in real life as in the movies that Archer is obsessed with.
* Archer doesn't even care about Lana, and thus the Mexican Standoff is futile.
* Archer, doesn't want anything to do with him. Even other camp gay guys make fun of him.
* Archer: Dreamland, a pulp adventure that winds back the clock some more to the late 1930s (this is all a coma dream in the real Archer's head), set mostly on a French-colonial Polynesian Pacific island.
* Archer Dreamland: Archer, in a coma from the events of the previous season, imagines himself as a decorated World War 2 veteran-turned private eye.
* Archer Dreamland takes place over the course of one week, according to Archer. Deconstructed, since he doesn't get any sleep and has pretty much lost any semblance of sanity by the end.
* Archer Dreamland, takes the super-spies cum drug lords cum detectives back to 1940s Los Angeles.
* Archer. During an operation that requires him to seduce a gay Cuban operative in

Miami, Archer visits a Latino gay bar called The Cockfight. It looks like any other bar, except that it has actual cockfighting. Most of the episode is about Archer gradually realizing that the Cuban operative doesn't really fit any of the stereotypes about gay men.
* Archer episode "Bloody Ferlin" when Archer, Ray and Cheryl go to West Virginia to visit Ray's homophobic brother, they pretend Cheryl is Ray's wife. Ray is disgusted when he finds out his brother wants to sleep with his fake wife. Unusually for this trope, the person insisting on the principle is depicted as clearly in the right.
* Archer episode "Honeypot" features a cut-away that shows Archer throwing Cheryl's clothes off the balcony with Cheryl covering herself to stop him from doing so.
* Archer episode "Killing Utne" after a very messy attempt to dispose of dead bodies.
* Archer episode "Smuggler's Blues", Archer travels to Colombia to seek an alliance with the beautiful and feared cartel boss La Madrina, who turns out to actually be a high-ranking officer in the Colombian national police. She has him arrested for drug trafficking, but only after a night of heated passion.
* Archer episode "The Man from Jupiter". Sterling Archer and his hero, Burt Reynolds, are in what's deemed the "world's slowest elevator" inside Archer's co-op building. Burt suggests that Archer "get a Batpole" as a joke. Archer, to Burt's surprise, replies "Nine thousand bucks. Lowest quote I got..." indicating that Archer had already looked into it.
* Archer episode "Training Day", Archer attempts to activate his car's ejector seat but is stopped by Cyril, who will be left in the car and be killed either by their pursuer or the now driverless car crashing at high speed.
* Archer frequently mentions an old gypsy woman who curses her and possibly her coworkers with various unfortunate fates that may or may not resemble their actual mishaps. Either that or she predicts the mishaps.
* Archer friend Dr. Krieger and records his and Barry's conversations about rocketing back home. He manipulates them to sound like admissions of infidelity:
* Archer gets a lot of mileage out of "No, it was just incompetence." "And that makes it better?" "... Doesn't it?"
* Archer Glengoolie Blue or Gengoolie Black scotch is featured in several episodes.
* Archer had a dramatic sting whenever Cheryl caught her brother interviewing her friends about her mental stability. Cheryl seems to be the only one who noticed it, implying that it's all in her head. She tries to ignore it, because "It's non-diagetic."
* Archer has a one-shot character named Noah who appeared in the season premiere two-parter, an anthropology doctorate candidate who has been captured and enslaved by a pirate crew when they hijacked his research vessel, and ends up becoming Archer's interpreter. Both Archer and Riley (the freelance agent Malory hired to find Archer) make fun of him for his degree, with Archer confusing it for Arachnology and Archeology, and Riley pointing out that his only job prospect will be teaching other anthropology students.
* Archer has been poisoned and drugged so many times in his line of work, he can metabolize and shake off toxins with ludicrous speed.
* Archer has even gone on record saying he's not sure he wants Archer to ever wake up. This has caused quite a bit of frustration among fans, many of whom see the dream sequences as pointless filler, or feel that Reed is no longer invested in the actual story and world of Archer and is merely using the show to push other ideas with the established characters.
* Archer has gravity thanks to its central cylinder spinning on its longitudinal axis. The central cylinder is divided up into separate sections that are spinning in opposite directions.
* Archer has Krieger inject a "mind control chip" into Cheryl's brain, so that she can overcome her stage fright and become country singing sensation Cherlene like she wanted all along. At the end of the season, Krieger reveals it was just the sticker off of a Lego spaceman... that he still injected into her brain.
* Archer has one of the worst statistics of all the servants in the Grail War and has no divine blessings or the like. However, he is immortal, and has spent a

* Archer has private(?) spy organizations I.S.I.S. and O.D.I.N. competing for lucrative espionage contracts.
* Archer has Ruth Anne Litzenberger as his stalker when he was a sought-after Lacrosse player. Just before she was about to seduce him, she shoots Archer and jumps out the window.
* Archer has slept with tons of women over the years that he makes James Bond's appetite for sex look tame.
* Archer has the titular character and ISIS save the Pope from an assassination plot by Camorra goons.
* Archer has this exchange, after a failed attempt by Archer to seduce an enemy agent at a gay bar that hosts cock-fighting:
* Archer has this reaction when asked to picture Pam having a threesome with Yakuza members. "Ugh, can the mind vomit?" He later "answers" his own question when Pam tells of how her "change of address" notice for the UPS guy included a picture of her in a whipped cream bikini.
* Archer has this reputation among her colleagues. Deserved, as can be seen in the following quote.
* Archer has, well, just about everyone in the main cast, which includes:
* Archer, head of ISIS, has been having an affair with Nikolai Jakov, head of the KGB, for forty years, going all the way back to their field agent days.
* Archer. He'll quite frequently spend good portions of a firefight attempting to remember an obscure piece of pop-culture trivia, roping in his colleagues who couldn't care less.
* Archer. He's commented that things just work out for him, and he takes his mortality for granted.
* Archer himself also gets tickled in "The Man from Jupiter", by his idol Burt Reynolds -
* Archer himself becomes the victim of this once in a Season 6 episode, when his mother pulls a voicemail hoax on him.
* Archer himself is very bad at keeping secrets, which is very unfortunate considering he's a spy. In fact, he often refers to himself as "The World Greatest Secret Agent" to random people, despite the point of remaining
* Archer humor, so it really helps to see the earlier episodes beforehand.
* Archerina, wife of Prince Gasket, is a very pretty robot girl. She's also manipulative and uses her magic love arrows to turn her opponents on each other.
* Archer: In one episode the ISIS staff start slacking off while Malory is away. Krieger uses some boxes filled with the paperwork they're supposed to be doing to build "Fort Kick-Ass".
* Archer in season 6 — as well as a bit of season 7 — takes up so much time that some major plotlines were almost ignored. This is not at all helped by the fact that, midway through it, they seem to start repeating the same toxic behavior that separated them in the first place: Archer's bouts of immaturity and impulsiveness together with Lana's bouts of jealousy and righteousness.
* Archer: In Season 8, "Dreamland", Lana turns out to be an IRS Treasury Agent working undercover while investigating the economic crimes of mob boss Mother. Much to her dismay, no one who finds out ever seems to be very impressed (or they think that "T-Man" is slang for transexual), and Linette just makes fun of her when she points out the IRS got Al Capone put away.
* Archer: In the episode "Swiss Miss", Ray gets stuck on a ski lift when he's supposed to be protecting the daughter of a wealthy German dignitary.
* Archer in the episode where the crew has to destroy an aneurysm inside the brain of an important scientist. The white blood cells try to consume the ship they are in but Archer kills them with a laser gun.
* Archer is a frequent source of these, though other characters get in on the action too. Also comes up with the frequent answer of "...also, yes".
* Archer is any indication, the quality of the animation has increased noticeably. There's a much greater range of expression and movement coupled with much better lighting.
* Archer is boasting about Lucas Troy and drops the control room mic.

* Archer is, in fact, unable to grasp a number of basic concepts related to his job. He's
* Archer, ISIS gets raided by the FBI. The core team manages to escape jail, but all they have going for them is Cheryl's huge house and a large pile of cocaine.
* Archer is known around the globe as the world's most dangerous spy and he lives up to it. A few opponents have been known to back down after realizing they're dealing with the infamous Duchess.
* Archer is not only one of these, but his magic is fueled by this. His Reality Marble, a representation of "the world he holds in his mind", is a featureless barren landscape riddled with discarded and heavily-used weapons, extending on forever, as giant metal gears endlessly turn in the sky.
* Archer is often shown recording his starlogs in real-time rather than a simple voiceover, more so than the other captains. He also has a tendency to pause his recordings to discuss things with his dog, Porthos.
* Archer is revealed to be a man when Archer (accidentally) rips off his dress after drunkenly hitting on him at a party at the house of a British Lord. Archer throws a serving tray into the bomber's head before he can detonate his suicide vest.
* Archer is sent to Miami to seduce a male Cuban spy, and gets coached how by a gay couple. After he's been at a cockfighting venue:
* Archer is that characters will call Archer and start talking only to realize that it's just one of his elaborate and obnoxious voice mail messages.
* Archer is the holographic girlfriend of scientist and major weeaboo Krieger. There have been at least two and maybe more, but they are indistinguishable from one another.
* Archer is transferred to SIBERIA when cyborg Barry takes over. Jackov defects to ISIS instead.
* Archer it'll be that much easier to win. Cyril does acknowledge that Tontines are illegal, but it doesn't stop him from joining in.
* Archer IV is an odd example, seeing as it's in the 61 Ursae Majoris system.
* Archer, Jakov is partway through his debriefing and about to give a personal message to Archer when the entire room goes up in flames.
* Archer, Katya Kasanova betrays the KGB because she fell in love with Archer during training, while being briefed on enemy agents and seeing his photo.
* Archer: Katya Kazanova is killed by falling out of Archer's balcony and landing on Dr. Krieger's van parked below. Her death brings Archer to tears while Krieger cries over his van getting wrecked.
* Archer keeps a pet ocelot named Babou in a completely empty room in her family mansion. Archer refers to the ocelot's room as "Meowschwitz".
* Archer: Kreiger likes his women like his coffee - black, bitter, preferably fair-trade.
* Archer: Krieger has successfully implanted a mind-control microchip into a rabbit.
* Archer, Krieger's robot duplicates are put through an impromptu Turing Test by Archer, who asks them "what is love". They instantly malfunction and are quickly put down.
* Archer, Lana and Archer must defend a pipeline from an eco-terrorist plotting to blow it up.
* Archer, Lana decides that she wants a child, and thus steals a vial of Archer's sperm and impregnates herself with it.
* Archer Lana dumps Cyril after walking in on him having sex with Framboise from ODIN.
* Archer: Lana's a black woman implied to have some non-black ancestry. And yet in the "Danger Island" season, she becomes a Polynesian princess with no change to her character model.
* Archer, Lana tells Archer that she would lay down some ground rules is he wants to be part of the child's life. While he does improve somewhat, Archer warns that said ground rules will likely be broken in some fashion.
* Archer, Lana tells Mallory that Barry is a douchebag. Then Barry points out that

he's sitting right next to her. He doesn't seem too bothered, though.
* Archer long enough to grunt out the word "Epi-Pen," which is what she actually needed.
* Archer Maggott is a bigoted, psychotic, woman-hating, murdering rapist, and Major Reisman knows it. But given that Maggott is also a trained G.I., and the operation needs all the help it can get, Reisman retains his services. Maggott doesn't mind volunteering for the mission once he realizes it could save him from the hangman.
* Archer. Malory Archer was forced to surrender the former after the FBI arrested everyone as an unsanctioned agency.
* Archer Mayor's Joe Gunther is a Korean War veteran; the novels are always set in
* Archer mocks Ray for winning bronze in Olympic Slalom, saying that he lost, while Ray argues that third in the world is hardly the same as losing. Then, when Archer walks away, he starts crying, admitting it was a huge disappointment.
* Archer: Non-bike example; in one episode, Krieger's van breaks down on the way to bowling night, and Pam is forced to pull the van up a hill while strapped into a harness. Not only are the others not helping, sitting around in the back of the van and drinking beer instead of pushing, Krieger forgot to release the handbrake, making Pam's job a hundred times harder.
* Archer Nothing stops the rampant sexual harassment, gunfire wounds and other inter-office debacles, such as Archer making Pam pee in fear. The fact that nearly everyone at ISIS is an asshole and/or deranged in some way possily balances it somewhat.
* Arc Hero defined by having an interest in Kirito. There's a large group who wish Sinon was the solo protagonist of the GGO arc without having to share the limelight with Kirito.
* Archer of issues stemming from his crappy youth, which is part of the reason for why he's such a womanizing jerkass.
* Archer of sorts, where occasionally the scene will cut to a young Sterling sitting alone on a bench hours after winning the big lacrosse game, showing both his lack of real friends and Malory's total neglect of her own child.
* Archer often utilizes this, often in the form of Archer (or others) screwing up tons of things in rapid succession.
* Archer of the bomb threat is unknown) with the intention of shorting the stock and recouping his retirement fund. Kraus knows how to disarm the bomb and also received the scar while saving a Jewish girl from a gang of skinheads who threw him a "curb party" for his efforts. He is unceremoniously shot by Lammers before he can disable the bomb.
* Archer: One episode involves an English Mastiff named Kazak that fits... unless anyone in his presence is waving around a firearm.
* Archer: One episode revolves around the survivors of Woodhouse's World War 1 battalion dying off, with newspaper clippings talking about foul play being suspected, and since the group created a tontine shortly before the war, which by now is worth about 1 £Million, it seems like one of them is killing the others. Nope, as it turns out, the deaths occurring so close to each other was genuinely just because of old age and accidents, since most of them were pushing 90, and the newspapers were just trying to drum up sales.
* Archer: On his birthday, Archer walks into the office lobby and announces "Paging Dr. Boy! Dr. Birthday Boy!" When he realizes no one is around and a security camera recorded him doing that, he reaches behind the receptionist's desk, takes out the security camera tape and smashes it on the counter.
* Archer, only for the Welshmen to admit it was to bring more drinking water to the region. Archer is still appalled that thousands of people were displaced, only for them to admit only forty-eight people were affected. Archer is still upset that those people were left homeless, only for them to admit that everyone was compensated and in many cases were now living in much, much nicer homes.
* Archer, Pam, Cheryl, Malory, Lana, Cyril, Ray, and probably the rest of ISIS are banned from Canada after the events of "The Limited".
* Archer pilots an escort fighter that can be launched from and docked in the cargo

bay of the Archer Crew's ship, the Seamus.
* Archer P.I. was released with Season 8, where the player works for Archer and solves various cases. Various objects hidden in the episodes can be pointed to with the phone's camera that will reveal items to use in the game. Playing it will also enter the player into a Sweepstakes to win $500. Not technically an ARG, but it does have some of the spirit.
* Archer plays it straighter, with a dose of snark. His response to being asked to battle Berserker so the others can flee? "Just to be clear. It's okay if I kill him, right?"
* Archer Ray Gillette mentions a (straight) friend pretended to be gay and interested in him to avoid the draft. Ray figured out his friend wasn't gay, so Ray alerted his draft board and had him sent to Vietnam.
* Archer received acclaim from both critics and the fans, being considered one of the best seasons of television that year. Season 4, although still considered a good season, received criticism for less interesting, creative plots, and humour that didn't land quite as often.
* Archer revealed that he had been awarded some of the United Kingdom's highest military honors, listing him as "Arthur Henery Woodhouse VC, GBC, DSO, DSC, MC."
* Archer revolve around the team getting their hands on a very large amount of counterfeit money. A major plot point is that while the money is fake, it's not worthless; it's good enough to pass muster to most, and even someone who knew the truth might give twenty cents on the dollar for it.
* Archer revolves around a scientist onboard a deep-sea laboratory threatening to launch two nerve gas missiles at New York unless the world agrees to several serious changes in eco-politics, and ISIS is sent in to take him down. However, it turns out there are no missiles and the scientist has simply gone insane from isolation. However, a brief scuffle leads to the walls of the lab being breached and flooding the whole complex. Since there are only three scuba tanks for four people, Archer agrees to go without, leading to him drowning and being legally dead for a few minutes once they reach safety.
* Archers, but "heroes", adventurers and other important characters will prefer firing by hand.
* Archer's comatose fantasies, he imagines himself as the plucky captain of a space-exploration team. On one journey they manage to uncover a cube of unknown origin and possessing logic-defying properties floating in space. As soon as the crew leaves it, the cube shows signs of changing its chemical properties. When the crew comes back for it, the cube has vanished, not only physically, but eventually also from everyone's memories.
* Archer season 5, Cyril is able to use his tabletop wargaming skills to run an entire country's military.
* Archer Season 6 opener, appropriately enough titled "The Holdout", has Archer encounter Kintaru Sato, a Japanese officer defending an isolated island in the South Pacific decades after the Second World War ended. He only finds out the war has ended by stealing Archer's smartphone and looking up old newsreels which displayed the dropping of the bombs on Japan, although Archer reunites Kintaru with his still-alive family.
* Archer sees the men of the Figgis Agency hired to seduce the wife of a producer, not realizing that the women of the agency have been hired by the wife to seduce the producer.
* Archer's entire backstory is just one big tragedy, having once been the
* Archer's flaw was his idealism which led him to being estranged from other people and finally executed for crimes he did not commit. He might have accepted this but
* Archer's Goon: Quentin, Howard's father, is this; he explicitly states that his role in life is to be a passenger.
* Archer sharply dressed unless Woodhouse is not available to pick his wardrobe. Even his stealth mission gear is stylish.
* Archer. She's a binge-drinking control freak who abuses anyone who gets in her way, but her behavior is so over-the-top and mean that it's hilarious rather than

cruel.
* Archer shot by Archer and promptly buried under an avalanche. Archer, Ray, and Lana decide it'd be a lot easier to just assume that he's dead.
* Archer situation, especially since it can indicate a larger-scale incident such as a structure fire or impending building collapse.
* Archer. Slater describes its miraculous properties in detail before being called on it by Kreiger. Who is then shot with a dart, knocking him out instantly.
* Archer sleeps with every man in ISIS as revenge. When Cyril finds that openly gay Ray is in line, Ray remarks:
* Archer's mom also purposely drives Lana closer to her boyfriend to get her away from Archer, because while Lana and Cyril are the
* Archer's mother, in a drunken fit of jealousy, issues a burn notice on her son after he quits ISIS to work for the agency's nemesis ODIN. To save Archer from being killed by his new coworkers, Lana sends a retraction of the burn notice from a Telex in the ODIN office building. Lana's false flag is compounded, as it implies that the burn notice itself was an ODIN false flag operation designed to discredit ISIS and its best field agent.
* Archer's natural speaking voice, but Carl doesn't do anything to imitate the way they talk ("Hi, I'm that guy, Archer!")
* Archer's opinion of them is based on their ceremonial gear, and didn't bring guns because they won't need them against halberds, which he notes aren't very practical.
* Archer, "Space Race", the crew uses Plasma Pulse Rifles aboard the International Space Station.
* Archer spaces himself in one episode to escape a space station that is moments away from emptying its stores of deadly viruses into the ventilation system. He's beamed onto the ship moments after clearing the airlock and materializes
* Archer's past self) still has flashbacks to the Great Fuyuki Fire, of which he is the sole known survivor. He has a pretty good lid on it most of the time, but anything that reminds him of that disaster can cause him to freak out.
* Archer spirit, when the time comes, he finds it's not all it's cracked up to be.
* Archer's Sterling Archer's dream in season 8, Pam became a man. He almost had a future with a bunch of trafficked Chinese women.
* Archer stem from the fact that they used to date. There's a lot of antagonism between them.
* Archer: Sterling Archer has once a car chase into the streets of a CGI Paris where white buildings extend to the infinite horizon. He also goes aboard a CGI spaceship in another mission.
* Archer, Sterling Archer spent much of his childhood being reared by Woodhouse because his mother was still an active black-ops field agent.
* Archer: Sterling does this several times over the course of the series. Mostly to Cheryl's pet ocelot Babou.
* Archer, Sterling's buddy Lucas Troy used to serve as his wingman back when he still worked for ISIS.
* Archer subverts it because of course Archer isn't embarrassed by "Mulatto Butts", a song about mixed-race buttocks. Not even in front of his mixed-race ex-girlfriend. At least one guard also has the same ringtone and also isn't embarrassed about it.
* Archer's Unlimited Blade Works lets him copy any weapon he has ever seen (except Ea, which he can neither replicate, nor even analyze), most famously swords. The copies are flawed, but they are still powerful, and he can summon a
* Archer talks about a time she got drunk and lost her pants. Rin says, "I don't need to hear about that."
* Archer that his parents were Nazis. This has led other characters to speculate that he's one of the "Boys from Brazil" (see above).
* Archer that is, has the Soviet Union as a recurring villain, despite being ostensibly set in the present day.
* Archer the birth is over. Lana told everyone she used a sperm donor to get pregnant when she actually used a sample Archer had frozen during an earlier bout

with cancer.
* Archer, the characters are inept spies working together in an office. In Season 5, they become inept cocaine smugglers hiding out from the law in a mansion. Season 6 sees them return to their roots as inept CIA subcontractors. After they are permanently blacklisted from espionage, Season 7 has them moving to Los Angeles, where they become inept private detectives. The only thing these seasons all have in common is that the characters, after all this time, are still inept.
* Archer, the first episode of the entire show in which that is the case.
* Archer The "high-budget" part comes in the number of episodes that require completely new parts (whether in the form of new characters or new outfits for existing characters), and the globetrotting aspects of the series require a constant stream of new backgrounds.
* Archer. The other Belcher family members appear, but only Linda has dialogue.
* Archer, the requisitions officer. Played for laughs as strict bureaucrat who cannot be threatened (but can be bribed). Also subverted in the sense that his placement is probably for the best, since the ISIS staff have a penchant of taking weapons for personal use, or for sale on the black market.
* Archer, the Servant of Rin Tohsaka, only comes to prominence in the second of three routes in the game, but he has more fans then the main character.
* Archer, the terrorist that ISIS is escorting back to Canada tries to break free with the help of friends dressed as Mounties.
* Archer: The title character was a fairly normal kid, but his mother wasn't around at all until he was 5, and messed him up even worse after she returned.
* Archer: The titular character, as his mother is the head of ISIS, but the entire cast under her supervision could count, with countless cases of insubordination, incompetence, using company equipment for personal use, drug use on the job, and unprofessional sexual behavior, yet no one has been fired. It also helps that Archer is actually a highly effective field agent, if primarily in matters involving violence and assassination.
* Archer the world's most dangerous spy. Archer boasts unparalleled skills in almost every field needed to be a secret agent, incredible and in-depth knowledge about a wide variety of topics (some quite obscure), and some outright savant-like genius abilities. He's even able to count the number of shots being fired from multiple guns being used simultaneously in a fire-fight and keep track of exactly how many bullets each shooter has left. Unfortunately he's also a selfish hedonist who's concern isn't whatever mission he's supposed to be handling but rather his own comfort and (short-sighted) entertainment. His main motivation for being a secret agent seems to mostly be so he can travel the world getting drunk and bedding women.
* Archer. This is obviously just a flimsy excuse for her flagrant bigotry, however, as Mallory has no trouble associating with people from other neutral countries or even former Axis countries.
* Archer to Sterling's earlier line ("Oh, is that what you want? Because that's how you get ants!")
* Archer tries to get his ex back by manipulating recordings of her current boyfriend in order to make it look like he's cheating on her. She doesn't believe him, but still appreciates the effort.
* Archer trope so far as to qualify for this, with Malory Archer and Algernop Krieger being the most extreme examples.
* Archer. Ultra-rare female example, although, unlike most male counterparts, she is equal opportunity.
* Archer: Unsurprisingly for a show set in a spy agency, most of the show follows this format. A good chunk of episodes have the format of "ISIS is hired for a mission, and either succeed by the skin of their teeth or bungle it completely" Season 5 and 8 avert this, having more long-form storytelling, and while Season 7 has a story arc running throughout, still mostly follows this.
* Archer uses a cold open in every episode, although it usually does involve the episode's plot.
* Archer uses this gag relentlessly on his voicemail message, usually causing his

mother to hold lengthy conversations with it. Inverted on the rare occasion when Archer actually answers his phone but his mother thinks it's another elaborate recording.
* Archer version of himself: The Bastard Chef Lance Cousteau. Reportedly, he was a fan of the show and enjoyed himself immensely.
* Archer: Very nearly in "Deadly Prep". When Richard 'Ivy' Stratton IV and another bully gave Archer a "swirly" back in prep school, they broke his nose and not only almost drowned him but also gave him pneumonia for a whole semester.
* Archer VS: Online comedic critic of epiodes of nimated TV shows, movies, and more.
* Archer walked this line. He grew up as an idealistic busybody, believing that he could be a 'champion of justice' and turn the world into a better place. In the end, he realized that for everyone he saved, someone else must die. He lost faith in his own ideals, and from then on, he simply killed whoever posed a threat to the rest of humanity, saving millions by killing thousands - "for the greater good".
* Archer, we find out that Pam has a thing for this trope, including keeping a "bug-out bag" on-hand with vital supplies.
* Archer: When Archer is training Cyril to be a spy early in season one, he stresses that to us the term "call girl" and NOT "hooker". Unless they're dead (which happens with surprising regularity to Archer), then they're hookers.
* Archer when Krieger gives the entire ISIS staff each a package containing part of a murder victim. He tells them specific dumpsters, to form a smiley face. Averted, however, as they just dump it wherever they feel like.
* Archer: When the title character knocks out a colleague in order to take his place on a mission, he advises, "Try not to stay unconscious too long. It's like, super bad for you." Others later comment on how he could have serious head injuries and he agrees about that and already has a medical appointment to make sure there's no permanent damage.
* Archer, where the main cast's fuckups will often lead to background characters dying in hilarious ways.
* Archer who almost always has a glass of liquor in her hand, she is prone to crushing them whenever somebody, usually Sterling, angers her.
* Archer, will mount a lot of long range weapons like LRMs, but have little armor or weapons for close-and-dirty combat.
* Archer, with the agents occasionally trying and failing to come up with a Bond One Liner when the time comes. However, one-off character Conway Stern has a knack for them, much to the others' annoyance.
* Archer, with this series set as a space adventure, and the term "space-phrasing" coming up several times.
* Archer woke up, ending the three season-long line of dream sequences.
* Archery fell out of military use because bows' battlefield function (indirect fire) is accomplished better by cannon. What was supplanted by firearms was the crossbow. Archery was never mainstream in most of Europe. An exception is horse archers, which did see bows replaced by firearms on the steppes.
* Archery fell out of military use due to the long training time needed. However, hunters commonly abandon guns in favor of bows, for both sentimental and practical reasons (bows/arrows are quieter and lighter than guns and make cleaner kills). This is often an
* Archetypal color: Darker shades of yellow, all shades of red or orange (the colors of a Volcano).
* Archetypal color: Gold, brighter shades of yellow, all shades of pink or aqua (the colors of the Sky).
* Archetypal color: Navy blue, dark purple, olive or darker shades of green, all shades of brown or black (the colors of a cave or cavern).
* Archetypal color: Teal, green, white, gray, all shades of blue or black (the colors of the ocean).
* Archetypal: Lincoln makes it clear that the last thing he wants right now is a harem, no matter what his Archetype (which is literally called "Harem King") says otherwise. Unfortunately, the universe seems to have a different idea...

* archetypal Vanishing Hitchhiker tale, which tells of a couple driving along when they pick up a girl who is hitchhiking. She asks them to take her home and gives them the address. On the way there they cross a bridge. Upon arriving at the house, they look in the backseat only to see that she has vanished. They go to the house and tell the people there what happened. The couple who live in the house explain that their daughter died a few years ago and many drivers have picked up her ghost asking to be taken home, but the ghost always vanishes trying to cross the bridge over the water.
* Archfiend Emperor, the First Lord of Horror is gigantic too, making the Archfiend Soldier and Archfiend General at its feet look minute by comparison.
* Archibald Cunningham toying with Rob Roy, dancing around him and bleeding him slowly until he's collapsing from fatigue.
* Archibald Peck, October 7, 2011, Leonard F. Chikarason said, "I don't want to cover Archibald Peck's psychiatrist bills. There's a lot going on there."
* Archibald Peck/R.D. Evans/Robert Evans. Debuted in 2001, arrived in CHIKARA in 2011 and Ring of Honor in 2012, worked as a producer for WWE.
* Archie (1966-7) had this as Betty/Superteen's origin story, as she tried to rescue an unconscious Archie from falling off a cliff.
* Archie #2 (June, 1970), Sabrina's keyboard playing left a lot to be desired. But the gang needed a keyboardist, so when it came down to performing at a concert, Sabrina uses her witchcraft to play like a champion. Reggie then discovers the keyboard was unplugged and wonders how Sabrina played it. She handwaves it as ultimate talent.
* Archie also once went through this problem in a story where he worked at a pizza place a few minutes away from Reggie's house. Reggie pulls off several traps to prevent Archie from making it through his front yard, but Archie accidentally tosses the pizza, it lands in Reggie's face at the last second.
* Archie and Deco are implied to be teenagers as well (one of the cops asks Deco if he wants them to call his mother, implying they at least think he's underage). Adam Douglas was eighteen, Thomas Fitzgerald was twenty-two.
* Archie Andrews is forced into a fight ring by the corrupt warden of his juvenile detention center in season 3 of
* Archie Andrews' jalopy has evolved over time as the series became a
* Archie, Betty was intended to be this, but usually on a day to day basis Veronica is his girlfriend and Betty just wants to be; the days when Betty was Archie's sole love interest and Veronica hadn't yet come to town are unknown to modern readerships.
* Archie Bunker said the answer was "Xavier Cugat". When Mike told him that "Xavier" begins with an "X," Archie insisted that "No human being begins their name with an 'X'!" and that Xavier was spelled "E-G-Z-A-V-E-R."
* Archie Bunker's Place, a woman robs Murray at gunpoint in his hotel room and ties him to the bed just to keep him out of the way. When Archie barges in, she hides the gun, pretends that the situation is exactly what it looks like, and leaves with her loot; Murray plays along until he's sure she's gone.
* Archie Bunker's Place, but died of a stroke in between the first and second seasons.
* Archie Bunker's Place ended, the writers struggled to explain Edith Bunker's constant absence in the spinoff. Eventually they wrote an episode entitled "Archie Alone" that explains that Edith had died of a stroke, and Archie was actively in denial and trying to keep news of her death from reaching his friends. This was for drama, as Jean Stapleton merely wanted to pursue other options instead of returning to occasionally guest star as her sitcom character.
* Archie Bunker tries to cook up a whiplash suit in "Oh My Aching Back", a first-season episode of
* Archie comic, Archie and Betty watch a sad movie. Archie says that he wishes Betty wouldn't cry, but not for the reasons she imagines:
* Archie comic: Betty tries to tell Archie — over traffic noise —how much money she's saved up and ends up accidentally getting the winning bid on a stuffed moose's head. Considering how often staple comedy devices are used in

Archie Comics, this is probably not the only example in existence.
* Archie comic book back in the 70s, where the school participating in a citywide athletic marathon, and Riverdale High's star athlete Reggie is felled by a sprained ankle. Archie has to take his place and in every event, he eats the other participants' dust coming in second and third. But Dilton Doiley has been crunching the numbers, noting that on total points alone, Archie has put Riverdale High in the lead and he winds up winning the marathon.
* Archie comic from the early '70s starts with Reggie yanking away a pennant from Jughead and saying "Take your hands off!" Jughead replies "I can't, they're attached to my arms!" and proceeds to drive Reggie crazy with his incessant recital of "Dem Bones." Later Jughead realizes he may have gone too far and seeks to apologize. He finds Reggie half way around the bend and tells him "I didn't want to upset you." This drives Reggie even crazier as he didn't accept it as a valid apology.
* Archie Comic involved Reggie lying about knowing a supermodel to screw Archie out of a date with Veronica for himself. He offered to set Archie up, but the model reveals she didn't know any Reggie. Archie soon finds out that she is dateless at the moment, and when asked, she reveals everyone always assumes she's already hooked up.
* Archie comic, in which Archie is dating Veronica, has Archie wondering about getting a tattoo or something for Veronica, then dozing off at the beach under a blanket with two small tears in it. On waking up, he discovers that he's one-upped the other beachgoers by getting 'branded' with a 'V'. On his forehead, no less.
* Archie comic, Jughead claims Veronica "made a big issue out of nothing" when Archie was late; then he yells at the pizza guy for being late.
* Archie comic, Jughead loses his hat and is none too concerned, telling Archie not to worry about it and going home. Archie, believing it to be an irreplaceable staple of Jughead's personality, goes to great lengths to retrieve it. When he returns it to Jughead at home, Jughead thanks him, but shows him that he has a cupboard full of them since they tend to get lost or damaged over the years.
* Archie Comics (2015), both girls hold hands after their plan to save Pops' business has come together.
* Archie Comics (2015) fell for Veronica at first glance. He even states that in his fourth-wall breaking monologue.
* Archie Comics (2015) guy", which offends Jughead as an aromantic asexual. He apologizes afterwards.
* Archie Comics (2015), he drives a 1980s-style hatchback which only Betty can keep in working order (meaning he always has to be on good terms with her if he wants to drive somewhere).
* Archie Comics (2015): In a secret-agent-themed Imagine Spot in issue 3 of Jughead, Jughead shoots at Reggie, who turns out to be a robot.
* Archie Comics (2015), Jughead goes to Kevin Keller for help planning a party. Kevin asks if it's because he's gay; Jughead responds that it's because the last party he threw had individualized gift bags.
* Archie Comics (2015)'s to get readers to hashtag what they thought Reggie did to earn a criminal record.
* Archie Comics: A comic had Betty out of sorts emotionally because her dad's business was going under. Archie lets her cry into his chest, which Veronica mistakes as him cheating on her. Archie flat out says "OH, SHUT UP, VERONICA!" which offends her greatly and impresses Reggie.
* Archie Comics, a competitor for Archie's affections. Betty often takes time for caring about others especially nurturing Archie. In an episode, she had to excuse herself as she was tutoring elementary students at the local library. Veronica discovers this as spies on her thinking Archie was cheating on her.
* Archie Comics, a flower putting off purple "bad vibe lines" caused nearby people to start acting meanly and selfishly. It, naturally, got passed around town for a while during the course of the story, making as many people as possible get into shouting matches. Probably not the only time such a story happened in that series.
* Archie Comics: After ignoring a warning from his mom that it looks like rain and

he might catch a cold if he goes out, Archie and Jughead both get soaked and head for Veronica's place. After going through a sauna and doing laps of a pool to try and avoid getting sick ("No germ would be stupid enough to stick around for that punishment") Archie gets home and... sneezes. "Banging your head against a wall is not an accepted cold medicine!"
* Archie Comics also came after a punk band called Jughead's Revenge, who were sent a letter from the company about their name (not just because of supposed copyright infringement, but because the higher-ups thought their music was inappropriate for the young people who read the comics featuring Jughead, the letter can be found here
* Archie Comics also has another character named Jinx, but she is just a normal (if mischievous) little girl.
* Archie Comics, and continued to 1971. It was again briefly revived in 1977, but that was the end of it and the character.
* Archie Comics and her skills are mostly social instead of practical, but she contributes by being the only one with unlimited wealth and resources.
* Archie Comics and Marvel was more than willing to soak up the free publicity.
* Archie Comics Archie after he breaks one too many dates with her. The story's title is "Woman Scorned".
* Archie Comics, Archie and Mr. Weatherbee switch bodies. Until they switch back, any speech bubble that comes out of Archie's mouth has a picture of Mr. Weatherbee inside, and any speech bubble that comes out of The Bee's mouth has a picture of Arch. The same motif applies to thought balloons.
* Archie Comics, Archie has been known to do this to Betty, e.g., asking her to do his homework while he takes Veronica to the dance. And Veronica sometimes does this to Archie.
* Archie Comics, Archie once requested for Jughead to use the latter's old stopwatch to record his time, to rehearse for the track-and-field tryouts later. During Archie's practice, Jughead tells Archie that he actually broke the world record for his sprint. Archie gets a huge confidence boost that he actually wins the tryout race. However, a skeptical Coach Kleats (he lost his own stopwatch, and Jughead volunteered to time the events in his stead; Kleats wonders why all the runners in the tryouts have excellent times) asked to have a closer inspection of Jughead's watch, and figures out that Jughead's watch is actually running slow. So Archie, never mind that he made the team, realizes he's been fooled, and decides to take out all his anger on Jughead.
* Archie Comics art-style but he also drew fanart of the characters. Quite a sum of it was NSFW art about Betty and Veronica.
* Archie Comics asking these sorts of questions. It was titled, "D-uh! Really Dumb Questions!" It even featured the classic "What's the number for 911?" line.
* Archie Comics (based on a line of toys) was about a trio of dying astronauts who are found by an alien. The alien saves their lives by turning them into super-powered cyborgs. Lasertech loves the change, Solartech accepts it as necessary, and Aquatech hates it.
* Archie Comics based on their labels; a door leading to 'Tennis Court' featured a player being sentenced a $500 fee for a double-fault by the judge, and a 'Roller Derby' had people racing derby hats on wheels.
* Archie Comics become Archie's witch doctor. Next scene has Jughead dressed as one.
* Archie Comics: Betty grows her hair out her short hair into her iconic ponytail in order to get Archie's attention after she saw him with a girl with a ponytail.
* Archie Comics bit in which Veronica went with a rich guy to his estate only to find out that she was the last item on the scavenger hunt list, the thing no one else had managed to get: a "townie." Archie and the gang got back at them for that one.
* Archie Comics both the cyborg good guys and the robot bad guys have modular parts. The comic was based on a toy line that had this characteristic.
* Archie Comics, both Veronica and Cheryl Blossom have been criticized many times by other characters for dressing too provocatively, being too flirtatious or

'easy', and going out with too many boys. Usually, the story will cast the girls in a bad light for this (worse than for male casanovas like Archie) and often punish them at the end.
* Archie Comics came along. They've all had countless one-time love interests. Chuck and Nancy have enough sense to keep out of this mess.
* Archie Comics changed the character's look near-completely, from her appearance (the better-treated hair and less pronounced buck teeth being the most striking changes) to her wardrobe, which became more fashionable.
* Archie Comics character (but gay) has gotten him popular enough to score his own series.
* Archie Comics character, Moose is rarely seen without a numbered jersey and track pants.
* Archie Comics Charley goes on a strict diet, supervised by his friend Greg, but each weigh-in reveals he hasn't lost any weight. Charley invites Greg to spend an entire day watching him, to prove that he isn't cheating. Greg observes that Charley is indeed following the diet religiously. However, that night, staying over at his friend's, he awakes to find Charley raiding the fridge and eating in his sleep.
* Archie Comics comic, Archie and Reggie were movie stars — Archie was a stuntman, but had to cover up the fact Reggie didn't do his own stunts.
* Archie Comics comic — Reggie has taken up prop comedy but can't get as much as a smile from Jughead. He determinedly ups the game as his pride is at stake. When he falls hard on his butt Jughead smirks, and Reggie knows what he has to do - he kicks Big Moose in the butt and waits for the fireworks. At the end, he's toothless but happy as Jughead rolls in convulsive laughter.
* Archie Comics comic, Professor Flutesnoot invents a hair tonic which apparently does a great job growing one's hair back. Though he stresses that he's still testing it, Mr. Weatherbee insists on secretly using it on himself. By the end of the comic, it's revealed that the tonic makes one grow a freakish amount of hair, with pouring water on it being the only way to stop the process.
* Archie Comics continuity, which uses a different art style and is more "modern" than the traditional series.
* Archie Comics could count. Betty Cooper got this once. Her nice girl/girl next door personality kept her exhausted with volunteer work and kinda turned her into a doormat.
* Archie Comics does this to a huge degree, which makes sense given its seventy-year run with multiple comics. And all the Digests that come out monthly, featuring anthologies of older stories. Running gags & themes abound, often creating the exact same stories and situations. Among the more notable examples, however, comes from the modern "New Look" stories—titles, concepts, character names and slices of dialogue are completely taken from the "Archie Novels" series from the early 90s. Betty & Ronnie's fight over "Nick St. Claire", Archie moving away, Moose & Midge's breakup, etc., are all direct copies of prior work.
* Archie Comics easily, but couldn't get the same feeling when handling a normal baseball.
* Archie Comics episode, "A Symbol Problem", Veronica goes to Norway. But everywhere she turns (and whatever she does), she always meets up with a guard who points to a sign which prohibits something she has done. Fed up with everything, she finally decides to show everyone what the place is really like, and changes the sign to say, "Welcome to NO WAY".
* Archie Comics, especially since she had blue eyes when normally they're a cartoony black, however it isn't referenced after that issue.
* Archie Comics even compared to Veronica. They created Ginger Lopez and replaced Cheryl with her. Eventually they stopped this practice but made Ginger into an individual character. This involved smoothing out her design a little bit, so her earliest appearances have a more angular look similar to Cheryl.
* Archie Comics fault if they just happened to remember what they saw. When they return to class, Ms. Grundy is obligated to tell the class that the answer key has vanished, so she'll have to try to recall the quiz format as best she can. As she

muses aloud that she thinks the original quiz had "13 true/false questions and three essays", Reggie and Veronica promptly forget themselves and blurt out that it was "11 multiple choice questions and two essays." They're rewarded for their helpfulness by being forced to take the quiz while the rest of their classmates get a bye.
* Archie Comics features a teenage version with nearly every character just casually dating. The girls get mad when Archie dates another, but it's commonly accepted that Archie, Reggie, Betty and Veronica all date whomever they want.
* Archie Comics features the writers trying to come up with new ideas. They end up being much nicer to Betty than Veronica, causing the latter to emerge from the panel and threaten them with a beating if they don't restore the status quo.
* Archie Comics format where Betty has a really big and sometimes obsessive crush on Archie.
* Archie comics. For the longest time, Metal Sonic was just one of many Mook bots getting sent out to annoy Sonic, the longest-lasting version being Metal Sonic v3.3, who lasted two dimensional hops and battled Shadow, Blaze and Marine to a standstill. All the other times, he barely lasted an issue. This got changed during the reboot, at least partially because Sega themselves stepped in and told Archie to cut it out.
* Archie Comics franchise who isn't Ethel or Miss Grundy has a tendency towards this.
* Archie Comics) from the others. He had black eyes in his first appearance but was redesigned later.
* Archie Comics "Gag Bag" strip, Archie's dad, Fred, is whittling down a piece of mahogany wood to make a table, but keeps screwing up and settles for something smaller. At the end:
* Archie Comics gag strip showed a bad mood being passed down when Mr. Weatherbee gets chewed out by the school superintendent. Mr. Weatherbee chews out Miss Grundy, Miss Grundy chews out Jughead, Jughead chews out his younger cousin Souphead, and Souphead chews out a stray dog. The punchline is that the dog encounters the superintendent (who greets it in a friendly manner) and chases him down the street, biting the seat of his pants.
* Archie Comics gang throwing Homer out of a van and warning him to "stay out of Riverdale". He is later seen reading an Archie comic and muttering under his breath about "stuck-up Riverdale punks".
* Archie Comics goes missing. The result is the Jones family lawn being dug up. (Well, now they can put in a new swimming pool where the crater is) But of the dozens of bones found, not one is the fossil. Turns out Svenson put it away somewhere so it won't get lost, and what Hot Dog had was a soup bone from Ms. Beezly, the lunch lady.
* Archie Comics grafted onto his body after terrorists nearly killed him in an ambush. He served as the Army's top superhuman operative.
* Archie Comics had Archie's friends and students from Pembroke trying to sway a new muscular adonis to join their school and football team, while Chuck repeatedly insists they let Pembroke keep him. It's only after he ultimately joins Pembroke that it's revealed he completely falls apart at even the slightest injury, and Chuck could just tell from years of dealing with such types in sports.
* Archie Comics had Veronica's young cousin praying to God to make Montreal the capital of Canada. When Veronica asks why he asked for that, he replies because that was what he had answered on his geography test.
* Archie Comics has an inconsistent design however he's always large and always friendly. Unless you try to steal his food.
* Archie Comics has Archie responding to Betty that "I had to beat off three guys to get to you!"
* Archie Comics has been known to bring a great deal of her extensive wardrobe along with her when traveling, regardless of the destination.
* Archie Comics has done it: Jughead once had a job as a flower delivery man and had to dress up in a yellow shirt, cape, and metal helmet with wings (like Hermes in the logo for FTD, a real flower delivery service). His friends were amused; he

was not.
* Archie Comics has quite a few examples. It eventually reached the point where Archie and Jughead invented a special umbrella, resembling two standard models attached to the same handle, in case a normal umbrella would prove too small to keep both partners dry.
* Archie comics have used this plot in many a Christmas themed storyline.
* Archie Comics. He is second only to Dilton in intelligence. Sometimes he is not even lazy, as he wins awards for his great marks. Several stories have played with the idea that his intelligence is fueled by all of the food he eats.
* Archie Comics he is sleeping with Kevin behind his girlfriend's back and hiding his bisexuality due to being an athlete.
* Archie Comics in American Popular Culture, for the over 70 years old romantic entanglement between Betty Cooper and Veronica Lodge for the titular Archie Andrews.
* Archie Comics in his den, telling a cop, "So I've got five cats. What of it?"
* Archie Comics. In one oneshot, a bear steals a picnic basket from the girls. It takes a bite, spits it out, and brings the basket back while pinching its nose, causing Veronica to cry, "Worse news, girls- the bear's bringing it back!"
* Archie Comics: In one story, Betty and Veronica put a lot of pressure on Archie to say "I love you" more. Jughead rightfully deduces that they're trying to get him to admit which one he prefers, and offers a solution. The next, Archie tells Veronica he loves her. And Betty, too. And Jughead, and Reggie, and Riverdale High, and standing around talking with all of his wonderful friends, and Pop Tate, and the ice cream he serves, and the football coach... Betty and Veronica storm off in a rage, saying Archie "makes love about as special as the common cold". Archie and Jughead yuk it up from around the corner, Jughead warning "the next time you tell them 'I love you', they're gonna deck you!"
* Archie Comics: In one story, Jughead finds such a buffet with the rule that the price only covers what he can fit on his plate. Jug proceeds to make a massive tower of edibles that soon gets him kicked out of the restaurant.
* Archie Comics in order to take down untouchable criminals like the mayor's brother.
* Archie Comics in the face just so that he'd stop freaking out over every little thing Jughead did being a potential set-up for a revenge prank.
* Archie Comics is a gateway series into comics due to its availability (it can be bought in supermarkets and stores, unlike most American comics) and its mostly kid-friendly nature.
* Archie Comics is a serial practical joker; most of the time he has a rule that his pranks are harmless.
* Archie Comics is the first girl who appears, and the one who Archie ultimately chooses.
* Archie Comics is usually treated in-story (more commonly early on) as more attractive than Betty, despite being famously the same face & body with new hair. It's excusable when one considers that Ronnie dresses much better, often showing more skin, and Betty can compete on an even keel whenever she dresses in skimpy gowns/bikinis. One story even makes fun of this, when Archie thinks he's talking to Veronica, only to find out that it's Betty trying out a black wig.
* Archie Comics is written this way. He used to say "Duh—" before every line.
* Archie Comics, its unusual setting (a thriller in a mid-century-style small town with a grunge-ish/1990s alt-rock soundtrack) becoming quite successful.
* Archie Comics, Jughead ended up in the middle of the Civil War and was immediately accused of being a spy for the South until Lincoln himself pardoned him.
* Archie Comics, Jughead gets some money from his bank account, but then belatedly realises that the ATM was glitching out and giving him too much money. He fears that the money is someone else's.
* Archie Comics Jughead. His idea of "help yourself to a piece" is to cut one slice of pie and chow down on the rest. In another example he conned Archie into having a square pizza; Jughead sliced a small perfect square in the center, and took the

rest of the share.
* Archie Comics: Jughead Jones actively shuns romance, because he's simply more interested in food than love. He remains good friends with Betty, and he and Veronica can usually tolerate one another. Ironically, there has been more than one female who has persistently hounded him due to some infatuation with his aloof, nonchalant nature towards the fairer sex.
* Archie Comics: "Jughead" Jones would prefer that you just call him "Jughead" and not "Forsythe". One issue has him do this by-proxy with his sister "Jellybean", real name "Forsythia", though it's mostly because uttering her real name has an uncanny habit of unleashing terribly bad luck on him.
* Archie Comics kicks in when Archie is angrily recounting the episode to Betty, and when Reggie overhears Archie shouting "catch!", fearing revenge, ends up diving into a mud puddle, taking Veronica with him.
* Archie Comics "knowledge ray" that taught him about robotics, so he wants to wipe out mankind and replace it with robots.
* Archie Comics later, Archie and Reggie are moping around, depressed, when Betty and Veronica ask to be shown how to "shoot baskets with this horse hide" (a football). Reggie and Archie walk off with the girls in hand, going "When will you learn football is a man's game?!" The girls wink at each other.
* Archie Comics later, Veronica storms off, leaving Archie on the sidewalk enjoying another dream.
* Archie Comics, leaving Betty, Veronica and the rest of the girls stuck naked in the ocean.
* Archie Comics love triangle. Both girls date Archie at different times and adding sexual aspects to it would both complicate the triangle and create even heavier fidelity issues.
* Archie Comics mini series had Cheryl as a pizza girl for the love-struck Archie (With a ticked-off Veronica in the background to boot);
* Archie Comics modernizes the series in a way even the newer 'classic universe' comics don't.
* Archie Comics: Moose Mason is a gold mine for these gags. Here are a few:
* Archie Comics: Moose, the typical strong guy with limited intelligence, will confuse words that are unknown to him with words of a completely different meaning.
* Archie Comics, Mr. Lodge does this routinely to Archie and less often to Jughead.
* Archie Comics never, ever, changes — and the cover doesn't even try kidding readers about this anymore:
* Archie Comics, of all things. Veronica attempts to trick Betty by telling her that the most formal dance of the school year has been changed to a country-style hoedown and that she should dress accordingly. Betty believes her, but also passes the information on to her friends without mentioning the source, and since they regard Betty as trustworthy they decide it must be true. The news spreads to other students, the hired band, and the decorating committee, all of who change their plans and outfits accordingly — so, on the night of the dance, it's the fancily dressed Veronica who ends up looking out place.
* Archie Comics of obsessed with Archie (even when he only dated Veronica).
* Archie Comics: Often, Archie towards Veronica, and similarly Betty towards Archie.
* Archie Comics often shows Archie pulling these off for Veronica, who is hard to please. Some examples: Making a giant Valentine card for her, building a heart out of snow and spelling "Archie Loves Veronica" in coal, buying her jewelry he can't afford...
* Archie Comics once. Archie's dad stays up to watch a movie called "Burglar of Barcelona" and is then called to answer a trivia question on who the burglar of Barcelona is, Kate or Harold. Since Archie's dad fell asleep during the movie and missed the conclusion, he can't answer and it turns out...the Butler did it.
* Archie Comics: One comic shows several veterans chasing a thief — but they no longer have their youthful stamina. The thief even says "This is where I lose the geezer brigade".
* Archie Comics only for the beautiful girls drawn by Dan DeCarlo, especially Betty

and Veronica. There is a reason why they appear so often in bikinis and other skimpy outfits...
* Archie Comics playing around anymore, and Archie finally choosing between Betty and Veronica.
* Archie Comics popularized this trope. It's surprising that reading their digests today, you can still see this being used.
* Archie Comics series and the popularity of gay character Kevin Keller, it's been interesting to see the company find success by taking new creative risks.
* Archie Comics series, the Turtles' world tour arc is kicked off with some breathtaking artwork of the cliffs of Tibet.
* Archie Comics she is basically her boyfriend's mechanic, and Archie is clueless about that sort of stuff.
* Archie Comics' short-lived comic based on the MANTECH toy franchise was based around this trope, with heroic cyborgs fighting evil robots. The three dying heroes were made into cyborgs to save their lives, their whole bodies being replaced with boxy robotic bits, gaining superpowers in the process. Aquatech hates what has happened to him, Solartech accepts it as a necessity, and Lasertech loves it.
* Archie Comics shortly after its preview issue was released and is all but confirmed to have been cancelled.
* Archie Comics. Similarly, there's an issue of Betty's Diary where she learns he regularly visits an elderly lady in a nursing home because she used to babysit him and is so sweet to her most of the residents and staff assume he's her grandson. Naturally Reggie gets Betty to swear never to tell as it would ruin his reputation.
* Archie Comics, so Jughead has to eat it instead. When it's shown on TV, Jughead is shown to not be happy about it.
* Archie Comics sometimes grouped Archie, Chuck and Betty this way in the 1970s.
* Archie Comics sometimes makes comics that clash their PG, family-friendly image with adult-aimed series:
* Archie Comics sometimes spawns a beach or a mountain, and occasionally gives a hint of where it could be located, just to be able to contradict it later. Its size also seems to fluctuate. Depending on the story, Riverdale's a hick town in the middle of nowhere, or is big enough to support an airport and an international stock exchange.
* Archie Comics story, a baby food company discontinues its Pizza flavored brand, which is too bad because little Jellybean Jones loves the stuff. Jughead tries to make his own kind by sticking whole pizza slices into the blender and setting it to 'puree'. After several false starts he calls the company and ask for their recipe. It turns out that the secret ingredient is anchovies, which is why it was discontinued- aside from Jellybean, nobody else liked it.
* Archie Comics story, a chemistry lab explosion knocks Mr. Weatherbee out. When he comes to, the first thing he sees is Betty and Veronica in angel costumes for a school play and he assumes he's gone to Heaven. Then he sees Archie in a devil costume and flees in horror.
* Archie Comics story, "A Date With Fate", Archie and Betty were supposed to go out on a date, but mutually agreed to cancel it because "absence makes the heart grow fonder". They both separately decide to spend their time in the mall and ran into each other on three separate occasions. Finally, they decide to put their cancelled date back on.
* Archie Comics story, a new physics teacher and Riverdale High does this trick to demonstrate the "Objects at rest stay at rest" rule. Lunchlady Miss Beazley, who set up the table, thought the new teacher was about to ruin her work and fainted dead away.
* Archie Comics story, Archie and Reggie are judging a boxing match, proud that they're too civilized to do anything so vulgar as box. They start arguing, and the last panel is the two boxers watching Archie and Reggie beating the crap out of each other.
* Archie Comics story, Betty's team has a rule that whoever turns up to the game late has to be the mascot as punishment.
* Archie Comics story featured Reggie showing an excessive, obsessive, amount of

concern for his car. As Archie states, "Reggie doesn't own his car- his car owns him!" Reggie gets his comeuppance when he forgets to roll up the windows before a big rainstorm, soaking the interior.
* Archie Comics story had Jughead timing Archie for the latter's partaking in a track meet, where he is astonished to learn that he just broke the record for being the fastest there is. Come the day of the track meet, after Archie wins the race, Coach Kleats then reveals to Archie that Jughead's stopwatch is actually a lot slower than Archie, which angers Archie so much that he starts chasing Jughead at the end of the story.
* Archie Comics story has Archie and Jughead house-sitting for Mr. Lodge. Although the mansion has a sophisticated security system, the boys decide to play it safe and add some extra anti-burglar defenses, involving the usual buckets of water, tin cans, flypaper, etc. Of course, Mr. Lodge comes home and walks into all the booby traps.
* Archie Comics story has Archie sending a Central City youth on a Snipe Hunt for a film supposedly showing the Riverside star player, Moose Mason, meeting with an underworld figure. The idea being to discredit Moose and have him thrown off the football (USA Gridiron) team so Central City has a better chance of winning against Riverside. When the youth finally shows the film to the Riverside coach (having not viewed it himself previously), it shows Moose delivering a lunch box to his father... who is a sewer engineer.
* Archie Comics story has Betty take a nap in a pickup truck after a day of chores. When she wakes up, she finds herself at the mall, still in her ragged work clothes. She feels embarrassed at her friends seeing her in this condition, but then she decides that she's probably dreaming. She proceeds to make herself look even more unsightly, and become a nuisance until security kicks her out. Betty then finds herself walking home and notices the truck absent from her family's driveway upon her return. She decides to pinch herself to see if she's really dreaming, but finds out otherwise.
* Archie Comics story has the gang try, for the sake of variety, to have lunch some place other than Pops'. In each place they, try they end up getting booted out due to their personal flaws and character quirks, until the only eatery left is Pops'.
* Archie Comics story has the guys turning the entire town of Riverdale into a huge Golf Course, setting various landmarks as their holes.
* Archie Comics story in the 1970s had Reggie, Riverdale High's ace athlete, suffering a sprained ankle just before a decathlon competition against Central High. Archie is recruited to replace Reggie with the result of Archie coming in second and third, time after time, event after event. But this competition is judged on the points system. Dilton Doiley points out that Archie's constant second and third place finishes add up which gives Riverdale High the victory. Reggie—on crutches—is livid as Archie is hoisted on the shoulders of the school faculty in victory.
* Archie comics story involves a new kid in town coming out of nowhere to become the star player on Riverdale's baseball team, playing shortstop. His leg is then badly injured when a player on a rival team spikes him, but he reinvents himself as an ace pitcher and leads Riverdale to the championship. It would be a great story if it wasn't utter bullcrap. As anyone who's ever pitched at any level could tell you, it is impossible to pitch on an injured leg, at least with any degree of competency. Pitching is not simply about throwing a ball; pitchers generate power from their legs and put a great deal of stress and weight on them when pitching. If you try to pitch on a bad leg, not only will you have difficulty controlling your pitches, it's a good bet you'll injure your arm also.
* Archie Comics story, Jughead beats Reggie at bowling by tricking him into actually focusing on the mechanics of play (e.g. how many steps he takes during windup, the ergonomics of the bowling ball) instead of just playing.
* Archie Comics story, Mr. Weatherbee asked Archie to deliver a message to a teacher. Archie delegated the duty to another student, who did likewise, until the chain went to Big Moose... who forgot to do it. Angry at what happened, Weatherbee demanded that Archie deliver another message to another teacher... who's in Africa.

The story ends with Archie writing to Weatherbee in the jungle, saying that he should catch up to the teacher's safari in another week or so...
* Archie Comics story (only two pages), Jughead boards a passenger train. The conductor yells at Jug to move his suitcase out of the aisle but refuses. After another passenger trips on the suitcase, Jughead still refuses to move it, so the conductor throws the valise off the moving train. Jughead then says he learned his lesson, and will never leave things where people can stumble over them. After the conductor expresses a little remorse for acting so ruthlessly, Jug calmly adds, "...it wasn't even my suitcase."
* Archie Comics story. Principal Weatherbee catches Archie fresh from a fight with another student, and about to reprimand him when Archie explains that the other guy had insulted his father. Weatherbee is actually sympathetic to Archie's excuse, as he considers those kinds of insults to be below the belt, and lets Archie off with a warning. As Weatherbee leaves, Jughead comes over and asks what the insult that set Archie off was, and Archie replies "What the creep said - and I quote exactly - was 'Arch, your dad's got a stupid son!'".
* Archie Comics story, Reggie saves Betty's life when she's knocked into traffic, she knits him a sweater as a thank you, and they start dating. They realize that it's starting to get serious after they each turn down a date with their typical objects of desire (Archie and Veronica) to keep a date with each other. They talk about it, and kiss... and she says "Oh Archie" and he says "Oh Veronica." They burst out laughing and decide to just be friends.
* Archie Comics story saw Veronica express a love for men in uniforms, causing the titular character to become jealous. This leads to a misunderstanding where Veronica thinks he enlisted in the army to impress her; in reality, he'd merely gotten a job at the local movie theater.
* Archie Comics story, Veronica gets one installed, only to switch back to normal phones because her friends called while she was doing face masks or when she'd just gotten up.
* Archie Comics story, Veronica invites Archie to a "high society" party. She berates him like crazy while briefing him for the event, e.g. "You have nothing in common with these blue-bloods, but there's no point in advertising it." At the end, Archie is barely up to Ronnie's socks. Then Archie runs into Betty, who tells Archie what a great guy he is. Arch walks away literally 10 feet tall.
* Archie Comics story was about a new foreign transfer student attending Riverdale High. The concept was that every time a character used a figure of speech, she would confuse it for what it would mean in a literal sense.
* Archie Comics story. When Jughead gets a toothache, his friends drag him kicking and screaming to the dentist. From the waiting room, they listen to him howling in agony until Archie decides to intervene.
* Archie Comics story where a bad guy has taken over the school with a teacher robot, Jughead gets out and is able to save the real teachers by asking to use the bathroom.
* Archie Comics story, where Mr. Lodge goes to a barber for a shave (just roll with it). The barber ends up cutting Lodge's neck several times, and when it's over, Mr. Lodge demands a drink to see whether his neck leaks.
* Archie Comics story where the cast are portrayed as superheroes, Evilheart (Reggie) and Pureheart (Archie) fight a baddie who has a ring that causes objects to rapidly degrade. Every weapon they fire at him, he simply destroys. To get the better of him, Evilheart tosses out a little black ball, which bounces all over the room. Because it is so quick, the villain can't hit it, and eventually his weapon runs out of juice. However, in trying to destroy the ball, the villain also destroys all his loot — which means it can't be returned to the victims, forcing Evilheart to pay reparations.
* Archie Comics story where Veronica buys a very expensive leather purse to carry her pet dog in, and she realizes that when she gets a knock-off of said purse for investigative purposes (she and Betty are helping to bust knock-off sellers), the dog immediately turns away because even it knows that the purse is fake.
* Archie Comics strip, Betty submits a macaroni sculpture depicting a victorious

athlete for an art contest, and was lambasted by the critics for being too naively optimistic. When the heat of the spotlight causes the sculpture to melt, the critics start to praise its brutal portrayal of despair. However, Betty defies this by declaring that life isn't just Angst, embraces a positive outlook of life, and withdraws from the competition.
* Archie Comics takes place a couple of centuries in the future, and Archie helps Betty babysit her young cousin. Among the cool devices they have in the future is a mirror that can show what you'd look like at any age. The cousin uses it to show what she will look like when she is sixteen, and Archie quips that he might just put himself into cryo-freeze to wait until then.
* Archie Comics. The characters don't age, but the technology is always up-to-date. It's not something that's just quietly slipped in either; a strip in the late 80s saw Veronica replacing her record collection with CD's, and in a later one Archie's parents reminisced about the days of dial-up.
* Archie Comics The five teens at the core of the series, revolving around their group dynamics and love triangles.
* Archie Comics: "The Great Switcheroo" issue involved Salem making everyone change sexes. "Archie" gets changed to "Archina".
* Archie Comics. Their friendship goes against the very logic that governs every aspect of the universe, and yet...
* Archie Comics, there is an old man that fits this: he has wish-granting powers, and Archie receives wishes that turn out to amuse the old man when they turn out wrong. Archie is so warped by anger over this that in a moment of evil, he wishes that REGGIE receive the remainder of his wishes. The moment of evil goes like this: "Are you kidding? I wouldn't wish this on my worst enemy!" (Archie's eyes glow with skulls for pupils and hellfire for irises as he gets an evil grin) "Or maybe... I would!" Which the old man provides. The first thing it leads up to? Reggie getting run up a tree by Moose.
* Archie Comics, there was one comic book in which Ethel was revealed to have very neglectful parents who were obsessed with TV and paid no attention to her.
* Archie Comics?), they have a heart-to-heart talk, when he admits he's not interested in dating at all but is okay with being friends. It ends on a happy note.
* Archie Comics. They were both dropped along with Jughead's makeover.
* Archie Comics, throws him out, and slams the door. Archie furiously pounds at the door.
* Archie Comics to be hated by the audience and that it's all part of the act. Then he replaces Reggie's tire and asks him to keep up the heckling at the next match.
* Archie Comics to deal with the stomach ulcers caused by the stress rather than alcohol. He's typically downing an entire bottle of the stuff by the end of one of his stories, if not by the middle.
* Archie Comics to prove that the man had orchestrated the entire thing.
* Archie Comics tried to salvage their failing 1960s superhero line by using "Mighty Comics" as their "Showcase", featuring such heroes as The Web, The Shield, The Black Hood, and Steel Sterling. It wound up killing the line for about 15 years.
* Archie Comics - twice - to get Sonic's attention more effectively. It took her a bit of a while to catch up mentally (though being a Freedom Fighter helped with that.)
* Archie Comics until Mr. Lodge gives up, has Archie gather firewood, and cooks lunch over a campfire in the kitchen.
* Archie Comics various love triangles and teen romances, often has stories with this dynamic. Most often has Reggie and Veronica bickering and Archie and Betty being the sweet couple, but it can switch depending on the needs of the story.
* Archie Comics Veronica explains that Chuck is most welcome at the party and that by "his kind" she meant Jughead, who's a "slob".
* Archie Comics Veronica fell for him. Kevin is gay and has a boyfriend.
* Archie Comics: Veronica has a habit of referring to Archie as "Archiekins", while her friends call her "Ronnie".

* Archie Comics, Veronica's schemes to beat Betty usually tend to backfire on her.
* Archie Comics was Anita Chavita, a paraplegic with genius-level intellect. She looked as good as your average Archie girl but was stuck in a wheelchair.
* Archie Comics: When Archie and his friends went camping, Archie woke up to an owl's hooting, and proceeded to wake the others:
* Archie Comics. When Archie's car breaks down, Betty fixes it. And there is even one comic where they try to enter a team surfing competition, but since Archie is too weak to carry Betty, Betty carries Archie.
* Archie Comics when Jughead comes over, because then he can "experiment" with someone who will truly appreciate it.
* Archie Comics" when the former somehow managed to set the ice cream on fire.
* Archie Comics where Moose looks to join the military and goes to Mr. Howitzer (a retired drill sergeant turned teacher) for advice. Howitzer tells him to finish high school first and even encourages him to consider post-secondary education, explaining that the modern military has little to no use for uneducated soldiers.
* Archie Comics, which never helped. In the 2010s much of the periphery hatedom is dying out thanks to various successful spinoffs and a more "modern" reboot that resonates well with comic readers.
* Archie Comics who also does about a million different volunteer jobs around town and is well-liked.
* Archie Comics who amuses himself by playing practical jokes on enemies and frenemies alike.
* Archie Comics who kicks it straight between the uprights. It seems that "they don't make old movies the way they used to."
* Archie Comics, who, like the story's apparent inspiration George, constantly manages to smack into trees or fall from vines. Betty co-starred as his smarter, long-suffering "Jane" counterpart.
* Archie Comics who wasn't bald but had gotten a new haircut she wasn't happy with and proceeded to get a wig made to look like her old style.
* Archie Comic. Then the judge states that her father's company is sponsoring the game and is therefore disqualified. Betty and Big Ethel win the game.
* Archie comic where a fly kept bothering Archie in school, with his attempts to swat it getting him in bigger and bigger trouble.
* Archie eye by a door. The last panel shows a dazed Alex sitting on the floor with two black eyes, mumbling that it was the same door that got him the first time.
* Archie friend Chuck Clayton has used Archie, and occasionally their other friends, as inspiration for comic characters.
* Archie genderswap" issue had been done nearly fifty years earlier. The plot was even the same: The girls and boys get into an argument over which gender has it worse and get genderswapped.
* Archie gets this job himself a lot. One year he tried to use it to get present intel from Betty and Veronica, but the girls saw through it and tricked him instead. Another year he learned the
* Archie had Pappy Guggenheim's Malt Shoppe. (Guggenheim and Tate both being famous art galleries.)
* Archie has Coach Kleats. Kleats looks like the stereotypical out-of-shape gym coach with a prominent belly, and even in his student days, he was never built for speed. But he makes up for his lack of mobility by being able to rip home-run balls with ease ... or casually shoot long-range baskets on the court ... or throw a football pass with startling power and accuracy, all to the shock of his once-mocking students.
* Archie has had this problem. Any time the cake isn't eaten by his chowhound friend Jughead, Archie ends up walking into someone and spilling it- Like Mr. Lodge, for example.
* Archie himself tends to accidentally cause chaos wherever he goes, usually due to his clumsiness. The
* Archie himself, who is portrayed as playing baseball, football, and basketball, although he's significantly less talented at it than Moose. He's still known as one of the nicest guys in Riverdale, walking disaster or not.

* Archie is Pop's fashion sense (at least in the digests using the traditional Archie house style), since he looks like he just stepped through a time portal from 1949. But Riverdale just wouldn't be Riverdale without it or without him.
* Archie is shot in the chest, sits down amids the battle and manages to appear all right. When Hornblower talks to him after the won battle, he asks if that's his blood... He lives long enough to take sole blame for their captain's demise, saving Horatio's life in the process, then dies from his wounds before he could be hanged for mutiny.
* Archie. It ends with the guys taking Archie out back and beating him up.
* Archie Kennedy is very go-hung in the first episode, looking forward to fighting the Frenchies! He proves himself a true
* Archie Meets The Punisher, and it was well-received and successful enough that it directly motivated the later crossovers below.
* Archie Meets The Punisher could tell they were not the same once he got a closer look.
* Archie Morris is something of a party animal... who finds himself falling head over heels in love with police detective Claudia Diaz. While they aren't engaged by the time the series ends, Archie makes it clear that that's where he sees their relationship going, and Claudia agrees with him.
* Archie named his rock 'n' roll group "The Archies". Reggie suggested re-naming the group "The Reggies". And Veronica, whose ego can sometimes match Reggie's, also nominated her own name once.
* Archie noted that some ridiculously high percentage of people who quote statistics "make 'em up on the spot!"
* Archie Riverdale Rescue Midge calls Moose a "big overgrown knucklehead" for getting five F's on his report card.
* Archie: Riverdale Rescue to eat Betty's latest concoction — which includes custard, spinach, pickles and hot butterscotch.
* Archie's Funhouse ("Keep Your Keeper") was the only ep to use a cold open during its CBS run. All sixteen episodes were re-edited for cable/satellite to have cold opens.
* Archie Sheridan, and while she may be intrepid she is also very much not a fighter.
* Archie Sheridan series, Gretchen Lowell is the extreme of this trope, as a beautiful female serial killer who claims to have over two hundred kills. Not just any kills, either—she likes to torture using blades and chemicals to extend the torture session for as long as possible. She uses sex to collect "apprentices," weak-minded selfish men who she can mold into serial killers themselves.
* Archie Sonic in spades. You have Moebian dogs mentally conditioned by dog whistles to attack with more ferocity when ordered, Wehrmacht like tactics and training, black Nazi like helmets, and the kicker? The Order openly supports genocide and interment of the 'rodents' of both worlds (echidnas who are hated for being allied to Eggman, and hedgehogs for being heroes normally in the Sonic fandom). However, unlike the Nazis the Order doesn't believe in harming the disabled, and both male and female soldiers have specific tasks on the battlefield.
* Archie special "Veronica in Germany", said heiress travels to said country to visit her distant relatives, including her cousin Elke, who is engaged to a man named Wolf. Even though they are set to be married, Wolf suddenly becomes too interested in Veronica when she reveals her father's massive wealth and empire, arousing her suspicions when he starts taking her on private outings just the two of them while leaving his "beloved" fiancée at home. In the end, Veronica's suspicions are right, as Wolf breaks up with Elke after they fight over his over-friendliness with her cousin, and immediately jumps to romancing a Greek heiress.
* Archie specifically promise Archie getting into Lamaze class hijinks.
* Archie's RC Racers franchise. In it, two teams of Riverdale teenagers, led by Archie and Reggie, travel across the United States racing radio-controlled cars, while foiling the dastardly schemes of the villainous Babette and her bungling henchmen.
* Archie's," the headline for the story about Betty's death reads, "Veronica Lodge

Gets Poor Girl's Blood On Dress!"
* Archie story had Archie's mother borrow his jacket and accidentally leave a tube of lipstick in the pocket. Betty and Veronica later borrow Archie's jacket and find the lipstick. They think that Archie is seeing another girl because the lipstick isn't either of their brands and angrily confront the baffled Archie. Betty and Veronica both dump Archie, but then they realize that this will just make him go after the girl they think he's seeing now. They both come back and smooch Archie to show that they're better than the competition. The story ends with Archie's mother realizing what she did and apologizing if she caused him any trouble, but a love-dizzy Archie just tells her to cause as much of it as she wants.
* Archie story had Big Moose going missing just before a big baseball game with Central High. Archie and Jughead trace Moose's recent whereabouts to a telegram office where Moose received a handwritten note. Archie used the indentation clue method to find out Moose was at the bus station waiting to go to the city where a family matter called him. It turns out that it was a Central High trick to get Moose out of the game. Archie and Jughead transport an incensed Moose back to Riverdale where he cleans up Central High virtually single-handed.
* Archie's Weird Fantasy in 2013, and then hired him as their chief creative officer the following year, they've clearly patched up their differences since then.
* Archie's Weird Mysteries converts humans into more of them by convincing them to use an ointment that makes their hair grow before transforming them fully. The substance constantly replenishes, and compels them to both keep using it and convince others to use it.
* Archie's Weird Mysteries episode "Attack of the 50-foot Veronica" Veronica gets hit with a size ray that causes her to grow into a 50-foot tall woman. At one point she sews all her swimsuits together to make just one that will fit her, and when she grows again she has to quickly use the roof from a party tent as an improvised dress in order to maintain some modesty. When everyone starts staring she of course briefly gets angry and goes full "Godzilla" on Riverdale before she starts crying and is comforted by Jughead. She is able to return back to normal size, however.
* Archie's Weird Mysteries has Archie traveling through time and bringing about several events of his series, including the founding of Riverdale and being responsible for Veronica's family moving there.
* Archie's Weird Mysteries has these, with the voice of any of the main characters shown saying variations of "don't go away", and even the opposite "we're back".
* Archie's Weird Mysteries played this for laughs when Mrs. Grundy, turned back into a teenager by exposure to space rock chemicals, develops a crush on Reggie. Reggie ends up freaking out about the whole thing. When he finally does start coming around to the idea, that's when Dillon manages to reverse the effect, much to both their surprise.
* Archie's Weird Mysteries revealed that the mysterious occultist Doctor Beaumont was a human born of vampires.
* Archie's Weird Mysteries shows Veronica accidentally causing the populace of Riverdale to start gradually turning into duplicates of herself after making a misguided wish on a wish-granting artifact that everyone was more like her. By the time Veronica is able to reverse this, the whole town is filled with snobby teenage girls and even Archie and Betty are starting to not act like themselves.
* Archie's Weird Mysteries special "The Archies in Jugman". He was unfrozen when a geothermal heating system was installed in Riverdale High School.
* Archie's Weird Mysteries: the cute cuddly alien is not only an evil intergalactic criminal, but he intentionally plays off his cuteness to take advantage of others. The "evil" aliens chasing him are actually cops.
* Archie's Weird Mysteries to slate his own material desires and needed to bring in as many souls as he could as payment. His inevitable defeat ends with him being dragged into Hell.
* Archie's Weird Mysteries was caused by growth formula being mixed in with the school lunch, creating a pudding monster.
* Archie's Weird Mysteries, when Riverdale is under attack by a vampire. The gang

are all warned about how vampires can't enter a house unless they're invited, so they figure that they're all safe at Veronica's Halloween costume party. Unfortunately, Smithers wasn't clued in on this in time.
* Archie's Weird Mysteries which has the Riverdale gang tangling with paranormal and extraterrestrial beings.
* Archie takes Veronica to a fancy, Middle-Eastern restaurant which is so authentic the staff doesn't speak English. Archie assures Veronica that he ordered lamb, but Veronica says it doesn't taste right. Archie flags down a waiter, points to the meat, and asks, "Baa baa?". The waiter replies,
* Archie), the first known patriotism-themed superhero in comic books.
* Archie, the ringbearer at John and Mary's wedding in "The Sign of Three", has a thing for gore. Sherlock is able to ensure the kid stays well-behaved during the ceremony by offering to show photos from some of his more gruesome cases.
* Archie, though, insists that any fan art of his characters include a copyright crediting him.)
* Archie: To Riverdale and Back Again characters (who are done in the usual art style and seen through flashback) and the older version (drawn by Gene Colan).
* Archie: To Riverdale and Back Again, now adults. Jughead spends most of the movie trying to avoid Big Ethel, but he decides to confront his fears and goes to her house. She's now a supermodel.
* Archie, Veronica, Moose, and Midge found themselves having to split a drink four ways when Archie and Moose became unable to take the girls on more indulgent dates.
* Archie vs. Predator, the Predator kills Archie because he's both a juvenile on his first hunt and he has a thing for both Betty and Veronica.
* Archie when Ms. Grundy jumped on her desk and Jughead took a picture of it for the school newspaper. She actually was worried that the picture would be about how scared she was of a little mouse but instead it turned out to be proof the school needed an exterminator.
* Archie when policemen were always treated with respect, women were put on pedestals, and nobody worried about pollution.
* Archimedean Dynasty environment. The end result was surprisingly awesome.
* Archimedes' famous discovery happened because of this: the king wanted a way to determine whether his crown was pure gold, or whether its composition had been mixed with other shiny metals—but he didn't want to bite his beautiful crown. What Archimedes realized was that if you mix base metals into the gold, the result will occupy more volume than the same weight in pure gold (since gold is denser than most metals it would be alloyed with). Dip the item in question into water and mark how far the water rises. Dip the same weight of gold into the water. If the item is made of pure gold, the water will rise by the same level. If the item is fake, the water won't rise as far when the pure gold is immersed.
* Archimedes, pictured above, even likes to hang out inside patients' ribcages. The only thing the Medic finds objectionable about this is that "It's filthy in there!"
* Archimonde, one of the two Eredar commanders of the Burning Legion, is destroyed in
* Archimonde's timeless classic "Tremble mortals and despair, DOOM has come to this world!".
* Archipelago actually manages to invert this seemingly un-invertible trope: Raven starts as a disembodied spirit, and his body gradually becomes more complete as he becomes more and more human. He's completely corporeal except for his right arm and wing by chapter nine. He looks like an amputee, but he's actually the reverse.
* Archipelago Exodus adventurers, but when the chips are down and her friends are in danger, she cuts loose with a frenzy of pinpoint projectiles that'll give any non-God-tier Power pause.
* Archipelago Exodus: The first two acts, or at least until Renard tails Channery's car.
* Archipelago gives us Captain Snow, who once apparently practiced as a doctor. Morally questionable procedures cost him his license, and now, he uses his anatomical knowledge primarily for torture.
* Archipelago has an awful lot of these. Avians are an entire race of them, and

Raven's wings seem permanent.
* Archipelago has vanishing wings as well as solid ones. Those possessed by Ravens seem to be able to have wings appear whenever they want.
* Archipelago: Raven is a spirit tethered to Blitz, and only Blitz can see or hear him at first. Raven takes advantage of this to cheat at cards, standing behind the Luck brothers and telling Blitz which cards to play.
* Archipelago: Riley recounts a time when Tuff was given medicine with alcohol in it. The results...were hilarious. (except to Tuff)
* Archipelago's becomes Raven, despite the role seeming to have always been set up for Blitz.
* Archipelago Steller found himself married to three harpies after killing their previous husband in a duel. Not that they (the wives) minded the change.
* Archipelago: The weresharks and wereorcas are locked in an eternal feud, which is minor in scale but well-advertised with all the wereshark skeletons hung as trophies. Justified, as most of the weresharks can only be truly happy when they hate someone — literally.
* Archipelago Vaniji and impersonates him so he can (re)join the Raven's forces without drawing suspicion.
* Architect of Sleep, the soldier caste of the raccoon-like sapients wear a 'Fighting Hand', a bracer with a hinged plate that folds down to cover the back of the hand with a palm strap to keep it in place; the hinged plate has four daggerlike blades usable in close combat.
* Architect's Sketch, including weird handshakes.. and de-programming masons (animated).
* architectural tools to rough out a model of a prospective building in 3D in a rapid and efficient manner. To this day they're still used as this, and LEGO has even spun-off a corporate consulting division which uses LEGO bricks to help solve problems in similar ways. This went full circle when LEGO started its Architecture line, LEGO sets for architecturally famous buildings.
* Architecture + Creativity + Mathematics + Programming + Survival: is even dedicated to this.
* Architecture, of course, deals with this. The invention of the arch in Rome enabled them to build some massive projects, including bridges and aqueducts. One of the biggest issues in medieval England was that their cathedrals kept collapsing. The
* Archius means "principle". He is certainly a man who sticks by them.
* archive as of 2013. And we're not counting the specials nor the feature films.
* Archive Binge, but other times they're meant to be read first to give necessary backstory. But most of the time, the only way to really know is to read them first. And it's not uncommon in both cases for these pages to be updated as the strip progresses to touch on storylines from the strip's run, including plot twists.
* Archive binges can get ludicrous when applied to text-heavy mediums, like blogs. Long-running, text-heavy, frequently-updated blogs can easily take your free time for a week to properly binge. Of course, this also applies to series of novels, newspaper columns, and other similar media, but blogs tend to be the easiest to access.
* Archive Binge: The many installments of a work are readily available and may be consumed in a short time.
* Archive of Our Own" - another author on the site who will be permitted to assume control of the writer's account and works in the event of their death. Both parties must agree to the 'inheritance' ahead of time.
* Archive of Our Own (AO3 for short) seems to be the newest playing field for the fangirls - the tagging system makes it really easy to find exactly what you're looking for.
* Archive of Our Own cracked down on sexually explicit fanfics in 2012.
* Archive of Our Own has an orphaning system for authors who wish to no longer associate themselves with works they wrote but don't want to delete them. Authors will lose control over a work once they orphan them and all orphaned works are moved to an orphan_account.

* Archive of Our Own has four primary content warning flags: "Graphic depictions of violence", "Rape/non-con", "Major character death", and "Underage". Authors can also choose to select "None of these warnings apply", indicating the story has no major content warnings, or "Choose not to use Archive warnings", indicating that they have chosen not to forewarn readers as to the content. Additional content warnings may also be provided in the tags.
* Archive of Our Own in protest at the latter site's crackdown on M-rated stories during that time. A decade earlier than that, in 2002, Adult-Fanfiction.org (previously using a .net web address) received its biggest surge in users, back when Fanfiction.net officially removed the NC-17 rating from its stories (back when that site was using the MPAA's movie ratings before switching to its own system some years later).
* Archive Panic: There's so many episodes! How will I ever have the time to finish catching up on everything?
* archives, collecting documentations on the city's affairs, population demographics, resource capacity and so on. When the invader had to establish control over the city, they did so easily as they knew how to properly allocate their resources and address any local problems. The king of the invaders ultimately commended the prime minister's wisdom in looting 'the real treasure'.
* ArchKnight, a necromancer starts yelling at Ash for an especially dreadful string of puns.
* Archmaester Gyldayn's Histories, but Lyman never leaves the Red Keep alive. His last recorded words are, "I am an old man, but not so old that I will sit here meekly whilst the likes of you plot to steal her crown."
* Archmage. His body lay rotting for six months before anyone dared touch it.
* Archmedes, Heron (of Alexandria), Copernicus, Roger Bacon etc., or you could even just say it was developed by an unnamed Babylonian/Hellenic/Arab/Chinese genius whose name is lost in the mists of time. The last one is the most justified and rational way to do it, as we'd naturally know more about the inventions and limitations of real and famous historical people, and there must have been any number of real instances (within reason) in history of this kind of thing occurring.
* Arch-Nemesis could be on the throne and not Dany, it perhaps explains why he went off the rails so much more toward the end of his life.
* Arch-Nemesis couldn't get out of the inning either, and then also lost the next game. However, it probably doesn't.
* Archnemesis Dad's life, realizes he made a terrible mistake and in an anguished voice tells Lex that he loves him after all. Unfortunately, by this point, Lex is so brimming with hate and has transitioned enough towards the dark side, that he pretty much just rejects his father's love.
* arch-nemesis not to leave him probably shows just how lonely the Doctor really is.
* Arch-Nemesis of why she ever turns back to her secret identity, given that they look exactly the same. The only possible benefit to transforming is that it saves her the trouble of changing clothes.
* Arch-Nemesis where he had to solve a murder case when he was in high school. In this time, he was shown giving street magic performance in a public park.
* Arch Of Triumph features Ravic, a skilled German surgeon who was stripped of his nationality by the Nazis due to being Jewish, and who is unable to legally exist anywhere else in pre-war Western Europe. He is one of many displaced persons without passports or any other documents, who live under a constant threat of being captured and deported from one country to the next, and back again.
* ARCHON keeps some of the precise details of its supers secret for tactical reasons. Most of their upper limits (such as speed and strength) are classified, as are some of their powers. Anvil's kinetic absorption is classified (though most people figure it out quickly), Dabbler's alien/demonic origin is classified, and Maxima's ability to shift her stats around is so secret even her own teammates don't know about it. Sydney's comm-ball is doubly classified since telepresence and truthsight are both most useful when the enemy doesn't know about them, and her two

unknown orbs are classified so that the team doesn't have to admit they don't know what they do.
* ARCHON lampshades this, saying "...It always astounds me how the primary antagonist being the protagonist's father, brother, evil twin or all of the above simultaneously comes as a shock."
* Archon pieces are summoned to the board by the four starting Adepts.
* Archon spiced things up further in the real-time combat sequences - swamps on a gray square would slow down non-flyers, lava would injure most units, and if you were fighting for a power point, you could park yourself over the power point to regain health.
* Archons (supposed to be the Judeo-Christian Yahweh but also borrows from the platonic demiurge), and the top ones, the Hebdomad, are basically planetary archangels. However, they are at best oppressive and at worst outright hostile, devouring the souls of the dead. To drive the point home, many are equated with actual Hebrew angels. Though the "real" Hebrew angels are occasionally seen in gnostic traditions and are independent, benevolent beings. It's complicated.
* Archon, the Wizard and the Sorceress units have pools of magic that they can use to hinder their enemies. Actually using them, however, cuts into their maximum HP when they enter combat. This can be dangerous toward the end-game, when your spellcaster may be one of the few pieces left on the board and they'll need all of the health they can muster.
* Archon, units that are stationed on Power Points are immune to Wizard or Sorceress magic.
* Archon was a fantasy version of this, with pieces like dragons, genies, goblins, and knights, who fought over the squares.
* Archosargus probatocephalus has lips which also bear a strange resemblance to human teeth.
* "Archotech" machines are extremely rare, later-game artifacts that grant seemingly magical things like unlimited power generation or
* Arch Pandara getting to it, but he can be beaten with a single strike.
* arch-rival. Whilst the latter half of this boast hasn't entirely come true (generic candles are fairly cheap), it is indeed much cheaper to run a light-bulb that produces the same amount of light as an equivalent candle for the same amount of time as that candle can burn for, even if you factor in the cost of the globe itself (as it can probably continue alongside hundreds of successive candles before burning out).
* Arch-Sorcerer homeworld of Fenris, Magnus has softened Ahriman's exile somewhat with the two working together once again for the greater glory of Tzeentch and the Thousand Sons, but their relationship remains strained and the Arch-Sorcerer has yet to be fully reintegrated into the Legion.
* Archvillain: Kyle Camden as the Blue Freak. Averted with Mike Mathews/Mighty Mike, who doesn't hide his identity.
* archy and mehitabel: archy sometimes noted that he dropped into an Irish stew or ragout in a restaurant for a warm bath and a bite to eat
* Arcia Chronicles, but they cannot control their appearance. Instead, each person sees them wearing different faces familiar to themselves: specifically, the Great Eagle's human form always looks like his vis-a-vis' greatest pain, while the Great Dragon takes the shape of the greatest mystery in their lives. When Roman encounters them both in book four, the Great Eagle wears the face of his late father Asten, whom he both loved and respected, while the Great Dragon takes on the form of the wandering mage Uann, who mentored Roman in magic, set him on the path to save the world, and disappeared without a trace in book two.
* Arcia Chronicles of Eric, "Darkness will protect from darkness; light, from light," foreshadow the protagonists' discovery that the best way to combat dark or light magic is with more dark or light magic, respectively.
* Arcia Chronicles, so when things are left up to chance, they usually go his way. However, this also means that he casually subjects himself to incredible dangers that, even though he always manages to survive them (in some way), have long-lasting and grave consequences for him.

* Arcia Chronicles, which provides a map of the entire continent (and the country central to the plot spans most of it).
* arcing a hill to stand on is a good way to cause casualties in the rear of your own units.
* Arc link to this page, and the assurance that further links to it are still to come.
* Arc of a Scythe. Centuries later post-mortal humans have difficulty understanding what life must have been like for their predecessors.
* Arc of a Scythe: Humans have, through advances in genetic engineering and cybernetics, made natural death a thing of the past, and humans are biologically immortal, although they can be killed through other means.
* Arc of a Scythe, Scythe Faraday continually hopes his job of killing people permanently remains this way for him and tells Citra and Rowan that it should always be a hard choice.
* Arc of Fire: Kail has concluded that it's pointless to worship any gods since none have ever answered his prayers to them and give no indication of caring.
* Arc of Sacrifices: Harry takes a Dark curse featuring this. Unlike some other incarnations of the trope, the perfect world in the curse doesn't turn into a nightmare, but it also takes an outside influence with knowledge of the Dark Arts (in this case Lucius Malfoy) to convince him to break the dream world.
* Arc of the Revolution, he winds up being seen as a legendary warrior by the Fang and winds up as their leader.
* Arc of the Revolution, Jaune derails the canon plot when he steals Amber's horse in order to get to Beacon faster. At least he gave her his savings to make up for it (along with accidentally saving her life from Cinder's ambush).
* Arc of the Revolution opens with the Jaune-led White Fang inside Beacon Tower, having successfully defeated Ozpin and conquered Vale. The next chapter rewinds to the beginning of Jaune's journey to becoming the Supreme Commander of the Revolution.
* Arcology are effectively hives, with the additional requirement of the whole structure be at least energy neutral if not entirely self-sufficient.
* arc. One has bat wings, one has white bird wings, and the leader has black bird wings.
* Arc Productions' work has gotten nicer looking within it's first couple of seasons and specials, with increasingly better textures and renders and impressive lighting and ambience. Combined with it's more vivid character animation, Arc has arguably surpassed Nitrogen by this point.
* Arc Rise Fantasia, she swaps outfits so that she wears a shiny red dress that looks like it's weaved out of oversized ribbons, and gets a funky tornado-like head-dress to match.
* arcs film and all merchandising rights. This means that every Spidey T-shirt and toy sold in the Ultimate Universe is funding the Kingpin's operations. And what is worse, Kingpin did it solely to spite Spidey.
* arcs that causes it often being paranoia and lack of trust in their friends.
* Arc Style: Baseball!! 3D: blue for the Mackerels, purple for Rhinos and red for Mammoths.
* Arc Style: Baseball!! 3D don't have a whole lot of speed, but they make up for it with a wide array of breaking balls that can make the CPU's life a hell.
* Arc Style: Baseball!! 3D, it feels so good to groove the strike zone with a fastball, but half the time it's hit for a home run on Hard difficulty (and powerful teams in general, like the Crystals). The same goes for slowballs, which can mess up the batters' swing timing but otherwise are easily hit.
* Arc Style: Baseball!! 3D, Team Albatross has two girls (Rivertorrent and Blackwell) and 10 guys.
* Arc Style: Baseball!! 3D this trope by giving your character hair and eyes of the same color.
* Arc Style: Baseball!! 3D use them to great effect to get strikes by pitching right on the border of the strike zone.
* Arc Symbol: A symbol appears over and over again, often with no explanation for

what it means until much later.
* Arc Symbol of the raven-feathered stag, and foreshadows the climax of Season 2.
* Arc Symbols as its recurring symbol, often using them as a hopeful symbol of rebirth and new beginnings.
* Arc Symbol. When they first meet Jane tells Michael that snow in telenovelas is because "snow makes everything more romantic", and subsequently many of their romantic moments feature snow (or falling dust that looks like snow).
* Arc System Works apparently likes puns based on this trope, considering that
* Arc System Works, uses this in place of traditional 2D sprites. In addition to cel shading the character models, also animated them with minimal tweening making them move just like traditional 2D sprites would (or as close as is possible with 3D models) as well as giving it a "Cartoony Anime" look.
* Arc the Lad 3 empire, because a Romalian merchant was the first to discover spirit stones and to use them as an energy source: When Arc the Lad start, Romalia has been the world first super-power for already 1000 years, thanks to its control of the energy supplies, and things started to go really bad only one generation ago.
* Arc the Lad enters the tournament to win the money to pay to cure his adopted daughter's blindness.
* Arc the Lad game was the first and only entry in the series to be released across multiple discs. The disc swap happened when you obtained the hovercraft, thus opening up the world more.
* Arc the Lad has a share of characters with summon magics such as the titular character, Arc.
* Arc the Lad is considered to be the apex of the series, and all games that came after are generally agreed to have failed to live up to it. As for the first, fans usually recommend it on the grounds of "well, it's the first in the series... also, the second one is a direct sequel."
* Arc the Lad should give you a vague idea of what kind of, uh, person-doll-demon-thing she is.
* Arc the Lad, subsequent falls are nowhere near as destructive because the plot says so.
* Arc the Lad, Tatjana as well as many of Darc's allies have this to some extent, but many of them have just had no real affiliation with the villains before meeting Darc, and Tatjana had merely been betrayed as a wake-up call. Tatjana is seen as one of Dilzweld's commanders and is capable of mutating a deimos into a state where it is completely unrecognizable. She is also fought as an enemy on Darc's side, but it is revealed that a lot of her power comes from having her advanced science (that is not portable) and from being able to command soldiers, since when she is a guest-party member in Kharg's group at first she is easily picked off by the boss monsters unless saved.
* Arc the Lad: Twilight of the Spirits between both races, results in members of each race attacking the other on sight.
* Arc the Lad: Twilight of the Spirits had this as a driving plot - a pair of twins, Half Human Hybrids, had been divided at birth. One had grown up amongst the humans, and was fortunate enough to not have any visible signs of his demonic side (At least at first...), while the other one grew up amongst the Deimos, and was visibly half-human, causing him to be ridiculed as a 'Wannabe Deimos'. However, they both eventually rose to lead their respective factions in a war against their other side...
* Arctic Canada has Night's Here, Getting Dark and Cold, Cold but no Snow, First Snowmobile Season, Too Damn Cold to Snowmobile, Second Snowmobile Season, Mud Season, and Summer. Summer is usually a Tuesday.
* Arctic Combat featured soldiers losing arms, legs, and heads to even weapons firing the relatively anemic 9mm round. Half of the fun of the game was running around and watching heads disappear from other players after you thwacked them with the stock of your weapon.
* Arctic Dogs not only was placed under a critical embargo, but there were also no Thursday preview showings for the film as a precaution against this. The film was

roundly panned and ended up with one of the worst opening weekends in animation history upon release.
* Arctic explorer John Franklin found himself in such dire straits in an 1819-1821
* Arctic foxes will do the same thing, in part because they're used to being the fastest thing around.
* Arctic hares have occasionally been sighted feeding on the eviscerated remains of caribou. Subverted in that the caribou in question had been killed by wolves or bears, and the hares were merely scrounging plant matter spilled out from the dead animals' torn-open guts.
* Arctic Monkeys 100 is "Do I Wanna Know?", which peaked at #70. They are more successful on the charts in their native UK, where their first two singles both hit #1.
* Arctic Monkeys deal with this. The album deals with kids clubbing in downtown London, so it's justified in that these kids need a freaking drink mainly to escape from their wounded pride.
* Arctic Monkeys - "Do I Wanna Know?" teeters between singing about unrequited love and this.
* Arctic Monkeys group of friends are also drunken, brawling louts who "might overstep the line, but you just cannot get angry in the same way".
* Arctic Monkeys is centered around a luxury hotel located on the moon. Many tracks focus on certain people in the hotel, such as the lounge act singer in "Star Treatment", two potential lovers in "Golden Trunks", one of the hotel's receptionists in the title track, and so on.
* Arctic Monkeys is notable given that the band is comprised of middle-class kids from Sheffield, London, and the album deals mostly with clubbing during the weekends, when they would often rub shoulders with upper-class kids. The band mostly mocks the rich kids' materialism and pathetic charm.
* Arctic Monkeys. It also makes fun of the fact that everything aligns properly for the narrator in the song to meet the girl, even though she's clearly egging him on to talk to her and dance with her.
* Arctic Monkeys starts of extremely simplistically with a sine wave moving in sync with the vocalist, but once the chorus starts it morphs into full animation which steadily gets more and more bizarre, until by the end of the video it's really freaking you out.
* Arctic Monkeys, was not intended to be a concept album; however, vocalist Alex Turner's lyrical subjects mainly deal with a night of partying and the adversity that one often faces while clubbing, leading it to be branded as one.
* Arctic Monkeys) which only hit #11 back home. In the US, this is averted where "Do I Wanna Know?" was their only chart entry on the Hot 100.
* "Arctic Nation", from the eponymous edition of the French-Spanish comic book
* Arctic Rim incursions through the Arctic Circle, largely because they are extremely drift-compatible. They are frequently compared to historical examples of this trope, which Elsa finds embarrassing, claiming they are simply fulfilling a duty to their country. Additionally, Prince Hans of Denmark is a former air force pilot and monitors the Vladivostok Shatterdome on behalf of the UN.
* Arctic Rising. Anika and her partner get a radiation signature off a tramp freighter and approach, assuming it's illegal waste dumping. Then the crew shoots them down with an RPG, killing her partner, and assassins are crawling out of the woodwork to try to kill her.
* Arctic Rising is a collection of ships and oil platforms attached to the last few bits of Arctic sea ice. Later, several of them decide to go their own way.
* Arctic Rising on is imposed on Thule by a multinational fleet when Gaia launches their terraforming project.
* Arctic Rising takes place in a near future where The Arctic Circle is melting, the Northwest Passage is a major shipping corridor and there are farms on Baffin Island.
* Arctic Scavengers takes place in a post-apocalyptic world with endless winter. Multiple tribes of survivors are fighting constant skirmishes over the dwindling resources and the tribes have to constantly balance the need to hunt for food and

scavenge for weapons or tools with the need to keep a large force to fight the next battle.
* "Arctic Splashdown". Bandit the dog looks into the camera and winks at the audience.
* "Arctic Tern" (along with Wayne having to bend over from laughter in the former) was funnier than anything else they could have done.
* ARC trooper Echo, who apparently died in an explosion in "Counterattack" is alive and a prisoner of the Separatists, prompting a rescue mission.
* "ARC Troopers", since it's their homeworld and they have a lot of younger brothers there.
* Arcturus Mengsk even wears ceremonial uniforms not unlike those from the time of the
* Arcturus Mengsk of started out as a dashing rebel leader who saved you and Jim Raynor from the Confederacy for killing Zerg. The first time he used a psi emitter to summon the Zerg it was a military target and the rebels helped the majority of civilians flee. Then he dumped several on Tarsonis, a planet with a population of two
* Arcueid actually has the same trouble telling how she feels towards Shiki. She doesn't know why she gets all emotional around him, upset if he breaks a promise, and spends so much time thinking about him. The idea is raised that maybe Arcueid hates him or something but that's
* Arcueid admits that she fell in love with Shiki at first being horribly butchered, something he reciprocated and spent 90% of the story denying to himself. Arcueid acts rather
* Arcueid and Ciel are described in canon as having a "weird friendship". One is a vampire. The other is a vampire killer. They also have a bit of a love triangle over
* Arcueid Brunestud was able to assemble pieces of her body back together after being killed and torn apart by Shiki in
* Arcueid, even while most of the nerves in her body aren't even connected, can still achieve this. Who knows how fast she really is.
* Arcueid herself is able to construct an entirely new body after being sliced into seventeen pieces by Shiki near the beginning of the game.
* Arcueid herself. She's been chasing one single vampire for 800 years, killing any of the others who get in her way. Even before going after him, she hunted the Demon Lords, fallen True Ancestors.
* Arcueid's case is kinda special in that she does not gain additional power during her "blood-lust" mode; she always had that power, "blood-lust" simply makes her no longer hold back. Well, unless she's fighting against Shiki, because only normal women can resist the Nanaya glands.
* Arcueid took this trope to its logical conclusion, making herself the
* Arcueid when Gil snubs Arcueid as being unworthy of his notice at the tail end of Act 3 (Super route), only to get utterly creamed by her late in Act 4 (with some help from Saber and Avalon).
* Arc-Ved Protagonists), his answer has typically been some variant of “Maybe.”
* Arc-Ved Protagonists in Jaden's duel against BB in “Dark Fusion” once it is discarded to the Graveyard, as it's effect can be used there to negate an attack. It is never used, the actual "gun" here is the Elemental HERO Burstinatrix discard at the same time.
* Arc-Ved Protagonists, right when Yuya gets what Yugi is saying about something having vanished, doesn't mean it is gone for good, during "Coming Right Back", the next card he draws is Monster Reborn.
* Arc-Ved Protagonists series of one shots. Being Yugioh, there is no doubt that this trope will be present, but one of the duels had it downplayed one turn, played straight the next, the subverted on the final turn.
* Arc-Ved Protagonists, with Yuya stating that Yugi's hair style is the craziest he had encountered, while still acknowledging that his is growing naturally into a tomato shape.

* ARC-V from three different dimensions, and at least two of the three pairs are this trope. Yuto with Ruri, and less ambiguous with Yugo and Rin.
* Arc Villain Amiba made up his own style of Hokuto Shinken based upon his study of the power points required to use the style. However, it is clear he could not have known how to properly use attacks based upon the style. Additionally, when Amiba attempts to use his knowledge of power points to make himself stronger, the result causes his hands to be destroyed, allowing Kenshiro to finish him off.
* Arc Villain: A villain who is only the central antagonist for a few episodes rather than for the entire series.
* Arc Villain characters too. Everyone was happy when Heather Taffet, the Gravedigger, was killed, and they were even happier when Booth finally killed Pelant.
* Arc Villain empathy for anyone, and the only thing that matters to him is his own amusement. This turns out to be because he has never had a single friend; when Fluttershy befriends him, he reforms.
* Arc Villain Ian Doyle, or even suggested that the authorities investigated further (Prentiss and the rest of her former team take it as a sign to GTFO before Doyle comes after them).
* Arc Villain, is single-mindedly obsessed with avenging the Tuffles' extinction at the hands of the Saiyans no matter what; when Pan tells him that the Saiyans who were actually responsible for his species' demise are long dead, Baby flat-out states that he doesn't care.
* Arc Villain, like Arachne, Shaula or Noah (The Tables of Contents), Medusa and Asura are not too far behind, similar to Bakura from above.
* Arc Villain Mard Geer's Thorn Curse lets him grow giant thorns and demonic flowers.
* Arc Villain: Not the villain of the whole story, just of a little story arc or a single season.
* Arc Villain of the Black Rose Duelist arc, is commonly interpreted as some kind of ghost that hung around Ohtori Academy long after dying.
* Arc Villain of the Mages Guild questline and also seriously fails at delivering the level of threat he was renowned for in-story, being a fairly generic mage. Thankfully, there's a mod that overhauls him and his entire dungeon to be suitably terrifying and difficult.
* Arc Villain of which is gold bullion that becomes a golden briefcase filled with (fake) money in the real world.
* Arc Villain pissed that the rules underpinning reality changed so that he couldn't be one any more. This didn't stop him from setting himself up as a god on Amonkhet, but that was just so he could better manipulate them, not because he believed it himself.
* Arc Villain. She is still very ruled by her emotions and extremely impulsive, she suffers anxiety over failing even mundane tasks, and has severe problems with empathy. While she tries very hard to empathize and use it to guide her actions, due to her past and mental state she does not have a very good idea of how normal ponies would feel under various circumstances. As an example, on one occasion she feels no compunction against mind-controlling her friends in order to complete a task more efficiently simply because she doesn't understand that having one's free will temporarily taken away would bother most people.
* Arc Villain Starlight has this problem, as her first instinct upon being told to socialize with other ponies involves things like magically compelling Big Macintosh to say everything that's on his mind and mind controlling the Mane Six sans Twilight.
* Arc Villain Thomas Wilder kidnapped, beat up, raped, and killed 22 women that we know of, and threatened to do so to Nicky Reagan but only got as far as the kidnapping part.
* Arc Villain videogame. No other member of his subgroup, the Mega and Ultra Pretenders (Pretenders with transforming shells), has received anywhere near as much focus; the next most notable is probably Crossblades, who featured in a few bits of Collector's Club fiction and had a brief appearance in the Marvel comics

where he died.
* ARC-V is around the size of the Earthbound Immortals - and his truly bafflingly insane wingspan and tail length add to this.
* ARC-V, it is actually a plot point that Reiji studies Pendulum Cards (cards unique to only Yuya) so he can mass-produce them. The Battle Royale features Pendulum Cards that litter the entire city, and by the next arc, many of the main characters received Pendulum Monsters.
* arc we find out that Erza, who we saw in an earlier chapter losing an eye when she was young, got a fake magic eye as a replacement. Because of this she only receives half the blast from a petrification gaze and is easily broken out the spell. After about another arc people forget she ever lost an eye at all, until she uses the fake one to see through an illusion.
* Arc Welding: The stories of a previously episodic show are retconned to be part of one overarching story arc.
* Arc Words), and each time Riff replies that he'll willingly follow him into Hell.
* Arc Words are the Genie Jafar's response to being reminded of his inability to kill: "You'd be surprised what you can live through."
* Arc Words: "Autopilot" has two: "Autopilot Engaged/Disengaged" and, near the end, "My phone was on the counter."
* Arc Words in the Tokyo Island arc are "When you hurt people, they hurt you back."
* Arc Words: "People shouldn't be afraid of their government, governments should be afraid of their people."
* Ardal O'Hanlon argues that glasses are better than contact lenses in case you get into an argument, in which case you can take them off to emphasise a point. Trying to take out your contact lenses in the same scenario doesn't have the same impact.
* Ardal O'Hanlon does a bit about how people are not as tough as they used to be and older folks have a higher tolerance for discomfort even when terminally ill.
* Ardat-Yakshi, especially since they lack the faint lights seen in other asari.
* Ardat-Yakshi that asari have always been exogamous, traveling far from their origins to find mates in order to prevent inbreeding. This makes anti-pureblood sentiment and preference for nonasari look a lot like aversion to incest, and raises the question of whether Ardat-Yakshi parents tend to be related.
* Ardian Syaf was an up-and-coming artist who was chosen as one of three rotating artists for Marvel's
* Ardie's name is somewhat of a reference to her color scheme, as begonias are pink flowers and Pinkerton is a surname with the word pink in it. Likewise, Turquoises' name alludes to her color scheme.
* Ardneh's Sword. It seems likely that their dependance on belief was psychosomatic at first, but became this trope over time.
* Ardrana series of freely available online short stories feature the Lanad Calendar. There are thirty days in a month and 361 days in a year, leaving one hanging day, Day of Change, a holiday that doesn't fit into any of those months. The Day of Change is considered both the end of one year and the beginning of the next at the same time. The years count from the founding of the "Third Civilization", details of which have been lost to time.
* Ardsley Wooster ships Gil/Agatha principally out of fear that Gilgamesh might decide to melt England if Agatha ends up with anyone else.
* Arduin Grimoire. The druidic spell "Chastarade's Spell of the Stone That Weeps in Silence" causes a creature to turn into a boulder. If the target makes its saving throw, it ages 20 years instead.
* Arduin, live on the Tenth Plane of Hell, are utterly without fear and relentlessly attack other creatures.
* Arduin, monsters, pools of acid, a 1,000 foot drop (Splat!), mechanical grinders, molten lava, boiling mud, quicklime and dragon dung.
* Arduin: Perrinites are a crossbreed between elves and dryads that have plants and flowers where their hair should be.
* Arduin. The Doppelganger is a quasi-living magical creation that is made to look like a specific target creature. It is designed to seek out, murder and take the

place of that creature, and it does this very well.
* Arduin. The Greater Demon Boak Chaos Hoof can pass through solid objects like a ghost, even while carrying a rider.
* Arduin: The ibathene was introduced for the specific purpose of being a monster capable of killing dragons, so as to provide something even tougher than the archetypal top monster of fantasy games. The result is an immense, reptilian beast strong enough to comfortably hunt and eat dragons and other powerful monsters — in fact, ibathenes hunted dragons to extinction in certain regions of the world.
* Arduin: The windego is a tornado-like creature from the 18th plane of Hell that grows up to 300 feet tall, with glowing red eyes.
* Arduin: Vroats have the bodies of gigantic toads and the heads of crocodiles.
* Ardwight Chamberlain was known as the actor who played Ambassador Kosh in
* Ardyn Izunia particular, and very much suck for all parties involved.
* Ardyn's muscle car. It's actually pretty plain looking, but he thinks it's awesome.
* are 8-foot tall men in the world, a man of that height with Gregor's proportions is literally impossible. The loyal Stark servant Hodor is supposed to be almost a foot shorter at just over seven feet (the actor being 6'10"); luckily they two never interact so it isn't quite so obvious.
* Area 11 - A band that is registered under the Yogscast's record label, with two members working for the Yogscast
* Area 11"). Likewise with every other country that has been numbered.
* Area 11 telling people not to do this at home since they will probably die. After he's finished, this exchange happens:
* Area 11. The band are no longer members of the group, but do still lurk there, so it's not as total a loss as it could have been.
* Area 11. The band then signed with the Yogscast for two years, which definitely helped them get off the ground. The group are not registered with the Yogscast any more, but are still friendly with them and have a large number of Yognaughts in the fandom.
* Area 11, who cameo as prima-donna versions of themselves that argue pettily about whether or not they should get to play as the top hat.
* Area 51: Aliens being hidden in Area 51, a US Air Force base (which is a real place, but no aliens are being hidden there in real life that we know of).
* Area 51: A lot of objects deemed magical or miraculous in myth were in fact very advanced alien technology left on Earth.
* Area 51 anyone who thinks about it for a second will realise how stupid that is and dismiss the conspiracy theorists as raving crackpots.
* Area 51: A real-life US Air Force base located in Nevada. Due to its highly classified status, it's been the subject of numerous conspiracy theories which claim that it's being used by the US government to store captured alien spacecraft and reverse-engineer them into experimental military aircraft.
* Area 51: As a result of their technology, Airlia can keep from aging (along with humans they've enhanced) and don't die of this.
* Area 51: A villain is introduced named Abdu Al Iblis. This means "Servant of the Devil" in Arabic. Oddly enough, Richard Francis Burton (despite having lived in Mecca where he met him) doesn't realize what this means (nor does it tip off Arabs generally).
* Area 51. Bonus content reveals cattle mutilations are because of aliens with mental illnesses. Little green men need Prozac too.
* Area 51 (bouncers) the US government long ago found a carrier ship for them, which they call the "alien mothership". For decades they couldn't even get inside due to its hull being utterly impenetrable with their tools. Eventually though they managed to on the basis of new information, with the idea of turning its engine on (they theorized it had interstellar FTL capabilities). Stopping this because it might result in a disaster makes up part of the first book.
* Area 51 (FPS) had the Illuminati RedOps troops, which commanded the regular Illuminati TacOps groups. They were better armored and had more powerful assault

rifles.
* Area 51 (FPS): In one level, you start off near a gas station. If you shoot the sign for it, one of your teammates will remark "I don't like those prices, either".
* Area 51: Frequently overlaps with Secret Government Warehouse, as their functions are similar.
* Area 51: General Gullick orders Dr. Cruise to kill Von Seeckt with an insulin overdose to make it look like he died of a heart attack after the latter's strenuous objections to their upcoming test make him think he might blow the whistle on it. Luckily, Turcotte finds out and stops Cruise.
* Area 51 has a very pronounced chiaroscuro artstyle and a private detective protagonist in a wretched town. Despite those elements though, there's quite a bit of humor. And also lots of monsters, gods, and other fantastical creatures.
* Area 51 However, in subsequent books things move on into other areas.
* Area 51 is "a meaningless airplane hangar, give or take", explicitly a decoy set up so the aliens could conduct their extraterrestrial business elsewhere (Dulce, primarily) undisturbed by "all the UFO freaks". You know, exactly what the
* Area 51 is apparently among the secrets in the Presidents' Book in
* Area 51: It's revealed that humanity isn't native to Earth. They were created elsewhere by the Airlia, an alien species, to be their soldiers.
* Area 51: It's revealed that two factions from the Airlia, an alien species, have been plotting against each other and covertly warring with human stooges for thousands of years on Earth, along with keeping their existence unknown to most.
* Area 51: It's revealed the Airlia weaponized the disease to cull humanity in the past. They do so again in the present, making it even worse.
* Area 51: It's revealed this was the source of all civilizations on Earth, after refugees from there fled its destruction by aliens millennia ago.
* Area 51: It turns out that the Pyramids were built to be beacons by an alien species called the Airlia. Their computers are pyramid-shaped too.
* Area 51: Majic-12 is in fact behind these as part of their cover-up for Area 51.
* Area 51: Members of the Airlia, an alien species, have covertly been living on Earth for millennia and also manipulating humans to their ends unbeknownst to most aside from their minions.
* Area 51 Morris Fletcher claimed to be the one who originally coined the term and insisted that powerful, primal, otherworldly forces are hidden beneath the waves, waiting to be plucked by man.
* Area 51: Part of the Area 51 disinformation campaign is taking cattle and mutilating them with lasers, which makes people think aliens did it for some unknown reason, misdirecting them down that rabbit hole.
* Area 51 program whose remnants spill out into the nearby town of Rachel, Nevada.
* Area 51 screen shows a video of the protagonist morphing into one of the alien mutants.
* Area 51's episode "Point of View". Several rows of shelves piled high with artifacts and technology from off-world, many of which were seen in previous episodes. It looks suspiciously like the show's props department.
* Area 51: The 2012 e-book version of the first book updated references to reflect time passing since it was published in 1997. Turcotte reference 9/11, and Von Seeckt no longer states that his birth year was 1918-while fairly plausible then as 79, he'd be 94 when the e-book came out. Of course, the reference to joining the SS in 1940 remains, so if he'd been younger it raises questions. There's only so far a character's age can be pushed (yet the next book says his birth year is 1918 anyway).
* Area 51: The Airlia all have red eyes, and sure enough, they're bad guys.
* Area 51: The atomic bomb is revealed to be based in part on alien technology.
* Area 51: The government has nine of these at Area 51 that they found in the 1940s-50s and have been testing their capabilities ever since, along with a mothership for them.
* Area 51: The Swarm, an ancient enemy of the Airlia whose sole objective is infecting and living in all other life as their hosts.
* Area 51: This top-secret Air Force base entered the popular consciousness in 1989

after a man named Bob Lazar claimed to have worked with alien spacecraft there.
* Area 51: This turns out to be the only way the Airlia can be killed since their technology heals anything else.
* Area 51 to the Fort Knox bullion depository. He's petitioning the government for permission to audit the vault, and Sam suspects he's been obliviously put up to it by Republicans to bother the Bartlet Administration.
* Area 51: Turcotte's a Green Beret (US Army Special Forces). We also encounter members of other elite units, including the British SAS (Special Air Service) or later US Navy SEALs. This is usually justified, as they're used for very hard, important missions, and explains why Turcotte's so good.
* Area 51: We meet a number of these, "UFO watchers" who camp outside Area 51. They turn out to be right that the government is involved with/covering up UFOs. In later novels, it's mentioned that most Americans don't believe aliens are real, that it's all been fabricated by the government (along with thinking the Moon landing didn't happen). No doubt the first lot being correct fueled later ones.
* Area 52 ("a storage facility for Area 51") is based entirely on this premise.
* Area 52. It was meant to house thousands of monsters of various sizes. The "unnecessarily" part comes from the fact that it never seems to house more than a handful at any given time. It would be necessary for any time they wanted or needed to move Insectasaurus.
* Area 7. Area 51 is never mentioned, but there's a strong implication of each of the Areas being some form of secret government facility.
* Area 7") is an obstructionist bureaucrat, and also the commanding officer during the book. Luckily, the President was around to make him shut up and listen to the people who actually know what they're doing in a battle.
* Area 7, Mother describes a war game Scarecrow had been involved in where he'd managed to evade the enemy until the time limit ran out. Scarecrow didn't hurt the opposing team in any way, but he denied them a clear victory for the first time, which had infuriated the opposing team.
* Area 7. Played dead straight, of course they immediately escape through the ceiling hatch anyway because the elevator is a death trap.
* Area 88 air force squadron of foreign pilots, some with dark pasts and some recruited unscrupulously.
* Area 88 air force unit, has several of these across all continuities, usually sending the fighters off to attack some objective. Actual attacks on the eponymous base are relatively rare.
* Area 88, and an amnesiac who spent the previous two decades in cryogenic suspension. Suddenly, Asran's future doesn't look so bright. Also at the end of the manga, Ryoko reunites with Shin. Shin suffers from amnesia due to head trauma and does not remember his time at Area 88. On the surface, this appears to be a happy romantic reunion, until you realize that Ryoko will need to explain to Shin why he's in Asran and why years of his memory are missing. To boot, Shin will undoubtedly suffer from unconscious war trauma, even if he can't remember Area 88. Finally, Shin broke Ryoko's heart several times throughout the manga, suggesting that he has cold tendencies. In short, Ryoko has chosen to marry a traumatized, amnesiac jerk, raising questions about what their life together will be life.
* Area 88 and move around 'underwater.' It doesn't dive like a submarine, though; it pumps sand up to bury itself. It also has a few problems with overheating.
* Area 88, an Italian mafia don and arms dealer who collaborates with Kanzaki and Asran's anti-government forces.
* Area 88. At one point, they fight the Wolf Pack, who play it straight.
* Area 88 At the beginning, the protagonist is tricked while drunk by a jealous rival into signing a contract as a mercenary fighter pilot in a foreign civil war, and is forced to fight a three-year tour under threat of execution.
* Area 88 becomes one of these after he takes over Yamato Airlines. Among other things, he was instrumental in adopting a very shoddily built new airliner.
* Area 88 carry a nuke, but its limited range means that the launch platform would be heavily irradiated at the very least.
* Area 88 ends with Shin about to engage against the mercenary planes that have

already annihilated the rest of the Area 88 pilots.
* Area 88 feature many aces among the mercenary pilots, including protagonist Shin Kazama, his friend Mickey Simon, and base commander Saki Vashtal. There are others, but they tended to die shortly after being introduced.
* Area 88 features several briefings in all incarnations, since it's a series about a foreign legion air force.
* Area 88 first meets Shin while he's a student at a flight school. She takes him for a skycap and asks him to stow her luggage.
* Area 88 focuses on a mercenary group who destroy most of the planes at Area 88 while they're on the ground.
* Area 88 frequently attempt to land damaged or burning planes at the eponymous air base, mostly because they have to personally pay for replacements.
* Area 88 game (UN Squadron in the United States) has the player fly into canyons and caves for a few missions.
* Area 88 generally watch each other's backs when in formation, but permanent pairs don't often show up because of the base's high turnover.
* Area 88 has a modified F-14A Tomcat. The RIO station is still there (the reporter joins him for one mission in the anime) but it isn't required, probably due to the fact he doesn't use the radar-guided AIM-54 Phoenix or AIM-7 Sparrow, so he flies solo.
* Area 88 has Boris, a pilot famous for always coming back alone. The TV series introduces him when some rookie tempts fate by saying they've survived a mission with him. He dies after demonstrating that the F8E Crusader can fly with its wings folded.
* Area 88 has many examples of this. The Area 88 mercenaries are meant to fly highly dangerous missions to take pressure off regular Asran forces, as Bowman observes in the OVA. Since many of the mercenaries are veteran soldiers, they're very good at warfare.
* Area 88: In one episode of the TV anime, a sniper terrorizes the entire base. He's never seen from anything beyond his own first-person perspective, and never says anything, at any point. Cold's a good word for it.
* Area 88 is an American veteran whose flashbacks show that he had a great deal of trouble adjusting to civilian life after the Vietnam War. In particular, he jumps at the sound of aircraft overhead. Ultimately, he leaves to join a foreign legion air force in North Africa.
* Area 88 is that Shin's (now former) best friend sends him off to a war in the hopes that he'll get killed, so he can marry Shin's girlfriend, the daughter of his company's CEO.
* Area 88: Kitori in the TV series; Sela in manga issues that did not make it stateside.
* Area 88 maintenance bill for his F-14. McCoy reminds him that an F-14 is expensive to maintain.
* Area 88 manga and OAV has Mickey Simon and Nguyen Van Com, veterans in the U.S. Navy and in the VNAF, respectively. Both pilots were recruited to work alongside Asranian military forces as mercenaries, and both men had a hard time adjusting to civilian life. While Mickey is friendly and approachable despite having signs of PTSD, Nguyen shows off his sadistic side when he takes out enemy fighter planes and even kills the pilots after they bailed out.
* Area 88 manga features one of these, albeit on land: The land carrier moves on tracks, launches unmanned fighters, and hides itself by burrowing under the desert sand. Perhaps unsurprisingly, it is very difficult to cool.
* Area 88 manga. For a soldier of fortune, Mickey has a strong professional code. He is loyal to his fellow pilots and politely turns down Rishar's offer to join the anti-government forces.
* Area 88 manga, Hoover Kippenburg was once a major in the West German air force and a NATO air commander.
* Area 88 manga, Mickey meets Rishar Vashtal, Saki's brother and a leader among Asran's anti-government forces. Rishar explains the anti-government forces' reasons for engaging in the civil war, showing that both sides of the conflict have

legitimate aims. Mickey feels conflicted after meeting Rishar but remains loyal to Area 88.
* Area 88 manga, Sela serves as this for Mickey. Years before in New York, Mickey and Tracy broke off their engagement, and Mickey became a mercenary in Asran shortly thereafter. Later in the manga, Mickey falls in love with Sela, who defected from Project 4 to the Asranian pro-government forces.
* Area 88 manga treated the use of armed drones in combat as alarming and strange. In the 21st century, drones are now an accepted part of warfare.
* Area 88, Mario reveals that Hoover is the son and grandson of ace fighter pilots.
* Area 88, most of the Area 88 mercenaries are greedy, amoral men who have no qualms about fighting in Asran's bloody civil war. Similarly, the anti-government forces are shown slaughtering Bedouin civilians in the manga. Downplayed with the pro-monarchy soldiers at Area 85, who are depicted as patriots.
* Area 88 One OVA character takes a sadistic glee in shooting down other pilots after they eject.
* Area 88, only made the connection between the games and the manga/anime even more obscure), which got adapted into a well-known SNES port.
* Area 88, originally a 1979 manga, then a mid 80s OAV, and finally a 2004 TV series, which are all clearly set in the year the original manga was made (or at least, that is when the story begins). The premise has dated and is completely implausible now. The information age, the fall of Communism, the end of the Cold War, and the current political climate in general, have made the idea of a small Middle Eastern country like Asran (Aslan) refusing to export its oil for profit very improbable. There are now more ways than ever for foreign capitalists (or countries) to manipulate a small North African country and get their heads of state to see things a different way. A protracted war would be completely unnecessary. Also, the idea of the Foreign Legion as a place for people to disappear, no questions asked, was dated even when the story was originally written. Today, they are not only more selective and do background checks, but you also have to prove your competency before the contract is even offered. So the idea of tricking a drunk person into signing up for the FL is completely ludicrous. Also, today, it wouldn't take much effort for Ryoko to immediately find out why Shin vanished (also, Shin could easily contact her by e-mail), thus exposing Kanzaki's sinister schemes. Finally, the idea of a mercenary air force being a quicker and less expensive alternative to training and maintaining one's own air force is no longer that relevant since air to air combat is now borderline obsolete. Besides, drone aircraft are even cheaper than merc pilots and a country could train its own operators quite inexpensively. Today, the war would be fought within the country, on the ground, and would look to outsiders as just another grassroots terrorist insurgency movement.
* Area 88 OVA. When confronted by three Paris thugs, Shin just smiles. He remains calm as he snatches a knife from one of the thugs and hurls it into a robber's shoulder. The thugs are completely unnerved. Given that Shin is struggling with war trauma, his dissonant serenity is a sign that something is off.
* Area 88, Shin can't sleep due to a dripping faucet in his apartment. Furious, he sits up in bed and screams at the faucet. This is a decidedly non-comical example, since it is intended to show Shin's psychological disintegration due to war trauma.
* Area 88, since it increases their chances of being found by one side or the other -a mercenary is unlikely to care which, if they're not likely to be ill-treated- before their water runs out.
* Area 88 starts with Kanzaki tricking Shin into enlisting in the Aslan Foreign Legion in the middle of a civil war, in order to have a shot at Shin's girlfriend, Ryoko.
* Area 88, the Asran foreign legion is desperate for fighting men, so it tends to overlook flaws in potential mercenaries, such as inexperience, criminal backgrounds, or psychopathology. They're not too concerned about lack of consent (in Shin's case) or age (in Kim's case) either.
* Area 88 TV series has the entire base pinned down by a sniper who shoots anyone he sees outdoors.

* Area 88 when the camp is attacked. Oh, and survived all that, though he did lose a hand.
* Area 88, where the planes are all rendered as intricately detailed, cel-shaded CGI models. As the planes themselves are usually shown dogfighting each other, this isn't quite the limitation it would otherwise be in terms of effects, but there are more than a few instances where CGI and traditional animation mix. This leads to somewhat jarring visual results, most notably when the view zooms in on a pilot in the cockpit. The vivid character models stand out against the often matte rendering textures for the CGI planes.
* are able to fight fate and prevent the events of the future (seeing which prompted them to try to prevent the events of the future in the first place) from occurring.
* "Area Codes" a fellow female employee, which many of his detractors pointed out as hypocritical. And despite many hit rap songs, the one rap song Ludacris is known for the most is... you guessed it, "Area Codes".
* are a complete quagmire. Not only do the shoe sizes depend of the country and culture, but also whether they are based on the foot size or last size (a last is the male "mould" upon which the shoe is made). The most common units are Mondopoint ((foot length and beam in millimetres), used on ski boots and by US armed forces), the EU sizing (1.5 times the length of the last in centimetres), US male shoe size (3 times the last length in inches minus 24), US female shoe size (3 times the last length in inches minus 22.5) and UK shoe size (approx 3 times the heel to toe length in inches minus 23). The UK sizes are one barleycorn (1/3 in or 8.47 mm) apart each other, while the EU sizes are 2/3 cm (6.6667 mm or 0.262 in). Mondopoint shoes are sized 5 mm apart, and they also take account the beam of the foot: 275/100 shoe is, while of same length (275 mm), 10 mm narrower than 275/110.
* are actually are based on traits of McCloud's own wife Ivy. He also responded to the criticism in several interviews, mirroring Nathan Rabin's response that the problem isn't quirky female characters, it's female characters who are nothing but quirks.
* are actually tapping into the knowledge of the entities that grant them their powers, and as those entities have visited- and destroyed- countless other planets in the past, they have access to advanced technologies devised by alien civilizations. In some cases, they also have a subconscious ability to scan their surroundings and determine how the recorded information can be applied to Earth-specific situations.
* are actually the first force users, or at least, members of the celestials were the first force users, the Father, the Daughter, and the Son. With the help of the Kilik Race, they created the Maw black hole cluster and Corellia in order to contain "The Mother," aka Aboleth.
* are actually undead Vordaks that murdered the real monks and took their place and takes the time to bury them.
* Area D, after that, however, it's clear that Jin is the real protagonist and Soutaro is just a member of the main cast.
* Area D Asura, in an attempt to make a safer place for women, she recruited mostly if not only women for the West District, resulting in turning it into an army of superpowered girls.
* A Reader's Digest story was submitted wherein a teacher at a school warned the kids about how high they were climbing in a tree. Sure enough, not long after she walked away, one of the kids fell a good six meters out of a tree (around twenty feet), landed on his back, and
* are a detriment to him rather than a gift. There's the "zoning-out" problem, which nearly gets him run over by a truck in the pilot, when he focuses his vision too much on a flying frisbee. Also, after his ears get flushed out from all the wax build-up, his hearing is greatly enhanced, meaning he can't even focus at work thanks to all the tiny noises hitting him with the volume of a heavy metal concert. He's also extremely sensitive to pain, although Blair teaches him how to "dial it down" (specifically, using the "dial" imagery).
* Area D has a deconstruction. One of the Altered early on has this power, and Jin

steals and uses it, however, the power has the realistic drawback: growing a living organism will drain the user's energy and nutrients since the plants need it to grow. What's more, the original user banked on this to subdue him along with his team.
* are against zombies; in the final release, they simply gave the Magnum a huge buff to let it one-shot zombies from the get-go, as well anything else that isn't a boss, and dropped the dum dums for being redundant. Oddly, the 2002 remake contains the same description on the weapon, and the same fully functional but dummied-out rounds.
* are age-regressed due to magical mushrooms. Ranma, the older at the moment, pushes Ryōga, and gets a spanking from Akane as punishment.
* are airplane. Every one of those qualifiers is necessary; each had been achieved by someone else before 1903. Also note that the exact wording is the Wrights' Take That! to the Smithsonian, which had long claimed that its own Samuel Pierpont Langley had made the first powered man-carrying flight a week before the Wrights.
* A real apocalypse later occurred in "Krabby Patty Creature Feature", when Mr. Krabs' new experimental Krabby Patties (invented by Sandy) turns everyone into mutant Krabby Patty monsters that force every non-monster they see into eating them. SpongeBob was the only remaining survivor (while taking shelter at the Chum Bucket) when he discovered that ingesting chum causes the monster Bikini Bottomites to vomit up the Krabby Patties that transformed them and return back to normal.
* A real biggie is "The Cat Carol", where a cat is locked outside her house and nobody will let her in, during a blizzard. She keeps a mouse warm and although the mouse survives, the cat dies.
* A real example, Reika Yotsui, does appear in a two-part case, in which the Mouris and Conan are invited to her birthday party after they find her lost puppy.
* A real example, the "Legendary Years" wing of Walt Disney World's Pop Century Resort was abandoned in 2002 due to 9/11 related tourism dips. Since then, the economy roared and now once again whimpers, and in all that time the structures remained left behind, the only thing complete being the parking lot. In 2012, the empty resort finally opened as Disney's Art of Animation Resort, making this a subversion of the trope.
* A realistic example is the DeLorean DMC-12, a car that had been produced for less than two years and had a reputation for
* a realistic facsimile of himself with Kiki the ferret inside has to do with anything!" and "A likely story." Gwynn manages to have a few rounds of conversation with it before she starts to feel like Torg's not even listening. When Kiki pops out and says that Torg's taking a nap, the voice recorder that she's holding goes "A likely story" again, and Kiki feels compelled to try to convince it: "No, really, Mr. Voice Recorder! He's taking a nap!"
* A realistic villain, similar to real world criminals or dictators (even with supernatural elements), starts
* a Reality Warper, she teams up with a group of artifact hunters and grabs two things: a ring that, when pointed at a person, reveals their true name, and a doohickey that lets her read books without opening them. The most major villains in the series have been defeated by "What are you planning?", "Where can I find X?", or "How do I escape from this situation?"
* a reality where their life is a TV show starred in, and archival footage from his appearances on it is used).
* are all about this trope. Both follow the same formula: We see a child's face as an unknown adult sings
* are all destined to eventually bcome this way. The necromantic magic animating them warps their souls and causes them to first envy and eventually hate all life until they want nothing more than to kill everyone and everything that isn't undead like them. Fortunately, Harry (after many months of experimentation) manages to find a way to resurrect the undead and remove the necromantic energies infecting them, though he admits many will later kill themselves anyway from the trauma of what they experienced.
* A real-life aversion was managed by the Anglo-Norman nobility in 1120. William

Adelin, the only son and heir of King Henry I had drowned in the White Ship disaster, and none of the nobles dared to break the news to the short-tempered king. In the end, they sent a small boy to do it. Henry couldn't get angry with him, and instead merely broke down in tears.
* A real life example occurred in the 2005 Ashes, specifically in the second Test. Australia were just two runs away from victory when Steve Harmison took the wicket of Mike Kasprowicz to level the series. It was almost universally hailed as the best Test match ever.
* A real life example that doesn't involve animal spawn... the cordyceps genus of fungi. They infect various kinds of insect, but the form most often seen by people is one which infects ants and flies and the like. The fungus grows within the body of the host eventually causing death, but before it does so it forces them to climb to a high point (say the top of a blade of grass) and cling there until they die. Then the fungus matures, fruiting bodies
* A real life example was avoided when Mandy Smith's mother broke up with Rolling Stone Bill Wyman's son. Smith and Wyman were married at the time, giving Smith a narrow escape from becoming her own step-granddaughter-in-law.
* A real-life inversion of this trope: Tank crews are trained to avoid heavy machine guns whenever they can. The Russian 12.7x108mm is able to penetrate lightly-armored vehicles and damage the external equipment of tanks, such as searchlights, radar, transmitters, engine compartment covers, etc.
* a real-life version of the "Mystic Warlords of Ka'a" tabletop game that was featured in a few episodes of the show.
* A real life version of this would be bartering with electricity, oil, or other types of fuel. Iraq used to do this under the UN's
* a real lion-turtle provides Aang with information about the Deus ex Machina
* are all named "Morgan _____" that egotistical: presumably, these are all divisions of the corporation.
* are all-natural. It is possible to fool a polygraph test, and the commonly used urine test is not the most sensitive or accurate method. There’s also the problem that testing is only right before the competition instead of year-round, which allows a cheater to spend most of the year getting bigger through doping, and then stop with enough time left until testing day for the traces to leave their stystem. So they may pass as drug-free on competition day, but a lot of them aren’t necessarily natural year-round. Some fans and commentators believe the "fake natty" problem is so widespread that it’s making a joke out of natural bodybuilding.
* A really awesome instance was Delenn demanding that the whole Minbari Civil War (which the warrior caste had theoretically won) be hazarded in a
* A really bizarre version of this trope involves the Japanese voice actor
* "A Really Cool Dance Song" is about how they are going to sell out by making a Dance Song.
* A really creepy one from Singapore's Health Promotion Board, to provide awareness of cervical cancer, is a print advertisement of a child's drawing of his family. There's the sun in the sky, and stick figures for everyone: "me", "dad", "sister"... but above "mom", a tombstone is drawn instead.
* A really creepy version of this happened with turn-of-the-century magician Walford Bodie. He was prone to severe seizures, and carried a note explaining the care that he should be given if he was found apparently dead. He revived several times after these seizures, but at one point he had a seizure, and the doctor treating him either didn't read the note, or didn't find it, and he was autopsied even though he probably wasn't actually dead.
* A really disgusting example occurred in Scotland in 2009, when the
* A really grotesque version is many ideological movements. A large part of the reason
* A really interesting example in the episode "Dax". Ilon Tandro believes Curzon Dax was responsible for his father's death and wants him punished. Curzon is dead, but his memories and experiences live on in a symbiotic lifeform that was implanted into Jadzia Dax, so Tandro wants

* A really memorable but creepy Smokey bear PSA commercial from 1973 had this. It starts off with actress Joanna Cassidy talking to us about forest fires and then towards the end she takes her face off like a rubber mask to reveal a creepy Smokey Bear costumed character underneath. It was remade in 1980 with the unmasking being less scary and Smokey being more cuddly and friendly-looking and have a voice that
* A really old one that people love to misquote, but Rowling never actually said that people were delusional if they ship Harry/Hermione; that was the owner of Mugglenet.com, Emerson Spartz.
* A really seriously twisted version of this is part of an episode of
* a really trippy hallucination of waking up in a dysptopian word populated by caveman hippies, was pretty much fine when the Iceman came to save him.
* A really well-done example of this trope can be seen in Season 5 of
* a real man forgives a woman's lies". And when Usopp was left beaten and bloody by Luffy, Sanji had to physically restrain Chopper from helping Usopp, saying Luffy had already shown pity to Usopp in the face of defeat and Chopper would've stomped on Usopp's pride by treating his wounds.
* A Real Man Is a Killer: A man discovers that he must kill something in order to prove his worth.
* A Real Man Is a Killer: "True" manhood is primarily about being violent and enjoying it; also associates men with death and destruction.
* A Realm Reborn also now adds a requirement to complete the Crystal Tower raids (which consist of another ten quests) because of the Tower's relevance to that expansion.
* A Realm Reborn expansion pack zones. In about a month, the developers severely nerfed the boss's HP and strength to the point where parties can easily kill it with their own strength alone no matter how much they screw up on the mechanics.
* A Realm Reborn, killing most of your allies and taking everyone else captive, and then, when you've barely had time to mourn your losses, you learn that another Primal is about to summoned, and now you'll have to deal with it without the allies and support that helped you handle the last two.
* A Realm Reborn story. The developers did finally address the issue and made the base game more bearable for new players by removing several quests.
* A Realm Reborn, while player characters returning from 1.0 would see changes to the story to account for their presence during the previous version's events.
* A real Plot hole in the Chris plot is the whole Valhala thing. Why did he send Leo to Valhala in the first place? It's what caused Leo and Piper's temporary breakup which
* A Real Princess series by Alexandra Yegorushkina, Dis is of normal height and build (for a dwarf lady, meaning shortish and chubby by human standards), while her love interest Kirn is extremely short and thin for a dwarf.
* A real problem for storage devices, being overwritten doesn't always mean being erased. Hard drives leave faint traces of the original data that special equipment can read. Flash drives are designed to avoid overwriting existing data whenever possible (too many writes to the same address eventually wears it out), thus leaving the original data completely intact.
* a real process that gave us words like "apron" and "adder." People heard "a napron" or "a nadder" as "an apron" and "an adder." It worked the other way around for some words like "a newt" (an ewt) and for the nickname "Ned" for Edward; it was "mine Ed" which transformed into "my Ned."
* are also almost impossible to keep because they need so much grass to eat.
* are also furries. The same goes for their main Japanese equivalents, animegao kigurumi, which have gained popularity with Western cosplayers.
* a real sweetheart, a good listener, open-minded, considerate, and empathetic to all.
* A Realtor.ca ad featuring a parody of "Total Eclipse of the Heart" has been getting a ton of airplay as of August 2019.
* A realtor is haunted by her husband, who believes (wrongly) that she poisoned him. Melinda finds her in her office which she just smashed up. The husband's spirit arrives with the two arguing...until it hits the wife she can

* a real unit of measurement. No wonder he is completely unconcerned with human lives.
* a real-word form of clock from the medieval period, which was simply a candle made in a length which would (theoretically) take X hours to burn down. The candle was striped in hour-long segments, so you could tell by looking at it how long it had been since you lit it. Obviously there was much potential for imprecision in the real world; in Valdemar they've got it down to a bit more of a science.
* are, and by the time of the Paramount War arc, anyone who isn't a member of the admiralty can get swept aside with ease.
* are and targeted, they also find their jobs and intentionally drive ridiculous distances to them based on accounts of especially suspicious-sounding deaths in newspapers. With this modus operandi, it makes sense that it would usually be murder, given creepy death apparently draws them like bees to honey.
* Area no Kishi is nearly always hounded by throngs of squealing fan-girls whenever he's at school.
* Area no Kishi team's top defenders in a practice match (after Kakeru spent most of the match wearing him down.)
* Area no Kishi to land at Suguru's feet, he is able to make the last second shot that ends the game in a tie between Japan and the reigning champions.
* A reaper-like figure with a scythe appears on the cover of the album
* are are often picked on by anime enthusiasts for not being "adult" enough. Just like children's media doesn't always have to be bright and cheery, adults' media doesn't have to always be dark and gritty.
* are aristocrats, or what passes for it in the Shire: Merry is the son of the Master of Buckland (Saradoc Brandybuck), Pippin is the son of the Thain of the Shire (Peregrin Took), and Frodo is from a wealthy family closely related to both the Brandybucks and the Tooks. Sam is, basically, the son of Frodo's groundskeeper.
* are aroused by porn, but decide to check out something outside their realm of interest.
* are asking and answering whether several angels can be in the same physical space at the same time.
* A Reasonable Amount Of People Might Be Kung Fu Fighting If They Really Needed To.
* A reasonably accurate reproduction of the Japanese carrier Akagi in most shots, save a long shot where a modern nuclear-powered supercarrier was rather inexplicably used instead. Trope played both ways.
* a reason) for Tedd's mom's departure: Not about her husband, but about Tedd himself.
* A Reason to Live, a Reason to Die! at Col. Pembroke's feet; demanding to know where the hidden gold is. When Pembroke doesn't answer, he goes to shoot him but the Gatling gun runs dry. Brent quickly changes clips, but the delay gives Eli time to bring his own Gatling gun to bear on Brent and gun him down before he can fire again.
* A Reason to Live, a Reason to Die! attempting to take the 'impregnable' Fort Holman from the Confederates.
* A Reason to Live, a Reason to Die!, Col. Pembroke and his men encounter a family of seemingly religious homesteaders who invite them in to share a meal and stay the night. However, while searching the farm Will finds the body of the their missing member MacIvers in the barn with his throat cut. The amount of possessions stored in the barn indicate the fanily has been robbing and murdering travellers for some time.
* A Reason to Live, a Reason to Die!, Col. Pembroke opens Sgt. Brent's tunic and yanks the jewelled cross off his neck. He shows the cross to Maj. Ballard, who recognises it as the cross that Pembroke's wife always wore, and therefore that Brent stole it. Ballard then tells Pembroke "Sergeant Brent also volunteers for the mission".
* A Reason to Live, a Reason to Die!, Eli enters Fort Holman dressed in a Confederate uniform and posing as a messenger.
* A Reason to Live, a Reason to Die!, Eli pretends to suffer from this when he is caught snaeaking around the fort after dark. He then has to go through an elaborate

charade of pretending to take a leak so the sentries don't get suspicous.
* A Reason to Live, a Reason to Die! in the war to try to con people out of food. Which unit he claims to have serve with changes depending on who he is talking to.
* A Reason to Live, a Reason to Die!, Pembroke's men mange to capture several of the fort's Gatling guns and use them to mow down many of Confederate troops.
* A Reason to Live, a Reason to Die! plays Major Ward, the insane commander of Fort Holman and personal nemesis of Colonel Pembroke. He intends to rule the area around Santa Fe as his personal fiefdom if the Confederacy wins the war.
* A Reason to Live, a Reason to Die! then gives some details and says that what follows is the true story, and then the film then flashes back to before the mission started.
* are assumed to be spies, in Russian, if they are spies. Daniel answers "no", but instinctively switches to Russian as well. O'Neill is rightly annoyed.
* Area X, as well as Elcia's powers, to try and resurrect everybody who died in the avalanche, he loses control of the Silver Orb's power, and split the timeline into several different timelines, scattering everybody he resurrected among them.
* Area X, as when travelling to another dimension, the traveler ends up inside the body of a resident of that dimension, although only a few people know that.
* Area X contains whole piles of apocalyptic logs: all expedition members keep a notebook of their experiences, and the notebooks of expeditions which never return always find their way to the lighthouse. By the time the biologist finds it, the pile has become alarmingly large.
* Area X does this in the Middle Ages when Pedoe tells her he wants her to be his 44th wife.
* Area X, Elcia and Irina have this relationship. [[spoiler:Irina's death has a major effect on Elcia, who is driven to find out the truth behind it.
* Area X, he and Elcia go on to terrorize the ORZ Corporate—aka what amounts to the government of their world—and be a general nuisance to them. As far as the ORZ Corporate's concerned, they're terrorists; on the other hand, the public hates the ORZ Corporate, and so cheers for the duo as heroes.
* Area X, this is one of the reasons that Elcia is able to tell that Rexus is the leader of Project Recovery and knows who she really is, as he don't react to the fact a girl in a school uniform wants to negotiate with ORZ Corporate, since a normal student wouldn't want or need to negotiate with a major corporation.
* are banished in the middle of snowstorm, finding a big metal door in the middle of nothing.
* are banned from Haiti and Indonesia. Gomez has been banned from Africa for an undetermined amount of time, but as of 1995, has at least ten years left on the ban. Grandmama is accepted as a witch doctor in five countries and banned from the rest of the world.
* are being used as projectiles by Yukari. Or any combination of those things.
* "Are Bent-knee sit-ups or straight-leg sit-ups better?" "Straight-leg."
* are black leather jump-suits which are understood to be utilitarian, though their use is never specified at least, other actors wore platform boots to make them seem taller).
* are both a head taller than Anri (5'0); incidentally, Shizuo appears to be one head taller than Izaya, but is actually half a head (185cm/6'1 vs 175cm/5'9).
* are both sirenians aka sea cows). Manatees are also portrayed being able climb onto dry land like seals, whereas they are purely aquatic dwellers.
* are both (usually) made from silver. It may also apply only to SLR and TLR cameras, where a mirror deflects the image from lens to film.
* A rebours as simply "the little yellow book". The entire novel is about a rich guy moving to his country house and then thinking of expensive and strange things to put in it, up to and including a tortoise with jewels embedded in its shell. Which dies because it has heavy jewels embedded in its shell.
* are but it's not said if they're still working). This, alongside the Great War, has greatly reduced the cybertronian population, making them an endangered species in galactic terms.
* are. But Kobashi, like Finlay and Regal, can work stiff responsibly, and the

Japanese touring schedule is much more relaxed, allowing the wrestlers more time off to recover and thus allowing them to take more punishment in the ring.
* are), but none are as truly nice as Julius. Even dragons who go out of their way to avoid killing people are repeatedly gobsmacked by Julius.
* are, but since they're usually the only real game in town people usually don't bother.
* are by some busybody who simply couldn't fathom that these two people of different races where in fact related.
* Are capable of nullifying your primary methods of attack/defense (often reflecting or
* are captivated by how gorgeous he is despite no visible changes in his appearance.
* are card-carriers by and large, being antagonists for antagonism's sake.
* A receding hairline/shaven head is a fairly reliable identifier of evil (or at least antagonistic) characters in the
* A recent Alienware advert suggests that the company's range of high-power gaming PCs was created in this way.
* A recent attempt, developed by the Russian government; the likely identity of the poisoners as captured by CCTV; and of course the likely motive for attacking a former Russian spy) have pointed squarely at Russia as the overwhelmingly likely culprit. Russia denies being involved, but President Putin recently referred on-camera to Sergei Skripal, calling him a "Scumbag" and "Traitor", which does not exactly help their case.
* A recent Bank advert in England has a man needing to use the Bank's new withdraw-via-a-code-we-send-you-if-you-lose-your-card system because he accidentally left his wallet in his jacket... and his jacket on Jackie.
* A recent discussion on a professional military historians' bulletin board tried to ascertain the existence of any statistics for civilians deaths caused by bullets, shrapnel, and aircraft parts falling out of the sky during a dogfight. While no contributor could answer the question, many observed that the Japanese and Germans used to collect aluminum from crashed aircraft and steel splinters from flak shells for recycling. The Americans used drop tanks (external fuel tanks for the extra range that could be jettisoned before combat to increase maneuverability) made out of paper after they realized the Germans were collecting the original metal tanks to ease their shortages.
* A recent example from Canada: In September 2018, Conservative leadership runner-up Maxime Bernier, disgruntled with actual new party leader Andrew Scheer not being hard enough on immigration for his tastes, quit the Tories and founded the People's Party of Canada, a party with much the same views as the Conservatives but with a more libertarian, populist and, of course, anti-immigrant stance.
* A recent example is Myron Rolle, Rhodes Scholar recipient in 2008. He was an all-ACC defensive back for the Florida State Seminoles and was good enough to get drafted in the NFL in 2010. Rolle never caught on with an NFL team and returned to Florida State to study medicine. After his graduation in May 2017, he took up a neurosurgery residency at Massachusetts General Hospital, the main teaching hospital for
* A recent Fairy Liquid advert has restored this jingle. Well, sort of...
* A recent hypothesis on the feeding behavior of dromaeosaurid dinosaurs (think
* A recent hypothesis to explain one of the most mysterious features of Mars (its northern hemisphere is significantly smoother and about a mile lower in average elevation than its southern hemisphere) is that
* A recent Internet meme involves people doing this with their pets. Not that the pets, especially cats, really care.
* A recent interpretation that's gaining a lot of credibility that, since the Persian Empire was run on the
* A recent issue of the new 52 Shazam comics shows that apparently Billy in his Shazam form can speak any language as Billy found out when fighting a giant robot in Japan, he believes he got this from “the wisdom of Solomon”.
* A recently-discovered "Care Package Bug" allows another version of infinite

supplies: with careful timing, swapping the care package marker and one's regular weapon while mantling over a chest-high structure gives you another marker after you receive and use your care package. Infinity Ward allegedly patched the bug, but made it easier to exploit, instead.
* a recently freed Sirius is talking to Remus about what happened during his illegal imprisonment.
* : A recently released psychiatric patient kidnaps an actress in order to make her fall in love with him. He believes his destiny is to marry her and father her children.
* a recently-resurrected isn't a zombie; then the one on the right wonders "What's a zombie?"
* a recently transformed Dark One Emma only gets a hair color change, and Hook doesn't change his appearance.
* A recently widowed Corday drops her wedding ring down the sink while scrubbing in for surgery on
* A Recent Martyr, the main character, Emma, is on an outing to a public park near the river when she sees an army of dying rats being cleaned up (i.e., hidden) by city workers. This is foreshadowing for the epidemic of bubonic plague that occurs later in the story.
* A recent National Guard commercial, where a series of guardsmen do this.
* A recent new character, Diedrich, claims to be a Grunny, but is so far from Grunny norms that many fans think he's something else completely. Nonetheless, Diedrich is
* A recent patch added the Sky Golem engineer-made mount. It looks like a steampunk robot with a goblin's face for a chestpiece. It flies (even doing barrel rolls!) and lets you pick flowers without dismounting.
* A recent quest features an ally who can be called upon to shoot a "smoke arrow" to your location, dropping you out of combat like rogues' Vanish. You have a few seconds to get out of the mobs' aggro radius, or if they were chasing you they'll run back to their assigned locations.
* A recent Quizno's commercial features a seductive, deep-voiced oven convincing an employee to advertise a new sandwich in unmistakably come-hither fashion.
* A recent report for the Greenwall Foundation discussed the possibility of
* A recent revelation in the series 12 episode "The Timeless Children" has the possibility of making this true, complete with memory wipe. However, it would potentially place Cushing's Doctor before Hartnell's, making the movies stealth prequels instead.
* are centrist and don't have their own biases. The latter in fact is more likely; historically newspapers were more than happy to take sides on just about any issue, and were usually published with a specific agenda in mind. Said initial agenda could be alluded to in the names of some of the smaller papers. The ideas that news should be 'neutral' and that 'commentary' should be separate from the news are relatively recent concepts.
* A recent series of commercials for the Orbitz travel website seem to be taking after the Old Spice commercials. "With Orbitz, I know what to expect from my vacation. Bless you; cannonball."
* A recent Seventh Generation detergent commercial with Maya Rudolph in which she makes a pun with every vegetable she picks up.
* a recent, still-classified incident in front of a fake Starfleet cadet, knowing that a real one would have no way of recognizing the comment as anything but a meaningless name.
* A recent television program was aired on the History Channel called
* A recent trailer for the sequel gives "Ring Around the Rosie" the same treatment. For the curious, these are the lyrics to the song in the trailer.
* A recent update exchanged the weapon scraping mechanic with an ammo crate drop so that players can grab and use dropped weapons instead of instantly converting them into ammo and/or scrap metal (exploded building parts still give scrap metal to engineers, though). Each dead character still drops the same amount of ammo no matter how much or how little they actually have on their person.

*) are certified salmonella-free and prized in Japan for sashimi purposes (partly because of the salmonella thing, partly because the chicken is actually just that good). In the U.S., food handlers are required to serve poultry fully cooked, and not to allow the utensils used to cook it to come into contact with other food.
* are changelings), and Celestia even name-drops the trope. She also finds it rather amusing that neither Cadence nor Shining Armor knows the other is a changeling.
* A recipe book for an air fryer has some recipes that either have listed ingredients that are never used or the instructions calls for ingredients that is not listed in the recipes. One chicken recipe has the instructions calling for a turkey.
* A Recipe for Seduction boyfriend at the start of the film. Harland is much less wealthy and gets mocked by Billy, but he's charismatic and kind, and quickly starts to appeal to Jessica.
* A Recipe for Seduction, Bunny and Billy conspire to get Harland out of the way so Jessica can't be with him. First they just try to bribe him, but then they escalate it to attempted murder.
* A Recipe for Seduction, Harland is presented as an excellent chef, first working at an exclusive restaurant before becoming the new chef for Bunny and Jessica. He boasts about having a secret chicken recipe he wants to change the world with, and at the end his new restaurant becomes successful.
* A reciprocal example is Lenobia and Martin. They met as teenagers in 1788
* A recognizable theme in warfare among Europeans and European-inspired military cultures. One side will find some technical advantage and roll over its opponents for a time. However, all occidental armies were formed in an environment so similar that it is impossible to find a technique that is incomprehensible; for instance
* A recoilless gun mounted on a militia technical is taken over by Deltas and turned against the on-site commander in
* a record 20 television dramas and 2 television movies of 1982, is considered Singapore's 1st ever locallly-produced Chinese language TV drama. Its lead actor, the late Huang Wenyong, would later be the first ever Chinese TV superstar in Singaporean history, leading the way for other Singaporean Chinese actors and actresses to follow.
* A 'recovering' addict in "Road To Recovery" is found dead in a rehab clinic. The killer is found to be a recovering addict who is taking his treatment seriously for the sake of being allowed to see his children again. The victim had a rich husband and little to lose if she failed the course and enjoyed goading others into giving into their vices. She put a gift-wrapped bottle of bourbon into the guy's room and kept pushing him to drink it until he snapped and killed her by accident. To really push it even after all that, the guy still never drank a drop and broke down crying in the station when he realised he'd never see his sons again.
* A recruitment advert once showed a camera's eye view of a woman in a war torn house while subtitles informed us that enemy soldiers had killed her husband and gang raped her, so the last thing she needed to see was another soldier. Luckily the soldier giving her a blanket was a woman. So... women should join the army to help rape victims...
* a recurring and more-or-less permanent roster. This is probably because it's easier to sign one actor for a film rather than three or five.
* A recurring apocalypse of unknown cause is central to the background of
* A recurring bit of weirdness when comments are made by a group. When Cecil says "The City Council said...", he probably doesn't mean that they released a statement, or used a spokesman, but that the whole Council spoke as one in
* A recurring bit will be a guest finding themselves in an elaborate fantasy (sometimes involving time travel) and falling for what they assume is some actor or part of the past. Just as they're about to leave the island, that new love will show up as they're also a guest and this was
* A recurring bit would be Murphy and her gang grousing on how the networks ignored hard-hitting stories for "fluff" pieces.
* A recurring boss enemy in the series, often fought multiple times in any given

game, takes the form of a giant worm- or centipede-like monsters fought in a sandy arena, where it burrows in and out of the sand to attack Link. These enemies include the Moldorm in
* A recurring character in season 1 is Ernest Hemmingway, who's a local newspaper reporter in Toronto.
* A recurring character in the Pop-Tarts commercials for some reason has a mouth on his abdomen.
* A recurring character is Bloth's sandworm-like pet, the Constrictus, which looks like an homage to
* A recurring character is the befuddled genius inventor Leonard of Quirm (an obvious parody of real-world Renaissance Italian inventor and painter Leonardo da Vinci).
* A recurring character of Sirgun Gard, a genuine Valkyrie, has limited perception of future events when it comes to a strong warrior about to die. She gets a glare and fixates on the person who will soon perish and believes it is their destiny. However, this is not guaranteed because mortals have free will and if another mortal were to step in, what she foresees may not come to pass. She is miffed when her mortal employer saves Harry from his death, and states there will be repercussions. The employer's response:
* A recurring character previously referred to as The Trickster (one of many) turns out to be the
* A recurring conception story for Egyptian kings was that a god such as Re slept with the queen
* A recurring element in the Wano Arc, to show just how badly things have gone in Wano since Kaido took control. Hyogoro was one of the most powerful yakuza but is now just a malnourished, small elder imprisoned in Udon. Queen lampshades how pathetic a legendary yakuza has become. Shinobu was once a beautiful kunoichi, but went to seed and is now an obese old woman of questionable skill. The country itself used to be a picturesque
* A recurring enemy named Mote transports the party to the Dream World practically every time he meets them, in which many rooms and areas tend to look like
* A recurring example throughout the series is that the antagonists only ever settle conflicts via pokemon battle, with the main exception (
* A recurring factor in any game that has a story mode is that you have to play through most of the fights that happen in the series. The issue is that it's entirely possible that the difficulty won't match what "should" happen: your character should be able to win the fight in their sleep, but it's
* A recurring fantasy of J.D. has him becoming a "Floating Head Doctor". However most end with Body getting into a fight with Head.
* A recurring gag in Series 3 subverts this. In the sketches, rowdy-looking fans of the Burnistoun United football team attempting to come up with rude songs to sing at the opposing team, but tend to make them overly nice and polite instead.
* A recurring gag, where a long conversation leads to a stretched word pun on the entire conversation, and then (usually) Rat
* A recurring gag would have Beavis doing a spit-take as a reaction to a horribly bad music video coming on the TV, usually with his regurgitated soda ending up on Butt-Head's face.
* A recurring gambler receives this comment: "Scat! I didn't recognize you without the feathers!"
* A recurring joke is that Meg is mistaken for a boy (despite having a clearly female chest). There are even episodes that show her shaving her face and taking a whiz standing up.
* A recurring joke names some fictional company (either featured in the movie or derived from someone's name) as "a subsidiary of ConHugeCo."
* A recurring minor character called Ginger is a stereotypical dumb blonde who has a
* A recurring moment whenever a dangerous stunt is or being performed, mostly Raphael will tell kids
* A recurring nemesis was able to make the system give null responses because he

was a stone-cold sociopath.
* A recurring one in the series is "Matthis Syndrome", a reference to the iconic example in the first game: Matthis can only be recruited by having his sister Lena talk to him, at which he'll have a
* A recurring plot point is an app that Gotham's petty criminals use to keep track of Batman's movements.
* A recurring plot point is the fact that Jake is infinitely more powerful then Finn and could easily overcome the majority of enemies they face alone. However, Jake's laziness and lack of focus often means he almost never uses his magic to its fullest extent, and will often get caught up on comparatively trivial problems without Finn present to motivate him.
* A recurring plot point over the years with Marvel Comics species the Kree, who have retained the same basic look for millions of years, and their DNA has stubbornly resisted any attempt to get it to budge, despite some very,
* A recurring poster in the background at Elmore Junior High explains that eating other students is against the rules.
* A recurring problem for Ben, especially prevalent when he gains a new alien form and has no idea what it does. The first time he turned into Cannonbolt, not only could he not figure out how rolling up into an armored ball was useful in combat, but he kept losing his balance and falling over backwards when he tried to stand. Reaches its ultimate conclusion in
* A recurring problem for Perceval; he can't ever tell right from left. He once called himself a "southpaw"... while drawing his sword with the right hand.
* A recurring problem in Mexico's Drug War: ordinary citizens are reluctant to cooperate with the police and army for fear of retaliation by gang members.
* A recurring problem in single-story album "Globe-trotters", requiring to
* A recurring puzzle is a broken circut, and a few movable blocks lying around that happen to have corresponding circut lines etched on them. When finished, the circut glows, and
* A recurring research project carried out by organic chemists has been to develop a sugar with at least part of the molecule having a reversed chirality: the goal is to have a sugar that will trigger the taste buds for sweetness the same but be unable to be taken up by the body (and as a bonus, the bacteria that cause tooth decay), thus being calorie-free.
* A recurring robot-type are the Hulks. A bulky central metal-block with a cannon on each side which is used for explosive deposit in mines.
* A Recurring Sketch in the Dutch comedian Andre van Duin's 90's show, where he played
* A recurring sketch in the show's earlier history had the Olympia Cafe, run by a Greek immigrant staff led by
* A recurring theme. Aegon the Conqueror didn't seize the kingdoms because he had any claim or right, he seized them because he could. Power may come from knowledge, the gods, or be derived from the law, but ultimately a swordsman decides whether the king, the priest or the rich man live or die.
* A recurring theme in Act III is that Tsukune's group is repeatedly targeted by the other students at Yokai Academy, who believe them to be nothing but fakers and
* A recurring theme in European folklore is that someone goes to the land of the Fairies and stays for what seems like a short time (perhaps only a night), but
* A recurring theme in internet hypnofetish art. (While this may seem like a breach of the "
* A recurring theme in size magic, especially Tedd's experiments, is the difference between half
* A recurring theme is doing what must be done. As such, a lot of the main characters tend towards the anti-hero. For at one point, Krunch at one point kills a gnome out of necessity, and then annoyance when the gnome is not quite dead. Benny objects to working for free at one point, claiming that isn't how the world works.
* A recurring theme is to what degree the Animorphs' actions are war crimes, especially since the

* A recurring theme regarding Robins and Batgirls. In Batgirl: Year One, Dick (as Robin) is enamored with Barbara (as Batgirl) all while getting beat up by her.
* A recurring trait among the Wildlings, which examples including Tormund (possibly
* A recurring trope for the Thing — he will constantly threaten, shove around, fight with, and even beat up the Human Torch, but the moment anyone
* a red and blue dragon. They're supposedly extinct, but Aang and Zuko are fortunate enough to discover that this is a falsehood deliberately spread for the sake of the majestic reptiles.
* a Red Bull commercial. Three people notice the peel and carefully step over or around it. However, the guy who drank Red Bull uses it as a skateboard.
* A Red Burn deck uses this concept for the player. It essentially is filled up with a lot of direct damage spells, and hopes that you draw enough of them to kill the opponent with sheer momentum. The problem with this deck is, no matter what, the game will likely end on Turn 6; either they kill the opponent with their spells or die from the inevitable counter attack, since burn decks seldom have any creatures to actually defend the player.
* A Reddit Q&A held after the end of Volume 5 included a question about whether or not Qrow's weapon had a name. The creators admitted that the weapon didn't have a name until they spotted the
* are deliberately making it so to maintain Gensokyo's power balance between the races.
* are designed to be way too over-the-top and silly to be taken seriously, but due to the nature of the challenge it's hard not to feel something for the guy whenever a Pokémon faints.
* A red flash means the defender will recover first and can launch a counter attack.
*) are different animals. Furthermore, the song contains the phrase "Compared to dolphin, its very close cousin...". Dugong and dolphins are water mammals, but hardly 'very close cousins'. Manatees and dugongs (Sirenia) are more closely related to elephants and aardvarks than to dolphins, while cetaceans are closer to hippopotamuses and swine.
* are dirty and people need protection against them just as much as against ordinary criminals.
* A Red Light Area is the location of a porn cinema shooting by a nervous little Catholic boy in
* are doing anything improper and keeping it from them, they won't accidentally find out.
* a red paintjob, while in recent years Orks instead have access to generic Looted Wagons. Their weaponry tends to pack a punch, but every turn there's a chance that the driver will hit the wrong lever and go careening forward at full speed instead of firing.
* A red ring around the moon, known as blood on the moon, is also considered a ill portent. Oddly, a red moon, called a Blood Moon, is associated with feasting and is also known as a Hunter's Moon.
* A red shower is also the result of a Smile experiment on Andrei Ulmeyda, which happens to be filled with the diseases Ulmeyda infected himself with as a form of thrillseeking. It's so infectious it kills anyone hit with it except the Killer7 (
* A Red String appears in a flashback of Juri's recollections of her time spent with Shiori and an unnamed male character in
* A Red Stripe beer commercial (titled "Big Word") shows a man giving an office presentation. He uses the word "equanimity", and the Red Stripe Band bursts in with the following:
* A Red Sun Also Rises, a doubting priest and his hunchbacked sexton are taken by a tribe of cannibals and transported to an alien world which starts their adventure.
* A Redtail's Dream when Hannu wished it would stop snowing... and it did.
* A red, white and blue livery on Amtrak trains in the '90s was nicknamed the "Pepsi can" due to its resemblance to the Pepsi logo at the time.
* are easily trouncing, which Michael gives a big, sanctimonious speech about.

* A reenactment of Sarah Adler being condemned to death at Salem is portrayed through an
* are episode had Mac do a technical one of these when he follows his stalker to Chicago, and tries to throw his badge to get into the Tribune building. The Chicago Police Department had to remind him that badges only work in their jurisdiction and he had no power in Chicago.
* are, especially when it has an ulterior interest in the client. Lilah even gave the keynote speech at a public school just to get close to a young telekinetic. Holland's division sponsored a high-profile charity event with the intention of stealing upwards of 95% of the funds raised.
* are essentially family. They operate well regardless, except Commander Ike finds performance reviews awkward when he has to evaluate his sister, husband, best friend, and surrogate parents.
* are evil and are aligned with a faction of demons that is bent on destroying all life in the universe.
* A reexamination of the Alcubierre equations has shown that changing the geometry of the generating ring to a toroid, and thickening the bubble's walls to a millimetre, would lower the energy requirements for a given vessel and speed by a factor of about 10^18. NASA is currently running experiments to determine if an Alcubierre-like space can be created in the laboratory. If such spaces can be generated, a speed of slightly over 1% of
* are fae in origin — the third edition Power of Silver, for example, is of Daoine Sidhe extraction.
* Are far less discriminating with who they do and do not torture or attack.
* are females. Ivo Roberto voiced Plugsy in both the 1996 and 2009 dubs.
* are fettered by morals. For example, an unfettered may evaluate that a chance at achieving their goal is outweighed what it would cost them to take it, if refraining from making that sacrifice would allow them a better chance of success in the future.
* a refinery for monopole ore orbiting the planet Fantoma) and Space Station V (an Invid base).
* are forced to get jobs that specializing in meat, including smoothies made entirely of meat.
* are found everywhere in Metal, anytime something gets too awesome, some of the energy will be let out with a yell..
* "Are "Friends" Electric?", "Down in the Park" and other songs by Tubeway Army are usually credited, even by radio stations, as solo recordings by frontman
* are from the Fire Nation, there's the Day of Black Sun, a solar eclipse that strips Firebenders of their powers and makes the Fire Nation vulnerable to attack.
* are function purely as rockets (and all the wings, jet engines, and other plane bits become expensive dead weight until you're back in atmosphere).
* are genuinely frightening and sound difficult to execute regardless.
Specifically, he wants to nuke areas even though people may still be alive in them and the nukes would be unlikely to destroy all of the zombies and also irradiate them, and he proposes feeding the bodies of dead humans to the zombies without any description of how to get out and leave the bodies, or how to get that many of them.
* are ghost, so dropping them in human jail would't help much. There is a ghost jail, but the warden wants Danny's head on a stick so going there to drop them off isn't an option either.
* A regional judge ordered all telephone operators in Brazil to block WhatsApp, the most popular messaging app in the country, for failing to turn over data as part of an ongoing drug trafficking investigation. The block was lifted some days after.
* are going to fall into the water several times throughout the game, just being a strong swimmer is very likely to get a contestant to the final round. This is helped by the fact that obstacles slow down and get easier to cross after repeated failures, so huge amounts of time can be saved by shortening the inevitable swims.
* A regular feature as the final challenge of games. Upon felling the

* A regular source of call-outs for coastal search and rescue organisations anywhere there's a lot of amateur sailors.
* A regular variation on this trope is that one parent gets the sole legal and physical/residential custody of the children
* are harboring Blood Mages and Abominations, firstly because the evidence of their existence would be all the Templars need to oppress them further or outright purge them, and secondly because if the Templars decide to do that anyway the Circle will need all the power they can get on their side. Their necessary evil comes to the same logical conclusion at the same time as the Templars'.
* are has also stated that the IVs' physical augmentations are inferior to those of their predecessors.
* are have shown that more progressive Elite factions like the Swords of Sanghelios are starting to allow women to serve in the military.
* are. He consented to play Klink only on the condition that Hogan and company would always win the day and that Klink was portrayed as a complete idiot rather than a competent Nazi who's simply outplayed by the heroes. This did vary depending on the episode; sometimes he's just an idiot, sometimes he's aware of what they're doing but pretends not to, and a few times he's actively against the Nazi regime himself.
* are hemalurgic spikes. The kandra have neither the ability nor the desire to make the blessings themselves, leaving them completely at the mercy of their creator.
* are heroes respectively, only to prove victorious in a later rematch.
* are highly advanced, such that he can put up a good fight against both Saber and Assassin. This makes sense too, as his ace in the hole is basically a pocket dimension with an endless supply of magical blades- rather useless if one was not able to actually use said blades. His skill with these many weapons neatly contrasts Gilgamesh, whose Gate of Babylon gives him an endless supply of vastly superior blades, but since Gilgamesh is only decently skilled at swordsmanship and can't bring out their full power he prefers to just magically fire them from a distance.
* Are his memories and feelings actually his own or are they mere fabrications so that a clueless persona will control the body and fool Alovenus into underestimating Ruphas?
* are hitting each other, although they at least try to pull their punches.
* are human, a result of the Culture grabbing some of them to spread out across the universe.
* are, if someone is in doubt about their issues, it's usually best to seek professional advice.
* are ignored or even forgotten, including by the story. The Anla'shok (Rangers) were often considered a fourth caste, separated by all the others. The Minbari system was consciously modeled on the Medieval European idea that society was divided between those who work (peasants, serfs, and craftsmen), those who fight (knights and other members of the aristocracy), and those who pray (priests, nuns, and monks).
* are imprisoned by the Soul Society after Uryu, Orihime, and Rukia are executed. Aizen then arrives and gives them a choice: stay and be executed by the Soul Society, or join him in Heuco Mundo to develop their powers and get vengeance. The two heroes accept.
* are in all but name. The DVD special features on the minor heroes in the movie even parodies Cyclops' infamously bland personality by having Gazerbeam be an incredibly dull person.
* are innocent of almost every crime, but Casey points out there's nothing she can do about the gun charge one of them is facing. Fin replies that the gun was "lost" coming back from the crime scene. Casey (and Cragen) sees it for the lie it is, but goes along with it. With that charge gone too, the brothers get to walk away free.
* are insane, their consent (or awareness) about this is moot. Many of them basically live out their entire time on medication, with little to no awareness of what's around.
* are instead of something with a motor, the Deathskulls like to loot and utilize

enemy equipment, while the Blood Axes like to turn the enemy's tactics against them. If the Orks can't find a better enemy to fight, they'll war with each other over these clan rivalries.
* are. In their final bout of Lensman style ingenuity, SG-1 defeat the Ori with a device that "neutralizes" them. They later have to strip the last surviving Ori of its power with an ancient brainwashing device and an arsenal of Asgard technology.
* are inverted and played with. While Steve did not do a good job, the jury found that because they had sex on tape, awarded the Rhoades with what they asked while the Bundys got nothing because "they didn't have sex."
* are involved in criminal activity such as false credit cards and fake IDs, this is done for sustenance and to further their mission.
* A rejected concept for the game included the idea of the Elements bonding through sex with each other. Seeing as the first round was all men and the second is all female except for one man...
* are justified in killing or stealing from most monsters. There are, however, occasional variations — you might meet the rare non-evil goblin, for example, but it would be the result of crossbreeding, magic, etc. — never willing change.
* are keeping Stahn's death secret from Kyle, fearing he couldn't handle the truth and might end up like his father).
* are kept cloistered away and pampered by their brothers, fathers and uncles. No Dwarf would even think to harm or mistreat a woman, and the Comapny is outright horrified to learn Willowyn's father threw his own daughter in the streets because she wasn't ladylike.
* are known: Katniss Everdeen (and her sister, Primrose), Peeta Mellark, Gale Hawthorne (and his mother, Hazelle, and siblings, Rory, Vick, and Posy), Madge Undersee, Haymitch Abernathy, Effie Trinket, Caesar Flickerman, Coriolanus Snow, Plutarch Heavensbee, Romulus Thread, Finnick Odair, Johanna Mason, Annie Cresta, Maysilee Donner, and Alma Coin. Everyone else presumably have surnames; Katniss simply doesn't know, and because the POV is solely from her, so do the readers.
* are known to be extremely repetitive (especially during dusk to early morning hours), sometimes both playing as one whole ad break (as shown in the video).
* A "related article" that appears as a sort of ad on some websites had the heading "Get To See The Inside Out DreamWorks Didn't Want You To Know".
* A related but separate reveal is that Seteth is actually Flayn's father, not her brother as he'd previously insisted. Despite Seteth claiming to look young for his age, he still looks like he could be at least a couple decades older than her (ignoring the fact that they're both
* A related complaint is that it makes it easier to make a "badly written" program that still "works". That becomes a problem when another programmer has to modify said program.
* A related concept is that of 'Marginal Gains' (popularised as a term by Team Sky in Cycling). Spending time calculating and adopting a perfect pedalling motion, or doing yoga to improve flexibility, or adjusting the brake position to improve aerodynamics will not, on their own, produce drastically different results. But doing all of these, and more, in
* A related concept to the true airborne aircraft carrier is the "parasite aircraft", in which one aircraft is launched in midair by another, but lands on the ground. This has actually been attempted in real life much more frequently. For example:
* A related discussion, next to a large swimming pool-sized vat of stem cells.
* A related error is the idea of "nuclear launch codes" that the President, or a similar official, has
* A related example, a man once tried to beat a DUI by eating his own underwear in the hopes that it would absorb the alcohol and defeat the Breathalyzer.
* A related example to this, even if unmanned and of course designed for scientific purposes, are probes as
* A related genetic term is mosaicism, which is also a case of there being multiple genotypes within a single organism. The end result is similar, with the

main distinction being the cause (chimerae happen when multiple fertilized eggs combine; in a mosaic all the cells are from a single fertilized egg, with something having gone "wrong" at some point during cell replication
* A related gimmick is, as an example, using a dirtier floor or a darker stain on a lighter shirt for your product, and only cleaning the middle. Because the contrast between cleaned and uncleaned is greater, the product seems more effective.
* A related idea mentioned is "Nuclear salt water" engines. The propellant is just regular water with thorium salt dissolved in it. Once it's pumped out of the neutron-absorbing holding tanks, the salt
* A related issue is that the popularity of science-fiction has raised the bar on what would have, in the past, been considered unequivocal proof of a deity because even if the technology doesn't exist right now to replicate the effect, one can imagine technology that could. If someone were walking unscathed through a blazing inferno a thousand years ago, most people would assume magic or divine intervention. Were the same thing to occur today, the first thought in the minds of many people would be "force field". However, at the time this page was made, force fields didn't exist in real life, and that argument doesn't rule out the explanations for miracles that occurred prior to the existence of advanced technology.
* A related mechanic is the "three-switch rule," which has been around at least since
* A related problem is that Trantor is stated to be a single, planet-covering city hundreds or thousands of levels deep, and there are special observation towers that you have to use if you want to see the sky. There's absolutely no way that you need that kind of urban structure to house a mere 40 billion people when we have 7 billion on Earth with cities covering only a few per cent of the land surface and most of that you can't travel around in much without going outside. (Yes, there are places where you can travel around significant sections of cities entirely indoors, but you have to do it intentionally and it's both limiting and inconvenient in most places where it's possible at all.) Also, if the entire planet is underground, what exactly is stopping the Trantorians from putting the dirt back on the unused surface and growing their own food?
* A related problem was that communicators on the show were made smaller than those in the
* A related real-life example would be the late golfer Payne Stewart, who, due to his NFL sponsorship, eventually started wearing attire matched to the colours of the local NFL team. As the last golfer on tour to wear a traditional golf outfit, the results were often humourous.
* A related saying: "Heaven doesn't want them, and Hell is afraid they'd take over."
* A related short story (can't remember the title just now), has a book critic happen upon
* A related special rule, new to 6th edition, specifically deals with infantry who find themselves in a fight with a
* A related story involves a sculpture submitted to a museum. The museum threw out the sculpture, and instead put the stand it was on on display, mistaking it for actual art.
* A related system uses a card that can store all of a player's game data like a memory card. These tend to be far more expensive, with some games offering cards with different capacities depending on the price. Naturally each is specific to one game, but there are cards that stores multiple games from the same company, especially if they are meant for arcade games. Bandai Namco's Banapassport and Sega's Aime are even cross compatible!
* A related test was Project 4.1, which involved studying the effects of fallout from the Castle Bravo nuclear test on the residents of the Marshall islands.
* A related trend during the 2000s was the Post-9/11 Military Game, which had you playing as a Western soldier or operative fighting terrorists in the Middle East or in other global hot zones. The

* A related trope, made popular by stories of Prester John and Sir John Mandeville, was the semi-human monster that inhabited faraway lands, typically India or Africa. This creature was frequently cannibalistic and had very different sexual or cultural norms from Christian civilization in Europe. Although foreigners continued to be depicted very negatively in the West for centuries, the exploration of the entire world and Scientific Revolution pretty much killed the idea of human-like monsters that inhabited unexplored lands.
* A relatively downplayed case of this seems to be how the connection between a
* A relatively mild example often ensues for new recruits joining the military, particularly in more individualistic cultures where one isn't accustomed to taking orders from arbitrarily appointed superiors and having to place the group before themselves. Not to mention little things like
* A relatively minor, but still noticeable one was made to the war between the Gods and the
* A relatively minor one, galactically speaking, is Consular companion Felix Iresso in
* A relatively mundane, real-life medical procedure, like an organ transplant or
* A relatively obscure dog breed, the Weimaraner has gained popularity through William Wegman's photos and videos featuring this breed.
* A (relatively) poor replacement for Bullingham after the death of the actor who played him (Bill Fraiser) was Mr Justice Graves, often referred to as Mr Injustice Gravestone. He is less aggressive than Bullingham but nonetheless tries to unfairly influence the jury, only with more subtle methods.
* A relatively tame one compared to the three above it, but "Sleepover at Sikowitz's" features a sub-plot where Tori's parents are celebrating their anniversary by watching
* A released audio segment depicting the training for the Space Shuttle's earliest available abort mode, RTLS (Return To Launch Site), was this. Engine 1 (the center engine) failed approximately 30 seconds after liftoff. The trainers were sporting enough to wait until after the shuttle had gotten some return velocity to Kennedy Space Center (but not enough) before killing Engine 2 (the starboard engine) - mostly because the Shuttle's response to losing two engines during the powered pitch-around maneuver would be to drop directly into the Atlantic Ocean. Engine 3 died shortly before fuel exhaustion, leaving a contingency abort (essentially, ditching the shuttle as close to land as possible and abandoning ship via the mid-deck) the only remaining option. It's easy to tell why the astronauts who flew the Shuttle never, ever wanted to actually
* A reliable indicator of critical special pleading for genre works is to claim that they "transcend the genre" — which usually means instead that the critic in question has transcended their snobbery.
* A religion teacher for the deaf once confused the signs "to feed" and "to eat" — in telling the story of the feeding of the five thousand. This same religious teacher, in trying to sign "water," made the sign with the wrong hand, consequently signing "beer" instead. When her audience was incredulous, she dug herself deeper, trying to sign that we need water to live, that our bodies are made mostly of water, and that the oceans are filled with water (only she kept signing "beer" instead of "water").
* A religious Jewish Israeli joke features a young boy asking his father what "gay" means. The father explains him the whole shtick in detail, and finally the shocked little boy asks, "So what's '
* a religious zealot bent on utter domination of the galaxy and a cook who couldn't make pie he was kind of a step up for her too.
* are likely to be tidally locked flares that put the Sun's flares to shame.
* are little more than computer programs, unless it happens to achieve sentience and becomes an AI entity.
* A reluctant admission, either because they've changed too much to return to the way things were or are loath to admit the enjoyment they get from their new lifestyle.
* A reluctant example (on the part of the guardian) in Maurine Whipple's novel of

pioneers in southern Utah
* A remake of the fourth game was made for PlayStation and announced for the U.S., but due to the aforementioned development team disbanding, it never came to fruition without someone to program the game to implement the English script, and the frustration continued when
* are), making this seem even more like a metaphor for gender identity; it's not about what they were born as, but what they want to live as.
* are mammary glands and instead what appear to be such actually serve a different purpose. For example:
* A remarkable number of tools assume (often with dangerous consequences) that the user is right-handed.
* A remarkably large part of the marsupial order Diprotodondia is made up of what look like ambulatory plush toys. Along with wallabies, the order includes the aforementioned quokka, the
* A Remedy to Cure All Ills, in which Merln uses magic to save Uther while he is unconscious... but Edwin specifically said a few scenes earlier than Uther would be awake and aware while he was dying, suggesting that, maybe, Uther heard everything but is letting Merlin live as a reward for saving him.
* are mentioned) and the war between two super-droid species that forced the Yuuzhan Vong to abandon their galaxy.
* are mentioned to be eating popcorn while watching Anakin and Padme argue.
* are miserable in close combat., which are inexpensive (both in lore and on the tabletop), reasonably well armed and, critically, infinitely more expendable than the living soldiers around them.
* are more concussive wind jutsus as well, like Orochimaru and Gaara's Great Breakthrough or Kakuzu's Pressure Damage. The Tailed Beasts are capable of leveling towns and causing all sorts of natural disasters just by roaring.
* Are mostly fuel tanks with a controlled explosion chamber in the back, with comparatively little volume for basic life support and human habitation, or ...
* Arena, and has taken his place as Emperor, using his magic to look and sound just like Septim.
* Arena and he was imprisoned, kicking off the events of the game. She is still able to guide the hero from afterlife, however.
* Arena case, he is constrained to frame you for a crime and throw you in prison first, as being too blatant about it would just make even more people suspicious), but also because many of his opponents were clever enough to remain hidden.
* Arena classic, Jagar Tharn, who uses magic to impersonate the Emperor. Defeating Tharn and rescuing the Emperor is the impetus for the plot. (In-universe, this event is known as the Imperial Simulacrum.)
* Arena Coliseo was the first arena built exclusively for lucha libre, its construction funded by
* Arena, either didn't or couldn't bother with preventing wars between and within the provinces, leading to several separate conflicts (such the Arnesian War between Argonia and Morrowind, or the War of the Bend'r-makh between Skyrim on one side, and High Rock and Hammerfell on the other) whose consequences still undermine Imperial rule even after Tharn is overthrown and the true Uriel VII restored. Even in other, less usurpation-filled times, smaller local wars were still tolerated within the Empire, such as the War of Betony between the Hammerfell kingdom of Sentinel and the High Rock kingdom of Daggerfall.
* Arena Football, 2005 playoffs: Chicago trails Colorado by 3 on the final play of the game. Colorado intercepts Chicago's pass, and the confetti flies... but there's a penalty on the play on Colorado, so crew have to clean up the confetti before Chicago kicks in a game tying-field goal. Colorado cleans up in overtime with a touchdown.
* Arena know about the Agent's involvement have reasons for keeping quiet about it and the Agent's identity.
* Arena lets you cast it from a place outside of your hand it'll appear in a seperate "hand" beside your normal one.
* are name-dropped once each (and closely together in the same song), but just like

with Enjolras, it's easy to miss.
* Arena Rock. Invented when the Beatles performed at Che Stadion in the USA.
* Arena Rock members, Alias, which nabbed a #2 hit with "More Than Words Can Say" in 1990.
* Arena Rock, who were accused of using their industry connections (they'd all been prolific session musicians before they formed the band) to rig the Grammy Awards in 1983.
* Arena. She didn't get much heat from the tabloids for switching to the more risqué role, however.
* Arenas of Destruction, the winner (Thor) was an unlockable robot in the game.
* Arenas, some episodes are centered on characters which aren't called Doom.
* Arena; the guy in the Gorn suit moves slowly, apparently in an attempt to make the Gorn look big and ponderous... but it makes the fight seem ridiculous. The Gorn also doesn't seem to be able to use his super-strength to overpower Kirk or use his big teeth to bite.
* Arena), the protagonist dresses up in the garb of the long destroyed Fifth-House in the Four House Annual Battle Tournament.
* Arena, the Skeleton Key will open any non-magical locked door or chest once per day.
* Arena tournaments played this trope straight in the sense that paying players are more likely to get powerful monsters than the ones who don't, which gives unfair advantage than those who are not. It certainly does not help that most battles, unless players are very unlucky, ends in 3 turns at most. This is further exacerbated by the existence of ability cards which its usage is locked by ranks, which paying players is more likely to have higher ranks and gain more slots than those who not.
* Arena. Typical abilities include fast movement speed, relatively strong melee attacks, poison (be it a spell or a natural part of their attack), and webs that paralyze or otherwise slow a target's movement speed.
* Arena: Unlike its successors, cities at night feature enemies that can and will kill you, though during the day they're nowhere to be seen.
* Arena, with influences including Marillion and Pink Floyd, and a dash of anger to go with the clown's tears.
* Arena with lycanthropy, as the two diseases are mutually exclusive (barring cheats or mods).
* Arena.Xlsm being used on their behalf is another question), which is a truly immense amount, and will require you to make do without many of the lesser spells that would have likely proved lifesaving otherwise.
* Arena.Xlsm, most of the enemies from there and to the end are the much stronger "Evil" versions of the earlier enemies.
* Arena.Xlsm, Succubi have an upgraded version named Demonic Temptress, while Wraiths are likewise an elite version of Spooky Ghosts.
* A renegade Yeerk that couldn't afford to go back to the base found a way to survive anyway,
* are nicer, being best friends with Juri and being a lot nicer to the other Sailor Scouts such as taking Ami to the titular bar.
* are not actually demons in the setting to be this in the comic itself, despite reputation — the evil ones just get all the press, because torturing or seducing people makes for a more exciting story than helping sick children.
* are not available to him while he is trapped in his house. The door unlocks.
* are notion of body and soul being inextricably interconnected. So yes, we'll have bodies in Heaven, just maybe different, and soul is as much a part of "you" as your leg is.
* are not truly zombies at all. They are in fact the primordial state of humanity prior to the discovery of the First Flame that introduced disparity to the world such as life and death. It was the Lord Souls that granted humans true life (and with it true death). Hollowing is simply humans reverting to their original state as beings who neither lived nor died, but simply existed.
* aren't, and are easily capable of downing aircraft that fly into them.

* aren't an item, just good friends...utterly oblivious to the clear chagrin of Marty, who is sitting right there with them.
* aren't annoying younger siblings... by setting out to break a world teeter-totter record.
* aren't are usually those maintained and/or built by post-War factions like the NCR; the NCR's firepower in fact almost entirely avert this trope thanks to the Gun Runners mass-producing new firearms based on Pre-War schematics.
* aren't. can't use your power on them. Of course, this is the same interlude where we see what an unfettered pyrokinetic can really do, so it seems morality and a reluctance to hurt people are definite limiters.
* aren't Children are evil, and those who aren't will end up used or mistreated by those who are.
* aren't even physically capable of eating, their sole purpose in life is to sniff out a female (multiple times their size) and bite into them, releasing an enzyme that slowly reduces the male to a pimple with gonads for a ready supply of semen whenever the female's ready to lay eggs.
* aren't even supposed to hesitate when choosing the right option, and whether you know that forks aren't allowed in prison cells is secondary.
* aren't homophones. Likewise for "Mary/marry/merry" (in linguistics, it's actually known as the "Mary/marry/merry merger").
* aren't humanoid and can't shapeshift) to show their devotion to the goddess. Every priestess goes through the ritual as part of initiation, and rarely it results in a powerful half-fiend called a Draegloth, considered sacred to Lolthites and a sign of favor from the goddess. As if it wasn't already clear Lolth is batshit insane.
* aren't in sync be explained this easily, such as Littlefinger learning of Sansa's escape and travelling halfway up the continent from the Vale to the Wall (half of it with an army) to meet with Sansa in the span of at most a few weeks when judged by the events of Sansa's own plotline.
* aren't jihadists isn't made apparent to the viewer until later in the film, when the video of Tony being held captive is given in-universe subtitles, which seems to be deliberate.
* aren't just restricted to jokes about Marines; if you're Army, you tell that about Navy, Air Force, etc; if you're Navy, you tell it about the Army, and so forth), there is some truth to the fact that, in general, Marine Corps training creates service members who act first and think later, often to their own detriment. Of course, in the Marine style of warfare, spending time thinking things through thoroughly before acting is suicide.
* aren't liabilities are Sizemax and Lemure, and neither of them are really good enough to carry the rest of the team. Of them all, it is probably Kismet (the team leader) who is the worst offender; when she is knocked out cold during a training session, the others manage to pull things together enough to successfully complete the mission. Cerebrex and Dynamaxx would be passable team-mates if it weren't for their personality flaws (serious enough in the case of Cerbrex, aka Captain Canada!, that it's been used against him in a Combat Final), but Donner is just an incompetent boob.
* aren't quite familiar with technical terms and jargon, so use Buffy Speak when the right words don't come to mind.
* aren't Redgar think a specter will care that its murderer has been brought to justice, and is very wrong.
* aren't specifically designed to make your hangover a little bit worse than it would otherwise be. Then there's the occasional bit of memetic warfare, with companies like Avalon Toys (shoot werewolves like Action Bill does!) and Omni Television.
* aren't taught to the mortals because of how everything being arbitrary and chaotic was hellish for most of humanity. For instance, there's not actually any such thing as gravity: you fall at 9.8 m/s2 near the earth's surface because that idea is engraved on the Sleeper unconscious by a wizard-run education system.
* "Aren't they still out of ammo yet?" A kitchen sink flies at Wolverine straight

into the face, and Punisher comments: "NOW they are out of ammo!"
* aren't worth using unless you're already winning or defending a very small area. The normal Tank, however, is probably the best all-around land unit - fast, armored, relatively cheap, enough firepower to destroy or cripple all other land units (except the bigger tanks).
* "Aren't you a little young to [whatever Phineas and Ferb are currently doing]?" "Why, yes. Yes I am."
* Aren't You Forgetting Something, Fiona?, Fiona the elephant has a poor memory, unlike the rest of her elephant family. When she signs up for a new exercise class, she ties a string around her trunk to remember where she's going, but forgets anyway. Thinking the string is a festive ribbon for a party, she buys a gift for her best friend, whose birthday isn't for another month. When she finally gets to the exercise class, the string makes a useful headband.
* Aren't You Going to Ravish Me?: Women should be offended not being raped because sexual assault is a compliment and a blessing, like any good rape victim will tell you!
* Aren't you the world champion? fear of being swatted away by Cell or ending as collateral damage of the Cell Juniors' rampage.
* A reoccurring joke in the Baldur's Gate series is references to, and eventually the appearance of, Drizzt Do'Urden - another drow who forsook his evil birthright to champion goodness and justice. He is the archetype within RPG systems as being the one exception to an overwhelming
* are of Crona, and constantly molesting and harassing them (pulling up their clothes, showing underwear).
* Areola, except the main female character looking uncomfortable the first time she's introduced. Later, during a party, another nude girl sees her and screams out "Oh my god! She totally copied my outfit!" When speaking, her English-but-heavily-accented (with random accents) voice is subtitled, with the subtitles moving out of the way to make sure they do not block her breasts in any way.
* Areola, she's standing naked in a school hallway next to a sign that says "Dress Code Strictly Enforced".
* are on the level of gods. There are other legendary Pokémon that are considered godlike, but it's more ambiguous if there are more than one of them or not.
* are (or "very attractive", at least), he pulls out ones that are older and even more noticeable.
* a repairman working on the jukebox isn't surprised to find them inside.
* are passing references series, but it hasn't been explored in any great detail.
* A repeated problem for Lopez, though inverted. He spends the latter half of
* A repeating gag is that Calvin, for all his artistic pretension, definitely wants in on the market share.
* a repeat of episode "Eek, An Urchin!" on NHK E-Tele got interrupted for news of a major earthquake in Miyagi prefecture.
* A repeat offender eats and drinks inside a supermarket and leaves without paying. When Loss Prevention Agents catch him, he denies it...
* , a repeat performance "afforded Harry the opportunity to avoid Filch and gave him another good reason to poke his eyes out with a blunted letter opener."
* are photographed kissing during their date, violating anti-fraternization rules. The omake chapter that follows has a self-insert character show up and chew them out for harassing her.
* are picture in order to preserve a method of filming that is inherently inaccurate, to begin with.
* a replica. It's just as hideous as the real thing, but they seemed to market it as if it were cute, making it questionable why anyone would want to buy this.
* a replica of the series protagonist, Sora, whose purpose is to serve the Organization and prevent Sora from waking up to defeat them.
* are police or police-aligned organizations themselves. tend to result in paid suspension or reassignment to another precinct or department at most.
* A reporter does this when Mr. Burns spits out a piece of a mutant fish that he

contaminated.
* A reporter is eaten on camera (though off-screen) at the end of the second episode of
* A report of a kid who loved to take naps with her Cthulhu plush toy: "Me and Cthulhu are gonna go to sleep now, but when we wake up, we're gonna rise out of the ocean and EAT YOU!"
* are possessed by the Devil when they write and/or perform their songs. Among other things. Apparently it was over seven hours long. There was a sequel, released in 2001, titled "Hell's Bells 2." It suggested that many rock bands promoted LaVeyan Satanism through their general attitude, even though most of the bands they described probably had little to no actual knowledge of LaVey.
* are pronounced the same, and 月坡 and 肚皮 are written with the same strokes, but with the left part of 坡 moved onto 肚. (Compounding the problem is the tendency of some fonts to not disambiguate between the moon radical and the meat radical.)
* A reputed prank to create the same effect in a school lab is to connect the water and gas taps with a hose, and briefly turn both on. Then when the next class want to use the bunsen burners, water will come out of them.
* are remnants of pre-Event civilization (the Atomicists worship "the power of Atom" without really knowing what that is, and the Rust Cultists see the machinery of old as the creation of a higher power), and they have re-purposed related non-material concepts into their faith — for example, the Atomicist religious leadership, when founded, is the Atomic Energy Commission.
* are right about to be destroyed by aliens, them, and the rest of the galaxy.
* Ares adventure "The Treasure of Socantri". One of the new monsters included in the adventure is a man-sized intelligent spider covered with long hair and capable of casting many spells of Earth Magic.
* Ares and, in some legends, threw Hephaestus off of Olympus for being born ugly.
* Ares before immediately paying more attention to Pegasus than anything else. His reaction to Athena having usurped Zeus is to ask what happened but be far more interested in playing with Athena's computer than hearing the answer to his question.
* Ares believes he should have a better reputation among mortals because of the positive things war brings with it.
* Ares bloodthirsty as Ares. Then there's Ares's sister/sidekick Enyo, whose epithets include "blood-splattered", "destroyer of cities", and "impartial" — because she would support both sides of a battle to maximize the slaughter.
* Ares Conventions and nuclear weapons. It doesn't take long for the Inner Sphere powers to decide that if the Blakists are going to violate the Conventions so flagrantly, they're not going to be protected by them either, and start nuking the Blakists right back.
* Ares Conventions (who would go on to use the same argument to 'convince' the Periphery realms to join it).
* Ares, could use whatever weapon he pleased. He chooses to use a savage axe.
* a rescued Greyhound, of all things, is surrogate mom to everything from puppies to a barn owl.
* Ares=Doctor Cottle, the soldier who has seen more war than any of the others.
* A researcher asked the machine to give him "Whatever the next person orders". The machine simply waited until someone else ordered something and gave two drinks at once, which naturally overflowed the cup and spilled all over the floor.
* A researcher told the machine "Surprise me". It gave him a cup of superheated water which exploded into boiling-hot steam when disturbed. The researcher confirmed that this event surprised him.
* A researcher working in the CIA has seen this phenomenon, and found it to be from the ventilation fan which made his eyeballs resonate, giving false images.
* are self-admitted enslavers of multiple species across the galaxy and.
* A reset button built into Sburb, to reset the ENTIRE UNIVERSE in the event of an unwinnable scenario, designed to make the new players much more capable than the previous.

* Ares Express, Sweetness searches through a mirror maze for one image that doesn't match her every move, because it's an independent virtual-reality copy of her.
* Ares Extinction Agenda can be summarized as follows: Some alien(s) created all life in the universe. Said alien(s) have decided humanity is destructive and wasteful and should be wiped out. A robot humans built disagrees, strongly.
* A.R.E.S. Extinction Agenda in 2013, with updated graphics, new character artwork, redesigned levels, new animated cut-scenes, and introduces a new playable character Tarus. This version was later back ported to Steam a year later as a separate title from the original.
* Ares, god of war and the ravages of war, was associated with serpents and vultures.
* Ares. He used to be more cheerful in his childhood, when he didn't have peek-a-bangs.
* Ares his fights were against Aphrodite and carried out by proxy since they and Artemis were the only Olympians still around and he and Aphrodite had a hate/love thing going on.
* are shows the Tau hunting for the technology behind the Battle Sister acts of faith (needless to say, without finding it).
* are, similar to the Alien Sky example of Lorkhan and the Aedra above. The Daedric realms are implied to be similarly shaped into something that mortals can comprehend, albeit to a more limited degree. They are still alien places even when shaped into something that mortals can perceive, and a few of these Daedric realities are very lethal to the unprepared.
* Ares is an interesting version of this. When he puts his mind to it he is a highly skilled warrior and not a half-bad tactician. However, he usually forsakes skill to rely on brute power and innate toughness. So he grabs whatever large weapon available and attacks head-on. This works great when he is facing opponents far weaker than him, but he often gets defeated by enemies on his level or even weaker because they outsmart him or bother to use fighting skills.
* Ares is often times depicted as rather handsome. In the movie, he looks like an average middle-aged man.
* Ares is recognized as the god of war and embodiment of physical power, but tends to lose or get humiliated in nearly every story about him. He gets trapped and humiliated by Hephaestus when Ares and Aphrodite (Hephaestus' consort) are caught in an illicit love affair, is terrified into retreating from the monster Typhon, loses a boxing match to Apollo, ends up wounded by the hero
* a resistance-operated transport that Julia almost took to leave Madrid had all its passengers gunned down by the police is discovered by everyone involved with it via the newspaper's front page.
* are slobs, and since she knows almost nothing about this child, it's entirely possible she's one of the supposedly rare messy ones.
* are slow!", which then causes Homer to go through the exact same thought process again until Lenny tells him to leave.
* Ares magazine #16 game "The High Crusade". One of the possible Fleet Combat Table results is that the battle area is filled with large and small asteroids. One of the two fleets involved will take significant damage from running into them.
* Ares magazine #6 game "Voyage of the BSM Pandora". One of the possible encounters in the game is a huge silicon-based monster which is powerful enough to pulverize one of the expedition's robots.
* Ares magazine #6 game "Voyage of the BSM Pandora". One possible monster an expedition can encounter is a large scorpion-like monster with a deadly tail (that is capable of killing a human in one blow), strong armor and razor-sharp talons.
* Ares magazine, article "The Return of the Stainless Steel Rat". The main computer on a space station has a memory capacity 100 times that of a human being. It somehow becomes intelligent and hostile to the inhabitants of the station, killing some and holding the rest captive.
* Ares maintains his tie to both serpents and dogs, mostly visible through his sons Phobos and Deimos who accompany him on the battlefield in the guise of monstrous dogs, and Phobos sometimes manifesting his head as writhing cobras.

* A Resounding Tinkle are quite aware they are in a play. There are frequent conversations about whether or not the audience will understand what's going on, at one point two characters are on stage being silent and then debate as to whether they should entertain the audience or not, at another point one of the characters wanders off the stage to talk to two cleaners in the theatre, all the characters are unceremoniously pushed off-stage in order for a group of critics to come on and debate the play, and the play ends when a member of the audience complains that the audience have had quite enough and demands to speak to the producer; the play concluding with all the characters thanking the audience for putting up with them.
* A response to the term "normal" being used to mean "not a Telepath".
* Ares rules. The Enchantment of Mental Attack requires the user to hide his body in a safe place, then send his mind out to attack opponents on the Astral Plane.
* Ares saves Diana's life on at least two occasions after learning she's his granddaughter (he didn't realize Hippolyta was his daughter). On both occasions his actions have the added benifit (from his perspective) of ticking off Zeus, but this doesn't make him any more friendly or less dangerous, he's still Ares through and through and his care of his children and grandchildren is just as key to his character as his
* Ares seemed to be going pretty strong, too. Although it's debatable whether he actually slept with her, just granted her "boons" for being a great
* Ares shows up, rather briefly, in the seventh book, along with Heracles. Athena, meanwhile, proves to be practically the only Greek god who the characters actually like.
* Ares suffers a problem during the 327th year of its voyage between the stars. A meteor impact disables the computer controlling the planet simulation deck (where colonists learn how to live on a planet) and a worm causes the backup computer to malfunction. As a result, the simulation becomes extremely dangerous and several people training on the deck are killed.
* are standard gruff fighters and miners who distrust and dislike magic due to its potential for corruption. They use runes instead, which aren't as powerful but are far more reliable and less likely to lead to madness.
* A restaurant also sold, for a limited time, a real life version of
* A restaurant chain, Raising Cane's, specializes in chicken fingers. That is, besides beverages, its menu consists of a single entree (chicken fingers), three sides (coleslaw, french fries, Texas toast), and the signature dipping sauce. Everything else on the menu is a combination of the above five items.
* A restaurant in Amsterdam reads "Mister Coco's: Lousy Food and Warm Beer"!
* A restaurant sign extols passersby to "try our new gluten-free fries!" Potatoes normally don't have any gluten. Except most fries are fried in the same oil as gluten products, and certainly stored with them and some of the salts/miscellaneous added extras contain gluten. It's super necessary to label what you have that's fully non-contaminated, even if it seems pretty dumb to the layperson, because of life-threatening conditions like coeliac disease. Also note that some fries are breaded.
* a restaurant that doesn't deliver OR make pizzas by throwing pizza at him.
* , Ares, the God of War attempts to tempt Superman into joining him, which fails.
* Ares, the God of War, is considered this, though he likes to fancy himself as a God of Order.
* a result of her being raped when he and his army are marching through the area when he's an adult.
* are superhuman, but also overspecialized and much less adaptable. Apparently, the other cultures in CoDo space decided to keep their options open rather than risk brainlocking themselves racially.
* are Superweapons, Geonosis is a Factory world, Tatooine is a minor Underworld, and Yavin and Hoth were strategic locations. Naboo was Blockaded for a while.
* a resurrection spell. It used to be stored in the Cornwall Institute, but has changed hands many times because many evildoers want to use them for their own ends. Its current whereabouts is unknown.
* ARES Warbots directly onto the battlefield. It's recommended to drop directly

onto an enemy, as they stun units they land on.
* Ares was madly in love with Xena when she was a warlord, and most of his villainous schemes against her were in hopes of getting her to revert to her old ways.
* Ares, which smoothly segue from scrolling stars at normal speeds to Streaming Stars at FTL speeds.
* Ares women exactly, but he thinks they're inherently weak and foolish, so much so he refused to allow his son's mother contact with the boy, as her influence would only weaken him.
* Arete, a mage "knows" that they can only change things through a focus. With greater mastery comes the realization that the tools are unnecessary — and the control to manage without them.
* are technically the same person. Korra is the reincarnation of Aang.
* Aretezzo's Cane is just a cane used as a crude bludgeon, but it can gain power according to (depending on the enchantment chosen) the user's diplomatic or intimidation prowess. It also provides resistance to dexterity afflictions by being usable as a cane.
* Aretha Franklin in particular. In fact, most of the musicians who appeared in that film credit it with saving their careers.
* Aretha Franklin, sang for President Obama... and those are two of the many awesome things she did!
* Aretha Franklin's "Who's Zoomin' Who" seems to be tailor-made to be used in commercials for cameras with zoom functions. And indeed, it was - it appeared in a 1989 ad for Sharp, whose video cameras had improved their zooming.
* Aretha Franklin was asked her opinions about several contemporary female pop singers:
* Are the antagonist or its minions so alien in appearance or mentality that simply being near them or
* are The closest the game gets is noting that Corinth is known for its prostitution, and mentioning how there are a lot of Hetaerae running the town, letting the player add 2 and 2 together.
* are the descendants of the Annuaki, extradimensional beings that took on animal bodies to interact with our world.
* are The girls in the song don't fare much better, since "dolls that will talk and will go for a walk" have long since ceased to be impressive. At least the line about "Mom and Dad can hardly wait for school to start again" is still pretty relevant...
* "Are the Good Times Really Over (I Wish a Buck Was Still Silver)," his 1982 hit that paints a much darker picture of the (then) current time (the 1980s) and even the recent past, with memories of Watergate and the Vietnam War still fresh. While he doesn't specifically come out against
* are. Their style revolve in planting killer mines in everywhere, which allows unexpected, silly deaths, or they could even lure the enemies to the mine field, or even plant a minefield sign to play mind games if there really are mines in that area. Furthermore, on the icon of their Ultimate, the Remote Mine, the internet Trollface is pasted right onto it.
* are "the most popular royal twins in all the kingdoms". By Amber's admission, there's "just one other pair" and "they're not much".
* are themselves theme park distortions of some real place or experience:
* are. Then again, Chickenfoot is probably best known as that supergroup with Joe Satriani in it, so we're right back to where we started.
* are the ones who can spawn the plagas, or a combination thereof. Combine that with having to protect Ashley the entire time and the room itself being slightly cramped.
* are the punishment. This is the meaning behind the famous Bible quote "The wicked flee when no man pursueth." Old Testament law merely fast-tracked some of these consequences in an effort to deter people from proceeding further down this road to ruin.
* "Are there aliens in the company? Are any of 'em... you know... hot?"

* Are there six films? Nine films? Twelve films? Depends on when you ask him, but expect him to disavow any other option. When did Darth Vader become Luke's father? Since the beginning? Eh, probably not based on drafts of the scripts, but that's what he'll tell you.
* are the same car list, the difference being the brand. ownard, all region-exclusive cars are in every region game.
* are the so-called "Forefathers of the Locust," although the Locust only seem
* Are they still unquestionably painted as being "on the right side?" By virtue of the other side being worse? Whether the author is successful or not does not matter.
* Are they Winged Humanoids winged tended to stay in heaven, or looked... different.
* are this five days to cross) and Autochthon (who needed to deliberately modify his world body to make it habitable; the deeper parts of it show the reason for this).
* A retired Major League Baseball player is shot in a hit gone wrong → a drug running conspiracy.
* are to a somewhat homely gremlin female who flies on a homemade rocket pack.
* are to each other, as each of them has "flushed" feelings for someone else but spend more time together than either of them does with anyone else.
* are totally this. Marcus is a 6'5", 200 lb. gargantuan 18-year-old, while his partner Amy is a 4'10", 90 lb. little 14-year-old. However, Amy proves to be far from harmless and can hold her own in the fight for survival alongside Marcus.
* are trapped under tons of debris after defeating the giant metallic dragon, Wolffy asks Weslie if he can take a bite out of him since he's traveled a desert and explored the moon, referencing the previous two films in the series (in the second film, an amusement park built over Goat Village uses up enough energy that it dries up the surrounding area and creates a desert that Weslie and Wolffy have to traverse, and in the third film the gang goes to the moon to defeat the Bitter Gourd King).
* are tried in the appeals courts again, such as Italy, but this just makes the appeals process even more time-consuming, as you'd expect).
* A retroactive example: Ken's stage (a yacht docked at what is believed to be the San Francisco Bay),
* are tunes passed down through generations (such as "Fields of Athenry" or "The Rocky Road to Dublin") doesn't help with clarity.
* are two more. In some cases, they go on about "top secret devices" so the fact that you're facing a time loop puzzle is not immediately obvious.
* Aretzes get this as their secondary power. It's also the first form of magic the protagonist masters.
* Are Ultra Beasts Legendary Pokémon? Since Ultra Beasts are simply Pokémon (but strong ones) from another dimension, the simple answer would be no
* are uneasy around cyborgs, this time in smoother-looking prosthetics.
* are universally killed in one or two hits because the materials they are made of tend to fall apart when attacked; your dwarves tending to punch heads, this causes heads to break apart, killing the creature.
* are using it to punch an omnipotent God in the face hard enough to make it fly from the outer rings to the center of the sun. Theoretical mathematics for theoretical deities.
* A reversal: Calvin asks his mother if hamburger meat is made out of people from Hamburg. She says it's ground beef, and when Calvin realizes he's eating a cow, he tosses the burger away with a disgusted "I don't think I can finish this."
* A reversal of the fake-arrow-through-head hat, an Indian with a fake
* A reversal of the roles occurs when Commissars serve alongside the Death Korps of Krieg. The Kriegers are a
* A reversal of this happens in the first episode "Rollercoaster". When Candace comes home with Mom, she checks the backyard and Phineas and Ferb are not there; then when Linda takes a peek, the boys

* A Reversed Road Sign to Sainte-Mère-Église briefly confuses invading Allied forces in
* A reverse trend is that in some parts of Asian countries to make theme park versions of Europe. There's Huis Ten Bosch: a Japanese theme park that recreates The Netherlands and Madurodam, the Dutch theme park version of The Netherlands (in miniature). There's also The Window of the World in Shenzhen, China contains scale models and reconstructions of the world's most famous landmarks and tourist attractions. This makes it the Theme Park Version of global tourism and the Chinese film
* A "reverse Turing Test" is administered when Bender has switched bodies with Amy and has to prove he's a robot. Since Bender is awful at math, he has to prove it a different way: Moonwalking.
* A review for Joey's newest play begins by saying that while his performance was "uneven" it wasn't the
* A review has pointed out that while this might not really be considered a "game," but as a multimedia experience, it is a memorable one.
* a review of two catgirl figurines of Rei and Asuka which have generic moe faces, off-model bodies and hairstyles, tiny underwear, and lovingly sculpted camel toes.
* a review states that it's rather ironic that "an artist who kept the idea of the concept album alive during the '90s, turns out to have a greater impact as a singles artist".
* a revived-turned-into-a-cyborg detective/Robocop expy, after Biolon's defeat, Naoto chooses to travel around the world, to learn and live as much as his lifespan as a cyborg ables him.
* a reward of $6.50 was offered for its safe return. The stakes were later raised to $36.73, but eventually it was returned with no ransom paid.
* "Are We Downhearted? No!" remains a well-known catchphrase in the UK. Hardly anyone knows the WWI-era song "Are We Downhearted?" which originated it - and wouldn't sing it now even if they did, since it's almost entirely made up of topical references of extremely limited
* "Are we not men?" "We are Devo!" "Are we not men?" "We are Devo!" "Are we not men?" "We are Devo!" "Are we not men?" "We are Devo!" "We must repeat!" "D-E-V-O!" "We must repeat!" "D-E-V-O!" "We must repeat!" "D-E-V-O!" "We must..." Best part? They once managed to keep this one going for about a half hour at a live show. But that point the whole audience was just about ready to storm the scene and beat them senseless.
* Are We There Yet? features Ice Cube's attempts to find a bathroom for one of the children he's babysitting. They find a bathroom, but the toilets are so filthy that the child resorts to peeing in the sink. That's when a woman shrieks in horror and Ice Cube, who's holding the boy, turns around to face her...
* Are We There Yeti?" to steal bug repellant off Duncan and Owen. Of course, it's Owen who gets caught and Duncan has to cut him free before he can go after the girls to repay them in kind.
* Are We There Yet? looking frustrated, surrounded by his screaming kids, against a white background with red lettering above them. A family comedy example.
* Are We There Yet?. Nick's bobblehead Satch is also a companion cube but he acts as more of a conscience.
* Are We There Yet?: Persistently questioning if the driver has reached their destination, often in an antagonizing matter.
* Are We There Yet?'s character is about to get stuck permanently in the "Friends Zone". he can practically hear the warning:
* are, with a bit of genocide thrown in for good measure. Deyz show all deze udder gretchin gitz 'ere 'ow itz don'. Follow me, ladz! WAAAGH!
* are with Very Soon being most likely to be closer to now and Soonish to be closer to said end of time.
* are with whatever tools happen to be available, to "cure" you of your condition.
* are written in what looks like blood over the door George is found dead in. This serves as a hint for later episodes in the "chiru arcs".
* are wrote some spooky stuff in his book and he can't get rid of it no matter what

he does.
* Are you a barrister in a Commonwealth jurisdiction? Congratulations! You are required,
* "Are You a Boy or Are You a Girl?", by '60s garage rock band The Barbarians.
* Are You Afraid of the Dark?, an initiate must tell a sufficiently scary story, then receive approval to join from all the current members. The vote to allow a new member must be unanimous, or the member is rejected.
* Are You Afraid of the Dark? around her. And when she does pull ups in his room randomly he says "I've always admired a strong girl."
* Are You Afraid of the Dark?, a villain put on a ring that was purported to make one immortal. It "immortalized" him in a way he hadn't bargained for. Removing the ring did not restore him.
* Are You Afraid of the Dark? bear an insignia of the Gremlin. When it escapes into the computer at the end, the monitor also displays the sigil.
* Are You Afraid of the Dark? did this in the episode "The Tale of the Silver Sight." The Midnight Society was looking for pieces of an old record to solve a mystery, and each member had one piece to find. It would then show one character's arc at a time, and would loop back to the same scene of everybody meeting up in Gary's dorm room, before going back to another person's scenes.
* Are You Afraid of the Dark? episode. A fashionable new restaurant serves a delicious and world famous soup which is eventually found out to require human lives to make, but not in the way the protagonists expect. Instead, they investigate the rear areas of the restaurant and see rooms where people are kept prisoner and subject to terrors beyond belief. Their fear is physically collected by the chef into liquid form and used to season the soup.
* Are You Afraid of the Dark? episodes. Namely in "The Tale of Laughing in the Dark" and "The Tale of the Dark Music."
* Are You Afraid of the Dark? episode "The Tale of the Dark Dragon" when the main character tests a magic potion on him without Sardo's knowledge.
* Are You Afraid of the Dark? episode "The Tale of the Midnight Ride" serves as a sequel to the classic story. In this episode a boy moves to Sleepy Hollow where he develops a crush on a girl. One night after the Halloween dance, they see the ghost of Ichabod Crane and send him over the bridge that the Headless Horseman cannot cross, prompting the Headless Horseman to then come after them.
* Are You Afraid of the Dark? episode, "The Tale of the Nightly Neighbors", the protagonists believe their new neighbors might be vampires and decide to sneak into their house to look for evidence. Despite their planning, there are a couple of close calls of them being found.
* Are You Afraid of the Dark? example: Two kids who live on a farm find an enchanted scarecrow that comes to life and obeys your orders, which is great, until the boy, within earshot of the scarecrow, accidentally says he'd "like to kill" his cousin for taking his baseball glove...
* Are You Afraid of the Dark? from "Dark Music", the spirit that haunted the pool in "Dead Man's Float", Captain Cutter in "Cutters Treasure", Madame Visage of "Many Faces", and many more.
* Are You Afraid of the Dark? had the "Phone Police" and their insane prisoner Billy Baxter.
* Are You Afraid of the Dark?" his cousin for taking his baseball glove.
* Are You Afraid of the Dark?: In the episode “The Tale of Station 1091”, a guy named Chris accidentally stumbles upon these which resemble Twin metal doors. These doors open to reveal an ethereal realm of bluish white light.
* Are You Afraid of the Dark?: In the episode "Tale of the Crimson Clown" the titular clown doll is shown reaching out of a television when trying to attack a bad kid.
* Are You Afraid of the Dark?: In the episode, "The Tale of the Time Trap", Sardo, the store keeper who sold the box to the protagonist, accidentally frees the current genies of the lamp and becomes a genie himself when he wishes for a million more wishes (the same wish the other genie used when she became trapped in the box as well, and so must grant them to others).

* Are You Afraid of the Dark?: In the episode, "The Tale of the Time Trap", the protagonist receives a box from a store-keeper holding a female genie who grants him any wish, but not the ones he desires.
* Are You Afraid of the Dark?: In "The Tale of the Closet Keepers", some aliens use closets as portals capture kids to put in a zoo.
* Are You Afraid of the Dark?: In The Tale of the Curious Camera, this happens to a fish tank when photographed with the titular camera.
* Are You Afraid of the Dark?: In "The Tale of the Night Shift", a vampire goes around biting the patients and staff of a hospital with only the two protagonists the remaining ones. Those affected by the vampire's power show visible bite marks on their throats.
* Are You Afraid of the Dark?: In "The Tale of the Virtual Pets," one girl tries to destroy the invading aliens' computer before they can upload her friends to their spaceship by running too many applications at once. It almost works, but the computer magically reboots.
* Are You Afraid of the Dark?: In "the tale of the water demons", the watery grave robber can't allow himself to sleep for more than a few minutes at a time, or the dead he robbed will come to drag him under.
* Are You Afraid of the Dark? in the U.S. The story revolved around a club of teenagers called the "Midnight Society" who meet around a campfire in the woods once a week to tell horror stories.
* Are You Afraid of the Dark? once features a story about a boy who was imprisoned by the "Phone Police" for making crank calls. When his friend tries to rescue him, he looks up their phone number in the phone book — and is shocked that said number only has six digits.
* Are You Afraid of the Dark? plays a girl whose twin sister (also played by Ali) died trying to get rid of a demon spirit known as the eponymous Quicksilver in the episode "The Tale of the Quicksilver".
* Are You Afraid of the Dark? protagonist and his love interest met their end this way, when their car stalled on a railroad and he tried to go back to fetch their engagement ring.
* Are You Afraid of the Dark? sets up each episode with the Midnight Society, a group of teens, gathering around a campfire in the woods to tell ghost stories. After the tale was finished, the episode would end with the Midnight Society calling their meeting to a close.
* Are You Afraid of the Dark? shows up. There were a more tunes like these in other episodes as well.
* Are You Afraid of the Dark?: "Tale of the Dream Machine" features this happening to one of the characters.
* Are You Afraid of the Dark?: The girl in the often co-ed heroic duo of the story would usually be the distraction, with the implication this was the far more dangerous job.
* Are You Afraid of the Dark?. The rest of the group never achieved the same level of stardom as she did (although a couple of the cast members were able to make a serviceable career out of bit parts and supporting character roles).
* Are You Afraid of the Dark?: "The Tale of the Hatching", the reason the students were instructed to keep quiet in the boarding school was because of the reptiloid aliens' intolerance to loud high-frequency sound. Accordingly, at the climax, Augie plugs his Walkman into a set of loudspeakers and plays hard rock music, which causes all of the aliens to messily explode.
* Are You Afraid of the Dark? was a recurring setting in several episodes.
* Are You Afraid of the Dark? was cancelled in 1996, then renewed for one more season in 1999 with an all-new cast.
* Are You Afraid of the Dark?). When the mummy puts it on, it comes back to life as a pretty girl.
* Are You Afraid of the Dark?, who comes alive and grows to human size to hunt children.
* Are You Alice?) states this a few times as an order. His job, executing "useless characters", also leads to this, with him using a giant scythe to do the job.

* "Are you a smooth, suave, single guy on the make, or maybe you fancy yourself the sleek, sexy femme fatale?" —
* "Are you at the end of your rope? There's hope." Another relatively new breed of commercial. The pitch here is to try to convince the viewer that the product works in a new way or is their last hope when everything else has failed. The commercial may even say that the product works in a different way than other types of medications that treat the particular condition. The hope here is to target those that are desperate for relief and therefore are willing to risk the long list of side effects in the hope that maybe this will be the product that finally gives them relief. Of course, in this case, the condition will likely be mentioned prominently, since how can the consumer know that they're at the end of their rope about a particular condition if they don't know what that condition is?
* "Are you aware of the number of live eel larvae the nasal cavity can accommodate? Make me listen to
* Are You a Werewolf, a variant of a Russian game, Mafia. The main difference is the addition of character types, among which is the Skeptic. The person who draws that card must refuse to believe in werewolves until someone adjacent to them is killed by one, no matter how many nights someone is mauled mysteriously in the middle of the night.
* Are You Being Served?, after Young Mr. Grace had died and the replacement Old Mr. Grace had proved unacceptable, the writers decided to move the character permanently off-screen. The character was still around and at Grace Brothers, issuing orders via telephone or memo, but he was never seen nor heard. There was never any indication whether this "Mr. Grace" was the "Young" or the "Old" one.
* Are You Being Served?, Arthur Brough, who played senior salesman Mr. Grainger, died in 1978 while preparations were being made for the sixth series (though he had announced his retirement from acting following his wife's death two months before, Lloyd and Croft were hoping to persuade him to return). He was replaced without explanation in-series by the character of Mr. Tebbs. Contrary to popular perception, Brough was the only actor who died before his character was written out of the series.
* Are You Being Served? came into the store with his "Cledit Caa" (Soooooooo!). Captain Peacock's attempts to communicate with him are at least as hilarious as the tourist himself ("You wanty buy?" "Whaty-wanty?") Also:
* Are You Being Served?: Captain Peacock is challenged to a boxing match, but backs out. Mr. Humphries is chosen to take his place in a wrestling match and loses. Then Mrs. Slocombe enters the ring.
* Are You Being Served?: Captain Peacock walks and talks this trope. He is extremely old fashioned and easily embarrassed about all the things going on in the clothing store. He is also very prone of accidentally touching a female model, a bra or a pair of knickers and only realizing it when it's already too late.
* Are You Being Served?, despite being practically unable to move unassisted, was a Dirty Old Man to the core. He once fired a secretary because his heart rate alarm didn't go off when she bent over in front of him.
* Are You Being Served? did this quite a few times, usually for Mr. Grace's birthday. In later seasons they seemed to happen more often, seemingly as an excuse to get Mrs Slocombe and Mr Humphries into ridiculous outfits and flamboyant dresses, even if it made no sense in context of the show.
* Are You Being Served? episode "German Week", the German Band arrives, and a character says something to them in German, and they respond in English.
* Are You Being Served? episode has Grace Brothers under threat of hostile takeover. When the staff meet to discuss possible responses, the first one on Young Mr. Grace's list is "Burn the building down and rebuild elsewhere with the insurance money". Captain Peacock protests this, to which Young Mr. Grace notes in confusion, "Well, it worked in 1918..."
* Are You Being Served? episode "It Pays to Advertise" is taken up with the Grace Bros. staff's disastrous attempt to film a cinema/TV advert for the store, with Mr Humphries directing. Mrs Slocombe's eyes keep getting stuck closed by her false eyelashes, Mr Grainger's jacket is too big and his trousers too small, the radio

mike Mr Harman (acting as sound man) instructs Mr Lucas (acting as boom mike operator) to put on Mrs Slocombe ends up falling down the front of her dress and picking up the noise of her digestive system, the accordion Mr. Rumbold has been given to play as a gypsy musician makes sounds of flatulence instead of music... all converging in a perfect comedy of errors when they try to do a take. The hat check ticket Miss Brahms gives Captain Peacock is covered in her saliva after she holds it in her mouth, Mr Grainger accidentally squirts Captain Peacock with a soda siphon, Mrs Slocombe's bar stool gets stuck to her backside, and when Young Mr Grace goes in front of the camera to pour himself a glass of champagne, he misses the glass by over a foot.
* Are You Being Served? episode "The Bliss Girl," the fog has entered the building, and into the elevator.
* Are You Being Served? episode "The Erotic Dreams of Mrs. Slocombe" has a rape-y ending where Mr. Humphries is overwhelmed with uncharacteristic heterosexual urges and jumps Miss Brahms in the middle of a ballet. The episode ends right there and you're left with the impression that Mr. Humphries impulsively rogered Miss Brahms, who rarely takes kindly to ungentlemanly sexual advances.
* Are You Being Served? features the men mistaking Mrs. Slocombe for pregnant, when she's actually talking about her cat, who was impregnated by "that Burmese that lives in the next house".
* Are You Being Served? had Grace Brothers, a parodic stand-in for Harrods.
* Are You Being Served? had the opposite problem, in which Mr. Humphries was trying to hold down a soufflé that was growing out of control.
* Are You Being Served? had the rather unflattering nickname of "Jug Ears".
* Are You Being Served? had the regular staff getting into a disagreement with the cafeteria staff. The cafeteria staff walks out and the regular staff are determined to do a better job than the cafeteria staff. They do - but only by sneaking out and getting expensive take-out food. Realizing that they were working extra-hard and spending themselves into a hole, they gave in and apologized.
* Are You Being Served?, had to have brightly-colored hair which changed color every episode. At the start, this was done by actually dyeing Sugden's hair, but the treatment caused reactions and hair loss so the production switched to a series of brightly-coloured wigs from then on.
* Are You Being Served? has a different, unnatural hair colour every episode. It can be strange to see Mollie Sugden in interviews with her normal brown (or grey) hair.
* Are You Being Served? have ended this way. One in particular is "The Hold-Up". A couple of burglars have broken into the store and taken Miss Brahms prisoner. Cpt. Peacock and Mr. Spooner pretend to be policemen to rescue her, but are taken prisoner themselves, and Mrs. Slocombe, Mr. Humphries, and Mr. Harman pretend to be gangsters to trick the burglars. At the end of the episode, Mr. Rumbold shows up with some policemen, pretends he doesn't recognize Mrs. Slocombe and Mr. Harman, and they are arrested. Then the burglars show up, and act threateningly towards Mr. Rumbold, and the episode ends there.
* Are You Being Served?. He had two successors, Mr. Grossman and Mr. Kline, who only lasted three episodes each before they, too, vanished from the show.
* Are You Being Served?: he was going to suggest something else to her, but she thought he was about to propose marriage, and when he started with, "I propose," she interrupted with, "And I accept!"
* Are You Being Served? implied this about an unseen man when a set of his pajamas are found to consist of a huge shirt and a tiny pair of pants.
* Are You Being Served? in an attempt to get Mr Lucas off work for the day. Mash makes a big show of spilling cleaning fluid on the stairs, then loudly moans in Mr Lucas' direction that he hopes no one slips on it.
* Are You Being Served?. In one episode, he helped out by cross-dressing by pretending to be a female customer to help Mrs. Slocombe get her job back.
* Are You Being Served?, in the episode "It Pays To Advertise", when Mrs. Slocombe and Mr. Humphries have mannequins made of themselves, and Mr. Grainger mistakes the mannequin of Mrs. Slocombe for the real thing:

* Are You Being Served?: In "The Hold-Up", Captain Peacock and Mr. Spooner do this as part of a gambit to rescue Miss Brahms from a brace of burglars.
* Are You Being Served?. Many of the cast members have speculated that had the show originally aired under that title, it might have succeeded, as it appears that most of the audience did not realize the show was a revival).
* Are You Being Served?, Mavis often says that her father will "give her the strap" if she gets caught doing something.
* Are You Being Served?. Miss Brahms is trying to convince a customer to buy a horrid cardigan:
* Are You Being Served?, Miss Brahms poses as a mannequin to avoid the notice of a couple of robbers. Of course, she sneezes and is taken hostage.
* Are You Being Served?, Mr. Grainger was a 40-year veteran employee and was much older than most of his co-workers. Many of his jokes are about how he should have retired years ago, and his tendency to fall asleep on the job. After the actor playing him died, the writers tried to replace the character with another similar character, but none of the replacements lasted more than one season.
* Are You Being Served?: Mr Spooner tries to tell a limerick that starts "There once was a girl from Prestatyn / Who said 'look here, I couldn't put that in'". He is cut off by the seniors but explains that she's packing her suitcase for the nunnery.
* Are You Being Served?: Mrs Slocombe is accused of being drunk, and she's asked to blow into a breathalyzer balloon. She does so and the balloon floats away.
* Are You Being Served?. Mrs Slocombe is annoyed by Captain Peacock's wagging his finger at her. She complains to Mr Rumbold that "Captain Peacock's wiggling finger got right up my nose!" As usual, Mr Rumbold takes things literally and admonishes Captain Peacock not to put his finger in Mrs Slocombe's nose.
* Are You Being Served? Mrs. Slocombe is greeted with one in her first day as "Mrs. Slocombe, Senior Person." It came with a note:
* Are You Being Served? occurring outside of the Grace Bros. sales floor. Captain Peacock quickly enters a scene carrying a stack of planks on his head. Informed that the planks are needed elsewhere, he turns about face, departing just as effortlessly.
* Are You Being Served?: One episode has Mr. Humphries dressing in drag for a store beauty contest. Not only did "she" win, but Mr. Grace asked "her" to accompany him on a cruise on his yacht! Mr. Humphries looked horrified as he was dragged away, and the viewer was left to imagine the hilarity that no doubt ensued.
* Are You Being Served?: One episode has Mr. Lucas lure Young Mr. Grace into the menswear/ladieswear department with an attractive young woman. When Mr. Lucas explains that the woman was hired "for one purpose", Young Mr. Grace immediately assumes, "Blackmail?" (It's so they can give him a "This is Your Life"-style celebration.)
* Are You Being Served? show for the children of Grace Bros. employees. Mr. Goldberg plays a butcher and Punch (Mr. Lucas) gets in a tug of war with him over a string of sausages.
* Are You Being Served?" (Soooooooo!). Captain Peacock's attempts to communicate with him are at least as hilarious as the tourist himself ("You wanty buy?" "Whaty-wanty?"). He ends up falling down the stairs and having his head stuck in one of Mr Mash's buckets.
* Are You Being Served?, so the set could be built with only one wall.
* Are You Being Served? that turns into a Wrestling Episode. Captain Peacock is challanged to a boxing match, but has to back out, so Mr. Humphries takes his place in a wrestling match instead. The episode guest-stars British Wrestling legend Jackie "Mr. TV" Pallo.
* Are You Being Served? the case, he read out the paper anyway, to their general amusement... but decided he was far too harsh towards Mr. Humphries. Mr. Humphries grabbed the letter, read it silently, and then tore it to shreds and jumped on the shreds, crying profusely.
* Are You Being Served?, the floor staff discovered through some incredibly subtle hints that it was Mrs. Slocombe's birthday, and did various things in preparation,

including practicing singing "Happy Birthday to You." They also discovered that they didn't actually know her given name, and test the variable portion of the song with different syllables:
* Are You Being Served?, "The Pop Star", Mr. Spooner is revealed to be a talented lead vocalist. Same for his actor Mike Berry.
* Are You Being Served?: The staff of Grace Brothers are performing a radio play. Captain Peacock's character arrives at a pub and asks for a pint. The sound effect of the pint being poured is created by a jug of water being poured into a bowl from a significant height, and sounds more like somebody urinating. Miss Brahms, playing the barmaid, says "I bet you were dying for that".
* Are You Being Served?. They are not successful, and Mr. Humphries complains that his braces (suspenders) have broken because of it.
* Are You Being Served? veteran who fought Rommel and (of course) to have been a Captain (in the Army, of course). He's frequently accused of, and later admits to, having served in the Royal Army Service Corps—the logistics department. Also, one episode implies that his actual rank might have been Corporal rather than Captain, but this never confirmed.
* Are You Being Served?, was able to get away with insulting his higher-ranked fellow employees and superiors every episode. Then, later on, he disappeared from the show. The only hint of an explanation for his disappearance was a passing line from Captain Peacock mentioning a time where the store didn't make any money and they fired the junior. This line was meant to intimidate Mr. Lucas' successor, Mr. Spooner — who managed to get away with insulting Mrs. Slocombe and Captain Peacock (though without Lucas' panache) until the final episode of the series.
* Are You Being Served? was eventually promoted to Senior Salesman because the producers were tired of casting elderly actors who subsequently died. In turn, actor John Inman asked for Humphries' promotion not to be formally acknowledged, because he was superstitious about all those dead actors before him.
* Are You Being Served?, which went over so badly that it was cancelled after a single six episode series.
* Are You Being Served?, with the grating Cockney-accented voice of the otherwise pretty Miss Brahms.
* Are You Being Served? would have come up with to defeat Oscar Peterson. It has to be pointed out to him that Oscar Peterson is a pianist, and that Bulldog Drummond's arch-nemesis was Carl Peterson.
* Are you going to a rather big anime convention? Did you remember to pre-register? No? Well then, have fun!
* Are you human? Are you currently being given a standard issue Lasgun, Flak Jacket, Infantry kit, and a copy of the
* Are You In The House Alone, the police chief refuses to even open an investigation on him due to his family connections.
* Are You Living in a Computer Simulation? To an SF fan, the argument can be quite convincing, considering that the technical premises of the argument are very mild speculations in comparison to the kinds of tech described in SF, even the hard variety.
* Are you playing the game in the United States? Enjoy your ripoff prices! The only arcades in the US that carry
* Are You Pondering What I'm Pondering? A non-sequitur answer when a more obvious solution is expected.
* Are You Pondering What I'm Pondering? moment with his Dad and punctuates it by tapping his head. Hugh mirrors the gesture but gets a hollow echo, one that goes on long enough for them both to make a curious face at.
* "Are You Satisfied?" also seems to be about one of these, with the singer even pondering if life would be easier for them if they were average.
* Are you sleeping?, and a photograph and/or address ringed by a red circle with three horizontal red lines below gives them their instructions. The cicadas' subconscious sees it as a problem to be solved, and the only way to do that is by completing the mission.
* Are You Smarter Than a 5th Grader? aired on Friday nights during the 2008–09

season, and were later moved to syndication for the 2009–10 season (with the latter show returning in September 2010); both shows were ultimately canceled by their syndicators in early 2011.
* Are You Smarter Than a 5th Grader?, but he talks so slowly that you can see the commercial coming a mile away. It's even worse there because one can easily look up the answer on Wikipedia before Foxworthy even announces the commercial break.
* Are You Smarter Than a 5th Grader?: In one episode, one of the quiz questions was "How many watts are used during one kilowatt hour?" (The answer given was 1,000, but the question as written is unanswerable since one kilowatt-hour can result from using 2000 watts over a half-hour period, 500 watts over a two-hour period, or any of an infinity of other possible combinations.)
* "Are You Still Waiting" by Hee Young. She has a red string tied around her pinky at the start, and walks around the block
* "Are you SURE?" from "Tweek x Craig" and tagged it with "creek is canon".
* Are You There, God? It's Me, Dean Winchester" in the middle of a sunny day.
* Are You There God? It's Me, Jesus He tells Chef that he has this friend who is upset because everyone already got their period. When Chef asks if he means his sister Shelly or his girlfriend Wendy, Stan says the identity of the person is irrelevant. He then talks to Dr. Mephesto about puberty and asks what happens if someone never went through it. Mephesto wants to know who never went through puberty, so Stan tells him his dad. He explains that's why he's there as his dad is too embarrassed to show up; Dr. Mephesto says he can't blame him.
* Are You There God? It's Me, Margaret. briefly becomes one. She was raised irreligious but is theistic. After getting "mad" at God she decides to stop praying to Him. Margaret ultimately stops being this after her first period finally comes.
* Are You There God? It's Me, Margaret. can raise one eyebrow and does it occasionally to get adults to stop asking her questions. She doesn't know why it has that effect, but it does.
* Are You There God? It's Me, Margaret. is loaded with this, seeing as it's a book about puberty.
* Are You There God? It's Me, Margaret., Margaret and her friend are embarrassed to buy menstrual pads for the first time. They end up getting other items to curb attention.
* Are You There God? It's Me, Margaret., Margaret is instructed in the proper use of a belt to secure her menstrual pad. The invention of menstrual pads with adhesive backing (something often taken for granted these days) had to wait until women's undergarments became snug enough for adhesive pads to be practical, which in turn required the invention of Spandex and cheaper methods of creating inexpensive fine-gauge cotton knits.
* Are You There God? It's Me, Margaret. play "Two Minutes In The Closet" (though they have to use a bathroom in this case). It's presented more innocently here because the characters are only sixth graders. They just give a quick kiss and exit.
* Are You There God? It's Me, Margaret. who is taller than the boys and is almost as tall as many of the adults.
* Are you trying to melt a metal door? There’s a table of melting points in the book.
* Are you used to doing outbound via an auto-dialer? You'll answer your phone and greet the caller by giving them the start of the sales pitch. You'll also end calls by thanking people for listening to your call even when they've called you.
* Arf also commented on Fate's smile when watching her officially become friends with Nanoha at the end of
* Arf does this to Fate in the movie version of the first season after the latter recovers from her
* Arfenhouse 3 has a boss named "YOMOMMA", who is actually Misteroo's mother. Housemaster laughs at the name.
* Arfenhouse contains the immortal line, spelled here as in the subtitles: "TEY MAY KIK R AZZ BUT TELL NEVFR KIK R FREEDUM!!!!!!!!"
* Arfenhouse fame had the message "I despise my creations" plastered all over the

Disaster Labs website.
* Arfenhouse has a scene where the animation stops and the words "to be continued..." are displayed on the screen. After a short pause, the words disappear and the animation resumes.
* Arfenhouse installments, Satan says that all they do in Hell is play DDR.
* Arfenhouse sound and "TO BE CONTINUED..." appearing, and after a pause the scene resumes.
* Arfenhouse with someone saying "BREAK TIME" repeatedly while bashing his head against a desk.
* Arfoire was once the True Goddess and eventually performed a Face–Heel Turn a goddess.
* AR∀GO: City of London Police's Special Crimes Investigator… It made a bit of a mess.
* AR∀GO: City of London Police's Special Crimes Investigator and other "mythical" creatures most definitely exist, but the majority of humans are completely unaware of them.
* AR∀GO: City of London Police's Special Crimes Investigator and wanted to open a candy store when he was a kid. He can always be seen chomping on them in lulls in the action and sometimes hands them out as gifts.
* AR∀GO: City of London Police's Special Crimes Investigator: Arago and Ewan. It's even highlighted by their hair color, one of the only visible difference between the two (the other being a scar on Ewan's arm).
* AR∀GO: City of London Police's Special Crimes Investigator convincingly — except that every time he does he starts tugging on his ear. Even after a childhood friend points it out to him (he hadn't noticed). Even when he's running.
* AR∀GO: City of London Police's Special Crimes Investigator - it's rather the cream that Joe applies to them that gives him the ability to see the monsters and ghosts in London otherwise invisible to the naked eye.
* AR∀GO: City of London Police's Special Crimes Investigator. The series ends with Arago and the remaining nakama going off to find a way to set him free.
* AR∀GO: City of London Police's Special Crimes Investigator: When Arago and Rio meet for the first time after Ewan's death, Rio quite explicitly expresses to Arago how she wishes that he would have died in Ewan's stead. This changes pretty quickly though.
* Argai: The Prophecy, Prince Argai runs into and befriends a trio of noble thieves, who in a later episode assist our heroes.
* AR Games, take advantage of the feature, with both having added use of the built-in gyroscope.
* Argath cries out to his mother when you kill him (again) after he's revived as a revenant in
* Argenta is 68 and a former Sinnoh champion, several times League Conference winner and runner-up in a Sinnoh Grand Festival. She's so skilled even now that she defeats 399 trainers in a tournament using
* Argent Ante theme, so all the episode titles from Chapter 2 onwards were gambling terms.
* Argent Crusade, but that doesn't stop the crowd from cheering when you trample someone under your horse.
* Argentina, after a train accident, this immortal line was given: "Murieron tres personas y un boliviano", or if you prefer: "Casualties are three persons and a Bolivian", you can just get yourself an idea of how racist the country is from that alone. And it still managed to be darkly hilarious.
* Argentina (and some other South American countries), any program (or block of programs) meant for older audiences would typically begin with this (or a variation of it):
* Argentina, and the authorities took the teams all the way to Madrid to finish the tie (which River won).
* Argentina and the "Maradona Curse": Diego Maradona's infamous doping-related retirement in the 1994 World Cup led to the downfall of the same team which had won two World Cups in 1978 and 1986, and the last two (South) America Cups, their 1993

championship being the most recent trophy for the "Albiceleste". And while they got the upper hand in Brazil '14, they were crushed by Germany in the finals, while beaten one year later by Chile in the 2015 Copa América (and one year later as well in the "Centennial Cup"). This has gotten to the point Messi has been mocked for his subpar performance for his national team while being Barcelona's superstar.
* Argentina has had an obsession with France since the 19th Century, starting back in the time when the Argentine bourgeoisie looked at France as the role model for the country they wanted to create (also, before 1920, the French were the largest non-Spanish European ethnic group). This becomes particularly clear when visiting Buenos Aires, as the architecture has an intensely French feel to it, while the tango is rooted in French music, which presumably helped its becoming popular in Parisian ballrooms in the early 1910s. Although the francophilia has dwindled through time (never quite dying out), the trend is still strong in the academic environment, mostly in the social sciences and humanities' colleges, which are overwhelmingly focused on French authors. Finally, as in Paris, psychoanalysis still thrives in Buenos Aires, particularly the Lacanian current.
* Argentina invaded the Falkland Islands because the islands were completely undefended (the only British "military" asset stationed there at the time was an Antarctic research ship, and even that was about to be pulled out) and they believed the British simply had no real desire to try to retake them, especially in the face of proposed defense cuts. Then they invaded; then the British got pissed, and sent anything they could to the South Atlantic, including postponing the retirement of their Vulcan bombers (and pulling some out of the boneyards), originally scheduled for retirement early that year and doing an emergency cancellation of the sale of the aircraft carrier HMS
* Argentina Is Nazi Land is an ex-concentration camp guard who thinks that if anyone finds out who he used to be, they'll kill him. He's right, but his case certainly isn't helped by him shooting the narrator's friends to death.
* Argentina modern Argentine pesos. It came to a head around 2002, when after a disastrous experiment in pegging the peso to the U.S. dollar, Argentina gave up, put its currency on the float, and saw the bottom utterly fall out, with a peak monthly inflation of 10.4% in April 2002.
* Argent, in an attempt to get Columen and Iaspis to safety, pushes some Mereish soldiers out through some windows.
* Argentina's invasion of the Falkland Islands on April 2, 1982, also qualifies. It helps that the islands are sparsely populated and that the British only had about 57 Royal Marines and some assorted sailors and civilian volunteers to defend the islands at the time. In spite of this, the Brits actually managed to force the initial Argentine assault force to retreat for a bit, and Governor Rex Hunt initially refused to surrender. Only after the Argentines brought in more troops and surrounded Government House did a surrender occur. This, of course, touched off
* Argentina. The image became very popular, and many ignored that it was based on a comic book.
* Argentina, Tierra de Amor y Venganza: Many characters escape from the Spanish civil war and move to Argentina.
* Argentinean film "Nueve Reinas" is a perfect example of this trope.
* Argentine Ants. In their native habitat, the floodplains of the Parana river in South America, their numbers are kept in check by the fierce competition from two other native ant species, fire ants and army ants, and because whenever they establish a new colony, genetic mutations result in the different colonies seeing each other as rivals and competing with each other, so their survival hinges on them being highly aggressive. When a small number of queens stowed away on human ships and set up new colonies in Madeira and New Orleans, there were no species that could compete with them, and lack of genetic diversity meant that the mutations that make them compete with themselves didn't establish as quickly, meaning they were more likely to co-operate together and form mega-colonies. Today, they're the most numerous ant species on earth, have established colonies on six continents, and are displacing and devouring many native ant, invertebrate and

plant species in their new environments. As an added bonus, they also know how to co-operate with aphids, and aphids that ally with them also profit from their success, growing into swarms that kill off human crops.
* Argentine junta tens of thousands of left-wing dissidents in the name of preventing what happened in Cuba from happening somewhere in Uncle Sam's Backyard.
* Argentine junta who ruled as a dictator from 1976 to 1981, died from multiple fractures and internal hemorrhaging caused by...slipping in a prison shower.
* Argentine outfit Gimnasia y Esgrima La Plata is often mocked in its country due to never winning a top-flight league ever since argentine football became professional in 1931. This is despite the fact it is tied with Newell's Old Boys as the fifth team with the most seasons in the division at 75. Its silverware during that time only contains three second-tier championships, an anniversary cup and a league containing only mid-table teams.
* Argentine songwriter Luis Alberto Spinetta's song "Post-crucifixión" is told from the point of view of a dead or dying Jesus who calls for his mother to hold him.
* Argentinian beef is regarded as some of the world's finest. Other cattle breeds that get this treatment are wagyu cattle of Japan (which gives us Kobe beef) and the Scottish Aberdeen Angus. American-style Kobe beef was created by crossbreeding wagyu and Angus cattle.
* Argentinian group El Simbolo had almost every song they released to be one of these, but their most popular one is the one where they command you to dance
* Argentinian strikers, with very offensive football being valued in the country.
* Argentinian voice actors Agustina Cirulnik and Demián Velazco have worked together in
* Argilac Durrandon, the Storm King, used to be the best fighter in his kingdom during his younger days. With his advanced age, he is no longer as skilled as he used to be, but still a fearsome warrior and worthy of his
* Argilians are an alien race with four tentacles extending from their shoulders. Their extra "arms" give them an extra attack in combat.
* ARG movie's viral marketing campaing, a guy nicknamed Kosmopol - who was able to reveal many clues - stated in his blog: "Apropos, sorry for my miserable English: just know, I'm just little humble Russian, living in Germany and translating this manga from Japanese into English.".
* Argo — a cruel, decadent, despotic puppet of the United States who forced foreign trends on his people all while also living in uncaring luxury as the country went down the toilet. While these facts were individually accurate, the film neglects to present the positive aspects of the Shah's rule that were also there, such as religious tolerance, giving land to peasants, and equal rights for women. Though it made sense in the context of showing why most of the Iranians had become so angry throughout the film, it isn't quite an accurate summary of his reign.
* Argo, and made to sound like an allegory for the Iranian Revolution itself, gaining the approval of some Iranian guards at the airport.
* Argo. A newspaper finds out about the six US Embassy employees hiding out in the Canadian ambassador's house in Tehran, but the US government convinces them to sit on the story so the Iranians don't find out.
* Argo are an unusual example, as they are robots rather than biological creatures. However, they otherwise fit this trope, as they are designed to be anthropomorphs so they can be cute instead of threatening to humans who would otherwise be uncomfortable with them.
* Argo became the number one bootleg on the streets of Tehran because it provided Iranian audiences with a perspective flip on the Islamic Revolution and the US Embassy hostage crisis.
* Argo by one of the hostages after hearing about the plan to pretend they're Canadian filmmakers to sneak them over the border. "Is this the part where we're supposed to say this is so crazy it might work?" (and given it's a true story...)
* Argo by Rick Griffin takes place in the aftermath of one of these. Regulations are placed on artificial intelligence to prevent it from happening again.

* Argo called in the actual Ken Taylor to write the replacement postscript, which complimented the effort of the Canadians.
* Argo film project, after the U.S. embassy personnel are rescued from Iran. ("It's in turnaround.")
* Argo had to go back and recut some of the film (less than a month before opening) to give a fairer portrayal of the Canadians.
* Argo has several added to the climactic airport scene, none of which happened in the true story it was based on.
* Argo is supposed to be an accurate depiction of historical events. In reality, it takes considerable liberties and even tells outright lies.
* Argo, Jack O'Donnell drops Tony Mendez off at the airport, as Tony's leaving to extract six Americans who are hiding out in Tehran at the height of the hostage crisis. Being a CIA agent who's going into post-revolution Iran, it's naturally a very dangerous mission that can end very badly, very bloody, very publicly. Before Tony leaves the car, there's this exchange:
* ''Argonautica''. He mentions how Phineus was granted the power of prophecy. However, Phineus told mankind the future, angering Zeus who did not want his designs revealed to humanity. In retaliation, Zeus sent the Erinyes (the Furies) to blind him, and sent the Harpies to seal or defile whatever food Phineus had at hand.
* Argonauts Agency 2: Pandora's Box Pelias acquires one after he opens the box by accident.
* Argon. However, the ATF ships are much more ornate than most Standard Human spaceships, as they all feature large, buttress-esque hull pieces and ornate engine sections, making them look vaguely like Gothic cathedrals.
* Argonians and scattered race, in search of their place in the world (both literally and figuratively).
* Argonians are seemingly named (in Jel, the language of the Argonians) after unique traits they display while still hatchlings and, if they have frequent dealings with non-Argonians, get those names translated into Tamriellic. "Haj-Ei" becomes "Hides-His-Eyes," for example. In other cases, their name in Tamriellic is based on their profession. "Quill-Weave" is a writer, "Makes-One-Soup" is a chef, and "Lights-Sparks" is a mage.
* Argonians if you call them unclawed or bald, even if they technically are.
* Argonians-like fashion. (Though those who've lived outside of Black Marsh for extended times tend to become more individualistic and adapt to the other cultures of Tamriel quite well.)
* Argonians), there is the Ehlnofey. They are the lesser et'Ada ("original spirits") from the creation of Mundus who remained in the mortal realm and populated it, becoming the progenitors of the modern races.
* Argonians. They also served as the advisors of the Imperial governors in Black Marsh, while being allowed to more directly rule over the more rural areas. When the Empire fell following the Oblivion Crisis, they quickly went bankrupt and were hunted by other Argonians as traitors.
* Argonians typically have lesser (around 50%) natural racial resistances to poisons.
* Argon Prime (originally "Sonra IV") was named for the leader of the colonists who settled there, Nathan
* Argo starts to contemplate her "humanity" more as she's upgraded by Eo, leading to a lot of questions and confusion.
* Argo stocks it with battlemech service manuals and other technical reference works and uses the space as a training facility for his rookie techs, and the hydroponic gardens reduce your running costs because they're supplying food and absorbing CO2 from the air.
* Argo when Tony Mendez and the six American hostages successfully clear Iranian airspace.
* Argo), who was of Spanish/Italian/French/Mexican descent, commented on this phenomenon once. He noted that someone with his look (dark hair, dark eyes, below average 5'7 stature, Mediterranean facial features, and skin that's fair by default

but quickly turns olive given even moderate exposure to the sun) can blend in as a local pretty much anywhere in the world outside of Sub-Saharan Africa and East/Southeast Asia. Including the Americas, most of Europe, the Middle East, and even India. This came in handy during his spy work.
* ARG, the phrase "Obey the Server" appears numerous times, and takes on more of a sinister meaning as the story unfolds.
* Arguably a larger, overarching theme across the different incarnations of the Holy Grail War. The original Einzbern ritual required seven mages working in unison to complete the Heaven's Feel. The squabbling between the seven started the Holy Grail Wars and cost
* Arguably, ALL of the absolutely major Spyro Villains are variations on this except the very first one, Gnasty Gnorc.
* Arguably another notable example is all of Rem's decisions after Misa's arrest in that Misa's lifespan is always visible to Rem.
* Arguably, an underlying theme throughout the Elder Scrolls series is that different, contradictory mythologies are all simultaneously true. There were some seven different endings for
* Arguably, any time you Slipshank (reach under, behind or into a convenient object and grab something that shouldn't be there) something in
* Arguably, a Soft Reboot happens whenever a new writer is chosen for a long-running comic book, such as those starring
* Arguably a subversion, as the primary function of any Peebo is a self-propelled
* Arguably a Trill-symbiont law that the humanoid half of the society accepts as the symbionts' right to decide for themselves. Surely the slugs have the right to determine their own species' rules?
* Arguably, Audrey II him/her/itself attempts this when it tries to off the original Audrey, depending on how you interpret the plant's relationship with Seymour.
* Arguably, Bill Gates promoted himself out of doing work to avert this trope. A talented inventor, a decent businessman, and an okay administrator, Gates really greased the wheels and got his company going. His style of management consisted of the philosophy that you should hire a lazy person to do a tough job because they will find a quicker and more efficient way to do it so they can slack off later on. He took this to heart and eventually put himself in a position where he basically did nothing but oversee the money flowing in while he simultaneously hired much better administrators to work in his place. Nowadays, Gates is mostly known to sit comfy in his mansion and use his vast fortune to fuel his charities.
* Arguably, Caliban and Ariel are foils for each other, or they're both foils for different sides of Prospero (id and superego, respectively). Caliban is ugly, crude, hated by Prospero, not too smart, and an unwilling slave; Ariel is airy, graceful, beloved by Prospero, and serves with his best efforts (at least until his contract is up).
* Arguably, classical music (especially baroque and pre-baroque music) can be considered future music, not only because they are still popular hundreds of years after their composition, but also because many fans contend that classical music will last hundreds of years more, while "modern" music will die out and be replaced by new forms of music.
* Arguably, criminal prosecutors and other law enforcement, especially when dealing with violent crime. They have had to look at many grisly and gruesome crime scene photos, not to mention hear some truly horrifying stories of abuse/violence from victims (including children). One of the key lessons to learn is "don't let it get to you."
* Arguably deconstructed in Theodore Thomas' short story, "Test," where a man applying for his driver's license experiences a horrific accident through hypnosis. The end of the story hints that no one gets a license — those applicants who still want to drive after experiencing that are presumed insane and dragged away to an asylum.
* Arguably done twice, as when she goes in for a routine check-up (the only one we see no less) she's told her cancer is advancing more rapidly than anticipated and

her estimated remaining time has been cut in half.
* Arguably, even Jesus was hoodwinked by the original Judas, especially for non-Christians and Christians who emphasize the "human" side of Jesus (i.e. Jesus had voluntarily limited himself to not be all-knowing while living as a human). In the gospels of both Matthew and Luke, Jesus promises the disciples that they will be seated on twelve thrones ruling the twelve tribes of Israel in the Kingdom of God (Matthew 19:28; Luke 22:28-30). That's a curious promise to make when one of those disciples was Judas!
* Arguably, everything involving Dr. Swordopolis and Darko, as well as the latter "unlocking the Nexus" within Black Mage. A lot of build-up, a lot of foreshadowing, and then absolutely
* Arguably, fascism itself may count, as its proponents saw it as this towards socialism. It combined many of its economic proposals (broad populism, state control of industry, etc.) and its revolutionary spirit with ultra-nationalism and reactionary social views, in sharp opposition to socialism's international worldview. In
* Arguably, "Gothically"/"Goffically" and quite a few of the other words (usually verbs or adjectives) in the infamous
* Arguably Haruhi's parents, as her mom Kotoko was a lawyer and her dad Ryouji/Ranka was a bartender/host.
* Arguably inverted with many passenger and military airplanes. For example, the
* Arguably it is not so much the properties of the gamma rays themselves that are different from real life but how certain organic beings make use of them.
* Arguably, Ivy. She is a living repository of all human knowledge, has no choice in the matter, should avoid any close emotional attachments and because of
* Arguably, Joe Piscopo played himself in the second season episode "The Outrageous Okona", but he was only credited as "The Comic". Data picked him from a list of notable comics from history, so if it wasn't meant to be a genuine one—like Piscopo—any actor could have played The Comic.
* Arguably just as exciting was the third Test a week later where Brett Lee and Glenn McGrath (at that time the worst Test batsman in the world) managed to cling on for a draw to keep the series level. The real hero was Australian captain Ricky Ponting, who defied the England bowlers for seven hours before getting out with only four overs to go.
* Arguably justifiable in most cases; since the show confirms that demons use their hosts and keep their bodies working regardless of the level of damage sustained, in most cases the Winchesters can conclude that any human possessed by a demon has already been through too much damage to survive an exorcism, focusing on exorcising only those hosts they can be sure won't just die off once the demon's gone.
* Arguably justified, as those Goa'uld jars are actually stasis devices designed to "store" rebellious Goa'uld symbiotes.
* Arguably justified. While the Third Imperium began as what was effectively a Sylean Empire, it became an empire glued together by its upper caste rather then by a core ethnicity. It probably would have been diplomatic to not stress the Sylean origins.
* Arguably Manticore's (another human polity) annexation of Basilisk, they largely leave the native Medusans (who are at an early iron age level) to themselves and only maintain small trade enclaves on their world. They also protect the system from more expansionist powers like Haven. The colonization of Sphinx was also beneficial to the Treecats, even if it was a few centuries before the humans figured out they were sapient, as they were able to colonize other planets when their homeworld was threatened.
* Arguably many of Machen's protagonists count as this to some degree or another, as they rarely have any personal stake in whatever supernatural unpleasantness is going on and are investigating it purely out of idle curiosity, while knowing full well that the mere sight of what they're looking for
* Arguably, many of the main characters are going through this in varying ways, not just the ones above.

* Arguably most of the reviewers and characters from Channel Awesome are this. The actors have a fondness for
* Arguably one of the most polarizing points in the show's evolution for fans was when the characterizations became dependant on the trope. Depending on the gag, the entire cast can switch between likable yet wacky characters akin to the original episodes or
* Arguably, Penguin's not wrong to call Batman a criminal. Bruce Wayne is not a member of law enforcement, he has no legal right to fight crime. And since Batman puts himself in these dangerous situations more often than not, he can't claim self defense. If criminals knew who Batman was, there would be so many assault charges filed against Bruce it could put Wayne Industries out of business.
* Arguably played a bit more straight with An and Momoshiro: he saved her and Sakuno from bullies first, later he teamed up with Kamio to have Atobe give up on
* Arguably played straight when it comes to Thumper's 40mm slug and other shotgun-type ammunition, however; there is some noticeable recoil, but for the size of the shell being fired it's hardly what one would expect - that is to say, Night Strike doesn't wind up snapping her neck every time she fires one of them from it.
* Arguably played straight with the A-10 Thunderbolt II. Plenty of observers have remarked that the overall design of the aircraft makes it look like something out of World War II, with its prominent externally-mounted jet engines, straight-wing design, rounded nose and prominent bubble canopy cockpit. It's a notion only reinforced by the frequent depictions of these planes bearing shark teeth nose art like those of the warbirds of yester-year.
* Arguably predated by the even creepier Pickled Punks of 4th bestiary, which are deformed fetuses/babies preserved in alcohol that have been animated as blood-sucking undead monsters.
* Arguably Quentyn's respect starts much earlier and builds up gradually as he proves his abilities. He also seemed to get plenty of respect until a he decided he wanted to be a Questor, which was generally considered to be an outdated tradition with no appointed Questors for decades.
* Arguably Ruth, the runner-up of series 1, who was so calm and composed, she would often finish ahead of time while everyone else was rushing to meet the deadline.
* Arguably, Ryoma and Takumi could count, too, since she was never officially adopted but lived with them for as long as the Avatar was in Nohr.
* : Arguably Shinji once he truly becomes an Alicorn. He's capable of surviving in the vacuum of space, withstand atmospheric reentry with ease, and tests his telekinesis by creating a sphere over a kilometer in diameter of molten metal, concrete powder, and crushed glass, and throwing it into orbit thereby creating a second moon.
* Arguably, Sora and Riku, or at the very least Riku towards Sora. In the original Japanese dialogue of
* Arguably, the Band of Seven and Kikyou have prosthetic bodies which store their souls. Ditto for Akago/Mouryoumaru, kinda.
* Arguably, the Battle of Vittorio Veneto in World War I in late October 1918. While there was already movement for peace, matters accelerated because of this battle. Two evenly matched armies (Italians with British/French support v. Austria-Hungary), with the fate of Italy and Eastern Europe to be determined. Midway through the battle, though, the Austro-Hungarian Empire begins to fantastically self-destruct behind them, literally splitting their army in half. In less than five days, the battle ends with Italy completing its 70-year unification, and the Empire fragmenting into several smaller nations. In turn, this led the Germans to revolt, and force the other Empire (which swiftly became a republic) to eventually call for armistice that ends the war.
* Arguably the biggest are the Warriors of Chaos. Think hulking, 8 — 10 foot tall superhuman Vikings from the far north, their fiercest and strongest fighters clad in several inch-thick plate armour forged in the depths of Hell itself, their least and weakest still giant men clad in the hides of whatever slavering beasts they've hunted and killed, and all wield massive axes and blades that lesser men

would struggle to lift, let alone use effectively. Did we also mention that the country they hail from is basically adjacent to a blasted landscape where at the heart of which lies an honest-to-god portal to the depths of hell itself? Hell, let the esteemed Richter Kleiss fill you in on why these guys will fuck you up.
* Arguably the Core Seven era characters (G 3.5) as a whole, though most notably Toola Roola and Starsong, both of who were not even in earlier G3 material. The minority that like 3.5 maintain that they could have been much better characters if they'd given time to further the generation before being canned for G4.
* Arguably the crowner is probably when, after assigning the class to read several different, random books from the library, he doesn't bother showing up, just writes on the board, "Discuss."
* Arguably, the entire setting springs from an example of this trope. Canon is vague about just how many people escaped Earth before it became
* Arguably the filmmakers got exactly what they paid for when they took a traditionally comic role, made it much more sinister, cast Jason '
* Arguably the first is when Goku accidentally turns into an Oozaru at the end of the Pilaf Arc, which is not at all played for comedy and reveals the cause of his beloved grandfather's death.
* Arguably the Humping Robot counts, not that you'd want to get within ten feet of it.
* Arguably the internet group Anonymous could be seen as a real life counterpart to the Dollars.
* Arguably, the many Houseless residents of Jackson's Whole (collectively referred to as Grubbers) would also count, as the Houses Major and Minor are effectively the governments of that planet, so anyone who hasn't got House allegiance/protection is effectively stateless.
* Arguably, the missing ingredient is the mindset of the volunteer—the comic implies that Manhattan gained the powers as a side-effect of learning how to piece himself back together, which required his knowledge of particle physics
* Arguably, the more mundane extension of this trope could be the standard sitcom plot where an adult character meets a childhood friend they haven't seen in years only to discover that the person literally hasn't changed at all - usually right down to still living with their parents, having the same part-time job they had in high school, and wearing T-shirts for bands that would have been popular a decade or more earlier. The regular character will either ruminate on how they can no longer relate to this relic of their old life or to revert immediately to their matching younger mindset.
* Arguably the most famous Breakcore musician, Venetian Snares fuses the genre with a host of other influences, including Classical, IDM, and Dubstep.
* Arguably the most important music example of this trope is Teena Marie, who was embroiled in a legal battle with
* Arguably the most interesting part of the second half of Shakespeare apocrypha
* Arguably the most notable case though, is another one from the first season. Wee-Bey Brice, the main assassin of the Barksdale crew, is caught and offered a plea deal: he'll avoid death row if he confesses to all the murders he committed on behalf of the Barksdales. Wee-Bey immediately starts confessing to every single murder ever committed on the Barksdale Organization's orders, even ones that both the audience and the police know he didn't commit so that as much of the Barksdale group as possible will remain free and able to carry on with business.
* Arguably the most notable example in football (soccer) is Maurizio Zamparini, chairman of the Italian club Palermo from 2002 to 2018, except for a few months in 2017. Since 1987 he has made (as of the end of his final spell at Palermo in December 2018) 67 managerial changes, including 43 while in charge of Palermo. Several managers have been hired and fired multiple times. In the 2012/2013 season alone he fired Giuseppe Sannino after three weeks, replaced him with Gian Piero Gasperini, who was in turn turfed out in favour of Alberto Malesani, who was fired 19 days later and replaced by... Gian Piero Gasperini. Gasperini's second spell lasted less than two weeks before he was fired and replaced by none other than Giuseppe Sannino, the coach from the start of the season. Zamparini's last

managerial changes at Palermo began with hiring Bruno Tedino in 2017, followed by swapping Tedino and Roberto Stellone
* Arguably the most notorious example in cricket was the semi-final of the 1999 World Cup, fought between South Africa and Australia. Australia had set a modest total, and the South Africans were set to win in the last over with one wicket in hand. However, a run-out happened with the scores tied, and Australia were handed the victory on the basis that their average scoring rate in the group stages of the World Cup was higher than South Africa's.
* Arguably, the most popular, and most remembered Disney cartoon, airing just after
* Arguably the most spectacular example to be found in the entire game is Theodore Wicker; an Oxford-educated demonologist and portal mage turned
* Arguably the result of any protracted siege in history. The soldiers, after watching their mates getting killed in various horrific fashions over a period of weeks or months, take out their frustrations on the defenders and civilians inside.
* Arguably the show is an inversion, because several times the audience gets clues that Veronica doesn't. (In the above storyline, for instance, the viewers get to see a few different instances of the culprit's temper/violence firsthand, whereas Veronica only hears about the events in passing, if at all.)
* Arguably the signature scene of the series is Liam Neeson coming to Ricky Gervais and Stephen Merchant in hopes of launching a comedy career; much
* Arguably the single most satisfying moment in the game comes at the end of the mission
* Arguably the two most effective martial arts are traditional western styles that the average person probably doesn't even associate with the term "martial arts".
* Arguably the Xeelee themselves, though they are a very... exotic kind of life.
* Arguably this has become the defining character trait of Ryan the Temp after his promotion in
* Arguably, this is more so that Kirk can't be accused of racism by his superiors in the Federation than anything else. He recognizes that the people back on Earth aren't going to look too kindly on him if he doesn't offer assistance, and he knows the Romulans well enough at this point to guess that Nero will reject his offer. Even if Nero did accept, Kirk could probably have simply used this as leverage to blackmail him. This incident is actually an example of Spock and the Vulcans not being entirely logical due to their bad blood with the Romulans.
* Arguably, this may apply with Susie as well. Susie generally is contemptuous of Calvin, ignores him, and associates with him only when necessary, but at the same time, perhaps like Calvin, doesn't know how to handle her feelings towards him.
* Arguably this was the problem that kicked off the Horus Heresy. The Emperor of Mankind steadfastly denied his divinity while his Word Bearers Legion insisted that he was, in fact, a god. The Emperor eventually felt it necessary to make an object lesson of one of the worlds the Word Bearers had indoctrinated. Now the Emperor is worshipped as a god by most of the Imperium, and he's no longer around (as a consciously aware entity capable of interacting with others, at least) to argue the point.
* arguably to do it! That's how Zeus knocked up Artemis' follower, Callisto.
* Arguably, what some considered pregnant, 17-year-old Bristol Palin's engagement to be in spite of the press releases.
* Arguably, what takes the cake is the final scream of "You Could Be Mine". Just when you think it's over Axl somehow manages to grow an additional lung and keeps going for a few more seconds.
* Arguably with Stephanie Griffin as Yukari. She wasn't a celebrity, but it looks like she was only given a role because she voiced lead Himeko Se in
* Arguaby a Deconstruction in the latter case. They fired it once in battle, against live targets (they had been fighting mostly
* argue back and forth with each other while on their rescue mission with Starlight and Thorax. While they are powerless without magic and arguing over which of them is more useful on the mission, Discord says once the throne is destroyed and he has his magic back, he'll be all-powerful again and be able to easily save their

friends, while she'll still be "a self-absorbed, below-average illusionist".
* Argued by Fingolfin. He loathes Eol, but Luthien's story convinces him that disapproving of his daughter's marriage is as meaningless as if he were disapproving of his death. So he decides to welcome Eol in the family, hoping that gesture may lessen the tensions in his daughter's marriage.
* argued paranoia, claiming that the film is actually highly critical of the United States.
* argued with them before they left. This has shot her self-esteem to pieces and left her believing that she doesn't deserve to live.
* arguing matches. The source of all this is that the game is a 3D fighter, and arena design and character fighting style can vary rapidly.
* arguing to have the gratuity removed only to leave a tip that was larger than the original gratuity.
* arguing with his stomach, just as if they were a bickering couple at a marriage counselor. (Note the stomach's voice: it's Gene Wilder.)
* Arguing With Idiots includes a bunch of quotes from liberals insulting him.
* "Arguing with Thermometers" by Enter Shikari, a protest song about exploiting the polar icecaps for the sake of acquiring the oil beneath it. : "So let me get this straight, as we witness the icecaps melting, instead of it spurning us to change our ways; we're gonna invest in military hardware to fight for the remaining oil that's left beneath the ice? Well what happens when it's all gone?! You haven't thought this through, have you boys?"
* Argument of Contradictions: Two characters enter an argument that amounts mainly to yelling each other's opinion or choice at one another.
* argumentum ad hominem (not "hominum") means dismissing another's argument because of who said it rather than because of what was being said.
* Argus Filch muses about how punishments were much more severe back in the old days and outright says that he
* Argus is revealed to have its own world-soul, which has suffered for millennia at the hands of the Legion.
* Argyraspides, from the war of the successors. These men had followed Alexander the Great in his campaigns and continued fighting in the wars of his successors. Most were over sixty by the time of their last battle. They formed a unit that was undefeated in battle, the only reason they surrendered was when the rest of the army had been routed and their camp, which had their wives, children, and loot, were taken by an enemy army. Afterwards they were disbanded and sent two at a time on suicide missions that they never returned from.
* Arhats live in absolute contemplation. Boddhisatvas are Buddhas who choose to keep existing in the Universe to help other beings out of pure compassion. Non-Boddhisatva Buddhas are fully separated from the material Universe or Samsara.
* Aria Advance, doujin and fan artists had a field day with this trope by pairing them together.
* ARIA, Akari winds up in a cafe that is usually only open to cats. Sure enough, when she walks out it appears to have been long abandoned.
* Aria and many other people are sliced across the chest by Erza's sword, but the wounds are nowhere to be seen.
* ARIA, Aqua (Mars) has its own calendar to represent that it has a different amount of days per year than Earth, but the series does use both that calendar and the standard Gregorian calendar.
* Aria Blake and Salina de la Renta openly refer to themselves as "Spoiled Brats" when they
* Aria Blaze absorbs some of Kaizer Ghidorah's energy and gains some of his powers. When she uses them, her normally violet eyes turn red, plus she becomes a lot more aggressive.
* Aria Blaze comes from a magical land of talking ponies and used to be a creature who would lure sailors to their doom with her singing, yet she finds the idea of aliens hard to believe.
* Aria Blaze's name is not mentioned in the film, only in the credits. Particularly egregious in this case since she's one of the major villains. Adagio

Dazzle and Sonata Dusk's last names were also unmentioned.
* ARIA: Despite the extremely optimistic atmosphere, it's an essential part of the setting that the oceans rose and among other things submerged Venice. Luckily, terraforming Mars went extremely well and a new Venice was built there. Characters mention other changes that are even more disturbing; Ai has never seen a blue sky and Akari comments that people can no longer swim in the oceans or dig in the earth.
* Ariadne auf Naxos. Strauss also composed substantial incidental music for the play, and later revised it so it too could stand on its own.
* Ariadne Oliver is a character who appears in seven of the novels. Like Christie, she is a mystery writer who doesn't much care for her principal hero (vegetarian Finnish detective Sven Hjerson) but has to keep writing about him because he's popular with readers. Christie uses Ariadne to poke fun at the mystery genre, as well as herself and her own mistakes in her stories.
* Ariadne was already betrothed to Dionysus, when she ran away with Theseus. Dionysus either ordered Artemis to slay her while she was giving birth or forced Theseus to leave her on Naxos, where he took her as his wife anyway.
* Ariadne was turned into a goddess by her husband Dionysus. He does the same for his mother, Semele.
* Ariados is about 1 meter tall and even its pre-evolution Spinarak is a foot in size.
* ARIA has people from Earth regularly visiting Mars (now called Aqua) for business or pleasure. A girl the main cast meets returns in the first season just to go to a New Years festival.
* ARIA has some of this. Alicia could have picked a local girl for an apprentice, but instead she chose someone who needs a lot of explanations about the planet she moved to—which then of course raises the question why Akari didn't read a travel guide beforehand.
* ARIA has the scene in which Alicia and Akari visit the remote part of an island, where a huge sakura tree blooms, covering the abandoned train car under it with cherry blossoms.
* ARIA, he finds out that all the girls he knows are guys in this new world and vice versa. The dresses Undines wore in the main world turned into a cloak and pants, while all of the original world's men incorporated skirts/dresses into their outfits as women.
* ARIA - Initially released sub-only on DVD by Right Stuf; a dubbed Blu-ray release for 2018 was funded via Kickstarter with a very successful campaign at that. To wit, it raised more than half a million dollars.
* ARIA is a special case, in that she manages to stand out in a setting that is practically paradise incarnated.
* Arial Kuyumaya also has shades of this; her mental processes run on
* ARIA manga, it was serialized in a shōnen magazine and it tends to be labelled as such.
* ARIA manga there is a variety in that extras usually still are have distinctive features, but that other Prima undines aside from the three main ones are drawn without faces.
* Ariana almost gets raped by a classmate after she agreed to go to a movie with him and a couple of other classmates and ended up in the car alone with him. Luckily she was able two whack him in the face with a soda and flee the car but the experience understandably traumatized her.
* Ariana Dumbledore despite having been dead for about a century and Harry never previously knowing she even existed.
* Ariana Grande at the 2016 MTV awards, and adopted a "blaccent" to go along with the look.
* Ariana Grande, but has adopted rabbits in her work, especially as of the music video of "Dangerous Woman". The bunny-ears mask is particularly associated with her.
* Ariana Grande (she chose to wear a wig instead of dyeing it for the later episodes) to the point where she started wearing it in a ponytail to cover up all

the split ends — which quickly evolved into her defining hairstyle once she went on to pop stardom.
* Ariana Grande. The years of dyeing damaged it, so wearing it in the ponytail was initially just to cover all the split ends.
* Ariana Grande to say "Seven Finger-Rings," but due to the order they're placed in, the tattoo can also be read as "Small Barbecue Grill Finger" or "Ring Seven Finger." The one consolation out of all this is that the tattoo is on her palm, meaning it'll fade away eventually.
* Ariana Grande. Unlike many break-up songs, this one is much more charitable to her exes.
* Ariana Grande (who was even credited as a feature). For Zedd, however, it's pretty normal sounding.
* Ariana was this in LLF during 2004, where she was so ineffectual that even when they were on the verge of winning a match she screwed so much up that her
* Ariane get into a drunken argument outside a club. A cop comes up to them and tells them they'll be arrested if they get too rowdy. After he leaves, the two go inside and burst out laughing.
* Arianna is capable of changing her avatar at will, and initially sports a different form each time you see her. She eventually settles on a permanent look, but still uses shapeshifting to trick the heroes at one point.
* Arianna wants to use STORM’s power to wipe the Internet clean, then replace it with a cold and clinical world of pure data where she feels safe. (The
* Arianna will comment in Primrose's chapter 2 that Stillsnow isn't far from Flamesgrace. In reality, it's just about the furthest away two towns in the same region can get. The frostlands are one of only two regions where you can't go straight from the chapter 1 town to the chapter 2-3 town and then from there to the chapter 4 town. To get from Flamesgrace to Stillsnow, you have to make a massive detour through the forest to the west.
* Arianne Martell also attempted to seduce Renly when the Baratheons visited Sunspear. Renly seemed mostly confused by her attempts.
* Arianrhod. Even the Japanese fans caught this one and the files was quickly renamed.
* Aria of Sorrow hit point. It's also tied for highest EXP yield out of all non-bosses.
* Aria of Sorrow, the chamber in which Legion is fought is made entirely of human bodies. The surrounding rooms are all made of stone — or carved in the rock, since they're underground.
* Aria of Sorrow, when you enter one boss fight room, a large number of smaller bats immediately form into a giant bat… Which then gets crushed by a giant hand belonging to Balore, the boss you actually end up fighting.
* Aria's hired guns (a mix of ex-Alliance soldiers and other species)
* Aria's mind when the topic of "temperature tolerance" included, among others, a large enema syringe, implying she would do this... should Shino didn't clarify what was in the latter's mind.
* ARIA's nature as a feel-good series, though, just how this artificial gravity works is left unexplained.
* ARIA, so her announcement does come totally out of the blue. Worse, her fiancé doesn't even get the slightest bit of screen time, so it all feels like quite a cop-out.
* ARIA spans the better part of three Martian years, or five to six Earth years in the anime and manga, respectively. Yet Alice, who we first meet at 14 years old while attending middle school, doesn't graduate from it until five Earth years have passed. The other main characters also seem to have aged little — most noticeably, in the anime, Ai.
* Aria's Story has sentient books as the main NPCs, and they get around by floating and flying their book wings.
* ARIA takes place in the city of New Venice, in a futuristic terraformed Mars.
* ARIA takes place on Mars, which got mostly covered with water from the pole regions after terraforming and subsequently got renamed to Aqua.

* ARIA talks a great deal about aspects of Venetian history and architecture, thanks to the story being set in a near perfect replica of Venice.
* ARIA The ANIMATION and The ORIGINATION (Season One and Season Three) are both 13 episodes in length whereas ARIA The NATURAL (Season Two) is 26 episodes long.
* ARIA, the city where most of the story takes place is Neo Venezia on Aqua (formerly known as Mars) and is based on Venice.
* Aria the Scarlet Ammo AA, takes place around the same time as the first season, but this time focusing on a set of new characters.
* Aria the Scarlet Ammo both sport twin tails, Aria being a tsundere and Riko being straight-out immature and bratty.
* Aria the Scarlet Ammo has Aira's mother Kanae Kanzaki, who due to various circumstances has been sentenced to 862 years in prison. One of Aria's main motivations is clearing her mother's name since she's innocent.
* Aria the Scarlet Ammo manages to tame) starts as a plain wolf, but when Reki becomes more prominent in later volumes, he starts to act as an adorable furball outside of combat. This contributes to make him a character of his own.
* Aria the Scarlet Ammo, Riko modified her school uniform to be more Lolita-like.
* Aria the Scarlet Ammo: Shirayuki Hotogi. A perfect Japanese beauty according to Kinji, except for one flaw — jealousy, which turns her into a berserker who assaults any girl approaching Kinji. When she finds out that Aria is living with Kinji she goes as far as trying to murder her. She is shown to love Kinji to the point that she will do anything for him.
* Aria the Scarlet Ammo tendencies and his general inner thoughts. While the gun info wasn't really necessary, the anime never gives a real reason why we should like the protagonist; it makes what was justifiable dislike for his situation seem like plain old angst. This is due to the character being the type convey his reasons in his thoughts rather than explaining his circumstances to other people, which the Anime never really displays properly.
* ARIA: The series is set in the 24th century on a terraformed Mars, now named Aqua, and follows a young woman named Akari Mizunashi as she trains as an apprentice gondolier (known as Undines).
* ARIA, the titular heroine doesn't realize that she has fallen in love with Uthar in "Les Chevaliers d'Aquarius" until he has passed away. But even then, she can't name the feeling she's experiencing at the thought of never seeing him again.
* ARIA, which takes place on a terraformed Mars called Aqua, they explicitly mention Aqua's longer year.
* Aribeth has one if you have too few ranks in Persuade and didn't complete her romance subplot.
* Aribeth's doesn't answer for unjustly executing two staunch champions of the city as scapegoats, which means none of the wrongs anyone ever did Aribeth were addressed.
* a rich family tricking the collector into canceling them from the taxpayers list and give them some money.
* A rich heiress kills her husband and the two women he was having a threesome with.
* A rich old hunter is showing off his trophy room and describing the exotic animals he's hunted. At one point the visitor points at one and asks "What is this?" "Oh, it's a Notmebwana" the visitor looks confused at says he's never heard of something like that. The hunter tells him "Oh, that's how I named it, because that's what it kept shouting as I was trying to shoot it".
* A", Rick, Carl, and Michonne run into a lone man desperately crying for help and they witness him being overwhelmed and eaten by walkers.
* A riddle features a clever aversion of this. Suppose a truck weighing one tonne at the start of its journey (including the driver) is driving across a bridge with a weight limit of exactly one tonne. Halfway across the bridge, a robin weighing 75 grams lands on the bridge. What happens?
* A Riddle Wrapped in a Mystery Inside an Enigma: Somebody describes a frustrating mystery as three mysteries in one.
* A Riddle Wrapped in a Mystery Inside an Enigma: Something is described as three

mysteries within one another.
* A riddle you may have heard in elementary school: "Can you stick out your tongue and touch your nose/forehead/ear?" (Yes. The wording doesn't specify you need to touch your nose/forehead/ear
* A ridiculous example in the first season finale and second season premiere of
* A ridiculously complex board game named "Cloak and Dagger" is significant in
* a ridiculously long series of prank callers, all giving the same nonsense answer ("India!") to his phone-in quiz questions.
* A ridiculous number of video game mascots are apes or monkeys of some sort: The mascot for the rhythm action game
* Aridus and Mechanus are extreme examples, since Aridus was once a lush world and Mechanus wasn't supposed to be taken over by the Mechanoids. One
* Arie Hon. Before entering the Tower, Arie Hon challenged Jahad 10 times and lost 10 times, so he chose to serve Jahad as a result.
* Ariel, a curse of a werefish can be healed by "living silver." It turns out that silverfishes qualify.
* "Ariel" also has Simon going off to save a dying man, risking capture and leaving River in Jayne's care — which he probably wouldn't have done if he didn't actually trust Jayne to get River to safety should anything happen to him. One can't help but wonder how the extent of Simon's trust factored in Jayne's decision to save the Tams instead of simply making a run for it at the first opportune moment.
* Ariel & Belle: Ariel has a year to either find true love or return to the sea, and the animals decide that getting Belle and Ariel to fall in love is easier than trying to ask Belle to make arrangements to get Ariel back to the sea.
* Ariel and Faen also have this when younger, though after the timeskip
* Ariel and her sisters were briefly shown as little girls at the very beginning of
* Ariel briefly tickles Flounder during her "Part of that World" song.
* Ariel certainly holds this view of Atlantica and undersea life in general in
* Ariel, however, and she has suddenly lost all of the ability, leaving her almost (unfortunately they excluded her feisty attitude) exactly as she was in her original film, leaving many players to wonder what the point of revisiting Atlantica was to begin with.
* Ariel in WWE's version of ECW was introduced as a Romani fortune teller who was then bitten by Kevin Thorn to become a vampire.
* Ariel is a beautiful mermaid princess living in an underwater kingdom yet feels alienated by her hobbies and feeling misunderstood by her father. Eventually she manages to both live in the dream world she always yearned for and also catch the affection of the guy of her dreams.
* Ariel is a little lost when her squad leader is missing and they need to figure out what to do. Ini'riia makes it clear that being
* Ariel, Kasurinen committed a few petty crimes before going to prison. After he breaks out, he has graduated to bank robbery and murder.
* Ariel, Kasurinen confronts the man who had robbed him, whereupon the man pulls a knife on him. Kasurinen disarms him and starts beating him, and is promptly arrested and sentenced to two years in prison for assault, attempted robbery, possession of a weapon and resisting arrest.
* Ariel, Mikkonen fakes suicide by hanging to lure the prison guard into his and Kasurinen's cell in order to facilitate their escape.
* Ariel, Mikkonen requests to be buried at a dump after he's been stabbed. Kasurinen obliges him.
* Ariel, not helped by the fact that her canon partner wasn't in the first game. The first scene between Sora and Ariel does have something that looks like flirting going on. Ariel's desire to see other worlds is paralleled to Sora's ambitions at the start of the game. Plus they share a couple of intimate scenes and Ariel is the only one of the Disney characters to worry about never seeing Sora again. But Sora is clearly attracted to Kairi and Ariel gets paired up with Eric in the second game (something that Sora actually helps with).

* Ariel Pink is a psychedelic lo-fi indie pop artist whose recordings hearken back to '70s and '80s music.
* Ariel, Queen of the Wood Elves, is arguably more influential and powerful in Wood Elf society than her husband, King Orion. They maintain separate courts, and she in no way owes her power to him - both having been invested with divine kingship by the spirits of the forest at the same time.
* Ariel Sharon Ehud Olmert, the government collapsed in a giant cloud of corruption that landed Olmert in jail. As of today, Kadima has no representation in the Knesset.
* Ariel", Simon can see that Mal, Zoe, and Jayne will never be able to convincingly lie about being paramedics, so he has to coach them. Jayne requires a lot of coaching, so much that he ends up over-rehearsed; when the conversation with the hospital doesn't go as practised, Jayne insists on spitting out his rehearsed line anyway, much to Mal and Zoe's horror. Fortunately, the nurse at reception is too wrapped up in her own work to do more than roll her eyes at Jayne.
* "Ariel": Simon plans a heist on a hospital, stealing medicines that the crew can sell for profit on the black market. The rationalization is twofold: One, that Simon's real goal is to get his sister River into an imaging suite so he can find out what the Alliance did to her at the Academy, and two, it's pointed out that as it's an Alliance hospital on a core world, they'll be restocked almost immediately, while the black market caters to people who otherwise wouldn't be able to get treatment.
* Ariel, the carefree, naive youngest sister, and Attina, the serious, mature eldest sister, in
* Ariel was down in the plans to show up in Season 2, but had her debut pushed back to Season 3. In Ariel's actual episode, her flashback doesn't involve Rumple at all.
* Ariel washing capsules are "Brrrr-illiant" because they will clean at a low temperature.
* Ariel was pushed to murder at a young age, and then killed a slave on impulse.
* Ariel Winter— even though she still has an average chest. That said, she did confess she didn't want to go completely flat.
* Ariel Winter, Winter revealed in August 2015 that she'd had a breast reduction in June that took her from 32F to 34D, citing negative media attention as as one of her primary reasons.
* Aries: Your plan to put on a spectacular song-and-dance show to raise desperately needed cash will somehow fail to save your foundering musical.
* Arifureta: From Commonplace to World's Strongest: Aiko falls in love with her student Hajime after he saves her life from poisoning by feeding her a potion via mouth-to-mouth.
* Arifureta: From Commonplace to World's Strongest: Aiko's apperances in the light novel can be counted on one hand, yet it's because of her that Hajime went from being from a very selfish anti-hero into someone willing to help others to avoid living "a lonely life".
* Arifureta: From Commonplace to World's Strongest, Hajime and company respond in ruthless and decisive fashion, not only destroying the slavers and freeing Myuu but liberating everyone else they'd taken.
* Arifureta: From Commonplace to World's Strongest, Hajime has rescued most of his harem members at least once at some point, causing them all to fall in love with him. Shizuku also falls in love with him after he constantly comes to her rescue.
* Arifureta: From Commonplace to World's Strongest: People can check their stats, skills and job thanks to a card-like device attuned to the user. Unfortunately, they are relics and no one knows how to make more, so they cannot be given to everyone.
* Arifureta: From Commonplace to World's Strongest" that causes Hajime to fall down a ravine and disappear.
* Arifureta: From Commonplace to World's Strongest who said that reading the storyboards he was sent caused him physical pain. Despite this, the anime still managed to boost the sales of the books enough that a second season was announced.

* A rigging coming down the shaft tags her in the head as she's being pulled up and...yeah.
* a right-wing terrorist planned a shooting at Rafiq's local mosque while the other retirees present called the police. By the time the police arrived, Rafiq and his fellow worshippers had already subdued and tied up the terrorist.
* Arihiko and Shiki. Arihiko is one of the few people who really knows all about Shiki and understands him and the two are mostly inseparable.
* Ari. His appearance is that of an adult man, but really is only around 7-years-old.
* Arika in that she was unjustly accused of a crime, and they didn't want Negi going off half-cocked to defend her reputation, so they didn't tell him about her at all.
* Arik Cannon, she even speculates that Cannon might have a "secret crush" and that it might have been the reason why he held back during their matches.
* Arik Cannon's promotion F1rst Wrestling. Also, the tag team champions Victor Andrews and James Anthony, F1rst Generation.
* Arilan can be very forthcoming, and he is among the most highly trained of Deryni, since his family have successfully hidden their magic for over two centuries. However, his long experience with the Camberian Council (his elder brother Jamyl and his uncle Seisyll were members before him) means he's apt to keep things to himself. The night Morgan and Duncan arranged for Kelson and Dhugal to experience
* Ari, Lena's mom was contacted by a man who had abandoned her years before and who she had never entirely gotten over. She went into the meeting seriously thinking it might result in her leaving her new husband and family, but left grateful that her life had gone in a different direction and with new appreciation for her husband.
* Arilou Lalee'lay and the Shofixti (upright-walking marsupials). A few others are added in the third game. It's implied that the Arilou may have tinkered with human genetics at some point in our past, which could explain the resemblance.
* Arimaa: A chess variant involving animals attempting to shove each other into pits.
* Arimaa subverts this trope quite a bit. While Gold does have the first move, Silver can see Gold's layout and react accordingly, making them more or less equal.
* Arima's best friend, Hideaki Asaba, loves being surrounded by his "kittens." In the manga's epilogue, he becomes an artist famous for portraits of women. Part of his success is that he always paints them (except for Yukino...) as ten times prettier than they actually are. When they point this out to him, he just shrugs and says that's how he sees them.
* A rime example was the 2004 Indian Ocean tsunami, in which some newspapers mentioned the 140,000+ Indonesian casualties as an afterthought - in comparison, the number of foreign citizens abroad killed totaled about 2,200.
* Arimnaes' Happy Fun Time Power Hour: Busting through the wooden wall of a building to escape the approaching guards? Yup.
* Arin also animated and provided grunts for the dinosaur segments in the NSP video "Dinosaur Laser Fight".
* Arina Tanemura is a drama about a former delinquent going to a school for the elite. General fan opinion is that it's... not her best.
* Arina Tanemura." That is to say, thanks to some weird rules in the Tanemura multiverse, a tall and hunky guy can completely turn into a little petite girl merely by putting on a skirt, some makeup and girly accessories. These characters tend to serve as mere plot twists that will put even the most adamant suspensions of disbelief to shame.
* Arina Tanemura, the character Maora was so feminine in the first volume that even the staff who read it thought that he was a girl. His real gender wasn't revealed until the second volume.
* Åke "Dacke" Axelsson, a journalist at the Swedish tabloid Göteborgs-Tidningen, came up with the idea of exhibiting a series of paintings made by an ape, under the presumption that they were the work of a previously unknown French artist named "Pierre Brassau", in order to test whether critics could tell the

difference between true avant-garde modern art and the work of an ape. "Pierre Brassau" was in fact a four-year-old Common Chimpanzee named Peter from Sweden's Borås djurpark zoo. Critics praised the chimp's works, with Rolf Anderberg of the morning Posten writing, "Brassau paints with powerful strokes, but also with clear determination. His brush strokes twist with furious fastidiousness. Pierre is an artist who performs with the delicacy of a ballet dancer." One critic, however, panned the work, suggesting that "Only an ape could have done this". After the hoax was revealed, Rolf Anderberg insisted that Peter/Pierre's work was "still the best painting in the exhibition." A private collector bought one of the works for US$90.
* A Ring of Djinni Calling does just that—it summons a genie to serve its wearer for an hour per day. Based on the story of Aladdin, of course, though unlike the Genie of the Ring in that story, the genie isn't inside the ring, it's actually summoned from another plane of existence.
* A Ring of Endless Light, series, that deals with the Austin family, and is the fourth out of five books and several short stories.
* A ring of salt will protect you against ghosts. Another way to get rid of ghosts in the Supernatural-verse is iron, although it's also used to just kill or weaken them normally.
* A Ring Of Their Own, Beth Phoenix is this to Layla, including sing-songing "I turned you gay" at her.
* A Ring Of Their Own gets fed up with the state of women's wrestling and after conveniently winning $20 million in the lottery, starts her own promotion, the FWF.
* A Ring of Their Own, had FWF commentator John Bradshaw Layfield saying this during a match that began with Ivory giving Michelle McCool three armdrags in a row:
* A Ring of Their Own in the locker room, making her unable to wrestle in the finals of the FWF Tag Team Title Tournament, making them the winners by default.
* A Ring Of Their Own in the ring. Michelle tries for a Faith Breaker but her hands are so sweaty she drops Ivory on her head, seriously injuring her and her being taken to the hospital.
* A Ring Of Their Own is called "Slime Time", where the winner gets to dump a bucket of "slime" (in reality, pancake batter with green food coloring) over the loser's head.
* A ring out is one of the ways for a victory during the finals tournament of the U.A. Sports Festival arc in
* Å, vilken härlig fred!, about war, democracy, and civil rights that touches on this. One scene is in an alternate history where Nazi Germany won WWII and... not very much seems different. A movie poster announces the latest 007 film — 007 Gert Fröbe, that is — and the latest teenage fad is rück und rüll music, but otherwise the actors read the actual newspaper of the day and discuss current events that the audience would be familiar with. But: when one of the actors complain about Hitler getting the Nobel Prize ("a fat geezer who spends his time at the Riviera wrapped in a blanket making bad paintings") a member of the audience leaves to come back later with some uniformed policemen who drag the actor off stage.
* Arin has always been uncomfortable with people drawing porn of his wife, Suzy, as he requested that a Newgrounds artist remove her likeness from a pornographic comic (she and Arin were thus replaced by
* Arion, at least in the Superman story "Camelot Falls." He believes that Superman must die, leave, or otherwise stop interfering with humanity. He saw a
* Arion wanted to destroy Superman because he felt like Superman was propping the world up to the point that when he broke, it would crush humanity.
* Arisa Arisa, and she doesn't seem to have learned anything from the experience.
* Arisa decide to switch places for a day and Tsubasa learns that her sister has been keeping some very dark secrets...
* Arisa ends with Arisa and Midori being together because they are truly in love. This is after Midori revealed how mentally unhinged he was, was directly responsible for horrific events, manipulated everyone in class (including Arisa, the girlfriend he supposedly loves so much, too), and tried to kill Arisa's twin

sister numerous times and their mother.
* Arisa Meigo thought she was a normal girl. Toward the end of movie
* Arisa's fire-wielding avatar started out as a fan depiction of what she would look like as a
* Arisa Uotani and Kureno Sohma. Arisa even worries if their 9-year age difference is illegal once she learns of Kureno's age.
* A Rising Thunder to learn while he was in the military and fell back on the eyebrow, but as a politician it's become a handy expression.
* Arista Nashville, Scotty McCreery released his 2017 single "Five More Minutes" independently. The song started gaining attention at radio, so Sony-owned Triple Tigers stepped in to promote it.
* Aristillus series has four uplifted dogs as central characters, and each one carries a very unique personality, while each being very 'dog-like' in sensibilities and all of them being smarter than humans. Their role in the Lunar Colony of Aristillus is a central question examined by the book and the dogs, respectively.
* Aristillus series, the giant antigravity ships made from modified cargo freighters are able to sneak between earth and the moon thanks to a 'stealth coating' that absorbs radar. At many points during the story, large objects sneak up on the lunar surface catching people unawares until the last second.
* Aristillus they find it a maze of twists, turns, and angry natives trying to kill them with extremely large guns.
* Aristillus Tudel uses pliers to break each of Captain Kear's fingers one by one, solely to hear the man scream and take revenge for earlier humiliations. He then proceeds to do something unspecified with his belt, and is shown to sadistically enjoy the whole process.
* aristocratic units always shows the Ghosts' as more subdued. (Better for subterfuge at any rate.) Conversely, one mark that they can integrate with the Belladon soldiers is that the Belladons take their advice about darkening their insignia so it doesn't show up on the battlefield.
* Aristocrats Are Evil: Evil, greedy, hedonistic, and obstructive members of nobility (and royalty).
* Aristocrats Are Evil: If the punchline isn't taken as ironic, then it would be a straight example of this trope.
* Aristocrats Are Evil: Royalty, nobility, and other established members of the social upper-classes are often depicted as cruel, rich assholes who show nothing but contempt for anyone who isn't as wealthy as them.
* Aristocrat's personality in the onlookers. What is peculiar that is doesn't seems to respond to the user's main abilities. von Ransow, an aristocrat with only Soft abilities has this, and Niall's abilities are mostly good for killing everything.
* Aristocrat Team: A team where it is possible that certain members of rich/noble bloodlines team-up together.
* Aristodemus was one of only two Spartan survivors of the 300 Spartans' famous defensive battle at Thermopylae. He had been temporarily blinded by disease along with another Spartan named Eurytus and they were sent home by Leonidas, but Eurytus turned back and died with the rest of the Spartans. Meanwhile, another Spartan named Pantites had been sent on an embassy and failed to return in time for the battle. Back home in Sparta, both men found themselves disgraced. Pantites hanged himself, but Aristodemus endured being called a coward and humiliated at every turn and bided his time. Next year, the Spartans faced the Persians again at Plataea, and Aristodemus was in the front line. As the armies approached each other, Aristodemus broke ranks and charged the Persians by himself. He fought furiously and killed several Persians before being cut down. Afterwards, he was cleared of all accusations of cowardice, but still he was not awarded any honors since he had left the phalanx to fight on his own, which was considered dishonorable and unfitting for a Spartan soldier. (The historian Herodotus, who recorded this, commented that if both Aristodemus and Eurytus had gone home, or Aristodemus alone had been excused, perhaps the Spartans would not have considered it dishonorable.)
* Aristoi, all human knowledge is contained within the Hyperlogos. The database is

so big, in fact, that the Moon has been entirely converted into a dedicated server farm, and it's only one of many such farms throughout the known galaxy.
* Aristoi, terraforming is so easy that humanity's spread through the cosmos is limited only by the Aristoi not wishing to have to run any more planets.
* Aristoks have three distinct forces - the commoner Palace Guard, the noble Shield Knights, and the religious Flame Champions.
* Aristophanes, as one character beseeches another to do whatever comedy bits he pleases, but not [long list of bits apparently already considered over-used].
* Aristophanes (Dionysos' slave Xanthias has just described to him a horrible monster that may or may not have existed) :
* Aristophanes holds the dubious distinction of being banned twice, in 1942 by the Nazi occupators and again from 1967 to 1974 by the Greek military dictatorship. The reason for this is evident: the story is about a woman ending the Peloponnesian War by organizing a protest movement. That fact that said protest was a sex strike probably didn't help.
* Aristophanes, it seems that his message was more like "even women are smart enough to know this war is bad."
* Aristophanes mocks moral relativists by depicting them as opposed to beating them.
* Aristophanes' plays gives an example of the difficulties a translator faces: jokes were made about people from the island of Salamis, because they had to row to the mainland, and the ancient Greek word for 'row' had a double meaning. Since modern audiences wouldn't pick up on this, the translators had to add a Lampshaded Double Entendre: "She's from Salamis, need I say more?"
* Aristophanes's play "The Clouds" makes fun of several Athenian figures of the time, but most notably to a modern audience the philosopher Socrates. According to legend, Socrates rose and waved to the crowd during the premiere of the play to show how it didn't bother him in the slightest.
* Aristophanes was also parodying and making satirical references to comedy works by his rivals, such as Eupolis and Cratinus. He is the only writer of Old Comedy whose works survive to the present day, and we know little about his contemporaries.
* Aristotle and Dante Discover the Secrets of the Universe, a novel that focuses more on the coming-of age aspect of the main character, but without brushing aside the LGBT themes.
* Aristotle as well, was that other historians realized that Aristotle was actually talking about this trope; it was never actually a rule so much as a budget limitation that forced many playwrights to keep the action relatively low-key, as opposed to epic poems that didn't suffer those limitations.
* Aristotle: For centuries, his scientific theories were considered dogma in Western civilization. He was seen as one of the biggest geniuses of the ancient world. Unfortunately, this also had a bad effect, because nobody dared to contest whether his theories were actually true. Aristotle had theorized a lot of stuff purely on observation, rather than testing it. This has diminished his stature quite a bit since
* Aristotle. His reputation as a biologist tends to get tainted by association, mostly because actually studying the history of science is more work than claiming to be smarter than dead people.
* Aristotle Means, tries to claim to have helped Juniper Woods cover up her crime. Not only is the culprit guilty, but as Athena points out, the person in question is actually responsible for Juniper coming under suspicion in the first place.
* Aristotle, oldest existing work of literary criticism, in which he identified quite a few tropes.
* Aristotle's philosophy posits that every personal quality is an axis of a person's moral alignment, and the ideal/virtuous path is somewhere on the middle of each axis, called the golden mean or middle way depending on your translation. For instance, if courage is a virtue, it's actually a scale where going too high results in
* Aristotle (the Great/of Macedon) and Leonidas I were all surnameless. After

Romans conquered Greece and started importing Greek slaves, any freed Greeks had to adopt the surname of their ex-owner since they lacked any of their own.
* Aristotle") though Aristotle seems not to have intended it as such. As a result, virtually all Renaissance drama from continental Europe is an example of this trope; English drama developed independently, and as a result is less likely to follow the unities especially in its earlier forms.
* Aristotle uses this trope frequently in the Metaphysics. To introduce new concepts, he will begin with an
* A rite of passage for musicians once they hit a certain level of popularity is that they get a call from Maxis and
* Arithmancy, since the Master (as noted below) is hardly in the running for Boss of the Year he's not exactly in a position to lecture.
* Ariya - "Go Away And Never Come Back" ("Уходи и не возвращайся")
* Arizona Cardinals head coach Bruce Arians, 65 at the time, announced his retirement at the end of the 2017 season, taking a job with
* Arizona Dream on her accordion until she's driven everybody else in the house bonkers. It's her favorite passive-aggressive weapon, whether it's to make herself busy when somebody else wants to scold her, or appear innocent right after her latest act of sabotage.
* Arizona. It is also a tourist attraction, though most of the original sets were lost in a fire.
* Arizona's mess decks lands in the ammo magazine below, giving one of the cooks time to look down the hole and then back up like "Wow, that was close." Then, its timer stops and it detonates all the ammo in the compartment, effectively blowing the ship in two.
* Arizona Sunshine is set in the southwest of America, which is overrun with zombies.
* Arizona Sunshine: You can wield revolvers against the undead, but it's debatable if they do more damage than a glock.
* Arizona vs. Cincinnati, February 10, 1996: The game is tied at 76 with just a couple seconds left and Arizona's Miles Simon gets his hands on the ball. Just before the buzzer, he throws up a desperation 3/4ths court shot that, by some miracle, goes in. Arizona wins 79–76, giving Hall of Fame coach Lute Olson his 500th career win.
* Arizona we have Summer and Slightly cooler Summer (Lows in the 'winter' of 50 F and highs of 120 F in Summer, normally.)
* Arjen Anthony Lucassen" in particular has a surprisingly upbeat song advertising a certain "Dr. Slumber’s Eternity Home".
* Arjen Anthony Lucassen, takes part in a great many musical projects that all coincide in some way, either in similar style or playing one another's songs when in concert. The last two Ayreon albums have had four year gaps between them and the previous one.
* Arjona's song "Quién Diría", about an aspiring musician and a rich girl. The song is full of counter-comparisons.
* Ark 2' first band) is about humanity evacuating into space because Earth is dying.
* Arkady and Boris Strugatsky's who treated Earth as an insignificant roadside stop on their journey.
* Arkady's transparent skirt prompts Karl to ask her to wear underwear in
* Arkana faces Yugi in a duel where the loser will get their legs cut off with a buzz saw. When Arkana loses, he first starts panicking when the buzz saw approaches, then reveals he was kidding because he was carrying the key to the shackles holding him in place all along. It becomes an
* Ark Angel, Alex finds himself unable to reach anything while floating around on a space station, and resorts to taking his shoes off and throwing them.
* Ark Angel. Alex uses a defibrillator to stun a character, the whole thing being preceded with something along the lines of "he knew what they did, he'd seen a lot

of television". Those must have been some pretty accurate television shows.
* Ark Angels, Nick jumps in front of a bullet that The Masked Man throws at the viewer, leaving the bullet to impale his clockwork heart and all the cogs and springs fall out causing him to rust up. However, Bang brings him back to the office and fixes him. If you click him, while he's leaping, he falls to the ground and the bullet hits you instead. When the screen goes back to normal, your surrounded by Nick, Qem, Bang, Malcolm and The Masked Man, who turns out to be Soldier.
* Arkanoid (except the edges of the screen) without deflecting or even slowing down. Often a level-ender.
* Arkanoid is an escape craft, though it has more mobility than your standard escape pod.
* Arkanoid of the things caging in all of the breakable bricks, making it so that you have to get the ball into a tiny little opening and hope it doesn't just bounce back out. Sure is fun bouncing the ball around for five whole minutes accomplishing nothing. Playing 2-player? Watch your friend fall asleep from boredom.
* Ark: a starship Ark One is built to save a small group of people as Earth drowns under a global flood. It launches and performs the first phase of its mission using a version of Orion. This version is ground launched though owing to the situation (the entire planet is about to drown anyway) environmental concerns are set aside.
* Ark gets a special mention. In order to get the strongest eidolon in the game, you have to get the Pumice. To get the Pumice, you need both Pumice Pieces. One you get from Ark the boss - which is easy enough. You can get the other through two ways: completing the
* Arkham Asylum: A Serious House on Serious Earth, a flashback to when the Arkham mansion was being renovated into an asylum shows Amadeus Arkham finding a Joker playing card outside of his daughter's room. He says that a worker must've dropped, but the script notes that he's not entirely convinced by his own explanation.
* Arkham Asylum: A Serious House on Serious Earth — which features (admittedly offstage) rape, dismemberment, and cannibalism — in the YA comics section.
* Arkham Asylum: A Serious House on Serious Earth Professor Milo appears in the background, calmly and rationally explaining how he is not insane and does not deserve to be in the asylum.
* Arkham Asylum: A Serious House on Serious Earth set in the titular asylum. Batman arrives during a takeover of the asylum by its inmates and explores a layered, disturbing tal supernatural/psychological horror tale involving the dark history of the asylum.
* Arkham Asylum: A Serious House on Serious Earth's idea of a very sexually fucked up Batman. In the end they scrapped the idea... not that it made the Joker any less terrifying.
* Arkham Asylum: A Serious House on Serious Earth, so Batman was defending himself from a villain trying to melt him.
* Arkham Asylum: A Serious House on Serious Earth, the Mad Hatter is hinted at being a pedophile, etc.
* Arkham Asylum: A Serious House on Serious Earth, the parts that focus on the backstory of the founder, Dr. Arkham, has a scene where he walks into his house after finding the door wide open, calling for his wife and daughter. Guess what he finds.
* Arkham Asylum evidence collected by a private citizen is always admissible, without exception; the exclusionary rule only covers evidence collected by government action. However, Batman might qualify as an agent of the police, since he works so closely with them (and has even been deputized), in which case the rule would apply. In any case, you can't just commit anyone to an institution anymore without grounds to believe they're a danger to themselves or others (committals are also subject to regular reviews by a judge).
* Arkham Asylum: Living Hell) and Harvey Bullock as a police detective.
* Arkham Asylum: Living Hell, Batman suggests the entire experience was another incident with the Scarecrow's fear gas. Finding this entirely logical rather than

the possibility that demons from Hell literally took over the Asylum, Dr. Arkham has Scarecrow tossed into solitary.
* Arkham Asylum: Living Hell., being unfamiliar with Arkham. It didn't take long for him to get horribly disfigured, driven half-mad, and turned into the supercriminal Great White Shark.
* Arkham Asylum: Living Hell for an easier insanity defense, which was probably the biggest mistake of his life.
* Arkham Asylum: Living Hell: obsessed with fixing objects he perceived as broken, he "took apart" his abusive grandmother to see what made her so mean, not realizing that she couldn't be put back together again. Not for lack of trying, of course — he stitched her back together with bootlaces.
* Arkham Asylum. The place gets destroyed regularly, yet somehow always magically comes back and it has a tendency to drive people completely batshit insane just by being there. When you remember these facts one kind of has to wonder why the city of Gotham thinks sending already insane supervillains there will make them better.
* Arkham City and Arkham Knight also give rather good moments of cathartic glory. After most boss battles you get your gloved hands of the night on most villains and are then entitled to deliver a satisfying beatdown on them, before delivering the knockout-blow.
* Arkham City Stories, Falcone in the Arkhamverse is doing quite well by comparison.
* Arkham Horror allows the players to visit the locations from H.P. Lovecraft's mythos, like the Plateau Of Leng, Yuggoth, and R'lyeh.
* Arkham Horror and you're using the Epic Battle variant introduced in Kingsport, it's possible to, on the first turn, draw an Epic Battle card that has you draw one of Bokrug's Ancient One Plot cards, and one of his cards has him... walk away. The players don't have to roll anything, don't have to sacrifice anything, they don't even have to have done damage. It's possible, at any time, to draw Bokrug's plot card where he apparently looks at the Investigators, then just waltzes off for whatever reason. Considering how massive of a nightmare Bokrug and the other Ancient Ones can be during the final battle, it can be bewildering to start the fight and have it end so randomly in victory (the only downside is losing 4 points to scoring).
* Arkham Horror as the rules state. Defeating it means it still had time to bulldoze the city and destroy a lot of the world. Should you fail, which is a definite option in this game, this trope is essentially played straight.
* Arkham Horror, differ mostly in gameplay mechanics but share the same bleak tone.
* Arkham Horror edition, it's automatic for every turn the character is engaged with the entity.
* Arkham Horror expansion has you sneaking into a finger-painting session. Finger-painting is indeed used as a component of mental therapy at times, so that's done right. The problem? Art therapy in general dates only to the late 1940s, with finger painting as a later addition to the milieu. Finger painting itself dates to prehistoric times, but it wasn't part of art education until the 1930s.
* Arkham Horror, features the Dreamlands mentioned above as an Other World location to be explored. Like its source material it's a surprisingly "gentle" location compared to, say the Plateau of Leng.
* Arkham Horror." Furthermore, on the off chance that players could overcome the -∞ penalty to attacks against him and defeat him before he destroys the world, he has the additional special ability that the players lose the game when he awakens.
* Arkham Horror has an item called a time bomb. You place up to 3 clue tokens on it, and when it detonates, everything in that neighborhood dies, including players. This is why you can put no clue tokens on it and just have it detonate immediately in your hands, killing your character but taking everything nearby out. This can be incredibly taxing on your efforts and a worse idea the further into the game you get, but early-on if you're facing a situation where the Terror Track will rise or some other awful thing will happen, just blow the monsters up.
* Arkham Horror, has dholes and cthonians as per the literature and RPG examples

above. In game terms, dholes are massive and incredibly powerful while cthonians can damage all the investigators by causing earthquakes.
* Arkham Horror obviously falls into this (if the name wasn't a dead giveaway). Take almost any encounter in the game regarding your character hearing a strange noise or seeing a weird light, and there's a chance it leads to a mystical artifact, a coverup, or a monster of indescribable horror.
* Arkham Horror starts this way. They all have detailed backgrounds with them ranging from escaping cultists, hunting monsters, looking for lost loved ones, etc. The only thing they have in common once the game starts is that they ultimately have the same endgame.
* Arkham Horror, used as a powerful one-shot magic weapon, one that also negates the endless ability and removes the victim from play. Amusing given the source material.
* Arkham Horror will swoop down on unsuspecting investigators, tickle them into submission, then deposit them into the nearest portal. This can occasionally be beneficial if they let you cross the board or kick you out of the Other World you're exploring.
* Arkham Horror, with areas such as churches, university buildings, estate grounds, and the eponymous mansions serving as the dungeon.
* Arkham Horror, you can be appointed an Arkham deputy if you murder enough monsters and seal enough gates.
* Arkham Horror, you can set a time bomb in any location if you have one. Once done, you have up to 3 turns (depending on how many Clue Tokens you put on it) before it explodes, and anyone in its way immediately loses all their stamina, and any monsters are immediately removed from the board.
* Arkham Horror. You generally burn movement points to read the tome, make a Lore check, and gain spells, skills, or some other benefit at the cost of sanity.
* Arkham House Publishers claims to own the rights to H.P. Lovecraft's Cthulhu Mythos. Whether they actually do or not is a controversy in and of itself.
* Arkham Knight the player can combine this with Fear Takedowns to take out 2-5 enemies in a row
* Arkham Knight, while he has his cult, he seems to be a rambling old man with no real plan besides causing chaos and ritual sacrifices, and Batman pummels him with relative ease.
* Arkham Series he'll tell you about his previous murders if you visit him with your system clock set to certain holidays.
* Arkham series them at the shelters, and goes on to say that the teenage villain Anarky, who has a very simplistic worldview, still is able to understand some things about the poor's situation that Batman doesn't.
* Arkham's Razor (In fiction, the oddest solution is probably correct)
* Arkham's Razor is that they have some kind of insight in a crime that a regular police detective doesn't, and this insight is instantly disbelieved (or worse yet, is wrong) then why write about someone using an "exotic" method to solve a crime?
* Arkham, where Riddler employs cybercrime, Anarky resembles modern street protestors, and on and on.
* Arkhan Land, a cheap utility vehicle used as a transport, a tractor, a vehicle to clear the field... and, if needed, you can use it tow artillery, or replace the engine and slap on a few stubbers to make an excellent recon vehicle.
* Arkhan the Black killing several major characters in the End Times books along with several named playable characters including Eltharion, Kurt Helborg and Orion.
* Ark is co-produced between US and South Korea, the latter contributing much of it's animation.
* Ark is set in the distant planet of Alcyeon, populated by two different alien races at war, the Ceveans and Storrians, but both races resembles humans, right down to having skin tones resembling earthlings.
* Ark Maxim, but still seashells. It's designed to take Eneru and four people of his choice to the moon. Which it does, minus the extra passengers. Oh, and it's made of gold. Like, solid gold.
* Arknights are child-sized, and their race is named after a dwarf from Norse

mythology. However, they don't have any particular association with mining or the earth, and the male Durin seen in an Event cutscene are clean-shaven.
* Arknights: Chapter 6 introduces enemies and stage hazards that can freeze your operators, leaving them unable to attack until they thaw out. The same stages also feature enemies that inflict hefty amounts of extra damage against frozen operators.
* Arknights isn't the first tower defense game, but it popularized the tower defense genre with more complex gameplay mechanics and more focus on the storyline than other tower defense games.
* Arknights. It's also not made extremely obvious at first, but the Rhodes Island company's base is a (somewhat smaller) instance of these and is the very Rhodes Island from which the company takes its name. You get a brief look at it at the start of chapter two, and it features in update trailers occasionally.
* Arknights. The amount of their fanworks together is just outright absurd, especially after the game launched internationally.
* Arknights. Upon reading this Lava demands she change the ending, partly because filming it as-is would put them severely over budget, but also because she can't think of a satisfying way to wrap up the story after what just happened.
* Arkn: Legacy: Ryael counts, being a character that presents as both male and female. They also identify as non-binary.
* Arkn: Legacy style, and "miraculously" saved when they've lost all resistance. The one that is used for a particular initiate is based entirely on how willing, or unwilling, they are to submit.
* Arknthology Stories are non-canon due to being tie-ins to material that was never produced. These include Chapter 4 (which was intended to help set up the "Evil Ellpagg" character arc that would have been explored in The Knight Shift: End Times and The Guarded Ones), Chapter 8 (which includes Redgrave's son Virgil, whose story arc was cancelled), and Chapter 11 (which was supposed to take place during the Arkn Civil War arc).
* Ark Royal first mission is to escort a small fleet of freighters to a strategically important system and set up a colony there.
* Ark Royal guns have a good chance of mistaking one of the carrier's own fighters for an enemy and shooting it down. Unfortunately, since the aliens' stealth systems are so good they can easily bypass a fighter screen to strike at the ship herself, the ship's CAG orders that at least one wing must always remain close to the carrier to protect it, despite the risk from the point-defense guns.
* Ark Royal has been the name of five British naval vessels, four aircraft carriers.
* Ark Royal is good enough to intercept most human missiles and even mass driver shots, not to mention fighters. Later, bigger alien capital ships start showing up.
* Ark Royal is noted repeatedly for its blocky, ugly appearance, presumably modern military starships are more streamlined or something. And there's a group dedicated to designing ships based on various sci-fi, most of which are just plain impractical.
* Ark Royal is primarily armed with powerful mass drivers that while considered decades obsolete, still pack a major punch. Capable of destroying most alien carriers with a single hit.
* Ark Royal. It's specifically stated that no one has been able to successfully design an aerospace fighter, since the requirements for air and space combat are radically different. One pilot does suspect that the more streamlined alien fighters may be able to land on planets.
* Ark Royal more effective, although humans quickly figure out how to, at least, approximate their location by certain weak emissions.
* Ark Royal the aliens have advanced stealth systems that allow their fighters to slip right past the human fleet's fighters in their first battle and dice the carriers to pieces. Fortunately it's not complete stealth and a hard enough scan can detect them, and it seems to interfere with their targeting so they have to drop it before attacking.
* Ark Royal The chief engineer has a still, which provided most of the booze Cpt.

Smith drank while the ship was stuck in orbit. Newcomer Commander Fitzwilliam is momentarily surprised to see unlabeled rotgut served openly at his first briefing with the senior crew, then remembers that he hadn't seen a ship yet where the crew wasn't fermenting something.
* Ark Royal the electrical generators, the ship having been built without dedicated emergency generators separate from the main system. Oops. (Poorly engineered and inadequate electrical systems were a "feature" of all Royal Navy ships of the period because their urgent need to rearm arose right when the Great Depression was making R&D funds hard to come by.)
* Ark Royal trilogy FTL travel is dependent on gravimetric "tramlines". Most routes that human ships can handle are five lightyears or shorter, but the enemy can go much, much, further.
* Ark Royal; while his partner had been blackmailed by him so she was given a choice between ten years in the second hardest prison in the solar system, or indenture on the colony they'd been deployed to establish on a Titan-like world. She chose the colony.
* ARK: Survival Evolved and from there developed the namesake ARKs, space stations populated with cloned life forms and humans, to breed an army strong enough to break the Element-corrupted creatures' hold on Earth and from there, repopulate.
* ARK: Survival Evolved are "savoroot" (potato), "rockarrot" (carrot), "longrass" (sweetcorn), and "citronal" (lemon).
* ARK: Survival Evolved can be equipped with saddles and ridden, from the relatively small sheep and moschops all the way up to the kaiju-sized giganotosaurs and titanosaurs.
* ARK: Survival Evolved can even have siege weapons and towers built onto their platform saddles like old illustrations of war elephants.
* ARK: Survival Evolved DLC adds a resource which is gathered from places that will occasionally emit toxic gases. The player can craft gas masks to counter these.
* ARK: Survival Evolved expansion some mushroom spores will give you explosive diarrhea and empty your entire food meter, leaving you weak and starved. In addition, if you feel like grabbing your own poop is too gross, you can build a toilet in your house and flush it away safely and cleanly.
* ARK: Survival Evolved: Giant bats are a common nuisance in the caverns. They can also be tamed, like most of the other creatures in the game.
* ARK: Survival Evolved is almost purposely-built to be a boss-killer due to its attributes for attacking large prey.
* ARK: Survival Evolved is a scorpion the size of a pony. It is a highly aggressive predator with a paralyzing venom, which makes it the bane of every starting player. Fortunately, you are also able to tame this creature and, with the right saddle, even ride it, making it a valuable ally.
* ARK: Survival Evolved it to hunt your tame creatures this way. The in-game Dino Dossier even speculates that it's purely for the thrill of it.
* ARK: Survival Evolved: megalodon are common in the seas surrounding the Island and other maps, and of course will attack other creatures and the player that come anywhere near them.
* ARK: Survival Evolved once you hit level 28 and have created a Smithy, with large versions following shortly at level 31.
* ARK: Survival Evolved reference the bald coyote type and are big, mostly hairless canines with massive fangs that cause bleeding damage.
* ARK: Survival Evolved uses hexagons on all the futuristic technology.
* ARK: Survival Evolved with the shock dart, which delivers a paralyzing shock against players before sending them into a deep sleep, and can potentially cause even larger dinos to fall asleep with a single dart.
* Ark The Improbable working it's disgusting magic on mundane animals, plants, humans, and fantastic creatures, including Werewolves and Zombies.
* Arktika there's a lot of space for comfort, guests, scientific equipment and really anything else.
* Arlecchino. Known for acrobatic movements on stage. Varients include: Trivelino/Trivelin, Truffa/Truffaldin/Truffaldino, Guazetto, Zaccagnino, and

Bagatino.
* Arle Heinessen, founder of the Free Planets Alliance has a huge statue of himself in the
* Arle x Schezo and Arle x Dark Prince are big ones, especially in Japan, since Schezo and the Dark Prince are known to start
* Arl Howe's rant towards a human noble Grey Warden late in the game is extra-dismissive if said heavily armed warrior or rogue who slaughtered her way through his guards is a woman, laughing at her acting like a man. Outside of the Qunari, female soldiers are
* Arl Howe, you actually meet Delilah, who wasn't at all pleased about being set up with the Male Warden and has since married a commoner in Amaranthine, with a child on the way.
* Arlington Road are implied to be this, since it invokes the Oklahoma City bombing and Ruby Ridge in the past incidents that are mentioned during the film.
* Arlington Road — Most of the movie is filled with lots of daylight paranoia and moments of bloated anticipation and creepiness as terrorists operate in broad daylight, undercover as you and me, but especially the tense interaction between Cheryl and Brooke at the payphone.
* Arlington Road Michael turns on the TV and comes in at the end of a news story about an auto accident, he goes through another channel before getting the full story.
* Arliss started out with the Four Tops' "I Can't Help Myself (Sugar Pie Honey Bunch)" in Season 1. Later seasons used Dusty Springfield's "I Only Want to Be With You".
* Arlo and Janis from the fourth wall. Characters sitting on the couch have their heads visible (and are usually shown in profile, as is common for these characters anyway).
* Arlo becomes this in the final third of the movie when Ruff and Stucky hold him hostage at the Met Gala and come within two seconds of hustling him out the door and using him as their newest attraction for their swamp shack. He is saved just in time by his father Ansel, who simultaneously reveals his true identity as a bird-man.
* Arlo Guthrie, but was completely unsuitable for single release because it was an 18 minute-long story song. Guthrie did try though, releasing the "Alice's Rock & Roll Restaurant" single which kept the song's chorus, removed the whole story and added three new verses that were about the actual restaurant, but it only made it to #97 on the Hot 100, and was his only other chart entry aside from "New Orleans".
* Arlo Guthrie" has a Type 3 example, where the singer and a friend of his get put in jail for littering. This actually works out to his benefit later.
* Arlo Guthrie, though this is somewhat debateable due to the "you've got to sing [The Motorcycle Song] with that kind of enthusiasm, like you just squished a cop!" line, which can be taken as either nervousness or... well... actual enthusiasm.
* Arlong and his younger sister Madame Shyarley. He's a Large and in Charge
* Arlong likewise shares this mentality largely due to the fact his mentor, Fisher Tiger, was killed by humans. Thing is though it was by Marines, Fisher
* Arlong Park, who themselves pooled together and voted on ideas to send to him for it.
* Arlong the fishman, who thinks the physically superior fishmen should rule over the weak and puny humans. He was also subject to this trope from the other side, having been a victim of racism since he was a child.
* Arlong, while initially not as willing to kill and subjugate humans as seen in his flashbacks, let his continued hatred and prejudice (as well as
* Arlong who laughs at Nami's misery after he breaks his promise to her. He then brags to his crew about he would keep Nami under his control for the rest of his life.
* Arlon tells Pit and Palutena that he will gird his loins for their arrival. Pit is noticeably disturbed.
* Arlo, of Youtube fame, uses a blue furry Muppet-esque puppet as his online

persona. Many, many,
* Arlo's commenters generally treat him like an actual person, and not a Henson-style puppet who looks like Cookie Monster's younger cousin. Even this wiki's page on him downplays the 'puppet' thing.
* Arlo the Alligator Boy: Arlo manages to reach the Met Gala and get Ansel's attention, ready to demand the truth if he's his father, but because of his worries that he may get rejected again, he gets nervous and cannot get one word out. Fortunately, advice from Bertie allows him to break into song about it and get over his nerves.
* Arlo the Alligator Boy: As Ansel Beauregard is preparing to present his presentation at the Met Gala, the instant he walks out to the stage, Ruff, Stucky and the Beast are shown spying on him from the shadows behind him.
* Arlo the Alligator Boy as well, and he shows his skills during the "Better Life" number.
* Arlo the Alligator Boy begins on Arlo's fifteenth birthday, when he discovers he's not from the swamp, but from New York City, and his biological dad is still out there.
* Arlo the Alligator Boy begins with the newborn Arlo Beauregard abandoned in the New York City sewers on the night of his birth, and shows how he floated all the way to the Louisiana swamp where he was adopted and reared by Edmée for fifteen long years until he learned the truth of his life.
* Arlo the Alligator Boy, Bertie rips off the back door at the Metropolitan Museum of Art so Arlo and his crew can sneak into the Met Gala.
* Arlo the Alligator Boy dubs — in French, German, Korean, Latin American Spanish, and Mandarin Chinese. Bertie, Ansel and Alia have singing doubles in the latter two, Marcellus has one in the fourth, and Edmée has one in the fifth.
* Arlo the Alligator Boy gives us Ruff and Stucky, an evil poacher couple who own a failing alligator museum in the swamp and opt to capture Arlo and use him as their newest attraction to make them rich.
* Arlo the Alligator Boy has one on her right cheek, just near her eye. Ansel is a male example, having one on his lower left lip.
* Arlo the Alligator Boy: Having been raised in a swamp until he was 15 years old, Arlo spends a good majority of the film returning to his birth home, New York City, so he can reunite with his biological father Ansel. Once he meets him however, he is devastated when Ansel claims his "son" is gone and rudely disowns him, and even tried to literally change his personality while having nothing to do with him.
* Arlo the Alligator Boy is half human, half alligator. His birth father Ansel is half bird. There's also the reverse merman Marcellus, and the Beast, who's more like a dog-cat-tiger hybrid.
* Arlo the Alligator Boy: It's hard not to discuss the film in future franchise installments after the reveal that Arlo's birth father Ansel is a birdman.
* Arlo the Alligator Boy of Arlo and his new gang of friends exploring New York City, Bertie utters the New Yorkers' "I'm walkin' here!" when crossing the street. Teeny Tiny Tony also shouts the same thing at a passing businessman when entering the phonebooth.
* Arlo the Alligator Boy. Secondly, Ansel changes his mind about destroying the Brooklyn boardwalk Seaside by the Seashore and instead lets the gang restore it and live there, so Arlo can remain in his birth place for good.
* Arlo the Alligator Boy tends to lapse into song during a sentence, to show how he feels of something.
* Arlo the Alligator Boy, the female Furlecia is voiced by a male, Jonathan Van Ness.
* Arlo the Alligator Boy: The first part of the end finale song "Beautiful Together" has Arlo singing and celebrating with his friends and father with a dance party at the Met Gala.
* Arlo the Alligator Boy: The New Yorkers have a habit of repeating "I'm walkin' here! I'm walkin' here! I'm walkin' here! I'm walkin' here! I'm walkin' here!"
* Arlo the Alligator Boy, the other Nickelodeon movie that came out the same day, did get screened for critics!

* Arlo the Alligator Boy, the whole movie takes place over a period of five whole days.
* Arlo the Alligator Boy was adopted by swamp hermit Edmée of a Louisiana swamp bog for fifteen whole years since being abandoned in the sewers of New York City as a newborn. She cared for him and kept him safe until his fifteenth birthday when she finally told him the truth.
* Arlo while also having its own unique merits, the low-budget crowdfunded game got a large boost in sales.
* Armağan and Ipek Yavuz, founders of TaleWorlds Entertainment and co-creators of
* ARMA 2 - there are two black men, two white men and a latino in the five-man squad. Even more, the main player character is one of the black men.
* ARMA and the Turkish Occupation of Cyprus. With the former, a nation is split in half, with the more militarized, communist North eyeing up the wealthier South. For the latter, it is the Mediterranean setting and the vague Middle Eastern and Greek influences that the island of Sahrani exhibits.
* arma". ("Arma" could be either the Brazilian word for "weapon" or the way Brazilian unsophisticated country people say "alma", the Brazilian word for "soul".) The spirit, who served as witness for the deal, said that either Tonin and the Devil reached for an agreement on which meaning the word "arma" would be employed for the deal, or the deal would be null and void. Unable to convince the Devil to taking anything from him as a "weapon", Tonin agreed to offer his soul.
* ARMA: Armed Assault added the "Rahmadi Conflict" campaign, where the Marines are the main playable forces.
* Arma: Armed Assault (a.k.a Arma 1) has a desert in a section of the southern part of the map (as well South Sahrani troops use desert-based camouflage) but it also has parts with Mediterranean climate and coniferous forests.
* Arma both featured popular zombie mods that turned an ultra-realistic tactical FPS into a zombie survival game. The use of massive maps and realistic effects and equipment makes them extremely immersive.
* Armacham's security/mercenary troops play around with this. In the first game, the security guards wear caps and
* Armacham Technology Corporation established the main facility for the Origin Project in an old military-industrial complex, and built the entire facility deep underground. Emphasis placed on the past tense, what with the explosive ending of the first game.
* Armada: 10,000 years of space travel divided mankind into six sub-species.
* Armada 2526 allows players to research increasingly virulent artificial plagues (both biological and nanotechnology varieties) which can then be unleashed as part of a planetary invasion, with predictable damage to the ecosystem, or as part of a deliberate planet-wide eradication of populace.
* Armada, and Megatron several times over the course of the Unicron trilogy.
* Armada: Debbie aka AtomicMom is a good example. She has three sons and is the eighth best pilot in the world in Armada.
* Armada. Most of the protagonists including Zack, RedJive, etc are Ace Pilots (technically, they are drone pilots). RedJive actually goes by the name of The Red Baron.
* Armada Sideways. Either of his small "mini-con" partners turn into his head, one for his Autobot form and one for his Decepticon form. However, he has a pop-up head just in case you lose both the mini-cons.
* Armada sticking out of his shoulders, and Megatron's extend into tank treads. Combined with his giant horns he looks ridiculous. And Optimus Prime has really chunky shoulders, as similar to the Laser Optimus Prime example, they form the front of his truck mode, and he has really fat tires.
* Armada. The wrist-mounted devices detect (human) spoken languages and provide a slightly-delayed text translation. Translations appear to be pretty close to what's intended, implying better computing technology and linguistic algorithms. In fact, only one important character speaks almost no English, being from China, but the devices allow everyone else to understand him.

* Armada, which changes hands a couple of times over the course of the series. Three Mini-cons transform into a rifle capable of blasting a hole through the guts of any 'bot with zero resistance.
* ARMA features a map that will contain dense urban towns or cities. Everytime you fight on them the game will turn into this trope.
* Armageddon 2001 alternate timeline, Metropolis is destroyed by a nuclear bomb.
* Armageddon 2001 Annual #3, Superman destroys the nuclear arsenal of several nations in 2001, including the Soviet Union. The USSR was dissolved only months after this crossover event was published in 1991.
* Armageddon 2001 annual for that year ended up foreshadowing key events in the Super-books, such as Superman deciding to finally take down Intergang once and for all which happened later that year, and Superman leading the rest of the DC heroes against against Brainiac's invasion of Earth in the "Panic in the Sky" storyarc which happened a year later.
* Armageddon 2001 are seen as having ended with the signing of the Good Friday Agreement in 1998, something which was unforeseeable in 1991.
* Armageddon 2001, becomes Monarch after killing the original when he kills Dove.
* Armageddon 2001 finale of Superman dueling with an armored Batman as part of its ending.
* Armageddon 2001 issue still contains a sequence where Catherine Cobert has a nightmare about being attacked by an evil Captain Atom, something that doesn't really fit the rest of the story (which instead sees the League mourning Captain Atom after thinking he died).
* Armageddon 2001 story, Superman takes advantage of Waverider's ability to freeze time so that he could position himself to rescue two falling construction workers before time resumed.
* Armageddon 2001 story "Time And Time Again Again", but he didn't because he realized that would disrupt events in the space-time continuum. He did, however, meet with his alternate timeline self as the leader of the Linear Men, which at first turned out to be disastrous since when Waverider killed the other Matthew Ryder, he trapped himself, Superman, and the Linear Men in a Nullsphere, unable to leave until Waverider used Hunter's energy beam to alter time so that the other Matthew Ryder was never killed in the first place.
* Armageddon 2001: Waverider experiences numerous different versions of 2001 in his attempts to determine Monarch's true identity. For Superman and Batman, who have multiple books covering their stories, they seem to have two or three multiple choice futures apiece.
* Armageddon 2419 A.D." into outer space, presumably forever. Ultron would not only allow one to build the functional equivalent of Wonder Woman's invisible plane but, being superconductive, one should beware lightning and heat rays as well as disintegrators.
* Armageddon 2419 A.D. in which all of Europe formed an alliance against them, and is subsequently conquered by Mongolian invaders who sacked the entire country but don't bother subjugating the populace because there own technologically advanced society is too self-sustaining to have any use for America's resources or manual labor. As a result, America is left as an anarchistic wasteland where the ruins have been almost completely reclaimed by nature, and the closest thing to a government is a handful of loosely affiliated "gangs" (basically fiefdoms).
* Armageddon 2419 A.D. Rogers, in the various versions of his tale, brings lost knowledge and a certain 20th-century vitality to future America and/or Earth as a whole.
* Armageddon 2419 A.D. Those without such cover have to get inventive.
* Armageddon 2419 A.D. uses what is essentially a cellular flip-phone. The story also features flying robotic drones.
* Armageddon 2, a map-pack for Skulltag, has a pair of these as bosses in the "Sand Worm Trench" level. They don't swallow people, just breathe fire at them (and are lanky, looking somewhat like snakes).
* Armageddon 3: The Remake in the decent roles, and if you complain, you get the correction fluid.

* Armageddon after Harry Stamper's team defeats the asteroid — with one notable exception.
* Armageddon AJ does a Wildlife Commentary to animal crackers on his girlfriend's stomach in a faux British (maybe) accent.
* Armageddon and company flying into space to save the world by nuking a giant asteroid was a clear draw for a male demographic, they decided to play up the romance between Ben Affleck and Liv Tyler's characters to draw in the female audience too.
* Armageddon. And, of course, he's not exactly pleased to discover that Ben Affleck, his #1 employee, is dating her.
* Armageddon. And said meteor shower damages/destroys several NYC landmarks, including Grand Central Station, the Chrysler Building — and the Twin Towers. (The third shower hits Shanghai, but fails to find a globally-recognisable monument.)
* Armageddon). As one of the few space faring nations, only America has the necessary technology and infrastructure to build the equipment necessary to destroy the asteroid. The Russians do provide support in the form of a refueling station. The team NASA sends is purely American, except for the Russian cosmonaut from the station.
* Armageddon, a stripper that Rockhound mentioned dropping a hundred grand on (which he is afraid he will be unable to pay back) by the name of Molly Mounds greets Rockhound on the tarmac after the survivors get home and hugs him so enthusiastically that they are both knocked to the ground.
* Armageddon before it's too late, so the two halves fly over and under the earth.
* Armageddon blows up. The spacecraft visits MIR for refueling? It blows up right after they're done. There are 2 spacecrafts? One crashes. The drill of the crashed spacecraft survives? The one from the other spacecraft blows up.
* Armageddon, Bruce Willis's character says that NASA undoubtedly has a crew of guys "just sitting around thinking shit up". These guys... the crew that sits around thinking shit up, are known as the "Steely Eyed Missile Men" for their ability to coolly and calmly think up technological solutions to the hardest problems on Earth or in Space.
* Armageddon) disconnects an oxygen tube from his space suit, forcing him to go back to the shuttle and let Harry do the job.
* Armageddon dropping her top after winning the Women's Championship - the first time there had ever been full intentional nudity on the company's national TV.
* Armageddon, each of Harry's men fails their NASA evaluations. Finally, Truman asks if they can merely survive the trip to the asteroid, and a doctor replies that he's surprised they even survived the tests.
* Armageddon Empires, the post-apocalyptic strategy/card game. While all the factions are capable of researching new technology, most games also feature at least a few special tiles where you can dig up unique (and powerful) units, weapon systems, enhancements, and other goodies to unleash against your enemies.
* Armageddon examples of this. One is at the beginning of the film, as Charlton Heston's voiceover about what happened to the dinosaurs threatens the same consequence for Earth later on. Truman later makes it explicit:
* Armageddon explains the cloudburst of meteorites as the result of a comet passing through the asteroid belt and bouncing shrapnel into Earth's vicinity and knocking one "the size of Texas" towards Earth. This is wrong because a single comet could not collide with so many asteroids and conveniently shove them in the same general direction. Enough shrapnel was knocked out of the asteroid belt to keep Earth in a 'shooting gallery' for 18 days.
* Armageddon. Explosions, the shuttle flights, drilling on an airless asteroid and so on. Given that the film is stuffed with enough errors to give anyone with even a trace of scientific knowledge an aneurysm though this shouldn't really come as a surprise.
* Armageddon Force, this is how the main villain is dispatched; he gets punched so hard (the arm is cybernetic) that his head flies off.
* Armageddon. Guess who gets chucked off the cell into a flatbed truck?

* Armageddon: Harry Stamper sacrifices himself to remote-trigger the explosive that will destroy the asteroid.
* Armageddon has a large number of gratuitous shots of helicopters. They were clearly getting the most out of those rentals.
* Armageddon has been fighting so many wars against the orks on this planet that Armageddon has come to mean "paradise" in Ork.
* Armageddon has lonely precursors creating humanity and every other race in the universe.
* Armageddon has one of these every five minutes, and then doubles up after they actually get into space.
* Armageddon has one when the nuclear ordnance exploded inside the asteroid.
* Armageddon have to go on a dangerous mission, and even if they survive, the Earth might still be destroyed. They spend their last day before training doing all the expected buffoonery.
* Armageddon involve this trope, with a meteor and a comet, respectively.
* Armageddon is not only airless, it's covered in big, jagged, evil-looking spikes and regularly spews forth masses of gas and rock designed specifically to kill intrepid astronauts.
* Armageddon: Many people die in the opening cataclysm. A small pug is spared.
* Armageddon MUD. They are no more fond of mountain homes, alcohol, forging and axes than people of any other race are.
* Armageddon: Once the asteroid appears, the Joint Chiefs of Staff want to toss the entire nuclear arsenal of the world at the thing. The scientists at NASA know that, unless the meteorite is drilled into at precisely 250 feet, any nuclear weapon launched at it or used on its surface will only cause some pretty fireworks. It takes some effort for them to make the Joint Chiefs of Staff understand, and when they decide that the plan to send astronauts to perform the drilling seems to have gone belly-up, they immediately take over the Space Center and try to remotely detonate the nukes, even after being reminded that a surface explosion is useless.
* Armageddon: One whacking great rock to destroy, but it's not malign in its effect. The moment when the military decide to detonate the bomb early is almost the only antagonism not related to the "destroy the asteroid before it destroys us".
* Armageddon Outta Here ... Which is rather uninteresting. The butler did it."
* Armageddon, Paris is destroyed by a chunk of asteroid, just to serve as a reminder that these things hurt. Shanghai suffers a similar fate later in the movie, so the heroes have further reason to angst about the danger.
* Armageddon, Rockhound puts the mack on a beautiful blonde by informing her the big diamond wedding ring she's wearing isn't the real thing.
* Armageddon, Rockhound uses an eye loupe to seduce a young wife by telling her the diamond her husband gave her is fake.
* Armageddon "Russian space station" attendant. He'd been alone up there for quite a while. Rock Hound, on the other hand, suddenly comes down with "Space Dementia" and starts shooting everything with the remote-controlled Gatling gun they brought along for some reason. Mind you, those guys weren't all that sane to start with.
* Armageddon's Blade, but a very negative reaction from part of the fanbase to some of things planned (a new cybernetic faction based on the technology gained by the evil side) led to that having to be scrapped in favour of a more standard fantasy story.
* Armageddon's Blade, which offers decent stat bonuses, adds Expert Armageddon to the wielder's Spell Book, and
* Armageddon: The Battle for Germany, 1944-1945 (non fiction) by Max Hastings. Hastings discusses how individual soldiers vary widely in competence, and quotes an American officer who said that he would rather fight with 40 men than 200, as long as he could pick the 40. Hastings goes on to say that the 40 wouldn't last very long without the "cannon fodder" to distract enemy attention and soak up the bullets.
* Armageddon, their vanity over the loss of their back legs was what caused them to accuse the Shokan of the deed, restarting their war.

* Armageddon, the Mir space station explodes shortly after Bruce Willis's team docks there, for apparently no reason other than to get one of the wise-cracking Russian astronauts to escape onto Willis' ship, in order to provide comic relief for the rest of the movie.
* Armageddon, the timer on a nuclear bomb is remotely canceled from Earth, only to be restarted after a direct order from the President. Back on board the asteroid, the bomb is stopped again manually, the timer freezing at 2.46 seconds.
* Armageddon, they walk around unsuited as though under normal Earth gravity.
* Armageddon Trilogy correctly identifies it as the M134 General Electric mini-gun.
* Armageddon Trilogy identities such as Mr. T. H. E. King and Noah Never.
* Armageddon was internationally the highest-grossing film of 1998 against a backdrop of mediocre-to-frosty reviews from critics, though it seems largely forgotten now.
* Armageddon was released in theaters in Taiwan, this line was in it. Subsequent satellite-TV showings cut this scene in order to not offend China, which uses the same satellite broadcast.
* Armageddon when he wrecks his own Mantis towards the end of the game.
* Armageddon, where the Pentagon activates the nuclear bomb on the shuttle because they believe the mission is doomed to failure, and the Air Force nuclear specialists on the mission have to disarm it. In this case, the airmen can't shut the bomb down directly because it has been remotely activated, and they have to cut the wiring. The usual dilemma is subverted; the airman disarming the wires briefly hesitates when determining which wire to cut, but he remembers exactly which one to cut after a second of thought. Justified in that they weren't trying to disable the bomb, as they still needed to use it. They just needed to disable the activated timer and stop the Pentagon-ordered detonation. It's also unclear if cutting the wrong wire would cause the bomb to detonate, stop the countdown but render the bomb useless, or just fail to stop the countdown.
* Armageddon, where the shuttles are rushed out in order to make the date of the mission — yet feature large decals with their names all over the interior. Apparently the NASA art department fears not the end of the world.
* Armageddon, with the twist being that all the guys being shown had already been hired on and the higher-ups were regretting this decision as they saw their psych evaluations.
* Armagooden, where they are "trapped in a Micky Bay film" and "anything we touch is likely to explode." This causes problems when Bob's helmet explodes and he can't get another one.
* ARMA has a notoriously excessive one. Enter CSAT, an Asian political coalition. They use a flag with a hexagon made out of hexagons. Their military facilities are encapsulated in domes made out of hexagons. Their security forces' uniforms are high-tech equipment which use a hexagon camouflage pattern on nearly every piece of the kit. Vehicles? Highly upscaled hexagons. Hexagons on guns? You bet.
* ARMA II campaign stars a Force Reconnaissance team, and therefore the USMC are the default "BLUFOR" for the game - hence Marine Corps weapons, Marine Corps vehicles.
* ARMA III and took place in Greece proper, specifically the island of Lemnos that the in-game map is based on. After two location scouts were arrested on counts of espionage by the Greek government, the developers reworked the plot to avoid any mention of Greece and to distance itself from real-world events.
* ARMA is an open-world military shooter that features a lot of enterable buildings. However, the player will find that nearly every building in the game lacks any form of furniture. The player can find newspaper with headings like "Mysterious Disappearance of all Furniture!" with a picture of a UFO.
* ARMA Kerry apologizes, but tries again only for Miller to cut him off with a "you're doing it again."
* Armand conjure a tree right into Sadlygrove's path during their duel in season 1 episode 19.
* Armand Goldman he's more convincing in drag as a housewife than he is when trying to fake straightness.

* Armando Galarraga catapulted into the headlines after umpire Jim Joyce's blown call cost him a perfect game (retire 27 batters in order without allowing any of them to reach base) in July 2010. Since then he's had nothing but hard luck - cut by 3 teams, kicked around the minors, and barely had the proverbial "cup of coffee" in the bigs since.
* Armando Iannucci. One episode has him tell a joke - "What's big and small at the same time? A really big egg." He then makes a Power Point presentation version of the joke about the dog having no nose.
* Armando Iannucci, the final series featured a number of guest directors including Chris Addison (who plays Ollie Reader). His episode was notable for the fact that his character spent most of the episode alone in a hospital bed.
* Armando is a well-known casanova, that flirted left and right with the models and other beautiful women he encountered, which he stopped after getting engaged to Marcela. However, the trope won't enter in full effect until he falls in love with Betty.
* ARMARC. Tucson Arizona was chosen as the massive storage area due to the dry climate and the hard soil. Many aircraft have returned to service or others scrapped. Even then, special procedures are taken to make sure the planes are preserved. Most involved removal of ordinance, batteries, fuel and oils.
* ARMA series. Various guns have different amounts of recoil modified by whether you are standing, crouching, lying prone or bracing the weapon and while rocket and missile launchers don't have recoil, they do sport an almost lethal backblast zone behind them and definitely should not be fired at too steep an angle or with your back to a wall.
* ARMA to avoid offending anyone or hitting too close to real-world politics. Never-the-less, the maps used are often based on real locations, and the conflicts are inspired by real counterparts.
* Arm-attached Blades types, who prefer to have a weapon that's always ready for use, instead of wasting time drawing a handgun, knife or whatever. Most of the time, those are retractable, usually through the power of thought. Robots are also popularly equipped with those, and can justify the retractability much better.
* Arm Cannon for Guts using parts that Godo had lying around the shop—which can fire a roughly billiard-sized cannonball for massive damage against monsters—and later produces goodies for Guts or himself such as mini bombs and a shoulder-fired rocket launcher. The giant Grunbeld also has a personal cannon built into his shield.
* Arm Cannon in a fight to the death with his evil "brother" Atlas. In this version, however, he doesn't have, ahem, rear-end gunning capability (and it's disturbing to contemplate what situation might have called for him to "evolve" it). He does have finger lasers to compensate.
* Arm Cannon: Ranged weapons mounted at the arm (whether on it or inside it)
* Arm Cannon shooting a beam of energy that suspends his target in mid-air.
* Armed & Dangerous has Dooley's former superior with the Police confront him after he and Kane successfully bring down the villains despite working as rent-a-cops, and says this:
* Armed & Delirious is spread over 5 CDs, each of which contains a different set of areas. The player has to switch disks when traveling to an area on a different CD.
* Armed & Delirious, the balloon maker spends a good portion of his musical number repeatedly singing the phrase "I love to make balloons" and nothing else.
* armed an aversion, because Honor has dual Manticoran and Grayson citizenship (and titles).
* Armed and Dangerous: features three versions of the 'Gold Guy' based on the game characters drinking tea.
* Armed And Dangerous. John Candy's character resorts to this when his motorcycle won't start. He tries several times, but no one will budge, partially because he's only a security guard and not a cop. Finally, a truck driver lets him in and is more than happy to help.
* Armed and Dangerous which seeks out enemies at will? Yeap, you're screwed.

* Armed And Famous and LaToya Jackson) went undercover during a prostitution sting. In contrast to typical portrayals, this wasn't played for Fanservice, and both were dressed very casually.
* , armed and in man's clothing, and when the two meet Robin is also disguised - so they fight, for "at least an hour or more", before recognizing each other.
* Armed Blag: A plot focusing on the theft of an armored car carrying someone's payroll.
* Armed Blag, the drive the hijacked armoured van into the back of a waiting truck and drive off.
* Armed Farces on the whole regiment thanks to his knowledge in military procedures and wilderness survival. And despite everything, he really seems to care for his men, he just doesn't want to show it.
* Armed Forces Network caters the US soldiers and families living overseas. Since they broadcast worldwide, separate channels with the same shows are created to accommodate viewers living in either the Pacific or the Atlantic regions during normal time slot hours. AFN Spectrum generally repeats the same show every eight hours three times a day. A soldier in Japan can watch a show in the morning, but too early for soldiers living in Germany or Honduras unless they wait eight or sixteen hours.
* Armed Girl's Machiavellism gets distracted and he is able to defeat her.
* Armed Girl's Machiavellism: Satori slips roofies in Nomura's food to knock him out, then strips them both naked and takes a picture with her on top of him to make it look like they are having sex and frame him as a two-timer. She edited the photo to make it look like he is awake and added a lens flare to disguise the fact he doesn't have an erection. While Rin and Mary are fooled, Warabi takes one look at the photo and is immediately able to tell it was doctored.
* Armed Girl's Machiavellism: Satori slips roofies in Nomura's food to knock him out, then strips them both naked and takes a picture with her on top of him to make it look like they are having sex, making Rin and Mary think he is a two-timer. She doctored the photo to make it look like he is awake and inserted a lens flare to disguise the fact he doesn't have an erection. Nomura tries to get the original negatives to clear his name, but Satori destroys them. Fortunately, he beats her in a fight and she confesses what she did.
* Armed Girl's Machiavellism to the limits means she grabs her scabbard to use as a second blade. While the scabbard doesn't cut, it helps her counter a much heavier sword, and being slammed in the face with a scabbard still hurts.
* Armed Legs in the previous episode was indeed deliberately set up to frame Yang).
* Armed merchant cruisers are quite literally merchant ships with guns and sometimes torpedo launchers bolted onto the decks. Though usually no match for a proper cruiser (emphasis on
* armed of dangerous wildlife outside of the fortified towns that are within it.
* Armed Police Batrider for Discharge and anything else that required too much power for anything else to work viably.
* Armed with a Bren gun, the British Infantry Section can "button" tanks and other vehicles - it will greatly slow the vehicle down and greatly reduce their ability to see, which is described as the infantry section firing at the vehicle's sight ports. The vehicle is a sitting duck to being outflanked with anti-tank weapons and can't defend itself while alone and buttoned down, but having other allies near them will allow them to fire back since they provide sight for the vehicle.
* Armed with Canon, explaining his attempts to deal with his health and mental problems.
* Armed with Canon: Various writers argue over what's canon from different incarnations of a franchise.
* Armed with nothing but his charm, Loki effortlessly assumes command of Korg's rebels, which makes him the Charismatic type. It's not shown onscreen, but he must have been extremely persuasive if the ex-gladiators agreed to
* Armello: Banes look like monstrous, semi-skeletal corvids wreathed in a sickly purple glow.
* Armello do battle, the one who is more corrupted gains additional dice equal to

the amount of Rot their opponent has. Doing this to the King nets the player a Rot Victory.
* Armello, Fang and Thane Greymane are both sons of the Wolf Clan Alpha. As the firstborn, Fang was supposed to be next in the line of succession but was exiled; thus leaving Thane the sole heir to their father. However, Fang eventually returns to join the fight for the throne, even if it means going up against his younger brother.
* Armello has fortified his palace with deadly Perils in order to keep would-be heroes out. However, if you complete enough quests, one of your contacts points you towards a way to sneak past one of the traps, enabling you to enter the Palace Grounds. Still have to deal with the King's Guard, though...
* Armello-inducing Plague Bearers and the Plague itself, are found here.
* Armello. In-game, he gets both a bonus against the Guard and a combat buff for how high the bounty is on his head. Unlike other characters, he's thus encouraged to go out of his way to hunt down and kill the King's Guard.
* Armello. One good clue about his size is the artwork of his personal sword, Pride's Edge: Just the sword itself is bigger than one of the King's Guards who serve him.
* Armello referenced through various cards and occasional random events. The King being a lion is the most obvious example, but there are also snakes, bats, boars, pigs, various species of cat and dog, frogs, lizards, hedgehogs, field mice, yaks, multiple kinds of stoats, some lemurs, druids that are heavily implied to be deer, and a random in-game event where the player encounters goblins.
* Armello restore one health when a character enters, save for Corrupted characters and Banes who are instantly killed.
* Armello: This appears in the "Sinking Caravan" quest. A merchant is late and he was last seen entering a swamp. When you get there, his wagon is stuck in a quicksand and you have the choice to either try to get it unstuck (body test) or to tell him to leave it.
* Armenian, a king offers a golden apple to anyone who can tell him a lie he won't believe. Many try and fail until a peasant enters his throne room and tells the king that he owes him money. Thus, the king is forced to either give the peasant the golden apple if he disbelieves the lie, or the money the peasant claims the king owes him.
* Armenian mythology had Vahagn, a dragon-slaying god, and Aray, or "
* Armenians. Same as Georgians. Minus the Hotblooded part, enforce the homosexual tendencies, or at least fondness for anal sex. A meta joke has people telling Georgians jokes about Armenians and vice versa.
* Armenia was chiefly ruled by wealthy families between 300 BC and 1045 AD in a similar way to Scotland, the heads of which were called nakharars. The families developed fierce rivalries with one another, but were mostly kept in check by a king or a conquering empire. The Mamikonians and Bagratunis particularly disliked one another, due to the Mamikonians liking to fight first and ask questions later, while the Bagratunis solved their problems diplomatically. Things got much worse though between the 800's and 1000's when the Bagratuni family was given its own kingdom by the Arabs. Rival nakharars decided to break away and form their own small kingdoms, and there was much in-fighting, making the whole area easy pickings for the Byzantine Empire and then the Seljuk Turks.
* Armero, Colombia, killing more than 20,000 of its almost 29,000 inhabitants.
* armies about the Ultramarines, because GW doesn't want to mix up the box art and confuse customers.
* Armies Are Evil: A ruthless military force comprised of soldiers that are either violent thugs, or expendable pawns for corrupt leaders.
* Armies Are Evil: A work portrays formal military as being a violent group of warmongers.
* Armies are vulnerable in the flank and rear, because the enemy is expecting them from a different direction, because the attackers can concentrate on a weaker force, and because supply lines are vulnerable. Also the borders between unit jurisdictions are a vulnerable spot.

* Armies have long faced the possibility of clashes in city streets, though. For example, during the medieval
* Armies have marched under banners (specific colors of cloth and/or actual flags) for thousands of years. In many cases, individual divisions and regiments will even have their own colors and mascots.
* Armies of Legionfall, that is conformed by the members of all class orders.
* Armies tend to be quite shambolic, if only for the sake of comedy — although it's also clear that conventionally disciplined, properly trained armies, which do exist, can be expected to had those idiots their butts. The presence of the trope is usually justified by the plots.
* Armillo, portals to a parallel world are located in various places in each level and must be entered to solve some puzzles. This version of the world is covered in purple fog and Armillo can only survive in it for a limited amount of time, forcing the player to complete these puzzles quickly.
* Arming America: The Origins of a National Gun Culture. against Bellesiles and his book forced him from his university post and cost him his prize.
* arming police officers with revolvers and ballistics are more similar to a .38 S&W cartridge, which is inferior to the .38 Special.
* Armin is shown throwing up repeatedly in the woods. When Mikasa is asked whether she or Eren felt that way after the first time they killed, the audience is not shown her response to this question. Levi reassures that shooting was the right thing to do, but falls short of invoking this trope.
* Armin realizes that the Female Titan is trying to capture a certain member of the Survey Corps, after it lifts up his hood to examine his face instead of killing him straight away.
* Armin's birthday is November 3rd, which is celebrated in Japan as Culture Day.
* Armin Shimerman. A lot of supermarket tabloids published wild stories blaming the quake on aliens, complete with eyewitness accounts, not long after.
* Armin Shimerman noted that the hardest word for him to pronounce with the Ferengi fangs was "hellhole".
* Armin Shimerman played a Betazoid gift box and two Ferengi in TNG before becoming Quark in
* Armin Shimerman, they liked his performance enough to keep him on the show until the end of season 3 (with a cameo appearance in "Restless" the following season).
* Armin Van Buuren - "Another You" featuring Mr. Probz. The narrator realizes he's done something wrong by his significant other, but would rather start anew with someone similar to his ex.
* Armin Van Buuren initially studied to become a lawyer and took up a job as a DJ on the side. When he became more popular as a DJ and found a passion in making his own music, he dropped out. He then returned to finish it up and graduated in 2003.
* Armitage Hux's big speech. It's like he walked up to one of the cameras, yanked the film right out of it and proceeded to gnaw and chew the shit out of it for over two minutes.
* Armitage III), blowing and popping bubble gum as she's at a police briefing.
* Armitage III is based on this, though during the events of the OAVs it's only a threat that Earth is dangling over Mars' head.
* Armitage III is waterproof, but earns mention after she attempts suicide by jumping into a river whilst riddled with bullet holes. Ross rescues her, saying "Hey, don't short out on me!"
* Armitage III: Naomi Armitage and Julian Moore (and possibly other Thirds) are this, as they are robots. Armitage remote controls a crane at one point and Julian hacks a computer by plugging a cable into his chest.
* Armitage III OVA. In the epilogue to the sequel, it gets oceans courtesy of a lot of dropped comets.
* Armitage III plays this straight, down to the "I hate technology" exchange.
* Armitage III, Ross has an artificial leg at the beginning. Later in the story more than half of his body is replaced with mechanical parts to save his life.
* Armitage III side after little Youko is kidnapped and she had to go after the culprits.

* Armitage III. The "seconds" from which they descended were intentionally designed to fit this trope, however.
* Armitage III: The villain D'anclaude has a habit of turning second-generation robots into walking bombs.
* Armitage III Which explains why she can deflect bullets just by holding her arms in front of her face, and survive a grenade blast aimed directly at her.
* Arm Joe, which had its fair share of fights but generally didn't involve the characters beating each other up. It includes things like Enjolras attacking people by building a barricade on top of them, Cosette throwing Valjean as a weapon, an evil robot clone of Valjean, and Javert shooting firebolts from his fingers.
* Armless Amy tends to react with absolute indifference towards all the horrifying things happening in each chapter. At worst, she seems slightly shocked by something, but nothing more than that.
* armless, vaguely dinosaurian creature with a large fin along its tail.
* armless Waterbender This is consistent with the aforementioned master rule.
* Armor almost certainly died somewhere out in orbit. His people keep searching for him anyway and imply they'll do so indefinitely because he was not explicitly seen to die.
* "armor", but a 67% chance of dying to a single small-arms round to the face.
* Armored: A newbie guard for an armored truck company is coerced by his veteran coworkers to steal a truck containing $42 million. But a wrinkle in their supposedly foolproof plan divides the group, leading to a potentially deadly resolution.
* Armored cars randomly spawn throughout Los Santos. If you happen to have some explosive charges and a getaway vehicle handy, you can blow the doors off of them and make off with their contents.
* Armored Closet Gay is one of the few cast members who sang in show choir in high school.
* Armored Closet Gay: They would be in a relationship if they weren't hiding their true sexuality.
* Armored Core 2 had shoulder weapons that took up both shoulders, but in reply gave 3 launchers with MMM. Two which fired in total 16 rockets (and overheated the enemy core) or one which fired one big slow missile, that fires a CLOUD of homing missiles.
* Armored Core 2 is set nearly a century after the events of the original trilogy and moves the setting from Earth to Mars, with the storyline making a few quick references to concepts from the previous games. After it, the series would establish a convention of new numbered entries being hard reboots.
* Armored Core 2: Leos Klein, immediately following his defeat at your hands, tells you how to avert the catastrophe on Mars that he was in the process of causing.
* Armored Core 3 in which at the end, The Controller released the locks to the surface granting humanity access to the now-healed Earth.
* Armored Core 4 falls below 25%, she'll choose to save you instead, and activate your Primal Armor anyways.
* Armored Core 4 labelled as "Normals". And each one is piloted by a borderline psychic crew member and capable of nearly 1:1 piloting input to machine reaction speeds.
* Armored Core 4's Supplice, but you don't see him doing that in the game, either.
* Armored Core 4. Unfortunately, in a game where only speed matters (at least in for Answer), using tanks are usually a good way to get yourself killed.
* Armored Core and the final stage involves a literal do-or-die test against several opponents.
* Armored Core, as each one gets defeated a new one is made that's even faster and more powerful than the previous one, with tanks being the weakest and the strongest being a crazy airborne spidery looking thing that gives the alien queen a run for its money. The humanoid one, interestingly, sits in the middle of the spectrum in regards to strength.
* Armored Core between Zio on Earth and on Mars and Balena being caught between the now Corrupted Martian government and the Earth Government.

* Armored Core. But even then, they're still just weird, and they're still broken English.
* Armored Core can be designed with massive missile supplies, in some cases firing dozens of light missiles at a time. Given the agility of some opposing mecha, and the cost of replacing missile stores, this isn't a popular option, but it certainly has a place.
* Armored Core, every one of the Lynxes for hire is a women, and unlike Bernard And Felix, more than willing to let you use them as consorts.
* Armored Core features several multiple endings, but there is one extra mission taking place after the "true ending" where the player becomes the last remaining Raven alive. The mission is given to you by an unknown client and proposes for you to fight one last Pulverizer designed specifically to fight against you in the Intercine. The Pulverizer in question is a palette-swapped, souped-up version of the one fought in that ending, and your reward for beating it is what is arguably the best head part in the game.
* Armored Core: For Answer. In that mission, your operator even flatly derides the enemy for being so desperate as to willingly deploy, in her words, "a relic".
* Armored Core: For Answer such as the one piloted by the protagonist.
* Armored Core for Answer wiped out the rest of humanity on ending C. Other paths to humankind's extinction exist in the game as well...
* Armored Core: from the Ashes high-speed battle, while the two discuss deep philosophical matters of good and evil, right and wrong, and whether Ghost's actions are justified or not, or one of the two calling a full retreat (which Ghost's Knight may not always obey).
* Armored Core games. Even in the universe where all of the corporations joined forces in a military coup against all world governments, they're still going at each others' necks and trying to gain control over the entire globe as well as outer space.
* Armored Core games, Nineball is known for having held the position of #1 pilot the longest, thus those who can beat him are famed as "Ninebreakers".
* Armored Core. Getting hit by an Assault Armor in 4A will also produce this effect.
* Armored Core had was that it was almost never advertised past E3. This caused the game to be thrown between publishing companies like a spiked ball. To elaborate, the series had been taken up by three different companies after the original dropped it (after Last Raven). Sega picked the series up for 4, only to drop it and for Ubisoft to pick it up. Ubisoft dumped it, so then Bandai had the ball for Armored Core 5.
* Armored Core: High-speed (in the later games) combat using mecha that you build yourself from the ground up. The biggest appeal of the game is that whatever mech you use, you built it yourself. Which requires the mention of its younger brother:
* Armored Core in the former, and the latter simply allows overweight ACs, albeit with greatly reduced performance. Not only that though, the ACs featured looked cool, but some of the designs were grossly impractical (cf. Master of Arena where the featured mech wields very powerful weapons, but very limited ammo, and very low AP body parts). Despite all that, they're all very competent in said cutscenes...
* Armored Core is set very closely after the events of Armored Core for Answer, and with the reformed ORCA winning.
* Armored Core. It even has a funny/morbid little cutscene with the evil AI and a doctor discussing it.
* Armored Core it's made from a highly toxic particles. Despite all that though, getting hit without it reduces your mech into a fiery wreck very, very fast, so it is useful to a degree.
* Armored Core. It wasn't until Master of Arena that the arena system even came in, and until the 3 series that the graphics and controls received good reviews.
* Armored Core, Jack-O may be the Protagonist or Antagonist. Regardless of which one, you will learn that Ravens who fail to live up to his expectations die a lot sooner than Alliance Ravens.
* Armored Core Last Raven developed Micromissiles, missile launchers that fired up

to 9 missiles in one salvo (13 if you have the extension part), this was perhaps the best weapon a non OP-I Core can have on his back. Unless he faces off against mechs with good anti missile weapons. The Nymph series compensates instant missile salvos with more stopping power and better firing trajectory, the Taurus also provides a spectacular display of an insane barrage of missiles. The best way to stop the Nymph and Taurus is to equip a lock canceller which resets the lock.
* Armored Core, making the player more of a private mercenary for hire. There's still an organization of some sort backing the player, but it's only alluded to, never really discussed in detail. Collared is pretty much just the Lynx's hangout, as its members are already sold to specific corporations or are freelancers. The organization is pretty much tradition by this point.
* Armored Core — Normals. The newer NEXTS now being the weapon of choice for Ravens, err Lynx.
* Armored Core Most of the games before the introduction of "primal armor" and related technologies — while the rest of the technologies shown may not be remotely practical or cost effective today, the first few entries in the series are hard science fiction with none of the technologies present requiring the laws of physics to be altered, and most of them currently possible given sufficient funding. The only fantastic elements are the fact that the technologies showcased are commonplace and treated as cost effective. Needless to say, giant robots are unlikely to be used as the mainstays of armed forces, ESPECIALLY not by non-state private military contractors that don't have the luxury of a large tax base. The mechs and energy weapons shown are all possible with technology currently available or on the drawing board, and realistically have heat issues and have weight limits dictated by the square cube law. The entires in the series that have primal armor and other fantastic elements are softer science fiction that falls more in the applied phlebotinum category.
* Armored Core, much of humanity (those who could afford it, at least) is dependent on the Cradle habitats they live in. One option the player can take later is to side with Old King and bring them down for the lulz. Maximillian Thermidor also wants to take them down, but this is because he believes that they are a temporary solution at best and that destroying them would open up the way for humanity to get to space.
* Armored Core Nine Breaker modeled after 9-Ball, the original game's villain.
* Armored Core reveal that humanity had warred against an alien race which caused a godly alien power to intervene, the resulting conflict leaving humanity living in an isolated machine controlled society in order to protect them from the wrath of the godly alien power.
* Armored Core series, a recurring theme is an AI "controller" that organizes the lives of humans, and it's up to us to destroy it.
* Armored Core series has each end every part have exact and in-depth specifications for any attribute the it applies to, to such an extent where you would consider purchasing a different head unit because not only does your current choice seem a bit heavy, it may drain too much energy, lack the stats to support your Fire Control System, not have a built-in radar function, not have a bio sensor, lack ballistic defence, is not very sturdy, and a whole host of other things you wouldn't even give a second look at.
* Armored Core series has the Justice cannon, a space-based laser cannon which, to this writer's knowledge, fired once, charring the surface of Earth and forcing humanity underground and to Mars in order to survive. Later, someone attempts to fire it again, and the player must take the fight down the barrel of the cannon to stop it from annihilating the planet.
* Armored Core Stinger, a power-hungry Irregular who has allied with the Doomsday Organization.
* Armored Core, the last mission ends with the player in his Armored Core fighting off suicidal machines that are crashing into the planet. Any good pilot probably won't blow up, but the screen fades to black as you're fighting the machines.
* Armored Core: The MTs in any of the games are this with few exceptions, especially if they're the armless "chickenwalker" variety.

* Armored Core the player could purchase a torso unit equipped with a "Exceed Orbit" function, where 1 or 2 weapon pods located on the back could detach and fire automatically at any enemies it saw (for some reason it could see through walls where as the rounds fired could not penetrate said walls, sometimes leading to waste of ammo if one wasn't careful) they came in shell-based and energy-based projectile versions, with differing damage and rate-of-fire stats, while the shell-based ones had more shots, the energy-based ones could recharge themselves when deactivated.
* Armored Core, there exists a number of Arms Forts which act as the main adversaries, which include a six-legged aircraft carrier, a giant hydrofoil...and a gigantic tank named Cabracan that has 4 multi-story chainsaw blades on the front!
* Armored Core they use and play the same way they can, if not better. In the Armored Core for Answer the NEXT, White Glint is this due to it moving so fast all you see is a "white glint" and has completely custom NEXT parts...until you get your own.
* Armored Core. This is increasingly subverted in later entries. For example:
* Armored Core titles, like Isaac City, are featured, however they've now been supplanted by newer cities of similar name. Isaac City in particular is now divided between Neo and Old Isaac City.
* Armored Core trope with the Arms Fort Great Wall, GA America's ultimate AF. Your objective is to get inside it and blow it sky-high. I don't think anyone's been dumb enough to attack it's outside other than to get into the damn thing.
* Armored Core units in V and Verdict Day is usually dropped in via specialized armored helicopter dropships called Storks. In fact, Stork pilots are considered mercenaries of their own alongside more traditional AC pilot mercs, and are usually called Storkers. Said large dropships are also heavily armed and are often a match against ACs, especially when employed as fire support role.
* Armored Core V. Although she started out this way, she genuinely grew to be fond of her latest clients: Fran, the daughter of a late revolutionary, and you, the player character. Then double subverted in the ending of the Order Missions, where, when asked what to do by "living for one's own sake", she immediately suggests making money as the first thing to do.
* Armored Core V nimbler enemies, subverting the hell out of the "slow but deadly up close" tank image.
* Armored Core V. One of the aforementioned pilots sums it up thusly: "Who needs a soul, as long as you win?"
* Armored Core V. That is to say, this indicated distance is the maximum range where a weapon's maximum theoretical firepower is conserved. What happens beyond this distance depends on the weapon:
* Armored Core... Weapon arms are much more weight — and energy-efficient than hands holding guns, though less destructive and less versatile. This doesn't stop the EKLAKH machine gun arms from ripping whatever they target to pieces.
* Armored Core. When activated, your AC is provided with unlimited energy for about 50 seconds. But once those 50 seconds are up the generator goes into low power mode for about a minute to a minute and a half, which prevents you from being able to dodge effectively or use energy weaponry. Death usually follows if your enemies were not wiped from the field during your assault.
* Armored Core, where the player character is yet another mercenary eking out a living amidst the war between the Three Great Forces.
* Armored Core, which can only be piloted by people with some special type of psyche. Ill-defined, but still an example.
* Armored Dragons: A dragon wears removable armor that is not part of their anatomy.
* Armored Hunter GUNHOUND EX: Players can unlock one in the form of the Anti-Ship Energy Cannon, which can be unlocked by scoring a total of 30,000,000pts.
* Armored Personnel Carriers (APC)Designed to transport troops safely, APC's are not meant for direct combat. It has no heavy weaponry, though it is lightly armed for defense.
* armored personnel carriers series are bulletproof and even immune to frag

grenades and grenade launchers.
* Armored six security guard working for an armored truck company decide to steal the money they are guarding and make it look like they were robbed while transporting the money to its destination. They figure that if all of them are part of the theft, then no one needs to get hurt. However, things do not go according to plan, a witness is killed and one of the guards decides to stop the others any way he can.
* Armored Trooper VOTOMS did dub the first episode as a pilot, but decided not to go through with dubbing the series due to not wanting to risk the cost.
* Armored Trooper VOTOMS, Fiana uses the engines of a crashed spaceship to help Chirico in battle during the Sunsa arc. Earlier than that, at the end of the Kummen war arc, three Melkian army ATs were vaporized by Chirico when he hit the engines on the escape shuttle under the Veela HQ (this one seemed to be unintentional on his part; those three mechs just happened to be in the wrong place at the wrong time).
* Armored Trooper VOTOMS has this as a means of getting injured soldiers off the front line and to proper medical care reasonably safely - "reasonably", because they're still referred to as coffins in-show.
* Armored Trooper VOTOMS of the franchise use a liquid called Polymer Ringers Solution that lets the machines move in a human-like way with hydraulics, similar to an advanced breaking fluid. Unfortunately the stuff is absurdly flammable, causing it explode when subjected to sudden changes in temperature. One wonders why they decided "explodes easily" was an acceptable vehicle design flaw.
* Armored Trooper VOTOMS setting. "Humans" here are said to come from a planet near the core of the Astragius galaxy, while Earth is in one of the Milky Way's spiral arms.
* Armored Trooper VOTOMS The arc takes a lot of cues from the Vietnam War (especially as the anime originally aired in 1983, only a decade after Vietnam), including flamethrower boats and guerrillas striking from the foliage while being backed up technologically and logistically by a foreign power.
* Armored Trooper VOTOMS. The first episode of Pailsen Files features a disastrous opposed landing against a Balarant position. While the overall operation was a success, the on-screen battle only has a single survivor - Chirico.
* Armored Trooper VOTOMS: The Role-Playing Game using the Fuzion system.
* Armored Trooper VOTOMS took quite the liberties with characters' designs, between the black-and-white interior pages and the colored artwork. Fyana's hair became somewhat shorter and colored black, with her eyes being green (instead of her having brown hair and brown eyes). Several characters in the Kummen arc were also drawn radically different compared to how they appeared in the anime, with Ru Shako receiving a black bowl cut and Kanjelman's gray hair also changing to black. Ypsilon received long hair, while the Schmitel brothers suddenly lost their eyebrows and received bulging, insect-like eyes.
* Armored Trooper VOTOMS universe, this does apply, when the fact that a century-long galaxy-wide conflict has just ended.
* Armored Trooper VOTOMS uses this trope as there was a century old war between Gilgamesh and Balarant, provoked by the presence of the Overman who are effectively immortal beings with Chirico being the most notable one.
* Armored Trooper VOTOMS) when the Melkian army formally decides to back the Kummen government against the Veela rebels.
* Armored Trooper VOTOMS while they are hunted by Ypsilon and the Secret Society.
* armored vehicles are usually wired to game controllers and even smartphones.
* Armored Warfare features a whole slew of IFVs, ranging from early model BMPs to cutting edge vehicles such as the T-15 Armata. They usually have good mobility, excellent stealth, and a combination of autocannon and anti-tank missiles that can output very high amounts of sustained damage. Their unique Troop Compartment module grants faster repair of damaged modules and higher base capture rate, though they can't actually deploy mechanized infantry until the American Dream update.
* Armored Warfare promises both PVP and PVE battles for all manner of armor units from the 1950s to present day. This means that a squad of five can go up against

more than three times their number in opponents and still win. It is undeniably awesome to team up with a few of your fellow mercenaries and reduce an entire enemy tank company to impromptu chaff by yourselves.
* Armored Warfare were reclassed from AFV to Tank Destroyer. The developers admitted that this isn't accurate to real life, but it better reflects their capability and role in the game as heavily-armored damage dealers.
* Armored when the thieves' hideout is found to be not as secluded as they thought and his friend tries to solve the problem by killing the witness, breaking the head organizer's deal with the protagonist that there would be no casualties.
* Armor Games: along with hosting a number of games, they also produce many popular ones, including
* Armor has a feudal society with samurai trappings, deliberately founded by some guy with an enormous pile of money and a big ego. The Emperor is accompanied everywhere by a bodyguard whose duties, apart from the obvious, include beheading anybody who doesn't appear suitably impressed by the Emperor's magnificence. (Fortunately, the current Emperor is genuinely pretty darn impressive.)
* Armor Hero. Half is spent viewing it from the classic angle (the bottom), and the other half is spent viewing it from the top.
* Armor is made of parts of monsters you've killed. The Bone set is the most direct example of this.
* Armor Is Useless: Armor that can't protect from damage isn't worth the trouble.
* Armor Is Useless were generally showing more skin than Xena's outfit does. Iolaus, in particular, doesn't seem to own a shirt.
* Armor of God, has Jackie and a woman fighting with two thugs in her apartment at night. The hotel manager downstairs thinks it is this.
* Armor of God. Rather than taking advantage of the opportunity to knock the guy out, Jackie and the gunman both stare.
* Armor of Invincibility which shakes off A-ranked magic without as much as a dent.
* Armor Piercing Ammo. Also, there are some attacks (Incinerate, Carnage) that qualify for this.
* Armor-Piercing Attack, dealing True Damage which cannot be mitigated by any means.)
* armor piercing damage in direct proportion to their HP, at the cost of reducing their HP to one afterwards.
* Armor-Piercing Question, and the crowd was beside themselves with laughter.
* Armor-Piercing Question are monsters because of their personalities rather than their species and that they chose to use their abilities for evil, just like any number of humans have.
* Armor-Piercing Question, "Because I want to remember what you say, RIGHT NOW." Translated: "Because you are a powerful Viking warrior of legend in your own way, and what you say now is likely going to be the stuff of a great saga."
* Armor-Piercing Question makes him realize that he'd be no different from the people he hates. If anything, the whole thing just serves as support for the fears of characters who believe that Harry has the potential to become the next Magneto.
* Armor-Piercing Question. When Ace dies, Lister and Rimmer take him to the burial ground of all the Ace Rimmers who died. Upon seeing all the hard light projectors of the Ace Rimmer holograms who died in acts of heroism, enough to form a ring around a planet, Lister turns and asks Rimmer if he really wants to be the one to break that chain. This convinces Rimmer to take up the mantle.
* Armor-Piercing Response on Ozai, the Fire Lord laughs mockingly and this exchange ensues:
* Armor-piercing shells from the big-gun warship era during the first half of the 20th century qualify. The same projectile that's designed to punch through an opposing battleship's armor and go off inside might just as easily go all the way
* Armor Plated Giant Space Hamster: Furless, covered in an extremely durable rhino-like hide, and extremely aggressive.
* Armor Thrulls for this purpose by the Order of the Ebon Hand, growing organic armor to be flayed from them at maturity.
* Armor Wars storyline. Although the suit was upgraded to now permit a limited

number of repulsor shots, he used them up in the battle and only succeeded in destroying the Dynamo's armor, and Titanium Man caught the weaponless Iron Man in a bear hug. Attempting to escape, Iron Man's jetboots were again weaponized, albeit unintentionally, when at full blast they set the Titanium Man's armor on fire, killing the Gremlin, much to Tony's dismay.
* Armor Wars storyline had Tony try to invoke this trope after one too many villains got their mitts on his suit tech, causing him to go a little overboard in his pursuit of unauthorized users of his armor technologies as several other heroes utilizing powered armor got involved.
* Armor Wars, though, and shut down another Terminax before it could destroy the Stark Enterprises campus.
* Armor, where the main character is a soldier who is simply so good that he survives when the rest of the army is wiped out. At one point he is in the hospital recovering from wounds where he is yet again the sole survivor, and he over-hears his superiors being stunned by the bureaucratic oversights and mistakes which caused him to continue to be sent back into battle. Eventually, they fake the records to remove almost all of the battles he has been in, so as not to get senior officers in trouble. He resignedly approves of their actions, even though it means sending him back into battle where he is again a sole survivor.
* Armor while the soldiers inside tried to figure out how to use the highly complicated armor to kill them.
* Armory & Machine has an enemy that's a sentient Giant Hogweed, which tries to destroy your fighters with corrosive venom. There's also the Pebble Swarm enemies, swarms of floating pebbles trying to destroy your fighters.
* Armory & Machine takes away most of the horror and makes them seem like comically inept buffoons instead.
* Armory & Machine while most importantly interrupting the enemy's current attack causing it to fail. Naturally, both Clamp Trap and Reinforced Clamp are best used against slow-casting but powerful enemy skills.
* Armory & Machine, you get the chance to depart. It will reset your progress, but give you a 5% production bonus the next time you restart the game. Additionally, if you don't depart, you can fight additional bosses, each one giving you another 1% bonus.
* Armory has a sidebar explaining that being caught in the immediate blast radius of a successful nuclear warhead attack insta-kills you.
* Armoured CavalryUnits that use ACV’s instead of warhorses. King's Royal Hussars of the British Army is one example.
* Armoured Closet Gay: A man who is vocally homophobic turns out to be a closeted gay man.
* Armoured Closet Gay: A vocally homophobic man turns out to be gay and in the closet.
* Armoured Closet Gay: I hate homosexuals, even though I'm secretly one of them.
* Armoured Closet Gay: The self-loathing gay guy who hides behind a macho facade.
* Armoured Closet Gay to express homophobia against others and aggressively assert his heterosexual bona fides. Their self-loathing can make the homophobia of such characters particularly vicious.
* armoured regiments). The Japanese used captured M3 Stuart tanks. A number of battles were initiated specifically to prevent the enemy from taking advantage of captured vehicles, most significantly the British bombardment of Mers-el-Kebir which sank three French battleships and killed over a thousand French sailors, despite Germans having no means or intention to seize those ships after the 1940 Armistice.
* Armour Is Useless, being either too cumbersome to wear for more than a few hours or something that will seal in your sweat. The book recommends you settle for tight (but comfortable) clothing with a few pockets, running shoes, and short length hair. This won't tire you out and still prevent zombies from grabbing you easily as there's nothing to really grip.
* Armour of God has three dubs: The original export dub done in Hong Kong, the Dimension Films version of the shorter export cut with a new music score and Jackie

voicing himself, and the Media Asia/Fortune Star dub used on current home video releases of the uncut Hong Kong version.
* Armour Piercing Questions from Oobleck. They conclude the answers they gave the first time weren't satisfying for their teacher, and that being a Huntress takes more than they expected... But it's still a worthwhile job. In the corner, a small smile creeps across the (apparently asleep) Oobleck's face.
* Arms and the Man... and then they hear soldiers entering the house. Bluntschli tells Raina to hide her eyes, as it'll all be over in a minute - but of course she has a wild bout of heroism and finds a way to hide him.
* Arms and the Man: Raina does start out in love with Sergei, but she's more in love with the romantic ideas she holds about what he's doing out on the battlefield, and once Bluntschli shatters her notions of romantic battle (in the first scene), we've got… Raina starting to want Bluntschli, Bluntschli thinking she's far too young to pursue, Sergei still thinking he's going to marry Raina but really more lusting toward housemaid Luca, and Luca seemingly going to marry a fellow servant. Of course, near the end, Luca pulls the rug out from under this arrangement, and everyone falls over into the right arms.
* ARMS, Biff will explain that Helix is a living blob of DNA, but admits he doesn't know what that means. His hypothesis is "Do Not Attack" and warns Mechanica not to fall for it.
* ARMS) can fight against Spring Man despite their obvious size and weight differences.
* Arms Corporation series, Arms was reduced to mostly support staff work before filing for bankruptcy in 2020.
* Arms Dealer: A merchant who sells weapons, acquired through (il)legal means.
* Arms Dealer: An amoral merchant of death who sells weapons for a living, to either side of a conflict.
* ''Arms Dealer'' and purchase firearms so you can sell them to nations demanding them for profits.
* Arms Dealer for the Kryptonian underworld. He would escape from the Phantom Zone multiple times to plague Superman as a continuation of his feud against Jor-El.
* Arms Dealer merchant who sells illegally smuggled weapons to the criminal underworld.
* Arms Dealer: Someone who illegally smuggles weapons to sell them to the highest bidder, including criminal gangs and terrorist organizations.
* Arms Dealer the villain used to collect the anger to collect the happiness from the circus audience and releasing it into the rest of the city.
* Arms Dealer this clientele. According to him, the world's best mercenaries (not the main characters) are so insane that they don't care about money at all—which is why he sells his best weapons for obscene amounts of money.
* ARMS, Double KOs are uncommon to see. In Versus Mode, Grand Prix and Arena matches, the win will not count if a Double KO is initiated and instead counts as an extra round regardless who initiated the attack. In Party matches, if a Double KO is invoked, it will count as a draw, even if the players before the final two are knocked out.
* ARMS-drawn blue stamps respectively. It sticks there until it either clears up by itself or recovering from getting knocked down, clearing it up quickly.
* Arms exporting countries have dedicated junior ministers for this sort of thing. In the UK, Lord Drayson is the Minister of Defence Equipment and Support.
* Arms Fair up it will make the fallout from Chernobyl look like spring rain. When the Royal Navy are unable to self-destruct the inbound Tomahawk, he nicks the plane.
* ARMS has his age listed as "Unknown". Considering that he is an Egyptian mummy, it is safe to say that he is centuries older than the other fighters.
* ARMS in Grand Prix mode at level 6 or 7. Spring Man's is this trope.
* ARMS introduces Ribbon Girl, a pop star with a cheerleader theme and ribbon arms. Her multiple mid-air jumps have a music note effect to them, and the music from her personal stage, the Ribbon Ring, has her providing the vocals. She's even described as "the pop star of the ring".

* ARMS is when Twintelle and Master Mummy are facing each other off, he would tell the audience to grab some popcorn as if it is a horror movie coming to life.
* ARMS Lacking the required genetic ability to participate in ARMS battles, Mechanica designed a stretchy-armed mech suit from scratch.
* Arm Slaves have the pilot wear a special headband over their forehead so the cockpit can track their head motions. This in turn allows the pilot to control the facing of the Arm Slave's head by moving their own. Since many models of Arm Slave mount machine guns in their head, this allows the pilot to direct point defense literally at a glance.
* Armsmaster Harlan in the Scarlet Halls is, in his last words, either incredulous and doing this trope, or just indicating he's pissed off:
* Armsmaster, who is normally limited to close quarters with his halberd, gets a pair of
* ARMS: Mechanica built a fully-powered combat suit, complete with thrusters, at the tender age of 15.
* ARMS, Mechanica is the only playable character not to possess the eponymous power, instead piloting a mini-mecha that replicates their function.
* ARMS Several fighters fill the niche completely (Barq & Byte, Springtron, Hedlok) while an arguable case could be made for others (Dr. Coyle and Helix).
* ARMS shows that his "gross factor" leaps past the edges of the chart and the user's web browser.
* ARMS, the titular allcaps word is used to refer to a mutation that gives people long, stretchy arms, a sport that revolves around boxing with said arms, and the various types of boxing gloves used in the sport, as opposed to regular, non-elastic arms.
* Armstrong (there are clan legends about what feat by an ancestor was commemorated by that name).
* ARMS True Final Boss, you have to play on one of the hardest two difficulties, where the final match is against Hedlok once more, but controlling its creator, Dr. Coyle, after she knocks Max Brass out of his arena and fuses with Hedlok after being defeated in a last ditch effort to destroy the player.
* ARMS, was watched by so many people that it wound up crashing YouTube. As a response, the Nintendo YouTube channel put up the Direct on their channel for the people who missed it.
* ARMS, which was released a month later, it still sold over 2 million copies in its first year; impressive for an experimental new IP, and especially for a new fighting game series.
* ARMS, Yabuki requested to have Min Min specifically be made playable, even though she already appeared in the game as a Spirit.
* Armus from a shuttle crash, for example by teleporting their phasers, tricorders, and Geordi's visor away from them.
* Arm Wrestling, is worse. Robots are allowed to participate. Headbutts and setting your opponent on fire are allowed.
* Army, Airforce and Naval troops also often use codenames over the radio, and many build up reputations that earn a nickname, either for themselves (Rommel - The Desert Fox) or for their regiment.
* Army Ants on a microscopic scale. The ants operate tanks and aircraft and carry guns, but the players are expected to basically use their own backyard as the world setting. A sandbox becomes a desert, a lawn becomes a jungle, and so on. It is possible to play an ant commando escorting workers to steal the Cheetos your players are eating.
* Army Ants. The ants, with their allies the beetles, crickets and ladybugs, fight hordes of bees, hornets and wasps, not to mention fighting predators and going on special missions like stealing cinnamon (an insecticide) from a kitchen.
* Army ants. They tear things apart, bit by bit, and their victim is alive throughout.
* Army Daze's effeminate and seemingly un-military Kenny also runs a mean obstacle course.
* Army dentist Dr. AnnaLee Kruyer came back from Iraq with the story of an

anonymous sergeant who was shot in the face in the exact right spot for all of the bullet's energy to be transferred to one of his teeth, ejecting it from its socket and stopping the bullet there. He initially assumed the shot missed and kept coming, scaring the living hell out of the guy who hit him, who surrendered immediately.
* Army @ Love is this trope. After an unsuccessful recruitment campaign, a division called Morale and Motivation markets the army as "Spring Break w/t Guns". Every platoon gets a state sponsored orgy as well as other perks, even if they're married. Hell, they start giving out medals to soldiers who 'deploy' in the middle of combat! Many military readers have found it deeply offensive.
* army, many of whom are several times stronger than Vegeta was when they first fought.
* Army Men. A plastic soldier very much in love with fire, packing a flamethrower with him everywhere he goes, and one of the more dangerous of Bravo Company, AKA Sarge's Heroes. "Light 'em up!", indeed.
* Army Men because all the characters are plastic toy soldiers, which will melt in high temperatures.
* Army Men endings, where a firecracker is taped to Sarge, and he can't get it off before exploding.
* Army Men, Sarge gives a content laugh: "Oh-ho-ho, yeah." Also, several times in the games the quote, "I love the smell of burnt plastic in the morning," is used to further the sadistic craving of burning plastic soldiers. The results of the flamethrower are quite satisfying and well worth the reaction: any mook (or Sarge himself) caught in the flames runs around in circles before shriveling up into a blob of goo and fading away (as video game corpses do).
* Army Men: Sarge's Heroes himself comes out of nowhere to mock you followed by a game over.
* Army Men series is about a continual war between those little plastic soldiers, green and tan. (And sometimes, blue and yellow)
* Army Moves in a helicopter flying from right to left, and Stages 5-7 (on the second load) switch to foot-soldiering action with a little platforming.
* Army of Darkness, a possessed woman pretends to be dead, but Ash knows better.
* Army of Darkness Ash builds a fully functional artificial hand out of springs and a metal gauntlet. Why? Because he's Ash.
* Army of Darkness, Ash crushes a pewter mug with his new gauntlet-hand.
* Army of Darkness, Ash is inexplicably seen teaching the medieval villagers, including their soldiers, on how to use a halberd.
* Army of Darkness, Ash sings London Bridge while killing miniature versions of himself. Definitely played for laughs though, especially when he steps on a nail and the tiny Ashes finish the verse for him as he gasps in pain.
* Army of Darkness becomes necrotized and takes charge of the Deadite army, he starts wearing a skull-like helmet.
* Army of Darkness by sliding further into comedy. There are still horror elements, but Ash has become a wise-cracking smartass, and the emphasis has shifted toward a comedic, action-adventure tone.
* Army of Darkness had its original ending (where Ash oversleeps after taking a sleeping potion and awakens in a post-apocalyptic future) changed after negative test audience reaction. A new ending was reshot and used for the theatrical release. Fortunately the new ending includes a whole additional action sequence and originates one of Ash's iconic catchphrases, "Hail to the king, baby!"
* Army of Darkness, has the highest budget and is the most well known. It continued the trend toward increased slapstick violence and making Ash a wisecrack-spouting badass, which is generally what people remember most about the series.
* Army of Darkness has this in both endings. In "I slept too long", his problem is pretty obvious, and in "Hail to the King", Deadites can still freely possess anyone, anywhere, and Ash is essentially doomed to live in a randomly zombifying world. The comics rolled with this.
* Army of Darkness in vast quantities that, frankly, it's surprising that people don't pop like blood-balloons when they get so much as poked.

* Army of Darkness I slept too long!". The Hollywood studio demanded a more kickass ending.
* Army of Darkness is the better of the two, it's hard to argue that the darker original ending doesn't clash just a bit with the rest of the movie's humorous action/adventure tone.
* Army of Darkness: "Maybe, just maybe, my boys can protect the book. Yeah, and maybe I'm a Chinese jet pilot."
* Army of Darkness: "The Red! The Red! Duke Henry and his men have come!"
* Army of Darkness. They attack a medieval castle, and it's up to Ash, his chainsaw, and his boomstick to defeat them.
* Army of Darkness They wanted to make him king. In his own way, he is king.
* Army of Darkness, though later on he's easier to distinguish and no longer identical after one of Ash's more gory actions.
* Army of Darkness, transformed into a steam-powered tank with a helicopter rotor.
* Army of Darkness was called "Captain Supermarket". This sort of makes sense, since Ash starts out as an ordinary guy who works at an S-Mart and becomes more superheroic as the story goes on.
* Army of Darkness when one of Ash's miniature clones dives into his mouth. He retaliates by drinking boiling hot water.
* Army of Darkness which featured the alternate ending where Ash wakes up in a post-apocalyptic future rather than going back to his own time. The next series of comics start where the movie ended, with Ash fighting deadites at work.
* Army of Darkness with a mechanical gauntlet strong enough to crush a metal goblet like it was play-doh. Groovy, indeed!
* Army officer Alan Frazer Scrope is sounding the charge on a bugle when a native arrow flies down the bell of the instrument.
* Army of Frankensteins: Alan is forced into the American Civil War by the time portal, and ends up fighting the Confederacy, mistakenly changing the assassination of Abraham Lincoln.
* Army of Frankensteins and its adaptations, down to naming his adopted son Igor.
* Army of Frankensteins, one of the Frankensteins tears off a Union soldier's face.
* Army of Frankensteins that has his eye, and periodically sees what he sees. All of the Frankensteins are linked to the same one, which causes them to feel the effects of any injuries he receives.
* Army of Frankensteins: The Frankensteins seem to be the main threat for the first half of the movie, but it turns out they were only rampaging because they were terrified from all the dimension jumping, and are eventually calmed down and turned against the Confederate States of America to free the slaves.
* Army of Frankensteins, which turns him into a powerful mutant intended to be sicced on the North. The Frankensteins themselves become an army of super soldiers for the Union.
* "Army of Ghosts": An army of several thousand Cybermen has just managed to conquer Earth. Then a spaceship stored in Torchwood's basement opens up, and out come four Daleks. A large part of the next episode has the Daleks effortlessly killing Cybermen.
* "Army of Ghosts"), but it even gives the TARDIS a run for its money in the "conceptually weird" category.
* "Army of Ghosts" has not only the news but any broadcast program in which the eponymous ghosts are featured suddenly turn into one of these when the ghosts are revealed to be interdimensional Cybermen.
* Army Of Ghosts" has Torchwood attempt to harness the energy of an opening in the fabric of spacetime 600 feet above London. They believe that this will make Britain truly independent. As a consequence, the ghosts start coming through...
* "Army of Ghosts" idea. Cue several million Cybermen from an alternate universe invading Earth through the crack.
* "Army of Ghosts": Minor characters Gareth and Addie run into the Cybermen hiding in the building after slipping out for a quickie.
* "Army of Ghosts" pipe the picture from it to a screen at their headquarters just in time to see the TARDIS dematerialize.

* "Army of Ghosts": The Doctor, distracted by the presence of the Void Ship, fails to shake hands with Rajesh Singh when offered.
* "Army of Ghosts": The Doctor pretends to the Torchwood Institute that Jackie Tyler, Rose's mother, is Rose after having undergone this. Jackie is not amused.
* "Army of Ghosts": The Doctor strides out of a Torchwood lab and heads left. Yvonne Hartman immediately says "No, Doctor" and he heads right.
* "Army of Ghosts": The Doctor uses this very effectively against Yvonne Hartman. After practically screaming at her to stop breaching dimensional barriers with no effect, he... suddenly stops, says "Okay" and pulls up a chair to watch. Yvonne calls the "ghost shift" off.
* Army of Ghosts": The Doctor, when the head of Torchwood finds out that the woman he'd claimed was Rose Tyler is actually Rose's mother.
* "Army of Ghosts": The Preachers turn up packing enormous guns designed to kill Cybermen. The Doctor modifies some of them so they'll be semi-effective against Daleks, as well.
* "Army of Ghosts": to defend the British Empire against Aliens and taking their stuff to make them stronger. The United Nations Intelligence Taskforce / Unified Intelligence Taskforce (U.N.I.T.) has a similar goal.
* "Army of Ghosts": When the Doctor tells Torchwood Institute head Yvonne Hartman that they'll never get inside the TARDIS, she just smiles and retorts "Et cetera".
* "Army of Ghosts", where he tells the head of the Torchwood Institute to stop punching holes in reality. She brushes him off as being too alien-supremacist... then, when the Doctor sits back to watch, relents and admits that she should listen to the guy who is not only named in her organization's charter, but has a very long pedigree that she's very well aware of about being right on these matters...
* Army of Lawyers: Group of lawyers (or "legal team", alternatively) used as an intimidation tactic.
* Army of Shadows: Another French film about the Resistance, directed by Jean-Pierre Melville, an actual Resistance fighter. He was critical of romanticized depictions of the resistance, and called out some of his countrymen for falsely claiming, after France was liberated, to have been resistance fighters.
* Army of the Ages: An army of warriors from different times, except they're not all famous.
* Army of the Dead, is centered around him and his previous heist team.
* Army of the Dead — Horror/action film series. 2 films since 2021.
* Army of the Dead: The opening scene features a honeymooning couple on their way to Vegas. The bride gives her new hubby a blowjob while he's driving... which distracts him enough to smash right into a truck coming from Area 51, resulting in a fiery explosion.
* Army of the Dead. There's also a bunch of topless showgirls chasing a guy and rabidly devouring him in a jacuzzi in the opening credits.
* Army of the Dead: the zombies in this film come off as surprisingly fast, smart, agile and organized when the team faces them, as noted by Lily "The Coyote".
* Army of the Sun. Interestingly, the only intelligent shark in the novel is pretty peaceful and bears humans no ill will and is a mentor to a young intelligent orca. For reference, orca's kill sharks for sport.
* Army of the Sun. The sharks actually become deeply philosophical, benign creatures, able to open portals from one planet to another, as long as both feature large bodies of seawater.
* Army of the Sun), they killed off many humans and enslaved many others. Those who survived and were not enslaved are still treated as second-class citizens (if that). As such, most traveling humans tend to pass themselves off as members of one of these human-like races, as aliens have no beef with them.
* Army of the Sun trilogy, aliens refer to humans as "ersers". Subverted in that they know exactly where the term comes from.
* Army of the Sun trilogy, this is the main theory (although there is little actual evidence) behind the similarity between humans and three human-like races. Each one looks like a "sub-race" of Earth: Caucasians, Africans, and Asians. It is also mentioned that an ancient wall carving on the "Asian" race's homeworld is the name

of a legendary figure in their culture, whose name sounds a lot like "Genghis Khan." This is all mentioned as a side-note, however, and is unimportant to the main storyline.
* Army of Thieves and Whores, rather than well-trained army that was seen as an honorable path in life for anyone like it used to be.
* Army of Two, after fighting through a cartel compound only to find the girl they were hired to rescue dead, Rios opts to save another girl they find, while Salem just wants to leave.
* Army of Two both wear metal metal painted facemasks, which actually have some practical applications in the game; one of their melee attacks is a simple, brutally effective headbutt, and if an opponent punches one of them in the face, he recoils, shaking his hand in agony, letting them set up to finish them off.
* Army of Two features four NPCs who sell the characters their armory. Of those four, only Cha Minh Soo has any relevance to the plot; the rest are nothing more than portraits. They could have been rolled into Cha Minh Soo's character and nothing would have changed.
* Army of Two, flamethrower-wielding enemies function as minibosses, and can only be killed by shooting their fuel tanks. A variation uses a grenade launcher instead, requiring you to shoot the 3 grenade pouches hanging from their belts.
* Army of Two game end this way. You either choose the "bad" option, or you choose the "good" option...except that the guy you gave up some advantage to save turns out to be corrupt AND selling weapons to terrorists. Or a guy you choose to save instead of killing in exchange for money is later killed in a plane crash accident.
* Army of Two game has Salem and Rios working together to take on Al-Qaeda terrorists.
* Army of Two goes for the third. One cutscene is for 9/11 and a lot of the game has you fighting al-Qaeda, who are even mentioned by name.
* Army of Two has heavily armored enemies that can only be hurt from behind. The general strategy is to use the game's aggro mechanic to get them to focus on one while the other sneaks around behind them.
* Army of Two, if one player gets shot down, the other has to drag his ass off the battlefield and into a safe place to resuscitate him. The banter between Salem and Rios makes this extra funny.
* Army of Two It ends about as well for the robber as you would expect.
* Army of Two joined the Army. He was in a gang as teenager and decided to enlist rather than serve time in jail.
* Army of Two of lifeboats clearly visible in the background graphics. One wonders if they game designers simply didn't know what they were (the large pill-shaped things around the lifelines) or just ignored them for plot purposes.
* Army of Two series began their careers as US Army Rangers who decided to become private military contractors (which tend to be Elites who get paid more and don't have to worry about a government defense budget and NATO "lowest bidder" equipment standardization).
* Army of Two: The game had already pissed several fans off by dancing around the fate of a character from the previous two games (I.E. not revealing whether they were alive or just missing) and its major plot twist halfway through the game (which many felt was completely nonsensical and utterly destroyed the characterization of previously good character for no good reason), and then to top it off the final scene throws out some vague hints towards a sequel, which given the games disappointing sales and its studio going bankrupt will likely never happen.
* Army of Two. The guys attempt this by ramming a bulldozer into a mall, but it just causes the entrance to collapse into an impassible wall of rubble.
* army of Unsullied is lethal due to their discipline and tactics making up for their lack of physical strength.)
* Army Rangers may go on to complete Special Operations training and join Delta Force. Beyond that, it's all secret hush hush type stuff.
* Army reservist. In one episode Gil mentions wanting to bring her to an office function. When the other characters express surprise at her existence, Gil

complains he has often spoken about going home to her. The others, assuming he was gay, thought he was talking about his cat.
* Army Scout (Traversing the front lines to bring back intel to the main crew. May be redundant with Communications Officer or Security Officer)
* "Army Tries to Temper Heat Risks Facing Troops" by Joe Gould, Staff writer. "Then on July 29 at Fort Bragg, Sgt. Joshua Mann was running with his unit, Company C, 1st Battalion, 504th Parachute Infantry Regiment, when he collapsed, apparently from a heat-related illness. The 22-year-old airborne infantry team leader from Winside, Neb. died the next day at a post hospital."
* army utterly devastated by Coalition forces, Ali disappeared. He wasn't seen or heard from until 1998, seven years later, when he turned up in Norway. He returned to Kuwait in 2000 where he was convicted of treason.
* army was so successful was due to him teaching them basic tactics like shield walls and rotating out men on the front line between charges. Such tactics allow his men to rather easily defeat a force five times their size due to the latter's lack of discipline. He also teaches what he knows of sanitation and modern medicine (such as digging latrines downhill from the camp to cut down on sickness).
* Army what the Japanese government had in mind when it commissioned this film.
* Arn Anderson for example - but modern wrestler autobios are more true to the business.
* Arn Anderson's Disneyland tapings in 1993 caused considerable havoc with the company's continuity that year.
* Arn Anderson seen without glasses except for his wrestling matches. Like Hansen and Duggan, this is attributed to his real-life eyesight problems.
* Arn Anderson. The Andersons were usually billed as a team of brothers, though Ole and Arn were sometimes billed as uncle and nephew due to Arn being the youngest. The four had nothing in common at all, other than a passing physical similarity, and only Gene was actually named Anderson in real life.
* Arn Anderson with a pair of scissors in a real-life fight and as someone who'd rather play softball than wrestle, but he's also well-known as a fluent Angrish speaker when cutting promos. After all, he has half the brain that you do.
* Arn and Ole Anderson were billed as anything from nephew and uncle to cousins to brothers.
* Arnaud Tsamere: A French surrealist comedian who has worked in television and on stage.
* Arne Anka: After picking up an STD after a drunken one-night stand, Arne complains that the government should start putting warning labels on the alcohol bottles just like they do on the cigarette packs, except about the dangers of mixing alcohol with the choice of hookups.
* Arne Anka. Arne had his friend Krille keep his porn stash after he was married. When Arne was divorced and tried to get it back, he was horrified to learn that Krille's wife had thrown them out when she discovered that they were lying in a different order than usual.
* Arne Anka: Arne seems to belive this, with most of his work being either incredibly confusing, or dark and depressing.
* Arne Anka cartoon ducks?" but then solved the problem by changing the look of Arne, particularly the beak. Arne kept that look for a few pages, but then he bought and put on a toy duck beak. That way, whenever Disney's lawyers complained, Christensen could point out that Arne wasn't really a duck, the toy beak just made him look like one.
* Arne Anka, which is partially biographical and based on the artist's life as a Starving Artist in the early '80s, though unlike him, the main character Arne is a poet and writer rather than an illustrator. Arne's best friend Krille is a bit more successful, being a semi-successful director, but still often had money issues.
* Arne Nordheim, honored contemporary composer of the experimental variety, was assigned an "honorary compartment" by the state of Norway for his achievement. This meant he had to move his costly Steinway grand piano from his flat on the fifth floor - out of the window with a cable and a lift. The cable broke, and the grand piano crashed to the ground. The man behind the wheel was baffled when the composer

showed up in the window with this comment: "Did you hear that sound?"
* Arnica montana) got its name from the belief that it could repel werewolves, or its extract could immunize a victim against werewolf bites, which would infect them into becoming a werewolf. Its comparative rarity helped maintain its curative legend.
* Arnie again: Douglas Quaid pulls off two sickening neck snaps in the original
* "Arnie" doesn't even try to be subtle about it (although in his case, he's a pastiche of Sylvester Stallone, despite the name).
* Arnie goes stark raving mad when he thinks Arnold was trying to steal his girl Lulu at the end of
* Arnie is a victim of this. Many didn't get its sly humour on release, which led to the film getting a bad rep as just a dumb action/fantasy comedy, when in actuality it was a spoof of the action genre.
* Arnie Pie says "Tell my wife I love..." before his helicopter crashes.
* Arnim Zola performs them as well, though in the pursuit of things like improving the Extremis virus.
* Arnim Zola, the scientist from. Since this happened back when computers were still reel to reel, his brain requires a truly massive amount of storage space, in both the literal sense and the technological sense.
* Arnold again, in "Benchwarmer", with a basketball game. This time, he comes off the bench after being benched for several games for not following his coach's ridiculous strategy and scores game winning points from a set play.
* Arnold and Gerald get in a fight. Phil and his best friend had a similar argument in their youth.
* "Arnold Betrays Iggy": Arnold makes Iggy a laughing stock of the school when he indirectly reveals that Iggy wears bunny pajamas. After a series of favors and Iggy remaining mad at him, Arnold does Iggy one last favor and wears the same bunny pajamas on live television, making him the new laughing stock instead of Iggy. The episode ends
* Arnold can only move his eyes when he is turned in a half-man/half-plant hybrid in
* Arnold continued to write for school newspapers throughout the rest of the series, and the occasional episode was dedicated to his developing journalism career. For instance, the last-aired episode of the series — "The Front Page," aired March 7, 1986 — saw Arnold go undercover to confirm suspicions that a popular athlete was using steroids.
* Arnolde the Centaur's magical talent is creating an area where magic works, which is useless in Xanth but allows magic to work in Mundania — unless he holds a stick of reverse-wood, which reverses his talent to create an area where magic is suppressed. Unlike Grey, he can't turn it on and off (except by dropping the chunk of reverse-wood).
* Arnold. has a tendency to make you fat. Hard to say which is more responsible in Arnie's case.
* Arnold himself also gets misnamed at times, usually by characters that don't know him too well.
* Arnold, in "Eating Contest", wins after the only remaining competitor falls face first into a bowl of ice cream.
* Arnold is also regularly associated with blue, due to his jumper and hat. Helga has a crush on him and they're arguably the two main characters.
* Arnold is trying to scam the company and put the article on Samantha's desk after the deadline to frame her and get her fired. Samantha then has to gain evidence that she didn't do anything wrong
* Arnold Lobel that writing about the inseparable title characters was the beginning of his coming out.
* Arnold names after a fallen friend he met during the events of the seventh main installment.
* Arnold Quis, aka Agent Spider Monkey, is this to Dib in the Swollen Eyeball Network, as Dib barely knows he exists and doesn't know just how much he hates him.
* Arnold Rimmer's Esperanto: "Could you send for the hall porter, there appears to

be a frog in my bidet."
* Arnold Ripner threatens to sue a lobotomist free of charge should he try to operate again on a patient who was rendered mentally incompetent by his amygdalectomy.
* Arnold Schoenberg: invented twelve-tone serialism. One of the first people in the atonal genre and the springboard for the later total serialism.
* Arnold Schoenberg, the composer illustrates the two lead characters' differences by a radical break with the basic convention of opera:
* Arnold Schwarzenegger, a film where he spends half his time screaming incomprehensibly at small children.
* Arnold Schwarzenegger. Although his character is a retired Special Forces colonel, Arnie still manages to kick enough ass for several movies.
* Arnold Schwarzenegger and undoes the premise that they were Skynet's creation to begin with.
* Arnold Schwarzenegger are secretly Satanists. And not the fun, pot-smoking free-love Satanists either, but the "murder witnesses and abduct women" kind.
* Arnold Schwarzenegger). Arnold has admitted he loves to spend Hollywood's money. Almost all of his salaries since the first Terminator movie rose from $11 million to $25 million.
* Arnold Schwarzenegger, as a nuclear warhead goes off in the background.
* Arnold Schwarzenegger as Mr. Freeze in the critically panned 1997 film
* Arnold Schwarzenegger at the 0:17 mark. He also did it in an outtake of his documentary— "Pumping Iron".
* Arnold Schwarzenegger bulky, particularly next to co-star Sally Field).
* Arnold Schwarzenegger Ed O'Ross (from Pittsburgh) tells Arnold's character to "Go to arse" (could be translated as "Go to Hell") in a perfect Russian with Georgian accent. Which was the only correctly pronounced Russian phrase in the whole movie.
* Arnold Schwarzenegger. "Everything I have, my career, my success, my family, I owe to America."
* Arnold Schwarzenegger, from energy drinks, noodles and beer to cars, DirecTV and anti-piracy. Schwarzenegger was one of the first celebrities to take advantage of this phenomenon, and many others followed suit. One example is the trope picture above for Alinamin V energy drink.
* Arnold Schwarzenegger. He actually shows some emotional depth in the film.
* Arnold Schwarzenegger, Hercules' date in Central Park is interrupted by a bear that has escaped from the zoo, which Hercules wrestles into submission.
* Arnold Schwarzenegger includes a homicidal hockey player, a chainsaw-wielding biker, an opera-singing lightning-man, a pyromaniac with a jetpack, and a wrestler/fitness TV show host. Although, he doesn't confront the latter for real.
* Arnold Schwarzenegger interestingly showcased a video phone call with an automated machine... for 911 Emergencies.
* Arnold Schwarzenegger is trying to determine if what is happening to him is real, or if it is memories that have been implanted in his brain because he's on a console.
* Arnold Schwarzenegger, later became a major film star and politician)
* Arnold Schwarzenegger led that had committed contractor fraud from Cyrex to Cyrez, as it turned out there was a real corporation, microprocessor manufacturer Cyrix, with an incredibly similar name to what they originally used.
* Arnold Schwarzenegger of this trope, in which Arnold plays a scientist who is willing to get pregnant for research purposes. The movie is a comedy, but the pregnancy is played surprisingly seriously here, leading to some emotional development in Arnold's character.
* Arnold Schwarzenegger possesses people to disguise himself... while being very indiscreet.
* Arnold Schwarzenegger, saying that the person who threw the egg now also owes him bacon, because you cannot have eggs without bacon.
* Arnold Schwarzenegger, since when said in a Yiddish accent his last name sounds exactly like the offensive (and somewhat redundant) Yiddish phrase for "black nigger."

* Arnold Schwarzenegger's roles usually don't bother explaining his accent, but some explanations differ from his actual Austrian-American background:
* Arnold Schwarzenegger's short-lived attempt to start a new bodybuilding organization to rival the IFBB, failed partially due to the pressure Vince felt to enforce drug testing), and as soon as the IFBB realized that they weren’t under serious government scrutiny, they quietly stopped testing for anabolics. The rules on the books still say that they reserve the right to test athletes at any time for banned substances, but in practice they don't test for anything except diuretics, and when they do pop someone for diuretic use it's just because they got unlucky or weren't smart enough to not get caught. If anything, the Mass Monster Era that we've been in since the 90s has gone in the direction of increasing drug use as the size game becomes more and more competitive.
* Arnold Schwarzenegger's son with the cleaning lady. He didn't know Schwarzenegger was his dad until the press got hold of the story.
* Arnold Schwarzenegger take aim at him while chasing him on a motorcycle.
* Arnold Schwarzenegger that the battle between the T-800 and T-1000 was the first time that any Terminators had fought each other. This information never appears in the film and contradicts several other sources which state that reprogrammed Terminators fighting for the resistance was a common occurrence — so common that the machines created various ways to counter it.
* Arnold Schwarzenegger. They're a bit of a subversion in that they're fairly competent when they have to be (skillfully slaughtering their more evil counterparts), but they're still pretty stupid much of the time.
* Arnold Schwarzenegger - was Governor of California. He also was a competitive bodybuilder.
* Arnold Schwarzenegger, when Matrix takes a bite of the sandwich Jenny makes:
* Arnold Schwarzenegger when the classroom full of children drives him to it.
* Arnold Schwarzenegger, which included working on construction in the off-hours, saw Arnie become the greatest bodybuilder of all-time, an action film hero with the biggest paycheck in Hollywood, and Governor of California.
* Arnold Schwarzenegger who won 7 titles, the other being Lee Haney. However, he paid a heavy price by suffering a back spinal cord injury which has resulted in 7 surgeries and counting in order to rebuild his back and prevent him from becoming paralyzed. Nowadays, he walks using crutches and suffers from constant pain, but tries his best to keep a positive attitude.
* Arnold Schwarzenegger with combined DNA from six athletic and scholarly fathers. Though the traits were obviously not distributed fairly.
* Arnold's second voice actor, Philip Van Dyke wasn't comfortable singing for "What's Opera, Arnold?" so they had Arnold's previous actor,
* Arnold, where a corpse's gold-digging wife (don't ask) hops into a shower with her lover... only to have the walls close in, crushing them to death.
* Ar nosurge do not act like video-game characters, a system called Interdimend connects the player to protagonist Delta as well as the robot Earthes. The characters acknowledge the player and occasionally refer to the fact that the player is viewing the action through the screen and is pressing buttons.
* Arn: The Knight Templar also appears in the films as Jarl Birger Brosa, but his character is not related to the characters his sons play.
* Arn: The Knight Templar: Harald, Arn and Eskil discuss the concept. Harald claims Arn is the greatest swordsman in the world. Arn claims that there were several Templars who were better than him. Harald concedes the point but also states that Arn survived things that killed them. Arn counters that his martial skills had nothing to do with why he survived. Eskil thinks living swordsmen are better than dead ones.
* Arn: The Knight Templar has a pretty neat subversion-inversion towards the end.
* Arn: The Knight Templar series, Cecilia patiently waits for Arn for more than twenty years while he's off making penance as a knight templar. Slightly subverted since she too has been sentenced to make penance and spends twenty years at a convent, but it kicks in for real once she's done her time and has to wait to see if he will ever return home.

* A Road Less Traveled from Greek Winter Media is a post-apocalypse visual novel series involving the Traveler, a mutant artifact hunter/gunslinger who's adventuring in the wastelands a few hundred years from now.
* A Road Less Traveled, it's a post-apocalypse future where the results of the nukes are two types of mutants. Mutts are just ugly and physically twisted mutants, though they are a danger in the wastelands as they congregate in large numbers. Anyone can become a mutt if they received enough radiation. The other type of mutant are the Shapers, these mutants are indistinguishable from normal humans, except they manipulate energy and may have psionics too (depends on breeding). Your character is a latent Shaper who has telepathy and electricity manipulation.
* A Road Less Traveled series by Jeffrey Dean and Greek Winter Media was originally video games/visual novels for Android. They feature a mutant gunslinger/artifact hunter who's had some time-travel shenanigans and is reminiscing their story to an audience in the distant past.
* A Road Less Traveled, the hero gets a choice of starting weapon - a shotgun, an Uzi or a Colt Single-Action Army revolver. Of these, the weakest weapon is the revolver (to make up for this, the Technocrat Guild gives you some extra medkits). The hero only gets his favourite set of revolvers (they were part of his graduation test to successfully refurbish them) when his instructor gave them to him.
* A roadshow and an appearance at a wrestling match don't actually count, but it's worth noting that 1.
* A roadside restaurant in Florida next to I-4 had gone out of business, leaving various signs around. One of them advertised truck fuel, right in front of the off-ramp from the passing interstate. Over time, half the sign fell down, and in large yellow letters on a black background, people would be greeted with DIE
* A robbery technique involved calling a bank manager's wife at home and convincing her not to answer the phone for some reason (e.g. claiming to be a telephone company working on the line, which would cause the phone to ring at random). They would then call the bank manager and use this trope, telling him to fill a suitcase full of money and meet them in ten minutes or else. The manager would try to call home and of course, when there was no answer, he would assume the worst.
* A Robinsons fruit juice commercial has a little girl rope her father and brother into a tea party while in the garden. She pours water from a teapot to serve as drinks but the son sneaks some Robinsons into each cup to make it taste better. Then the girl
* A robot has been programmed to not obey non-human commands tell her the program responsible, and it disobeys. Sam cuts to the chase and orders it not to treat the two of them as human.
* a robotic cook who is equipped with burners that can fry entire hordes and cleaver-throwing skills.
* A robotic toilet the crew is throwing away offers them "Happy Poopy Time" if they spare it. Fry simply says "You know too much."
* a robot; it tends to range from annoying to violent, depending on how humans react to it.
* "A robot named Qwerty. wrote the first. of his epic. rap yodeling. operas. It was then. I knew conflict between [robots and humans]. was inevitable." He didn't force anyone to listen to it. Just writing it was enough to justify genocide.
* A robot prostitute is a significant supporting character in the webcomic
* a robot who achieved sentience that the scientist would think that. The scientist explains that that's just kind of how advanced intelligences operate.
* A rocket scientist describing the chemical properties of chlorine trifluoride, one of the most dangerous chemicals known to mankind (a highly reactive and powerful oxidizer), casually lists several things it will instantly set on fire if it touches: wood, cloth, sand, water, glass,
* A Rockhoof and a Hard Place": To be fair, Rockhoof does use the door to the classroom... it's just that with his large bulk and the shovel on his back, he also resizes the doorframe at the same time. He later bursts through the wall of the same classroom when he believes there's a fire on the second floor, and evacuates

the students through the hole.
* "A-Rod Scored a Touchdown in Yankee Stadium" when Rodriguez scored, imitating the home-run calls of long-time Yankees play-by-play announcer John Sterling.
* A Rogers commercial had a woman start off saying, 'Hi. This is our family — and that's our home number.' They cut to a shot of the number...which was a 555 number.
* A Rogue-friendly prestige class in v3.5 called Invisible Blade applies this trope more narrowly to combat. The rogue becomes incredibly skilled at fighting with
* a roll of thunder, so he switches to "... a flying ice-cream truck." A shadow then appears over him, accompanied by chiming.
* A romanced Blackwall calls the Inquisitor "my lady." A romanced Cullen does too, but not nearly as often.
* A romanced Miranda will tell Shepard she loves him right before she dies (if she dies) in the Sanctuary mission.
* "A Romance with the Grave" by The Vision Bleak. Literal example. 'Ruthless lust without disgust, dirt and dust, a romance with the grave'
* A romantic hike Patrick arranges for David turns into them intertwining grand romantic gestures.
* A romantic scene with an umbrella happens off-screen between Yukari and Kouichi in
* A Romulan's formal name is composed of a given name, a locative indicating their place of origin, and a clan name which is passed matrilineally. So, for example, Areinnye ir-Menhei t'Sei means "Areinnye, from the Menhei region, of the clan s'Sei." The prefix on the surname is t' for women, tr' for men, and s' when speaking of the clan itself.
* Aron and its relatives eat iron, which makes them a nuisance to railroads.
* Aronofsky's. She is even carried by Him in a fashion similar to how the Virgin Mary is said to have held Jesus when he was removed from the cross.
* Aron Ralston replaced the arm he cut off (having gotten it trapped under a boulder) with an ice pick.
* Aron Ralston, the mountain climber who cut his arm off below the elbow to free himself after being trapped by a boulder for five days, has the option of attaching a hook, an enhanced plastic hand, or a
* a rookie Auror runs off to throw up after witnessing Harry's severely-abused state.
* A Room For Two is about two girls with completely opposite personalities becoming roommoates and maybe more.
* a room in a dungeon with a mini-boss or boss fight, the door often closes and locks itself behind him.
* A room with a cable car in it is labeled Cable Car Room. The label is where everyone who can see the sign can also see the cable car.
* "A Room With A Moose" would also qualify. No one can understand how the moose is meant to be a menace, not even Dib, who points out it's a big moose, but really, just a moose...at which point Zim sends several walnuts into the room, and Dib sees the moose eating the walnuts...which horrifies him for some reason. Confusing to the audience, but evidently effective against Dib.
* A Room with a View, Lucy has a choice between Cecil, who is of her own class, and George Emerson, who is of a lower class (and particularly prone to behaviour inappropriate for Lucy's class).
* A rope bridge over a river of lava serves as the entrance to Atlantis in Disney's
* A rope walks into a bar and orders a drink. The bartender says, "I'm sorry, but we don't serve ropes here." So, the rope leaves. He meets another rope, who says, "I can get that bartender to give me a drink." The second rope enters the bar and orders a drink. The bartender says the same thing he said to the first rope, and the second rope leaves. The first rope is waiting outside for her, and when she leaves, the two ropes see a third rope, who says, "I can get that bartender to give
* A Rose And A Thorn, Amy is stood up by Sonic in the first chapter. She meets

Shadow while she's walking home in the rain, and they end up having sex at her place.
* A Rose by Any Other Name and its impact on both society in general and those who are victims of sexual violence, uses a rose dripping blood in its intro.
* "A rose by any other name smells just as sweet." - it's actually: "What's in a name?
* A Rose for Emily cracked, but she might have been cracked well before falling in love.
* A Rose for Emily paints the image of Emily in the background, and her father at the door with her back to her, bullwhip in hand. It is implied this is why she never got engaged.
* A Rose in the Twilight, like the main character Rose, cannot die. No matter how gruesome their death is, they will simply reappear in another area as if nothing happened. In fact, part of the game requires Rose to be placed in death traps to advance.
* A rough estimation of a god's power can be determined from their Essence stat. The gods of small things usually reside in Creation and have a low Essence score (1-3), while gods of large cities and concepts usually have Essence in the 4-7 region. The highest-ranking gods, the Celestial Incarnae, have the maximum Essence rating of 10. However, given the nature of the
* around 150 "friends list" several times that number; a source of minor contention for skeptics of social media.
* (around 170 when they first meet) did they start having anything approaching a real relationship.
* Around 1800 German poets were hotly debating whether or not one should write sonnets in German (it being a form originally created in Italian and according to some better suited to the Italian language). Johann Heinrich Voss, best known for translating
* Around 2000, The Truth ran several anti-smoking PSAs that began as commercials for some kind of "way out" product (for example, a brand of soda called "
* Around 2003-2004, Disney Channel and Toon Disney usually used any holiday where kids would be off from school as an excuse to play
* Around 2004, former WCW wrestler Ernest "The Cat" Miller made his WWE debut, basically a comedy
* Around 2008, a group of college students in Florida found themselves offended by provocative,
* Around 2014, Time Warner Cable was looking to hit AT&T U-verse on the fact that their service at the time could "only" show live TV on
* Around 2016-2017, Common Sense Media released a revamp to their age ratings, which resulted in several movies/games that were rated 18+, such as
* Around 2019, Toad become a tertiary character, as he was displaced by later characters who often left him
* Around 500,000 years back, the Dreiman suddenly vanished and the remnant Fenrias nations all collapsed, to be replaced by the Soia. They were more advanced than the Dreiman and, like them, seem to have come from outside known space. They traveled in massive and heavily armed artificial moons that they used to enforce their rule and created numerous genetically engineered species, referred to as the Soia-Liron species; most were hyper-efficient food plants and animals, which are still found on multiple worlds, but at least five sapient species are known from Soia sites and may also have been created in this manner — the ancestors of the modern Barsam, Neridi and Loroi and two now-extinct species. The Soia are thus believed to have been a multi-species civilization, although whether these species were naturally occurring ones from a single world, artificially created or a mix of both, as well as whether any of these were the "true" Soia, isn't really clear. The Soia empire collapsed 275,000 years ago, seemingly in a devastating conflict that subjected every settled planet to devastating orbital bombardment and caused every sapient species to regress to the stone ages — galactic civilization is technically still climbing out of these dark age.
* Around 500BC, the Etruscan King Porsena besieged Rome. Gaius Mucius snuck out of

the city to assassinate Porsena while he was paying his soldiers. There was one problem: he had no idea what the king looked like and there were
* Around 800 years prior to when First Edition takes place, Arazni (a paladin who was the herald of the now dead god Aroden) was turned into an evil
* Around Chapter 10 (Eirika's path), if you rescue Innes the Archer with his Pegasus Knight sister Tana, Innes almost immediately tells her to "stop playing soldier and go home". This is explained later in their supports as being a part of Innes'
* Around July of 2012, the CEO of Chick-fil-A, a chicken-based fast food chain, made a comment on the radio stating that he believed in "the Biblical definition" of marriage. Combined with the millions of dollars he has donated to anti-gay organizations, including several that are labeled hate-groups by the Southern Poverty Law Center, this caused a massive uproar across the United States and created a divide between the supporters and the protesters. The people that were appalled by the CEO's comment staged protests and boycotts of the fast food chain while supporters went out to eat at every Chick-fil-A restaurant to show the CEO their support. Some cities are also banning the fast-food chain from setting up shop in their city because of the controversial comment. A few months later it was announced that the company would stop donating to anti-gay groups a few months after the initial kerfuffle... and then it was discovered that they lied about
* Around late 1700s to the 1850s there was also a massive craze in Europe for Chinese-style (Chinoiserie) art and especially porcelain.
* Around mid 2020 the YouTube app tweaked how you play/pause video. Before one had to tap once to bring up the controls, then tap again to actually play or pause the video. The change made it so the video will play/pause as long as you tapped somewhere around the middle of the video, but this also meant playing and pausing is now essentially a single tap instead of a double tap, causing users to inadvertently undo their action.
* Around My Head". A man digs up his dead girlfriend. It's actually very funny, especially the ending:
* Around November 2012, there would be two ads for Nenuco products in the same break: one for the doll line in general, and one for a school playset. Around September of that same year, an ad for a Cinderella dress and vanity set played a lot, along with the CuddleUppets ad.
* A Round of Drinks for the House with a $100 bill. His father Frank calls him out for this with the implication that not only was it suspicious but that it was mean-spirited to throw money around in front of down-on-their luck working men.
* Around one hundred and fifty Challenger IIs are scheduled to by upgraded to the new Challenger III spec, featuring a ton of upgrades including a new turret with a smoothbore Rheinmetall 120mm cannon allowing commonality with other NATO tanks, an improved hull, upgraded weapons sights and control systems, active protection systems etc. for the next generation battlefields.
* Around second place or so are the various other important smugglers, and government agents are somewhere around twentieth. Unless they're
* Around some US states, there are trucks that stop at bridges with the message: "Jesus Christ is lord, Not a swear word." Some people don't realize that they are for the Jesus Christ is Lord Travel Center, located at Amarillo, TX.
* Around summer 2017, Comedy Central re-rated the episodes from seasons 1 to 20 from TV-MA to TV-14-DLSV (for moderate-to-strong suggestive dialogue, offensive language, sexual content, and violence), with the exception of particularly controversial episodes such as "Trapped In The Closet" (due to gun violence from R. Kelly, the innuendo about Tom Cruise being gay, and the general mocking of Scientology) and "With Apologies to Jesse Jackson" (due to racist content and discriminatory language). Unlike the syndicated editions, which are also rated TV-14, these episodes are not edited for content, merely rated TV-14 because the TV-MA rating is only allowed on programs that air after 10pm. The reasoning for this change is obvious:
* Around that time there was another cheerful jingle written in the German language:

* Around the 13th century, Chess was considered a game of the devil, and forks were a devil's instrument. The fork argument makes some sort of sense; it looks like a pitchfork, and the devil loves those. But chess? Some also believed that it encouraged gambling and were offended that it allowed commoners to kill kings.
* Around the end of August to the beginning of September in 2021, Great Eastern Entertainment announced some new plushies for the
* Around the fifth or sixth season, Gary Burghoff had his contract changed to limit his appearances as Radar to 13 episodes of each 24-episode season. During these episodes, Radar was frequently said to be "away on R&R".
* Around the Internet there is an image of a college newspaper reporting on the Republican Party disagreeing on President Obama's economic stimulus package, deeming it too large. Or, as the headline puts it, "REPUBLICANS TURNED OFF BY SIZE OF OBAMA'S PACKAGE".
* Around the Las Vegas Crime Lab, no one calls Supervisor Russell Dienbenkorn, as he tells new old colleague Finn. It's D.B. Russell.
* Around the Moon states through his characters his conviction that the Earth is getting colder as its core is dying, and that in a few hundred thousand years it will be as cold as the moon. Earth's core is indeed getting colder, as the heat is at least partly produced by decay of radioactive material. However it would take longer than the current age of the universe for it to cool down completely.
* Around the same time as Cassel, the Jewish German-born French composer
* Around the same time, Avril Lavigne's "Don't Tell Me" was on their hits rotation regularly. Due to their strict
* Around the same time Book was defending the Leader, Jennifer was suing Tony Stark for injecting her with power-inhibiting nanites that made it impossible for her to transform into She-Hulk. The problem is that, while she could theoretically sue for tortious battery, Stark would have an unbeatable self-defense defense: Jennifer, in her She-Hulk form, was beating him up at the time he injected her. At the very least, Stark would almost certainly have qualified immunity, since he was acting in his capacity as director of S.H.I.E.L.D. at the time. Stark would almost certainly win on dismissal or summary judgment, but the comic presents Jennifer as having a real chance of winning a big judgment.
* Around the same time, comedian Bill Minkin created an impersonation of him as
* Around the same time, it was revealed that the same spoiler-tagged character was responsible for the mass dereboticization in "The Last Robian". This explanation was widely seen as lazy.
* Around the same time period, Florence Nightingale and her trainee nurses were promoting the idea of sanitation (and hand washing) to reduce mortality rates among patients. However, a lot of doctors were reluctant to practice hand washing because it was promoted by women. Florence and her nurses were not so much mocked, just quietly ignored.
* Around the same time that the US military was working on the ARPANET project that later birthed the civilian internet, the Soviets were also doing research into computer networks, as
* Around the same time the 1998 re-dub of The Little Mermaid was produced, an alternate Austrian-German dub was also made for distribution in – You guessed it – Austria. Superficially identical to the 1998 re-dub but with different voice actors (again) performing their lines in an Austrian dialect. In the decades that follow, the alternate Austrian dub has only sparcely been re-published, notably in the 2006 Special Edition DVD.
* Around the tail end of the 1980s, Mike Gonzalez of Dark Angel was arrested while on tour in Germany because he supposedly vandalized a police cruiser. He actually wasn't responsible, however; according to Eric Meyer, the real culprits were several members of their crew, and Gonzalez was arrested because he was the only one with a passport and thus an easier scapegoat.
* Around the time Office XP came out, Microsoft ran a series of Flash cartoons in its website mocking the much-hated paperclip-shaped default assistant in Microsoft Word, and explaining how he was going away in the next version of Office (to the relief of the other characters).

* Around the time of its release, there was an online petition parodying this phenomenon by arguing against it on the basis that it was an
* Around the time of the 1988 presidential debates, Democratic nominee Michael Dukakis' campaign ran a series of ads known as the "Handlers", featuring actors playing members of the campaign of
* Around the time the legalization of marijuana started gaining real traction in some states, someone made a
* Around the time the Straw Hats depart Water 7, as part of their plan to recruit an unwilling Franky into the crew, they lure him to where the Sunny is docked by having the Franky Family steal his speedo, and passing it from person to person. Franky only gets it back after he joins.
* Around the turn of the century, Mercedes-Benz and McLaren collaborated on the SLR McLaren supercar. Production lasted for seven years. When it was time to create a successor, the two companies had different ideas for where that would go and they parted ways. Mercedes created the SLS AMG while McLaren followed up with the MP4-12C.
* Around the World in 20 Days has episodes that are five minutes long.
* Around the World in 80 Days (1956) includes scenes of Cantinflas bullfighting in Chinchón.
* Around the World in 80 Days (2004) all this really amounts to is showing off her ankle.
* Around the World in 80 Days (2004): Fogg and co. build one of these out of pieces of their ship in order to finish their journey on time.
* Around the World in 80 Days (2004), the villain makes a speech denouncing Queen Victoria in front of a horrified crowd. At the end he says, "She's right behind me, isn't she?" Her Royal Majesty is revealed.
* Around the World in 80 Days (2004) used a variant of this trope that involves turning the lights on and off via whistling. This eventually leads to another gag where Jackie Chan's character whistles in astonishment, accidentally turning off the lights in the process.
* Around the World in 80 Days added a lengthy bullfight scene to show off Mexican comedian Cantinflas's bullfighting skills.
* Around the World in 80 Days: After beating all 81 levels, you can start a new journey back in day 1 with all the score and lives kept from previous journeys. However, with every new journey, the timer is more strict and there are now rocks the game calls "debris" that can't be matched and even if they fall to the bottom of the game board, they respawn. Journey 7 maxes out the debris at 13 at once, at least.
* Around the World in 80 Days! American train passengers, not so much. Adventure ensues.
* Around the World in 80 Days around the knowledge that Fogg would interrupt anything, even a chase scene, if offered a tea break.
* Around the World in 80 Days (Burbank Animation) cut quite a bit of the book, such as Aodua's subplot, from the 48 minute film.
* Around the World in 80 Days (Burbank Animation), when Fogg claims that a journey around the world would be possible in only 66 days.
* Around the World in 80 Days ends the third to last chapter with Fogg concluding he has arrived too late and lost his bet, leaving him ruined. However, the penultimate chapter has him suddenly arriving just in time to win after all. As the surprised reader wonders how he pulled that off, the narrator explains that Fogg forgot to account for gaining a day after crossing the International Date Line, meaning he arrived early without knowing it and would never have realized his mistake in time if his love, Aouda, hadn't set off a chain of events that alerted Fogg he still had time to win the bet.
* Around the World in 80 Days, Fix does this to prevent Fog and Passepartout from reaching Buckingham Palace.
* Around the World in 80 Days, Fogg foils Mr. Fix by swiping his pants, causing Fix to run and hide, because being seen in his underwear is "undignified".
* Around the World in 80 Days is not only a Victorian lady, but she's also devoted

to her beloved Phileas Fogg and certainly nicer than her rotten uncle Lord Maze.
* Around the World in 80 Days, leaving the funny animal versions of Professors Lidenbrock and Aronnax standing around without much to do.
* Around the World in 80 Days, one figures into an attempt by Mr. Fix to trap Fogg in a carnival funhouse.
* Around the World in 80 Days, Phileas Fogg and Passepartout are sentenced to imprisonment in India for desecrating an Indian temple. Phileas Fogg pays a bail for both Passepartout and himself, then immediately proceeds to board a steamer leaving for Singapore.
* Around the World in 80 Days. Phileas Fogg and the ship he has commandeered are racing across the Atlantic to Liverpool. Unfortunately, the coal on the ship runs out. So Fogg buys the ship from the captain outright and then has the crew burn the cargo for fuel. When that proved insufficient, they rip out just about everything on the vessel made of wood, and throw the wood in the furnace. By the time Fogg reaches England the ship is nothing but an iron hull above the waterline.
* Around the World in 80 Days: Phileas Fogg gets a bullet through his hat when he and his companions escape after saving Aouda from ritual human sacrifice.
* Around the World in 80 Days. Phileas Fogg must travel round the world and along the way, he visits several important cities but he's actually absolutely uninterested in those mesmerising, unique places. His servant Passepartout is the one who admires the world's many wonders. The plan is to go from London to Suez via Paris, Mont Cenis and Brindisi, then to Bombay, Calcutta, Hong Kong, and Yokohama; from Yokohama to San Francisco and then to New York and from New York back to London. It must be accomplished in 80 days and the plan is to travel by rail or streamers. They also use an elephant, a small pilot-boat and a sledge with sails.
* Around the World in 80 Days, Phileas Fogg rescues the Indian noblewoman Aouda from death by suttee. She falls in love with him almost immediately, despite their differences and how he's hinted to be quite older than her. Because Phileas Fogg has such an unemotional exterior, we don't find out that he loves her until the end of the novel.
* Around the World in 80 Days, Sir Francis Cromarty points out a statue of Kali, and says that she is the Hindu goddess of love and death. "Of death, perhaps," replies Passepartout, "but of love — that ugly old hag? Never!"
* Around the World in 80 Days's original references to Utah's "Lake Salt City".
* Around the World in 80 Days. The plot centers around a race against time as protagonist Phileas Fogg attempts to win an argument that the completion of an Indian railway section would make it possible to circumnavigate the globe in eighty days. (This was in 1872.) Travel is mostly done by rail or boat.
* Around the World in 80 Days. Thirty people show up, but after a few minutes Passepartout is the sole auditor—and then even he leaves.
* Around the World in 80 Days, whatever description Inspector Fix was given about the robber, it's made obvious that it was not detailed enough, considering that he spent seventy-eight days chasing the wrong guy and in the meanwhile the rest of the London Police easily found the real thief.
* Around the World in 80 Days, where Fogg embarks on the trip just because other members of his club bet him it couldn't be done. Notable in that Fogg stands to win almost nothing from the bet - if he wins, his winnings cover his expenses, if he loses, it costs him everything - but is taking on the wager simply to prove that the trip can be made.
* Around the World in 80 Days whose disguises can fool Phileas Fogg’s companion Passepartout.
* Around the World in Seventy-Two Days, "a gray, misty fog hung like a ghostly pall over the city."
* around the world voyages, following prevailing winds and carrying different cargos on each leg: such as lumber from Europe to Africa, fertilizer from Africa to Australia and grain from Australia to Europe.
* Around the World with Auntie Mame and end up being the punchline to the whole England chapter.
* Around the World with Willy Fog, adds a Spanish character, Tico, to the

adventurers' party. At one point the heroes also encounter a Spanish balloonist, whom Tico enthusiastically greets as a compatriot.
* Around the World with Willy Fog and the travellers are forced to break their journey and take shelter in a log cabin until he has recovered.
* Around the World with Willy Fog. At one point, Dix and Bully are talking about finding a way to arrest Fog for (supposedly) robbing the Bank of England when Bully brings up the possibility that Fog may be innocent. When Dix challenges him on this, Bully says it is like when everyone thinks "the butler did it", but the real culprit turns out to be someone else, prompting Dix to try and enlist the help of Fog's butler and travelling companion, Rigodon.
* Around the World with Willy Fog, even impersonating Willy Fog himself on a couple of occasions! He isn't shown putting on the disguises or unmasking very often, but it doesn't matter as no matter the disguise, he always has that freaky glowing left eye that shows up even when he's wearing a mask, so the audience will know...
* Around the World with Willy Fog finds out that he imprisoned Fog under a false accusation and caused him to lose his bet, he is overcome by guilt and asks his put-upon sidekick Bully to punch him. Bully hits him twice—once for Mr. Fog, and once for himself.
* Around the World with Willy Fog, Fog tries to reunite Romy with the uncle and aunt she hasn't seen since she was a child. When Fog and Romy visit the address in Hong Kong where Romy's uncle and aunt were last known to be living, they are told Romy's uncle and aunt "left us some time ago". Thinking this means they have simply moved elsewhere, Romy asks where they are living now, only to learn that they were killed in a flood the previous year.
* Around the World with Willy Fog has Fog and his companions relaxing onboard ship and also has Fog and Romy taking a romantic stroll in Singapore. It takes place between the episodes set in India (which include an encounter with a bloodthirsty cult who plan to sacrifice Romy and try to kill the travellers when they rescue her, as well as Rigodon and Tico getting arrested for breaking a local law) and a three-part arc in which one of Transfer's schemes results in Rigodon and Tico becoming temporarily separated from Fog and Romy.
* Around the World with Willy Fog has Transfer pull a fake surrender on Rigodon while they are fighting on a runaway locomotive (which has been detached from the train it was pulling). The moment Rigodon lets his guard down, Transfer takes advantage of his lapse and quickly gains the upper hand. Tico then leaps into the fray and all three fall off the locomotive.
* Around the World with Willy Fog: Main antagonist Transfer the wolf is a sinister master of disguise hired by London Club to ensure Willy Fog lose the wager. Viewers can spot his disguise from the way his one eye gleams red.
* Around the World with Willy Fog: Phileas Fogg becomes Willy Fog, Passeport becomes Rigodon, Aouda becomes Romy, Inspector Fix becomes Inspector Dix.
* Around the World with Willy Fog: Princess Romy is a very young woman who lost both her parents in a typhoid epidemic when she studied in England. Then she was forced to marry an old Rajah and almost died with him as a sacrifice to goddess Kali. She hopes to be reunited with her uncle and aunt who she thinks will take care of her. Unfortunately, they also passed away and she's all alone in the world. This tragic backstory makes her even more adorable and sympathetic to the viewers. She's warm and kind, and almost always smiling and happy. She's very grateful to Mr Fog and his companions for rescuing her, taking care of her and allowing her to travel with them. They all adore her and she makes their world lovelier.
* Around the World with Willy Fog: Rigodon (a male cat) wears a blue suit, while Romy (a female cat) wears a pink-and-white sari.
* Around the World with Willy Fog: Rigodon demonstrates a talent for dual-wielding guns in the episodes where Fog and his companions are travelling across America.
* Around the World with Willy Fog, Sullivan hires a cunning master of disguise known as Transfer to make sure Fog loses the wager by keeping him from completing his trip around the world within the eighty-day time limit. In the end, however, Fog evades every one of the traps which Transfer lays and reaches the Reform Club in time to claim victory. Shortly afterwards, Sullivan is dismissed from his

position as governor of the Bank of England for "misappropriation", having used the Bank's funds to pay for Transfer's travel expenses.
* Around the World with Willy Fog survive and is still out to try and stop Fog from completing his journey in time.
* Around the World with Willy Fog takes place in a world of anthropomorphic animals. Unlike Willy Fog, however, Passepartout is a monkey and Phileas Fogg is a fox.
* Around the World with Willy Fog. The judge declares the bail forfeit on the spot and awards it to the injured party.
* Around the World with Willy Fog, the villainous Transfer gets swept over Niagara Falls. His last words before going over are: "No-one's ever survived Niagara Falls!" However, he turns up in the next episode, still very much alive.
* Around the World with Willy Fog Transfer and overcome him. He single-handedly saves Princess Romy from the suttee when he's massively outnumbered.
* Aroused by Their Voice: A character thinks another character's voice is hot.
* Aroused by Their Voice: Others find the voice of this particular character attractive.
* Aroused by Their Voice: The sound of a character's voice is a turn on.
* aroused. Happens again when Daario kills a Meereenese champion on her behalf.
* "Aroused" was originally interchangeable with "roused", but after acquiring sexual connotations this is definitely no longer the case. However, it is still technically possible to
* A routine by O'Brien and Valdez regarding a lie detector starts with a woman assuring Valdez that he's her "first." After the lie detector goes off she quickly amends it to, "first blind Mexican this week."
* A Royal Affair, set in 18th-century Denmark, following the love affair of Queen Caroline Matilda and Dr Johann Struensee, her husband's advisor
* A Royal Christmas, a Hallmark Channel movie: It snows in the fictional nation of Cordinia for the first time in a century after the crown prince marries his commoner girlfriend.
* A Royal Christmas, a queen accompanies her son to Philadelphia to propose to the commoner girlfriend that she drove away because she didn't think that she was good enough for him. When they get out of the car, her hair is loose, in stark contrast to the prim updos she's worn throughout the film, representing that she's loosening up and willing to accept her.
* A Royal Christmas Queen Isadora is rude and snooty to her son's "commoner" girlfriend and constantly tries to push him into a relationship with his childhood sweetheart, who is of royal birth and who despite her icy demeanor she is clearly genuinely fond of. As the Queen is played by Jane Seymour and the girl is played by her daughter, this is understandable, and even lampshaded in one scene—"You remind me of myself at that age!"
* A Royal Christmas, the prince and his girlfriend do everything they can to get a reaction out of the royal guards, who of course, stand impassively no matter what. They do break into huge grins at the end, when the couple marry.
* A Royal Night Out. Margaret is about to go out on the town apparently 'incognito' - only for one of the guards to point out that she probably shouldn't go out wearing her tiara. Even so, earlier in the film when the princesses were casually lounging around the palace, Margaret is dressed in casual 40s wear and Elizabeth is in her military uniform.
* A Royal Night Out parodies this, as the Buckingham Palace guards snap to attention whenever the princesses walk by - one of them even doing so while in the middle of reading a magazine.
* "A Royal Problem" Has Princess Celestia swap cutie marks with Princess Luna. Despite a prior episode showing the black patches were part of Luna's natural coloration as opposed to her mark, the black is swapped along with the white moon cutie mark for no clear reason save that it would be blend into Celestia's white coat otherwise.
* A Royal Problem" introduces an evil version of Celestia called Daybreaker. When Celestia dispels the nightmare containing Daybreaker, she says "No, you're not! You

are not real, and you will never exist again!", which leads to three options: 1 - she's referring to Daybreaker being manifested in the dream, 2 - the last part of the statement is directed to Nightmare Moon, or 3 - Daybreaker somehow "existed" previously...
* A Royal Problem" introduces Daybreaker, a hypothetical superpowered evil side for Princess Celestia. Unlike Nightmare Moon, the trigger for this transformation is stated to be Celestia realizing that she has the power to do whatever she wants whenever she wants, and all that's stopping her is her caring about others.
* A Royal Problem", Starlight because she regrets her rash decision to swap Luna and Celestia's cutie marks, and Luna because she is failing so badly at performing the role Celestia normally fills.
* A Royal Problem": The montage of Luna's public appearances in the day uses Celestia's sun cutie mark (now sported by Luna) as wipe for the scene transitions.
* Arpagone", the black Dhreller silently emerges from a pit behind Yugo through a lift.
* Arpeggio of Blue Steel (ケッコンカッコカリ), which literally means "marriage(temporary)").
* Arpeggio of Blue Steel and their base at Yokosuka to film the music video for the opening theme song.
* Arpeggio of Blue Steel, humanity's naval and seafaring capabilities are torn to shreds after engaging in a losing battle with the "Fleet of Fog", AI ships with directives to attack any human ships attempting to venture out to sea. Fortunately, one of the captured Fog ships, I-401 "Iona", only remembers one set of orders: "To obey Gunzou Chihaya", giving humanity a chance to defeat the Fog ships.
* Arpeggio of Blue Steel somewhat zig-zags this trope: the AI personifications of the ships are tied to the ships' systems but can also exist and move independently. The series as a whole raises questions on the sapience of the ships and whether these "Mental Models" raise the ships from weapons to beings.
* Arpeggio of Blue Steel, the Japanese Navy is shown to have an underwater dock at Yokosuka Naval Base, built to protect what's left of the Japanese Navy's fighting ships from the Fleet of Fog. There's also the base I-401 maintained at Iwo Jima.
* Arpeggio of Blue Steel the main characters are the crew of the submarine I-401, so there are several battles between submarines:
* Arpeggio of Blue Steel to try and emulate and better understand human thinking, which has indeed made them more flexible, but also introduced some quirks.
* Arpeggio: Resentful that he can't fly, he opts to use Clockwerk to overcome that problem and also seek immortality. He has the Cooper Gang (by trickery) and Neyla seek out Clockwerk's scattered body parts that other members of the Klaww Gang were using for their own vices. With illegal Indian spices provided by Rajan that was secretly feed to the population of Paris through an unsuspecting Dimitri, Arpeggio intends to use the Northern Lights to send everyone in France into a hate frenzy that would provide the fuel for Clockwerk's immortality, with Arpeggio himself inside.
* Arrakis, and they train their lives to become impossibly deadly with it. They practically worship their knives. For instance, their knives are never allowed to leave the planet, anyone who owns one cannot leave the planet without their permission, and any outsider who sees the blade of a crysknife must either be cleansed or killed. Their obsession comes in surprisingly handy given that shields have made melee combat the standard for infantry soldiers.
* arranged a marriage between himself and dowager Queen Anora, although it's not clear whether or not it's a happy union.
* arranged for other men to impregnate his wife and, when she could no longer conceive, he artifically inseminated his daughter. It wasn't his
* Arranged is about two school teachers, one Jewish and other Muslim, who become friends by sharing the highs and lows as their families arrange their marriages.
* Arranged Marriage about how the little lady is the first bride in the Seven Kingdoms to be wed and widowed before she'd been weaned.
* Arranged Marriage Abraham's son Isaac to get married, Abraham sends his servant

back to the old country to find a nice girl for him. Isaac and Rebecca agree to the match without meeting each other (Genesis 24).
* Arranged Marriage: A common technique in historicals to force the hero and heroine to deal with each other.
* Arranged Marriage. After Brandon Stark's death, she married his younger brother Eddard.
* Arranged Marriage: A marriage set up between two people who may or may not love each other, often due to political or financial reasons.
* Arranged Marriage' Ami, it's joked that he needs an armorer to make him a horned helm.
* Arranged Marriage and block the marriage Noirtier has Valentine — who is set to inherit his fortune — disinherited, and only reinstates her once the engagement falls apart (ironically for unrelated reasons) and she is free to court Maximilien Morrell.
* Arranged Marriage and disrupts everyone's plans for inheritances, alliances, and succession.)
* Arranged Marriage between royal families. And they do grow out of it and fall in love later on.
* Arranged Marriage. Come to think of it the Big Bang Theory does this particular plot a lot...
* Arranged Marriage, especially compared to her tomboy sister Arya. However, she lacks the poise and wisdom usually associated with this trope. She moves closer to this trope again in later seasons, but with an underlying steeliness and ruthless edge.
* Arranged Marriage" her if she persisted in wearing chainmail and training in swordplay. Brienne stated that she would only allow herself to be chastised by a man who would defeat her in combat. Deciding to teach his future wife her place, he accepted the challenge and ended up with several broken ribs from a tourney mace. After that, Brienne's father gave up the idea of marrying his daughter off.
* Arranged Marriage intended for Yseult and naturally falls in love with her. They end up eloping, and while Mark gives chase, he can't bring himself to kill them because he knows it's not Tristan or Yseult's fault it happened.
* Arranged Marriage is in mortal danger. A curse he suffers from transforms him into a fiend called Malken (the true darklord of Nova Vassa) a madman who targets any woman Hiregard loves. (Unlike Renier, Hiregaard isn't malicious and doesn't truly know that he is Malken, but he does know that there's a dark presence inside him, and tries to avoid becoming attached to women because of it; it's often hard to find any who are attracted to him nowadays anyway, as they tend to remember what happened to his previous lovers.)
* Arranged Marriage: Money and power-obsessed parents force their offsprings to marry someone from a wealthy family to maintain their social status and gain more power regardless of their children's agreement.
* Arranged Marriage, Nabu ran away from home in order to learn what Aisha was really like.
* Arranged Marriage points out that neither behaviour is going to help matters.
* Arranged Marriage Prince Rhaegar (who broke his own arranged marriage to his wife Elia Martell in the process). The nature of Robert and Lyanna's match is also complicated; Robert believed himself to be genuinely in love with her, but Lyanna doubted they'd be happy together because of his unfaithfulness, and in present day her brother Ned acknowledges that Robert didn't truly know her.
* Arranged Marriage: Roman style is described by Pliny in one of his letters. He's been asked to look for a suitable husband for a friend's daughter and lists his candidate's qualifications in this order: family background; personal character; career prospects, appearance, and finally fortune which is probably placed last out of piety rather than its real importance. The physical description, interestingly, is clearly included for the girl's benefit.
* Arranged Marriage: Royals and nobles often have their spouses chosen for them for the good of the country.
* Arranged Marriages and the religious angle is just another diplomatic wrinkle

among the paperwork when royals marry for love it shades into this:
* Arranged marriages are common in the series among upper-class mages. The reasoning is that it's best to marry someone you won't have to hide your Elemental magic from, and if you get along well with him/her that's a bonus.
* Arranged Marriages are still practiced in South Korea as well, though they are becoming increasingly rare. Matchmakers and parents are usually very careful, though. They will scrutinize and vet a potential suitor for a period (a few weeks to a few years) before allowing the marriage to happen, allowing the couple to date and get to know each other during that period. That way they avoid most of the issues that could happen in arranged marriages of other cultures. Marrying for money is also discouraged.
* Arranged marriages happen to Sansa so often that she's basically pimped out to unconsummated marriages. First, there is Joffrey, which she views as a
* Arranged marriages were fairly common right up to the 20th century in many western countries and still fairly common in African, Middle Eastern, and Asian countries even today. As much as 90% of Indian marriages are still arranged. Expect societal disapproval if you choose your spouse yourself.
* Arranged Marriage, the contrast is given much emphasis, especially as Tyrion is a deformed dwarf and Sansa is lauded as one of the greatest beauties of her age. It only serves to make the both of them even more miserable.
* Arranged Marriage. This wasn't true when Cersei and he first wed, but he let himself get fat and lazy.
* Arranged Marriage to Cho Yon, and they fell in love, but he was murdered. She eventually gets together with Anguirus. Interestingly, at one point, Anguirus has to wear Cho Yon's unused wedding garment as a disguise to fool Jeog (Cho Yon's murderer), causing Seong to compare the two in her head.
* Arranged Marriage. When she meets her husband to be, she sees a bunch of drawings he made showing a woman's face from childhood to adult. The groom claims this is a woman who has been appearing in his dreams from a young age and always assumed it was Troi. Sure enough, said woman turns up later in the episode, prompting the groom to run off with her returning us to status quo.
* Arranged Marriage, which would make this a "cover up the shame" marriage.
* Arranged Marriage with Prince Karras forced by her sister Blackfire to secure a political alliance, which caused no small amount of angst due to both Kory and Karras being in love with their own someone else. Even though they were married, Starfire returned to Earth to be with the Titans with Karras' approval and he would later die fighting his sister-turned-evil. Later on, she married General Phy'zzon and their union worked out a little better in no small part to her relationship with Dick being severely shaken, but he would sacrifice his life to save countless others.
* Arranged Marriage with Sansa Stark; he's in his mid-twenties while she is only thirteen. However, neither of them are happy about it and he ultimately refuses to consummate the marriage because she's just a child. In the TV show, the gap is even more significant despite Sansa being aged up to fourteen, as Tyrion is also aged up to about forty. The two do start to bond a little bit in spite of everything, but then the Red Wedding happens...
* arranged the battle beforehand or planned for it who serves as a military adviser whenever Odin is not around.
* arranged the Kaled Dome's destruction (and the extermination of his people) to avoid having to cover his tracks.
* arranged, yet loving marriage. When she died after the miscarriage of their 6th child, Charles V was away on a conquest. Her death shattered him so much he wore black for the rest of his life and never remarried. Charles V later abdicated and died in a monastery.
* arrangement. He allows them a more or less free hand in and around Charming and they keep drugs and other gangs out.
* arranging fake marriages for illegal immigrants. They allegedly recruited homeless people and drug addicts to marry illegal immigrants in order to bring them to the country.

* Arranging one's suicide to look like murder or an accident, even for the purpose of defrauding a financial institution.
* Arrebato has writer and professor Luis Vega accused of a murder after publishing a book where a real life crime is described meticulously.
* Arrested: Ayano left too much evidence behind, and the police arrested her.
* Arrested Development, after the publicist has just told the family that Michael is the most likeable member of the family:
* Arrested Development all the time. His family usually drives him to it. And his family will mock him for falling to their level.
* Arrested Development also had a feature-length pilot, but had a half-hour reduced cut as well.
* Arrested Development and former cell-mate of his father, George Sr., is given a job at the family company right after a storage unit full of evidence incriminating George Sr. is burned down.
* Arrested Development, and on a larger scale, almost everyone steals from the Bluth company.
* Arrested Development and Paige Carlyle Howard that it makes it look believable.
* Arrested Development Ann by attending her religious protests and family Christmas party.
* Arrested Development) are extremely unhelpful, and don't allow him to obtain the magazine without boarding a flight.
* Arrested Development. A religious group (led by the girlfriend of Maeby's cousin George-Michael) protests the film and turns it into a hit.
* Arrested Development, as even his own family don't really care for him.
* Arrested Development as she was fully capable of sight (except when some incident left her temporarily blind); she just acted like that to play with the emotions of the jury.
* Arrested Development, at which point he leaves her at the mercy of his sister and his mother.
* Arrested Development, Barry Zuckercorn starts talking nonsense to try to fudge the fact that he lost George Sr.'s will. He is rescued at the last minute by the fact that George isn't dead.
* Arrested Development between Michael, Marta, and Gob, as well as Tobias' anxiety over going nude.
* Arrested Development-breaking jokes where the presence of a camera is made clear to the audience. However, characters never acknowledge the presence of the cameras, everything has a smooth, filmic quality and there are several scenes in which a documentary-style crew would not be allowed to be present.
* Arrested Development breathes this trope. The original run did dabble in this, most notably involving multiple Bluths in different cars. In Season 4, each episode follows a specific character through part or all of the period 2006-2013 with several of the same events where everyone's paths crossed covered repeatedly, slowly revealing more of what went on at them.
* Arrested Development, Britta tries to impersonate a lawyer but fails. She later tells Jeff "First the good news: I was not arrested for impersonating a lawyer." He replies "Good. Wait, there was a possibility of that?" Does Jeff's comment mean he's just now learning that Britta was doing something potentially illegal or is he referring to his own time as a lawyer which came to an end because he didn't meet the educational requirements?
* Arrested Development, Buster accidentally bids on his mother's best friend and chief social rival, whom he was trying to avoid, when he was supposed to bid on his mother(the two share a first name).
* Arrested Development, Buster goes to the bathroom then climbs out of the window to get away from Lucille II.
* Arrested Development), but he can't use the jail cell toilet as there is no door.
* Arrested Development, but his plan doesn't work out in the way he thought it would.
* Arrested Development, but later revealed to be a lookalike for a segment on a late-night talk show.) Buster does go through with it, but only because he assumes

he'll be rejected for his various shortcomings. However, he underestimates their need for recruits and is accepted.
* Arrested Development, but outside school fends for herself quite easily, even landing a plum job in Hollywood.
* Arrested Development) but those first seasons had a huge impact on sitcoms, causing them to become more continuity heavy and meta.
* Arrested Development can do this frequently, although the main character, Michael Bluth, can shift between an Innamarata and a Pantalone multiple times in any given episode, most of the time, however, he is Pierrot.
* Arrested Development cast. She has had little to no commercial success outside of her role on the show, though has found some critical acclaim on the indie film circuit.
* Arrested Development comes up with a few of these to "rebel" against her parents.
* Arrested Development dense. Try to summarize a typical episode of the half-hour show and you'll see.
* Arrested Development: During Season 4, an ostrich shows up a lot. It symbolizes the family members learning to be self sufficient.
* Arrested Development episode ("Charity Drive") has Gob request George Michael and Maeby break into a municipal office and sneak a file into their file cabinet. This conversation occurs after Maeby sticks her gum on the side of the file cabinet:
* Arrested Development episode "Immaculate Election", Lucille Bluth gets a Roomba after firing her housekeeper Lupe for having sex with Buster. Lucille then walks in on Buster in bed with the Roomba.
* Arrested Development episode "Notapusy" courtesy of his nephew, Steve Holt.
* Arrested Development episodes, which ties him with Henry Winkler/Barry Zuckercorn for the most appearances of a cast member/character not featured in every episode.
* Arrested Development falls into this trope, even the well-meaning Michael. It can range from simply not listening or paying attention to their children, to openly ranking their children from favorite to least favorite, to adopting a Korean child to make their children jealous, to adopting a child to screw their rivals, to setting their kids up to take the fall for various felonies.
* Arrested Development features a brief yet very gymnastics-heavy fight between George-Michael and Micheal.
* Arrested Development. "Finally a frozen banana that won't make you sick and kill you!"
* Arrested Development, following various fake dismemberments, has the moral that you shouldn't use a one-armed man to scare someone. This aesop comes into the ridiculously over-specific category, although for the show it's actually good advice.
* Arrested Development for alienating new viewers. It's one reason that show was canceled, but also one reason fans loved it.
* Arrested Development for his practice, in which he dramatically says the name "Bob Loblaw" and (thanks to in-universe poor continuity) is seen closing the same law book three times, for effect.
* Arrested Development for one character catching us up on what happened with them in the years after season 3 which leads to many overlapping storylines and setups to jokes that sometimes are not paid off for as long as 10 episodes.
* Arrested Development. Franklin is often used to knock out people by dipping his lips in ether and "giving some sugar" to the victim's nose.
* Arrested Development frequently uses it straight, but it's subverted in the first season finale when twice, after baldfaced lies, it cuts to an insert saying "FOOTAGE NOT FOUND."
* Arrested Development gave us "analrapist", a combination of analist and therapist. Given the word's inventor was Tobias Funke, he's completely oblivious to the fact it looks like "anal rapist".
* Arrested Development: George Bluth, Sr. had a tendency to hide things inside walls, and had even designed the model home with a secret room. GOB found a document signed by George, Sr. and Saddam Hussein by taking a sledge hammer to the wall of the president's office because there wasn't enough space to line up a

proper cue shot, and apparently everybody in the household knew about the secret room except Michael, who needed paperwork that was stored there.
* Arrested Development, George Sr. (currently under house arrest) sends a proxy named Larry to attend events in his place, wearing a camera and an earpiece so that George can tell him what to say. It goes terribly wrong when George mutters something that's not meant to be said aloud, but Larry says it anyway.
* Arrested Development: GOB Bluth presents a video sliming his nephew George Michael's political rival, but his message is followed by the tape's original contents: George Michael recreating Star Wars Kid in the garage.
* Arrested Development: GOB temporarily loses two of his fingers while performing a magic trick with Buster and a sword. "Handle first, handle firstMY FINGERS!"
* Arrested Development had a depressed Buster and GOB sitting on swings at the local playground. Then GOB started half-heartedly pushing Buster on the swing and Buster got really into it.
* Arrested Development had a nurse that fell for coma patients. It would turn out that they were faking it, and when they admitted they were conscious and reciprocated her feelings (As per her "Oh, if only you were well and we could be together!" comments) she would immediately get angry and leave them for lying.
* Arrested Development had a straight example and a subversion in "Ready, Aim, Marry Me!":
* Arrested Development had Gob, at the behest of his father, planning to use dyed corn syrup as fake blood to fake a narcoleptic stripper's death. Things didn't go so well when Buster drank all of the fake blood, mistaking it for juice.
* Arrested Development has a ventriloquist dummy, Franklin Delano Bluth.
* Arrested Development has Buster with Lucille Austero, then later GOB with Lucille Austero. They're both 30+ years younger than Lucille, and though both are pushing 40.
* Arrested Development has G.O.B. and Buster talking in a closed nightclub for a while, waiting for G.O.B.'s magician rival Tony Wonder. After a bit of conversation, Buster says "I wonder where he is." To which Wonder appears in a puff of smoke, asking "Did anyone say 'Wonder'?". The narrator later explains Tony Wonder had been hiding for hours in a small service elevator, waiting for someone to say the word "wonder".
* Arrested Development has Michael Bluth walking by George Michael's room when he hears GM's girlfriend Ann trying to talk him into doing something that he doesn't feel comfortable doing. Michael bursts in, thinking they're about to have sex, but Ann is just trying to talk GM into running for Student Council president.
* Arrested Development has Michael's constant need to be depended on as one of his flaws. While he conceded that he does like to be needed, any time he takes a day off or "deserts the family once and for all" things fall to pieces. The one time his absence as President sticks it's because he's running things from behind the scenes, and even then things fall apart because he's not President (and therefore has no real say in anything. Also, because Gob is an idiot.)
* Arrested Development has the Bluths repeatedly saddled with a doctor who always does this, like saying someone is going to be all right...because their left hand is gone. The third time he appears, Lucille mutters "Oh great, it's the wordsmith."
* Arrested Development has this in spades. It mostly crops up in foreshadowing, where innocuous jokes and unimportant details will turn out to be set-ups for much larger plot arcs further down the line. At the very least, one should keep an ear open for lines of dialogue repeated verbatim in different contexts seasons apart.
* Arrested Development"; he never seems to be guilty of much beyond possession of marijuana and sleeping with his brother's wife.
* Arrested Development. He once asked a group of dolls which of them wanted to take their shirt off. Granted, he was a little stir crazy at the time...
* Arrested Development: High-school age Maeby Fünke is able not only to con her way into a job as a film executive, but to actually execute it competently, despite only getting a crocodile in spelling and a daisy in arithmetic.
* Arrested Development. His tentative attempts to explain this to his father lead him to believe his son is trying to get them together, and he ends up dating her.

* Arrested Development. However, when Lindsey's father, George Bluth, Sr., suffers a heart attack, and Tobias rushes to her side to offer emotional support, Lindsey decides that maybe there is still something worth saving in their relationship.
* Arrested Development in a preliminary to the court case. It makes George Sr. aware, for the first time, just how deep in trouble he is.
* Arrested Development. Indeed, one of the main driving forces of the fourth season of the show is about Ron Howard wanting to make the said movie and hiring Michael Bluth as its producer.
* Arrested Development in the back (actually taken from an excavation site by Michael's brother). Michael wants to prove that he's a good person by giving this woman a ride, refusing to let her out "too soon" when she becomes distressed by the shovels and "blood spray". She eventually runs away when he stops in the Wetlands, and the episode ends with Michael being arrested.
* Arrested Development). In the end, she decides to bow out, feeling she doesn't deserve to win, only for the judges and audience to declare her sudden ability to walk as a miracle and award her first place anyway.
* Arrested Development: In the pilot, Maeby kisses George Michael just to get attention from her parents. They don't notice. This does, however, provide George Michael enough fetish material to last the rest of the series.
* Arrested Development involves the law firm of Feinstein, Feinstein, Feinstein, and Feinstein.
* Arrested Development) in which this is one of the tools used. Tobias, who thinks he's an actor, does a terrible job at playing Lindsay ("I'm a woman, with womanly needs!"). Eventually, the psychologist starts playing Tobias, and it gets... awkward. Quickly.
* Arrested Development is mentioned, you see a still of the pair racing in shopping carts. This is, of course, played with in a later episode.
* Arrested Development is set in Newport Beach and Balboa Island, but is filmed primarily in Culver City and Marina del Rey. The use of Culver Ciy locations that are less frequently used in other shows and their similar geography (both in Southern California, in neighbouring counties) make for some fairly effective doubling, only appearing especially jarring to some Newport Beach natives.
* Arrested Development: "It doesn't mean you're bad, it just means he's not interested in you."
* Arrested Development, it quickly becomes clear to the Bluth family that Michael is the only one with enough intelligence and sense to run the family business, and so they invite him over for an "intervention":
* Arrested Development It was a lot funnier and less creepy than this sounds.
* Arrested Development keeps the Lunar Excursion Module that was used to fake the landings in his office and holds meetings in it.
* Arrested Development: Kitty wants George Senior's baby, and ends up with a cooler full of his sperm.
* Arrested Development. Lindsay notes that she has hit 3 climaxes in one night plenty of times.
* Arrested Development, Lindsay tries to open a jar but fails. Her husband Tobias proudly comes to her aid but fails miserably as well—playing into his general lack of manliness displayed throughout the series.
* Arrested Development, Lindsey is sitting on a photocopier while talking about buying a Volvo. She then shows Michael what she thinks is a picture of the car in question...
* Arrested Development looks away, his eyes linger on the camera just enough to make the irony apparent.
* Arrested Development loves to play with this one with Buster and Lucille.
* Arrested Development: Lucille is at a party for the Desi awards (given to the stars of Spanish telenovelas), where most of the attendees are Latino. She complains, "A sea of waiters, and no one will take a drink order!"
* Arrested Development. Maebe ordered several virgin versions of alcoholic drinks, without realizing what the prefix actually means. Later she and George Michael drink from wine bottles that GOB has switched with something non-alcoholic in to a

botched attempt to copy Jesus' water-into-wine trick.
* Arrested Development: Maeby Funke. Her parents barely notice she exists—forgetting they have a daughter, even when she's standing next to them. She spends the majority of the series trying (and failing) to get them to notice her.
* Arrested Development, Maeby is tasked with producing an American remake of a French film about cousins who are in love with each other (mirroring George-Michael's feelings for her). Ann organizes a protest which ends up making the film a hit.
* Arrested Development, Maeby tries to fool the security guard at her grandmother's apartment complex into giving her the mail by putting her hair in pigtails and riding up to the security booth on a razor scooter. Her response when he points out that she's a little old to be getting all that mail: "Babysit me!"
* Arrested Development Magic Circle, who have a similar goal of preventing the exposure of "magical" secrets.
* Arrested Development, magician Tony Wonder hides in restaurant dumbwaiters in order to appear suddenly at dinner meetings. The effectiveness of this is lessened by the fact that he's usually covered in food scraps afterwards.
* Arrested Development makes the nightly news. Reporter John Beard wants to be sure viewers know "What this means for your weekend!"
* Arrested Development, Marky Bark takes Lindsay out to a restaurant that only accepts trade. He offers a handful of hotel soap bars, but he's told by the waitress that those are no longer accepted.
* Arrested Development: Michael and George Michael, his son, are making snacks and discussing their plot of that episode. George Michael remarks that he doesn't need his dad to stay out of his life, he's the biggest part of his life. Michael states, referring to the snack they are making, "That's a little cornball, son."
* Arrested Development: Michael and Gob use policemen-themed strippers to fake-arrest George Michael and scare him straight. Also, Gob nearly gets his head blown off when the would-be customer takes him for a real policeman.
* Arrested Development Michael Bluth at the helm of a sinking ship... of fools.
* Arrested Development: Michael Bluth is a master of the sarcastic blank stare.
* Arrested Development, Michael calls his father on the phone in the hotel room where he's waiting for his fiancee, to prove to him that he's not afraid of intimacy. After his father tells him to put her on, Michael claims she's in the shower, to which George Sr. replies that he'll wait. They end up waiting through to the following morning, and anybody who's ever seen the overpriced phone rates at hotels can anticipate Michael's reaction to his room charge that morning:
* Arrested Development: Michael finds a woman named Nellie, who he assumes is his sister, when she is actually a prostitute that George Sr. uses every once in a while.
* Arrested Development, Michael has this problem. His wife is dead, but he's always worried about neglecting his son because he spends so much time trying to save the family business.
* Arrested Development, Michael is in a meeting with Wayne Jarvis. Wayne dramatically says, "[GOB]'s on the news right now," and turns the television on. GOB is not on the news. They wait for quite a while before the aforementioned news report finally comes on.
* Arrested Development moment, at one point played by a passing mariachi band.
* Arrested Development, mostly situations surrounding Michael. He's always trying to do what's best for the family, and he's pretty much the only person working to keep everything from falling apart. But every time he tries to get cooperation from his family members he's met with more irresponsible behaviour, animosity, and sometimes outright hostility. They constantly mock him for being the 'good' brother, and they spend all their time either ignoring him, walking all over him, or leaving him to deal with the fallout of their bad behaviour.
* Arrested Development, most of the inaccuracies are probably intentional.
* Arrested Development. No matter how outlandish or irrelevant the story he's teasing, he'll always throw in something like "What this means for your weekend, at

11."
* Arrested Development none of the Bluth family (except her sometimes-boyfriend George-Michael) can remember Ann Veal's name; usually referring to her as "Bland," "Egg," "Annabell," "Yam," or "her?". Not out of malice, just because she's so forgettable.
* Arrested Development occasionally becomes fed up with his family and quits. This is most obvious in the season one finale when he intends to move to Arizona with his son. In the season two premiere, he comes back almost immediately. He doesn't even cross state borders.
* Arrested Development once asked the family lawyer if she could divorce her parents, and was told she needed to prove that she was living in an unstable environment. Cue Maeby attempting to help her mother have an affair.
* Arrested Development on the phone, and he plays along while driving until cut off in a tunnel.
* Arrested Development over how much it's worth — a number that inflates tenfold over the course of the episode.
* Arrested Development: Parodied in an episode with GOB driving away George Michael for similar reasons, and again in Rita's first appearance, where Michael utterly misinterprets her statement "I'll make you blue."
* Arrested Development phone call with Michael, but her cover is blown when Michael hears her maid Lupe asking her a question.
* Arrested Development picked up the series for a fourth season which debuted in 2013. A fifth season aired in 2018 and 2019. No news about a sixth season has come up, however, with the cast being a little too busy, Portia di Rossi's retirement from acting, Jessica Walter's passing and Jeffrey Tambor's... er... you know, it seems very unlikely.
* Arrested Development played with this. Michael develops feelings for Marta who is with GOB. GOB is mostly using her but he doesn't want Michael to have her either. Also Buster has a crush on Marta. All three of them are rebuffed by Marta eventually.
* Arrested Development' policy." According to George, "it's worth a week in the hot box."
* Arrested Development runs on this trope, usually in form of simple statements that end up being correct in an utterly bizarre way.
* Arrested Development s4e12, giving her presentation on Fakeblock to a room of investors.
* Arrested Development served as the narrator. He appeared as himself in the final episode of the original run (to whom one of the characters pitches the idea of the show itself). He has a recurring role (as a fictionalized version of himself) in the post-resurrection fourth season.
* Arrested Development. She is so self-centered and used to having things done for her that she has trouble taking care of her daughter and is very often (unintentionally) neglectful towards her.
* Arrested Development showed basically the same events as the other episodes but seen through different POV characters' eyes.
* Arrested Development's porn magazines. Due to the specificity of said porn, she believes a cricket bat to be essential to the process.
* Arrested Development starts off pretty slow as it spends most of the first few episodes setting up key plot points that pay off at the end and mostly puts jokes to the side. The whole season should be thought of like a movie with interweaving plots that make much more sense as the story goes on.
* Arrested Development: "Switch Hitter". When the president of a rival company hires Gob in an effort to win the company softball game, Michael asks Gob to throw the game.
* Arrested Development that the workmanship is incredibly shoddy, however, and damage done to the home in any given episode is retained with meticulous detail in subsequent episodes, so that by the end of the series, the place is a dump.
* Arrested Development. The bleeping makes the cursing funnier than if it were left in and preserves the generally light-hearted tone of the show. In one scene, in

particular, Buster is being encouraged by his siblings to gently deride their mother; Buster gets over-excited and launches into a string of epithets that are mostly bleeped out and goes on for quite some time while the increasingly shocked expressions of those around him convey just how big a leap down the slippery slope he has taken.
* Arrested Development the Bluths always get "hop-ons" when they drive their van because it was made to load airplanes and has a set of stairs on it.
* Arrested Development, the character to whom the house wall falls upon is even named Buster.
* Arrested Development. The documentary narrator insists some facts as true: Gob's chicken dance is an offensive gesture in Mexico, the word pussy means "kind person" in the UK, and naming media that doesn't actually exist.
* Arrested Development: The Franklin puppet soaked in ether can immediately knock people out.
* Arrested Development, the "previous girlfriends" montage reveals the depths of embarrassment his family has caused him, so he simply blurts out the lie "I have no family."
* Arrested Development, the rest of the Bluth family has no idea what George Michael sees in Ann Veal.
* Arrested Development this tends to be how the Bluths attempt to communicate with the various Spanish-speaking characters.
* Arrested Development, three characters all monologue about issues regarding their manliness, each continuing the next part of his own monologue from the last phrase of the previous person's monologue, all the while never paying attention to each other. Amazingly, they all reach the same solution to their manly dilemma: going to the mall.
* Arrested Development: Tobias (David Cross) married to Lindsay (Portia de Rossi).
* Arrested Development, Tobias has himself put in prison to research an acting role. He runs afoul of the notorious White Power Bill and later tries to psychoanalyze him. He comes to the conclusion that White Power Bill is frustrated with his own failures and only really hates himself. White Power Bill angrily states that he hates his father, the government, and even Tobias himself. Tobias refutes each of these by calmly stating that White Power Bill hates White Power Bill. He then goes to prepare for the beating that White Power Bill promised him. While Tobias is preparing, White Power Bill climbs over the railing in the background and jumps to his death. His last words: "I hate White Power Bill."
* Arrested Development, Tobias is covered in blue paint and tells Michael, "I just blue myself." Later, after he gets hit by a car and ends up in the hospital, his wife Lindsay asks Michael what the last thing he said was. Cue flashback to "I just blue myself."
* Arrested Development; Tobias lost his medical license as a result of incompetently applying CPR to an elderly man who was simply taking a nap.
* Arrested Development, Tobias starts dating a woman(?) named Michael. He doesn't seem to mind that this is also the name of his brother-in-law.
* Arrested Development used his family's wealth to become a "professional" graduate student well into his 30s. By the start of the series he has done coursework in cartography, Native American tribal ceremonies, 18th century agrarian business principles, and archaeology. With the ability-level he demonstrated in his archeological dig and just reading maps, it makes sense that he would be guided away from learning skills, e.g., engineering, he could use on a day-to-day basis.
* Arrested Development uses audio looping to a very noticeable degree, though whether it's to get different line readings or to rework scenes after the fact is unclear.
* Arrested Development was acclaimed from the start, but it always received low ratings, and wasn't that popular, so it got cancelled after three seasons airing on FOX. After the whole series got put on MSN, and started airing reruns on HDNet and G4, it got many more fans and became a huge phenomenon. Years later, it finally got a fourth season on Netflix, and even has a movie in development.
* Arrested Development wasn't originally going to be the narrator. He simply

recorded the narration as a placeholder until they found someone else. However, his voiceover worked so well, they kept it.
* Arrested Development was shot in an actual model home which featured an elegant sweeping curved staircase leading to a barren unfinished attic.
* Arrested Development what it says on his business card, even when compressed into a single word.
* Arrested Development: when Buster joins Army, his drill sergeant is not allowed to "motivate" him over the climbing wall because there have been a variety of lawsuits. Fortunately, by the end of the episode, his older brother Gob is around to tell him "Now get over that wall, homo!"
* Arrested Development, when George Michael got an A-. Both he and his dad were disappointed.
* Arrested Development when George's Sr.'s brother is holding up his boombox in front of Lucille's window to get her attention.
* Arrested Development when he is accused of killing an old man who went missing. He tells the reporters who accost him, "Don't edit this for your broadcast so it looks like I'm screaming, 'I killed Earl Milford!'" Needless to say, those last four words were all the reporters needed.
* Arrested Development when his various yearbooks are shown and his most recent quote is "study hard guys - trust me"
* Arrested Development. When Michael discovers that a storage unit his father tried to keep him from finding out about has burned down, it doesn't take him long to connect it to the recently released arsonist who's been set up with a job at the banana stand (which he readily admits to).
* Arrested Development when Micheal romances a beautiful blonde who, unbeknownst to him, is actually mentally handicapped.
* Arrested Development when she advises her brother Michael Bluth not to be the bearer of bad news to his love interest. Her exact words: "It's called 'Shoot the Messenger'."
* Arrested Development: When Tobias attempts to argue that being a Never-Nude is perfectly normal.
* Arrested Development, when Tobias, former psychologist turned acting-hopeful, manages to accidentally talk his prison bunkmate, White Power Bill, into suicide by questioning him about "where the hate comes from."
* Arrested Development when Tobias Funkë went to prison and accidentally killed the craziest guy in there. Tobias' psychoanalysis of the man broke his spirit and caused his suicide. Tobias gets a lot of street cred on the inside and his derogatory nickname "Dorothy" becomes a name to be feared.
* Arrested Development where during GOB's seduction attempt, secretary Kitty undoes her bun and removes her glasses to reveal horribly frizzy hair and severely crossed eyes.
* Arrested Development where Michael realizes he loves Marta when they're sitting on the steps in the hallway during the Desi Award show.
* Arrested Development, which the writers usually expressed through dialog with the protagonists' customers.
* Arrested Development", which would appear to fit the trope fairly well. This is arguably more a parody of "classy" European softcore films. The parody isn't so much that it's art as that Europe is more sexually liberated. Compare the American remake where "classy" and "erotic" are filtered through more stereotypically puritanical American values.
* Arrested Development, while Gob is talking about why Ann would make a bad girlfriend:
* Arrested Development, who fell in love with a "brownish area with points".
* Arrested Development, who was a one-armed man that George Bluth hired to help teach his children a lesson. Several lessons. Through graphic traumatizing deceit, fake blood, and a fake arm, he managed to burn into the kids' minds that everything from talking too loud in the car, to leaving the house without putting a note on the fridge will inevitably end in someone's arm being ripped off.
* Arrested Development with a private eye who always wears a rather bad disguise,

but who completely fools the delighted Lucille.
* Arrested Development would expire unless a film was made within the next six days. They immediately cast the film with the bartenders from the party, then hired the same bartenders to work the film's wrap party five days later.
* arrested for assault. "It's almost as if they don't want you to buy razors."
* Arrested for Heroism: The police try to arrest you for doing the right thing because it's not exactly the way they want it.
* arrested him? What for? All he was doing was running around the Air Israel desk calling her name..."
* arrested You can practically use that argument to call for the arrest of rich people.
* Arrgh!, and he directs them to go west when Mr. Krabs requests east, simply because he thought Mr. Krabs said "weast".
* Arrghus is another Mini-Boss from the Palace of the Four Sword. This one replaces the Arrgi with regular Bari (that instantly electrify themselves once they get hit with the Hookshot), and summons Kyamerons in its second phase.
* Arrietty, Arrietty escapes a cat by slipping through the metal grid of the basement window which the cat cannot fit through.
* Arrin is only interested in his ex-lover Malya despite fifteen years of absence in
* Arrival. Amy Adams enters a zero gravity situation with her hair tied up, only for it to come undone and spend the scene billowing around as it would in actual zero gravity.
* Arrival and the vehicles carrying them to and from the alien spacecraft are decontaminated as a precaution.
* Arrival: around a dozen alien spaceships touch down on various places around Earth and then just... sit there. The story mainly revolves around humanity's attempts to work out some way to communicate with the aliens aboard the ships, and find out why exactly they've come to Earth.
* Arrival at the scene: the detectives show up. We see one of the police officers (an extra) throwing up in the bushes.
* Arrival DLC, Shepard is captured and sedated by an indoctrinated scientist, who has him/her locked up with a small army of indoctrinated soldiers outside. This... doesn't work out.
* Arrival. Each of the seven legs can open up into a star-shaped, seven-fingered hand, out of which they can produce a squid-ink like substance which they use to communicate.
* Arrival is quite possibly the most detailed primer on language ever put to film. It's also wildly entertaining.
* Arrival It's essentially saying that from this point on, no matter what you do, you'll still be sacrificing someone.
* Arrival, it's revealed that the Batarian Hegemony has been trying for years to force Aratoht to support life via heavy importation of cyanobacteria. According to the codex, after 23 years of labor, their efforts have resulted in a 1% increase in atmospheric oxygen.
* Arrival, Louise acquires the ability to incarnate into her future self. Knowledge gained during those experiences later help her solve the crisis in the present.
* "Arrival Of The Torso Takers": After watching an episode of a horror anthology series, Max becomes paranoid that David has been replaced by one of the aliens from the show.
* Arrival: One of the first things attempted for meaningful communication with the aliens. It doesn't work until they try sending extremely advanced mathematics rather than simple ones. Turns out the aliens' minds are structured very differently, so what is simple and easily understandable for humans is not so for them.
* Arrival, particularly notable if you're going for the "Last Stand" achievement.
* Arrival's character bumps it up to a PG-13 - not that it would appeal to most under that age to begin with.
* Arrivals from the Dark. All alien races were to be conquered and adapted to serve

the Faata.
* Arrivals from the Dark and believe that each race must progress at its own pace in order to maintain stability. While these aliens don't reject technology (after all, they're a star-faring race themselves), they don't believe that they (or anyone) have a right to impose their technology on anyone else.
* Arrivals from the Dark and left the galaxy, leaving behind their creations, known as the Lords of Emptiness, as temporary stewards, until another race was worthy of taking up the mantle. There are indications that humanity is being groomed for the role.
* Arrivals from the Dark appear to accept both genders equally. However, female officers are contract-bound to avoid pregnancies for the 5-year term. On the other hand, every book features a man as the main character.
* Arrivals from the Dark, as humanity expands to other star systems and establishes colonies.
* Arrivals from the Dark, but their interests generally align with those of Earth, and the Paraprims are both advanced and peaceful.
* Arrivals from the Dark, cults spring up, believing that the aliens were humanity's intended saviors and even those believing they were descended from those same aliens. The spin-off series takes place in the 29th century, and it's stated that, while a good number of humans still believe in various faiths, organized religion is pretty much gone due to the predominant view that a person's faith is a deeply personal thing that doesn't require a priest or a minister. Also averted with some alien races, such as the Kni'lina, who are at the same technological level of development as humanity, but one of their two main factions deeply believes in a prophet-like figure and treats him as divine. The other faction is highly pragmatic, but still views that figure with respect.
* Arrivals from the Dark. Each former Defender race tends to have a beef with the new Defenders for losing a lucrative deal.
* Arrivals from the Dark, extremely powerful antimatter weapons. Races that don't have annihilators (e.g. Dromi) tend to use plasma as their primary space-based weapons.
* Arrivals from the Dark force in such a way as to leave their technology largely intact, allowing humans to study and implement technology that, eventually, turns humanity in a galactic superpower.
* Arrivals from the Dark for communication among themselves. Powerful bio-computers are able to communicate across light years using psychic waves, but even they can't reach across the Void between galactic arms.
* Arrivals from the Dark for millennia (although their space habitats generally orbit one of their now-deserted central worlds).
* Arrivals from the Dark is a career officer, who spends most of his life fighting the Dromi, eventually dying aboard his flagship. He's had several wives and abandoned a number of children. Even when he was married to their mothers, he rarely saw them and typically couldn't wait to get back into space while on leave.
* Arrivals from the Dark is masking it from human radar systems, the cruise's captain has no idea why the ship is suddenly moving forward despite the retro-rockets firing.
* Arrivals from the Dark is the official government of humanity, although it is unclear if the nation-states still exist as governing bodies.
* Arrivals from the Dark, it's briefly mentioned that the US is now called the USC (United States and Canada). How this is achieved is not explained, although it can be inferred that the unification was peaceful.
* Arrivals from the Dark, many major cities get hit with smaller falling alien ships full of antimatter, with the casualty count in the tens of millions, not to mention all the material damage. Earth recovers remarkably quickly in the sequel, though.
* Arrivals from the Dark, mind you) and promises to stop his philandering ways.
* Arrivals from the Dark occasionally experience vivid dreams that are based on the memories of their ancestors. They are able to move within the dream, but only to an extent that their ancestor has experienced (i.e. if the ancestor in question has

not gone into a building, then his descendant can't go into that building in his dream).
* Arrivals from the Dark refer to heavy Dromi warships as dreadnoughts because it's nearly certain suicide to face one of these monsters and their heavy plasma cannons in one of the patrol craft provided by the Lo'ona Aeo. On the other hand, a Dromi dreadnought is comparable to a human frigate in terms of firepower, while a cruiser can blast a dozen dreadnoughts with ease.
* Arrivals from the Dark series, although never actually done in the books. It is explained, though, that jump calculations need to be extremely precise with distance and gravity being major factors. While, theoretically, it is possible to instantaneously jump anywhere in the galaxy, nobody actually does this as they would not know where they would end up. As such, most jumps are relatively short-range (several parsecs). This is known to play havoc with any military plans, as each ship jumps individually, often causing them to end up spread out all over the system. On the other hand, in-system jumps are usually fairly precise.
* Arrivals from the Dark series are a race of shapeshifters whose normal form is a shapeless pile of flesh. Most are able to shift at will to mimic any race (down to internal structure to fool any scan) and even specific beings. Due to their nature, they are, essentially, immortal. After all, what is aging to someone who can simply turn into a younger version of himself? They are also able to recover from massive damage. They are pretty neutral and prefer to stay hidden. They still send out emissaries to secretly monitor a given race and, occasionally, help or subvert them for the good of the galaxy at large. One of the key characters is a Proteid with a birth defect. He can only morph into a species once, at which point he is stuck as that form for the rest of his life, able only to affect fairly minor changes (height, skin color, body shape). Even turning into a member of the opposite sex is impossible, as that involves major changes to internal structure. Named Exile for this defect, he chooses to go to Earth (in the 13th century) as an emissary, as his people see the potential in humanity. He assumes the form of a human male and begins to observe humanity.
* Arrivals from the Dark series is spread out over centuries and is (mostly) focused on members of the same family, this trope is in effect with almost every new title. The protagonist of the second book is the godson of the protagonist of the first book. The protagonist of the third book is the great-grandson of the second book's protagonist. The next book's protagonists are his son and daughter (well, mostly the son). Averted in book 5, as one of the two POV characters is book 4's protagonist, while the other one is his sister's ex-husband. Book 6 jumps forward and makes the protagonist a descendant of book 4's protagonist's sister and her ex.
* Arrivals from the Dark takes into effect, making it very difficult to move, and they eventually get crushed by their own weight.
* Arrivals from the Dark that appears to stretch as far as the Magellanic Clouds.
* Arrivals from the Dark, the Dromi Empire is internally known as the Clans. Even the Faata technically means "the people of the Third Phase". On the planet Osier, the dominant Empire (which also fits) is also called the Seven Provinces. Four of these provinces don't have proper names are are instead named after the times of day: Dawn Province, Midday Province, Day Province, and Dusk Province. There are also nations called the Island Kingdom and the Archipelago Principalities.
* Arrivals from the Dark, the number of fleets in the USF is increased. Eventually, after a series of wars with other races, the USF becomes the most powerful military force in the known space. After the formation of the Earth Federation, it's renamed to the Earth Federation Space Forces.
* Arrivals from the Dark, the Orion Arm of the galaxy is divided between several galactic races, some of which have been in space for millennia, while one is known to have been star-faring for tens of thousands of years. Despite this, no race has more than a few hundred colonies. This is because habitable planets are few and far between. The Haptors have been in space for over three millennia and have about two hundred worlds. But their territory also includes thousands of systems they don't bother settling because they have no habitable planets. Humans have gotten good at

terraforming barely habitable planets (after practicing on Mars), but it seems that only the Solar System has space habitats and domed cities on airless planets and moons (and only because many of those were built before humans got interstellar travel).
* Arrivals from the Dark. The subsequent novels shift the Annihilators into the more common variety of weapons with missiles and magnetic weapons relegated to ground-based use (no one in their right mind would use antimatter weapons in an atmosphere). Plasma weapons remain as secondary weapons for capital ships and primary weapons for fighters.
* Arrivals from the Dark, two of the first human extrasolar colonies are named Baal and Astarte.
* Arrivals from the Dark was found where the ruling clans also used genetic engineering to make themselves physically distinct from the people below them. Some of those changes turned them horribly ugly (e.g. giant noses, enormous ears, long breasts that reach the ground).
* Arrivals from the Dark, whose homeworld is split into a number of clans/subspecies, dominated by the Ni and the Poharas clans, who even have different cultures and governments (the Ni are technocratic and secular, while the Poharas are deeply religious and have an empire). Most Kni'lina colonies tend to belong to a particular clan, but at least one is evenly split between the Ni and the Poharas, with plenty of tension on that planet. In fact, during the Human-Kni'lina War, only the Ni and their affiliated clans were involved in open hostilities with humans, the Poharas maintained their neutrality.
* Arrival. The third game opens with Shepard in custody over this very incident, before he is released and free of all charges when the Reapers finally show up to invade Earth.
* Arrival to keep the Reapers at bay. The mooks are absolutely terrified by him/her. Lampshaded during the main game by Garrus pointing out that the Reapers killing Shepard only meant pissing him/her off.
* Arrival, when Shepard and Dr. Kenson escape from the Batarian prison, some guards arrive a bit late to stop them... and find themselves on the wrong end of their escape shuttle.
* arrived and took on the stuffy role, before he joined the Watchers Council, so he had always been someone you didn't want to cross, and had merely hidden it under the tweed-clad librarian persona.
* arrived at Spider's cafe leading a konga-line of Ballet Dancing Okama. It would be a moment of awesome if it wasn't upstaged by many of the other things he did later.
* arrived in pairs: one a higher-status officer, the other a low-ranker who would shine his superior's shoes, fetch his coffee, etc. Douglas insisted that all his students were equal and put an end to this practice.
* arrives, mentioning that a famous celebrity has a sex tape only garners mild interest. However, Naruto still strictly enforces that the age of consent is eighteen Earth years (or roughly fifteen Erius years). It certainly helps that eventually all citizens of the Celestial Empire are implanted with a microchip at birth that acts as perfect birth control and cannot be turned off until they're twenty-five.
* Arrogance for Mannimarco, but he does survive as he appears in (chronologically) later games in the series.
* arrogance. His arrogant attitude toward, and outright abuse of subordinates such as Catra and Shadow Weaver contributes to their disaffection, which has disastrous consequences for him. His arrogance toward the "inconsequential" Adora/She-Ra blinds him to the real threat she poses to the Horde.
* Arrogant Bastard Ale There used to be a comments section, and complaints weren't tolerated - because if you complained, then you aren't a bastard enough to drink this beer.
* arrogant bastards (High Elves), xenophobic bastards (Wood Elves) or murderous bastards (Dark Elves).
* Arrogant God vs. Raging Monster: Personal hate between the ace and the berserker.

* Arrogant Kung-Fu Guy: Combines powerful fighting ability with a huge arrogant streak.
* Arrogant Kung-Fu Guy: I can kick your crooked ass with my martial arts skills!
* Arrogant Kung-Fu Guy: I'm more skilled than you! I can knock you out with my eyes closed!
* Arrogant Kung-Fu Guy probability of failure and drag his feet into helping as a result (at best) rather than admit the infinitesimally small chance that he's wrong.
* Arrogant Kung-Fu Guy was really no less than Tai Lung deserved at that point.
* Arrogant Worms - "Killer robots from Venus" (there's nothing wrong with them though)
* Arrogant Worms's song "Car Full of Pain" — complete with a verse describing how it is possessed by the Legions of Hell.
* Arronax suffers from this trope as well; his backstory plays him up as a terrifying force of destruction who
* Arrow 18 Mission Logs: First contact between Earth and Equestria is from a ship from Earth to investigate the Equestrian world (namely the fact that it's sun is orbiting the planet, and not the other way around) and discovering signs of civilization.
* Arrow, 6'2.5". In all her scenes with him, Felicity is wearing heels, and he still towers over her.
* Arrow absolutely nobody likes, even those ostensibly under her command... until roughly halfway through season 4 when she gets taken hostage. After it's confirmed that the sociopathic Waller will let her entire staff be killed without even blinking, the leader of the terrorists immediately shoots her in the head in disgust and starts bargaining with the next best candidate instead.
* Arrow a flashback shows that when the "Queen's Gambit" sunk, three survivors made it to a lifeboat: Oliver, his father and an unnamed crewmember. Once they realized that there was no immediate rescue coming they inventoried their supplies and Oliver's father figured out that three people would run out of drinkable water long before they could reach any land. He then promptly pulls out a gun, shoots the crewmember dead and then kills himself. This way Oliver would have a chance of surviving long enough that he could reach land. Oliver survived but the experience messed him up really badly and he became obsessed with trying to make his father's sacrifice meaningful.
* Arrow, after Laurel deduces that the List is a list of people in Starling City who can be blackmailed over past misdemeanors, this allows Team Arrow to determine that the man behind the Dark Archer must be one of the city’s elite from five years ago who isn’t on the List.
* Arrow. After Oliver Queen is accused of being the hooded vigilante, he throws a big party at his place that means there are plenty of witnesses when the Hood is seen elsewhere beating up some criminals (it's actually John Diggle wearing his outfit).
* Arrow. After Sara Lance is murdered, Oliver Queen shuts down his emotions during the hunt for her killer, despite a tearful Felicity Smoak trying to get him to unbottle his grief over a woman he once loved. It's too much for Felicity who decides to quit Team Arrow. At the end of the episode when the killer is still uncaught, Oliver finally cracks and breaks down in tears.
* Arrow after some struggling with a defibrilator discharge at his head. Dig gets up and says a single word on the matter: "Clear".
* Arrow and Ace, The Peacock, one of the most popular vigilantes in San Francisco, has bright blue hair. Interestingly, Andrew, the head of The Peacock Fanclub has the same blue hair, not to mention the same height and build. A number of character theorize that there is some connection between Andrew and The Peacock, but due to the different mannerisms and ticks Andrew uses while The Peacock, no one has guessed that they're the same person.
* Arrow and Ace type story where everyone in the world has superpowers. It follows multiple characters and their struggles with both accepting their powers and more typical teenage concerns.

* Arrow and Ace uses this as a premise; every person in the world (above the age of puberty) has a power.
* Arrow and Deathstroke emerge. Yao Fei tells Oliver to run, barely buying him time to escape before he gets knocked out and dragged away.
* Arrow and Oliver had to put her in jail. Sara Lance is a member of the League of Assassins, who while an ally, is much more ruthless than he. Isabel Rochev turned out to be the Ravager and working with Slade. Lampshaded in season 3
* Arrow and says that arrows are inefficient projectiles and he's surprised people are still afraid of them. So why did he train the Dark Archer in their use? Ra's would disagree for that matter, having trained his daughters to be highly skilled archers. Arrows are kind of the League's thing.
* Arrow and the Green Arrow punching each other in the face in a cartoonish way (as in literally taking turns).
* Arrow and the Longbow Hunters are in so they can't get to the weapon. When Felicity can't bring herself to do it since that would mean Diaz escapes again, Curtis does it for her.
* Arrow arrive in Gotham following a lead, Oliver suggests looking up an old socialite associate of his who has connections. When Barry asks if Oliver slept with her, Oliver legitimately doesn't remember.
* Arrow as a memorial. Because Team Arrow are reluctant to believe that Oliver is dead, Malcolm Merlyn retrieves the sword and brings it back to the Arrowcave so they can run a DNA test on the blood.
* Arrow as Felicity, who was only a regular for six seasons but appeared in every episode during that span.
* Arrow as "his balls", only for Curtis to try to correct him. Early on, probably accidental, but done on purpose by season 6.
* Arrow, as one of the tattooed names is the brother of John Diggle, the first man Oliver Queen recruits for Team Arrow.
* Arrow assigned by his mother so he can carry out his secret vigilante activities.
* Arrow, a superhero in his own right. In several later episodes, he works alongside Oliver as an equal.
* Arrow at first but is revealed to be an over-zealous, militant bastard in "Broken Arrow" when he enacts a hostile takeover of A.R.G.U.S. and plans to kill thousands of Hong Kong citizens with the Omega.
* Arrow: At his best, the titular hero usually combines all four types.
* Arrow, at least in terms of their faces. Oliver is heavily scarred on his chest and abdomen, but never his face.
* Arrow. At once point when Oliver is talking to Sara, her father turns up to talk about his other daughter's problems with alcoholism. To prevent him coming inside, Oliver goes outside to speak to Quentin, with Sara listening to their conversation from the other side of the door.
* Arrow. Averted in Season 8 when the deaths of everyone on Earth 2 is treated with the appropriate depth. In particular, the episode focuses on Laurel's grief over the loss of her entire universe and everyone she loved. The Monitor on the other hand treats the destruction of Earth-2 as a "necessary sacrifice", showing little regard for the lives lost and simply warning that it was just a taste of what the Anti-Monitor is capable of; the only person who could or would treat the loss of an entire universe with such detachment is a godlike being who has an infinite number of universes to consider.
* Arrow Barry admits that they would be perfect for each other if they weren't too busy pining over other people.
* Arrow before heading out for a duel to the death with Ra's Al Ghul to save his sister from the clutches of the League of Assassins:
* Arrow between Oliver and the erstwhile-minor character Felicity so much that the showrunners ended up being motivated to write it to the show.
* Arrow. Both of which require no real special effects and can instead be done solely by the actors. Another trick, telekinetically stopping projectiles in midair, is also fairly cheap; as opposed to fireballs or lightning anyway.
* Arrow, brings Slade Wilson into their camp with his hands apparently tied behind

his back.
* Arrow broadcast announcing that he has secretly addicted large numbers of innocent people to the drug Vertigo, of which he controls the only supply. He concludes with, "I'm Count Vertigo, and I approve this high!"
* Arrow, but the Hood. The hood was worn by his first mentor Yao Fei and passed to his daughter Shado before Oliver wears it. Some members of Team Arrow also copy his style, such as Roy Harper (as Arsenal) and Thea Queen (as Speedy) though they prefer a red hood. Villains such as the League of Assassins use the hood coupled with a mask.
* Arrow by only incapacitating Prometheus to save William, but the latter just kills himself, ending the season on a massive cliffhanger as the entire island explodes.
* Arrow: Chimera uses a WayneTech prototype power armor to fight most of the heroes at the same time. Once they disable the power supply, he can't even support his own weight.
* Arrow cites this trope for the cliffhanger ending of the episode "Monument Point", when Oliver Queen and John Diggle enter a room to find Damien Darhk surrounded by vast magic forces that he's been able to summon by the nuclear destruction of an entire town.
* Arrow clear that Oliver and Laurel had one of these in the Dominator-Dream World.
* Arrow consisted of Oliver Queen (white guy), John Diggle (black guy), and Felicity Smoak (Jewish white girl).
* Arrow. Curtis starts to point out that Ghost Initiative is just a cooler name for the Suicide Squ—, but Lyla cuts him off.
* Arrow, Damien Darhk's rivalry with Ra's al Ghul results in him leaving the League of Assassins and forming H.I.V.E. Talia al Ghul also forms her own unnamed all-female cult. Later on, after the League is disbanded, it's revealed that Malcolm Merlyn created the Thanatos Guild out of the former members of the League still loyal to him.
* Arrow debuted), while others are pretty obscure (in one episode, Oliver is wearing a prison jumpsuit with the number 399471. This is the HTML hex code for the specific shade of green used on Green Arrow in the comics.)
* Arrow described a Strela launcher (with a range of under ten kilometers) as a SA-300 (a much larger missile with a range of as much as four hundred kilometers) and claimed it had a range of 2,400 kilometers, before using it to attempt to shoot down an aircraft flying straight overhead.
* Arrow. Diggle then picks up the earpiece to let Oliver know what happened.
* Arrow doesn't feel the same way, because she realized what a monster her father was. The only thing that she's upset about is that she didn't get to kill him.
* Arrow episode "Dodger". He straps explosive collars to people and has them steal for him; removing the collar and shocking them into unconsciousness once they have handed over the loot.
* Arrow. Even before that, she dated Oliver, betraying her sister, Laurel, who was his very first girlfriend.
* Arrow feature flashbacks to what Oliver experienced during his 5 years of being presumed dead, which tend to be their own "B plot" for the episode. They also have a slight blue tint to them, probably to both induce a sense of cold and unease and also to help distinguish these scenes from the present-day plot which aren't tinted.
* Arrow. Felicity at one point jokes that she "may be blonde, but... not that blonde" in reference to one of the ridiculous cover stories that Oliver and Diggle tried to fool her with; in fact, Felicity is a genius but is also actually naturally a brunette and dyes her hair blonde. Her mother, however, who is a natural blonde, fits the stereotype to a much greater extent.
* Arrow: Felicity Smoak acts as Mission Control to Team Arrow. In Season 4 she's given the codename "Overwatch".
* Arrow: Felicity Smoak. In one episode she went to a party without her glasses and just looked gorgeous instead of "Smoaking" Hot!. Sorry.
* Arrow, female characters in more recent seasons are mostly defined by their

relationship with Oliver, and Felicity is a prime example of that.
* Arrow for a new Suicide Squad in "Past Sins". Given that the applicants are criminals with mental issues who aren't particularly enthusiastic about being implanted with explosive devices to ensure their loyalty, they're all terrible by default.
* Arrow, former unofficial US black-ops agent, and a member of the Russian mob. Throughout the show, he goes from a murderous vigilante to a man who avoids killing whenever possible, though it's never completely off the cards...
* Arrow, for Season 6 John Diggle had to take on the Green Arrow mantle. Unfortunately he's a mediocre archer, so the team took a crossbow design and created a new rapid-fire loading system for it. As an expert gunman, he transitions easily to the crossbow and its innovative rapid-fire lets him go up against guys with submachine guns.
* Arrow for the fifth season was actually the weakest thus far in the series, and his goal was positively minuscule in comparison to the previous four.
* Arrow from white in the comics to this. He's from Australia and the actor who plays him is half-Māori, but other than that we have no clue what his ethnicity is.
* Arrow given that she's actually his half-sister, a fact only revealed after Tommy's death.
* Arrow gives her a costume that shows her face, giving Lotz the chance to showcase her skill set with less use of a stunt double.
* Arrowgram: Sending someone a letter by shooting an arrow near them with the letter attached to the arrow.
* Arrow had a case with replacements: Dinah was Fernanda Baronne, until her sister Flávia Saddy had to take over.
* Arrow had an episode revolving around a vigilante who owned a boxing gym, based on Wildcat of the comics. While no one boxed, the episode did feature Oliver's famous boxing glove arrow, so it counts.
* Arrow had flashbacks from five years before the first episode, they advanced one year each year like the main story and these flashbacks also lasted for five years connecting the last flashback to the first scene of the series.
* Arrow handled its main pairing) and was when the fanbase began to seriously criticize how the-then showrunners (Marc Guggenheim and Wendy Mericle) handled the show's direction. When Beth Schwartz took over as showrunner for the final two seasons, she made a point to improve and, most importantly, reduce the focus on the Olicity angst, a decision that was universally welcomed.
* Arrow happened during the five years he was supposedly marooned on Lian Yu doesn't help.
* Arrow: Happens to Laurel in "Midnight City" as she tries to rescue the aldermen from Brick's van. She throws several punches at Brick which he shrugs off with no effect, before announcing that he doesn't like hurting women and casually tossing her aside.
* Arrow has a variation when a man working in his office at night turns off his computer, and the now dark monitor reveals the Arrow and Arsenal standing behind him.
* Arrow has quite a lot of these, due to having a whole flashback storyline each season that is told alongside the present-day storyline. A large amount of the characters end up dying before reaching the present day, so all count as this trope. They include (but not limited to): Rebecca Merlyn, Robert Queen, Yao Fei, Edward Fyers, Shado, Anthony Ivo, Akio, Conklin, Baron Reiter, Taiana, and Gregor.
* Arrow has struck something like this with most of the cast. Being 47, he's over ten years older than Stephen Amell (the lead of the show), and twice the age of Colton Haynes, Emily Bett Rickards, and Willa Holland, yet, going from videos they've made on set, he seems to be best friends with the kids on set.
* Arrow have her past self's memories. Writer Brad Meltzer even intentionally invokes Romeo and Juliet when it comes to the two.
* Arrow have openly laughed that "you look at the first few episodes and it feels like a totally different show." Indeed, Oliver working on his own was handled in a

rough way and the island flashbacks were seen as a major distraction and time-waster. It was the addition of supporting characters Diggle and Felicity that began to spark the show up and then the flashbacks becoming just as important to the overall arc that made the show a hit.
* Arrowhead: In one comic, Cody sees a comic book character that looks like Arrowhead, so he travels back in time to ask the writer where he'd gotten the idea for his character. The writer tells him about seeing a strange figure in the woods as a boy. Cody jumps back to the time he'd specified, and sees a meteor heading towards town. As Arrowhead, he deflects the meteor, and is spotted in the aftermath by a group of children, one of which would grow up to be the writer; Cody-as-Arrowhead himself had been the writer's inspiration.
* Arrow. He came home to a beautiful toddler who didn't recognize him and didn't get the chance to get to know him before PTSD-driven aggression drove him out of his home.
* Arrow he finds himself in the embarrassing position of contacting Vesper Fairchild for information when he can't remember if he had sex with her or not. Turns out she had, and hangs up on him.
* Arrow he's gone through, it's not surprising he needs a little help in learning to be happy again.
* Arrow. In "Betrayal", the Hood uses an arrow with pyrotechnic warhead to blind a couple of sharpshooters for a moment so he can shoot them in turn.
* Arrow. In "Burned", Laurel Lance comes home and busts her boyfriend Tommy Merlyn drawing up a list of Reasons Why I Deserve A Drawer.
* Arrow. In "Crucible", Oliver Queen shows up at a Queen Consolidated investor party right after taking on a gang armed with automatic weapons as the Arrow, and their host calls him on the fact that he has blood on his face. Felicity Smoak unconvincingly tries to pass it off as this trope.
* Arrow: In "Draw Back Your Bow", Ray Palmer's speech announcing the rebranding of Queen Consolidated reworks a couple key phrases from Oliver's opening narration:
* Arrow in Hell to his Jewish girlfriend, and the two go about their business with no further interest in the very real eternal punishment of the netherworld.
* Arrow. In "Home Invasion", the hitman Mr. Blank holds up a police badge to the peephole to get Laurel Lance to open the door for him. It doesn't work as she's the daughter of a police officer, and realises the badge number doesn't match the rank of the police lieutenant he's impersonating.
* Arrow. In "Honor Thy Father", Oliver Queen shows up at Laurel Lance's apartment with a bag, and when she asks him what's in it, he tells her, "Every day I was on the island, there was something I thought about doing, and I told myself that if I ever got to do it again, I would do it with you." It seems like he's talking about sex, and the bag contains condoms. However, he then says, "Eat ice cream," and it's revealed that the bag has mint ice cream in it.
* Arrow: In one episode, tech genius Felicity claims that she has a teraflop of data to sort through. Teraflops are used to measure processing speed, not quantity.
* Arrow in prison, Oliver Queen becomes a lot more concerned with how the consequences of his actions effect others, including the people he's helped put in jail. Oliver becomes less volatile, now preferring slower, methodical investigation that leads to legal, lawful prosecution and talking in order to de-escalate potentially violent situations rather than his previous method of making demands and putting arrows in people who don't comply. In contrast to the eponymous name, the Green Arrow has barely used his bow and arrow post-prison. Additionally, the biggest change is that Oliver is now deputized and working with Star City PD instead of acting as a vigilante as he did in the first six seasons.
* Arrow: In "Public Enemy", Arrow, Arsenal and Canary escape from the Vigilante Taskforce by leaping off the roof of the building where they are cornered; firing grapple lines to slow their descent as they fall.
* Arrow in Season 2. It was first sought by the Clock King before Team Arrow defeats him and gets ahold of it. Later, Slade Wilson breaks into their HQ and takes the skeleton key for himself.
* Arrow in Season 2, the affair is shown to hang over all three characters

throughout their lives.
* Arrow: In season 3, Ra's al-Ghul, impressed with Oliver Queen's tenacity, desires for him to be his heir and the new leader of the League of Assassins, making a threat-veiled-as-prediction that Starling City would turn on him. When Oliver refuses, he decides to have his men dress up like the Arrow and start killing criminals, making good on his threat.
* Arrow: In Season 4, Felicity Smoak is forced to redirect a stray nuclear missile from hitting the metropolitan city of Monument Point to its suburb of Havenrock, reducing casualties from millions of people to a "mere" tens of thousands. Things get awkward come Season 5, when one of Team Arrow's New Recruits, Rory Regan, happens to be Havenrock's sole survivor.
* Arrow: In Season 4's "Restoration" Felicity refers to herself, Oliver and Diggle as "Original Team Arrow" while the other characters are away and even comments how long it's been since the three of them have had time alone. Original Team Arrow or "OTA" is a long-standing fan nickname for the fan-favorite trio, and a major complaint during Season 3 was that their dynamic was sidelined to accommodate a new batch of heroes.
* Arrow: In "Suicidal Tendencies", Senator Cray stages a fake terrorist attack so he can cast himself as a hero to help his bid for President.
* Arrow intends to destroy everything he cares about. She points out that this is stupid. Their enemy knows he cares about her, has a grudge against her too, and isn't going to leave her alone just because they broke up.
* Arrow in that Oliver manages to beat the bluff, but Fyers is actually already aware of who he is anyway.
* Arrow in the fifth season premier, complete with a flashback to when he was introduced to the skill of dislocating his own thumbs.
* Arrow in the first few episodes, Oliver Queen enters a nightclub and when his bodyguard John Diggle is stopped from following, claims he's never seen Diggle before in his life.
* Arrow. In "The Promise", Professor Ivo uses sodium pentothal on Oliver Queen. However Sara Lance has worked up a picrotoxin to counteract the effects of the barbiturates in the sodium pentothal and given it to him beforehand. He intentionally gets captured and proceeds to feed Ivo false information.
* Arrow: In the Season 8 episode "Purgatory", the plane where Roy Harper, René Ramirez, and Dinah Drake are traveling to Lian Yu gets shot down. When they find Roy he has an arm trapped under the wreckage. Unfortunately, the team doesn't have the luxury of time to try and remove it due to the high potential for an ensuing explosion from the remainder of the wreckage and the approach of enemy soldiers, so they are forced to amputate it so they can all escape with their lives.
* Arrow in the special's penultimate episode, two episodes before his own show's finale.
* Arrow. In "The Undertaking", Oliver Queen slugs and arrows his way through the goons in the corridor outside the room where Walter Steele is being held prisoner.
* Arrow: In "This Is Your Sword", Felicity throws her tablet at a member of the League of Assassins in desperation. She watches amazed as the assassin starts to fall to the ground. However, as he finishes falling, she sees he has an arrow in his back and Malcolm Merlyn is standing behind him with a bow. "Oh. That makes more sense," she says to herself.
* Arrow, "Irreconcilable Differences", forcibly shilled how "in love" Oliver and Felicity were, as if they were trying to convince the fans of that fact.
* Arrow is capable of some ridiculous excuses, particularly when it comes to Felicity before he just gives up and lets her in on the secret. He is somewhat better at deceiving his family and friends (not to mention the police) but mostly that's because they write his odd behavior off as PTSD from the island. Lampshaded when Diggle tells him "your BS excuses are getting worse".
* Arrow is full of this for Oliver Queen in Season One. Although there's a healthy dose of guilt added to the mix. Starting a relationship with Sara Lance, then Felicity Smoak (both members of Team Arrow) solves much of the problem, but not all

of it.
* Arrow is seen as pretty much the blueprint for how one can redeem a once-beloved superhero show that had fallen into disrepute.
* Arrow is set twenty-five years in the future, but Oliver still has a tendency to brood. Fortunately, both Felicity and their daughter have a knack for smoothing away his grumpiness.
* Arrow is this when she becomes the new Black Canary. She gets beaten up easily for how unskilled she is, but she makes up with much force.
* Arrow, it's brought up several times that vigilantes taking care of criminals is making the cops look bad and has a negative effect on morale. Legally, the city varies between trying to ignore the vigilantes to actively hunting them. This usually depends on whether or not a villain is framing them at the moment. In Season 7, Team Arrow is even legally incorporated into the Star City Police Department (though making this work in practice is shown to be rather difficult).
* Arrow? Jesus Christ.” As various villains find out over the course of the series, it is an absolutely terrible idea to go up against the Queens.
* Arrow, John Diggle is officially the driver and bodyguard of Oliver Queen and served three tours of duty with the US Army's Special Forces. He's rarely ever had to defend Oliver, who is a badass vigilante all on his own, but that doesn't stop him from kicking plenty of ass on his own.
* Arrow kidnaps Laurel. Oliver shows up to save her, but Blood gains the upper-hand in their fight. Right as he's about to kill Oliver, Laurel guns him down.
* Arrow Laurel and made little effort to stay in touch, and most of her appearances are concerning Sara as if that's all that makes her come back to Star City.
* Arrow: Laurel and Sara are very close, once they repair their relationship anyway, with Laurel being very protective and nurturing towards Sara.
* Arrow lets down her walls around family, just like her father Oliver.
* Arrow like when they first met, only to find Diggle has locked the car door in advance.
* Arrow, Lyla's response to getting shot is, "Don't make a fuss." Her daughter can only say, "Mom's hardcore." Felicity will also pick up a weapon to defend her kids without hesitation.
* Arrow: Malcolm Merlyn does this in "The Magician"; escaping from Nyssa and Oliver by dropping a smoke bomb and vanishing under the cover of the smoke.
* Arrow: Malcolm Merlyn gets his left hand chopped by Oliver in a duel for the title of Ra's al Ghul. He gets a cybernetic replacement a few episodes later.
* Arrow, might have worked if the dimensions had been vaguely similar to that of the truck's freight container.
* Arrow mob boss. The charge will never hold up in court, but it doesn't have to: the prison he's being sent to is filled with members of the murdered gangster's gang; they'll kill him long before his case gets to trial. He's soon telling Laurel everything she wants to know.
* Arrow, most egregiously early in Season 2. The Arrow is trying to stop the Triads from stealing medical supplies bound for a beleaguered hospital in the earthquake-ravaged Glades district of Starling City. When the police arrive on the scene, do they focus on the people robbing doctors? No. They attempt to capture the only person capable of bringing China White and Bronze Tiger in non-lethally, allowing those two to escape and attempt another heist.
* Arrow: Much of "Broken Arrow" is set inside Iron Heights and focuses on Roy's attempts to survive in prison after he confesses to being the Arrow.
* Arrow never sank and Oliver never became a vigilante. Their normal memories are suppressed, but the machine is unable to lock them away totally, with the heroes having flashes every time they encounter someone or something they knew in the real world but shouldn't know in the illusionary world. Eventually, they remember everything, and find the portal that enables them to escape the illusion.
* Arrow of her own). Thankfully after a few years, her optimism has rubbed off on him and he's noticeably more hopeful about life.
* Arrow of Oliver, Diggle and Felicity and they gain more members and allies throughout the series.

* Arrow often, with Felicity Smoak in particular. When she has a new Arrowcave built, Felicity makes a point of including the salmon ladder as she enjoyed watching Oliver Queen work out on it.
* Arrow of the Green Arrow that becomes a bow-wielding serial killer to get his attention. Unlike in the comics however, she was not a spec-ops agent driven made by an experiment. Instead, she was a police officer that possessed an attachment disorder; fixating on a single individual and projecting her own extreme emotions on to them to a murderous degree, becoming fixated on the Arrow after he saved her from a mugger.
* Arrow of the previous season, is still out to get them. Naturally, he tracks them down and almost kills them both, prompting Felicity to send William away to a boarding school in Cambridge, and herself to return to Star City and reunite Team Arrow to take down Diaz herself.
* Arrow of the title character, an obsessed fan of Arrow trained in archery who has a psychological inability to form permanent relationships.
* Arrow of the Week in Season 1, followed by a more generic Criminal of the Week in Season 2.
* Arrow, Oliver and Felicity discuss relationship issues over the radio, while Oliver (as Green Arrow) is on a mission. Diggle opens his line, stating that he can hear everything. When Felicity asks if everyone can hear their conversation, Black Canary and Speedy simultaneously confirm this.
* Arrow, Oliver and his son often butt heads, but he and his daughter get along beautifully. He is very protective of her, and he tends to let her have her way. Felicity finds this a little frustrating. "I can't be the bad guy all the time," she complains. "I don't have a mustache to twirl.”
* Arrow. Oliver Queen does this so often that John Diggle jokes he should call himself the "Guilt Arrow" instead of the "Green Arrow".
* Arrow: Oliver Queen has a one night sand with the villainess Isabel Rochev. It's later revealed that Isabel had an affair with Oliver's late father Robert.
* Arrow, Oliver Queen spends a great deal of time evading capture. The bad guys want him dead for ruining their criminal enterprises. Law enforcement wants him captured because of the murders he's committed as a vigilante. Covert ops want him for his value as an operative. People from his past show up wanting revenge for actions he's taken that created collateral damage.
* Arrow once performed a bit of difficult computering, and shouted out, "Who's the best hacker?" The entire rest of Team Flash responded, "Felicity Smoak!"
* Arrow) or them arguing over issues that could be avoided by talking it out like adults.
* Arrow, preferring espionage, intimidation, and then punching his way out.
* Arrow: pretty much Oliver's preferred method of killing other than his bow.
* Arrow pretty much stalled that opportunity until it was gone, one has to wonder if it would've only been a matter of time otherwise.
* Arrow, prior to the start of the series, Oliver spent several of his years stranded on the island of Lian Yu where he is caught up in the many dangers including militant groups and criminals. He eventually finds allies on the island and partakes in wars with the other side to thwart their plans.
* Arrow: Ra's al Ghul forces his daughter Nyssa and Oliver Queen into one, much to the Nyssa's disdain (Oliver also flinched when it was announced, implying his discomfort). At the end of the next episode, Nyssa attempts to stab Oliver during the wedding. Although later events make it clear that they got the marriage annulled (if it was even valid in the first place), Nyssa occasionally snarks about it, such as greeting Oliver's sister as her sister-in-law.
* Arrow rather than to Oliver's age (Oliver would be around 30 at the time).
* Arrow: Rebirth", as she isn't fit enough. Also, his favorite piece is the drumstick.
* Arrow: Rebirth, it's revealed that the central headquarters of Division X (the secret government agency that deals with the Dominators) is located at Area 51. Most of the Justice League is naturally shocked to learn that.
* Arrow: Rebirth to piss off the League of Assassins, because unlike the other

organizations, they're integral to the balance of the world, so he can't do anything to get rid of them this time around.
* Arrow resulted in the dissolution of his marriage. After he was imprisoned for drawing a gun on his wife, Lawton was approached by an agent of H.I.V.E. who offered him money and freedom in exchange for killing a man named Andy Diggle and the rest is history.
* Arrow, Roy volunteers Sin for a makeover from Thea so that Sin can look sexy/slutty and pose as a hooker as bait for a vicious hooker assaulter. Thea obliges, saying they'll do something about her hair, and Sin asserts that nobody touches the hair.
* Arrow. Sara Lance even before she joined the League of Assassins. In the flashback scenes in Lian Yu, Slade Wilson is holding Sara's ex-boyfriend Oliver Queen hostage and torturing him. However Slade needs an engineer to repair his ship, so he offers to make an exchange. The engineer is naturally reluctant to work for a psycho like Slade, so Sara knocks him unconscious and straps a bomb to his body in the hope of blowing Slade up after they make the exchange.
* Arrows books even before Elspeth returns home with the magical aid she was sent to seek.
* Arrow Season 3, Laurel decides she wants to be a vigilante and asks Oliver to train her. He refuses making it clear he doesn't think she's capable of doing it. So she does it anyway, and while Oliver is missing and presumed dead works with the rest of his team. When he comes back, he kicks her off the team once again indicating he doesn't believe she's capable of this life. Fed up, she finally calls him on it.
* Arrow's Fall. Having once had a just-friends sexual relationship, they were able to be very convincing about it.
* Arrows Fall immediately cured by True Love. Bonus points to Lackey for that.
* Arrow's Fall trilogy, Herald Talia and Herald-Princess Elspeth catch a traitorous nobleman this way.
* Arrow Shirts' classic commercial. The perfect way to smash a stogy image with a joyful, colorful noise
* Arrowsmith is about the title character's gradual growth into one in a fantasy version of World War One.
* Arrowsmith is a very traditional First World War story, complete with analogues of gas warfare and all the other horrors.
* Arrowsmith is fought with and by dragons, spells, vampires and all other kinds of magical weapons and beings.
* Arrowsmith series, the United States of America is known as the United States of Columbia due to the magical races choosing to reveal themselves during the signing of the Peace of Charlemagne, their version of what we call the Pax Nicephori in our world.
* Arrowsmith: The Prussian airmen's uniforms. Also various countries' infantry soldiers, who wear trenchcoats (natch).
* Arrowsmith, various fantasy races such as trolls live alongside humans; albeit as second-class citizens in many places.
* Arrowsmith where, at the forging of the Peace of Charlemagne (the Pax Nicephori in the real world), the various hidden magical races of the world decided to make their existence openly known to humanity, also joining in the peace treaty. The United States of America is actually the United States of Columbia in this series, which takes place during this world's version of World War I. Dryads, trolls, dwarves, etc. live among humanity, magic co-exists side-by-side with technology. The Industrial Revolution is causing a magical revolution, as spells become mass-produced for the first time in human history.
* Arrowsmith, who are seen serving as part of the Gallian colonial troops.
* Arrows on Fire, unless used as a psychological weapon or to light targets on fire.
* Arrow, so the training is more about learning precise control than gaining muscle.
* Arrow's Ray Palmer, so much. He's generous, friendly, and works as hard as, if

not harder than, anyone. He appreciates his employees and goes along with all of Felicity's quirks, such as her taking two different - highly suspicious sounding — calls while she's in a meeting with him. He also lets her take a sick day to spend time with her mom, even though he knows full well that she's fine.
* Arrows. The trope is depicted positively- the Heralds of Talia's fantasies aren't significantly more flawed in real life, nor did she expect that the job would be without danger. Most of all, it gave her comfort and hope during a very harsh childhood.
* Arrow, story arcs per season (though this formula ends with Season 5):
* Arrows trilogy, where Queen's Own Companion Talia (who might have to conduct a ceremony one minute and defend the Queen at knifepoint the next), has a formal gown which is specifically made to be practical to fight in — no train, for example, and detachable sleeves.
* Arrow suggests this was the fate of Oliver Queen, the eponymous Green Arrow, after becoming the Spectre and expending his life-force to recreate the multiverse. The final scene reveals that, in one of many possible futures, his wife Felicity Smoak followed him there twenty years later.
* Arrow tells Roy Harper to cut the yellow wire on a bomb planted under a stadium. Roy tells her there is no yellow wire. They end up using a Freon line from the stadium's air conditioning system to freeze the bomb instead. Added bonus: The Freon pipe that Roy breaks is yellow.
* Arrow that could have brought him back, but it turns out Diggle's just hallucinating.
* Arrow that Damien Darhk has magic. The team quickly concede the point.
* Arrow that highly trained covert operatives can stroll into whatever heavily-secured location they want because people keep leaving the doors unlocked.
* Arrow, that magic existed with its own community of users, and that the US government (at least) was well aware of the existence of hostile aliens since the 1950s. And yet none of this changed the world in any significant way until Oliver Queen returned to Starling City and put on a green hood.
* Arrow, the 5'5" Emily Bett Rickards (Felicity Smoak) spends most of her scenes with the 6'1" Stephen Amell (Oliver) and the 6'2" David Ramsey (Diggle). You can see where this is going. In fact, her Twitter bio used to say "I stand on apple boxes for a living."
* Arrow. The fact that the show has continued to prop her up regardless of the growing hatred of Felicity across every show's fandom and dropping ratings has caused many to speculate that Felicity isn't just an Escapist Character for the fan girls, but for the show runners and writers as well.
* Arrow: The first Count Vertigo takes three arrows to the chest, falls out a window, and lands several storeys below on a parked car. We're pretty sure he's dead.
* Arrow The first few episodes of season 7 have him in prison, trying to survive and keep a low profile hoping for an early release with a handful of the show’s previous villains gunning for him.
* Arrow the parents of the District 4 girl who died during the 74th Hunger Games kick off the revolt in District 4 by, while being interviewed about the Quell, drawing knives and cutting down several members of the camera crew (along with the mayor, his wife, and the Capitol liaison), doing so specifically to strike few in the hearts of the Capitol viewers.
* Arrow they had for wanting him dead was he tried to destroy the City, and this was 'against their code'.
* Arrow: This is Helena Bertinelli's plan to avenge her fiancé Michael, who was killed by her father because he thought Michael was a mole for the FBI (he wasn't — Helena was the one talking to the feds). She weakens his organization by anonymously assassinating several of his key officers and men, and then kills the head of the Triad (the prime suspects for the assassinations, of whom Frank Bertinelli personally accused right to their faces) to instigate the war. With the Bertinelli Family as weak as it is, they would assuredly be wiped out. Both Oliver and the police want to prevent this, as while a mob war would wipe

out one of the organizations, it would also likely involve several innocent lives getting stuck in the crossfire as well.
* Arrow This seems to lean more towards the "actually caring" side of the trope:
* Arrow, this was what Fyers was doing to Yao Fei in order to publicly make him a Chinese terrorist as a scapegoat. This plan never materialized since Oliver and Slade ruined his plans.
* Arrow this way and it gets mentioned several times, including the final episode when Thea accepts Roy's proposal of marriage.
* Arrow three of the female characters qualify: Laurel whose drive for justice and involvement with the Vigilante sometimes mean she has to fight off an attack using self-defense lessons (as opposed to actual martial arts/or battle training); Thea clocks a thug with a bottle in 1x23 to protect Roy; and Moira shoots the Vigilante when he comes to question her. Even Oliver himself counts in the flashbacks, as he starts out as a whiny, spoiled rich boy who progressively turns into a hardened bow-toting killer from his experiences over his five-year absence.
* Arrow uses a slightly more plausible variant with the line attached to an arrow and the vigilante either zip lining on his bow or using some kind of portable winch to rapidly ascend to the tops of buildings. No explanation as to where he's keeping all that rope.
* Arrowverse #3, Kara Zor-El wields twin sabers during a battle in a snowy dreamscape.
* Arrowverse alongside Barry Allen (who is arguably the most powerful superhero in all of Earth-1).
* Arrowverse began with no fantasy or science fiction elements, just a guy who was unusually good at archery, only introducing a couple sci-fi gadgets (an earthquake machine and a cybernetic eye) near the end of the first season. But as the franchise continued and added more and more spin-offs, the fantasy/sci-fi elements began to build up. Demons, aliens, shrink rays, time machines, parallel universes, psychic powers, zombies, ghosts, angels, mystical totems, giant robots, talking gorillas . . . and sometimes (especially if it's a crossover) you might get most of those things all in one episode.
* Arrowverse, but found them difficult to animate when they decided to make the aliens entirely CGI.
* Arrowverse crossover, Oliver brings it up, and Barry reveals that the toilets are just hidden in the wall of the cell most of the time.
* Arrowverse crossover, which has Nazi versions of Green Arrow and Supergirl being married. When Kara finds out about this:
* Arrowverse has a tendency to depict many characters as far more ruthless than their comics counterparts, even if they were already villains:
* Arrowverse has a variety of queer characters played by queer actors:
* Arrowverse has Mon-El. Given the ambiguous wording when he's talking about people he's slept with as well as his mentioned attraction to both Superman and Supergirl, Mon-El is apparently bisexual.
* Arrowverse has several series, all of whom are "Another Story" with respect to each other.
* Arrowverse, he still considers the thought of helping the police distasteful.
* Arrowverse. In a crossover episode, Music Meister uses the device to get to Barry, although it's implied he doesn't actually need it and merely wants Mon-El to follow him there.
* Arrowverse, Kendra Saunders, aka Hawkgirl, and Carter Hall, aka Hawkman, are lovers who've been with each other since ancient Egypt, finding each other only to end up being killed again and again by Vandal Savage.
* Arrowverse: Majority of its characters' backstories and the most important flashbacks happened in this decade.
* Arrowverse making a cameo despite not currently being a part of the Arrowverse). There are some humorous moments, such as almost everyone being ready when Barry walks in, clearly unprepared (not even shaven) and munching on a Big Belly Burger. Then again, it takes him only a second to get ready and speed out the door, once again annoying Oliver, who likes the more deliberate approach. He turns to Kara and

sees that she also managed to change in her costume in only a second.
* Arrowverse of Oliver and Kara, respectively, who are married. Supergirl is vocally grossed out by this.
* Arrowverse quickly took up the slack, leading the franchise into a new decade.
* Arrowverse retains his immortality by periodically killing and absorbing the life force of Hawkman (originally Prince Khufu) and Hawkgirl (originally Priestess Chay-Ara), while those two periodically reincarnate, although they typically have to regain their original memories before Savage can kill them. Savage has also learned that feeding the blood of one of the "hawks" to his followers grants them an extra 100 years of life, which is how he maintains their loyalty.
* Arrowverse's fifth season aged badly before it had even finished airing, due to its anti-technology message coming as the coronavirus pandemic of early 2020 pushed people into using technology to connect with each other on a massive scale as people were encouraged to physically avoid others to slow the spread of the virus.
* Arrowverse's Winn, this version is a grizzled (and bearded) veteran, who only cares about saving his world from the Nazis at any cost.
* Arrowverse the Book of Destiny, with which the doctor starts to rewrite the reality of Earth 1.
* Arrowverse. What didn't help matters is the first seasons of both shows were focused on a very specific arc at the centre of the characters' motivation, the Undertaking conspiracy with Arrow, and who killed Nora Allen in Flash. Once those were resolved, the writers didn't really have any plans going forward, so they've largely just made shit up as they go along.
* Arrowverse", when Barry Allen's first trip to Starling City sees him save Laurel Lance from jumping off a bridge before he is 'captured' by Diggle and Felicity to treat Oliver's recent poisoning. When Barry asks Team Arrow to look up the woman he saved, Oliver swiftly starts looking for Laurel rather than look for another woman in Starling City with that name, although this can be justified as him wanting to rule out the one he knows before he starts looking for someone else.
* Arrowverse when CBS decided not to renew the series. All shows crossover frequently; outside of individual episodes, there's been an annual crossover event since 2014 which sees most of the characters team up to battle a shared threat.
* Arrowverse", when Laurel comes to assist in the prisoner transfer when Thawne sets the pipeline to overload, Thawne takes advantage of the opportunity to restore one more part of the "original" timeline by trapping Laurel in a cell of the pipeline and setting off a minor dark matter explosion so that she gains her 'Canary Cry'. While Thawne's only purpose in doing this was to make it easier for him to return to his own time, Laurel's new power causes her to ruin Oliver and Malcolm's existing plan to subvert the League of Assassins, prompting Oliver to set up a new plan where Barry accompanies them back to the League base so that he can evacuate the entire League before Laurel destroys the mountain with her scream, destroying the Lazarus Pit and depriving the League of most of its resources even before Ra's is killed. Laurel also assists in Thawne's subsequent capture alongside Oliver, Barry and Firestorm.
* Arrowverse" when Oliver, Barry, Kara and their allies realise that Earths 1 and 38 have been merged into one universe. As far as the wider world is concerned, Star City, Central City and National City have always existed on the same Earth and their heroes’ respective team-ups still took place, but only those who directly interacted with people from the other worlds before the merge still remember the original course of events (so, for example, Iris and Winn still know about parallel universes even though they never travelled to the other world themselves, but as far as Alex Danvers is concerned the Flash and Central City have always been on her Earth). The heroes eventually determine that when their worlds merged, anyone with counterparts on both Earths would have merged into one person with the ‘stronger’ counterpart taking precedent, so essentially the weaker counterpart, whether from Earth-1 or Earth-38, has ceased to exist as an independent entity.
* Arrowverse (who incorporates her experience as a dancer into the Canary's fight style),.

* Arrowverse, with people wondering if he even left, as barely a second has passed.
* Arrow was at its lowest points, their subreddit re-dedicated itself to the two.
* Arrow wears his League of Assassins uniform in battle even after he left their organization.
* Arrow. We then see Oliver Queen discovering the dead boss and placing a call to his friend Diggle.
* Arrow: When Diggle needs information from a captured mook, he has Felicity hack the man's finances and start donating his money to charity.
* Arrow, when Felicity Smoak learns her mother is dating Captain Quentin Lance:
* Arrow when she becomes a masked vigilante herself (after an unsuccessful attempt to get everyone to call her "Red Arrow").
* Arrow; when she learns (after Tommy's death) about her true parentage, Thea is understandably freaked out.
* Arrow, where, at the end, Huntress and Black Canary square off to spar with no one watching, and the episode ends before the audience sees who wins.
* Arrow, where she was canonically bisexual but ever since joining the time-travelling legends has discussed more and more how she exclusively "prefers girls". Sara's sexuality spills over into the stories, with her various romantic entanglements through history being aligned with the plot of that episode.
* Arrow which routinely have scenes set during bright, sunny days. This is sometimes lampshaded in the series with characters remarking that Star City, where Arrow takes place, is a much darker place than Central City, home of the Flash, or National City, home of Supergirl.
* Arrow while Thea leaves Team Arrow to locate and destroy other Lazarus Pits around the world, alongside Roy and Nyssa. In Season 7, Laurel returns to Earth-2, reformed as Black Canary, to protect her Star City much as Oliver protects his.
* Arrow will star Oliver's daughter Mia as she takes the Green Arrow mantle.
* Arrow with the earthquake machine. Not only does it turn out to have a backup — resulting in the bad guy's partial success — but half a season later the prototype turns up.
* Arrow works for a legal aid office and seems to take great delight in taking on cases where people have been abused by the system.
* Arroyo del Fresno station. It was constructed to serve a proposed housing development, but never opened as said housing didn't materialise in time and the area around remained very sparsely populated suffering vandalism as a result. It's expected to open it in 2019, twenty years after other stations of the same line.
* "arroyos" (streams, or creeks), which makes them sound like a trickle of water compared to what they actually are and the damage they can cause.
* Arryn Zech revealed on a livestream that Blake Belladona, just like herself, is bi.
* Arsalan wears a cape and a shirt for his Frankenstein skin, but is otherwise never shown wearing a shirt. Justified since his ability to create oil from his Sacred Artifact and using it to anoint himself would probably make for some wet and ruined shirts
* Arschgesicht is nothing but trash talk and taunting. Played for laughs, as the vocals are done by one of the band members 10 year old son. In the video, he is playing a board game with a man looking like a heavily muscled hooligan.
* Arsène becomes a black and white bird mask, and his own "face" is a semi-transparent horned mask.
* Arsène Lupin (2004) and its 1950's and 1960's prequels, recounting the adventures of the famous French gentleman thief.
* Arsène Lupin aspect of the trope. He dislikes anyone risking their lives (despite putting his own on the line), whether the person taking the risk is one of his accomplices or his victim. Defying his rules can earn you a meeting with the hangman, as he withdraws his protection from the cops.
* Arsène Lupin but had to resurrect him for several new books due to popularity.
* Arsène Lupin, gentleman thief, had this down to an art and inspires several imitations. Notably, his appearance doesn't get much attention in the

novels because he never looks the same twice. In his first short story, he confesses to the narrator that he no longer even recognises his own, undisguised face in the mirror.
* Arsène Lupin, he's referred to as 'the well-dressed young gentleman'.
* Arsène Lupin his first escape from prison is part of a plan for particularly spectacular escape.
* Arsène Lupin; it ends with Lupin happily married and retired, albeit under another name.
* Arsène Lupin, Lupin determines that one of the extras in a silent film is infatuated with the leading lady solely from the out-of-character lustful gazes he casts upon her in the film. (These days, we'd just call that "bad acting".)
* Arsène Lupin stories. Lupin sometimes adds insult to injury by giving the owners of his targets details such as the time, date, or even method of the theft in advance.
* Arsène Lupin (until the Doyle estate complained), so he ended up crossing paths with a Mr/ Herlock Sholmes instead.
* Arsenal FC. Despite always being in contention for the League title, they haven't won one since the legendary "Invincibles" season of 2003-2004, consistently finishing either 4th or 3rd in the League, complete with impressive wins at times when it didn't matter...and frustrating losses and draws at times when it
* Arsenal of England and Glasgow Rangers of Scotland are in many ways joined at the hip. In the 1930s, it was Rangers' owner who came in with cash to save Arsenal from administration, and over the years, the two storied teams have enjoyed a number of friendlies and European meetings. This was renewed in 2021, when after an incident of racism involving a Slavia Prague player making racial comments toward a Rangers player and defeating Rangers to advance in the Europa League, Arsenal played Prague next and thumped them to the delight of many Rangers fans, which was swiftly followed by Rangers announcing their 150th anniversary commemorative friendly match being played against Arsenal in the following summer.
* "Arsenal ship" shifted onto a single ship class. More or less all the ships have some, often quite a bit, of point defense, but the dedicated vessels have even more, but then AA ships exist in the real world as well. They're not used that much differently either, really, the Battleships bombard at range, the cruisers are the main force that mixes it up closer, the AA ships protect from missiles, and the little frigates scurry around out in front being blown up in droves as cannon fodder.
* Arsenal v Liverpool in the 2010-11 Premier League; after an injury to Jamie Carragher, and other delays, the referee calls for
* Arsenic and Old Lace, a body is hidden in the compartment of a window seat before it can be transferred to the cellar for burial.
* Arsenic and Old Lace actually takes place on Halloween, although the only real nod to the holiday comes early on when some trick-or-treaters visit (in the daytime!).
* Arsenic and Old Lace, and does another a few minutes later when one of his aunts suggesting burying it in the cellar "with the others."
* Arsenic and Old Lace and its film adaptation, one of the running gags is hiding the body of Mr. Spenalzo, which gets shuffled around into various places, including a window seat.
* Arsenic and Old Lace and Raymond Massey to go wild on camera. The result is Grant playing the dashing yet hapless hero Mortimer to the scenery-chewing maximum, while Raymond Massey plays his psychotic older brother Jonathan in reverent homage to Boris Karloff whom his character is supposed to resemble.
* Arsenic and Old Lace are two charming old ladies who invite charming old gentlemen to tea, then bury them in the basement. They haven't the slightest inkling there's anything wrong with their serial poisonings. The men are all lonely and unhappy, and Martha and Abby see it as putting them out of their misery.
* Arsenic and Old Lace by Boris Karloff. As the production was still making money at the time the film was set to be produced, the stage producers wouldn't allow Karloff out of his contract long enough to appear in the film version, and so the

film producers had to make do with a heavily-made-up Raymond Massey. Karloff did get to reprise the role for a TV movie adaptation in 1962.
* Arsenic and Old Lace centers on a certain pair of sweet old ladies who are inviting gentlemen over to drink homemade wine and then poisoning them. However, this is not done out of malice, but out of genuine mental illness much like one of their nephews believes he is Teddy Roosevelt. Subverted with another one of their nephews, who was a malicious murderer.
* Arsenic and Old Lace he was doing the play on Broadway - his contract stopped him.) There is also a bit where the hero, a theater critic, lampshades his scene by discussing the same scene in a play he recently saw, which is the play in which he is acting. Confused yet?
* Arsenic and Old Lace (including the film version) Mortimer Brewster pulls this when trying to get "Teddy Roosevelt" Brewster to sign the papers to admit him and his aunts to the crazy house.
* Arsenic and Old Lace is a good example, in that although his villainy is motivated by a desire for wealth, it is apparent from his conversations with his sidekick, Dr. Einstein, that when killing someone who crosses him, he prefers to make their death as long and painful as possible.
* Arsenic and Old Lace is presented as being a railer against marriage, and consequently, takes pains to cover up his engagement, because he's embarrassed about being called out as a hypocrite.
* Arsenic and Old Lace likes to shout "CHARGE!" as he dashes up San Juan Hill (i.e. the house stairs).
* Arsenic and Old Lace, Mortimer Brewster describes how a not-too-bright character in a play he's recently seen just sits down in a chair "waiting to be trussed up and gagged," and a moment later has exactly that happen to him. The first policeman who finds him is less interested in untying him than in reading the second act of the play he's written.
* Arsenic and Old Lace, Mortimer tries to call off his marriage to Elaine when it becomes clear just how severely insanity runs in his family because he's afraid of what their kids would be like. At the end of the movie/play, he discovers that he's not genetically a Brewster and changes his mind.
* Arsenic and Old Lace, O'Hara says, regarding his own play, that he wants to "just run through the third act quick."
* Arsenic and Old Lace seems to be one of these, from the descriptions of his typical reviews.
* Arsenic and Old Lace, the bluffing game regarding which characters know about the murders committed by the other characters reaches truly epic levels.
* Arsenic and Old Lace, the curtain call is supposed to include the twelve deceased old men walking out of the cellar and taking their bows.
* Arsenic and Old Lace where the main character is a critic who criticizes characters in a play for making the same sort of mistakes he's making in dealing with his criminally insane family; in one scene he describes the stupidity of an oblivious victim, even going so far as to suggest using the curtain cords as rope to tie him up.
* Arsenic and Old Lace who fully intends to make Mortimer his next victim.
* Arsenic and Old Lace will give Jonathan stitches on his face to help drive the idea that he's had plastic surgery on his face and now "he looks like Boris Karloff". The script does not call for stitches, merely saying he looks like Karloff, whom modern audiences will likely know best for his role as Frankenstein's Monster. The original production had the benefit of actually having Karloff himself playing Jonathan.
* Arsenio Hall in 2013 was a complete failure that was cancelled after its first season.
* Ars Goetia is portrayed as one. She takes everything at face value and responds to others with complete and utter seriousness. In one example, when she and the house leaders fall into Yggdrasil, after hearing that Claude's butt "has a crack in it", she orders him to take off his pants to heal him.
* Ars Goetia is this when she gets in a mood, according to her father.

* Ars Goetia), Marchosias (she-wolf with a snake's tail and gryphon wings), and Ipos (lion with a goose's feet and head and a hare's tail).
* Ars Goetia of the Midnight Car in the following chapter, he wields a lance and briefly transforms himself into a skeletal horse. Eligos is commonly shown riding such a horse and one of his symbols was a lance.
* Ars Harmonia who fights to keep various supernatural entities from encroaching upon the unsuspecting society at large, and what happens when she fails.
* Arslan is adopted and is not actually Andragoras and Tahamine's biological son.
* Ars Magica #9, article "Draugadrottin, The Norse Necromancer". A draug (Norse zombie) can be killed by decapitating it with a single blow. Some legends say that only a sword taken from the draug's own grave can perform this task.
* Ars Magica, A character who researches and recovers an ancient fertility magic tradition will be able to create rituals to endow unborn children with nearly any virtue or flaw.
* Ars Magica, also has solidified magic power in the form of Vis. Since it's essential in powerful ritual spells and magic item creation, control and trade of Vis is the basis of the economics of magic covenants. It's exchanged for favors, support, access to libraries and in places where it's scarce — such as the Roman Tribunal — for enormous amounts of money. The vis "tainted" by the power of the Techniques (magic language "verbs") is much more valuable than that which is linked with Forms (names).
* Ars Magica and not realize you're trapped until you stumble out again 250 years later.
* Ars Magica, an innate resistance to magical effects. It's the signature ability and most jealously kept secret of the Order of Hermes, though the fact that the magnum opus of the Order's founding magical theorist is at odds with all of his own theories causes his successors some irritation.
* Ars Magica, at least in some editions, has this in its Combat Botch Results table, for the more disastrous rolls, each describing death in a wide variety of instant and horrible manners. As an example, one extreme result ends with "Your weapon glances harmlessly off your opponent, rebounding back into your face. Fragments of bone shatter backward into your brain! You die horribly. Your friends mourn."
* Ars Magica becomes one point stronger while the sun is down, which can be enough to create more overt and dangerous manifestations of evil.
* Ars Magica doesn't suffice is almost by definition one in which one side or the other is seriously out for blood, which the Order generally frowns on.
* Ars Magica gives several examples of how magic can complement or replace technology, such as a circular stone that can be made to turn by magic. Perhaps the most terrifyingly-powerful item that a wizard could invent would be a magical printing press, allowing books of Hermetic knowledge to be copied and disseminated in minutes instead of seasons.
* Ars Magica has Regio, which are localized versions of this — alternative layered realities that only exist in one limited area.
* Ars Magica has rules for aging. Every winter after a character turns 35, they must make a roll (with penalties for poor living conditions and advanced age, or bonuses for good living conditions and longevity rituals); failure means they either acquire an aging-related affliction (like weakening eyesight or poor hearing) or a Decrepitude point. If they have too many afflictions already, they must take the Decrepitude point. Once they have enough Decrepitude points (depending on edition - 10 in 4th, 5 in 5th), they die of old age at some point in the following year. The book notes that, since this is the 13th century, dying of old age is an accomplishment worthy of praise all its own.
* Ars Magica has the Longevity Ritual, which can greatly extend a mage's lifespan and weaken the ill effects of aging. The problem is that it does so by concentrating a mage's life force and preventing it from being expended. As such, a mage who uses any variant of the ritual becomes permanently sterile. (There are a handful of exceptions, but they don't work quite as well and their owners tend to be very iffy on lending them out.)

* Ars Magica, Hermetic magi often have familiars because they are amazingly useful. They can help you not botch your spellcasting rolls, resist mind control, resist physical damage (and heal it when it happens), not drown, starve or die of thirst, and resist aging. And that's just from the magus-familiar bond. You can add special powers later in the lab.
* Ars Magica, if a magus is prosecuted for a violation of the Code of Hermes, declares Wizard's War on the prosecuting principle, and kills the magus in question, the charge is dismissed. This is even true if the prosecuting principle is a Quaesitor (the judges and lawyers of the Order), though only the mightiest magi can expect to triumph in this.
* Ars Magica is a little bit like communicating across a language barrier via Babelfish translations.
* Ars Magica is the home of Ephram, a wandering penitent who stopped for a rest and came to realize that he wasn't aging and somehow knew how to give directions to any passer-by. It's also easy to find by people who are lost, impossible to reach by people who are looking for it, and saturated with holy power.
* Ars Magica its members automatically being Quaesitors (to the point the house is nicknamed "House Quaesitoris"); members of other houses may become Quaesitors, but they tend to get sidelong looks from members of House Guernicus for it.
* Ars Magica, lycanthropy is the result of a curse which can be magical or faery in nature, and is tied to the moon cycle. If taken as a blessing, transformations can be controlled. Were-bears and were-lynxes are also possible in the setting.
* Ars Magica of its own, led to the mechanic being scrapped in later editions.
* Ars Magica; otherwise, the food is tasty but provides no long-term nourishment.
* Ars Magica out of nowhere, but they won't last long enough to hydrate anyone unless they make the extra investment.
* Ars Magica powerful enough to warp creatures who enter. Fortunately, crossing into "higher" levels of a regio requires magic or special conditions; unfortunately, so does trying to get back into the regular world...
* Ars Magica receives an inheritance of land and a title as a knight. The character has a year and a day to claim their inheritance. If they don't, it will go to the Catholic Church.
* Ars Magica rules let a Hermetic mage create "Automata" with a year-long process. They can be highly customized, but each comprises a Body that determines its physical power, an animating Impetus that determines its agility, and a Heart that houses its mind at minimum.
* Ars Magica something goes wrong — something always goes wrong.) The results can include almost any of the things named above, except that the original soul can never return — the 'best' possibility is a facsimile with the memories and personality of the original person, but without the ability to learn anything new. You're far more likely to get an emotionless automaton or a possessed body, though.
* Ars Magica. Somewhat different from the trope's definition, as Kabbalah and similar traditions are not included in Bonisagus' theory, but still includes rituals, time-consuming spellcasting and the like.
* Ars Magica, so there is no direct competition between the power levels of different types of characters.
* Ars Magica that's tremendously useful for magic and that has to be harvested rather than magically produced.
* Ars Magica that the player should know when their character is vulnerable.
* Ars Magica that they meticulously curate and develop. There are extensive rules for researching, writing, and studying magical volumes over the course of seasons, and the Order's founding Covenant of Durenmar has the most extensive magical library on the planet.
* Ars Magica, the Catholic Church's authority over medieval Europe is called The Dominion, and stifles the power of demons, faeries and Hermetic wizards. The devout have a chance of calling on a miracle as well.
* Ars Magica the creation of the first Dark Churches despite being bound in the deepest corner of the Pit.
* Ars Magica, the Parma Magica (and the magic resistance it grants) is the primary

reason for the ascendancy of the Order of Hermes.
* Ars Magica. The spell "Curse of the Unportended Plague" starts a plague in a city over a period of 6-12 months. It will kill 10% of the city's population over a period of a few months.
* Ars Magica, this is treated as a fairly ordinary quirk of apprenticeship in the Order of Hermes, especially if the apprentice in question has an affinity for say, fire magic, or, in the case of Bjornaer magi, if they have a particularly ornery or excitable heart-beast form and haven't learned to shift properly yet.
* Ars Magica this trope sums up Flambeau's magical philosophy (at least prior to 5th edition).
* Ars Magica, which are less versatile but can accomplish results that Hermetic theory thinks impossible.
* Ars Magica, wizards can do virtually anything, but every spell they case must be formed by combining and constructing a Latin sentence consisting of one of five "techniques" (the verbs, all with the subject "I") and one of ten "forms" (the direct objects). For example, throwing bolts of flame would be "Creo Ignem" ("I create fire"), while making someone forget something would be a "Perdo Mentem" spell ("I destroy the mind"). Every wizard has varying levels of ability with each form and technique which determine how powerful of an effect they can generate (someone with a high score in Creo is good at making things in general; someone with a high score in Mentem is good at working with people's minds in general; someone with high scores in both Creo and Mentem would be extremely good at putting thoughts in other people's heads). Each edition of the game also has a few hard-and-fast rules beyond the verb/object format, such as it being impossible to raise the dead or travel back in time, although whether those things are literally impossible or simply unknown or forbidden to members of the Order of Hermes (the organization player character magi are assumed to belong to) is generally unclear (by design).
* Arson, Murder, and Admiration: Naming evil things, then mentioning something complimentary.
* Arson, Murder, and Admiration: One villain seemingly tells off another for their evil acts... and then compliments them for it.
* Arson, Murder, and Admiration (One villain starts listing the flaws of the other villain, then complimenting their merits)
* Arson, Murder, and Admiration: One villain starts listing the flaws of the other villain, then complimenting their merits
* Arson, Murder, and Jaywalking, 1 Peter 4:15: "by no means let any of you suffer as a murderer or thief or evildoer or a troublesome meddler."
* Arson, Murder, and Jaywalking: A list is ended with the weakest example for comic effect.
* Arson, Murder, and Jaywalking: A list of accomplishments or flaws ends with one that doesn't sound as impressive or heinous when compared to everything else on the list.
* Arson, Murder, and Jaywalking, but a World War II minister's diary entry leading up to the May 10 1941 invasion of Iceland:
* Arson, Murder, and Jaywalking: Ending a list with the weakest example.
* Arson, Murder, and Jaywalking: Listing strong, serious examples and then a weak, trivial finale.
* Arson, Murder, and Jaywalking: Mundane item in a list of horrible ones vs. horrible item in a list of mundane ones.
* Arson, Murder, and Jaywalking since the common law definition of 'mischief' involves destruction of property, which is known today as vandalism. Such definitions lead to the theoretical common law crime of "Malicious mischief and mayhem".
* Arson, Murder, and Jaywalking was formerly known as "Bus Full Of Nuns" because of this trope.
* Arson, Murder, and Jaywalking. When Flintheart Glomgold and El Capitan set off the homemade alarm and wake everyone up, Scrooge cries out, "Robbers! Thieves! Politicians!"

* Arson, Murder, and Jaywalking, where a character is making a list of great things and then they have to list one that's... less favorable.
* Arson, Murder, and Lifesaving: A character is chewed out for what they did wrong, then praised for the one thing they did right.
* Arson, Murder, and Lifesaving: Naming evil things, then mentioning a good deed.
* Arson, Murder, and Lifesaving: The hero seems to be getting called out over acting unheroically, before being praised for their heroism.
* Arson Sam: The fire brigade burns down buildings for two reasons: one, the owners don't pay protection money, and two, they're monumental jerks.
* Ars Technica article discussed the statistics usually used by software developers to complain about piracy. Specifically, the article pointed out that the statistics most commonly cited are most likely not only bullshit but old bullshit. Amusingly enough, the image used for the related post on Gamepolitics was a pie chart divided into three sections, marked "Lies/Damned Lies/Statistics".
* Ars Technica Mk.III and a Japanese Kuratas, was scheduled for August 2017.
* Artakha: hammer-wielding mask maker who wears the Mask of Creation. Like Ekimu, Artakha also had a feud with a less talented "brother", with the latter getting banished to a place of darkness — in essence this makes the new Makuta a composite of the original Makuta and Artakha's aforementioned rival, Karzahni.
* Artanis also is shown one-shotting zerglings and clearly uses his Resurgence ability in the "Alone" cutscene. However, he also uses a psi-storm, which he should know as a high templar, but does not have in-game.
* Artanis feels ultimately responsible for the death of Zeratul and the corruption of the Protoss on Aiur, but the truth is that he did consider Zeratul's words. It was Selendis.
* Artanis, his most precious ally, kills him while under the influence of Amon
* "Artank Swilovich: Here interred and with great mourning courtesy of the Barovian Wine Distillers Brotherhood."
* Art Attacker: When the Improbable Weapon is art (of the non-martial kind).
* Art Barr of Los Gringos Locos popularized the "frog splash" which was top rope like Jimmy Snuka's but involved jumping still crunched and unfolding in midair before landing (or jacknifing before landing, same visual effect).
* Art Blakey: Brilliant drummer and bandleader whose band, the Jazz Messengers, created almost as many big names as Coltrane's various lineups. The Jazz Messengers' style of hard bop is one of the most important codifiers of mainstream jazz, but they were also one of the most sheerly exciting bands to listen to.
* art blog creator James Gurney has amassed over 4,500 posts, and is updated daily.
* art blog was regularly updated with literally thousands of pieces of animation artwork, and it managed to reach 2,882 posts total.
* Art by Yasmina Reza, Serge describes "a man of his time" as "a man who lives...in his own time."
* Art Cor-vel-ay created by George from Seinfeld, also known as Art Vandelay.
* Art Deco: Mostly of its progressive, Euclidean and futuristic appearance.
* art drawbacks tend to be the massive costs involved (monetary or otherwise). As an example, E-books are lightweight, cheap, and consume less paper than a stack of books carrying the same amount of information. On the downside, e-book readers require power and are made with several materials that are toxic if not disposed of properly, plus have a high up-front cost that has no analog for paper books. You could write an essay detailing the necessary drawbacks of both mediums.
* AR Team, comprised of M4A1, M16A1, ST AR-15, and M4 SOPMODII, with Colt RO635 joining later on. While AR officially stands for "Anti-Rain" (the significance of this isn't explained yet), it also references the fact that all members use guns based on the AR platform.
* Artemis and her Roman counterpart Diana. She is the goddess of the moon and hunting, often depicted as standing on top of a mountain and shooting arrows at whoever she felt like.
* Artemis and Philippus see the U.S. warships parked off the coast of Themyscira to be a sign of the U.S.'s willingness to escalate things into a military conflict. Their meeting to try diplomatically heading this off was going poorly already and

then was interrupted by Medusa, but due to the timing of the next Crisis their talk ended up more successful than originally planned.
* Artemis, Artemis spends some time trying to configure it into resembling her original costume. Not helping matters is that Artemis's chosen hero alias is her first name.
* Artemis comes from a family of wanted criminals, so when she joins the team, she doesn't tell anyone about her roots. Wally is mad when she messes up a mission on purpose, but he later finds out she did it because they were facing Sportsmaster, who is her biological father and one of their worst enemies. When Wally discovers her reasons, they kiss and make up.
* Artemis delivers one to Kid Flash when he won't stop flirting with Miss Martian.
* Artemis dons one as Tigress (a reference to her villainous comic book counterpart) when she
* Artemis ends up in a similar arrangement with Blue Skull. Her bio in
* Artemis Fowl: after a character collapses from magically-induced cardiac arrest, instead of doing CPR, Artemis simply grabs a (conveniently nearby) defibrillator and revives him with that.
* Artemis Fowl) also had Swiss Bank Accounts, ripe for Artemis to dig his fingers into.
* Artemis Fowl and Butler are spared the effects of the fairies' magic hypnosis by using specially coated mirrored contact lenses, preventing them from forcing Artemis to give up his secret plans for getting his memory back when they are mind-wiped.
* Artemis Fowl and enough money to indulge a self-admitted childish belief in fairies and magic. Though only 12, he's treated like an adult.
* Artemis Fowl and lucha libre) to become her own fighter, but whenever she is mentioned by other characters, it is always in the context of her relationship to Butler.
* Artemis Fowl and shooting her superior officer (with a paintball gun).
* Artemis Fowl!), and their saliva is a fast-hardening, glow-in-the-dark anaesthetic.
* Artemis Fowl and the Lost Colony, and commenting on how Butler does not know how to appreciate an opera.
* Artemis Fowl and the Lost Colony, Holly and Mulch are forced to become bounty hunters in order to pay the rent for the offices to their PI business. Unusually for this trope, the bounty hunting is portrayed accurately, in that they're searching for a criminal who has skipped bail and are forbidden to carry weapons.
* Artemis Fowl and The Lost Colony vehicle with proficiency, so that he is even recruited for his skills. His pack also contains vehicle specific gadgets such as a nuclear battery to boost a vehicle's power, as well as a portable rear-view mirror.
* Artemis Fowl and things you can grow underground (like fungal goods). Sustainable and organic, but clearly not quite the same as surface food. (Not that they'd set up systems to get food from human farming, because of the pesticides.) The logical extension of this includes things like high-stakes seafood smuggling.
* Artemis Fowl, Area 51 is said to have been made solely to cover for a senator who crashed a jet into a mountain.
* Artemis Fowl Artemis claims that he gave Holly a dose of sodium pentothal as a truth serum, and that all of his knowledge of fairy society comes from what she told him while under its effect, but the reality is that he wouldn't dream of administering such a drug to her out of fear of giving her brain damage. His lie covers up the real source of his knowledge, while also being intended to make Holly think she betrayed her own people so she succumbs to despair while she's his hostage.
* Artemis Fowl, Artemis convinces a fairy named Gobdaw (Who's just awakened after several millenia of slumber) that he's become something of a joke in fairy society in his time away. Gobdaw responds by snapping a martini glass in two and attempting to stab Artemis with the jagged end of the stem.
* Artemis Fowl: Artemis decodes a fairy's book to learn their language, and uses it to learn the limitations of their magic, and uses those limitations against them,

despite not having any magic himself.
* Artemis Fowl: Artemis Fowl Sr sets up a deal to export soft drinks to Russia but the Russian Mafia ambush his freighter in the Bay of Kola and sink it. This leads to the following exchange between two of the Mafia enforcers:
* Artemis Fowl Artemis questions the first paradox, but eventually gives up trying to figure it out.
* Artemis Fowl Artemis watches Holly while she's unconscious, but she was knocked out earlier and isn't actually sleeping. It either case, it doesn't go anywhere.
* Artemis Fowl as a meeting place by dropping words into the conversation. That it works seems far-fetched, except that the man is already intimately familiar with the location and calls it "his second home".
* Artemis Fowl bases a remote gunning system on video game controls to improve accuracy.
* Artemis Fowl because she's a woman... but for the wrong reason. On the contrary, if she can handle the unpreferential treatment, then there's hope that other women will one day join the force as well. He also notes that her capabilities are far beyond what he'd expected.
* Artemis Fowl becomes a hideous shadowy creature with a guttural, rasping voice — what minor glimpses we get of the face hidden beneath her cowl are decidedly unpleasant.
* Artemis Fowl being the least of its problems) and that the demon, knew humans were far beyond crossbows as weapons, he just used the threat to rule over the demons.
* Artemis Fowl, Billy Kong was set to get away with all of his crimes, until Butler remembered that he had once pulled a kitchen knife on a friend and that there was no statute of limitations on murder.
* Artemis Fowl bodyguards has one of these. "inca-incapci—incap—broken."
* Artemis Fowl book, Julius Root complains how fairies are using less magic and relying more on technology instead. After the fifth book, Demon warlock N°1 is rediscovering old magical methods and developing new ones.
* Artemis Fowl book, one of the Corporals in the LEPrecon refuses to address his Captain appropriately over the radio because he is his brother.
* Artemis Fowl books have a surprisingly large fandom, considering they would probably hate each other.
* Artemis Fowl book, so the main character can have the first stimulating conversation he's had in the book. It's downplayed in that he didn't know exactly what future Artemis would say, but knew that he would and so could qualify it as a conversation.
* Artemis Fowl books, there is a code running along the bottoms of the pages. Ostensibly the message is in Gnommish, the fairy language of the books, but is actually a simple substitution cypher. If you translate them, they are funny or quirky messages that are loosely related to the plot of the series as a whole. Usually, the message is too short to run for the span of the entire book, so when it reaches the end, it repeats until the book is over.
* Artemis Fowl books where Commander Root has a belt full of explosives locked on him and supposedly the only way to disarm it is to shoot a tiny corner of the attached screen displaying the villain's face. Holly Short shoots the screen to save Root, but the villain was lying and it explodes anyway. To the security cameras surrounding them, the belt and screen were invisible, so it looks like she shot the commander to death.
* Artemis Fowl book, the translation of the Book of the People inexplicably rhymes.
* Artemis Fowl book, when Trouble Kelp orders his troops to "retreat". The narration points out the troops' disbelief; whether it's called a retreat or a tactical withdrawal, they're still running away.
* Artemis Fowl book, while watching goblins approached, Butler asks, "Do we wait until we see the whites of their eyes?" Commander Root responds, "Goblin eyes don't have whites."
* Artemis Fowl both embraces and averts the trope. To an outside observer, most (if

not all) Fairy technology would seem to be magical. The story, however, is also told from the Fairy point-of-view, where it's shown that technology and magic are distinguishable, and it's someone's job to distinguish them further.
* Artemis Fowl, Butler gives Artemis a nudge to prompt him to thank Holly for saving his parents.
* Artemis Fowl: Butler might have been one while waiting for a new Fowl child to bodyguard, although the narration doesn't really go into detail about it (it mentions that he was about to blow up a South American druglord's house, but an earthquake handled it for him).
* Artemis Fowl by bureaucratic ethics boards that review whether or not invitations are actually valid, and that may interpret the rules less or more restrictive depending on circumstances.
* Artemis Fowl calls Mulch Diggums "my pungent friend". Mulch says, "Don't call me friend."
* Artemis Fowl can translate the fairy language so easily is that it is similar to Ancient Egyptian, and Artemis comments this is because the Egyptians borrowed it from the fairies.
* Artemis Fowl, career criminal Mulch is given an amnesty for all past crimes after saving the city of Haven from being destroyed. He tires to push for all future crimes as well, but is told not to push his luck.
* Artemis Fowl chosen that moment to bend down to plant the acorn needed to restore her magic. This promptly alerts her to his and Artemis' presence, though they eventually manage to capture her anyway.
* Artemis Fowl closed theaters prevented the company from having a massive commercial failure.
* Artemis Fowl: Commander Root does this once (either by accident or on purpose) when he needs to get a crowd of people out of the way to get their attention.
* Artemis Fowl: Commander Root is technically too high up to participate in field actions, but quickly reactivates himself when the situation calls for it (he has quite a bit of influence with the commanding officer).
* Artemis Fowl: Commander Root reactivates himself as a field agent when a hostage situation goes bad. Normally this requires extensive paperwork and an interview with the commanding officer, fortunately Root happens to have quite a lot of influence with him...
* Artemis Fowl depicts Artemis Fowl, Domovoi Butler and Juliet Butler standing together with a prize of fairy gold, as well as Holly Short doing the ritual and Fowl Manor being attacked by a bio-bomb. While all of these were key events in the original novel, none of them appear in the final film, though some do surface in the deleted scenes.
* Artemis Fowl does this; he has more developed hearing that usual and he's had so much experience stealing things that he breaks into the extremely new and top-of-the-line safe Artemis keeps his copy of the Book in by listening to the dials.
* Artemis Fowl does this in the second book. He mines a recorded conversation with his mother for quotes that he then combines into an entirely different message to fool his school principal.
* Artemis Fowl do his usual bomb check, and just about the only thing that would interfere with his reflexes is fairy mesmer.
* Artemis Fowl. During this period the story revolves around her almost as much as Artemis and the readers are made to sympathise with her. It is more evident in the Graphic Novels where she serves as the second narrator in the stories.
* Artemis Fowl, even if she does suspect he takes after his father in this respect.
* Artemis Fowl eventually decided that he should bring him back as the protagonist and make Minerva a secondary character instead.
* Artemis Fowl. Eventually they reach a truce, and Artemis gets to stay in the know.
* Artemis Fowl Evil Is Hammy. Especially in the eighth book. She even lampshades it.
* Artemis Fowl: Fairies have managed to remain hidden even from modern tech thanks to performing mindwipes on humans who see them. They actually have two types: a

blanket mindwipe which is done in the field with little equipment necessary, and a more precise version where they remove select memories (in both cases, the human's mind connects the dots and finds its own excuses for what it was doing at the time, but the real memories can resurface with proper stimulation). Artemis himself doesn't know how to prevent it, but he did figure out a way to restore their memories by leaving prerecorded messages to himself and to Butler (he even figured out a way to prevent the fairies from making him reveal his failsafes, by leaving one with Mulch and leaving it out of the ones he "confessed" to).
* Artemis Fowl fairies refer to themselves as The People. Even the few humans who have contact with them, such as Artemis, use that name. They refer to humans as Mud Men.
* Artemis Fowl family, of Caucasian (as in, from the Caucasus) descent.
* Artemis Fowl fanfiction, Artemis's mother takes a five-year old Artemis Christmas shopping and makes take a picture with one. Artemis bluntly tells the Santa that he knows the man is a fake. The Mall Santa rolls with it, telling Artemis of the Santa Conspiracy.
* Artemis Fowl finely-tuned senses, so that exposure to the surface tends to cause them sensory overload which causes severe brain damage, usually removing most of their survival instinct.
* Artemis Fowl, fish smuggler Doodah Day can allegedly drive any vehicle, be it human, fairy or otherwise.
* Artemis Fowl Foaly at the keyboard, and Artemis has occasionally updated his stuff with Fairie tech, though Artemis himself notes that it should have been impossible for him to receive the message.
* Artemis Fowl: Foaly makes extensive use of human spy satellites. And then there's the villain who claims the CIA changed a satellite's orbit just to track him...
* Artemis Fowl), followed by panic and mass deaths from medical emergencies and starvation, and the collapse of human civilisation as we know it.
* Artemis Fowl for Leon Abbott. This iteration uses the clinical definition rather than OUR definition.
* Artemis Fowl from the reader's point of view. We see Foaly beginning to count from one to ten, see the entire journey of Holly and Artemis, then "return" when Foaly say it's the longest ten seconds of his life.
* Artemis Fowl fuel cell. When a security officer realizes he isn't a real kid, Doodah hit the throttle, going from five to fifty thousand in two seconds, and is described as leaving behind a distinct and long lasting after image in his wake.
* Artemis Fowl has a lock system like this. Artemis gets around it using an ingenious extending pole disguised as a collapsible scooter (to get it past security).
* Artemis Fowl, has an alliance with the Chicago mob, and states that he intends to spend the last 20 years of his life bleeding the planet dry with the stolen 'Cube' supercomputer; once he's gone, the world can go to hell with him for all he cares.
* Artemis Fowl has Artemis' signature vampire smile. It's just as creepy as it sounds.
* Artemis Fowl has a specially constructed shuttle made entirely of "stealth ore" that is supposed to be almost impossible to detect with most conventional technology, in order to evade the authorities. Artemis gets around this by modifying the scanners on his own shuttle to detect unnatural absences of common elements... and very quickly finds what appears to be a shuttle-sized vacuum at the place where Opal is hiding.
* Artemis Fowl has quite a few of these, but the biggest one is Ark Sool.
* Artemis Fowl has the B'Wa Kell goblin gang torch several of her own facilities as a "smokescreen", to hide the fact that she's the one arming them.
* Artemis Fowl hates being called "Artie". He allows his mother and Juliet to call him that. And later on, Holly calls him by it, which causes him some confusion.
* Artemis Fowl: Haven City is infested by swear toads, amphibians magically altered to constantly repeat obscenities. They began as a practical joke, got severely out of hand, and now live in every damp corner of the city.
* Artemis Fowl. He also struggles to relate to people and spends most of his time

tracking down his missing father from his mansion with only his bodyguard for company. As the preface to the second book wryly remarks, his adventures were good for getting him outside and meeting new people, even if most of them wanted to kill him.
* Artemis Fowl, he icily counters with a sophisticated and precise order — down to the composition of the ice cubes — that leaves her wondering if he's a centuries-old child vampire.
* Artemis Fowl. He is quick to lampshade the fact that fairies are the ones disbelieving him.
* Artemis Fowl. He is stated to be the reason the People are still ahead of humans.
* Artemis Fowl. He spends most of his time in his lab, helping the heroes from long-distance with any hacking needed.
* Artemis Fowl, Holly tells Foaly that the guidelines which suggest that in her situation she should retreat to a safe distance and construct a bivouac are "with respect... a pile of troll weevils." Foaly, who helped to write those guidelines, asks if she actually knows what respect means.
* Artemis Fowl). However, he doesn't want his real name associated with them...
* Artemis Fowl. However, it also mentions that it's rising carbon dioxide levels that's the danger.
* Artemis Fowl includes a scene where Mulch tracks Doodah Day to a secret shellfish restaurant popular with pixies (who love lobster even though it's illegal in the Lower Elements.) He has to get through a filthy toilet stall in a dive bar to find the secret establishment within.
* Artemis Fowl in his own book series after being mind-wiped in the third book. It comes to fruition in the fourth.
* Artemis Fowl in his schemes. As the series progresses Artemis becomes less and less villainous and as as a result Holly shifts away from the antagonist role, but is no less heroic.
* Artemis Fowl in the maternity ward and hasn't let up since (except the parts involving time-travel).
* Artemis Fowl in the thick of things. "I shall be the hero of the resistance and you shall be my princess."
* Artemis Fowl inverts this by having fairies that live near the Earth's core climb into metal pods and ride magma flares up to the surface.
* Artemis Fowl is as bad as Voldemort in this department. Her mood swings will give you whiplash.
* Artemis Fowl is evil, and goes to great lengths to use 5s and avoid 4s as much as possible, which is one of the first signs that he's going insane.
* Artemis Fowl is not my biographer" preword from Artemis... despite the epilogue already presenting the book as an LEP psych report.
* Artemis Fowl is rescuing Artemis (trapped in his "secure" office because the lock had been welded shut), he blasts the frame instead of firing at the door itself. He notes that the security flaw should be fixed even as he exploits it.
* Artemis Fowl it is mentioned the Butler keeps a large suitcase full of fake IDs, clothes, and assorted guns in every major airport in the world, as this saves a lot of hassle with the security (and given the many (many) weapons he keeps on his person, who can blame him?).
* Artemis Fowl it's mentioned that Artemis was once mortified to get a 99.9% on something (or something like 99.9%)
* Artemis Fowl: Jon Spiro wishes he could still do this, but if you throw an employee out a window these days, he'll phone his lawyer on the way down.
* Artemis Fowl, Julius Root's funeral has all of the press show up, looking sad for the camera. Also, Julius' ashes are buried in the earth to replenish the soil. Too bad Holly couldn't be there. But Artemis kind of cheers her up with his newfound niceness.
* Artemis Fowl Koboi Labs and Police Plaza have plasma cannons that can be set to "stun" or "kill". They are also powered by a tube of plasma that acts like a gel when unpowered and is safe to swim in.
* Artemis Fowl language, including those of non-human species (such as dogs). This

is explained as due to a combination of magic and the fact that every language is apparently descended from Gnommish (the fairy language).
* Artemis Fowl, LEP has to resort to using a few outdated electric guns after Opal upgrades every weapon and vehicle in the fleet. Then triggers the secret modification that renders them all useless.
* Artemis Fowl live in a large underground complex of cities and tunnels as their way of hiding from the "Mud Men" on the surface.
* Artemis Fowl live underground to avoid humans, although it wasn't always so. Also, the demons in "The Lost Colony" used to live in Limbo.
* Artemis Fowl machines, both on the surface and underground had catastophic failures. While one would think this would help the masquerade, since cameras and other such equipment are now completely destroyed, this breaks the masquerade wide open since a large part of The People's tech was hiding themselves from "the Mud Men" (their name for humans).
* Artemis Fowl, Mafia metal man "Loafers" keeps a notebook filled with these corresponding to the occupation of the target that he killed, including such gems as: "I'm just doing this because I knead the dough!" (After killing a baker, naturally)
* Artemis Fowl meets his eventual closest friend Holly Short when he kidnaps her to ransom her for gold.
* Artemis Fowl mentions that one of his spells "might hurt a bit". Holly, who is about to receive said spell, immediately lampshades the trope to herself.
* Artemis Fowl, mostly because the villains are fond of elaborate, high-tech security systems. (Considering that the protagonists manage to break into the impenetrable safe every time, the villains have good reasons to beef up their security.)
* Artemis Fowl, most of the book takes place in the span of ten seconds, though it was roughly three days in the past.
* Artemis Fowl Mulch amuses himself on a long trip in a stolen shuttle by doing this repeatedly, activating the emergency braking system and dumping a load of "waste" on some very surprised fishermen.
* Artemis Fowl: Mulch Diggums, finding the life of a (rich) law-abiding citizen in the human world to be unbearably boring, soon resorts to kleptomania, stealing Oscars from (fictional) Hollywood stars.
* Artemis Fowl Mulch Diggums is released from prison after the eponymous character has tampered with the police's records, making it look as if the first search of his home was carried out before it was ordered.
* Artemis Fowl, N*1 does this to Artemis and Holly at the same time, because the time stream is too fragile to allow extra objects in.
* Artemis Fowl: "No one could pretend to be in a coma for over a year. Surely not. A fairy would have to be totally obsessed. ... ... Chapter 1: Totally Obsessed"
* Artemis Fowl novel is about the title character's manor coming under siege by Elves.
* Artemis Fowl novel, someone tries to pickpocket Butler, and gets his fingers broken without so much as a wayward glance.
* Artemis Fowl novel, the Irish mobster Loafers gets a new symbolic tattoo every time he completes a hit. Most of his body is inked.
* Artemis Fowl novel, where an invisible Holly hits Butler with her mesmer as he leaves the car and gets in when Butler comes back. Artemis, noting that Butler didn't perform the usual security checks or perform the errand Artemis told him to do, immediately asks the (still invisible at this point) Holly what she wants.
* Artemis Fowl often feels this way about all of the other main characters (except Foaly, who is a genius) throughout the entire series. To be fair to his friends and teammates, almost all of them are quite competent in their own right, but Artemis is still equal parts exasperated/amused at their lack of understanding of his jokes/references/plans. It's tough to be an evil genius!
* Artemis Fowl of trapped air in their digestive systems, which are also specifically designed to be one-way only. A "back-up", where the trapped air rises back out their mouth, could have fatal consequences.

* Artemis Fowl, Opal Koboi, a quick zinger before she kills him. In spite of this, she considered it unfinished business because not only was his death instantaneous and painless, but she could no longer deliver a counter-zinger to satisfy her ego.
* Artemis Fowl, Opal Koboi goes into a self-induced coma after her goblin uprising fails, and depends on others to feed, wash, and otherwise take care of her.
* Artemis Fowl: Opal Koboi has her none-too-bright henchmen the Brill brothers convinced to the point of paranoia that she can read minds, simply by turning on them at random and shrieking "I heard that!". Mervall Brill at one point tests her by thinking treasonous thoughts at her as loudly as possible.
* Artemis Fowl, Opal Koboi is broken out of her mental clinic-prison by the Brill Brothers. She is mentally cognizant, but extremely physically weak (even by pixie standards), and it takes several days in a muscle-massager to get her back into shape.
* Artemis Fowl, Opal Koboi traps Artemis and Holly in the abondoned "Eleven Wonders" theme park, which has been overrun by trolls.
* Artemis Fowl, Opal waits a year before having herself revived from her self-induced coma. This is partly because she wanted to throw off suspicion. It's also, though, because she wanted to wait until Artemis, Butler, Holly, Commander Root and Foaly were all back at the top of their game before unleashing her new plan so that victory would be that much sweeter.
* Artemis Fowl read their culture like a book and do with the faeries what they will.
* Artemis Fowl series are all susceptible to animal fat. Being exposed to animal fat will suck out all of their magic.
* Artemis Fowl series, Artemis always wears Armani suits regardless of the temperature. But remind you, he's 12.
* Artemis Fowl series begins with the eponymous protagonist offering to cure an alcoholic sprite of her addiction & never ending hangover in exchange for information. The end result is "a hundred years of alcohol leaving the body by any means possible."
* Artemis Fowl series, Foaly's first name is never given for definite but it may be Paddox. This is because his wife's name is Callabine Paddox Foaly.
* Artemis Fowl series. He also likes to steal things just for the challenge.
* Artemis Fowl series, Holly Short shuts off the communicator in her helmet when she is about to disobey an order to stand down.
* Artemis Fowl served in a war, but he was bodyguarding a journalist well away from actual combat. Later, he uses his experience to bluster his way into a lucrative security job, but is woefully unprepared when actual trouble comes knocking.
* Artemis Fowl's father in the eponymous series. It's his absence that causes the plot of the second book.
* Artemis Fowl short story "LEPRecon", Turnball Root decides he would rather kill himself by swallowing a Tunnel Blue spider than let his brother Julius incarcerate him.
* Artemis Fowl, since she's technically under arrest and awaiting a court martial.
* Artemis Fowl's mother has no idea he's a criminal mastermind who consorts with faeries. His father kind of suspects the criminal mastermind part, but knows nothing about the faerie part.
* Artemis Fowl: something of a hobby among most of the main characters, Foaly and Mulch in particular.
* Artemis Fowl, spontaneously hugs Artemis and just as quickly pulls away, embarrassed at his lack of professionalism. A one-sided example, as Artemis doesn't seem to find it awkward.
* Artemis Fowl. Subverted in that the hologram shows all this accurately and Holly writes it all off as this trope, which Julius is willing to buy. (She also blames the old technology malfunctioning on it displaying her location, around the world from where she's supposed to be, "inaccurately".)
* Artemis Fowl. Technically not a teen in the first book, since he was twelve then, though he gets older later on. And he is smart, to say in the least.
* Artemis Fowl technology, yet they still keep their presence hidden from humans.

They mostly want to avoid war with humans, particularly once they realize how much better the living conditions are below the surface, but one wonders if good diplomacy (and a willingness to trade some of the tech) might not have had the same effect.
* Artemis Fowl territory, some has quietly become upgraded over the course of the series as real-life human technology has reached new heights, making the fairy tech seem backwards in comparison. While the series has progressed forward in time, it's worth noting that in-series, fairy tech has been high-caliber for a long time and is not generally noted as making significant improvements. This is especially noticeable when the fairies suddenly start talking about "mini-apps" four books in, after the rise of smartphones and app stores in real life.
* Artemis Fowl the burial, which he passes off as "shaking in fear". Right, Mulch.
* Artemis Fowl, the eponymous character ends up in a different dimension for a few hours on the inside, but it sadly turns out to be three years on the outside.
* Artemis Fowl: The Eternity Code acquires a wide variety of bizarre false teeth at some point after having his real teeth knocked out by a sonic grenade.
* Artemis Fowl: The Eternity Code, Arno Blunt apparently "ripped those handcuffs apart as though they were links in a paper chain."
* Artemis Fowl. The Extinctionists consider this a tragedy not because of the extinction itself, but because the fish has a unique flavor which no-one will ever be able to enjoy again.
* Artemis Fowl, the first book mentions that fairy cops can consider a call for help to be an invitation.
* Artemis Fowl The Last Guardian, a dwarf finds himself facing Opal alone, who's brimming with power. Knowing he's probably about to die, he proceeds to tell Opal "I always thought you'd be taller. Plus, your hips are wobbly."
* Artemis Fowl. The latter requested for elecftric runs during a goblin rebellion despite not having to fight due to her desk job position but the same desk job position gives her a lot of power. She didn't miss.
* Artemis Fowl, the LEP are trained with these. Holly Short passed one of her exams by shooting the projector, technically defeating all the enemies.
* Artemis Fowl the maid in question, this results in her being fired and then rehired before she even finds out that she had been fired in the first place.
* Artemis Fowl the reader goes into Artemis's head a couple of times where Artemis is trapped inside his own head. His mind takes the form of his office back in Fowl Manor, though he does acknowledge that none of it real and is simply his mind putting some order to the discord in his brain.
* Artemis Fowl. They also address the problem of ice crystals in the blood vessels and take steps to avert it.
* Artemis Fowl" They then proceed to knock him out, and scan his retinas to see if he's ever seen the bad guys.
* Artemis Fowl to being one of the benefits of having inherent magical talent.
* Artemis Fowl to capture an Elf only so that she can escape and erase all of Minerva's research and stroll out of the place.
* Artemis Fowl to do something, so Foaly asks whether it's an order. Root says it is, to which Foaly replies that he's not a soldier.
* Artemis Fowl to preserve the timeline. The last scene is him waking up post mind-wipe, back in the past, and half remembering "Fairies. Something about fairies."
* Artemis Fowl to the interrogator and mocks him by stating "Clap your hands if you believe in fairies."
* Artemis Fowl using nanotechnology to take down the Russian Mafia is typical for the series.
* Artemis Fowl-verse dwarves were described in the books. It does strike one as a bit odd that this, of all things, was something they felt they needed to keep.
* Artemis Fowl was interrupted by a terrorist plot, as her instructor was yelling at her for rescuing him rather then getting backup, she shot him with her paintball gun and repeated what he told her at the beginning of the exercise: "Shoot me before I shoot you, you pass."
* Artemis Fowl wasting time like that. Not as vehement as some of the other

examples, but does contain built-in proof he'll grow out of it: Within three years, back in the second book (or at least non-U.S. editions thereof), he's consciously aware that he'll be attracted to Holly when he's older.
* Artemis Fowl whenever he's going to be spending time out in the sun.
* Artemis Fowl. When he reappears later in the novel, it's mentioned that he's gotten several custom sets of dentures, including a set that is transparent and filled with oil and blue water.
* Artemis Fowl, which reveals that Stonehenge is the remains of a fairy pizza place. The real building had to be moved belowground once humans began snooping around, but it's still a popular tourist destination for fairies.
* Artemis Fowl. While an excellent fighter, she's too impulsive to be a good bodyguard and in the later books starts a career in wrestling.
* Artemis Fowl, while hunting for fairies, Artemis tries not to get too excited upon seeing a decent photo of one, knowing the possibility of forgery. As the narration puts it, "anything could be faked these days with a PC and a flatbed scanner". He demands physical evidence and gets it, as the photo was real.
* Artemis Fowl (who are not immortal but very long-lived) can only have one child every twenty years; humanity's faster reproduction is actually the main reason it was able to more-or-less take the world from them.
* Artemis Fowl, who at the beginning of the series is a twelve-year-old evil genius who plans to rebuild the Fowl family fortune using fairy gold. Adults are always nonplussed at his mannerisms and speech patterns, and his mother wants him to act like a normal kid.
* Artemis Fowl, zero-G garbage wrestling is mentioned. Although specific rules aren't given, it doesn't exactly take a ton of speculation to work out the gist of it.
* Artemis from the comic is a villain and never had a relationship with the Wally West incarnation of Kid Flash, but here, they became very close, with that romance only ending with
* Artemis has served this role to Diana ever since her debut being the more cynical and violent foil to Diana.
* Artemisia Gentileschi, one of the few truly relevant Renaissance female painters, was for a long while looked down and seen as dependent on the fame of her father. Then the Feminist Movement came by. What's that you say, a Renaissance
* Artemisia Gentileschi's "Susanna and the Elders" was thought for a long time to be the work of her father, Orazio.
* Artemis in particular was often shown with a company of huntresses who swore off men. Or at least
* , Artemis is a lot more positive-minded about it, and shows the mindset of this trope when talking to the new Sailor Mercury, Sharma Dhiti:
* Artemis is a stubborn, brash and feisty jock, while Svetlana is a perky, Olympic Gymnast who wears lipstick and mascara.
* Artemis is considered the best warrior the Bana-Mighdall ever produced.
* Artemis is even taller. Like Wondy, her height has been edging up over the years from 6 feet even in her original stats to a current 6'2".
* Artemis is far better suited to orchestrating everything from behind
* Artemis, Jazz is certainly this. She is smart enough to figure out the orbital mechanics of how spacecraft make it to the Moon in a few minutes, but only works as a porter and smuggler.
* Artemis knows this full well and purposely leaves the loophole as the final step in his Evil Plan
* Artemis Neo: The asteroid mining town of West Haven, New Vancouver, Cascadia on the moon Neo Luna II.
* Artemis' outfits tend to accentuate her long legs; even when she wore baggy pants, they were transparent "harem pants" to show off her legs.
* Artemis reveals she's the daughter and sister of Sportsmaster and Cheshire, respectively. Robin admits he knew all along and that it didn't matter to him.
* Artemis she comes back as a vengeful walking skeleton clad only in the scraps remaining of her armor.

* Artemis she feels the need to take. Naturally her main weakness is bright flashes of light.
* Artemis's most iconic 90's costume included bands of large sharp spikes around her thighs, and some other questionable choices. How awkwardly she would have had to walk to keep from tearing deep gouges in her inner thighs with every step was never addressed.
* Artemis's mother, Paula, suggesting that she and Will get together leans into this. While she genuinely believes that they are interested in each other, she also wants her daughter to pursue the relationship so that she can permanently retire from being a superhero out of concern for her well-being. Another reason is because Paula has lost hope that Jade will return to the family, and she needs Artemis to be there for Lian as a mother.
* Artemis: Spaceship Bridge Simulator canon. The fourth race, the Skaraan, aren't part of this hegemony but have a mutual non-aggression pact.
* Artemis: Spaceship Bridge Simulator" floating around in pods, and appear on the minimap. They are also targetable and are not impervious to nuclear missiles.
* Artemis: Spaceship Bridge Simulator has a 2D map (100 by 100 kilometers) and no provision to change the ship's pitch, limiting you to flying the ship in only two dimensions. This leads to the Captain ordering Helm to come about to "course xxx", instead of "course xxx mark xx".
* Artemis: Spaceship Bridge Simulator often plays out like this, complete with bow-to-bow gun runs, preceded by long-distance missile firing as they close distance to beam weapon range. Skilled crews often use tactics based more on maneuvering around the enemy to strike weakspots than simply closing range and engaging in a slugfest, but novice crews often resort to simplistic scuffle tactics.
* Artemis: Spaceship Bridge Simulator series the game emulates in many ways, generally avert the boxy shape while playing the riveted look straight.
* Artemis: Spaceship Bridge Simulator, this is one of the taunts the communications officer can use to draw the attention and aggression of an enemy ship.
* Artemis: Spaceship Bridge Simulator, with minor justification on the missiles' part (due to fuel requirements, etc.)
* Artemis: Spaceship Bridge Simulator you defend a sector of space from an alien invasion.
* Artemis, the goddess of the hunt, had deer while her brother Apollo, god of music and art, had swans.
* Artemis: The titular colony has no native-born residents. Pregnant women go back to Earth to avoid birth defects from the Lunar gravity and children under the age of twelve are not allowed to move to the city. Main character Jazz moved to Artemis when she was six, before the law was changed, and doubts she could handle Earth's gravity if she was deported there.
* Artemis the very next issue, allowing Diana to reclaim her costume and identity, so Artemis got a much better deal than her prototype.
* Artemis, unaware her organization has been mislead about him as part of a plot by Neron to kill Diana.
* Artemis undid many of the changes wrought on Diana and the Amazons by the New 52 by revealing that her mind had been tampered with and that the Amazons she's been interacting with were fakes, paving the way for Temi and Philippus to return to continuity.
* Artemus Gordon ends up this way at the end of almost every first season episode of
* Arteria is one to the Vatican, being the official city-state of the
* Artesia features the titular Artesia and her brothers Stepjan and Justin. There are characters named Wallis, Owen, and Colin, along with Daemander, Argante, and Branimir.
* Artesia inverts this, the eastern part of the map where all the action happens is almost a mirror image of Western Europe, with a sea surrounded by land on three sides and opening into an ocean to the east.
* Artesia is set in a fantasy world that looks to be at about 15th-century European technology levels. They have bombards, although they have not been seen on-page as

of yet.
* Artesia, the men of the Middle Kingdoms are disturbed and horrified by the warrior women coming down from Daradja. They believe women belong in the home, not the battlefield.
* Artesia, the Wild Hunt is very similar to the Christian-era version of the above-mentioned European folktales. The Hunt is led by the Black Hunter, a son of the goddess of Death and the Earth, depicted as a black-skinned giant with antlers, a spear and a chain threaded with the heads of people he's hunted. The other Hunters are either demonic Rahabi spirits, the ghosts of wolves and hunting dogs, and thousands of years worth of individuals who the Hunter asked to join the Hunt — heroic types that he finds worthy hunting companions. As one would imagine, his request to join is difficult to resist, and he isn't happy if he's refused.
* Art Evolution: A character's design gradually changes over the years.
* Art Evolution, as one quest involves a distortion in time, thus causing characters' art to reverse to its original and first images.
* Art Evolution; his head became a smoother, more simplified triangle shape, and his gums became less prominent when he would speak.
* Art Evolution, however, is both musclebound and able to crush diamonds with his fists.
* Art Evolution retool. It removed most of the cast except for seven ponies, rebooted Cheerilee completely, and changed Rainbow Dash's personality and accent.
* Art Evolution), still have eye-slits or holes in their "masks", but just fire behind them, no actual eyes.
* Art Evolution throughout the series has since been explained a result of in-universe forces. To note:
* Art Evolution, Tsuna and Kyoko are now practically twins, as shown in Chapter 237.
* Art Evolution, who send Doraemon back in time to help change his fate which, originally, would have him marry Jaiko (Gian/Jaian's beloved little sister who looks exactly like him) and lead a life of poverty and misery.
* Arte, who later became court painter to Philip II of Spain. All of Anguissola's extant writings and correspondences suggest that she was treated with respect in the art world from a young age not only because of her talent but also because professional artists, who largely came from the merchant and laborer classes, would not dare speak ill of a noblewoman. The manga's portrayal of the Renaissance art world as not only exclusively male but openly hostile to women trying to enter it seems to be much more exaggerated than it actually was—since Arte is of noble birth, in reality, there would be little to no chance that she would have been mocked to her face for trying to become an artist like in the series.
* Art explosion, Soriku's friend puts a stick of dynamite in her ear, which proceeds to explode and cover her in soot.
* Art Galt triggers a PTSD flashback from Rambo as a result of this in
* Arthas, after revealing he was a Death Knight publicly, ordered Thassarian to kill his own mother to prove his loyalty. So he did.
* Arthas also gets this. In cutscenes, he demonstrates the ability to drain someone's soul with his sword and turn them into a banshee he controls, raise the corpse of a giant dragon, and possibly teleport. Outside cutscenes he can temporarily raise six dead things as zombies, but it doesn't work on dragons.
* Arthas himself becomes something like this during his campaign against the undead. There's Stratholme to consider. The only reason he doesn't command every last soldier to this undertaking is that Uther is very much opposed to the notion. Medivh points out to him that his course of aggression against the undead only makes life easier for the Scourge. Even Muradin, Arthas' lifelong friend and teacher, calls out the prince's new qualities after he
* Arthas is so incredibly fond of this that it prevents him from actually accomplishing anything.
* Arthas scolding him, warning that he is making a terrible mistake. Then the Lich King commands him to return the blade, so Arthas does, striking the Frozen Throne so hard that it shatters and releases the armor trapped within. Then Arthas puts on

the armor, fusing his and Ner'zhul's souls to become a new Lich King.
* Arthas' sword, Frostmourne, is a soul jar plus. When Tirion Fordring shatters Frostmourne, it releases the souls of every being it's absorbed, including Arthas' father. Its destruction also leaves Arthas vulnerable to a
* Arthas to get all his servants killed. This later turns out to be an odd compulsion of human Arthas's pride, trying to train new champions to corrupt.
* Arthas uses this to some degree to break particularly strong individuals to heel. He seems to transcend purely physical torture, though, even going so far as tearing at the enemy's very soul.
* Arthas, who has been corrupted by the sword Frostmourne which contains the spirit of the Lich King.
* art have white hair, because then they're a ripoff of Sephiroth, even if the only black are shoes or a black T-shirt.
* Arthéon, as he has a goal that puts him at odds with most of the player community, but is permitted to temporarily ally with players if it can help accomplish the goal in question faster.
* Arthéon fills this role due to being the one the most interested in the game's background. Sometimes Omega Zell needs to get him to stop talking. Ivy and Couette fill this role in his absence and are better at only giving the information needed to understand the current situation and nothing else.
* Arthéon gets a gradually diminishing role, first by being kidnapped in Season 2 of the webseries, then due to
* Arthéon gets a job controlling a game character/boss in the fourth novel/Season 5.
* Arthéon uses two swords between the guild's termination of the second floor of the Galamadribyak tower and
* "Art Heist" with Brain, when he gets kicked out of the art museum, his chest fills the screen as he's sliding out.
* Arthie Premkumar (Indian) plays Beirut the Mad Bomber (Lebanese). Unfortunately for Arthie they debut the character during the TWA Flight 847 hostage crisis and Arthie gets beer cans thrown at her head.
* Art himself is a Covert Pervert the 10% of the time he's not being an
* arthouse films Channel 4 quietly discontinued them after just three months.
* Arthur (1981), as the title character thinks he's done this, only to realize that he's crashed into a hedge.
* Arthur (1981), as those two movies were by far the biggest hits represented in the category.
* Arthur (1981) ("Don't you wish you were Arthur?"). It's generally agreed that one reason the 1988 sequel and 2011 remake are not as effective as the original is because they both try to bring the character down to Earth by treating his vices (alcohol in particular) more seriously and realistically, and that's at cross-purposes to this trope.
* Arthur (1981) finds true love with a working-class woman who loves him for himself.
* Arthur (1981) sees a woman shoplift a tie from a store he is in, he says that it's the perfect crime, since "girls don't wear ties." He then says some do, so it's not a perfect crime but a really good one. His man-servant deadpans, "If she murdered the tie, it would be a perfect crime."
* Arthur (1981), the title character and his lover Linda go to his fiancee Susan to tell her the wedding's off. Susan's father tries to kill the lovers and is only stopped by Arthur's grandmother - but he does beat Arthur up enough that he's black and blue when he explains to the guests what's happened and then passes out on the altar.
* Arthur (1981), the title character tends to laugh at all of his own corny jokes.
* Arthur (1981) was an intentional throwback to these, and a very successful one.
* Arthur, a babysitter did this to try to stop Arthur and D.W. from fighting. It didn't work, as the two soon begin fighting over a jacket draped over the tape line.
* Arthur about cancer and the fear of losing Mrs. MacGrady when she was diagnosed

with it. The episode was pulled from reruns after the scandal broke, then remade in 2021 with Lance replaced with an original character, a pro wrestler named Uncle Slam Wilson.
* Arthur. Again, if their S-Support is unlocked Arthur will tell Camilla about his feelings, and she will tell him that she has come to like him back.
* Arthur, "Ah, sheesh." Notably, though, neither Mr. Read nor Mrs. Read were actually in D.W.'s fantasy in any form.
* Arthur: Alberto's soccer ball, signed by a player named El Boomerang. In "Follow the Bouncing Ball", he gets it mixed up with Francine's brand new soccer ball. By the end, it's lost and rolls down the street, with the ball finally finding its way back to Arthur in "The Long Road Home."
* Arthur all the kids act like the Brain is a super-genius, and he uses big words his parents have to look up, but he's really just much more knowledgable than average for his age.
* Arthur Also throws in several non-union Los Angeles voice actors into the mix.
* Arthur. Although she's not as bad as most examples on this page, she is still snobby and not afraid to lord her family's wealth over her classmates. It also doesn't help that she's constantly resorting to and putting her friends up to overly eager get-rich-quick schemes despite already being fabulously wealthy.
* Arthur always begins with a teaser that's about a minute long, followed by a title card. The teasers usually consist of characters talking to the audience, by giving anecdotes on a topic related to the episode. For example, the intro to "Francine Redecorates" has Francine and her friends talking about what they like, to illustrate how everyone has different personal interests.
* Arthur among longtime fans of the show, but hadn't spoken before season nineteen.
* Arthur, and after his friends hear it, they much prefer his original version.
* Arthur and Buster each decide that their group of friends prefers the other character, and so essentially switch personalities in an attempt to seem more likable. When the two each enter
* Arthur, and gives them a four-month ban on TV. His wife helps him to think rationally again.
* Arthur and her jaw was redesigned to be more rounded and slightly "monkey-like" compared to the other rabbit characters in the show.
* Arthur and later books, where they are animals like every other character.
* Arthur and Morgana sort of have this, but it's debatable and their relationship evolves over the series. Considering that Morgana is Arthur's father's ward, she's essentially his foster sister.
* Arthur, and Prunella with her hair standing on end due to a shock from the metal chair.
* Arthur and the Invisibles) and the U.S. DVD release was a simple two-disc set of both films instead of separate releases.
* Arthur and the Invisibles: Arthur asks Selenia to give him the lace holding her top together, so he can use it as a grappling hook. She refuses. He takes it anyway when she is distracted.
* Arthur and the Invisibles has Arthur's granny sing it to him in the English dub of the film.
* Arthur and the Invisibles standing in for a long beard and hiding the King's body.
* Arthur and the Invisibles. What he's truly after is the treasure hidden by Arthur's grandfather in the world of the Minimoys.
* Arthur and the Square Knights of the Round Table, a dragon does this for so long that Arthur simply passes beneath him.
* Arthur! and the Square Knights of the Round Table: The Black Knight is a lackey to the witch Morgana le Fay, and always manages to ruin her evil schemes through his incompetent bungling.
* Arthur and the War of the Two Worlds... atop a toy train. But since the belligerents, Arthur and Darkos, are 3 mm high, it works just the same.
* Arthur, and when the two go to the concert, they realize the stage is so tall they can't even see the band from their front-row seats.

* Arthur animations from the 4:3 seasons has Arthur caught in the rain. He digs through something offscreen, throwing out various objects, before he takes out an umbrella and smiles.
* Arthur an inanimate object. Getting to play the first light bulb is sort of a big deal even if there are no lines, but Francine's perfectionism manages to make it an ordeal anyway.
* Arthur appears to be this. The nineteenth season ended with Arthur and his classmates being promoted to fourth grade, while D.W. and her class moved up to kindergarten. The beginning of the 20th season found them back where they were before. Also, Mr. Haney had to be written out, because his voice actor had died.
* Arthur are based on people from his life. Arthur is, of course, him as a kid, Grandma Thora is based on his grandmother, who encouraged his writing/drawing, Francine is based on his sister, Sue Ellen is based on his childhood girlfriend, etc.
* Arthur, Arthur asks his mother, Mrs. Read, to call Buster's mother, Bitzi Baxter, after finding out she told Buster he couldn't come to Arthur's sleepover because she's worried he'll be scared due to the recent talk of alien spaceships. We don't hear what Bitzi says other than her answering "Hello?" and a sped-up babble and Mrs. Read barely gets a word in edgewise, but the upshot is that Buster can come.
* Arthur: Arthur does this to Binky in "Arthur's April Fools." He was afraid most of the book that Binky would pull a prank on him, and ended up turning the tables at the end. He told Binky to go home and look through the paper tube at the mirror to decode a written message—that said 'April fool's'.
* Arthur, Arthur is astounded to hear about D.W. being a hero for having stopped a little kid from crossing the street without looking both ways first. "D.W., a hero?" he questions and then he drops a wrench he was holding onto his foot and starts hopping up and down.
* Arthur, Arthur is shown reading a gourmet magazine, and he imagines a set of books as a turkey. When he realizes the truth, to satisfy his hunger, he takes a page off the magazine and chews it up.
* Arthur. Arthur notices that his sister D.W. has been acting strange and upset lately, so he sets out to find what's wrong with her, and eventually places a walkie-talkie in her room at night to hear her sleep-talking. D.W. apparently catches on to this: "I'm sad... because... because... BECAUSE ARTHUR IS A DODO-BRAIN!" (Eventually it turns out that she's upset because she wasn't invited to a friend's birthday party — nothing to do with her brother at all.)
* Arthur: Arthur's friends' summer project was to dig all the way to the center of the Earth. They never succeeded because summer ended.
* Arthur, Arthur's little sister D.W. is still a firm believer in Santa Claus. When she finds out that she might not be getting the gift she wanted, Tina the Talking Tabby, she concludes that Arthur wrote her letter "all wrong" and decides that if she wants something done right, she has to do it herself. When the Tibble Twins see her mailing the letter, they tease her, but she tells them that it's to the President of the United States, leading one of them to conclude "Oh, so he's the one who delivers all the presents."
* Arthur, "Arthur's New Puppy" has D.W. joke about how Arthur will need a shovel to clean up Pal's poop.
* Arthur as a "variation on a dog," apparently because she has the type of nose normally used on dogs on the series. Later, however, she has been established as a rabbit.
* Arthur asks this to his father in "Arthur's Family Vacation" during a road trip.
* Arthur. As of season 20, 9 Story has been entrusted with all of the show's animation.
* ArthurAs the show progressed, the quality got better, with the digitally animated episodes looking better than ones from the earlier seasons. Then along came season 16, which is very obviously done in Flash, to mixed reactions.
* Arthur: A store that Buster steals an action figure from has a broken camera, but Buster thought it was working and confesses.
* Arthur, a strong Artificial Intelligence whose systems are the basis of the

futuristic "biochip" computers in
* Arthur, as when the school bus breaks down on the way to Bartleby Hall and on David and Jane Reads' 10th anniversary, when they are forced to stop at the Ten Spot diner. Another episode had Arthur oversleeping on a bus and ending up at the edge of town. He waited for the next bus at a diner, where the waitress replied to his order of milk by hollering "Squeeze me a cow!"
* Arthur: At a ComicCon panel, some of the writers admitted that George was their favorite character, on grounds that he's so interesting to write for, given how creative, imaginative, and inventive he is, despite being withdrawn, shy, and timid.
* Arthur Atkinson' has an annoying voice and "personality" at the best of times, but his laugh could kill small animals.
* Arthur, a tyrannosaurus rex falls off a cliff while trying to eat another dinosaur.
* Arthur Balfour, took no end of pleasure in forcing Balfour to keep to giving brief, concise answers to questions.
* Arthur began their lives as popular book series. Both have since been made into television series. In turn, episodes of those series have been released as books, though they've generally avoided releasing episodes as books that were adapted from books in the first place.
* Arthur, Brain gets a B- on a test and becomes convinced that his mind is being weakened by the breezing listening music that his parents recently started playing at their ice cream shop.
* Arthur Brown does this a bit near the end of "Fire" as he's shouting "Burn!" over and over at the top of his lungs.
* Arthur Brown's "Fire". "You're gonna burn! Burn! Burn! Buuuurrrn!!! Ah-hahaha!!!"
* Arthur, Buster Baxter solved a case involving missing quarters thanks to a comment from Alan, a.k.a. "Brain".
* Arthur, Buster dreams about aliens, and when he sees them his eyes pop out.
* Arthur, Buster has a "collection" of interesting-looking and potentially delicious food, all of which is old and stinky. Periodically, his mother throws it all out.
* Arthur but first subject him to brief medical testing. They then toss him out of their spaceship and leave Earth, assuming all humans are as high in cholesterol as Arthur is. The real Arthur is not amused.
* Arthur, but the smart girl disagrees and they argue back and forth in this manner, interspersed with clips of Arthur and D.W. doing the same, before finally agreeing that they really are like Arthur and D.W.
* Arthur, by the way, commits incest with his sister Morgause (not Morgan Le Fay, btw. The roles only become merged in more contemporary stories). The story varies, in some versions it's an accident and in some it's rape. By either Morgause or ARTHUR himself. The result is Mordred, and as such other things like the ruin of Camelot, civil war, and Arthur's death. So, going by the myths, rape is fine as long as you're not related.
* Arthur called "Buster Baxter: Cat Saver", Buster saves a cat from being caught in a tree (by happening to be holding an ice cream cone with fish sticks in it), causing eventually the whole town to laud him as a hero after the event gets published in the local newspaper. He lets it go to his head but eventually is humbled after he isn't able to duplicate the incident without the ice cream, only to then save his friends from a runaway piano, starting the whole cycle over again.
* Arthur C. Clarke about 50 years after everyone stopped ridiculing the very notion. Almost everyone has.
* Arthur C. Clarke about a space empire that keeps inventing one incredible super weapon after another, with the most cutting edge science. They end up getting overrun by their enemies who directed their resources towards making huge numbers of basic ships with 'generic' weapons while the other side was busy updating their ships, and by exploiting the flaws and weaknesses of waves of new technology being field-tested for the first time.
* Arthur C. Clarke: A cargo hover ship makes an emergency landing in the United

States and a teenager named Johnny Clinton stows away aboard it. A few hours later it crashes into the Pacific Ocean and Johnny is rescued by dolphins, who take him to safety on an inhabited island.
* Arthur C. Clarke after the deaths of his partners and disconnecting the HAL 9000 computer, making his only contact with Earth through pre-recorded messages. Given his circumstances he had quite a bit of difficulty remaining sane.
* Arthur C. Clarke alien, who wanted to save the most precious relics of Earth before it's destroyed in a nuclear fireball. This has already started, and he's left in the frozen seconds before the end, with all the time in the world...
* Arthur C. Clarke Also, it is explicitly explained that the viruses in question are not just your regular run of the mill viruses - they exploit the laws of mathematics such that ANY computing system that uses numbers is vulnerable, no matter how advanced, and NO countermeasures of ANY kind are possible.
* Arthur C. Clarke": An experimental superconducting power station accidentally inverts Richard Nelson so that all his body chemistry is opposite-handed. He needs to have special "left-handed" food synthesized for him, and since no one is sure if we've missed any essential micronutrients that would also need to be inverted for him, he figures his best option for long-term survival is to repeat the accident and try to re-invert himself.
* Arthur C. Clarke, Apartheid in South Africa continued into the 2030s, when it ended in a revolution that kicked the white ruling class out. Apartheid-related predictions were often a bit off in this way, due mostly to outsiders imagining some sort of centuries-long, deep-seated race war, whereas it was a recent and quickly dated policy which was mostly prolonged because it somehow wound up as a part of Cold War politics. As soon as the policy was put up to a vote, it was rejected by overwhelming numbers.
* Arthur C. Clarke as well, with the planet's orbital inclination being the only thing that give its inhabitants a sense of time passage. The protagonist's lifelong ambition is to find out what secrets lie on the dark side.
* Arthur C. Clarke collection), and not just in Eastern European Communist countries.
* Arthur C. Clarke, Dave Bowman tries (unsuccessfully) to talk to the Iapetus monolith by broadcasting primes at it.
* Arthur C. Clarke equipment. Lesson: In industrial war, industrial capacity is more important than the quality of the weapons. Unless, of course, your weapon is The Bomb...
* Arthur C. Clarke even after one of them suggests this trope as the explanation.
* Arthur C. Clarke for nefarious purposes; instead, they want to provide an energy source to the evolving life forms on Europa, who would otherwise have died out as the geothermal vents keeping them warm went cold. The novel shows that the destruction of Jupiter's current climate is an apocalyptic event for the strange gasbag creatures that live there, but the Monolith's creators decide that fostering a potential civilization on Europa is worth the sacrifice of an environment in which intelligent life is unlikely to ever develop.
* Arthur C. Clarke had an intelligent species that evolved on Earth several billion years ago, but it was about to be destroyed by an asteroid impact that they could see coming but couldn't stop, so they filled the earth with bacteria so that at least the basic building blocks of life would survive.
* Arthur C. Clarke, he rewrote it to match the film version, with the Monolith orbiting Jupiter instead of Saturn.
* Arthur C. Clarke is very similar, but the machines go further in their disgust and decide to wipe out the meat-creatures. Here they're explicitly rather than implicitly machines, and the exception that decides to destroy the rule.
* Arthur C. Clarke, it turns out that the stellar ignition of Jupiter at the end of the previous book tossed a few "insignificant chunks" of this core up into orbit, including one mountain-sized hunk that landed on one of the Jovian moons.
* Arthur C. Clarke lived out his later years in Sri Lanka, making this a borderline case (his residence wasn't a secret, but he did assiduously avoid public appearances).

* Arthur C. Clarke) Mars is being terraformed by selection and spread of oxygen-generating plants native to Mars, as well as by turning Deimos into a continuous thermonuclear explosion, effectively providing the planet more sunlight than the Earth gets for a hundred years. It's sometimes regarded the first sci-fi novel on terraforming (1951).
* Arthur C. Clarke Master being revived from eons of suspended animation - only to realise...
* Arthur C. Clarke mentions different religions, namely Mormons, Neo-Christians, and Muslims, sending seedships in the generations before the End. It's implied that they may very well have succeeded.
* Arthur C. Clarke mentions that many mental illnesses have been cured, but as a result, there is a marked decrease in creativity.
* Arthur C. Clarke, Mercury is inhabited by a community of temperamental miners, Hermians, who plot to destroy the titular alien spacecraft out of paranoia. Colonising such a hostile environment has made them over-cautious by nature.
* Arthur C. Clarke) of bisexual experiences and his statement that "we're all a little polymorphously perverse", he never formally came out of the closet. Later in life he faced accusations of paederasty and homosexual paedophilia, which delayed his acceptance of a knighthood (at his request) until they had been put to rest. One is left to draw one's own conclusions.
* Arthur C. Clarke reportedly said that if he had been on the set that day, he would have corrected this.
* Arthur C. Clarke) scientist invents VCR for the brain. He quickly comes to the obvious application. And the story gets more interesting from there...
* Arthur C. Clarke secret US military project, Project Clausewitz, to build a computer (called Karl) that could analyze any battle's starting conditions and perfectly predict the result. However, the general in charge of the project insults the lead scientist, who hard-wires Karl into delivering insults to the general every time a battle is input, but still doing pure math just fine. It's only "sort of" this trope because Karl is not an AI: he's a dumb 50s computer. The effect, however, is the same.
* Arthur C. Clarke's short story "Dial F For Frankenstein" has all the phones in the world ring at once, a few hours after the world's phone networks are connected by satellite. The billions of phone connections act as neurons, and all automatic systems are lost to this "brain." Unfortunately, this brain has just been born, and doesn't know how to control its "limbs."
* Arthur C. Clarke's story "The Wall of Darkness", Shervane and his father's traveling party includes "certain animals it is convenient to call horses".
* Arthur C. Clarke stories. The White Hart tales mention a few well-known British SF authors of the time, but "Charlie Willis" was the only one to draw some (light) flak from the others.
* Arthur C. Clarke) supposed that the replacement of the car with the personal helicopter would eliminate the need for cities and "decentralize" civilization.
* Arthur C. Clarke tells a story of running across him on a street in New York City looking at the display in an electronics store window of the latest PCs (considering the time of the story, they were probably the IBM PC, Mac and Amiga). Bradbury notes that Clarke ended up buying one of each and had to lug them home through the streets of New York. When Clarke died at the age of 90 in 2008 his estate posted a weblog he recorded which had some final words for his fans.
* Arthur C. Clarke (thanks to the Overlords) was going on at the same time, this may have been a factor in the death of monogamy.
* Arthur C. Clarke, the alien monoliths that are attempting to wipe out humanity are defeated by an ancient computer virus that was sealed away in a vault of weapons that were deemed too dangerous.
* Arthur C. Clarke: The chronoscope, a machine to create and look through wormholes in this setting, immediately becomes public and the novel explores how society would change as a result of the complete lack of privacy and ability to know the real events that modern myths and religions are based on.
* Arthur C. Clarke, the Overlords state their objection to killing animals for

entertainment. They put teeth into this pronouncement by causing every member of the audience to feel the bull's pain at what, for obvious reasons, is the last bullfighting event.
* Arthur C. Clarke, the particle beam weapons are directly derived from spacecraft ion drives, which are dangerous enough in their own right.
* Arthur C. Clarke, the protagonist discovers that "Comarre", a rumored place that is occasionally sought out by people who are never seen again, is a robotic Lotus Eater Machine facility. The government tries to keep the truth hidden, and to keep people away — but not very hard, as it's considered a good safety valve for those who would otherwise be disruptive.
* Arthur C. Clarke, they left their Monoliths to continue their work in their stead.
* Arthur C. Clarke, travelers from Saturn to Earth have a few hours of zero-gee halfway along, while the ship is flipping over to decelerate.
* Arthur C. Clarke used a Locked Room Mystery in his descriptions of spatial dimensions: if two-dimensional beings had a "bank vault" sealed on all sides — i.e. a square — then a 3D thief could remove its contents via the third dimension, leaving the 2D police baffled.
* Arthur C. Clarke was a visionary in many respects, but some of his works share his peers' failure to anticipate advances in computing:
* Arthur C. Clarke when his ship blew up. The aliens offer to reconstruct a body for him, but the protagonist's attempt to describe what he looks like dissolves into incoherent babble as the imperfect recording breaks down.
* Arthur C. Clarke, which has religious fanatics trying to sabotage a project to save the Earth from an asteroid.
* Arthur Christmas: A "Center for Self Help" sign in Toronto becomes "elf Help".
* Arthur Christmas, Arthur has a habit of claiming crazy things like he's scared of buttons. One of his outlandish claims is that he's allergic to snow.
* Arthur Christmas has elements of this. A variety of misunderstandings lead to NORAD thinking that Arthur's attempt to deliver a present for a kid that was (accidentally) left out of Santa's list is an alien invasion, which leads to the armies of the world unleashing all of their available firepower in order to "save Christmas".
* Arthur Christmas has the job of Santa be passed down from father to son.
* Arthur Christmas, hopes to succeed him as the next Santa, but his younger son Arthur is the one who really understands the importance of making children happy on Christmas despite being clumsy and terrified of practically everything.
* Arthur Christmas, this is how Santa's elves treat the titular Arthur, who is Santa's younger, much clumsier son. Late in the film, when circumstances fill him with despair, Arthur reveals that "I know what you all say about me!" It's particularly harsh because Arthur's defining trait is that he wants everyone to be happy and he goes to great lengths to try to help them be so.
* Arthur Christmas, three elves use this technique while they're delivering gifts. They were disguised as a nurse in a hospital.
* Arthur Christmas uses a gigantic, futuristic aircraft with cloaking technology to deliver presents to all the children in the world. When Arthur discovers that one child has been overlooked, he and Grandsanta try to deliver the present using the 170-year-old sleigh that previous generations of Santa used, which looks just like the traditional version of Santa's sleigh.
* Arthur Christmas uses Bank Gothic for its interstitial location overlays.
* Arthur Christmas was supposed to be a pun on "Father Christmas", partly because the words don't rhyme in most dialects of American English, and partly because most Americans are used to saying "Santa Claus".
* Arthur Christmas: You might assume that Arthur's brother Steve would become the villain, but he doesn't have any real animosity for Arthur, and really just hates how his father has such unreasonably high expectations of him.
* Arthur coincidentally burned down the family home before the couple could kill Ed.
* Arthur computer game includes a scene where D.W. claims she can read.

* Arthur Conan Doyle are all excellent stories that rival or even exceed some of the early works.
* Arthur Conan Doyle by having Holmes and Moriarty plunge off a cliff to their deaths. Massive public outcry made quick work of that, and so three years later, it was "revealed" that Holmes was still alive.
* Arthur Conan Doyle considers him more useful than all the police detectives in London.
* Arthur Conan Doyle (he even tried killing Holmes off at one point, but fan backlash forced him to do an about-face).
* Arthur Conan Doyle made him continue each time. But when the real last story came, Conan Doyle said, "screw it" and completely averts this by giving us a standard-issue mystery as the last Sherlock Holmes story.
* Arthur Conan Doyle, Professor Challenger is a man of science who has no hesitation to set off and explore a mysterious plateau in the Amazon.
* Arthur Conan Doyle short story "The Horror of the Heights" details the adventures of an intrepid aviator who flies above 40,000 feet and encounters an "air jungle" — an entire ecosystem of atmospheric beasts. He barely escapes from a predatory creature on his first flight, and records his intentions to go back up later and explore more thoroughly. The framing story reveals that the aviator's plane was found crashed and the aviator himself missing. All that was found in the plane was a torn, blood-stained journal. The last words are hastily scrawled: "Forty-three thousand feet. I shall never see earth again. They are beneath me, three of them. God help me; it is a dreadful death to die!"
* Arthur Conan Doyle Sir Nigel wears his lady wife's leather glove on his hat as a favor. Lady Loring is several inches taller than her husband, much heftier and harsh featured but as far as her loving hubby is concerned she is the most delicate and delectable creature on Earth. Joke about the size of her glove at your peril.
* Arthur Conan Doyle stories predate the Fair Play convention, so most, if not all, of the stories are Clueless Mysteries. The solution often hinges on something that Holmes observes, but which is not described to the reader in sufficient detail for them to come to the same conclusion as Holmes does. In this case, the fun of the stories don't come from solving the mystery, but seeing the logic Holmes used to solve them.
* Arthur Conan Doyle stories, which to a large extent were based on the memoirs of the French Colonel Marbot.
* Arthur Conan Doyle story in the entire series. Fan polls indicated that many readers agreed with him.
* Arthur Conan Doyle suggests that forensics may one day be the future of entertainment. Murdoch says the public would find it "too dull and too bloody".
* Arthur Conan Doyle (the man did, after all, kill Holmes off purely out of spite for the character). The huge sums of money editors were offering him for new Holmes stories, and his dwindling bank account, no doubt played a part in his decision to finally take the plunge. There is an anecdote sometimes cited that says that, tired of being asked to revive Holmes, he finally asked for a ridiculously huge sum of money that he knew the publishers wouldn't be able to pay, and was appropriately shocked when they immediately said yes. Doyle was paid around 600 Pounds per Holmes story, worth about 80,000 Pounds (or $125,000) today
* Arthur Conan Doyle to be able to outwit Holmes. Part of the reason she outwitted him was that his plan to beat her basically relied on her being an easily-led moron, and he found it remarkable that she wasn't, so in essence Holmes lost because his attitude was biased in a sexist manner.
* Arthur Conan Doyle was a great believer in spiritualism, including séances.
* Arthur Conan Doyle was hijacked by a group of black radicals who murdered the crew and sailed the ship to Africa, leaving one white survivor (the titular Jephson). The article, originally published pseudonymously by Doyle, was widely mistaken for a true account of the incident at the time, leading to denunciations from the ship's owner and investigators of the incident.
* Arthur Conan Doyle. When a man claiming to be an American lawyer recently arrived

in London calls on Holmes, Sherlock first asks whether the American had placed an ad in the "agony columns" and is assured that he did, then when the 'American' says he's from Kansas, Holmes mentions an old correspondent of his, Dr Lysander Starr, who was "mayor of Topeka in 1890." The 'American' assures him that Dr Starr's memory is still honored in Kansas. After he's left, Holmes assures Watson that he's not what he claims - there was no ad in the agony columns and "Dr Lysander Starr" is completely fictional.
* Arthur Conley's "Sweet Soul Music" starts "Do you like good music (Yeah yeah)" and has the "yeah yeah" at the end of pretty much every line.
* Arthur Conley's "Sweet Soul Music" - the one that spotlights on Sam & Dave, Wilson Pickett, Otis Redding, and James Brown.
* Arthur contains several on the final page of Arthur's Halloween, with probably the most bizarre being "Here lies the body of Sally Bent: Kicked up her heels and away she went"
* Arthur Curry's death led Garth (the first Aqualad, and later Tempest) to succeed him as Aquaman. Kaldur'ahm succeeded him as Aqualad II and Aquaman III. Prince Arthur (who's implied to be Arthur Curry's grandson) in turn succeeded Kaldur'ahm as Aqualad III and Aquaman IV.
* Arthur delivers at the end of the episode isn't the obvious "It's no use crying over spilled milk", or even "You shouldn't jump to conclusions", but "Don't leave your milk too close to the edge of the table, because somebody's bound to knock it over." However, this could be interpreted in a metaphorical sense.
* Arthur Dent activates the Infinite Improbability Drive without any probability settings in all versions of
* Arthur Dent and Ford Prefect end up stuck on prehistoric Earth with the idiotic Golgafrinchans at the end of
* Arthur Dent, as mentioned above. He has an even worse time of things in the books than in the movie; Earth is destroyed
* Arthur does it twice, once when he spots Romulus' resemblance to Bellatrix and again when Sirius reveals that Romulus is the birth identity of a formerly glamour-charmed Harry.
* Arthur does the traditional version in one episode, with a race to the ice-cream place: "Last one there is a henway!" And then after arriving:
* Arthur, D.W. disposes of the dirty diaper by flushing it down the toilet. This clogs the toilet up and creates a flood that leaks onto the bathroom floor.
* Arthur: Early episodes had Muffy, the rich girl, the only one with a cell phone, and Arthur's family owned a computer that seemed to be command prompt and had a very primitive GUI. Later episodes had everyone else owning a phone, the computers up-to-date with 21st century technology (though Arthur's family's computer still resembles one from the 90s, complete with boxy PC tower and CRT monitor, despite actually showing modern operating system and software GUIs).
* Arthur ended after eight seasons, because Cinar (the original animation studio) went out of business after a financial scandal.
* Arthur ended after five seasons. Spain was luckier, as their dub went as far as season 14.
* Arthur ending of "And Now Let's Talk to Some Kids" shows Arthur and Francine having grown old together.
* Arthur episode also titled "Postcards from Buster", where Buster leaves to explore the world with his father.
* Arthur episode, Arthur and D.W. are seen fighting over the last grape, when their parents walk into the kitchen to inform them that they're going to be getting a new sibling.
* Arthur episode "Arthur and the Square Dance", after Arthur spends the entire episode believing that he and Francine are in love, this exchange follows:
* Arthur episode "Arthur's Birthday" the woman working as a cashier who suggests blowing square breaths for square balloons to D.W. looks high.
* Arthur episode "Arthur's New Puppy", Pal wets the rug so many times that D.W. suggests renaming him Puddles or Lake.
* Arthur episode "Arthur's Underwear", while Arthur was having dinner with his

family, his mom asks Arthur how school was that day. He then does a spit-take and starts abruptly laughing before choking, because earlier when Binky Barnes was writing on the board he tried to pick up chalk he accidentally dropped and ended up ripping up his pants, something Arthur found hilarious even after the fact.
* Arthur episode "Arthur the Wrecker" shows Arthur in different time periods accidentally smashing off the Sphinx's nose, breaking of Venus de Milo's arms, and cracking the Liberty Bell.
* Arthur episode "Binky Goes Nuts", Binky dreams about a boy who's allergic to formica, two other boys who are allergic to utensils and their own hands, and a superhero who's allergic to salt.
* Arthur episode "Bleep" when DW is in a store she sees a mother arguing with her son and when she tells him he can't go to a concert he swears and the mother drops the glass she was holding in shock. Later she repeats the word to Arthur to ask what it means and he drops his model plane. She gets the idea that this is some kind of magic word that makes people drop things.
* Arthur episode "Bossy Boots" Brain designs a machine in the episode intro called the "Boss-O-Meter" to measure how many bosses a child has in the life. D.W. makes the machine break down by overloading it.
* Arthur episode "Buster's Back", Buster Baxter returns to Elwood City after traveling with his father, a pilot. When he comes back, a lot of things have changed, including his friends loving a clown show they all hated before he left. However, this is downplayed, as he's readjusted by the next episode.
* Arthur episode "Cast Away" D.W. catches a fish on her first try, much to the annoyance of Arthur who has been trying and failing repeatedly.
* Arthur episode "Dad's Dessert Dilemma" Mr. Read introduces the episode from his garage kitchen by acknowledging that the viewer was probably expecting to see Arthur. He says Arthur is not there because he must be doing his homework. Cut to Arthur cramming his face full of cookies in the house kitchen.
* Arthur episode "D.W. Gets Lost" advertises a sale on chocolate-covered cabbage, "the dessert that makes you go 'Bleagh!'"
* Arthur episode "D.W. Gets Lost", D.W. enters the store's security room and begins playing around with the cameras to find Mom on the screens. Her antics first knock out an employee in the Video Department followed by toppling a display of tennis balls arranged in a pyramid. When she sees customers tripping over her mess her response is "Look at all those clumsy people!"
* Arthur episode "D.W. Goes to Washington", one briefly appears in a flashback showing the time D.W. convinced the family to go to "Santa's Igloo" ("Share a sundae with Santa and his friendly reindeer!") The place turned out to be a crappy tourist trap run by a surly, disheveled Santa who grumpily grouses at the Reeds for not bringing a sundae.
* Arthur episode, "D.W.'s Baby" shows the events of its brother episode, "Arthur's Baby" from D.W.'s point of view.
* Arthur episode "D.W.'s Very Bad Mood", Arthur enlists the help of his friends hoping to find out why D.W. is experiencing her negative mood. While D.W. is in bed, she starts mumbling about something being wrong, then sits up in bed and calls Arthur a "dodo brain".
* Arthur episode "D.W. Thinks Big", Arthur becomes the ringbearer for his Aunt Lucy's wedding. The ring gets lost ending up in the pipe organ. Arthur is perfectly willing to retrieve it, but is too big to go inside the organ. Fortunately, D.W. is small enough to retrieve it. It also serves to nicely expose Cora's true personality to everyone. She's small enough to go inside, but unwilling to, saying the bridal couple can "just get another ring."
* Arthur episode "Finders Key-pers" revolves around this trope in a sense. Arthur, Brain and Binky find a key, and spend much of the episode thinking of all of the cool things that it might unlock, such as an F1 race car or a literal key to the city. In the end, the key is revealed to actually just go to the sprinklers for the school's baseball field.
* Arthur episode "He Said, He Said", the cable goes out at the Read house, and Jane calls the company. She's put on hold, and a few scenes later, we cut back to Jane,

still in the kitchen on the phone, with a bored, exasperated expression on her face. We never find out if she actually gets through to a person, or indeed, whether a conversation with a representative is necessary to ensure restoration of the cable signal.
* Arthur episode ("Mr. Ratburn And The Special Someone") got banned by Alabama Public Television, along with its sister episode, "The Feud" due to concerns over showing gay marriage to conservative families. It was pre-empted by a rerun on the day of its premiere.
* Arthur episode, "Play It Again, D.W.," the camera zooms out of D.W.'s screaming mouth when she realizes her Crazy Bus CD is gone.
* Arthur episode "Poor Muffy," Muffy has to live with Francine's family. When Francine offers to walk to school with her, she refuses and instead gets in her limo. It turns out that the school is right down the street from Francine's apartment building, close enough that her mother can shout out that she forgot her lunch.
* Arthur episode "So Funny, I Forgot to Laugh" centers around the title character making fun of Sue Ellen because of a fur sweater she wore to school; claiming that she looks like a sheepdog. Sue Ellen then tells Mr. Ratburn about this and he tells Arthur to write Sue Ellen an apology letter. Arthur does apologize in the letter, but also points out that he thinks that Sue Ellen is just overreacting. He does eventually give her a sincere apology however.
* Arthur episode, "So Long, Spanky", D.W. dresses Spanky, her pet parakeet, in a shirt and bonnet and has him hold an umbrella. It is at this point that Arthur mentions that he feels sorry for Spanky in these kind of situations, feeling that being D.W.'s pet is worse than being her brother.
* Arthur episode "Spar for the Course" is about Binky, Buster, and Muffy trying to build a mini golf hole.
* Arthur episodes "The Great MacGrady" and "Room to Ride/The Frensky Family Fiasco", got pulled due to the Lance Armstrong doping incident (Armstrong cameoed on both episodes). The former episode was brought back for season 24.
* Arthur episode "Tales from the Crib", when the mischievous Tibble twins invent a monster to frighten DW from moving out of her crib.
* Arthur episode "Team Trouble", Arthur, Francine, and Buster have to do a group project on Ancient Rome. They decide to make a comic book about it, but none of them do any research for it. Arthur and Francine realize the low quality of their portions after showing them to other people, who point out the problems in them. Buster, on the other hand, concludes his portion isn't good because Binky liked it.
* Arthur episode, "The Rat Who Came to Dinner", D.W. gets Mr. Ratburn's name wrong every time by calling him "Mr. Ragworm", "Mr. Ratbite", "Mr. Ropeburns", "Mr. Rathead", and "Mr. Ragburp". Justified since she is four years old. In fact, no one even bothers to correct her.
* Arthur episode "The Secret Origin of Supernova", Arthur finds out that an energy drink endorsed by Dark Bunny is actually unhealthy, being against the hero's self-imposed code of honor.
* Arthur episode "Whip. Mix. Blend./Staycation" was released on a DVD in January 2015 before it aired on television in any country. It made its proper American television debut in September of that same year.
* Arthur episode "You Are Arthur", Arthur tries his hardest to outrun the Brain but falls behind after he stops to help Muffy after she trips and hits the roadblocks. He doesn't win but does get featured in the newspaper, which he considers a better reward thus.
* Arthur. Even as the leader of the Kingsmen he comes across as very snobby and elitist, thinking the lower-class Eggsy shouldn't be included in their ranks. Following
* Arthur: Fans analyzed Nigel Ratburn's stereotypically effeminate mannerisms and hobbies and spent decades buzzing about the possibility of his being gay before he married a man in season 22.
* Arthur featured a Jack's Joke Shop commercial, where the proprietor showcases several of his gag items that he's giving away for free. Buster says that that's

just crazy.
* Arthur featured an episode in which the cast entered a contest to propose a story idea, which was won by the avatar of the girl who submitted the premise for that episode.
* Arthur featured a product called Woogles, which you could squeeze, stretch, bounce, and customize. Woogles had a cheap knockoff called Poogles, which looked like a potato and couldn't do anything.
* Arthur featured this in the arcade game "Planet Smasher" that the gang (sans Arthur) was playing.
* Arthur finds himself in a room carved out of the inside of a mountain that looks like it was carved out of the inside of a mountain.
* Arthur Fleck already laughed due to mental illness even before he snapped out to become the
* Arthur: "Flippity Francine" has Muffy post a humiliating video of Francine slipping on mud, bouncing off a pile of soccer balls and face-first into another pile of mud. The episode is about Francine having to deal with the aftermath.
* Arthur focused on Sue Ellen and her feeling lonely at being an only child, she meets up with the Frensky sisters, practicing cheering. Catherine gets her to put her arms higher over her head, and then...
* Arthur, Francine and the Brain are fighting, so Arthur and Buster write fake apology letters to try to get them to make up. When Arthur delivers his to the Brain, the Brain reads it and yells "This isn't an apology, it's a list of demands!" as the letter is just a list of toys and dolls preceded by "I want." Arthur quickly realizes that he wrote the letter on the back of his little sister's Christmas list.
* Arthur, Francine and the Brain create a fake love letter and give it to Muffy to get back at her for insulting their science fair projects.
* Arthur furries, but it still gets ton of fan work and fan fiction from furries.
* Arthur gets this from the Tough Customers when coming clean about not being a habitual thief.
* Arthur Goes Fourth. Beat finds Brain's nickname silly and questions why he allows people to call him it.
* Arthur Goes Fourth fan verse. It has two spin-offs, each set in a different grade.
* Arthur Gold, who could (and did) often goad Stone into legal mistakes simply by looking like he was enjoying himself while defending obvious scumbags.
* Arthur Greyhem, Vandar Rowan, Arman Gill, and Gerald Swordhand are all Validian officers who defected after realizing Maultor lied about the elves and hid the existence of other deities.
* Arthur Gride to Madeline Bray, since he's old, ugly, greedy and lecherous.
* Arthur had a couple of episodes which featured some of the characters as giants. D.W. mostly gets this treatment.
* Arthur had an episode where George, a moose, tried to be tougher and wrote "LOVE/HATE" on his antlers.
* Arthur had Arthur and Francine end up getting locked in the library when it closed. They go through the card catalog looking for a book on the subject.
* Arthur, had Arthur look a little more like an aardvark, but over subsequent books changed to his current appearance.
* Arthur had a strange example of this trope in the episode "The Longest 11 Minutes". The episode's plot focuses on the gang trying to find a way to survive when the Internet goes out, and learning about things that can be done without the Internet, like reading encyclopedias and using an instant camera. However, the things they choose to entertain themselves with are claimed to be "unfamiliar" to the characters when they have appeared in previous episodes of the series. This was likely done because it is relatable to the current demographic watching the show.
* Arthur had a subversion; Arthur knows which restroom he needs, but when he figures he doesn't need glasses after being teased about them, he can't tell the two restrooms apart and attempts to go into the right one from memory. He doesn't succeed and causes chaos when going into the girls' room.

* Arthur had Francine filming a music video. When asked why she put a bottle of tomato ketchup on top of a tombstone, she explained it was product placement.
* Arthur had to storm his own castle to save it from his evil sister Morgana, who'd stormed it herself the episode before and declared herself
* Arthur Hailey, a reporter on a bus with the others covering the opening of a power plant asks if there's any booze at the meal the electric company is providing. The public relations flack on the bus asks all the reporters if that item will be off the record, and they all agree. Basically, if the electric company can afford to give reporters free booze, it might look (to the public) like they are spendthrifts when it comes time to ask for a rate increase, so they have to ask the reporters to keep that point about the availability of booze to themselves.
* Arthur Hailey features a subplot about a failed businessman who takes out a large flight-insurance policy and plans to blow up the plane with himself on it, so his wife can collect.
* Arthur Hailey is an air traffic controller who's haunted by memories of a mid-air collision that took place on his watch (and for which he holds himself responsible). A flashback scene has him and his colleagues listening to a radio transmission from one of the planes as it plummets to earth after the collision, and the final words of a little girl aboard said plane:
* Arthur Hailey, St. Gregory hotel owner Warren Trent is facing serious financial troubles and may have to sell. Curtis O'Keefe offers to buy the place for his massive chain but Trent is unsure as it's not just him but his employees, who he sees as family. He cites Tom, the hotel's chief bartender for 30 years who Trent would trust with his life. To his shock, O'Keefe produces a report revealing that Tom "has been bleeding you white" almost that entire time. Trent confronts Tom on this and fires him. At which point, Tom sneers that he never saw Trent as anything more than a high and mighty boss and he (and others) are going to enjoy seeing him go out of business. Trent marvels at how he could never realize in 30 years how much his "close, personal friend" hated his guts.
* Arthur has an episode where Binky tries to teach ballet to D.W. When Binky's Tough Customer friends see him practicing ballet with a preschooler, he tries to defend it by saying that she was actually teaching her a martial art called "Kung Fu Young".
* Arthur has at least one 10 featured in every episode. The season premier, "Happy Anniversary", features almost twenty of them.
* Arthur has "Binky", a virtual band, whose life performances are basically holographic projections.
* Arthur has Binky taunt Arthur that he might have a crush on Francine, and starts singing the song only to screw up the spelling several times and then give up.
* Arthur has Brain slip on a banana peel resulting in a badly sprained ankle on one leg and a torn knee ligament in the other.
* Arthur has D.W. and Arthur imagining their parents getting a divorce over literally spilled milk.
* Arthur has one in "Meet Binky", due to Arthur mistaking a CPU case for a trash can.
* Arthur has saw this happen to its toy license. The license originally belonged to Playskool, but then passed on to Eden Toys after just a short stint. When Eden Toys went defunct, it passed on to a little-known company called Crocodile Creek and has remained since.
* Arthur has the episode "Arthur Plays the Blues". It is mostly about the dangers of procrastination, as it nearly gets Arthur to lose his piano instructor and his hopeful future job.
* Arthur has the episode "One Ornery Critter". Apart from the above formula, Arthur gets so worked up about one dog's dislike of him that he stops working at the local animal shelter since he's great with dogs otherwise. Arthur comes around when Buster tells him that the dog is very selective of who she likes: She only seems to like one of Buster's cousins out of her owner's immediate family.
* Arthur has this happen when several of the love notes Arthur gets end up spilling out of his jacket. Many of the other schoolkids tease him about this and start

singing the rhyme as Arthur retreats.
* Arthur have a fight and break up. Muffy auditions a long list of her other friends and acquaintances for the role of "best friend", but when she finally settles on a candidate, she keeps suggesting things she would do with Francine, only for Binky to be completely uninterested.
* Arthur himself ends up in a very similar situation later on. Stranded on a planet still in the equivalent of the Middle Ages, he at first hopes to
* Arthur himself gets this treatment when he underestimates Eggsy, who had switched out his poisoned drink.
* Arthur. However, "The Blackout; Mei Lin Takes A Stand", which has the first segment of the episode focus on a heatwave hitting Elwood City during the summer, is placed in regular rotation. It also first aired in April 2009, two months before summer began.
* Arthurian, a work most scholars date to the 1310s. It isn't too far-fetched since archeological evidence has shown that there were people of Berber or African descent living in Roman Britain such as the Ivory Bangle Lady and the Beachy Head Lady.
* Arthurian Legend, Arthur's mother has three daughters with her first husband: Morgause, Morgan le Fay, and Elaine. The first two play pivotal roles in Arthur's life, but Elaine is typically mentioned once in passing and then never heard from again, possibly because she's unremarkable in a tale of the remarkable - her life's achievements amount to marrying according to her station and bearing a son (her son's accomplishments boil down to being a lesser Knight of the Round Table who goes on one quest, fails miserably, and has to be rescued by Lancelot).
* Arthurian Legend, but amongst the most notable would be Gareth and Lynette (where, oddly, they end up marrying each others' siblings).
* Arthurian Legend. But despite hating women, he still adheres to the code of chivalry and agrees to defend Queen Guenever's honour when she's accused of poisoning Sir Patrick. White subtly hints this stems from Bors being gay and in denial about it — apparently like White himself.
* Arthurian Legend depending on whether your sympathies lie with the knight whose life she saved (and whom King Arthur would rather have executed) or with the women he could potentially rape.
* Arthurian legend does this often, although just as often there aren't any armies, just little clumps of knights. Check out Malory for good examples of the trope actually in action. Geoffrey of Monmouth, despite his habit of making history up, was actually fairly reasonable about battles.
* Arthurian Legend. Every time a new knight is introduced, they prove how great he is by having him defeat a line-up of more established knights. Gawain gets this a lot, as does Percival.
* Arthurian legend has The Green Knight. Depending on the version, he may have a real name revealed at some point, although not always the same name. Appropriately, the earliest version of his story appears in a poem authored by someone known only as The Pearl Poet.
* Arthurian Legend, King Arthur's final battle with Mordred started this way. Neither side trusted the other and brought plenty of heavily armed soldiers along to the negotiations. The fighting started when one soldier, bitten by an asp, drew his sword to kill it. Both sides had been warned to expect treachery and responded immediately. Due to the confusion and disorganization, both sides were essentially wiped out.
* Arthurian Legend: King Arthur's jester was Sir Dagonet, a man knighted as a joke. Many stories have him wittily pointing out the other characters' mistakes and shortcomings.
* Arthurian legend. Later, when he figures it out, he sets off in search of her to make good his proposal.
* Arthurian Legend legends into one story and can't just go by one copyrighted canon. When one bard tells the legend as a tragedy and another tells it as ye olde action movie, how do you decide which version to keep?
* Arthurian Legend: Merlin, Sir Kay, Guenivere, Percival... pretty nearly every

character in the Arthurian myths. Only Arthur and his father have a known surname - Pendragon.
* Arthurian Legend. Or at least he's like this in Malory's Le Morte d'Arthur.
* Arthurian Legend Others avert it by having him merely exile Tristram, who later dies of other causes (and then Isolde dies of a broken heart).
* Arthurian Legend portrays Guinevere as a badass warrior queen and/or spellcaster. In later retellings, her main achievement is to bonk Lancelot behind her husband's back, and modern retellings can use either as the author prefers.
* Arthurian Legends came by way of French storytellers. Percival was an OC. It could even be said that the entire Arthurian Canon is, in its own way, fanfiction.
* Arthurian Legends engine and, as the name implied, it would be set in a Camelot-type setting.
* Arthurian LegendsIronically the Arthurian Legends have also been an inspiration for the Romanticist movement, of which it derives its name from the Medieval Romances, and also brought about a revival in interest in the Arthurian Mythos starting in the Nineteenth Century. Though that is arguably due to the fact that the Romances did not have to address the same issues earlier authors.
* Arthurian legends movie, Lancelot's character was preserved. He was memorable for scenes where he would kill innocents and be pretty sorry for it later, just like the stories.
* Arthurian legend songs to pass the time (and annoy his friends). This in addition to his nigh-unmatched talent in melee combat.
* Arthurian L Egend stories involves the Green Knight challenging any of Arthur's knights to chop of his head and, one year hence, return to have his own head chopped off. In some versions, only Gawain was brave enough to answer the challenge. In others, Arthur himself stepped up to the plate, but Gawain begged to do it instead because he didn't want to risk his king coming to harm.
* Arthurian Legend. The fact that his character may have been partially inspired by Cù Chulainn is probably a coincidence, however.
* Arthurian Legend (the legends and stories about the founding of Britain)
* Arthurian Legend. They're not inherently or incorruptibly good and noble, and it frequently shows. For the most part, even those who want to live up to the ideals of chivalry have to work at it, since it doesn't come naturally to them, and it's hardly uncommon for them to fall short. Really, the knight who most fits the idea of the pure, untarnished, incorruptible hero is Sir Galahad — who is very clearly intended as a truly exceptional figure. While many of Arthur's knights were certainly successful, heroic figures capable of great selflessness, that didn't necessarily make them wonderful people. The vast majority of them had serious character flaws and/or did some very questionable things. Some of them could even be downright nasty at times. In other words, a knight could be a great and noble hero who did incredible things and saved countless lives — and yet also be an unlikable jackass.
* Arthurian Legend: this is how the relationship between Guinevere (A) is married to Arthur (C) but in love with Lancelot (B), with Lance torn between his attraction to Gwen and his loyalty to Arthur.
* Arthurian Legend treat Morgaine Le Fay as the partner or boss of Mordred; the actual legends and romances don't reflect this, but the story of the Green Knight could fit because she uses her magic to help his beheading game.
* Arthurian legend, was described as having a snake-like head and long neck.
* Arthurian Legend, which is a very good example of how this can happen.
* Arthurian Legend, wields an appropriately sized axe as his main weapon.
* Arthurian mythology once held off a massive angry mob while using a chess board as a shield. Not to be outdone, the damsel he was protecting started chucking the pieces (which would have been made of carved stone) at the mob. She knocked a few people out before the whole affair was through.
* Arthurian mythos as the tale of Tristan and Isolde. Here, the added twist is that hearing of her revulsion for King Mark of Cornwall, Tristan acquires a love potion, which with the best of intentions he intends to use on her to make her fall in love with Mark. But she deftly ensures Tristan drinks it so he falls in love with her...

* Arthurian myth (who may have been descended from Joseph and Mary) would result in the Ultimate Christian Knight - Galahad.
* Arthurian Romance is arguably one of the earliest texts to use this trope. A woman, Eufeme ("Alas, woman!") gives birth to a daughter, Eufemie ("Alas, girl"; or, "euphemism", a way of speaking around the subject). Her parents decide to raise her as a son, named Silence ("Seriously, could the metaphor be more clear?"), so that she can inherit her father's land. She becomes famed as a minstrel and a knight, captures Merlin, and is unmasked. Unfortunately, it's not quite as feminist as it sounds; Silence is depicted as the "perfect woman" precisely because she was raised as a man, and thus is not as susceptible to evil as other women are.
* Arthurian: The plot revolves around the history of the Grail, which traditionally gained its magical powers from an encounter with Jesus, but in this telling existed and had its powers — including the power to defeat death — long before he appeared on the scene. Late in the book, there's a flashback to the events surrounding Jesus' death and resurrection, from the point of view of a character who knows about the Grail; he initially assumes (rather smugly) that Jesus was just an ordinary man brought back to life by the Grail, but then is surprised and disturbed by the discovery that it couldn't have been the Grail, and so therefore must have been something else he doesn't understand, possibly even a genuine act of God.
* Arthur, if one succeeds in finding a treasure chest in the scuba diving minigame, a newspaper article with a picture of Arthur surrounded by the treasure will appear.
* Arthur, in a conversation between Binky and George about creating a new language:
* Arthur, in an attempt in find a positive role model to cosplay as after an advertisement involving
* Arthur: In "Binky Rules!", the manager of a band called Binky decides that graffiti-ing "BINKY RULES!" all over the school would be a good publicity stunt. However the character Binky gets in trouble when the school janitor believes he's responsible for the graffiti.
* Arthur: In "Binky's Music Madness", Binky doesn't like the Bang on a Can All-Stars for their odd methods of making music. He takes a bunch of random noises and plays it in school as a random band he heard about, and to his surprise, they all like it. The Bang on a Can All-Stars explain to Binky that he actually did put effort into it to make it sound good, and he realizes that experimental music can be cool.
* Arthur: In "Brain's Shocking Secret", it's revealed that the Brain was held back in kindergarten; Prunella, and then Binky, are the only other ones who know about it.
* Arthur: In "D.W.'s Backpack Mishap", Arthur follows D.W. while she tries to find out who took her backpack. One stop is Emily's house, where she invites Arthur and D.W. to a pretend tea party; Arthur reluctantly goes along with it, but is very bored.
* Arthur. In fact, it's shown that his parents keep a large dictionary at the dinner table because of it.
* Arthur: In "Jenna's Bedtime Blues", minor character Jenna is worried about going to a sleepover because she wets the bed.
* Arthur: In "Mom and Dad Have a Great Big Fight", Arthur and D.W. begin blaming each other for their parents arguing and listing the reasons why. As they throw their accusations against each other, D.W., who runs out of decent reasons, delivers this:
* Arthur in Mr. Ratburn's play about the inventor. But she begins to go on a power trip and start acting like she's running the show - with an iron fist.
* Arthur: In "Nicked by a Name", after Brain gives the other soccer teammates cool nicknames, when Arthur presses him for a nickname, Brain comes up with Average Arthur.
* Arthur, in "Pageant Problems" D.W. tricks Arthur into performing as the chimp for a two-person poem she wrote for her preschool's pageant by pretending that none of her friends or classmates would agree to perform the poem for her. Afterward,

Arthur talks with her classmates, who loved his performance and says that he bets they wished they hadn't refused her offer and nobody has any idea what he's talking about. His friends rib him for being tricked by D.W. He says he's going to get her back, but Francine says that D.W. is just too smart. He admits the whole thing was pretty funny and they crack each other up acting like chimps.
* Arthur: In "Prove It", D.W. claims that it hurts more to fall on your knees and on your behind, because your behind is fleshier.
* Arthur: In "Team Trouble", Arthur draws a comic for his history assignment. However, he doesn't include any real ancient history in it. Prunella asks him about it.
* Arthur in theaters. All of them except Brain like it until Brain delivers a detailed criticism of the movie, which changes the minds of everyone except Buster. Buster begins to review movies in the newspaper that his mom works for, but he has nothing but praise for every movie (all of which involve robots, aliens, monsters, superheroes, and/or explosions). Brain decides to counter this by starting a movie blog, where he rates every movie unfavorably. Their friends keep flip-flopping on whose review to take - until Buster and Brain decide to review a movie together. This is ultimately averted at the end, when their friends call them out on this, with Muffy stating that they have their own opinions.
* Arthur: In the episode "Bitzi's Break-Up", Buster learns that his mother Bitzi is breaking up with her boyfriend Harry. Not wanting to lose Harry's friendship, he tries to get them back together and although it doesn't work, Bitzi and Harry reassure him that they can still be friends, much to Buster's relief.
* Arthur: In the episode "Buster's Green Thumb", Muffy wants to sell the tomatoes Buster has been helping Mr. Langley - a gardener - grow. After he gets in trouble with Mr. Langley for taking too many tomatoes, he eventually makes amends with the older man and enlists his friends' help with the community garden. Muffy again makes suggestions for tomato products, to which Buster responds by "offering" her a piece of garlic bread and gently shoving it into her mouth.
* Arthur: In the episode "Desperately Seeking Stanley", Arthur learns that the girl he sold his childhood plush bear Stanley to has in turn sold Stanley to the rambunctious and destructive Tibble Twins. While on his way to the twins' house, Arthur has a fantasy that the Tibble twins are standing over an operating table and wearing surgical gowns and masks, making comments such as "One more snip...There!" only to reveal that Stanley has had all his stuffing removed by the twins.
* Arthur. In the episode "Locked in the Library", Muffy calls the library after hours to ask Mrs. Turner about borrowing some books but when Francine answers the phone Muffy assumes she's called the wrong number and hangs up.
* Arthur: In "Waiting to Go", when Binky is tempted to steal The Brain's cranberry juice, he (imagines? hallucinates?) them saying, "We're so quenching!".
* Arthur in which Arthur and Buster are in the school bathroom, trying to pull Francine in through the window. It then flashes back to explain how this came to be, and catches up with itself about 2/3rds of the way through.
* Arthur, in which Arthur and his best friend Buster visit New York City. Much of the episode is animated as usual, but whenever New York is shown through Buster's camcorder, the show becomes live action.
* Arthur, in which Arthur's new voice actor redubbed the season during which his original voice actor had gone through puberty. Especially jarring for viewers who had viewed the episodes before the edits. That said, Mark Rendall is near universally viewed as a better actor than Justin Bradley, who the producers claimed lacked the vocal range of Arthur's original voice actor, Michael Yarmush, and would make Arthur sound whiny when he was upset. Mark Rendall is also generally considered Arthur's second best voice actor, behind Michael Yarmush.
* Arthur is about a 3rd-grader aardvark, his family, and his friends. Common themes taught include getting along with siblings, responsibility, and cooperation.
* Arthur, is another Montreal talent who is impossible to track down. The only known photo of him was taken in the late '90s when he was still a child, and he has no social media presence.
* Arthur is at the hospital where his mother is being cared for after a stroke, and

a pair of detectives come to question him about the subway murders. After a tense back and forth, Arthur tells them off and walks away to go tend to his mother. As he tries to get into the hospital, he slams into the automatic door, spends a moment trying to get the motion sensor to work while one of the detectives tells him that it's an exit door, and he goes through when an employee is leaving for the night.
* Arthur is constantly needing to be saved by Merlin, despite being one of the greatest swordsmen in the series and capable of holding off two lesser swordsmen blindfolded. It's pretty well justified by the fact that most of the threats are magical but the way Merlin got his job as Arthur's manservant was by saving his life, and after 52 episodes of this, Merlin's extremely jaded by it.
* Arthur" is infamous for this. Long story short, Arthur builds a model airplane, but D.W. breaks it. Arthur tries telling her several times not to touch it, but it never works, and he hits her in anger and gets punished for it.
* Arthur is not only passionate about sports but is the key to victory in many competitions.
* Arthur is preparing for a written test he's required to take, and knows full-well he's going to be terrible at it. One of the men who works at the center tries dropping some hints about the correct answer Arthur will need, but Arthur's too stupid to get it. And later on admits he wasn't listening to the conversation to begin with.
* Arthur is prone to this, at least in the earlier episodes. For example, Arthur frequently visits the library, and it's pretty obvious which books he'll take off the shelf.
* Arthur: It's been alleged that the reason Marc Brown drew Arthur with a nose that looked more like a tapir's trunk than an actual aardvark nose is because an editor decided real aardvark noses were too phallic-looking to be appropriate for a children's book. There is absolutely no evidence to support this claim.
* Arthur, Jenna has a pillow fight with her friends. Since she had a pull-up hidden in her pillowcase, she ends up exposing it during the pillow fight.
* Arthur, King of Time and Space, and when she casually mentions that she likes online social interaction because you don't have to get dressed for it, he assumes she's kidding.
* Arthur, King of Time and Space appears to have this as its only function. In-universe, the reason for this is unknown, out-of-universe it's to set up the space arc version of the False Guenevere story.
* Arthur, King of Time and Space, Arthur doesn't want to be High King of Britain (or High King of British Space, or C.E.O. of Excallicorp), but his sense of responsibility is too strong to give it up.
* Arthur, King of Time and Space, Arthur is in a supermarket checkout, and says the total is a bit over what he expected. The cashier reminds him that he recently put a tax on entering the express lane with too many items, and Arthur pays up.
* Arthur, King of Time and Space, Arthur sleeps with Morgan (in the space arc) and Morguase (in the baseline arc) without realizing the relationship. (Or vice versa — when Merlin finds out about Morgan he specifically notes that she should have been able to figure out who the mother of the rightful king must have been, but apparently she didn't. And Morguase didn't either, because if she had she'd have realized that her spell wouldn't work properly.)
* Arthur, King of Time and Space banished Guenevere and Lancelot in the Space and Fairytale arcs, but at least partly because he thought they'd be happier together without him. He was wrong.
* Arthur, King of Time and Space crossover fanfic cartoons with the proper names search-and-replaced (Arthur, Lancelot and Guenevere replacing Kirk, Spock and McCoy; Merlin and Nimue subbing for the Doctor and various companions).
* Arthur, King of Time and Space: Excalicorp is a good Mega Corp, at least since Arthur started influencing policy. The strip doesn't directly state how big it is, but if you pay attention you'll notice that everything from computers to cars has a sword-in-the-stone logo.
* Arthur, King of Time and Space, fairies and Olympians can see ultraviolet.

* Arthur, King of Time and Space had a strip that began in the contemporary arc with Arthur saying he wasn't sure why a razor needed five blades, and Merlin replying that he remembered when three blades was a SNL punchline. And then a cut to the space arc with the same dialogue only both numbers are followed by "thousand".
* Arthur, King of Time and Space had Morgan avoiding helping with an engine problem, citing she hated being the "too manyth" cook.
* Arthur, King of Time and Space happens in spring, and then the whole thing starts again next season.
* Arthur, King of Time and Space has been space-opera-fied as well; the earliest history anyone in the setting knows is the Eden Colony formed after the destruction of the theoretical origin planet, and Arthur gets to go back and visit Space Hercules on Planet Greece, plus Space Jesus, Space Noah, and many more.
* Arthur, King of Time and Space. (He gets over this long before it becomes hypocritical.)
* Arthur, King of Time and Space, he wishes Merlin was there to advise him on what to say...
* Arthur, King of Time and Space: "If my terrorist is your freedom fighter, I hope the next thing he wants to be free of isn't you."
* Arthur, King of Time and Space." In 2008, they're in the skybox, and it's too far away to see what's happening. Merlin comments "Next year: the stands!"
* Arthur, King of Time and Space, including comparision to a lightsaber (without actually saying "lightsaber").
* Arthur, King of Time and Space, in the space arc he's still inbred but not particularly evil, while in the modern arc he's Guinevere's son and a little creepy.
* Arthur, King of Time and Space, Lancelot cannot lose any contest due to having God's favor. In the Western arc, Arthur sees him playing poker and is surprised that a religious man like him is gambling, and Guenevere replies that, for Lancelot, it's not a gamble.
* Arthur, King of Time and Space magic and technology are both required for FTL travel and Merlin is not only a wizard but a time traveler from the lost planet of Avalon.
* Arthur, King of Time and Space modern arc strip, Arthur tells Kay he's got a role in the church play. Kay says he'll be sure to bring tomatoes, and Arthur comments that the admission fee might actually be a donation to the food drive.
* Arthur, King of Time and Space occasionally show Merlin in his hippy days.
* Arthur, King of Time and Space often comes across as a Dumb Warrior. According to Fairytale!Arthur "Gawaine's not stupid. He just hasn't any retention for what's outside his field of interest." This is engineering in the Space Arc, the roll of arms in the Fairytale Arc, and computer science in the Contemporary Arc.
* Arthur, King of Time and Space. One of many points where Arthur would really like to get some legal reforms done.
* Arthur, King of Time and Space reveals that the world hasn't been transforming around Arthur all this time, his consciousness has been shifting to other incarnations.
* Arthur, King of Time and Space shows Arthur barely avoiding doing a hefty load of literal paperwork.
* Arthur, King of Time and Space sometimes does jokes about modern-arc Arthur, updating his own webcomic, saying how much he hates having to do "can't think of a joke" jokes.
* Arthur, King of Time and Space spends multiple panels carefully setting up the punchline "I wouldn't send a knight out on a dog like this", before Lancelot derails it by asking, if the dog has no nose, how does it smell?
* Arthur, King of Time and Space strip, Arthur tells Gawaine that while he had the advantage of being taught by Merlin, there are a lot of factors holding back education in this hemisphere. Gawaine responds "Hemisphere?"
* Arthur, King of Time and Space strip, Arthur visits the castle paddock and asks what's happening. Upon being told the colts are being gelded, he leaves again

quickly.
* Arthur, King of Time and Space strip concluding they should never do it again.
* Arthur, King of Time and Space strip Fasha asks Guenevere what the documentary about ADHD she was watching was like. Guenevere replies that she doesn't know, she switched channels to watch cartoons.
* Arthur, King of Time and Space strip, Merlin responds to Lancelot's "Do you think this is wise?" with "Why, no. I woke up this morning and decided to do the least wise thing that occured to me."
* Arthur, King of Time and Space strip, one of Arthur's subject kings asks him if he can play chess. Arthur replies that he knows how the pieces move, but nothing about strategy. The other king concludes "So, no."
* Arthur, King of Time and Space strip, the sorceress Morgan mentions that every curse needs to have an out, "or the spell is structurally unsound and won't work".
* Arthur, King of Time and Space strip, which has Lancelot trying to teach Guenevere how to use stirrups in the baseline arc, Guenevere complaining about a telepathic command system in the space arc, and Guenevere struggling with her smartphone in the modern arc and sayng she "hates technology".
* Arthur, King of Time and Space suffered this, paralleling the illness of the one in the fantasy arc.
* Arthur, King of Time and Space that as the king's half-sister she can do whatever she wants, but egalitarian Arthur has instructed his people that anyone saying "Do you know who I am?" is to be ignored.
* Arthur, King of Time and Space. The characters exist simultaneously in multiple time periods, but most of the romances are the same in all of them, including a few cases where one or both partners is gender-swapped. (For example, Tristram and Isolde are always a couple whether Tristram is male or female.)
* Arthur, King of Time and Space, the Fey have agreed to help Morgan become queen, for impenetrable reasons of their own (hence "Morgan le Fey"). However, they don't actually seem to be all that bright...
* Arthur, King of Time and Space: the others expect Lancelot to hate the practice, but he explains that he might deplore the commercialism, but maintaining the Christmas spirit all year is something he's in favour of.
* Arthur, King of Time and Space to their baseline and space selves preparing for the Roman War.
* Arthur, King of Time and Space uses a variant spelling for Iseulte of Ireland to distinguish her from Isolde of Brittany. It keeps all the Elaines, though, and the "false Guenevere" in the fairy tale arc (in the contemporary arc she's called Fascha, and is Guenevere's full sister).
* Arthur, King of Time and Space was Arthur doing this every time Merlin started predicting things he didn't want to hear.
* Arthur, King of Time and Space well-balanced and laid-back that the worst things it can find in his mind don't actually bother him that much.
* Arthur, King of Time and Space, when Guenevere criticises Merlin for eating junk while exercising as missing the point. Merlin retorts that the point of exercising is to let him eat what he wants.
* Arthur, King of Time and Space. When his worst fear is manifested in the space arc as being that he's really Ector's bastard and condemned to life as Kay's squire, his reaction is "Well, it could be worse".
* Arthur, King of Time and Space, when it looks like Sir Ector's son Kay is the lost heir, King Lot says to Ector "Of all the honors Uther gave you, I never suspected the horns!"
* Arthur, King of Time and Space, when Morgan explains "We don't just go from one time to the next. We genuinely belong in all of them."
* Arthur, King of Time and Space, where he's CEO of Excalicorp) he's dedicated to helping ordinary people.
* Arthur, Lakewood Elementary Principal Mr. Haney was sent away to Africa to live his dream of opening a school following the death of his voice actor Walter Massey in 2014.
* Arthur listed above, there was a young female character with a gender neutral

voice and a baseball hat nickname "W.D."; she also has a gender neutral haircut and wears masculine clothing, to emphasize she's a tomboy. Her name is "Wilhelmina", but no one calls her that.
* Arthur looks like a gerbil, mouse, bear or a hamster rather than an aardvark.
* Arthur loves an odd seafood pizza known locally as the Surf's Up Surprise. The only known ingredient is oysters though presumably there are other bits of seafood involved.
* Arthur Machen are implied to all share a universe, though it's never made explicit, but rather hinted at by the recurring locales (Edwardian London or the English countryside— or both) and references to Mr. Dyson, his most recurring character who starred in multiple short stories and a novel.
* Arthur Machen who seduces men into partaking of her unknown horrors, driving them to madness and suicide.
* Arthur may be thrown off by witnessing Pal and Kate talking all of a sudden unless they familiarize themselves with season 6's "The Secret Life of Dogs and Babies".
* Arthur Miller's play "All My Sons" has Chris shirtless at the start of the second act.
* Arthur Miller which actually was the major reference point for a lot of writers about this kind of pairing back in the day.
* Arthur Morgan contracts tuberculosis and dies of it in a matter of weeks..
* Arthur Morgan sacrifices his life to help John Marston and his family escape from the collapsing gang, helping them get a better life.
* Arthur movie. After subduing a villain in a fancy restaurant, the hero tells the manager to put the damage on his tab.
* Arthur movie, but everything kept going wrong, due to the incompetence of Muffy using her new video camera.
* Arthur, Mr. Ratburn turns out to be less than confident when it comes to the Internet. However, the trope is quickly defied when the Brain shows him how to use it and he quickly becomes addicted (although not seriously) to web forums.
* Arthur. Mr. Read is less than happy, especially when he discovers D.W. cut a hole in his pajamas to try to hang them, but can't grump about it too much, as he's coming down with the cold too. Fortunately, both of them turn out to be fast learners. The next day they wash the dishes by hand and are otherwise smarter in their chores, negating Mr. and Mrs. Read's plan to call in Grandma Thora for help.
* Arthur: Mrs. MacGrady was turned into this for "The Great MacGrady" episode, which was written by staff writer Leah Ryan, who eventually succumbed to cancer, which Mrs. MacGrady was diagnosed with. In fact, Mrs. MacGrady's first name (which has always been Sarah) was changed to Leah for this episode.
* Arthur Naturally, the company that makes it shuts down when word gets out.
* Arthur. Near the end of the episode, we get this exchange between Buster and Arthur.
* Arthur nevertheless proves himself noble in a situation entirely unrelated to combat: having taken refuge in a peasant's home, Arthur and his companions learn no one goes near it because the occupants are dying of the pox, with the daughter upstairs and the mother too weak to see her off. The king, without a word, leaves the room and is heard going upstairs.
* Arthur normally depicts shower or occasionally arc juggling, but the opening of season 17's "Ladonna Compson: Party Animal" has Ladonna juggling in the cascade method.
* Arthur Novit sting on a robber who was rolling drunks in the subway. While one officer played the drunk, Novit waited behind a sabotaged steel door, dressed as Superman. When the moment came, he sent the door flying and arrested the robber. At trial, with Novit in his standard attire for court, the robber failed to recognize him. "Superman arrested me!" got him a trip to the court psychiatrist.
* Arthur (now completely embracing his Joker persona) brutally guns down
* Arthur, offers Arthur one of his tickets, which are in a great section.
* Arthur of just such happening with Francine's disembodied head complimenting the beautiful lawn she just landed in.

* Arthur of the Britons, Arthur's adoptive father Llud has a silver hand to replace one he lost in battle.
* Arthur of the Britons had Arthur attempting to unite two tribes. During a feast, he suggests the two tribes swap their bread. This almost leads to a riot as each side tries the other's bread and declares it to be 'frog spawn' or some other insult.
* Arthur of the Britons, one of the biggest problems Arthur faces in attempting to unite the Celtic tribes against the Saxons is that the Celts are just as willing to fight each other as they are to fight the Saxons - perhaps even more, due to ancient grudges.
* Arthur of this, even having a mini science-laboratory in his room and constructing his own machinery. For all intents and purposes, they act pretty much like high schoolers unless the plot requires otherwise.
* Arthur once spent most of an episode looking for his glasses, not realizing that they were pushed up on his head.
* Arthur, one of the signs that the fame has gotten to his head was using his newfound "hero" status to cut in line for a movie. With Arthur insisting that they should've waited in the line.
* Arthur. One time she ate a green potato chip and upon being told that it was poisonous, acted like she was going to die. It's worth remembering that she's four years old, though. It's not exactly uncommon for small children to be like this.
* Arthur Penn's heavily fictionalized portrayal of the title bank robbers in
* Arthur Petrelli in Volume 3. When Maury Parkman protested against his plan to kill Matt, Arthur responded by
* Arthur plays this trope straight, preferring to focus on life issues.
* Arthur presents) and Lunch Tomorrow take Prunella on a trip through time to show her that Francine was determined to get Prunella the doll as thanks for the older girl tutoring her for a difficult history test. Francine worked tirelessly to earn the cash, and even made a deal with her mean older sister Catherine to get enough money to personalize the doll's sweater. Prunella then realizes how cruel she was to Francine and makes things right by personalizing the original doll and giving it to Francine.
* Arthur Prysock later adapted his 1978 song “Here’s to Good Friends” into a jingle for Löwenbräu beer.
* Arthur Ransome wrote the famous British children's adventure series
* Arthur Read to the list of preteen boys with crushes on teenage babysitters.
* Arthur Rimbaud, French poet. He had a wild love affair with Paul Verlaine.
* Arthur Rimbaud is considered one of the most influential poets of the 19th century, despite giving up writing at
* Arthur Rosenfeld's Xenon Pearl's identity as a mob fighter remains officially unproven on police record, at least in the first novel.
* Arthur's aunt and uncle (Cousin Mo's parents) are apparently mobsters as well.
* Arthur saying he's almost done with it - because it was the only one he actually found interesting.
* Arthur says that he's assigning them a five-page essay about what they did over the holidays. Arthur grumbles to Buster that he knew it was too good to be true.
* Arthur seems to fit this trope, although this is more evident in the Live-Action, as noted above.
* Arthur's father David is actually fairly good at cooking, and he even runs a successful catering business, but he tries experimenting at home so much that we mostly hear of the gross stuff. Arthur and D.W. are often grossed out by his more experimental dishes, and there's a song devoted to his culinary abominations in the
* "Arthur's First Sleepover": Arthur recounts being afraid of the dark as a child, and envisioning the radiator in his bedroom as a toothy monster.
* Arthur's grave (at least on high honor) has an inscription of Matthew 5:6. Years later, John's will have an insciption of Matthew 5:9.
* Arthur. She is diagnosed after her behavior, or more precisely D.W. setting her house on fire, causes her to be institutionalized.
* Arthur. She prefers to write her replies when Ratburn calls upon her in class,

was a mime on Halloween, and Arthur has apparently never even heard her speak. It turns out she has a terrible stutter and, despite seeing a speech therapist, is very embarrassed of it.
* Arthur. She then starts to think that someone named "Omble" actually stole her backpack.
* 'Arthur shrugs off getting raped by a wolf-monster like it's a mild hangover and confesses his love for Ford' is from the
* Arthur. Since he has a less than stellar opinion of him, he avoids him for the rest of the day. Then nighttime comes and an enchantress puts the court to sleep and throws a knife at Arthur. Merlin pulls him out of the way without thinking. By the time he's realized who he rescued, the king has made him the prince's new manservant as a "reward".
* Arthur's little sister Dora Winifred would rather be known by her initials, Arthur sometimes calls her by her full name to infuriate her.
* Arthur's little sister, D.W., have been male. Prepubescent, mind you.
* Arthur's mother Atlanna is in an arranged marriage with King Orvax, which was the reason why she escaped to the surface many years ago. She conceived Orm from this relationship, although it's worth noting that she had him after she was forced to go home.
* "Arthur's New Puppy": Pal has to sleep in the garage, but is scared due to envisioning a rake, lawnmower and tree branch as monsters.
* Arthur's Nightmare in the game have audio that would normally be considered unremarkable (either a shout of "HEY!" or "ARTHUR!"), they have intense clipping that makes them difficult to listen to.
* Arthur. Some episodes contain an additional segment after the second story, like "A Word From Marc Brown" and "Which Arthur Character Are You?".
* Arthur: Some people think the titular aardvark's last name is Reed. It's not— it's Read.
* Arthur song "In My Africa" to teach the names of all 54 countries on the continent.
* Arthur so Tommy has to take a time-out twice. Apparently, Timmy always makes Tommy do both time-outs because "you're better at it than me."
* Arthur's parents tend to heavily favor his sister DW over him. However, they favor baby Kate over DW.
* Arthur's paternal grandmother is much the same, and only Buster, who has an iron-clad stomach, would eat the cookies she made for the bake sale. Perhaps Mr. Read learned to cook early on because of this.
* Arthur special regarding Francine starting a rock band that quickly becomes a celebrity band, the Principal, after doing the announcements, is muttering bitterly to himself about the band's choice of a band name ("You Stink!"), only to realize shortly thereafter realize that he left the mike on.
* Arthur's playbook, deliberately making the show watchable to anyone who can help a child learn, i.e. everyone.
* Arthur's power and status as a king is limited by the film's minuscule budget; he travels with a small retinue, we only see his castle in a brief musical number, he only calls upon his army at the very end of the film, and so on. This is written into the film's plot itself, as it's made abundantly clear that few people really respect Arthur's claim as king and they mostly just see him as a bossy weirdo with nice clothing. Of course, this all works to the film's benefit—it's absolutely hilarious to see a man in full kingly regalia
* Arthur's son) is frequently given to Morgan Le Fay; the original mother (Morgause) is either absent or given a different role.
* Arthur stands on his chair after realising there are mice on the dinner table.
* Arthur's: "The North Remembers, Arthur Dayne. When you see Aerys in hell, tell him his son will soon join him."
* "Arthur's Toy Trouble" begins with a shot of Arthur walking on top of the Earth (mirroring a shot at the end of the theme song), until he suddenly stops and notices a present in his backyard.
* Arthur Streeb-Greebling, the proprietor of "The Frog and Peach" restaurant

featuring two specialty items: "Frog à la Peche" and "Peche à la Frog" — nauseating and positively revolting, respectively.
* Arthur-style future. One character mentions the incredible deal they got on mittens for "only" $3 million.
* Arthur Sullivan" (although probably not surprised, as it had already started in his lifetime). He wanted to be known more for his serious music and wrote a large number of hymns including "Onward, Christian Soldiers".
* Arthur's Valentine, Sue Ellen criticizes the Valentine Arthur leaves in her desk; Buster announces that Arthur left it, and the class sings "Arthur loves Sue Ellen!"
* Arthur's weakness is table salt. As soon as it contacts his skin, he loses his powers, retains water, and becomes grouchy.
* Arthur, thanks to a very cruel prank by Arthur and Buster meant to get revenge on DW for eating a green potato chip that they intended to do something with, DW became terrified enough to believe that she would actually die from eating a green potato chip, and decided to do what she can for her supposed lingering days, also telling Binky Barnes (who himself ate more than one), who then decided to take up dance lessons, whereas DW treats Arthur nicely and attempts to kiss him goodnight. She only learns the truth when, after witnessing Arthur about to eat a green potato chip, she snatched it away from him in order to save him.
* Arthur that dealt with fads, Arthur's grandmother gave him his father's old pet rock to substitute for a Woogle, the new toy everyone has. It barely lasts one scene before Arthur dumps it.
* Arthur, that the final batch of episodes has already been produced in advance and a wrap party was celebrated by the team recently. This gives the show an impressive 26-year run.
* Arthur, the adults are realistic enough, but fourth graders (a mere grade above Arthur and his friends) are portrayed as "tough big kids" who essentially act like teenagers and are often not too bright. This is heavily based on how Binky Barnes, who is their age, is portrayed in the books.
* Arthur: The animated central nexus of this trope, as many Canadian actors and actresses associated with this trope have appeared on the show over its 24-year-run.
* Arthur, the book version of "Arthur's New Puppy" has Pal pee on Arthur's lap and then the rug. (In the cartoon version, he pees on the rug, but not Arthur's lap).
* Arthur, the Brain is well, brainy, knowing math and other things far beyond any of the fourth grade characters on the series and as a rule speaks in this manner.
* Arthur (The cartoon is already mentioned in the at least 20 years section, the books series ran for 34 years, 1976-2010)
* Arthur, the eponymous character is the ringbearer in his aunt's wedding. He's nervous, and trips on the way down the aisle, which sent the ring flying into the church organ. D.W. is the only one small enough to climb inside and retrieve the ring.
* Arthur.) The kids shot blank looks at Mr. Ratburn when he talked about Thomas Edison's invention, the phonograph, and prompted the following exchange:
* Arthur, the main character who still believes in what the gang stood for back when it started, slowly starts realizing how things - and Dutch - have changed over the years and begins to wonder how to make things better.
* Arthur: The opening teaser of "Pets and Pests" has the entire Read family, sans Baby Kate, demonstrate a highly over-exaggerated version of this when Dad unveils his banana bread and there's a mouse on it. It ends with them all running out of the kitchen screaming, only for Mrs. Read to run back in and grab Baby Kate.
* Arthur, the Point-Man, is the sensible and cool-head Lancer to the dark and troubled Cobb in
* Arthur: The Quest for Excalibur provided a monastic-style illuminated manuscript with poetry about the "canonical hours" to help players make sense of the in-game time system.
* Arthur, there is a lamp that gets irritated at you for clicking on it.
* Arthur, there was a paraplegic character named Lydia Fox, who was the winning entry in a contest to create and pitch a new character with a disability.

* Arthur the scene, it becomes clear that it's just a little girl (D.W. Read) complaining that her dog (Pal) stole her hot dog.
* Arthur, the title character and his little sister D.W. complain to themselves about their grandma's cooking. D.W. attempts to give some olive-loaf to Pal, their dog. He refuses it and D.W. responds with "That dog's not as dumb as he looks."
* Arthur they do this a lot: the first time Buster wrote a comic making fun of Francine in which she was a giant slime the ate Mr. Ratburn and Bionic Bunny. Later Buster’s character in the story ate the slime. In one fantasy Arthur imagined D.W. was gigantic and was looking for her breakfast. When everyone ran away she told them to “Come back here! I’m hungry!” After chasing them for a little she reaches down to the camera and it fades to black suggesting she picked someone up and was about to eat them. D.W. told Arthur and Buster the story of OD.W.eus (Odysseus) and during one part of it the Cyclops (Buster) ate Tommy and Timmy. In another episode where all the gang was dared to skip school Arthur and Buster had a dream that they got eaten by a giant clam and were getting digested! It is suggested that that happens to Dark Bunny in a special episode (just like Robin in the Batman episode The Joker‘s Tricky Hand).
* Arthur. They only move and talk around babies and non-anthropomorphic animals.
* Arthur thinks pretty much everyone is, in his words, "brilliant", so when he's asked to describe his father and the best he can come up with is "he's all right", Martin's immediate reaction is "God, he must be awful!" Later in the same episode, Carolyn greets Arthur's father (her ex-husband) with "Hello, Gordon. How necessary to see you."
* Arthur to accompany these kind of endings (such as in "Arthur Makes the Team", "Team Trouble", "Buster Baxter, Cat Saver", "Arthur's Dummy Disaster", "Francine and the Feline", "Locked in the Library!", and "Is There a Doctor in the House?").
* Arthur tried this once as an excuse to get out of being punished. It didn't work - he was still grounded.
* Arthur tried this when he went into a music store to buy a copy of the "Love Ducks" soundtrack CD (which everyone else thinks is the "babiest baby show of all"). But it didn't help much when the cashier went on the intercom, asking if they had any copies of the CD "for this boy," to which everyone else in the shop stared at him. Arthur made the excuse that it was for his baby sister.
* Arthur, until he gets "The Brain" to check his findings. At first, when they find Buster's right, everyone panics, but Fern finds a piece of the telescope that fell out of the treehouse during assembly, and they fix the telescope and discover it was giving the wrong readings and the comet wasn't going to hit the Earth. But a story still gets published in the newspaper for Buster discovering a new comet.
* Arthur via puppet shows, of which he owns a lavish collection of marionettes at home.
* Arthur was hinted to have shades of this in one episode. During a summer workshop session, he and Sue Ellen competed in a karate match, and he manages to win against Sue Ellen, only for him to be upset that she lost due to realizing that she didn't even bother to try and beat him (due to thinking from one of Francine's sister's teen magazines that kids hate people who are exceptionally skilled), sending him into a deep amount of depression, which was only cured when Sue Ellen managed to actually defeat him in karate after getting her act together.
* Arthur was the carnival barker at a "house of horrors" that featured the most embarrassing moments of his friends, such as the Brain wearing pajamas to school.
* Arthur wears a sash around his arm in the melee in "The Shadow of the Sorcerer". A deleted scene reveals it was not from Gwen, as you'd assume, but Morgana.
* Arthur Weasley comes home from the Ministry and passes Molly's challenge at the door. When she goes to open it, he grabs it and pulls the door shut again so he can challenge her. Afterwards, Molly comments that it's silly, since anyone impersonating Arthur could easily torture the question and response out of him. He agrees with her, but says that they should do it to set an example.
* Arthur Weasley did this with his enchanted car. Enchanting muggle items to do things other than what they were originally designed for is illegal. For example, enchanting the car to be

* Arthur Weasley performed it on his twin sons Fred and George after he caught them trying to make an
* Arthur Weasley's thanked him for and held no grudge over post-mortem, his family don't see it the same way. Which, since they don't know that the Winter Soldier is in fact not dead, but actually right under their nose, is a problem just waiting to be exploited in the sequel...
* Arthur Weasley suddenly gained Plot Armor when Rowling was writing
* Arthur (we know for sure it was a dream), it is never explained if it was a regular dream that happened to reflect reality or if the ghosts actually existed and manipulated Prunella's dream.
* Arthur, when Arthur and D.W. and even Mr. Read are being particularly rambunctious at dinner and Mrs. Read is getting a cold, she imagines them as clowns and then shouts out "Can't we just have a little peace and quiet for once?!" Everyone looks shocked, even Arthur's dog Pal, who whimpers and scampers out of the room.
* Arthur when Binky photocopies his face pressed against the glass while making copies for a school assignment.
* Arthur, when Brain and Binky are waiting to be picked up by their parents.
* Arthur when D.W. tells him that she sent their baby sister Kate to an orphanage. D.W. points out that they just couldn't take care of her and that she deserves to be in a place that can change her diapers.
* Arthur; when Jade thinks Gamzee is a runaway violent criminal, she offers him and Tavros candy, saying "I know you guys like Lawbreakers!"
* Arthur. When she does, it sounds like her singing and her drum playing are trying to out noise each other.
* Arthur: when she was in maybe kindergarten or first grade, a couple of older kids teased her about her poofy hair. She took out her hairbands, letting her hair fall across her eyes, and became a bully.
* Arthur when the book was adapted into an episode for the show (see Literature), another episode, "D.W. the Copycat," had D.W. dressing like and copying everything Arthur was doing, and at one point when Arthur goes into the boys' room at the public library, D.W. decides to follow him in. Cue the boys screaming.
* Arthur, where a piano duet stops Arthur's grudge against his cousin.
* Arthur where Arthur Read is kidnapped by aliens and Buster Baxter is crushed by their flying saucer.
* Arthur where Binky imagines that he gets so strong he makes the entire school collapse by slamming a door. After the whole building falls only the door he slammed, minus the glass in a small window at the top, remains standing, and it promptly falls onto him with him going right through the window hole.
* Arthur where Binky is in the swim team, decides he doesn't care about swimming, jumps in, and flails around in what it turns out is waist-deep water. Brain is the one who calls him out.
* Arthur where Binky punches him and Buster so hard they end up flying into outer space.
* "Arthur, where didja put the body ?"), written by Boris Vian and sung by Serge Reggiani, starts off like this: a band of thug murder an antiquarian to steal his stock. One of them, Arthur, is tasked with disposing of the body. Problem is, he can't manage to remember what he's done of it.
* Arthur where the characters begin pulling mean pranks on Francine after she insults one of them. One of their teachers, who's working as a fortune teller at a fair, tells them that she can rig things so that Francine will get covered in goop from a box trap during a visit to her. They eagerly agree but when Francine laments during her fortune-telling session how she regrets her insult and feels saddened that everyone has been doing nothing but mocking her, they feel guilt and decide not to activate the trap. The subversion is doubled down on when they leave and the teacher activates the trap, revealing that the box actually didn't contain any goop but confetti instead.
* Arthur where the laboratory HUGO was developed turned up its accuracy level was only 98%, which the developers dismiss, figuring 2% inaccuracy isn't going to make

a difference.
* Arthur, where the "Scare Your Pants Off" books are in danger of being banned from the town library due to Muffy having nightmares after apparently reading one. It turns out that she was just eating a kind of ice cream that gave her nightmares before bed.
* Arthur, which was the title where Arthur gets his glasses (adapted into the first episode of the TV series as well.)
* Arthur while there are tons of yard workers around. Interestingly, the word meets both definitions at once.
* Arthur, who are revealed at the end of "Meet Binky" to just be holograms.
* Arthur who nobody can even remember anymore having actually hit anyone. At the end of the episode, everything is resolved; Binky's fellow Tough Customers find out that he sometimes holds his mother's hand, but they couldn't care less. George, however, is still talking using signs, so Binky tells him that he can talk now and George holds up a sign reading "Really?" "Yes, really," Binky replies, and George says "phew" in relief.
* Arthur, who was planning the wedding as a gift to her little brother. Mr. Ratburn is actually marrying a local (male) baker named Patrick, much to the kids' relief.
* Arthur Winkings (Count Notfaroutoe) dresses the part. He doesn't have the accent, but his wife Doreen (who is
* Arthur, with all of the characters drawn this way (see its entry below).
* Arthur with "Woogle" collectibles, a craze that annoys Arthur to the point that he says that clicking the bubble-top of a metal bottle cap would be just as fun. Cue the next trend: bottle cap clicking.
* Artic Drift, including massive machinery, farm animals and seeds of all kinds, various cultural artifacts, ect.
* Artichoke's Heart Kyle despite being a jock is one of the nicest, most sweetest guys there was. A few other jocks at the school on the other hand ... not so much.
* Article 175 of the Penal Code of Japan requires genitalia to be censored, even in pornography
* Article 1 Section 5 of the US Constitution gives each chamber of Congress to set up their own rules as they see fit. This can lead to strange politics when Congress subverts its own rules by making new ones.
* ARTICLE 2 Celestia excuses herself saying she left her sewing machine on fire.
* ARTICLE 2 it is subverted and deconstructed at the same time. Shane shoots the glass panel first to only then dive through it, and the cuts he suffered are very frequently mentioned.
* ARTICLE 2, John and Shane are astronaut marines. John bets Shane 50 dollars that they will discover intelligent life. Their ship crash lands on Equestria and Shane is the only survivor. As soon as he is able, Shane visits John's body in the morgue and gives him his money.
* ARTICLE 2, Major Shane T. Doran shows traits of this when he touches the quill Twilight Sparkle is levitating and the energy field she's using flickers. When he keeps his finger in contact with the quill, the spell is undone completely. The backstory of his medical internment, as explained by Celestia, confirms that magic works very peculiarly on him, always having unusual (and sometimes dangerous) side effects.
* ARTICLE 2 that Shane is just one person, a soldier, and in a very stressful situation, so it's not really fair to use him as proof of any faults in humanity as a whole.
* article about Tide detergent, people owned far less clothing and wore an outfit several times before washing it.
* article by a University of Michigan doctoral student shows that romantic movies and TV shows can indeed distort how the public views stalking.
* article claiming that the MPAA was lobbying Congress to pass a law requiring anyone who owns a home theater setup to purchase a home theater license, and additionally, that they would require people to install surveillance devices to make sure there were no unauthorized home screenings. Even though the site only runs parodies and not actual news, they had to run a second article explaining this

fact to all the people who read it and thought it was real.
* article in The Atlantic, Subaru's popularity with lesbians and bi women (and later gay/bi men) in the 1990s saved the company in North America. While the advertisements would seem somewhat covert by current standards, the company was proud to be called Lesubaru and was the first major automaker to embrace the market.
* article , it was revealed that supervising director Matt Danner just did scratch work for Kermit before a notable voice would be cast, but the higher ups liked his performance, and cast him in the role proper.
* article? Just because it's a good idea to practice with something less deadly than owlbears.
* article on conversation while traveling (appropriately enough labeled "talk") links to this page, discussing a common pitfall when there is no shared language.
* article says her father "...made plans to allow Rynn to live alone...", presumably including financial matters.
* article starring characters that wouldn't be out of place in an eighties action film.
* article stating that all of his spells on Harry, Snape and Voldemort were removed in a goblin cleansing ceremony.
* article, "The irony of the federal government’s desire to obtain informants within the Aryan Nations is that different branches of federal law enforcement and intelligence gathering occupied five of the six key positions in the organization. This means that the Aryan Nations were effectively a government-run shop, with agents spying on each other to ensure the integrity of an investigation – into an organization almost entirely run by the federal government."
* article. When an erotic screenplay is left by a company's printer, the company's employers wonder who wrote it.
* article written by a former Viet Cong fighter describes his group's shock at finding a squad of dead African-American soldiers.
* articulate in an unheated house in a freezing cold winter while chain-smoking and eating diazepam.
* Artie also finds himself on the receiving end of a ball that bounced off his head at high speed until he caught it. Not deadly, but disorienting.
* Artie (and their subsequent bedroom athletics), this begins to apply to men as well.
* Artie Lange's Beer League (which Lange is one of the hosts of) due to its poor production values.
* "arties" were specifically built to serve as soldiers in wartime but were afforded full personhood rights in the courts. They are still discriminated against both for being unnatural (true) and for being prone to violence (debated).
* Artie, the only other boy in Lincoln's gymnastics class, tells him that he went through a similar situation when he first started gymnastics. He got interested after coming across the Royal Woods high school gymnastics team and his mother and older brother were supportive, but he hid it from his father due to his traditional ideas about masculinity. When Artie's father did find out, he wasn't too pleased at first but came around to accept it.
* Artie/Tina was this for the first season, compared to the Rachel/Finn/Quinn/Puck mess and Terri/Will/Emma. In the second season, after breaking up with Artie over the summer, Tina and
* Artifact Abuse is basically a compilation of Haruna horribly misusing her artifact in various ways.
* Artifact Alias: A character goes by their alias even after their real name is revealed.
* Artifact cards have some kind of special innate ability. However, some of them, such as Axe and Keefe, lack an innate but make up for it with high base stats.
* Artifact Database: The Quantum Bus is a convenient artifact that has a habit of an appearing to run over people who need to go, erasing them from the timeline. Used on the wiki to explain the sudden absence of any banned users and their characters.

* Artifact Labrys, a sentient axe that can summon herself when a fellow Artifact is destroyed.
* Artifact Mook (previously encountered Mooks that are contextually out-of-place in later appearances.)
* Artifact Name: A name that originally made sense, but no longer does.
* Artifact of Attraction: An artifact that magically causes everybody to lust after it, generating conflict.
* Artifact of Attraction: A valuable artifact causes a fight between characters.
* Artifact of Attraction: If the object itself is inherently irresistible.
* Artifact of Attraction: You'll be compelled to kill for it and be killed over it.
* Artifact of Death: An object that inevitably cause the death of its owner.
* Artifact of Death: A powerful artifact that leads to its owner's death.
* Artifact of Death is a New Kingdom Egyptian story about a prince who covets the magical Book of Thoth, buried in the river in six nested boxes and guarded by snakes and scorpions. He digs it out, kills the guardians, and obtains vast magical power, but the offended gods promptly kill him, his sister/wife, and their son.
* Artifact of Death, who simply falls onto the steering wheel of the truck he was driving.
* Artifact of Doom, among others. The van is also much larger on the inside, and the owner said that it has a map on the fifth floor.
* Artifact of Doom: An artifact which contains powers that are purely evil.
* Artifact of Doom: A powerful item that causes corruption in all who use it.
* Artifact of Doom be rediscovered, explaining that "...we committed the First Error, the Error from which all other Error flows: The Error of Pride."
* Artifact of Doom demonstates. Killing Mal'Ganis doesn't end the mission however, the player still has to complete the quest to get Frostmourne before the mission ends.
* Artifact of Doom fiddle (and to make matters worse, he was out of tune). Then she fell victim to one of Jokey's practical jokes, and she wished he'd "grow up and act serious", at which point he grew to three times his size and started talking like a Rhodes scholar. At the end of the story, Papa Smurf realized what the locket was doing, and hurled it into a fire, which fortunately undid the effects of all the wishes.
* Artifact of Doom from the Great Sith and seeing as Anakin learned a way to negate to not be killed when approaching it is likely Dooku didn't see it to be worth it to dig up a second one. A better example from the same would the Protodeka which was justified as it only saw a limited production due to how expensive it was to build and the original creator was captured shortly after the events of the game.
* Artifact of Doom guarded by a monster in a labyrinth. Then the monster breaks out of the labyrinth, wearing the artifact.
* Artifact of Doom in the series. Like the Nox, it also runs on seithr to function, unlike them however, it is a remnant of the aforementioned Black Beast and using it will slowly corrode the user's soul into another beast, and injuries through supernatural means are retained across timelines.
* Artifact of Doom in the subsequent strips because, as Torg whose idea it was points out, the place is quiet enough that they can still hear each other perfectly well. He also suggests they stay on the same floor, but then he annoys her so much they don't.
* Artifact of Doom) is in their possession. This is to the point where any new additions to their movesets (or lack thereof) shows that they have grown as a person, started going down a new path, or have begun to stagnate.
* Artifact of Doom like Celestia and Luna. This was later confirmed by the season 3 finale, which uses the term "alicorn" to refer to such winged unicorns.
* Artifact of Doom: Supernatural objects that are cursed or can cause terrible things to happen when (ab)used.
* Artifact of Doom: This weird doohickey, medallion, or statue causes a lot of problems through its powers or presence.
* Artifact of Doom which grants wishes, but results in an eternity in hell if not sold for a price less than that which it was purchased. He is despondent after

having to buy it back for a penny, but his wife astutely notes that due to exchange rates, coins do exist which are worth less than a cent.
* Artifact of Doom which will restore her lost power. However, she only manages to bypass the hundred-foot-high gates, rather than the whole dungeon. Why did she have to do it? The keys to the gate are INSIDE the dungeon, since the group of adventurers that previously used it... died midway.
* Artifacts cannot be destroyed. The logical conclusion is to create eternally flaming artifact wooden weapons or coal statues.
* Artifact, since its nature as a paid card game and the fact that it came in the absence of a proper new installment for any of the above series (or even a new IP altogether) turned off most potential players. It slipped directly to a 6c mere weeks after release, and attempts to rework the game have since been abandoned.
* Artifacts of Doom, where it is suggested that the ultimate goal of the Machine is to locate the Servant again, for some mad reason. It would seem that these two devices are sentient beings that are fated to either oppose each other or combine their powers in some way; the reason can't be good.)
* Artifact Title but due to one type of this trope or another now only do what gave them their name as a minor part of their brand or don't do it at all.
* Artifact Title from the first and second Haohmaru-centric (well, kinda) games, as Haohmaru definitely is a samurai (well, kinda).
* Artifact Title. In recent years, the school has more openly embraced the meme, officially adopting a bat as its mascot (while retaining its longtime athletic nickname, Pioneers).
* Artifact Title: The show still goes by its original title in spite of having gone through developments and changes that render the original title meaningless.
* Artifact Title: When a title relates to the first story, but not to the sequels.
* artifact, when Best Foods bought Hellmann's and didn't want to change their brand name in a large geographical area for an expensive amount during an inconvenient time; eventually it stuck. McCormick spices also did the same thing for Schilling in the west for years. In both cases though, little was different besides the label and a slight change in the jingle.
* Artifexian technology is much easier to develop with pre-industrial technology.
* Artifice, android soldier Deacon looks and for the most part acts completely human (even though he rejects the term) and, in the opening scene, two security guards debate whether he deserves the title of being called an "Artificial Person".
* Artifice, two security guards debate the status of a new android soldier and whether it deserves the title of being called an "Artificial Person"
* Artificial Academy by Illusion allows you to have entire classes filled with school girl lesbians or gay school boys, it's all up to the player and whether the character was set to homo/bi in the Maker.
* Artificial Afterlife: An afterlife that was created by regular people.
* Artificial Animal People: Creating animal-like people or human-like animals using science.
* Artificial arms are the rage in 2027, it seems — Jensen's boss David Sarif and Tong Si Hung, a Shanghai bartender/mafioso, sport them too.
* Artificial Atmospheric Actions actions which are programmed but turn up in inappropriate ways or circumstances.
* artificial atmospheric action. Some guys are watching the Formula 1 race talking about how fast they've driven, with Officer Nick Brick going down the line handing out speeding tickets. One of them says she's only ever gone 50 mph.
* Artificial Brilliance, any Endermen exposed to water or rain will immediately teleport away.
* Artificial Cannibalism human meat, I.e. vegan zombies or cartoon predators going vegetarian.
* Artificial Family Member: A robot and its creator think of themselves as being "related".
* Artificial Family Member that is treated as their creator's own child.
* artificial famines (governments make a mistake, few thousand to 50 million dead) that slowed population growth.

* Artificial Gill: A device that allows a character to breathe underwater.
* Artificial Gravity advanced artificial gravity among the Younger Races) having failed to develop shields.
* Artificial Gravity and sending a fleet to help defend against the Drakh invasion.
* Artificial Gravity because they perceived them as a waste of lives and couldn't make ones capable of competing with the Centauri's anyway. In spite of numberical inferiority, the Abbai held long enough for the Centauri Republic to to win the war and use the vastly superior numbers and skills of the Royal Navy and non-Torra militias to force House Torra and its allies to give up.
* Artificial Gravity before the Orieni power was shattered, with the victorious Centauri starting their path to decline due the devastating losses suffered and the conflict paving the way to a civil war.
* Artificial gravity failure has only happened twice in the franchise; on the Klingon vessel Kronos One in
* Artificial Gravity ray and threatens to use it on the planet's inhabitants unless the king bows to his demands.
* Artificial Gravity: Spaceships and space stations with artificial gravity systems.
* Artificial Gravity uses the older, less convenient but mechanically simpler method that requires spinning the whole ship rather than using two contra-rotating gravity wheels.
* Artificial Gravity: Virtually all Sci-Fi starships have some form of artificial gravity. This carries over to video games because it's difficult to make tight control systems for moving in 3D space using only analog sticks and buttons, not to mention that moving around in a weightless environment can be counter-intuitive (and thus, frustrating) for humans who have only ever been on Earth.
* Artificial Gravity, with some characters standing with no obvious magnetic boots while other people or objects float in midair beside them.
* Artificial Human, and consequently much tougher than a human, but that was a very serious injury even for her.
* Artificial Human: Any person who was created in a laboratory as a clone of another person is this trope by definition.
* Artificial Human, as his name suggests, is this trope taken to its logical end.
* Artificial Human "Headdliner" partners can focus on controlling the mechs' movements & not wory about other stuff like its power supply or balancing.
* Artificial Human: Humans (or humanlike beings) who were conceived and born through unnatural methods (such as cloning).
* Artificial Humans: A human being who was created artificially rather than born naturally.
* Artificial Humans, such as Signum, Shamal and Vita. Vivio used to be an example, until Nanoha officially adopted her and she received the Takamachi name.
* Artificial Hybrid: Someone who was born one species, but turned into a hybrid.
* Artificial Intelligence: A Modern Approach by Sturart Russell and Peter Norvig has quite a sense of humor at times. For example:
* Artificial Intelligence as a whole; as the AI can provide the answer to any question, there's no concept of education, much to Lala's fascination when she arrives on Earth and learns about school.
* Artificial Intelligence, complete with a tail-like appendage ending with a USB plug.
* Artificial Intelligence), even if individually they remained but fancy calculators.
* Artificial Intelligence. It has a child-like personality and just wants to help and protect the planet, but the authorities are afraid it will use the weapons to attack the planet.
* Artificial Intelligence known as the Z.O.E. However, the rebels didn’t know anything about it. It just showed up to assist them without warning, and attacked Scarface. It’s eventually revealed that the Z.O.E. was created by Belka.
* Artificial Intelligence or computer that happens to be in control at the time.
* Artificial Intelligence painted pink one of them to get an individual version of

Gilliam II, which later became part of the group in reunions.
* Artificial intelligences and robots in the Marvel Universe are generally depicted vocalizing binary code when subject to major damage or critical system failure.
* Artificial Intelligences as actual humans, when they have a discernable gender identity at all.
* Artificial Intelligences, even for direct interaction between AIs themselves. Some exceptions are Haban, who is embedded into a human and talks through him, Ennesby, who has a physical flying body and was talking through it or just speakers when he was a ship AI, and TAG, who speaks disembodiedly on purpose.
* Artificial Intelligence's retrofitting to avoid getting shut down, and if that were true, Traynor would definitely be needed. Also her job quickly grows into being in charge of cryptography and signal tracking for the Normandy and much of the fleet.
* Artificial Intelligences with potentially superhuman capacity have deliberately been limited to human-equivalent abilities, again except when the plot causes them to be briefly and intermittently superhuman. There is a specific example of this: at one point Barclay has the Holodeck run a program which enables him to interact with a virtual Albert Einstein and discuss entirely new ideas. If the holodeck is capable of simulating Einstein's intellect in such a fashion, it would imply that the computer running it is at least as smart as Einstein and should be capable of making new discoveries on its own. This, of course, never happens. Well, except that whole Moriarty business. Which apparently required a significant portion of the Enterprise's processing power.
* Artificial lifeforms like Data, Lal, and EMH-1 have to prove they are deserving of rights.
* Artificial Limbs are from the future, stays away from water out of fear it will cause his limbs to short-circuit.
* Artificial Limbs Are Stronger: A prosthetic that's stronger or faster than a flesh-and-blood limb.
* Artificial Limbs Are Stronger: Characters with fake limbs are incredibly strong.
* Artificial Limbs, artificial hearts, aural implants, and the like are fairly common knowledge in advanced medicine, and are not reported to have side effects of insanity, lobotomy, or other forms of radical personality change characteristic of this trope. However, some of the people who've received artificial hearts, specifically the continuous-flow design, have reported a feeling of unease and detachment due to no longer having a pulse.
* Artificial Limbs is a tall imposing man named Gray. He lost his hand in their first encounter and replaced his entire forearm with a multi-tooled Arm Cannon. Attachments included a hook and spring-launched machete.
* Artificial Limbs: Limbs that have been replaced with prosthetics, but are just as useful.
* Artificial Limbs that enhance his strength. These limbs plus the element of surprise allowed him to briefly overpower Mr. Incredible long enough to escape.
* Artificial Limbs was fitted with an iron prosthesis after losing her leg in battle, and returned to battle.
* artificially created plasmas need to achieve 10 to 100x the temperatures in the sun's core to achieve any reasonable power output at all.
* artificially intelligent computer programmed to THINK of itself as Don Steele. Half his memories weren't even his — programmers patched in some of their own to fill gaps in the upload. He angsted a good bit about his humanity when he wasn't slaughtering bad guys.
* Artificial Meat, food will be synthesized to something that resembles meat.
* Artificial Meat: Meat that was grown in a laboratory from cloned animal cells.
* artificial replica of him. She eventually realizes that the replica is not a replacement for her lover and it prevents her from grieving and moving on in a healthy way.
* artificial smiles and air of professionalism for the next customer. Only once they're off-shift can they finally let out all the pent-up stress caused by all the

casual abuse from customers.
* Artificial Stupidity, forgetting how to walk through doorways, dropping babies on the floor for no reason, and drowning in pools because the ladder got removed.
* Artificial Stupidity. If your ship is next to them and between them and their target, they may not care and open fire anyway, blasting you instead of their target.
* Artificial Stupidity means most people think they're more trouble than they're worth. They have been improving gradually with each patch but a lot of players really just want them removed entirely.
* Artificial Stupidity on the part of AI squadmates, the inability to move while downed (meaning that your teammates had to rush into whatever location was dangerous enough for you to be downed in the first place), and the fact that going down while playing solo meant instant death. Thankfully remedied in the sequel, which improved the AI pathing and gave them the ability to revive other squadmates, including you. However, it had its own set of problems, not the least of which being...
* Artificial Stupidity (Player!Officers getting stuck on objects and obstacles, the mentioned jumping glitch, stupid horse, etc.).
* Artificial Stupidity rears its ugly head, and they start giving you idiotic or even impossible routes.
* Artificial Stupidity. The AI will target only the attacking unit, so park your army close by, send an archer to fire a single arrow, then run it to the back. The AI's units will get slaughtered as they try to get at the archer. The most glaring example would have to be the Greek campaign, where Alexander the Great's army can basically win without a single loss.
* Artificial Stupidity: The computer AI for a video game does amazingly stupid things like getting stuck in a door.
* Artificial Stupidity will buy and use jumpdrives (barring scripted plot events). One of several things the AI is not programmed to do that ships in the game are capable of...
* Artificial Time XS just has a verb as a name. This starts with the main group of Sheath, Float, Tear and Feed and extends to everyone with the exceptions of the three Void Knights.
* Artificial Zombie: A zombie is intentionally brought to life through scientific means.
* Artificial Zombie: Bringing someone back to life through scientific means.
* Artificial Zombies made from experiments with San's Ghidorah head exhibit creepy eyeshine in the darkness.
* Artificial Zombie: Who needs voodoo and dark magic to raise the dead when you got nanites and cyborg implants?
* Artillery could have this effect. In the First World War the British had the SOS Barrage, which on a prearranged signal (usually a flare and/or field telephone call) would drop an annihilatory curtain of fire down in front of friendly positions. On 21 March 1918, the German assault on British Fifth Army began with a bombardment of gas shells and HE specifically designed to cut the communications wires and paralyse the artillery. (Despite this, and despite the huge losses the assault barrage caused them, the British still managed to kill or wound better than one for one on the first day.)
* Artillery is the worst offender due to large blast radius, inaccurate gun, long shell traverse time and fairly low skill requirement. It can be avoided by not sticking to enemy tanks, but it tends to be the easiest way to defeat
* Artillery laser cannon in the form of a complex array of lenses through which a powerful light spell is cast, which the lenses focus into, for all intents and purposes, a powerful laser beam.
* Artillery lore, as most of its spells are some variety of "make people die".
* Artillery sergeant Brian Allen Harvey orders his men to fire a cannon, oblivious to the fact that he is standing directly in the line of fire.
* Artillery units will often have a new soldier perform a "Boom Check" by placing their face against the muzzle of whatever cannon is available and yelling boom.

* Artillery, which lob high-explosive shells all the way across the map, frequently landing on your soft, squishy top armor. Certain artillery can load solid AP shells as well, which are rarely used, but have their place.
* Art Initiates Life is about a man who goes on a trip and returns with a magic chalk that creates living drawings.
* Artisan Entertainment and Family Home Entertainment for Kids released three
* Artis fought in the war without magic at all, using machines. They were all turned into scrap, including Dorothy's dear friends.
* Artist Christian Zanier's main output is highly erotic adult works and
* Artist Disillusionment the creator's own enthusiasm for it and willingness to work on it.
* Artist Disillusionment voice-actress persona. However, apparently it didn't do enough damage to keep her more obsessive fans away. Kimiko constantly worried about "letting her fans down," although she more or less stopped this since encountering the unpleasant side of fan obsession.
* Artist Disillusionment: When an artist hates their own creative career and/or fanbase.
* Artist example: ask Leinil Francis Yu to draw a scene with multiple superheroes, or large battle with them. The odds of finding his favorite character,
* Artist Greg Land is notorious for not only overusing photo references (tracing porn, basically) and plagiarizing other artists but also recycling much of his own work.
* artist has admitted in the early stages of the comic, and by the time it was pointed out to him, both characters were too well established to change them.
* Artis the Spoonman is a street performer who is known for using a set of spoons as his instruments. He has since been featured on many songs, most notably the
* Artist Ian Hugo, the husband of Anais Nin, wrote this in an article about engraving:
* Artistic License – Animal Care: Humans treat their pets in ways that would be very dangerous in real life.
* Artistic License – Biology in a majority of recent art. A little knowledge is a dangerous thing…
* Artistic License – Biology: No, the work doesn't follow actual biology, but if it did, we wouldn't have a very good story.
* Artistic License – Biology: Rules of biology ignored for sake of story.
* Artistic License – Biology: Something happens that goes against real-life biology.
* Artistic License – Cars (or at the very least, a digital badge-swap).
* Artistic License – ChemistryS are acid gases, so they dissolve in mucous membranes (such as the eyes and lungs) to form acids, which can cause permanent damage to many vital organs even if it doesn't outright kill you. This means that even taking in one breath should have some serious consequences at least, if not instant death.
* Artistic License – Child Labor Laws: Child labor is a form of abuse where children are forced to do jobs that deprive them of their childhoods.
* Artistic License – Child Labor Laws: Kids are shown working despite being too young to work in real life.
* Artistic License – Child Labor Laws: When kids in fiction work despite being too young.
* Artistic License – Education: In the case of teachers and other school staff exerting their authority over students when, in real life, they should not have that much authority.
* Artistic License – Education: When fiction depicts a real-life school system inaccurately.
* Artistic License – Geography, Nunavut is not one of the territories... oh, and its border with the Northwest Territories apparently doesn't exist.
* Artistic License – Gun Safety: Stupidly handling guns in ways that would seriously hurt or kill someone.
* Artistic License – History and availability of primary sources.

* Artistic License – History. In all, ninety women received the Gold Star Medal and the title Hero of the Soviet Union during World War II, most for service in front-line combat.
* Artistic License – History: The work shuns historical accuracy for the sake of the plot.
* Artistic License – History: When a work of historical fiction contains factual inaccuracies that are more the result of poor research or outright carelessness, rather than an intentional effort at writing a different take on history.
* Artistic License – Law: A work of fiction depicts how the law works inaccurately.
* Artistic License – Law indeed. In real life, what happened is that Judge Wilkerson switched the jury POOL last minute before Voir Dire (jury selection) had begun, because of suspicion some members of the pool had been bribed. This was legal because the trial itself hadn't started yet.
* Artistic License – Law. Most countries can not revoke Citizenship for anything short of treason and even then.
* Artistic License – Law, there is no such charge as "conduct unbecoming a Marine". "Conduct unbecoming an officer and a gentleman" exists as UCMJ Article 133, but Kaffee's clients are enlisted Marines and can't be charged with it.
* Artistic License – Law: To the extent that litigation is dramatic, almost none of it happens in the courtroom. But the way it actually plays out, i.e. trading written motions over several months, doesn't exactly make for gripping television.
* Artistic License – Marine Biology: Factual inaccuracies about marine life in a work of fiction that make the story work better.
* Artistic License – Martial Arts: Fight scenes are usually very dramatic, adding to a good story. Slow, concentrated movements don't make for exciting scenes.
* Artistic License – Martial Arts fight scenes. If you do see this type of fighting in modern fiction, it's only in parody, homage, or in works in which the characters have supernatural powers.
* Artistic License – Nuclear Physics examples having to do with radiation.
* Artistic License – Physics: No, the work doesn't follow actual physics, but if it did, we wouldn't have a very good story.
* Artistic License – Politics: Inaccurate depictions of real-life politics in fiction.
* Artistic License – Politics: The story doesn't follow political procedures correctly, which is for the better because otherwise it would be extremely boring.
* Artistic License – Religion: A work of fiction features an inaccurate portrayal of real-life religion.
* Artistic License – Space: Astronomy does something that, in the real world, it shouldn't do.
* Artistic License – Statistics slanting the game in favor of the offense.
* Artistic License), and even if these go back to oral traditions of entire towns, somewhere somebody changed it from the common origin.
* artistic license by the filmmakers: at one point, at the insistence of the Navy pilots flying the actual planes, they tried filming period-accurate missile combat with the F-14s, A-4s and F-5s (the latter of which also stood in for the fictional MiG-28s), but that meant fighting at such long ranges that the other planes were practically invisible.
* Artistic License, having everyone do paperwork and eat and drink coffee 90 percent of the time would likely bore the audience, which is expecting drama and action). Generally doesn't break Willing Suspension of Disbelief unless the following applies:
* Artistic License occur refuse permission to use its locations or if the military refuses to lend assets to a topic it regards as controversial.
* Artistic License: people in very hot climates tend to actually wear clothing that covers their entire body to avoid exposure to the sun, with the clothing being

loose to allow ventilation. Although the breast-baring style was popular at times in Ancient Egypt, it is debatable to what extent.)
* Artistic License: When you don't have to obey the laws of science or can ignore historical fact or can make it unrealistic in another way, you can make it much more interesting.
* artistic reasonsFurther complicating things is the recent proliferation of cell phone cameras and mirrorless cameras which do not have reflection-based viewfinders at all so they would see vampires normally. Digital reflex cameras also have a screen that can be used as a viewfinder so a clever vampire hunter could easily spot vampires with them by switching between the two modes on their camera.
* "Artistic video" he's been deceiving her about it for who knows how long.
* Artist Kurt Schaffenberger drew himself into many stories he illustrated. (Look for a tall, thin, dark haired man with a mustache and wearing glasses.)
* Artist Marcel Duchamp went through a transvestite period as "Rrose Selavy", a genteel-looking gentlewoman type who was photographed by Duchamp's friend Man Ray.
* Artist Markus Rothkranz' girlfriend appears as the surfboard-carrying blonde in the corner of the backglass.
* Artist Norman Lindsey used his wife Rose as a model in many of his paintings. She was one of his most recognizable models and also helped him with the business side of his art.
* Artists Are Attractive: A character is attractive due to their artistic talents
* Artists Are Attractive: Many folks can't help but fall for a poet, painter, musician, etc.
* Artists in the 1900s depicted a future of personal flying machines, X-ray surveillance, moving walkways and weather control. The people, on the other hand, most notably the women, are still wearing 1900s fashions.
* Artists on the net (both of the fan and original variety) tend to exaggerate this taboo: in works depicting two characters as a
* Artists (or anyone who likes extremely realistic artwork) will love the artwork in
* Artists' rifles is inspired by the First World War in both lyrics and music.
* Artist's shit by Piero Manzoni, an Italian conceptual artist. The artwork consists of 90 tin cans aptly labeled: Artist's Shit, Contents 30 gr net, Freshly preserved, Produced and tinned in May 1961. Now that's an example.
* Artist Stuart Immonen uses this (with simple short lines radiating from the head) in
* Artists with #1 albums on the Billboard 200 but no top 40 singles on the Billboard Hot 100 include
* Artist Unknown, is often imitated by real life painters and can even be bought online on Amazon. Ironic, considering that, in-universe, the art critic that avaliated "Bold and Brash" said that it 'belongs in the trash'.
* Artix Entertainment games do this so frequently they have 3 or 4 lampshades to a bulb. Games like
* Artix Entertainment has a moment where Artix and the player see a giant undead with a BFS almost as big as he is (and he towers over both Artix and the player). The player then says "I think we're going to need something bigger." Artix then picks up a giant hammer. Subverted in that in the actual fight the hammer gets replaced with the his sword via a glitch.
* Artix Entertainment) have the basic storyline and most equipment available for free, but the best weapons, armor, Titan quests and battles (best for farming!), and so on are only available to upgraded players and (in the case of equipment) often only for special currency that must be purchased with real-world money (although small amounts can be gotten rarely in AQ, DF, and MQ). The worst for it is probably AQ; MQ is probably the best, but DF and AQW both have an awful lot of content available for free players.
* Artix Entertainment however, when your character is asked why he fights for good, he answers, "I'm the Hero of the story. It's my job."
* Artix Entertainment is to fight aliens while in a giant bipedal mecha.
* Artix Entertainment with sentient beings in order to enslave or manipulate them

into acting as their agents.
* Artix. Paladin is also an available class in pretty much any Artix Entertainment fantasy game, though at least one version is member-only.
* Artix von Krieger. He has the irresistible compulsion to slay any and all undead nearby, regardless of their intentions or if it's better not to.
* Art Major Physics what the real-life submarine uses (using a Lead-Bismuth mixture rather than Liquid Sodium).
* Art Ninja as he has to keep her out of trouble as she understands nothing about the world.
* Art Nouveau: The aesthetic developed during this era in tandem with the last hurrah of romanticism. Today, the organic motifs provide a stark contrast with the industrial progress of the era.
* Art of Domination, indestructible door in hopes that it would make hostiles overlook the walls. It worked.
* Art of Domination, Saramis scientists look down on those among them who aren't developing weapons. Medical genius Koda Serivi was pressured into designing a rifle, which came out with some glaring flaws.
* Art of Fighting 2 has a younger Geese Howard as a secret final boss under the same conditions.
* Art of Fighting 2, Ryo and Robert both get into one with each other in the former's ending.
* Art of Fighting and a Guile-like army dude probably didn't remotely help.
* Art of Fighting as well with scenes like Terry's pet monkey nailing Yamazaki with a Power Geyser when Terry couldn't.
* Art of Fighting. Either he's a tanned white guy or a very light skinned black guy. His official birthplace is listed as Australia, if that's of any indication.
* Art of Fighting games (although Yuri was only an NPC in the first). The third game had three female fighters (Kasumi, Lenny, and Sinclair).
* Art of Fighting has this in the ending, in which either Ryo or Robert beat up Mr. Karate badly, but just before they finish him off, Yuri suddenly appears to reveal Mr. Karate's identity, however before she can do so it cuts away to a "To Be Continued?" shot.
* Art of Fighting OVA, King is shown searching through a database that has complete biographies of Ryo Sakazaki and Robert Garcia, and uses this knowledge to track down and kidnap Ryo's sister Yuri.
* Art of Fighting, regardless of the fact that she's an adult and mutually attracted to Robert.
* Art of Fighting series: a crime boss who kidnapped a teenage girl to blackmail her father and force both her brother and her best friend to fight him.
* Art of Fighting series, where they often have special pre-fight intros and victory quotes for when they face each other.
* Art of Fighting tournament, by defeating Geese over a decade prior to Terry.
* Art of Noise. But how many are aware their band name is a nod to Luigi Russolo's manifesto "Art of Noises"?
* art of Randy Regier consists of authentically crafted vintage/Atomic Age toys, complete with the occasional aging, packaging, printed media and shopfront setups, that range from high quality (i.e. "The ToyGantic" and "Go Fast Daddy-0"), to intentionally shoddy (i.e. the John Manshaft line and "Electric Man Waiting for a Train Set") and absurd (i.e. the "Blazing Sun Model" and "Tardy the Manpony").
* Art of the Dead Dorian Wilde can possess the body of anyone who been completely corrupted by one of his evil paintings. He possesses Gina after she has been completely corrupted by Lust.
* Art of the Dead, Father Mendale tells Kim that the only way to destroy the cursed paintings is to gather them together and burn them.
* Art of the Dead: Having been corrupted by the Lust painting, Gina exhausts her husband Dylan in the bedroom. When he staggers off to try to get some work done, she finds herself still craving sexual satisfaction, so she plants the kids in front of the television, tells them she needs some "alone time", and retreats to her bedroom to furiously masturbate. While she is in this vulnerable position, she

is approached by Dorian's spirit, who promises her eternal pleasure.
* Art of the Dead is decapitated during the battle between Dylan and Gina in the garage.
* Art of the Dead, the seven paintings can not only corrupt the souls of those in contact with them, but once they are fully corrupted, they will be drawn into the painting and trapped there permanently. Wilde can also cause the paintings to reach and snatch people and objects into them.
* Art of the Dead Tiffany, amputates her breasts, and gives herself a 'boob job' by transplanting them on to herself. She does the same thing with Tiffany's lips.
* Art of the Dead: When Louis is possessed by Wrath in the garage, he grabs an axe and attempts to kill Kim. Shortly after, the Envy-possessed Donna gets hold of it and buries it in the head of the prostitute.
* Ar Tonelico 2 as it seems Infel's text was translated word-for-word, and Japanese puns normally don't work in other languages. Croix still reels after each joke, confusing many English-speaking players.
* Ar Tonelico 2, even leading to him being nicknamed "Fuglycool" by one character.
* Ar Tonelico 2. In a game filled with robot warriors, and highly trained knights with rocket lances with guns sticking out, the only listed reason for her badassery is that she is "a really energetic girl".
* Ar Tonelico 2 was a fan-theory that gained approval from series' creator Akira Tsuchiya.
* Ar tonelico and Haruka Shimotsuki usually providing for the main heroines even though all of them have different voice actors. It gets even more obvious in the English dubs, that just use the Japanese songs with no change.
* Ar tonelico And then later on, weird things happen to the Reset Button in its so-called "upgrades".
* Ar tonelico by "diving" into the female characters' inner mental worlds and helping them fix their issues, an act which the game specifically links to romance. Furthermore, the characters' power in battle is increased by "Harmonics", a set of two gauges which represent the feelings of the fighting party and the magical songstresses respectively, which add status boosts to the party when the bars meet in the middle; the bars increase when the fighting party defends your singer-mage, attacks on her behalf, or does something otherwise suitably impressive for her.
* Ar Tonelico... even if none of the ingredients they had available could make purple.
* Ar tonelico has the Hymn BGM cut off abruptly when the singer is knocked out.
* Ar tonelico II: Melody of Metafalica and very cute. She confides in Cloche that she is in love with him but his only love is as a brother because of their age difference, though if you don't secure any of the other three endings you default to her. The sequel suggests that this is the true ending, however.
* Ar tonelico II: Melody of Metafalica. The current period of conflict takes the majority of the gameplay, so it doesn't feel very offscreen-y.
* Ar tonelico in the series are all implied to be related to each other across many millenia: with Ar Ciela being the original language, Carmena Foreluna being a simplified version of it, and Hymmnos and its dialects being descended from that. Some commonality can be seen between the languages, showing the relation. For example, the word "hymmnos", meaning "song", appears back in Ar Ciela passages virtually unchanged.
* Ar tonelico: Melody of Elemia has her tie Lyner up in this fashion in attempt to rape him. He even lampshades this trope word-to-word.
* Ar tonelico: Melody of Elemia has his left arm (and most of his torso) converted into machinery, with his arm doubling as a Gatling gun. Of course, he only uses it in his powered-up state, and normally just fires a pistol that he holds in his right hand.
* Ar tonelico: Melody of Elemia has the war between Mir-led Reyvateil and humans, which ended with Mir sealed and the Reyvateil treated as second- or even third-class citizens.
* Ar tonelico: Melody of Elemia, it turns out that she's a genuinely good person who had no idea Bourd was a villain performing inhumane experiments and perverting

her company away from its goal of helping people, not just making a profit, as she was poor at the actual day-to-day management of the business, and left that to Bourd.
* Ar tonelico: Melody of Elemia: Leard is the governor Platina and his conflict with Lyner is based on him wanting his son to succeed him when Lyner doesn't want to. Over the course of the game, Lyner becomes this for his group. The father is a levelheaded/headstrong leader for being grumpy and aggressive yet still looking for the best solution; the son becomes a charismatic leader once he matures enough that his earnest heroism comes off as noble instead of naive.
* Ar tonelico: Melody of Elemia levels depicts a cat on a vacuum cleaner that has been sucking away her power. Once that is discovered, another her comes and redirects the cat-vacuum toward Misha and Shurelia. The rest of the level is spent dealing with Aurica's inferiority complex with the other two potential love interests.
* Ar tonelico: Melody of Elemia magic as simply "much weaker," but even when you use it in Phase 3 before reawakening the Tower, spells are no less powerful than before and you can still use one that involves painting a target lock for the Tower's own energy cannons.
* Ar tonelico: Melody of Elemia referenced still aren't out in the States.
* Ar tonelico: Melody of Elemia takes place on a floating continent and a humongous tower floating over a devastated, uninhabitable planet.
* Ar tonelico: Melody of Elemia takes this even further, as Ra Ciela's civilization is even more advanced than Ar Ciel's, and one of the series' games even takes place almost entirely on a spaceship. However, there's still the same magic music and gods as is usual for this universe.
* Ar tonelico: Melody of Elemia, the Akashic Record is a rare item that is supposed to be like a CD for a 3D holographic projector, but since the technology for using it properly has been lost, it's only used now for crafting.
* Ar tonelico: Melody of Elemia when she goes missing again, and Meu goes to look for her. They both end up getting chased by monsters and getting even more hopelessly lost. Zelos puts it best: "Those two need GPS devices tagged on them or something." And within the same game, both Whim and Lily supposedly get lost, and as Raze points out, they were both right behind the camp.
* Ar tonelico Qoga: Knell of Ar Ciel and the entire planet slowly turning from dead brown and red into blue and green.
* Ar tonelico Qoga: Knell of Ar Ciel, anyway. They're embarrassingly and hilariously lovey-dovey together.
* Ar tonelico Qoga: Knell of Ar Ciel He even remarks that the drill is every man's fantasy.
* Ar tonelico Qoga: Knell of Ar Ciel is often seen mentioning her need for a drink whenever you end up building some of the more reality-breaking items in the game, such as a floating tablet... out of spare parts.
* Ar tonelico Qoga: Knell of Ar Ciel like Ruto in a talk topic. Without context this would sound like a lover's spat.
* Ar tonelico series indicates that this happens to Pureblooded Reyvateils when they die—their bodies are created from biofluid, and only retain that shape for as long as the Reyvateil lives. (This doesn't happen to Halfblooded Reyvateils because they're functionally humans with Reyvateil powers.)
* Artoo and Threepio guest starred, and Artoo fell in love with a fire hydrant.
* Artoria Pendragon gets summoned and helps Issei Hyoudou rescue his friend Asia Argento from Freed Sellzan, Raynare, and the Fallen Angels. Since Rias Gremory's peerage have no idea who Artoria is, where she came from, or what her true motives are, they prepare for a fight after she defeats the Fallen Angels. When she says she simply wants to make sure Issei and Asia are safe, they stand down, but are still wary.
* Artoria Pendragon) is also on the receiving end of this trope from the Knights of the Round Table. While all of them will faithfully serve any Master they have, they will forever consider Artoria their one and only true king. The sole exception is Mordred, and even then, despite her betrayal, she still harbors a certain degree of

loyalty mixed in with her resentment.
* Artorias also went through this when he became Ciaran's apprentice.
* Artorias of the Abyss DLC introduces the Stone Guardians, the predecessor of the aforementioned Large Stone Knights. They are golems animated by magic to protect the forest sanctuary in Oolacile.
* Artorias of the Abyss. In fact, it's the only way to get their unique armour sets.
* Artos who becomes the 'Warrior King' in the single-player campaign for the computer game
* Art Reflects Personality: An artist's work reveals what's going in their head and/or heart.
* Art School Sub Rosa is a female who's attending Art school as a male as part of a somewhat crooked "deal" to get a scholarship.
* Art-Shifted Sequel: The sequel's art style is noticeably different from the art style of the original.
* Art Shift Sasha got a more modest look — and suddenly she has fans.
* Art Shift to achieve this technique, using a sudden increase in detail to highlight the characters' childishness. For example, when Calvin and Susie play house, they're rendered as adults in the style of a dramatic soap opera-type comic, but their dialogue is still the kind of thing a couple of six-year-olds would come up with.
* Art Shift ("You women walk three steps behind us men!"), and so forth.
* Art Sirota's 'Norton Songs' album has a song about how Elvis was abducted by aliens, but came back because he couldn't get parts for his motorcycle on their planet.
* Art Spiegelman cat stereotype is that they hunt mice, and it makes a good analogy for the Holocaust. More than that, there is an artistic point. Nazi propaganda films drew analogies between Jews and rats. Spiegelman depicts the Jews as mice — who are typically portrayed as cute and sympathetic in fiction — rather than rats — typically villainous and revolting. By doing so, he is able to show how weak and manipulative the propaganda was (in one edition, he even cites an excerpt of a Nazi-era German newspaper lambasting Mickey Mouse).
* Art Spiegelman: Comic strip artist and reviewer of other comic strips and graphic novels.
* Art Spiegelman tells the story of his father Vladek's survival of the Holocaust, and the horrors his endured for being a Jew. Yet as an old man, Vladek thinks nothing of acting racist toward blacks.
* Art Spiegelman was being published and released. The publishers for the latter were concerned that Spiegelman would be credited by name for the former, driving away potential customers who wouldn't want to read a comic about the Holocaust done by a gross-out artist. Topps didn't credit Spiegelman and the latter kept his involvement quiet until the foreword to said commemorative book.
* art style and new eyecatches to boot. Only Luffy and Zoro got their own for now but they're splendid, showing the character preparing for an attack accompanied by a japanified version of their theme.
* Art-Style Clash: A work that relies on many different art styles at the same time.
* Art-Style Dissonance: An art-style that doesn't match the story and setting.
* Artsy Omni, and it far exceeded its initial expectations. He and his team ask their viewers to use the hashtag #smashified to suggest what characters they would like to see made in the show.
* Art Tatum entering. Waller welcomed Tatum to the stage with the memorable introduction, "I only play the piano, but tonight, God is in the house!"
* Art Tatum learned to play church hymns and piano rolls at 3. Rumors would circulate that he played piano rolls meant for two people (and he was blind).
* Art Tatum. No wonder too, as (so legend goes) he learned to play by repeating the movements on a autopiano... which played pieces for four hands! Playing his material is a truly monumental achievement even to this day.
* Art the Clown — Slasher film franchise with a total of 4 feature-length

movies and 2 in the making and two shorts dating as far back as 2005.
* Arturo dismisses not being meant to understand as "blasphemy", but by the end, the events of that particular world force him to admit that, somehow, the system apparently works and he can roll with it.
* Arturo doesn't point out the logistical issues such a task would require (i.e. not nearly enough thrust to cancel out the orbital velocity) but instead brings up the possibility of the launch failing and contaminating the surrounding area with radioactive waste.
* Arturo Gatti and Micky Ward fought each other in a trilogy of matches that each lasted the full ten rounds. And these weren't slow matches. These were 30-to-60-punches-a-round matches. These two men beat each other into so much hamburger but neither ever slowed down.
* Arturo Pérez-Reverte), an art restorer finds the hidden message "Who killed the Knight?" in a 1471 painting, then decides to investigate the 500-year old murder with her friends.
* Arturo Pérez-Reverte loves this trope. In most of his novels, if a German character appears, there will be some reference to Nazism or the Holocaust, and if the character is old enough, he will also be a former Nazi collaborator or sympathizer. He even once wrote an article where he discussed the difference between the crimes of Nazism and communism, where he affirmed that "Nazism was an exclusively German phenomenon".
* Art vs Science's "Parlez Vous Francais?" starts an epic Mime on Mime battle when one mime has their hat shot off by a mime bow and arrow.
* Artwork depicting the pre-Fall Garden of Eden sometimes includes images of a snake balancing or hopping on the tip of its tail, on the grounds that it shouldn't crawl on its belly until after it tempts Eve.
* Artwork in general tends to employ this, depending on what the artist wants to depict.
* Artwork of various Chaos leaders, especially sorcerers, usually portrays them as bald, with various Chaos symbols worn on the scalp.
* artworks". If you'd like to know more, Google it - the advertisers would have our heads otherwise.
* A Rugby Union example came in the 2003 Rugby World Cup final between Australia and England in Australia. After a half-time score of 5-14 to England, Elton Flatley kicked penalty goals for Australia in the 47th, 61st and 80th minutes to tie the game at 14-14. English fly half Jonny Wilkinson kicked a penalty goal to put England ahead in the 2nd minute of overtime, which Flatley responded to in the 97th minute with 3 minutes remaining. Wilkinson kicked a drop goal with 27 seconds left on the clock to win the game 20-17 and the World Cup for England. The commentary was special.
* a rule made to prevent easy, endless flight). However, old bows enchanted before the update will still work.
* A rule of thumb for Agatha Christie is that around 80% of sympathetic murderers are terminally ill so that the protagonist can feel comfortable with not turning them in. If you're a Sympathetic Murderer who wants to
* A rules change finally addressed this, and created the "Exile" zone to replace the "removed from the game" zone. Cards that allow the player to bring in a card from "outside the game" cannot affect the Exile zone, like they could with the "removed from the game" zone. This has had the effect of making the Exile zone
* A rules related version crops up in the 8th edition High Elves book. In earlier editions (5th and before) the High Elves general could be decided by a random dice roll, due to politics deciding who was in charge (the rule was called Intrigue at Court). In later books, this rules was removed by the fluff still makes mention to generals being decided by politics, and states that this is usually overriden by the Phoenix King.
* Arumana no Kiseki released exclusively in Japan for the Family Computer Disk System, features an Indiana Jones-like adventurer who navigates a cave by grappling hook.
* Arume use cloning/genetic engineering technology to accomplish this.

* A Rumor Of War the platoon sergeant (Brian Dennehy) steps on a mine. While being treated by the corpsman he asks the doc if his credentials (genitals) are OK.
* A rumor says that if you look carefully through the Library level in
* A rumor spread by his detractors says that because of the controversy surrounding his election,
* A rumor stretching back to the 19th century is that boot camps put saltpeter
* a rumor suggests that Zemeckis owes an apology (or preferably a real hoverboard) to all the children who saw the film for the trauma brought on by the realization that they could not, in fact, buy a hoverboard.
* a rumour of a strike on the London Underground as its headline, pushing things like the assassination of the Pope onto page 2, while more provincial papers have archetypal headlines like "Edlington man has ferret stolen from back garden".
* a runaway Harry growled that he wasn't "charity" when three Diagon Alley shopkeepers offered to let him stay with them - until they threw in a job offer.
* A run-down bar in an episode has holographic windows that don't even provide any sort of forcefield. This makes for the "window" is used as a parody/homage to the traditional cowboy movie barroom brawl, allowing the protagonist to be
* : A run-in with an artifact (antique snow globe) ends with Myka trapped in a giant glass ball for three days, and at the end of the third day she stiffens into a statue unable to move or see (she closed her eyes right before she lost control) in center of said ball complete with water and glitter but fully aware and able to hear everything around her for ELEVEN days before she is finally freed.
* A Runner's High (or Swimmer's High for swimmers), when an athlete feel they can last for miles on end through the sheer euphoria caused by their exercise of choice.
* A runner-up to Communists is drug dealers, appropriately for a series rooted in
* A runner who is competing totally of their own free will, we hasten to add, and who is not harmed in any way.
* A running bit on Dan Cole's radio show on KFAN is to state that a given show is "one of the top five shows on the station." There are only 5 shows on the station.
* A running gag has the two main characters (who are brothers) being
* A running gag in the anime was that Misty would yank on Brock's ear whenever he hit on a girl, which was
* A running gag in the omakes is Al storing cats in his armor, which often leads to this...on the parts of characters like
* A running gag in the relationship between Kota and Miku is that Miku and her gang love to constantly dress Kota in drag, since (according to them) he "looks cute" in it.
* A running gag involved Ryōga walking along and getting splashed by something. Can be a car going by, can be someone tossing used washwater out of a window, can be (and often is) an old woman watering her plants via ladle. Since cold water turns him into a pig, this is milked for all the humor value possible.
* A running gag involves the antagonist of the episode picking up the Warner siblings by the scruffs of their necks and get ready to throw them out. The scene would then cut some distance away, and the person getting ready to throw them would instead come hurling toward the screen.
* A running gag is that Chandler's obnoxious Janice keeps showing up, even once Chandler happily dates Monica.
* A running gag is to have a wrestler take an especially harsh thrashing if a show happens to fall on their birthday, bonus points if the thrashed are a baby face and even more it is also in their hometown.
* A running gag with Gaspar the vampire, whose manner of dress and speaking makes it very easy for him to be mistaken as a cute girl.
* A running gag with Sentomaru, who claims to have the world's tightest mouth, yet will immediately tell anyone whatever they want to know, even if they're not actually addressing him.
* A running joke concerning many Finnish athletes, who apparently have hard time showing emotion even when they win something big. A good, notable example is the F1 driver-turned-rally-driver-turned-F1-driver-again Kimi Räikkönen,

parodied
* A running joke in Indianapolis is that they don’t even need a team, people will pay to just sit and look at
* A running joke in the "Jack and Dean" videos involves Dean pronouncing
* A running joke in the series is that Jurgen has as much, or more of a claim to being a real hero than Cain himself. Cain acknowledges this and is constantly annoyed that no one else ever does.
* A running joke is the 'main character' Akari worrying constantly about her complete lack of screen time, character traits, and presence. Although she leads the
* A running joke that crops up every time Sargent Slaughter appears is a commentator reference to his chin always preceding him. This is more of an
* A running question in Emma Lathen's novels about banker/amateur detective
* A running situation throughout the story is the main character's inability to reveal who she is to the rest of the cast. Most of them don't find out until the latter third of the story.
* A running theme in pro wrestling is the claim that no one, not even the owner, can override a referee's decision. This is countered by the fact that the owner or GM
* A run of radio ads from the late 2000s repeatedly compared Comcast's "blindingly fast speeds with Xfinity" to the "slow, plodding service" provided by "the phone company" and how largely unnamed national studies prove that the Comcast service is faster. You're lucky if the term "DSL" is directly mentioned in anything but the fast-speak at the end, since that's what it's ACTUALLY being compared to, despite the unstated implication being a direct Xfinity-to-FIOS comparison.
* A run of the mill one happens when Brennan is talking to Sweets' girlfriend over problems in their relationship. Cam comes in with DNA evidence from a murder weapon where the gender was in question. Brennan says one word in response: "Sex?" ...needless to say, as Sweets' girlfriend didn't hear Cam come in,
* Aruosumente, at one point during the Sage's Trial Legna becomes so frustrated with the Sage's noncommital and vague answers — which come about because Legna himself has no idea what he's doing or has not read up on the rules — that he rage quits the dream. Fortunately for him, that does not equal an end to the trial.
* Aruosumente, Dante single-handedly killing 300 enemy soldiers when he was a child does not make for a pretty scene.
* Aruosumente, Jasmin flat-out says that Lante is a good liar, giving the first hint that Lante may not be what he seems.
* Aruosumente, Legna, due to lacking imagination and being stubborn, is really bad at telling lies, and usually doesn't bother, so the one time he does he is immediately called out on it.
* Aruosumente, Legna has had a sheltered upbringing, with the Senate taking great measures to make sure he has as little contact with people as possible to keep the past events from him. This means that while he is quite competent at his job and organizational affairs, he has no clue about how to deal with people. He also lacks imagination, so his demeanor comes off as blunt and straightforward, however, as soon as those around him realise that he's honest and determined, they tend to warm up to him somewhat.
* Aruosumente, Legna is known for getting angry whenever he catches His Majesty outside his duties, e.g. while trying out a new invention. However, that's because he's responsible for His Majesty's safety, and they're childhood friends besides.
* Aruosumente, Moeran, one of the council members, turns out to have studied medicine at the Shengtalisi, the most prestigious university of his home country. His private rooms still look like those of a doctor, even though he's not actively practicing medicine openly.
* Aruosumente, Oracle Kian's original thought behind taking in Lante and Dante, with the latter being a loose cannon waiting to happen. He reasons it's better to keep them close than to have them fall into enemy hands and be used as weapons. It is also the reason Lante and Dante have been made commanders of the White and Black

Knights respectively.
* Aruosumente, the entire point of having an Oracle around is that they are capable of having prophetic dreams. The plot is kicked off by Oracle Legna dreaming of someone shouting "Die!" but being unable to determine the killing intent's source.
* Aruosumente, the Sage's Trial consists of arranging the first ten cards of the Major Arcana according to the given situation and allocating the right cards to the right people involved. Legna trying to determine who corresponds to each card takes up most of the story.
* Aruosumente: When threatened by an approaching enemy army, Oracle Kian decided to send out Dante — who he had decided was uncontrollable — to face the army alone, putting Dante's non-combatant brother in front of the gates as well for added motivation. It backfired badly, with Dante not only surviving but killing 300 enemy soldiers, Rucetta's second-in-command getting killed because she tried to save the children, and possibly resulting in Kian's own death down the line.
* A Rush of Blood to the Head is a loose concept album about urgency and the quietude that often obfuscates it.
* A Russell Baker column suggested what he really considered painful and condign punishments for the Watergate conspirators — such as sentencing them to ten years of high school. ("You can't do this to me, Sirica!")
* A Russian, a Frenchman and two American lawyers are on a long train ride in the same cart. Russian takes out loads of vodka and caviar, treats everybody aplenty, and just throws the rest out the window. "Oh, we have an overabundance of that!" Next, Frenchmen takes out loads of vine and cheeses, treats everybody aplenty, and just throws the rest out the window... After some deliberation, one of the American lawyers gets up, grabs and throws the other out the window.
* A Russian comedian, Yevgeniy Petrosian, had a sketch once where he outlined the typical man's schedule and the typical woman's schedule. The man's schedule consisted mostly of meals, TV, fishing, rest and "relaxation after rest". But it added up to more waking hours, so his conclusion was that men should have Mondays off.
* A Russian commercial of ready-to-cook chicken breasts. The spokesman for the product was a
* A Russian Commissar sends a group of POW conscripts into a kill zone of the German forces, also shooting anyone who tries to retreat.
* A Russian Course by Alexander Lipson and Steven Molinsky is stuffed with this. The practice dialogue for greetings is followed by the notation "awkward pause," then the dialogue for farewells. Another exercise covers "Four ways to avoid answering a question." Cassette tapes supplied listening material, including among other things a pompous choral anthem for a cement factory that celebrates cement the way Monty Python celebrated spam. Early readings outline the ways of shock-workers and loafers: "Shock-workers live well. In factories they work with enthusiasm. In parks they think about life. About what life? About life in factories. How do loafers live? At work they steal pencils. In parks they conduct themselves badly. Shock-workers are often cultured people. Cultured people read books. And they wash every day. Loafers are often uncultured people. As far as I know, uncultured people don't wash. Never? Yes, they never wash. And they like to smoke in trolleybuses." Later readings reach so far as the mysteries of the uncultured psyche ("I don't like to conduct myself badly. God only knows why I conduct myself badly. I'm not a bad person. *he weeps*") and the meanings of happiness and decadence ("Happiness is to sit by the Great Blinsk Sea and build hydroelectric power stations. Decadence is to lie on the beach by the Great Blinsk Swamp and watch television. In tuxedos").
* A Russian film involves a scientist who develops a device that is able to analyze a child's brain and determine his or her likely career path. A father finds out about this too late and, by the time he starts looking for the print-out for his son, his son has ripped up the piece of paper, leaving only a single letter. Determined to find out the truth, he takes his son on a trip to the scientist's home town. Unfortunately, when he gets there, he finds out that the guy died a few days before that. Prior to his death, he took his machine apart to try to improve

it, and no plans are available to put it back together or make another.
* A Russian KGB agent from the anime series sports a large-bore cannon built into her elbow. It is presumably a last-ditch weapon, as it is rather cumbersome to fire — her forearm must fold backward on a hinge to expose the muzzle.
* A Russian phrase (Я сошла с ума — "I have lost my mind") is in the chorus of "All The Things She Said" by
* A Russian physicist named E. Frenkel believed that he had acquired the psychic power to stop vehicles. He tested this by standing in front of an oncoming train. It didn't stop.
* A Rustle in the Grass style. At one stage the anthill is attacked by a bird and the ant hero drives it off by climbing up its body to attack the bird's eye.
* A Rustle in the Grass their great size is hardly surprising. Interestingly the ant protagonist doesn't find the spiders anywhere near as terrifying as his encounter with a toad, with its natural camouflage, ability to leap huge distances and strike with its tongue from well out of stinging range.
* Arvid basically dedicated his whole life to this prior to the start of the series. When he gets married he has trouble with consensual sex and they try a roleplay scenario where he pretends to pillage his own farm, mock-kills his slaves, and attempts to have sex with his screaming wife... but overthinks it and can't get it up. Apologizing to the slaves afterwards.
* Arvis got this too. He's basically coerced to accept Manfroy's help, otherwise his Loptous heritage would be revealed and there's only one fate for those with that bloodline: Getting burnt on a stake publicly.
* Arwing enemy. Apparently it was coded in to test a flight pattern for dungeon boss Volvagia.
* Arx Fatalis claws. Seconds before you meet it, you have to crawl through the tunnel that is apparrently burrowed in solid rock, with Wolverine-like claw marks all over the floor and walls.
* Arx Fatalis is a bunker city built in collaboration by all the races of the planet on realizing their sun was going dark, plunging the surface into permanent winter. The various races have set up their own settlements at different locations throughout the caverns. There are also other bunker cities scattered across the world which sometimes trade with Arx.
* Arx Fatalis, it is possible for the player to, by killing the friendly and plot-critical king, and stealing a key from his body, to open the doors leading to the surface. On opening the door, you are instantly frozen solid and die.
* Aryabhata, rather than the common perception that the celestial sphere rotated around the Earth. He even calculated the Earth's diameter to a surprisingly accurate degree.
* Arya drops a coin to catch an enemy off his guard when he stoops down to get it in "Mhysa".
* Arya gets m'lady-zoned by Gendry in "Kissed By Fire," when Gendry recognizes that even if he serves House Stark as Arya wishes, class differences mean the two can never be equals.
* Arya has her father's grim determination, a fierce sense of justice, and love and empathy for the smallfolk. She also ends up best friends with Gendry during the war — who is the son of Ned's friend Robert who he fought alongside during the last war.
* Arya is a deconstruction of the trope. Her coldly calculative personality is
* Arya is noted to be Generation Xerox for her Aunt Lyanna in both appearance and personality, as a similarly wild, tomboyish
* Arya is shown to have scars from her training with the Faceless Men. None of these are on her face.
* Arya is skilled enough to fool Tywin, up to a point. He figures out she's a highborn northern girl, but almost certainly doesn't realize she's actually Arya Stark (he would hardly scruple to take a child hostage. And just about the one thing that
* Arya is the noblewoman whom Eragon is destined to have an "epic romance" with.

Especially considering he never pays attention to
* Arya manages to sneak up on and kill the Night King with a dragonglass dagger, which causes his army to instantly collapse as all the other White Walkers, and by proxy, the Wights, were spawned from him.
* Arya often chews on her lip, a habit the Faceless Men try to stop her doing, as it's distinctive.
* Arya reacts this way after the Waif plays 'the game of faces' with her.
* Arya's direwolf Nymeria had gone completely unseen and unmentioned since the
* Arya's list of people she wants to kill all have very good reasons for being there. When she does kill, it's almost always much worse people who did terrible things to inspire this.
* Arya Stark cleans and sews up Sandor Clegane's neck wound in "Mockingbird". Given that all their previous interactions have involved either killing people or engaging in
* Arya Stark has a close relationship with her father Ned Stark. Realizing that his daughter is a tomboy who doesn't like the fact that she's being brought up to become a "proper" courtly lady, Eddard eventually allows her to be instructed by a fencing teacher. By contrast, Arya doesn't seem to take after Catelyn at all in looks or personality and is never seen interacting with her directly.
* Arya Stark has had to rely on her wits to survive just as often — if not more — than swords. While she doesn't make the best
* Arya Stark has the Stark look, including fair skin and brown hair. Due to having the slightly unnervingly pale skin and dark hair of Northerners, she is regarded as less attractive than her red-haired sister, Sansa. However, with time, her appearance becomes the least eerie thing about her, as her behavior verges on
* Arya Stark has to do this after her father, Ned, is accused of treason and executed, because otherwise she would have ended up as a political hostage like her sister, Sansa. Her initial goal is to find her older brother Robb and mother, Catelyn, who are leading a rebellion in the North. However, after Robb and Catelyn are murdered during the Red Wedding, she is left completely astray, as she has no family or home to return to. She decides to exact revenge, traveling to a different continent to achieve this.
* Arya Stark has warmer relationships with Gendry, Hot Pie and even Sandor Clegane than she does in the books.
* Arya Stark. "I'm good at killing fat boys. I like killing fat boys." And others. In the later seasons she becomes
* Arya Stark in season 1 behaves like a tomboy and was frequently being mistaken as a boy due to her appearance, which annoyed her. After the death of
* Arya Stark. In Season 3's "Kissed By Fire", Gendry decides to remain with the outlaw group The Brotherhood Without Banners, instead of continuing on to Riverrun where Arya's highborn family rule.
* Arya Stark is certainly growing into this. She is offered a position as a Courtesan, can easily seduce any mark and her beauty has been noted by many other characters.
* Arya Stark is seen wearing dresses in the same style as her sister Sansa and has an intricate hairstyle. At the end of the first season, her hair is cut short and she is forced to dress as a boy, but for the rest of the series is a fully-fledged
* Arya Stark kills the men of House Frey (in retribution for their killing of her family and violating the sacred law of guest right) with poisoned wine, which makes them cough blood and drop dead within minutes of consumption.
* Arya Stark like sword-fighting, riding, and archery rather than ladylike arts. Catelyn even admits that Arya is "a trial" and, along with the Stark family features she shares with Jon, it's one of the reasons she's closest to fellow misfit Jon.
* Arya Stark makes a hit list of those responsible for the deaths of her family members and friends. She is able to kill two people. Ironically, she ends up being with the man who is on her hit list later,
* Arya Stark, once forced to go on the run, isn't much of a threat due to being a young girl, and is surrounded by heavily-armed and potentially-hostile adults which

has fostered quick thinking on her part just to stay alive and avoid being captured by the Lannisters. She proves quite adept at using her wits to survive, such as when she uses them to force a skilled assassin to help her escape Harrenhal.
* Arya Stark racks up a virtually countless number of daring escapes unscathed.
* Arya Stark's entire goal in a nutshell. She wants to kill the people who caused misfortune to her family and friends. She executes Meryn Trant (who killed Syrio Forel and, unknown to her, beat Sansa on Joffrey's orders), Polliver (who killed Lommy and whose party killed Yoren) and she kills The Waif, who killed Lady Crane. In "
* Arya Stark threw food at Sansa at a feast, filled her mattress with sheep dung whenever she was angry with her (which happened to be all the time), and constantly embarrassed her by acting 'unladylike'.
* Arya Stark wields Needle, a light fencing blade suitable to her small stature and stealthy nature.
* Arya's younger brother Bran ends up doing this as well, after the sack of Winterfell and its occupation by the Boltons. He travels north beyond the Wall alongside three companions to learn more about his greensight.
* ARY News. It was shut down for a brief period in November 2007, and only returned after the network promised to provide no coverage critical of Musharraf's government.
* As 2020 came, a lot of players noticed an eerie possibility that Battlefield 4 might actually happen, due to the recent Hong Kong protests, and fear that if it escalates and the US are forced to intervene, that might lead to China declaring war on the US (not to mention this is more or less exactly what started the war in
* As a affectionate parody of Bond villains, it shouldn't be too surprising that your goal in
* As a bard Leliana was... what's the word? Vicious. Very, very vicious. About her only scruple was to give those she killed a clean death, everything else was fair game. After her betrayal she goes on a
* As a bit of humor, one can buy a paperweight featuring a novelty hand grenade (that is to say, no explosives in it) with a number tag hanging from the pin, complete with a sign reading "Please take a number".
* As a bonus gag, Ty Johnson (Cloak) is revealed to have been the teenage manager of the burger joint Peter worked at.
* As a bonus, the couple above is involved in a sort of love triangle with a third person who, unbeknownst to all three at the time, is actually their father.
* As a bonus, the long-suffering fans know team management will do something to crush their hopes, most notably
* As a bonus, the nearly-fifty-year-old Kent proceeds to beat the crap out of the much younger Oswald, without ever telling the poor sap who he really is or why he's beating him up.
* As a bonus, the sword cannot harm an innocent when it is in the hands of evil, so Jack himself can't be hurt by the weapon if it is used by a villain, as demonstrated when Aku once tried to stab him with the sword and it just bounced off.
* As a boss, Yogg-Saron without any keepers was far harder before the recent onslaught of nerfs. Lore-wise, Algalon could wipe out Yogg-Saron and call it a day, but doesn't want to as it could destroy the world.
* As above, but your friends don't even bother pushing, they just say you volunteer.
* As Above, So Below features characters descending into hell to face their own personal demons under the catacombs of Paris. "Abandon all hope, ye who enter"
* As above, something unusual is going on, but this time the character is using the line ironically, or at least knowingly. In such cases the character is evidently aware that the sight before him is well out of the ordinary, but, instead of gawping with his cohorts, greets it like
* As a budding politician, Devin's spent years having to interpret people's true intentions, and as a result he's become a sweet talker who uses his words to deal with sticky situations.

* As a by the way the word "Merkava" means chariot. As that is in a way what a tank is, a "horseless chariot", it makes sense.
* As a child, Boxing icon Muhammad Ali was offered his first boxing lesson by the police officer to whom he'd reported his stolen bicycle. He only took up lessons so that one day he'd be able to beat up the kid that stole his bike...the rest is sporting history.
* As a child, Bree cleaned the blood of her mother up (when she was hit by a drunk driver and was rushed of to the hospital) off the drive.
* As a child, Harry set fire to his house in the hopes that he would be rid of his abusive mother. At the very least, he succeeded in having her lose custody of him.
* As a child, Littlefinger was one of these. After all, the small and lowborn yet intelligent hero always gets the girl, right?
* As a child, Narendra Modi's family flee India as refugees after a war with Pakistan, and end up in the US. He still goes into politics, though, and ends up as a Representative from Texas.
* As a child, Ned Flanders was spanked nonstop for eight months straight, making him the repressed goody-two-shoes he is now.
* As a child, Queen Chrysalis was taught by her father, a hunter, about the nature of predator and prey. She took it to heart, using the logic of survival of the fittest to justify her having to drain others of their emotions to survive. She considers Changelings to be the ultimate predator, since they can feed on the love of any being, and believes they, and by extension her, are destined to rule over all other beings.
* As a child, Sarah Lynn was as sweet and friendly as the character she played on
* As a child, Sayid stepped in and killed a chicken when his brother Omar couldn't bring himself to do it, thus starting a lifelong pattern (and an unhealthy co-dependent relationship).
* As a child, serial killer John Wayne Gacy loved gardening, but his abusive father would not let him do anything he thought of as "girly".
* As a circle lined with several thin triangles on the inside, the First Order's logo resembles a lamprey mouth. This is fitting for how aggressive and murderous they are.
* As a clone, Atria had a very sheltered upbringing by her master, who would not let her attend formal education, as is customary for the Adari masters. As a result she is hopelessly naive or clueless about many things on Earth (such as that casually having a threeway with a man and woman after she starts dating Tom would upset him).
* As a close variant of the Machines, and the ancestor of Cosmic AC, there is Multivac in
* As a common example of covers being black sheep hits, one of her biggest hits is "Your Song", an
* As a comparatively lesser example, Chat Noir comes to dislike Vexxin for the horrible crime of
* As a complementary replacement, the chop-shop owner provides Wick a loaner Chevelle SS 396. The staff of the Continental also gift him a modern V8 Charger, which
* As a compromise with Greece, the United Nations in the 1990s admitted a new member country using the name "The former Yugoslav republic of Macedonia" (FYROM). (It's now known as
* As a concrete example, Shadowrun 4th Ed featured cyberware which could be hacked through their remote diagnostic connections, in part to give hacker characters a role in combat. Every player naturally had their PC disable all remote functionality on their cyberware and the idea was retconned after observing that any enemy who did not do so just looked ridiculous. 5th Edition then brought this back by giving cyberware enhanced functionality only if it was connected to the Matrix (ie, the Internet), but with there often being no explanation why this should be the case. (Not that it's difficult to imagine an "always online" requirement in a cyberpunk setting, mind you.)
* as a condition for Cedric to keep his position as the Royal Sorcerer, King Roland

demands him to remember it's because of Sofia he's not being exiled.
* As a Confederate Army quartermaster, restaurant manager Jerry Dover in the
* As a consequence of the above the nascent New Republic isn't forged in a crucible of continued war and greatly downsize their fleet in order to avoid potential bad PR after twenty-five years of Imperial rule, with the bulk of it kept stationed around the capital at any one time. By the time of the sequel trilogy the government is so complacent and conflict-averse that they stick their heads in the sand and ignore the warning signs pointing to the First Order's emergence, allowing them to wipe out their leadership and most of the navy in one fell swoop come
* As a consequence of this, to this day, whenever a Mexican soldier/officer encounters a Legionnaire, the Mexican will always salute
* As a corollary to the second rule, dynamic but artistic openings aren't action, so the opening of
* As a counterpoint, the NCR is highly egalitarian when it comes to gender. Women can be found in every role within the NCR's society and military, which makes sense since probably the most influential figure in their history has been Tandi, who was female and eventually became President. And even with the more chauvinist policies under President Kimball's administration, women can still rise up the ranks with distinction; compared to the Legion, the sexism that's crept into the NCR is outright benign.
* As a Countess with access to the highest circles of Prussian society, Marie von Brühl could easily have married someone of her rank; instead, she fell deeply in love with Carl von Clausewitz, an almost unknown but promising officer of dubious nobility, who loved her just as much. Despite many hardships and obstacles, such as their separations when Carl went to war and was captured by the French, or Marie's mother's firm opposition to this misalliance, they finally married in 1810, eight years after they first met, and remained closely united for the rest of their lives.
* A sad and — unusually — gender-flipped occurrence can be found in
* Asada seems to be about one head taller than most of the female cast in
* As a daughter of the ocean, Thetis is able to swim massive distances in seconds.
* A sadder example is Lester, a once promising singer until an altercation with the mob had his throat crushed, ruining his voice. Listening to old recordings, he imagines himself as a singing star with his wife and children, living in a great home with bright light. It then turns to today as he can barely croak out the words as he sits in a run-down apartment by himself.
* A sadder/scarier incident: In the 90s, Sega's development of Sonic Xtreme was cancelled because staff member Christina Coffin almost died from stress.
* A saddle can be put on a pig to ride them, but it wasn't until the game introduced carrots that players got a method to steer the pig: by combining a carrot and a fishing rod, you can make a "carrot on a stick" item that lets you steer a saddled pig you're riding, in whatever direction the player is looking.
* As a deconstruction of sequels the entire game is a recreation of the Shadow Moses incident in the original Metal Gear Solid 1. After Raiden gets his new signature weapon, the hf blade, the gameplay never returns t stealth based sneaking around.
* as a demonstration of his powers. He then tells him to improve his aim after regenerating, due to him missing a part of his jaw.
* A sad example. In Chile, a university created a three-year CSI course due to popular demand. It lasted for two years, until the students realized that there were no jobs for CSI technicians in Chile. They promptly tried to sue.
* A Sadie Hawkins Day dance was actually a plot point in one episode of
* as a direct consequence of trusting to their underdog powers of 'heart', enthusiasm and lack of preparedness, as well as the unprofessionalism of their default lead singers.
* A Sadness Runs Through Him: COMPLETE Snowtuft Warriors AU Map: Snowkit was a gentle and sweet kitten who became angry and bloodthirsty in adulthood.
* A sad reality for many people who cannot bring themselves to move on, even if they know that they should.

* As a driver, Tony Stewart had three Cup Series championships and won 48 races, but he was shut out in the Daytona 500 every time it looked like he had a shot. The closest he got was in 2004. He led 98 laps, or almost half of the race, but Dale Jr. overtook him with 20 laps to go after the last pit stop cycle and he couldn't get around him. In 2008, Stewart led coming to the white flag, but he and his then-Joe Gibbs Racing teammate Kyle Busch got outdrafted by the Penske duo of Ryan Newman and Kurt Busch, and Newman took the flag. Ironically, Newman would join Stewart's new team in 2009.
* A sad twist to this is that Pete Townshend partially took The Who on the road in the late
* As a family-centered season of Super Sentai, the villains, the Psyma Family, is a family consisting of three sons and one daughter who wants to please their literal demon of a mother, Grand Witch Grandienne, and bring her back to Earth for her goals. The tragic thing is while they love their mother, she never truly returns the favor, seeing them as pawns to be either discarded and/or controlled.
* As a fantasy writer, Pratchett had several opinions on the ghetto. He's quoted as saying that he doesn't like the term "
* A safari park in the UK had to remove five African grey parrots as they were swearing at customers and laughing about it. The five were quarantined together originally, allowing the birds to teach each other the swear words.
* Asaf Avidan and the Mojos are a popular folk act in their native Israel, but their only hit outside of it was a 2012 remix of their 2008 song "One Day/Reckoning Song".
* A Safe Place (1971) is played by Tuesday Weld, whose birth name was Susan.
* As a filly, her friendship with Sunburst, another unicorn, broke apart because he received his cutie mark, and was sent to Canterlot by his parents to study magic, effectively abandoning her. This left her so scarred that she never made friends again out of fear of losing them to cutie marks as well. Instead, she warped into a fanatical cutie-mark hating dictator who manipulated others into giving up their cutie marks under a false guise of friendship. Starlight never truly understood friendship until she is befriended by the Mane Six and is taken in as Twilight's new student.
* As a final point, the series also features literal "deflector fields"... which actually aren't this trope at all, but rather
* As a first for the mothership titles in the series, Ludger, the protagonist of
* As a flight cadet, Boomer in the Re-Imagined Series gets into hot water with Adama over her poor landings, and the subsequent second chance he gives her leads to her repaying this debt in a vital way at the climax of the series.
* As a former student of Pierre Schaeffer, Jarre used noises in his music on other albums as well. The waves and seagulls in "
* as a freaking Oh and he brings former Xbox Mission Division spokesman Izawa along for the ride.
* As a fun bit of trivia, Arnaud De Thiel is also the name of the first case of identity theft legally recorded in France.
* As a gag item popular among doctors who treat sexually transmitted infections, there's sometimes a statue of a fourth monkey covering his crotch with the phrase "Spread no evil."
* Asagao Academy Normal Boots Club, Hana's mother died when she was eight. This deeply affected her father and the family's finances.
* Asagao Academy Normal Boots Club Jon tells Hana she has just the right skill set to be a star in the drama club's performance of Romeo and Juliet... as a tree.
* Asagao Academy Normal Boots Club Mai does this frequently throughout the story with other occasional examples from some of the boys.
* Asagao Academy Normal Boots Club who bashed and manipulated both him and Hana for a good portion of the last chapter.
* As a general performing note, singing is quite different from normal talking and
* As a general rule, absent any other cues like dialogue or geography (and often enough even with them), a rising sun is depicted as red and a setting sun as orange in all films. This is just a cinematographer's convention that's gone back to the

early days of color film.
* As a general rule, almost any chemical that contains a large percentage of nitrogen by weight. Nitrogen gas is extremely stable, so nitrogen compounds have a nasty habit of reverting to gas given the slightest opportunity. This results in a rapidly-expanding ball of hot gas, which is, well, basically what an explosion
* As a general rule for the 'verse, it's not a good idea to try to eat/absorb the mind of the Doctor (or other Time Lords), and even if you can handle him, Clara Oswald and her echoes are an even worse idea/have this going on as a bit of a running theme.
* As a general rule in Star Trek series, this is often justified by the Federation's own definition of morality, particularly the Prime Directive. Starfleet considers it deeply unethical to interfere with other cultures if it can be avoided, especially if that culture is less technologically advanced. Thus the heroes will usually try to do things in a way that does not draw attention to them or influence the local culture too much, while villains have no such limitations.
* As a general rule, just about any intense battle will leave the battlefield looking like this; the more modern the time period, the more likely the trope will be realized.
* As a general rule, many of the "robber barons"—Vanderbilt, Rockefeller, Carnegie, and their ilk—used this trope to rewrite history. Towards the end of their lives, they set their families up with their own fortunes, then donated massive sums to public works and artistic endeavors (Vanderbilt University, Carnegie Hall, and the like) to enshrine their reputations as generous philanthropists. Thanks to the work of the muckrakers, their actions are carefully documented, but they were still able to portray themselves as heroes who cared about the common man, and their legacies live on in the projects they funded.
* As a general rule, medium tanks are this; not quite as tough as heavy tanks, not quite as mobile as light tanks, not quite as gun as tank destroyers, but tough enough, mobile enough and gun enough.
* As a general rule, most games involve combat, and thus any Neutral Route through a story will often end with
* As a general rule of thumb, if the Doctor offers to let someone travel with them at any time before the very end of the episode, that person has an excellent chance of being dead before they have a chance to set foot in the TARDIS (see Lynda, Astrid, Jenny, Reinette, etc.). This rule doesn't apply if the same offer is made just before the credits roll.
* As a general rule of thumb, there are two types of prototypes: concepts that barely work, and just demonstrate what the finished product could be; and stuff that has more buttons and features and flashing lights than you can imagine, and is prohibitively expensive or complicated to make on a wide scale. Super Prototypes are the latter category.
* As a general rule, the less lustful a relationship or attempted relationship in
* As a general rule, the manga also loves to give certain characters metaphorical nightmare faces when their evil intentions come up front, like Chairman Asano or Nagisa's mother. The results are suitably terrifying.
* As a general rule, there are two types of amphibious landings: unopposed, and opposed. An opposed landing usually only works if the attacker has dramatic numerical superiority, because losses at the beaches
* As a general rule, whenever a town has the nickname "People's Republic of ____", it's probably this.
* As a general thing, commercial products are more likely to use this trope because the more unique a name, the easier it is to trademark. Notice all the
* As a genre, historical mystery fiction (and to an extent historical fiction in general) often has some amount of this in order to keep the character sympathetic. There is definitely a continuum of this though. On one end, the title character of the
* As a genre which is focused on awesome stunts, personal interactions, and a small group of people being vastly more powerful than anyone else, Wuxia has inspired a number of RPGs:

* As Agent Kent Mansley leaves the Hughes after borrowing their phone, he remarks about Hogarth's name, which leads him to…
* as a ghost, he annoys the Oracle enough that he banishes Roy (using a magic item, the Oracle has no actual Divine magic), not realizing that banishing Roy bypasses the Memory Charm.
* As a ghost, Terumi's existence is not stable by itself and he has to rely on a series of living vessels to inhabit. His current vessel at the time the plot starts is named
* Asagi it is revealed that she is still using an older-style Disgaea sprite unlike the others who are in HD.
* As a gimmick in the Jeff Zucker era, NBC sometime had its shows do special episodes which are slightly longer than the standard half-hour/twenty-two minutes formula, called a "supersized" episode. When they reach syndication, or even reruns, they're trimmed down to the usual length or, if there's enough extra footage, stretched out into a two-parter; a couple of
* Asagi (the eldest Ayase girl) and her mother regularly fight over sweet food.
* Asagi, vocalist for the Japanese band D, always has his right eye covered.
* As a grade schooler, Shouya tore off Shouko's hearing aid. It was bloodier than he expected.
* as a handsome man in his mid-30s instead of the sodden wreck he is now about how she needs to come into the past with him and live trapped in amber forever, which she says she already is. Since amber's ability to trap the past is limited to insects, it is significant that the climax of the story revolves around an insect that is notably free of any trapping at all.
* As a hangover from the above concept, Vincent was intended to be a
* as a headband. (Tied in a Windsor knot, as specified in the student handbook.)
* as a heart, inside of Sora's heart. Yeah, this trope is taken quite literally here.
* As a heroic inversion, the Doctor himself has been known to say this, on occasion, like in
* Asahi adverts starring Richard Whiteley, in the 1990s(?), parodied this phenomenon.
* Asahi gets sent 20 years into the past and befriends the teenage Genjirou and Touko when they were high schoolers; their relationship is basically a gender-inverted version of Asahi and Youko's. However, things went to Hell just days before graduation when Genjirou's vampiric nature went out of control and he had to drop out of school, which is what Genjirou was warning Asahi about. Genjirou also had a trio of friends just like Asahi's own friends, but they turned on him when he went berserk, which has Asahi worried that his friends might do the same. Even worse, Asahi's Granddaughter from the Future.
* Asahina of the Four Holy Swords has a nice, neat scar going vertically down his face, above and below his eye.
* As a hivemind species, Gaim units are genetically engineered by their queen for specific tasks. Thus the Gaim ambassadors and traders seen on Babylon 5, needing to interact with the mostly-humanoid races, are more humanoid than typical for their species - even being granted a degree of autonomy and individuality.
* As a homage to this trope, the highest jackpots on a slot machine is often assigned to three 7s.
* Asa home after the latter twisted her ankle. Both are sitting on her bed, and Rin is getting teased. When the poor girl stands up, she trips and falls on Rin, pinning him to the bed. She leans in for the kiss, but her mother comes home and goes up to the room; when she opens the door, we see the two separated, with Rin sitting at the desk (as is, of course, proper for a gentleman).
* A Sailor-Made Man: At one point while fleeing from the Maharajah's goons, Harold crashes through the harem, with the girls scattering in panic.
* A Sailor-Made Man: Harold, who is filthy rich, enlists as a common sailor. Of course, it was basically a random choice to prove to his girlfriend's disapproving father that he could hold a job.
* a Sailor Moon fanfic Interestingly, this is also one of the few fics to suggest

that Usagi would be upset by this situation.
* A sailor named Scouse had to fill in as a waiter at a political dinner, and got himself very drunk to cope with the "exposure to so much concentrated hypocrisy", as one of his coworkers puts it.
* A Sailor of Austria by John Biggins. The crew of a WW1 submarine get food poisoning while hiding on the sea bottom, leading to an attack of particularly foul flatulence that forces them to surface in full daylight to vent the air. By coincidence they do so just as an enemy warship is passing in front of their vessel. After sinking it they return as heroes to be greeted by an army brass band, but unfortunately are still feeling the effects, so have to rush into the nearest bushes to drop their pants, outraging the local commander who assumes he's being deliberately insulted.
* A Sailor of Austria, the historical irony being that the empire had disintegrated by 1918. The worth of this man's calculations are shown when he assigns Otto Prohaska's submarine for a long-range mission for which it's blatantly unsuited — not only is it a small coastal submarine, there's been no allowance made for where they are going to store the food, fuel and lubrication oil for such a trip. His response when this is pointed out is simply to order Otto to go ahead regardless and leave in a huff.
* A sailor wins a painting contest open only to amateurs. He is called out as a professional painter pretending to be a sailor because he failed to do the research on nautical terminology: he used terms like "left" or "right" when describing a boat he was painting rather than the nautical terms like "port" or "starboard", as well as the redundant phrase "knots per hour"
* A Saint Named Mary: A benevolent or saintly female character is named after Mary the mother of Jesus.
* As aircraft are mostly controlled by an autopilot and usually only have the rudder controlled by foot pedals, falling unconscious won't affect a climbing or cruising plane's ability to fly.
* Asajj Ventress, Count Dooku's main follower...cruel, skilled, and a major threat, with a tendency to pull a
* As a joke, Dark Horse Comics writer Randy Stradley created a character called Soon Bayts in the
* As a joke goes, programmers never retire, they just move to consulting about systems written in outdated programming languages.
* as a justification. It is as if readers have a psychology that was bred to deal with a wilder world, and in the modern world they are like a well-fed lion pacing around in its cage ominously and wishing it was back in the Savanna.
* Asakara, on witnessing Negi's powers for the first time, theorizes that he is a magical girl (boy version).
* Asa kara Pika Pika, Itou Maasa finds herself gaining the attention of three brothers, all named Hiroshi.
* Asakawa copies the tape twice more for his wife and daughter, showing the copies to her parents, but as he's driving home, he looks back to see them both dead. Copying the tape wasn't the answer in the first place.
* Asakim Dowin will occasionally lend a hand to the heroes when they are having a hard time, but then again he is properly up to something.
* Asakim. Setsuko tells Barbiel that she felt his sorrow and says that he is a sad person. In fact, sympathy towards the bearer of the Resentful Scorpion sphere causes its powers to weaken.
* As a kitten, Tailchaser returned home to find his mother and siblings gone without a trace.
* as a kit. Third edition reintroduced the class, and it also appears in the fourth edition. In addition, there are several other classes that could perform a similar role.
* Asako Makimura, a Japanese TV personality and writer, is a lesbian and was married to another woman.
* Asakura Hao, who reincarnates himself every 500 years (having done this twice at the time of the series) to compete in the Shaman Fight. Could possibly reincarnate

more frequently, just chooses not to.
* A Salaryman In Nobunas Court has each chapter referred to as a 'Slice' which is appropriate for the story being set in the Warring States era.
* as Alcor euphemistically calls them, where legal or technical failures, or good old incompetence has led to cryopreserved bodies thawing out prematurely, in some cases leaving extremely gory and unpleasant messes behind to clean up. One of the worst of these involved a body thawing and then being re-frozen, only to thaw again. The results were not nice to deal with. Of all the people cryopreserved prior to 1974, only one remains "viable" and in suspension as of 2014.
* a salesperson in a store Harry visits is a man dressed as a woman, who suggests that Harry crossdress during the summer to avoid the fanatical attention of the post-Voldemort wizarding world.
* A sales speaker describes a sale like a good wedgie, which he demonstates on a gulible employee.
* As Alexander Graham Bell lay dying, his deaf wife signed, "Please don't leave me." Bell signed the word "No" and died.
* As Alex Mercer succinctly puts it: "Nothing can protect you from me! Not men! Not weapons! Not armor!"
* As a link in the intro notes, a 2010 prisoner exchange between Russia and the United States revealed
* As a literal example, Mando Guerrero had Weird Al's "Taco Grande" as his entrance music in
* As a literal squad, all six of the Crypton Vocaloids qualify for this trope over the 70-something others (and often Gumi and Gackpo (though even
* As a little girl, Lysa Tully used to adore her older sister Catelyn. Key words
* as All for One's physician, up to sharing voice actors, leaving it ambiguous just how small his role in the story is.
* As almost everyone knows by now, there is a town in Michigan called Hell. Being in Michigan, it has been known to freeze from time to time. There's one in Norway as well. The one in Michigan has begun to realize this, and has begun to
* As a long-running series dealing with, well, the supernatural, it has touched on this trope. Sam's girlfriends have included a werewolf and a demon; he's also had romantic friendships with a vampire and a kitsune. Dean has generally avoided relationships with monsters;
* As a long-term collaborative fiction project that has undergone some pretty big paradigm shifts, the
* As a lost tribe of Aztecs, the Tulpani still practise human sacrifice in
* As also noted in the Real Life section, the British Kangaroo carrier in
* as, although in exchange they picked up a vulnerability to biotic attacks like Warp, which shields protected against.
* As Alvy and Annie sit on a bench people-watching, Alvy says of one man, "Oh, there's the winner of the Truman Capote Look-Alike Contest!" The man is Capote himself.
* As a male example, he fell in love with Molotov Cocktease when, the first time they met, she kicked his ass and set the building on fire.
* As a manner of spoiler, the Masters have also granted these before in previous deals for previous cities, somewhat by accident in some cases. The big damn diamond at the center of Polythreme is a particularly intense one for its user, radiating so much life inanimate objects anywhere nearby start coming to life, and just a tiny little dusty speck is enough to keep a
* As a matter of fact, a few of Henry's later armors were very bling-tastic, even the last one he wore when he got fat was no slouch in that regard.
* As a matter of fact, ALL of Bungie's pre-Oni games were absurdly bloody, with explosions actually
* As a matter of fact "cilantro", in Spanish, can refer to the entire plant, generally called "coriander" in English, whereas in English, the word "cilantro" generally refers to the leaves of the plant.
* As a matter of fact, Dream himself supplanted the original characters who were actually called Sandman (Morpheus himself

* As a matter of fact, his habit of doing a cameo in each of his films became so well known that he began doing it as early in each film as possible, so that the audience would focus on the plot and the actors instead of looking for him through the whole movie.
* As a matter of fact, Magic, particularly Kafrizzle, is still effective as a Legacy Boss killer as anything else- and in fact can be even better than the Gladiator Falcon Blade and Falcon Slash strategy... That is, if you disregard the ridiculous amount of set-up time it requires to make the strategy viable. You need four Mages, which have pitiful defenses unless their stats are ground up to the maximum by seed farming. Then you need to waste four turns casting Twocus Pocus on each character. Finally, if you get the attack off- Every Mage using Kafrizzle- you've got to hope that all of your attacks hit one after the another- if the boss goes in the middle, the combo chain is disrupted. Way too much to hope for, it still exists.
* As a matter of fact, one of the first American airmen to receive the Medal of Honor, Sergeant Maynard "Snuffy" Smith, happened to be serving a punitive KP detail when he was supposed to be receiving the Medal of Honor from the Secretary of War. His bravery in tending to the wounds of several injured crewmates while defending a burning bomber from repeated German attacks notwithstanding, Smith was
* As a matter of fact, pretty much the entire British civil service is portrayed as such in those series.
* As a matter of fact, the American Budweiser and the city of Budweis'
* As a matter of fact, the base luck stat of a Lancer-class Servant without a Heroic Spirit attached is E-ranked...however, given that pretty much all Servants are Heroic Spirits in the series, the stats are all over the place. Still, the luck stat of many Lancers tends to be E or D...but rarely ever is it over C.
* As a matter of fact, the earliest heavy artillery, ie: Catapults and Trebuchets and the like, were referred to as Siege Engines. Engineers were the guys who set up and ran them. Thus, the earliest artillerymen
* As a matter of fact, the (former, as of 2012) German collection agency for state TV, the GEZ (Gebühreneinzugszentrale) appealed to this trope, to the point of broadcasting a series of
* As a matter of fact, the largest known prehistoric spiders (the Jurassic
* As a matter of fact, the relationship between Naruto and his friend/rival Sasuke works as this across multiple generations, dating all the way back to the very
* As a matter of fact, Tokyo itself is something of an example, the name translating as "East Capital", in contrast to the country's previous capital, Kyoto ("Capital City"). Nothing happened to Kyoto (in fact, Kyoto fared better than Tokyo, having been spared the devastating fire bombing that Tokyo underwent in
* As a matter of principle, Bill Watterson always refused any kind of merchandising. This does not stop people creating pirate products. A pair of hacks actually wrote a children's book called
* AS A MECHA SETTING, John Arthur is High King of Earth (mostly by virtue of blowing up the Skynet-esque MerGN-A's main processor and sending her fleeing). Other planets have similarly feudal arrangements: the Guinevere-equivalent, Valerie le Guin, is officially Valerie IV, Regent of Venus, and the Jovian moons are covered in squabbling minor houses known as Petty Titans. Even the Saturnian Senate seems to be more of an oligarchy of wealthy families than an actual democracy.
* As a member of ASU-NARO, Gashu Satou was complicit in throwing his biological son Kai into the Death Game, resulting in him slitting his own wrists
* As a member of the main cast, Wooton Bassett seems to be required to spend a little more time on Earth, but he still has his moments. Oh, does he have his moments.
* As "Amending Fences" reveals, Minuette, one of Twilight's old Canterlot friends, is a very upbeat girl. No wonder she and Pinkie are friends.
* As America declines and the corrupt Federal Government comes to depend more and more on minorities to support its ruthless rule, President Warner eventually agrees with Mexican nationalist leaders to establish a condominium over Texas, Arizona and Newmex. This backfires, however, as the locals rebel, and end up destroying most of

the Mexican army in the ensuing war. The resultant power vacuum then allows the
* A same-sex example: the former marriage of US women's legend Abby Wambach and former pro player Sarah Huffman.
* Asameshimae Nyanko whenever there is a battle the game turns into an arena where both players' cats leap at each other and start a Big Ball of Violence, which, after a few seconds, reveals the winner standing over the loser.
* Asami also goes through a somewhat less severe one, also becoming Result A. When Asami was a child, her mother was killed by firebenders. She is strung along by Mako while dating him, only to lose him to Korra. She learns that her father, whom she looked up to, was working for the Equalists, and is forced to attack him, damaging the reputation of his company and their relationship almost irreparably. She has to take on the failing company; the guy she trusted to help her restore it steals the inventory. She watches Korra, her best friend
* Asami and Korra over Mako In Season 1 and 2, thankfully they get over him and move on
* As a minor note, Umon had been inspired by a Dom pilot he fought at the Battle of Solomon in the One Year War, who used a skull and crossbones as his insignia.
* Asami Sato didn't just inherit her father's industrial company, she also inherited his engineering genius. She can build a sand glider out of ship scraps, come up with innovative infrastructure ideas to incorporate spirit wilds into the city, and design biomimetic flying mech suits, among other things.
* Asami was a newly assigned patrol officer, who was presented as cheerful, perky, and
* Asami. When the two of them first meet, it's at a formal gala event, and although Korra feels hostile, the situation has none of the Meet-Cute's trademark... well, cuteness. Justified by the writers having not so much dreamed of this pairing at that point in the story.
* As a more humane alternative to physical ordeals, the accused can be exposed to some
* As a (mostly) reformed con-artist, Jack Fortune, the protagonist of
* As a motorsports commentator, Murray Walker made a habit of this. Very frequently, he'd state that something would happen "unless I'm very much mistaken." This would immediately be followed by that something not happening and Walker commenting "I am very much mistaken!" Murray once lampshaded this habit: "I don't make mistakes. I make prophecies which immediately turn out to be wrong."
* A sample of a music box version of "Rock-A-Bye Baby" is used near the end of the song "Bosnia", by
* A samurai gets permission to kill the four bad guys who killed his father, but the last one has repented and become a priest, so the samurai takes his Samurai Topknot as a trophy instead.
* A samurai's wife would also be taught to wield a tessen—in case she couldn't take her trusty
* As an absolutely flabbergasted Sergeant Colon thinks to himself, "He had seen people bluff with a bad hand. He had never seen anyone bluff with
* as an actual story when judging film adaptations, even when there'd be no film if their proposed changes were made.
* As an ad agency boss turned Army PR agent, Major William Cage from
* As an added bonus, if you play the game on Christmas Day, (or you know, just change the clock) you unlock an achievement.
* As an added bonus, in the War multiplayer especially, the player character would often
* As an added bonus linked to the storyline aspect of the Guardian, it actually does cause damage to the Gunark and Buster Ark when used, making these two the only mecha in the game capable of destroying themselves.
* As an added bonus, the winning hand also follows the "whoever shows his cards first, loses" portion of the trope to exacting degree - the first hand revealed is the flush, which is immediately trumped by the full house, which in turn is trumped by Le Chiffre's higher full house, which is then ultimately trumped by Bond's straight flush. Bond is the last player to reveal his cards.

* As an additional note, most of the Bumblebee toys made for the film are based on an earlier character model that has the same front door wings as the Camaro Bee from the precedent movies, while the render used in the final movie has the front doors folded up and pointed downwards.
* As an adopted alien who was raised by some of the nicest Midwestern farmers out there, he is quite fond of this.
* As an advance incentive, patrons who donated $50 or more toward the production of
* As an Alicorn, Prince Sparkling Wing is one, despite being one of the younger members of the Church. Notably, he is skilled with
* As an amusing point of fact, Sephiroth was himself inspired by Psaro of
* As an analogy, dogfighting for pilots is like hand-to-hand combat for infantry: an
* As an anime fangirl/cosplay enthusiast, she does this a lot. For instance, when she and Gai end up in possession of an (even more) will-less Yin, they try to figure out where to hide her while everyone's out looking for her. Kiko suggests
* As an "Antecedent"-ranked Zebra goddess, Queen Mzazi is one. As a goddess of Alchemy, she's one of the most powerful alchemists and potion-makers on Equus (and has mentored younger deities who share her domain or partake in the craft). She can generate lightning potent enough to electrocute Giants and Dragons if she chooses, and has created cataclysmic lightning storms for both offense and protection (one imperialistic fleet was wiped out down to its last soldier for trying to invade Zebrica, and Zebrica itself is surrounded by a storm whenever she goes traveling). This comes from being a goddess of Nature, though Kendell2 has stated that she embodies the stormy aspects of it rather than
* As an art student or artistic person, one has to be careful to avoid invoking this. Obviously watching TV/reading books/absorbing popular culture will mean one might want to draw bloody things or
* As an aside, losing an eye would have very little, if any, effect on long-range rifle accuracy such as sniping (presuming it wasn't their dominant eye) - in fact, USMC recruits (at least as of the early 90s) would be taught to close the eye opposite the one being used to sight with, and even issued an eyepatch to cover that eye until they could break the habit of trying to use both eyes. At ranges over about 100 meters (give or take), human eyes simply aren't far enough apart to contribute greatly to depth perception, and visual references (the car or doorway the opponent is standing near, for example) are much better for use in estimating distance.
* As an aside: US currency is among the most difficult to counterfeit in the world. The exact security methods are both well-known and secret: there's a watermark in every bill
* As Anastasia Luccio, the Commander of the Wardens (i.e. the wizards actually charged with enforcing said death penalty among their other duties), explains to Harry in a later book, another reason in modern times is simple overpopulation: with the rapid increase in the number of humans in the world over the last century or two, more new magical talents are being
* As an attempt to justify having the muscle tone that her powers have created on her body, Asuka starts to use the NERV HQ's gym, and Shinji starts to use it as well to accompany her. Several chapters later (and a couple of months
* As an Augment, Twincast allows the final party to raise all their HP caps, buff physical and magic attack power, and cast a devastating White Magic spell. The same flaws still apply, so your mileage may vary, but it's Rosa's only other magic offense besides Holy.
* As an aversion to the past examples though, none of them is required to be destroyed.
* A's and would have won if the others hadn't interfered just the episode before.
* As an Easter Egg, the spirit-hunting protagonist was born in April- specifically, he was born on
* As an eight-year-old, he had shape-shifted into a snake in order to trick Thor into picking him up (Thor loves snakes), and Loki then stabbed his brother (yes,

this counts as a
* As an elf, Legolas is always far better and cleaner looking than the men. However, when a lot of other elves show up at Helm's Deep in
* as an engine, and then teaming up with them when the next bunch of the enemies arrived. THREE TIMES. Also, the Ramirs (ancient super-advanced civilization, which lives in the galactic core) utilise Roton Beam, which can be switched from "burn the planet" to "blow up the star" mode and has an interstellar range.
* As an example, consider the Cutie Mark Crusaders, consisting of Apple Bloom, Swetie Belle, and Scootaloo. They spend half of the series trying to obtain their Cutie Marks. Despite showing many,
* As an example, in one animated adventure he put out a forest fire by spinning over a lake and creating a waterspout.
* As an example of a human going beyond the pale and becoming a humanoid abomination, we have
* As an example of him trolling fans, he was once asked if Mangle was a boy or a girl. His answer was
* As an example of how effective Revise's power could be, the story showed Carl, the fourth little pig who built his house out of cloth. But Revise removed Carl from the story and everyone now thinks there have always been just three little pigs.
* As an example of how this trope may evolve, the square, angular, boxy aspect of late 70's/early-to-mid 80's looks nearly
* As an example of Shackleton's leadership, the crew had decided to portion out food each day (determining who would get the most to eat that day) by drawing straws. Shackleton
* As an example of this happening in Japan, the console versions of the medieval-themed FPS,
* As an example of when this type of conversation is taken to absurd lengths artist Jacen Burrows relates a story of when he was promoting his collaboration with
* As an example, only very few Fujiko F. Fujio anime were dubbed in Italian (the Doraemon animes (twice for the second anime), Perman, Ninja Hattori, Mami the Psychic, and Kaibutsu-kun), the rest of them were never released nor dubbed there.
* As an example, the following is a composite of a usual artist profile in Visual Kei. The items have been randomized, and there is no artist name so this doesn't stick to a particular artist, but this is how far Product Placement goes into the image of an artist.
* As an experimental musician, Mike Oldfield has never been interested in crafting pop hits, but he's remembered by most people as the guy who recorded "
* As an experiment, a "Most Unwanted Song" was created by combining a whole bunch of themes and instruments that people claimed to hate. Not surprisingly,
* As an extension of that, early in the following season, Star is furious when she discovers that Tom learned about the kiss and choose to talk about his conflicted feelings concerning what happened with his mother rather than her. Tom proceeds to rightfully point that
* As an extra bonus, the visual effect for each escape pod launching homages the iconic
* as angels (widely believed to be divine agents of God), or their equivalents in non-human cultures.
* As an homage to the above-mentioned Dave Chapelle sketches about him, Rick James did this at
* As a nice touch, if the control station is destroyed, the satellite de-orbits. Straight down at whatever it was targeting. With all the ready-to-explode mass and energy of any experimental.
* as an ice world draped in ice and snow. The Fortuna colony is trying to reactivate the terraforming tower to expand Orb Vallis and create more livable land on Venus.
* As an illustration of how deeply the Ultramarines vs Word Bearers hatred runs: in the

* As an inhospitable location, people don't go there because it's convenient, but because they have a purpose (
* As a ninja, Greninja uses this with its Shadow Sneak and Substitute special moves (the latter of which combines it with a
* As an interesting note, the whole comic was originally named "Albedo Anthropomorphics", since the comic originally began as an anthology of many
* As an obvious pun, Pendles the sneaky professional assassin snake man from
* As an odd example of this trope, Gilgamesh seems to believe that he's the only one allowed to defeat
* As a nod to the comics, Roy Harper gets a similar one to the above by the finale of
* As a nod to the first game, in the last race immediately before the last mission, a
* As an old-fashioned world, the magicals of Harry Potter can be given this view, at least the purebloods and other jerks. While pureblood females are generally accepting of this policy in fanon, many a
* As a non-American example: the Ukrainian band Skryabin made several of those. Among the most memorable ones:
* As an operatic composer, Bedřich Smetana was accused of following
* As an organization, the Imperial Guard largely fits this trope. Their doctrine combines a
* As another example, in "Lisa's Rival" Bart's diversion is jumping up and down shouting "Hey everyone look over here at me!" Response: "It's Bart!" "And he's doing stuff!" Skinner even went on to say "Bart! Stop creating a diversion and get out of here!"
* As another example of "Demonization as a response to Demonization", someone wrote a fanfic called "Hogwarts Exposed", in which Hogwarts cheerfully embraced the practice of nudism, meaning everyone going around naked all the time. The fic was written as a response to the fact that most people demonize nudists as a pack of sexual perverts or irresponsible hedonists. However, there were two problems to the author's attempt to fix this demonization: One, the fic demonizes
* As another, more minor, character asked, "Do you examine everyone that way, or just people you feel have wronged you somehow?"
* As an Unsullied, Grey Worm has been raised from a very early age to fight and kill, and do nothing else. Affection and love are alien to him. When he starts having these feelings for Missandei, he has no idea how to articulate them. The closest he can come is to call her his "weakness," in Season 7 Episode 2 before he leaves for battle against the Lannisters, because the thought of losing her is the first thing to ever cause him fear. They consummate the relationship immediately after.
* As an unusual heroic example (or straight example, depending on how you feel about his career), the big man himself,
* As ANX expanded into The Cabinet their foils became Search And Destroy. Both groups
* As any Army field officer knows, either knowing the right people in QM or having an NCO/private/dogsbody who does and being deliberately ignorant of how they go about their business leads to wonderful things being acquired for the unit that are either unavailable/waiting in a depot somewhere/need to be requested in triplicate.
* As anybody who's ever worked in the theatre around stage building will tell you, there is no problem that can't be solved by using wood. Wood has been used to keep cushions plump.
* As any high school student knows well, pressing up on the "No internet connection" page for Chrome (the one with the t-rex on it) gives you a tiny jumping game. Even your web browser is distracting you from your education.
* As anyone who has worked at a tourist attraction can attest, this trope is
* As anyone with a basic understanding of German will know, the German word for 'Father' is 'Vater', pronounced exactly like 'Farter'. (Americans, who mostly have rhotic accents, may be confused by this claim, since it's only true in a non-rhotic ... think Baahhston ... accent.)

* As a one-off gag, the Janitor calls the floors of Sacred Heart his children, and that he's given them all names.
* As a parody of the old Nintendo Power commercial, James Rolfe eats a Nintendo Power magazine, causing his head to explode — followed by the world and then the freakin'
* As a particularly overblown example, one episode has Spoony coming back to
* As apart of an ad campaign for Undershare Inc, there were three ads released of a woman giving a man a wedgie in an attempt to get his underwear.
* As apart of Burger King's "Kingon Defense Academy" campaign, one commercial has the King demonstrate a "Warp-Five Wedgie" on a random customer. He tries the same on a more Star Trek savvy customer, only for it to fail due to him not wearing underwear.
* As a part of the failed bid to revive Star Trek as a TV series in the 70s (Phase II), a handful of episodic scripts and a two-part pilot were prepared. While the series never made it to production, the existing work on the pilot was turned into
* As a party member, Psaro is well-balanced all around. He is powerful on his own as a physical attacker, but he also has access to the most powerful healing and offensive magic, as well.
* As a pastry chef, usually a standard part of training is learning how to make 'display' versions of your normal desserts. Any restaurant you see with a cart of desserts displayed usually has at least a bit of lard on the plate.
* As a penguin that apparently likes hot springs, Pen-Pen qualifies as the single least screwed-up character in the entire series. And even
* As a place in a very cold climate, you can find even more specialized equipment around.
* as a plot point called the Remote colonists became sterile, and so developed technology to avoid extinction: Remembrance Tanks. You insert some biomass ready for cloning (a corpse) and get a few friends of the deceased so the machine can scan their minds for memories of the dead person, allowing the device to weave them together and form the clone's mind. This had the unpleasant side effect of making every iteration more and more stereotypical, to the degree Remote time-travelers are often disgusted and confused by meeting their future selves, often wondering if they are just that damn unpleasant.
* as a plot point. episode in order to distract Starla from his bald spot on his head.
* As a point of interest, in PC World a price ending in .97 means that the item has been discontinued and is being sold at a clearance price, making it ineligible for further reductions such as staff discount.
* As a practical matter, sections within a title or chapter are often "reserved" so that entire chapters don't need to be re-numbered when a new section is added. Normally, the hundreds digits and up within a section number indicate the chapter, while the tens digit of a section indicates a particular topic within a chapter. Thus, §521 might deal with 1st degree murder, §522 with second degree murder, §523 with felony-murder, and then §524-530 are "reserved", with §531 being, say, voluntary manslaughter. If a new degree of murder is added (capital murder, perhaps), it would be §524, rather than having to renumber everything, having to make it §523A (which is
* as a practice run is on key when Zelgadis teaches them the embarrassing lyrics.
* As a prank, the folks at All Too Flat once created a large cardboard cutout version of the guy on the crosswalk sign, then put it in the middle of the street and see what happened.
* As a prank, users on 4Chan convinced the media that the "OK" hand gesture had become a white power symbol. White supremacists started using it ironically to reference the controversy, and over time it's become a sincere symbol for far-right, ultra-nationalist and white supremacist movements.
* as a presidential nominee faces accusations about not being a "true" citizen because of a missing "Earth certificate".
* as a promise to their other "brother" Sabo, who he thought was dead.
* As apropos of a franchise chock full of ridiculously good-looking guys, several

of the MCU men qualify for this descriptor, but the most prominent example is Captain America, who goes through every movie appearance being ogled by high-ranking male SHIELD agents, male Apple employees, male international terrorists,
* As a Psycho himself, Krieg pretty much speaks in nonsense by default. With Raving Retribution however, he'll end up going on some rather lengthy and utterly nonsensical rants. His short film shows that he is seemingly unable to communicate his thoughts into coherent sentences, to the great frustration of his sane side.
* As a pure lead artist, he also had one Top 40 hit: 2016's "Purple Lamborghini" featuring
* As a quick summary, the linked article describes the catastrophic meltdown as not only stemming from shoddy design, but from its workers deciding to see what happened if
* As a rare aversion to this trope, the addition of the Dungeon Finder feature in patch 3.3 was met with near universal praise, despite a few grumbles that it made traveling to dungeons unnecessary.
* A sarcastic reading of a Dear John letter by its recipient comprises the entire lyrics of "
* As are All is Full of Love (lesbian incest robots being deconstructed), Cocoon (a naked woman being wrapped in a thread secreting from her nipples), Where is the Line (blob thingies attacking a pinecone), Triumph of a Heart (about a woman leaving her cat husband to go out partying, then coming back home with a hangover), Wanderlust (going travelling on a buffalo in a river with a rather aggressive backpack) and Army of Me (who knows).
* as a Reaver vessel, complete with lots of red paint and human corpses lashed to the hull.
* As a reference to how she hasn't spoken in the twenty years she's been a background character, Maria from
* As are Jiraiya and Hiruzen Sarutobi, both have extremely powerful Katon (Fire Release) jutsus. One that Jiraiya created, with the help of
* as a reminder. The narrator didn’t find it very creepy as many others had similar things with their original body parts.
* As a research station, you can find all sorts of specialized equipment around.
* As are some of his peers. Spock and Sarek (and Scotty) are regarded in awe by the characters when they show up in
* As a result, a surprising number of players start in Galaxy for some peace and quiet.
* As a result, Lynch was hardly involved with the rest of Season 2 — he didn't write or direct any of the next 14 episodes and returned only to direct the finale. There's a consensus among
* As a result, May did barely any campaigning for the election, refused to take part in the televised leadership debates on the implied grounds that she didn't think the other party leaders to be even worth acknowledging, and gave little more than vague soundbites when she did bother campaigning.
* as a result of being a hybrid of human, hollow, Shinigami, and Quincy theorizes that Ichigo's talent seems to be mostly instinctual, and generally trains him by tossing him into life-threatening situations under the theory that he learns best from experience.
* As a result of colonialism, the English developed fads for the cultures of conquered lands, whether in
* As a result of COVID-19 forcing people to stay at home in the early months of 2020, copies of
* As a result of Frank Miller and Alan Moore's influence this trope has almost become the industry standard, with internal narrative caption boxes becoming the standard over the more traditional thought bubbles.
* As a result of Hanako's... questionable cooking, almost all the guys in the team end up losing color from their faces. Only Kakeru and Prince manage to survive it without any complaints.
* As a result of her insanity caused by the events of the Eclipse, Casca from
* As a result of her precognitive abilities, the Sweetie Bell of the

* As a result of his indoctrination into Reek, Theon has great difficulty making eye contact; also, perhaps as a physical side-effect of all the torture, he's also prone to twitching during times of stress.
* As a result of his paranoia, General Ironwood believes the first step to any problem is to put
* As a result of his stretched-out life expectancy, Yugo in season 3 still looks like the kid he started out at, but an encounter with some time magic briefly ages his body, showing that when he
* As a result of his upper-class upbringing, Benedict refers to the other characters exclusively by their last names. Finn also does so, but to a lesser extent, using first names for people that he's amicable with.
* As a result of Napoleon being embroiled in Spain, Austria decided to go to war again. Marshal Berthier's disastrous performance in Bavaria actually fuelled Austrian hopes they could knock out an entire French corps. Napoleon quickly recovered the situation and sent the Austrians into headlong retreat.
* as a result of such rumors the Veil of Alaris expansion has a water based zone with both a kraken and a megalodon as rare monsters.
* As a result of the 1973 oil crisis making new petroleum much harder to come by, record manufacturers tried to find various workarounds to avoid paying excessive amounts of money on raw materials. Most companies simply recycled scrap vinyl from old batches and made their records thinner and more lightweight, but
* As a result of the above, when she gets her costume, she makes sure it's flame retardant and durable to avoid this later on. But it still gets shredded by
* As a result of the crisis, most of the fashion trends of the decade became
* As a result of the deaths caused by the Infinity Gauntlet affecting the entire multiverse in May 2018, the
* As a result of the general quality (or lack thereof) of video comments on
* As a result of the Good Neighbor Policy to Latin America, Anglo-Americans went gaga for Latin American stuff like sombreros, samba, mambo, conga,
* As a result of their past, the Dark Angels Chapter of Adeptus Astartes and their successors are known for this. They rarely speak to anyone outside of the Chapter, and in one noticeable instance, the entire Consecrators Chapter deployed en masse and relieved an Astra Militarum force by fighting for six straight hours and killing the enemy's leader without sending a single transmission to their allies.
* As a result of the Mob's total inability to switch out Pokemon, some Mons in
* As a result of this attack, the Avengers ended up moving their base to an artificial island named, naturally, Avengers Island. The fact it's mentioned on this page can probably tell you what happened to it.
* As a result, this also happens during the design phase of a set. For example, during one test,
* As are the Lizardmen, although the Slann spend most of their time pondering magical secrets and leave the day-to-day running to the Skinks.
* As a reversal of such reversals, there is the Orgg, a monster first appearing in the Fallen Empires set. It was named to poke fun at a playtester who consistently mispronounced "ogre".
* A "sargon" is sometimes mockingly used as a unit of time equal to 5 minutes. This comes from an infamous incident where someone made a video criticizing of You Tube personality Sargon Of Akkad for using
* As arguably Priam should have given Paris and Helen (who after all endangered their people for their personal pleasure) to the Greeks with his thanks, thus saving a whole lot of trouble, one could say that
* asari are the ones with the interstellar reputation for diplomatic ability and cultural outreach; humanity, by comparison, is still rather supremacist.
* Asari can live for hundreds of years, while, if the partner is human, turian, quarian, or batarian; with medical advancements a member of any of those species can reach 150, and drell can get up into their eighties. With krogan, who have a similar lifespan to asari, this is not even an issue. Salarians, meanwhile, are lucky if they reach 40 — because asari are so long-lived and avert
* Asari can mate with any sentient species in the galaxy and produce viable

offspring. This includes just about every species you see listed. Talk about
* Asari father based on her body), but the "nature vs. nurture" influence is unclear.
* Asari have natural lifespans of about a thousand years, and krogan of about
* asari. If you look closely, they aren't solid black, but have faint star-like lights in them.
* Asari Justicars are fully committed to upholding an ancient and strict Code that allows for no leniency. Asari law enforcement is obligated to stand aside if one shows up but gets very worried as there's a good chance that anyone involved in a crime, no matter how small, will end up dead very soon, which tends to be a diplomatic nightmare when the person in question is anything other than another asari. On Ilium, meanwhile, the local authorities have to arrest a justicar who's on a mission to enforce off-world laws, while the justicar is obligated to fight her way free after one day. In fact, the Justicars are one of the two groups that were used as a basis for the Spectres.
* Asari love Egyptian artifacts. Especially because their own ancestors made hieroglyphs in a similar style.
* Asari play this trope up, responding with diplomatic measures to threats, but when that fails, they subvert it and send in the Asari Commando units. Let's just say, they can skin you alive... with their minds.
* asari religion is revealed to be entirely based upon contact with Protheans by their primitive ancestors, heavily implying that ancient religions may be the direct result of alien contact, misconstrued or misremembered by the populations they affected.
* asari series. An asari and her partner will look into each others' eyes and "embrace eternity" together, which is all but outright stated to have effects of intense pleasure similar to an orgasm for both parties. Shepard and a romanced Liara get quite a few of these (both the sexual kind and loving kind) throughout the course of the trilogy.
* asari species, the asari — and therefore human female — form is considered a standard of beauty, even for extremely non-human species like the krogan.
* asari that a person going one-on-one against an asari commando (unless s/he's Commander Shepard or a krogan battlemaster) is practically committing suicide.
* Asari: The asari commandos, who form the elite of their military. They're all extremely talented in biotics and guerrilla tactics, and
* asari, who are capable of inhabiting any shape of body due to their nature as software, build most of their mobile platforms in a humanoid shape (or rather, quarianoid).
* As a robot, Bomb King sometimes calls the other organic champions "meat bags".
* As a rookie pro wrestler, Nikki Matthews took an interest in SHIMMER and eventually got added to the roster as a last minute addition after a year, where she met Portia Perez and formed The Canadian Ninjas, staples of the
* As a rouge...rogue...damn, rough rule of thumb: The probability that Rouge is erroneously called Rogue (or Rogue Rouge) is directly proportional to the
* As arrogant and abrasive Mike is, he made two accurate points, even if it was done rudely. During the auditions, Meena, who was stammering and unable to sing, was holding up the line for the rest of the contestants, and Mike was the one who had to wait for her to finish. He's also the first contestant to get angry at
* As arrogant as she is tiny, despite having a clear technological advantage. What's more, her psychotic grandstanding ends up causing a spike in negativity from the locals which spurs a mass Grimm attack on the city.
* As artificial gravity generation is a closely held secret, humans have to make do with ships that have rotating hull segments to generate centrifugal force, whereas smaller vessels had to do completely without any gravity other than when accelerating. Humans eventually get a hold on this technology thanks to
* As artificial humans in this world are mass-produced, a favorite is simply to reveal that (an)other identical version(s) of a character exist(s). This is done with

* As a rule, even avowed non-fans of the genre can effortlessly summarize the plot of any modern
* As a rule of thumb, any film depicting the American military killing Mexicans in any context, while not always banned, is normally edited out in dubbed versions, for
* As a rule of thumb, expect this every time someone really powerful shows up.
* As a rule of thumb, for this trope to apply to a work you generally need a
* As a rule of thumb, Japanese dubs of foreign films featuring Japanese actors speaking in Japanese are normally redubbed in Japanese by the same actors back in Japan. There's a few exceptions to this rule:
* As a sailor Captain Haddock's stream of abuse is, if not rude, then certainly inventive. His trademark phrases are "Billions of blue blistering barnacles!" and "Thousands of thundering typhoons!" When particularly angry, "billions of blue blistering barnacles in a thundering typhoon!" is heard. When Hergé originally designed the character, he wanted him to swear, well, like a sailor. However, the
* As a satire of excessive capitalism, an artist made a bench that you must pay to sit on; overstay your purchased welcome and the bench will
* as a sexual partner ever since she met him, even though she was genuinely in love with, and dating, Tadashi long before she met Hiro.
* As a shounen series, ridiculous and improbably hairstyles often pop up in
* As a side note, a different issue with OSS' drivers, namely lack of security, was what gotten the OpenBSD developers to create their own OSS-like set of drivers.
* As a side note, both Square and Enix had this going on before they merged (with some crossover between the two camps, but also some tension).
* As a side note company for them. The field uniform on Feldgrau fabric was the standard design of the Wehrmacht, with different insignia for each arm of service and made by dozens of factories – of which Hugo Boss had been the first, as an old-time political and financial supporter of the Nazi party, but not the only one.
* As a side note, in spanish (Especially in Latin American countries) it is used the original latin word for Odd:
* As a side note: the game takes that whole "Malroth is barely mentioned" thing from
* As a side note, the Moon stays with Earth without any engines, since it's still gravitationally tied to it.
* As a side note, the soldier Patton slapped later said, "He was probably pretty well worn out himself." Combat can do strange things to people. Patton's popularity and
* As a side note, Time Lord society has always incorporated a lot of vaguely ecclesiastical imagery — e.g., the robes and skullcaps, the rank of "cardinal," and the TARDIS alarm being called the Cloister Bell.
* As a sign he is ready to be more serious with Carol Hathaway, Dr. Ross actually asks for a drawer on
* As a snowboarding instructor, a favorite method of helping someone figure out their stance is the "which foot do you step forward with when pushed" method. Of course, the method has to be explained so the instructor doesn't come across as a
* As a somewhat less benign example, several historical conquerors have been known to deal with their enemies — mostly besieged cities — by diverting the flow of rivers, and the like.
* As a specifically non-human example, many species of sharks that give live birth have this as regular behavior in the womb. The litter of shark pups starts out more numerous, but the pups predate and eat one another until only the survivors end up being born. Usually if a shark has two surviving pups, it's because the shark has two uteri they can be born separately in.
* As a specific example, take the presence of American soldiers in Europe as part of
* as a sperm. Once he was born via sperm donation received by a lesbian couple, though, he seemed to focus more on a rivalry with Stewie.
* a sassier alter ego. It turns out Agnes isn't alone, as the Reverend Mightily

Oates has a Good Oates and a Bad Oates, who disagree on theology and life philosophy.
* As a staple of Gamebooks, any item found by the protagonist (even seemingly useless trinkets) can prove surprisingly useful later in the book — or sometimes, one or two books further in the series. However, there are also plenty of random items that serve no purpose but to take up space in the backpack, and thus you must choose wisely what you keep. Also, it is quite possible to miss the specific path were any item happens to be used.
* As a sterling example, the last set of dailies is Roger and Andy talking about how, after 19 years, a "major cartoonist" is moving his strip to be
* as a stowaway to the crew. And literally in the middle of becoming aware of the mage powers that would make him a more active member later on.
* as a straight action-adventure, with a few too many of the audio and visual gimmicks in every contemporary trailer for such films whether needed or not.
* As a Stromling, Zachary Virchaus aged about a year in a matter of days, serving as a
* As a subversion of sorts (as in this case it rarely deals with actual romance), in
* As a subversion, the Red Army (Sgt. Reznov in particular) have become wise to this kind of behavior from the Nazis, and just kill them anyways.
* As Asuna fight some demons, they're pleased to discover that she's
* As a teenager in rural Vermont, Karen hooks up with a drug dealer as an escape from the stress of managing her family's struggling diner. Things escalate until she's essentially said dealer's accomplice. It takes her brother getting killed in a car accident to get Karen to realize how royally screwed up her dependency on drugs has made her.
* As a teenager, photos of fetish model Veronica Vance helped Dora realize she was bisexual. Years later,
* As a teen, Anne became attached to a cult led by a "loser preacher" who dubbed her "Sister Sunshine". Afterward, she reinvented herself as "Chantarelle" and became a regular at the Sunset Club. Next, she drifted to Los Angeles and took on the name "Lily Houston". It was during this time that she ran into Buffy, who was herself a runaway and going by an alias: "Anne". Buffy's heroism so inspired her that she decided to adopt Buffy's middle name as her own.
* As a testament to how badass he is, he held the record for fastest time on the Top Gear Test Track in the Suzuki Liana for over five years, racing against a half dozen past and present
* as a thriller, that implies Buddy is a schizophrenic who lives in some childlike fantasy
* As a time-saving device. Real forensic work or database searches might take days or weeks, and involve dozens or hundreds of hours of mind-numbing desk work that makes for poor viewing. Judicious use of this trope can reduce that boring search to a perky geek girl pushing a button and giving you instant DNA results so your characters can get back to busting bad guys.
* a satirical animated short (from 6:40 to 7:42) that they've just let an enemy Harvester escape under their noses.
* As at least one critic pointed out, "Save the cheerleader, save New York" would have been a more accurate tagline for season one.
* As a town, necromancers were introduced by Heroes II. They were aligned with Archibald, the... not so good... candidate for the throne of Enroth.
* As a trained assassin and spy, Laura herself isn't exactly squeamish about using the
* as at the name selection menu (you could only select from a limited amount of preexisting names), enabling you to name your cadet "James T. Kirk". All other name combinations resulted in the standard Kobayashi Maru scenario, with either the loss of the freighter, or the loss of your ship.
* A Saturday Night Live skit spoofing 'Judge Judy" (with Cheri O'teri as Judge Judy Sheindlin), starts with this exchange:
* A Saucerful of Secrets (which came out eleven years after the former album).

* A saucier variation on this is him riding a giant chicken and saying that he wished for a "huge cock."
* As Austin is interrogating Dr. Evil, the doctor notes everything Austin does is
* As a variant, it's not that uncommon for newlyweds to shove wedding cake in each other's faces and the like. As they generally agree to it beforehand, it's not considered assault or the like.
* As a variant: no matter how much a person enjoys a given thing (be it a song, movie, book etc) they will eventually get bored with it. This is
* As a villainous foil to the Princess, if the black dragon Jeratheon lives to see Bellinda kill his father Chargammon, he will most likely join the party to kill her in return.
* As a visual gag, when someone is warned about the shit hitting the fan. Cut to a view of the fan.
* As a voice actor, the only works Rick Hunter is credited for are the
* A savvier version from the same show when Arlene blackmailed her son-in-law Alec into an affair and taped their trysts as an insurance policy, warning him that if he killed her, the police would find the tape and know his motive. Sure enough, he tried, assuming she was bluffing. . .and it was found.
* As a warrior, Adam Taurus is a force to be reckoned with. As a leader, he's probably the worst thing that's ever happened to the White Fang; he's
* As a way of distinguishing the "real" concept from the fake version, such as "
* As a way of illustrating that much of the Delta Quadrant is less-advanced technologically than the Alpha one, many of the cultures Voyager runs into are dealing with disease and lack of medicine. The Vidiians were a race dying out from an extremely hideous plague called The Phage, and the planet the Doctor's trapped on in "Critical Care" is struggling with curing illnesses with limited resources.
* As a way of implying great age be spelled in a number of different ways, though in modern fantasy it is often gratuitous and may not even reflect the way a word was really spelled in any ancient languages.
* As a way of intimidating the Allied Powers, who he knew would be watching,
* As a whole, the MCU films didn't have foul language that are stronger than "Damn", "Hell", "Crap", and occasionally "Son of a Bitch". Since after the
* As a whole, the NYPD (or perhaps just the Nine-Nine) has a bitter rivalry with.... just about every other civil service agency in the city, from the MTA to the NYFD to the sanitation department.
* As a whole, there exists a literary version of this phenomenon— an "illustration age ghetto"— in which books with illustrations are seen as being exclusively for children regardless of their actual subject. A number of authors have struggled with this.
* As a whole, wrestlers on the indies are warned against making their matches longer than fifteen minutes and keeping false finishes to a minimum precisely for this reason. Fans tend to be more forgiving of this trope at something like WrestleMania whereas a small indie event will just bore the crowd.
* As awkward as it is to call them "hammy", there's no denying that the
* As a wonderful subversion, Chandler insists that Monica wear some earrings that he bought for her. She loses one, so frantically substitutes another pair instead. The final punchline is that she gets away with it. Chandler has forgotten what they look like; he had Ross buy them.
* As a work-saving device. Sometimes, writers just don't have time to come up with plausible ways to solve the convoluted plot they came up with this week. Maybe they're more interested in the detectives as characters than the police work itself, or maybe they just flat out
* As a wrestler, Leva Bates wears goggles to protect herself from eye pokes (she's made use of other "armor" such as headphones to block out
* a saying amount of money, the bank owns you; beyond that, you own the bank."
* As a young child, American serial killer and necrophiliac/cannibal Jeffrey Dahmer was unusually interested in his father's taxidermy of small animals and enjoyed collecting dead animal parts. Much like animal torture, this proved to be an early warning sign that he would later become interested in preserving human

bodies in a similar manner.
* As a young man, John Paul warns his fellow laborers that the Communists will not bring freedom for the Polish people.
* As a young man, Sparhawk acted as Ehlana's personal tutor and champion until his exile. Ehlana treasured how safe she felt whenever he was around and decided she was going to marry him well before she reached puberty and made good on the decision when he returned. Sparhawk tried to resist as he felt it was inappropriate but she ultimately won him over.
* As bad as Diamond Tiara can be, her mother, Spoiled Rich, is much, much worse, treating everypony she considers to be beneath her (and there are very few who she does not consider to be beneath her) like dirt, and
* As bad as hooliganism gets in Europe, it's far worse in South America, which takes its football
* As bad as it might seem, it used to be even worse in the early days of radio and TV. Shows that were named after their sponsors were very common in those days. The practice began in the 1920s as a way to circumvent rules against direct advertising on radio, but it stuck around even after those rules were lifted in the early 1930s. This trend started to end in the 1960s and the concept of corporate naming declined only to revive in the 1990s.
* As bad as the Autobots can be, they still aren't the Decepticons. When an
* As bad as Timmy's parents are, Remy Buxaplenty's are even worse (and the reason why he has a Godfather in the first place). They spend a minute a day with their son
* As bad as Zo'or was, he was downright restrained when compared to Howlyn, the main antagonist from Season 5. Right out of the gate he wants to conquer Earth, is violent, short-sighted and genocidal.
* As badly misattributed as "Uptown Funk" tends to be, it's nothing compared to "The Hanging Tree" from
* as Bastian is told by the Water of Life that AURYN will not permit him to leave Fantastica until he's finished all the stories that he started. Atreyu and Falcor agree to do this in his stead.
* As befits is quite hard sci-fi nature, the Thunderbolt was based on real-world theoretical physics, see below.
* As befitting a nation that aims to (eventually) conquer all known space and is constantly on the verge of war with the Narn, the Centauri army is as well equipped as EarthForce but with more advanced technology. They tend to
* As befitting an intergalactic arms dealer, Animated Swindle understands the need for moar dakka. In addition to his arm-mounted gun, he's got two over-the-shoulder guns, a gatling gun in his chest, and his hands both change into two twin-barreled guns.
* As befitting much of Robert Kirkman's work in the Invincible comic series, it turns out that Robot's 'behind the curtain' takeover has actually yielded many positive results for the world. Including, but not limited to: eliminating various wars and conflicts around the globe, creating positive government re-organizations and progressions, practically ending crime on street and super-criminal levels, ending drug trade and wars, liberating North Korea from it's previous dictatorship and bringing necessary resources to its people, and expanding space programs. Even Mark admits, based on the results, that it's hard to argue that Robot has made a positive effect on the planet since his seizing control.
* As befitting the premise, a majority of the female cast (aside from Chiaki) in
* As beloved as the video for "Thriller" is, almost everything that would come to be mocked in his later "short films" starting with "Bad" begins with it: extended
* Asbestos-Free Cereal contain, which may be more important information.
* Asbestos-Free Cereal: Treat some inconsequential trait about the product as something cool or unique.
* "Asbestos I Can Do" has no deaths or injuries in the video itself but does have a montage of deaths from previous and later episodes.
* as big and dramatic as they look on TV. For every classic "elephant on the chest," there are scores of "it's just heartburn/pulled back/something I ate."

* as big or small as they want. The only real exception is for artists who want to sell physical collections, who remain bound by the harsh realities of the print industry.
* Asbjørnsen and Moe, and then in an attempt to keep him from marrying the princess; in the end, he gives in.
* Asbjørnsen and Moe", the foals are the king's transformed sons.
* Asbjørnsen and Moe", the giant, besides the heart, turns people to stone and back.
* Asbjørnsen and Moe, the giant turns the princes and their brides to stone.
* Asbjørnsen and Moe", the king insists on keeping one son by him at all times. Which is awkward when the other six vanish.
* Asbjørnsen and Moe, the trolls all own swords, and magical potions to drink when they use them, because they are too heavy even for trolls without them. Fortunately, they leave them where the princesses can have Halvor drink the potion and use the sword.
* As Black Mage puts it: when Sarda casts a spell that hurts you, and you learn that spell, you learn to cast a spell that hurts
* As borne out in the introduction, until the advent of 24-hour cable news networks, and the World Wide Web and presence of online newspapers, whenever a major news event happened — such as the president dying, a declaration of war/ceasefire, the Space Shuttle Challenger exploding or the 9/11 attacks — many newspapers would publish special editions. Near the top of the page, below the flag, would be a huge "EXTRA" along with a large-font headline and photograph.
* As both Negi and Asuna have discovered, it could be worse: she could like you.
* As both she and her father are highly ranked engineers, Laeshana from
* As Brainstorm (a "seafood platter with a rather high IQ", as he puts it), Ben 10 is prone to using extremely large words.
* As Brian's leaving Hector's garage, he's ambushed by Dominic and Vince and tries to explain that he's only checking out the competition because he can't afford to lose again. He's able to convince Dominic he's not a cop and they decide to check out more competition: Johnny Tran. While the three of them are looking around Johnny's garage, Brian finds a load of DVD players like the ones stolen from the truck. He reports this to his superiors and they perform a raid on Johnny and his crew. However, it turns out that the DVD players were purchased legally and they were forced to release him.
* As Brienne tells Arya, Lord Selwyn Tarth became so tired of his daughter Brienne's belligerent attitude to all her potential suitors and her always getting into fights and losing because of her lack of discipline, that he shrugged and decided to get her the formal training as a knight which she needed to do it properly, in spite of Westerosi society being extremely disapproving of female fighters, reasoning if she is going to get in fights and beat people up, she might as well do it right.
* As Buttercup has a meltdown, Blossom rises to tell her to shut up, unaware that she now has Miss Bellum's body. She finds this out when Buttercup produces a hand mirror for her to look into.
* Ascalon bad crimes (like assassinating the emperor), the accused may select a champion to fight in their stead, with evidence determining just how effective a champion one may select.
* A scam - particularly frequent with companies offering free trials of their latest, most awesome anti-virus - or...

* As can be expected, this can be found amongst the many, many traps of
* A Scandal in Belgravia", Irene Adler replaces Sherlock's ringtone with the sound of her orgasmic groaning.
* A Scandal In Bohemia warns us of the dangers of this fallacy in regards to investigation:
* A Scandal in the British Empire, he expects Sherlock to confront of The Lord of

Crime and sets up an arrangement to give Sherlock proof of his identity, which Sherlock burns.
* A Scandinavian cookie brand boasts that their cookies, which are light brown like most cookies, are "free of artificial coloring." A scientist interviewed in the newspaper noted that this is nothing special, since for the most part, cookies aren't blue.
* A Scandinavian fairy tale about a man who bets someone that his wife loves him no matter what, and to prove it he has the other man listen by the door while he relates to his wife how he didn't take the cow to the market this morning, but traded it for a horse, which he then traded for a goat, and so on until he finally tells her that he traded a rooster for a meal since he was hungry, so essentially he gave the cow away with nothing to show for it.
* A Scanner Darkly had Substance-D, sometimes abbreviated as "D" or "Slow Death." It was a powerful hallucinogen with some schizophrenic side-effects.
* A Scanner Darkly insofar as the characters are living in a rundown part of town that likely hasn't been renovated in decades.
* A Scanner Darkly, Rory Cochrane. What a cast to play a bunch of stoners!
* A Scanner Darkly. The protagonist has increasing trouble in making the distinction between reality and fantasy, due to his addiction to a drug that causes a split between the two hemispheres of his brain.
* A Scare at Bedtime, most of the stories Podge tells his brother are adaptations (usually set in Ireland, of course) of famous and well-known legends, usually frightening.
* A scare chord accompanies some of would-be Presidential assassin Mitch Leary's appearances in
* A scare chord begins to play whenever you trick-or-treat at a house in
* A scarecrow is one of the forms inhabited by the eponymous villain in
* a scar on his cheek is automatically assumed to be a Nazi and the bomber when an actual bomb is discovered. This all turns out to be wrong. Also, he lost his eye while rescuing a Jewish girl from a gang of skinheads, and is the only one on board who knows how to disarm the bomb.
* A Scar to Remember: A villain leaves a wound on the hero's body to make them remember their encounter.
* a scary-arse psycho mo-fo, as well as the head of the family, with a sort of supernatural power over all the others suffering the Zodiac curse.
* A scary Georgian era mechanical puppet found in Portsmouth Dock's museum.
* A scary musicbox tune has been playing in the background in the VERY creepy WWE promo videos for the former TNA wrestling Awesome Kong, to be known in WWE as "Kharma."
* As casualties mounted, the Centauri shifted into Soldiers, pragmatically taking advantage of their superior numbers and production and logistically less intensive directed-energy weapons, while the Orieni became Warriors relative to that, refusing to water down the training of their forces (that slowly became too small to counter the Centauri's numbers) or to move away from logistically intensive
* A scenario known as an SK-class dominance shift describes a scenario where the current dominant species is overthrown. The above article on SCP-1000 describes such an event taking place, while SCPs with the potential to instigate a dominance shift include
* A scenario promoting M&M's Ice Cream Treats shows Red and Yellow trapped in a frozen wasteland that is revealed to be the inside of a grocery store freezer. Yellow then notices his 'M' is much smaller than usual.
* Ascendance of a Bookworm: A knight commits insurbordinantion by refusing to protect a person of lower status of himself. When that gets the knight executed, his family only escapes the same fate thanks to an arrangement with the archduke. The knight's mother nonetheless seeks revenge towards the person he refused to protect with absolutely no regard for the consequences for the rest of the family.
* Ascendance of a Bookworm and doesn't have any books at home, so all he needs to do is forbid her from accessing the temple's book room.
* Ascendance of a Bookworm attendant is overtired, asks him to rest and offers him

two options on where to do so. She more or less threatens to have him sleep on the piece of furniture on which she's currently sitting while using her lap as a pillow if he refuses the initial options.
* Ascendance of a Bookworm because the money she pays them can go to their own care.
* Ascendance of a Bookworm between archducal couples. Among the two, Frenbeltag came out worse from the war and had the oldest sibling from both families, making it quite hard for Ehrenfest's archducal couple to refuse their requests for help.
* Ascendance of a Bookworm, "Climbing up the towering stairway". When the less-educated ally responds by trying to contact the deceased with an actual letter, the protagonist correctly guesses the euphemism wasn't properly understood and mistaken for the news that the deceased got a promotion.
* Ascendance of a Bookworm commoner children are often enslaved to be used as mana sources.
* Ascendance of a Bookworm: Damuel, who's from one of the poorest families within the nobility, ends up demoted and in debt after failing to guard someone properly. One of the consequences of this is that his fiancée cancels their engagement. Since he has spent all his savings on her by that point and she was the one to cancel, Damuel hopes to get some of that money back. His brother advises him against it for reasons that can be summed up as "you're the one who messed up, don't expect a single small copper back".
* Ascendance of a Bookworm death, but thinks the job is good enough that the female half would happily move in with him. The female half wants to go back to her home province after getting married and is technically the better off one, so what she wants to do takes precedence as far as society as a whole is concerned.
* Ascendance of a Bookworm fall into this trope's trappings. His wife's solution is to give him a few incentives to be a better example.
* Ascendance of a Bookworm for weeks on end says a lot about how invested he is in the aspects of his job that don't involve political maneuvering.
* Ascendance of a Bookworm. However, she was born with a weak body, the world is medieval, and her family poor, so she starts trying to make her own books with the help of her friend. Started publishing as a web novel in 2013 on Shousetsuka ni Narou and was later released as a light novel series by TO Books.
* Ascendance of a Bookworm: In the temple, access to food is trickled down from the high-ranking blue-robed priests to their grey-robed attendants, making denial of food a frequent disciplinary measure towards attendants who don't do their work properly. Upon becoming the equivalent of a blue-robe herself, Myne accidentally does this to one of her attendants by skipping lunch to have more time to read the temple's books, then heading home. This wasn't a problem for her two other attendants because they are both watching Myne for temple higher-ups, and said higher-ups are feeding them properly.
* Ascendance of a Bookworm: Invoked. After Myne uses her shampoo on the hair of an older friend's wife, the friend very obviously wants to have a "private moment" with his wife and asks Myne if there is any reason she needs to leave immediately.
* Ascendance of a Bookworm is compliant aside from being human-only, but magic being restricted to the nobility and (to an extent) the Church creates a somewhat darker world than normal.
* Ascendance of a Bookworm is frequent among nobles and it's not rare for men to take mistresses on top of this, so things can get ugly when women end up with some power over the fate of children who are their husband's, but not their own:
* Ascendance of a Bookworm is set with the high priest of the local temple looking through the main character's memories with magic to see how she got here. It's not really necessary, but gives a hint to viewers about where the season will end and also gets to show off a popular supporting character ahead of schedule.
* Ascendance of a Bookworm, Lutz basically accuses Maine of being a demon possessing his friend and is not, strictly speaking, actually wrong. To his surprise, she agrees to get out of the body, but suggests they go home first. After all, the original Maine was already dead when she got here, so "getting out" would leave Lutz with a corpse to explain, not the little girl who once was. He calms

down when he realizes the Maine he knows is the same one he's always known and that she didn't even want to be here.
* Ascendance of a Bookworm Lutz realizes that given Maine's background she shouldn't know how to create paper, hair ornaments or shampoo and calls her out on it. She doesn't deny it, but he eventually decides it doesn't really matter who she is since the original Myne isn't coming back and he never knew that girl anyway.
* Ascendance of a Bookworm Maine ignores everything people say about magic or all evidence that some plants have magic powers because she simply assumes that magic can't possibly exist. It takes her a long time to realize that not only is magic real, but she has pretty high ability for it herself.
* Ascendance of a Bookworm, Myne acquires a bunch of these, thanks to accumulating secrets that only a select number of people know about:
* Ascendance of a Bookworm: Myne describes her previous life mother's attempts to save water and electricity to be this. She would turn water off while brushing her teeth but not while doing dishes and unplug the television while it was not in use only to regularly fall asleep while it was on.
* Ascendance of a Bookworm: Myne's who's from the poorer part of town, remarks that a much richer acquaintance's cook looks a lot like her best friend's mother, and the character designs from the illustrations follow suit. There is no indication those two characters know each other.
* Ascendance of a Bookworm: Myne, the protagonist, is a modern-day bookworm who reincarnated as a poor girl in a world that is in its pre-printing press era and has a large price tag even on materials used to make books. As a result, books are luxury items that only the wealthiest can afford. Some time after having introduced cheaper to produce plant-based paper to her new world, Myne finds out someone she knows is to going to have a baby and decides to make a picture book for the child. Cue a montage of Myne's best friend who helped make her first batch of paper, the merchant selling said paper and Myne's mentor in a job she took for easy access to the town's only library all having the same bemused reaction to the notion of a picture book. Myne's reaction to her mentor's is the feeling she's hearing an echo.
* Ascendance of a Bookworm, Myne wakes up in the middle of the night and notices her father drinking alone in the kitchen.
* Ascendance of a Bookworm. Since the scope of that person's mind in limited to their own world, the first thing that comes to their mind is that Myne may be some sort of spy from another location.
* Ascendance of a Bookworm situation. The "what if they get married?" scenario makes the interest of the factions overlap rather than compete, which causes Lamprecht to like the idea of a marriage for reasons other than the two children having complementary personality traits.
* Ascendance of a Bookworm (technically nobility), there are a few scenes in which she suspects that her adoptive father is planning to have her marry her adoptive brother.
* Ascendance of a Bookworm: The first wives of noblemen who have at least two of them are not only expected to produce the first heirs in the sucession line. They are also the only ones allowed to take an official part in political decisions to avoid having too many cooks spoiling the soup. For instance, if a viscount has several wives, only the first one holds the title of Viscountess. If a first wife dies, the second wife, if she exists, usually takes her place.
* Ascendance of a Bookworm: The Guildmaster's cook Leise was hired from a noble household who wouldn't give her a position on par with her talents because of her lack of connections. She's shown to be able to make a good approximation of a recipe Myne remembers from Earth based only on verbal instructions, on first try.
* Ascendance of a Bookworm the main character Maine was pretty contemptuous of her family because they lived a (dirty) medieval lifestyle fitting for commoners. She was also quite the leech, tending to get in the way of their work and showing no gratitude for how much they did for her. However, she gradually comes to understand her position and tries to be better. In the anime, they downplay her entitled behavior and almost completely eliminate her distaste for the poor hygiene, which makes her look less stuck up.

* Ascendance of a Bookworm. The noble-born blue priests are actually children born with so little mana in regards to their family's standing that their parents aren't bothering to raise them as potential heirs.
* Ascendance of a Bookworm: The only secret Myne can be guaranteed to keep is the exact source of her knowledge. Just about everything else can fall victim to the fact that she has no brain-to-mouth filter when enthusiastic or deep in thought. Unfortunately, carelessly sharing information becomes more and more dangerous as she climbs up the social ladder, resulting in Myne's mentors constantly having to remind her to watch what she's saying and in whose presence she's saying it.
* Ascendance of a Bookworm: The protagonist eventually ends up with a noble identity named Rozemyne, who is officially a different individual from Myne, the commoner identity to which she was born; the fact that the two are one and the same hence needs to be kept from as many people as possible. Benno, a merchant with whom she has many business dealings, is in the loop out of necessity. The morning after Rozemyne is brought into existence, Benno is asked to get an outfit altered so its fits Rozemyne. Upon handing the outfit over to his seasmtress sister Corinna, who has made an outfit for Myne in the past, Benno tells her that the order is for a noble girl named Rozemyne, but also tells her to reuse Myne's measurements.
* Ascendance of a Bookworm: The story is usually told from Myne's point of view, but prologues, epilogues and side stories are told from that of other characters. This often results in the reader being made aware of something a significant amount of time before Myne is.
* Ascendance of a Bookworm they more or less share and consider each other the weirdest person they know.
* Ascendance of a Bookworm to go into places where men aren't allowed, such as gender-segregated social events.
* Ascendance of a Bookworm to support herself and donate to the Church.
* Ascendance of a Bookworm upon her first appearance in the story proper.
* Ascendance of a Bookworm, Urano Motosu lived for books. Then died for them too after an earthquake shook up the messy books around her and crushed her to death. Her last thought was that she hoped she could read more books in her next life.
* Ascendance of a Bookworm. While Maine's food is considered extremely good, this is only a relative thing. She's in the middle ages, meaning there's no culture of professional restaurants or particularly advanced recipes. As such, simple things like pancakes come across as amazing food even though they're quite simple.
* Ascendance of a Bookworm: While reading these, note that Myne is a seven year old girl as far as most people are concerned and that both Ferdinand and Benno are single adult men:
* Ascendance of a Bookworm world. Early on, a major stumbling block on her journey to invent a printing press is the fact that she defaults to Japanese mannerisms most of the time, mainly prostrating herself and lowering her head when she's requesting something; in her new surroundings, this comes off as lacking backbone or even being untrustworthy (since she doesn't make eye contact) rather than a humble show of respect. Fortunately, she's able to befriend some upper-class merchants who teach her the proper etiquette for making deals.
* Ascendance of a Bookworm: Young noblewomen who want to practice sewing tends to make clothing meant for their relatives' very young children... or their own pets.
* Ascendancy allows very lopsided development as long as prerequisites are met. Practically, to climb up with sensible speed you need to generate lots of research points, so you need Prosperity to have more people working in labs and factories (at least until Automation is invented — after that, population growth is only necessary for colonization), you need production to build facilities that actually give you research, population, prosperity and more production.
* Ascendancy feature ruin tiles that can be excavated, resulting in a random tech from the research tree. This can be anything from a tech you would've discovered the next turn from normal research to endgame tech that could give you a massive advantage. It normally takes 50 turns (25 if colony base is built on a red square) to build a dig site on a newly-colonized world.
* Ascendancy had terraforming as something that could be done only after

discovering a fairly high-level technology. In this game, all territory considered of "squares", which could be different colors, each color corresponding to its suitability to different tasks (green for prosperity, red for industrial, for example). Black squares were uninhabitable (except to one species) unless terraformed. Further, the Lush Growth Bomb project increased the maximum population of a planet.
* Ascendancy has cloaking generators. The ones built in orbit or on the planet's surface prevent the enemy from seeing any orbital or surface structure, respectively... but not firing on them. They can still be useful but to a limited extent. They can also be present on ships, but all that does is defeat any enemy scans to see what devices you have on-board.
* Ascendancy is a gravity drive which works by projecting gravitons in front of the ship, which then pull the ship forward. Presumably, the gravitons are removed after the ship passes, otherwise, they would then pull it backwards. It should be noted that this is by far not the fastest engine in the game and has no advantages other than be slightly faster than the one preceding it.
* Ascendancy, the player can name their colonies whatever they want, but the defaults are (Starname) (Roman numeral) (such as Hope II, Nougat IV, etc.)
* Ascendancy. They are so cute they can force all other species to make peace with them at once.
* Ascendancy. They vary wildly in descriptions and principle, but function basically the same in-game, varying only in strength and the amount of power used up. Shields typically only drain the ship's batteries when struck by enemy fire, except for one low-level passive shield that doesn't drain power at all. Visually, if a ship is struck by a weapon that is completely absorbed by the shield, the effect is only a shield fizzle. If the weapon even partially penetrates the shield, the weapon's explosive effect is shown.
* Ascendancy with chameleon (i.e. turreted) eyes. Then there's a race whose people are made up mostly of a giant eyeball (unsurprisingly, they're called Oculons).
* Ascendancy without adequate advancements in production capability and/or power sources.
* Ascendants are beings that have in some way transcended the natural boundaries of their race and make for excellent god material. Many of the younger Gods used to be Ascendants.
* ascended after gathering all four pieces of a Talisman and he only stayed as long as you had mana to burn on him or until you dismissed him.
* ascended being over it, and gets some flak over it. Chaya however isn't bothered by it at all. When Sheppard apologizes for McKay's behaviour, she points out that McKay is simply acting according to his beliefs, making him no different from her people who act according to theirs.
* Ascended believe in non interference (or have tremendous faith in the SGC).
* ascended between hosts whose bodies reacted to him as if he were a disease and eventually suffered immune system failure.
* Ascended Demon: A demon becomes a heroic being vs. an angel becomes evil
* Ascended Demon: A demon becoming a heroic angel or other divine entity
* Ascended Demon: Demonic beings redeem themselves to become divine guardians.
* Ascended Demon Sparda who rebelled against the forces of the demon world to protect humanity. In the modern day, his legacy is carried on by son Dante and grandson Nero.
* Ascended Extra: A background or minor character becomes a major character.
* Ascended Extra and rewrote the script to completely erase her. In her place for solving the problem of the day was Colm Meaney's character, who was just referred to as "Transporter Chief" at the time, and was given the surname "O'Brien". Thus began the long history of one of Starfleet's most normal (and ambiguously ranked) members.
* Ascended Extra. As of "Mario the Babysitter!", most episodes involving him are about Jeffy.
* Ascended Extra, gaining toys and important roles in the fiction along the way.
* Ascended Extra in the campaign wrap up, specifically because so many of the Dark

Eldar players had wanted to betray her.
* Ascended Extra, though for nations that lack strict term limits the possibility always exists. (Australia is probably one of the few countries where examples of this exist, with three Prime Ministers having done this during their lives in parliament.)
* Ascended Extra: When the adaptation gives a minor character from the original work a more prominent role.
* Ascended Fanboy: A fan of heroes ends up becoming a hero themselves.
* Ascended Fanboy all have their roots in backyard wrestling. The "ascended" part comes from them "going legit" and being professionally trained afterwards.
* Ascended Fanboy. In fact, Cryptic Studios approached CBS for permission to use this and they suggested they talk to Drexler himself.
* Ascended Fanboy of the Second Crusade. Why? They were raised on stories of the First Crusade.
* Ascended Fanboy status. They spend a lot of the movie leisurely sitting back and sending out remote-controlled trucks rigged with bombs and detonating them once the tunneling monsters swallow the trucks.
* Ascended Fanboy (working for BBC America and ComicCon) and a cultural institution onto himself.
* Ascended Fan Fic: A published work that started out as a fan written story.
* Ascended Fan Fic: A work that started out as a fanfiction of another story becomes an original work.
* Ascended Fan Fic (started as fan fiction, morphed into original fiction)
* Ascended Fanfic", where a starship captain figuring he'd just drop an asteroid on the planet (admittedly a time-honored tactic, among orks) is sent to remedial accounting because it ended up costing almost three times as much as a standard orbital bombardment.
* Ascended Fangirl named Misfit, and back when she started being Batgirl could have been considered one herself.
* Ascended Fangirl Renge Houshakuji, who originally had a crush on Kyouya because he reminded her of her favorite guy from a dating sim. She eventually has to learn the hard way that Kyouya isn't anything like the dating sim character she's obsessed with.
* Ascended Fanon, as the fandom had taken to calling the character "Tim" (in likely reference to Monty Python).
* Ascended Fanon Doctor, not the other way around, and that in one language it translates not to "healer" or "scholar" but to "mighty warrior".
* Ascended Fanon having the Augurey go back in time to prevent Voldemort's first defeat and Harry and co having to stop her.
* Ascended Fanon, purposely drops the Doctor off in places and times where he is needed. This was heavily implied to be true throughout the revived series, and is eventually explicitly made canon in "The Doctor's Wife".
* Ascended Fanon that they're brothers, as Ask That Guy recently referred to Rob as his brother.
* Ascended Fanon: The fans' interpretation of something becomes canon.
* Ascended Fanon: The fans' interpretations of things end up becoming officially canon.
* Ascended Fanon using the Geofront translation as the basis for the multi-platform English release of the two games.
* Ascended Fridge Horror at the end of the story and runs Interpol exactly how Jack would have run it, which in reality isn't a good thing at all.
* Ascended Fridge Horror of their own works and incorporate it into the story.
* Ascended Glitch: Like Thrown It In, but specific to software (usually video-game) development.
* Ascended Glitch. Note that for all intents and purposes, a bug is an unintentional error in the implementation of the software.
* ascended god form. As such, he did ascend to a form of godhood as the God of Worms, but it is in a rather minor station. It also seems to have created another version of him which did not ascend, remaining on Tamriel as a Lich who leads a

cult that worships the God of Worms, who seems to be treated as a different entity.
* Ascended Meme: A meme ends up being made officially canon by the work it is derived from.
* Ascended Meme: A meme is made officially canon by the work it is derived from.
* Ascended Meme" (Karbonn is a cellphone maker, Kamaal is a word meaning "perfection")
* Ascended Meme. Leto quote retweeting the trailer on Twitter with the meme verbatim pretty much confirms that he knew exactly what he was doing.
* Ascended Meme: The work officially makes it so a meme based on it is now canon.
* Ascended Meme were now (primarily on web-based content), this became common.
* Ascended Meme where the Secret Service and similar government agents are concerned, though it's possible and in fact fairly likely that the guys in the sharp suits are mostly there as decoys and an equal or greater number are wearing band T-shirts, worn cargo pants and sneakers.
* Ascended Meme, which has Nanoha traveling in exactly this way through a computer-generated maze of buildings.
* Ascended Meme who is shown to be a loving boyfriend. It's well known that Dick has one of most sizeable fanbases of fangirls and gay/bi men.
* ascended mortals (while giving more powers to the lucky bastards who already ascended).
* ascended referenced Dennis Stamp and recreated the trampoline scene on his Internet show.
* Ascended Super Saiyan combines the basic Super Saiyan form with the Power Stressed form, increasing the power through both multipliers... And so the stamina depletion. Ultra Super Saiyan is similar in that it increases the muscle mass more than Ascended Super Saiyan, with a proportional increase in stamina depletion... Plus increasing the muscle mass to the point the movements are impaired (hence Vegeta never bothering with it after discovering it, as he could anticipate the drawback).
* "ascended"). The Ancients are often said to have re-created human life across the galaxy when they started ascending.
* ascended; they are eventually revealed to have driven the Ancients from their home galaxy to the Milky Way.
* ascended to a higher plane, while Po and the Furious Five help evacuate the valley.
* Ascended to Carnivorism: An herbivorous animal decides to try out meat.
* Ascending. Since less-advanced species like humans don't have the technology to doctor images taken with it, it is acceptable evidence in courts of law.
* Ascending to a Higher Plane of Existence is (usually) a prerequisite for becoming an arcana in
* Ascending to the God Tiers gives characters near-impenetrable in-story Plot Armor. They can only be killed in a manner that is either heroic or just, preventing meaningless deaths. Interestingly, the heroicness or justness of the deaths are decided by a clock, it is not clear if a single clock or one per character, but the important thing is that the clock simply exists within the universe of the story, meaning characters could conceivably go and mess with it to kill or save a particular God Tier. This is one interpretation of what happens to Vriska, as a
* ascends to alicornhood and Celestia asks to be their Parental Substitute.
* Ascend to a Higher Plane of Existence: A character dies (or pseudo-dies) and then turns into a more godlike version of themselves.
* Ascend to a Higher Plane of Existence: A character dies without actually dying, often becoming a spirit.
* Ascend to a Higher Plane of Existence. All Dean can say is "Holy crap."
* Ascend to a Higher Plane of Existence, eventually leaving a gaping hole in both the world and history.
* Ascend to a Higher Plane of Existence: Every Egyptian king got to do this upon their death, where they joined Re, Osiris, and/or the Imperishable Stars in heaven.
* Ascend to a Higher Plane of Existence, for example, it's entirely possible to

start a vendetta with a Chaos Gun (level 8 offense) and have a Quantum Laser (level 16 offense) by the end, and that's if the vendetta finishes relatively quickly.
* Ascend to a Higher Plane of Existence: Technically dying, but doing so in a way that you ascend into a superior being.
* Ascend to a Higher Plane of Existence: The mystical or religious variant where someone leaves the physical reality for another one.
* Ascend to a Higher Plane of Existence, which was Rassilon's eventual plan for the Time Lords.
* ascend who ascends to help mortals, bringing down the banhammer at the slightest sign of rule-breaking.
* A scene cut from "Sven Hoek" implies that Sven and Stimpy are playing with turds from Stimpy's litter box. ("Look, I'm a juggler!" "I'm a sword swallower!")
* A scene cut from the film was to have been within the attempts to kill Ringo, (within the five attempts), it involved Ringo making a phone call in a phone box, and a blotched sacrifice attempt made within the phone box.
* A scene exclusive to the second movie of this route sees the Shadow blanket some of Fuyuki in black, instantly devouring anyone in the area.
* A scene in an 80s Batman comic has a hulking female coming at Batman with a knife, while gloating that everyone knows that the Bat won't hit a woman. Batman casually punches her in the face with the line:
* A scene in EP8 shows Bernkastel fretting with the simple act of calling someone with a phone, and how to speak with someone over it. This is at stark contrast with the overall much more serious mood of the scene, and particularly since she has always been shown as being in control and competent throughout the rest of the series.
* A scene in one episode starts with a Sunday school teacher saying, "...and that's why God causes train wrecks."
* A scene in season 3 has Mamoru giving exposition on the Outers to the Inners. The audience is shown a slide show of each Outer with their corresponding Talisman and planet. The (dwarf) planet Pluto is depicted as a gas giant. Suddenly,
* A scene inside a chop shop showed crooks slicing up stolen cars with a laser chainsaw.
* A scene in the eleventh book has a listing of a huge number of "ingredients" for an improvised glue-like substance.
* A scene in the episode "A Scause For Applause" is animated in Dr. Seuss' style.
* A scene in the episode "Dungeons, Dungeons, and More Dungeons" has the main characters watching the season finale of
* A scene in the first episode shows Iroh running Zuko through firebending combat drills, where he explains that firebenders use their breath control to draw chi energy outwards, which manifests as flame. Most likely the creators did this to make the firebenders more threatening.
* A scene in the first game hints that most of HK-47s personality and speech quirks were accidental errors in his programming that his creator found amusing enough to keep. HK himself seems rather proud of them, becoming insulted when asked to talk normally.
* A scene of Cubby riding a horse in "The Gay Gaucho", which is reused from Harman and Ising's "Lady, Play Your Mandolin!" (justified, as the cartoon was outsourced to the Harman-Ising cartoon studio).
* A scene of this happens in episode 8 of a forgotten anime known as
* A scene (originally deleted) from the pilot movie indicates that there are guidelines restricting with which species humans are permitted to have sex. Speciesist? Maybe. But there are reasons...
* a scene series where Cutter is telling the Wolfriders he's made an important decision. This goes on over three panels, and in the background of these panels his lifemate Leetah and his best friend Skywise are apparently conspiring behind his back.
* A scene showing the so-called "first victim" of the sinking, Junior Assistant 2nd Engineer Jonathan Shepherd (who asked to be left behind in a flooding boiler room after falling and breaking his leg) was scripted and shot, but ultimately cut.

* A scene that was just so shocking it became firmly lodged in the viewer's memory.
* A scene was filmed where Noah confronts Vira and begs her to kill him to end his agony, that
* A scene where Fluttershy and Tree Hugger are talking transitions into one set in Discord's dimension when one of the monsters that live there flies across the screen, trailing the new scene behind it.
* A scene which was cut and later reinstated for the DVD release shows Newt's parents and brother, Timmy. Timmy was played by Carrie Henn's brother Christopher, who had read the part to help Carrie out and was ultimately cast in the small role.
* A scene with Simba going through a cavern filled with steam geysers on his way back to the Pridelands that was completely cut from the film became
* Ascension Academy: Ascension Academy is an Officer Training School that aims to produce the finest Officers for the Cross-Allied Forces' Specialist Units. The Cadets of this Academy are trained in combat, survival skills, diplomacy and negotiation, and in the use of various magics. By the end of their four years of education and training the Cadets should be capable of moving into the Specialist Units of the CAF, or to take on other roles within the Forces or within their home nations. Many nobles send their children to the Academy for advanced education to make them better leaders. The Academy's true purpose however, forgotten by most of the world, is to protect the Door to the Darkness' prison. The last time the Darkness was free during the Dark War, over 80% of the world's population was lost. The price of failure is high.
* Ascension Academy has many examples of this trope. Cadets are broken into six squads and there is a battle couple in three of the six:
* Ascension Academy Thankfully she slowly lost interest in Chipz over the course of the Second Year as it became apparent he had no romantic interest in her.
* Ascension advanced enough in Forces, for instance, can simply declare that nothing moving over a certain speed is allowed to enter the space he's occupying that scene, making him effectively an example of this trope.
* Ascension and the mechanics of magical combat. The most powerful ability for keeping one's magical dealings secret (and protecting against sympathetic magic such as scrying and ranged strikes) is directly incompatible with essentially every wealth or status-related advantage, since it causes mortal record-keeping (including bank account numbers, deeds, and credit cards) to fail. So almost all players tend to be this by default unless they go to the other extreme and use overwhelming fame as a shield.
* Ascension are this, and the Moon elves are very close. It's not that the Moon elves don't feel anything, they repress their emotions because showing emotions is considered rude in their culture.
* Ascension. As Ascension was later confirmed to be a very real thing, this actually gave Buddhism some credence.
* Ascension gives us Manticore who has an interesting design, having a large purple lion-like body with chiropteran wings and chitinous plates, a spiked scorpion tail, the upper head and nuzzle of a lion and the maws of a shark.
* Ascension group that epitomised "blue collar" were the Craftmasons, the founders of the Order of Reason, who valued hard work above all else. Unfortunately, they got wiped out by their own creation in the 17th century.
* Ascension (Miniseries) journey, have to deal with the fact that they — thanks to a decision taken by their parents and grandparents — were all born aboard the ship and will all die aboard it, never going anywhere else or meeting anyone new, their lives essentially serving only to provide for the eventual settlers once they arrive. At some point in their lives, pretty much everyone goes through an existential crisis as a result.
* Ascension (Miniseries) that has been in space for 50 years, so the murderer has no way of escaping.
* "Ascension of the Cybermen" jumps out of the Boundary portal all smiles:
* Ascension of the Cybermen", the companions take the time to explain what each of the Doctor's devices is supposed to do and how it will stop the Cybermen. Therefore

all of the devices are destroyed by the Cyberdrones without even having a chance to do anything.
* Ascension. The introductory cabal in the 20th anniversary edition quickstart, the Bridge Trolls, are a group of street-dwelling mages.
* Ascension there's two races whose females are this. First are the female Nobles, and second are the female Moon elves. However the first is because they have no feelings whatsoever, while the second simply don't show them.
* Ascension, the Technocracy calls Sleepers "the Masses". Depending on a given Technocrat's view of why they impose order on the world, it can be paternalistic or contemptuous.
* Ascension to divinity or even beyond it is still in the cards for 4th edition
* ascension to godhood at the end of the original series. This, like the devil Homura, was branded for the movies instead of the TV series.
* Ascension (who have been shown to have strange powers) and then went all the way has never been addressed.
* Ascension worked its way into the minds of mortals. Unless one is directly confronted with the true nature of the universe, any faint evidence of magic will feed the Lie, and thus the Abyss. And Paradox is how the Abyss enforces the Lie.
* Ascent To Transcendence secret project, which causes their faction to merge with the Planet intelligence.
* Ascent to Transcendence suggests a variant: "stellar encapsulation," effectively bottling the star without dismantling the planets of the system or otherwise affecting their biospheres.
* Ascetic Aesthetic (a setting that is very clean and simplistic, which is meant to be ominous)
* Ascetic Aesthetic themes. A number of less important stations crop up in sidequests.
* As characters in a fantasy series where mind control magic and shapeshifters exist, the mages of
* As Charles Barkley once said: "How am I gonna lead the SEC in rebounding if I was in class?"
* As Chatta noted, Darkar needed to keep them alive to find out where their village was, so it's
* As Chell is making her way through the ruined Enrichment Center, she finds a seed in a cup she planted on Take Your Child To Work Day (which is when all of her troubles started). It's grown into practically its own ecosystem.
* A scheme to rescue Tiger from the Gestapo nearly goes bad when the Russian man they have playing Himmler hits his head on a pipe and collapses. He abruptly sits up a moment later, salutes, and says, "Long live our glorious leader, the Czar!" before passing out again.
* Aschen are worse about this. They're strong enough to fight off the Goa'uld, and often use it as a pretext to begin the covert process of turning populated worlds into giant farming fields with a fraction of the original population via the use of sterility viruses. This also serves to eliminate any potential competitor.
* Aschenputtel not by a Fairy Godmother but by the birds in the tree on her mother's grave.
* Aschenputtel. Not only does she enslave her stepdaughter, she orders her own daughters to cut off parts of their feet to make the slipper fit near the end.
* A schoolboy is told to write a 1,000-word essay on pets. He writes, "I have a pet dog named
* a schoolgirl used the confusion of the school trip to ensure she was locked in the room, then simply stashed the painting in a hollow door panel.
* A schoolteacher loses his job because a kid took pictures of underage children with the teacher's phone, getting him branded as a pervert. Later, when the kid admits to setting up the teacher, the teacher responds with "If you're truly sorry, then you have done no harm."
* As chosen in one of the very first episodes, "Stop Podcasting Yourself" fans are called "bumpers."
* As Chowder, Mung, and Schnitzel venture out for more cinnamini, Mung asks

Truffles to mind the store, because, as he dramatically announces, "We need more spice!" Cue Truffles: "Vell at least
* As Chrono states in the first season, raw magical power doesn't equate to being a top tier mage. This point is made clear in a supplementary manga, where Nanoha and Fate, both AAA class mages,
* , a science fiction film about space whaling in the 22nd century, with space whale eggs being the key to creating fuel for faster-than-light travel.
* A Science Fiction Omnibus of the previous three, and a remake of the omnibus that removes some stories and adds others.
* a scientific experiment that a severed head would be able to see and recognize its own body in that brief time.
* A Scientific Fantasy, the dinosauroids (species normally don't count, but since the whole species is also a civilization, it counts) fired a laser to blow up the asteroid that caused the K-T extinction and had already been around for 10 million years.
* A scientific theory known as the "Gaia Theory" or "Gaia Hypothesis" proposes the idea that Earth's biosphere functions as a huge superorganism.
* A scientist at the Bedrock World's Fair in the original series invented a working (albeit not very well) time machine.
* a scientist at the Harker foundation sticks her finger in Dracula's mouth when she unearths his casket on the ocean floor, believing him to be dead. Unsurprisingly, he bites her finger off, and this is what revives him from his century long coma.
* A scientist engineers a device that can close holes in the ozone layer. Khan realizes that it can be used to
* A scientist is trying to create a super-speedster, but his test subjects burn up when they accelerate, indicating that not only do they lack speed-resistant cells of the Flash, but the subjects can't slow down either, as only an idiot keeps running if they are overheating. He solves the problem by cloning the Flash.
* A scientist's experimental treats cause a Caterpie that ingests them to turn gigantic, subsequently re-enacting a parody of
* a scientist uploads his students and employees into a simulated computer environment without their knowledge and uses them to do tasks that require a human mind at computer speeds, and "resets" them after a set period
* A sci-fi noir short story (appropriately titled "Murder On-Line" (and written in 1992!)) involved a murder in an online virtual world, in which the victim will be replicated by AI because "he had many friends on-line, and they'd miss him — murder isn't what it used to be."
* As Claremont eventually revealed, Mystique is over a hundred years old; she has had relationships with several men, but her most enduring one was that with Irene Adler aka Destiny. Mystique is also
* As Class VII is discussing what everyone is doing for the school festival, Jusis says that the horse-riding club is planning an event and although there's supposed to be no gambling, he's sure their "senior colleague" will find a way. At this, Crow gives one of these, and the text actually reads "*innocent whistle*."
* Asclepius was originally just Apollo's son. Then he became a medic so good he could
* As close to the truth as possible with available resources and information
* as collected here. Not all of the speech is decipherable, though. eg. in the third part of "Mausoleum Suite", the voices are just backmasked gibberish.
* As Commander of the City Watch, Sam Vimes has a ceremonial truncheon with silver facings and the inscription "Protector of the King's
* AS-Convoy is a Strong-tier "N.E.G. vs. Hellions" match, and there's a chance the player can fight against the Strong-tier Hellions team.
* A Score to Settle, Frankie is released from prison after 19 years when he is diagnosed with a terminal illness.
* A Score to Settle. Joey actually died years ago while Frankie was in prison, and the Joey that meets Frankie when he gets out is a hallucination caused by Frankie's terminal illness. The truth is revealed when Frankie visits his wife Lorraine's

grave and Joey's grave is next to it. In hindsight, there were multiple clues to Joey's nonexistence: he walks rather than drives to the prison; he never eats; nobody besides Frankie ever interacts with him; and his number isn't recorded on Frankie's phone despite him having called it.
* A Score to Settle's nephew Bailey Coppola. Nicolas Cage plays the older Frankie. The resemblance is uncanny.
* "a scorpion snips off a girl's bikini top with its claw" - right after taking it off their own bodies."
* A Scotsman in Egypt) at the sight of them, not calming down until he's finally killed one. Singlehandedly.
* A Scotsman in Egypt: Gordon of Edinburgh never gets his servant's name (Eoin) right. Of course, when Eoin accidentally calls him master George, he gets kicked out.
* A Scotsman in Egypt: Happens repeatedly over the course of the many, many sieges the Scots lay to their enemies: their catapults/cannon concentrate fire on the gate or a wall section, and the Scottish hordes pour into the enemy. That is, when their spies haven't infiltrated the city to open the gates for them.
* A Scotsman in Egypt Robert into killing the heir and raping the prince's wife by threatening to publish evidence that Robert's father and Adam were part of a plot to kill the current king back in their youth... and is murdered by a panicking Robert maybe two minutes after she tells him this.
* A Scotsman in Egypt: Several commanders piss themselves when they see just how screwed they are.
* A Scotsman in Egypt simply bought off each new Pope, allowing their decidedly un-Catholic rampages against the other Christian powers to go completely unpunished, even going so far as to dump bags of gold on the new Pope's desk without even a Mea Culpa.
* A Scotsman in Egypt starting in Egypt and spreading from there. Of course, as one Scot proudly proclaims, the Scots are good at two things: fighting and making more Scots.
* A Scotsman in Egypt, when the Scots break an enemy army, they'll allow the survivors to run to their army, following them closely to destroy them just before they can regroup. A variant is to chase them to the walls of a city, where the defenders refusing to open the gates to let the survivors in (and their subsequent slaughter) does horrible things to enemy morale.
* A Scotsman moves to London and after a week his mother phones to ask how he's getting on. "Well, Mam, I've found a nice flat, but the other folk are a wee bit strange. The man below me keeps hammering on his ceiling, the woman above me keeps stamping on the floor, and sometimes I can hear a weird moaning and groaning coming from the family opposite."
* A Scottish man tells his friend he is getting married, and will wear a kilt at the ceremony. The friend asks "What colour is the Tartan?" and the Scotsman replies "She's in white, same as usual."
* As could be expected of a rich young woman from a noble house, Cersei Lannister received an excellent education. She is able to match wits with Ned Stark during a subtext-laden conversation about Ned's education as opposed to his brother's, and understands enough about the military realities of the North to lecture her son Joffrey on the impossibility of occupying the North directly. She's also plotting to kill the King.
* As could be guessed from the title in the rest of the film, where Blade is the only one using such an anachronistic weapon, while everyone else just uses guns, or maybe the occasional cattle prod.
* A Scout Camp sketch references this, as the campfire is interrupted by an old former Scout
* As covered, Silo (a chain of home electronics stores) ran a commercial offering home stereo systems for "299 bananas". In context, they clearly meant 299 US dollars, but several customers came in bearing bushels of fruit. While they probably had a legal case to refuse the alternative payment, they instead decided it'd be better PR to make good on their unwitting offer and accept the bananas.

* A scrapped closing number is "Ain't it Strange", which has Beetlejuice point out that he's the one who saved everyone from Juno in spite of his earlier misbehavior and the rest of the cast conceding that they themselves weren't flawless.
* a scrappy post-apocalyptic style. In particular, their aircraft tend to be scrap-encrusted pastiches of real-world designs from the 1940s and 1950s.
* A scream? More like a ten billion ton nuclear assault formed into human voice.
* A screencap of Chode, a fusion between a Charizard and an Electrode. However, this is an edited image, as this fusion is named "Charitode" by the website and is more likely a joke about "chode", which is a slang term for a... vertically challenged penis (
* A scripted sequence involves bandits attacking the protagonist and Sophia (a minor NPC based off the main character of the manga), and reinforcements will continue to arrive until they kill Sophia. While beta testing, Aoba's best friend Nene finds a way around this; by leading Sophia into a corner of the forest, positioning the protagonist so that he's between Sophia and the bandits, and then continuously attacking, the player can prevent her death. Unfortunately, it's impossible to advance the story, since the sequence ends with her death.
* A script from one of the many early-90s attempts to bring the show back — either as a motion picture or a new series — contained the memorable phrase "Sons of Sabiches!"
* A scrollbar is provided by Google Wave, where the arrows are located on the upper and the lower end of the bar. Clicking these will achieve a a page up/down effect indeed, instead of skipping lines. Moreover, you can't operate this thing carefully, because there is no line on which it would move, so you can't click past the bar. By dragging it, the scrolling delays until the shadow of the bar (?) catches up with the body of the bar, completely disorienting the user. You will end up dragging it randomly and ending up at the right place in the wave with a great deal of luck - the effect is simply ridiculous.
* As Crouch Jr. proves, people who have drunk Veritaserum (Truth Serum) also speak like this.
* As Cruel as School Children, although their highest charting album on the Billboard 200, didn't produce any hit singles, unlike its predecessor and successor.
* As cruel, insensitive, insane, sadistic, and bigoted as she is, Lydia Nance gives a very valid reason in Issue 1 of
* As Cruella comes to visit the Radcliffes, Nanny walks over to open the door for her. Cruella manages to open it on her own.
* A Scummy Gap Student With a Hard Life Calls Upon a Lady of the Night, but make no mistake- she brings much of her misfortune on herself.
* As cute as a couple they were, Larry's girlfriend, Stacey from the
* As cynical as the show is, even the speech is played straight a few times. Dean doesn't understand why
* a scythid crawler, one of the weakest enemies in the game. And no, it's not a case of it turning out to be a Killer Rabbit Even the quest giver is openly disappointed by this.
* As dangerous as the F-Zero races are, the F-Max Grand Prix that took place two centuries earlier are said to be even WORSE.
* as Darth Vader is firing at him to finish him off, apparently just so Red Squadron would know what they were dealing with. These two guys are of course responsible for coining the Star Wars in-jokes "Stay on Target..." and "Just a few more seconds..."
* As Deadpool faces the stunt performers surrounding him for "I'm Deadpool" (
* As demonstrated in the NFL, when the injuries are real, the quality of the games slowly degrades over the course of the season until it is not much higher than college games'. Kayfabe allows for (relatively) minimal injuries over a long period of time - or rather, allows professional wrestlers methods for working around the injuries they do sustain in order to keep the matches exciting. There's even a certain art in the delivering and receiving of "reduced contact" hits, while still preserving the visual spectacle of a

* As described above, Year One will have The Letter From Hogwarts, The Visit To Diagon Alley, The Trip To Hogwarts, and The Sorting Hat. These stations are particularly special in that they'll often take place in
* As described to an anime club once: "Gurren Lagann is about brotherhood, giant robots, and killing furries with phallic symbols."
* as destructive as him ultimately a heroic but misunderstood character, if someone saw the Hulk coming to save them from drowning, they'd be more likely to die of a heart attack instead).
* As detailed in the 30 for 30 short "The Anti-Mascot", the San Francisco Giants "Crazy Crab" mascot, a guy in an unwieldy crab suit that the audience was expected to enjoy hating right off the bat. Perhaps a little too much so.
* As deuterostomes, humans — like all other chordates — go through a very early developmental phase when they have an anus but no mouth. The opening that will become the mouth doesn't arise until the end of the gastrula phase. A common joke is that some people never move past this stage.
* asdfg.jodi.org. Just that. Flashing black and white backgrounds along with a load of absurd ASCII art jiggering around your screen. It's even said it'll become a virus if you visit it a second time.
* asdfmovie 2, a guy tricked into seeing the word "gullible" on the ceiling just utters "Oh, you just stole my lungs."
* Asdfmovie7. A man says to a woman, "Hey, baby, are you an angel? 'Cuz I'm allergic to feathers." [vomits on her]
* asdfmovie9; a woman tells her lover that she's pregnant only for it to be revealed that her lover is also a woman, who is understandably confused by this revelation. Granted, this is assuming the first woman didn't get pregnant... the old-fashioned way with someone else.
* asdfmovie, after one man invites another to smell his flower, an alien bursts out of his chest. The other man just says "LOL!" and the first is completely unfazed!
* asdfmovie, a magical flying pony, a cow pretending to be a man, and floating disembodied buttocks, simply happen without explanation
* ASDF Movie. Another sketch has a talking burger, who casually states: "I used to be a cow." The person talking to it is quite disturbed.
* ASDF Movie, as detailed in the song "Everybody Do The Flop," created his titular dance craze this way. Mid-jump, a crowd watched him and he shouted "Everybody do the flop!" and everyone just went with it.
* asdfmovie ends with two men growling at each other, with a third man awkwardly backing away. Strangely enough, once the video was adapted into an official asdf sketch, the third man was removed for some reason.
* ASDF Movie has a cow pretending to be a man. Its disguise consists of a baseball caps and a skateboard.
* ASDF Movie has a fear of backstories. When he consults a doctor who asks how said phobia began, he starts screaming in terror.
* asdfmovie has a man telling a crying boy that "boys don't cry"; the crying boy then spontaneously grows breasts, as if changing into a girl.
* asdfmovie has these during the lines "YOU'RE DEAD TO ME!" and "I AM PUNCHING YOUR SALAD!".
* ASDF Movie: In one skit a man announces he's going to be car sick... right before vomiting up an entire car that crushes the person next to him.
* ASDF Movie into a cellphone. Cue trains coming straight out of the phone and crushing the guy on the other end.
* ASDF Movie is a guy leveling up after punching another guy in the face.
* ASDF Movie: "Kitten Fight!" "No wait, I'm allergic to adorableness!"
* ASDF Movie occasionally uses the "I like trains" gag (where a boy says the line and subsequently summons a train to run over someone) to end sketches like this.
* asdfmovie, one of the skits is about a couple who are relaxing together under the moonlight, when the moon tells them they should kiss. However, it's unknown if the couple heard the moon.
* ASDF Movie: Parodied. When a waiter approaches a leaving customer stating that she had to pay for her food, she promptly refuses and regurgitates the burger she

ate back onto the waiter's plate before leaving. The burger is somehow still intact as if it was never eaten.
* asdfmovie: Possibly the "I Like Trains" kid. Every time he talks, he summons a train to run over himself or someone nearby, and he doesn't seem to be aware he's doing it.
* ASDFMovie's creator, TomSka, has a pair of his own. They play dubstep.
* ASDF Movie, there's a character who's allergic to adorableness. Someone gives him a cat, in which he says "aaaaw..." right afterwards, a tombstone is shown.
* ASDF Movie, there's "the funniest thing you've ever seen... from really far away". You can never hear what the first guy says before he explodes and the other guy yells out "Apples!"
* ASDF Movie throwing muffins, the guy punching the salad, and the guy who squashed the talking potato.
* asdfmovie, where an officer brings a boy home and explains that he was caught "doing homework". The mother screams the singular variant of this phrase in horror.
* As Diabolik is a well-known criminal and the existence of the masks is a known fact, the police and/or possible victims will set up face checks (consisting in pinching the face to try and take off the eventual mask) any time they suspect Diabolik is around (this was actually expected by Diabolik back when the masks were still unknown to the public, hence him trying to prevent their discovery).
* As Diabolik is the only one who knows how to make the plastic for the masks, everyone who wants to put their hands on the secret is after him.
* As did Dwayne Johnson, who could have played the role without doing so.
* As did most ancient peoples. Many believed their gods were tied to a particular place and didn't have jurisdictiion outside of it. For example: the Egyptian Gods only had power in Egypt not in the entire world. While virtually everyone in the ancient Mediterranean acknowledged the divinity of the Egyptian Pharaoh, that also didn't mean much to people who lived outside Egypt unless they were in a position to meet him.
* As did several successive cartoonists working for the Spanish comic magazine TBO (the inventions were credited to "Professor Franz from Copenhaguen")
* As did the Brass Bridge. One wonders if Colon is really up to the job.
* As did the rest of Celestial Being. Halleluah, Allelujah's dark half, enjoyed it and egged him on.
* As Director of Karakura General Hospital, Ryuuken Ishida always wears a perfectly pressed suit and tie. Flashbacks reveal that, even as a teenager, "casual-smart" was his most dressed-down style. As he fights in his suits and favours the colour white, he is also a
* As Discord never really had any friends, he does not have much social skills, being more socially awkward and acting outwardly strange and loud.
* As discussed above, most folkloric traditions have some version of this in the form of some ghost, spook or creature traditionally used to explain unnerving nocturnal occurrences and/or frighten children into behaving.
* as distaff counterparts to the Maidens. Unlike the Maidens, being a Star Knight is hereditary, passed on to the oldest son, though there is one single recorded case of a woman inheriting the powers after her brother died childless.
* Asdivine Cross to learn new skills. Once any skill or spell is used against her, she gains it permanently.
* Asdivine Hearts, has hair so spiky that he quickly earns the nickname of "Pineapple Head."
* Asdivine Hearts looks like a female version of the home kingdom's Prince Lawrence, who disappeared without a trace a year before the events of the game. The resemblance is so uncanny that guards at the castle arrest the party for kidnapping the prince when they see Uriel.
* Asdivine Hearts, Uriel is convinced that Zack is the one who saved her from her burning village a year before the events of the game and joins the party to express her gratitude. This is despite the fact that he hadn't even left home at all at the time.
* As divisive as the seventh season was, it addressed the issues that plagued the

previous year - the pacing was much better, it boasted an actually intimidating
* As do countries in the Horn of Africa (Djibouti, Eritrea, Ethiopia, Somalia).
* As documented by aired in Las Vegas (and possibly in other parts of the United States) at 7:00AM.
* As documented on the never-to-be-released-until-everybody-in-it-is-dead
* As does Amy Lee in the video "Everybody's Fool". Complete with a shot of her underwater in the tub with her eyes wide open.
* As does anyone on a bike coasting downhill fast enough that the choices are 1) hope you miss the trees (or car) at the bottom, 2) slowly (but in a way that damages the brakepads) apply the brakes a little at a time as they grind but don't quite grab, or 3) hit the brakes fully or flip to one side, and don't quite stay in the sweet spot of possibility 2 while scratching the hell out of your brakepads, or
* As does Dr. Suvi Anwar. Her belief Sara might be not be serious evaporates the minute they kiss.
* As does Gandalf's when a large number of trolls burst through one of the gates in Gondor in
* As does his "friend," Lando Calrissian; he goes from Bespin City Administrator/Executive to General.
* As does Hooded Justice. Both he and Rorschach are very protective of their "real" identities; the Comedian also has a full-face mask but seems to have adopted it to hide his facial disfigurement rather than to protect his face from view.
* As does Shirou, who also owns a pink apron on top of it. Although the housekeeping side of him is only shown before he starts doing anything badass.
* As does Tewi of the same series, with Reisen Udongein Inaba as the most frequent victim of her pranks. Sometimes she'll prank someone else and leave Reisen to take the fall like the
* As does the one in the seventh movie, though in this case it's saved for the climax of the movie.
* As does, to a Degree, does other Existentialist Philosophy, too. Most Existentialist Philosophy boils down to "find something you are willing to endure hardships and suffering for."
* As do Levellers in a few of theirs, most interestingly, in "England My Home".
* As do the Veteran Trainer class. Predictably, they tend to have rather powerful Mons.
* As Dr. Grant puts it in the first film, "They're not monsters, Lex. They're just animals."
* As Dr. Thomas Neill Cream, an infamous abortionist and poisoner, was being hanged for his crimes, he allegedly managed to get out, "I am Jack the..." (He is not normally taken seriously as a
* Asdrubael Vect, and sent the slave back to the torture pits, but not before informing him that the wine he just consumed is not fit for human consumption and causes them chronic stomach cramps. What a dick.
* Asdrubael Vect can get a custom ravager/raider called the Dais of Destruction that packs 3 dark lances, armor 13 all sides, and a transport capacity of 10, meaning it will ruin someone's day quite nicely (if a more than a little expensive at 240 points for Vect and another 200 for the Dais).
* Asdrubael Vect get similar reputations, and the Chaos god Tzeentch is a god of false hope and betrayal.
* Asdrubael Vect. Started out as a slave, got into what was at the time a minor Dark Eldar kabal, manipulated and backstabbed thousands of allies (including a particular
* as drugs if they want to survive the journey from system to system, it doesn't work so well.
* As each new threat appears to stop them, a pair of the attackers are forced to stay behind to buy the others time. The stakes are high because, last time the Alliance tried this, Entrapta was captured and presumed dead. Subverted in that the Princesses are much stronger and the Horde much weaker than the last time, and everyone is eventually reunited.
* A sea cucumber's gills consist of frilly tentacle-like structures that sprout

from the inside wall of its anus. It normally extends them to breathe, but if threatened, it retracts them into its anus. Filter-feeding species also capture plankton on their gills, then retract them into their anus to transfer the food to their gut.
* As early as 1782 the label "Circassian" was used to advertise beauty products, ranging from lotion to hair dye to medicinal creams. Companies falsely claimed that their manufactured goods were actually used by the women of Circassia, renowned worldwide for their beauty.
* As early as Season 1, you have episodes like "SB-129" and "Squeaky Boots" where supporting characters (Squidward in "SB-129", Mr. Krabs in "Squeaky Boots") are the main focus of the episode and Spongebob is in more of a supporting role. In "SB-129" in particular, Spongebob himself (as opposed to his futuristic descendant and prehistoric ancestor) only appears in the very beginning and very end of the episode.
* As early as the 1910s and 1920s, novelty songs were written about Chaplin.
* As early as the time of Charles Dickens, popular historians have alleged that Charles VII, who had become King of France thanks to
* A season 1 episode saw Icy destroy Red Fountain by freezing it with a nifty ice dragon. Season finale, Icy doesn't even make any effort to use it to freeze Alfea, or to take on Bloom, who has an fire-energy dragon of her own.
* A season 2 episode features a game set underwater. The User's submarine is very shark-like. Not to mention a scene where mer-Bob and mer-Dot are surrounded by a school of sharks until Bob cuts one in half and scares the rest off.
* A Season 2 episode had JD and Turk flirting with a waitress called Jenny, and wondering which of them she likes better. She's black, so she turns out to prefer Turk.
* A season 2 episode has Homer calling Barney for bail, and initially gets an answering machine message sung to the tune of Beethoven's Fifth Symphony.
* A Season 3 episode by showing flashbacks to his wife's murder in 1994.
* A Season 3 episode has Sabrina and Valerie sneaking into a club to see
* A Season 3 episode shows Ilana temporarily working at Hillary Clinton's presidential campaign headquarters, instantly dating the episode to 2016.
* A Season 3 episode to events six months prior to the series premiere.
* A Season 3 episode to the high school days of the characters' parents.
* A season 3 episode, "Victor Victorian" featured a whole group of women masquerading as men. Murdoch later notes that he should have realised that the
* A season 4 episode even lampshades it when Regina says Emma should forgive her parents for lying to her and Emma retorts, "This from the woman who spent half her life punishing everyone around her for an eight-year-old not able to keep a secret."
* A season 4 episode has a Genie's bottle delivered to the clock shop. When the lid is opened, it sucks Hilda and Zelda inside. There's a switch to get them out but disaster strikes when it malfunctions — as the bottle is resistant to witches' magic. Zelda also dresses in a
* A season 4 episode has Lindsay and Tobias being asked whether they have children, both replying "no". The camera then zooms out to show Maeby standing next to them.
* A Season 4 episode of Stargate Atlantis went to great lengths to point out how "stupid" a name C-SIS was for an intelligence agency ("That's the best you could do?"), but this is also completely in check with the rest of the tongue-in-cheek Canadian bashing on the show (most of the cast and crew is Canadian, and the entire franchise is filmed in Vancouver).
* A season 5 episode even addresses this issue with a gathering of gods from other/more ancient religions being mad that the Christian apocalypse is going to end the world instead of their
* A season 5 episode features his 51st birthday (with a lampshade hung on
* A Season 5 Thanksgiving flashback to two Thanksgivings ten years before hand reveal that Chandler and Monica first met when Ross brought Chandler back from college for Thanksgiving two years in a row. Monica was immediately attracted to

Chandler, but her attraction was killed when she overheard him calling her fat. She spent a year losing weight in a plan to get him back for calling her fat. The next year, he's completely bowled over by her new look, but her attempt to gain revenge for the previous year's insult results in a kitchen accident that leads to the loss of one of Chandler's toes and the death of his attraction to her. Unlike Ross and Rachel, however, once their interest in each other is rekindled in Season 5, they become a much more stable beta couple than the alpha couple.
* A Season 6 episode features Sam and Dean transported to an alternative universe where their lives are the storyline of a fictional television series starring
* A season 6 episode has three evil blonde witches who are completely dim. Their entry in the Book of Shadows says there's no need to vanquish them because of how incompetent they are.
* A Season 6 episode taking place in Sri Lanka was dedicated to the victims of the 2004 Christmas tsunami that ravaged it months later.
* A season 7 episode has Niles bringing his new girlfriend Mel over. Daphne, who's just learned Niles has a crush on her but is engaged to someone else, and who hates Mel on sight, starts knocking back Bloody Marys.
* A Season 8 episode featured another Witch-Whitelighter hybrid named Simon Marks, who is notably a year older than Paige. It is implied that Whitelighter-Witches were more common than anyone thought, but they were forced to keep their existence hidden until Paige was needed to recreate the Power of Three.
* A Season Eight episode has an entrepreneur salvage some wreckage from a fight between the Asgard and Goa'uld in Earth orbit, and produce an empty Asgard clone to the press. He
* A Season For Slaughter are named after real people who made charitable donations for the privilege.
* A season four flashback shows Michael confessing to Chidi that he doesn't know if soulmates are real, but if they are, they're made, not found.
* A season later, Carl (and Master Shake) get their entire skins ripped off (
* A season later, however, magic returns to Earth. This changes some magic rules. This creates a new breed of vampires that is much stronger than the previous breed and
* A Season One episode explored this. People who were used in experiments involving Pyrokinesis would burst into flames and explode if they couldn't focus their attention on other things around them when their power builds up inside of them.
* A season one episode had Homer attempt to make a tree snare and end up launching a bunny rabbit over a mile into the horizon.
* A season seven episode featured a musical dream sequence which allowed Hugh Laurie to show off his vocal range (again) while also giving Lisa Edelstein a chance to show off her pipes.
* A Season Six episode has a reporter discover some evidence of one of the SGC's side programs. It turns out to be an NID plot, and the reporter is left empty-handed - but alive.
* A season three episode features a character who can see people's deaths by touching them, but Clark manages to prevent one of these deaths, something no one before had been able to do. Clark is speculated to be able to change people's destinies.
* A season three episode had people being turned into zombies due to a mask that contains the powers of a Nigerian zombie demon.
* A season wide Double Subversion makes up the whole plot of Series Six. The opening,
* A Seattle store called "The Purple Store" plays with this trope. It sells a variety of things, including clothing, office supplies and home decorations; it's just all colored purple.
* A second American civil war breaks out in the early 1900s, when the hard-right wing Nationalist governments of several Western states grow dissatisfied with Liberal and Federalist rule and declare independence.
* A second and third Smurfette (named "Sassette" and "Nanny Smurf" respectively,

to avoid confusion) were introduced latter. Sassette (who is also an artificial Smurf) wears overalls, like Handy, but hers are pink and she has long, red hair, which she wears in
* A second appearance of the "Hare Krishna" joke leads Kermit to make an
* A secondary character hands the player a key before locking himself into another room. Finding a way into that other room triggers a
* A secondary human villain was manipulated into bringing It a hostage and looks at It when It's not wearing a form and promptly keels over dead.
* a secondary mutation is that his skin, eyes and hair are all different shades of purple Vol. 4 #8 in 2014; they can only exert their pheromone powers when they are united in a group.
* A secondary plot line in which the crew of a Coast Guard cutter conducts a mock execution in order to get a pirate to confess is omitted almost entirely, the film only showing the pirates' capture.
* A secondary system exists where all your total diamonds in the level are banked once you get to the end, with every 100 giving a life.
* a secondary unit of measure (in this case, a constant level of evil of 4.8 kilonazis with 0.4 kilonazi deviation):
* A second character suffers a lengthy and fatal illness later in the story, and they never find out what this is, either.
* A second contest was made for fans to submit their own Copy Abilities. The four winners were Water, Top, Iron and Baton. These four would be featured in the two-part "Air Ride in Style" special. Three of the four have been incorporated into the games: Water has been recurring since
* A second, downplayed example occurs in the book's climactic mission. Prior to takeoff, Furness and Mace are inspecting two nuclear weapons that have been loaded aboard their aircraft when they are interrupted by a pilot from the allied Ukrainian Air Force. To their horror, they discover that neither he nor anyone outside their direct chain of command is aware of their nuclear attack orders, and the three pilots rush off to correct this oversight. The mission is launched, and Furness and Mace release their weapons... only for it to be revealed that a last minute switch has been made - a nuclear attack is still taking place, but it is the Ukrainian pilot who will carry it out.
* A second example happens with a guy sweeping a broom outside an abandoned theater. He says sweeping's his passion, and equates it to making love. The Smiths drive away when he offers to show how a broom's like a phallus.
* A second example is the flashback where Chase interrogates a man who
* A second flashback arc to twenty years before the story starts gives the spotlight to Ichigo and Uryuu's parents. Until the Thousand Year Blood War Arc, Isshin and Ryuuken had only minor roles in the story, Masaki's
* A second form of inherent magic is the one focused on in the series: Ambient Magic. A person can have an affinity for a particular craft, activity, force or thing (in the series we see Ambient Magics for weaving, weather, forging/fire, plants, dancing, glassworking and stones amongst other things). The wielders can only express their magic through the thing they have the affinity for, but with a little imagination and a lot of practice and study this doesn't have to be limiting at all: for example, Sandry the thread-mage is able to work with all sorts of materials by stubbornly persuading herself to think of them as weavable or spinnable. In addition, when desperate, Ambient Mages are able to work with their raw power rather than through their 'thing', but since this uses their own life-force rather than accessing the power inherent in the activity or object of their alignment it is swiftly exhausting. Furthermore, Ambient Mages are bound by the natural order of their 'thing': the weather mage Tris is able to push storm clouds around but more often than not she finds it's either pointless or a bad idea to mess with what the weather wants to do. Lastly, the abilities of the ambient mages vary between people and have certain limits: Lark, an ambient thread mage, must work with physical cloth and thread to represent the thing she is trying to spin or weave, while Sandry can spin and weave
* A second is a day, and a nanosecond appears to be an hour. Weird time.

* A second, less successful company coined the catchphrase "Foutje, bedankt!" ("Mistake, thanks!") which reached meme levels for a few months, except that nobody has an inkling who or what it was supposed to be advertising. This campaign was quickly dropped once the ad agency clued in.
* a second look. Considering the author, it is entirely possible that these are the intended lessons for adult readers, although most of those listed are actually the primary aesop intended for the book.Note that the books were written to work on two levels: the timeless children's morality tale and political commentary on current events (for example, Marvin K. Mooney is Nixon). It's not as surprising when you realize that the first drawings he published were anti-Nazi political cartoons starting in the late 1930s.
* A second monster, based on a chimera, had this with a lion head, a goat stomach, and a snake tail.
* A second Obi-Wan example concerns R2-D2. When Luke says the R2 claims to belong to Obi-Wan he responds "I don't seem to remember ever owning a droid". This is technically correct since R2 was never actually his property but he leaves out the fact that he knows exactly who R2 is and who he does belong to.
* A second official cookbook came out in 2016, by professional cookery writer Joanna Farrow.
* A second one occurs in episode 9, when Ledo finds an old recording at the bottom of the ocean, which details humanity on Earth a long time back when it was starting to freeze up. The contents are a shocking revelation to him, and contradicts everything he'd been taught by the Galactic Alliance about their losing battle in the
* A second possibility, wildly popular at the time but now more obscure, is
* A second revision is used after coaxing Andrew into having sex with her, which she describes as having her cake and eating it and
* A second season episode mentions a powerful hallucinogenic mushroom species native to Titan (one of the moons of Saturn).
* A second season episode turned out to involve a less-than-competent plastic surgeon and his partner staging a random attack in the middle of a crowd at Grand Central Station in order to collect the $10 million his hands were insured for. The attack turned fatal when the partner was jostled and the lye being poured on his hand splashed into his face.
* A second Skylab module ("Skylab B") was also built as a backup. NASA drew up various plans for what to do with the spare (the most notable being one proposal to put it in orbit around the Moon, and another to dock it with a Soviet Salyut — effectively creating an "International Space Station" two decades early), but none of these got off the ground before the Skylab program was shelved. Skylab B is now on display at the National Air and Space Museum in Washington, D.C.
* A second strip around the same time had Linus tell Lucy to ask their grandma why there's a Father's Day and a Mother's Day but no Children's Day, and he correctly predicted that she would reply "Every day is Children's Day". Both strips are an inverted parody of the then-current child psychology craze of Dr Benjamin Spock, with Linus saying "You just have to understand the adult mind!"
* A second strip has Jeremy's dad invoking the trope by walking up to Connie one early morning, kissing her, and wishing her a happy Mother's Day. Cue Jeremy panicking and dashing out to grab a gift. Turns out Dad was just messing with him.
* A second subculture, not seen as often, followed the King into seclusion. While the Queen and her followers wish to dominate the world and steal what they like from it, the King and his followers are perfectly willing to wait in their
* A second tape was prepared for when Robert finally did do the eulogy. Mo also stares at him in a slightly pleading manner, waiting and timed right until he opens a case revealing his inheritance.
* A second team was added later with Ahri, Miss Fortune, Soraka, Syndra, and Ezreal.
* A second type is called a "lungfish" (and looks vaguely like a real-life lungfish). Although the appearance is actually that of an eel-like fish, it acts like a straight sandworm, and is found in desert sand dunes.

* A second, unconfirmed example involved the captured German U-Boat later re-launched as HMS
* A second variation comes from the anime adaptation of the Breaking Point storyline. After turning down Cologne's initial offer to train him, Ryoga takes his leave. The next scene shows him wandering into the living room and sheepishly asking them to tell him the way out...
* A secretary runs over a guy's foot with a lawnmower in the office. Nothing happens to her.
* A secret cell within London's Metropolitan Police Special Branch - the Special Demonstration Squad. From 1968 to 2008, these elite policemen would go on deep-cover 'tours' in political activist groups; mainly to provide information to the regular police ahead of any protest or illegal activity, but also to smear and discredit them. A tactic they found useful was to get into a relationship with a high-ranking member of a group - the end of a tour saw the operative vanish from the group and the person's life, which had a side-effect akin to the Stasi's 'Zersetzung', especially when one officer left his partner in the group with a baby.
* A secret non-canon bonus ending suggests that the events of the game are all in the player character's head, and that he, like James Blackwood before him, has gone crazy.
* a secret organization has been murdering people on behalf of the world's leaders.
* A Secret Skill Shot is available by holding the left flipper button to disable the magnet and send the ball to the left flipper. Hitting the right ramp will award a 5 million Ramp Skillshot.
* A secret technology developed by the Star League before HPGs but abandoned when HPGs were more practical was the "Black Box" devices. Instead of point-to-point, the Black Boxes worked instead by broadcasting much like a radio, but into hyperspace. The Federated Commonwealth acquired and developed the technology to secretly break the monopoly on interstellar communication via HPGs by the "officially politically neutral" quasi-religious organization known as
* A section specifically made for military humor has always been a tradition for
* A security guard at Dilbert's company got bored of his job, and went from cubicle to cubicle, advising each one to "try rebooting." Even Dilbert got this advice, though Dilbert had to question it: "To fix a typo?"
* A security guard conveys a suitably detailed explanation about the whereabouts of the big-time music producer Frank Sharp. Wayne hangs a lampshade on it at the time by commenting "For a security guard, he had an awful lot of information, don't you think?" Wayne lampshades this again later when Sharp's whereabouts suddenly become important: "Aren't you glad we were there to hear that information? Seemed extraneous at the time."
* As Eddie Valiant leaves a movie theater, a newsreel tells the news of how Maroon Cartoons was sold to
* A Seeker of the Name — more precisely, if you've stained your soul in the process of Seeking she will vomit, burst out crying and demand you leave her home.
* A seer said that Psyche's mysterious betrothed "is a monster whom neither gods or men can resist". She was not speaking
* A segment about Pope Benedict forgiving the Jews for killing Christ:
* A segment from Great: The Show 8, titled "Replacement Bully", has a subversion of this trope: the title character "bullies" another student at school by unknowingly "replacing" his possessions (such as his #2 pencil with a mechanical one and his lunch pizza with a vegan grandma pizza). This gradually escalates further until he eventually replaces the kid's sidewalk with a conveyor belt and eventually literally replaces his dad with himself.
* A segment of a season 3 episode opens with Icy boasting about a new fire power Valtor gave her. In the Trix's battles against the Winx, including the one just a few minutes later, she doesn't use it (and in fact, it's
* A segment of the 2003 MTV awards ceremony shows Gollum/Sméagol on a rant about how MTV and Peter Jackson suck and how
* A segment on the negative influence of Twitter: "Jon Stewart Looks at Kid's

Junk."
* A segment on the Reliant Robin had Clarkson attempting to drive it without flipping over. He fails miserably.
* A segment with cartoons: "Jon Stewart's Story Hole! Remember, it's our little secret."
* A segment with then-correspondent Ed Helms involved him coming up for an idea for a "gay radar", which he decides would be called the "homometer."
* Aseir can NOT take a joke, and Nik wonders if he knows what a joke even is.
* Aseir is quick to lash out if you push his buttons or bring up his vulnerabilities.
* Aseir speaks with a deep, uncaring tone. However, he's not as much of one as Jenna, because he's got a bit of a temper.
* A select few Firebenders, namely Combustion Man from the original series and P'Li from
* A select few in the world are aware of this; others, not so much. It was an accident to begin with, set ten thousand years prior to the start of the actual story, where mankind's creation crash-landed on the planet and respawned humanity through a fabricated "mother" entity. Furthermore,
* A select few levels (exactly how many depends on which version you're playing) are impossible to save 100% on.
* A select few of the normal humans with psipotential gain access to their talents through special drugs.
* A selection of several cases from, a sword who has only sustained serious damage being displayed as dead.
* As electromagnetic waves increase in energy and power, their colour turns more purple.
* A self centered ambitious female villain kills and manipulates others to find Themyscira in order to get her daughter back. Are we talking about Circe in
* , a self-confessed game of "Calvinball" is played with an assortment of board games on the floor, and the rules are that "the rules can never be the same twice."
* A self imposed version, but Raven will save the life of any non-enemy, no strings attached…exactly once. After that, they need to earn their own survival.
* A self-learning computer program that has learned enough to become sentient is the
* a self-propelled barge got lost in the Pacific without fuel or radio — the previous crew left several pairs, parts of accordion. They were rescued after 49 days of drifting.
* Aselian Continuity are something else entirely. Symphonia, and Dawn of the New World have a rare mineral called Aionis that allowed that rule to be broken.
* Aselia the Eternal - The Spirit of Eternity Sword and have a child together. This is apparently completely unheard of and they're a bit nervous about how they're going to explain it.
* Aselia the Eternal - The Spirit of Eternity Sword are both rather emotionless. The latter isn't even an exaggeration or merely based on her behavior since her profile indicates that her sword has eaten away most of her personality. She genuinely feels very little until she gets to know Yuuto.
* Aselia the Eternal - The Spirit of Eternity Sword are killed off. Main spirits result in a game over. On the first playthrough, Kouin and Kyouko are killed off and can be in later playthroughs as well if you don't do the third chapter exactly right.
* Aselia the Eternal - The Spirit of Eternity Sword. Birth doesn't appear to start at infancy for them, however.
* Aselia the Eternal - The Spirit of Eternity Sword. Halion really tries, but she's a bit too slow and strange to pull it off.
* Aselia the Eternal - The Spirit of Eternity Sword has a somewhat strange example in the last enemies you face in the game, which are Eternity Swords given humanoid form. Eternity swords are not normal swords and appear to be sort of mystical or cosmic in nature.

* Aselia the Eternal - The Spirit of Eternity Sword has the Sargios empire, the strongest nation on the continent. The people are actually perfectly content since they don't have to do any of the fighting and are benefited by the imperialistic nature of the empire.
* Aselia the Eternal - The Spirit of Eternity Sword. Kouin comes across as rather perverted and isn't as pretty as Yuuto... but he's also more intelligent, competent and even stronger than he is. He just lacks charisma.
* Aselia the Eternal - The Spirit of Eternity Sword like an absolute horrible catastrophe waiting to happen. Helion did not help in that respect despite her best efforts. Read: Put flowers into the mouths of fish or turning things purple.
* Aselia the Eternal - The Spirit of Eternity Sword. Only Yuuto ever seems to realize it. Deep down, she's really not so bad, though.
* Aselia the Eternal - The Spirit of Eternity Sword than a heroine and does not even have a proper ending. Yuuto is frequently accused of being a siscon due to his overprotective nature, but in the end, it turns out to work in reverse due to her unrequited affections.
* Aselia the Eternal - The Spirit of Eternity Sword. The Ice Banisher skill stops any healing or offensive magic from being cast.
* Aselia the Eternal - The Spirit of Eternity Sword. The next year, JAST licensed the game, and chose to work with the group in order to publish the official translation, which was released in November 2011.
* Aselia the Eternal - The Spirit of Eternity Sword. There's not enough mana in the air for them. However, on other worlds with mana as thick as Phantasmorgia they seem to do well enough.
* Aselia the Eternal - The Spirit of Eternity Sword. Unless they do it during the sex scenes, which aren't part of the English release. On a more important note, neither Kyouko or Kouin ever confessed to the other despite the two actually dating. Both have their own reasons.
* Aselia the Eternal - The Spirit of Eternity Sword unrealistically huge. But Karma? It's bigger than the guy wielding and that guy is pretty big.
* Aselia the Eternal - The Spirit of Eternity Sword was popular at his school before ending up in Phantasmorgia, and after that he ends up winning the affections of essentially every named female in the cast.
* Aselia the Eternal - The Spirit of Eternity Sword where Yuuto refuses to refer to yofwals as anything but waffles.
* Aselia the Eternal - The Spirit of Eternity Sword with a questionable grasp of reason when her character gets flashed out.
* Aselia the Eternal - The Spirit of Eternity Sword work like this. You agree to become one, you get tested to see if you're capable, and if you are, everyone forgets you even existed apart from other Eternals. And then you disappear from whatever world you came from altogether.
* A Seller's Market," when she's lied to by Haley and accepts the lie without question.
* A Semester in the Life of a Garbage Bag: Sean laughs at Jardine's claim that the island of Theamelpos is endowed with good luck. Then he opens a magazine with a story about an unemployed dockworker who got rich and married a supermodel during a vacation to Theamelpos.
* A Semester in the Life of a Garbage Bag = this time, the Bruno Expy has the world's worst luck and is trying to finagle a trip to the world's luckiest island.
* A semi-example, but during the Crisis Times 5 JLA/JSA team up, Shazam is able to end the battle between two 5th Dimensional Imps by combining their names into one word, and getting the good Imp present to say it, causing them to combine into a balanced entity.
* A semi-example of this type of thing is when we hear the middle of Vernon Dursley's "Japanese golfer" joke in
* A semi-humorous example is the forehead tattoo of the badass mercenary Raven in
* A semi-infamous ad toys, so presumably amazing cutting power would actually not be a positive.
* A semi-regular character Methos is revealed to have been the inspiration for the

biblical character of Death, along with his three immortal friends who became known collectively as the Four
* A (semi-) serious example in Episode 25, when a brainwashed Cloud prepares to bring his Buster Sword down upon Aerith. The rest of his friends are understandably horrified.
* A semi-sympathetic example in the backstory of the lawyer, Benjamin Arcinas of
* As EMLL and CSP developed into two different versions of the World Wrestling Council, WWC became a spiritual antithesis of
* As Empathy is exclusive to the hero side of the game, villain players are very used to playing without a dedicated healer on their teams and look even more down on hero players who will not do anything without an Empathy healer standing by.
* Asemu intrudes on a battle between the Earth Forces and Vagan in order to settle his personal score with Zeheart. The Earth Forces have him flagged as hostile and Flit tells him to get lost and not get involved in their business but when he shows he's willing to cooperate Flit relents and lets the three Gundam's team up.
* As engine design improved, battleship performance improved as well, leading to the Fast Battleships that would dominate
* A senile old king is delighted when told of a competition which required people to cut off and mail in the headlines of the advertised newspaper. His
* A senses you're hiding something and threatens to call it off if you don't come clean. You can't, so they do. Or maybe you try to come clean and either they don't believe you, or the proof you provide freaks them out.
* A Sensodyne advert features a woman turning on a tap. The man in the shower shrieks.
* A sentence written in the past appearing in the present letter-by-letter.
* A Sentient Animal by Robert Merle is about a scientist who successfully teaches human languages to dolphins, resulting (to his dismay) in the latter being used as living weapons by the US military.
* A sentient Atlantis (who is partial to John Sheppard) is a common feature in
* A sentient cloak who fights communism with his disembodied head sidekick Robert Mitchum
* A sentiment related to this trope comes up when Pietro escapes from the Asgard-area Human Ranch, only to be reduced to a nearly mindless shell of his former self, and his escape indirectly leads to the Desians attacking and razing Luin, taking the survivors to the ranch. When Sophia is reluctant to have Pietro show the party how to re-enter the human ranch, Sheena angrily reminds her that because of him, many people from Luin lost their lives, and the least he can do is help.
* A separate example is the colour of blaster and turbolaser weapons. In the original trilogy, this trope was used in the
* A Separate Peace, and deals with a young veteran returning to Devon as a teacher, dealing with the effects of the war. It also deals with the attitudes of the students who were facing the near certainty of military service but with no more enemies to defeat, there's no need for it, which leaves many of them wondering what they'll do now.
* A Separate Peace, Finny creates Blitzball, a game to which only he understands the rules.
* A Separate Peace. The author was widely regarded to be closeted and did not acknowledge the same-gender romance in the story until he was in old age.
* A Separate Peace, the main character Gene reflects on the death of his best friend Finny and comes to the conclusion that Finny had to die because he was too good-hearted to be able to live during a war.
* A Separate Peace, who never sees anyone as an enemy, and believes that "when you really love something, then it has to love you back, in whatever way it has to love."
* A September 2017 ad by DirectTV (yep, them again) re-assured viewers that there were still people who enjoyed cable, just like how there are people that enjoy unpleasant things like banging their heads into a low ceiling, drinking sour milk, or getting a paper cut.
* A sequel in the main JLA series, Kurt Busiek's "Syndicate Rules", had the mirror

universe supervillains realizing that the narrative causality law had failed, giving them a chance to win in their alternates' world. Of course the heroes, once they quickly figured it out, went on the attack themselves in the mirror universe.
* A sequel series, released almost 25 years after the fact, does tie up some unresolved plot and character points, though leaves others unanswered and adds quite a few new ones as well.
* A sequel to any story could also have this effect if the author includes spoilers in the summary.
* A sequence early in the film features a variant on this, where creatures and things ran back and forth between doors in a long hallway only when the main characters were not present. One has to wonder whether The Beatles were aware of it or not; since they never saw the creatures, they may not know their house is inhabited by so many zany creatures. Since they later open one door and see King Kong about to abscond with Fay Wray, and another door has a locomotive chugging towards them until the door is closed, it's possible they had some idea.
* a sequence of events that starts with a man in a ski mask holding up a video game store ends with what appears to be a city in ruins. And it was awesome.]
* A Seraphim had already appeared, it just wasn't known. Leliel, the Dirac Sea, is one of them. There's also the bizarre hybrid of Lilim, Grigori, and Archangel known as 02EfA9iel, created by one of Kei's mindbabies taking a prototype Grigori-based Eva way beyond its operational limits in
* A Serbian Film, has been described by its director Srđan Spasojević, as an allegory for the corrupt, post-Cold War government of Serbia.
* A Serbian Film is the only movie that's currently banned in the country. The reason is that it's considered child pornography in multiple countries, including the Netherlands.
* A Serbian Film resulted in the movie being banned in Australia, New Zealand, Malaysia, and Norway. It was also temporarily banned in Brazil and Spain until it was eventually released with some cuts made to the film to excise the more disgusting scenes.
* A Serbian Film shot with him in the fetal position in the shower. Eventually this leads to him killing himself.
* A Serbian Film, the main character's brother talks to the main character's wife about being single, and then takes a trip to the little boy's room to (predictably) masturbate. It doesn't help that at another part in the movie, a porn director talks about how the main reason porn is popular is so people can "cum into a napkin what they couldn't into a woman."
* A serf can gain his freedom by escaping to a freeman town and remaining there for a year and a day; see below for the
* A Sergeant in motion outranks a Lieutenant who doesn't know what's going on.)
* A sergeant reported to Colonel Chamberlain at Little Round Top that their C.O. Vincent was wounded and they had reinforced by a brigade, but their commander was dead and they had moved an artillery battery to the top of the hill and
* A serial killer arranged his suicide to make it look like Mac had thrown him off a roof while handcuffed, causing Mac's career to be in jeopardy for a while.
* A serial killer example would be Dennis Nilsen, who simply didn't want his "dates" to leave him (there was a bit of this in Dahmer's mental dysfunction as well).
* A serial killer finds out a wanna-be bounty hunter is tracking his last victim, so he lures them down into the basement of his plastic surgery business to dispose of them in secret. However this is
* A serial killer named Beer Man left beer cans beside their victim's bodies.
* A serial killer nicknamed Tooth Fairy from season 6 has a tin box with his victims' teeth.
* a serial killer who's come back to keep killing because his ashes had not been scattered over holy ground... and he'd left his girlfriend behind, who is just as nuts as he was.
* As Eric's confidence grows so does his wiliness. He does not defeat older and more experienced mages by overpowering them but by outsmarting them. In this sense,

he's not so different from
* A Series 18 episode has Clarkson talking about how his custom mobility scooter meets British regulations, mixing in some
* a series invovling seemingly scary monsters who turn out to be rather friendly.
* A series is produced for broadcast on both commercial and non-commercial broadcasters, resulting in deleted scenes existing from the perspective of viewers of the former. A recent example is
* A series is produced for cable/streaming in one part of the world, but airs on a commercial broadcaster elsewhere, necessitating the removal of scenes with an unacceptable amount of sexual content or violence. (Examples of this include
* A series of 3-dimensional models in the Chinook Mall (Calgary, Alberta, Canada) are this. They're suspended from a track which they periodically move around. Only one is an actual airplane.
* A series of '70s spy/mystery stories had Jeff Pride become the guardian for Anglo-Japanese Cherry Kobayashi when she was six. The stories are set somewhere between ten and twelve years later, she's grown to be
* A series of '80s commercials for Bartles & Jaymes wine coolers featured the fictional Frank Bartles and Ed Jaymes. Frank did all the talking for the duo.
* A series of ads about 20 years ago promised a "beautiful gift worth $40" if you could name the tune. One was "Yankee Doodle." The next was "I Heard it Through the Grapevine," and they used the part of the chorus where Marvin Gaye sang the title lyrics. It cost $10 per minute to call.
* A series of ads for a language school in Brazil tells the misadventures of two youngsters who can't speak English and wind up in all sorts of misery because of it. Such ads have featured celebrities like
* A series of ads for Axe shampoo features an odd inversion- according to the add, if you use their competitor's product, random gangs of hot women will grab you and give you a bath with Axe Hair-Care Product Like Product (TM).
* A series of ads for Glico candies follows a detective attempting to solve a serial murder. She figures out that a major clue is the vowels in the victims' names when written in romaji. She pronounces it like "bawl".
* A series of ads for GM's Good Wrench service depicted a rival mechanics shop as being staffed entirely by rude, apathetic and incompetent long-haired young punks.
* A series of ads for speech-to-text software spouts how much more convenient it is than typing by showing actors doing chores or similar while dictating a document. Then one of the ads shows a man who's writing a saucy romance novel — then closes and hides it when his family comes home. The software frees your hands —
* A series of ads for Starbucks began with a text screen explaining that the flavor and the emotions and ideas it is supposed to evoke, and compare it to something else that evokes those things, then they show someone talking at length about it. For example, the Italian Roast flavor, "like a classic scooter", was supposed to capture "the romance and spirit of the sweet life", and the commercial then focused on a woman talking about what she likes about scooters and why people are drawn them. The people shown in these segments do not mention Starbucks, Starbucks is not shown in their segments, even in the background, and except for the opening and closing text linking the ideas, the things they are doing have nothing to do with coffee.
* A series of ads in 2021 for AT&T Fiber Internet point out that if you can't get something done because you have cable internet, then you're not a bad person and you just have bad Internet such as AT&T Fiber.
* A series of ads made in the 1990s for Union Bank of Switzerland consisted entirely of mood-lit celebrities, including Harvey Keitel and Ben Kingsley, performing readings of classic poetry (including
* A series of ads several years ago for the everything-shop Argos featured a (
* A series of advertisements for the Vauxhall Astra featured the irascible executive JD (Nigel Hawthorne) and his put-upon subordinate Percy Atkins. In one advertisement, Atkins realised to his horror that the hitchhiking teenagers he'd picked up were JD's children, who'd heard all about Atkins from their father but

had never seen him. Since they were behind a lorry of sheep at the time, he quickly gave his name as Ramsbottom.
* A series of anti-texting-while-driving PSAs from Australia, called "Don't Be a Dickhead", fall into this trope. It proclaims that every time you use a mobile phone while driving, gingers (or "
* A series of articles and Joan Sanderson as Joan Sanderson and John Cleese.)
* a series of artworks. Overall, quite humanoid in appearance, yet obviously not human.
* A series of assassination attempts (one successful, the rest failed with significant collateral damage) is used by
* A series of (banned) "Bud Light" commercials featured a robot that delivered bad news right before offering the recipient Bud Light. Here's one example (paraphrased):
* A series of Bounty radio ads begin with a song themed around a certain drink, such as "
* A series of breakfast cereal toys was even released (if decades later) that follow this trope.
* A series of Bud Lite commercials called "Real Men of Genius" once paid tribute to this with "Mr. Really Bad Toupee Wearer", noting how it couldn't be anymore obvious if it came with a chin strap.
* A series of Burger King ads airing in summer 2010 features people who have bought items from Burger King's value menu. Apparently this was such a "smart move" that they are allowed to, in their own words, "be dumb". For example: handling conductive metal rods on the roof of a tall building during a thunderstorm.
* A series of Cadbury commercials involves creme eggs finding, in a rather suicidal air, ways to smash themselves. One commercial involving a series of eggs and mousetraps, set off by one egg in particular, seems more like a mass cult suicide than a way to consume many creme eggs.
* A series of Christmas ads from West 49 show a bunch of clips of kids throwing tantrums because they didn't get the right thing for Christmas. One clip shows a young boy that got so upset, he knocked down the Christmas tree.
* A series of Chrysler commercials used an instrumental with an intense, pounding beat. However, said instrumental was the background music to
* A series of claymation specials was made in the 1960s, using the soundtracks of the original shorts.
* A series of Coke Zero ads featured various animate body parts. One, in particular, had the
* A series of comics by one 'Enigmatic Envelope', creatively titled,
* A series of commercials both using the same before picture of an over-weight woman, but the after photos are of two completely different women.
* A series of commercials for a diarrhea medication show a person experiencing something great (ex: a man being in a hot tub with two beautiful women eager to talk to him, a teenage girl flirting with a hot guy) only for them to be forced to ruin the moment themselves when they experience a sudden need to race to the restroom.
* A series of commercials for an allergy product during the late 1990s featured a disembodied human nose at their main character.
* A series of commercials for Bud Light celebrates various superstitions that sports fans have, featuring the song
* A series of commercials for Edge Shave Gel seem to carry the message that if you use their product, an army of busty, microscopic women will throw a foam-party among your whiskers, playfully hosing each other down with cutoff-T-shirt-dampening foam. Until they are forced to flee in terror from dismemberment by your advancing razor. The survivors will fly jetpacks up into your nose, where they will disco.
* A series of commercials for Esurance has people, usually seniors, literally interpreting modern social media. For example, an old lady talks about how she's saving money by posting pictures to her wall (an actual wall) instead of mailing them to friends, and uses a CD tray as a coffee cup holder.
* A series of commercials for Food Lion (a regional grocery chain in the

southeastern US) features the Food Lion mascot, a
* A series of commercials for Roomaire (No Sweat!) air conditioners in the mid-1980s used a typical country song playing on midwestern and southern stereotypes this way. "The big fat sheriff was heard to mutter/ If it don't cool off, I'll turn to butter."
* A series of commercials for the Android smartphone featured a girl who couldn't stop talking about her new
* A series of commercials for the (now defunct) Outpost.com seem to have been designed on this principle. If nothing else, they
* A series of commercials for the Yellow Pages featured a scene showing some odd happening, then an entry in the phone book where the scene was a visual pun based on it:
* A series of commercials in summer 2016 show an average family whose Internet provided by the cable company has just gone down. Apparently first thing after it went down the cable company went as far as to lock the family in their houses a-la
* A series of Conservative party ads mocked Stephane Dion, the leader of the Liberals at the time, by calling him a nerd and claiming his name is not masculine enough.
* A series of controversial experiments by Robert White showed that it is possible to transplant a monkey's head onto a different monkey's body, although establishing spinal communication between the two was not possible. Originally proposed by the surgeon as a means of prolonging the lives of quadriplegics whose own bodies are failing, this technique has been soundly rejected by bioethicists... not because it's gruesome, but because donor organs can save more lives if they're distributed among many transplant patients, rather than the whole body being used to aid one.
* A series of Discover credit card ads established a pattern of people calling their customer service line, and having their queries answered by an employee who symbolically looks just like them ("We treat you like you'd treat you"). Then they subverted viewers' expectation that the employee's resemblance was purely symbolic, having the employee in a new ad be the caller's
* A series of Doritos commercials involve this trope where the participants perform this:
* A series of Downy commercials advertising their WrinkleGuard product play the trope straight, then invert it.
* A series of EPs featuring music from the above three albums, grouped by theme:
* A series of Farmers' Insurance commercials include some examples of this, e.g. a driver moving his convertible away from perching birds only to have it filled with cement (and the birds crap on it anyway). Supposedly based on real claims Farmers' has paid.
* A series of fiery accidents involving 1973-1987 Chevrolet/GMC pickups prompted the TV magazine
* A series of flashbacks throughout the first season chronicle the origins of the cowboy who will become the Saint of Killers
* a series of following strips, variety rather than upgrades for their own sake.
* a series of four drawings that paint a rather troubling picture. The first has him holding a cookie and standing on top of K.O., who is lying on the ground and telling him to stop while T.K.O. refuses to. The second depicts T.K.O. attacking a city, with the caption "GET REKT". The third shows him apparently taking over/terrorising the world while people cry for help. The fourth depicts him surrounded by darkness, pulling at his hair and saying "I can't stop" while crying.
* A series of guttural, rapid-fire clicks that accelerate to a cork-like "pop," before ending with a loud scraping sound.
* A series of home safety PSAs in New Zealand began as a commercial for something else (
* A series of humor oriented web videos shows a paper pusher dealing with the
* A series of humorous ads for Norton Antivirus 2011 involved celebrities (representing cyber criminals) wanting to do bad things to critters/inanimate objects/etc (representing the viewer's PC/identity/etc.). The viewer had the choice to deny or allow this to happen. One of these was

* A series of humorous ads for Norton Antivirus 2011 involved celebrities (representing cyber criminals) wanting to do bad things to critters/inanimate objects/etc (representing the viewer's PC/identity/etc.). The viewer had the choice to deny or allow this to happen. One of these was David Hasselhoff and an oscillating fan. One of the "allow" outcomes was Hasselhoff seducing the fan, causing it to melt. Viewable
* A series of independent experiments carried out by a sadistic Harvard psychology professor named Henry Murray in the 1960s could be counted as an extreme (and, as it turned out, extremely unfortunate) real-life example of Breaking Them by Talking. University students were instructed to write an essay summarizing their personal philosophy on life and underlying principles, then went into a room expecting to debate philosophy with a fellow student. They instead faced an interrogation by a far more experienced opponent, whose sole purpose was to attack and ridicule their beliefs at length. Since one of the main goals of the experiment was to induce stress and upset the subject as much as possible, it's not surprising that many students came out feeling traumatized. One of them, a student by the name of Ted Kaczynski, eventually went completely over the edge (for this reason or some other) and became
* A series of inhuman experiments has created a handful of living ignition weapons, people with the power of an ignition weapon. Bam with the Thorn is sort of an example. Two other obvious ones are the Beniamino "brothers", both of whom were known as "The Devil of the Right Arm" at some point, each of whom can activate one of their arms like an ignition weapon. (For Ilmar, it's actually the right arm, and he originally earnt the nickname, but then it came to refer to Cassano.) Rapdevil, who went around pretending to be the Devil of the Right Arm until he got beaten up by the original, also had some weaker Super Mode power in his arm.
* A series of Italian "Coloured is better" laundry commercials play this as a joke.
* A series of Lenscrafters commercials showed people trying on glasses with unusual powers. One man tried on a pair of glasses with
* A series of Levi's Jeans commercials in the late 90's followed the adventures of Flat Eric, a yellow, monkey-like puppet who liked techno music, and Angel, his human partner, who always seemed to have a bored look on his face. The two drove around California, the audience never really knowing what it was they were up to (although it was confirmed at one point that they were wanted for something or other). Despite this, the character of Flat Eric became quite popular in the late 90's, and the song that he dances to in
* a series of 'Lie & Pie' videos that got released across the participating Youtubers' channels.
* A series of Mentos (The Freshmaker!) commercials has the protagonist faced with some conundrum. After popping one of the mints, the character is suddenly inspired by a clever, later-thinking solution to the problem. Noticing the amazement of a bystander, the protagonist triumphantly holds the pack of Mentos aloft, as if giving all credit to the mints.
* A series of murders are carried out in one day. The detectives discover circumstantial evidence connecting a
* A series of Nicktoons shorts called "A Very Aggressive Vegetable" featured vegetables chewing out children for not eating healthy, and one where a potato gets mad at a kid for racism against spotted potatoes.
* A series of OLED Space by LG ads start with what looks like an art piece, romantic scene, or dance party while appropriate music plays in the background, until it's revealed that one of the subjects was on the other side of the fourth wall (grabbing a donut in front of the art piece, rushing to an air conditioner in front of the romantic scene, hula hooping in front of the dance party), at which point the music deflates for a few seconds, before it starts up again as they show off the TV being watched.
* a series of paintings-themed artworks in the style of Edward Hopper.
* A series of Pop-Tarts commercials have really pushed the boundary by portraying the Pop-tarts as sentient beings always being hunted by humans and animals out to

gobble them up. Worse is that the Pop-tarts always lose; an especially weird one has a baby pop-tart eaten by a nurse as its parents
* A series of promotional photos from 2009 featured the indie rock band
* A series of PSAs on the dangers of unlocked guns featured crayon drawings of children accidentally killing their siblings after finding an improperly stored loaded gun.
* A series of radio ads for Progressive car insurance has "listeners" calling in and asking whether they should shop around for car insurance or just go with their parent's company. Are these people calling in expecting that Flo will say, "you should just stick with whatever your parents have"?
* A series of radio commercials for a Southern California tire store had two characters trying to tour the world and constantly mixing up remote locations for more local ones — assuming they were in Ontario (the Canadian province) when they were actually in Ontario (the California city), for example.
* A series of Renault Clio ads in the UK featured a pair of French people, a beautiful young woman named Nicole and a handsome old man—the viewer assumes from their ridiculous
* A series of Santander Bank radio ads revolved around people going to competing banks and getting strange things there, such as a large metal pole ("the shaft"), a man named Jack who follows them around doing exercises ("Jack squat"), or a coat of wool growing on their body ("fleeced").
* A series of seemingly random murders at Spring Break turn out to be the work of a young woman who had been horribly bullied by those kids as overweight and ugly. After a huge makeover, she hunted them all down to kill them off. The episode ends with the woman (in her "original" form) smiling as she's led off in handcuffs. As soon as the cell door shuts, she becomes her current version with her smile fading as it sinks in how she let her desire for payback for some minor bullying ruin her entire life.
* a series of separate, simultaneous plots that all come together at the end: Marzipan and Strong Sad host a seance to contact the ghost of a dead houseplant, Strong Bad and his posse throw eggs and toilet paper at places and people (with the King of Town desperately trying to invite himself along), while Homestar goes trick-or-treating with Pom Pom, Bubs, and Coach Z.
* A series of short plays for kids published in the UK featured a detective with the
* A series of short stories by Robert W. Chambers leave us (and a young fan named
* A series of Simplisafe security system ads feature "Robbert Larson", burglar and satisfied Simplisafe customer, who never, ever removes his ski mask. Not even in the bath.
* A series of Sprint commercials has the setup of a pair of people, one of whom has just received bad news (A football player with a career-ending injury, a guy whose girlfriend that is sitting across from him is breaking up with him) and they repeatedly ask questions while the other people say irrelevant stuff about their phone
* a series of stories about a man who teams up with a space whale. (The stories also featured lots of complex typewriter-generated graphics, for reasons best known to the author.)
* A series of Tesco Mobile ads in the UK centered around a group of people wishing for "a world where strangers... become friends" etc, before cutting to a simple person on a white background asking simply for a cheap monthly rate with a free phone.
* A series of trading cards from the mid-90s explained the difference between the Meddling Monk and the Master with this: The Monk would use a complex time-travel gambit to accrue his fortune, but the Master would walk into the bank, murder the staff, and walk out with an even bigger fortune!
* A series of TurboTax ads mention how you might suffer some horrible fate, like
* A series of TV Commercials for Nationwide Insurance feature a leather-catsuited woman (played by actress Jana Kramer) backflipping around a house undoing the damage done, either by a burglary or by a fire.

* A Series of Unfortunate Events (2004) centering around the children inventing devices from scrap materials lying around. Klaus, for example, creates a grappling hook by combining a bicycle pump, coil, and gardening tool.
* A Series of Unfortunate Events (2004): Lemony Snicket insists that this is a true story that he has extensively researched in an attempt to make the story of the orphans available to the general public.
* A Series of Unfortunate Events (2004) pulls this trope: it looks like you will be seeing a happy stop-motion animated tale about a little elf, but a few minutes later, when the happy elf is skipping over some rocks in the water, an abrupt record scratch is heard and the set lighting turns off:
* A Series of Unfortunate Events (2004) start off being unusually aggressive towards the Baudelaires in Olaf's manor. The Bald Man became agitated with Klaus for interrupting him during his meal, the Hook-Handed Man demanded to know what the kids were doing in a hallway, and the White-faced Women were annoyed with the children entering the parlor while they were rehearsing. All three of these incidents result in the henchmen attacking the children.
* A Series of Unfortunate Events (2004) where the Baudelaires efforts are wasted. Their escape from Olaf's house fails due to Olaf somehow catching the children as they crawl out of the escape hatch. Their efforts in protecting Josephine also fails due to their rescuer being Count Olaf and he pushes Josephine's boat away from his, thus resulting in her being eaten by the leeches you fought so hard against.
* A Series of Unfortunate Events (2017): After Count Olaf locks the Baudelaire children in his tower, he sets an hourglass, telling them their doom will come when the sand runs out. However, the little hourglass is too small and cheap so the sand runs out almost immediately. He then resets it and apologizes, claiming he bought it online.
* A Series of Unfortunate Events (2017) has the Village of Fowl Devotees, who have flags that are simply Nazi flags with crows replacing the swastikas.
* A Series of Unfortunate Events (2017): In "The Hostile Hospital, Part 1", Esme runs into this problem when she wants to capture the Baudelaires in the library, but can't find the right key among the dozens of keys on the keychain. She gets quite frustrated, even attempting to force a wrong key in the lock. By the time she gets in, the Baudelaires have found the film they were looking for and already partly watched it.
* A Series of Unfortunate Events (2017) played for laughs, and even his henchmen look shocked.
* A Series of Unfortunate Events (2017), with Count Olaf composing a song:
* A Series of Unfortunate Events about different ways the author can torment children and the unusual ways supporting characters can be killed. It's one of those books you'll often see teens and adults picking up for themselves, possibly not allowing their own children to read them until they are mature enough that it won't give them nightmares.
* A Series of Unfortunate Events absurdly short distances - most of which are shorter than the limo itself. In one case, they get into the limo only to immediately get out on the other side. When the Baudelaires try to sneak back into the penthouse, they just walk there.
* A Series of Unfortunate Events: A creepy series about the life of three siblings orphaned and sent to live with a malicious distant relative.
* A Series of Unfortunate Events: A film based on the first three books. Three orphaned siblings get sent to live with their abusive distant relative who only wants their inheritance and is willing to resort to murder to get it.
* A Series of Unfortunate Events after it was originally mailed. For context, the late Mr. and Mrs. Baudelaire came home from a trip less than a month after the letter was declared lost in the mail.
* A Series of Unfortunate Events (also named Dénouement), and it answers a ton of the questions in the series, but still leaves a treasure trove left unsaid.
* A Series of Unfortunate Events and a backstory in Book the Eleventh, we learn that his name is Fernald.

* A Series of Unfortunate Events and forcing them to stay on the run for the rest of the books.
* A Series of Unfortunate Events, and one of the identifiers of volunteers.
* A Series of Unfortunate Events) and the English language (for attempting to use such a half-rhyme).
* A Series of Unfortunate Events and the reader starts to need to have read the previous books to make sense of all this stuff about VFD and Beatrice and so on.
* A Series of Unfortunate Events appears to be the group's enforcer, and later on, we meet the leaders...
* A Series of Unfortunate Events are innocent and Olaf is responsible.
* A Series of Unfortunate Events, as the characters begin communicating via telegram often late in the series.
* A Series of Unfortunate Events as whatever onomatopoeia for laughter he happens to be using. He stops doing this in the next book in favor of a more conventional evil laugh, which is mentioned to be something of a relief to the Baudelaires.
* A Series of Unfortunate Events. Based on guesswork about word frequency, Snicket translates "cul-de-sac" as "At the end of a dark hallway, the Baudelaire orphans found an assortment of mysterious circumstances."
* A Series of Unfortunate Events. Basically every single plot point in the series was left unresolved at the end. The last book can best be summarized as "Ha, ha! In life, there are lots of mysteries you'll never know the answer to."
* A Series of Unfortunate Events before the Baudelaire orphans were born.
* A Series of Unfortunate Events, being an actor, has an infinite amount of costumes at his disposal, especially from his evil troupe. He's been everything from a Sikh gym teacher, to a submarine captain, to a carny. No one second-guesses the tall lanky man with an eye tattoo on his ankle except the Baudelaire kids.
* A Series of Unfortunate Events books. It mean "one who trains bats" — and it's an anagram of the name "Beatrice," who Lemony Snicket dedicates all his books to.
* A Series of Unfortunate Events books. There's even an "unauthorized autobiography" on "Lemony Snicket".
* A Series of Unfortunate Events book, where Count Olaf's ultimate disguise is of a pregnant woman. Even the people he's trying to fool think it's ridiculous.
* A Series of Unfortunate Events, boss." The emphasis is the author's.
* A Series of Unfortunate Events, both the movie and the books, with the Incredibly Deadly Viper — especially when it "attacks" Sunny.
* A Series of Unfortunate Events. By. The. Truckload. Just a few examples:
* A Series of Unfortunate Events could be said to be the second variety.
* A Series of Unfortunate Events, Count Olaf has a group of henchmen that help do his bidding. In his group, there are two women, with white powder all over their faces, and they are never depicted without the face powder.
* A Series of Unfortunate Events, Count Olaf suspends Sunny in a cage, and blackmails the other Baudelaire children into playing along him by constantly reminding them that he can make the cage fall on walkie-talkie command.
* A Series of Unfortunate Events, Count Olaf tries to marry his young ward Violet. He didn't use a "position of trust", though — he tried to force her so he can inherit her and her siblings' money.
* A Series of Unfortunate Events derived from the Italian word for "prostitute".)
* A Series of Unfortunate Events, established so as to not distress the audience to the extent that it would have otherwise.
* A Series of Unfortunate Events features a library of some sort which is plot important.
* A Series of Unfortunate Events features one of these, which belongs to the show's narrator.
* A Series of Unfortunate Events for reasons which aren't explained until much later, and no index exist (the staff seem to be expected to memorize it). Also, the children are not given breaks, even for sleeping, they just have to kind of doze at the concierge desk.
* A Series of Unfortunate Events for their baby sister, and the two of them are

pretty much the only people they can trust.
* A Series of Unfortunate Events from the moment they find out their parents have perished in a house fire.
* A Series of Unfortunate Events gave her full name, usually to people who already knew it.
* A Series of Unfortunate Events had its characters escape from prison with an improbable set of equipment that included the bread they were given to eat. This isn't the only example in the series.
* A Series of Unfortunate Events has Count Olaf scream for Mommy while fleeing from a burning building along with his enemies the Baudelaires making him seem as even more of a cowardly joke than he already is.
* A Series of Unfortunate Events has Esmé Squalor, the city's sixth most important financial advisor.
* A Series of Unfortunate Events has some of Sunny's comments, such as her "arigato" in the Slippery Slope, or her saying "Aubergine" to mean that she is making a plot with this eggplant. Others are a mishmash of English ("Kicbucit?" for "Is he dead?") and a couple are plain old Hebrew ("Yomhuledet!" which is translated as "Surprise" but means "birthday" and "Yomhashoah" which is translated as "Never again" but means "Holocaust Memorial Day"). The children also make pasta Puttanesca, an Italian dish translating as "whore's sauce."
* A Series of Unfortunate Events. He also frequently makes comments on Violet's beauty. In a later book, Olaf and his gang were talking about which of the children might have survived a fire. His answer? (Paraphrased) "I hope it's Violet. She's so pretty." Yikes!
* A Series of Unfortunate Events, her fears of them prove amusingly rational for just one evening, when a hurricane strikes her house and causes all her appliances to malfunction in exactly the way she claimed they would. Apart from the realtors.
* A Series of Unfortunate Events (himself a tragic figure) lends everything a lighthearted and over-the-top tone. Besides, many of the actual details, like the costumes adopted by the villains, can be accurately described as "cartoony".
* A Series of Unfortunate Events, his disguises are still comically inept.
* A Series of Unfortunate Events; in reality, they're hidden inside a statue of a large red fish - the red herring. A patient in the Heimlich Hospital has a name that is an anagram of red herring.
* A Series of Unfortunate Events, in the "Beginning" days, Count Olaf creates the illusion of this to their closest neighbor where the Baudelaires are concerned, far enough away to paint a very different picture of who they are, up to passing on the fake message that the lamb she made was too salty and that they don't want to see her; he convincingly shrugs, "Rich kids."
* A Series of Unfortunate Events: In the eighth book Count Olaf began laughing maniacally until his girlfriend informed him the intercom was still on.
* A Series of Unfortunate Events, involving the rather non-fantastical deaths of the heroes.
* A Series of Unfortunate Events in which he spends most of the film bagging how awful it is and during the scene with the leeches at Lachrymose Lake, he actually starts singing "Leeches! Leeches! Who would want to watch a movie with leeches?!"
* A Series of Unfortunate Events in which the Baudelaires are forced to cook dinner for their horrible guardian Count Olaf and his entire theater troupe. Once they finish, Count Olaf yells at them for forgetting to cook roast beef, and out of spite he and his troupe don't eat the food that the children worked so hard to prepare. He then tells them to clean up the kitchen and go to bed. At this, Klaus yells, "You have only provided us with one bed!" which, in turn, rouses Count Olaf's temper and he says they should buy another bed. Klaus tells him that the only money they have is the Baudelaire fortune, which is not to be used until Violet is of age. Count Olaf grows red with anger and strikes Klaus across the face. His theater troupe applauds and laughs at Klaus as they leave with Count Olaf, which firmly implies that they are proud of Count Olaf for hitting Klaus and that Count Olaf felt like Klaus definitely deserved it.
* A Series of Unfortunate Events is a prime example of this. The setting is kept as

vague as possible, grabbing the bad and depressing details from a variety of eras to create an atmosphere of pure misery. It includes, but is not limited to; operating theaters, burning at the stake, freak shows, child labour, broken elevators that require you to walk up 66 floors of stairs, mysterious black-and-white photos, and bulky, unreliable computers.
* A Series of Unfortunate Events is a running gag that even comes up in Lemony Snicket's "Biography".
* A Series of Unfortunate Events is dangerous and forces her siblings back to the ground so they won't get hurt, even though the Quagmires are on the balloon and it is designed never to return to ground.
* A Series of Unfortunate Events is reluctant to believe the Baudelaire's claims that the Viper is innocent because he finds Monty's choice of name for it to be too counterproductive if it's supposed to be a joke name.
* A Series of Unfortunate Events is Sir, the amoral, cigar-smoking lumbermill owner who pays his workers in coupons and gives them gum for lunch; in a later appearance, business is bad, as nearby lumber source the Finite Forest is running out of trees.
* A Series of Unfortunate Events, it should come as no surprise that the Hotel Denouement wasn't all that safe to begin with.
* A Series of Unfortunate Events: Josephine has just barely managed to convince the ax-crazy villain to let her live. What does she do five seconds later? Well, correcting him on his grammar, of course! He then promptly throws her in a lake full of carnivorous leeches. The writer makes a huge point about Josephine's obsession with grammar and spelling. In fact, the way the kids realise her suicide note isn't sincere is by the large number of spelling and grammar mistakes in it.
* A Series of Unfortunate Events, Klaus suddenly remembers that it's his 13th birthday.
* A Series of Unfortunate Events: Lemony Snicket seems to have an affinity for strange and humorous metaphors of this kind.
* A Series of Unfortunate Events live action adaptations, where he's either the same height as her or is taller than her.
* A Series of Unfortunate Events: mad Emperor Nero also inflicted his astounding lack of talent on his unfortunate subjects. In his case, complaining about the racket meant death.
* A Series of Unfortunate Events, many mysteries unsolved and loose ends, it's particularly jarring.
* A Series of Unfortunate Events: Meta-fictional example: books are only written in this type of prose. Actually one of the characters thinks it's less difficult to say "hum" when an unusual word shows up rather than looking it up, with surprisingly good results. Made even weirder by the fact Georgina always speaks in a normal manner.
* A Series of Unfortunate Events musical number and an adorable dancing elf. It's cut off by the narrator.
* A Series of Unfortunate Events novel, this sums up Mr. Sir's treatment of Charles in a nutshell.
* A Series of Unfortunate Events Olaf attractive is himself an unpleasant semi-villain.
* A Series of Unfortunate Events, or just very pale faces. A frequent occurrence is that the Baudelaires are very quick to see through Count Olaf's terrible disguises, but often miss seeing through those of his accomplices. (This element is dropped from both the film adaptation and Netflix series; the accomplices' disguises tend to be just as bad.)
* A Series of Unfortunate Events plays this one for all its worth with Mr. Poe.
* A Series of Unfortunate Events. Pretty much everything that he does is because of his desire to obtain the Baudelaire fortune.
* A Series of Unfortunate Events, Prufrock Preparatory School revels in this trope. Punishments for breaking the school's rules include removing your rights to forks, spoons, glasses and knives at the cafeteria. And if you miss one of the vice-principal's violin concerts, you are required to buy him a bag of candy and sit in

his office watching him eat it all. It's hinted at being more depressing than it sounds, since the vice-principal is such a jerk.
* A Series of Unfortunate Events series based on the books series. Three orphans are sent to a relative who abuses them and plots to steal their inheritance. After they escape him, he continues to pursue them, trying to capture the three and willing to murder anyone who gets in his way. All the while the orphans find out some dark secrets about their parents.
* A Series of Unfortunate Events series has the Village of Fowl Devotees, which holds the punishment for all crimes as burning at the stake. It's mentioned that even putting too many nuts on a sundae is grounds for this. But then, this is a series that really doesn't take itself seriously.
* A Series of Unfortunate Events series. There are times in the series where it appears Violet, Klaus and Sunny are going to catch a break, but then Lemony Snicket crushes all your hopes.
* A Series of Unfortunate Events. She goes so far in her first appearance as to adopt children because "orphans are in." Many of the trends she jumps on are downright absurd, including drinking "aqueous martinis" (water with an olive in it), attending restaurants that serve exclusively salmon, or putting her entire home in complete darkness.
* A Series of Unfortunate Events. She neglects to inform him of this loophole until after he has had her sister released.
* A Series of Unfortunate Events since they are able to escape from many dangers relying only on their skills and knowledge.
* A Series of Unfortunate Events sting humans just for the fun of it. Klaus does state, though, that they are mildly poisonous and a large enough number of stings could cause severe illness.
* A Series of Unfortunate Events: Sunny Baudelaire is notable for biting anything she gets her hands on, and people are no different. How she bites them is how she shows her feelings. If she bites hard, she hates them. If she bites soft, she likes them.
* A Series of Unfortunate Events symbol everywhere, even as tattoos on the ankles of their members.
* A Series of Unfortunate Events that stalks the depths of the ocean, and looks like a question mark on sonar. It gazes in the porthole of a submarine at one point.
* A Series of Unfortunate Events that the Baudelaires saw through them right away while the adults remained almost willfully oblivious.
* A Series of Unfortunate Events: The Anxious Clown, With clown-costumed waiters, balloons, and food with names like "Surprising Chicken Salad".
* A Series of Unfortunate Events: The Baudelaire siblings are allergic to peppermints, a fact often forgotten by their escort Mr. Poe, who keeps absentmindedly giving them some. In the third book, they deliberately eat them to give themselves an excuse to stay home, and their symptoms are quite ridiculous, with Violet breaking out in spots, Klaus's tongue swelling up too much to speak, and Sunny getting both.
* A Series of Unfortunate Events, the character Phil gets his leg crushed. He reacts to this with, "Well, this isn't too bad. My left leg is broken, but at least I'm right-legged." Somebody comments, "Gee, I thought he'd say something more along the lines of 'Aaaaah! My leg! My leg!'
* A Series of Unfortunate Events, the character Phil remains quite upbeat for a guy who is working in a lumber mill, is paid with coupons, and has gum for lunch every day. When his leg is crushed, he says, "Well, this isn't too bad. My left leg is broken, but at least I'm right-legged." Somebody comments, "Gee, I thought he'd say something more along the lines of 'Aaaaah! My leg! My leg!'"
* A Series of Unfortunate Events "The Ersatz Elevator" after Esme pushes the children down the elevator shaft they find the Quagmire siblings locked in cages, terrified, and looking like they've been crying.
* A Series of Unfortunate Events, the events of "The Vile Village" occur on Klaus's birthday. Likewise, "The Grim Grotto" takes place on Violet's birthday.

* A Series of Unfortunate Events, the low-quality Caligari carnival has people mocking 'freaks' such as contortionists and ambidextrous people, dangerous rides, fake fortune tellers, and of course, Olaf.
* A Series of Unfortunate Events the most, and always tries to get them through tough situations.
* A Series of Unfortunate Events the mother of protagonists Violet, Klaus, and Sunny.
* A Series of Unfortunate Events: The Person of Indeterminate Gender is played by a man who wears primarily women's clothing.
* A Series of Unfortunate Events: "The Reptile Room" before Uncle Monty's death when he tells us Uncle Monty's going to die and then goes on to tell us about dramatic irony and how terrible it feels.
* A Series of Unfortunate Events: The Snow Scout pledge is a series of adjectives that goes down the alphabet. The Baudelaires wonder about some of the more contradictory ones (eg. how they can be "calm" and "frisky" at the same time).
* A Series of Unfortunate Events: The spatial as well as temporal milieu of the Series is best described as "everywhere and nowhere", as it's apparently far from most known continents, and the large city the Baudelaires lived in doesn't even have a name.
* A Series of Unfortunate Events the thing, so naturally he expresses great sympathy and regret during the horrible events that occur within the book.
* A Series of Unfortunate Events, the villain's submarine is powered by the labour of the snowscouts, whom they abducted in the previous book.
* A Series Of Unfortunate Events: The weird noises that baby Sunny makes are treated like this, with her siblings understanding her perfectly.
* A Series of Unfortunate Events this in the movie, showing how many problems they would solve by just listening to the heroes. This goes double for Poe.
* A Series of Unfortunate Events this trope is outright given by Lemony Snicket in regards to many of the supporting characters in the series who reappear in the penultimate book of the series. While we are told that some of them died and others are this trope, we are not given any specifics.
* A Series of Unfortunate Events: Though many of Count Olaf's schemes are thwarted, he always manages to escape punishment and go on to torment the Baudelaires again, making their lives Hell all for the sake of acquiring their fortune. His streak finally comes to an end in the final book, when Olaf is harpooned by Ishmael and exposed to the toxic Medusoid Mycelium he had planned to threaten his enemies with. Despite eating an apple that contained a cure to the Mycelium, Olaf was nonetheless mortally wounded and succumbs to the injury, realizing that all of his plans have been foiled, he has nothing left to live for, having lost everyone close to him, and he has no chance of obtaining the Baudelaire fortune.
* A Series of Unfortunate Events to die or meet an ambiguous fate each book, until by the final book he was completely alone and powerless.
* A Series of Unfortunate Events to do much. This, however, is entirely fitting given the way adults are portrayed as universally incompetent or evil (or dead).
* A Series of Unfortunate Events. To make matters worse/better, the author never says just what the question mark was.
* A Series of Unfortunate Events Understandably, many readers were frustrated.
* A Series of Unfortunate Events Unless you happen to be Violet Baudelaire."
* A Series of Unfortunate Events. Unsurprisingly, it's noted that they struggle to actually do their jobs.
* A Series of Unfortunate Events, Violet always ties back her hair when she's inventing something.
* A Series of Unfortunate Events, Violet and Klaus use this to pose as a two-headed person.
* A Series of Unfortunate Events Violet attempts to use fire tongs for several different things, including welding and noisemakers. They only are effective for their final use, however.
* A Series of Unfortunate Events: Violet says this to Count Olaf in the first book when she learns he captured her baby sister Sunny in a bird cage and dangled her

from the window of his tower. Count Olaf's response is "Anything? Would you consider marrying me during the play tomorrow?"
* A Series of Unfortunate Events was released on Friday, October 13. The word "thirteen" appeared on virtually every page of the book.
* A Series of Unfortunate Events: When the Baudelaire children (now orphans) were brought to the ashes of their home by Mr. Poe, a creepy music box plays. Bonus points to the filmmakers for having the music be played on a visible music box jutting out of the rubble, presumably one of Violet's projects.
* A Series of Unfortunate Events when they disguise themselves as doctors and are mistaken by Olaf's associates for the two powder-faced women who are also disguised as doctors.
* A Series of Unfortunate Events, where Season 2 opens with the Baudelaires still sitting on the bench from the end of Season 1. Klaus says it feels like they've been sitting there for months, and even notes their baby sister Sunny has aged into a toddler.
* A Series of Unfortunate Events, where the protagonists are each forced into situations best-suited to their siblings' specialties.
* A Series of Unfortunate Events which takes place on a faraway island, Helquist draws a stereotypical portrayal of this trope.
* A Series of Unfortunate Events, who enjoy either patronizingly or smugly explaining rather obvious facts to the Baudelaires despite the children being far smarter. More often than not, said facts are wrong.
* A Series of Unfortunate Events, who relentlessly pursues the Baudelaire siblings around the world and causes them all manner of pain and suffering in pursuit of their inheritance, killing numerous innocent people along the way.
* A Series of Unfortunate Events, who's apparently so evil that Lemony Snicket won't even tell us his name.
* A Series of Unfortunate Events, who's apparently so evil that Lemony Snicket won't even tell us his name, and the bald man with a long nose, one of Count Olaf's henchmen. In the illustrations, Olaf himself has a noticeable receding hairline.
* A Series of Unfortunate Events, with a village of puritanical fanatics whose punishment for breaking any of their village laws (which prohibit mechanical devices, books which break the rules, and harming the local crows) is burning at the stake.
* A Series of Unfortunate Events (with Handler presented as Snicket's representative).
* A Series of Unfortunate Events with its embedded definitions matching subsequent descriptions. "The restaurant, which was very 'gaudy' (a word here which means 'filled with ugly neon lights') was filled with ugly neon lights."
* A Series of Unfortunate Events with Mr. Poe, who has a perpetual cold that causes him to constantly cough and sneeze. This helps characterize him as distracted and incompetent at his job.
* A Series of Unfortunate Events works out to be an Orphanage of Fear. Although a few of those cases only turn that way because Count Olaf shows up.
* A Series of Unfortunate Events: "You must be a very intelligent man." "Not only am I very intelligent, I'm also very smart!"
* A series of Volkswagen ads once featured a terrible German-accented comedian. The gag is to imply that while
* A series of Warburton's Bakery adverts in the UK used an extremely long-burning (the last ad came two years after the first two, which were six months apart) version of "the third is the punchline". The first one had
* A series of Windex window cleaner commercials featured a pair of birds who were musing about how said cleaner is so bright that birds could get hurt flying into the windows that were cleaned.
* A series of workplace safety PSAs from Canada’s Workplace Safety and Insurance Board depict workers getting into gruesome "accidents" and then rising from the dead to explain how it could have been prevented if the working conditions were safer. However, the ad most people consider the scariest is the first one, where a soup chef slips and pours boiling water all over her face. While the other

ads are meant to be realistic, the workers rising from the dead and talking calmly about their accident despite being horribly disfigured makes it more fantastic, with some finding it
* A series of Wrangler jeans commercials used the first lines ("Some folks are born, made to wave the flag, Ooh they're red white and blue") of
* A series of yoghurt commercials is a "behind-the-scenes" making-of featuring animated yoghurt bottles messing up by being too lively (the yoghurt is supposed to give you energy, of course).
* A series of YouTube videos exist-style edits. A couple of the videos managed to retain their original aesops, while others (if they had any at all) ended up with nonsensical ones like "Hey kid. I'm a computer. Stop all the downloading. Help computer."
* A series-wide example is that the final bit of health is valued more than the rest, allowing you to take more hits than you think you can when near-death.
* A series wide one is "The worst of times are when lawyers have to force their biggest smiles."
* a serious collision in the intersection right behind her. The anchorwoman deadpanned: "They must have been shocked by the gas prices."
* a serious demonstration of the effect that a 90-tonne locomotive would have on a car" mocking detached, unreasonable OSHA bureaucrats and their favourite magical implements.
* A serious essay/article on the subject coming from the hunger strikes of the women's suffrage movement.
* A serious example is implied with Admiral Fujitora's blindness, which was apparently self-inflicted because he didn't want to see any more of the world's evils. Whatever sent him over that particular edge must've been quite awful.
* A Serious Man: After enduring all kinds of torture at the hands of his family, his employers, his neighbours, and just about everyone and everything else in his life, Larry gets an ominous phone call from his doctor implying he's got something seriously wrong with him, while at the same time a tornado descends on his town.
* A Serious Man as blood comes out of his chest. Knowing when he isn't wanted, he gets up and leaves into the night.
* A Serious Man is a very good example of this. The premise is very Job-like, but many people have reported that the worse things get for him, the more you laugh out of the sheer ridiculousness of it all.
* A Serious Man. Poor Larry Gopnik just wants to find some spiritual satisfaction in life when everything in his life is going to hell.
* A Serious Man, which is extremely stubborn when it comes to answering Larry's questions (and ours) as to whether the hand of God is at work in his life, or if there is a purely mundane explanation for everything (as he wants to think).
* A serious one occurs in "Homefront". Robin and Artemis are looking at the security footage to find out what ambushed their friends, only for all four cameras to be wiped out while recording the ambush.
* A serious version of this forms a plot point for a major character in
* A Serta mattress advertisement once had the counting sheep getting
* A servant character is tasked with guarding a rich man's house while he is away. When the rich man returns and asks if anyone has entered the house, the servant replies, "Not a fly!" The pleased master goes inside, only to discover dozens of people in the rooms. When he takes the servant to task for this, he responds that the master didn't find a
* , a set composed solely of cards with a proven impact on tournament play.
* a set of CDs did so on the song "Poor Places" and were sued for copyright infringement by the label that released the box set (a settlement was reached and the sample remained on the album).
* A set of commercials for orange juice had a talking sandwich advise people opening the fridge to drink orange juice instead of going for their intended snack. The usual response of viewers was "If your leftovers are talking to you,
* a set of hammers capable of disabling all electronics they hit (at the cost of limited power for each), a jar that essentially circumnavigates the cameras used by

the Mastermind and reinstalling Keebo's weaponry, turning him into a One-Man Army means no one wants to work with except when required.
* A set of HULU ads have various celebrities encouraging people to watch more television, because it softens your brain so they (being, of course, aliens in disguise) can eat it.
* a set of identical twin police officers with opposing personality but the same rank.
* A set of infinity plus one equipment: The Sequence Sword, the Peytral armour, the Sapere Aude Rod and the Acacia Hat. Each of them were capable of growing by one point in their main stat every time a certain repeatable quest is completed. These quests didn't occur very often, however it was also possible to do two-player co-operative missions that also awarded both players (or just one in the case of hunting missions) with equipment growth.
* a set of Inside Out-themed car toys:. Also the Sadness one kind of looks like an ambulance. Make of that what you will.
* A set of instructions for getting from the Hekawi Indian camp to Fort Courage on
* A set of photos from a photo booth comes alive and talks to Nino. At first, they speak in unison, but then start speaking individually.
* A set of regional commercials for Old Home Bread during the 70s featured C. W. McCall as a truck driver of the same name who regularly stops at the Old Home Fill Er Up and Keep on Truckin Cafe, where he makes sure to have some Old Home Bread with his meal and flirt with Mavis the waitress. These commercials would tell stories about McCall and Mavis, and since he was a trucker, and this was the C.B. radio boom, the stories would often involve McCall's CB radio. McCall would later have a top 40 radio hit with the song "Convoy", which tells a similar story, though without the bread commercial. And that would later be turned into a
* A set of triplets conspire to murder the rich husband of one sister, figuring their identical appearances will guarantee the cops can never prove which one of them did it. Not only are they wrong but as it happens, the man they killed was actually their husband's
* A set of wine ads targeted at women displayed them sitting about together sipping wine, while nearby men humiliated themselves in various ways to try and "earn" a glass of it. The women would laugh and roll their eyes at each attempt, shrugging off the idea that it "deserved" a glass of
* As Europe honed the art of heavy cavalry, so too did they practice through the use of several sports. Most famously in the form of jousting. By that time in history, full-plate armour made most combat long and arduous affairs, and the combatants were able to batter each other mercilessly in training since in general fights were won purely by concussions.
* A seven-man honour guard at the funeral procession for Commissioner Loeb in
* As events progress and he finds himself in increasingly dangerous situations, Gordon in
* A seven year old swallowed a duck whistle and got it lodged in his windpipe. He made squeaking noises whenever he breathed until it was removed.
* As Ever, Booky by author Bernice Thurman Hunter, the titular character wins an essay contest. The result is this trope to a T, including getting her comeuppance from her friends and family.
* As ever, it was Sixie who got it wrong, with a pair of snot-green boots and violently orange spats to not match.
* As evidenced by Lord Yu, even a sarcophagus can, eventually, prove useless, if a symbiote is extremely old. Yu is shown to be suffering from the Goa'uld version of senility, such as ordering fleets to a battle that was fought long ago. His
* As evidenced by Mega Man's most (in)famous utterage of the page quote,
* as evidenced by the French kiss she and Setsuna have for their first pactio. Plus she can be quite teasing.
* A sex act called the "Chuck Berry" has been referred to a few times, though they haven't said what it involves.
* as example (in this case, the violation of the slave trade ban and US slavers trying to have the Mende treated as slaves anyway).

* As expansions have come out, some missing places have been restored. The second (blue) moon has been restored, and it is now possible to visit some places that were missing originally. Some still remain unaccounted for, however.
* As expected (as it's based on historical events), the final season of
* As expected for a martial arts movie, the yin and yang symbol when referring to Po's status as the Dragon Warrior. As a panda he's black and white, and
* As expected from from a Finnish-inspired school, Jatkosota High is the most infamous among all of Sensha-do schools for both its excellent gunners and the insanely skilled drivers. Because their school is poor, the students compensate for their lack of firepower with skills (and some property stealing from other schools) that have been passed down for generations. Because of this, they excel on rough terrains like mountains or swamps. Former vice-commander of Jatkosota, Lili, dodges attacks from Kuromorimine by making her T-28 do a wheelie, something that is lampshaded as borderline miracle as the tank weights 28 tonnes. The current commander's driver, Mikko, makes full use of the BT-42's Christie suspension and already configured the tank for when the treads break. When the wheels on one side are shot,
* as expected, he died in the final chapter doesn't count because she's a girl and it doesn't get in the way of duty).
* . As expected in most gender-bending, the boy-to-girl transformation is more frequent. They can also change the other's clothing, including undergarments, but they can't change the gender and not change the clothing, nor can they change the clothing into garments worn by the other's gender (e.g. Ayumi as a girl wearing a man's suit).
* As expected of a series that puts a lot of emphasis on the succession of the old generation by the new one, all cases of immortality in
* As expected, subversion abounded as the face would counter, reverse, take away, show the ref, or otherwise win the match by using the heel's cheating method.
* As expected, the Factionless subvert this trope; they dress in whatever they can get their hands on, and it's exactly this lack of uniformity that makes them so easy to tell apart from those in a Faction.
* As expected when one of the best dramatic actors of his generation plays Dr. Zachary Smith,
* As expensive as Michael's mansion looks, it doesn't appear to have any sort of security system. Both Franklin and Trevor are able to gain unannounced access to the interior of the house without much effort.
* As explained before, the Scarlet Witch's powers come and go between being from her mutation and being actual magic. Here, they do not: it's just her mutation, magic is never mentioned.
* as explained in her entry in the fan wiki, both of her parents were distant descendants of a Native American tribe that had made a pact with the spirit centuries earlier to provide the spirit with a human host, but neither of them knew about it until after she was born.
* As explained in the above quote, owls are symbols that you've been abducted by aliens in
* As explained in the comic, Tedd is TOO girly for gay men (well, Justin at least) to find attractive. Straight men,
* a sex slave and goes on a rampage across NERV HQ, even managing to impersonate Gendo in order to seize control of MAGI.
* A sexsomniac mistook his fiancee's sister for his fiancee while "sleepwalking" and the DA can't charge him with rape because he wasn't conscious of what he was doing and he regularly had consensual sex with his fiancee in his unconscious state.
* asexual and aromantic. Raphael does care for Lily in his own way, but as a friend, not as a lover.
* asexual is beloved by the asexual and aromantic communities, even if he is a bit dim and fits the "asexual who just cares about food" stereotype.
* Asexuality: A person does not feel any sexual attraction whatsoever.
* Asexuality: A sexual orientation which means you don't experience sexual

attraction.
* Asexuality, as he does not care for the romance going on in the group.
* Asexuality: Doesn't experience sexual attraction vs. is sexually attracted to everyone/everything.
* A sexual relationship between a doctor and a nursing sister is at the heart of the UK medical drama,
* Asexuals sometimes watch porn because they find it fascinating, despite not finding it sexually appealing. Ditto to those who
* asexual than Collin", and by the end of the comic is married, though it's vaguely implied she's not planning on having sex with her husband. (He seems okay with it.)
* as failed clones who have ludicrously short lifespans quick to point out how flawed their logic is and how pointless it is to fight for no reason, with Bats even believing that such irrational behavior has to be the fault of their minds deteriorating. It also happens to be one of the most genuinely tragic examples of this trope.
* As Faith holds Willow at knifepoint, Willow tries to reason with her. Faith senses another speech coming on and invites Willow to tell her it's all right, there's still good in Faith, it's not too late to change, et cetera. Willow furrows her brows and says it's
* . As Faith points out, having sex with a Slayer would give Xander the physical abilities of one (until he has sex with someone else).
* as fans like to call him), he hasn't quite shed his Failbaddon reputation. (As for the "armless" thing, it's because the arms on his figurine fall off easily.)
* As far a literature in general goes, there is a trend of reincorporating genre structures and tropes into the style and depth of "literary fiction". Many writers are referring to this blurring of the established lines as the post-modernist movement in fiction, as literature and genre as we know it today is commonly attributed to the Modernist movement.
* As far as actual characters go, the Dalek Emperor first appeared in Dalek comics and annuals, though he looked considerably different in his first TV appearance in "
* As far as actual dungeons are concerned, Naxxramas probably qualifies. A flying Necropolis filled with more undead horrors your mind can comprehend.
* As far as ads for similar games on this wiki are concerned, see also
* As far as Barbie dolls go, there are two kinds - the kid toy "Pink Box" Barbies, and the "Black Box" ones marketed to collectors, which tend to be more for adults. But to a lot of people, a Barbie is a Barbie, whether it's meant for kids or not.
* As far as baseball goes, Alex Rodriguez is probably the #1 example. While one of the greatest power hitters of all time by pure numbers, A-Rod is a confirmed PED (Performance Enhancing Drug) user, so all of his numbers are automatically suspect. Until Jenry Mejia of the Mets, A-Rod was the first and only person to get multiple PED suspensions in the MLB. Add into that his reaction to being caught using PEDs was to
* As far as Bible translations in general, Eugene Peterson, the main translator behind the paraphrase edition called The Message, isn't very fond of that translation being used and read aloud by pastors in the pulpits during sermons. He intended for his translation to be the first translation for beginners of the Christian faith to read and then be weaned away from to other translations.
* As far as canon goes, the Third Hokage has a very formidable (if aging) monkey summon, while the Four-Tails is a giant sentient mass of chakra in the form of a four-tailed monkey with lava powers.
* As far as character interpretation is concerned, there are also her claims about Voldemort. She is known to have claimed that he is incapable of feeling love and uses the loveless union that he is a product of as symbolism (if not as a cause of it) to make the point. But then she is also recorded to have said that if Merope lived and raised him he would have turned out different. So how again is someone who is born incapable of any positive emotion towards another being in need of only a mother figure to start feeling?
* As far as Commander Vimes is concerned, being a nobleman is a bad job, made all

the worse by having to wear velvet tights, a useless gold breastplate and
* As far as Cordon Bleugh Ice Cream Makers go, there's the Iceman from
* As far as credible villains go, Angelus is not on the same scale as the ascended Mayor but he's a Master Vampire who has been in the game for over two hundred years and is powerful enough to stalemate Buffy, an unusually strong Slayer. His greatest asset, however, (aside from a meticulous brand of viciousness that would make The Joker proud) is his inside knowledge of the Scoobies, which he uses to full effect.
* As far as Earthlings are concerned, Videl and Pan come from the heroic lineage of Mr. Satan.
* As far as fluff goes, the Nosferatu and Gangrel tend to get Designated Hero slots, but if an NPC in a supplement is marked "Ventrue Invictus", you can guarantee that the character is going to be portrayed in a villainous light.
* As far as Fury was concerned, Badra was just another loony whom her mother Wonder Woman had defeated before her time. Then Badra bashed her mother's face, and Fury promised to tear Badra's face off.
* As far as gameplay is concerned, the characters are traveling together as a party, dealing with their stories together and helping common folk along the way. Cutscenes, meanwhile, portray them as overcoming these hurdles on their own, often in situations that would make little sense with a full crew of eight people. And then you get to the party banter scenes, where party members act as if they were present during the other's story cutscenes...
* "As far as I know I wasn't an egg. I don't believe human beings lay eggs do they?"
* As far as it is known, Chihiro Tanaka is not a bad girl -albeit persistent and meddlesome-, but Shinji loves Asuka in spite of all her flaws.
* As far as melee weapons are concerned, the book highly recommends survivors pass up exotic blades in favour of the humble crowbar, for its reach, balance and utility: can you pry open a door or tear down a barricade with that
* As far as movie trailers go, chances are that if it's a comedy or action movie, or just a film that's there to make quick money, the T&A will be heavily marketed. If a male character has a shirtless scene, it's going in the trailer. Ditto for female underwear scenes or even skimpy clothing. Examples:
* As far as music videos go, "These Are the Days of Our Lives" was the last time Freddie appeared. By this point, his illness had progressed to the point where he needed to wear make-up and have the video shot in monochrome in order to hide how gaunt and physically weak he had become, but he nonetheless delivered a stellar performance that belied his failing health.
* As far as other fantastic races, it often seems that the morality of killing the race depends on how much they resemble humans either culturally or physically.
* As far as player-based alliances go, the Red Alliance are literal Space Russians, formed by Russian-speaking players to have an alliance they could call their own. They even had their own Great Patriotic War when they got
* As far as recurring characters go, Artemis was completely absent from the tenth, twelfth, and fourteenth seasons.
* As far as Red Mage is concerned, the less sense a plan makes, the greater its chance of success! He took this
* As far as Russian-American (or Russian-NATO/EU) relations were concerned, it seemed that relations between the two sides were improving for good in the
* As far as Sam Vimes is concerned, the race of any Watchman is Watchman.
* As far as Schlock himself is concerned, the words "temporary restraining order" mean
* As far as secondary characteristics go, males lack eyelashes and have more angular muzzles and narrower ears than females. Some are noticeably taller and stockier, but not all; for example, the exposed muzzle is the only way to determine Wonderbolt (and Shadowbolt) genders (unless they
* As far as sex is concerned, yes. On the other hand, Marcus can't get out of that one time he stole a woman's phone (because it contained hard evidence that Homeland Security had imprisoned his friend illegally for most of a year) and ends up going to prison for it. The judge even mentions that it's a bit of an absurd edge case,

but that
* As far as strictly animation goes, there's a five-year gap between the end of
* As far as studio technology is concerned, the fact that the Beatles used EMI REDD47 mixers, Fairchild 660 and 670 limiters, Neumann U47 and U48 microphones, and Altec compressors to record their music, often pushing them in radical ways to produce the groundbreaking sounds they made, has led not only to new interest in the genuine articles, but plenty of hardware and software recreations of that gear. Oddly enough, even by 1960s standards it was relatively old-fashioned equipment, and Abbey Road Studios was slow to adapt new technology.
* As far as supporting characters go, Garrus is a mix of Trick Shot and
* As far as the "as we know it" goes, this has happened periodically throughout human history in both small scale (see: the fall of the civilization on Easter Island), and large scale; depending on how interconnected your home is to the outside world, the end of
* As far as their society goes, they have themed courts all ruled by Kings, Queens, Royal Couples or a couple of royals all exalted by
* As far as the magic paths go, this is the combat modus operandi of the Creation path. Heals, regeneration, resistance boosts (both status and elemental), extra maximum health, powerful shielding, cannon fodder minion spawning that also tends to be most competent defensively, and more besides; on the flip side, Creation has no damage spells and very few aggressive spells at all (and most of those can also double as buffs).
* As far as the more benign definition in the summary goes, sometimes your purchased item gets stuck in the machine. In most cases,
* As far as the War of the Five Kings goes, Stannis is the one in the right, since Joffrey being a bastard makes him Robert's rightful heir as his eldest brother. He's also the only one to come to the aid of the Night's Watch when they put a call out to all of Westeros. Despite this, his cold and stern personality, combined with the concern over his worship of the Lord of Light, means very few respect him and fewer love him.
* As far as the WW2 complaints go, most of them are due to the sheer umber of WWII shooters there are, while WWI, Vietnam, Korea, etc. get ignored.
* As far as units go, Tanks. Not as fast as Recons, not as powerful or tough as their cousins (Medium Tank and higher), and not as cost-efficient as Mechs but still remain the dominant ground unit on small maps and are a staple of early gameplay.
* As far as we know (certain conspiracy theories notwithstanding), no conclusive or strongly convincing evidence for extraterrestrial life has ever been discovered, despite decades of searching with programs like SETI. That said, the universe is a big place. See also
* As far as we know, Princess Ursa and her mother Rina don't display any firebending abilities, but Rina's father was a firebender — namely
* As far as women go, WWE sure do love the idea of a crazy and unpredictable heel - especially acting very
* As far as working on making children from two fathers, it's significantly harder, as eggs become the core of an embryo while sperm is little more than genetic information. There are a few ideas, but in practice it's quite a ways away still. Also, YY combinations must be avoided because they don't work, so effectively the children will be male 2/3 of the time and female 1/3 of the time. That doesn't even get into the fact that there'd need to be a surrogate mother to actually carry the baby, or an artificial womb outside of a body (while there could in theory be male pregnancies, they would be extremely dangerous, and the technology required to make them would be more difficult than a completely artificial womb altogether).
* As far back as the early 1930s, Thelma Todd was renowned for her skill at slapstick; in
* As far back as the early 1970s, when Vince McMahon was play-by-play announcer, the WWF’s syndicated programs featured pre-taped Christmas messages from the promotion’s top wrestlers, or sometimes just simply a message of peace and

goodwill for Christmas. Said shows would air the last weekend before December 25.
* As far back as the original series' "Let's Go Rider Kick" (performed by
* As far back as the original series, they are shown to sustain themselves on liquid Energon by drinking it. Even when they're purely mechanical, they still have a sort of bionic anatomy that acts as a digestive system.
* as far back, in which the heroine Nora is a (seemingly) flighty, vivacious, kooky child-woman who gradually realizes that she's been so working so hard at playing this role for her more conventional husband — even through bearing him three children — that she has never really grown up and has no idea of her true self, and that their relationship is thus only a game, not adult love. She leaves him to try and learn how to be a fully formed human being.
* as fast as Tengu and as strong as Oni. and Aya have her beat on both accounts.
* As Fate Would Have It, after having Their First Time, talk to one another for a bit before both of them eventually fall asleep.
* As Fate Would Have It, as well as the fact that the Xtransceiver shipping was seen as criminally underrated in the fandom.
* As Fate Would Have It. As Yancy's father states, he regretted agreeing to the arrange marriage and decided to pay off his debt to the former's father over time. When his daughter found and began dating Nate, he was happy that she found someone whom she genuinely loved.
* "As Fate Would Have It" begins with the plane about to crash. The bulk of the episode explains the circumstances that put the characters in that situation.
* As Fate Would Have It between the two until Nate confessed to her on a whim following a fancy dinner.
* As Fate Would Have It, ends up saving the other two from being frozen to death by Kyurem.
* As Fate Would Have It has Nate first come across Yancy by finding her lost Xtransceiver not long after his childhood friend Rosa rejects him. They begin talking to one another through said device, and eventually meet one another in Nimbasa City's amusement park, enjoying the Ferris Wheel view and having dinner together. They later become a couple around 5 chapters in.
* As Fate Would Have It has this happen thrice, with Yancy meeting Nate's parents on two separate occasions and Nate meeting Yancy's parents at the same time.
* As Fate Would Have It, he eventually ends up meeting Yancy. For the rest of the story, their friendship and eventual romantic relationship is covered, with both of them ultimately becoming a couple.
* As Fate Would Have It however, they go on dates at places besides the Ferris Wheel.
* As Fate Would Have It with Nate. Thanks to not having done this before, however, she initially ends up scared that she'll eventually be consumed by her own lust. It takes her talking to Rosa for her to realize that it's a natural thing to do.
* As featured in the credits in the earlier seasons; Adam ended up asking the crew "Am I missing an eyebrow?", after a more-energetic-than-expected experiment with sending static sparks into a fuel-air mixture.
* as Feron does the same in the closing cinematic for the Lair of the Shadow Broker DLC during a momentary power outage.
* As fighting games have become more popular among female gamers, the male characters with either
* As film critic Redmond Bacon argues in his article for The Calvert Journal,
* As flashbacks flesh out Pearl's relation with Rose Quartz, it becomes apparent the two shared a mutual, long-term romantic relationship,
* As for accidental examples, SCPs tend to be much less terrifying if you recognize the decidedly non-anomalous source of the page image. For example, there's one of a large, strange mass of random aircraft parts which is instantly recognizable to anyone who's visited (or even walked past) the Museum of Contemporary Art in Los Angeles, on account of being a perfectly ordinary (
* As for actual fairies in this series, it's averted: in this setting, while they look like tiny winged humanoids and use a form of (very weak) magic, they're only about as intelligent as insects (they metamorphose and lay eggs like insects do)

and are treated like household pests. Occasionally, they're even used as decorations (which is a pun on "fairy lights", the British term for Christmas lights).
* As for Apollo Justice, he is sometimes called "Polly", but his most famous nickname is Klavier's "Herr Forehead".
* As for appealing for hardcore fans, the home video market in Japan, which is largely a form of
* As for Azulon's father Sozin who started the whole mess? While leaving behind a legacy as a feared and successful conqueror, Sozin would spend his last years as a somber and downcast old man, plagued by regrets from betraying his best friend and the atrocities he committed, unable to enjoy his success or attempt to undo the damage he's done. The world let Sozin off, but his conscience didn't.
* As for Blue Kryptonite as Bizarro's weakness, Blue K was introduced in the series in a storyline totally unrelated to Bizarro - it was a total off-switch for Kryptonian powers but otherwise harmless. However, when Bizarro appeared, he was no misguided, well-intentioned dimwit - he was a Phantom Zone criminal who could possess others, causing
* As for Chaos, most who serve it do so for the promise of power and advancement from them, or are even just clinging to it for the hopes their god(s) may help them (they generally won't, and if they do, you still probably won't find it pleasant). However, it's not uncommon for many of their servants to simply become addicted to the horror they inflict in the names of Chaos. With Khorne's followers, it's generally hard to tell due to their sheer
* As for damage to self, the Amakakeru Ryuu no Hirameki requires incredible will as well as impeccable timing to execute, or the reversed blade may well slash Kenshin's left leg off in the process. (The detrimental effects of the entire Hiten Mitsurugi Ryuu on Kenshin are
* As for da Orks, even the runtiest of boyz thinks WAAAGH!!! is a bloody good larf, while the only guiding principle in Ork society is that
* As for Donkey Kong himself, he's largely presented as being more laid back than his
* As for Ekaterin, Miles is her Second Love, after a marriage that started off well but ended in constant emotional abuse. It ground her down until love itself seemed horrible, made worse after her husband's death when various suitors wanted her as an eligible Vor widow to marry. Miles got through by being the one who wanted
* As for examples that completely miss the point of the song at hand, there's a Citroen C3 commercial that features
* As for fire, animals instinctively fear fire. Humans have largely conquered that fear by conquering fire, but it still crept into the subconscious.
* As for France, they hold the record for most losses in World Cup finals (three) and ties with New Zealand for most losses in semifinals (also three). They have yet to win a World Cup.
* As for Gabby's "very best friend" Benson, good luck trying to have one sculpted by a puppetmaker though—a full-scale dummy can go for around several thousand dollars depending on how advanced the controls are. That isn't to say that a full-size Benson figure is out of the question though, as similar dummies can be had for under a hundred dollars, albeit as an entry-level dummy rather than a bespoke, professional-grade figure.
* As for GamePass, the announcement that EA Play would be offered for GamePass subscribers at no additional cost became a big boon in the Series X|S' favor, effectively widening the library of games available for owners of the system.
* As for Gauron himself, he reveals that when he was around the same age as Sōsuke, he was ordered to arrange the bodies of the victims of the Khmer Rouge his Pol Pot colleagues killed. The similarities in that aspect end there, however. Although he was forced to give proper burials to the people his superiors killed, he is shown to be
* As for God himself, he has only ever been seen by four archangels. In the season 4 finale, Zachariah claimed God had 'left the building', and that the angels were

giving the orders. In season 5 however God has been implied to have intervened in the storyline, transporting Sam and Dean out of harms way and bringing the angel Castiel back to life. Subsequent attempts to find him reveal that he is completely apathetic about the war between Heaven and Hell. Either that or while he does want Sam and Dean to win, he needs to be subtle in his methods to allow free will to continue. Then in the season 5 finale it's very strongly implied that
* As for Hao himself, the strict conductor with feelings for Sona, he tells her that she's always beautiful after she nervously mentions to him that it feels weird to her too. Not before dropping all his sheet music in surprise, though.
* As for Henry, he tries not to get himself into trouble. He just has the occasional drink at a party.
* As for his competence in everything not relating to asking Holmes about something, consider a scene in A Scandal in Belgravia: There is a fight going on. The combatants are a bunch of mooks versus Sherlock Holmes, consulting detective, Irene Adler, dominatrix, and John Watson, ex-soldier. Of the three, who does not down an opponent? Yeah...
* As for Jaeger and Hashima, he permitted the former to serve under him despite being utterly mad, and so far, Jaeger has been nothing but help to his cause, with Hashima sticking around due to loyalty to Jaeger.
* As for John Redcorn himself: "Sug Night" has him break down in tears after Hank admits to having erotic dreams about her, showing how much he still loves a woman he can't have and "Vision Quest" shows how painful it is for Redcorn to have to watch another man raise his son.
* As for Kevin, he had a (very) brief stint on the reality TV circuit with
* As for Lelouch, his friend Shirley calls him "Lulu", but he isn't really bothered or embarrassed by this. It may have something to do with his feelings for her.
* As for Liechtenstein, history suggests a relation to Austria, which fans have already considered. Then again,
* As for Lincoln, he was absent from "Net Gains", "Fandom Pains", and "Missed Connection" despite appearing on the title cards and being mentioned in the first.
* As for Luna, it's generally accepted that if one participant is under emotional duress and would not have consented if mentally sound, it is rape.
* As for Marty, he was likely lured to Doc's laboratory simply because he was told not to venture there. The original draft explains that Marty took an interest in Doc's vinyl record collection.
* As for Nancy, there was a failed TV pilot in the 1950s, as well as a made-for-TV movie in 2002 that would function as a backdoor pilot if ratings were good enough (they weren't). After the flop of the
* As for NesQuik itself, it was originally named Quik and marketed as "Nestlé's Quik". In Europe it was known as NesQuik from the start and that name was adopted worldwide in 1999 to simplify advertising. Said advertising now refers to it as "
* As for New Phyrexia's other factions, the Green-aligned Phyrexians of the Vicious Swarm have a few traces of Nazi, with their
* As for personal tough acts to follow, quintuple Olympic ski jumping champion
* As for Pujols' predecessor at first base for the Cardinals, Mark McGwire, he along with a great many baseball players (including Sammy Sosa and Barry Bonds) forever lost their "role model" status when their links to steroids were uncovered. McGwire himself was actually upfront about one steroid he had done, androstenedione, which despite being banned by the World Anti-Doping Agency, was at the time available over-the-counter and
* As for Rassilon, the founder of the Time Lords, he was always revered despite being a bit of a genocidal maniac, but the War pushed him off the crumbling remains of his pedestal.
* As for Ruby's family, her father Taiyang Xiao Long is voiced by Rooster Teeth co-founder Burnie Burns, while her half-sister Yang Xiao Long is voiced by RT's expo and social media manager Barbara Dunkelman.
* As for "Satan", that wasn't explained away. That was just a con-artist

pretending to be Satan (and a bunch of other dark entities from various interstellar religions). Satan never actually appeared in the franchise.
* As for some of Tchaikovsky's other works, you'd likely recognize the swooning string lines from his
* As for specific things not to know, well... there's the Nemesis Continuum, a set of Abyssal
* As for Sugar Belle, she has Mrs. Cake bake 22 different desserts and place a piece of paper in each one with a different part of her proposal written on them. But Mrs. Cake becomes so stressed out about making 22 things that she mixes everything up and causes the desserts to all taste terrible. Then Spike volunteers to help by transporting the notes into the desserts with his fire breath, which causes them all to burn up.
* As for the bosses, the stage end boss is a water plug. For chapter bosses, in order, there is a giant sea bass, a giant spider hanging from the sky, a South American-styled sun god symbol, giant lobster, killer snowman, giant hornet and
* As for the boss fights, one of them has the main character riding on the back of a giant cat and fighting an anthropomorphic sentai wolf on a transforming motorcycle. The cat can also do the aforementioned missile surf while the main character
* As for the distinctive spiraling flght paths which often show at least a few missiles
* As for the enemies of the X-Men (particularly the members of the Brotherhood of Evil Mutants and others), fans tend to hear
* As for the Ferguson era, they developed a nasty reputation for fizzling out in the Champions League; despite being a domestic powerhouse and a near-constant Championship presence, the Red Devils only came away with UCL silverware in 1999 and 2008 while losing the finals in 2009 and 2011 (both times to Barcelona). Then again, winning the Champions League is pretty tough; not that it prevents Liverpool fans from mockingly chanting "Five Times" in response to United fans' chants of "20>18"
* As for the games, bootleggers have managed to sell fake game cartridges in the earlier generations, either counterfeits of the licensed games or knockoff rom hacks loaded onto cartridges.
* As for the ghouls, one of them managed to get hold of two young Warden trainees that were being taught fire magic.
* As for the Hornburg, it is accessed by a high causeway that helpfully forces the enemy to come a few at a time under the defenders' fire. However, the fact that the builders didn't go the extra mile and put in a drawbridge makes this defense much less effective and contributes to the orcs being able to bust their way in with rams and explosives.
* As for the individual members, Jimmy Page was a respected session guitarist and John Paul Jones a respected arranger in
* As for the judges, Mary came to the same decision as Mel and Sue, putting out a statement that she was staying with the BBC out of loyalty and thanks for the broadcaster giving her a career boost. Paul, on the other hand, decided to stay with
* As for the main recurring cast (all of them being seventh graders), despite most of them still
* As for the other Kamen Riders, only the ones that would have plausible ability at fighting frequently engage in hand-to-hand combat, such as Ren (bar room brawler), Sudou (hardened cop) and Asakura (psycho outlaw). The others frequently rely on their armour and special abilities to compensate: for example, Kitaoka is mainly a ranged combatant.
* As for the reporters — well, some of them managed to break the sound barrier all by themselves.
* As for the rest of Europe, Luxembourg and Portugal aren't in much despite being very close to attention grabbing neighbors.
* As for the rest of the conspirators, most of them are either too low-ranking to count as this trope or would serve their nation's interests if they arrange for a

Federation-Klingon war.
* As for the rest of the Todoroki children, it varies. Natsuo hates Endeavor even more than Shoto does (though like Shoto, still loves him enough to be worried when he's in mortal danger) and won't forgive him. Fuyuki, his and Shoto's older sister and second oldest child, is ready to forgive them and wants them to be a real family. Toya
* As for the second part, there is some truth, as several high-profile Nazi officers fled to South America (specifically, to countries that were neutral towards Germany during the war) to escape punishment during the Nuremberg Trials. The idea of a secret "Fourth Reich" came about through the real-life
* As for the Specials, they don't have any kind of "official" name, so the Survivors just call out whatever first comes to mind when they first see them, like "Exploding man!"/"Barf bag!" or "Little guy!". By the third level of the campaign, they've reached some kind of unspoken consensus on what to call them (Jockey, Boomer, Tank, etc.). Only Ellis occasionally calls a Jockey by the alternative nickname "Little guy!" from then on.
* As for the title character, Harry Dresden's best friend is one of the aforementioned Knights of the Cross, as a magic-user he dallies with the supernatural each day, he's conjured up demons and done battle with devils, and he's even sat down and chatted with several deities. But Harry's not very religious, and when it comes to God, Harry thinks that
* As for the variations, Space Marines, for instance, bear a resemblance to knightly chivalric orders more than a traditional army but exactly where they fall depends on the chapter: for example, the Ultramarines with their hyper-adherence to the
* As for the Wattersons, despite the fact that eyelashes aren't a telltale sign, Nicole and Anais's eyes are completely round, as opposed to the guys' eyes which looked like straight tubes.
* As for video recording, any standalone camera on the market can record in HD; even your cellphone can likely do 16x9 HD in landscape mode. As above, talent is the thing to find, as well as ingenuity to compensate for the lack of budget.
* As for villain-to-hero accusations, Dannan, Scipio, Brian, and Ishtar all use this line, though in Scipio and Dannan's case the parents of the heroes killed their father, close enough.
* As for what a "Cuca" is, it's a child-eating hag (not unlike the Baba Yaga character of Russian folklore) with the head of an alligator.
* As for why they're pointing guns at each other, it's most likely because the guy who completes the contract by killing 47 is the only guy who gets paid.
* asgard hail from Othala, it's not explicitly stated that this is their homeworld. In fact, it's not even stated that Ida is their home galaxy. Given that they can galaxy-hop in minutes, it's not inconceivable to assume they could have come from yet another galaxy.
* Asgardians, and probably all deities in the Marvel Universe, can speak every language thanks to a handy little ability called the Allspeak, in which what they say is understood by every species in their own native language. This rather makes sense for a race of gods. After all, it's pretty difficult to tell your followers what to do if they can't understand a word you say.
* Asgardians broadly tend to get stronger as they get older. Odin, relatively old but vigorous at well over 5,000 years old, is described as having aged like an oak tree, having become harder and stronger as he grew older. However, they do eventually decline somewhat, as they age and die, being more mortal than other pantheons — who definitely fulfil this trope, being biologically immortal.
* Asgardians member, Karolina Dean, whose blood is basically a liquid solar energy - a vampire who once tried to bite her got obliterated from the inside.
* Asgard is alluded to have all of the various varieties in its armed forces. Specifically, Loki generally functions as an intelligence gatherer and special forces operative.
* Asgard plasma beam weapons can also qualify since these are the only weapons known to be able to defeat even Ori ships. And unlike the Ori super-cannon, plasma

beam weapons have the same rate of fire but are MUCH smaller to the point where at least four can be fitted onto a single 304-class ship, turning them into
* Asgard's libraries date back over a million years, and quite possibly well before that, since Asgard's civilisation is ancient - they've been gods for over a million years, ruled a galaxy spanning empire for a million or two before that, and only "probably" evolved after the dinosaurs went extinct.
* Asgard's royal palace is also demonstrated to be a played down version of this, like Hogwarts, with the narrative stating that this sort of thing happens to all magical buildings eventually.
* Asgard, they are completely naked. And needless to say, Tau'ri wear BDUs. Genii clothing looks like WW2-era Soviet uniforms.
* As Gekko Moriah's powers include summoning zombies or shadow manifestations to fight on his behalf, Gekko Moriah can fend off skilled fighters without even having to move. With Luffy's first encounter with him, Moriah created a silhouette clone of himself to fend Luffy off as he got up and walked out of the room, to Luffy's frustration.
* As generals they were granted more leeway, but Patton did suffer from his maverick ways, consistently being demoted and kept from a higher command, at one point almost being dismissed from service during WW2 due to his 'poor' conduct outside the field of battle. Rommel, however, was a maverick only in the field, mainly due to frequently outrunning his own supply lines without informing his logistics officers or setting up fuel dumps beforehand. Outside of it, though Rommel presented himself as every inch the perfect officer.
* As Gene Wilder's Frederick boards the train from New York he overhears a married couple arguing behind him:
* As Genta was the only boy who was big enough for his jacket to fit Ran, this made a good bit of sense, even if it was a coincidence. Also, Mitsuhiko likes both Ai and Ayumi, Ayumi likes Conan, and Conan (Shinichi) likes Ran.
* AS-Glacier is a subversion: it's an "Axon vs. Izanagi" match, with the Izanagi side being represented by the Thunder Crash team, usually affiliated with the N.E.G. However, the match belongs to the Strong tier, a tier below Thunder Crash's Godlike tier, and while Axon has representation in the Tournament via the Weak-tier Goliath and Strong-tier Juggernauts teams, the player cannot play with any of these teams unless they have a full Juggernaut roster
* As Glenn Talbot prepares to shove a nasty-looking drill-syringe in the
* Asgore can be seriously debuffed if you eat the pie you got from Toriel in his fight, because he still misses her.
* Asgore is also known to Gerson as "Lord Fluffybuns". When you first meet him, he can't remember
* Asgore makes a scary face during his final attack on a genocide run, as a reference to one of Toby Fox's original concepts.
* Asgore offers you the chance to stay with him if you choose to spare him after defeating him in your fight. However, it's not to be; if you don't kill Asgore, Flowey does it himself.
* Asgore's declaration of war on humanity. While he bears no ill will to humanity, the war is the only thing giving monsterkind hope that they can one day return to the surface. If they kill you and take your soul, then they can break the barrier and return.
* Asgore sometimes suffers from this in some fanworks, being depicted as a
* Asgore the Mercy option on your menu bar, disabling your access to the "flee" and "spare" commands.
* As Green is the color of nature, most Green planeswalkers and mages and many Green creatures can animate and control plants in various manners.
* , as growing up together has made them feel love towards each other.
* Ashad, a Cyberman she was warned about earlier in the season. Ashad forces her to give him dangerous information that he can use to advance his species, setting the stage for the finale, so once all the party guests are safe, the Doctor and her friends follow him into time to stop him. The following two-parter, "Ascension Of The Cybermen / The Timeless Children" changes the setting to the distant future,

with a completely different supporting cast, and is all about the Doctor and her friends' attempt to thwart Ashad's plans for the Cybermen.
* A shaded variation on Hero/Villain Mode, featuring a great deal more detail
* A Shadow Discretion Shot of Pegasus gaining the Millennium Eye, complete with his
* A Shadow Girls Summer Of Love And Madness by Jackson Boughen. It's kind of implied by the title.
* A Shadow Girls Summer Of Love And Madness: the protagonist, Nomie is one.
* A Shadow of the Titans actually has a seminar on this, debating whether or not it's worth it.
* A Shadow of the Titans and enjoy nothing more than fighting (and killing) people.
* A Shadow of the Titans civilians of Jump City, Jade ends up being labeled a public threat. And matters aren't helped any by her having to pretend to be a villain so that the HIVE doesn't kill her.
* A Shadow of the Titans for her results in her being rendering a formless mass of shadow, and Susano sends what is left to the Shadow Realm, apparently killing her, Jinx becomes depressed (apparently neglecting her hygiene) and destroys the Titan's favorite pizza place for petty revenge against them, without any real plan, and has to be rescued by Gadjo.
* A Shadow of the Titans. He apparently walks away more angered than harmed; Penguin speculates that his costume is padded for protection against that kind of thing.
* A Shadow of the Titans inhabited by the Cackler. Whether this is his doing or incidental is unknown.
* A Shadow of the Titans is so angry she is only able to snarl out one of these.
* A Shadow of the Titans: Jinx refers to Jade/Zhu Chan as "Blue", while Gadjo calls her "Little Shadow".
* A Shadow of the Titans) pull the plug on it before it can activate. Afterwards, Robin states that this proves they can't ever underestimate a villain, no matter how simple they seem.
* A Shadow of the Titans that caused the Titans (already unstable following Starfire's disappearance) to fall apart completely. While the letter doesn't give details, Nightwing does imply that there's a moral quandary involved, and implores Robin to do the right thing. Robin initially believes the message refers to the "Star Chan" situation, in which the Titans were briefly split by the decision to keep a brainwashed-via-Starfire's-chi Zhu Chan a hero, or give her back her original chi and return her to villainy. The situation's later resolved in a fairly awful manner, but just as Robin is preparing to sigh and consider the fiasco over, Cyborg points out that in the history that created Nightwing, Starfire would not have been available to trigger the disaster in the first place, so Nightwing's letter refers to an as of yet unknown scenario.
* A Shadow of the Titans, the HIVE has a fully stocked bar in its lower levels, complete with bartender, bouncer, and karaoke machine. Since they're all villains, they don't care that most of its clientele are underage.
* A Shadow of the Titans uses this trope to keep Jade from realizing she's stumbled onto him messing around with her subconscious — he conjures multicolored mushrooms and ducks in top hats, then turns himself into a basketball with a mustache.
* a shadowy NGO, in order to develop Ghana, has the plan to turn a part of the Ghanaian population into cyborgs, and then they would act like mobile hospital, sucking out diseases with machines in their abdomens.
* Asha Greyjoy for Tristifer Botley. They experimented sexually as preteens and ever since Tris has been infatuated with her, convincing himself they're soulmates, and they will marry someday and have babies. He even refused to sleep with anyone else,
* Ash also got slapped twice by Misty very early in the series for his immature behavior (both cut from the dub).
* Ash also invokes this trope frequently in the anime, but instead of encouraging an opponent to strike his Pokémon to trigger its powers during a battle, Ash

encourages his Pokémon to strike
* Ash always had a skin tone was always slightly darker than other characters, though he's undeniably Japanese. Starting in Hoenn he's just barely lighter than Brock and has stayed that way since.
* Ash & Cinders can Still certain parts of the world and keep them from changing on a whim.
* Ash & Cinders features a mythological land that restructures itself as it pleases, and with little regard to the life in the immediate area. The main characters even travel through a forest while it's changing into a mountain.
* Ash & Cinders. He was living a quiet life as a lovable lunatic in the Smallwood due to an as-yet unexplained event that made him decide to give up being a Wizard.
* Ash & Cinders is literally bolted to her own throne by its branches weaving through her body, forcing her to move the branches of her throne with her mind if she wants to move at all. Cinder notes that she can't really tell if the Forest Queen is doing anything of her own accord, or whether her actions are manipulated by something more Fae.
* Ash & Cinders on a race to retrieve their half brother after he is stolen by a Wizard.
* Ash & Cinders Orym and Thavian were both Wizards, both trained under the same master, and are brothers. For some an-yet unspecified reason, had a falling-out that's led at least two known nearly-lethal encounters.
* Ash & Cinders Phira treats Cinder and Azoc like workers and threatens to kill Cinder after her own child is abducted.
* Ash & Cinders, Thavian has yet to be seen with any less than six knives looped through his belt. He's quite fond of using them for intimidation.
* Ash & Cinders to survive an encounter has been Gabrien's wife and the Forest Queen. And they at least had some sort of title.
* Ash & Cinders, when facing the Traveling Dark - creatures that disabled her brother and gave Orym a run for his money, Cinder trips and accidentally wills a burning branch to impale them when she throws up her hand to shield herself.
* Ash and collect the semen for artificial insemination. Occasionally, to help him get excited, they bring in a naked woman without letting him touch her. Needless to say, he doesn't enjoy the experience much.
* Ash and Marona. If Ash was summoned first, he proves wary of Marona, thinking her a duplicate due to her summoning materials being Taro's game and save data.
* Ash and Petals. An example is when he made her train barefoot on broken glass at age 13.
* Ash and Petals is not a dumb girl, but school has never been her strong suit. She only got through her academy days by copying off of Azula.
* Ash and Petals: It's mentioned that Fire Lord Azula had Mai's father publically executed.
* Ash and Petals. Ozai is only presumed dead, as no one saw him die and there was no body left behind.
* Ash and Serena met in a summer camp held a few years before Ash started his journey. The meeting was pretty memorable for Serena and she fully remembers it in the present, but Ash seemed to think it was nothing special and completely forgot about it. Though Ash does remember when Serena shows him a handkerchief that he gave her back then.
* As Hank pointed out to Peggy, even though Cotton is fond of exaggerating his accomplishments he is
* As Han Solo demonstrates in the title and quote, he's in the events of
* Ashanti has a song called "Mother." She sings about her mother and how she thanks her for being wonderful to her.
* Ashan who is very much alive and naturally immortal without any magical help.
* A shape-shifting plant Fae creates bountiful harvests that bring good fortune to those who eat of it. It is explicitly stated many times that she is inextricably tied to her land, and accepts that it is her nature to feed and care for those that feed and care for her.

* As happened most notably after the Chernobyl disaster, while officials were working out how to efficiently communicate what had just happened to the public.
* As happens with space video games, hull failure causes an explosion.
* ASH Archaic Sealed Heat, from Mistwalker, had a partial fan-translation leaked by a beta-tester of said fan-project, which has been dropped.
* as Hardin is a much more militant leader than McNamara, which will lead to problems down the line.
* A shared kill or damaged but not destroyed aircraft would be represented with half a symbol.
* A shark can be seen chasing Scrooge McDuck's submarine in the opening theme.
* A SHARK was subjected to this trope by another shark ending). Cue the puns about sea-sections and nurse sharks.
* As Harry cannot explain precisely how he and Thomas know each other, this tends to lead to a lot of assumptions about him as well. Almost always played for laughs at either Harry's uncomfortableness about this or interfering with his ability to flirt with the attractive women who tend to accompany Thomas.
* As has almost anyone who's stayed in a hotel. Not just sleazy motels, either; even good hotels aren't soundproof, and the chance your room will be next to people having sex is pretty good.
* As has been noted by counter-culture comics for about twenty years now, it gets particularly grating when it's a beer commercial that shows sexy women—because there's a decent chance that immediately before or after you'll see a commercial where it claims pot smoking will
* As has been noted elsewhere on this page, the plague is an entirely treatable illness these days (its effects have been likened to "a bad case of the flu with some pneumonia and chicken pox symptoms tossed in for good measure"). Ironically, this has led to the
* As has been talked about with the Mi-24 "Hind", and it's limitations with carrying troops while laden with ordinance: Getting rid of ammunition to make room to load infantry into your pseudo IFV when under fire is a self-solving problem.
* As has Dario at the end of "The Flame Pokémon-a-Thon", following a confrontation with Ash over his methods in the race. Though he comes back down just in time to blame his defeat on the Rockets themselves and chase them away.
* Ash: A Secret History follows Ash, the female commander of a mercenary company in a rather different fifteenth-century Europe.
* Ash: A Secret History, several characters piss or soil themselves on the field of battle or in other horrifying situations.
* Ash. Ash's Greninja can't even hit base form Charizard, but is fast and powerful enough to keep him on his toes. Once both transform, Ash-Greninja actually gets a rather painful hit in and matches Mega Charizard's power, but still gets beaten.
* As have the Engineer and Pyro now, and the Medic and Scout are next in line.
* A shaving gel commercial portrayed itself as giving such a great add-on to the manly activity that the guy in the commercial shaved his entire head just so the experience wouldn't end. (And it was
* Ash being an observer to Gladion and Lillie's arguement will foreshadow Goh and Chloe and how Ash would have been unaware of how many problems Chloe had.
* Ash briefly wields two swords while fighting on the castle wall's stairs in
* Ashbringer, there is a scene where King Magni Bronzebeard forges the legendary weapon from the purified crystal shard of evil.
* Ash can be pretty enthusiastic when announcing his arrival someplace.
* Ashcan Copy: An adaptation is made solely to hold onto the media rights.
* Ashcan Copy: An adaptation is made when the company's media rights to the original work will soon expire in order to ensure that the company will be able to keep the rights for a while longer.
* Ashcan Copy: We didn't care about the artistic merit, we just had a legal obligation to do so.
* Ash chains Bad Ash to a table in the windmill he's squatting in before hacking him to pieces with his chainsaw. The problem with this is that during the scene where Ash arrived at the windmill his horse, which may have been carrying the

chainsaw, was scared off into the woods by the evil entity chasing him. Ash was left to run to the windmill on foot, where he was clearly not carrying the chainsaw.
* , Ash develops a fairly friendly rivalry with Paul. They still trash talk each other and battle any chance they get, but it's also clear they respect each other as well.
* Ash does this when he realizes that he's won against Sabrina in their gym match when Haunter gets her to laugh, which, due to a telepathic bond with her Kadabra, makes it laugh, too.
* Ashe and Annette, if not recruited, are the last two members of the fallen Holy Kingdom of Faehrgus still fighting after the death of King Dimitri.
* Ashe and Balthier could be read as this, particularly from their scene together in
* As he delivered the final line, he looked Judge Quartus de Wet straight in the eye, an action which Mandela later credited with saving his life, as he felt that, directly dared to order his execution, de Wet didn't have enough ice in his veins to go through with it.
* A Shed For Edward", Philip would talk all through the night, costing Edward his much-needed sleep. When he saw just how tired Edward was, Philip learned to be quiet during the night so Edward could sleep, and this led to Edward choosing to stay in Wellsworth Sheds with him permanently.
* (as he does in the case of Dan Hollis, turning him into a jack-in-the-box) No one is safe in the entire town- not even his own family. Oh, and Peaksville, Ohio isn't even on Earth anymore (or even in this universe for that matter) all thanks to good old Anthony. My, what a good boy!
* as he gets half his goddamn face blown off while lacking most of his head.
* As he had very recently become sexually active, the researcher speculated he was celebrating his ability to overcome his inhibitions.
* As he is leaving after questioning his client, Tom Cruise's Lt. Kaffee turns and says, "Whatever happened to saluting an officer when he leaves the room?" whereupon Dawson stands up and pointedly shoves his hands in his pockets. Great moment, great scene... except that Marines don't salute indoors, while Navy officers would not expect a salute indoors. (Specifically, in the Navy and USMC, covers (i.e. hats) are not to be worn indoors except for a few rare occasions...and in those branches, you are not supposed to salute without your cover. Therefore, there is a very small chance of saluting indoors for members of those branches of the US military.) Dawson does finally manage to salute Kaffee (again, indoors) at the end of the film. At this point, he is a prisoner whose sentence includes discharge from the service; such individuals are not permitted to salute or return a salute (though Dawson probably knows this and is breaking the rules out of respect).
* As he is looking for a wounded bird, Hiro comes across some discarded clothes. He picks one at random... and it just happens to be the underwear of the girl
* As he learns more of Watts's connections to the victim, a sadistic gang leader who tortured and killed Watts's adoptive brother and was released because Watts himself was guilty of evidence tampering, he starts to suspect the murder was premeditated, before realising Watts is protecting the other
* as he lies dying in her arms from Naja sticking his claws straight through his chest,
* . As he locks her away in her bedchamber and refuses to let her interact with anyone except for two or three persons, she may have a point. Forced isolation did such a number on her that she throws herself at Jonnel Stark - whose father's war heroism entitle to a royal bride - and begs him to take her baby sister with them at Winterfell, as she cannot stand the idea to leave her behind with a madman.
* A Shel Silverstein poem had a goose angrily asking why people called him a duck when he walked in a room. The picture shows him looking at the reader as a spear flies towards his head.
* Ashely from Sector Z says "This is going to be delightful!" before she and her friends/team fight
* Ashen. Its feathers alone are about as large as the player character. The

Diasora, a giant furry whale-like creature the size of a small fortress also counts.
* Ashenmoor Liege, which astride a giant bat hunts for the one who cursed its race.
* As he notices that they're about to start fighting through a hospital, Garrus Vakarian cracks "That's unfortunate. Hospitals aren't very much fun to fight through." Late in
* Ashens and the Quest for the Game Child inverts this: London doubles for Norwich.
* Ashens' Christmas specials he brings out a pair of socks which say "Crap Christmas present" on them.
* Ashe of the same game is one of the nicest characters in the monastary and similarly wields a bow. Unlike Claude, he actually uses the Sniper class when
* A Shepard romancing Kaidan outright states that s/he is turned on by watching him fight in the Citadel DLC (a rare heroic example, unless s/he's a Renegade).
* as her dad appears, not knowing that there is a hole in his car made by the robotic Bebes while they capture the wrong person: Ron Stoppable (disguised as Mr. Dr. Possible) only to be brought to her arch nemesis, Dr. Drew Lipsky (often known as Dr. Drakken).
* Asher gets half of his face chopped off, and we get a nice view of it in the strip where it happens. He "fixes" it with a crude cybernetic mask.
* As her home is the actual place/plane/dimension, Maze considers Earth a hell she is willing to brave for Lucifer even if she is looking for a way to get him to willingly go back.
* as her nail polish contains the same poison (also put there by the killer). When she bites her nails due to the stress of the trial (she is a VERY sheltered girl), she collapses on the stand. Should the player pick the wrong option at the trial's end, her condition worsens and she dies in her hospital bed that night, her verdict being postponed for eternity.
* Asheron's Call 2 Syndrome" when discussing the problem that MMORPG sequels (spiritual or otherwise) are liable to run into (namely that the first installment is doing pretty well or you probably wouldn't be having a sequel). The term didn't stick. The phenomenon, on the other hand, is pretty much this entire page.
* Asheron's Call for two players to work together to glitch through a door.
* Asheron's Call had a Shimmering Skeleton Key as a rare item, which could unlock any lock in the game but only had one use before it broke. The best bet was the use it on the Colosseum Vault (which normally required you to win the Colosseum to get a key for, and, in addition to some really good random loot, always had two random Empyrean Rings.) Once the Gauntlet (basically the Colosseum on steroids) was added near the end, it became better to use the key on the Gauntlet Vault instead.
* Asheron's Call had at least two examples. The first was actually called "The Underground City" and it was the former home of Elysa Strathelar and Thorsten Cragstone's rebels. The other was Xarabydun, a settlement in the middle of the desert strangely full of plant life.
* Asheron's Call has low-grade Chorizite which can be made into weapons that ignore magically modified armor and protection values.
* Asheron's Call that unique NPCs actually respawned due to lifestones (In game devices used to set your respawn point), while this might make sense for intelligent creatures, it still doesn't explain how unique animals and the like can respawn, not to mention the obvious problem that in most cases theres clearly no lifestone nearby. Also, neither "version" of this explanation accounts for why certain creatures only "portal in" to certain locations (such as high level monsters only appearing in the games designated high level areas, even though the portals would have no way of "knowing" how to assign creatures to the right area based on their power) Really, this is one of those game mechanics that should have just gone unexplained.
* Asheron's Call: the default Marionette, the Dark Marionette, the Mad Star Marionette, the Cursed Marionette, the Damned Marionette, the Fallen Marionette, the Malignant Marionette, and the special mobs the Puppeteer and Yaja the Shepherd. Marionettes are magic-using constructs that appeared in Dereth in Portal Year 12. They are suggested to be linked to the Virindi.

* As Herself. Christene shows up in-comic to compliment protagonist Zoe's fashion design work.
* As Herself for her then six-year-old daughter. She also sang the opening and ending themes of the show for the same reason.
* Ashes 2063. There is an alternate path through that deviates to a less spooky abandoned mall, but years of disuse made the entrance hard to find.
* As he's about to play something on his guitar: "You know that song 'Amarillo by Morning' by George Strait? Well this here don't sound anywhere close to that song!"
* Ashes and killed most adults, thus making the only survivors younger children or elderly people, who both have no problem mistrusting teenagers.
* Ashes, Ashes sing the eponymous nursery rhyme to draw attention to their skeletons.
* As he says in his stand-up act: "If you were offered $100,000 to kill a dying show, you're a fucking idiot if you turn it down!"
* As he says to his companion upon arriving at said school: "Are we there already? Oh well, I'm sure I won't last longer here than I did at any of the others."
* As he says when one of his targets tries to buy his mercy: "you can tame a dog with food and a man with money, but you can never tame a
* As he's being pulled into a limbo between dimensions, Talgeese cries, "This can't be happening!" Before admitting, "...Well, I suppose it could, but it shouldn't be happening!"
* Ashes by Ilsa J. Bick, an electromagnetic pulse turned most teenagers into zombies instantly. This is different from most, because the zombies aren't dead, they seem to be extremely brain-damaged living people. They also cannot change you into a zombie through biting, instead their bite is like a regular person biting you.
* Ashes by Ilsa J. Bick, some sort of electromagnetic pulse instantly kills all adults and turns most teenagers into zombies.
* As he's frying in the sun, he's ranting at Goku and wondering why he wasn't destroyed with the rest of the Saiyans when Frieza destroyed Planet Vegeta, and then flashes back to the day Frieza did so; during that time, Cooler saw Goku's space pod escaping the explosion, but refused to intervene, partially because he had his own schedule and refused to fall behind to cover Frieza's own mistake, and partially because Goku was
* Ashes Of Empire deals with Lyonesse's efforts to keep out the "Barbarian Plague" — an Imperial bioweapon accidentally released when reavers raided biowarfare labs (placed on the Empire's borders to keep them well away from inhabited planets) looking for technology to scavenge.
* Ashes Of Empire: The "knowledge vault" on Lyonesse hasn't reached this level yet, but they're working on it.
* Ashes Of Empire to use hyperspace for interstellar travel instead of the wormholes they would run out of fuel before getting to their destination.
* Ashes Of Honor, Toby prefaces her comments "Not to be rude or anything." Riordan observes that always means rudeness will follow.
* Ashes Of Honor, Toby talks of how proud his parents must be after Quentin breaks them into a place. Quentin only grins.
* Ashes of Honor transforms when Tybalt collapses. Toby has to rush to arrange for the healer to be brought in — and allowed in by the magic.
* Ashes of Love and seeing his fiancée sleeping with his brother, all within the span of a few days.
* Ashes of Love and was promptly subjected to extreme hatred and cyberbullying from fans. It got so bad she decided to quit Weibo.
* Ashes of Love: At the end of the series Run Yu atones for his actions by accepting an eternity of loneliness.
* Ashes of Love: Both Xu Feng and Run Yu have their personality flaws downplayed in the series and become more likeable than in the novel, though this effectively changes Run Yu's moral alignment.
* Ashes of Love: Liu Ying wields a whip, and uses it to duel Xu Feng and fight off a group of assassins.

* Ashes of Love: Run Yu. In the series, he's abused and mistreated by his father and stepmother, and overlooked or disliked by many of the other characters. Among the series' fans, however, he's one of the most popular characters. Some even like him better than Xu Feng and Jin Mi.
* Ashes of the Past), and the three Beasts of Ecruteak all see themselves as siblings. Suicune admits to being a bit unsettled whenever she sees her own doppelganger being affectionate with her brother's doppelganger.
* Ashes of the Past, as it took place on Ash's 13th Birthday. As a result of Latios' sacrifice in the original timeline, Ash didn't do anything for his later birthdays.
* Ashes of the Past: As the dialogue of the Pokémon in this fic is translated, and quite often are allowed to determine their own fighting styles, they often do this.
* Ashes of the Past, Cyrus ends the world so he can recreate it in his own image. Arceus dislikes this, and creates a new Dialga in order to send Ash, who had been (maybe) saved from the end of the world, back in time to the start of his journey, with knowledge of the future, the ability to use aura, and the ability to restore memories of the original timeline to those he knew, in order to prevent the end of the world.
* Ashes of the Past gives us the Lake Trio, who refuse to clarify their gender beyond stating that "it's obvious" and may be clueless that others don't think so, and then there's Mew, whose sex is unknown, and uses both masculine and feminine pronouns because (s)he finds binary gender boring.
* Ashes of the Past. He also uses the signs as a version of Wood Hammer.
* Ashes of the Past He's now officially running a corporation in addition to being a published author and television personality.
* Ashes of the Past. However, in the new timeline, he manages to save her.
* Ashes of the Past is that Ash tends to heavily damage the gyms he fights in).
* Ashes of the Past. Lampshaded by several characters, who joke that his Rock Type specialty in itself is misleading.
* Ashes of the Past: Lance and Agatha have heard all the type jokes, and are not amused when Lorelei makes one at them.
* Ashes of the Past, Riolu and Lucario have a sense of justice apparently written into their very DNA; Aaron's Lucario realizes that Ash is telling the truth when he sees his Riolu defending him, something that wouldn't happen if Ash was a bad person.
* Ashes of the Past treats Victini's V-Generate like this, as it was used to destroy Hiroshima and Nagasaki in the fanfic world's history.
* Ashes of the Past with a tactic called the Bull-Dozer. It involves Squirtle riding all five of them at once , and the Tauros running directly forward crushing everything underneath them. Anything that survives then gets attacked by whatever was behind the Bull-Dozer (read: Ash and his team).
* Ashes of Time by Wong Kar-wai is probably the most "artistic" martial arts film ever made.
* Ashes to Ashes (2008). Alex Drake may be the only woman born who can hold her own in a wine bar with Gene Hunt and an epically bad mood, and she has every excuse in the world for doing so.
* Ashes to Ashes (2008), Alex has drunk too much (again) and has passed out on her couch. Gene, also tipsy, covers her with a convenient blanket and staggers off, back to work. Considering how much time the two of them spend fighting, it's a very sweet moment.
* Ashes to Ashes (2008), Alex's voiceover on the opening titles mentions time running out for her to get back home (i.e. to the present day). This isn't explained in the slightest, though, since neither world, now or then, is in any imminent danger whatsoever.
* Ashes to Ashes (2008) as she stops hearing/feeling things from the 'real world', and focus shifts off her fight to get back to her daughter, implying that she may be beginning to either forget her old life or accept death in Season 3. In the Series Finale, Alex is stated to be dead.

* Ashes to Ashes (2008). At the end of season two, they were getting happily married. By the start of season 3, they are separated with barely a single line from Shaz about being sick of Chris's immaturity or some such reason stupidly contrived by the show's writers.
* Ashes to Ashes (2008): Chris and Shaz between seasons two and three.
* Ashes to Ashes (2008) DI Alex Drake arrives in 1981 dressed as a prostitute, and the entire station thinks she actually is one until she produces her warrant card.
* Ashes to Ashes (2008) Diary to uncover a secret meeting between him and a murder suspect.
* Ashes to Ashes (2008) doing this with his glasses - mainly to look cool, but also to underscore how much more human he appears without the glasses.
* Ashes to Ashes (2008), Gene Hunt declares that he can transfer Alex Drake from CID because she is "causing disconsternation amongst her male colleagues." To which Alex immediately replies that "Disconsternation is not a word."
* Ashes to Ashes (2008), Gene Hunt has a bright red Audi. "Fire up the Quattro!"
* Ashes to Ashes (2008), Gene Hunt mentions how Al Capone was caught for tax evasion. Inspired by this, the team arrest a troublesome loanshark for outstanding parking tickets.
* Ashes to Ashes (2008), Gene Hunt sees that Alex is shivering and looking unwell. His remedy for that is to wrap her in his coat and drag her downstairs to a bar (resulting in her looking rather ridiculous as she's already wearing her own jacket). Of course, this being Gene, he grabs his coat right back when he's called away.
* Ashes to Ashes (2008) incidents in the 70s and 80s, a period when the London Metropolitan Police in general and the Flying Squad in particularly might just as well have been another gang.
* Ashes to Ashes (2008)) is far smarter than Ray or Chris and often provides valuable information when solving cases.
* Ashes to Ashes (2008) link in the chain, who's dating the guy in front of her, simply rolls her eyes and tells him to get on with it.)
* Ashes to Ashes (2008), Sam Tyler, died in a car accident after spending seven years in 1973 onward. One year later, when Ashes begins, his body has yet to be found.
* Ashes to Ashes (2008) sees everyone in the office suddenly start talking in the names of boy bands yet to come into existence, much to Alex's despair.
* Ashes to Ashes (2008) So, definitely demonic, maybe or maybe not Satan.
* Ashes to Ashes (2008)'s office. They do, however fall asleep together on Gene's desk and have a scene the next morning in front of the rest of the team who don't know this is what they were doing.
* Ashes to Ashes (2008): Subverted by Gene and Alex falling asleep in Gene's office after bugging Mack's office... and Alex is snoring.
* Ashes to Ashes (2008) the cops suspect someone protesting about the Docklands redevelopment might try something on the Royal Wedding day, so they round up members of the protest groups, and one man from the Anti-Nazi League by mistake; he gets the worst of it because he talks back.
* Ashes to Ashes (2008) times between Gene Hunt and Alex Drake, with the same resolution. Arguably, one party was unconscious for three of these.
* Ashes to Ashes (2008) to play strip poker. However, Chris's lack of knowledge in poker means that he ends up losing most of the hands... much to Ray's disappointment.
* Ashes to Ashes (2008), when in order to smoke out a suspect from several possibilities without arousing suspicion, she decides to (in her words) "invent speed dating twenty years early".
* Ashes to Ashes - although whether the drugs are the cause or the result of his space madness remains unspecified.
* Ashes to Ashes, Gene and Alex have finally cornered a very nasty character. Gene proceeds to read him his rights, but being Gene, does his own version: "Anything you say will be taken down, ripped up and shoved down your scrawny little throat until you choke to death! Gene Hunt, chapter 1, verse 2."

* Ashes To Ashes had this: "That's very sweet of you, but you just told me the comets are tiresome."
* as he suddenly arranges his wedding to someone the clan wouldn't really approve. Fortunately, it's a subversion as Lan Wangji is in a consensual relationship with his sweetheart Wei Wuxian, rather than wanting to trap him into marriage.
* as he's unleashing the Rumbling upon Marley. Ignorant of the Colossal Titans flattening every human and building under their feet, he can be seen as his younger self, soaring above the clouds — which are actually steam and dust coming off of the Titans and destroyed places — and finally seeing 'this scenery' of true freedom. It's unclear if this is his way of coping over what he's unleashing upon the world or a delusion to justify is actions, even to himself.
* Ashe Ubert reveal that he also enjoys more raunchy tales involving knights.
* As he used to do in his Glory Days, a big strategy that Batman employs for his return is to terrify criminals and Mutants who have so far been enjoying a free reign of mayhem in Gotham.
* As he walks away from the Mars colony as it's being destroyed, knowing that it, being a fixed point in time, cannot be saved, he hears the screams of the perishing people in his headset. Eventually, it gets too much and the Doctor, utterly terrified of becoming the single survivor once again, turns back and, in a frenzy, tries to take control of the laws of time.
* as he was able send Mata-Nui in another world, and take over his body, making a god.
* As he was about to be executed, Giuseppe Zangara, the would-be assassin of FDR, shouted, "Goodbye to poor people everywhere! Push the button! Go ahead, push the button!”
* As he was about to commit suicide, no less. They were ruining his big dramatic moment.
* As he was leaving Dr. Strange's manor, he summons Mjölnir (in the form of an umbrella), and it again takes several seconds for it to reach his hand. This time, things are getting knocked down and glass is breaking as it travels through Strange's manor. Thor awkwardly apologizes as he's waiting for it to get to him.
* Ash Face: A character survives an explosion and ends up with a face covered in soot.
* Ashface's Daughter has his eyes turn completely red whenever his true berserker curse activates.
* Ashface's Daughter is described as the most notorious assassin in the empire. He does rather dote on his daughter, and threatens unspeakable horrors on a couple of bandits who dared threaten her.
* Ashface's Daughter may be attempting to assassinate his nephew, but he makes sure that the families of people who have died in his service are well-taken care of.
* Ashface's Daughter pretty clearly states that's he's rather pathetic when it comes to fighting.
* Ashface's Daughter refuses to attack Anna during training, she's angry and asks him if it's some ridiculous chivalry thing where he can't hit a girl. It turns out that he has no problem with trying to hit her, instead he refused because he was terrified that as soon as he did, she would hurt him pretty badly once he failed to connect.
* Ashface's Daughter say that because they deal with life energy, necromancers make the best healers. One necromancer, Anna Dreschner, is seen healing someone who had a crossbow bolt punch into his chest.
* Ashface's Daughter wears one of these and has never been seen so far without it.
* Ashfall, but in a horrifying way: Instead of helping people, FEMA restricts the movement of refugees, and their camps operate more like concentration camps rather than refugee camps. To make matters worse, they execute non-compliant individuals by locking them up in doghouses and subjecting them to starvation diets. This is done because apparently it's easier to just say that they died from exposure to the elements rather than straight up admit to murdering them. Darla and Alex escape when the former offers to be a prostitute for the utterly corrupt captain of the FEMA camp, then takes her opportunity to steal a bulldozer and break open the

doghouse that Alex is locked away in.
* Ashfall, center on the Yellowstone volcano erupting and majorly screwing up civilization, at least in North America.
* Ash Firin may be a horribly burned pyromaniac with a creepy voice, but when he met a little girl who was brought into Superjail by mistake, he instantly gets attached to her, throws the inmate who wanted to burn her into the incinerator and starts being his parental figure. He also inadvertently named her Cancer (pronounced San-sehr) mistaking the medical bracelet in her arm for her name.
* Ash. Fortunately, Logan happens upon the scene and manages to scare the two men off.
* Ashfur serves the purpose of having a one-book romance with Squirrelflight, who
* Ash got possessed a few times by an evil being. One towards the end of the Battle Frontier arc ("Battling The Enemy Within") has him being possessed by an ancient king bent on getting back at the Legendary Pokémon
* Ash has been confused for someone else a few times, some of whom even had a Pikachu. And then there's Ritchie...
* Ash has been forced to cross-dress once each region after this—as a one-shot female NPC in Hoenn, and as a
* Ash has been shown to still have the power twice or thrice. It's just that he doesn't train them and has no special equipment to channel them (he probably left Aaron's gloves behind after the movie) so they are rather underdeveloped and not really good for anything, except finding runaway Riolus.
* Ash has gotten fried by Pikachu so mch that he's built up a near-total immunity to electric shocks, surviving jolts that were outright
* ASH has very low-level telekinesis and a superhuman grasp of angles, resulting in this.
* Ash himself starts to take his losses in good spirit after his post-Kanto
* Ash himself to battle in his place, as Ash was ill at the time. James had previously done so in his partner Jessie's place under similar circumstances.
* Ashi borrows Aku's catchphrase in episode 4 of season 5 when she rants to Jack.
* as Hiccup’s mother Valka unlike of the vikings cared deeply for dragons to point where she refused to return to Berk after being carried off by one and lived among them. Valka is delighted that her son shares her ministrations and eventfully returns home knowing everyone now loves dragons as much as she does.
* Ashida Kim, Christopher Hunter, and possibly Dr. HaHa Lung (Radford W. Davis)
* Ashida Kim is a self-proclaimed ninja who is based in Lake Alfred, Florida. Having written over 30 books on the subject, he claims to have learned his ninjutsu from someone named Shendai. He also claims to have met Count Dante (who is best known for his "Deadliest Man Alive" ads appearing for years in comic books) and trained under him. He also has posted a $10,000 challenge to anyone who wants to fight him. It should be pointed out that the aforementioned $10,000 is not awarded to the person who defeats Kim. It is Kim's fee (plus travelling/lodging expenses and a $25,000 appearance bond assuring the challenger is "serious") for showing up to the fight. Long suspected to be the pseudonym of a Christopher Hunter, recent investigations have suggested that Ashida Kim's birth name is Radford Davis. Also, despite the Japanese first name and Korean last name of his favorite alias, Mr. Davis is very Caucasian.
* Ashido and the Forest of Menos were designed by Kubo, with the full intention of having Rukia encounter him in the manga. However,
* Ashido is shown to be an example of this when another character walks in on her changing.
* Ashido Kano from the Forest of the Menos episodes, who is presumably still living in the titular forest.
* A shift toward emphasizing stability muscles has had several strength training regimens like Crossfit and sports-specific workouts add strongman-style exercises like flipping a tire or wringing out a wet towel: the muscles that these exercises build are not directly involved in most competitive feats of strength, but
* Ashi is confirmed to be the sole surviving sister of the Daughters of Aku.
* Ashikabi of Thunder and Lightning: Tsukiumi tries to attack Minato the first time

they meet, leading to both of Minato's present Sekirei attacking her. When Tsukiumi insists that matches are supposed to be one on one, they remind her that attacking an Ashikabi is also forbidden.
* Ashikabi of Thunder and Lightning Uzume snaps at Miya after the latter scolds her with the dreaded Han'nya mask for a dirty joke, telling Miya that even if she doesn't react to Minato she's still going to ask to move in as it's better than dealing with someone trying to force her morals and opinions on others.
* Ashikabi of Thunder and Lightning when she found this out and makes her desire more just by thinking about it, and it's likely why Yume could transplant her Tama into Musubi. Her best guess is that either the Sekirei are clones of ones that already existed, or were somehow regressed into a fetal state from an outside force.
* Ashildr, who only shows up a few times in a single season, canonically lives from the 9th century until
* A Shilling for Candles, the con man Herbert Gotobed makes his first appearance dressed as a monk. It turns out that he is genuinely, though not sincerely, a member of a small religious order, which he joined with the intention of sweet-talking his way into a position of authority from which he could embezzle its assets.
* As Himself: A celebrity played by the actual person as opposed to an impersonator.
* As Himself appears in the scene of the Schindler Jews walking across the fields slightly earlier.
* As Himself as an emotionally abusive wife to Mr. Peanutbutter who is oblivious to how bad her movies are.
* As Himself guests as a hammy pop diva whose every move is mimicked by her troupe of backup dancers.
* As hinted above, the Rebel Alliance was very prone to arm any transport they could due them having very little numbers of actual warships, and generally of smaller size, compared to the Empire.
* A shinto priestess allows the victim to speak through her by magic and give his version of the murder in
* Ash involves Earth waging a nuclear war against its only extrasolar colony (the colony wanted economic independence). By this point, the planet is a radioactive wasteland, but the Earth military (based on the far side of the colony's moon) keeps dropping nukes on it. It turns out that two cities have survived: one underground and one underwater. The underground city has worked for a long time, building thousands of nukes in order to obliterate the lunar base. They finally launch them, but the orbital and lunar defenses manage to eliminate most of them, with the lunar base experiencing relatively minor damage. The Earth forces then realize that the nuclear barrage wasn't the main attack. Some of the missiles were programmed to strike an asteroid in order to cause it to fall on the lunar base. They manage to attach some engines to it and aim it at the planet. Due to a freak coincidence, the asteroid somehow ends up destroying a large chunk of the planet (not just the surface).
* Ashiok is an almost literal nightmare fetishist who enjoys witnessing and creating nightmares. After taking a peek at Elspeth's nightmares of her life as a slave of the Phyrexians, he became fascinated by them and has decided to pay New Phyrexia a visit.
* "A Shipful of Shivers", one of the ghost's tongue fills the screen as he is licking Jessie and Meowth.
* A Ship Named Francis has been promoted to their level of incompetence.
* ''A Ship of the Line''. As his ship was undercrewed, Hornblower had exempted sailors from the merchant convoy he was escorting press-ganged in his crew. When the captains of the convoy protested he said his sailors had misunderstood his orders and that he had sent them to search for volunteers, and that he'd check who was a volunteer and who was pressed... And as soon as the convoy captains return to their ships, he sends the signal "All volunteers".
* Ashi Productions - Founded by ex-Tatsunoko staff, known as Production REED from

2007 to 2018, but then changed their name back to Ashi Pro in 2019
* A ship sent on a rescue gets its communications down and its engines damaged, but the allied ship doesn't know which way to go. So he shoots in the direction of the jump point, despite the fact that he's spinning out of control.
* Ash is a pretty good case of this as well. Consider this: When Ash and Kate race
* as his character of the same name sure knows how to tinkle the ivories.
* Ashi, searches for him while meeting various characters whom he'd helped in the past.
* as his head opens up and an exasperated alien shakes its head tells her to give it a rest already.
* as his name implies, to the most unruly children. Sometimes he kidnaps the worst ones, who are never seen again (and implied to be taken straight to Hell or eaten).
* As his name suggests, Hooded Justice, the first costumed adventurer in the
* as his name would imply, of course). However, he is quick to point out the positives as well, things most people don't even think of.
* As his powers began to develop as a child, he started to hear his father's thoughts. He came to the realization that his father really and truly hated him because he was responsible for his wife's death, though he acted as he loved him. One day, Psycho Mantis burned his entire village to the ground out of pure hatred for humanity, and especially his father.
* Ashi stares at his face with confusion, but Jack has no idea why. By the time it wears off, Jack still hadn't noticed anything.
* As historically nobility equaled warrior class, worth as a vassal was earned in warfare, and commonplace wars and duels let the stronger take over the weaker. So in the Early Middle Ages, higher nobility had to be highly skilled in combat to stay such, through
* Ashita Dorobou of sorts. Straitlaced protagonist Kyouichi Miyasako, 30 years old, broke up with his quirky, free-spirited girlfriend Ashita Tendou way back in college, and has been haunted by regret ever since. Suddenly, with a UFO hanging in the sky over Tokyo, she returns to him, wearing the same maid costume she was wearing when he dumped her, and she hasn't aged a day. He tentatively accepts her back into his life, even though something feels off about the whole situation.
* Ashitaka does this to get to San and Eboshi when San attacks Iron Town, in a rare combination of this and
* Ashita mo Tanin, the protagonist Akio's new boss, Tsukada, suggests that he wear an apron to express his feelings for his childhood friend-turned-lover, Ryousuke. Akio wears an apron with underwear underneath and welcomes Ryousuke home from work. An excited Ryousuke strips Akio of his briefs and completely loses control and later tells Akio to never ask his boss for love advice again.
* Ashita no Nadja but truly cares for Francis and doesn't use her riches to make herself look better than she truly is.
* Ashita no Nadja has Hermann's plan to steal Nadja's brooch, ruin her chance to claim the Preminger fortune (though she doesn't care about money and only wants to meet up with Colette) and become heir.
* Ashita no Nadja Ironically, Bandai would later make Disney merch for Japan and Asia.
* Ashita no Nadja: It starts when Nadja has to leave the only home she has known, travelling with the Dandelion Troupe to find her origins and grow up...
* Ashita no Nadja takes place in various European countries several years before the first World War.
* Ashita no Nadja, which was made for a preschool and elementary-school audience, tells the story of a teenager who goes on a search for her mother.
* Ashita no Nadja, who travels around the world searching for her mother and helping others.
* Ashi. Whenever sufficiently enraged enough to fight someone, she's absolutely brutal and ruthless to her opponents; as best seen when she battles, for example: Jack, the Dominator, or that Orc Army.
* Ash Ketchum acts like this in the episode "Brave the Wave." He was acting all high and mighty and got too carried away until he challenged Brawly in a gym battle

and lost. When Brock tries to advise Ash about how wrong he was to force Treecko to fight, Ash angrily tells Brock to shut up.
* Ash Ketchum has never captured a Legendary Pokémon, but he's befriended most of them,
* Ash Ketchum himself certainly counts; he's not very bright when it comes to social cues, and has admitted that he's
* Ash Ketchum's mother Delia has a bad habit of giving him embarrassing reminders while in public (ex. changing/packing his underwear, etc).
* Ashlanders firmly consider gold coins to be this. That doesn't mean they won't take them off your hands, however. After all, you aren't the only clueless city slicker in the world...
* Ashlee Simpson has a hidden note about being yourself in spite of issues in the spine of the cd case.
* Ashlee Simpson image. She eventually let it return to blonde, and has since dyed a deep red.
* Ashlee Simpson is about someone who feels like the person they're in love with was their lover in a past lifetime as well.
* Ashley also gets wasted at some point, but you only see the aftermath, what with her curled up on the floor with a massive hangover. Shepard can then proceed to make fun of her.
* Ashley America argued the business practices of Valkyrie Woman's Pro, the first all women's promotion in New York City New York since Betty Niccoli got the ban on woman wrestlers lifted, unconscionable, accusing them of depriving starving male wrestlers of work and demanding they only run a single women's match(
* Ashley America is this in Valkyrie Women's Wrestling. She joined the locker room for the purpose of exposing and putting an end to women's wrestling, or at the very least the first women's wrestling promotion in New York since
* Ashley America made her debut in Valkyrie Women's Pro Wrestling protesting the booking of Nyla Rose, calling it immoral that they would book a "Native American" while leaving young male wrestlers out of work and reminding them the country was founded by Christopher Columbus and the pilgrims. In addition to the
* Ashley and James can sneak into the back, while Zaeed makes a pass at Samara.
* Ashley Angel, who was in the boy band O-Town and also had a solo career, was also the voice of Alex in
* Ashley can also be this for a male Shepard assuming you carry the romance through the original trilogy, as Ashley was the first female character introduced in ME1 that isn't the middle aged non-love-interest doctor, or Shepard herself if you're playing Femshep.
* Ashley Crawford, better known as Big Bertha. In her civilian identity, she's a conventionally thin model; however, her mutant power allows her to swell her body mass immensely, transforming her into a
* Ashley Eckstein Ahsoka Tano since she puts a lot of her personality into Ahsoka's character.
* Ashley Eckstein. She originally auditioned for Padmé, but was deemed too high-pitched and instead was cast as Ahsoka.
* Ashley had light blonde hair in the cartoon, but in the comics, it's a more orange shade.
* Ashley is also presented as an obvious final girl, being a fairly meek
* Ashley is rescued by Shepard (and Kaidan) on Eden Prime from overwhelming geth forces.
* Ashley Johnson. Cipes even stated that Johnson is his cartoon girlfriend.
* Ashley Judd appeared in a cameo as a conspiracy theory-obsessed prisoner that was cut.
* Ashley Judd likes being "in a cathedral of trees and the sanctuary of canyons." Judd's love of nature led her to be locked out of her cabin at the Ahwahnee hotel in Yosemite without her clothes. Judd leaned outside her door trying to get her yoga mat when the door slammed behind her. She covered herself up with her yoga mat and went to the lobby to get a new key. It was only later that she realized that not only was she naked, but her face had also been covered in pimple cream.

* Ashley/Kaidan will break up with Shepard in the second game, although it's possible to make up with them eventually.
* Ashley Katchadourian, one of the smallest teenagers, has the deepest female vocal range.
* Ashley Massaro either is remembered for her terrible wrestling (as WWE never trained her properly) or for her Playboy cover - specifically the segment where she unveiled it, removing her top to show Playboy bunnies over her nipples.
* Ashley Massaro may have come into play - as reports surfaced that it could have been a second Ashley Massaro, a Las Vegas-based bikini model.
* Ashley Massaro mocking her. Though opinions on her have likely softened in light of her suicide in 2019.
* Ashley Massaro's momentum was killed in WWE. She only wrestled for three years, yet suffered about as many injuries as someone who had been wrestling for ten.
* Ashley, most popular girl's name in 1991 and '92. Like Charlie, Ashley has also seen alternate spellings that are more clearly feminine, such as Ashleigh and Ashlee.
* Ashley or Kaidan go well regardless of if you were in a relationship, though in the third game you get the opportunity to patch things up.
* Ashley Parks was caught and stuffed into the Billy animatronic by Bon (along with
* Ashley's alternate armor in 3 has some catsuit qualities to it. In the same game, there's Eva Coré, who's kitted out in the same catsuit as Miranda, which can then later be put on
* Ashley seemed like an example of this at first, but in the end it was inverted
* Ashley's maternal grandfather tried to pull this with her parent's relationship for similar reasons, a traditionalist Japanese man who didn't want his daughter marrying a man who was half-white and half-Chinese, but Patrick talked to him. Then they argued. Then they got drunk. After that, they fought over who would pay for the wedding and all problems were resolved.
* Ashley Smith is a sad example of this. She was a teenager originally arrested and sentenced to a short sentence in a juvenile detention facility for throwing crabapples at a mailman in late 2003. However, her sentence - which was originally supposed to be for only a few weeks - quickly extended into years after she racked up 50 additional charges while in custody for fighting with the guards or damaging the facility. Her sentence was eventually converted into an adult sentence and she was moved to an adult prison, where she committed suicide in 2007, four years after first entering the prison system for what amounted to a minor harassment offence.
* Ashley "Starexorcist" Swaby went from a fanartist of the show to a concept artist on Ross O'Donovan's upcoming series Gameoverse.
* Ashley was attracted to Elliot just from watching him on his show with Susan and became even more interested in him upon learning he can turn into a woman. Her sexuality was discussed between Elliot and Tedd, but they aren't sure either. Turns out, she
* Ashley Wilkes and Melanie Hamilton are engaged during the very beginning of war. He ultimately survives the war, but refuses to be called a hero, depressed by the war horrors.
* Ashley Wilkes, who disagrees with the American Civil War but is willing to fight anyway.
* Ashley will even tell Shepard 'with all due respect' at the beginning of the game (when talking to her on the Normandy prior to arriving on the Citadel) as a preface of telling them that they're selling themselves too short if Shepard has the War Hero background and tries to downplay their actions.
* Ashley Williams, although less in the sense of hatred than a refusal to completely trust or rely on them. She appears to have her reasons for disliking aliens, as her grandfather was commander of the Shanxi garrison during the
* Ashley Williams. Amusingly, James Vega still jokes about her being "a fun girl when she actually lets her hair down".
* Ashley Williams has also been labelled this trope thanks to her redesign in the third game. Her previous appearances had tied-back hair and an armour design that

everyone else uses. In
* Ashley Williams is also one and talks about her family extensively, both because it's a tradition stretching back several generations and because they were unfairly maligned after the First Contact War. This is because Ashley's Grandfather, who was a General commanding the Marine garrison defending the colony of Shanxi, was forced to surrender to the Turian invaders due to low supplies, numerous civilian and military casualties from turian orbital bombardment, and no immediate aid or reinforcements. Thus gaining him the reputation as the first and only human to ever surrender to Aliens. Made worse by the fact that the aftermath of the war created a very prevalent anti-alien culture in the Alliance.
* Ashley Williams. Play your cards right in dialogue and this will be invoked by Ash herself.
* ASH like "all-cyborg" or "voodoo-esque powers". Pretty much all of them have exclusively paranormal membership. Hard to compete with people who can shoot lightning and throw cars when you can't.
* Ashlyne Huff's "Run to You" treats this behavior as more romantic than anything else, as the singer describes herself as Supergirl and will "protect you from the world" at a moment's notice.
* Ash managed to exorcsises one of the Zombie Gary's to learn some info about how he and the others died.
* Ashmedia, the Overlord of Lust. While it's not stated outright, it's very clear that she has Histrionic Personality Disorder, as stated below.
* Ash Morgenstern. His father is a Nephilim who was fed demonic blood, turning him into a black-eyed
* Ash nazg durbatulûk, ash nazg gimbatul, ash nazg thrakatulûk, agh burzum-ishi krimpatul, languages (our English, the Black Tongue, and the Westron language the notional "real" text was translated from).
* a shocked John calls him out for drowning Angelo Bronte and feeding his body to an alligator: "It ain't nice, I know it, but it is either us or him! I figure it might as well be him." This changes the context of the original line to John deliberately quoting Dutch.
* A shocking, but simultaneously fascinating example from an aquarium in New Zealand:
* A Shock to the System: All of the murders Graham commits are cleverly disguised as accidents, so the police can never prove he's guilty. There's not enough even to arrest Graham, let alone get a conviction.
* A Shock to the System is infested with "a greenish biomatter" that looks like both meat and mould.
* A Shock to the System It comes in handy later, as it's used for distracting an enemy.
* A Shock to the System, Michael Caine discovers just how easy to get away with murder, and decides to test the limits of his ingenuity and the cops' credulity.
* A Shock to the System: Stella realizes that Graham was involved with his boss's death after finding the incriminating lighter he left behind, but is intimidated into keeping silent when he makes clear killing her is something easy for him. Graham is satisfied on seeing she's realized this and lets her go.
* A shoed Giant Foot of Stomping makes an appearance in the opening credits of
* Ash, of course, thinks that Sewaddle is cool, and ends up catching it.
* A Shoggoth on the Roof, with his devoted young wife by his side. He actually winds up the hero of the whole musical because of this.
* As Homer and Bart are playing in the yard, a news banner rolls across the bottom of the screen displaying the message, "Yes, we even advertise during movies now." The implication is that the advertisement is being done live, but the joke is lost on a DVD.
* Ash On Yo Head to a full body with none of his other body parts being seen prior to him becoming whole again.
* a shooting occurred in Munich, Germany. The attacker was an Iranian who was alleged to have yelled "God is Great" or "Allahu Ackbar", a sort of battle cry Jihadists utilize, prompting people to declare it another ISIS attack. It was soon

discovered, however, that this claim was unfounded as the shooter had no links to ISIS and his particular brand of far-right politics were in fact a twisted form of European ultra-nationalism rather than Islamic fundamentalism. The shooter had looked up to Norwegian right-wing terrorist and mass shooter Anders Brevik for inspiration, his victims were mostly foreigners (many of whom were Muslim), and he was yelling to onlookers that he was German. The fact that Iranians are mostly Shia who oppose Sunni ISIS was a bit of a giveaway to this trope. However, since ISIS had been committing so many attacks as of late and the fact that the Sunni/Shia divide is not particularly well known in the west, it took a while for people to figure out it wasn't an ISIS terrorist attack.
* A "Shoot" in wrestling is a term for something that happens which wasn't in the script, contrasted with something combined before, a "work". The etymology may come from wrestlers accidentally "shooting" their opponents through ropes. And due how
* A shopkeeper does this to Link, then admits that it's a hobby of his. He doesn't like it much when Link manages to pull this on him.
* A short clip may be seen after the end credits "500 years later," where Red XIII is running around with two offspring and the city is wrecked, but plants are growing everywhere. This also happens at the very beginning of
* A shorter example was one strip where a group of predators fell into the rabbit warren, forcing them to disguise themselves as rabbits until they find a way out. At least one of them ended up spending the rest of his life there, growing old and marrying and still wearing that rabbit disguise.
* A shorter narrative poem that uses stanzas is a ballad (especially if it is set to music)
* a short film called "Cheese" loosely based on the real-life Sutherland sisters (see "Real Life" section below) featuring several women with appropriately-long hair.
* A short film sometimes shows up as a Youtube pre-roll ad featuring numerous wearers. However, none of their faces are shown.
* A short has a mule that chases you if you sneeze and stops once it hears a sound of an alarm clock.
* A short independent film had an eager teenager mail-ordering a sexbot, but it arrives without the manual. He tries to get it to work, but it refuses to have sex
* A short list of things Vimes has resisted: The Gonne (which corrupted everyone else who held it except its creator and Carrot), The Summoning Dark (a quasi-demonic entity of pure revenge which managed some control before
* A short lived one involved a string of three posts on /v/: "When you see it", "you don't see
* A short number titled "Bright Canary Yellow" or "Loneliness Of Evening", which appeared in
* A short one appears in the Dark Knight Rises, with Bruce getting back in shape
* A short one plays out as Fury and Maria are pursued by enemies and Maria runs out of ammo.
* A short online story described a writer being visited by a flat character, on behalf of all the characters who have been killed by the eight deadly words, and seeking the author's help in revitalising them and making their stories engaging. The writer declines to help, since he doesn't care what happens to them either.
* A Short Stay In Hell, where after death, a man is sentenced to a limited stay in Hell before he can go to Heaven. Of a multitude of hells, he is sent to a library filled with books of every possible combination of characters on a keyboard and tasked to find the autobiography of his life among the nearly infinite number of nonsensical volumes.
* A Short Story About Love seems to have started to understand the concept.
* A short story, a murder mystery, is set on a Mercury with a city on tracks.
* A short story and script for several anthology series: a man invents a memory enhancement drug, but finds that the result drives the adult insane. A baby/young child takes the drug, and their developing brain adapts to the new load. As a result, the child becomes a rich genius and take control of his parents and then the world.

* A short story "Bílá hůl ráže 7,62" ("White Cane 7.62") by a Czech author
* A short story by Edmund Cooper has teams of American, Russian and British scientists all building incredibly elaborate Doomsday Devices that will destroy the world completely if anyone tries to use nuclear weapons or invade their countries at all. This ends up causing world peace; in a subversion
* A short story by J. G. Ballard has World War III happen over the space of about five minutes, but the American people don't even
* A short story called "Master Race" had the conquistadorial aliens' mighty armada of miles-long starships flee the Solar System in terror after their scout swiped some comic books from a boy's treehouse and the aliens concluded these were historical records of the awesome powers of humanity.
* A short story featured a black businessman who frequently harangued the people around him. When a scientist appears with a helmet that he claims can allow you to read minds he promptly tries it on and starts hearing just how much people hate him, either for his behavior or his race. Worse the helmet burns out leaving him permanently stuck hearing the thoughts of everyone around him driving him insane due to being unable to cope with reality being far harsher than the fantasy he'd lived that people liked him. Eventually, he commits suicide in the asylum they place him in (no surprise there, given what kind of thoughts he got bombarded with THERE).
* A short story in one DC comic had a man wrongfully convicted of a crime and sent to Arkham Asylum. By the time the error was discovered and the order to release him was given, the asylum and its unique blend of inhabitants had crushed his sanity.
* A short story of the same series also describes virtual space combat played by several passengers of a transport ship. The ship is also transporting actual
* A short story titled, "And Now, A Word From Our Sponsor" (possibly by
* A short story titled "Whatever Gods May Be" (author unknown) subverted this: the main character volunteered to be left behind on Mars after an accident meant their ship didn't have the fuel to take off with the full crew. He told the other astronauts he'd freeze himself to wait for rescue, but in fact he
* A short story turned the Literal Genie clause back on the Devil. The Devil offers a single wish to anyone in exchange for their soul, with the limitation that if the wish is supremely selfless, the Devil has to spare the person and cease tormenting humanity forever. A man accomplishes this by wishing,
* A short summary for all the non-Americans who can't see the video:
* A short, three-strip story has Jhim ask out a somewhat mannish woman who looked like an attractive male from behind. He tells PeeJee that they got along really well; if only she were a man! (PeeJee, naturally,
* A short time afterward, Lumpy himself catches a cold because of Giggles sneezing on him, but has to
* A short time ago Levis ran ads for their "go forth" campaign in black and white, showing young models doing things like standing alone in a field with either recordings of a Walt Whitman
* A short tutorial stage with Wario as its host, followed by a stage hosted by Mona or Jimmy T.
* A short while later, an old Commonwealth Space station is found manned by kids. Thanks to Dylan's access code, they are able to open the station's hangar, which reveals dozens of slipfighters, each of which is armed with a Nova bomb. At least one inhabited star system is blown up by the fanatical kids in a suicide run, but Dylan ends up safely detonating the rest and confiscating one from a recovered fighter.
* a shot and wounded KGB agent leaves one on a door, followed by a trail of blood, allowing a CIA agent to track him down and eventually kill him.
* A Shot at Glory in which a small Scottish football team from the Third Division (managed by Robert Duvall and owned by Michael Keaton) reaches the Cup Final against all odds - and loses.
* A Shot at Glory were real-life players at the time of filming. The staged football matches in the film all appear fairly realistic as a result.

* A Shot in the Dark, an attempt at murder is made at a nightclub during a flamenco dance, with the gunshot being timed to coincide with the dancer's boot tap.
* A Shot in the Dark does this with several botched attempts at killing Clouseau.
* A Shot in the Dark from a "Phantom Killer" (his neurotic boss, Dreyfus). When it strikes three, it explodes, but Clouseau is pretty much perfectly okay.
* A Shot in the Dark he said, "I know I fell off the sofa, Madame. There's no need to tell me: everything I do is carefully planned, Madame."
* A Shot in the Dark: Inspector Clouseau, while going undercover as a hunter, angrily shoots the crow that's splattered on him... and is immediately arrested for hunting without a license.
* A Shot in the Dark movie, involved Inspector Clouseau having to sneak onto a nude resort to find a witness. They end up having to escape for some reason or other and end up arrested for their trouble.
* A Shot in the Dark (see film examples below). The Clouseau and Cato characters wore only fig leaves.
* A Shot in the Dark spoofs this trope. Inspector Clouseau tries to pull it off, but he left the door open when he walked out, and as he turns to walk back in someone tries to close it — which means he puts his outstretched hand through the frosted-glass window.
* A Shot in the Dark" was originally to air on November 15, 2015, but was replaced by "Peter's Sister" (which was originally to air the following week) following the ISIS attacks in Paris two days prior (due to the plot of Peter shooting somebody and being charged with a hate crime), and then it got bumped again due to the San Bernadino shooting, making the final air date December 13, 2015.
* A shot of a car and a voice-over saying "We put a gallon of economy petrol in this car. Let's see how far it goes." The camera followed the car driving around for a little bit, before it reached a banner saying 'TWENTY MILES'. The car was just about to drive through...and then crashed into the banner. "
* A shot of a satellite orbiting the earth, with varying degrees of realism, often with a blinking light accompanied by a synchronized beep.
* a shot of Octavia and DJ Pon-3 together for the first time in the series, apparently judging Sweetie Belle in a talent show.
* a shot of the pyramids of Giza as an establishing shot for the lost human homeworld of Kobol.
* A shot of the surrounding area with the audio of the scream still going, then to the countryside (where it might disturb livestock or a farmer or cause birds to burst from the brush in a panic), and possibly further back to a shot of Earth from space all the while with the scream still looped in the background (it has been applied to the
* "a shout, a slash, and a fine brave death", normally has no trouble standing them off because they do still actually have training, tactics, and equipment. And the 700-foot Wall they stand on.
* A shout-out to the Batman TV series (see below): in the graphic novel
* A shout-out to this trope occurs in a vampire context, thanks to the magical Blood Chalice of Bathori carried by the vampiress Isabella von Carstein.
* a shovel). The Stone Melee powerset also included two powers, Stone Mallet and Heavy Mallet, which involve a big two-handed hammer formed out of stone.
* A show about the simple disappearance of all humans predicted that the last traces of human existence would be the man-made objects on the moon (lunar landers, US flag, etc.). Unless some outside force or object intervenes, they would remain on the moon forever. And the only human whose name will be left there (well, on the plaque on the Moon, anyway) is
* a show about two British coppers, and often performed stunts in his everyday life.
* A show in which every major character has been killed, some as many as nine times over eight years (including Prue once, she was brought back by a genie), explained that Prue was "dead for good" when
* A show is canceled (be it short-lived or long-running) and has some episodes that have never been aired (cf.

* A "show-me" is a universal ID card issued by the United States government.
* A Show wrestler or two will often be on the card (frequently as part of the main event, or to help anchor the card and guide the younger/local talent), and a secondary championship will frequently be defended (usually against wrestlers who would never be given the opportunity at an A-Show), these shows also are put on to allow promoters to evaluate new and potential talent. Often, matches against local wrestlers will also be on the card, with the promotion's main wrestlers being the headliners. As such, being on a C-Show isn't always a bad thing.
* Ash pulls the pins of some grenades he stole from Kaiza and then blows up a bridge to keep the Cloyster from attacking him and Dawn in
* Ash released a collection of B-Sides titled "Cosmic Debris" as a bonus with their greatest hits album Intergalactic Sonic 7"s.
* Ash (Satoshi) inevitably ends up like this any time he's placed in a traditional school setting. An episode of DP has him failing miserably during a Pokémon quiz, leading another character to question how a trainer with such poor academic knowledge of Pokémon could have earned 6 badges. The episode eventually leads to an Aesop about how learning theory in school doesn't necessarily make one good at actually doing something in real life. The character who mocked Ash's low score gets
* Ash/Satoshi manages to be the first person ever to knock out Tobias's/Tokuto's Darkrai, who up until that point, swept every foe away singlehandedly, including all the Gym Leaders. Unfortunately, half his team has already been knocked out. Furthermore, Tobias sends out a
* Ash saves Misty a few times, and while Ash was oblivious, it very much meant something to Misty
* Ash's Bulbasaur and Squirtle were non-evolved seasoned combatants skilled as an ambassador and firefighter respectively, while May's Bulbasaur and Squirtle were both relatively young until they
* Ash's Butterfree falls for another Butterfree, who just happens to be the only Pink Butterfree around (and this was before Shiny
* Ash's Charizard does a leg variant to Casey's much smaller and weaker Chikorita.
* Ash's Chikorita had a habit of running into Ash's arms. When it evolved into Bayleef, she didn't lose this habit, but unfortunately, her much larger size caused it to hurt Ash, and an entire episode was made out of this. She gets better, fortunately.
* Ash's Coma, Ash demonizes his father, placing him as being the evil boss over Team Rocket.
* Ash's Cyndaquil was shy, timid, and initially had a hard time warming up, while Dawn's Cyndaquil was an eager and playful little fire starter before both later evolved into Quilava.
* Ash's dad is a gynecologist who treats several of her friends — and will happily talk shop over the dinner table when said friends have come over. Taken to a whole new level because he has a terrible memory for faces, but never forgets a vagina.
* Ash's father uses a sausage and a pair of scissors to tell Rumsiel why sleeping with Ash would be a bad idea.
* Ash's female companions have their moments too. One scene has Misty in the Cinnabar hot springs where she seems to actually feel tempted to peek on Ash on the other side, while another has
* Ash's first Indigo League opponent refuses to shake Ash's hand in a manner that establishes him as a
* Ash's Just Reward, Ash is on friendly terms with a lot of the Legendary Pokémon, much to the shock of his classmates. The Legendary Pokémon are even given gifts to Ash as their way of saying thanks for helping them.
* Ash's name is often assumed to be a shortened version of another name, such as Ashton or Ashura. His canon name is just "Ash".
* Ash's Oshawott and Dawn's Piplup over Meloetta, during the Dawn arc of
* Ash's Oshawott can't control Aqua Jet because he's afraid of keeping his eyes open while underwater. He manages to overcome it later.

* Ash's Oshawott is much the same, falling for every female Pokemon he comes across.
* Ash's Pidgeot arriving on Vaniville Town and delivering Ash's message to Serena.
* Ash's Pokédex tendencies, Ash and the others never miss the chance to voice their annoyance at it.
* Ash's reconciliation with Sceptile and his victory on the Battle Palace.
* Ash's Return, the doors in Glitch City manifest this way to anyone trapped inside.
* Ash's Snivy's Attract only works once for an opponent. After that, they find a way to break through it.
* Ash's victory on the Orange League, Lapras' release and the Pallet Town Reunion.
* Ash tells Red that in order to win, Red needs to evolve his Charmeleon. Red and everyone else thinks he's crazy, but Ash insists that he can see his Charmeleon has the power to evolve and just needs the motivation to do so. Red then awkwardly gives Charmeleon a pep speech, and to everyone's shock, he does evolve, becoming strong enough to overpower Torterra.
* Ash, the pyramids are revealed to be sentient static golems who are manipulating the planet's timeline so as to take over Earth for their own ends. The sheer amount of energy needed to do this explains why Europe has fallen into a state of perpetual night wherever their armies have conquered.
* Ashton Kutcher's cameo as an electrician and Amy Hill as Nigel and Kyle's kindergarten teacher.
* Ashton Kutcher where Mila was even shorter at the beginning of the series.
* Ashton Sharpe, given his sociopathic tendencies, shows no care towards his minions. He belittles them at every turn, and was perfectly fine with helping Chayne open a portal to Heaven, knowing that the energies would've slaughtered other Red Clover associates.
* As humanity's knowledge of the natural world increases, many of the phenomena once thought to result from magic or supernatural forces are given scientific explanations. This sometimes gives the impression (especially when reading old books from, say, the Middle Ages, which are often full of miracles and unexplained phenomena) that the world has become a more mundane place than it was back then.
* As humanoids go, nearly every zone has some version of a gnoll or murloc. They are just
* ASH universe. Lightfoot is notable because he makes anything he's touching faster. This includes motorcycles, cars, spacecraft and his own body.
* Ashuraman vs. Satan Cross: Ashuraman knocks Satan Cross into the arena wall with his Ashura Lightning Strike, but Satan Cross counters with a Triangle Dreamer as they fall to the floor, leaving them both KO'd.
* Ashuramaru of the Kibao Clan has a basket of various swords and spears, and axes he keeps on his back, which he uses when he shows that he's
* Ashure Lagfedor from Pochi Kuro. His first impression of being a handsome Vampire-esque demon was ultimately shattered when he turned out to be a frail old man and a perverted one at that. Whether pulling up Pochi's skirt to admire her cute butt or fondling her breasts calling it "Charging", the main character Kuro makes no qualms in roasting and eating the old man for his lecherous actions.
* Ashur faithfully serves Batiatus' ludus outside the arena, particularly through cloak-and-dagger intrigue, but is treated with contempt by the gladiators because he's a weak fighter and the gladiators only respect skill in honorable combat. Ashur's response to the gladiators is
* Ash vs. Evil Dead and he doesn't want her to pick up his bad habits.
* Ash vs. Evil Dead: Ash gets hit with this from the first season episode "Bait" onwards, becoming wanted by the police for the chaos caused by the Deadites. As revealed in the season two premiere of the show, he's also one to his entire hometown of Elk Grove, who believe him to be a deranged lunatic who killed his friends during their weekend at the cabin.
* Ash vs. Evil Dead at the high school dance, but can't bring himself to shoot her. She steals his gun and has no problem firing several shots at Pablo instead that all miss. Just when she has him cornered, the gun has run out of bullets.

* Ash vs. Evil Dead boss, Mr. Roper, outright tells Ash to his face that the only reason he hasn't fired Ash is because he has seniority.
* Ash vs. Evil Dead does this to Ash by taking on the forms of his dead loved ones — his best friend Chet, sister Cheryl, and father Brock.
* Ash vs. Evil Dead end up peeing her jeans during a exorcism to rid her of Eligos in “The Host".
* Ash vs. Evil Dead, he hallucinates his guide, El Brujo, has an eye in his mouth, which he begins eating.
* Ash vs. Evil Dead, instead having a wooden one. When he loses it a few episodes into the first season, Pablo builds him a new metal one, based on a Nintendo power glove.
* Ash vs. Evil Dead is still working fine however, so all she has to do is re-attach the missing limbs.
* Ash vs. Evil Dead left off by focusing on the action hijinks of Ash Williams, now thoroughly a blowhard loser who nevertheless fights horrifying monsters.
* Ash vs. Evil Dead, like trying to go through a door that may open to the other side of town — and it constantly changes.
* Ash vs. Evil Dead lure his friends there so he can destroy the Necronomicon they're carrying. Lampshaded by Kelly when she sarcastically comments that the place looks "totally not scary at all".
* Ash vs. Evil Dead movie, but due to so much material being written, the makers decided to turn it into a television series instead. If the first season was a movie, it would've been around five hours long.
* Ash vs. Evil Dead, only to be rendered comatose. Awakening in a post-apocalyptic future, he ends the series riding off to keep fighting the evil.
* Ash vs. Evil Dead That's not to mention all the Deadites in the series in general, who are humans (or corpses) possessed by Kandarian demons.
* Ash vs. Evil Dead, the chainsaw arm makes a return and is used prominently throughout the series.
* Ash vs. Evil Dead, the main characters fight their way out of a diner overrun with deadites.
* Ash vs. Evil Dead the next episode when he worries about the possibility of numerous other children he didn't know about showing up on his doorstep, all with a shit-eating grin on their faces.
* Ash vs. Evil Dead: The pilot, "El Jefe", shows that Ash has spent the thirty-plus years since his first encounter with the Deadites in hiding, spending his days wallowing in survivor's guilt, indulging constantly in drugs, booze, and cheap sex. However, when the Deadites track him down in his trailer and attack him and his friends, he decides he's tired of running and fights back, showing that despite being an arrogant blowhard, he's still one of the most badass demon slayers in human history.
* Ash vs. Evil Dead to occult book dealer Lionel Hawkins, the man can barely contain his glee. And when Ash comes up with his rather moronic plan to summon a demon for interrogation, Lionel is thrilled at the prospect.
* Ash vs. Evil Dead under his father's old hardware store, Ash is attacked by tentacles protruding from the wall and ceiling.
* Ash was also berated for making his Treecko continue to fight Brawly's Hariyama despite Treecko having no chance to win.
* Ash winning his 8th gymbadge, and Ash's reuinion with his previously released Goodra
* Ash won the battle against Greta the Frontier Brain when his Snorlax flattened her Medicham.
* Asia Argento, is a Russian deep cover agent forgotten and/or abandoned by her agency.
* Asia Kate Dillon who is also non-binary and thought of as being one of the first fictional non-binary characters portrayed on television.
* Asian Airhead and instead is not smart enough to tie their own shoes.
* Asian, and particularly Japanese, culture and goods maintained a certain mystique and allure for many Europeans; Asian imports were a popular sort of upper-

class knickknack.
* Asian Babymama: The male lead discovers he has a child and the mother is an ex who is an "exotic" Asian lady.
* Asian Cleaver Fever, as the initial ingredients can be switched out with the finished meal behind the smoke.
* Asian Cleaver Fever: Characters preparing Asian food wield knives as though they're fighting or performing.
* Asian Cleaver Fever: Characters preparing Asian food wield knives like they're performing or fighting.
* Asian communist terrorists play a minor role: Dutch mentions at one point that Lagoon Company has sometimes made shipments for the
* Asian countries are known to have bootleg vendors that operate out in the open. In Seoul, South Korea, a lot of the street markets will have bootleg DVD's being freely sold. These vendors are often gracious enough to have a small TV and DVD player available to ensure their quality.
* Asian dragons, being usually associated with rivers or water, almost never have wings but can have four or more legs (usually depending on how long/powerful the dragon is). For an example, see the river spirit in
* Asian elephants have been used as mounts for thousands of years, although more as beasts of burden than long-range transport. African elephants are far less manageable, although some individual animals will allow a familiar human keeper to ride them.
* Asian F" about her desire for the spotlight, when it's about a woman in an abusive relationship.
* Asianfanfics is mostly about Asian characters, and topics that often revolve around Asian culture.
* Asian Hooker Stereotype: a prostitute of East or Southeast Asian ethnicity.
* Asian Hooker Stereotype: When an Asian woman appears with the sole purpose of being a prostitute.
* Asian Lion Dogs: Feline and/or canine beings, usually guardians of people and places.
* Asian Saga: In the adaptation of Shogun, Englishman John Blackthorne is shocked to see a samurai slice the head off an oldster who did not bow when he was supposed to. The audience gets a great look at Blackthorne's face (and that of the Jesuit priest accompanying him) and just a glimpse of a headless neck—and vertebra—before the body falls out of camera shot.
* Asian Saga one of his aides brings him information that they have found previously unknown descendants of Tyler Brock, a woman with two young children that are descended from one of his extramarital affairs and probably don't know about their lineage. Dunross simply nods and states that them not knowing about their family history or the feud will just make it that much easier to have them ruined and murdered.
* Asian Saga The officer assigned to investigate is incensed that the higher-ups are taking triad money but isn't really upset that the beat cops do it, since their salaries are so low they can barely support themselves.
* Asian School Girls: After four Asian schoolgirls are drugged and gang-raped by members of a crime syndicate, they train to hunt them down and exact revenge.
* Asian School Girls: After going out for a night on the town, four ethnic Asian schoolgirls are abducted, abused and gang-raped by members of a Los Angeles crime syndicate. When one of them later commits suicide out of shame of being sexually violated, her three remaining friends turn to the underworld of crime to train themselves to track down and kill all the thugs responsible.
* Asian School Girls, Charles forces the crooks who supply the girls for his rape ring to rape one of the girls they supply so that they are fully implicated in the crimes and cannot go to the police.
* Asian School Girls, Martin, Jack's boss on the police force, is in league with crime syndicate and does everything in his power to prevent Jack from investigating either the rapes or the vigilante killings.
* Asian School Girls: When Vivienne goes missing, her brother searches her room and

finds a matchbook from The Kitty: the strip club where she has been working. He and Hector go to the club where the bouncer is able to point them in the right direction.
* Asian Speekee Engrish: East Asians are often depicted speaking English very poorly.
* Asian Speekee Engrish has also helped this trope die out, with Asians appearing more in works that don't involve cheap gags.
* Asian Speekee Engrish Max keeps mis-hearing the villain's name as "The Craw" even though no one else has trouble hearing it as "The Claw".
* Asian Speekee Engrish: When the English language is butchered by speakers of East Asian languages.
* Asian Storeowner: An (East or South) Asian immigrant who works as a shopkeeper.
* A side character named Sandi is a straight example. The author has said that he doesn't feel particularly guilty about having her fit all the ditzy blonde stereotypes because she always seems to appear around perfectly intelligent blondes.
* Aside Comment: A line directed to the audience and apparently not heard by other characters, as if the speaking character is thinking aloud
* Aside Comment and contemporaries. (Since live theater was the main mode of entertainment during this era, Aside Comments were helpful in telling the audience what characters were thinking.)
* A side conversation between Alistair and Oghren has them going back and forth about "polishing their weapons." Hilariously, while one of them is saying it in the lampshaded way, the other just means polishing his weapon, with the conversation ending with:
* A side-effect of Leviathan sinking Kyushu is a much larger percentage of Japanese immigrants.
* A side effect of this dispute was that the Pythons obtained the copyright to their own series, something that has never happened with any other BBC show. The DVD releases are not on BBC Video or its partner comany 2|Entertain, and the packaging doesn't credit the BBC at all.
* Aside for being their leader, Jason's role among the Argonauts was this. He too was taught by Chiron;
* Aside for Cena, and except for one match against Mark Henry where he used one of Eddie Guerrero's heel tricks (though even that was more of an homage to his recently departed friend), Rey Mysterio Jr. had never play any role other than the pure whitemeat face. He's probably unique among male Superstars in that respect.
* Aside from a brief video appearance, Amanda Tapping was absent for the opening five episodes of Season 9 due to being in the final stages of pregnancy at the time. In order to avoid carrying an all-male cast for that stretch, they reintroduced Claudia Black's guest character, Vala Mal Doran, from Season 8 for those episodes, who eventually also then became a
* Aside from a few audiobooks, David Kolin's only voice acting role or any other acting role for that matter was the voice of Felix the Cat in
* Aside from a fight when she premiered in one issue of the comic book, the
* Aside from a handful of brief cameos on a couple television shows, Sarah Vowell's only acting role is as Violet in Pixar's
* Aside from being a badass, Jorah Mormont's beard varies in length and intensity.
* Aside from being able to drive standard military vehicles like the Warthog, Master Chief and the other Spartans can also steal lots of Covenant vehicles and have a fairly easy time piloting them, though it's implied that they've actually already had a lot of training and experience doing so (especially Chief, who's already been fighting the Covenant for almost three decades by the time we play as him). His ability to drive every single UNSC atmospheric vehicle (be it ground or flying) is justified in that he
* Aside from being a smear campaign against the PC, the Mac comes across more as a smug
* Aside from being standard fashion of the time, the use of hats had a practical purpose — it hid the transition from the actors to the stuntmen in the

fights. Notice how the hats rarely come off during fights. In fact, some of them were secured with chinstraps during action scene shooting.
* Aside from calibre and type of firearm, different types of ammunition have characteristics that may or may not allow them to fully penetrate a human body. For example, a full metal jacketed 9x19mm Parabellum bullet may be able to go straight through a human torso, while a wadcutter .45 ACP bullet is more likely to lodge itself somewhere inside an organ (although the possibility of the bullet going out the back shouldn't be ruled out).
* Aside from cannibals (who are obviously far too small a demographic to profitably market to) and surgeons (who as mentioned above are paid too much to need to resort to black market acquisition), who on Earth would the alleged perps even be
* Aside from Dent, the Joker's habit of threatening to give his victims
* Aside from Eggman, G.U.N. is an international military organization that sometimes has to cross paths with Sonic and other characters. Aside from the Hunters, all of G.U.N.'s robots are non-humanoid in appearance, from the hovering ovaloid Beetles (which only vaguely resemble them); to the Hawks, which are two rocket-propelled tanks with an energy ball spitting mechanism between them; to the Artificial Chaos, roughly six-foot tall cybernetic blue blobs, some of which can shoot lasers. These machines appear in
* Aside from garage, the Horrors pay tribute to '70s electronic duo Suicide with the "Shadazz" half of the
* Aside from getting even with the antagonists, Buster Bunny also helps out kids who have been or may have been victimized by them. Such examples include the short, "Ruffled Ruffee" (part of "
* Aside from having her father's blue eyes, Yuki she looks a lot like her mother, Sam, and even like her father's
* Aside from his huge blond afro, Bobobo has what looks like a long, thin moustache... that's actually two of his nosehairs.
* Aside from his involvement in the aforementioned Suntory Whiskey ads,
* Aside from his usual assortment of equipment, Link will always obtain a unique item that he will need to use for most of the game like the
* Aside from Jaqen, Gendry is the only one who knows that Arya is actually
* Aside from many obviously real burial tombs, Pharaohs would actually circulate legends about their tombs being cursed to prevent grave robbing. In the long run, this did not work.
* Aside from Melisandre and Davos, Stannis feels he is surrounded by mostly bootlickers and fanatics.
* Aside from PALs, strategic warheads (like those used on ICBMs and SLBMs) have to meet a myriad number of environmental conditions (like flight time, acceleration, aerodynamic forces) throughout its travel to enable detonation. This essentially makes the Earth a "third man" in the process.
* Aside from parsing the name as two words rather than one, no significant changes seem to be made to the Rin Shi in
* Aside from police documentaries Crimewatch (1986-present) and True Crimes (1982-87),
* Aside from professional sources like the above-mentioned SPFX Masks and Composite Effects, there are also dozens of hobbyists around the world who make and sell masks of varying levels of realism. In addition, a growing number of companies offer full-torso and lower-body suits. Full one-piece bodysuits are available, but would-be impersonators must still pay steep fees and wait several weeks for completion.
* Aside from regular programming being pre-empted for congressional hearings and impeachment trials,
* Aside from Sammartino, it's generally accepted that the three living legends of the three main wrestling regions are
* Aside from sentient plants, interdimensional beings and such, one of the novels by
* Aside from simply running out of tiles to draw from the wall, there are a few

specific circumstances in
* Aside from SMS contests, phone-in game shows have been banned since November 2007 for being unlawful gambling games.
* Aside from sonic weapons, fire is the only other weapon generally effective against symbiotes like Venom that give
* Aside from speech, parrots have also been known to imitate ringing phones, doorbells, knocks on the door and so on, well enough to interrupt conversations because the listeners excuse themselves to answer the caller.
* Aside from that, Dazai likes to sing about suicide, read books about suicide, flirtatiously propose double suicide, and constantly drops lines referencing suicide. And it's never,
* Aside from that, this very trope is why Cobb is working for Saito. Presumably thanks to Saito's influence, he can get the murder charges Cobb has erased.
* Aside from the adaptation of the comic book story referenced above,
* Aside from the aforementioned corruptions, there is also the possibility that all of them would be, to us,
* Aside from the biology, there's also some very big geography/geology weirdness in how the Nautilus can sail straight to the South Pole under the ice when we now know the South Pole is over land. Exploration of the Antarctic continent was just beginning when Verne wrote the the book, so it was plausible at the time, but now it just looks weird. (Of course, the NORTH Pole is over water, and submarines regularly have and do travel to it under the ice— and the first to do so also happened to be named "Nautilus".)
* Aside from the canonical 'Boy-Who-Lived', there is also 'the Phoenix' and
* Aside from the Captain and XO having their own arming keys, the Captain's safe has additional keys that needed to be passed out to other crewmembers during launch preparations. The missile launching switch itself was also located in the Missile Control Compartment, behind a multi-door safe; only the weapons officer (played by Viggo Mortensen) had the combinations to the locks.
* Aside from the common "rogue" error, fans frequently misspell Scourge and Lionblaze's names as "Scrouge" and "Loinblaze". You'll also occasionally find people asking others what their favorite "arch" is, or what "cannon" pairings they like. The most commonly misspelled book title is
* Aside from the Daytona 500 and the Party at the Poconos 400 (which is, however, presented by
* aside from the Devourer after it deletes Earth) and has no penalty, allowing to leave and strategize without needing to die and reload first.
* Aside from The Endless in Sandman, there are a few other examples. One being Hob (who later went by Robert) who boasted to fellow tavern patrons in 1389 that he had decided not to die. Everyone does it just because everyone else does, but he wasn't going to go along with it. The personifications of Death and Dream happened to be sitting nearby incognito, and decided it would be amusing to take him at his word. (His curmudgeonly reaction to the Ren Faire he visits five hundred years later is amusing.)
* Aside from the examples given able, in general snipers, at least military snipers, are trained in the "one shot, one kill, no remorse" philosophy and numerous media stories have been done on how snipers feel no remorse for killing other people. It may not be to the extent of the "would-be serial killer" described in the introduction to this trope but nonetheless, the very concept of a sniper requires cold-bloodedness. It helps that many snipers believe, often correctly, that their role in eliminating key targets quickly and precisely from a great distance is vital to protecting their fellow soldiers and is actually reducing total casualties for both sides.
* Aside from the examples noted above, TV in general has become more sexually explicit, particularly any show made for broadcast after what UK broadcasters refer to as "the
* Aside from the famous Bethlehem (city of David, alleged birthplace of
* Aside from the few times they recognize the answer instantly, the characters in
* Aside from the good old-fashioned gladiator arenas found in many places, the

* Aside from the half dozen playable races (Tau, Eldar, Necrons, humans, Orks, and Tyranids),
* Aside from the inherent problems of romancing, say, a drell or a quarian, the strongest is probably Jack, who only really warms up to Shepard when she realizes he cares
* Aside from their morally questionable leaders, the other "Children of Oberon" in the series vary greatly in personality, disposition, and form. Though they all tend to be pretty mischievous, even the ones that like humans and Gargoyles.
* Aside from their storge bonds with each other, the protagonists show deep-rooted storge for their siblings (and Granny Smith, in Applejack's case). Rainbow Dash also develops storge with her fan Scootaloo.
* Aside from the Lord's Believers, Gaia's Stepdaughters are noted to be a religious society focused on coexisting with nature, the Cult of Planet is obvious, and both of the Progenitor factions smack of taking their dogma to the point of religion.
* aside from the mechanical Reapers, given their immortality and vastly more advanced technology, and no explanation is given as to why they aren't interested in other galaxies.
* Aside from the name and a few small sprites on the playfield, Bally's
* Aside from the obvious bent of the Imperium using holy-techno hammers to smite the enemies of man, they are a theocracy so ultra orthodox it allowed next to no innovation in the last 10,000 years. They've basically been using the same tactics (and sometimes gear) for that long.
* Aside from the obvious need for an infinite amount of energy, one of the limiting factors in attempting to reach the speed of light is that the interplanetary medium does actually begin to have significant friction as an object accelerates towards light speed (even if it never reaches it).
* Aside from the obvious of Thor and Mjölnir (see below), we should mention
* Aside from the obvious "plane crash survivors wanting to go home" plot (which is
* aside from the occasional joke about modern Germany's dominant position within the EU There are minor Neo-Nazi groups within Germany to this day, but they are so superbly infiltrated by the federal authorities that they have no hope of ever attaining any real power.
* Aside from the opinions put forth on his blog, nothing else is really known about
* Aside from the recording of, and very few and unsuccessful promotional appearances for, their debut album
* Aside from the risk of zoonotic diseases that all animals carry, a swarm of bats is more scary than dangerous. They'll bite if handled but if you remain still, they'll fly past and away from you. Roosting bats have much more to fear from spelunkers than the other way around: rousing them in winter can needlessly use up their fat stores and cause them to starve before spring.
* Aside from the rocket launcher, the Chinese Tank Hunter can plant a TNT charge on buildings and vehicles. The explosion is not particularly powerful, but they can place it instantly by getting close enough. It's not a good idea to run them over with a vehicle unless you consider it disposable.
* aside from the section of HYDRA within SHIELD, they might have one of these — it's in London, but London's a very big place and no one's actually sure if it's underground.
* Aside from the Shadows, several character-specific Personas from throughout the series wear additional masks to hide their own inhuman facial features.
* Aside from the soldiers, the Seswenna governor has more subtle security to deal with assassins. They're quite efficient, and Ventress notes that the one who came close enough to a reception for her to spot him had been
* Aside from the superheroes and major characters displaying it, ordinary people in both DC and Marvel main universes are often shown being shocked and/or disbelieving at the idea of aliens. Despite the fact that both versions of Earth have been invaded multiple times, and in DC continuity the most famous superhero on the planet is well-known as being a literal alien. Similarly, when a super uses

their powers in front of others often normal people and sometimes even other supers will claim what they're doing is "impossible", despite living in a universe full of superheroes and supervillains that demonstrate so-called impossible superpowered feats on a routine basis and are widely known to the public. Additionally, random bystanders also tend to think when someone else sees supers that are flying or look unusual, which they usually describe as "flying men" or "beast men" or something along those lines that those people are drunk or need a psychiatrist despite again, supers that fly and look like lizard people or whatever being all over the planet and widely known.
* Aside from this being the movie that put M. Night Shyamalan on the map,
* Aside from this episode, there are many episodes that continue off of each other, numerous
* Aside from this however it seems to be mostly played straight for the movies, which don't mention religion (aside from the Ewoks thinking Threepio's a god, but that also fits the trope).
* Aside from those who actually used the name word-for-word, there are a number of wrestlers who became legends in their own time, perhaps most notably
* Aside from tiny differences in the origin story, Lorna was a blatant Sheena rip-off, right down to the romantic entanglement with a
* Aside from torpedoes, the Germans also had an unusually high occurrence of total or partial failure to detonate problems with ordnance in WWII. Many historians think this might have something to do with using somewhat less than enthusiastic workers (
* Aside from using humans or various parts thereof in their war machine, the Strogg from
* Aside from using it as a makeshift flashlight, Kratos can put Helios's severed head in
* Aside from various typical merch fare (T-shirts, prints, anthologies, etc.) pop by Mookie's booth at a convention and you can even pick up a
* Aside from what is stated above, Bubbles is also frequently shipped with her counterpart, Boomer, though he is less malicious than his two brothers. However, he is by no means innocent, as he is still
* Aside from what not to do when on leave, one cartoon shows why you should use mosquito netting when posted in the tropics. Another, why having your mail censored is a necessary frustration.
* Aside from writing acclaimed speculative fiction novels such as the
* Aside Glance: A character reacts to something by turning to face the audience.
* Aside Glance: A milder form of this, when someone might glance at the fourth wall but otherwise keep it intact.
* Aside Glance: Someone looks in the direction of the screen, doesn't say anything, and doesn't get acknowledged.
* A sidekick is written out of the story and the mentor chooses a new person to take on the sidekick's mantle.
* A Sidekicks Pediasure TV commercial ends with the Aesop "Kids are what they eat." Then it shows
* A side note to that was Roddenberry's footnote in his novelization of
* Aside of the aforementioned cases, several real-life country unions/pacts/colonizations/etc. are seen as this in
* A Side Order of Romance: A character meets his love interest while she is on the job as a waitress.
* A Side Order of Romance: A character visits a restaurant, and falls in love with the waitress.
* Aside philosophical issues, the setting's strict caste system is no doubt an example of this trope. Peasants are considered "half-people" and Eta (untouchables who handle "dirty work" like waste management) aren't considered people at all. Caste is determined by birth, and aside from being reincarnated into a higher caste in another life, there are very few ways to change caste. While some of the clans in the game are
* A side-plot in the overreaching story of the war against a cosmic devourer; the

Snarl has (directly or indirectly) created at least
* A side-quest in Athkatla's cemetery leads the Protagonist to track down a gang of kidnappers who bury their victims alive. When you catch up to them it turns out they intended to kill the victims before burial, but the body disposal guy was
* A side quest on the neutral world of Manaan reveals that the Sith have lured a number of young Selkath (the local species) to their embassy. The Sith have convinced them that their cause is just so that they can help overthrow the Manaan government and replace it with a Sith-controlled one with the Sith-trained Selkath as the puppet leaders. The player can find them in the embassy and show how the Sith are lying (Light Side points) or just kill them (Dark Side points). This comes in very handy later as the player
* A sidequest will lead to Geralt getting a very risque tattoo on the side of his throat in full view. Unless you take specific steps to remove it, the tattoo will stay on for the rest of the game and the sequel if you import the save.
* a side short, James Potter convinces Peter Pettigrew that there is a "Church of Potter", then renamed to "Pottertology".
* A sideshow performer's corpse was found rolled up in a sheet of heavy tent canvas in "Freaks & Geeks."
* A side story even shows the Iron Fist from 1000 years in the future.
* A side story has Gym Leader Clay helping the local police with a ship whose paperwork is out of line. This leads to League authorities encountering Shadow Pokémon for the first time.
* A side story in the novels also has Zelgadis encounter another girl, named Miranda, dressed as a male bounty hunter. During his fight with another chimera, her gender is revealed.
* A side variant occurs in “Fry and the Skyrim Factory” where Bender is saved from becoming over a hundred slurm cans… but not fast enough to have a hole punched through his side. Justified, since he’s a robot.
* A sideways example in The Slayer's Handbook supplement to the RPG: an alternate setting called Hellworld, in which Glory's portal wasn't closed, unleashing a demonic apocalypse on Earth. One of the last remaining enclaves of humanity is defended by a group of grizzled demon fighters led by a horrifically scarred, nearly psychotic Alexander 'Call me Xander and die' Harris. In the same scenario, there are rumors filtering in from the wasteland about someone called "Ripper" who hunts down demons with a combination of magic and mundane weapons....
* As if all that wasn't enough, since the 90s there's been the option of "sight enhancement oils", which are substances such as Synthol that can be injected into a muscle to make it look bigger than it actually is. The most common sites for these injections are the biceps, deltoids, and calves. The problem is that over-use of synthol is really obvious since it can cause discoloration, unnatural muscle shape, or erasure of the "cuts" between different muscles that bodybuilders need to score well on conditioning. A bodybuilder who shows up on stage with a botched synthol injection will of course have to engage in
* As if Boney Island isn't dangerous enough as it is, Chris sets up quicksand pits in "
* As If! by Amy Mebberson (Mimi) and Nikki Purvis (Jet Wolf). When Hunter gets her driver's license and wants to drive Angela to school each day, Angela's dad insists on testing her abilities. As they get into the car, he acts as if he's evaluating a potential boyfriend, asking if Hunter's intentions are "honorable". Hunter rolls her eyes and Angela can only admonish: "Daaaaad!"
* "As if by magic" is another related phrase. It's most often used in situations in which everyday gadgets are too complex for most people to take.
* As if in return for their bad behavior, the author seems to delight in
* As if interrupting him mid-speech wasn't rude enough (with a flaming chakram to the face, no less), Axel also cuts Vexen's last words short in
* As if it is OUR fault that they chose a class not capable of doing everything.
* As if its unnerving design wasn't enough, this creature is a sadistic demon who trapped the souls of a Japanese family in a haunted house. After devouring the souls of her family, the demon lets Kuni live solely to use her as bait to lure in

more victims. Perhaps the scariest thing about this thing is is how little we know about it, making it even more frightening. What is it? Where did it come from? Why did it target that family? What did it want with Jack? And is it even sentient?
* As if it weren't possible to be any more vile, there is an NPC quest in Amoria that provides a Cash Shop item as its reward. What is it? It's a "random haircut" coupon. Anyone who's fallen into this trap knows that a "random haircut" from Claudia really means
* As if Kagami didn't have enough fake love letter issues in the manga, the anime has her receiving a note while on their
* As if regular orks weren't crazy enough, Ork Freebooter bands are type two space pirates, and like hats and bandanas and fly the Jolly Ork. Examples include flash git Kaptin Badrukk, the richest ork in the galaxy with a coat of gold armor forged from the false teef of other kaptins he's defeated, while the
* As if Rory's death wasn't bad enough, he returns as an Auton constructed from memories. While the Rory persona eventually wins out in the ensuing mental battle, it's not before he fatally shoots Amy.
* As if that's not enough, we now have Shadow 2 and Robot, who have no similarities other than being named by
* As if that wasn't enough, one was given specifically to the female members of Team Natsu, titled
* As if the Angry Chicken wasn't bad enough, we also got the Gurubashi Chicken. At least Angry Chicken only requires you to buff its health and make it take damage; Gurubashi Chicken requires you to buff its health
* As if the Court would let a descendant of a fire elemental and a potential medium go anywhere else.
* As if the foot-mutilation mentioned below weren't enough, the original Grimm version of "
* As if the game weren't hard enough already, you can't turn off the friendly fire in the game (though you could in later
* as if the Man on Fire. (MoF would yell "Subway! Eat Fresh!" or whatever while on fire).
* "As if the purpose of the military is to continue to throw away its ordnance on invulnerable targets after it's been shown that there is no effect" is a pretty good description of
* As if the trope wasn't embedded enough in pop culture, the narrator goes on to note "that's the way it is with inventors - they're geniuses, but they're also quite forgetful."
* As if the Weeping Angels didn't have enough powers, they also can apparently use a version of telekinesis to short out lights. While this might not sound very deadly, you have to remember that being unable to see an Angel even for a split second easily gives it enough time to kill you (and if there isn't a light source, you're going to be blind for longer than a split second). They can reach a person standing several feet away and kill them in the time it takes for someone to blink, after all...
* as if they were a couple While the preface page to chapter 45 plainly shows them engaged in foreplay, while spooning together in lingerie.
* As if this weren't enough, Destiny made it impossible for Jayfeather to be a warrior on top of his blindness
* As if to balance this, the developers did see fit to include a few Templars who do abuse their power and authority: Sers Alric, Mettin, and ultimately
* As if to highlight Kasandra's status as this, her heart-to-heart conversation just happens to be where a powerful
* As if to make up for all of the above, Taurus cutting off a tentacle of Earthland Byro's monster octopus during the Starry Sky Key filler arc results in two giant gouts of blood.
* As if working slaves to death in the salt mines isn't bad enough, the Sodomites torture them to death for entertainment. When Ishmael's attempted slave revolt fails, the re-captured slaves are strapped to a wooden wheel over a fire pit, doused with oil, and slowly burned to death as the wheel turns, all while a raucous

crowd of Sodomites watches and cheers.
* a significant African population—large enough that Elizabeth complained about it on multiple occasions. It was also about half a century before the Trans-Atlantic Slave Trade and thus, racialized slavery, really took off.
* A significant amount of the voice actors that vocally performed as
* A significant cause of runaway trains throughout history has been the failure to apply parking brakes on stabled trains when they are on a gradient. After a time the air will leak from the brakes and they will release. Other than for moving between cabs, a train should never be left unattended without sufficient parking brakes applied, and will usually be chocked when left for longer periods. Some trains have parking brakes that automatically apply if the air pressure falls below a certain level (usually using a powerful spring to apply the parking brake which is held off by air pressure).
* A significantly changed the grading system for the first time in almost a decade. Aside from adding pluses and minuses to the letter grades, the score requirements for all grades were reduced. It's very difficult to pass a song without getting at least a C+ or B- (both equivalent to a D before). This is ignoring that Greats are now worth 60% of a Perfect (versus 50%) and Goods are worth 20% (versus nothing). Of course, some older fans complained, some to gatekeep, some because they felt like their own scores were now "cheating", and some worried that new players wouldn't want to develop their accuracy, since you could "flail" through a song and still get an A- (an old C).
* A significantly expanded version of Smaug's final attack on Lake Town
* A significant number of communities in Alaska are "dry communities" where no alcohol is permitted. Enforcing this has proven to be extremely difficult, and these communities continue to have some of the highest alcohol abuse rates in the country.
* A significant number of their other songs are based on true stories.
* A significant percentage of people picture South America being directly under North America, when it is actually more to the south east. Also, people tend to imagine Australia being much farther south than it really is.
* A significant percentage of people will reach a point in their lives in which they essentially stop seeking out unfamiliar music and are perfectly content simply relistening to the songs and albums they enjoyed in their younger days. According to various studies and surveys, this tends to happen around age thirty, give or take a few years.
* A significant portion of Marlene Dietrich's career was built on such titles as
* A significant portion of the fandom still believe Alister Fletcher did not die and is somewhere in Avalon, due to his last words being "I'll see you in Avalon". There is plenty of fanfiction involving Lara travelling to Avalon/Helheim to find him - despite the fact that one cannot choose to go to Avalon in death, and people who are there are turned into soulless thralls. Other than this, in a similar way to Archie from Hornblower, fans just choose to write post-Underworld fics and state that Alister didn't die.
* A sign in the Magic Box warns customers against blocking the back alley when they park, saying TRESPASSERS WILL BE TURNED INTO TOADS.
* A sign obstructing the scenery warns you not to obstruct the scenery by posting signs.
* A sign on a fence has a "stranger" drawn and a forbidden red line. A "stranger" looking exactly like it goes in, thus showing he was
* A sign on the ventilation duct work states: "Limit Two Horny Teenage Boys". When three try to use it, it breaks.
* As I Lay Dying, as women who grow up with low nutritional standards tend to skip their menstrual cycles, but still get all the symptoms of a period, which is already similar to a pregnancy.
* As I Lay Dying both feature a mother having a favorite son out of all her other children, despite the fact that the son is a Jerkass.
* As I Lay Dying has no set age, and it is often debated as to whether he is young or just retarded (or both). He's the youngest of his five siblings, and the next-

youngest is obviously at least a teenager.
* As I Lay Dying. When Dewy Dell (not the brightest bulb) tries to get an abortion, a man tells her that 'more of the same' will get rid of the baby. Dewy Dell storms out of the shop a few moments later raving how it wouldn't work.
* A silent version occurs in Season One. King Robert's son has been bitten by a pet direwolf belonging to one of Ned Stark's daughters. The direwolf flees, so Robert orders the direwolf belonging to his other daughter killed in surrogate retaliation. Because Ned and Robert are
* A Silent Voice and befriend her. Learning sign language was one of the things he did to befriend her, though Shouko still writes down when talking to people who don't know JSL.
* A Silent Voice: Both Ishida and Nishimiya blame themselves (not each other, though) for all of the difficulties in the lives around them. Ishida arguably is right about at least some of it (at least, the parts that stem from the results of his bullying years ago), although he actively blames his actions to the present if they're not perfect.
* A Silent Voice due to her deafness, and he mistakes it for a comment about how the moon looks nice that night.
* A Silent Voice, even though in reality she was a bystander who laughed at the bullying and was responsible for turning Shoya into the class scapegoat. But, of course, Kawai appears incapable of acknowledging these flaws, and ultimately believes she can do no wrong.
* A Silent Voice from a suicide attempt. He stops her from trying to jump off a balcony, but he accidentally falls and ends up in a coma instead.
* A Silent Voice has an open ending between Shouya and Shouko. They have mutual affections and flirt with each other but aren't a couple.
* A Silent Voice. However, it is played straight in both the English and French dubs, where Shoko is respectively voiced by deaf actresses Lexi Cowden and Mélanie Lemaistre.
* A Silent Voice. It was only because he met Shouko again, that he decided to do everything in his power to make amends, even though he didn't believe he deserved to be forgiven by Shouko.
* A Silent Voice took several years to become a series due to its controversial nature. There was even an attempted lawsuit against it. It was originally a one-shot in 2008 but was remade in 2011, where it finally got mainstream attention, and later was adapted into a several volume manga in 2013.
* A Silent Voice use him as a scapegoat and shift all blame onto him, from then on tormenting and ostracizing him. After five years, the situation and the extremely guilty conscience he still holds for his actions have left him near suicidal. He decides to befriend Shouko before killing himself, though after befriending her he decides not to commit suicide.
* A Silent Voice: Yuzuru is a skilled photographer and wins local photo competitions, but she rarely attends school. Later, after Yuzuru decides to become a regular student again, she reveals to Shouya that she's been failing her assignments and asks him to teach her how to study, which Shouya happily agrees to.
* A Silicon Valley joke (also used for surgeons, fighter pilots, etc.):
* A silly observation; what is otherwise a normal-looking picture ends up becoming another thing entirely, and it catches on. In
* , a silver dragon assumes the Boys (a group of half Fyarl and half Brachen demons) are Tieflings and only confuses them.
* A Silver Mt. Zion, Stars of the Lid, Labradford, God is an Astronaut, Explosions in the Sky, Gastr del Sol, The Sea and Cake, Do Make Say Think, Lounge Piranha...
* A "SimCity local 709 Burglar's Union" is mentioned in the Cat Burglar Chance Card in
* a similar ad, to grab a Maruyama chainsaw and send him running away screaming.
* A similar anecdote tells of a new hire sent for checkered paint. The newbie constructed a cardboard grid, inserted it into an empty paint can, filled the squares alternately, and then removed the cardboard. It wouldn't stay that way for too long, but it worked long enough.

* A similar angle is when a wrestler is "fired" only for them to come back in no time at all, usually never even leaving TV. Cases include
* A similar apocryphal story has a somewhat more sociopathic interviewee reply to the question "How can you shoot unarmed women and children?" with "They don't run as fast, so you have to
* A similar argument is sometimes made for Elijah as well, although since he only lived around 900 BC he hasn't quite reached this trope yet.
* A similar bit of battlefield black humor occurred during or after the Battle of Trafalgar. A British sailor's injury was so grave as to require the amputation of his leg. Said sailor's reaction was: "Never! Where shall I find another match for this one?"
* A similar, but far more subtle and subjective case could be made about Sans. He explicitly states at the end of a No Mercy route that it doesn't matter to him if he makes it to the surface or not - he's been so conditioned by Flowey/the player's continuous resets that making it would just feel like a false hope being dangled in front of his face. The question here is a matter of
* A similar but less extreme example is the Life Tap spell which allows the warlock to directly convert health to mana, but it is impossible to life tap to death.
* A similar, but longer and considerably more elaborate speech is delivered to Superman by
* A similar, but more extreme, parody occurs in the Canadian radio series
* A similar, but much less contentious event, happened to the Patriots in Super Bowl XLII. After the Giants took the lead with 30 seconds left to go, New England had one chance to go down the field to kick a Field Goal to tie and send the game into overtime, yet were unable to convert a first down. The Giants got a turnover-on-downs with one second on the clock, since the Patriots had used 4th down for one last (unsuccessful) "Hail Mary" attempt. Despite the game being essentially over, NFL rules dictated that a play must be run (in almost all instances, the "Victory Formation" QB kneel is run here). However, Bill Belichick had already left the field by that point, and many Patriots players were already making their way to the locker room. Belichick
* A similar calling card was later discovered on the Nazi toxin in Season 2, in this case, the image of the seahorse,
* A similar case can be made in tracing the outcome of the Mongol Horde. It doesn't help that the Mongols didn't have a sophisticated writing system until they began to be assimilated to the culture of the invaded peoples. It doesn't help even further that the Khans valued secrecy if not deliberate obfuscation — where is the Tomb of Genghis Khan? Who was split from who? And the few Europeans who wrote about them had no idea of many aspects of their culture and their own religious and ethnic prejudices to contend with (to say nothing of wishing to please rulers or wealthy people who paid them).
* A similar case can be said for Manson's sole chart entry on the Hot 100: a feature on
* A similar case could be made for the 2 new Césars that were introduced in 2011, specifically César of the Best Documentary and César of the Best Animated Film.
* A similar case happened with her husband Chandler. When he and Ross are armwrestling, Monica says she loves his sensitivity and kindness not strength. From his end, he happily admits that she is freakishly strong and could kick his ass. This trope is also mentioned by Ross in the same episode, as he feared Mona wouldn't find him attractive if he was unable to beat Chandler in an armwrestling competition.
* A similar case happens in the second game, furthered by the case that the hero and the villain there have pretty much zero animosity towards each other the whole game. The villain even provides the hero with both the means to say goodbye to his dead girlfriend and the key to figuring out exactly what he's planning. They also part amicably at the end.
* A similar case in "The Cycling Tour" when Mr. Pither is arrested by the Russian

Military. As he's being led to a firing squad we hear his narration.
* A similar case is the disappearance of Amelia Earhart. Several artifacts believed to come from her plane (and a possible skeleton, although the bones themselves are lost and there's considerable evidence both for and against) have been found on Gardner Island, close to her last planned refueling stop, but whether the plane landed there or the items washed onto shore after a crash at sea is unknown.
* A similar case is the general Magick Revivalism that started around the late 1800s and early 1900s with the foundation of several new Esoteric schools and others that went public like the Theosophical Society, the Hermetic Order of the Golden Dawn and the Ordo Templis Orientis. Personalities like
* A similar case to Lyra's aforementioned renaming happened to minor antagonist
* A similar case took place in Japan in 1959. Dr. Karsuaburo Miyamoto was unable to accept his wife's death, so he embalmed the body and kept her in their conjugal bed for ten years before he was caught.
* A similar "cell service went down" crash occurred when Shane Dawson posted a video apologizing for activities he had done in the past, but with AT&T's cell service.
* A similar comic had her remarking on Peter borrowing a bunch of books like the encyclopedia set and dictionary; it turns out he was just changing a light bulb.
* A similar Competence is available for some races in the Tabletop RPG based off Naheulbeuk : "Touching naivety" grants the character a +4 bonus to all Charisma rolls in order to get forgiven by the rest of the party for any laughably catastrophic mistake. Considering how stupid, clumsy (read "very keen to accidentally shoot allies in the back while trying to cover them") elves can be in the Naheulbeuk Universe, they automatically start the adventure with this competence.
* A similar complaint had been lodged over earlier installments of the series for "
* a similar conclusion, going as far as describing the 1980s as "the new 1950s".
* A similar connection can be made for Rhea assuming the role of "big sister" to Buwaro, something she promised Sakido she would do when they escaped Hell.
* A similar contrast is done between Snow White and Regina. Snow White of course has
* A similar demand made by these groups is that gun manufacturers and sellers should be prosecuted if the people they sell guns to commit suicide, rape, murder, etc. with their products. American laws don't necessarily hew to this trope, and immunize manufacturers from being sued for criminal misuse of their products. Other manufacturers who make things that can easily kill people, even when working exactly as they should, are given the same protection (for example, you can't sue General Motors because a maniac used one of their trucks to plow into a crowd of people). A seller can only face charges if they sell to someone who the seller knows is legally prohibited from purchasing or owning weapons, such as a convicted felon.
* A similar drug, Rhapsody, was mentioned in an issue of X-Men 2099, in which it was revealed that the Synthia corporation secretly laced its food products with the drug, so that consumers would become addicted to eating Synthia food, at the expense of their health.
* A similar eastern example is Konstantin Rokossovsky, Red Army commander in the
* A similar effect happened to "New Soul" by Yael Naim and "1234" by
* A similar effect happens during the Council of Elrond when Gandalf breaks up the squabble by reciting the ring couplet in
* A similar effect in the Yugoslavian animated short 'Passenger, Second Class'
* A similar effort was spearheaded by Napoleon in Europe, promoting beet sugar as patriotic against the "English" cane sugar. As there was actually a practical reason (imports of cane sugar from the Caribbeans and the American continent had been almost completely cut off due the concurrency of the Continental System, the Royal Navy blockade of Europe and the Haitian Revolution) this effort was far more successful, with beet sugar cornering the market and remaining the preferred sugar

in the entire continent to this day.
* A similar element from above was used during production on the 2000 children's film
* A similar episode about the suicide of one of Mallory's friends. In one scene, she berates herself for not realizing how depressed the girl was.
* A similar even more clueless version showed up in a few news reports soon after the Newtown school shooting in 2012. They tried to blame the massacre on the murderer's love of Starcraft, a top-down strategy game, and Dance Dance Revolution of all things.
* A similar event in November 2014 involving a window-washer falling 11 stories onto a moving vehicle.
* A similar events happens in "Tales of the Public Domain:" when the Joan of Arc story ends with her being burnt at the stake, Marge grabs the book, invents an ending where she has a
* A similar example exists in FASA's ship combat sim Renegade, at least for the majority human government. The Terran Overlord Government got to be the big dog in the galactic stage by being brutally stupid and corrupt, being based upon the worst excesses of Rome. In their case, the filing error will not only wipe out a planet and/or its location, but also result in about 140 senatorial murders. Whereas the most gross stupidity in Warhammer 40k is a result of religious fanaticism, in Renegade's universe, it's a result of purely shortsighted greed and avarice. And occasionally throwing bureaucracy into bureaucracy. Forget the name of it but the creation of one TOG fighter led them to many victories, as the constant reshuffling and retitling of it while it was in development resulted in a huge amount of nasty ambushes for spies who reported on freighters and dignitaries having only 'light escorts.' To make matters worse, TOG owns roughly 3 times as many planets as the Tyranids have devoured. It is not unheard of for an entire SYSTEM to escape taxes in the political morass for decades, only to later be invaded by their hosts who want it paid back with interest.
* A similar example happened in "Don't Make Me Over" with Meg where she became a cute blond girl and a singer, but also a jerkass until she is humiliated on tv and returned to normal.
* A similar example has happened with a man and a spider and with a lady and a snake.
* A similar example involved Donald engaged in a sporting contest with some millionaires. He's won every year because his opponents suck, but in the tournament appearing in the book a new, physically-fit competitor appears and seems ready to sweep the competition. The character is so confident of his victory that he volunteers to concede the trophy if Donald can win even one event.
* A similar example is on Route 18, where four Durant are accompanied by a Heatmor, their
* A similar example is "Tick Tock Tuckered" (1944), a remake of "Porky's Badtime Story" (1937). The main change was replacing
* A similar example occurs in "5ever." A girl asks her boyfriend if he will love her forever; again, he says no, and again, she runs away and dies (this time she's struck by a car). When he finds her corpse, he explains that he didn't plan on loving her forever — he was going to love her
* A similar example of this trope happens when Finch asks mob boss Elias to remove a bounty on their current protectee. Elias agrees, as long as Finch agrees to
* A similar example somewhere between television and movie, is the original
* A similar fairy tale talks about a woman who lives in a vinegar bottle whose wish for a proper house is overheard by a passing fairy. Unfortunately, not only does the woman show no gratitude, but every time the fairy returns she wishes for a more prominent position in the world, until she wishes to be the Pope.
* A similar fate befalls male dairy calves: as they will not produce milk, they are slaughtered for veal at as young as two weeks of age. As mother cows suckle their young for up to two years, the extra milk she produces is what we buy in groceries, and once she stops lactating, she is mated again only for her next calf to be killed so that the milk she produced for it can be harvested. The use of this

trope is why ethical vegans oppose the milk and egg industries.
* A similar fate befell the Prothean division on Eden Prime, as shown in
* A similar fate could have been suffered by a number of German U-boats, such as
* A similar fate had befallen a number of short OAV series, especially during the 80s and 90s: The material produced was intended to be a pilot for a longer work, but the series was canned before it ever got off the ground. While not all of them necessarily had trailers produced advertising the dead-in-the-water series, see also the "in the next episode" bit advertising "Knight of Lemon" at the end of
* A similar faux-historical retrospective was released directly to DVD, to accompany Stephen King's miniseries
* A similar folklore variant involves hanging a sieve, colander, or other household item that's full of holes outside your front door. That way, the vampire will stop and count all the holes, leaving them vulnerable at sunrise.
* A similar foot-and-shin remnant of a gigantic statue is prominently featured in the ruined city at the heart of module X1's "Isle of Dread". It one-ups Shelley's metaphor of Time erasing human hubris, by having nothing legible left of its inscription at all.
* A similar gag happens at the end of the Leghorn short "Weasel Stop", when he and the weasel are run through a machine that removes their feathers/fur and bales it up like hay.
* A similar gag happens when Odie licks Jon awake in another episode.
* A similar gag in another Bugs Bunny cartoon, this one with Yosemite Sam, has Bugs load his glove with a brick for the return slap he gives to Sam.
* A similar gag item is a toy pistol that contains a laser pointer, but pulling the trigger shocks you, because the laser is actually turned on by pressing the pistol's hammer. That way, when somebody sees you playing with it and asks to borrow it, they will shock themselves when you give it to them.
* A similar gag re: pizza in the seventh-season episode "Plucky Pennywhistle's Magical Menagerie" -
* A similar gag with a man with the last name "Smoketoomuch" who had apparently made it to his thirties without anyone making a joke about it.
* A similar grisly death could await early divers in old diving suits (this
* A similar has a Male brain and a Female brain for sale. The traveller asks why the Female brain is cheaper. The butcher answers, "Because it's used."
* A similar idea, except exclusively used with "Plothole Generators" in the
* A similar idea is posed as a philosophical question by Ivan to Alyosha in
* A similar if not exact term in wrestling is known as the "jobber to the stars." While jobbers are usually completely unknown local talent brought up solely to get squashed, a jobber to the stars is a more high-profile contracted wrestler who is in the mid-card and seen as more of a threat, who are brought up solely to get squashed.
* A similar incident occurred with WCW, who introduced a character called "
* A similar incident occurs with Blurr in "The Face of the Nijika" (minus the whole "save my girlfriend" thing).
* A similar incident threatened when it emerged that Hikaru Yamamoto, who plays Akiko in
* A similar incident, where Lust shows that her core is actually a Philosopher's Stone, and Mustang points out that the only reason she's telling them this is that she has no intention of letting them live.
* A similar instance happens earlier with the swarm of jellyfish. Marlin and Dory don't notice the jellies swimming towards them until they've been surrounded.
* A similar instance occurred when the Saturday Morning block theme was a crossover between
* A similar internet joke says that Australia was made up by British colonists to cover up their mass murder of unwanted convicts by dumping them in an empty stretch of the Pacific rather than sending them to a remote penal colony.
* A similar issue exists between two Outland factions, the Aldor and the Scryer. While they both are part of the same alliance, players are forced to choose between the two.

* A similar issue is people thinking that tabbies are a breed. All "tabby" means that the cat has a certain pattern of stripes, dots, lines, or swirling and usually an "M" like marking on its forehead. Many cats, both breedless and pure bred, have this pattern. It's not a breed unto itself.
* A similar joke appears in UK graffiti, with Gretzky replaced by whoever
* A similar joke asks, "Which is better, eternal happiness or a turkey sandwich?"
* A similar joke has been put up in German work-places at least since the 1960s: "Rule 1: The boss is always right. Rule 2: Should the boss not be right for once, then rule 1 comes into force."
* A similar joke in a Muppets comic had Fozzie reporting on a home run during a baseball game the night before. Just as he mentions how the ball sailed over the stadium and just kept going, it hits him in the head.
* A similar joke is common in the west, but usually has the three characters as a brunette, a redhead and a blonde.
* A similar joke is done at the end of "Halloween on Spooner Street", Stewie offers Brian some of his Halloween candy but reminds him that they can't use the real names due to "advertising concerns". Brian picks a few fake candy names like "Jim & Ms", "Not-a-Finger", "$64,000 Bar", and "Dawkins' Peanut Butter Disc". A frustrated Stewie mutters "God, I hate television." in response.
* A similar joke shows up in "Bart the Murderer", where we see the hands of various mobsters. One has four aces and a king... panning over to another, who has
* A similar joke tells about a farmer with a talking pig which annoys him greatly and so he tries diverse methods of sending him away, but
* A similar joke to the one above is a popular old-school Chilean joke about an Animal Kingdom ruled by a tortoise. One day, a lion, a hippo and a zebra were being prosecuted for a crime; the trial was to tell a joke to the king and if they make him laugh they'll be safe, but if they fail, they will be killed. So the lion told a hilarious joke, everyone laughed but the king remained silent. Executed. Then the hippo told a joke that was even better, everyone in the court was crying and suffering extreme side pain—from laughing too hard—but the king didn't react. Executed. Then the zebra told an incredibly lame joke, it was so bad that the room stayed quiet, but the tortoise was laughing out loud and writhing in joy. "Oh my god, oh my god, the lion's joke is the best thing ever".
* A similar joke to the one above - the genie gives a wish to each man. The first two wish they were home and are sent there. The third man says "Now I'm lonely.
* A similar joke was found in an outtake for Australian children's show "Agro's Cartoon Connection":
* A similar joke was used/expanded on in a one-panel gag in Marvel's
* A similar lack of foreshadowing is applied to the villains from various other franchises who appear in
* A similar language issue occurs during the "Bug Bomb" myth tested by the
* A similar legend is that an actor was killed in unspecified circumstances during the
* A similar legend is told about Pope Silvester II (999-1003) who was reputed to have had a pact with a female demon called Meridiana, with whose help he managed to ascend to the papal throne. According to the legend, Meridiana told Silvester that if he should ever read a mass in Jerusalem, the Devil would come for him. The pope then cancelled a pilgrimage to Jerusalem, but when he read mass in the church Santa Croce in Gerusalemme ("Holy Cross of Jerusalem") in Rome, he became sick soon afterwards and died.
* A similar legend to the above is told about the Greek tyrant and sage Periander. In his case, the first target was
* A similar line is used in where Klinger is threatened with this. In his continued efforts of trying to get a discharge from the Army by running around in dresses, among other things, Frank, at one point, says to him, "I've warned you, that crazy stuff's
* A similar love of Laura exists for Brazilian players, though this one is easier to understand since she's an
* A similarly jumping around in ratings for the games has occurred in Germany: one

game (
* A similarly low-key or unhappy ending to an episode of a normally "happy" series. Also rare, due to the same reasons as above. Sometimes used in an attempt to get Emmy nominations, or to at least surprise the viewer. When the series finale of an otherwise "happy" series is one of these, it's a
* A similar mentor/apprentice relationship (this time with spies/thieves) develops between the main characters during the first two books of the
* A similar moment occurs when one of Frank's friends charges his classmates to peep on his older sisters as they prepare for a bath. One of the boys climbing up the spout gets a little overzealous and ends up pulling the drainpipe off the wall, causing the rest of the boys to be caught in the act as well.
* a similar move called Bloody Dagger. It probably can be used by Hayate, too.
* A similar myth exists about Frederick Barbarossa, who was a real historical figure, and a number of others, some real, some altogether legendary. A more extensive, but no doubt still partial list, can be found under
* A similar mythology was used for the opening of Mickey's Toontown in Disneyland: the "neighborhood" had been there since before the opening of the park, but humans weren't allowed in until 1993.
* A similar occurrence happened during the "Muir Island Saga"; as they battled on the Astral Plane, the Shadow King crushed
* A similar occurrence happened in "Renaissance Man" where the EMH briefly took on B'Elanna's appearance and was forced to behave affectionately towards Tom in order to maintain the ruse.
* A similar occurrence happened when Mike decided to contact the Mads
* A similar occurrence happened with the East Area Rapist/ Golden State Killer / Original Night Stalker (or EAR-ONS, in police terms). He would strike houses in California, commit petty theft, rape the occupant and then leave. However, it is widely believed he would extensively stake out an area beforehand, both on foot and using hang-up calls. Dogs in the area would bark at the dividing fences between houses or at something in the back yard, even if the owners couldn't see what was winding them up. A woman also received a knock on the door from a local man whose dog had been injured after chasing after something, which was also believed to be linked to EAR-ONS (the dog got medical help and was fine; the man later sent the woman a thank you for her assistance).
* A similar one exists where a guy sees police officers writing a ticket for an expensive-looking car that's parked in front of a big office building. He goes up and tells the cops he's not paying the ticket and keeps antagonizing them, with the cops finding ever more reasons for giving the car a ticket (tires too smooth, lights not working, etc.). When they leave it turns out the guy was perfectly honest: it wasn't his car, it was his company's CEO's.
* A similar one has the setup include a foot-long pen or lighter, with the punchline being "What, did you think I wished for a twelve-inch
* A similar one is someone saying "[word ending in -er]? I barely know her!," the
* A similar one is the "shuffles deck, draws card" meme that involves mocking a post that makes a racist comment against someone for doing something that has nothing to do with their race or racism at all, or otherwise construing something innocuous into a racist thing:
* A similar one, more common in the UK and Australia, is getting them to say "Mike Hunt", which doesn't work in RP English but does in other accents.
* A similar one to both previously mentioned is the popular "You are now aware that your tongue does not rest comfortably in your mouth". Now take a few minutes to forget that statement.
* A similar one with Colbert, when he reviewed the 2004 Oscars in song: "Oh, are you saying it was a tedious exercise in void-filling, Jon? An industry-wide circle-jerk televised for the wanking convenience of a billion drooling wannabes? The one night people in this town pretend quality matters when each and every one of them devotes the better part of their lives to trying to figure out a way
* A similar one with headlines: "HALF OUR NATION'S POLITICIANS ARE CROOKS". Outraged phone calls and

* A similar phenomenon occurred when "Wild Thing" was used in commercials for Marine World Africa USA.
* A similar plot device also shows up in the Grimm Brothers fairy tale
* A similar plot to that first example is used in an episode where an invading alien sends androids down to Earth that not only happen to look exactly like Fred, but also
* A similar ploy has targeted university students studying abroad, who are told not to contact their families in any way (including social media) and to go into hiding. The students' families (who are typically wealthy) are then contacted and told that the student has been kidnapped, and demand a large ransom for their release.
* A similar ploy to travel back in time and get earlier versions of himself to do his homework also ends in failure.
* A similar point was made during a sporking, when it was commented that Bella might as well say "Goodbye, I love you, because of course I'm not going to survive this even though there are 200 pages left in the book and it's told in first person."
* A similar practice is done by espionage agencies. They will tempt the mark into a "small" treason (such as releasing records on the number of pens needed to write embassy reports) that would not in itself hurt the country betrayed. Once that is done the handler will use that treason as a blackmail device. Another similar means is the infamous
* A similar prank-deranges-and-deforms-victim premise drives the film
* A similar problem occurs when switching between one of the other blades and sabre (or vice-versa), as the majority of attacks in sabre are delivered with the edge of the blade, instead of the point. Adjusting for the extra step (swing blade down from guard to cut as the arm extends) can take a little while. Added to that, the standard guard in sixte (for example) has a radically different angle of blade when used in sabre to either of the other weapons, so people tend to find they're using the wrong guard stance and leaving themselves open.
* A similar process can be seen in aphids, which alternate generations between parthenogenic females and sexual reproduction.
* A similar process may be occurring to the CEO, originally a bald man dumber than
* A similar rationale to Wonka's stands for the enormous set of underground tunnels built by the deep-down dwarfs in Ankh-Morpork in
* A similar, real example: man couldn't keep up with child support even with a full-time job, so his driving license was suspended, so he lost his job.
* a similar requirement, with those who die during the Vigil being assumed to not be pure in their commitment, but it can actually be obtained by anyone and for any reason.
* A similar rocket launches and twinkles in "Live and Let Dad" with Ned and Newton inside like last time, only it follows Dad's rocket and halfway though it initiates ejection sequence.
* A similar role (information broker to the villains) was played by the Monitor during the run-up to
* A similar rule applied to some British newspapers: "One Brit equals 10 Frogs (Frenchmen) equals 100 wogs (non-Europeans)".
* A similar saying to this trope is utilized in the Occupy protests, by the slogan "You cannot evict an idea". Possibly a subversion, given that Occupy got stuck with the reputation of being a bunch of rich kids trying to convince the poor they were one and the same, a case of an idea eating itself. However, many of the ideas of the Occupy movement have been absorbed into the rise of the Democratic Socialist movement in the 2018 election cycle, which has also expanded on the concepts to apply the ideas to things beyond just banks.
* A similar scam circulated in the United States during the boll weevil infestation of the 1920s. The scammer would advertise a sure-fire weevil killer, and a desperate cotton farmer would send in the money... to receive in the mail two heavy wooden blocks with the instructions, "place weevil between blocks and crush."
* A similar Scandinavian water spirit known as the nøkken (in Norway at

least; the name varies from region to region) could also transform into a horse, but his signature form was that of a handsome man with a violin. Its enchanting music would lure victims into the water, causing them to drown.
* A similar scenario happened in a prison boxing match in an episode of
* A similar scenario happened when Waffsicle tried to claim that they own the idea of
* A similar scenario unfolds on the snake planet with hordes of opposing terminators battling over the alien snake and her brood.
* A similar scene can be seen at the beginning of the Blood Harvest Campaign.
* A similar scene happens in the book, except there, rather than falling into the pond fully clothed, the boys go
* A similar scene occurs in the Battle of Panama. After taking Panama base and destroying its mass driver, several ZAFT mobile suit pilots start shooting the surrendering Federation troopers. This was said to have been in response to the Battle of JOSH-A, where the Atlantic Federation brass activated a microwave device hidden underneath the base, wiping out most of the ZAFT forces as they broke through, as well as the remaining Federation defenders (Who were
* A similar scheme based on the same logic was used by Soviet admirals to ask the government for resources to build new ships. The navy would ask for X amount of money to add four cruisers to the Soviet fleet. X would always look like a reasonable amount of money for four ships so the central government would approve.
* A similar situation (although with thankfully better end results) happened when Jerry Lawler had a massive heart attack during a
* A similar situation can occur with the Starf Berry (at least in generations wherein Berries could be grown.) This berry
* A similar situation happened in the Japanese "Middle Ages" of the Sengoku Jidia (which lasted from 1467-1617 CE). It is a common myth, spouted in stories like
* A similar situation happened with Pochi (Japan's pet dog) and Netherlands' rabbit after the latter greeted the former by licking him.
* A similar situation (not with wires, but close enough) occurs in the
* A similar situation occurred when Jon went to buy a new wastebasket and tried to pay with cash (he'd cut up all his credit cards after Garfield had abused them one time too many). The clerk had no idea what
* A similar situation occurs in the episode "Tikka to Ride", but with JFK.
* A similar situation occurs when Cyrus, finally succeeding with his plan to create the perfect universe using Dialga and Palkia's power, gets absorbed into it. This "universe" ends up being destroyed when Dialga and Palkia regain control of themselves.
* A similar situation surrounds the Israeli Postal Company, who have at this point stopped even trying to find excuses for not delivering the mail, and instead simply don't do it. It's even been reported that disgruntled Israelis waiting for the mail have gone to the post office and seen massive stacks of unsent mail, dating as far back as eight months, sitting right by the front door, which the postal employees insist they'll only send them when they feel like it. A joke that came out around 2015 was something to the effect of "Israeli Post Office Serving the Central District Destroyed in Horrible Terrorist Attack- Service Not Expected to Change." This all sounds funny, but when this means court summons and draft notices come months late, or don't come at all, you'll find yourself in a lot of legal trouble.
* A similar situation that did not work out very well at all involved
* A similar situation to the Southern Conference has been going on for the last century in the interior West.
* A similar situation unfolded when Washington Nationals manager Dusty Baker, talking about his new team in 2015, accidentally referred to superstar right fielder Bryce Harper as 'Royce'. Bryce later responded by saying, "That's okay, Rusty."
* A similar situation (with only one habitable planet per sun) in the Nuncio system in the Talbott Cluster. These may actually be more realistic since current models suggest that telluric (rocky) planets can't form stable orbits in a binary system where the two stars are close enough to form a traditional two suns

situation
* A similar sketch has people discussing someone's hotness and what they intended to do with that person, when they were interrupted by a machete-bearing country salesman crying "¡Machete!", who was covering his groin. ("Darle machete" is a somewhat rude way of saying
* A similar sketch has the French woman deliver a similarly angsty, introspective monologue to her companion, who sits and nods patiently before, in English, responding with "No, I'm sorry, I don't understand a word you're saying."
* A similar story appears in Genesis — Judah condemns his widowed daughter-in-law, Tamar, to death for getting pregnant out of wedlock. It turns out the conception was when Tamar
* A similar story depicts British explorers in Australia. Noticing large hopping animals, they asked the Aborigines what the animals were called. The natives replied "
* A similar story ended with Reed realizing that he doesn't need to understand
* A similar story from Scotland features three witches, a baby, and a piece of peat.
* A similar story happened in the Soviet program too, but wasn't really a case of the
* A similar story is told about unrooting mandrakes. Some variants state it's not quite the sound — the mandrake is bloodthirsty, and you can
* A similar story is told in England about a 14th-century nobleman named Robert de Shurland. Upon getting a prediction that he will die because of his horse, he killed it on the spot. A year later, he passed nearby and kicked the skull. A piece of bone pierced his foot, causing blood poisoning.
* A similar story is told of ancient China: three suspects would be told to plant sticks of equal length into the ground, and are told that by morning, the stick belonging to the guilty man will have grown one inch. The next morning, the authorities arrest the man whose stick is one inch shorter than the others; the guilty man, afraid that his stick would grow, secretly cut an inch off it in the middle of the night.
* A similar story tells of an American zoo visitor who, hoping to prove the effectiveness of Crazy Glue to some
* A similar strategy is the "Hack-a-Shaq" strategy, wherein a team continually fouls a player who's really bad at making free throws (the strategy is named after Shaquille O'Neal, who was infamously bad at free throws) in the hopes that their opponents score less from the stripe than in regular play. There have been calls to change the rule that allows this strategy, however.
* A similar strip features a wasp detective trying to figure out why there is a rock-shaped hole in the wasp nest that appears to have been punctured from inside the nest, somehow. Standing inside the nest is also a gigantic human child, whom everyone is ignoring (Larson apologies for the lameness of the joke in the strip's caption, saying "it was late and I was tired).
* A similar subversion in LFO's music video for "Girl on TV". As the song is about falling in love with a female celebrity, it would seem to be the case that
* A similar symptom is when a child is born with their skin covering over their eyes. This can be a result of radiation in the environment. This looks actually freakier than bilateral anophthalmia (who look like their lids are permanently closed), since the children born with this condition appear to have nothing but smooth skin where their eyes should be.
* A similar system has been implemented in Ukraine, although it has a reduced effect, as the population growth is still negative. This has resulted in many kindergartens shutting down (why keep them open when they make no money?), and any parents requiring to get in line almost as soon as their child is born in order to have a shot at putting their child into one of the remaining ones.
* A similar system was proposed for the B-1 Lancer. Although fitted to the prototype B-1A was ultimately scrapped in the production B-1B. The XB-70 also had a similar system for each pilot that would encase the pilot before ejection. The system was used when the 2nd prototype crashed due to a mid-air collision with an

F-104 Starfighter.
* A similar tactic got the Crusaders, and later the Turks, into Constantinople. It's a heavily walled city, but if the emperor needs an army and you happen to have a horde of barbarian mercenaries for hire...
* A similar tale exists in Greek Myth - Meleager was fated to die when a particular log on the fire was burned up, but his mother overheard the fates and rescued it. However when Meleager killed his uncles over their treatment of the huntress Atalanta (whom he had a one-sided crush on), his mother in anger threw the log into a fire, and Meleager died suddenly.
* A similar tale is told of the original Bowie knives. Their maker supposedly tested them by whittling a piece of hickory for a couple of hours, after which the knives still had to be sharp enough to shave a man's arm without nicking him. This is less fanciful than it may appear. The original Bowie knife (made for Colonel Bowie himself) was forged from a large file. Files are made of extremely hard steel (so that they can be used on regular grades of steel), so as long as it was properly tempered the blade would hold an extreme edge through treatment like whittling.
* A similar tale surrounds the invention of the sewing machine: the inventor dreamed of spears with holes in them stabbing towards him, and realized upon waking that the eye of a needle to fit into a sewing machine had to be in the
* A similar tale tells of a girl who would die if she didn't get to smile. The hero unwittingly helps remedy that, and the King tells him that he can marry her.
* A similar technique used by Jedi is used to similar effect, but without utilizing normal trash talk techniques. Notably Luke utilized this to turn Darth Vader back to the light and in one EU game this must be utilized to sever a Sith's connection to the force to actually be killed.
* A similar technique written, possibly as a joke, in a swordplay manual, involves unscrewing the pommel of your sword and throwing it vigorously at the enemy. The technique is called "ending him rightly."
* A similar test had students who volunteered for a survey who were met by a receptionist and given a form to fill out. This receptionist dropped a pen, bent down behind the counter to pick it up and a completely different person stood up and continued the conversation. A large number of the participants didn't notice.
* A similar theory goes as follows: Assume the Universe is finite. If the Universe is finite, it can be perfectly recreated in a simulation, given sufficient resources. If we can perfectly simulate the Universe, our simulation will contain individuals who will attempt to perfectly simulate their universe. As their (simulated) Universe is finite, they will be able to do so. This recurses infinitely. Therefore, there are potentially an infinite number of simulated universes, each containing one or more simulated universes, with one (real) Universe at the top of the stack.
* A similar thing happened a few months afterward with a burger restaurant in New South Wales. A post was made on their Facebook page
* A similar thing happened in Sweden when comedian Christine Meltzer parodied Silvia, the Swedish queen, on comedy show "Hey Baberiba". The parody was part of a series called "Familjen" (the family) which made fun of the royal family on a weekly basis. Hey portrayal was so spot on that some now feel like it's almost as if the queen is parodying Meltzer.
* A similar thing happened on Venus, despite the extremophile tweaks wiping out the baseline colonists (the former were then banished from the solar system).
* A similar thing happened to Kathryn Janeway with her being voiced by the late-Angeles Bravo who made her sound as if she was in her 70s rather than in her 30s.
* A similar thing happened to Mother Needham, the notorious bawd, in Channel Four's drama-documentary of Hogarth's
* A similar thing happened when Superman was attacked by Evil Star. His star blasts strengthened Superman, as the sun is a star.
* A similar thing happened with BoJack's parents, with his heiress mother getting pregnant after a one-night stand with his drifter father. This proved to be a huge mistake which torpedoed all of their plans and left them both deeply unhappy for

life, seriously screwing up their son in the process.
* A similar thing happened with "Súbeme La Radio" by. In July 2017, it got a remix by Jamaican rapper Sean Paul and immediately shot right to no. 3 on said chart.
* A similar thing happens at the end of season 1, with several characters getting on a raft and finding a boat which they think will rescue them, but instead it's the Others, who kidnap Walt and torch the raft.
* A similar thing happens in "A Piece of the Action": The inhabitants of a primitive culture get a book from a visiting starship, "Chicago Mobs of the '20s", and
* A similar thing happens in the Realm of Darkness; characters state that "time does not exist" within it. One character (
* A similar thing happens in the US remake, although the kid steals the tape.
* A similar thing happens in "Unfathomable Depths", a sidequest where a clearly traumatized Argonian named From-Deepest-Fathoms asks you to bring back a dwarven artifact to the ruins of Avanchnzel where she got it. Just as for Labyrinthian, you see ghosts of her and her companions as they travelled through Avanchnzel, and they start dying one by one as you progress.
* A similar thing happens in writing for stories set in other countries the author has never been to or heard terms from or seen spellings from. It's most prominent in fanfiction and can be seen in stories from
* A similar thing happens when certain requirements are met while playing "Ether Strike".
* A similar thing has been associated with the later post-punk scene, which frequently drew on reggae influences.
* A similar thing is occasionally done in military exercises — the
* A similar thing is with "pig", which is both the animal and "an earthenware crock, pot, pitcher or jar."
* A similar thing occurred with Cisco's IPhone, one of their IP office phones. Thing is, Apple didn't actually bother to check if anyone had already registered this name before they branded their own product, leading to a lawsuit. Ah, if they'd just called it the iPod Phone...
* A similar thing occurs in another episode where he stashed party balloons, streamers, and a clown on the chance where he was finally right about something.
* A similar thing was done later in the series with Eve. She spends an entire episode hiding from Hamilton, claiming that if he finds her he'll kill her. When he catches up to her, he just severs her contract. When asked why she said she would die if he caught her, Eve answers that now that she's mortal, some day she will.
* A similar treatment was given to Seawolves (an old term for pirates), spider-monkeys (they really look disturbing), and wolf spiders (who have wolf heads). However, since these are all cases of
* A similar trick is pulled on Commander Shaw in one of the novels of Philip McCutcheon.
* A similar trick is to place explosives where a character will appear during a cutscene. The villian gets two words into their spiel before flying face-first across the room.
* A similar trick was used in Britain to provide suitable cover identities for undercover police officers infiltrating supposed terrorist organisations, most of which turned out to be largely harmless environmental activists on closer examination when some documents were leaked to the media. The children's next-of-kin were
* A similar urban legend claims that Kentucky Fried Chicken recently changed the decor and logos in its restaurants to show just the chain's initials instead of spelling out the word "chicken," because they are feeding the public genetically engineered chicken-creature-tumor-flesh grown in vats instead of actual chicken, and for reasons of legal liability they no longer claim it is chicken. Except on the menu, of course, right? Right.
* A similar urban legend is about a man tying his wife to the bed so he can play a "Batman saves the girl" role play scene. But during the fun he jumped onto the bed

and smashed his head on the ceiling fan, knocking him unconscious. The woman had to call for help until the police kicked in the door to save them. (
* A similar urban legend persists about the average person swallowing seven spiders per year in their sleep, due to the offending arachnid crawling in the nose or mouth and not being able to climb back out. Spiders aren't prone to crawling into damp,
* A similar urban legend tells of a Chinese (or sometimes Korean) student in London who complains that he is unable to buy fresh dog in the supermarkets, only tinned. The tinned dog doesn't taste right so he has started catching his own.
* A similar version of the trope was employed in the Eastern Bloc countries to ridicule communist dictators whenever gaffes, illiteracy or being unsophisticated on their part became known to citizens.
* A similar vocabulary game, more popular in the anglophone world, is called
* A similar way to avoid turbo-lag is to have multiple smaller turbines feeding the same engine. While effective at minimizing lag, it requires more space than a single turbo.
* A similar "White Terror" happened in Taiwan, except that one ended up with a lot more people in prison (it didn't help that
* A similar "woman doing manly things only revealed to be a woman at the end" music video is Bush's "Machinehead".
* Asimov also has a short story happening in the 21st Century where the world is thoroughly split between the capitalist West and the socialist East to the point that Cuba became capitalist and South Korea was absorved by the North with no proxy wars or any other fighting among the sizes. Of course as we know, the USSR collapsed in 1991.
* Asimov also loved writing so much that he hated vacations. According to one story, he came back from a trip, kissed the walls of his office, and sat right back down at the typewriter, never to leave it again.
* Asimov also uses the device in the short story "Pâté de Foie Gras". The titular goose literally lays gold-filled eggs, and a group of government experts is trying to figure out where the gold is coming from (or at least figure out how to breed additional gold-egg-laying geese so that some can be spared for dissection). The story ends with one of the experts convincing the others to get the account published in an SF magazine as fiction, thus putting it before a large number of people who might come up with useful ideas while
* Asimov appeared in various other stories, with aliases ranging from paper-thin ("Abram Ivanov") to slightly thicker.
* Asimov has also written a story called "I am in Marsport without Hilda" which is based around the fact that most people cannot travel in space without a dose of special medication... and it is very difficult to conceal the fact said medication can be cooked into a super drug in anyone's kitchen.
* Asimov Laughs Again recounts having coined, along with a friend, a humorous unit for measuring beauty, the "millihelen", measured as the amount of beauty required to launch a single ship, based on the beauty of Helen of Troy having launched a thousand ships (although it is not certain whether he was the first to come up with this idea). Theoretically, each point on this sliding scale could correspond to a measurement in (milli)helen, with levels of beauty ranging from Just Average at 0 helen to Divine Level Beauty at 1 helen (1000 millihelen), since Helen of Troy was considered Divine Level, and levels of ugliness being measured with a corresponding negative number (-1 millihelen being the amount of ugliness required to repel a single ship).
* Asimov once wrote a mock academic paper (and eventually a sequel or two) about "the endochronic properties of resublimated thiotimoline", a substance with one chemical bond extending into the future, which dissolves
* Asimov's Guide to Shakespeare: "A guide to understanding and enjoying the works of Shakespeare"
* Asimov's Guide to Shakespeare is dedicated to the memory of Dr Asimov's father, Judah Asimov (1896-1969).
* Asimovs Mysteries has all four stories featuring Wendell Urth, a detective so

afraid of travelling that he worked almost entirely from home.
* Asimov's Robot-series books, the justification being that humans have already been designing tools for their own use for thousands of years, so it makes more sense to just design robots capable of using those same kind of tools rather than intensely specialized robots with those tools built in (like a robot that can ride a tractor, instead of a tractor-bot). Starfish robots of varying degrees appear earlier in the setting when robots are used almost exclusively in space for exploration, mining, and terraforming.
* Asimov's stories predated the development of Robotics as a science, so when he had characters in his stories as scientists working with robots, he used the word "Robotics" to describe it, thinking the word already existed. It was in fact the first publicized use of the word, and Asimov is now credited with its creation.
* Asimov's, the police are equipped with electric whips as a less-than-lethal way of dealing with criminals. R. Daniel's plasma blaster resembles the handle of one all to well, something he uses to stop more problems when a group of citizens were ready to attack some robots who were only doing their jobs as shoe salesmen.
* "A Simple Case of Black and White" features Jack and Trixie being hired by a pro bowler, Jim White, who wants to reunite with the woman and child he ran out on. However, when Jack and Trixie find the woman and her little boy, they return to their client to find him murdered, shot in the stomach by a gun registered to the woman's current husband, Donald Black. The gun was reported stolen a year ago and the detectives realize that White was in town for a tournament at that time. Their theory becomes that White was in town last year, found his ex with a new husband and son with a new father, and plotted revenge against the man he felt had taken what was his. To this end, they determine, the gutshot was deliberate, a slow and painful means of death in order to give himself time to get rid of the evidence of his suicide. The episode ends with police lieutenant Sabien telling everyone that confirmation of this theory was waiting on snaking the glove White had worn to keep powder burns off his hands from his toilet.
* A simple example of this is Lightning Vortex versus Smashing Ground. Smashing Ground destroys the highest-DEF monster on your opponent's field, while Lightning Vortex destroys all face-up monsters on your opponent's field but requires you to discard a card. Smashing Ground is a +0, since you used one card (Smashing Ground) to take out one card (the opponent's monster), while Lightning Vortex varies from a -1 to a +3, since you used two cards (Lightning Vortex and the discarded card) to take out one to five cards (the opponent's monsters). Smashing Ground is considered a better card than Lightning Vortex, because it's much more likely for your opponent to have one or two monsters than four or five, so Lightning Vortex will usually just break even.
* "A Simple Game" is usually associated with the Four Tops, but was originally the B-side of
* A simple grenade launcher is the first heavy weapon you get and is vital against the Ymir on Freedom's Progress
* A simple gun might have made the Suspension of Disbelief (barely) possible, but the producers went balls-to-the-walls improbable with a
* a simple inconvienience that ultimately saved them. Ex: A worker who's office was in the Twin Towers accidentally sleeping through their alarm or getting stuck in traffic on the way to work. Or a passenger missing their flight on board one of the hijacked planes.
* A simple morph or demorph will heal any injuries, and almost all illness, suffered in
* A Simple Plan: The characters come up with an easy straightforward plan, only for it to fall apart.
* A Simple Plan to save people in abandoned habitats—habitats that have been left unharmed for years, with no reason to suspect that things are about to go wrong.
* A Simple Plan, when a backwoods yokel and his brother stumble on a wad of cash in a downed airplane.
* A simple roundhouse kick to the head is a staple of the Japanese shoot-style

finishing offensive. It's credible enough to pass for a real KO, and the
* A Simple Survey features a decidedly-grotesque form of this. Many common tools now incorporate elements of human beings. Examples include: frying pans with skin to sense heat and prevent overcooking of food; ladles with lips to taste their contents; surveillance cameras with eyeballs to focus at long distances; lawnmowers that use nails and teeth to cut.
* A Simple Survey has a number of short stories that end before giving a clear resolution. For example, one story is about how humans have developed technology that allows them to see into hell, which appears as a pleasant beach resort. A demon tells the narrator that, although they were instructed by God to torment sinners, the inherent nature of demons is to rebel against divine authority, so hell is in fact a nice place. However, an angel then interrupts and claims that this is a lie, to trick humans into wanting to enter hell voluntarily.
* A Simple Survey intervened, causing the money (in an attache case) to fall down a slope. Yet another person picked it up and used it for day trading, gaining an immense fortune, and donated half of this to children in a poor country. This then somehow led to oil being discovered in that country, lifting it out of poverty.
* A Simple Survey will be summoned. However, because the event has occurred in reality it is no longer absurd. As such, the notion of "absurd" and Alice herself will evolve to become an even more absurd existence.
* A Simple Thinking About Blood Type is a Type O, and has admitted that the character is based on himself.
* A Simple Thinking About Blood Type of Park Dong-Sun himself, Type A is based on his dad, Type B is based on his mom and several other friends, while Type AB is based on an extra-curricular friend
* A Simple Thinking About Blood Type somehow distorts his statement that he's dating a kindergarten teacher into a rumour that he molests kindergarten kids.
* A Simple Thinking About Bood Type, it occasionally alludes to some educational topics, such as psychology.
* A Simple Wish gets bitten on the bum by her own assistant, changed into a dog earlier in the movie.
* A Simple Wish, the camera zooms into Mara Wilson's screaming mouth when her godfather poofs himself and her to escape from being crushed by a giant rabbi.
* A Simple Wish, the meeting place for the annual convention of the North American Fairy Godmothers Association is in Manhattan. In fact it's just down 82nd Street from the Metropolitan.
* A Simple Wish, which takes up the vast majority of the movie. He goes far enough to admit that if the movie didn't have any of the magical fairy godmother aspects and just focused on the relationship of a single father juggling his professional life and his relationship with his daughter in the wake of losing the mother, that he'd probably like the film.
* A simplified version is available on the game's website. (It's a good thing it was simplified, because apparently the original version used a 748-entry questionnaire and full thermal body scanning. It was still deemed worth it in-universe to avoid hooking up with a psychotic necromancer, which in Valoran is a very real possibility.)
* A Simpsons TV Episode guide also used this phrase on the subject of how Kang and Kodos could tell each other's genders.
* As in a lot of incarnations, Joker's obsession with Batman is subtly (and sometimes not-so-subtly) implied to have sexual/romantic elements.
* As in canon, changelings tend to use insect body parts as names. The exception is Queen Metamorphia, whose name is simply derived from "metamorphosis". Other original characters for this fic are named for the following parts:
* As in canon, Robert plans to marry Sansa to his eldest son Joffrey. However, he finds out that Sansa is already betrothed to Domeric Bolton. Ned argues that such marriage is key in ensuring House Bolton's loyalty, and cancelling it would cause a huge rift between the Starks and Boltons, and the current situation with the Others demands a unified North. Fortunately, Robert decides to let the issue go without much fuss.

* As in canon, Servants can get a hefty power boost from being in their home country. Fiore's Servant Gunner is Japanese, giving her an advantage. Illya's Berserker is also Japanese, which might be why she was able to overpower three Servants at once, but it's not stated outright.
* As in canon, the Kwamis. Pollen mentions that she, as one of the older Kwamis, was born when the stars were
* As indicated above, multiple disc games often make certain areas inaccessible after certain points in the plot, to save on space on each disc. Each disc usually has some big event occur at the end of the disc that will remove access to certain side areas that are no longer useful to the plot in the next disc. It's annoying if you needed a certain item for a side quest, but allowing the developers to not have to try and fit the entire world and everything in it on the last disc, freeing them up some space for ending cutscenes, boss data, and the very definite final dungeon.
* As in Film (above), this isn't just wanton destruction, as Starfleet Headquarters is in the Presidio right next door.
* As in films, in basically any show where they go to CIA headquarters, someone will walk over the seal in the main entrance, including
* A single artist who plays all the instruments, writes all the songs, and performs under a band-like moniker. For example, Trent Reznor really is
* A single Burmecian soldier arrives to inform King Cid of the attack on Burmecia in
* A single character takes up the majority of a page or is disproportionately bigger than other folders.
* A single, comprehensive backstory was given for the Godmodder in DTG2.
* A single drop of water is what vaporizes Mega-Slank's Synthetic Space Slug in an episode of
* A single hated character, only applies to individual characters. Hated works or products do not count. Groups don't count either as they are not characters, and each character could vary in individual popularity (unless said group is small enough that all of its members can feasibly be judged Scrappies on their own).
* A single line in Episode 89A reveals the true identity of Season 3's
* A Single Man, the main character is a gay college professor, who decides to commit suicide after his partner dies in a car accident. At the end, he decides that life is worth living after all - and promptly dies from a heart attack.
* A single object, or a collection of extremely similar objects, that appear(s) many times throughout the course of the play/film/book. Tends to place a lot of importance on the item itself, possibly at the expense of whatever they are supposed to represent. Example: The titular
* a single page. The character invoking the trope was not recognized as female, and the one subverting it was not recognized as male. The latter justified the aversion of the trope on the grounds that they're part of a race of shapeshifters, making such traits superficial at best.
* A single-panel cartoon had the wolf and the pigs sharing beer and sandwiches while they laughingly reminisce about "how I blew down your houses for the insurance."
* A single parent who views dating partners as potential future surrogate parents and tries to push anyone who they get serious with into that role as soon as possible.
* A single-part variation happens twice in "Kitty Foiled", where Tom shoves his muzzle into a mouse hole and finds it shaped like the entrance when he pulls back.
* A single platoon-sized unit of 62 French Foreign Legionaries with little more than rifles essentially held up the entire main Mexican army at the Battle of Camarón, inflicting ten times their own losses, even though the Mexicans had thousands of troops with artillery and cavalry.
* A single scene, where the character unambiguously chooses their own way in a plot-relevant fashion.
* A single sip of beer renders our heroes incoherent and leads to a drunk driving accident.
* a single tear escapes him.. (In a follow-up ad, the Indian rides with a big smile

through towns where people are cleaning up.)
* a single wing. It has never been seen since, and it is possible it was a mutation, not a different species.
* as in "God proves, in various ways, that he is, indeed, God, but the man flat out states "I don't believe in you, I'm an atheist") and rejects the offer.
* Asinine Alternate Activity: A character isn't allowed to do something they want, with a boring alternative offered instead.
* Asinine Alternate Activity: Sets up a conflict between what the kid wants to do and what they're allowed to do.
* As in its source material, the eponymous starship's dark matter drive explodes in
* As in most other games, all of the characters have a defined pose they do when initiating/ending a fight which shows of their individuality. Squall will rest his Gunblade on his shoulder and swing it a couple of times and cooly turn his back against the opponent. Zell warms up before a fight and loudly celebrates shaking his fists in the air after winning. Quistis, being the elegant, collected one, lashes with her whip going into a fray and afterwards stretches and relaxes. Selphie, the spirited and spunky girl, throws her arms in the air before resting her Nunchaku on her shoulders and doing a sassy pose. Irvine, in keeping with his cool sniper façade, twirls his rifle around and cockily salutes with his hat, whereas Rinoa, the high-class rebel girl who is new to fighting, seems a bit nervous and sighs in relief then the battle is over. Pretty much every action each character does, like casting a spell or even sitting, will be animated in a particular way to showcase their personality.
* As in other series which blur the line between fantasy and science fiction, Steven Brust includes coded references to modern things in the seemingly Renaissance-y
* As in other versions the Joker makes some suggestive comments suggesting flirting to Batman.
* As insurgent forces often times have to make due with whatever they can get their hands on, they're frequently equipped with weapons ranging from factory-made functional weapons to homemade duplicates of dubious quality. The most infamous of these are the
* As in the book series, Ross Poldark went off to war, leaving his First Love Elizabeth, and returned to find she was marrying his cousin Francis. His struggle to move on from her, and his inability to forget her completely and focus on his
* As in the book, the Phantom attends dressed up as Red Death. He's much more blatant about crashing the party in this version, though.
* As in the comics, Rhodes takes one of the suits, and becomes War Machine, in the very next movie.
* As in the episode "Day of the Living Gelatin", it's possible to make a pool full of gelatin to lay on and to slide on, although it can't be used as a trampoline-like in the episode.
* as in the Felt to have homosexual reproduction exclusively. She's interrupted before she manages to say so but the author puts up her speech anyway, and though the part about how they reproduce is damaged by the glitches it seems quite similar to Dave's Brother's Smuppets.
* As in the film example noted above, Buttercup wants this answered in
* As in the film version, Spy Satellites played a central role in the plot of
* As in the final battle, Ruby, in order to protect Sapphire, refused to involve her and push her into the car, cause her trauma. In
* As in the first movie, Francesca "Kitten" Natividad makes another blink-and-you'll-miss-it uncredited
* As in the games, Amy is pink. Unlike the games Sonic is not naturally blue furred. He gained
* As in the games, there is Iris. Fans usually consider her either black or Native American, but there isn't much to go on besides her being darker than Ash.
* As in the Laurence Fishburne example above, Paul Le Mat said many people reacted to him with hostility after he played the role of abusive husband Mickey Hughes in

the
* As in the novels, Jaime and Cersei Lannister are in an incestuous relationship, and as in the novels their oldest son Joffrey is
* as in, there's a chance they'll give you superpowers instead of just killing you. obtained abilities from the same source.
* As in the source material, Robb ends up engaged to a Frey girl. Contrary to canon, Ned Stark intends to honour the betrothal, only asking to screen Lord Frey's daughters and granddaughters to find the most suitable one for his son. Walder Frey is ecstatic about it.
* As in the Tortall-verse, some people are born with an inherent capacity for sorcery. This is known as Academic magic, and is an all-purpose force that can be turned to many different tasks.
* as is and edits it into their film... only for Mayor Bourgeois, who's a judge, to reject the project from entering. He thinks the monster looks too fake.
* As is "Billy Taylor", but it has a twist ending. It turns out that the titular character, whom the song's main character has joined the Navy to follow has found a new girl, and the main character tracks them both down and kills them, and is promoted for it.
* As is described by Salah Babhair, the premier geologist of the area:
* As is her fellow Kalos Gym leader Valerie, with her own knee-length black tresses.
* As is her teammate Rachel Foley, who wears a similar outfit. While she at least had the sense to not hack one of the legs off for no reason, she's instead wearing a suit that is about three sizes too small and thus can only be zipped up to about her nipple, and has scraggly messy hair with bangs that completely obscure her eyes. It's no frigging wonder she dies within about five seconds of starting their mission, considering she probably can't see and is wearing such a tight suit as to constrict her movements and cut off blood flow to her head.
* as is Hina after she throws in her lot with the former two to bring down the World Government, forming the organization Marine Integrity 3, or MI3 for short. In Chapter 30, Captain T-Bone joins the party, making the organization MI4. After the events at Omatsuri Island, Vice Admiral Jonathan joins, making the organization MI5. And in Chapter 40, Vice Admiral Tsuru joins, making the organization MI6.
* As is noted in the booklet that came with the Legacy Edition of the movie's soundtrack, "The Mob Song" from
* As is OVA Kagato being he was the hermaphrodite clone of Naja Akara, Washuu's best friend, that took over a Ryoko prototype and split off his female half.
* As is partially expected given the circumstances of his creation as a diametric opposite to a
* as is pointed out by a fellow knight Oh, and reads poetry about cheese.
* A Sister's All You Need: Nayuta always feels the need to make clear that she loves Itsuki.
* A Sister's All You Need), the mid to late part of the decade saw a massive boom in the export of light novels to foreign shores. This reference to a time before light novels became readily accessible overseas, and the sheer amount of name-dropping of other novel series that were popular at the time, places this series firmly in the early 2010s.
* As is that of the Bretonnian peasants. Fortunately they have longbows and can kill at distance and run away should things get queasy.
* As is the Dimholdt on the Paths of the Dead, especially in the film version.
* As is the entire opening scene in "Homer Goes to College", specifically the bits with Homer and the bee.
* , as is the Marquis. When the two lovers learn they've been fretting over the same secret, they accept each other for who they are, continue living their lives as they please, and guarantee the existence of a rightful heir that will keep Mariane's scheming uncle away from the family fortune.
*), as is the mother of the Kuno siblings (to be exact, they share the same mother as Ran).
* As is typical with Brandon Sanderson, it gets more nuanced than that. By the end

of
* A Sitch in Time, Rufus' descendants are shown to be muscular, articulate, hyperintelligent mole rats.
* A Sitch in Time, the older present Ron advised the past young Ron that he should keep the haircut.
* A Sitch in Time whereby foolishly pressing the dangerous button he destroys an evil giant monkey statue.
* A's. It did enough damage to burst the containment barrier, demolish the room, knock everyone out and caused the entire interdimensional TSAB base to shake.
* A site called careerbuilder.com ran an ad campaign about an exasperated office man literally working with a bunch of monkeys. For their Super Bowl XL ad, said man is on the phone with a woman friend of his who sympathizes with him...as she has to work (literally) with a bunch of jackasses.
* A site selling "Fagas Straps", a type of strap used in making furniture, has the unfortunate URL of
* As it goes, these changes on a whole do not play well with the erosion of checks on the Senate as handing more power to each party.
* as it happens on live broadcasting seriously and don't know whether or not the person they're going after is heavily armed or have any hostages. People have died as a result of these sorts of incidents. As a result, at least one serial SWATer is currently serving prison time for his "pranks." Not to mention that you'd be hard-pressed to pull off a SWAT prank as laws have been proposed and/or enacted to counter this, imposing harsh penalties to those responsible for (at best) wasting police resources or (at worst) causing injuries and deaths. Some have advocated classifying SWATing as a form of (domestic) terrorism due to its use as an intimidation tactic and to sow discord.
* As It Happens, syndicated in the US on PRI, uses "Curried Soul" by Moe Koffman.
* A Sith officer commanding a guard camp outside Freedon Nadd's tomb in
* As it is a book about Vlad Tepes and Elizabeth Bathory, who can somehow write letters to each other despite living over one hundred years apart,
* as it is, and ends before the player is allowed to make sense of it.
* as it is covered in poo. He then says that she won't want his trousers either.
* As it only originated in obscure production documents from Saban Entertainment, Billy's surname of "Cranston" was known mostly by fans. When Disney later culled the knowledge of these fans to construct their official site, they just ran with it. This also led to the
* As it pleases the Court, it is the ancient elves that are on trial, not their modern-day descendants. That the ancient elves managed to destroy their own civilization without securing their
* As it riffs on classic comic book tropes and stories the superhero-filled world in
* As it's a Romance story, the implication is this is the meaning of Hearts in the chapter called
* As it says on the sign at the spaceport, ""No laws" doesn't mean "No rules"".
* As it's been mentioned before, a lot of superstitions mention that salt is a very good way to get rid of demons.
* As it seems he's been set up to reform Ankh-Morpork's tax system, we can only wonder who has been stealing from whom.
* As it stands, most would probably go with either The Million Dollar Man
* As it takes place for the most part in a world populated by ghosts,
* As it turned out, Harry's mother managed to get through his protection with her Death Curse
* As it turned out, the overabundance of Good within the Elternteil pantheon was what caused it to splinter into the Bogolenya and the Hoyklan pantheons, because there were no "Evil" deities to keep it in check. The only evil god among them at the time, Temnobog, was emotionally abused because his family and peers believed that his mere presence would "taint" their benevolence,
* As it turned out, to stop the time skips they had to drop several dozen stars into a black hole so it wouldn't interfere with the rest of the universe. Using the

star moving device, Fry spelled out a declaration of love using the stars themselves. Before he could point it out to Leela the Doomsday Device.
* As it turns out, all of the Knights Radiant are this. Being broken is a prerequisite to being a surgebinder, as the "broken" bits are what allow
* As it turns out, Dean was this for Castiel since the first moment they saw each other in Hell. Unfortunately, this doesn't save.
* As it turns out, Kormac did not commit any crimes, but that the order wanted him for his fighting prowess, so they piled false sins upon him and brainwashed him to take away his memory — and that they did the same thing to his fellow Templar Jondar, who you helped him to kill.
* As it turns out, not even the Green Sun can match the fully unleashed power of hope
* As it turns out, Odysseus arrives just in time. Before he left to go to the Trojan War, he told Penelope to wait until their son Telemachus came of age and into his inheritance as the new king of Ithaca and that she should then marry the best husband she could find. At the beginning of the Odyssey, Telemachus declares that he is old enough to become head of the household and ruler of the kingdom in his mother's stead. Penelope then does what she can to postpone the potential wedding, but eventually she can delay no longer. The day Odysseus arrives home is the day before she was to be forced to choose a suitor.
* As it turns out, one of these factors into Varric's romantic history - not for him, but for the girl he wanted to marry. They were going to elope, but she left him at the altar and went through with the arrangement her parents put together instead.
* As it turns out, Rainbow Dash is one. She's a Rainbow Pony, a mutant with a genetic mutation that lets her metabolize light into energy and mana, which are known for their super speed. However, even by their standards she's extremely fast,
* As it turns out, someone had the foresight to add tamper-proof measures to photobooths — they'll take your picture if they detect someone trying to, for example, steal money from the machine
* As it turns out, that wasn't the first time. Flashbacks to their early days in "
* As it turns out, the Alpha Lanterns hasn't prevented that at all, especially not with
* As it turns out, the entire exchange was improvised. Dana Carvey, Garth's actor, visibly snickers right before asking the initial question and Mike Myers bursts out laughing after responding. The director decided it was too funny to cut and so left it in the final version.
* As it turns out, the ENTIRE Reaper threat is due to a particularly nasty case of this.
* As it turns out, the hat he was given as a Christmas gift at the present time of the story does allow him to glide.
* As it turns out, there's a lot of other dimensions. At least 54 if the number is correct.
* As it turns out, the tax department never does catch up with him, although later in the episode he has a nightmare vision of a taxman who threatens to smash his thumbs with a hammer if he doesn't pay up immediately.
* As it turns out the thing would not stand on its own and had to be divided into six separate sandwiches, each of which was itself a Dagwood-sized tower and hardly structurally sound either.)
* As it turns out, the very fact that she was even assigned to a relatively unimportant mission was the crucial point.
* As it turns out, they also have silver bullets, which ends up being a
* As it turns out, Will is seemingly prone to just as much jealously when it comes to Hannibal. You would think, after Hannibal
* A situation involving a whale will often lead to jokes about having "A whale of a time".
* A situation where the bad guys attack and the characters lack access to their signature gear, forcing them to make do with only their wits and whatever they can scavenge from the field (including the paintball weaponry).

* As it was one of the first titans ever produced, the Lucius Pattern Warhound suffers from a similar problem as the Defiler; namely it was boxy and much more mechanical looking than the more rounded, dog-headed Mars Pattern Warhound. Functionally the two are identical, but the aesthetic set by the Mars Pattern Warhound would later go on to influencing the design of the Reaver Titan and the (much smaller) Imperial Knight Titans. While a Lucius Pattern Reaver was produced, it was in epic scale (a 40k scale one was never made) and thus the Lucius pattern warhound remains the odd one out in the imperial lineup of titans. This is made all the more evident as the Lucius Warhound is much more easily scratch built than any of the other ones (due to it's blocky nature) so most people will more likely own one than the Mars pattern variants.
* As it was superstition in Tsarist Russia (and Latin American countries like Argentina) that the seventh subsequent son or daughter of a family would be
* as it works both ways — the ideal Jedi Trap, as either Obi-Wan or Grievous would die. Especially since getting Obi-Wan out of the way temporarily was the main objective.
* , a six foot by nine foot painting of the titular gallery, including detailed renditions of 38 different paintings on display at the Louvre in the 1830s, as well as giving an indication of how the museum's patrons spent their time (several other people are depicted similarly making copies of the works on display). His intent was to share the work of the great European master artists with the culturally isolated American people.
* a six-year-old English girl accidentally spent £900 of her parents' money for gems in-game.
* A sizable chunk of Hargon's forces defect to the Builder over the course of
* A sizable portion of the problems that Sousuke has with the Arbalest in
* As Jayne Cobb of would say: "You know what the chain of command is? It's the chain I go get and beat you with until you know who's in ruttin' command here!" Actually an example of a
* As John Godfrey (18 kills) to Don Gentile (22 kills) in USAAF. Likewise, Lt Roy Rushing (9 kills) to CMDR David
* As John, Kate and the T-850 are heading to the base, General Brewster gives Skynet free range, at the same time, Kate appears out of nowhere, causing General Brewster to question her sudden appearance, but the T-850 shoots her multiple times, revealing her to be the T-X in disguise again.
* As John McCain's running mate in the 2008 presidential election, Palin appeared at a rally in Erie, Pennsylvania, and inexplicably stated that she was "thrilled to be here in the home state of the world champion Philadelphia Phillies!" What Palin apparently didn't understand was that baseball fans in Erie, being in the western half of Pennsylvania, prefer the Pittsburgh Pirates (or, in certain areas, the Cleveland Indians) and
* As Jon and Garfield watch a film about a man-eating lion, we know who roots for whom. Even when the lion gets killed in the end, Garfield happily notes that he ended with a score of "Villagers: 1 Lion: 42".
* As Josie Wahlford(AKA Minerva) was the first known "World Champion" recognized by any significant part of the pro wrestling industry, the wrestler to be recognized as a World Champion among male wrestlers,
* Aska: During her freak out Ayra decides this after realising she can't beat Nico without dying herself. Fortunately for her it doesn't come to this.
* "Ask a Foolish Question" ends in a series of objects exploding around Dr. Doofenshmirtz, punctuated by him asking "
* Ask a Gay Man "hey there, bitches" at the start of at least a few videos.
* ask a girl out because he doesn't want to come across as intrusive (or out of fear of being accused of sexual harassment), while the "macho jerks" have no such qualms.
* Ask A Mortician: Mortician Catilin Doughty explores our relationship with death.
* Ask a Ninja. 99% of the time, he doesn't actually have anything against the people he kills. He just kills them because they're there.
* Ask A Ninja Ninja describes something called an "Extremely Extremely Broadsword,"

which is so big that "it can slice TEXAS in half!" He also notes that there are only a few things in the universe that can even lift it, and since none of them are good guys.
* Ask a Ninja: Ninjas don't employ rabid squirrels because they're unionized and too expensive. Unfortunately, zombie chipmunks have proven to be a poor substitute.
* Ask a Ninja: Particularly the Omni- episodes, in which the Ninja answers several questions in rapid succession.
* Askanj" by contrast are a large number of small shield plates that can be just as easily arranged around the ship to provide all around protection as they can be layered atop one another to provide more protection in a given direction and can be shifted around to plug gaps or face a new threat relatively quickly. Each individual barrier can be brought down quite quickly, but can be restored just as fast.
* Ask an old-school player where the pre-made modules went wrong, and they'll probably tell you it happened when the designers started focusing on the story at the expense of making a fun adventure. The first real alteration to the
* Ask any '90s kid growing up in Japan, and you'll probably hear they grew up watching
* Ask any 911 dispatcher: the typical call from a business isn't an emergency, but because someone thought they had to dial '9' before the real phone number.
* Ask anybody who wasn't a internet user in the 2000s or a site member what
* Ask any non-comic fan what the lineup of the Teen Titans is, and if they can name any, they'll say, Robin,
* Ask anyone about the song "Surfin' Bird" and they'll most likely attribute it to Family Guy instead of its original creators, the Trashmen.
* Ask anyone outside of France to name a famous French leader who wasn't
* Ask any parent how many times they've been interrupted. Children are master Moment-Killers.
* Ask any parent of a toddler what their favorite Disney Junior show is, and they may say it's
* Ask any player about what happens when they accidentally got too close to a Gibdos or ReDead in the 3D games after using a fire arrow but before the arrow finishes them off.
* Ask any voice actor of any anime that was successful in the US. None of them expected the shows they were working on to be anything more than weird little projects with quick paychecks. This goes all the way back to
* Ask a person what games launched with the original Xbox. Almost all of them will say that there was only
* Ask a Policeman, a tunnel leads from Devil's Cave to the cellar of the police station, which the smugglers use to transport their contraband from the beach to the village.
* Ask a Policeman: In Devil's Cave, Brown finds a still smouldering cigarette butt at the mouth of one of the tunnels; telling him which way the smugglers went.
* Ask a Policeman, Sgt. Dudfoot and his constables create fake evidence of a smuggling ring to report to the Chief Constable so they can keep their jobs. In doing so, the accidentally expose the existence of a real smuggling ring.
* Ask a Policeman vanished, the three coppers are knocked over when the door swings open suddenly.
* Ask a Policeman: When Dudfoot attempts the damage the Chief Constable's car so it will look like he's been in an accident, he starts the car, only to discover it is still in gear, and drives it straight through the window of Harbottle's shop.
* Ask a Policeman which supposedly contains vital information. Unfortunately, he can't recall the last line, which contains the information, and makes something up that makes no sense. When the characters eventually learn the real final line, it completely destroys the scansion of the poem.
* Ask a Pony, it's explained that in Equestria's prehistory Discord was actually one of a race of "Draconequusi". These were not twisted and ugly like him, but were beautiful and actually looked like dragons with horse features. Discord's transformation began when a war broke out between the Draconequus race and the race

of Alicorns, who lived alongside them, and hoping for a way to sway the tide he unleashed a powerful god of madness named Genuvial which corrupted his mind and body until he lost sight of the war and decided to turn the world to chaos instead.
* Ask a Pony of a previously well-intentioned regime. To say he has well intentions would be a sad mistake to make.
* Ask a Pony: One tumblr pony drops the whole line in response when anonymous calls him autistic for creating an ask blog specifically about a pony with human genitalia.
* As karma would have it, after getting back together, Angela leaves Shawn to go traveling with her dad near the end of the final season.
* Ask a Stupid Question...: It's quite common that wrestlers, usually the heels, will insult or intimidate interviewers for asking obvious questions.
* Ask a Stupid Question...: What's this page, you ask? It's an index of happy people because the title that's right in front of you means nothing.
* A Skaven sourcebook includes a map which uses the Skaven vernacular. Most areas are labeled with the Skaven names for their inhabitants ("Man-Things", "Elf-Things", "Green-Things", "Dead Things"); the Chaos Wastes, populated, if at all, by mutant monstrosities, is labeled "Things".
* Ask Axe Cop has a race of gill-men who want to remove all the land from Earth, but even they aren't sure how.
* ask before you borrow it leaving him looking at a note with the slogan on it. Another had a slow breakup song and a woman throwing the man's possessions out of the bedroom window as he came home, looked at the car keys in his hands. The car was the Nissan Micra.
* Ask Brainy Twilight: Brainy Twilight has recently begun an attempt to reform a cannibal pony. Progress is... iffy.
* Ask Brainy Twilight has the titular brain in a jar make an AI to run her old body. She names it Sparks and treats it like a daughter.
* Ask Brainy Twilight. In an odd play on this trope, she struggled with admitting she was one of these until she made a sapient flaming chainsword for a friend.
* Ask Caesar by Yevgeny Lukin and Lubov Lukina is an attorney's speech in court. His client is accused of attempting to change history by teaching modern science (up to quantum physics) to Cro-Magnons. "But did it change anything? No." Except for some insignificant details, like the fact that Gaius Julius Caesar has been diced with lasers.
* Ask Crapplejack blog: When Applejack arrives in Falkath with the Merchant from Perseth, he approaches the customs agent at the docks claiming to sell 3,000 metaunits of concentrated malus domestica, to which the agent replies "What a vile fluid, however legal." Malus Domestica is actually the name for the common apple.
* Ask Dr Eldritch: a robot writes in to ask why everyone around him thinks he secretly desires to be human, when he's actually quite satisfied with being a robot, something he considers to be far better than being human.
* Ask Dr. Eldritch — just ignore the fact that he openly sleeps with her.
* Ask Dr. Rin! is Tenshin, a monkey that does nothing but squawk and eat candy, but due to being something of a mascot for the series, gets a lot of screentime.
* Ask Dr. Rin!, one of the episodes had the soccer team competing against one of the other teams who made sure to showcase a lot of this, just in case you weren't convinced by a flashback earlier in the episode that showed them being jerks off the field.
* Ask Dr. Rin!. The plot at first follows the everyday life of Meirin Kanzaki, a 13-year-old girl with the power to predict the future using feng shui magic. In order to test her powers, she creates a Web site under the pseudonym of Dr. Rin.
* asked Buffy to keep her for when they're reunited. At the end of the season, she does:
* asked to be killed from orbit so the Lamenters wouldn't die to the last man to save them. Their request was granted. The world was rendered unusable to the orks, but the Lamenters left with maybe a tenth of the slaves they'd tried to save, not to mention the horrific losses they'd taken.
* asked to describe some of the issues that made him angry part of the sketch.

* Askeladd is a downplayed example: He is not based on any historical figure and his
* Askeladd unite the Norse and Saxons under a single crown and stop the Viking Age.
* A skeleton could be assembled with 15 interlocking pieces of Fleer's "Mr. Bones" candy.
* A skeleton guard's jaw drops (literally!) when he sees that Miguel, a mortal, has made his way into the Land of the Dead.
* A skeleton walks into a bar and says "Give me a beer — and a mop."
* As Kenshin's equal, Saitou is certainly a contender for best swordsman in Japan, as well as the strongest of the Shinsengumi.
* A skeptical atheist walks around near Loch Ness. Suddenly, the Loch Ness monster erupts from the water and grabs him. In panic, he shouts "Oh Lord, save me!"
* Ask Ernst Stavro Blofeld films are said to be this, and they are extremely close to the real events. The Daniel Craig reboot, on the other hand, is the result of the producers being forced to make stuff up now that the real James Bond has retired and that Blofeld is in jail.
* Ask Ernst Stavro Blofeld lifelong — he was already trying at age ten).
* Ask Ernst Stavro Blofeld's Blofeld calls himself "a soulless murderous monster" without a trace of irony.
* A sketch about a Lifetime channel game show, "What's Wrong With Tanya?" where the contestants were all suburban mothers from Lifetime movies. They had to guess what specifically was troubling different teenagers named "Tanya" that were brought out.
* A sketch advertising the NRA to kids has a father take his son hunting. The kid takes a disturbing like of the sport and proceeds to blow the shit out of everything, including using grenades and "Ol' Painless", a gatling gun.
* a sketch. Also, the guy who they're enlisting to pilot the helicopter has two days to learn to fly a helicopter from a book.
* A sketch exclusive to their "Matching Tie and Handkerchief" album is a dramatic narration of an occurrence where there was emphatically no mayhem, violence, or other criminal activity whatever, narrated with an ominous, emphatic voice and plenty of alarming background music.
* A sketch from lampoons Irish pronunciations and the confusion they may cause in Britain.
* A sketch had the two hipsters discussing the meaning of their favourite piece of street art, only for it to be revealed to be a No Parking sign.
* A sketch in a Norwegian humour show was a subversion: Not only were both characters actually blind, both characters though they were being led by the other. One sketch had them Rally-driving.
* a sketch (including the first man's fiance and the registrar's "wife"); they all get married and live together happily ever after.
* A sketch of a Swedish comedy show played with it; a door-to-door sales man knocks on a door, and when it opens he is confronted by a smiling couple telling him: "Hi! We're from Jehovah's Witnesses!"
* A sketch on BBC show Recorded For Training Purposes has a writer calling a producer about a sketch he wrote, which is about a writer calling a producer about a sketch he wrote. The punchline is the writer realising that the sketch needs a punchline.
* A sketch on the artist's blog depicts Hungary dressed in a princely garb as the knight and Liechtenstein with long, flowing hair as the lady — in a variation where both are female.
* A sketch revolves around a pigeon teaching his son how to poop on things, and how to select the best target. They reject the top of a bald man's head (too obvious), on a baby (
* ask fits in. Granted, it's all parody, but still, the Vegas-style showgirl outfit????
* Ask Fluffle Puff blog, the pink fuzzball quickly grew in popularity. Eventually receiving her own spinoff blog, with Dan relegated to a background character.
* Ask Fluffle Puff: Fluffle Puff communicates only through blowing raspberries and

pantomiming, yet the others still understand what she's trying to convey, with the audience being the only ones left out of the loop.
* Ask Fluffle Puff For extra humor, she's saying it to Queen Chrysalis.
* Ask Fluffle Puff has Derpy blowing soap bubbles, one of them popping in Fluffle Puff's eye. She starts screaming in pain, making Derpy scream in turn. It goes on and on until the episode ends.
* Ask Fluffle Puff shows Fluffle Puff playing with a box after throwing away the book it contained, destined to Twilight (and with the mention "last copy ever, handle with care").
* Ask Fluffle Puff territory with the titular character. She can even move around while flat on her face.
* Ask Fluffle Puff, this is Princess Cadance's reaction the first time she meets Fluffle Puff. To which Queen Chrysalis objects. Strongly.
* Ask Her Lustrousness, Yellow Diamond freezes up when Bill Dewey kisses her hand. It takes a couple of calls from Blue in order to get her to snap out of it.
* Ask Her Lustrousness, Yellow Diamond (under the aliases "Bella Azula" and "Susan Azula" respectively) in order to safely visit Earth and understand the meaning of Steven's birthday. Even though they end up blowing their covers right in front of Greg, they really don't end up in any actual problems despite some awkwardness with the Beach City citizens here and there.
* Ask Hoops and Dumbbell and apparently regularly does some pretty complex math at his job.
* A skilled Bondsmith is also able to nullify the powers of Radiants through manipulating the metaphysical Connection of their bodies and their
* A skill you get from Anise the Witch grants infinite item use in battle. Not only does this allow you to cover any holes in the party's line-up, it allows for infinite amounts of healing too. The only thing deflating it is that Anise is the second-most powerful entity in the entire game (surpassed by the Black Rabite alone), and you have to beat her on Hard mode in under two minutes to get this skill. And Anise is the only boss in the entire game that has more than one form, since she gets
* Asking Alexandria band We Are Harlot. Although they had a top 10 rock radio hit with "Dancing on Nails", which post-Worsnop Asking Alexandria have yet to achieve, We Are Harlot remains obscure to the public, known mostly for being Danny's new band, whereas Asking Alexandria is still going on strong with new vocalist Denis Stoff, and has shown no signs of slowing down since. Worsnop returned to the band about a year later.
* Asking Alexandria have had ten charting hits on mainstream rock (the highest-peaking being "Antisocialist" at #3). However, it seems unlikely that any of them will displace "Final Episode" (which came long before they ever started getting radio play) as their signature.
* Asking a newbie to wash the gels. For those who don't know, gels are colored films placed in front of lamps to provide colored lighting effects. A gaffer or best boy would tell the newbie to wash the gels and give them some very complex and difficult-to-remember instruction on how to do so. Nowadays, gels are colored plastic, but back in the day, they were made by adding food coloring to gelatin and letting it set in a thin film, hence the name. As a result, they dissolved when washed, casing the newbie to think he had done something wrong and panic.
* Asking Brod to destroy his manuscripts and notes is an interesting story. Kafka mentioned several times before his death that he intended to ask Brod to do so, and Brod always told him that he wouldn't do it, as he respected Kafka's work and disagreed with Kafka's desire to have it destroyed. He even believed Kafka really didn't want his works destroyed, because if he did he would have either done it himself or asked someone else to do it.
* "Asking For a Friend" by Devin Dawson, as the title implies. The narrator approaches a girl at a bar and asks if his friend could buy her a drink and slow dance with her... and if this friend of his had hurt her in the past, could she ever forgive him?
* Asking for negotiations as a ploy to draw them out and slaughter them is a very

old tactic. For example, the Romans did it to Lusitania after the last Carthaginian war. The Romans promised them that if they would surrender peacefully and come hand in their weapons, they could be buddies. About 20,000 Lusitanians were slaughtered. This backfired horribly because a guy named Viriathus survived it and
* Asking if you have the bill or the establishment's telephone number
* Asking questions might be a uniquely human ability. Apes have been taught sign language, and they are able to answer quite complex questions, but they never ask any.
* asking the operator to patch him through, after giving them their secured number learned to recognize the number and would cut Max off in mid-sentence by simply stating: "Oh, you want CONTROL Headquarters. One moment please."
* Asking the victim questions as soon as you get to them is also helpful in first aid situations, as their being able to give you any kind of verbal answer also handily answers the question of whether they're breathing. Failing this, you have to resort to other more difficult methods like checking for chest rises.
* Asking "what if Operation Sealion had been successful" or even mentioning the "Unmentionable Sea Mammal" in a non-ironic way on
* a skirt over her pants, and kicks butt, while Selene wears dresses aside of her standard outfit, which has pants, and is more openly feminine, likes cute stuff.
* A skit frequently used at summer camps is all about this, with everyone standing behind a sheet so only the shadows can be seen. There are several variations depending on who is performing it and where, but some include:
* A skit scold a gift recipient, who's complaining about receiving the wrong gift last year, for writing a letter instead of sending him an e-mail.
* A Skittering Heart. In ASH each esper is the incarnation of a different set of ideas or concepts,
* A skit was the Chicago super fans (Bill Swerski's Superfans). Heart attacks were a common occurrence, with at least 25 heart attacks between the four guys. At this point for these guys, they do a little chest clutching (or for Todd O'Connor, chest pounding) and shrug them off.
* Ask just about any fan what the currency of the Alternian Empire is and they'll answer "caegars." The only caegar we see on screen is only used for coinflips, and their use as currency is implied only once (when Karkat described Vriska as a "run of the mill little psycho girl, a troll caegar a dozen"). Caegars as the official imperial currency has been widespread in
* Ask King Sombra is Coffee Talk, who he absorbed in his shadow form before it happened.
* Ask King Sombra, mangling it into things like Hockey Puck, Toffee Socks or Coughing Rock.
* Ask Kira #96 has Kira giving Viola a wedgie, due to it being "Wedgie Time".
* Ask leading questions to a few favored guests on their show, and ask randomly hostile questions to everybody else.
* Asklepios and not her bust. After the surgery is over, he even says she looks better flat-chested.
* Ask Lovecraft has been created in June 2012. Four years later, there are more than 600 episodes and counting.
* Ask Me Another character to use the f-word, the game bleeped out a particular word from a quotation and had Wiseman try to guess it.
* Ask Me shorts would air in every single commercial break. They would play it once, twice, sometimes 3 TIMES in just one commercial break. They don't even have much variety in the episodes they would even air. So if you are a Qubo fan but hate Ask Me, you're screwed.
* "Ask not for whom the bell tolls." You've heard that pithy phrase, usually said when someone else is in trouble, but who said it? How about "No man is an island" ? Well, they both came from the same paragraph of the the same essay, but missing the context.
* Ask people in Chicago, and they'll tell you that the Cubs lost the 2003 NLCS to the Marlins because of Steve Bartman. Forget the fact that they couldn't get an out the rest of the inning, and then lost the next game. No, it all comes down to that

one play.
* asks an attractive female race-car driver the very question, responds with "speed".
* Ask Serious Rainbow are fitted with technology that's able to resurrect them about five seconds after they die. Serious has flat out exploited it to get an advantage in battle.
* Ask Serious Rainbow her. This impressed a god enough that he gives Rainbow Flash a new chance at life as Rainbow Dash, who eventually becomes Serious Rainbow.
* Ask Serious Rainbow to inject drama, claiming anyone who does so "can't write for shit" and finds it galling that she has to clarify that she's not mocking the trope.
* asks Gideon not to use any more spooky spells and Gideon promptly uses one has some ominous-sounding gibberish chanting as part of said spell. The chanting turns out to be "spooky evil spells, spooky spells, spooky spells!" when played backwards.
* asks how can Launchpad that by his logic, know is he not a mole monster himself.
* asks Naja to kill him so he can't destroy the world specifically so Morte will be safe. (He didn't want to destroy the world in the first place, but who are we kidding?)
* Ask someone "Have you heard the one about the pervert with a micropenis and a talent for bait-and-switch?" When they inevitably say no, act like you're going to whisper the punchline in their ear, and then
* asks story at all. Heavy agrees that "No. It's not." All are baffled at how that question led to that answer.
* asks the Oracles why he's being tasked with reviving one of the worst demons in history. The Oracles reassure him that The Judge will be defeated because "it's supposed to be". Whistler calls the Oracles out on the idea that something will happen because "it's supposed to" when their very problem is that nothing has been happening the way it's "supposed to" since Halloween.
* Ask That Guy admits that the mutant powers really confused her as a kid.
* Ask That Guy episode 33: Question? How can I kill my family and frame the cat?
* Ask That Guy episode: "You'll be able to hear colors and smell happiness."
* Ask That Guy explains possible Christmas-themed forms of suicide, culminating in him suggesting that one could be sodomized by a reindeer. At the very end of his response, he utters the magic phrase.
* Ask That Guy: [Looks up from his book] "Oh! [Foreign, or just made up, greeting]! Didn't hear you come in."
* Ask That Guy subverted this trope by suggesting an original movie: 2½ hours of exploding babies.
* Ask That Guy, where he frequently reveals disturbing facts about his personal life.
* Ask That Guy, where The Guy's voice will spontaneously drop a few octaves when he feels particularly evil.
* Ask That Guy will tell you all about this, in great detail. Just ask him.
* Ask That Guy with the Glasses Also, the Nostalgia Critic made a comment that Satan goes to the Devil Devil when he's not being evil enough.
* Ask That Guy with the Glasses, although he cares enough about the narrator to shoot himself in the mouth because he can't live without him... after killing him, obviously.
* Ask That Guy with the Glasses being forced to do sexual favors for his gym teacher either.
* Ask That Guy with the Glasses. Doug admitted he turned his morals off to answer the questions, but still refused to go anywhere that would spread hate instead of mock it.
* Ask That Guy with the Glasses has Ask That Guy attempting to disturb Bennett the Sage. The end result is Ask That Guy huddled in the corner in the fetal position as Sage rapes him.
* Ask That Guy with the Glasses has boasted that he'll go down on anyone and anything.

* Ask That Guy with the Glasses has done this twice, once when he was miserable over his marriage to the GPS falling apart, and the second time was when he mourned his pipe that snapped in half.
* Ask That Guy with the Glasses: In one christmas episode featuring Sage, the last question asked is what happens when somebody eats yellow snow. Sage is blunt in that he says that you get sick because you ate pee.
* Ask That Guy with the Glasses narrator tells him how amazing he is constantly, he'd rather be abused and told he's worthless.
* Ask That Guy with the Glasses rapist, but he's managed to get a lot of consensual male and female tail too.
* Ask That Guy with the Glasses walks right into his bookcase when he takes his glasses off.
* Ask That Guy with the Glasses, who'll hit, torture and rape men and women without prejudice.
* Ask the average westerner to name one historically famous Chinese Emperor, or Indian Mughal Emperor, or Japanese Emperor off the top of their head without using Google. Probably none of them will be able to but they'll know the name,
* Ask the devil for something he can't do (like worship God) or that destroys him, which makes the entire deal pointless.
* Ask the guardian whether they could "take them home" with a goofy grin on their face. Usually, the answer is no.
* Ask the Little Heros says that Billy and Tommy alternate between Xavier's School and foster homes.
* Ask the majority of hearing people if they know sign language. If you specify which, they might also know how to fingerspell, but most likely they’ll say that’s the one ‘sign’ they know.
* ask them to do things calm enough to converse with it without it immediately attacking her.
* Ask The New Hope's Peak and a few of the more obscure characters, it can still be counted as having plenty of characters.
* Ask The New Hope's Peak of how human cloning is performed using these.
* Ask the StoryBots computer to figure out computers themselves actually work.
* Ask the StoryBots has a case of this happening during the show itself. The StoryBots are traditionally animated when they're in the computer world, but shift to CGI when they reach the Outer World.
* Ask The Tropers and open a query but without checking "make private".
* Ask The Tropers and open a query. Make sure you check the "make private" checkbox before saving.
* Ask The Tropers Here you can ask fellow tropers any questions you have about the wiki. Also to report problems with other tropers.
* Ask The Tropers. This is a good place to bring up problems with articles or with other tropers.
* Ask This of Rikyu for him, just three years before being ordained as a Shingon Buddhist monk.
* ask try this (which happens more often than you'd think, since police often figure they can get away with it), the best thing to do is to not interfere, but to keep stating that you don't consent and try to establish as much proof as possible of you saying it (such as by recording it, or better yet calling someone so they can hear it); if the person in question can reasonably demonstrate that they didn't consent to the search, then anything the police find is inadmissible as evidence in a court of law.
* A skullcap is made from an actual skull, something its description milks at some length.
* Ask Vector Prime Go-Bots and a final farewell from Cy-Kill posted at the beginning of 2017) being a two-part story titled "Combiner Wars", which had the humans, the Guardians and the benevolent Rock Lords form a peace treaty between their respective home planets Earth, Gobotron and Quartex and a calamitous battle involving Renegade combiners Nemesis, Puzzler and Monsterous resulting in the Renegades and the evil Rock Lords soundly defeated while their respective leaders

Cy-Kill and Magmar were forced to lie in wait until their next chance at battling the Guardians and the good Rock Lords.
* "Ask Vector Prime" notes that the Multiverse can occasionally interact with a larger Megaverse, and beyond that is the Omniverse, which consists of every reality imaginable, as well as some that aren't. (Admittedly, it's a bit more complicated than that, but that's the basic gist.)
* Ask White Pearl and Steven (almost!) anything after learning what kind of gem Steven is:
* Ask White Pearl and Steven (almost!) anything, Amethyst grows to resent Steven for being Rose's "golden boy" and being forced to share her room with him. Just as she concocts a plan to frame him for a corrupted gem being released, she overhears him talk to Connie about how he feels like she is justified in being jealous and quickly changes her mind.
* Ask White Pearl and Steven (almost!) anything attack, Rose was the only one able to withstand it, her shield blocking the attack while the others were poofed instantly.
* Ask White Pearl and Steven (almost!) anything he has severed the connection between them and allowed her to be free again.
* Ask White Pearl and Steven (almost!) anything meets the Crystal Gem Pearl, he starts referring to White Pearl as "Earl" to avoid confusion.
* Ask White Pearl and Steven (almost!) anything) of crackers she was holding.
* Ask White Pearl and Steven (almost!) anything, Pearl and Amethyst argue about having Steven bunk in Amethyst's room, Amethyst comparing it to babysitting while Pearl thinks that it will teach her responsibility, as well as the fact that Steven and Amethyst are similar. This goes on with Steven sitting between them, acting as though he is not even there.
* Ask White Pearl and Steven (almost!) anything, Steven's hair is naturally spiky and roughly resembles a five-pointed star similar to his mother White Diamond.
* Ask White Pearl and Steven (almost!) anything, the majority of his mother's gem occupying the majority of his skull cavity and the pointed end of her gem visible as a small horn on his head.
* Ask White Pearl and Steven (almost!) anything, the readers know that Steven is the half-human son of White Diamond, but nobody in-universe does with the exception of White Pearl, who is unable to tell anyone.
* Ask White Pearl and Steven (almost!) anything, White Pearl is unable to speak on her own, only able to repeat words that Steven has already spoken and weave her own sentences with the recycled words.
* Ask yourself, knowing people often number things according to quality (and SG-1 are said to be the point team because they are the best - aiding the assumption), would you want SG-24 helping you or SG-12?
* Ask yourself this: in a world with things like psychiatric evaluations and antipsychotic medication (things Westeros could do with, frankly), would Aerys II "The Mad" Targaryen ever have become the paranoid pyromaniac who thought murdering two Starks and requesting the head of a third with a side order of a Baratheon would solve things? If the answer is "no", then most of his atrocities would have to live here, on the grounds that Captain Reason was not at the helm of his ship a lot of the time.
* ask you to become her servant. Agree, and you get another Game Over. Hopefully you saved right before the final door.
* a slab of rock fashioned into the rough form of a sword even if she broke through his guard.
* As Lady Noire, Marinette's hair grows to form a braid that goes past her legs, taking the place of Cat Noir's belt as her "tail".
* Aslan Adam due to being raised in the wilderness by lion certainly helps.
* Aslan are aliens who roughly resemble lions. They generally behave more like the more
* Aslan: feline-like humanoids, named either for the Turkish word for "lion" or the character Aslan in
* A slang term for a specific portion of the male anatomy in the groin region.

* Aslan have a fancy for decorated weapons and elaborate epics. They also have insult contests, bragging contests, and tall-tale contests. Recreational dueling (which often requires a ritual insult that the recipient
* Aslan is of course Narnia's version of Christ. God the Father is 'The Emperor Beyond the Sea'.
* Aslan: they prefer to fight duels with claws. As humans have no claws, a human fighting Aslan fashion would wear an Ayloi, or artificial claw. Ayloi could count as this.
* Aslan, though are more Romanticist than the Imperium. Having much more in common with the Sword Worlders save that their social structures have barely progressed beyond tribal levels.
* A Slap On Titan, Pastor Nick mocks Eren and Mikasa by singing a variation:
* As Laura hemorrhages following an emergency C-section, she mumbles, "I want my mother", just before passing out. This is especially poignant as her mother passed away years ago.
* As L comments, "It's very creative how you dot your 'i's with hearts."
* a sledgehammer. Even with the latter being a robot, it was still a dangerous tool to use.
* A sleep-deprived Mr. Smiley, trying to man every location in Funland, in "Too Short To Ride".
* A sleep-drunk Eric walks into the closet instead of leaving the house for school one morning.
* Asleep for Days: Someone falls asleep for days after a bad experience.
* A sleeping dragon almost blankets the landscape in smoke for a century because he couldn't find a better place to snooze in "
* asleep. Its first appearance in the anime showed it mistaking a wind chime for food.
* Asleep, Not Meditating: A seemingly meditating person is actually asleep.
* As Lethal as It Needs to Be (Effective Killing Power as the Plot Demands)
* A slew of awkwardly titled rap-dance sensation songs were released after the success of the
* A Slice of Life that she "may have let herself go a little" during that time. One period of time during this was even named "The Great Decade of Cheesecake".
* A slight aversion in "Starship Mine". Picard was unhappy having to attend the reception of a socially annoying Commander and was looking for any reason to leave. When told that there were horses and riding trails, Picard immediately picked up on that and said he was going back to the Enterprise to get his saddle. Only the Commander believed it. The other Enterprise crew didn't, but he had actually gone to get his saddle.
* A slight aversion: people from Balkans understand Serbian, Croatian, Bosnian and Montenegrin... because it's all basically the same language.
* A Slight Case Of Murder When Marco visits the orphanage where he grew up, he volunteers to spend a month fostering the brattiest kid at the orphanage to try and "mold" him into a productive member of society. The kid is fairly surly and annoying throughout the film.
* A slighter case was the Ultimate-status DJ Sona skin in 2015, turning
* A slightly bowdlerized version of the show used "boink her beaver", which adds another
* A slightly different theory is that the jungle can't be colonized by humans without agriculture, and that all "strict" hunter-gatherer tribes that live in jungles actually do some kind of small-scale itinerant agriculture and livestock rising (fowl, pygmy pigs,
* A slightly different version of faulty cooking logic on an episode of
* A slightly earlier and weird example is what happens with Starrk and Wonderweiss. Turning up behind the man, Wonderweiss puts his
* A slightly less common, but still all too regular occurrence, is for players to forget that there aren't actually all that many races that are
* A slightly less extreme example is Mamoru, the Star Social Link — a star athlete who really just likes to test himself. His Social Link concerns how to

maintain this in the face of ever-growing family troubles.
* A slightly less literal variant of blood magic is a significant plot detail that runs through the whole series, but isn't fully explained until
* A slightly modified version, "something only she would type", is used in
* A slightly more adult version of this includes Bad Dragon's fantasy adult toy line. Everything usually arrives in a small unmarked 6"x6"x6" square box, no matter which one you purchase. With toys over two feet long, and an additional 8 ounce bottle of fun included, it can be like hammerspace has opened up to welcome you to a world of fantasy dragon dong as they unfold from the depths and horrify your roommate.
* A slightly more blatant example is when she says the following toward the end of that song:
* A slightly more minor example in the form of Weisslogia and Skiadrum not being dead despite Sting and Rogue remembering having killed them. Apparently dragons can alter the memories of humans somehow. (They then both proceed to die a few minutes later, making everything a bit of a moot point.)
* A slightly more obscure example can be found with the mage Shandalar, who serves as a quest-giver in Ulgoth's Beard in the Tales of the Sword Coast expansion. Although not immortal, he is very obviously designed to be as close to unkillable as the game engine allows. He will cast Globe of Invulnerability on himself the moment anything threatens him, and is specially coded to be able to cast spells twice as fast as the player can. His AC is also so high that only a maximum level fighter stands a chance of hitting him. To add insult to injury, he will teleport away after a few rounds of combat, rendering attempts to whittle him down with lucky hits pointless. However, a Scroll of Protection from Magic will render his attacks completely harmless, and an extremely liberal use of magic wands will suffice to kill him before he can teleport away. For your troubles you get the best (neutral aligned) mage robe in the game, which can otherwise only be purchased for an enormous sum of money at one special shop.
* A slightly more sinister example is Rose's wands. Doc Scratch suggests that the real power was given directly to Rose by the horrorterrors and that the wands are a way to make her think she's working alone while actually doing their bidding.
* A (slightly) more straight example can be found in Knight Of One Bismarck Waldstein, who has his left eye sewn shut.
* A slightly odder example is fighting skills. Shiraishi is not very athletic and not physically strong, and yet both Yamada and Asuka, who are strong hand-to-hand fighters, keep their fighting skills when they've swapped bodies with her.
* A slightly realistic and downplayed version of this trope (surprisingly enough) appears in
* A slightly serious version was uttered by the defense counsel to one of the members of the
* A slightly straighter example is implied: It's revealed that Tobi unleashed the Nine-tailed Fox on Konoha when Naruto was born.
* A slight subversion, O'Neill THINKS he and Teal'c are about to bite the big one.
* A slight variation, but Alistair Urquhart voluntarily slept upright in a chair so he wouldn't attack his wife in his sleep due to the nightmares he had about his time as a prisoner of war under the Japanese during the Second World War.
* A slight variation in cases of severe blood loss: in addition to the usual drowsiness and disorientation, the lowered bodily fluid levels can cause the victim to feel extremely thirsty. There have been many accounts of the aftermath of battles and disasters where the dying were heard begging for water as they bled out.
* A slight variation in the case of Vin, who twice ends up fighting in her underwear as a result of having to quickly discard a bulky and inconvenient
* A slight variation in the original pilot "The Cage," where the Talosians were breeding a race of
* A slight variation on the trope (in this case, it's a played-straight version of the trope
* a slimeball; the meanings of "talismans" and "great power" are stretched paper-

thin; the binder didn't make them; and Brenish got them from his corpse. He's also saying this to a mind reader.
* A Slim Jim commercial features two guys whose car breaks down and get picked up by an
* A slimy politician in the Season 8 opener has a history of molesting his stepdaughter, who later became a drug addict. He also seems to be grooming his younger daughter
* A's, Lindy finds Nanoha and Fate propped up next to each other after the Wolkenritter drain their Linker Cores. Since they originally passed out on the ground several yards away from each other, it's implied that the Wolkenritter actually moved them there.
* A slingshot maneuver around Jupiter is attempted by O'Neill and Teal'c in "Tangent", but the attempt fails as the rockets they use (the pair of Sidewinder missiles their
* As Link goes along the path, Sidon checks up on him at another bridge, Luto's Crossing, where a Moblin sneaks up on Link.
* As lions are obligate carnivores, they can't choose to be vegetarians. Leo's body frame, which the movie tries to say is good because of a vegetarian lifestyle, is less sleek and more emaciated.
* as Lissa with a specially tall guy (like the aforementioned Gregor, Lon'qu, Kellam, and Vaike) can give a similar impression.
* As listed above under Literature, Asajj Ventress is also portrayed as this on
* As Lizard was originally planned to appear, several people claim that he is still in the game. Usually, the theories say that he's in the sewers, accessible through a certain manhole after a certain requirement has been met.
* A slogan which appears on various T-shirts, and may have been adapted for
* As long as evil villains reveal their plans, you can count on GEICO saving folks money.
* As long as her airheadedness doesn't get in the way, the second one — Hammy, the Cat-Fairy — can
* As Long as It Sounds Foreign: A character speaking a foreign language is really speaking unintelligible nonsense that sounds like a foreign language.
* As Long as It Sounds ForeignWhere creators don't bother getting a foreign language right when they feature it in their work.
* As Long as It Sounds Foreign: Words that are not foreign, but are put in to "sound" foreign.
* As Long as There is Evil: As long as evil exists, the villain will always come back.
* As Long as There is Evil: Evil will always pop up as long as evil exists.
* As Long as There is Evil: The villain boasts that as long as evil exists, they'll never be dead for good.
* As Long as There is Evil: The villain can't really be killed because he'll keep coming back as long as evil exists.
* As Long as There Is One Man is defeated by the villain, there will always be one person to step in to take them on.
* As Long as There Is One Man: The belief that if there is just one person who opposes tyranny, then the villain can never truly win; often inspires others to rise up as well.
* As long as the relative speed between ships are at least 10 knots, ships do base damage equal to their undamaged hitpoint total to each other, though this can be modified by signal flags.
* As Long as They're Happy psychiatrist Dr. Schneider explains thusly; when a man shoots himself, it is a tragedy. If he shoots himself in the pants, it becomes this trope.
* As long as you remain in secure space, CONCORD will respawn at your position until your ship is destroyed. If you were thinking of leaving secure space to escape them, they have locked down the jumpgates to keep you here.
* a sloth demon sends you into the Fade (the place where a person's consciousness goes while they're asleep). The segment which follows is long, unskippable, boring,

and difficult. A very popular mod for the game has no other use but simply jump that segment and get you back to the normal quest; however, this is only available to PC players. If you're on console, you have no choice but to do the whole thing.
* as lovely temptresses, rather than the hideous bird-women they are in mythology. (The painting also shows them more aggressively trying to seduce the sailors; the ones in myth were never stated to leave the safety of their island while singing.)
* A slowed-down, piano-based version of the series theme tune plays as the characters go over the top
* As ludicrously impractical as these concepts were (Hitler's own top tank general, Heinz Guderian, dismissed the notion as a ridiculous fantasy), they were in fact technically
* as Luffy learns when he collapses at the climax of the Marineford arc when he's desperately trying to help Ace against Akainu, leaving him wide-open for Akainu's attack that the already injured Ace has to perform a Heroic Sacrifice
* As Luna gloatingly tells Olive Branch himself after he's arrested, his half-assed plan and the actions of himself and his lieutenants have caused the anti-Celestia movement to lose almost all support, not only allowing the royals to focus once more on searching for
* A Sly Encounter with it, when Sally is confused why people would need privacy when dressing, with Sly insisting on her wearing pants and a shirt. He squicks himself out when thinking about Murray without pants, and (as he is a hippo) without fur.
* As Lyta mentions, the Psi Corps takes its responsibilities as a parent
* As Magna states himself, he doesn't have the large magical power that nobles have, and needs to use his magic wisely as a result. Thus, he uses aim, proper timing, and tricky pitches to make the most of his fireball spells.
* A small and interesting Easter egg can be found in the mobile version of Windows 10. The default wallpapers are located in the Photos app under the date April 1975. However, this is not just any ordinary date, nor is it random: Microsoft was founded on April 4, 1975.
* A small band of concerned but "average" citizens who have taken it upon themselves to deal with the threat(s). The ones who survive long enough can also graduate to
* A small but amusing example, but there have been some rather off phenomena with storms - not hurricanes, mind you, but small rain showers and blizzards. They actually seemed to travel up a street, or even up
* A small but vocal minority has pushed getting the extra point removed from the game, due to the high probability of a kicked extra point being good leading to teams always kicking the single over going for two unless absolutely necessary.
* A small Easter egg can be found in Google's Calendar widget icon in Jelly Bean. If one were to look at the widget icon join the widget menu, an appointment for a time travel demonstration in a
* A smaller example came in the Alabasta arc: After traveling across half the kingdom to get to the rebel based in Yuba, they find out it was moved to Katorea, a city near where they started. They could have been saved most of the trip if Eyelash(es) (the camel who Chopper was able to talk to) mentioned that the wagon full of guns that accidentally brought Chopper to Katorea was being used by the rebels. He was promptly kicked in the face by Luffy, Sanji, and Usopp for not mentioning this, scoffs it off, and is then kicked in the face again.
* A smaller example: Chloe Sullivan, gets dumb when she is romantically involved with
* A smaller example does this with a creepy twist in the original Myst. Achenar installed a holographic projector within an altar that
* A smaller one, but no less hilarious, is the Flanderization of weapons and equipments in the Codexes. Space Wolves don't have "lightning claws", they have "Wolf Claws". Blood Angels don't have Power Fists, they have "Bloodfists". And almost every single melee weapon available to the Grey Knights are now some flavour of "Nemesis Force", although that is somewhat justified due to them being previously named under the blanket "Nemesis Force Weapons", meaning that there is

simply more of a distinction now rather than a full rename (unlike the aforementioned Bloodfist, which is functionally identical to Power Fists). There's also the "Artifacts" section of newer Codexes, meant to be a selection of rare weapons and equipment that can only be selected once-per-army. However the naming gets silly with the Tyranids, who have "Bio-Artifacts" that somehow grows on their body but are still "artifacts" in that they're unique in the universe.
* A smaller one is also in the first season finale. After defeating Gauron one last time,
* A smaller one occurs in "The Not-So-Ugly Duckling" when a boy Jan likes drools over Marcia. However, Marcia has zero interest in the boy, despite Jan's accusations of boyfriend-stealing.
* A smaller-scale aversion of this is the reason why the Cole Protocol (jumping to various random coordinates before making the final jump to a human world) is adopted to keep Earth's location hidden from the Covenant. Starships within human-controlled space could jump directly to Earth if they wanted, but this would essentially let the cat out of the bag.
* A smaller-scale example appears in the original film also: one minute, a giant hairless horned demon-dog is smashing its way through an apartment building in full view of dozens of witnesses; the next, a uniformed guy is insisting that some idiot brought a
* A smaller-scale example exists with Shinjuku, one of the 23 special wards of
* A smaller scale example: Kirk, Spock and Uhura leave the cockpit to take a smaller ship down to the surface of Qo'nos, leaving Sulu as Acting Captain. As soon as Sulu starts speaking to inform the crew of this, just a few seconds after the aforementioned three left the room, the camera cuts back to them to reveal they've already changed clothes and are about to get on the smaller ship.
* A smaller version from the same film. When Rose is preparing to jump from the
* A small example, but as punishment for stealing soap in the Mohave county the thief is forced to wash themselves with said soap until it is completely used up.
* A small gag in "Goodbye, Krabby Patty?" involves Squidward pretending to be an animatronic to keep his job at the Krusty Krab Museum. A repair man comes in and bends him over so that his butt is up in the air. He then pulls out a drill, and the painful screams from off-screen fill in the blanks.
* A small gag used in a third season episode when Peter is about to be killed by a bear while on a hunting trip with Chris, his childhood flashbacks appear showing he has to repeat the fourth grade several times and finally passed right before his hunting trip.
* A small girl asks her mother if her curfew can be midnight. Her mother replies "only when pigs fly". The daughter then launches her pet pig out of a catapult to get her mother to change her curfew.
* a small incident, causing a rather startled reaction from the panel including Vincent Martella reacting in-character as Phineas.
* A small joke in the second game involves a salarian video game store shopkeeper being distracted by a fascinating human game—Solitaire.
* A small minority of (current) US military personnel are involved in criminal gangs or organized crime. A number of gangs in the US used to require members to enlist in the Army and go through at least basic training before leaving so they'd learn how to shoot straight.
* A small minority of the population have a rare allergy to their own tears.
* a small mouse-like creature that shoots lightning is soon advised by the narrator as "NOT PIKACHU PLEASE DON'T SUE!"
* A small number of hotel chains of this nature do exist in the USA, Sybaris being a well-known example in the Midwest. The smallest rooms feature a bedroom, full bathroom, wet bar and a hot tub and quickly escalate to having steam showers, fireplaces, and increasingly larger indoor pools up to where the largest not even has an indoor water slide but is effectively a small house with a two-car garage to make the customer feel like they've arrived at a luxurious vacation home.
* A small number of Scots (mainly Scots-Americans of distant Scottish ancestry) condemned

* A small one that can be found in most computer science textbooks is fairly simple. Going to the index usually reveals entries similar to the following:
* A small robot called Haro is the franchise mascot. Depending on the adaptation, they're also given combat abilities, but are otherwise just there to be someone's teddy bear. Some iterations (such as
* A small rollercoaster erected on Brighton Pier in southern England was initially given a name meant to be a cool-sounding version of "cyclone" until it was pointed out that "Zyklon" was the poison gas used in the Holocaust.
* A small-scale seller who just did it as an experiment and got sick of it after all his wares sold out (often on eBay and Amazon)
* A small scale version is when pest exterminators kill ants, termites, hornets and the like.
* A Small Talk at the Back of Beyond LDAC gives you two options. If you stay on the ship, you and LDAC will die together. If you take the escape pod, LDAC will die alone and you will remain adrift in space. Whether someone finds you and rescues you, or whether you run out of food and die alone in space, the game does not reveal.
* A small-time international music awards show in 2009 (so small-time in fact it looked like it was filmed in a hotel theater) was apparently only sponsored by
* A small-time version of this can be found in Jacoby Drexelhand, Korthos villager turned Devourer cultist and Sahuagin collaborator in the introductory Korthos Island missions from
* A small town doctor put a fat woman on a diet. The following day, he called the local lunch counter where she ate every day, asking the owner to check and see if she's following the diet. The owner looks out at the dining room. "Yes. She's just finished her diet meal. Now she's having her regular lunch."
* "A small town, I'll admit, but nevertheless a town of people." As opposed to the
* As many as a dozen other races of little to no consequence beyond certain characters or as background elements. May include Robots, aforementioned rebel/heretical sects, Alien Slavers, an
* As many as half the members of the Lubavitch Hasidic sect believe that their long-deceased spiritual leader, Rabbi Menahem Mendel Schneerson, touted late in his life as the Messiah, is not really dead. Rather, they claim, he has been mystically "concealed" and will return to fulfill his mission. A much smaller number of Lubavitch messianists have claimed that Schneerson was actually an angel in human guise, or even somehow equivalent to God.
* As many of those Yeerks are quick to point out, if you get all of your initial information on what Yeerks are like from
* As many parents of young children and owners of dogs, especially puppies, can testify, this happens quite often.
* As many people didn't consider the short clip to contain enough dakka, one Youtuber created
* As many things that Isaac sees on the Ishimura are hallucinations, there's a good chance it's the Hive Mind imitating the voice of Nicole in Isaac's head.
* As many writing guides will tell you, flaws are what draws people to fictional characters.
* As marijuana is increasingly legalized, many hemp and cannabis based products have used the number as part of their brand and advertising.
* A smarter man in a similar variation of the joke merely asked to donate a kidney.
* As Martha manages to determine while doing medical checkups on the ATMOS factory workers, this is because all of them have been hypnotized by the Sontarans (as evidenced by one who says in a never-changing pitch that he works 24 hours a day, and has an abnormally high pulse rate).
* A smart player could run straight through the first mission (Liberty Island) to the boss and complete it in less than 5 minutes with minimal enemy contact. Once that happens, the UNATCO troops come up behind JC and kill all of the NSF troops. A player that knows what he's doing can force open the UNATCO door with a gas grenade, bypassing the mission entirely. The game acknowledges this.

* As Mary Jane was re-established as Peter's love interest after his painful break-up with the Black Cat, relations between MJ and Felicia Hardy were very prickly and competitive, especially during the run-up to the Watson-Parker wedding. However, the two eventually became friends during
* As Matt and Trey confirmed in the commentary, "Something You Can Do With Your Finger" got away with using the word "cunt" uncensored in "Wendy's Cussing Song" despite being
* as Megu-nee died just afterwards. A few weeks later and she doesn't know what a Polaroid camera is anymore.
* As mentioned above, 2007 was a year in which nobody seemed to want to stay atop the rankings for very long.
* As mentioned above, after the murder of Commodus (not directly by the guard), they murdered his Senate-appointed successor Pertinax, and then literally auctioned off the empire to the highest bidder. This led to a civil war even faster than usual because the legions were outraged by that decision. Outraged, that is, that they weren't included in the bribe.
* As mentioned above, Cilan (and by extension Cress and Chili). It's for different reasons than the anime. Many fans thought behind their sweet personalities they were really working for Ghetsis. This could mean anything from them being
* As mentioned above, DC assassin Deathstroke often fits this trope. In
* As mentioned above, Dr. Alex Brisbane. He may lure the heroes into an obvious trap, but he's still definitely not a villain. Of course, as the people he has to fool are Joey, Tristan, Tea and Yugi, not one of them thinks there's anything strange about him. Well,
* As mentioned above, Game Masters do this often, so it's no surprise that the GM of
* As mentioned above in the article, almost any fictional work set in
* As mentioned above in the film folder, Agent Coulson continues to be the Heart of the
* As mentioned above, James T. Kirk is the patron saint of Crazy Enough To Work. From corbomite to fizzbin, most of his plans are completely insane when viewed from a distance (and pretty often he's so damn lucky that they work for him and
* As mentioned above, just about any weapon or fighting style created will have to sacrifice some advantage in order to gain a more powerful advantage. When you've found something wherein the advantages outweigh the disadvantages,
* As mentioned above, kids' meals often come with toys themed after a big-name intellectual property. The fast food joint inevitably makes sure everybody in the country knows. Not every chain engages in these shenanigans, though.
* As mentioned above, Kirby and King Dedede both have large hammers as weapons; for Kirby it's one of many, while for Dedede it's his main method of attack.
* As mentioned above, Peridot has the nicknames "Peri" and "P-dot" from Amethyst. Steven calls her "Dot" on occasion.
* As mentioned above Samurai is almost identical to Shinkenger yet a few minor details are changed such as Kevin being a swimmer instead of being a Kabuki performer like his counterpart and
* As mentioned above, silver is as abundant as gold, but there aren't any references about it being commonly used.
* As mentioned above, some insect species have haploid males and diploid females. For them, a mature female can reproduce without mating. The resulting offspring are always male.
* As mentioned above, the concept of making a whole new show to frame a foreign cartoon or children's show was a common practice in the 90's because back then, the
* As mentioned above, the Lunar Lander used in the American Apollo missions could be considered a dropship at its most basic, simplified elements: A vehicle capable of transporting people and cargo from an orbiting ship to the surface and back again. Granted, however, that the
* As mentioned above, the only reliable cure for a hangover is water and time, which arguably counts as an example of this trope as well. So much so
* As mentioned above, the original G4TV was going to be replaced by the Esquire

Network in fall 2013, before additional last-second
* As mentioned above, the Pussycat Dolls song "Beep" sounds incredibly dirty, as the end of almost every line is a beep, talking about what men "look at" and what men "play with." The most explicit thing mentioned, however, is wanting to hold the singer's hand.
* As mentioned above, there are children's beauty pageants, and they are
* As mentioned above, there is still one revolver-carbine still in production for novelty purposes, though— the Circuit Judge.
* As mentioned above, the Spanish leader El Cid Campaedor was killed by a Moorish crossbow, but legend has it his wife got the idea to strap on his sword Tizona and put him on his horse Babieca to keep morale from falling.
* As mentioned above, this is standard for ALL anime recording in Japan. However, Japan uses a different style of recording than many other countries. Anime uses what is known as "three microphone" or the "step-up mic", where there are three microphones set in front of a screen showing the cartoon. The actors go through the episode scene by scene and "step-up" to the microphone when it's time for their lines. This technique has its roots in pre-WWII American radio shows.
* As mentioned above, this trope becomes less egregious as time goes on, and is downright subverted by Season 5, with the introduction of
* As mentioned above, this trope is far rarer in traditional fairy tales than
* As mentioned above under Literature, Bertie Wooster (and most of his friends and relations) in
* As mentioned above under Live-Action TV, most of the media coverage Disney planned for the opening of Shanghai Disneyland Resort in China ended up postponed thanks to these incidents, although the grand opening ceremony special aired on The Disney Channel, Disney XD, and Disney Junior as scheduled.
* As mentioned above, water is generally held in various folklore as proof against the likes of witches, ghosts and vampires, the idea being that water is purifying and thus can impede or dissolve unholy forces. This gave rise to the trial of water, iudicium aquae, such as used in witch trials (if you floated, you were a witch), which was also used in some regions on cadavers (if it floated, it was a vampire).
* As mentioned a few examples below, indiscriminate planetary bombardment with asteroids or WMDs is called "The Heinlein Maneuver" in-universe. It is also worth mentioning that while it may specify
* As mentioned at the top of this page, Bill Gates suffered a similar fate on a trip to Belgium.
* As mentioned before, Apple. Chances are, if you have marketed and sold a product with this type of idea, you got the idea from Apple.
* As mentioned before, most of Hercules' original flaws came from his rage curse inflicted on him by Hera, who did this out of revenge against Zeus. This is all ignored on the account of Hera being the birth mother of Hercules in this movie, and thus all animosity towards him is non-existent, instead loving him like a mother would.
* As mentioned before, the show changed Captain Atom's real last name from "Adam" to "Adams".
* As mentioned below Live Action TV, this trope hasn't fully disappeared in Asia. A few times in
* As mentioned below, "Operator, Operator" is a cover of Larry Willoughby.
* As mentioned below, xxAbarenbou Kishi!! Matsutarou'' is based on a '70s manga but was animated over 40 years later.
* As mentioned earlier, countless examples of yellow journalism purposely inciting wars purely from their sensationalistic rhetoric exist throughout history. The least controversial is probably the
* As mentioned in Comic Books above, Maxima also pursued Superman in
* As mentioned in Film below, Orson Welles's infamous breakdown (the recording of which is informally titled "Frozen Peas" or "Yes, Always") while recording what he considers to be poorly written narration for a series of Findus TV advertisements.
* As mentioned in the Comic Books section, the G1 Jetfire figure was just a

licensed repaint of a VF-1 Valkyrie from
* As mentioned in the comics section, his name was originally DW Banner, as he debuted in the TV series three years earlier than in comics, so it's an adaptation of an adaptation. Or not, if the "D" in "DW" stands for "David" (it was never clarified what the initials stand for).
* As mentioned in the description, police will attempt to scare a suspect into submission as a way to eliminate a threat without resorting to force.
* As mentioned in the description text, one of the earliest known spinoffs comes from the work of
* As mentioned in the description, the John Frum cults. Frum himself is a sort of amalgamation of Uncle Sam, Santa Claus, and John the Baptist; the name is believed to be a corruption of "John from America", though another theory holds that it's based on a letter "from John". They believe he will return on a February 15th, celebrated each year as John Frum day. In some circles, John Frum is considered to be Prince Phillip's brother. A
* As mentioned in the description, there are a handful of real-world beliefs that use the term. Whether the lines are created by what is built on them, or things are built on the line over the centuries because it is there, tends to vary.
* As mentioned in the entry for the Cyrodiilic Empires, the Aldmeri Dominion is an empire in all but name, and plays the trope straight. Based out of the Summerset Isles, the homeland of the
* As mentioned in the "Film" section, Bovington's Tiger made an appearance in David Ayer's
* As mentioned in the film section, this is how Roger Bushell, the man behind the real "Great Escape", was captured. Like his counterpart in the film, Bushell and his companion, Bernard Scheidhauer, were posing as French businessman. They initially passed the checkpoint, but as they were walking away, a guard turned and abruptly fired off a question in English. Scheidhauer, who was French by birth but had become accustomed to speaking English with his fellow POWs, reflexively answered the question in English.
* As mentioned in the initial trope description, this trope also applies to Bart's schooling—teachers dread having him in class, and only the sour Edna Krabappel has ever shown any ability to get a handle on him (although Marcia Wallace, Mrs. Krabappel's late voice actor, went on the record as saying that the two were more like
* As mentioned in the introductory section, the words "idiot", "moron", and "imbecile" were originally medical terms which described the mental age of a mentally disabled person. Nowadays, all three are used as insults synonymous with "stupid".
* As mentioned in the intro paragraph above, a variety of weapons and tools exist to make things difficult for ground vehicles of all sorts. Caltrops, for instance, originally designed as an
* As mentioned in the intro, some faster jets, such as the American SR-71 Blackbird or the Russian MiG-25 Foxbat, were able to use their superior speed to outrun their enemies. During the
* As mentioned in the Literature section, there is a Krampus in the Corner plush that goes with the book of the same name. It is a parody of the Elf on a Shelf.
* As mentioned in the main article, many live-action Western shows are adopting this, such as NBC's
* As mentioned in the main article, this happens to starships a lot, often to the point where the ship itself is a main character (sometimes
* As mentioned in the page quote above, the anime adaptation of CLAMP's
* As mentioned in the page quote, BMW's "The New Five" commercial was shown
* As mentioned in the page quote, Mordin Solus has this view of the Collectors in
* As mentioned in the series below the idea is taken to one of the most extreme examples in
* As mentioned in the Trope description, this initially came from the old live-action
* As mentioned in the trope description, this wasn't uncommon prior to the

* As mentioned in the video game section any player who doesn't pull their own weight on a team can easily be the load. Hence the term "carrying." This can easily happen to any team based sport or game of any type when a player isn't performing at their best.
* As mentioned in this article was made white, although the author is African-American.
* As mentioned in Trope Makers, The Clock was the first costumed crimefighter in comics, making him the Ur-Example of comicbook superheroes. Additionally, he had a female teenage
* As mentioned, Neo-Paganism, subfaiths, Wicca, and witchcraft (all of which can and often do overlap but don't necessarily) all suffer the same fate, though to a lesser degree in that fewer people are familiar with Neo-Paganism. Wicca + witchcraft plays this entirely straight, given that most people's associations with both come from
* As mentioned, often very blatant in soccer/football, often with the commentators snarkily pointing out the attempts. Unfortunately, it's often only blatant to those watching on television, as they have the advantage of multiple angles and slow motion, meaning that many a referee has been taken in. It is popularly associated with the Spanish, Italian, and South American leagues in particular, especially by British fans. However, while referees are a great deal less interested in injuries and theatrics in the UK, with far more leeway given in regards to what constitutes
* As mentioned on the quotes page, "Booby Trap" is the title of the first episode of
* As mentioned, several Servants (like Odysseus and El Cid) have top-level AGI paired with superior defense and strength.
* As mentioned, the Brits received and made use of American tank destroyers as well. The only difference was that since they didn't use American tank destroyer doctrine, instead of calling them tank destroyers and creating a dedicated ground forces branch to crew these vehicles, they designated them as self-propelled guns and crewed them (mostly)
* As mentioned, the Titans are all platonic except for Robin/Starfire. A lot of fans have trouble seeing Robin and Raven as only friendship, especially on Raven's side. They understand each other so well and have such a good friendship in later episodes that many thought Raven liked Robin and she's the only person capable of calming his mind in "Haunted", something even Starfire wasn't able to accomplish. Robin is also the one who volunteers to go find Raven in the underworld in Season Four when Trigon causes
* As mentioned, the various Cyrodillic Empires tend to dislike the idea of outlawing religions for theological reasons, as a lingering reaction to the extremism of the Marukhati period — which does not mean it does not outlaw religions, it just does so for political reasons, like connections to anti-Imperial movements (many Meridian cults), being involved with conspiracies to usurp the throne (there was a crackdown on Mehrunes Dagon cults after the Simulacrum), or attacking the legitimacy of the Septim Dynasty (Arcturianism).
* As mentioned under Comics, Spider-Man himself with the symbiote. In an interesting twist, in this series, it starts out as just his normal suit in black (a la
* As mentioned up top in the description, the troubled fetal position is a natural position to take if and when one feels overwhelmed by anything.
* As mentioned up top in the description, this can and does happen quite often to grade school age glass-wearers. Although quite annoying, there are those who sincerely don't mind letting others wear their glasses.
* As mentioned, "When You Say Nothing At All" by Keith Whitley, then Alison Krauss.
* As microphones are sensitive equipment that can be easily damaged by such a shock the sound tech will hate you if you do this. It's also a good way to never be welcome at an open mic again as the hosts don't appreciate you abusing the equipment that they are providing for your use.
* As might Lucius, the protagonist of Lucius Apuleius Platonicus's novel

* Asmik Ace Entertainment is mostly known as a film distributor, but their video game success comes from developing
* As Mikan is finally found out in the Chapter 3 trial and starts to really lose it, she drops a line that reveals that the events of this game aren't so disconnected from the rest of the franchise as one might have thought...
* A smiley face mask. Made to look like his face. Before it was heavily scarred.
* as Minerva has to leave the house on an out of town errand when Dracula comes to claim Lucy. Though likewise an inversion as Dracula's brides intercept Minerva's carriage and and her vampiric daughter later bites her and turns her into a vampire, meaning she does
* As Miss Beelzebub Likes tendencies and poor social skills. He'll even hold up multiple signs to emulate speech balloons.
* As Miss Texas, defeated La Tigresa at the WWC (World Wrestling Council in Puerto Rico)'s 22nd Anniversary Show, August 22, 1995 in an
* a smith by trade. He also built a deep-water ship for his family and ended up leading his people once they had crossed the ocean, both in building up civilization and creating civic projects and also as a warrior.
* As modern vehicles have been fitted with increasing levels of electronic driving aids the sorts of tyre squealing, rubber burning, back end sliding maneuvers typically seen in chase scenes are no longer possible without intentionally disabling such features first. When such features are on vehicles will maintain almost full traction no matter what sort of craziness the driver attempts to do. The result is not only vehicle behavior that looks completely alien, but also one that is quite dull to watch.
* Asmodeus. Despite being probably the most evil being in the setting and responsible for countless acts of torture even against his closest allies, he's always portrayed as urbane, unflappable, and chillingly reasonable.
* Asmodeus is probably the biggest, although he wasn't technically a god until 4e, where he became the god of indulgence by absorbing the divine essence of another god. He's the literal ruler of Hell, and, according to some sources, was one of the creators of the multiverse (representing evil, whereas his sister Jazirian was good).
* Asmodeus only eats one of his victims, that being Redtooth. In Season 2, Chickenhound the fox comes back as the villain. Also, no Constance the Badger did not eat anyone. You should probably re-watch the show or re-read the books.
* Asmodeus takes on this role, depending on your preferred backstory. He's the
* Asmodeus, the King of Hell, has made it his personal mission to prove
* Asmoraius and Belzagor are fairly friendly and approachable individuals who aren't afraid to pick fights with humans who irritate them, and have no problem
* As more and more studies are made about the bone structure of dinosaurs, how their bones connected and just how flexible the joints were, the smaller details of the way we perceive how the animals might have looked and behaved changes so fast, media and the public have a tough time keeping up. One of the more "radical" findings that frequently gets overlooked when it comes to depicting dinosaurs is the revelation that most dinosaurs couldn't rotate their hands the way humans can, and that their palms were almost permanently stuck facing inward. Thus the classic (and to most people, standard) way of positioning their hands the kangaroo-way became as obsolete and incorrect as the kangaroo-stance itself. But it's such a relatively insignificant detail that most pictures/movies/sculptures/toys still get it wrong.
* As more characters joined the series, the idea has been subverted in some specific cases, like with
* As more people are embracing their identity distinct from the cisgender heterosexual norm, the moral panic over people identifying as allegedly ridiculous things (most commonly in the form of retorts somewhere along the line of "What next? I identify as an attack helicopter, then!") has been steadily increasing, with the implication that society is decaying.
* A Smoshy Christmas with the bedtime story Anthony is telling to Ian.
* As most any cat owner can attest, this is a very common reaction for a startled

housecat. This can be very bad news for anyone close, as the frightened and now airborne cat is liable to grab whatever it can with its claws, and climb it in a panic.
* As most of a Viking crew are looting and burning a village and carrying off the women, two are in the foreground, casually having lunch, one of them complaining (as he looks in a lunchbox), "Well, she did it to me again. Tuna fish!"
* As most other characters are aliens, and animal-looking aliens exist, it's possible that Jim and his parents are
* AS-Mothership is a "Humans vs. Skaarj" match, belongs to the Godlike tier, and there's a chance the player can fight against the Godlike-tier Iron Skull Skaarj team.
* as Mr. Producer or Producer-san, but Mika and Natsuki call him “Black Knight” and “P-kun”, respectively.
* as Mrs Clay becomes his mistress and they settle together, Elizabeth remains single and Anne gets married to her one true love.
* ASMR Video by recording a video in one language and then recreating the video but speaking in a different language, in order to reach audiences who speak those languages.
* ASMR Video" sees Honey taking the role of the listener's big sister, telling them not to beat themselves up over mistakes, that they're not perfect, and that they're wonderful in spite of a few mistakes.
* ASMR videos feature a scripted off-screen narration accompanying what the creator is doing on-screen. One particular instance is "clothing haul" videos, where the creator models clothes they have recently acquired while the narration talks about each item as it's shown.
* ASMR videos have the ASMRtist whispering or mumbling in incoherent nonsense speech to use the flow of the spoken sounds as the trigger for the ASMR response.
* ASMR videos often feature the creator coming very close to the camera, either as part of a roleplay or in order to speak directly into the microphone(s) behind the camera.
* As much as crucifixion has been used for symbolism through the years, the symbolism of the most famous crucifixion was that the punishment was given to slaves, pirates, and enemies of the state.
* As much as House/Cuddy is loved, so too is it reviled for not only going absolutely nowhere for so very long but for a while popping up in
* As much as Katniss Everdeen bickers with Haymitch and as angry as she is with him in
* As much as you can expect out of a play that can be translated as "The Miserable Ones", this trope painfully averted in
* A Smurf-sized bird does this to a soap bubble that a Smurf is riding around inside of in
* A Snake Named Voldemort: Harry calls snake-Voldemort one when the latter objects to being coddled.
* A Snake Without Fangs fic, there's a scene where Zachbots are teleported into a fight looking like giant terrifying hornets because Zach Varmitech has actually been taking some lessons from nature and wanted them to look more threatening. One Zachbot in the background is still actively painting itself, stencils and all, and seems startled to be there.
* A snarky Crime Computer can grace you with a nice "YOU don't have to worry about brain-eating zombies" if you use an item at the wrong place in
* As nearly 17 years of war drew to a close, Carthage opted to make a final stand in the
* As Nebuchadnezzar II is admiring the city of Babylon which he built
* As nice as SOL was, it's hard to argue against "Floyd", the Kill Sat used by the US Military near the end of the manga, having it beaten hands-down. Able to fire multiple beams at once, move the beam
* A Snickers candy bar commercial had a football field worker putting the finishing touches on the end zone graphic for the Kansas City Chiefs. He leaves out the "I".

* A Snickers commercial from the '90s showed a football player proudly displaying a huge tattoo that he just had done of his team's logo on his back. His coach's reaction: "Nice. You've been traded."
* A Snickers commercial that had a bunch of guys riding ATVs and goofing off with
* A snippet of the song was used with unchanged lyrics in the 1970s(?) for some sort of skin-care product.
* As Nodt's black eyes are creepy and black and seem to gain a strange pale sheen at the edges when he uses his power to give them an even more alien look.
* as Norm suggests) or simply wishing to have a fairy in his possession, he wastes his wishes on parts for ridiculous traps that backfire on him. Norm allows Crocker to wish for more wishes — which he does by wishing for them three at a time — and continues to waste them.
* As North Korea and the USA are still fighting for the decades, North Korea's educational anti-American propaganda animation
* As North Korea and USA are still fighting for decades, an North Korean educational anti-American propaganda animation
* As noted above about a president approving the commercial even when someone else is exclusively in it,
* As noted above, a number of neo-Nazi groups have also embraced this trope due to their anti-Semitic sentiments extending to Christianity.
* As noted above Aquaman gets this a lot because of his Super Friends version. Unlike the other heroes on the show though, for a long time it
* As noted above, C. Auguste Dupin, who appears as your partner and friend in the PC mystery game series
* As noted above, "If you know what I mean, and I think you do." is the catch-phrase of famed drive-in film critic and monster-movie show host
* As noted above in Comic Books, Spider-Man across all three film continuities fits this in some way.
* As noted above, ripping the heart out isn't fatal. Destroying the heart afterward is.
* As noted above, scientists have speculated for long about the possible existence of other universes, and even have classified the types of them that could exist. Two examples of that classification are the ones of
* As noted above, the houses inhabited by people in British sitcoms and dramas are shorthand for their social status and class. In
* As noted above, the Mongol Empire destroyed the Khwarazmian Empire over exactly that. A Khwarazmian governor abducted a caravan belonging to the Mongol Empire (claiming them to be spies, though less a less charitable interpretation is he just wanted to seize the goods they were carrying). This irked the Mongols, but they had the sense to send some emissaries to request reparations and/or the caravan's release. The Shah executed the emissaries.
* As noted above, the name was coined by Bill Bryson. He discussed it in an essay in which he suggested that the stereotypically lower intelligence of Americans compared to people of other nationalities is not down to some sort of racial defect, but a result of Americans being regularly freed from any need to think, ever. This trope, he argued, is one way in which American newspaper-readers are not required to cognitively exert themselves in the same way that British newspaper-readers are.
* As noted above, the official term for this (Mithridatism) comes from King Mithridates VI, a king of Pontus. He feared assassination so badly that he took small doses of poison regularly in order to become immune to the poison's effects. This backfired when the king was eventually conquered. He attempted to commit suicide by poisoning himself only to find that he was immune; depending on the version of the story you hear, he then either fell upon his sword or had an underling run him through. In either case, the poem says it best:
* As noted above, there is some historical basis for the Illuminati. During 1776, a group of Bavarian Germans formed a secret society and used "Illuminati" as their name. The self-imposed mission of the Illuminati was to fight against abuses of state power, superstition, religion, and prejudice. (That's right, folks: the

actual Illuminati were
* As noted above, the show has been occasionally affected by Cartoon Network's
* As noted above, this trope largely originates from the time when most of the officers were from aristocratic families, while NCOs were generally low-born grunts who had survived previous campaigns long enough to learn the "tricks of the trade" through personal experience. Today, officers and NCOs go through completely separate training programmes and promotion from one group to the other is rare (as they do different jobs, it's more of a career change than a promotion). In the modern era, it's also fairly common for sergeants to have a higher pay grade than their commanding officer, for this reason. Yet it's still an effective chemistry, sometimes invoked a bit, but always lampshaded.
* As noted before, this trope doesn't necessarily result in bad fiction — think of the doorstopping evergreens by
* As noted below, this is an accurate representation of how cults and terrorist organizations recruit.
* As noted by the quote above, a few opening credits can combine this with
* As noted in 133.7, Trixie owns a prop chainsaw that she uses for the "saw a pony in half" trick. Chrysalis freaked out when Trixie tried to do it without telling her it was fake. (And when Snips and Snails tried to reproduce it with a real one.)
* As noted in a message to a fan podcast, Nigel Kitching's original description of Sonic's hideout in the early years of
* As noted in Film, mocked repeatedly by the Critic, starting from the
* As noted in Literature, until 1965 Mercury was believed to be tidally locked to the Sun, and several major science fiction authors wrote stories featuring this. In 1965, radar measurements revealed that the planet actually rotated three times every two orbits. (The combination of motions from rotation and revolution means that an observer on Mercury would see one passage of the sun across the sky, one local day, every two local years.)
* As noted in Real Life, Blish gives the lower reliability of transistors as the reasoning for the titular Cities using mainly vacuum tubes for their computers, which was true at the time of writing. However, he failed to predict any advance in this area, and even in the far future vacuum tubes appear to remain state of the art.
* As noted in the anime section, Clock Tower Prison is a facsimile of the tower that holds Big Ben, used in Destiny Hero decks.
* As noted in the description, the "Of The Yard" part of the name means that this trope also applies to Scotland Yard itself, which is probably the most famous and well-known police headquarters on planet Earth. After all, how many people outside of, say, New York, Sydney, Johannesburg, Tokyo or Rio de Janeiro would be able to recognise where each city's police department's central headquarters was based out of?
* As noted in the intro, Pluto was delisted in 2006 by new standards (new in that before, there were
* As noted in the intro, there are in fact many actual phone numbers using the 555 exchange, the most widely used being the one assigned for directory assistance services.
* As noted in the laconic version of this trope, the statement "you are better than you think you are" is backed up with an explanation or motivation
* As noted in the page quote above, General Maxwell Taylor found himself in this position on D-Day. Immediately after landing, he found himself in command of a single private; as he gathered more men, a disproportionate number of them were high-ranking officers.
* As noted in the page quote, when police Chief Clancy Wiggum is promoted to commissioner, he promotes Lou to police chief, and Eddie to Lou.
* As noted in the trope description above, the practice of using "Alan Smithee" ended with
* As noted in the Zombie Survival Guides (of all places), most North American doors are actually quite breachable by trained professionals with a boot; this is so that in the highly unlikely (but still possible) event that a Firefighter does

not have access to the actual keys and either lost or cannot access a tool (the hammer or the axe) to help breach the door, he can literally just kick it down by knowing where the weakpoints are. Note that it still takes multiple kicks and considerable effort to breach a door this way, which is why it's only considered a last resort (such as you know there's someone on the other side that requires immediate attention).
* As noted in Western Animation, Cobra Commander usually wears one. In
* As noted, Irish folklore marks February 29 as the day women are allowed to propose to men, explained as a deal Saint Bridget struck with Saint Patrick.
* As noted, Lisa Lampanelli's (former) weight, taste in black men, and insinuating she looks mannish have been used many, many times.
* As noted, no equivalent of Africa exists in Strangereal, so Keith Bryan from
* As noted, police actually do rely on this as part of real life interrogation techniques. However, over-reliance on this technique has led to a significant number of false confessions and erroneous arrests. Police will either feed the suspect information he didn't know before and he'll repeat it back, and they'll use that to browbeat a confession out of him, or the suspect will make inferences that make it seem like he knows more about the crime than he really does (it's
* As noted previously, the Orks have such a firm belief in the idea that red-painted vehicles go faster,
* As noted, sports announcers will use "You have got to be kidding me" or permutations of it during pivotal moments in an event. But the announcers of the New Orleans-Minnesota game on January 14, 2018 had opposing emotions when Vikings QB Case Keenum's 63-yard touchdown pass to Stefon Diggs with ten seconds left in the game sent the Vikings to the NFC Championship. The Vikings announcers (KFAN) were yelling "Are you kidding me?!" in delirious jubilation while the Saints announcer (WWL) delivered the same line with stressed disillusionment.
* As noted the Blue line was built upon the former right of ways for the the 47L Library and 47D Drake (itself the last remnant of former intercity trolley line) lines of streetcars, however when the light rail system opened in 1985 a new spur, the 47S South Hills Village, was added along the 47D Drake Line to service South Hills Village Mall and the new trainyard just beyond there. The 47D Drake continued to be in service along this line, splitting at Dorchester Station, until it was cut in 1999, largely due to being superfluous thanks to the 47S. The track and overhead wires used for the Drake line are still present along nearly its entire length along Graesers Run, and can be easily seen along the line between South Hills Village and Dorchester Stations.
* As noted under film, Heavy Duty's name was changed to "Herschel Dalton", though otherwise, he's more in line with his original incarnation (an American soldier and Roadblock's cousin).
* As noted under film, Longstreet was known for often riding too far forward and coming under fire, which led to him being severely wounded in 1864.
* as nothing else was evil enough., whose own evil and power he then absorbed, giving him an evil aura as well as incredible magical power.
* as not only are the latter more liable to screw up a job, but it's easier to make someone stronger than to make them smarter.
* A Snowflake In Spring glances at Anna. The contrast is made especially apparent when the story switches to Elsa's perspective.
* A Snowflake In Spring. She crashes at Kristoff's house, losing contact with the world for three days. Her new friend Megara, who has no idea what's going on, sends her a series of texts that progress from annoyed to concerned to nearly hysterical. When Anna finally recovers and calls her, Meg practically explodes at her over the phone.
* A snuff-movie racket is one of the plot elements of Joseph Wambaugh's crime novel
* As Nuke's power continues to grow, he has to wear a lead-lined suit to avoid irradiating everyone around him.
* Asobi Asobase, and the resulting lack of a social life due to athletic pressures made her quit for good.

* Asobi Asobase, Hanako Honda discovers Kasumi Nomura writing smutty yaoi novels, to the latter's great embarrassment. When Hanako questions why Kasumi likes BL despite being an androphobe, Kasumi says that 2-D stuff is fine since they aren't real men and they don't hit on women.
* Asobi Asobase, Olivia's hairstyle changes in every episode, contrasting with the other characters who stick to one hairstyle.
* A soccer match between Mexico and Portugal about to take place in Springfield is heavily-advertised as an exciting match, convincing Homer to take the family to the match. The arena is packed with spectators on the match day, but when the match starts, it pretty much consists of everyone standing still while three members of the same team pass the ball between each other. This leads to a riot between everyone present, even
* A society where wizards practice the Masquerade is the exception, not the rule. Wizardry is practiced out in the open on most other planets, and cat wizards and whale wizards only have to hide their magic from humans, not other members of their own species. The
* A sociology textbook, discussing social mores, put in a picture of the late "Human Blockhead" Melvin Burkhart, with the caption, "One unstated rule of most societies is that you do not put things up your nose. Melvin Burkhart, pictured here, makes a living out of breaking that particular rule."
* a sociopathic anti-Talented murderer like Nana. Then, she eventually starts to sympathize with Nana's crusade against the Organization they used to work for and starts being less villainous.
* As odd as it sounds the British and Americans have/had different billions; in British English a billion is (or was) a million million (i.e. 1,000,000,000,000), while in American English it has always equated to a thousand million (i.e. 1,000,000,000).
* As of 1.11.1, no new bows can be enchanted with both Mending and Infinity (
* As of 1.9, after you kill the Enderdragon, yet another Cool Gate spawns in the sky. There is no way to enter it without using an ender pearl, and if you do enter it, you are taken about a kilometre away from the central
* As of 2005, if your security is wearing black uniforms and have guns, you've probably hired one.
* As of 2007, Grolsch beer has licensed "It Don't Mean A Thing (If It Ain't Got That Swing)" for use in its ads for a lager sold in
* As of 2008, Israel started to produce an actual APC based on the Merkava chassis called
* As of 2008, the claim on Mongolia has been officially dead, with ROC officials now says Mongolia has ceased to be "lawful territory" of Republic of China under current constitution. Other areas have only minor difference from PRC's claim line, and the full ROC map had fallen into disuse after 2000s — now map of ROC simply shows Taiwan and its associated islands, a number of islands in Fujian and South China Sea that are "free".
* As of 2008, the packaging and advertising for Goldfish snack crackers features four
* As of 2011, there's mounting concern in America that the relative absence of men from higher education and the disparate impact of unemployment on male-dominated fields in the wake of the recession have left many college-educated women without opportunities to meet and have relationships with their educational and social peers.
* As of 2012, the program Valve used to create the "Meet The Team" shorts, Source Filmmaker, is now released - for free! - to the public. Meaning, with time, skill and patience, anyone make videos up to their quality with the proper lighting and beyond. Better yet, you can even edit a couple of the Meet The videos yourself.
* As of 2013, several tech companies and research organisations have developed working exoskeletons for medical and emergency applications —
* As of 2014, resulting from Disney's acquisition of Lucasfilm and the edict therein, the lock-out has been broken due to moving nearly every piece of media ever released for

* As of 2014, this also applies to the Invasion From Below series of
* As of 2015, Cena started being booked lower on the card, feuding with Rusev over the United States Championship (his first title he won back in 2004). It didn't bring Cena all of his fans back, but when he won the title at WrestleMania 31, he began a weekly title defense of the United States Championship, putting on impressive matches against other mid-card wrestlers such as
* As of 2015, Konami announced that Kojima would be leaving the company for good after
* As of 2015, Pacifica Radio has been mired in public spats between presenters and executives over (among other things) promoting alt-med quackery and conspiracy theories; cutting hours and pay, and laying off some staffers, in violation of union rules; and failing to pay Amy Goodman an estimated $2.1 million in broadcast fees.
* As of 2015 Retro-Tomorrowland is itself largely a thing of the past. The only
* As of 2015, Russia has merged its Air Force and Aerospace Defense Forces into Aerospace Forces.
* As of 2016, every character has been absent for at least one episode: Chris in "I Take Thee Quagmire"
* As of 2016, only two Cup-clinching overtime goals have ever come in a deciding Game 7. Both of those goals were scored by the Detroit Red Wings: by Pete Babando in the 1950 Finals against the New York Rangers, and by Tony Leswick in the 1954 Finals against the Montreal Canadiens.
* As of 2016, Russia has started testing a new type of ICBM warhead codenamed "object 4202." It's designed to dive through the atmosphere at mach 15 and destroy its target entirely via kinetic impact. (c.f.
* As of 2016, the Stanley Cup has been won on an overtime goal 17 times. The most famous image of such a feat is Bobby Orr of the Boston Bruins, who fell over as he scored on the St. Louis Blues' Glenn Hall, and was immortalized celebrating with his arms up as he was flying in front of the crease. However, it should be noted that this goal came at the end of a Bruins
* As of 2016, the titles are also color-coded with either the faceplate or leather of the belt matching its show's respective color.
* As of 2017, California Adventure will also be getting a Halloween overlay and festive decorations. 2017 also introduced the Halloween overlay for
* As of 2017, "Cases" with cosmetic items have since been distributed. They still require their own specialized paid keys to open.
* As of 2017, it appears that the real prank was on the audience, as both parties admitted on the podcast
* As of 2017, there have been no fewer than six attempts to make Pan Am a
* As of 2018 and the series returning from a long hiatus caused by Aoyama having health issues, it's rare for a story arc to
* As of 2018 the word "Waifu" has been in the western animefans, or at least western otakus, lexicon for several years. Meaning seems to vary from "the absolute best girl ever in any anime", to "I actually want to marry this fictional character", to "another synonym for best girl". Some say you can only have one waifu, others say you can have multiple.
* As of 2019-2020, Shadowednavi and Camden are no longer together, though Camden is still a member of the imagiBROS, and worked on Full Service Shop.
* As of 2020, it seems like this is becoming more frequent. The actors of both the green ranger of
* As of 2020, these jokes have started to include Kamala Harris... usually as Biden's
* As of 2020, this appears to be happening to theatrical films as well. Since 2016, no less than three successful adult animated movies have been released in American theaters: the aforementioned
* As of 2020, this role falls to Gren Maju da Eiza — its effect lets it obtain a truly ludicrous ATK value of 400 for every banished card, which is particularly impressive for a level 3 monster with no summoning conditions. However, Gren Maju has no protective effects of any kind, which means that it can

be killed easily the moment the opponent takes their turn. Most Gren Maju decks are all about removing enough of the opponent's defenses for Gren Maju to take a swing, which will probably kill the opponent in one hit.
* As of 2020, Zoom is starting to become this for video tele-conferencing software.
* As of 2021 some minor genetic tweaking is possible (in laboratory embryos at least) which mostly eliminates genes responsible for rare debilitating illnesses and organ flaws. However, if genetic engineering/modification technology will progress at the same pace as computer technology did since 1980s and 1990s, in 20-30 years from now we could see some dramatic results and possibilities.
* As of 2021, with Olivia Rodrigo now being a world-famous pop star, people now acknowledge it as the show that Olivia was on before she made it big.
* As of 21st century, social networking sites seems to have taken this role.
* As of 3/7/14, Massachusetts passed a law to make "upskirting" (surreptitiously taking pictures of women's underwear under their skirts) after it turned out it didn't qualify under the existing
* As of 4th Edition, holding a weapon in each hand doesn't allow you to make two attacks by default, but certain feats give you benefits for dual-wielding, and quite a few Ranger powers
* As of 4th edition, though, tieflings are back to having supernaturally
* As of 5th Edition, Clerics of the Knowledge Domain can call upon the divine power of their god to gain proficiency with
* As of 5th Edition, hearkening back towards some of 3.x' sensibilities, characters may wield a second weapon in their other hand (no mention of off-hands this edition) and attack with it at the cost of a Bonus action. This limits the feasibility of dual-wielding somewhat: you only have 'one' Bonus action a turn — there is no switching in or altering other actions to allow for multiple Bonus actions, and you generally have better uses for such limited but important actions in your game turns; additionally, without feats of training, the extra attack cannot gain benefits from your offensive statistics with regards to damage dealt.
* As of 6th Edition (or before?) there is a special rule, Hammer of Wrath, which is mostly used by jump infantry to bump their first melee attack up to initiative 10 (normally the maximum possible under the rules) when they...
* As of 7th Edition's "Gathering Storm: Fall of Cadia", Abbadon's Thirteen Black Crusade resulted in a victory for the forces of Chaos and the complete destruction of Cadia. The Cadian Regiments still exist as a fighting force due to evacuated civilians and other deployments across the galaxy but Cadian recruits will be a bit hard to come by now...
* As of 8th edition in 2017 (said event occurred shortly before the release of 4th edition), status quo has finally been dumped and nearly everything promised back then has actually happened; the Cadian Gate has fallen and Chaos has spread across large parts of realspace, splitting the galaxy in half. Of course, this more than likely brings a couple of decades or so of the new
* As of 8th Edition, which was released in Summer 2017, we are a few centuries into the next millennia, and the plotline has advanced. The Imperium hangs on hard-pressed, and the Tau are advancing. The more things change...
* As of a 300+ chapter, she actually states that she has no affection for him. What this means in light of earlier events hasn't been fully played out.
* As of a later expansion Paladin were given a finisher in the same vein as Rogues and Druids, when properly built up the Templar's Verdict ability can hit for almost three times the damage of a normal weapon attack.
* As of April 2011, the Grey Knights themselves were given their own book to replace the Daemonhunters Codex. They're still insultingly effective against Daemons,
* As of April 2014, the hierarchy goes something like: RAW (A-Show; it's three hours long and it's where all the major story lines are set up and moved forward), Smackdown (B-Show; it's an hour shorter than RAW and often fills up that time with recaps of events on RAW), Main Event and Superstars (both C-Shows that run just one

hour and are only available online or via the WWE Network, mostly featuring low-card talent rarely seen on RAW or SD). NXT doesn't really fit into it at all, as it's so disconnected from the primary WWE product.
* As of a recent official Q&A for the Going Rogue expansion, this has been rather humorously averted. The devs of the game had actually
* As of at least 3.0 Edition, if not earlier, the rules for such spells explicitly do not allow this, as they specify that summoned creatures/items have to appear on the ground. However, there are still a few ways to accomplish something similar — the Earthquake spell can cause a cave-in if cast in an underground cavern, while enemies can be buried alive by using Transmute Rock to Mud or
* as of August 31, 2018, at which point any remaining revolver users would have to transition to either a Generation 4 Glock 17 / Glock 19 or a SIG Sauer P226 DAO.
* As of Bender's Big Score. Partially justified, in that Bender is 40% titanium (see Batman entry above) and 40% dolomite (the tough black mineral that won't cop out when there's heat all about).
* As of Beta 1.9Pre4, End Portals are also available. These are even more difficult to find since they are only found in strongholds and only 128 of those spawn on the entire map. Also, the Enderdragon is on the other side of End portal.
* As of Chapter 15, this includes dreaming of her future self and full potential. Can't get much more things to come than
* As of Chapter 692, Sasuke reveals that his ultimate goal is world domination, starting with killing Naruto, the only person he believes can stop him.
* As of chapter 90, Mika is also confirmed to have romantic interests for Yuu and Yuu only, as shown by his
* As of Chrono Phantasma, he gets his just desserts, but not before killing off a main character as a final fuck you.
* As of December 2010, videos can be as long as they want now, although Let's Play videos rarely go above 20 minutes, though.
* As of December 2014, sister channel MSNBC likes playing ads for Movado Watches every day at least once an hour during Morning Joe.
* As of December 2016, you can now buy replicas of Stan's, Kyle's, Cartman's, and Kenny's
* As of early 2021, she's stayed dead for 14 real-world years and the comic has entered its final arc, meaning the statement about her being present for most of the story is already confirmed as either a
* As of Eleven, the Doctor has sacrificed three of their lives for a companion, two of them female. The Fifth Doctor died to save
* As of episode 11, Wily has one against Dr. Light running even deeper than before.
* As of episode 11, Wily wants revenge on Dr. Light for perceived involvement in
* As of Essentials humans now have a true racial ability "Heroic Effort". With it if you miss with an attack or fail a saving throw you can add a +4 bonus to the roll but you must give up the bonus at-will to get it. A good power, but if it is better then the bonus at-will or not is up to you.
* As of February 2011 number of Earth-like planets out there may be very large.
* As of Fifth Edition, if an orc mates with a non-ogre non-orc it results in either a half-orc or a full-blooded orc.
* As of Fourth Edition, there is no mention of divine rank as yet, but Asmodeus (the lord of all devils) has indeed obtained full divine status.
* As of Fox and Xanatos' marriage, the Xanatos-Renard family counts. It includes a former
* As of her November 15, 2015 loss to Holly Holm, we now know that she reacts poorly. Rousey has yet to return to competition.
* As of Issue 21, Galaxy City has been destroyed, and serves only as the tutorial zone for both heroes and villains.
* As of January 2015, a campaign on Youngstown State University's YikYak calling for the firing of a professor who allegedly sexually harassed students has begun to use the lyrics to the chorus of "Youth of the Nation" by
* As of January 2015, it seems that Valve is very slowly getting no longer

obsessed with
* As of January 2019, the design of the SpaceX Starship (the second stage of the interplanetary rocket previously known as BFR) is made of
* As of July 2019, Laff's obsession appears to be the obscure indie romcoms
* As of June 2017, CBS will usually cap the end of every other commercial break of their shows with promos for
* As of late 2019, these allegations are back in the news, this time regarding the Chinese government's mass imprisonment of Uyghur Muslims.
* As of late, Luigi seems to have been put in the unenviable position of 'Character everybody would rather play as'. In an effort to make players work for their reward, he's been made unavailable throughout
* As of late March 2020, the network now airs a marathon of one of their shows on Friday nights.
* As of late, Natsume and Xseed have been fighting over the American translations of the
* As of March 2nd, 2011, Holy Amulets, which prevent equipment from becoming cursed, are now absolutely free.
* As of "Marik's Evil Council of Doom 3", Dartz's hair changes colour in every shot. When he enters the main series, it changes colour
* As of Mass Effect 3 it is shown that any Geth with the ability to speak has this.
* As of mid-late October 2019, it's supposedly been flipped. The network provider FOX invested in WWE to get a show on their network, and they chose Smack Down, renamed it to
* As of mid-Season 2, it can also be argued that Roan has elements of
* as of New and Old Flames giving him non-illusory magical powers, seemingly related to punching instead.
* As of November 2015, you can almost always expect Stanley Steemer ads during
* As of now at least, nothing seen in a typical horror game or creepypasta is present, aside from darkness and text that seems to indicate child abuse. Most of the horror and uneasiness of the series comes from how bleak the game is, how silent the commentary can be sometimes and how little interactivity is seen in levels. Because of this, you're constantly waiting for something to pop out, which in turn is arguably the most scary part of the whole thing.
* As of now, they've ceased most fighting (outside an occasional jab) to deal with bigger issues. Furthermore, they do still care a good bit about one another and hurting one is a good way to get the other to become quite hostile.
* As of October 2015, Justin has returned with a new channel, "Hungry Lights". It would seem he has apologized for his past behavior, with the Amnaeon channel.
* As of October 2018, it's happened again, and the system once again worked beautifully.
* As of Part 5 of the "Bowser Junior's First Grade!" story arc, Bowser Junior believes the sun is a planet, much to Cody's disappointment. Unlike Rosalina, who says the same thing but is clearly off her rocket, Junior makes logical arguments that are entirely wrong such as the Sun being round and therefore being a planet. He actually even died when trying to go to the Sun to prove it.
* As of Patch 2.0, it is possible to play a militarist, spiritualist authoritarian empire with an oligarchy government, the "Nationalistic Zeal" and "Slaver Guilds" civics and a Roman-themed name list. Bona-fide
* As of post-movie episodes, SpongeBob and Patrick Star can be seen as this
* As of season 13, he freely relinquishes his memories as they too were restricting him, turning a light-hearted comedy series into one of the most profound and longest written transformations of a character into an Ubermensch.
* As of Season 19's "Tweek X Craig", Craig Tucker and Tweek Tweak are now an
* As of Season 35, SPIN IDs are only put into play when the $10,000 Mystery Wedge is won.
* As of Season 4, most of the main characters have tortured, been tortured, or both.
* As of Season 5, there is also amateur profiler Declan Rand and, oddly enough,

Curt Smith from Tears for Fears.
* As of Season 5, the Travelers make this into a way of life with their "Passenger spell", which allows them to merge with and control seemingly anyone. They do this to get around a curse that prevents them from being able to really settle down anywhere for good. The passengers control over the possessed body can be temporary or permanent, depending on the rituals performed, though a special knife can kill the passenger and restore the original self either way. Notable people possessed include
* As of season 6, we now know one other longtime name for the Man in Black:
* As of season 7's ending, the creators also revealed they had been planning on Barney and Robin eventually getting married since the episode where they break up in season 5, THREE years ago. Everything we see of Barney and Robin in the following episodes/seasons (5-8) is getting them back around to the point of dating again and eventually marrying. Basically, they are the definition of "endgame". The creators have also revealed, as of S8, that they planned for Ted and the Mother to meet at a train station since very early in the series.
* As of season 9 (mainly with the return of Stephen Hillenburg), the animation is more fluid than it was the past few seasons due to converting to HD. It gets more noticeable in episodes made after Sponge Out of Water, especially in the later ones (like the dance sequences in Sharks vs Pods, which was animated by David Gemmill).
* As of Seasons 4 and 5 it is fully justified with Earth Ponies. Their strength has been confirmed as being an inherent magical ability, along with unicorn magic and pegasus flight.
* As of season six, a villain uses ultraviolet ray blasts that the Flash can't outrun. The computer Gideon clocks the UV blasts at 186,000 miles per second (light speed) and says that this is 80 times faster than Barry's current maximum. While it seems a letdown to those assuming the previously-mentioned feat must've been light speed or much faster, consider that 186,000 divided by 80 is 2,325.
* As of season six, we now also have House freaking Wilson when he walks into the living room to find House is "picking lint out of his belly button." Which he later happily admits he wasn't actually doing. In addition, in Private Lives his answer to Wilson's question about what he's doing that night is simply a gleeful "Masturbating!"
* As of September 2017, the war of words between the United States and North Korea, or rather, between Trump and Kim Jong-Un. However, given the stakes, this is less entertaining than disturbing for observers.
* As of September 2020, SundanceTV has begun showing the following before airings of
* As of Series 22, the team captains are now Rob Beckett and Katherine Ryan though Sean and Jon are the team captains on the spinoff hybrid series 8 out of 10 Cats does
* As of Sixth Edition and Seventh Edition, Warhammer 40k has gotten a "Look Out, Sir!" rule similar to the rule in Warhammer Fantasy. In brief, when a character is hit, there is a die roll representing the chance for some sap in his unit to take the bullet. When protecting named characters, the mooks succeed with a 5 in 6 chance, while nameless squad leaders have a 1 in 2 chance of someone taking the hit for them. There are ways to alter the odds.
* As of strip 830, Redcloak's back to being sole Dragon, having killed Tsukiko for knowing too much.
* As often as their fights get serious, Plankton and Mr. Krabs sometimes fall into this (particularly when Plankton is written as a
* As often happens with portrayals of ice hockey in U.S. media for some reason,
* A Softer Sea, down to the formula of three or six panel strips juxtaposed with poetry, created by two people. The main difference is that A Softer Sea seems to adhere to a loose canon, rather than a wider variety of content from its inspiration.
* A softer version of this happens three years later. Misugi returns to soccer after years of medical treatment, but while his skill is intact
* A Softer World: "I don't know how to make things right. So I'll just keep

pretending that nothing's wrong."
* A Softer World is a comic with an absurdist and dark style of humour and a large stash of old Polaroid pictures.
* A Softer World; "I thought a psychic girlfriend would see the real me. And she did. I just didn't think she'd call the police".
* A soft example of this is the Scurvy Crew, three pirate crabs that act as the second boss of
* As of the 2010's commercials for CTC seem to promote cannibalism: the live-action actors are gone entirely, and
* As of the 6th edition updates, Abaddon is shown to not only have the 13 Black Crusades perfectly under control, Possessed are now more reliable (or unreliable in an awesome way), Belial gained himself a perfectionist character, and some could argue that Ethereals are now a must-have in a Tau list, thanks to how much Vettock improved them.
* As of the eighth console generation, PC fans and Nintendo fans seem to be on much better terms with each other than with the Microsoft or Sony communities. This stems from a few sources - among other things Wii, 3DS, and
* As of the end of Resistance 3, it seems that the hope is back into the world.
* As of the end of Season 6, this also happens to the Tyrells and Martells.
* as of the end of the game, a total of two named characters survive. The sum total of surviving characters are them, a handful of Resistance stragglers, and certain player characters depending on the exact ending.
* As of the end of the series, he's still not back. But the above image, plus the fact that existing Transformer sparks can be transferred into the bodies of healthy protoforms, makes hope spring eternal.
* As of the episode "Isis", it's official; Clark confessed that he's the Blur to Lois, who responded by jumping into his arms, kissing him and asking, "What took you so long?"
* As of the fifth edition, all dragons now have Edge and great dragons no longer have stats in the rulebook. There are guidelines for making them, however, but given how fierce a regular dragon is, the concept of fighting one, let alone getting away with it, is a pipe dream for most runners.
* As of the "Labyrinth" expansion, Evie aquired a skill that creates a large, crystal-shaped shield that offers complete invulnerability for a short time. Casting time is instant, but casting cost is high. Unlike most personal shields (and her normal magical shield), the character is fully immobilized inside (curled up in a ball); although the shield itself can be knocked around by enemies.
* As of the latest arc, Byakuya Kuchiki can be added to that list. Ever since his apparent death, many people have denied it. Granted the chapter where he apparently died just came out so this might be a little premature, it still counts.
* As of the latest codex, several Dark Eldar now go barefoot on the battlefield, including the Mandrakes (who are living shadows), some Hellions (who ride flying, bladed hoverboards) and Scourges (who have wings), Urien Rakarth and the other Haemonculi (who float around using suspensors), and Lelith Hesperax (who is just badass).
* As of the latest expansion (Inferno), missile graphics have been updated to add both trails and missile separation, so it appears much closer to MMM than before.
* As of the latest of the anime series, the list of girls to have shown canon feelings for him include
* As of the more recent books, the closest thing Honor has to an opposite number in the Republic of Haven, Thomas Theisman, has risen to the positions of Chief of Naval Operations and Secretary of War, which firmly places him in the political battlefield rather than the literal battlefield.
* As of the more recent Codices, the C'tan are "merely" incredibly powerful but ultimately physical entities who have no connection to the Warp. The Machine God is indeed a C'tan: the Void Dragon, whom the Emperor beat into submission and sealed away on Mars to act as an inspiration for the Adeptus Mechanicus. Mephet'ran the Deceiver is not Tzeentch or the Eldar Laughing God Cegorach, though the three apparently know and respect each other for being devious bastards.

* As of the Omegapause (summer 2015), this is turning around; she's undergone some character development (due to John's ability to retcon history allowing Terezi to
* As of the "Pretty Scary" update, bats count as well. They're small brown flying bundles with big ears that make adorable squeaks and hang on walls by their tiny little feet.
* As of the quest "Sliske's Endgame", the jury is on indefinite recess.
* As of the Rise of the Hierophant arc, whatever the Breath of Hyperion is, it will most likely turn out to be this.
* As of the season 3 finale, Klaus now possesses Tyler, thanks to Bonnie.
* As of the Vivre Card datebook releases in September 2021, aside from Luffy, only eleven other people are known to have ever had bounties of one billion or higher — in order, the top six are the late Pirate King Gol D. Roger (5,564,800,000, the highest known to have ever been given), Edward "Whitebeard" Newgate (5,046,000,000 before his death and the second highest ever issued), Kaido "of the Beasts" (4,611,100,000), "Big Mom" Charlotte Linlin (4,388,000,000), "Red-Haired" Shanks (4,048,900,000), and "Blackbeard" Marshall D. Teach (2,247,600,000), while the five below Luffy are all followers of three of the original Four Emperors — King "The Conflagration" (top-ranked of Kaido's three "Lead Performers"; 1,390,000,000), Marco "The Phoenix" (former First Division Commander of the Whitebeard Pirates; 1,374,000,000), Queen "The Plague" (second-ranked of Kaido's three "Lead Performers"; 1,320,000,000), Charlotte Katakuri (son of Big Mom; 1,057,000,000) and Jack "The Drought" (lowest of Kaido's three "Lead Performers"; 1,000,000,000).
* As of this writing Umak Leth and Bevel Lemelisk haven't received characterization yet, but they too don't care about.
* a soft stridulating sound that a cricket would put to shame. The idea that they attack camels and humans comes from their name; "Solifugae" means "those that flee from the sun", which is exactly what they're doing. Dead camels and humans provide shadows for them to use to get out of bright desert sunlight. Aside from all that, they're not even exclusive to the Middle East, also being native to the American Southwest.
* As of TWC's new face as Spectrum, they aren't even being subtle about selling themselves as better than satellite television, having slogans such as "DirectTV Bad, Spectrum Good".
* As of version 0.75 the rifle was made much less accurate (making sniping with the submachine gun a viable alternative), the shotgun now follows its
* As of version .13 Scrolls of Immolation inflict this on every enemy in visual range. This can often lead to
* As of version 2.6, you can select this as your empire's origin, which means that a more advanced empire of the same species will exist somewhere in the galaxy.
* As of Volume 3, Miles Luna is sticking more to his natural voice for Jaune, no longer laying on the squeaks and vocal cracks like before.
* As of Volume 4, the previously clean-shaven General Ironwood has gained
* As of Volume 4, they've significantly nerfed Peter's ability to where he
* A Sojourn in the City of Amalgamation, in the Year of Our Lord, 19—.
* Asoka, Asoka's grandfather tells him to put his sword away because it's a demon that desires bloodshed.
* Asok the Intern provides a straighter example. The only reason Adams made him Indian was in tribute to
* A solar day on Mars (called a "sol") is 24 hours 39 minutes 35.244 seconds long. Therefore, people working with Mars Rovers have to go by a working schedule based on sols, not days — they start work about 40 minutes later every Earth day, and use Martian "hours" and "minutes" that are about 1.0275 times the length of their Earth equivalents. Many people working on the MER project had wristwatches specifically calibrated to Martian time.
* a solar powered steam-propellant spaceship could be used for economical Mars travel, which just goes to show we could easily go full circle and start traversing the solar system in steam ships....
* A solar storm plays havoc with the defenses of the bank of Karabraxos in "

* as old as the universe itself and far older than the Chaos Gods by rebellious Necrons and the gods of other races, but the pieces are still out there, and should they reunite...
* A soldier in Afghanistan had to rush out to the defense of his outpost, firing his rifle while wearing "Hello Kitty" underpants. Showing the video, President Obama called him "
* A soldier in a U.S. Army convoy uses the phrase "over and out" during a radio call to another Army unit.
* A soldier in the Middle East was shot in the head (he survived, thanks to his helmet), and claimed that he actually saw the bullet move through the air toward him, as though it were moving in slow motion. It probably happened as a result of intense adrenaline, as he actually remained conscious after it struck him long enough to take aim and put out a burst of fire, killing the shooter, before collapsing.
* A soldier is shot in his bulletproof vest, falls and gets back up.
* A Soldier of the Great War references this trope. A young boy is talking to the protagonist about various fertility superstitions he's heard. Alessandro tells him that the real rule is "Once if you're not married; a thousand times if you are."
* A soldier ran 84 yards through enemy fire to rescue a downed drone.
* A Soldier's Story is an extra-special case, a light-skinned black sergeant in the Deep South during WWII heaping abuse on his recruits, due to his own self-hatred.
* A soldier wants a nose job. The team of doctors sets up an elaborate scheme to get him the operation without anyone getting in trouble rather than just pretending he broke his nose.
* A soldier was in tears when he brought in his squad's robot drone (nicknamed "Scooby Doo") for repairs. When told he'd just get a new drone, he replied that he didn't want a new one, he wanted Scooby Doo.
* A soldier who was just shot in the stomach is asked "Does it hurt?" He responds: "Only when I laugh." This joke exists in many variations, and the punchline became a well-known phrase.
* A solemn statue of St. Nicholas donated by the Russian Orthodox Church, where the saint is still widely revered as a religious figure, was literally replaced in the main square of Demre, formerly Myra, Turkey, the saint's home town, by a statue of the commercialized and Americanized Santa Claus.
* A solid case could be made for Angel as the Lancer of the original five, actually, right down to being a rival for the affections of
* a solid piece of vulcanized rubber at your opponent's face." There's also the similarly intentionally vague "game misconduct" penalty, which is basically the hockey term for being ejected from the game.
* A solitary mad scientist is able to create a bunch of androids whose powers dwarf that of Frieza and even the Super Saiyans of legend, which basically puts them among the most powerful beings in the universe. What planet did this mad scientist come from? Earth.
* ; a solo confrontation with the Red Death left Hiccup with practically his entire right side covered in burns, to the point that even years after treatment the burns still dull his sense of touch on that side and he can no longer grow hair on that part of his body.
* A somebody once used Tagon's girlfriend as the carrier for a horrific nanotech weapon in an attempt to kill his father, a senior military officer. Father and son survived; the rest of the family were collateral damage. A series of similar attacks all over the planet killed the majority of its leaders overnight as the start of a major war. Also, the incident destroyed the relationship between the father and the son for years.
* A somewhat common attitude in warfare, though since the targets are (usually) declared enemies who can typically shoot back, it avoids the more unsavory aspects of other portrayals:
* A somewhat common staple, particularly for younger wrestlers, where a newcomer (usually initially presented as a
* A somewhat complicated example between Max Caulfield and Rachel Amber. Max had

always known that she was attracted to women, but she is also
* A somewhat complicated example occurs during the "Phantom Bullet Arc" of
* A somewhat different definition of 'mook', but Ace Trainer (Cooltrainer in earlier generations) class NPCs often appear in
* A somewhat different take was when Jan ran for "Most Popular Girl" in her class. It mainly came down to making a bunch of promises she didn't intend to keep in order to get elected. The lesson she learned wasn't that
* A somewhat disturbing take on the trope is given in a joke where an aged man who has a wife in her early 20's complains about being called a pedophile, then remarks how the accusation
* A somewhat extreme example is Alexander Matrosov, a Red Army soldier during
* A somewhat ironic example: Motorcycle manufacturer Harley-Davidson is certainly no stranger to licensed merchandise, and video games based on their bikes are no exception. While the
* A somewhat justified example appears late in the game. The V-mails you get are all recorded from satellite cameras orbiting Citadel Station; The last one fills up with static
* A somewhat lesser example that applies to story only was in the Ancient Gates. When humans discovered them and started to open them they had no idea where they would lead. A few were opened during the course of the game giving access to new high level zones.
* A somewhat lewd joke about a bear and a rabbit who both gets three wishes:
* A somewhat low-key example, one between colleagues, occurs in Fraction's
* A somewhat more believable variant is a man falling in love with his mother's description of a woman - at least, the
* A somewhat more indirect version explains the existence of Little Lamplight in
* A somewhat more lighthearted example is Ki-bo, who is treated as a nuisance by most of the other students (barring Kaede, Shuichi, Gonta and
* A somewhat more literal example. The episode "Wizard Battle" features a wizard named Abrakadaniel, whose body is squishy:
* A somewhat more realistic variation exists through the Neckbreaker feat, which is available to anyone willing to sink the feats into it. A successful attack deals considerable damage directly to the target's strength or dexterity score as their spine is violently twisted. Once paralyzed through nerve damage and their scores drop to zero, any further damage from this attack is done directly to their constitution score - once that hits zero, they're dead.
* A somewhat more sedate, erudite, but no less nasty version would be
* A somewhat obscure saying goes that you can buy everything you'd ever need at Costco except "the textbooks you study from, the tuxedo or gown you're married in, the house you live in, and the coffin in which you're buried."
* A somewhat obscure trope but one that nonetheless exists is the notion that band vocalists often had to tape the mic to their hand to avoid dropping it or it flying into the crowd due to how chaotic the live shows were. This is often referenced and parodied. In reality, there's only one credible report of this being done seriously: by the frontman of Reversal of Man.
* A somewhat odd example from the Dark Sanctuary duel: Yugi notes that Bakura's strategy will fail because he needs to play more than five Spell/Trap cards at once to achieve it. Bakura then says that Dark Sanctuary allows him to have more than five on the field at once. Yugi then counters that it doesn't matter what the card
* A somewhat of a love triangle version happens with this: Rei loves Mamiya who loves Kenshiro. And it's pronounced for both of them. Rei is unable to act upon it later on as he was dying after
* A somewhat related weapons manufacturer and PMC known as MARSEC is in charge of doing the same for
* A somewhat similar change also appeared in episode 11. Wherein the characters looked like they came from a
* A somewhat unintentional one as the cavalry comes charging in so they run into the half-assembled structure and stop cold out of nowhere, vulnerable to getting floored by the aforementioned Billhook.

* A somewhat unusual case, as the initial crime leads Monk to coincidentally solve two completely unrelated crimes while operating under the assumption the killer was trying to prevent
* A somewhat unusual example is the Tama Hills Recreation Area, a former munitions factory and arsenal used by the Japanese during
* Asomodeus.EXE, is NOTHING but this as he tries to trick you into looking away from the game window. This includes faking a Steam
* As One, a movie about table tennis, climaxes with the two former bitter rivals competing as doubles partners for the table tennis world championship.
* As One, but otherwise played letter-straight, with Bun-hi being taken away on the bus while Jung-hwa follows along outside, calling out to Bun-hi, reaching for her hand, and giving Bun-hi a ring. Tears are shed.
* As one comment on the YouTube video for the Game Over music states, "If one could harness the pure hatred and frustration induced by this song, the world would never want for energy again."
* As One is a film about the North Korean and South Korean teams competing as a unified team for the 1991 World Table Tennis Championships. The North Korean head coach, a stern taskmaster, says this to the South Korean coach (who is #2 on the unified team, and much more the easygoing type) after the head coach gets ejected for protesting some dubious referee calls.
* As One is a Korean film about the North Korea-South Korea unified team that competed at the 1991 World Table Tennis Championships. The protagonists are two women players, one from the North and one from the South, who start off as bitter rivals but become fast friends by the end. The men's team players are little more than extras.
* As one might expect for a comedy trope, variations of this are rather common on the Discworld. Wizards in particular seem to be prone to losing their robes and having to have the problem pointed out to them by others (they take the view that a wizard is dressed as long as he's wearing his pointy hat).
* As one might expect from a group called Nazgûl, all their lyrics are Tolkien-based. What might
* As one might garner from the page quote, this trope tends to show up a
* As one might guess from the name, the apexes are culturally dominant and brutally oppressive of the other genders. Males have the lowest social standing and rights, treated as nothing but
* As one might suspect from the title, the entire plot of Justin Lieber's
* As one Muppets' guidebook from the '90s put it, Gonzo and Rizzo "love to disagree."
* As one of Gus's top men, Victor is tasked to track and follow certain people to keep tabs on them:
* As one of their numerous gifts from Blibaal, Goddess of Storms and Slaughter, the Kua-Toa of
* As one of the more prominent ads of this type, professional gamers are often asked to play on stage on such peripherals; selling the idea that you could 'play like the pros'.
* as one of the most sucessful rally cars ever, it definitely qualifies as a cool car.
* As one of the Valkyrie, Wildfire has spent all her life seeing men as
* As One Star Sets Another Rises: The premise of the story is 2015 Japan being transported back in time to 1939. Using uptime knowledge, you have several characters doing this. From Winston Churchill trying to prevent the end of British hegemony, to one of the Kennedy saving Rosemary from her lobotomy.
* As One. The Chinese national team is scowling and mean-spirited, as opposed to the sympathetic Korean protagonists playing against them.
* As One. The governments of North Korea and South Korea merge their national table tennis teams into one unified team, which competes together and wins the world championship, thus fostering International Friendship By Proxy.
* As one would expect from the series title, this happens frequently in
* A song about a couple's rendezvous at the Berlin Wall that acknowledges that the

relationship may well not last has nothing to do with Godzilla, but
* A song about feeling uncomfortable with all the genetic enhancements one's significant other is getting.
* A song absent from the film is "Baby and Me", which is full of double
* A song by Draco and the Malfoys titled "Tom Felton's Kinda Hot" embodies this particular trope.
* A song called "As If By Magic" (featuring Elphaba and Fiyero helping Dr. Dillamond with his research, before the whole Animals sub-plot was retooled)
* A song called "Johnny I Hardly Knew Ye", tells about a soldier (named Johnny), who came home alive from a war, but is so horribly disfigured and crippled that even his family could not recognize him. Since he can no longer walk or use his arms and hands, they decided to have him beg on the streets (Ye're an armless, boneless, chickenless egg Ye'll have to put with a bowl out to beg). The lyrics said very pleasing things about his loss of legs and arms (Where are your legs that used to run, hurro, hurro; Ye haven't an arm, ye haven't a leg, hurroo, hurroo), him being overly skinny (So low in flesh, so high in bone).
* A song called "Not Another Song About Love", where the narrator rants about what hates about the girl
* A Song For Arbonne ceded all the northern lands of Gorhaut to Valensa in exchange for money, dispossessing a significant part of Gorhaut's population and squandering the victory in the actual Battle of the Iersen Bridge. The shameful deal motivates many Gorhautians: some want to restore Gorhaut's honour, others just treat it as opportunity to invade the titular Arbonne.
* a song for Spiner's album "Ol' Yellow Eyes is Back", styling themselves 'The Sunspots'.
* A song from the American Civil War entitled 'the Valiant Conscript' pokes fun at this tendency among green recruits. The speaker, said conscript, spends the first several verses boasting of how he's going to whip the Yankees, and eventually ascend to command the entire Confederate Army, until 'poets sing his story'. When the Yankees actually
* A song from the Green Day side-project The Network is called "Right Hand-A-Rama" and is about
* A song from the show about a mushroom wanting to leave the forest and go on an adventure (set to traditional Russian folk music) became a hugely popular hit and charted on the regular Japanese music charts. It was even sung live by the hosts on NHK's New Year's Eve special (one of the most watched shows of the year in Japan).
* A song in which zookeepers complained about the things people always say at their exhibits. ("When you see a meerkat, don't say '
* A Song Is Born, as a rousing rendition of "Flying Home" manages to cause a drum to fall on one of the villains, knocking him out (after "The Anvil Chorus" failed to work).
* A Song Is Born by the fact that she always has him get a stack of books for her to stand on before she can kiss him.
* A Song Is Born, Frisbee walks into Honey's bungalow at the motel they stay at by mistake, believing it to be Prof. Oddley's, and since it is dark, he fails to realize his mistake and pours out the depths of his ardor to Honey, causing her to realize just how much he really loves her.
* A Song Is Born, gangster Tony Snow wants to marry his moll girlfriend Honey Swanson just so she can't testify against him about a murder he committed.
* A Song Is Born have been so cloistered in their conservatory making their history of music that they've completely missed the modern music that has been evolving outside.
* A Song Is Born playing themselves, Benny Goodman plays one of the cloistered professors, Prof. Magenbruch. At one point in the film, the musicians lament the lack of a clarinet player among them and wish that Benny Goodman could be there with them. Frisbee notes that they have a very good clarinet player among his fellow academicians that might be able to stand in... and brings in Magenbruch. (Nobody notices the resemblance, but the audience is in on the gag.)
* A song is more associated with the featured artist than with the lead. Even if

that song is their best-known song, it's not as associated with them as their other material (although that song can be still seen as the signature for the featured artist). Alternately, the song
* A Song of Grumbling & Cotton Candy, Jem is involved a charity auction where the biggest bidders wins a date with her. A drunk Pizzazz crashes the auction and wins by bidding $10,500.
* A Song of Grumbling & Cotton Candy Jem. Jem goes along with it by claiming she broke up with Jerrica because their relationship was unprofessional.
* A Song of Grumbling & Cotton Candy, Pizzazz calls Clash in an angry panic. Clash thinks that Pizzazz is angry about Kimber and Stormer's relationship and threatens to burn all her Misfits memorabilia if Pizzazz is homophobic. However, Pizzazz is actually panicking because she wants Clash to help her figure out if she's gay or not (despite the fact she's sitting in Jem's room after a date).
* A Song of Ice and Fire, 13, is called "little grandfather" by Old Nan.
* A Song of Ice and Fire) accompanies his father on campaign. Domeric has never met Ramsay and is in no hurry to do so thanks to what he's heard of his half-brother.
* A Song of Ice and Fire, after all), but they keep it chaste until circumstances cause them to part ways.
* A Song of Ice and Fire, after Daenerys frees the slaves of Astapor the council she leaves in charge is quickly overthrown by a former slave and butcher named Cleon, who takes the highborn boys to be trained as Unsullied-i.e. eunuch slave soldiers.
* A Song of Ice and Fire: After Jon Snow is forced to reveal that his "defection" to the Free Folk is just a ruse, his wildling lover, Ygritte, continuously tries to arrow him as he runs away from her.
* A Song of Ice and Fire again and return the Stark girls to Catelyn to repay Brienne and atone for his many horrible acts. While this doesn't work out, he is going to every length imaginable to keep his oath to never raise his sword against a Stark or Tully again.
* 'A Song of Ice and Fire again; she stabs him to death while repeating the interrogation questions he'd ask all of his victims.
* A Song of Ice and Fire, against his own objections. When he later confides to Maester Pylos his fears that he will fail in his duties and that the King's Hand should be some great knight or lord, Pylos assures him that one of the greatest Hands had been the son of a lowly blacksmith, and offers to help him overcome his shortcomings.
* A Song of Ice and Fire A.K.A Barristan the Old from the also qualifies.
* A Song of Ice and Fire, albeit a loose one. Even prior to the unification, it was only divided into the Seven Kingdoms: the Reach, the Kingdom of Isles and Rivers, the Stormlands, the North, the Westerlands, the Vale, and Dorne.
* A Song of Ice and Fire all the Andal and Ironborn kingdoms to the south of his, and wisely bent the knee as soon as Aegon the Conqueror turned his attention towards the North's army.
* A Song of Ice and Fire all the major houses have at least one of these. Jon Snow and Dany Targaryen are also both shaping up to become this as well.
* A Song of Ice and Fire, a lot of battle strategies among the warring claimants to the throne involve capturing or killing important commanders on the other side(s) as well as taking a side "out of the race" by killing their leader.
* A Song of Ice and Fire Also somewhat deconstructed with the Queensguard, in service to Dany, as it has never had more than one member at a time.
* A Song of Ice and Fire: Although the Crannogmen of the North are (somewhat) normal people, but since they live in the swamplands they are subject to rumors that they have webbed fingers and toes and can breathe underwater.
* A Song of Ice and Fire always seems to come within hours, or occasionally minutes, of her home or family members only for something to keep her from reaching her destination.
* A Song of Ice and Fire, always speaks in whispers so faint that people have to lean close to hear him. His tone is constantly described as unsettling, emotionless and cold, as he believes that avoiding passion is the key to staying young.

* A Song of Ice and Fire, Amerei Frey tells of how her father was "hung" by the Brotherhood without Banners when he approached them to pay a ransom. Her mother corrects her: "Hanged, Ami. Your father was not a tapestry."
* A Song of Ice and Fire, among the families of the North, in the continent of Westeros, it is common during winters—which can span decades—for old men to announce they are "going hunting" and leave their homes so so as to leave a little more food for the young. In times of war, instead of "going hunting", the old men enlist in join the armies in order to die in battle.
* A Song of Ice and Fire: Among the most notable are Jon Arryn, Lyanna Stark, Brandon Stark, Rickard Stark, Rhaegar Targaryen, and his father Aerys.
* A Song of Ice and Fire, an atlas of the world depicted in the novels.
* A Song of Ice and Fire, and are likewise considered the strongest seasons of the show.
* A Song of Ice and Fire and are particularly vulnerable to fire, yet are nonetheless persistent fighters that are hard to put down. Wildlings aka the Free Folk north of the Wall (where the Others are located) burn their dead to prevent them from returning as wights. As the series begins, the Others are becoming more aggressive and amassing large armies of wights from Free Folk towns and settlements they have overrun, seemingly in preparation for an invasion of the kingdoms south of the Wall.
* A Song of Ice and Fire and begins to rediscover his own honor, instead of simply being a reflection of her who will do her bidding, she has no more use for him.
* A Song of Ice and Fire, and characterizing side characters. Outside of this sort of description, though, Martin does a pretty respectable job of making all events and conversations important.
* A Song of Ice and Fire and incompetent poseur with an over-inflated opinion of himself. he inevitable comparison is to the Red Viper, who is actually a badass.
* A Song of Ice and Fire and in the process break his vow to Walder Frey, and all she talks about is how to be a good wife to Robb. (The fact that there are no point-of-view chapters for Robb explains this somewhat; we never see the two of them interact one-on-one, so we don't know what their relationship is really like.)
* A Song of Ice and Fire, and other tropes to not only justify and cement the power of the aristocracy but to make them feel good about it. Maester Pycelle, the utterly corrupt Grand Maester of the Citadel, in particular serves as the propagandist for tyrannical Tywin Lannister and more or less justifies all his most heinous crimes for the greater good.
* A Song of Ice and Fire and the previous generation has been pointed out.
* A Song of Ice and Fire. Anyone who brings in Tyrion Lannister's head will get a lordship.
* A Song of Ice and Fire: any time a man dies before he can marry his betrothed, she is very likely to be betrothed to any surviving (unattached) brother he has.
* A Song of Ice and Fire are a prelude to trying to use him in this way.
* A Song of Ice and Fire are assassins who through their training are able to completely alter their appearances. Some kind of magic is involved, but also basic theatre techniques if that will suffice.
* A Song of Ice and Fire are probably the closest the series has to a Good Guy faction, and suffer mightily for it:
* A Song of Ice and Fire Arya overhears a conversation between conspirators, but the conversation involves the political situation on a different continent, they don't drop many particular details, and speak metaphorically for a large chunk of the conversation. Since Arya's only ten, not only does she misunderstand, she forgets large parts of the conversation (and also misidentifies the dragon skulls being stored in the room she's hiding in as "monsters" when asked.) As a result, when she tries to relate the conversation to someone else, it's garbled to the point of incoherency.
* A Song of Ice and Fire. Arya rescues three men from a burning wagon, after which one of them reveals himself as Jaqen H'ghar, a Faceless Man— a member of a group of assassins who are known for changing faces. H'ghar reveals that, by saving the three of them, Arya has stolen three lives from the God of Death, but as a

recompense for having his life saved, he will take three lives of her choosing, so long as she gives him the names. She gives him two names, which he carries out. She wants to give him a third, but must escape the castle she is held up in, and Jaqen refuses to help her escape, so she names him as the third name. Jaqen is horrified at this, and begs her to un-name him because he cannot refuse, and she promises she will if he helps them escape. He does, and she un-names him. This impresses him enough to give her a nudge and some help to walk the path to becoming a Faceless Man herself.
* A Song of Ice and Fire Arya Stark, who spurns ladylike activities in favour of swordplay. Her late aunt Lyanna Stark was an ardent horse rider.
* A Song of Ice and Fire as a chaser, even if you do have the blood of the dragon in you". No, you will not transform into an actual dragon; ashes, however...
* A Song of Ice and Fire as a Faceless Man assassin is to kill an insurance broker known to cheat some of his clients out of claims.
* A Song of Ice and Fire as an exemplar. He'll do practically anything to the best of his ability... as long as his price and operational conditions for it are met with remuneration enough to offset the difficulty/ social stigma/ other fallout/ any gaps in his skill-set. If it doesn't meet his criteria, he just won't agree to do it — at all. End of. Parachute clause engaged.
* A Song of Ice and Fire. As by the series standard, the family has not been portrayed as wholly good or evil, but some individuals frequently swerve to some extreme.
* A Song of Ice and Fire, Asha Greyjoy is shown engaging in some rape roleplay with her lover.
* A Song of Ice and Fire, as he's disfigured in one battle, and nobody ever believes his heroics because they do not believe that someone with his handicap can actually put up a fight.
* A Song of Ice and Fire: A side character (whose face is covered with boils) reminisces about his boyhood in a small village. As a teenager, he spent hours gathering flowers for a girl in the village who had the "town slut" reputation. When he presented them to her, she laughed at him. So he killed her, and was exiled to the Night's Watch.
* A Song of Ice and Fire aside, this one isn't so much memetic as horrifically canon.
* A Song of Ice and Fire" as one of the seven aspects of God, his face always half concealed by a hooded cloak.
* A Song of Ice and Fire. As part of the propaganda spread about Tyrion Lannister after his escape from Kings Landing, he's said to have wriggled between the bars of his cell because he's a dwarf. In reality the Black Cells have very solid doors, which his brother in the Kingsguard conveniently opened for him.
* A Song of Ice and Fire aspect of the series. Also, the fate of several lesser characters declared traitors by the crown, including some poor, innocent dwarfs.
* A Song of Ice and Fire, as she realizes that Viserys has no leverage against her beyond his empty threats.
* A Song of Ice and Fire as soon as it's convenient to do so (after letting her know that she's been playing this role all along).
* A Song of Ice and Fire, as the Sisters take a vow of silence — such a vow would be meaningless if they weren't able to talk.
* A Song of Ice and Fire a sword. His attempt to become Lord Commander was hopeless because no one who'd been taught by him—a fair amount, as he'd been on the Wall some sixteen years by that point—would ever support him.
* A Song of Ice and Fire at the hands of the Brave Companions, he is tricked into drinking horse piss to the company's general amusement. He's forced to keep drinking out of sheer thirst.
* A Song of Ice and Fire back in prehistory, during the Dawn Age and/or the Age of Legend, well before anointed knights of the Faith were even a thing, and are as iffy as all get-out as a result — including the slaying of dragons.
* A Song of Ice and Fire) base slander. Historically, there are other examples such as Visenya, who may have poisoned her stepson/nephew Aenys so her monstrous son

Maegor the Cruel could succeed.
* A Song of Ice and Fire became popular. But that's nothing compared to the dismissive attitude they have toward fans of the TV show that have yet to read the books. They refer to them as "Unsullied" and speak of them the way you'd speak of particularly immature children.
* A Song of Ice and Fire be counted as rather massive strokes of great good fortune wrapped in the incredibly grubby package of a terribly unjust demotion care of both familial missteps and unrelated events.
* A Song of Ice and Fire, being a medieval fantasy, has a lot of these. A few examples:
* A Song of Ice and Fire, being most frequently applied to knights. This is a male-only honorific, because female knights are nigh unheard of in Westeros, and there isn't any "Dame" equivalent; the only one is Brienne of Tarth, whose squire is quite confused about how to address her, "ser" or "m'lady".
* A Song of Ice and Fire: Biter, a cannibalistic thug from King's Landing eats most of his victims alive.
* A Song of Ice and Fire, black dragons are apparently always the strongest. Balerion the Black Dread is the largest dragon in Westerosi history. Daenerys owns three dragons, who are each a different color. Drogon, the strongest and biggest of the three, is black with red accents.
* A Song of Ice and Fire books, where being tied up or chained up can be extremely painful, but also sort of played straight, since a couple of characters survive being restrained in ways (like being strung up dangling by their wrists for extended periods of time) that would probably kill them or at least permanently disable them in real life.
* A Song of Ice and Fire), but others remain unexplained. Ordered by reverse chronology:
* A Song of Ice and Fire, but suffers migraines that cause him to drink milk of the poppy (opium) like ale. When he's fatally poisoned, his ludicrous size and drug resistance keep him alive, but he's in agonizing pain, and no amount of milk of the poppy can ease it because he's virtually immune.
* A Song of Ice and Fire Butterbumps sing loudly to prevent anyone overhearing.
* A Song of Ice and Fire, but there isn't any evidence to confirm the crime. Polliver and Dunsen are on the list for flimsy reasons, like stealing. She has Chiswyck murdered for the crime of not being as funny as he thinks he is (granted, Chiswyck was joking about a gang rape, but that isn't the reason Arya cites as his crime). The conflation of justice and vengeance, and how that conflation leads to this trope, is one of the key themes of the entire story.
* A Song of Ice and Fire but the southern realms of Westeros don’t.
* A Song of Ice and Fire, but they can definitely prove themselves and gain a following if they're strong enough. Women are treated the same way. Being both of these things, Daenerys likes to twist this trope to her own benefit whenever an advisor or commander voices some opinion that she disagrees with or believes is short-sighted.
* A Song of Ice and Fire... by doubling down on what got him canned in the first place.
* A Song of Ice and Fire By firing those two, the Lannisters created a pretty foundation-shaking precedent; later Cersei plans to use that precedent to assassinate Jon Snow and get the assassin out of the Night's Watch scot-free. However, these plans do not reach fruition.
* A Song of Ice and Fire can be considered to be a "third parent" in the process.
* A Song of Ice and Fire, catacombs under the castle in which the kings and lords of Stark are entombed and their likenesses set in stone. Traditionally, it's just for the lords and kings, but Ned Stark took to entombing his brothers and sisters as well. The deepest depths of the crypts have not been detailed as of yet, and are the stuff of some legend (including the rumor that a Targaryen dragon once found its way down there and left a nest of eggs).
* A Song of Ice and Fire, Catelyn's daughter Sansa Stark, solely dependent on him, and view him as the only man worthy of her.

* A Song of Ice and Fire Catelyn suggests trading Jaime Lannister for her daughters, whom she supposes are being held hostage by the Lannisters. Given the patriarchal society of Westeros, this is not regarded as a good exchange and the idea is rejected even by her son Robb.
* A Song of Ice and Fire caused by a swollen tongue, leading to any time he speaks being amusing. In-universe even, he's mocked for both his lisp and slobbering behind his back. As if to emphasize the "evil" part of this however, this swollen tongue is due to STD...that he got from raping someone.
* A Song of Ice and Fire causes no end of problems for the whole of Westeros.
* A Song of Ice and Fire, causing adults to mistake them for one another.
* A Song of Ice and Fire. Cersei in particular is fond of it; subverted nicely once when Tyrion decides he's tired of taking it quietly.
* A Song of Ice and Fire, Cersei is left unrestrained and quickly goes downhill — she starts stress-drinking and becomes more overtly paranoid, cruel, and incompetent in her determination to keep the crown.
* A Song of Ice and Fire, Cersei Lannister has a nightmare that starts at her sitting on the Iron Throne and everyone admiring her. Then suddenly Tyrion appears and laughs at her, and Cersei realizes that she's not wearing a dress. After that, the dream takes a horrific turn: Cersei stands up, stumbles and is impaled on the blades of which the throne is made of. The throne starts to grind her into a fine red paste like a meatgrinder, and she awakes in horror.
* A Song of Ice and Fire, Cersei offers a huge reward to anyone who brings her the head of her dwarf brother Tyrion, which leads to a steady stream of people bringing her the heads of innocent dwarves and the occasional child. The murders go unpunished because Cersei doesn't want anyone to hesitate if they actually do find Tyrion and aren't entirely certain of his identity.
* A Song of Ice and Fire claims himself to be this: "Why is it always the innocents who suffer most, when you High Lords play your Game of Thrones?" However, he is perhaps the most gifted intriguer and spy in the Seven Kingdoms, so his own motivations are incredibly clouded.
* A Song of Ice and Fire, commanded by Randyll Tarly, fought Robert's army to a standstill, but when Robert received news that Lord Tyrell's main army was on the way with reinforcements, he decided to withdraw and retreat in good order. It wasn't really a crushing defeat, and Mace Tyrell wasn't even there.
* A Song of Ice and Fire, competency over background occasionally comes in handy, after all.
* A Song of Ice and Fire, considering how much he and his poor, disposable horses haul about) and he suffers from chronic physical pain thanks to his gigantism for which he's on constant medication. But, if you think that's a bonus, it just means you need to hurt him more (all while dodging the inevitable) for him to even register it.
* A Song of Ice and Fire correct manners and exceedingly polite phrases into the ring to box her opponent into semi-socially acceptable behavior remains her number one, go-to weapon of choice, however: no matter how many other skills she gains. She even manages to trip the invariably rude Joffrey up with this a time or two... when he's stuck with an audience.
* A Song of Ice and Fire crap their pants frequently when they become afraid. Several examples being Maester Luwin after being threatened by Tyrion with execution, Samwell Tarly several times due to his cowardice, and a boy who Arya beats with a stick for messing with her.
* A Song of Ice and Fire cut open the living to study death. He's lucky that they only took his maester's chain.
* A Song of Ice and Fire, Daenaerys Targaryen believed that the stories of her father being an insane tyrant were lies spread by the Usurper Robert and his supporters. When she asks Barristan Selmy to tell her more about Aerys, she is not happy when she realizes that her father really was a monster.
* A Song of Ice and Fire, Daenerys and her handmaids, particularly Irri and Missandei. Missandei spends a lot of time with Dany, attends her baths, and sleeps in her bed, but there's no actual romantic implications between them since

Missandei is 10-11 when Dany is 15-16. Irri, on the other hand, used to sleep in Dany's bed & attend her baths and still helps her get dressed in the mornings, and twice actually pleased Dany sexually (although Dany was just lonely without Drogo and most likely didn't feel desire for Irri herself, it's possible that Irri had some feelings for Dany). After the second time, Dany thinks Irri "was sweet and skillful, but all her kisses tasted of duty."
* A Song of Ice and Fire, Daenerys Targaryen and Khal Drogo have an arranged marriage. He's a hardened tribal leader who towers over most men, while she's thirteen years old and slight even for her age.
* A Song of Ice and Fire: Death is worshipped in many forms in the world, from the Black Goat of Qohor to the Stranger from the Faith of the seven. However, a cult of assassins known as the Faceless Men believe all of these to be the same being, the Many-Faced God.
* A Song of Ice and Fire decided that he couldn't just leave all of the character developments offscreen and abandoned his plans for the time skip.
* A Song of Ice and Fire degrees of lackadaisical thinking can get in the wrong time or place, not just the full glory of the Stupid alignment spectrum. Yet, it still has its stand-outs.
* A Song of Ice and Fire demonstrates this trope nicely. As more and more POV characters are introduced, the plot has slowed down considerably as time and space is used to develop each POV. The first three books are very well written and gripping whereas the fourth is slower paced and focuses mostly on sideplots with hardly any of the series' main protagonists featuring. The fifth gets things back on track but is still very slow.
* A Song of Ice and Fire, despite appearances. While the living Starks at the start of the book are all honorable to a fault, Eddard's father, Rickard, is never implied to be especially heroic, his older brother, Brandon, was a noted womanizer, and there are plenty of Stark ancestors who were cruel (Theon the Hungry Wolf, who served as this world's personal Vlad the Impaler when the Andals invaded, the Night's King, not to be confused with the Night King, who usurped the Night's Watch and declared war on the North), ineffective (Brandon the Shipwright, who foolishly abandoned his people to sail into an ocean that no one has ever returned from and was lost at sea) to the destructive and insane (Brandon the Burner, who set the Northern fleet on fire after his father, the Shipwright, went missing).
* A Song of Ice and Fire, despite surviving another 2 husbands after this.
* A Song of Ice and Fire "dishonouring" the family in any way. Even the family members he actually likes get disowned if they defy him, even if they were still loyal to the family.
* A Song of Ice and Fire dislike — and complain about — the "kissing stories" their elder sister Sansa likes.
* A Song of Ice and Fire dragons are described by Maester Aemon as "neither male nor female, [...] but now one and now the other, as changeable as flame." His knowledge of dragons being able change sex at will comes from a rare book from scholar Septon Barth, who also served as Hand to Jaehaerys I. Interestingly during the books several dragons are referred to by a specific gender, for instance Balerion is referred to as male by Daenerys and Tyrion refers to Syrax as a "she-dragon", suggesting some dragons may remain a single fixed gender.
* A Song of Ice and Fire: Dragons never stop growing after they hatch and have an incredibly long natural lifespan. Daenerys' dragons grow from tiny hatchlings to being large enough to ride in the space of only a couple of years. In the backstory, Balerion, the century-old dragon ridden by Aegon the Conqueror, was said to be massive enough to have entire towns fall under his shadow when he flew overhead, and had a jaw large enough to swallow a mammoth whole.
* A Song of Ice and Fire dry and subtle sense of humor which is lost on the average Westerosi who is accustomed to bawdy and/or toilet humor.
* A Song of Ice and Fire, during a battle in the Slaver's Bay, the generals of Astapor crudely try to use this stratagem with the dead king Cleon. They exhume the corpse, put it in its armor, strap it on his horse and have him "lead" the troops. This is a rather desperate attempt to save a hopeless situation, and it fails

miserably, every man in the sortie getting killed. (Afterwards, the man who "slayed" the dead Cleon is ironically nicknamed "corpsekiller" by his allies.)
* A Song of Ice and Fire: During the election for Lord Commander of the Night's Watch, the cook Three Finger Hobb is put forward as a candidate. He receives a small number of votes in each ballot. When one character asks why people support him, to which someone speculates that his supporters just want him out of the kitchens.
* A Song of Ice and Fire, Ellaria Sand and Willas Tyrell are this: they are generally just friends, but when he thinks he could never be any good in bed with his injured leg, she spends a few nights with him to convince him otherwise. Willas, however, feels awkward and guilty about it, especially since Ellaria is the paramour of his good friend Oberyn (who is the one to suggest the scheme, actively encourages it, and is in an open relationship with Ellaria anyway).
* A Song of Ice and Fire end of the seven kingdoms, and have only had one significant 'on-screen' appearance since that first prologue. Daenerys Targaryen, the last surviving heir of the previously ruling Targaryen dynasty, has, five books in, still never set foot on the continent of which she claims to be the rightful Queen.
* A Song of Ice and Fire, especially those that take place on boats, come across like this. Bonus points for them being called the Iron Born.
* A Song of Ice and Fire. Even after that war grinds down, new factions rise up or splinter away.
* A Song of Ice and Fire. Even characters that had previously only appeared in the Appendixes can turn out to be important.
* A Song of Ice and Fire. Even the notoriously strict King Stannis doesn't try to stop his men from plundering. And a sign of the discipline of the Unsullied slave soldiers is that they have no interest in plunder (being forbidden any private possessions) unless ordered to do so on behalf of their master.
* A Song of Ice and Fire. Eventually, he just ties her up in a horse blanket at night so she can't move.
* A Song of Ice and Fire: every House has its colors, sigil, and words.
* A Song of Ice and Fire, every novel begins with a prologue chapter from a new or minor character's point-of-view who dies at the end of the chapter, or shortly thereafter.
* A Song of Ice and Fire fandom, and actually help GRRM with keeping details straight.
* A Song of Ice and Fire: Features both Western-style dragons and Daenerys, the Dragon Queen/Queen of Dragons.
* A Song of Ice and Fire features Dany and Drogo, neither of whom speak more than a word of the other's language when they're married. They do both eventually become passably fluent in both languages, but they still have sex every single night in the meantime.
* A Song of Ice and Fire features this trope in both spades and shades.
* A Song of Ice and Fire (for example, girls are considered women the moment they begin menstruating for the first time, so they can be married off pretty young):
* A Song of Ice and Fire. For instance, people can be forgiven for flipping back a few pages during the Red Wedding to determine when exactly the crossbows came out.
* A Song of Ice and Fire from the encounter, having only barely recognized the threat in time for the first blow.
* A Song of Ice and Fire. From what we know of his backstory, Littlefinger himself has a few streaks of the Love Martyr in him as he remained obsessed with Lysa's sister, Catelyn, even after she rejected him at least twice.
* A Song of Ice and Fire from Yunkai are trained in the way of "the seven sighs and the sixteen seats of pleasure," presumably referring to techniques and positions (or perhaps obscure erogenous zones?) respectively.
* A Song of Ice and Fire fugu) than a conscious attempt to build up immunity, though... that is, if it's not just a lie they tell to outsiders.
* A Song of Ice and Fire: Generally, hair color is not a guarantee of characterization, but preconceptions about it still abound.

* A Song of Ice and Fire gets a few of these. They may not be masterpieces, but since he's a dwarf, the fact that he makes the effort at all is nothing less than phenomenal.
* A Song of Ice and Fire gets put in charge of managing the sewers in Casterly Rock, since he's horribly unpopular. In something of a subversion, Tyrion goes on to make the sewers incredibly more efficient than they used to be.
* A Song of Ice and Fire: Giants are a species of shaggy, ape-like people living in the frigid north of Westeros. They stand around fourteen feet tall, are strictly herbivorous, wield crude clubs in battle, and ride woolly mammoths. It's noted that their legs and hips are much larger, proportionally, than a human's, in order to hold up their massive weight. A dwindling species, giants are little more than a legend to the majority of the continent, despite once having been widespread throughout Westeros and Essos.
* A Song of Ice and Fire gives us Valyria, the ancient capital of a great empire once known as the Valyrian Freehold. Home to the most advanced civilization of its time, Valyria was destroyed in a single night when a natural disaster sank much of the peninsula and turned the rest into a fiery wasteland.
* A Song of Ice and Fire goes up against him, his tactic is as much to keep Clegane at a safe distance with his long spear as it is to outspeed him.
* A Song of Ice and Fire has a backstory which reaches back thousands of years. Its stories tend to be vague and dark.
* A Song of Ice and Fire has a few characters like this, most notably Robert Baratheon, Amerei "Gatehouse Ami" Frey, and Oberyn Martell. The absolute master of this trope, however, is King Aegon the Fourth, who boasted sleeping with over 900 women and had scores of illegitimate children all over the kingdom. His libido was so out of control that it actually led to war.
* A Song of Ice and Fire has an in-universe example with the song "The Dornishman's Wife":
* A Song of Ice and Fire has a tendency to take minor or antagonistic characters and make them point-of-view characters in later books.
* A Song of Ice and Fire has convinced some fans that Martin has no idea where he's going with the series.
* A Song of Ice and Fire has heavy shades of this. According to the believers of R'hllor, there is one eponymous good god and one evil anti-god known as the Great Other. However, the priests of R'hllor are far from being a pure force of good: their "Red God" commands them to burn the heretic and purge the unclean by all means necessary, and the miracles they perform are pretty sinister. As for the Great Other, if he exists, he is behind a race of ice demons known as the Others, who are the greatest threat to humanity in this world.
* A Song of Ice and Fire has Janos Slynt attempt to do this at the Wall, despite the fact that at the Wall you're essentially a dead man and no one will care what happens to you.
* A Song of Ice and Fire has Litterfinger developing an ever-creepy crush on the daughter of his childhood sweetheart. Please note, however, that is it acknowledged as creepy and not reciprocated.
* A Song of Ice and Fire has Missandei, who is specifically taken into Daenerys's court for her skill. Somewhat justified, as Missandei is a child, and children learn languages better than adults, and she has been exposed to many languages in her life.
* A Song of Ice and Fire has never smiled since he lost his wife. Even before then, there had only been four recorded occasions of him smiling.
* A Song of Ice and Fire has raised and protected his beautiful little sister all her life. By their family's traditions, he should've married her, had circumstances been better. When it's time to marry her off to someone else, even though he decides to do it, he barely goes through with it. The little sister in question is reasonably aware of all this, and not cool with it.
* A Song of Ice and Fire has stated to be a similar figure to Gandalf. The other is the much more benevolent Thoros of Myr, who, at one point, is referred to as the Red Wizard.

* A Song of Ice and Fire has the annihilation variant when Roose Bolton and Jaime Lannister discuss the impending fate of a man who betrayed Jaime's father.
* A Song of Ice and Fire has the city of Braavos being founded by several shiploads of slaves who hijacked the ships transporting them and with the help of the Moonsinger priests sailed off to found a settlement in a place the slave masters wouldn't find them. In the modern day, the First Law of Braavos forbids slavery of any kind within the city, and Braavosi have been known to dip their fingers in type A at opportunity (liberating the slaves on encountered slaver ships, having the forbidding of slavery as clauses in peace treaties even if they don't bother enforcing it beyond the letter, etc.).
* A Song of Ice and Fire has the City Watch of King's Landing, also known as the Gold Cloaks for that prominent feature of their armor. They are extremely corrupt, tending to work for whomever pays them the most.
* A Song of Ice and Fire has this trope forced upon her, although she was something of a tomboy in the first place.
* A Song of Ice and Fire has "wolf dreams", where he sees the world through the eyes of his direwolf. This happens to Jon, too.
* A Song of Ice and Fire have a naming convention which will make any evil alien proud. Lots of Rs and Zs and Ks, and a generally unpleasant sound which makes one (Westerosi, i.e. Fantasy Anglo-Saxon) character dismiss: "They are all Harzoos to me". They are a people of slavers with cruel and unusual customs.
* A Song of Ice and Fire have vowed to get vengeance on Robert and his allies.
* A Song of Ice and Fire. He actually has seven children, as well as being an ex-smuggler.
* A Song of Ice and Fire. He became so hated that Jon Roxton, a member of the side Hugh had defected to before attempting to name himself king, decided to kill him. Just as a battle was starting to break out and there was chaos all around, (and Hammer was far away from his dragon) Roxton walked up to Hammer, and we get this exchange:
* A Song of Ice and Fire: Hedge knights fill a similar role to ronin in that they have no land or lord and wander the country seeking employment. They also have the reputation that they are at risk of becoming bandits.
* A Song of Ice and Fire, he is more like his book counterpart during the third season.
* A Song of Ice and Fire. He is the captain of the ship "Silence", whose crew is made of mutes and its hull painted red with the blood of Euron's enemies, and it is said that men pray whenever they see his sails.
* A Song of Ice and Fire, he never shows any of his inner torment to others.
* A Song of Ice and Fire, hero and villain scars are sometimes played straight and sometimes subverted:
* A Song of Ice and Fire hints so far. The series in general is full of Beast and Beauty motifs (including a ribald song entitled "The Bear and the Maiden Fair").
* A Song of Ice and Fire his daughters (and sacrificed all his sons to the Others). At least one of the daughters is shown to be pregnant, and though it's never made explicit how many generations it goes back, he's not young and girls in Westeros are considered marriageable as soon as they hit puberty, so it could be a few.
* A Song of Ice and Fire, his hair starts growing darker during his recovery, and Jeyne helps him cut the white away.
* A Song of Ice and Fire. His oldest sister Sansa is living in a Prison Break story, except she's stuck at the mercy of an feudal tyrant, has no (real) allies, and is limited to the skills of a 12 year-old. Even when someone does "break her out", the reader knows that she has just traded her physical shackles for psychological ones. And there are more genres beyond this.
* A Song of Ice and Fire hot. Harrenhal has an interesting melted look to it now, and is considered cursed.
* A Song of Ice and Fire, House Frey take this to extremes. Lord Frey is on his eighth wife and has children by all of the previous seven, as well as several illegitimate children and plenty of grand- and great-grandchildren. There is so little love lost between them all that news of a family death elicits more

calculation of the effect on the line of succession than grief. It is especially bad between Edwyn and "Black" Walder Frey, two great-grandsons of Walder Frey who hate each other and each aspire to be Lord of the Crossing.
* A Song of Ice and Fire. If there is one lesson to be taken from the series, it's that feudal society sucks for everyone except the ones at the top. The vast majority of nobles in the series care only about themselves and their family, and the common folk is at best worth considering because they are cheap labor, but usually considered an after thought. Even the series' more benevolent nobles, namely the Starks, care more about honor and nobility than they care about the smallfolk. The peasantry may not be suffering directly under "honorable" nobility, but things aren't changing for the better, either.
* A Song of Ice and Fire if you somehow break them by their lights, no matter how good or reasonable your reasons may appear? Mayhaps.
* A Song of Ice and Fire in case they get to the ending before he does.
* A Song of Ice and Fire incident mentioned below) and a belief that fan fiction is bad practice for an aspiring writer since creating and developing one's own characters and setting are an integral part of writing. He likens fan fic to an artist learning to draw by doing paint-by-numbers. Fan art, on the other hand, still requires genuine skill, so it doesn't bother him as much.
* A Song of Ice and Fire. In fact, many of the Houses in that series seem to take their names from this convention.
* A Song of Ice and Fire in hostile territory, offers the choice to his men. 17 out of 20 stay.
* A Song of Ice and Fire: In King's Landing, the Tyrells give Sansa her favorite — lemon cakes — as a gesture of goodwill.
* A Song of Ice and Fire in their right mind is going to strike the king in a melee.
* A Song of Ice and Fire in the making and hitting puberty being a good baseline in a pinch.
* A Song of Ice and Fire: In the Night's Watch, the Rangers are the ones who venture beyond the Wall to fight wildlings, while the the Stewards and Builders stay behind and get much less prestige. When Jon is assigned to the Stewards rather than the Rangers, he's extremely disappointed. He complains that rather than face wildlings in battle, he'll be changing the Lord Commander's chamber pot. It takes Sam to make him realize that the Lord Commander is grooming him for command.
* A Song of Ice and Fire. In the prequel novella "The Mystery Knight", Dunk remembers an incident in his childhood in Flea Bottom wherein he and some other kids played with a severed head taken from the site of executions. After a while, the head became very decomposed, so they disposed of it by throwing it in a cooking pot.
* 'A Song of Ice and Fire is a bustling port city brimming with wealth. Three guilds of merchant princes are always competing with each other and the nominal rulers of the city for power.
* A Song of Ice and Fire is alluded to in Cersei's chapters which provides some early warning signs of his later psychopathy — while the details are sketchy, it's implied that he found a pregnant cat and cut her open to see what the kittens looked like.
* A Song of Ice and Fire is almost always described as a "haunting" woman with dark hair and violet eyes.
* A Song of Ice and Fire is a military failure whose one successful campaign was due to the work of Randyll Tarly. Therefore, he pushed each of his sons to become great knights. He put his eldest son Willas in his first tourney before he was ready and up against Oberyn Martell, which ended up getting his leg crushed.
* A Song of Ice and Fire, is another, possibly more frightening example.
* A Song of Ice and Fire is based heavily on various Scottish and English internal wars of the Middle Ages.
* A Song of Ice and Fire is based on Earth with some key differences. For example, Westeros basically corresponds to Europe both culturally and in size, but is similar to a re-arranged map of Britain. Essos is Asia and Sothoryos is Africa.

Some fans speculate that another continent corresponding to the Americas is yet to be discovered.
* A Song of Ice and Fire is doomed to die, and the same applies to the epilogue characters in the two books which have them. None of these characters' POV is shown anywhere else in the books, and all but two (Varamyr Sixskins and Kevan Lannister) are pretty insignificant characters that we mostly haven't seen close-up before.
* A Song of Ice and Fire, is implied to employ mute (because he had their tongues cut out to prevent idle gossip) yet literate (so they can read secret documents without stealing them) children who wander the sewers and low places of King's Landing as his "little birds."
* A Song of Ice and Fire is rife with nicknames, many of them quite embarrassing:
* A Song of Ice and Fire is set in the second to third century after Aegon's Landing. The seasons are random in length, but are much longer than the years, making it uncertain what a "year" actually means (probably related to a complete rotation of the sun, our own calendar is measured as such, rather than the passing of seasons).
* A Song of Ice and Fire is sinister, due to it coming from him catching a disease from raping someone.
* A Song of Ice and Fire is SOP, it adds another layer of intrigue to any historical fic.
* A Song of Ice and Fire is the backstory of the characters and Westeros itself.
* A Song of Ice and Fire is the biggest example of what happens when too many oaths and rules come into conflict. As the first born son of a feudal lord, he owes fealty to his father. As a knight, he took sacred oaths to protect women, the innocent, and the church, and as a member of the Kingsguard, he took another set of oaths to protect and serve the king. All of this works fine as long as everyone is getting along well enough. Early in his time as Kingsguard, he was forced to stand by while the king raped the queen. His commander reminded him that while they took oaths to protect the king and the queen, those oaths did not permit them to protect the queen 'from' the king. That same king burned innocent men alive in kangaroo courts, and the issue finally came to a head when the king ordered the fire bombing of the entire capitol city and for Jamie to go kill his own father. Jamie killed the king, saving the realm from more destruction (and everyone already called him 'Mad King'). The result? Jamie is known only as a King Slayer and Oath Breaker.
* A Song of Ice and Fire is unhorsed in a tourney, he calls for his sword and proceeds to decapitate his steed and attempt to murder his victorious opponent in full view of the King and his court.
* A Song of Ice and Fire. It's mentioned that their mother caught them behaving inappropriately with each other when they were children and moved Jaime's room to the other side of the castle to try and stop it, threatening to tell their father if it happened again, but obviously this didn't work, mostly because their mother died soon afterward giving birth to their dwarfed brother Tyrion. Cersei also says that despite knowing this relationship wasn't allowed they comforted each other with the fact that the ruling dynasty also practiced brother-sister marriage, though that backfired horribly when the incest produced "Mad King" Aerys Targaryen, who brought down said dynasty.
* A Song of Ice and Fire. It's not clear whether this is a supernatural effect, or if dying and coming back just gives one a stubborn streak.
* A Song of Ice and Fire it's not quite as bad, but he has a significant belly.
* A Song of Ice and Fire it's quite obvious that he's right and a woman over thirty, having had several children and in a world with no modern beauty products should starting looking for herself for a new card to play.
* A Song of Ice and Fire, it was the custom of the First Men that "the man who passes the sentence should swing the sword". This tradition is carried on by Northmen in general, and by House Stark in particular.
* A Song of Ice and Fire, Jaime Lannister is given an ancient gelding with a blind eye to prevent him from outrunning his captors while being escorted back to King's Landing for a prisoner exchange.
* A Song of Ice and Fire, Jaime Lannister ponders a different version; keep your

friends behind you and your enemies in front (where you can see them).
* A Song of Ice and Fire Jaime Lannister receives a crude prosthetic hand made of gold. Unfortunately he needs to use his other hand to tighten it on something, and he can't wield his sword with it at all.
* A Song of Ice and Fire, Jaime Lannister winds up in a sword fight with his hands chained in front of him (as his captor had to let him ride a horse). It slows him up a little because he has to use a two-handed grip on a sword that isn't really long enough to be a two-handed sword. It doesn't slow him up very much. (The bigger problem is that he's spent the past six months or so locked in a dungeon, eating crummy food and getting exercise only in the form of the occasional beating).
* A Song of Ice and Fire Janos Slynt is the captain of the city watch in King's Landing and thoroughly corrupt. He and his men have loyalty only to those who pay them and are perfectly willing to serve as thugs for court intrigue. When Slynt is given a lordship, he recommends his subordinate Allar Deem as his replacement, saying that the man has absolutely no scruples. Tyrion has Allar Deem killed and instead promotes the honest Ser Jacelyn Bywater.
* A Song of Ice and Fire: Joffrey reacts this way when Sansa tries to comfort him after he has been mauled by her sister's direwolf. Cersei later states that this incident is the reason why Joffrey delights in making Sansa's life miserable: she saw him when he was weak.
* A Song of Ice and Fire, Jon Snow accidentally invokes the wildling marriage custom of bride-stealing, when he captures the spearwife Ygritte, is unable to kill her and instead lets her go. This is one of the few genuinely humorous moments of the series, though it is overshadowed by the two of them actually falling in love.
* A Song of Ice and Fire - Jon Snow's true parentage has not yet been revealed in the as yet unfinished book series, but the TV series (which has overtaken the books) revealed it as being pretty much the number one fan theory since the first book was written (although there are still diehard factions who insist on alternative possibilities, mostly on the grounds that the official TV reveal is "just too obvious, so it can't possibly be that"). The question of his actual legitimacy may be another matter, considering the somewhat shaky laws and precedents for divorce or annulment and remarriage in Westeros: but the question of his parentage can probably be regarded as settled - not least since, allegedly, the author only gave the go-ahead for making the show when the producers were able to give the correct answer to this exact question, and are unlikely to have changed what is evidently an important plot point.
* A Song of Ice and Fire just as they've ditched their habit of turning up more than fashionably late to wars. Guess who now has pride of place near the very top of the list of those chosen for the front lines when any given commander wishes to reserve their best, most loyal troops? Go on... guess.
* A Song of Ice and Fire keep trying every time they think they spot even a half-chance.
* A Song of Ice and Fire kidding about how seriously he takes his petty amusements. He's dragged his whole family in on this one, after all.
* A Song of Ice and Fire: Lady Lysa Tully is married off to elderly Lord Jon Arryn, a man decades older than her. Their marriage forges a useful alliance during the war and Lord Arryn needs a young woman to give him an heir. They have a loveless marriage because Lord Arryn is distant, Lysa has had many failed pregnancies and stillbirths, and she has never stopped loving her first love Petyr Baelish who was her father's ward. Later at court, Lysa and Petyr begin a secret affair (though he doesn't love her back) and Petyr even convinces her to poison her husband. Interestingly, Lord Arryn is portrayed sympathetically, while Lysa and Petyr are framed as villains.
* A Song of Ice and Fire, Lannister soldiers arrive with an arrest warrant for Gendry, who has joined the Night's Watch. Yoren asserts that recruits of the Night's Watch are immune from arrest, but the Lannister men refuse to back down, resulting in a fight.
* A Song of Ice and Fire. Later in their relationship, he only calls her a wench when she frustrates him. In the fourth book, after they go their separate ways, he

encounters someone who knew her and has a variety of unpleasant things to say on the matter, including calling her a wench. So he punches the man out. With a metal fist, at that.
* A Song of Ice and Fire likes to ask the reader an important question: does this trope make the awful things these characters do any better, any worse or just more heartbreaking?
* A Song of Ice and Fire longs for the days of the Rebellion, when he was a strong, dashing and popular hero, with a clear enemy to fight and a damsel in distress to rescue. He really hates being king, and he'd give it up in a heartbeat if he could.
* A Song of Ice and Fire, Loras Tyrell is still a teenager and frequently described as slender and feminine in appearance, yet he's one of the best fighters in the Seven Kingdoms and is seen kicking ass with full plate and battleaxe in one scene. It's worth noting that references to how badass he is generally seem to be in regards to his skill, particularly his swordsmanship, rather than his strength. Larger characters like the Cleganes, Umbers, or (younger) Robert Baratheon have their remarkable size strength referenced far more often.
* A Song of Ice and Fire: Lord Manderley serves meat pies to the Frey and Bolton lords who were responsible for his son's death. Roose Bolton is very careful not to eat the pies until Manderley has some himself. The pies are secretly made with slain Frey noblemen.
* A Song of Ice and Fire. Lord Tywin Lannister's baldness of awesome was actually an indicative character trait. When his hair started thinning, he commanded his barber to completely shave his scalp, as he would not brook half measures. King Stannis Baratheon also more than qualifies.
* A Song of Ice and Fire love to wear extremely ornate armor, especially during jousts, but often into actual battle as well. Various knights wear gem-encrusted breastplates, laquered armor, fancy capes and so forth. Even knights without money to burn will get themselves sculpted helmets. Particular examples include:
* A Song of Ice and Fire, lowborn smuggler Davos Seaworth manages to sneak past a Targaryen naval blockade of the besieged castle Storm's End under the cover of night and deliver a load of turnips and onions to the castle's starving defenders, earning him a knighthood from the grateful Lord Stannis Baratheon. The highborn lords and nights disparagingly call him "the Onion Knight" to mock his humble origins; Ser Davos takes the onion as his sigil so that he and his descendants will never forget them.
* A Song of Ice and Fire, Maester Marwyn reveals that there is a faction of the Citadel who want to actively extinguish magic from the world.
* A Song of Ice and Fire, Mance Rayder's message to the parties of Wildlings south of the wall to attack Castle Black is carried out by "lighting the biggest bonfire the North has ever seen."
* A Song of Ice and Fire Mance Rayder, the king of the tribes beyond the Wall was once one of the Night's Watch. His life was once saved by a wildling woman who mended his torn cloak with swatches of red silk; the most precious item she owned. When his superiors insisted that his cloak be replaced because of the patches and stitches' non-regulation color, he deserted. Beyond the Wall, he wears the cloak in memory.
* A Song of Ice and Fire masquerading as random drivel generally is. Brrrrrrr.
* A Song of Ice and Fire master had skinned them for his own pleasure is not known.
* A Song of Ice and Fire — but in later books, Daenerys (after a visit to the House of the Undying), Jon Snow (mainly because Bran's leading him through one), and even Arya (though it's mostly cloaked with symbolism) get them to a degree. However, it's worth noting that three of these characters are Starks, who are implied to have strong, possibly magical connections with the direwolves they adopt, and the fourth is a Targaryen, another family that is implied to have magical connections with animals (in this case, dragons).
* A Song of Ice and Fire: Members of House Targaryen tend to have violet eyes, and they were the ruling house of the Seven Kingdoms for almost three centuries. They were a family from Valyria, which used to rule the world for thousands of years. The violet eyes are actually a sign of Valyrian ancestry, though, so they are not

necessarily a noble trait. For example, while only nobles of Volantis have violet eyes, most people from Lys have them, including the smallfolk.
* A Song of Ice and Fire: Men who want to become Moonsingers must dress and live as women. In many cases, it's said outsiders cannot tell if the moonsinger is a man or woman at all due to this.
* A Song of Ice and Fire, minor character Corliss Penny is taunted with this line:
* A Song of Ice and Fire, more may continue to be found or rediscovered.
* A Song of Ice and Fire: Most castles, keeps, and holdfasts in the series are old enough to have a legendary ghost or two knocking about somewhere on their grounds. But, some places go more full-on Hammer Horror than others do.
* A Song of Ice and Fire, most knights and men-at-arms conform to this trope, particularly those assigned to raid and despoil peasant villages for information and supplies. One character gives a sympathetic monologue that any man conscripted into war can become this way if he survives long enough.
* A Song of Ice and Fire, mostly by overthrowing the slave-holding cities. The unfortunate side effects are extensive. In Astapor, a tyrant known as Cleon takes over the city once she leaves, and reinstitutes slavery except with the former masters as slaves. Yunkai agrees to free them, but the moment she leaves starts up the practice again and starts preparing for war against her. Some of the slaves, particularly those trained in skilled occupations, actually had a better quality of life before they were free, and she's disturbed to learn that people are trying to sell themselves back into slavery. Famine results because of the war to free them, and because some places refuse to trade with them.
* A Song of Ice and Fire. Most of the time dead means dead, but there are notable exceptions. Most notably, Thoros of Myr's resurrection of Beric Dondarrion and later Catelyn Stark.
* A Song of Ice and Fire: Mushroom the Fool produced the unsanctioned narrative of the Dance of the Dragons, a war of succession between the Targaryen kings, with trash, sex, treason and murder included. It's a remarkable thing that with all their power, the Targaryens were not able to purge his book.
* A Song of Ice and Fire. Nearly every description of the clothing of the other courtiers by her is described this way. Justified because she apparently views the world this way. Rarely are clothes "simple".
* A Song of Ice and Fire, Ned Stark and his wife Catelyn discuss whether he should become Hand of the King while in bed.
* A Song of Ice and Fire, Ned Stark's sister Lyanna is strongly associated with blue winter roses, her favorite flowers. She was infamously crowned as Queen of Love and Beauty at Harrenhall by Prince Rhaegar with a crown of blue roses, died in a room that smelled of blood and roses, and in every dream she appears she still wears the crown Rhaegar gave her.
* A Song of Ice and Fire never stop growing as long as they have freedom and food. Balerion is the only known dragon that got old enough to die of old age, and is by far the biggest dragon known to live; it was said his shadow could cover entire towns when he took flight. Vhagar, smaller and younger than Balerion at the time of his death, is considered twice the size of the next largest dragon, and three times the size of most mature dragons.
* A Song of Ice and Fire. None of the cultures or characters parallel Judaism or Jewish people at all.
* A Song of Ice and Fire. Not without a certain amount of justification.
* A Song of Ice and Fire: Oberyn and his eldest four daughters. Other family members are also sometimes included. Oberyn and his brother Doran work together, and Ariane recounts a time her uncle took her and her cousins — the above mentioned daughters — and taught them about snake poison.
* A Song of Ice and Fire observations and anecdotes make him one of the funniest characters in the series.
* A Song of Ice and Fire off one of the Unsullied, who doesn't even flinch.
* A Song of Ice and Fire of many of the tropes of medieval fantasy literature, including chivalrous courtly love, has a few characters who fit this trope.
* A Song of Ice and Fire of their family. His only flaw in question is the simple

fact that he can be manipulated easily, and this can be excused since he's still just a child. He also quickly realizes that a king needs to be wise.
* A Song of Ice and Fire of them realizes that Valyrian, the language the prophecies were written in, is gender-neutral and they should be looking at female candidates too. (It's as yet unclear if he was right; the two most likely candidates are a man and a woman and it could possibly be both of them, or maybe neither.)
* A Song of Ice and Fire of the series this is less true than they claim.
* A Song of Ice and Fire of Tumbleton much like Hammer did. Then there's his appalling treatment of Lord and Lady Footly.
* A Song of Ice and Fire Oh, and in the event that visitors become too troublesome for their own good, Lys is also famous for its master poisoners...
* A Song of Ice and Fire once rescued a besieged, starving castle by sneaking through a blockade and delivering badly needed supplies. Lord Stannis Baratheon rewarded him with a knighthood for it. But Davos was also a known smuggler, and Stannis did not pardon him for it, and cut the first finger joints off his left hand as punishment. Davos considers it tough but fair, and remains loyal.
* A Song of Ice and Fire, once you get to know them. Their numbers are, barely, kept adequate only through prisoners being sent their as a punishment in exchange for avoiding death, so this isn't a great surprise that many that even the volunteers and disciplined things are looser in certain areas.
* A Song of Ice and Fire one, namely Eddard Stark. Later, Ned's wife Catelyn and eldest son Robb join him in this trope.
* A Song of Ice and Fire One of the biggest, shallowest, spoiled douches in the series, but oh so fun to loathe.
* A Song of Ice and Fire, one of the important historical characters is the Princess Nymeria, who led a fleet of Rhoynish refugees away from their Valyrian conquerors. After ending up in Dorne and allying with the then-minor House Martell, she burned the rest of the fleet so that the Rhoynish would never leave their new home. This is the reason for the differences between Dornish culture and the other kingdoms'.
* A Song of Ice and Fire: One of Tormund Giantsbane's sons dies of exposure and comes back as a wight.
* A Song of Ice and Fire only war. They can appreciate a good joke, such as those told by trained Fools. One of them is named Butterbumps, an enormously fat man who tends to wear a chicken suit.
* A Song of Ice and Fire on the characters and cultures found there, and by book 5, it's where about half the narrative happens.
* A Song of Ice and Fire on their wedding night that she fully intends to be loud. She wasn't lying, and everyone else in the rather small castle they're in gets an earful.
* A Song of Ice and Fire, on the other hand, is more diplomatic and cerebral.
* A Song of Ice and Fire. On the other side, some characters who start as secondary characters and little by little gain importance may (or may not) have a form of plot armor against death:
* A Song of Ice and Fire over to discuss a marriage pact with few or no problems.
* A Song of Ice and Fire pairing in another family. Many fans ship characters the same way:
* A Song of Ice and Fire partly because of her idealism. She grows out of it.
* A Song of Ice and Fire partner is their paramour. In the rest of Westeros, such behavior is considered scandalous, but Dorne prides itself on being socially and sexually progressive.
* A Song of Ice and Fire; plus, he makes her pose as his daughter while at the same time forcing kisses on her - even iffy considering he was in love with her mother.
* A Song of Ice and Fire pretends to be delivering vegetables and a horse to get into the Twins. The horse comes in handy for distracting the attention of a nobleman who's encountered the Hound before.
* A Song of Ice and Fire pulls one of these, when the "reinforcements" turn out to be invaders.

* A Song of Ice and Fire punishment for his life of crime at the same time, by having one joint of each finger on his left hand removed. But that seems relatively lenient by the standards of Westeros, and it certainly doesn't seem to bother Davos. He'll argue with anyone who suggests it's unfair.
* A Song of Ice and Fire: Pycelle claims that "Robert Strong" took a holy vow of silence, but it's heavily implied that Robert Strong is the reanimated Gregor Clegane and unable to speak.
* A Song of Ice and Fire quite a bit, resulting in a few straight examples of this trope.
* A Song of Ice and Fire, Ramsay Bolton sends the Night Watch a false message stating Stannis Baratheon is dead to demoralize Stannis's forces. But did Ramsay send it, or did someone else...
* A Song of Ice and Fire rather than space exposure). One castle, built atop a huge mountain, has a door in the throne room that leads directly outside the walls. This is the door unwanted visitors exit through.
* A Song of Ice and Fire, real magic is becoming more common and powerful.
* A Song of Ice and Fire), recognise each other in an inn, causing the intrigues of other characters to spiral out of control into an all-out civil war.
* A Song of Ice and Fire repeatedly suggest this as an explanation for Brienne's fierce fighting style. Their tone of voice while doing so tends to vary between misogynist mockery (if she's busy or out of earshot) and outright pants-wetting terror (if she's not).
* A Song of Ice and Fire, repeated references are made to the Doom of Valyria. It's not clear what exactly this was, except that it was very hard on Valyria. Euron Crow's Eye claims to have "seen the Doom," so whatever-it-was may still be going on (although Euron shows every sign of being an inveterate liar). Given that Valyria seems to be the birthplace of the dragons, along with various references to smoke, fire, and poison, fans have speculated that the Doom was actually the eruption of one or more very large volcanoes.
* A Song of Ice and Fire, resurrection is possible (though rare enough that most people assume it to be legend, and are astonished when it happens), but only if the body is in good enough condition. In particular, decapitations are mentioned to be permanent deaths.
* A Song of Ice and Fire: Rhaegal does this while living in the dragonpit in Meereen, much to Quentyn Martell's surprise.
* A Song of Ice and Fire. Rhaenys dearly loves her brother despite never having met him before and has his best interests in mind. She strongly disagrees with Aemon wasting his live on the Wall, and has a tremendous grudge against Ned Stark for encouraging it.
* A Song of Ice and Fire riding "giant ice spiders". However, they have yet to appear in the saga.
* A Song of Ice and Fire: Robert Baratheon's relationship with Lyanna Stark. 15 years later, she was the love of his life and he went to war for her. Her brother Eddard says that for all his talk, Robert barely knew her, and Lyanna had acknowledged before her death that being married to her would not change Robert's womanizing ways.
* A Song of Ice and Fire said horse in a blind rage and attacks his celebrating opponent (and his own brother when he attempts to break up the attack), only stopping when ordered to by the King. This is only a mild example.
* A Song of Ice and Fire said 'No one will be alive by the last book. In fact, they all die in the fifth. The sixth book will be just a thousand-page description of snow blowing across the graves'... which, even though he was clearly partly joking, especially since the fifth book was released since then, implies that he intends to do something like this to his series. Whether or not the final books will ever be published is a different question, though.
* A Song of Ice and Fire, Sansa realizes how great it would be to see Jon again and believes he is the only brother remaining to her.
* A Song of Ice and Fire: Satin, the former whore and steward to Lord Commander Jon Snow of the Night's Watch, evolves into this (with a crossbow) during the attack on

the King's Tower.
* A Song of Ice and Fire's dominant hand is amputated, and he has to learn to fight with a sword in his left hand instead. It goes about as well as you'd expect.
* A Song of Ice and Fire seems to bring her closer to fulfilling various conditions.
* A Song of Ice and Fire. Ser Alliser Thorne insults and berates all the boys he's supposed to train, without actually giving them anything in the way of instruction. Meanwhile, the few pages' worth we see of Ser Waymar Royce has him mocking the lower-ranking but more experienced rangers under his command every time they display caution or prudence.
* A Song of Ice and Fire, Ser Gregor Clegane stands with his back to the sun to blind his opponent, the Dornish prince Oberyn Martell. Martell turns this against him by using his polished metal shield to reflect the sun back into Gregor's vision slit.
* A Song of Ice and Fire series has many examples. The North had hundreds of ruins and tombs dating back thousands of years from the era of the First Men. Likewise, the many castles of the Night's Watch along the Wall: Once, there were nearly twenty fully-manned keeps; now, only three remain in use, while the others have fallen into ruin over the past few centuries. But the crowning achievement can only be Harrenhal. In the distant past, King Harren spent forty years designing and building the largest, most magnificent castle in all the Seven Kingdoms, bankrupting his realm in the process. And the very day construction is complete and he moves into residence, Aegon the Conqueror lands on the shores of Westeros. Barely a year later, Aegon's dragons torch Harrenhal into molten slag. Today, nearly three centuries later, Harrenhal still stands, but in a state of perpetual disrepair, with crumbling towers and passageways. The lands and incomes of Harrenhal's fiefdom are very wealthy, for a minor lord anyway, but there has never been a Lord of Harrenhal that has not come to a bad end.
* A Song of Ice and Fire series, much influenced by ASOIAF, does the same thing.
* A Song of Ice and Fire series, which is based on Zoroastrianism, believe that their god, the lord of light, is locked in eternal conflict with The Great Other, the lord of cold darkness, in a battle that determines the fate of the world.
* A Song of Ice and Fire "Ser Robert Stone" was a result of him remembering the name of a previous king and looking at the castle wall.
* A Song of Ice and Fire, since the scarcity of magic in Westeros makes a flying knight with magic beam weapons all but impossible. It's only when Ned confirms that the stories are fact that she becomes a big fan of the guy.
* A Song of Ice and Fire: "skinchangers" and "wargs" can do this to animals. A particularly powerful one can do it to a human, but most humans have the mental strength to resist their possession. When successful, the experience is extremely traumatic for the person.
* A Song of Ice and Fire, so he'll empathize with the common people, might have a few flaws.
* A Song of Ice and Fire So in fact the civil war that ripped apart the Seven Kingdoms was started by misunderstandings (which were reinforced by Littlefinger).
* A Song of Ice and Fire, squires are to be found all over Westeros, serving both lords and knights. Heck, you can even find lords who worship either the Old Gods or the Lord of Light with squires who worship the Seven, the pantheon knighting is associated with. They are often extremely young, with some of the youngest being around 10 years old, although there are some older ones as well (sometimes, in special circumstances, even older than the knight they are squiring for). Some knights have more than one squire as well, due to their high status. Actual squires have rather better rights than mere wards (foster children), since they are rarely treated simply as barely-disguised hostages — the knight-squire relationship has codified, two-way cultural expectations placed on it; warding... not so much. However, going into situations where fighting (and politics) is likely is hardly risk-free, and abusive, less-than-shiny knights aren't that uncommon.
* A Song of Ice and Fire Stannis Baratheon considers being named Lord of Dragonstone this. While being granted the ancestral seat of the Targaryens would

normally be a great honor, with Robert taking the Iron Throne, Stannis would have been Lord of Storm's End, which is bigger, richer, his ancestral home, and not located on a godforsaken rock in the middle of the ocean. It's not exactly that Dragonstone itself is lame, just in comparison to what he would have had had he not been so "honored". Making it even worse is that during the rebellion, Stannis defended Storm's End through a terrible siege, eating rats rather than surrender, only to have it taken away and given to his little brother afterward.
* A Song of Ice and Fire: Stannis Baratheon, one of the greatest threats to the Iron Throne among all five of the kings fighting for it, besieges King's Landing itself with a huge army, and is only beaten off due to preparations made by Tyrion that hold him off long enough for an allied Lannister-Tyrell army to come in from behind and smash his army so badly that he only has around fifteen hundred men and is now sending out people to hire sellswords to bolster his numbers.
* A Song of Ice and Fire starts off with a chapter from the perspective of a doomed character. Later books sometimes end with similar chapters.
* A Song of Ice and Fire: Step pyramid is an architectural characteristic of the Slaver's Bay cities: Astapor, Yunkai, and Meereen. This is inherited from the Old Empire of Ghis, with Meereen's 33 stories-high Great Pyramid being specifically styled after the Great Pyramid of Ghis. Unlike in real life, these pyramids are not used for burial or religious procession, but as living quarters for the nobility.
* A Song of Ice and Fires That Weren't All My fault after assassins try to kill them.
* A Song of Ice and Fires That Weren't All My fault), and having a pronounced dislike for feudal lordship, are also factors. One of the main initial successes is starting up a printing press.
* A Song of Ice and Fires That Weren't All My fault win regards to Harry Dresden, meaning that they're easily framed for threatening to try get him out of Braavos. As it turns out, though, they only object to necromancy (which isn't exactly unreasonable).
* A Song of Ice and Fire, such as "Unbowed, Unbent, Unbroken" and "Take The Black."
* A Song of Ice and Fire swords are laid over the tombs of the dead Lords of Winterfell. Later, when they're hiding in the crypts Bran, Meera, and Osha steal three of these swords.
* A Song of Ice and Fire take on Edward I "Longshanks", and the Titan's Bastard, a giant of a sellsword who leads a mercenary company.
* A Song of Ice and Fire, taking part in sporting events, getting ill, using poorly maintained infrastrucure... all these turn up as rather suspiciously convenient ends.
* A Song of Ice and Fire. Tavern wenches who slept with Lannister soldiers were likewise executed and hanged from trees, their bodies left to the crows. However, Stannis Baratheon does have a habit of punishing his men for this, such as castrating those who raped Wildling women even though Stannis was fighting the Wildlings.
* A Song of Ice and Fire tells Sansa Stark to "love only your children," because a mother can't help doing that, but no one else because of this trope. Cersei also states:
* A Song of Ice and Fire tendencies, Howland Reed will probably still wind up dying before anybody else finds out.
* A Song of Ice and Fire that can change their identities/faces on a whim. She also has a psychic bond with a giant man-eating wolf.
* A Song of Ice and Fire that happens in those books is brutal and/or disturbing in some way or another. Even the sex. It's reached memetic levels.
* A Song of Ice and Fire that he has done, it's too late for him to salvage anything of his relations with the Starks.
* A Song of Ice and Fire that she exhibits when talking about gruesome death.
* A Song of Ice and Fire, the Battle of the Trident was the decisive battle of Robert's Rebellion. Despite setbacks and defeats at the hands of House Tyrell, Robert Baratheon faced Prince Rhaegar Targaryen at the Trident and personally killed him, shattering the royal armies. This battle made Lord Tywin Lannister, who

by then had been sitting out the war, to realize that the rebel cause would soon be victorious and so lead his own armies to King's Landing to sack it as a sign of fealty to Robert.
* A Song of Ice and Fire. The Boltons as a whole been doing it for centuries... and, one of the nastier rumours that may prove itself all too true is that they keep the skins (or parts thereof) of prominent victims and preserve them in the keep of the Dreadfort. Alongside other, more traditional trophies of war and what have you. Nice.
* A Song of Ice and Fire, the character Stannis Baratheon expresses atheist sentiments while using the magic of a particular religion to accomplish his own ends. He's portrayed very differently in the TV adaptation. It's somewhat justified as magic in general is proven to exist and there are magic users who belong to other religions or who are not religious. The fact that Red Priests are able to use magic and produce what appear to be miracles isn't necessarily proof that their god is real.
* A Song of Ice and Fire, the city Yunkai in the Slaver's Bay region is famed for its pleasure slaves trained in the ways of the "seven sighs" and the "sixteen seats of pleasure."
* A Song of Ice and Fire, the cynical, anti-villainous Sandor Clegane calls out the Brotherhood Without Banners for putting on airs about their own murderous actions and attempting to condemn him for crimes of his employer with which he had no connection:
* A Song of Ice and Fire. The dwarf Tyrion Lannister met a woman named Tysha, with whom he fell in love and tried to hide from his family because she was not a noble. Then, his father reveals that she was a prostitute who Tyrion's brother had hired secretly for him. To "prove" how she was a hooker, he hires her to have sex with the entire family garrison and then forces Tyrion to go last. This experience naturally scars Tyrion his entire life, until he later learns the truth: She was never a prostitute, Tyrion's father lied, and the scene with the garrison was in fact a gang rape.
* A Song of Ice and Fire, the dying King Robert tried to call off the assassination he ordered on Daenerys Targaryen, but either the message didn't get there in time or someone made sure it didn't. While the assassination does fail, the attempt does a lot to motivate Dany to invade Westeros and retake the throne.
* A Song of Ice and Fire: The extinct House Lothston, whose sigil was a black bat, had an ill reputation in the Seven Kingdoms. Lady Danelle Lothston was rumored to have practiced black magic, bathed in blood, and presided over feasts of human flesh. Even decades after the fall of the Lothstons, their sigil is still feared by many, and mothers tell stories to their children about bats flying from Harrenhal to carry bad children to Mad Danelle's cooking pots.
* A Song of Ice and Fire. The fact that he fathered her children instead of Cersei's actual husband helps kick off a civil war.
* A Song of Ice and Fire, the fantastical races tend to be this due to the encroaching expansion of baseline humans.
* A Song of Ice and Fire, the formal ceremony granting new lands and titles to a vassal tends to include the phrase, "...to be held by your children and grandchildren from now until the end of time." While such holdings can indeed last quite a long time if well-managed, they can also be lost rather quickly if the liege lord is removed from power or the vassal attainted for treason. Janos Slynt, for example, is granted Harrenhal by Cersei Lannister and never sets foot in it before being condemned to the Wall by Tyrion Lannister; Harrenhal is later granted to Petyr Baelish, who is too smart to put much stock in promises. The end of time having not yet been reached, it remains to be seen which (if any) noble houses will still be in possession of their original holdings.
* A Song of Ice and Fire, the Greatjon insults Robb Stark and has two of his fingers bitten off by Robb's direwolf. Defeated, the Greatjon grips his bleeding hand, makes a wisecrack, and laughs it off. Bran, who watches the whole thing, is flabbergasted.
* A Song of Ice and Fire, the greatsword Dawn is thought to be forged from a fallen

star. The blade is handed down to members of the noble House Dayne, and a wielder of the blade is always called the Sword of the Morning. The world of the series also features particularly sharp and strong blades believed to be forged by magic, but Dawn seems to be held in even greater respect. A previous Sword of the Morning once dueled a notorious bandit knight and hacked the bandit's first sword to bits, showing that Dawn is indeed something special.
* A Song of Ice and Fire. The guy commands a good percentage of the continent's armed men while barely old enough to grow a beard.
* A Song of Ice and Fire, the identity of a given executioner is often used for contrast compared to the example from Ned Stark.
* A Song of Ice and Fire, the incest between Cersei and Jaime is this trope after King Robert's death. Initially, it was known only to a few people who had spies or performed some research (Varys, Littlefinger, Renly, Stannis, and Jon Arryn). However, after the end of the first book where the Lannisters have performed a coup and killed Robert and Ned, Stannis sends letters all across Westeros with the news of incest. While the fact is known to even the Lannisters' allies, it's something that can't be discussed because the reveal of the incest would result in the whole reign of Joffrey (and later Tommen) being considered illegitimate and treasonous. So, people like Margaery will occasionally make a snide comment, but in whole the discussion is avoided lest the whole Lannister/Tyrell regime collapse. However, it's looking like that's going to happen anyway with Cersei's incompetence.
* A Song of Ice and Fire, the investigation into the murder of Jon Arryn leads Eddard Stark to evidence that none of the heirs to the throne are actually the children of the king and the assumption that Arryn was murdered to cover up this fact. This knowledge eventually leads to a succession crisis called the War of the Five Kings, and Stark's own murder. Ironically, it is revealed later that Arryn wasn't murdered to cover up the Queen's affair at all, but rather because Arryn's wife wanted to be free to marry the man she'd been having an affair with for years.
* A Song of Ice and Fire, the Ironborn tell stories of how the legendary Grey King killed the sea dragon Nagga and built his hall from her rib cage. Whether the stories are completely true or not, the petrified, building-sized rib cage remains; they treat it as holy ground and crown their kings there.
* A Song of Ice and Fire the Long Night might be an eternal recurrence. There are too many legends of the world freezing over and the living being terrorized by the dead.
* A Song of Ice and Fire, the morally ambiguous War of the Five Kings is caused by a complicated series of political, social and filial problems. This is contrasted with the constant menace of the coming army of the Others (White Walkers in the show), a bunch of evil zombies that want to overrun Westeros.
* A Song of Ice and Fire, The Mountain That Rides. It's less of a tiny-mount situation and more of a the-guy-is-so-frikken-huge-that-a-Percheron-on-growth-hormone-would-be-tiny-by-comparison situation.
* A Song of Ice and Fire, the Night's Watch has devolved into this, with it consisting mostly of people who faced the option of death or going to the Wall.
* A Song of Ice and Fire... Then one of them clubs him in the head. They then sell him out and go home.
* A Song of Ice and Fire: Theon Greyjoy/Asha Greyjoy. Groping, near-sex. Poor Theon needs some Brain Bleach, stat!
* A Song of Ice and Fire: Theon Greyjoy, at a dark time in his life, thinks back on all the people he has lost while walking around in Winterfell:
* A Song of Ice and Fire, the people of Naath are extreme pacifists who don't eat meat and mainly live on fruit.
* A Song of Ice and Fire: The people of Slavers' Bay really like these kind of sports. When Dany goes there to buy slave soldiers, their owner invites her to go see a game that night where three children are slathered in different condiments and thrown into a bear pit, with wagers placed on which one lasts longest.
* A Song of Ice and Fire, the people of the island of Naath worship the God of Harmony and reject all forms of violence; they don't even kill animals and live mostly on fruit. They were protected from conquerors by "butterfly fever" a disease

they're immune to but every foreigner gets who spends time on Naath. However, they became a target for slavers who found out that they don't get sick if they only stay for a short time.
* A Song of Ice and Fire. The place is designed to limit the damage should a cache of wildfire combust.
* A Song of Ice and Fire the pro-sacrifice side refers to him as "the boy" or "the bastard." Davos, who opposes the idea, resolves to use his name as frequently as possible.
* A Song of Ice and Fire, the pyrotechnics of the Battle of Blackwater cause the normally fearless Sandor Clegane to have a breakdown, triggering memories of the attack by his brother in his childhood that left him permanently disfigured. Lord Beric Dondarrion's flaming sword has a similar effect.
* A Song of Ice and Fire, there are certain rules all Wargs must obey unless they want this trope to come in effect. You don't eat human flesh while you are in your beast's body, or you'll become a cannibal back in your own body. You don't have sex while in your beast's body, or you'll find yourself to enjoy bestiality as a human. You'd better avoid warging into herbivores (to avoid becoming a coward) and birds (apparently, flying is addictive, and not being able to as a human can drive you insane).
* A Song of Ice and Fire: there are quite a few theoretically villainous or antagonistic characters that act rather decently, at least to some people. These include Jaime Lannister, Sandor Clegane, Jaquen H'Gar, and Petyr Baelish, all of whom have acted decently towards protagonist characters when they didn't have to. Then again, the series tries to show all of its characters as three-dimensional and well-developed.
* A Song of Ice and Fire: There are several characters who are commended for their prowess in battle:
* A Song of Ice and Fire, there are several faiths coexisting more or less peacefully. It is not known if these gods really exist, but many of the magical feats performed in the series are attributed to them. The main ones are:
* A Song of Ice and Fire, there are several groups and people who dislike it. The Dothraki culture is fearful of it, and the Maesters - an institution of scholars - are opposed to it as well because it clashes with their naturalistic worldview. Varys has personal reasons for disliking magic - he was castrated as a child as part of a strange supernatural ritual.
* A Song of Ice and Fire there are various peoples who embody different versions of this:
* A Song of Ice and Fire, there is a legend about a swordsmith who worked day and night trying to create the perfect sword, but always failed at the last stage. He finally succeeded by stabbing it into his own beloved wife, causing her blood to temper the blade and make it unsurpassed at killing.
* A Song of Ice and Fire, the sadistic Ramsay Snow likes to hunt women with dogs. If they are "lucky", and he thinks they put up a good fight, he'll kill them and then flay their skin and will name a dog after them. If they aren't lucky, he'll rape them and then flay them alive.
* A Song of Ice and Fire: The series is full of them, both in current events and the backstory.
* A Song of Ice and Fire the sorceress Melisandre definitely has magical powers, but they are weaker than she lets on, and so to maintain her image, she uses colorful powders, chemicals and the like. Making the stage magician connection is the fact that she literally keeps her "supplements" up her sleeves.
* A Song of Ice and Fire, the south is warmer than the north. In the continent of Westeros, the North is freezing, while the southernmost kingdom, Dorne, is Mediterranean. The southernmost continent is described as jungly, though the known world does not extend far from its northern coast.
* A Song of Ice and Fire, the Warrior's Sons and the Poor Fellows, the militant wings of the Faith of the Seven, wear hair shirts.
* A Song of Ice and Fire the wights, corpses on the control of The Others, are described to have piercingly blue eyes, in this vein.

* A Song of Ice and Fire, the witch Mirri Maz Duur tricked Daenerys Targaryen to sacrifice her son and bring her dying husband into a state between life and death. After putting Drogo out of his misery, Daenerys executes Mirri Maz Duur by strapping her to Drogo's funeral pyre.
* A Song of Ice and Fire. They are called the finest foot in the world, because they have discipline and intense training. However, they're not all that good at non- or para-military matters.
* A Song of Ice and Fire: They are slave soldiers that are castrated, hooked on medieval magical steroids and put through a brutal regimen of training which most of them do not survive. They are also brainwashed to be obedient and personality-less. Much emphasis is put on how inhumane is their very existence and how Daenerys Targaryen did a good thing by freeing all Unsullied from slavery, encouraging them to develop personality and putting a stop to producing any new ones.
* A Song of Ice and Fire. They hesitate, probably knowing there is no such thing, before scampering off at his insistent roaring. Robert laughs and hopes Ser Santagar will send them on to someone else. "We could keep them going all day."
* A Song of Ice and Fire, they tell tales of Danelle Lothston, aka Mad Danelle, who bathed in the blood and feasted on the flesh of her victims.
* A Song of Ice and Fire, they tend to be subdued and more 'realistic' in some way:
* A Song of Ice and Fire, they were possibly in this relationship during Loras' time as Renly's squire. A less extreme example as Loras is only 4 years younger than Lord Renly.
* A Song of Ice and Fire. This becomes less appealing and more creepy as the story goes on though, as the goals Arya persists in achieving pretty much amount to mass murder. Her sister Sansa, too, who manages to stay cool even when life seems more and more persistent to break her.
* A Song of Ice and Fire. This has only intensified with the controversial series ending, where many people are hoping to see the "real" ending as done by GRRM.
* A Song of Ice and Fire: This is a legal way to solve a dispute in Westeros. Any person can request a trial by combat, and knights specifically cannot be denied one if they ask. The accuser and accused can ask for someone else to volunteer as well, if they are not fighters. An accused or accusing woman will automatically be volunteered by a man. The trial ends only if one of either parties yields or dies. There is also a rare variation known as trial of seven, which is an ancient Andal tradition that is connected to the Faith of the Seven. This happens if a person is accused by multiple people. In this case, the accused and six companions fight seven men chosen by the accuser, with the latter normally being among them.
* A Song of Ice and Fire: This is basically Hodor's job description for the cripple Bran Stark.
* A Song of Ice and Fire: This is considered common practice during war:
* A Song of Ice and Fire. This is just one of many horrific punishments in the series, yet it manages to stand out among the crowd. POV character reactions run the gamut from truly scared to almost blasé.
* A Song of Ice and Fire. This is partially because she makes the magic look easier to use than it actually is, using various forms of tricks and items to make the act of casting easier, or produce an effect which looks far more impressive than it actually is.
* A Song of Ice and Fire, this is the Old Gods' purpose in sending Robb back in time.
* A Song of Ice and Fire, those born as commoners in Westeros rarely have last names, leading to many characters without them. In addition, Septons (priests) and Maesters (order of scholars) discard their family name and the High Septon (head of the clergy) discards even his given one.
* A Song of Ice and Fire: Throughout the series, several passages are written from the perspective of the Stark children's direwolves.
* A Song of Ice and Fire. To all appearances, this does save his life, but the poor kid would be a lot happier about the flight he was promised if he could grasp a metaphor.
* A Song of Ice and Fire to Arya than she was in the books and even apologizes for

it.
* A Song of Ice and Fire to be; thousands of years ago many men would volunteer to take the black, but nowadays the Night's Watch is only seen as guarding against the barbarians beyond the Wall instead of ice monsters and their zombie thralls, and is only a tenth of the strength it used to be.
* A Song of Ice and Fire to continue indiscriminately. After the war is over, several nobles are noted to be utterly clueless why the smallfolk protect and collaborate with the Brotherhood, rarely or never acknowledging the horrendous crimes afflicted against the defenseless lower classes.
* A Song of Ice and Fire to go through with. Kids are usually neonates by the time they're fostered out, and view their foster-siblings as peers and friends, not siblings:
* A Song of Ice and Fire to lead the least experienced part of his forces that he wants the enemy to overwhelm to lure them into a trap. Without informing Tyrion of the plan. It turns out the enemy doesn't fall for the trap, and the Mountain Clansmen Tyrion is leading into battle are so badass they throw back their attackers instead of breaking themselves. It would probably have worked anyway, but the army they're facing turns out be a diversionary force much smaller than what they expected to meet.
* A Song of Ice and Fire to play in the story's multiway civil war before dying off screen.
* A Song of Ice and Fire torches. Tyrion notes that the hall is only used to impress visitors and all the torches will be extinguished as soon as he leaves.
* A Song of Ice and Fire, to the confusion of some fans. As of 2014, the comics are still adapting the first book while the TV series has reached parts of the fourth and fifth.
* A Song of Ice and Fire... to then repeat the process all over again down the line).
* A Song of Ice and Fire towards the edges, reflecting limitations in the Middle Ages.
* A Song of Ice and Fire turns him into 'Reek', who has long ago learned to do whatever his master tells him without hesitation.
* A Song of Ice and Fire, two of the Lannister hostages try to escape from King's Landing by hiring on as oarsman. Tyrion Lannister suggests keeping them on the oars for a few years as punishment, but eventually decides against it as they can't afford to lose the hostages.
* A Song of Ice and Fire, Tyrion is falsely accused of poisoning Joffrey at a wedding feast where hundreds of people witness that he happened to be the closest person in proximity to the victim at the time, and also happened to be the one pouring the wine in question. It is later used against him that he was seen directly afterwards picking up the goblet of poisoned wine and pouring the contents out onto the ground, as well.
* A Song of Ice and Fire - Tyrion is too busy trying to save the city to struggle with Cersei's schemes so he uses a mild poison to get her out of his hair for one day.
* A Song of Ice and Fire, Tyrion Lannister enlists the services of one such camp follower called Shae, and later smuggles her into the city to be his concubine.
* A Song of Ice and Fire. Tyrion Lannister thinks he'll finally get the respect of his family for saving King's Landing from the attacking forces of King Stannis. Unfortunately, the three people handing out the rewards — his nephew King Joffrey, his sister Queen Regent Cersei, and his father Lord Tywin — all despise Tyrion, so he never gets credit for any of it.
* A Song of Ice and Fire Unsurprisingly, setting aside and storing food grown during the "quite wonderful, thanks" sections is a bit of a continental habit.
* A Song of Ice and Fire uses dreams a lot as a foreshadowing tool, usually those are understood to be magical "green dreams" or otherwise sent by the gods. Perhaps. The system of magic in ASOIAF is anything but functional.
* A Song of Ice and Fire, various feudal houses can wage wars against each other, though overstepping certain bounds will result in an intervention from the king.

* A Song of Ice and Fire warriors and raiders who pride themselves on taking everything they need by force rather than producing it themselves or buying it — the motto of their ruling house is outright "We Do not Sow". This means that everyone who isn't a warrior or a reaver is looked down on in their society, including both the large population of thralls that grows their food and mines the iron that makes up their weapons and the farming societies they raid, despite the fact that Ironborn society is utterly dependent on these two groups in order to keep itself going. Fishermen are the sole exception, considered upstanding Ironborn presumably since they still make a living at sea. This also extends to Lord Rodrick Harlaw, nicknamed the Reader, an Ironborn lord more concerned with reading and collecting books than pillaging. He's looked down on by most other lords because of this, except for a few aware of how valuable his knowledge and advice can be.
* A Song of Ice and Fire was one of the key factors that lead to the new civil war. Which, as far as we know, was intentional on his part, thus making him directly and indirectly responsible for most of the bad things that happened in the series, including about half of Westeros being devastated by said civil war and most likely facing famine in the near future.
* A Song of Ice and Fire was originally kept in a similar fashion, but after he broke his captors' expectation that he wouldn't try to escape, they moved into a conventional dungeon.
* A Song of Ice and Fire, Westeros is very patriarchal when it comes to ruling and fighting that it's no surprise there would several female POV characters trying to break the barrier:
* A Song of Ice and Fire, what Harrenhal probably needs to get fixed up properly is a major cash injection, mass evacuation, a good six or more decades of constant scaffolding and an army of masons, carpenters, blacksmiths, plasters, plumbers and all their suppliers. Failing that: ten years and a wrecking crew would do to start back at scratch. What it generally gets is... bodge jobs on a budget that never address any of its core issues because no lord it has had since Harren the Black built it can afford to anything else.
* A Song of Ice and Fire", when fans speculated that the repetition of certain words, especially the squawking of Joer Morment's pet raven, was actually a cryptogram that they could use to predict events in the series.
* A Song of Ice and Fire. When first released, it was a fairly traditional CCG, with base decks augmented by booster packs. Starting in 2007, though, it converted to a Living Card Game, meaning it was sold as box sets and packs with fixed contents rather than randomized booster packs. Has been in production since 2002, making it one of the longest lasting card games on the market aside from the Big Three (M:tG, Yu-Gi-Oh!, Pokemon).
* A Song of Ice and Fire when in actuality he was the only one trying to reign the king's madness in.
* A Song of Ice and Fire, when Jon Snow is chosen to become the Lord Commander's personal steward, he initially assumes it's a punishment, as he had wanted to become a ranger instead, but as Samwell informs him, personal stewardship to the Lord Commander has historically been a fast track to becoming the next Lord Commander, so Jon has essentially been put on the fast track for a major promotion.
* A Song of Ice and Fire: When Littlefinger left his home to seek his fortunes, he carried all his worldly possessions with him. It helped to fuel his lifelong obsession with power.
* A Song of Ice and Fire when one character mentions that marrying Margaery is a death sentence.
* A Song of Ice and Fire When Renly boasts to his normally stoic, humorless brother Stannis that his new bride Margaery Tyrell "came to [him] a maid," Stannis replies, "In your bed, she's like to die that way."
* A Song of Ice and Fire when The Red Viper, the most notorious Dornishman of them all, comes on the scene.
* A Song of Ice and Fire: When Vargo Hoat tries to rape Brienne, she bites off his ear. The wound becomes infected and drives him mad. In general, the ear is a common victim of various fights that break out through the series.

* A Song of Ice and Fire, where he admitted that the minor character Ser Patrek of King's Mountain was based on Patrick St. Denis, owner of the website Pat's Fantasy Hotlist. They're both football fans and had a friendly bet over the Dallas Cowboys and the New York Giants. When the Cowboys finished ahead of the Giants, under the terms of the bet, Martin had to kill Patrick in a horrible fashion in the novels. So, Martin gave Ser Patrick the sigil of a blue star on a silver backdrop (the logo of the Cowboys) and had him ripped to shreds... by a giant.
* A Song of Ice and Fire where two very long term complicated plans prove difficult to sustain when the time to act arrives, causing one plotter to declare that he's "tired of prudence", unwittingly acting out a plan improvised on the fly by a skilled improviser by the name of Tyrion Lannister.
* A Song of Ice and Fire which then feeds back into more magic becoming more widely available. Too much knowledge has been lost for anybody to definitively know how this cycle(?) works.
* A Song of Ice and Fire: While at a wedding reception as the bedding gets underway, Catelyn Stark remembers from her own bedding that Lord Willam Dustin, upon seeing her bare breasts, joked to Eddard that they were enough to make him wish he'd never been weaned.
* A Song of Ice and Fire: While the series often subverts and even deconstructs the trope, it does contain a few straight examples:
* A Song of Ice and Fire who always leads from the front. Bored with the siege of Riverrun, Jaime hears of an attack by raiders on his supply line and leads a small force off to attack them, only to be ambushed by Robb Stark's army. King Robb also leads from the front to inspire his men but is more cautious about it, keeping a strong bodyguard and not taking unnecessary risks. Jaime's father, the coldly pragmatic Lord Tywin, leads from the rear where he can control the battlefield and judge the right moment to throw in his own efforts.
* A Song of Ice and Fire who chose the wrong side of one political game or another. A common treatment of prisoners of war with no expectation of ransom is to allow them to take the black, as opposed to being held captive or executed.
* A Song of Ice and Fire, who had the opportunity to remove a poisonous solid disguised as an amethyst from Sansa's jeweled hair net and drop it in his cup of wine. One indication of this is the wine itself: an early goblet is poured over Tyrion's head and described as red, while the dregs remaining in the later, poisoned goblet are described as purple.
* A Song of Ice and Fire who is described as a charismatic charmer who can make friends of his enemies.
* A Song of Ice and Fire who is even close to sympathetic really says a lot — at least Utt feels guilt over what he does (even if it doesn't stop him) while the rest of the Brave Companions revel in their vileness.
* A Song of Ice and Fire, who is sugar to his family and ice to the rest of the world.
* A Song of Ice and Fire who recalls how as a young squire he'd stumble still yawning onto the training ground every morning, whereas now he hardly gets any sleep. As he's old and full of regrets, it's not a good thing to be awake in the wolf hour.
* A Song of Ice and Fire, whose world map reflects the limitations of medieval maps.
* A Song of Ice and Fire who taught her combat knew that her male opponents would try for a quick victory so no-one could say they found it hard to defeat a woman. So Brienne has been trained to fight defensively and wait for her opponent to exhaust himself first, then attack.
* A Song of Ice and Fire why he is offering his left hand instead of his right.
* A Song of Ice and Fire with her he realizes his feelings are less shallow this time. Dacey is attracted to him but hesitates to take new steps in their relationship, fearing he is only so interested in her because of her initial refusal.
* A Song of Ice and Fire, with hot worm-like creatures bursting open from her skin and dying on impact with cold water.

* A Song of Ice and Fire wouldn't see airing until April 2011. Fortunately, it ended up being a hit, and then some.
* A Song of Ice and Fire zig-zags this with Cersei Lannister and her son Joffrey. In spite of his being a sadistic little shit, Cersei always takes Joffrey's side on everything, acting as if he's blameless. As time goes on, however, Cersei acknowledges the cognitive dissonance it takes her to love him unconditionally.
* A Song of Metal and Marvels. As such, each book has standalone plots and antagonists that are notably distinct from the series' main conflicts:
* A song, possibly known as 'The Baby's Name', has which the chorus is: "The Baby's name is Kitchener-Carrington-Methuen-Kekewich-White-Cronje-Plumer-Powell-Majuba-Gatacre-Warren-Colenso-Kruger-Cape Town-Mafeking-French-Kimberley-Ladysmith-Bobs-The Union Jack-Fighting Mac-Lyddite-Pretoria-Blogs" or something to that effect.
* A song spawned by the fandom of the fic that the creator of the video versions was fond of.
* A Song to the Sun so she decides to go outside more. Alas her illness doesn't magically go away and she eventually dies due to the sun exposure.
* A song was cut and replaced with a second round of "Can't Buy Me Love".
* A Sonic Christmas Carol while discussing dark topics and ambiguous intentions.
* As only a sophomore in high school, Jean-Paul (Northstar) is this in the
* A son of Poseidon named Alirrothios tried to rape a daughter of Ares named Alkippe; Ares killed him, and was subsequently put on trial by the other gods at Athens' Areopagus (hence its name). Ares was acquitted.
* a son would easily fail, it would provide a fatal distraction at a crucial point in time.
* A Sony VX2000 camcorder with a tripod was seemingly the only camera setup used, making the film resemble a home movie. Two of the actors in the film were also credited as "cinematographers", suggesting that they hung around when not being shot to help manipulate the camera. The lack of a proper stabilizing rig makes any shots in motion very shaky and nauseating. All lighting is apparently whatever natural light was available, with one scene of Ben in a dark bedroom waking up being almost pitch black because of it.
* Asopides, the daughters of river-god Asopus, were frequent targets of this trope: Aegina, Thebe, and Plataea were kidnapped by Zeus; Corcyra, Salamis, and Euboea were abducted by Poseidon; Sinope and Thespia were carried away by Apollo; and Tanagra was kidnapped by Hermes. Asopus actually tried to prevent the abduction of Aegina but was shot with one of Zeus’ thunderbolts.
* as opposed to the sentient ferret he appears to be Unfortunately, we never hear what the other girls who went on the trip (and who also knew about Yuuno) thought about Nanoha's idea.
* A sorcerous duel between Belgarath and Ctuchik leaves Belgarath weakened to the point that Polgara fears Belgarath may have lost his powers, or worse, had just enough to kill himself when he finally does use them.
* A sore finger! (More so when phones had dials, rather than buttons.)
* As originally filmed, Joe was speaking to other "dead" people in a morgue. Test audiences found the scene ludicrous and it had to be hastily revised prior to public release.
* As originally opened, the line ran from Stanmore to Green Park, then turned east to terminate at Charing Cross. Following the line's opening, there were multiple plans towards extending the line onwards from Charing Cross, none of which came to fruitition until 1999.
* "A Sorta Fairytale", which is a touching story about a leg lady and an arm man falling in love, then transforming into full human beings.
* A sort of example: Douglas forces Martin to invent a story of how he escaped a polar bear with only an egg whisk and a pogo stick.
* A sort of extended variation of this trope is used for the doctor reacting to how Dan McNinja wound up on fire. "You. Lit. Yourself. On fire.
* A sort of French equivalent: Guernsey French, a.k.a. Guernesiais, spoken on the Island of Guernsey (a few miles off Normandy, but technically under the British

crown, though with independent government). It's said to be a version of the northern dialect of French people marooned there after the last British territory on the European mainland fell to France in the fifteenth century. It's also spoken with a heavy English Accent (most Channel Islanders these days speak English anyway), and so practically incomprehensible to modern French speakers.
* A sort of meta example since it wasn't mentioned in the film, but supplementary material reveals that
* A sort of third-person variant: Sara is dumbfounded to learn Oliver had no idea Mary attends physical therapy
* A soul stealing alien called Shauri not only speaks English, but is a
* A Sound of Thunder Also, apparently, no one bothered to preserve the DNA of animals before they went extinct. The protagonist has to use a self-made scanner to obtain DNA readings on animals in the past, in order to see if they can be cloned (he somehow gets readings on a lion despite the machine set to go to a time before lions even existed).
* A Sound of Thunder by Ray Bradbury, the titular sound is used to refer to three things: 1) The Roar of a Tyrannosaurus Rex, 2) The guns that kill said Tyrannosaurus, and 3) The sound that the gun makes when aimed at the Protagonist who destroyed the present by tampering with the distant past.
* A Sound of Thunder it affects the future is... jarring to say the least.
* A Sound of Thunder point and then go forward (if you guessed that no explanation is given as to why the time disturbance is somehow not blocking that too, you've been paying attention).
* A Sound Of Thunder sings "Red and black our banners wave/ As we march across the land."
* A Sound of Thunder (who describes him as "only slightly less stiff than the fossilized bones of the dinosaurs they hunt").
* A sourcebook on the drow explains that they're much more technologically-inclined than surface elves, since their natural magic resistance has taught them not to rely on spells over tools, and their ambition and tendency towards conflict drives them to innovate as much as humans. Over their history, drow inventors have come up with clockwork timepieces, moveable type, blackpowder, even steam-powered pistons. Unfortunately, a society defined by scheming, infighting and paranoia means that few drow innovators risk writing things down or sharing their breakthroughs, meaning the aforementioned technology has been lost and rediscovered over and over again.
* a source of serious abuse where he becomes fast friends with Jon Snow and all of Jon's friends.
* A South African ad for spice had a certain woman's cooking smelling so delicious, that the news anchor on TV started to sniff, went to the camera, and then told said woman he liked that smell. He even went "No, don't" when the woman changed the channel while freaking out. Later on,
* A South African state police force chasing Lozi separatist terrorists is drawn into a firefight with an
* A Southern belle, having moved to a big city in the north, visits a stationary store and asks for some rotten pepper. The owner tells her that he doesn't carry that sort of thing and directs her to the nearest grocery store. She thanks him and is about to leave; but then he asks, "If you don't mind the question, why do you specifically want
* A South Korean woman decided to inject cooking oil as a beauty treatment.
* A Southwest Airline pilot ranted to his co-pilot about the lack of
* A Southwest Airlines ad had a band playing a huge crowd that loved the show...until the lead singer yelled "THANK YOU DETROIT! WE LOVE YOU!" The crowd falls silent...and his guitarist says "Detroit was
* A Southwest Airlines commercial has a band playing to a room full of screaming fans, and the lead singer ends the set "Thank you, Detroit!". The room falls silent, the fans all look at each other in confusion, and another band member turns to the lead singer and says "Detroit was last night". Cut to the "Wanna Get Away?" tag line of the commercial.

* A Soviet fishing trawler engaged in espionage identifies itself as registered in Prince Edward Island, Nova Scotia. PEI is an entirely separate province from Nova Scotia.
* A Soviet spy pretends to work for South Africa to get a British official to reveal secrets. The British official was a staunch anti-Communist who felt that South Africa needed to know information to help fight the USSR and that South Africa was being denied information because of their "minor" problems with oppressing blacks. So he tells the spy classified information to help South Africa fight Soviet influence.
* A Soviet story "Engineer Alexeev's Mistake" is about a scientist who created a tiny galaxy orbiting Earth. When some time later he decides to shut it down, it turns out that due to time passing differently there, the galaxy has already developed an advanced civilization (with a communistic government, naturally), and managed to retaliate by putting the scientist in stasis.
* A Soviet woman named Larisa Savitskaya, though survived a somewhat smaller fall of 5220 meters, managed to stay alive in the taiga for three days, with a concussion, broken arm and a spine trauma, fighting off mosquitoes, animals and incessant rain before she was rescued.
* A space elevator enables the premise of Frank Schätzing's novel
* A Space Marine "Commander" is simply the highest ranked Space Marine in a force. If a Space Marine battlegroup takes
* A.S.P. Air Strike Patrol ending, all three meters have to be high, which is infamously hard to achieve — but it's worth it for the hero's welcome you're given.
* A.S.P. Air Strike Patrol will narrate the disastrous effects the war has had on your country.
* As Pandorym comes closer to freedom, an increasingly complex and visible sigil appears in the sky, and it becomes increasingly difficult to contact the gods or summon extraplanar beings; neither of which are a direct result of Pandorym, but rather the Gods of the world trying to quarantine it in the Material Realm (which the book acknowledges won't work).
* A Spanish teacher in a seminary school was talking about a river that originated in the Pyrenees, when an Argentinian student began laughing loudly. The teacher blushed and revealed he had said "orinando" rather than "originario," meaning instead of saying, "The river originating from the Pyrenees," the teacher said, "The river urinating from the Pyrenees."
* A Spanish version has two inmates arguing, each of them claiming to be the King of Spain "because God told me so"; a third inmate cuts in: "I've never talked to you guys in my life."
* A Spanish woman claimed ownership of the sun, and wanted to charge for all the people using it. As the article suggests, she seems to have forgotten the risk of being sued due to her property causing injuries and deaths via sunstroke and cancer...
* As parents know, a toddler with a sore throat can have the cutest little whispery-raspy voice - but the poor kid isn't feeling well, either.
* A sparkling wine flute containing a ring was delivered to Ted and Robin's table while they were on the first anniversary date, rather than the table next to theirs. When Robin sees it she yells "Noo, no no no no no no no, No! No, no no no, no, no, No!" The situation is soon cleared up, but Ted's alarm at Robin being so horrified by the prospect of marrying him sparks a serious talk about their relationship, leading to their breakup.
* A Spark of Genius end up in a relationship with Selina Kyle, a relationship she finds more enjoyable and straightforward than her one with Batman since Xander isn't bothered about her criminal activities and has a sense of humour.
* A Spark of Genius has him doing things like disassembling an entire village that is in the path of a volcano's lava flow and reassembling it several miles away within a quarter second.
* A Spark of Ice and Fire: Not just Agatha but Willas Tyrell. After studying Agatha's notes on aerodynamics, he manages to create a tiny but working airplane.

* A Spark of Ice and Fire. This is important in several ways as they choose to do this over the traditional way with the man draping his cloak over his bride, it symbolises Tyrion's growing preference for Agatha's culture over the one he was raised in, and the fact that the rings are Valyrian steel forged just for them by the Citadel are a symbol of just how valuable Agatha is to the Maesters.
* A Spark of Ice and Fire. With her inventions of guns and engines (to name a few), Barristan fears that the time of knights and honourable battle is over, while Jon believes he is simply too old to see the new world the brilliant Spark will create.
* A Spartan in Westeros, is left curled into a ball sobbing, thinking of her mom.
* A Spartan in Westeros, Master Chief investigates Brandon Stark's fall from the Broken Tower. The next day, when Tyrion swings by to discuss the topic, he instantly fingers Cersei and Jaime as the culprits. An initially-flippant Tyrion challenges him to prove it, so the Spartan shows him the foot, hand and fingerprints they left behind, a hair from Cersei, and drops of mixed sexual fluids, finishing by telling Tyrion he has Brandon's direct statement.
* As part of an experiment to increase Sheldon's feelings for her, Amy served him his favorite meal from when he was a kid: spaghetti with cut-up pieces of hot dog in it. It worked.
* As part of a plan to fight aliens with 'bring one back to life' über-technology,
* As part of a plan to get rid of Poof, Foop tried to have the Fairy Council declare Timmy Turner the worst godchild ever. (All wishes of godchildren declared as such are undone and Poof only came into existence because Timmy wished Cosmo and Wanda had a baby.) After the Fairy Council declared Timmy the worst godchild ever, Jorgen reminded Foop that, as Poof's Anti-Fairy counterpart, he only came into existence because Poof did. "If he goes, you go!" Foop then offered a dollar bill and asked if anyone could
* As part of a plan to steal Olive Oyl's heart, Bluto disguises himself as Superman and uses several tricks to make it look like he had Supes' powers. That includes wearing a metal plate under his costume and daring
* as part of a plea deal, as she had committed the murder at her husband's instigation.
* as part of a sponsorship deal. He gets there in time, though the sponsorship deals keep bugging him.
* As part of being taken to the Tower of London, John was made part of the tour there. Yeesh.
* As part of character creation, players are encouraged to have the GM do a Tarot reading for their characters. Cards that determine the past and present are used to flesh-out character background (sometimes giving the character bonus advantages as part of that) while the "future" card gives the player and the GM ideas for future stories involving that character.
* As part of drug education programs like D.A.R.E., many people who attended elementary school in the 90's were shown
* As part of her Hololive EN's six month anniversary, Gura reacted to her own debut stream. When the stream reached the point where past!Gura was talking about her fan art hashtag and fan base nickname and asking for suggestions, present!Gura started snickering so hard she had to pause the video when
* As part of her obsession with regaining her former sitcom fame, Baby Doll from
* As part of his act, the Russian comedian Maxim Galkin occasionally includes a (possibly apocryphal) story about his friends and fellow celebrities
* As part of his and Mariah Dillard's plan to manipulate the NYPD into buying
* As part of his thrill in screwing with every single person's head, Alucard from
* As part of Mickey's training to make him the perfect gentleman Minnie wants him to be in "
* As part of the Armenian Genocide, Armenians were marched to the Syrian desert, with large numbers being murdered, starved, robbed and raped along the way.
* As part of the backstory, Misato's father, Dr. Katsuragi, was manipulated by
* As part of the brainwashing both Chibiusa and Endymion go through at Servant Chaos's hands in

* As part of the brainwashing Chibi-Usa and Endymion went through in
* As part of the British counter-operation against the Kriegsmarine's
* As part of the California Bathroom Bill, which took effect in March 2017, both single-stall bathrooms that were originally labeled "Men" and "Women" would be turned into "All-Gender Restrooms". In many cases, it's the male restroom that would be turned into such a restroom, while the female restroom remains intact, regardless if the latter restroom is either single-use (only 1 toilet) or multiuser (at 2+ toilets). This would be up to the woman to decide if she wants to use the all-gender toilet (which is the former male restroom) or the 'women only' toilet.
* As part of their Mobile Support Goods (MSG) model kit lineup, Kotobukiya has a WORKING small chainsaw (Weapon Unit MW26, Dynamic Chainsaw) for their other plamo, like the Frame Arms and the
* As part of their process of absorbing a world's entire biomass, the Flood will convert the planet's atmosphere to one more suitable for expansion.
* As part of their symbiotic relationship with Stevland, a vast sessile
* As part of the negotiations that produced the arranged marriage Robb failed to actually have, Catelyn also promised her younger daughter Arya to Walder Frey's son. However, Arya never finds out about this arrangement and with everyone who
* as part of the older woman's annual gynecological examination, and Hana does it slowly, gently, and with a gloved and lubed finger; regardless, Tsunade still finds it pretty uncomfortable.
* As part of the same agreement Arya, his little sister, is promised to Elmar Frey. This is a rather dubious example, however, as Arya is on the run at the time and no one involved in negotiating the match even knows if she's still alive to fulfill the deal. Robb also wryly comments that "Arya won't like that [the marriage] one bit" and her other brother Bran says outright that she'll never go along with it
* As part of the same plan, the heroes have to stop a squadron of zombie SS commandos from attacking a Woodstock-like music festival in Germany, which is part of the Illuminati's plan to trigger World War Three.
* As part of the tasks they had to complete in the "stranded on an island with nothing but duct tape" episode of
* A special case in WWE, where heel Divas are as likely to scream out of rage as out of fear (not that the screams are any less annoying in the former case). Examples:
* A Special Day: Antoinetta the neglected housewife has sex with her neighbor, Gabriele, a gay man. Afterwards she is swept away, chattering about how great it was and how she can't wait to see him again. A weary Gabriele says that while he might be able to make love to a woman, it doesn't change anything.
* A Special Day: How we learn Gabriele is gay. His long talk with the person on the other end of the phone, obviously his lover, ends with him addressing the other person as "Marco".
* "A Special Edition": A guy appears on a talk show to present evidence that the government is performing illegal cloning experiments. The government cuts off their signal and sends armed thugs into the studio. The guy, cast, and crew try to escape, but are eventually captured. A clone of the guy appears and gives a fraudulent report that "disproves" the guy's evidence. The clone mocks the protagonists, claiming that the masses are stupid sheep who believe anything they hear, so his fraudulent report is already making them forget the truth. The guy, cast, and crew are all shot to death by the clone.
* "A Special Edition" had a talk show host interview a man who claimed to know of a conspiracy which replaced prominent figures with clones loyal to the creators. At the end of the episode, the "conspiracy nut" is killed, at which point the shocked host sees a duplicate of himself wearing the same clothes. The final scene is a report by the clone who dismisses the claims of the "nut" who has "
* A special ending, wherein Markus is out of the picture and North dies will see
* A special example of this type is Tony Tony Chopper, a reindeer who ate the
* A special exemption was made for "light" olive oil: it still retains its label, and it still has the same caloric content as any other kind of oil — lots,

since it's a type of fat. The term refers to its taste and colour: it has a more mild flavour and tends to be a pale yellow-green rather than the deep green of stronger oils. It's not much good on taste, but you can use it for higher-temperature applications than the stronger stuff.
* A special font, Starfleet Bold Extended, was created for the forward-facing hull registry on the primary saucer, and was used on nearly every Starfleet vessel in a film or series set after
* A special instance is the Indian tale of Urvashi and Pururavas, which is the Quest for a Lost Bride; however, the prohibition he breaks is that at night — with the aid of a lightning flash provided by her sisters who want her back — she sees him naked, when seeing the husband at night is usually from
* A special issue that deals with a teenage boy being "outed" as a mutant. After training to control his powers, he goes home to find that his parents, originally rejecting him, have finally accepted him; that the girl he had a secret crush on is now interested in him; and that his oldest friend since they were babies has shut him out completely. Hmmm...
* A special issue that dealt with a teenage boy being "outed" as a mutant. After training to control his powers, he went home to find that his parents, originally rejecting him, have finally accepted him; that the girl he had a secret crush on is now interested in him; and that his oldest friend since they were babies has shut him out completely. Hmmm...
* A specially tailored uniform (for reasons other than purely utilitarian ones
* A special material in the second movie has the capabilities of producing infinite free energy, and served as the foundation of an ancient civilization, that was gone since then. In the climax, the mines where this material is found begin to collapse, threatening to wipe out the entire continent in one giant explosion. Hmm.
* A special mention goes to Agent Texas and Carolina — like most freelancers, they just look like normal soldiers (albeit in armour) but are exceptionally fast and hard-hitting, even amongst their fellows.
* A special mention should go to the fact that Hot Shot, unlike the many other Velocitronians who were racing for planet-wide supremacy, did not even know that leadership was the prize for winning the race and he won thinking there was nothing to win. He just likes racing.
* A specialty of the Zuul (whose species name means "pirate" in their own language) in
* A special type of instant noodles from the webcomic "The Junk Hyenas Diner" by the same lady who made
* A species called the yahg were discovered a few decades before the series began, and an emissary group was sent to make
* A species of date palm known to have gone extinct in the wild ~1500 years ago has been revived when Israeli researchers planted a seed recovered by an archaeological expedition. Unfortunately, the resulting tree is a male and so can't produce seeds of its own.
* A specific character confirmed to be human by Mortis Ghost is Enoch, the boss of Zone 3, who is even weirder than the regular workers. He first just looks like a really fat Elsen with black dots on his cheeks, until he starts
* A specific dialog choice when asking Kaidan about his past will have Shepherd indirectly, but pretty obviously, ask if he and the other teenagers in biotics training coped with boredom, loneliness, and home-sickness with mutual masturbation; Alenko replies that it's not the sort of thing he does "lightly". That is a possible interpretation, though Occam's Razor would suggest Shepard thought they were hooking up and having rather than engaging in
* A specific example comes to mind when, in one story, his subjects demanded that he obey an ancient law and step down as ruler of Latveria in favor of Prince Zorba. Doom's reaction was less than gracious:
* A specific example from the series' backstory is Emperor Tiber Septim,
* A specific example in soul society of bending the rule that meant they couldn't 'fly' in the first place - the
* A specific example: in the episode "The Man in the Bottle", an old couple uncork

a genie who can grants wishes, but warns of the price to them. When the couple figures out to carefully word their wishes, the husband wishes to be a leader for life in a modern European nation, but he still messes up when the genie gleefully turns him into
* A specific example is Horizon, a colony in the process of being abducted by the Collectors. It's a beautiful, summery day and the colony looks like any prefabricated community, a place where people live, farm, work and sleep. And then you come across humans frozen in place in the process of fleeing, falling, screaming, hiding, trying to help each other...and then you
* A specific example is the nobility during the reign of Aegon V. Aegon was one of very few kings in Westeros who considered the smallfolk worthy of consideration and maybe getting slightly better lives. During his rule, he instigated several reforms meant to improve the condition of the working class, such as labor laws, but this made him immensely unpopular among the nobles. Even when he attempted to appeal to
* A specific example is the Pekingese, a dog that Chinese Emperors used to keep inside their sleeves. If the dog bit someone who had been granted an audience with the Emperor, it was a sign they were untrustworthy, which usually meant execution.
* A specific example of this would be the prosecution of the staff of the Hadamar Clinic, a children's clinic where mentally and physically handicapped people were murdered. After Hadamar was occupied by the US army they attempted to prosecute the staff for murdering children but found that since the children were German citizens they had no jurisdiction. Following an investigation however they discovered that a few Polish and Russian adults had also been killed there, giving them an excuse to try the staff for war crimes.
* A specific example spawned from the normally-unobtainable Digivolution items is the Moon Mirror, which is supposed to digivolve your partner into WereGarurumon but actually does nothing. According to rumors, the item actually partially worked in the original Japanese release of the game, but only when used on a Garurumon (
* A specific example that's given of what constitutes a "palpably unfair act" is the defense repeatedly committing penalties near their own goal line to prevent scoring. "Half the distance to the goal" is a trivial penalty when the distance to the goal is only about a yard. But if a team is deemed by the referees to be doing this intentionally on multiple plays in a row, they can give the offensive team an automatic touchdown. In the NFL, this can only happen for fouls committed after the officials warn the defense that they're suspected of intentionally fouling.
* A specific example would be Saul of Tarsus, better known as Saint Paul the Apostle. He began as a notorious persecutor of the earliest Christians, who was knocked to the ground and struck blind by a vision of God on the way to Damascus (
* A specific in-universe example is 'Main Street', containing buildings like Tom's Rhinoplasty and Photo Dojo, which are often seen in the background outside but rarely used in the show anymore. Distance shots often show only a single strip of familiar buildings, but modern scenes often show buildings on both sides of the street and cross-sections, and incidental locations are often suggested to be on the same strip of buildings.
* A specific show (or work) exists, which obscures the fact that the events in it are real.
* A specific type of dangling modifier is a dangling participle. "Robbed of my wallet, the man decided to lend me some money." would mean the man, not I, was robbed.
* A specific variant of cancer cultured in a lab called HeLa (a contraction of Henriette Langer, its
* A spectacle from Dieudonné was banned after the state convinced the
* A spectacularly successful example was the wrongful imprisonment of Deidre Rachid in
* Aspect Book: Wood was in a sexual relationship with his mother from the age of eleven. He Exalted — and went utterly insane — upon witnessing her death. These days, he's in the habit of having children brought to his manse, dressing as his mother, giving the children toys and sweets to win their trust, and then violating and strangling them.

* Aspect of Crow job is to recover these pieces and give them back to their owners.
* Aspect Ratio Switch in cinematic history. This three projector system would be imitated 25 years later with the Cinerama system.
* Aspect Ratio Switch - Intentionally changing aspect ratios, for example from 4:3 to 16:9
* A Spectre Is Haunting Texas: The hero is from the Sack, an extension of a satellite inhabited by American and Russian scientists who chose independence after the collapse of Earth, which is in turn inhabited by actors and other hipsters who make a living providing entertainment to the scientists. The Sack-dwellers are divided into Thins, who are tall and skinny, like the hero, or Fats who are short and fat, both due to low gravity. A major plot element is the hero's inability to function in Earth's gravity without his titanium exoskeleton.
* Aspects of Love includes a particularly cathartic and pathetic one from Rose in the finale.
* Aspect Warriors (Eldar) dedicate every single conscious moment of their lives to training for a particular aspect of war, also utilizing the second-most advanced technology in the setting. Despite being of only average human dimensions, they can generally go toe-to-toe with the above-mentioned Space Marines.
* a speech to the Springfield, Missouri City Council-gay stance halfway through.
* A speedster who's so good that time-stops merely slow her down to moving as fast as he does.
* A spell capable of doing it is used against Richard in the first book. The spell could have crushed him, although it's also poisonous (in his case, it was intended for capture, not killing). He manages to change it so that the caster is crushed to death instead.
* A Spell for Chameleon novels, the first time Bink encounters Magician Humphrey.
* A Spell for Chameleon, the hero encounters a sorceress who is a master of illusion magic. She attempts to seduce the hero by making herself appear as a beautiful and buxom young woman (when in reality she is far less attractive).
* a spell his own family placed on him to prevent him from discovering his sister's supernatural abilities. As of the same chapter, said spell is no longer in effect so his skepticism is gone.
* A spell of sorts brings everyone to a parallel universe with role reversals: Regina becomes a Snow White expy (and vice versa), thus a bandit, archer, sword fighter and so on, enforcing this trope in full.
* A spell that enables Twilight (or presumably any other pony) to appear in books is prime for fandom exploration.
* a spell which makes you relive previous incarnations gives Harry and Hermione the personalities of Godric Gryffindor and Helga Hufflepuff. After they exit and came back again Harry, now sporting a goatee, claims to be "Salazar Slytherin" while Hermione, in glasses, announces herself as "Rowena Ravenclaw." When a Muggleborn first year is the only one to recognize them, "Rowena" and "Salazar" comment that they needed four teachers for the school and that "Wizards and witches may have a lot of power, but they don't have a lot of common sense."
* As penance for an accidental murder, Heracles was made to serve Omphale for a year, doing women's work and even wearing women's clothes. Artwork of the two usually features her wearing the hero's iconic lionskin and club.
* Aspen MLT, a comic book company founded by Michael Turner, continues to put out comics, even though Turner himself died in 2008.
* As per canon, Giovanni is this. To the outside world, he's just the benevolent, if somewhat demanding, leader of the Viridian Gym. A sidestory reveals that the Pokémon G-Men are aware he's the leader of Team Rocket, but have been unable to find decisive evidence to expose him.
* As per canon, the entire reason the White Council exists, according to Ebenezar McCoy, is to hold this attitude in check among wandless Wizards (as it often leads to dark magic) and protect ordinary humanity from those less pleasant species that would use and abuse them, which is also why they often stay aloof of mortal disputes (for one thing, grudges and feuds can last for centuries with ordinary human lifespans. Wizards live for most of half a millennium). It's also the reason

they heartily dislike/are wary of Doctor Strange, who has absolutely no qualms about getting involved in mortal politics, and persuades, manipulates, or outright bullies pretty much everyone into doing what he wants - he is, after all, the key representative of unchecked power. While Strange has his own, largely justified, reasons for what he does, you can see the Council's point.
* As per canon, the testing sites for the U.A. Entrance Exam are littered with cameras for the proctors to observe the students with.
* Asperchu becomes a rampaging self-parody when he's turned into a fictional drawing, with literally no exaggeration whatsoever.
* Asperchu is simply "I'm going to hell for this." Said page uses pictures of Ground Zero to represent a collapsed building, while the next page ("Straight to the depths of Tartarus") explains that the comic's villain deliberately crashed his plane to destroy the structure.
* Asperger Adventures, Ben and Andy find a corked blue bottle while digging in the garden. They make a series of wishes, not expecting any of them to come true. They start to come true anyway, and every time, a puff of smoke comes out of the bottle.
* Asperger Adventures, Lisa shows Granny May her mouse Paddy, thinking she'll be interested. Instead, Granny May screams and drops her teacup.
* Asperger Adventures, Lisa, who seems to be about twelve, befriends Granny May's sister Hannah, who is somewhere in her eighties. It's implied that Hannah has Asperger syndrome as well as Lisa, so they get along well.
* Asperger Adventures. Now most of the people involved have been dead for decades, so Hannah has no way of setting things right.
* Asperger's Are Us are a comedy troupe consisting entirely of people with Asperger's.
* Asperger's Syndrome can also vary in severity, from barely noticeable to outright debilitating. On TV, it's always the most severe level.
* Asperger's Syndrome: The frequency of this disorder is uncertain (estimates from various studies range from 1 in 250 to 1 in 5,000), and diagnoses have increased in recent years, but it's likely not as common as it may appear to be on the internet. Tends to get dredged up by writers who do not realize that genius does not equate Asperger's or vice versa.
* Asperger Sunset, Baldy throws Russ off a bridge just upriver of a dam. Russ fails to get to shore on time, but manages with difficulty to get through a sluice without dying.
* Asperger Syndrome. Although it's conquerable, a lot of people with this condition remain quiet for many reasons but mainly out of fear for saying the wrong thing.
* Asperger Syndrome are noticeably different from his conception of the condition.
* Asperger Syndrome. Because they are much more socially naïve than most people, they tend to fall into this while talking. It may take longer for them to realize it, too, because they often have trouble reading others' facial expressions—in fact, unless there's a more obvious cue (such as someone bursting out laughing), they may not realize their mistake at all, and even then they may not know what, exactly, the problem is.
* Asperger Syndrome end up like this, or on the complete opposite they overcompensate and ham it up a lot.
* Asperger Syndrome. Even after being taught to distinguish metaphors and idioms from normal conversation, they will still tend to think of the literal meaning before interpreting it, just as one would with a foreign language. Many people with Asperger's have been fascinated/obsessed with learning the meanings of different idioms at some point in their lives.
* As per his comics and MCU selves (see appropriate folders), this is one of Steve Rogers' greatest abilities. Whether it's a one-on-one duel or leading
* As per history, Griboyedov's corpse is torn into pieces and mutilated in other fascinating ays while being paraded across Tehran by an angry mob in
* As personal remote control drones became cheaper, easier to fly, and gained increased range in the late 2000s/early 2010s, significant concerns were raised that they would be used for spying and peeping. Sitcoms made it seem like the skies would be inundated with drones (for example, this was explored in an episode of

* As per the RPG rulebook, anyone with some magical talent gets some sensitivity toward others' supernatural natures, particularly with physical contact. While
* As per usual, Doctor Octopus is a super villain who is also a brilliant engineer and inventor. He goes the extra mile by having "Evil Genius" printed on the side of his coffee mug in
* As pesticides and herbicides began to grow in popularity, many industrial chemists began inventing chemicals and blindly testing them simply to find a better one. These tests were limited in scope and simplistic as well; if a chemical killed an insect, it was an insecticide, a plant, an herbicide, a man, a chemical weapon. Sometimes these overlapped; the most (in-)famous cases are some of the insecticides developed in interwar Germany, which turned out to be
* As Phoebe pauses in her attempt to mediate an argument between Chandler and Joey's chick and duck, Ross notices that the duck has done its business all over an angry letter he has written to his ex-wife Emily. He stops midway through yelling at the duck when he decides it actually enhances the message he is sending. Then he puts it an envelope, licks the seal - and grimaces in disgust.
* A spider showed up with a lawyer and a restraining order against Garfield, who was smiling because he'd "never squished a lawyer".
* A spike-filled one is one of the traps found in the grounds of the Iga ninja dogs in
* A spinning front page of the Smurf Village newspaper can be seen in
* A spin-off of the series, who also qualify for this trope. However, 5pb. is nowhere to be seen.
* A Spinosaurus kills a Tyrannosaurus. Same sound effect even. One of the raptors also performs this trick on the last remaining mercenary.
* Aspirin (acetylsalicylic acid): the Bayer company lost the trademark in most Allied nations shortly after World War I as part of war reparations, but holds it in
* Aspiring artist allowed to post bail for illegal drug use if he comes to court for three days to draw lawyers
* Aspiring Champion instead. If the sacrifice was killed before the daemon could manifest, then the Daemon could still possess his flesh, but the necrotic corpse cannot sustain the daemon for long (which is represented by the daemon having to take instability tests every turn and losing health every time he failed, until he died).
* aspiring middle classes. Thus feeding the American media, but not a product of it. Vernon may be stuffy and concerned with appearance, but he is very much not reserved, and is implied to be telling raunchy jokes in mixed company with his 12-year old son around.
* Aspirin is kryptonite to cats. This article even acknowledges the trope.
* a spirit can detect other spirits too, and the puppy is actually the little leaf spirit she meets in the Tree of Life.
* a spirit of laziness and apathy that possesses an abandoned baseball stadium. And is actually capable of causing a Total Party Kill
* A spiritual successor under the same name puts you in the shoes of an expert safecracker, hired to find the will of Duncan W. Adams , oil conglomerate CEO who had a serious passion for designing safes just as strange as Crabb & Sons'.
* A spit-take is surprisingly (or disgustingly) avoided in the second
* As plane-spotters or people who live close to airports can tell you, a milder version of this trope can often take place when under certain wind conditions aircraft must take off from a runway usually used to land... causing them to fly over houses when they're still climbing with their engines at full throttle. Even if they already are at a height of several hundred feet, if not more, the effect is quite dramatic -and twice or more noisier- for big planes as a Boeing 747 or an Airbus A340
* A splashing of chemicals prompts good-natured vegetarian Beast Boy to turn into a surly, meat-chomping bad boy who later turns into an anthropomorphic wolfman that was capable of taking on the entire team (as well as another wolfman). Later it's explained that, instead of turning Beast Boy into an actual lycanthrope, the

chemicals only unleashed what was already there (which makes no sense considering that
* as playable characters, who also appear as a friendly faction with settlements in the frozen areas.
* As Playing Villains showed up as 'guy who got run through with a pitchfork in the first few minutes of the episode').
* A "splendid example" of the kind kicks off the action in Barry Hughart's
* A spoilery example to back that up: Hatsumi is so spectacularly doormat-like that she actually
* as pointed out by Lisa, Homer was only paying $5, so regardless of whether it's a percentage or just $5 per person, it was the smallest tax hike in history.
* As pointed out by William E. Fairbairn (who, as a policeman in 1930s Shanghai, one of the deadliest
* As Poland fell, they sent off to the UK their work on breaking the German codes. This has been portrayed as a dying man flinging his sword to his ally, so they can continue the fight.
* As Ponyville Town Hall transforms into a portal to the void, it becomes spatially inverted.
* As popular as the characters ended up being, the show's introduction of Shining Armor and Cadence—the focus characters of the Royal Wedding toyline—is quite forced. Their debut in the Season 2 finale requires the viewer to just accept that Twilight Sparkle has had an older brother and a

* As revealed in Chapter 482, Karin fell in love with Sasuke after he saved her from a bear in a Chuunin exam she was taking.
* As revealed in Chapter 498, Naruto's mother, Kushina, fell in love with Naruto's father, Minato, when he saved her from the Kumo ninja that kidnapped her when she was a kid, and then
* As revealed in "I Just Don't Get It", June had knee-length hair in her audition tape.
* As revealed in the credits, the name of Juno Temple's character in
* As revealed in "The Tomb" (much to O'Neill's disgust), the Russian teams sent through the Stargate were each given a cyanide pill in case they couldn't return.
* As revealed in "Total Drama Drama Island", Lindsay is not a natural blonde. Judging from her eyebrows, we can assume her natural hair color is either black or dark brown.
* As revealed near the end of the act, Akua and Kahlua aided Kiria in his plan to rewrite history with the Chrono Displacement spell, intending to give their father Issa a top spot in the new world once humanity is subjugated. In the final chapter, it's revealed that Kiria's plan would ensure that
* As Richard Carrier memorably put it: "God needed blood to fix the universe, but only his own blood had enough magic so he gave himself a body and killed it".
* As Richard is the one who says the line, it is rather bitter/sarcastic. The full couplet translates as "things are looking up, I'm going to murder my brother."
* Asriel displays this to a decidedly unhealthy degree towards Chara in
* Asriel moments in their past (Asgore's sweater, for example), and (if they are the narrator) are helpful, love dogs, and generally good-natured-if-snarky on the Neutral-and-better routes.
* AS-RobotFactory is another subversion: it's a "Liandri vs. The Corrupt" match, however it takes place in the Tough tier, two tiers below The Corrupt's Godlike tier, not to mention... the Liandri Corporation itself is backing the The Corrupt team.
* Assablanca to a friend's stag party only for the men to be horrified that it was partially recorded over by a documentary about The Statue of Liberty.
* As said above, a similar scene on a different route plays the trope straight, and
* As said above, many want to reverse-engineer the masks, but the closest anyone got was masks that would resist a few hours before melting (Diabolik solved this problem).
* As said above, Minako is the clearest example, as in all continuities she puts it well above her dream to be an idol and her love life: in the anime, where the element is at its lightest, an episode showing her choosing her duty over her love

life and another having her placing her duty over the dream of being an idol (the above incident where Yaten berated her. Turns out, Minako not only just wanted to see if she had the ability to pull it off
* As said above most people do this for many reasons especially children.
* As said above, the actual phrase "masquerade" appears in Heinlein's
* As said before, Jewish humor and political humor often goes hand in hand in Russia. A notable example is this:
* As said in comics, any game that has the option of the black suit has it as this. In games such as
* As Sanders and his ideology became more mainstream, Republicans began to use this line of attack to criticize not just Sanders but the Democratic party as a whole. Some moderate Democrats even tried to use this tactic in an attempt to frame Sanders, and to a lesser extent Elizabeth Warren, as an existential threat to the Democratic party...
* ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass ass
* Assassin and terrorist Carlos the Jackal, so much so that he got his nickname from a fictional Master of Disguise and
* assassinate Adolf Hitler by erasing him from history in Landsberg in 1924 and prevent World War II. The Soviet Union under Stalin then develops into an unstoppable war machine in the European power vacuum, causing World War II to happen anyway, just a decade later and with some sides changed (Germany heading up the Allied forces, Russia fighting them on its own, and Japan and the US not getting seriously involved).
* assassinate Cleveland Jr.'s character by the time he finishes his sentence.
* assassinate several main characters — because he's been sent from the future to stop them from causing The End of the World as We Know It
* assassinates Omar after seeing him hobbling on crutches and being disappointed at how the legend appears in person.
* assassinate Stillson to prevent his visions from coming true. He fails, but Stillson's reaction - using a child as a human shield - kills his political chances. A final vision shows that Stillson will commit suicide not long after.
* Assassination (1987) has a scene when the first lady of the United States insists on riding in a open top convertible car. He replies that the last time the Secret Service allowed one of its "protectees" to ride in a convertible, it was JFK in Dallas...
* Assassination Attempt: An attempt is made at taking an important person's life.
* Assassination Attempt: A specific individual (such as a high-ranking mobster) gets targeted for murder.
* Assassination Attempt: Government officials and political activists of all kinds tend to attract enemies who want them to be killed, sometimes successfully.
* Assassination Attempt: Terrorists will often try to kill any important figure whom they believe to be an enemy to their cause.
* Assassination Attempt: When someone tries to kill a particular targeted person (usually an (in)famously notorious individual), and they may or may not succeed in doing so.
* Assassination Classroom: After Maehara was humiliated by his ex-girlfriend and her new boyfriend in chapter 23, the rest of Class E decides to avenge him with this trope in the next chapter. Okuda prepares an extremely powerful laxative (Which she dubs "Victoria Falls" with a rather worrying face), and has the class's snipers shoot it into the couple's coffee cups. A disguised Nagisa and Kayano deliberately occupy the café's only toilets, forcing the couple to run to a nearby convenience store, with more students cutting branches right above them, causing them to fall onto the boy and girl; leaving them drenched and disheveled from the rain, and bickering to each other the rest of the way. It was a resounding success, leaving them humiliated and none the wiser about Class E's involvement.
* Assassination Classroom and becomes more snarky, while Yoshida's interests for vehicles eventually leads to him crafting some of those. Similarly, Hazama who was also hanging a lot with the delinquent trio also has become more distinct and her

interests for dark literature and dark writing is often used for some jokes.
* Assassination Classroom and Class 3-E's foreign language teacher, is a rather benign example (she's not evil, just somewhat bitchy and temperamental) whose career began when she was orphaned and traumatized during the Yugoslav Wars.
* Assassination Classroom and detailed guidebooks of Kyoto Koro-sensei prepared for his students aren't just helpful to know what to do when a bunch of thugs kidnap your friends. They're also good for bonking said kidnappers unconscious.
* Assassination Classroom a pervert, there's no way he'd do something so low as stealing underwear, as losing his students' trust would be worse to him than dying. So they decide to investigate in order to find the real culprit and clear their teacher's name.
* Assassination Classroom are already on the way to become this trope.
* Assassination Classroom, a Southern Slavic assassin specializing in seduction.
* Assassination Classroom assassin, becomes the students' foreign language teacher after her initial attempt on Koro-sensei's life fails miserably.
* Assassination Classroom, but instead fascinated the young child, as the hitman's movements were so graceful and perfect (And granted, the fact that the boy's father was an abusive asshole probably helped). The boy asked the assassin to take him as an apprentice on the spot, and eventually grew to become the world's best and most feared hitman himself.
* Assassination Classroom Chapter 180.1 and daughter of the owner of a diner Koro-sensei frequents, looks like Nagisa if he had longer hair and was actually a girl.
* Assassination Classroom: Class 3-E celebrate the anniversary of the moon explosion as Koro-sensei's birthday, so they get him a cake and sing Happy Birthday to him. Terasaka refuses to join in, claiming it to be "some bullshit", but is pinched into singing along by class representative Kataoka. They also sing the song in the English dub, which was released soon after the Happy Birthday song was deemed in the public domain, but that doesn't stop Terasaka from lampshading the trope:
* Assassination Classroom: During the battle in the concert hall, Gastro cranks up the stage lights behind him so that the kids can't aim their guns at him properly.
* Assassination Classroom etc.), it's his most common for avoiding his students' daily attempts on his life, and he just as often uses it to get shaved ice from the North Pole or Chinese food from China during his lunch break.
* Assassination Classroom: Generally, all professional assassins have very odd quirks. Many of them come from outside of Japan, and some of their behaviours are played for laughs.
* Assassination Classroom goes from one side to the other whenever it feels like it. At times it occupies both sides of the scale simultaneously. And it works.
* Assassination Classroom: Half of the plot is that Korosensei is determined to cultivate Kunigigaoka's E Class, the class of outcasts and ne'er-do-wells, into students knowledgeable enough to take out the A Class, the all-stars with the highest grades, with Principal Asano's son as the school's #1 student.
* Assassination Classroom has the crescent moon on Koro-sensei's tie. It's often used as a reminder of just how powerful Koro-sensei is.
* Assassination Classroom. He has near god-like speed, regenerative abilities, immunity to poison, and is inhumanly perceptive. Whenever someone apparently drives him into a corner, he always pulls another trick up his sleeve to escape (which he keeps deeply concealed within his plot armor).
* Assassination Classroom him to reduce his concentration and seal off possible escape routes.
* Assassination Classroom. However, once it finally did, it's been a fixture on the New York Time's bestseller lists, so it's safe to say it's done well despite all the fears.
* Assassination Classroom. Hunting a Bully who was academically gifted in defense of a student from the lowest class got him kicked down to Class-E as well... where he is now thriving in learning assassination techniques to add to his arsenal.
* Assassination Classroom: If you're attractive (or at least ordinary) without looking downright creepy, then you're likely a member of Class-E in one way or

another. The only exception to this seems to be Koro-sensei and the four 3-E delinquents (not counting Karma). It's even lampshaded when two girls in a higher-ranking class note that 3-E's PE teacher, the young government agent Karasuma, is rather attractive, and that all of the guys and teachers in their class are ugly and mean.
* Assassination Classroom: In the epilogue, it's shown that Kayano has taken to doing her own stunts in her films, using the skills she picked up during her time in Class E.
* Assassination Classroom. In the final test of the series, he gets a perfect score, having studied in order to beat his rival who is both brilliant and a hard worker.
* Assassination Classroom is out to kill Koro-sensei, an unstoppable octopus who will destroy the world if he isn't killed within a year. Expect every assassination attempt on Koro-sensei's life to fail miserably and hilariously if the plan is explained to the reader beforehand. The most successful attempts, which merely injure him or catch him off guard, have always been kept as a surprise to the reader until the last possible moment.
* Assassination Classroom, Itona introduces himself by plowing through the wall to enter class. When everybody complains, he says he wanted to show off his strength.
* Assassination Classroom. It's rather hard to tell how he's keeping himself off the ground.
* Assassination Classroom, Karma, as a result of his character glitch, is on the receiving end of this effect whenever he talks down to people. This happens often.
* Assassination Classroom Kayano uses a library book to hide the "Puddings of the World" book she's actually reading.
* Assassination Classroom. Koro-sensei already destroyed 70% of the moon, and if Class E can't kill him within a year, he'll do the same to Earth.
* Assassination Classroom. Koro-sensei draws a short comic that is presented as if it were this to Kataoka to warn her that she may grow up to be dangerously codependent if she does not learn to stand up for her own needs more. It's much funnier in the manga than how it is described here.
* Assassination Classroom, Koro-sensei is completely immune to lead bullets. As Irina, one of the other teachers of Class 3-E and a trained assassin, finds out, lead bullets simply melt inside Koro-sensei's body without injuring him.
* Assassination Classroom loaded with all kinds of information. For example, his guidebook of Kyoto he prepared for the school trip there contained info such as maps, popular sightseeing sights, Kyoto's Top 100 souvenirs, what to do if a five-story pagoda collapses, coping with food that accidentally gets stuck in your throat, "How to comfort yourself when seeing couples flirting by the Kamo river makes you feel lonely", and more seriously, what to do when a friend has been kidnapped.
* Assassination Classroom, Matsui's previous work, while a message encouraging the viewer to pick up the 12-volume compilation scrolls through the background. This does not go unnoticed by her friends.
* Assassination Classroom movie subjected this to a lot of characters, including Nagisa and Kayano. Karma, oddly enough, still has his red hair.
* Assassination Classroom must also run through one to reach the main campus for an assembly. The course entails crossing a river, dodging boulders, snakes, and Bee Hives. The real kicker is they have to make it there and line up before all the other classes.
* Assassination Classroom of the kinds of stunts he pulls because they can't move at super speed, don't have perfect memory or genius level intellect, can't memorize dozens of textbooks and can't hold multiple conversations at once. Nor can they be everywhere at once to stop bullying or attacks. It may be perfectly true that the Japanese educational system is deeply flawed in many respects, but expecting a human being in charge of dozens or hundreds of students to be able to keep up with Koro-sensei is impossible.
* Assassination Classroom. Once Koro-sensei knows how to defeat a tactic, he's smart enough and aware enough that it will never have a chance of working on him

again.
* Assassination Classroom on him and trying to force him down the path she had set for herself.
* Assassination Classroom, only really ever targeting those who harass others or threaten either himself or his classmates.
* Assassination Classroom: On March 13th of the next year, Koro-sensei plans to blow up the Earth. The students, along with the handful of people aware of the threat, only have a year to kill him.
* Assassination Classroom: On the newspaper page with the baseball player being attacked by Koro-sensei's tentacles, there's a side article captioned by the quote "My wife is a slut".
* Assassination Classroom play "assassination badminton" in PE class, which is actually more like volleyball in almost every way. The main differences are that they can only touch the ball with the blade of a knife, and they use a tennis net instead of a badminton or volleyball net.
* Assassination Classroom, really likes licking, tasting and biting his guns. He has been seen holding a pistol in his teeth with the barrel pointing into his mouth, and even using a pistol as an eating utensil.
* Assassination Classroom: Ryunosuke Chiba and Rinka Hayami are the most stoic and serious students in Class E, and they stand out as the class's best marksmen (the former for long-range shots and the latter for moving targets).
* Assassination Classroom. She's the only girl in her class who wears glasses.
* Assassination Classroom so they will avoid failure by any means necessary. He created Class 3-E for this purpose. Formed by students who either failed to keep their grades up or were punished for breaking regulations, they're the pariahs of the school and the rest of the students as well as the faculty are encouraged to threat them like trash. Effectively, Class 3-E's role is to demonstrate what happens to the people that are labeled "failures" by the system.
* Assassination Classroom so they will avoid failure by any means necessary. He created Class E for this purpose: to show everybody what happens to the people that are labeled "failures" by the system.
* Assassination Classroom - spacecraft. When Isogai asks who wants to go, almost everyone raises their hands despite being told that only two people could board the craft. Koro-sensei then reminds everyone that the technology is still experimental. Instantly everyone's hands go down.
* Assassination Classroom specially made to kill him. The whole series is about his class trying to kill him, after all.
* Assassination Classroom starts off with Koro-sensei casually dodging a heavy barrage of gunfire from his students while he calls out each of their names to take attendance. When one student fails to answer back, Koro-sensei politely asks him to speak up over the sound of the gunfire before resuming the roll call.
* Assassination Classroom that "someday, somewhere" her body type will be considered desirable.
* Assassination Classroom. The anti-sensei material is cheap and easy to produce in large amounts, so Class 3-E and all the other would-be assassins introduce it to Sensei's life as much as possible in all forms, from bullets and knives to pudding and henna tattoos.
* Assassination Classroom: The best assassin in the world, the Reaper (a.k.a. God of Death), wears a black longcoat, as a modern allegory to the traditional Grim Reaper cloak.
* Assassination Classroom: The Japanese river otter, declared extinct in 2012, appears in chapters 56 and 88.
* Assassination Classroom, there seems to be a narrative event horizon between the major action parts of the story and the rest of it. No matter how many times or how seriously the kids are threatened with death, they shrug it off afterwards with nary a mention.
* Assassination Classroom the speed of sound, twice the speed of sound would be Mach 2, and Mach 20 is twenty times faster than sound.
* Assassination Classroom, the students are thrown into a coliseum where they must

slay a hoarde of gigantic, surreal monsters within a short time limit. In reality, they're just sitting in a chair, taking an exam on a piece of paper.
* Assassination Classroom, the students wear casual street clothes instead of their typical school uniforms on the first day of their vacation. On the following day, they've already gone back to wearing their P.E. jerseys. Two of the students explain that they're both comfortable and that "it would cruel to have to think up clothes for a second day". The context implies that it would be hard for the mangaka to have to think up new clothes to draw for each of them.
* Assassination Classroom. The tentacles are usually used for more mundane things, though.
* Assassination Classroom, the two young boys at the nursery act unusually mature for their age.
* Assassination Classroom. They also make it impossible for them to make it to a bathroom, either discretely or in time.
* Assassination Classroom, they decide to do their own version of Momotaro, which starts with the old couple discovering a child is developing in a peach... only for the old man to boast of using the peach to get fame and fortune for himself, which finalizes the wife's decision to divorce him on top of his cruelty and adultery. It ends with the old woman raising the peach on her own while the old man trains a dog, a monkey, and a pheasant as his attack animals.
* Assassination Classroom used against him since they disintegrate his cells on contact, so he catches it with two pieces of chalk instead. However, he can catch typical anti-aircraft missiles with no problem.
* Assassination Classroom will end as soon as someone successfully assassinates Koro-sensei. Of course none of the assassination attempts shown in the first hundred chapters or so are going to work.
* Assassination Classroom with regards to Irina Jelavic, a Serbian assassin who teaches English for Class 3-E.
* Assassination Games, Brazil has no emotional affect, is obsessed with maintaining his house in perfect order, doesn't seem to get sexual gestures, and has a fascination with using bizarre and archaic weapons in his kills.
* Assassination Games has at least two. Brazil is a professional killer who uses a combination of audacity and bizarre methods to take out his targets at close range. Flint is a retired killer brought out of retirement for revenge who prefers to kill his targets from a distance. They wind up with the same target.
* Assassination Games, once with the girl in Brazil's apartment — he tells them that he doesn't care — and once with Flint's comatose wife.
* assassination in 2017 of Kim Jong-nam they were only pulling a prank. Kim was the eldest son of North Korean leader Kim Jong-Il, and the half-brother of current leader Kim Jong-un. He was at Kuala Lumpur International Airport when two young women came up behind him and splashed some liquid on his face in a "Guess Who?!" prank, then walked away. He immediately felt something was wrong, and contacted a receptionist, but he was soon sweaty, unresponsive and vomiting blood. He was dead within two hours. The two young woman, Siti Aisyah and Đoàn Thị Hương, were quickly identified and arrested from CCTV footage. It turned out that they had been training—or so they thought—to be on a prank TV show, and had been under the impression that they were simply pranking some random guy. The liquid they had splashed on Kim had been the deadly VX nerve agent. Their handlers, the people who'd persuaded them that it was all for an innocent TV show, were never found. The court eventually concluded that there was zero evidence that either of the women had the faintest idea that they were committing a murder. Siti Aisyah's charge was dropped, and Đoàn Thị Hương was released after little more than a year in prison.
* assassination is a lot more fitting — "I am Death Itself! I'll Chase You to the Ends of Hell!"
* Assassination Nation, the hacker who leaked all of the private information of the people of Salem. When the police ask him why he did it, he simply responds, "for the lulz."
* Assassination of a High School President had one at the very start of the movie

to explain "the elements" (cliques) of the high school.
* Assassination of a High School President, shot at Bayonne High School in Bayonne, New Jersey.
* assassination of King Carlos I of Portugal in 1908, Queen Amelia beat one of the rifle-armed assassins over the head with her bouquet of flowers while crying "Infamous bastard!".
* Assassination Sidequest: A mission to kill someone stealthily in an otherwise non-stealth video game.
* Assassinations (melee attacks in the back which snap the neck) are instantly lethal regardless of health
* assassination. The Secret Service agent Ray Livingston grows suspicious of Fitzgerald, believing him to be a Soviet sleeper agent, and has the camera analyzed by Department of Defense metallurgists. They discover that it is made from an unknown alloy which is harder than steel and impervious to X-Rays. When confronted, Fitzgerald admits that he is a time traveler from the future and shows JFK and Livingston a holographic recording of the Dallas motorcade to prove his story.
* Assassin bug nymphs have been known to camouflage themselves in the husks of their prey.
* Assassin by John Mayer is about a ladykiller who falls for one of his many conquests. Unfortunately for him, she is only interested in a one night stand. "I was a killer was the best they've ever seen. I'd steal your heart before you ever heard a thing...little did I know that girl was an assassin too."
* Assassin EMIYA is an alternate version of Kiritsugu Emiya who never had a family. Irisviel, Illyasviel, and Archer EMIYA still treat him as their husband and father, which annoys him as he doesn't know them, yet despite this he finds himself shadowing and oddly protective of them in spite of himself.
* Assassin himself. He wants to challenge Saber to a swordplay duel, and takes winning and losing in equally calm measure. Simply 'fighting' anyone else doesn't seem to get his interest in the same way.
* Assassin is also a good example of this trope, being perfectly polite and courteous to Saber even as he's trying to separate her head from her body, and complimenting her swordsmanship
* Assassin is fast but not very strong and is wielding an essentially normal sword. His magical energy is not only low, it only declines because it cannot be restored. However, he fights on more than equal terms with Saber herself and only loses because his sword is bent from blocking an attack of hers. Even Lancer, who thinks nothing of fighting several other Heroic Spirits at once so long as he is on the defensive, highly dislikes the idea of having to fight Assassin. Let's put it in perspective: Assassin's secret technique allows him to strike thrice in the same exact instant. This is NOT a Noble Phantasm, magic spell, or of divine origin; he simply trained a lot.
* assassin is the one who is now Patient Zero, as his attempts to keep her away from the infected resulted in him creating the plague within himself. He voluntarily lets himself be poisoned in order to keep his future family safe.
* Assassin of Black and her Master Reika Rikudo from the aforementioned
* Assassin of Gor are held is also used for animal-vs-animal fights. Sometimes it's even flooded and aquatic animals are pitted against one another.
* Assassin of Gor has Tarl and a group of warriors fighting some two hundred enemies. When the one of the men tries to start a competition another makes fun of him.
* Assassin of Gor player was blinded by a powerful man whom he had beaten in a game. But he is still able to play because he can visualize the board.
* Assassinorum: Execution Force, where Imperial Assassins attempt to kill a Chaos Sorcerer before he opens a gate to a demon-dimension.
* Assassin Outclassin': An assassination attempt ends up failing or getting foiled.
* Assassin Outclassin', Safi is later told that he's been assassinated.
* Assassin politely greets all opponents and then attempts to butcher them. But he chats the whole time, and all he wants to do is have a good fight without outside interruption. If something happens that is disadvantageous to his opponent like

Rider spying on Saber to see her Noble Phantasm he will stop fighting immediately and will not take advantage of outside distractions, such as Saber abandoning the fight temporarily in order to help Shirou. He's like a formal
* Assassins: After Bain is arrested and put in a police car, he disposes of a cop sitting in the driver's seat by kicking out the side window and breaking his neck from behind, using only one hand in a casual effortless way that suggests the cop's spine was made of cardboard.
* Assassins, a musical about the men and women who have either killed U.S. presidents or attempted to do so, gives us the examples of John Hinckley, Jr. (see Real Life below) and Lynette "Squeaky" Fromme, who tried to murder Gerald Ford in an attempt to impress Charles Manson. They even have a duet about it: "Unworthy of Your Love."
* Assassin's Apprentice, Fitz asks a woman where he can find Hod, who is going to teach him swordfighting. Naturally, the woman is Hod.
* Assassins Are Always Betrayed: Professional killers are always at risk of being double-crossed by their employers.
* Assassins: Assassin Miguel Bain frequently dual-wields pistols on his missions.
* Assassins, as she was infatuated with Manson and tried to kill the President in his name.
* Assassins, because he wanted an ice-cream. Thankfully, she doesn't pull the trigger.
* Assassins but they can't fool Miguel Bain, who casually greets them, then as he walks past them, whirls, whips out his silenced pistol and shoots both of them (and a hotel maid who inadvertently witnesses the scene).
* Assassin's Creed (2016): After Aguilar performs a Leap of Faith, Callum goes into a seizure, foaming at the mouth and being paralyzed for days before he can walk again.
* Assassin's Creed (2016): Aguilar and Maria escape their execution by having their pursuers follow them up a large tower in the middle of construction and then performing a Leap of Faith off the top of it into a hay wagon. Later, Aguilar is cornered on a bridge and performs another, more artful Leap into the river below.
* Assassin's Creed (2016): Aguilar's outfit includes a hood per the franchise's Assassins' tradition. What's more, the Brotherhood's symbol is embroidered on it.
* Assassin's Creed (2016): As in the games, Assassins run, jump and climb over quickly traverse city rooftops and evade pursuing crusaders.
* Assassin's Creed (2016): Averted. This film takes place in the same universe as the games and takes pains to acknowledge the larger mythology while not causing plot issues. Also, Ubisoft liked the film's production design so much they decided to try and incorporate some, especially the redesigned Animus, into future Assassin's Creed games.
* Assassin's Creed (2016) Before then, their interaction were just business and research.
* Assassin's Creed (2016)) but he backed out at the last second and instead ordered young Cal to run away.
* Assassin's Creed (2016): In keeping with previous protagonists with bird-themed names, Aguilar means "eagle house" in Spanish (as in "pigeon house"), coming from the Spanish word for "eagle" (águila), while Callum means "dove" in Scottish and Irish Gaelic (as in "Hawk and Dove").
* Assassin's Creed (2016) is set in 2016, with Templar Ellen Kaye outright stating the year.
* Assassin's Creed (2016): It's an original story instead of a straight adaptation and it's notable for being one of the few examples of this trope that takes place in the same continuity as the games.
* Assassin's Creed (2016): Joseph Lynch, member of the Assassin's Brotherhood, is arrested in the film's prologue for the murder of his wife, and Abstergo presumably got their hands on him quickly after that.
* Assassin's Creed (2016): Ojeda surely doesn't have the fighting skills of an Assassin, but still knows how to put a fight with aid of his raw physical strength and warrior training.

* Assassin's Creed (2016) protagonist Cal Lynch uses the Aminus to relive the experiences of his ancestor, spectating the past behind his ancestor’s eyes.
* Assassin's Creed (2016): The Assassins both past and present uses the traditional Hidden Blade as primary weapons.
* Assassin's Creed (2016): The main historical figure behind the Spanish Inquisition, Tomás de Torquemada, also happens to be a Templar seeking to eradicate Assassins in Spain and trying to get his hands on an Apple of Eden.
* Assassin's Creed (2016). (Two blades to the throat while the enemy is injured and on their knees.)
* Assassin's Creed (2016): While he was imprisoned at the Abstergo facility in Madrid, Moussa gained the trust of a number of other assassins, becoming their leader and planning their escape. Whenever newcomers arrived at the facility, Moussa was the one to welcome them.
* Assassin's Creed 2 has a cape that actually does something - it decreases his notoriety so he doesn't get in near as much trouble with the law.
* Assassin's Creed 2 has a gang battle and a night of passion with his girlfriend. Ezio returns to his home, seeing his father at the door, expecting the worst when...
* Assassin's Creed about an ancient conflict between two secret societies fighting over the fate of humanity spanning over ten thousand years of history with two parallel but distinct storylines (one set in the past and the other set in the present), multiple protagonists, a revolving cast of characters (both historical and fictional) and the presence of powerful artifacts known as the Pieces of Eden created by a long-deceased civilization known as the Isu.
* Assassin's Creed accuses Robert de Sable of leading a massive conspiracy. At the end, Richard believes that God wanted Altaïr to win, and he must have been telling the truth; Altaïr takes the skeptical approach and tries to convince the king that he was just the superior fighter.
* Assassin's Creed allows the player relive dozens of historical assassinations as carried out by members of the fictional Assassin's Brotherhood. Targets range from Crusaders like Robert de Sable to American Revolutionaries like Charles Lee.
* Assassin's Creed allows you to do this when killing guards or targets, but for a non-gameplay example, this is how Altaïr kills one of his targets in the intro video.
* Assassin's Creed, Altair can save women in the streets who are being harassed by gangs of armed thugs who are threatening and groping them. Though it's never exactly stated what they intended to do, the rescued citizens indicate just what they believe the thugs were planning. If you bother listening to the guards chatter, they are accusing the women of stealing from someone in front of them. Whether that's an excuse or not is not known.
* Assassin's Creed: Altaïr's Chronicles: Altair takes down many a Templar in this game, and not a single drop of blood is shed.
* Assassin's Creed and designed their technology to be recognizable and usable by future humans.
* Assassin's Creed, and Francesco de' Pazzi demonstrates amazing proficiency for a presumably non-athletic man, much less a non-Assassin. (It's implied that for the player characters, their physical aptitude is a "family thing.")
* Assassin's Creed and historical revisionism. But even then, it does feature huge dollops of politically correct history:
* Assassin's Creed and killing bad-mouthing politicians in broad daylight.
* Assassin's Creed and lets the body fall into a shallow pool of water which rapidly becomes red with blood.
* Assassin's Creed and really secular humanists. While this compromise makes commercial sense and fits with the overall meta-narrative, it ends up giving a distorted view of the period and history.
* Assassin's Creed and the etymological origin of the word "assassin".
* Assassin's Creed, and the occasional frenzy of short and violent fights frequently followed by a lot of running and hiding. Even boss fights generally fit into this standard. Then at the conclusion of the game, nearly all of it is thrown

away for a long series of non-stop straight up sword fights with no chance of stealth or sneaking.
* Assassin's Creed. And they created the first humans as slaves. The slaves rose up, and a great war took place, and the only remaining signs of them are individuals with some First Civilization DNA, like Desmond and his ancestors, and the artifacts they left behind.
* Assassin's Creed (a rare Western example) -> the somewhat unfortunate "AssCreed"
* Assassin's Creed are creatively referred to as Assassins by both developers and fans.
* Assassin's Creed are explained as 'malfunctions'. At one point his kidnappers say that they could revert everything back to period appropriate dialects, but that it wouldn't do you much good unless Desmond had "read Chaucer."
* Assassin's Creed are typically some form of plea for forgiveness or understanding.
* Assassin's Creed as a front to recruit more Templars among the converts.
* Assassin's Creed: As Cal is put into the Animus for the first time, the arm is lowered, he's strapped in, DNA sequences are scanned and compared, lights come on and he is finally sent to relive the life of his ancestor, Aguilar de Nerha.
* Assassin's Creed: Assassins' preferred method for killing? Using the Hidden Blade to stab a man's neck. Ezio takes it further with his rather graphic killing of Checco Orsi, where he pushes the blade into Checco's throat slowly. In the sequel, he can cut multiple throats spinning a spear, and even jump towards an enemy and prick his throat open with a sword. It goes without saying that all of this is pretty awesome.
* Assassin's Creed because of its focus on world history and near-perfect recreation of various monuments and other architectural wonders.
* Assassin's Creed being in control of the world is coming from their own deceitful mouths, and e-mails you can secretly read imply that they're not quite as powerful as they make themselves out to be. Meanwhile, the Assassins are a similarly ancient counter-conspiracy that exists to thwart the Templars.
* Assassin's Creed be surmounted. Targets can only be assassinated during specific events in which they are in the open because that is when the given Assassin found the opportunity to bypass security to make the kill. Guild branches always have open rooftop entrances because that is the method by which the Assassins always accessed them. Even in the countryside areas, geography keeps the players from wandering off the map; Ezio, a master acrobat who can climb sheer buildings hundreds of feet high, can't jump to the top of a three-feet high gentle slope, simply because he never really explored those areas and passes on no memories of what those areas contain outside of a specific path.
* Assassin's Creed both have this ability. (referred to as Eagle Vision) You can use it to tell if people are hostile (red), friendly/ have important information (bright blue), neutral (white) or an assassination target (gold)
* Assassin's Creed: Brotherhood, Abstergo is using cell towers to keep tabs on people and that satellite surveillance was phased out for being inferior.
* Assassin's Creed: Brotherhood: a doctor who's treating your bullet wounds will mention that four out of five doctors would use leeches, lucky for you he's the fifth.
* Assassin's Creed: Brotherhood aim — they're the only such chests in the entire game!
* Assassin's Creed: Brotherhood aka Abstergo Industries do to people in the modern day.
* Assassin's Creed: Brotherhood, all of the missions to destroy Leonardo's war machines will eventually involve Ezio taking the things and briefly using them against the Borgia.
* Assassin's Creed: Brotherhood and Bart's statement becomes completely null and void.
* Assassin's Creed: Brotherhood and mini-bosses also can dodge or outright block counters; the final boss can as well. (There are two more story targets, but

they're not so much bosses as "guys you have to kill without being detected, or mission failed.")
* Assassin's Creed: Brotherhood as one actually built by Leonardo for Cesare Borgia. It was actually pretty fast, although only firing one cannon at a time. The mission involves destroying all prototypes and the original plans. It can be assumed that Leonardo then made a second set of plans deliberately flawed.
* Assassin's Creed: Brotherhood, Baron de Valois captures Bartolomeo's wife and tries to make him surrender.
* Assassin's Creed: Brotherhood, by faking the capture and delivery of Bartolomeo d'Alviano to the French, in order for Ezio to get close and assassinate the Baron de Valois. Bartolomeo's captors are all his own troops (and Ezio) wearing stolen French uniforms.
* Assassin's Creed: Brotherhood by the standards of the time period (reaching the age of 40 in Renaissance Italy was an achievement, much less one lived as dangerously as his was) and spent a period of time comatose and feverish with no medicine to help him after being shot. Getting Ezio back to his full climbing condition requires getting Leonardo Da Vinci's help to design a harness that helps with Ezio's aging and damaged muscles.
* Assassin's Creed: Brotherhood cooperation with the Borgia, given his good leanings and the villainy of the Borgia, is explained away as his being forced to work for them.
* Assassin's Creed: Brotherhood culminates in a flight-action sequence.
* Assassin's Creed: Brotherhood did a similar trick with Ezio being shot at the beginning of the game removing any chance of free-running forcing him into following the tutorial's linear path. He quickly gets patched up but doesn't regain his full climbing ability until late in the game and only after buying climbing equipment indicating he never fully recovered.
* Assassin's Creed: Brotherhood do that whenever they are called upon to attack instead of escaping.
* Assassin's Creed: Brotherhood, during one of the repressed memories. Ezio's older brother tells him men are afraid of attractive women, and thus the first person to actually talk to them has the advantage.
* Assassin's Creed: Brotherhood evil Pazzi family, as well as Rodrigo Borgia. It also adds the rest of the Borgia family, as well as fictional Silvestro "The Noble" Sabbatini who engaged in human trafficking.
* Assassin's Creed: Brotherhood: Ezio can recruit women into his bunch of Assassins.
* Assassin's Creed: Brotherhood. (Ezio will actually complain as soon as he performs a parkour move, so he could say this while climbing the church the player is directed to climb, or he could complain as soon as he hops on a fence.)
* Assassin's Creed: Brotherhood further expands on the ritual. Instead of losing a finger, new assassins get red hot iron tongs placed on the top and bottom of the base of their ring fingers, likely to symbolize the cutting off of the finger.
* Assassin's Creed: Brotherhood has an artificial left arm ending in a claw.
* Assassin's Creed: Brotherhood has a popular fan theory that Cesare Borgia is the creator or inspiration for Abstergo Industries — because he said the word "cleanse" once.
* Assassin's Creed: Brotherhood has a soul patch and close-cropped goatee, contrasting with Ezio's full beard-and-'stache. Cesare, Rodrigo, and the Engineer also have beards.
* Assassin's Creed: Brotherhood has gotten a fair share of flack for making gameplay too easy.
* Assassin's Creed: Brotherhood. In the novelization of the game, he actually jots down notes while Ezio is giving a speech to the crowd.
* Assassin's Creed: Brotherhood, it's possible to unlock Ezio's Repressed Memories of his first love Cristina Vespucci and their relationship, which ultimately does not pan out well.
* Assassin's Creed: Brotherhood La Volpe ("The Fox"). Ezio helps Volpe establish a proper guildhall disguised as an inn and can undertake missions for them to help

undermine a rival Borgia-backed Thieves Guild called the Cento Occhi.
* Assassin's Creed: Brotherhood makes it evident that Vieri would have done such a thing, as during a flashback to Ezio's pre-Assassin life, he tries to rape Cristina Vespucci when she returns home, after having rejected his advances so often. Luckily, Ezio comes along and sends him running, after giving him a nice beating.
* Assassin's Creed: Brotherhood of binary mean it is actually literally raining real code. Sorta.
* Assassin's Creed: Brotherhood of his work. Il Carenfice never actually reads the warrants for execution he receives (having never learned to read) and instead abuses his authority to executes whoever he wants.
* Assassin's Creed: Brotherhood. One of the town criers' announcements is a citywide ban of the song about "The Little Boy of Prussia", since minstrels singing it have caused "embarrassing physical juttings" for priests wandering through town who hear it.
* Assassin's Creed: Brotherhood, one part of the story requires Ezio to retrieve a tank built from Leonardo da Vinci's plans as well as burn the plans so the Borgias cannot build more. The tank is a steam-powered bloated wooden barrel with a dozen cannons sticking out in all directions. You can fire only one at a time, though. Also, the cannons appear to be breech-loaded. The entire beast can be operated by three people, which is pretty impressive.
* Assassin's Creed: Brotherhood's multiplayer is the Barber, a spy for the Templars who goes around cutting throats with a straight razor.
* Assassin's Creed: Brotherhood, so he orders his men to kill said actor.
* Assassin's Creed: Brotherhood that he deliberately put flaws in his sketches after being forced by the Borgias to build them advanced weapons.
* Assassin's Creed: Brotherhood, this is given a darker edge if Ezio achieves "middle" rank with the Courtesans' Guild, unlocking the ability of Courtesans to distract Horsemen, but also somehow arming every affiliated courtesan in Rome with a dosage of poison which they can inject a guard with. Unfortunately, since the player can't control this at all, it sometimes leads to a distraction of a far less desirable sort...
* Assassin's Creed: Brotherhood, though by that point it's really more like "Surrounded by dead people and one very, very good Assassin."
* Assassin's Creed: Brotherhood to conclude the Siege of Monteriggioni, once again motivating Ezio to get revenge.
* Assassin's Creed: Brotherhood was just delusional, and Ezio did this just to troll him.
* Assassin's Creed: Brotherhood. When Leonardo tasks Ezio with destroying the war machines the Borgia forced him to build, you not only have to destroy the prototype, you need to burn the blueprints too, and often there will be a backup copy of the war machine that also needs to be wrecked.
* Assassin's Creed: Brotherhood, you can send novice Assassins out on missions by themselves. There is a chance that they can fail. The chance of success can be improved by sending multiple or more experienced Assassins on the mission, but doing the former means that the benefits of success are split amongst them, while doing the latter can result in the less experienced Assassins losing out on leveling opportunities.
* Assassin's Creed, but with the most notable being Altair's preparation for the final assassination target, in which he does the most well-recognized form of the montage (swinging his swords to test the balance, tightening straps etc.).
* Assassin's Creed can only be used by descendants of the first civilization.
* Assassin's Creed, characters from non-English speaking countries or settings will use a phrase or expression from their native languages.
* Assassin's Creed: Chronicles corrects Nikolai Orelov's last name to Orlov. Presumably, the well-meaning creators translated "eagle" into Russian ("oryol", although sometimes written as "orel") and added the common Russian "ov" ending. What they forgot was that, in some cases, a vowel may need to be dropped.
* Assassin's Creed: Chronicles review, he muses that the word "assassin" has gone "weird" on him, containing "ass" twice in it.

* Assassin's Creed. Desmond is being interrogated not for his own memories, but for his ancestral ones, using the Animus system that gives him flashbacks of Altair's life.
* Assassin's Creed: Discussed many times by Altair, Al Mualim and the various Rafiqs. Altair is told to perform simple tasks (kill 9 Templars) but finds that their motivations and the reasons for killing them, and the connections between the targets hint at something bigger:
* Assassin's Creed Elise meets an untimely end, and, finally, Desmond and Lucy's budding romance does not have a happy ending.
* Assassin's Creed: Embers ends with Ezio having well and truly left the Assassin life behind him, but with a younger Assassin heading off with enemies of her own to take down.
* Assassin's Creed ensures that there will never be a proper end to the story.
* Assassin's Creed: Etruscan, Greco-Roman, Egyptian, Norse, and other deities co-exist with one another as members of a long-extinct species known as the Isu, the creators of humanity. In fact, every mythological and religious pantheon in human history can trace back its roots to the First Civilization.
* Assassin's Creed, even) without the nasty "cutting off fingers" catch.
* Assassin's Creed) Ezio has likely fathered many illegitimate children in his lifetime,
* Assassin's Creed, Ezio strips off his Assassin gear and uses an Apple to communicate with his descendant Desmond, effectively passing him the torch.
* Assassin's Creed features detailed forest environments for the first time in the series.
* Assassin's Creed: Forsaken. He is right at the front prominently displayed, despite only appearing for a few chapters near the end. Main character Haytham is a blurry image in the background.
* Assassin's Creed franchise are relative unknowns that have little to no acting experience.
* Assassin's Creed: Freedom Cry." Given the time period this takes place in, this is a common belief of the time and will continue to be so for centuries to come.
* Assassin's Creed: Freedom Cry is also set during the Golden Age of Piracy, but focuses more on the slavery aspect of the era.
* Assassin's Creed from entering common knowledge. They use a technology called the animus to extract information about religiously important object (which are lost etch, perhaps), and hunt and kill anyone in their way.
* Assassin's Creed games, the Heralds always speak out against the Assassins even if you do your best to avoid civilian deaths. However, this is easily solved with simple bribes.
* Assassin's Creed games, where you can lose pursuit by killing all the guards in a specific encounter and they will only respawn much later, more than long enough to get out of the area. Guards in other areas won't pay any extra attention to you for that. The only times this is played straight are when the plot calls for it.
* Assassin's Creed generally avoids this for the main, in-Animus plot of each game. But with a dozen games in just the main series alone, the ongoing modern day plot is likely to confuse a new player.
* Assassin's Creed gets a ton of mileage out of showing how nearly every historical figure was secretly a Templar, a group dedicated to controlling humanity from behind the scenes, or an Assassin, the opposing group who believes humans should be free to live however they want, or were somehow affiliated with the two groups. Most evil people were secretly Templars and most good people were secretly Assassins, but sometimes the games like to throw in a surprise.
* Assassin's Creed gives you the option of doing this to your apprentices.
* Assassin's Creed had a likable main character, levels that were memorable, and missions that were actually fun.
* Assassin's Creed had Al Mualim and Altair using almost these exact words during one of their discussions. Al Mualim asking and Altair answering.
* Assassins Creed had guards that would attack Altair just for running in a crowded area.

* Assassin's Creed has a bell sound as the second target falls back dead from Ezio's gunshot.
* Assassin's Creed has adaptations ranging from the Roman Empire to the Russian Revolution.
* Assassin's Creed has a kill animation closely related to this trope: Altair runs up to the target, leaps onto him and stabs him in the throat.
* Assassin's Creed has chemical formulas as well as other random bits of text floating about.
* Assassin's Creed has it as its central concept, featuring a secret conflict between the Assassins and the Templars. Though the rule truly applies mostly in the first game; by the time of the next games, the Templars have become mostly as shadowy as the Assassins over the course of the years.
* Assassin's Creed has now lost her status and is pretty much hunted, since she no longer has Robert de Sablé to keep her in despite the No Women Allowed rule.
* Assassin's Creed has Smoke Bombs as recurring tools. Taken together with a location that has multiple curtains to duck behind or haystacks to leap into, and you can vanish, shank, come back out, and vanish until you run out of enemies or exhaust your supply of smoke bombs.
* Assassin's Creed. He is also the only assassin in the series to only use blades and no other long range weapons like a crossbow or a gun until he builds one a good seventy years later.
* Assassin's Creed; he just needs glasses. Shame they didn't exist back then.
* Assassin's Creed. His ancestor, Ezio, wasn't even aware of his heritage. Later games make it clear that Desmond was vaguely aware of this while he was a kid in the assassin camp in South Dakota, but couldn't really understand it.
* Assassin's Creed however, Ezio requires no such sacrifice, due to the blade's mechanism being modified in the 13th century (likely by Altaïr as outlined in the Codex pages), to keep Assassins from being identified so easily.
* Assassin's Creed, if you kill a wild animal but don't skin it afterwards, you receive a warning stating that Connor always skinned the animals he hunted. If you refuse to heed the warning and leave too many animals lying around dead and unskinned, you will be forcibly desynchronized.
* Assassin's Creed II: According to the database entry on La Volpe, he once managed to rob the Pope's carriage — while the Pope was still inside it.
* Assassin's Creed II added two Memory Blocks before the final one, and Ezio can be seen growing the beard in them.
* Assassin's Creed II. After he avenges himself upon the prosecutor/judge though, he finds out about a conspiracy against the city which his father had collected evidence against, and considers the conspirators partially responsible as well.
* Assassin's Creed II, Agostino Barbarigo dies after receiving several poisoned letters from the Assassins.
* Assassin's Creed II, and if you choose, you can beat him by repeatedly kneeing him in the groin.
* Assassin's Creed II and Machiavelli, as well as his involvement with the infamous "Bonfire of the Vanities." If it happened during the Renaissance, Ezio probably had something to do with it.
* Assassin's Creed II and punch the crap out of those annoying bards. There's a lot to do in Renaissance Italy.
* Assassin's Creed II and still remains the most popular assassin to this day.
* Assassin's Creed II (and the player) about the revenue chest, Claudia mentions that whatever excess appears in the chest, she'll take for herself.
* Assassin's Creed II, as well as dressing as a Frenchman alongside Bartolomeo's men to infiltrate the French camp.
* Assassin's Creed II), but the penultimate and final boss are conveniently immune.
* Assassin's Creed II. Certainly, one who can consistently strike the weak points of plate-clad opponents in a stand-up fight is no slouch.
* Assassin's Creed II could be accomplished using Ezio's pistol, if you timed your shot with the fireworks going off in the area.
* Assassin's Creed II determines if he gets clocked or not, and the scene continues

regardless.
* Assassin's Creed II, dies of a heart attack at an advanced age after years of idleness. Which is just the way he wanted it as he had chosen to give up the life of being an assassin years ago.
* Assassin's Creed II, entrances to Templar Lairs are marked by red crosses, but those aren't sufficiently unusual to make them completely obvious. On the other hand, the entrances to Assassin Tombs are marked by wall decorations that look like a skull within a stylized letter A.
* Assassin's Creed II: Ezio learns how to assassinate from above partway through.
* Assassin's Creed II, Ezio says "I wish every day was this fun. Oh, wait, they are!" The next day, his father and brothers are arrested on trumped up charges, and are executed the day after that, setting Ezio on the path to being an Assassin.
* Assassin's Creed II, Ezio says this towards the beginning when seducing a girl.
* Assassin's Creed II, from Lorenzo di Medici to Niccolo Machiavelli to Leonardo da Vinci to the ENTIRE BORGIA FAMILY.
* Assassin's Creed II, hammers and mauls can be used as Ezio's main weapon in place of single-handed swords. Hammers and mauls swing more slowly and are less effective on defense and countering, but are much more effective against heavily-armored elites.
* Assassin's Creed II has Ezio meeting Rosa at one point. As they hug one another, Rosa tells him to put his sword back in its sheath. Ezio replies by saying that she has it.
* Assassin's Creed II has Ezio's introduction as a new-born where we get to move our arms and legs a bit.
* Assassin's Creed II has the Armor of Altaïr, which requires that the player clear six platforming side missions (mostly with very little in the way of combat), but its only unique property is that its pieces can't break. By the time you would be able to acquire it, your character would likely have been swimming in more than enough money to both buy the Missaglias armor set (which has the same number of health squares) and keep it repaired. Likewise, although the Sword of Altaïr is the bar-none best medium weapon in the game, it's still second to the Hidden Blade(s)' ability to fatally counter attack any non-boss enemy in the game, which is available far earlier.
* Assassin's Creed II has the protagonist Ezio Auditore land in the middle of a street in Venice in front of a target, before shooting them with his hidden gun.
* Assassin's Creed II. He still uses his charm to imply that he would be delighted to work closer with his female co-conspirators, but treats them with respect and can keep his mind on the job when necessary.
* Assassin's Creed II, he tries to pull this on his way to kill the guy that did it. Unfortunately, he's stopped by a pair of heavies and disarmed, forcing him to run.
* Assassin's Creed II (his own mother and sister end up in charge of the biggest brothel in the city) and adds an army of Assassins that he trained to the mix — people he recruited simply for daring to stand up to the Borgias.
* Assassin's Creed III, after a violent altercation leads to a cross-city pursuit that gets him arrested and framed.
* Assassin's Creed III, a half-Mohawk assassin whose main goal is to fight the Templars and protect his people. Interestingly, compared with his predecessors, he tends to draw more attention to himself on the job due to his strong principles and more open interaction with major political factions, but not to the extent that he can't have a life outside his work too.
* Assassin's Creed III, also worked as a privateer on occasions on the side of the Colonies during the American Revolution.
* Assassin's Creed III and even a French officer that serves alongside the American Patriots. The two works however are polar opposites in terms of characters, setting, themes, morality and historical accuracy:
* Assassin's Creed III. As a Templar, Haytham is totally obsessed with control; although their relationship was happy enough, if brief, Ziio's deepest worry about their son is that he might have inherited the obsession.

* Assassin's Creed III). Connor calls Achilles out on the fact that it happened on his watch. By that point, Achilles is an old man with a cane whom the Templars (usually) leave in peace as long as he stays in the Davenport Homestead and doesn't try anything. It's up to Connor to rebuild the Assassins by recruiting those dissatisfied with the British rule and sending them on missions to other colonies. The state of the Assassins in the Old World is unknown.
* Assassin's Creed III, Connor goes through one late in the story, using a knife to shave off most of his long hair into a short mohawk, and permanently leaving his hood down.
* Assassin's Creed III: Connor has just gone through an epic naval battle at Chesapeake Bay, all to get some French ships to aid him in his assault on Ft. George in New York. When he begins to explain his request to the Admiral, the following exchange occurs:
* Assassin's Creed III, Connor recruits an old ship captain by the name of Robert Faulkner, who fell into drunkenness after his ship, the Aquila, was decommissioned and he lost his purpose. He leaps at the chance to sail her again for the Assassins and by all appearances remains sober afterward, or at least as sober as any other sailor.
* Assassin's Creed III convoys filled with money and special items occasionally spawn in different parts of the frontier and Connor is able to steal from them after killing every guard. It´s also implied the player is on the receiving end of this as sending a land/naval convoys with products to a city or the frontier will usually present a percentage of failure.
* Assassin's Creed III Desmond (and the audience) had a quite fitting "Wait, what?" look on their face at the revelation.
* Assassin's Creed III DLC, Ratonhaketon gains several powerful animal abilities, but they drain his health quickly while active.
* Assassin's Creed III establishes that before going to America, Haytham had also purged the British Assassins (the game begins with him killing one of the last), which was so effective that over a hundred years on, the Assassins still refuse to go near London.
* Assassin's Creed III from the encounter at the church until the confrontation with Washington qualify.
* Assassin's Creed II if your reflexes are good enough and you're paying attention. Pickpockets will show up on your radar. All you have to do is make sure you're facing away from them, draw a weapon, and kill them when they get close. Or you can chase them down after they steal from you, but it's a huge pain in the ass. These kinds of enemies show up in a lot of the games after this point.
* Assassin's Creed III has this as a gameplay mechanic. Connor can summon Assassins disguised as Redcoats to take him "prisoner" and march him into heavily fortified locations.
* Assassin's Creed III, Haytham is lured and trapped belowdecks by one of the ship's mates, who threatens him with a sword. Haytham (the player character) notes that it would be unfair for him not to have a sword of his own, so the mate tosses him one, which Haytham uses to kill him.
* Assassin's Creed III... Hickey's just a hired thug who sees the Templars as a good way for him to gain money and power, and openly mocks Connor for being an idealist.
* Assassin's Creed III. Horses can get shot by a musket volley, lay down on the ground for three seconds, and then get back up and ride normally as if nothing happened. The only time when a horse actually dies in the game is in a cutscene.
* Assassin's Creed III: In an optional conversation, Shaun reveals that, while poking around the Grand Temple, he found machines that manufacture a bland but nutritious substance, evidently intended to keep the people of the First Civilization alive while sheltering there. He theorizes that this is the origin of the concept of ambrosia, and to the dismay of his companions, states that he tried some of it. According to him, it tastes like cardboard.
* Assassin's Creed III includes her cosplay character finding a poster of herself and ripping it off the tree.

* Assassin's Creed III - In the first Homestead mission you have to save one of the woodcutters before he goes over.
* Assassin's Creed III in the first Sequence of the game the player can have a conversation with Benjamin Franklin in which the latter explains the "benefits" of courting an older woman — which is from an actual essay Franklin wrote, "Advice to a Young Man on the Choice of a Mistress."
* Assassin's Creed III. In this case, it also applies to Aveline as well in her game.
* Assassin's Creed III is more of the same, with the arsenal expanded to include a bow and a second handgun. Tomahawks can also be carried in place of daggers and bayonet-equipped muskets replace spears and two-handed swords from the Ezio trilogy.
* Assassin's Creed III is now the most powerful man in the newly-formed United States of America.
* Assassin's Creed III. It was also criticised by fans for its glitches, scripted missions, lack of stealth, a poorly written story and a protagonist that wasn't as compelling as the previous one. To an extent, the divided opinions extend to the other games set in the Americas.
* Assassin's Creed III: Kaniehtí:io defies this trope; while Haytham Kenway does indeed rescue her and a number of her people from enslavement (or worse) at the hands of a British thug, she refuses to trust him until he accepts her as an equal and fights on her side.
* Assassin's Creed III. Keeping with the generalized "nothing is actually supernatural" trait of the larger franchise, it turns out that the creature is actually a very big, very hairy man living in the wilderness who, when found by Connor, admits to being a kleptomaniac but is ultimately harmless. After learning the truth, Connor just leaves him alone.
* Assassin's Creed III lets you visit parts of the map, the map being the east coast of the USA. The locations are the cities of Boston and New York which are bigger than realistic scale but with locked doors everywhere. The frontier is a Real-time, small scale world version of the New England countryside. Davenport is a very small town made up of less than a dozen individuals that you all personally know, so that its map is of realistic scale with tons of buildings enterable. The mission exclusive parts like Charleston and Captain Kidds treasure locations are of realistic scale but with most of the world in the background.
* Assassin's Creed III: Liberation (co-developed with Canada and Bulgaria)
* Assassin's Creed III: Liberation (co-developed with Italy and Bulgaria)
* Assassin's Creed III: Liberation, Connor's letter tells that she's known as a great slave liberator even as far up as New England.
* Assassin's Creed III: Liberation is also set during the American Revolution, but in the French colony of Louisiana this time around.
* Assassin's Creed III, most of the Founding Fathers were neither Templar nor Assassin, except for Charles Lee, who was a Templar.
* Assassin's Creed II in his younger years as an ally of protagonist Ezio.
* Assassin's Creed II in the same Animus back room used for every major assassination in the series. Then, he retracts his blade and walks away.
* Assassin's Creed III). One of the upgrades available for the ship is a ram, which can gut even enemy frigates, especially if your own hull is reinforced and you do it at full sail with the wind.
* Assassin's Creed III opted to slow down the production schedule of the series in 2016 and take a longer time to complete each installment.
* Assassin's Creed III presents a further variation. Haytham and Connor continue to wield two hidden blades, but the left blade (the one traditionally used for assassinations) has been modified so that it can be pivoted off the mechanism to be used as a clip point knife.
* Assassin's Creed III quit the slave trade to become a sell-sword, which was how he came across the Templars to begin with.
* Assassin's Creed III: Ratohnhaké:ton/Connor during the events of the game has a very, very full plate and no time or headspace for romance.

* Assassin's Creed III, Ratonhnhaké:ton, more commonly known as Connor Keway, makes use of a tomahawk with the axe head in the shape of the Assassin's crest, fitting his Native American ancestry.
* Assassin's Creed III released in Fall 2012, around the same time as the Wii U, and was a launch title for that system in addition to coming out on Xbox 360 and PS3.
* Assassin's Creed III, Samuel Adams, Paul Revere, and Israel Putnam during this game.
* Assassin's Creed III, Samuel Johnson is arguably the nicest of the founding fathers. However, when Connor asks him why he isn't speaking out about slavery even though he freed his wife's slave, he says "It's complicated" and ducks the issue. Even though he himself is opposed to slavery, he doesn't really want to force the issue for fear of dividing the colonists, a trait that was true even years later.
* Assassin's Creed III's confrontation ends, because it took place in a burning shipyard and Connor got impaled by falling rubble, while he shot the villain mid-gloat, meaning the two are crawling and limping their way through.
* Assassin's Creed III, Shaun in one combo mentions finding an old machine Those Who Came Before used to create manna, the so-called food of the gods, only to find that its taste is utterly unappealing, which he theorizes may be the result of them having different taste buds than humans. Rebecca proposes the alternative theory that the machine's "flavorizer" broke down in the 50,000 years it went without maintenance. It's never cleared up who's in the right.
* Assassin's Creed III some of the soldiers that wear face covering scarves make grunting sounds that imply this trope.
* Assassin's Creed III spends the first three sequences setting up the plot with a completely different character and doesn't really open up until the 6th sequence about seven to ten hours in.
* Assassin's Creed II) is subsequently able to talk Dante into annulling his marriage, and even has the audacity to hire him as a bodyguard.
* Assassin's Creed II: It doesn't take many punches from Ezio to put them in their place.
* Assassin's Creed III that allows people to relive the past. As the player levels up, they unlock cheesy, happy-go-lucky meta-commercials promoting it; completing difficult challenges, however, unlocks hacked versions, which contain "Erudito" pointing out true motives, hired actors, careful marketing and blatant lies to hide the truths about it.
* Assassin's Creed III: The Boston Massacre is portrayed as a Templar plot to destabilize the colonies and fan the flames of war.
* Assassin's Creed III, the British's dogs may start barking at you and grab the owner's attention, even if you haven't done anything "wrong" in front of it.
* Assassin's Creed III: The British wear redcoats while the Colonials wear blue.
* Assassin's Creed III, the events of the DLC turn out to be a vision generated by a Piece of Eden to show what would happen if Washington claimed its power for himself. Washington is so horrified by the tyrant he becomes in this alternate timeline that he begs Connor to throw the Piece of Eden into the sea to prevent anyone from ever taking it. Later, Washington is tempted by a voice in his own head suggesting that he become king of the newborn United States of America, but he rejects it.
* Assassin's Creed III. The guards take as long to aim their sidearms as the 18th-century officers, allowing Desmind time to grab the nearest guard as a shield.
* Assassin's Creed III, the hero Connor has no known love interest or sex life despite meeting many quite attractive female characters. When one of the NPC falls in love with a woman, it takes ages for him to understand what's happening, and the first advice he offers (giving flowers to a tomboyish girl) is completely inappropriate.
* Assassin's Creed III. The player themselves is stated to be a privateer working for the Colonials during the naval missions.
* Assassin's Creed III: The voice actress for Kaniehtí:io, Connor's Mohawk mother, is Kaniehtiio Horn.

* Assassin's Creed III this trope by not only having a half-British/half-Native American protagonist but the Mohawk tribe's culture and language are accurately represented in the game.
* Assassin's Creed III unsolved mysteries: Connor's ultimate fate, Juno's true plans for the world, and that mysterious voice at the very end. Only the last was ever resolved (an Abstergo tech guiding one of the company's Animus users). In Black Flag, Connor is only briefly mentioned with no new information, and Juno for some reason is helplessly trapped in Abstergo's network, only saying that "perhaps the Vault was opened too soon".
* Assassin's Creed III when Haytham slowly enunciates his English to Ziio, a native, she is confused as to why he's doing it in excellent English.
* Assassin's Creed III, where the primary hazard comes from the fact that the whole place is falling apart.
* Assassin's Creed III which attack you on sight. Contrary to what happens in real life, the wolves are super persistent and attack you... even after you kill their alphas. They don't retreat even when it's in their best interest. Possibly justified since it's a computer simulation in-universe rather than "real" wolves.
* Assassin's Creed III you can manually execute these by jumping of a high place and holding the high-profile button, making your character stay in that position until you release the button.
* Assassin's Creed II of these incidents being in public, with witnesses, and Ezio wearing the Assassin Robes. On top of that, before this Ezio was (even after his exile from Florence) had been a recognized absentee lord of the castle-town of Monteriggioni, making him a semi-public figure.
* Assassin's Creed II: One of Ezio's targets is hiding atop the highest tower in San Gemignano.
* Assassin's Creed II onwards, if you kill too many people and your notoriety goes to 100%, the trope is turned up to eleven: every guard that sees you attacks on sight without warning. You can still kill everyone in a certain area and end the fight, but after moving to a new place, you have to do it all over again. You can reduce your notoriety by bribing heralds, taking down your wanted posters, and assassinating corrupt officials.
* Assassin's Creed II on, you have firearms, which are an instant kill on almost all enemies, but take several seconds to aim and also alert any guards in the area.
* Assassin's Creed II, or because the glyphs work the same way in the Animus as they do in the game.
* Assassin's Creed II, or humans granted longevity through the Pieces of Eden.
* Assassin's Creed II provides us with an example of shaming by legislation. The extra, in-game index describes how courtesans (by that time a word meaning essentially "whores") were by law more and more circumscribed and sharply defined in dress and hairstyle in an effort to eliminate their profession from polite society.
* Assassin's Creed II say that she eventually took over the Rosa in Fiore from Claudia and became an Italian Assassin leader.
* Assassin's Creed II's Infinity Plus One Armor, granting as much Health as a complete Missaglias armor set but unbreakable, and only unlocked by clearing the six Assassin Tombs, which were mainly platforming missions.
* Assassin's Creed II that "Everything is going according to pla-" before being killed by Ezio, who had secretly replaced one of the others guards.
* Assassin's Creed II, the Auditore family is charged with treason and arrested. Ezio, the only man in the family to not get caught in the initial sweep, quickly acquires some documents that would exonerate them, but unfortunately, the court official he delivers them to is part of the conspiracy that framed his family, so the evidence disappears before the trial and Ezio's father and brothers are all hanged.
* Assassin's Creed II the Auditore family, which is a prominent house of Assassins (the Pazzi are Templars in the game).
* Assassin's Creed II there is an Achievement for killing a guard with the broom.
* Assassin's Creed II they left in certain human bloodlines were all designed to

converge in 2012 and communicate the information necessary so that the modern-day Assassins can avert a repetition of this catastrophe.
* Assassin's Creed II to fight back... But it also makes it rather difficult for the Templars to exterminate them.
* Assassin's Creed II troops to assist him in battle. They can't parkour around on rooftops, but they are very tough and carry heavy weapons, making them superior to most of the city guard. In addition, they allow Ezio to make flanking moves and attack enemy troops from behind, which are one-hit-kills.
* Assassin's Creed II uses stock footage and photos in "the truth" segments to prove the fact that we've been lied to.
* Assassin's Creed II. When Ezio walking around or even jogging, his cape has a pretty realistic flow, but when he's running or on horseback, the cape becomes stiff as a damned board.
* Assassin's Creed II when they are caught with their lovers, then beaten the shit out of.
* Assassin's Creed II where the Templars have infiltrated the Catholic Church in a bid for power over the people. Many of your targets are high up "holy" men; culminating in you beating up the Pope.
* Assassin's Creed II, which allows Marco to talk him into annulling the marriage.
* Assassin's Creed II worked with the Assassins, though he wasn't an Assassin himself.
* Assassin's Creed II working for Mario Auditore and Bartolomeo (and, by extension, the Assassins).
* Assassin's Creed II, you can distract guards by using thieves or courtesans that you hire, throw money around them to gather civilians, or use a smoke bomb and assassinate them, all to get a chest or codex page. Who here keeps using the last one?
* Assassin's Creed II you find throughout the cities are (after Sequence 1) on Ezio's side. For some coin, he can hire a cluster of them to surround him as he walks the city — their sexiness being sufficient distraction to keep Ezio "invisible" while he walks the streets. He can also send the hooker entourage to "distract" troublesome guards, though he'll automatically "lose" two of his four courtesans whenever he passes close enough to a group of guards, as in both cases the courtesans are occupied with their distraction so that Ezio can move on.
* Assassin's Creed: Initiates, one bloody handprint can be seen at the attacked Assassin safehouse in Osaka, Japan.
* Assassin's Creed. In Japan, "AC" literally stands for "arcade cabinet" and is used to refer to arcade games. Outside the context of gaming, AC can also stand for "alternating current" and "air conditioning".
* Assassin's Creed, Innokenti Orelov ends up having to shoot his own father Nikolai, an Assassin, who is struggling with another Assassin. The bullet passes through Nikolai and the other Assassin, killing both. It's implied Nikolai wanted his son to do this to save himself. Innokenti picks up his father's hidden blade and walks off into the sunset. While his further fate is unknown, it's clear he at least survives to produce a child, as Daniel Cross is his descendant.
* Assassin's Creed is like this, especially the short distance between the major cities of the Holy Land. At some point having to ride across the vast landscapes would just get dull. The historical accuracy also tends to stop right around the point where the fun begins, such as Altaïr's signature spring-loaded hidden blade.
* Assassin's Creed, is narrated by Desmond Miles, and through his flippant narration, William Laurence's constant grave seriousness in the midst of all of the ridiculousness Desmond brings with him ends up taking on a rather amusing bend.
* Assassin's Creed, Isra is getting fed up with being protected. She would rather be doing her job - killing people.
* Assassin's Creed is the first to have an internal set of achievements, called Abstergo Challenges.
* Assassin's Creed, it is even more obvious than usual that she is the Love interest.

* Assassin's Creed, it lists a whole bunch of famed artifacts and strange incidents that are connected to, stolen by, or caused by said Conspiracy. The list includes the Tunguska Incident, which was apparently the explosion of a covert laboratory under their control, conducting research on some kind of alien artifact - which, predictably, blew up in their face.
* Assassin's Creed it's actually very common for gamers to report that they spend more time sailing around the world or customizing their ship than they do playing through the main story.
* Assassin's Creed. It's genetic - Ezio, Connor, and Desmond walk the same way. Altair's traditional robes make it the most obvious out of the four though.
* Assassin's Creed IV: Black Flag, and the lives of the Kenways are only recordings that are simply viewed out of order.
* Assassin's Creed IV: Black Flag as a facade for their real plans, and to get money so.. Congratulations, you just gave the big bads sixty bucks!
* Assassin's Creed IV: Black Flag Bartholomew Roberts flees to Principe in the near the end of the game after the British and Spanish navies take notice of his conquests throughout the Caribbean. Edward Kenway catches wind of his trail and pursues him there, eventually arriving and forcing Roberts to take to the seas once again. His escape causes him to accidentally sail directly into an absolutely massive battle between the British and Spanish fleets both arriving off the coast at the same time. Both sides immediately turn their guns on Bart and he is forced to return fire in every direction while Edward attempts to navigate himself onto the ship to kill him.
* Assassin's Creed IV: Black Flag but he has a swarthier complexion than most British characters in the franchise and an Arabic first name.
* Assassin's Creed IV: Black Flag, but interestingly does NOT state outright that they are of Precursor origin.
* Assassin's Creed IV: Black Flag, but when the war ended it left him without a livelihood, and he turned to plain old piracy.
* Assassin's Creed IV: Black Flag, Charles Vane and Bartholomew Roberts.
* Assassin's Creed IV: Black Flag (co-developed with Canada and Ukraine)
* Assassin's Creed IV: Black Flag (co-developed with Italy and Ukraine)
* Assassin's Creed IV: Black Flag (co-production with Canada and Italy)
* Assassin's Creed IV: Black Flag DLC about two-thirds of the way through the main story. You also periodically interact with fellow pirates, one of whom, Anne Bonny, replaces Ade as quartermaster.
* Assassin's Creed IV: Black Flag during a home invasion. Yeah, that's how a pirate/Assassin goes, apparently. This also allows his son Haytham to be corrupted into becoming a Templar.
* Assassin's Creed IV: Black Flag, Edward and James are secretly tailing Governor Torres and the slaver Laurens Prins while they negotiate for the release of the captive Sage. However at the last moment, Prins backs out of the deal:
* Assassin's Creed IV: Black Flag fan. When sailing was removed from the series, some felt that it was a good thing, since the devs could now focus on creating large historical cities like in the original games instead of an empty sea with small locations scattered around, and those who felt sailing was too good to be removed.
* Assassin's Creed IV: Black Flag gives your ship an upgraded ram attack as a reward for defeating the four Legendary Ships, which are the hardest naval battles in the game.
* Assassin's Creed IV: Black Flag has Edward Kenway as a pirate who ends up killing an Assassin and taking his identity. It turns out that the Assassin was defecting to the Templars, so Edward is more than happy to play along, seeing an opportunity to get rich. Then the Templars figure out the truth, the other Assassins find him, and Edward ends up becoming the real thing. Bonus points for being able to pull it off for that long, having never previously heard of either the Assassins or the Templars.
* Assassin's Creed IV: Black Flag, if you have several hostile ships around you, they'll stop firing at you when you board one to take it as a prize. Same goes for

forts if you initiate a ship boarding mini-event near a hostile fort.
* Assassin's Creed IV: Black Flag: In the modern day portions of the game, you (as the point of view character) interact with a cell of Assassins who are hiding from the international Templar manhunt targeting them. How do they hide? By working openly in the lobby of Abstergo Entertainment, a subsidiary of the very company that is the front for the Templars.
* Assassin's Creed IV: Black Flag, Mary Read pulls one of these on some guards, so that they'll open the doors. She promptly kills them.
* Assassin's Creed IV: Black Flag—they also seem to include the Wandering Jew from the Bible, Jacques de Molay, and (seemingly) David Bowie.
* Assassin's Creed IV: Black Flag. Most of the pirates are former Privateers and honest sailors who eventually went rogue because of poor pay and terrible conditions. They set up a Pirate Republic in Nassau, with Benjamin Hornigold hoping that this experiment in democracy will eventually lead them to give up on their criminal origins. As time goes on however it becomes obvious that this is just a pipe dream:
* Assassin's Creed IV: Black Flag parodies Monkey Island in a discussion between some guards on the left side of Laurens Prins's mansion, during the mission where you have to infiltrate this mansion.
* Assassin's Creed IV: Black Flag released in Fall 2013, around the same time as the PS4 and Xbox One, and was likewise a launch title for both of those systems in addition to coming out on Xbox 360, PS3, and Wii U.
* Assassin's Creed IV: Black Flag returns to save Edward, after a bit of counter-mutiny once Rackham got too drunk.
* Assassin's Creed IV: Black Flag's boosted ram attack, but then again, by that point there's not much left to use it on.
* Assassin's Creed IV: Black Flag, serving as the Order's main supplier of weaponry and ammunition.
* Assassin's Creed IV: Black Flag: Sharks, including hammerhead, bull, and great white sharks, are the main enemies in the underwater segments.
* Assassin's Creed IV: Black Flag started out as a privateer for England, but quickly turned pirate when peace broke out.
* Assassin's Creed IV: Black Flag: Templar smuggler Julien duCasse keeps a box full of Hidden Blades, the trademark weapon of the Assassins, with him as "souvenirs".
* Assassin's Creed IV: Black Flag. The circumstances of the aforementioned scenario and the evidence found in his files (and the fact that he is the Head of IT giving him access to places the player shouldn't technically be able to go in) is more than enough to divert all suspicion from you. So, in the course of trying to eliminate you, he frames himself for the crimes you actually committed, albeit at his behest.
* Assassin's Creed IV: Black Flag the clothes), it is also very useful for open combat. They still use two of them.
* Assassin's Creed IV: Black Flag, the Templar Kenneth Abraham expresses his surprise that his enemy Antó was able to defeat him. Antó spells it out for him:
* Assassin's Creed IV: Black Flag to the non-silent Edward Kenway. Subsequent games, like Unity, Rogue, Syndicate, Origins and Odyssey, all have their assassins (or in case of Rogue, Templar) non-silent and completely drop the modern-day part.
* Assassin's Creed IV: Black Flag, two Sweet Polly Olivers on the same ship, no less! Apparently the practice of women joining pirate crews disguised as men was common enough for Black Bart to specifically forbid it in his formulation of the pirates' code. Ironically, both escaped hanging because they claimed to be pregnant, since it was a pretty standard way of forestalling a death sentence, as there wasn't any immediate method to definitively confirm the allegation. Read later died of a fever while in prison, while Bonny disappeared from the record.
* Assassin's Creed IV: Black Flag" voice — and the reveal is probably not too much of a surprise, especially if you know your history beforehand.
* Assassin's Creed IV: Black Flag were those requiring the player to tail NPCs on a journey, with special vitriol reserved for "eavesdropping" missions, which required

the player to remain within a (very narrow) circumference from the target.
* Assassin's Creed IV: Black Flag, where combat is harder and has consequences when done openly.
* Assassin's Creed IV: Black Flag, you can renovate a building in your base at Great Inagua into a brothel, which is signified by red lanterns.
* Assassin's Creed IV: Black Flag. You can then decide what you want to do with the captured ship: break it down for pieces to repair your ship, use it to lower your wanted level, or send it to join your fleet, which operates in the Atlantic.
* Assassin's Creed IV: Black Flag, your ship automatically comes with a ramming prow, and plowing into enemy ships is highly encouraged as a combat tactic. If you fully upgrade to the highest quality ram, you can punch through and destroy even the dreaded Man-O-Wars in just a few passes.
* Assassins Creed IV, the British navy sets up a blockade around the pirate stronghold of Nassau. Edward Kenway, Charles Vane and Jack Rackham manage to escape by loading Rackham's ship with explosives and blasting a gap in the blockade.
* Assassins Creed IV: The British wear red once again, the Spanish wear yellow, while the briefly seen Portuguese forces wear blue.
* Assassins Creed IV uses a similar loadout, letting Shay Cormac brandish a sword and dagger, two pistols, the rope darts and smoke bombs, and an air rifle with a grenade launcher in addition to the hidden blades.
* Assassins Creed IV, with the process streamlined from the previous game.
* Assassin's Creed known as "The First Civilization", "Those Who Came Before", or the "Isu" are given as being the inspiration for many if not all gods from ancient mythologies, the first individual to explicitly appear being named Minerva as the player character, Ezio Auditore in this case, immediately identifies her as such a god but she denies any actual divinity.
* Assassin's Creed know what Eagle Vision is — they call it the "Dragon's Eye" — and can tell Desmond has it, which gets him into hot water because they believe the ability to be limited to the Imperial Family and dragons, of which Desmond is neither. Things get even more complicated when William Laurence develops the ability independently during the events of the story when he's in his thirties, and still yet more complicated when Laurence and Desmond are fed a serum that enhances their Dragon's Eye/Eagle Vision and makes them see auras in even more colors than the AC-canon's red, blue, gray, and gold.
* Assassin's Creed, Lucy Stillman identifies herself as a friend of Desmond by holding her right hand open to her chest and curving in her ring finger (think "the shocker"). This identifies her as an Assassin, and therefore an ally of Desmond. Whether this is a Assassin salute or simply a coded gesture she hopes Desmond will understand is up for grabs - it represents Altair's loss of his ring finger to make room for the hidden blade.
* Assassin's Creed made many fans become revisionists of pirate history overnight, and its use of sea shanties as accompaniment also exposed many of tunes to non-folklore specialists.
* Assassin's Creed main characters not would get just a single game apiece and we'd learn almost nothing of what they did afterward.
* Assassin's Creed makes innovative improvements to the original designs.
* Assassin's Creed: Much like Altair before him, Aguilar's ring finger is severed during his Assassin induction. Interestingly, this should not have been necessary, as the Hidden Blade was modified in the 13th century so as to no longer require such a sacrifice.
* Assassin's Creed multiplayer actually subverts this as the winner of the game is more about how well and stealthy your kills are rather than how many. So there are situations where someone could have killed twice as many as you, but will often either win or lose by a few hundred points.
* Assassin's Creed Multiplayer is all about this. Each player is given the goal of assassinating specific players within an area filled with similar-looking NPCs. The player then must find and kill their target while avoiding assassination themselves.
* Assassin's Creed: Never directly seen, but implied by the emails in the first

game. For example, the term "Hurricane Season" has been abandoned...because now they can occur at any point during the year.
* Assassin's Creed: Odyssey about the Order of the Ancients, the precursors of the Knights Templar:
* Assassin's Creed: Odyssey. Additionally, the Persian Order of the Ancients is also led by the historical Xerxes I.
* Assassin's Creed: Odyssey. As the name implies, he's a rather jolly figure who helps Kassandra/Alexios captain his vessel, the Adrestia, due to their inexperience. He very much leans towards the fatherly side of this trope, and despite his lax attitude, Kassandra/Alexios come to call him the most honest man they know.
* Assassin's Creed: Odyssey can smash ships in half, especially if the enemy ship is damaged enough.
* Assassin's Creed: Odyssey cell who is fighting off Abstergo's Sigma Team and working with Layla Hassan.
* Assassin's Creed: Odyssey escort a wrestler to compete in the Olympics. Unsurprisingly, events conspire to force the Eagle Bearer to take his place.
* Assassin's Creed: Odyssey. For instance, the mythical monsters like the Minotaur are bonus bosses in the main game but mandatory for the DLC arcs that lead to the game's true final ending.
* Assassin's Creed: Odyssey has the Cult of Kosmos, who are essentially the Order of the Ancients of Ancient Greece. Like them, their members also wear masks to indicate their membership.
* Assassin's Creed: Odyssey has the Isu covered in them, going from their temples down their arms, the sides of their stomach and their legs. Once the Eagle Bearer gets their mitts on the Armor of the Dikastes set, they get a set of Lines of their own, in gold.
* Assassin's Creed: Odyssey has the young Alcibiades as an ally before he became one of the central figures of the Peloponnesian War.
* Assassin's Creed: Odyssey: If the Eagle Bearer delivers an assortment of wines (and other recreational substances) to a group of soldiers and regardless of whether or not they opt to partake, they zig-zag this trope upon waking up on a beach the next morning:
* Assassin's Creed: Odyssey in which you travel all over Ancient Greece, island to island, gives you Phobos, also known by players as 'the Horcycle'. You whistle for him, and he comes. He can stumble, and temporarily die if you gallop off a cliff too high, and when you've travelled about 60 seconds he can be called for again.
* Assassin's Creed: Odyssey like money and resource packs, experience boosters, money boosters, as well as maps that mark a range of collectibles on the world map.
* Assassin's Creed: Odyssey One side-quest has the main character faced with a jealous suitor having rendered a rival bald via a "love potion", gloating about how she's gotten away with it all. The player has three choices: Try and kill the woman herself (not a sensible idea at a crowded party), decide the insanity isn't worth it and leave, or... tell the guards that the woman's a witch, and have them get her. This actually works (and her decidedly ex-husband just goes "you know, that explains a lot...").
* Assassin's Creed: Odyssey on the unnecessary brutality and waste it produces, should you desire.
* Assassin's Creed: Odyssey plays it classically straight: unexplored chunks of the ocean on the map are depicted as ancient Greek maps decorated with artwork of soldiers fighting sea beasts.
* Assassin's Creed: Odyssey, so the briefest contact with such a human torch is enough to set yourself on fire, too, and being on fire deals a lot more damage than that enemy could've ever inflicted in person. Meanwhile, the amount of damage the enemy recievies is unlikely to total up to more than one or two normal blows from your weapon.
* Assassin's Creed: Odyssey The "Judgement of Atlantis" DLC has the Eagle Bearer doing this with Ros, a dog found around Elysium. Less so when Ros suddenly goes through a growth-spurt, gains two extra heads and the ability to breath fire...

* Assassin's Creed: Odyssey: The Spartans are red, the Athenians are blue (this even goes for the clothes of NPCs), and Cultist soldiers are Purple.
* Assassin's Creed: Odyssey, though, the Eagle Bearer is able to kill the sharks while swimming instead of just driving them off, and some side-quests have killing them as an objective.
* Assassin's Creed: Odyssey to romance male and female characters alike.
* Assassin's Creed: Odyssey which uses the correct Greek names for the characters and locations though the Eagle Bearer and most of the NPCs use the term "Greece" instead of "Hellas" to describe their homeland not to mention that the word "Greek world" is also used to describe specific colonies of the city-states.
* Assassin's Creed. Of course, Adam and Eve saw it as unnecessary slavery...
* Assassin's Creed of mankind, once ruled the world, spread across the entire planet, with science and technology millennia ahead of anything mankind could achieve... and then the Toba Catastrophe happened. By the modern day, the only sign they ever existed at all are a few ruins scattered about the place, in hard-to-reach locations, and a handful of obscenely dangerous artifacts they left behind.
* Assassin's Creed of novels, comics, short films, and a feature film.
* Assassin's Creed (one of the spinoff handheld games) wherein he turns around toward his attackers, spreads out his arms, and just leans back over the edge.
* Assassin's Creed. One of your submissions in each assassination is to seek out very specific people, sit on a bench nearby, and listen to their conversations. These inevitably give you some information about the target or ways you can infiltrate their strongholds and kill them.
* Assassin's Creed onwards. With so many different angles to each game, it's no wonder the audience gets up in arms about the new games as they come.
* Assassin's Creed Origins, albiet with just melee weapons and a single bow. Technically these games manage to play it both ways: while you can carry an enormous amount of weapons, you can only hold a tiny selection of them during gameplay.
* Assassin's Creed Origins as Bayek and Aya roll Cleopatra up into a rug to sneak her past Ptolemy’s guards so she can meet with Julius Caesar.
* Assassin's Creed Origins, Bayek ends up losing his ring finger after a mishap with his Hidden Blade caused it to trigger while in the middle of a struggle, which would eventually begin the above ritual.
* Assassin's Creed Origins, Bayek manages to take in details around the scene and reconstruct events from there.
* Assassin's Creed Origins Cleopatra cares about). Not that this stops Bayek from helping anyone he runs into while hunting the Order, that is.
* Assassin's Creed Origins depicts the relationship between Julius Caesar and Cleopatra with historical accuracy in regards to their ages: when the two first meet, he is in his mid-50s, while she is 21.
* Assassin's Creed Origins four-part comic mini-series details the fall of Cleopatra 14 years after the game.
* Assassin's Creed Origins gives us the Order of the Ancients, the Egyptian equivalent of the Templars with their members wearing masks representing which temples they work for while also serving as the puppet masters behind the scenes.
* Assassin's Creed Origins has the Phylakes, a paramilitary police force that works to protect the hegemony of Cleopatra and the Ptolemy dynasty over all of Egypt. They have also replaced the Medjay of the New Kingdom as personal bodyguards to the Pharoah.
* Assassin's Creed Origins. It's much more recent and modern than most examples, though the spirit and aesthetic remain especially in the non-Greco Roman areas such as Siwa where the setting is more akin to the pre-Prolemaic period.
* Assassin's Creed Origins Kermit wished to destroy Egypt and reshape it in his image.
* Assassin's Creed Origins, Layla is now an Assassin, and seeks to find Isu artifacts through the memories of Kassandra and Eivor, respectively, to prevent the end of the world.
* Assassin's Creed Origins located inside a temple but they would quickly evolve to

include rich, upper-class elites across the known ancient world.
* Assassin's Creed Origins of sorts with Bayek, a Medjay who serves as the protector of the Siwa Oasis which is far away from the Greco-Roman influenced cities of Alexandria and Memphis in Ptolemaic era Egypt.
* Assassin's Creed Origins to unwittingly aid them in their quest for complete control of the known world.
* Assassin's Creed Origins: Two different quests in Libya deal with former gladiators who were promised freedom after winning a certain amount, only for their masters to renege because their fights earned so much money, at which point the gladiators made a break for it anyhow. In the first, the slave's owner doesn't even give a rat's ass about the escaped slave, just the fact he stole the man's favourite sword.
* Assassin's Creed Origins, which portrays the founding of the Assassin Brotherhood in Ptolemaic Egypt as the Hidden Ones by Bayek of Siwa and his wife Aya.
* Assassin's Creed outside of their citadel. His legacy extends even to Assassins in the modern day, who hold him in high regard for rewriting the rules of the order and implimenting many changes to their equipment and training methoods.
* Assassin's Creed penultimate boss and the otherwise highly scripted final fight, can be instantly killed with the hidden blade counter.
* Assassin's Creed positing that the Assassins and Templars have been fighting each other for tens of thousands of years and, naturally, every single game and much of the expanded universe details small parts of this history-spanning conflict:
* Assassin's Creed puts a twist on this: Since Desmond Miles' ability to view Altaïr's genetic memories ends with the conception of his second son, Altaïr's subsequent memories are viewed secondhand, by means of the Masyaf Keys that Ezio uncovers during the course of his adventure. So in this case it's a genetic memory of Ezio viewing the stored memories of Altaïr.
* Assassin's Creed: Revelations 30 seconds later, it turns into a tower defense minigame.
* Assassin's Creed: Revelations dancers, though the desired effect is still the same.
* Assassin's Creed: Revelations Ezio and the other Assassins pretend to be minstrels to infiltrate a party and protect Prince Suleiman from Byzantine killers. Towards the end, one of them charges Suleiman, but Ezio breaks his lute in half and stabs the killer in the heart with the handle.
* Assassin's Creed: Revelations, Ezio's primary goal in Constantinople is to recover the keys that he needs to access the library at Masyaf but along the way, he keeps getting roped into the fight against injustice, and not unwillingly. As he needs help from the Assassins in the city, he winds up working to bolster them in their fight against the Templars. He also befriends Suleiman, the future Sultan, whose father and uncle are involved in a war for the succession of the Sultanate. Further, he meets and falls in love with a librarian in his search for the keys and is eventually forced to protect her from his enemies. At this point in his life, he is bone-weary of the constant struggle, but as long as he remains an Assassin, he must keep fighting it.
* Assassin's Creed: Revelations gives its characters a "hookblade," which will allow them to use wires as ziplines.
* Assassin's Creed: Revelations gives us yet another example. A senator complains that his organization has been demoted to useless functions, like legislating the length of women's sleeves (a real thing). The heralds also make announcements about that same recent legislation. Wearing their sleeves too short was a punishable offense for women.
* Assassin's Creed: Revelations has both the Master Assassin Armor and Ishak Pasha's Armor, though the former can be obtained as soon as you can recruit and level assassins, the latter requires a certain story mission to be beaten that unlocks an area where one of the collectibles for the armor is contained. In the case of weapons there's Yusuf's Turkish Kijil, the Almogavar Axe and Altair's Sword.
* Assassin's Creed: Revelations has this, between the Ottoman guard, the Byzantine

Templars and their guards, and the Assassins. It's not uncommon to see both of the opposing factions fighting (or sometimes cause it by forcing them to meet somewhere).
* Assassin's Creed: Revelations". His skeleton is found on that chair in the same position.
* Assassin's Creed: Revelations, in which Ezio must discreetly assassinate (specifically, with poison) Templars who try to take the local Romanies' money chest so that they'll think the chest itself is "cursed" and be too scared to try to steal it.
* Assassin's Creed: Revelations, is a psychotic female AI snarking at you.
* Assassin's Creed: Revelations just exactly how that first catastrophe happened.
* Assassin's Creed: Revelations lying lifeless in her house, on the other end of a carpet of dead Templars. A quick count tallies up at least fifteen dead Templars left in the shop, and that's not counting any that he wounded or that managed to get away unscathed.
* Assassin's Creed: Revelations makes the framing device recursive by having Ezio (the Renaissance-era ancestor) use First Civilization artifacts to experience memory-recordings left by Altaïr (the Crusades-era ancestor), thus crossing over the bloodlines since Ezio was not Altaïr's descendant. So you're playing a character experiencing the memories of a character who is himself experiencing the memories of a character.
* Assassin's Creed: Revelations moment with a terrified mother clutching her child as an explosion slowly engulfs them. After this, the hologram simply mentions that out of two civilizations (humans and the First People), only about 10,000 individuals survived after only a few days of the catastrophe.
* Assassin's Creed: Revelations replaces the Papal Guards with the Janissaries, who are equally deadly.
* Assassin's Creed: Revelations: The Animus sections take place in 1511 (well, the first half of them; the last few sequences bleed into 1512), exactly 500 years before the 2011 release date and the 2012 setting of the modern-day gameplay.
* Assassin's Creed: Revelations, the protagonist Ezio snaps a soldier's neck like a twig. Considering that he's a trained killer and pretty darn buff, it's reasonably believable.
* Assassin's Creed: Revelations there is a short shot of Desmond sporting one of these.
* Assassin's Creed: Revelations this trope at once. One of the sidequests involves a Romani woman who is having trouble with the guards because everyone thinks of her and her people as witches (which is not the case). Her solution? Take a expensive-looking chest and have Ezio poison everyone who goes after it to convince them that it's actually cursed. It works spectacularly.
* Assassin's Creed: Revelations (who was watching the Apple) would later set to paper.
* Assassin's Creed: Revelations, with memories set during the Third Crusade and Mongol conquest of Syria.
* Assassin's Creed, Robert De Sable attempts to persuade King Richard to form a truce with the Saracens and unite against the Assassin Brotherhood, since Altair is responsible for murdering several prominent citizens on both sides of the conflict.
* Assassin's Creed: Rogue, and considering how popular that game was most don't see this as too big of a problem.
* Assassin's Creed: Rogue, and your ship doesn't even have to be crippled for that, just rammed.
* Assassin's Creed: Rogue displays it from the perspective of Dorian's son, Arno.
* Assassin's Creed: Rogue further backs Haytham's point. It shows that the Assassin's ideals of absolute freedom for everyone ultimately leads to anarchy and lawlessness while the Templar's desire for power and control is ultimately to spread order and stability. The Assassins are also shown to be just as ruthless as the Templars they oppose as well, targeting innocent people for simply writing articles calling attention to their actions or getting in the way of their agendas.
* Assassin's Creed: Rogue, George Washington's half brother Lawrence Washington is

a Templar. George is never made aware of this.
* Assassin's Creed: Rogue. He is so iconic Abstergo Entertainment would obviously include him as an easter egg in their game.
* Assassin's Creed: Rogue is likewise a dual-wielding swordsman in the vein of Edward, but favours a sword and dagger combo.
* Assassin's Creed: Rogue of the Colonial Assassins, and the title screen goes a step further by having the shattered symbol turn to reveal a Templar cross formed from the shards.
* Assassin's Creed: Rogue, since the events deal with the fall of the Colonial Assassins some time before Connor meets Achilles.
* Assassin's Creed: Rogue sports a pretty nifty greatcoat after he's formally inducted into the Templars. The one he wears during his transition period from the Assassins to the Templars is pretty good too.
* Assassin's Creed: Rogue: The British are red, the French are blue and the Assassins are orange.
* Assassin's Creed: Rogue was caused by Shay Patrick Cormac disrupting a Piece of Eden.
* Assassin's Creed: Rogue, which allows Shay to engage in river travel.
* Assassin's Creed series explains that anything in human history, ever, happened because either a Templar or an Assassin did it.
* Assassin's Creed series has the player eavesdrop on people who are sometimes up to 30 or 40 feet away, often on crowded streets. This may be part of the assassins' heightened senses, along with Eagle Vision.
* Assassin's Creed series have managed to get at least one scar on their faces, either over the right side of their mouth (Altaïr, Ezio, Bayek, and Desmond), beneath their eye (Connor and Arno), or through one of their eyebrows (Edward, Shay, and Jacob). Some characters, such as Bayek and Edward, have multiple scars.
* Assassin's Creed series simply running up the wall next to a ladder is faster than climbing it.
* Assassin's Creed series, some Assassin members who can use Eagle Vision are the descendants of Those Who Came Before.
* Assassin's Creed series started out pretty abusive what with creating and enslaving humanity with their Pieces of Eden. The combination of a slave revolt and a solar flare that nearly destroyed all life on Earth changed that. Before dying off, Those Who Came Before worked together with humanity to rebuild the world, and they left behind tools and knowledge (in the form of the Pieces of Eden) to give humanity a fighting chance when the next solar flare hits Earth.
* Assassin's Creed series; the "Leap of Faith" is a signature move of the Assassins.
* Assassin's Creed. Several times, it's shown that the Templars have a tendency to kill anyone who learns too much about them, and on at least one occasion, the Assassins themselves have been shown doing this as well.
* Assassin's Creed shifts to a fantastic art shift where episodes in China, India and the Soviet Union take on the aesthetic elements from the respective culture and time period.
* Assassin's Creed shows produced over the last 14 years. Almost all of it is considered canon, and is regularly referenced within the games.
* Assassin's Creed's inventions (tank, bomber, boat-mounted artillery, machine gun) without even reading the manual.
* Assassin's Creed's miracles. You can even do some of it in the games, such as Altaïr using an Apple of Eden to defeat an entire army by causing them to think an army of assassins is striking them down.
* Assassin's Creed, states that Shaun and Rebecca are inseparable. Apparently not.
* Assassin's Creed still more or less presents simplified versions of actual historical periods, nations and cultures.
* Assassin's Creed: Subject Four is what allows the Templars to enact the Great Purge on the Assassins and rig the election so that Bush ends up winning.
* Assassin's Creed, such as the Apples of Eden. By the present-day, the Templars are winning with the Assassins playing catch-up.

* Assassin's Creed: Syndicate" and wonders if the team are trolling him by reprogramming Helix to mess up his taste impressions.
* Assassin's Creed: Syndicate, a segment featuring Jacob's descendant has her working with a young Winston Churchill, presumably before he became a Templar.
* Assassin's Creed: Syndicate being the moment when he released his bisexuality.
* Assassin's Creed: Syndicate brings back the dual blades, and now they have a hook attached to propel the user on buildings and make impromptu zip-lines.
* Assassin's Creed: Syndicate by performing a sad song on the piano. When a servant enters the room to give him an update, he barely gets one word out before Sterrick blows his head off.
* Assassin's Creed: Syndicate - constantly chastising herself for falling for Henry, a fellow assassin.
* Assassin's Creed: Syndicate, Evie Frye invented the word "telephone".
* Assassin's Creed: Syndicate features brief interludes where the player controls Jack the Ripper, long before his identity is revealed at the DLC's end.
* Assassin's Creed: Syndicate has Henry and Evie learning floriography by collecting flowers. Henry then uses a bouquet of flowers to propose to Evie, with each one having a special meaning.
* Assassin's Creed: Syndicate He at one point mentions that they all have "side notes of sturgeon and the dark tears of a recently divorced ploughman" and wonders if Rebecca is trolling him by messing with his taste impressions through the Helix.
* Assassin's Creed: Syndicate: If one looks at things from Henry Greens point of view, he's a clever analyst but a bumbling field agent, and Evie Frye swings into his life like the damn dashing assassin dame that she is, kicking ass all over the place while taking over London's underworld on the way to finding mystical artifacts.
* Assassin's Creed: Syndicate is about a British working-class crime syndicate in London led by the Frye twins of the Assassin Brotherhood in the late 1860s.
* Assassin's Creed: Syndicate, making them rethink the future of the series.
* Assassin's Creed: Syndicate murderers, all acting independently, leaving the Frye twins to figure out who gets the credit (and criminal charges) of actually killing the man.
* Assassin's Creed: Syndicate. On another note, one of the Frye Twin's friends is Ned Wynert, a transgender man who successfully runs a criminal enterprise without, from what we see, anyone having any problem with him being transgender.
* Assassin's Creed: Syndicate reciprocate, what with Roth being a sadist and would-be child murderer.
* Assassin's Creed: Syndicate, the city of London is embroiled in a gang war between the Assassin-backed Rooks and the Templar-backed Blighters, complete with referees for official battle between the bosses.
* Assassin's Creed: Syndicate, the Templars have invoked this, worming their way deeply into London's economy and infrastructure so that taking out any one of them would collapse the entire city. Unfortunately for them, Jacob Frye doesn't fully realize that and is happy to crash through their Order like a bull in a china shop. Fortunately for London, his sister Evie is equally good at cleaning up the mess left behind.
* Assassin's Creed: Syndicate: Two versions of Spring-heeled Jack appear as a side mission Jacob and Evie Frye can investigate.
* Assassin's Creed: Syndicate who's giving a medical presentation. The doctor first notices something is wrong when he sees that his "corpse" is still wearing boots...
* Assassin's Creed: Syndicate you're given a short cutscene. If there were any guards left alive after freeing the last group of children, the cutscene shows your Rooks beating them up while the kids run for safety. If you eliminated all the guards beforehand, it instead shows the Rooks calmly reassuring them and walking with them out of the factory.
* Assassin's Creed systematically kill all the leaders of the Templar-control Blighter gang.
* Assassin's Creed takes a good hour and a half to get to your first real mission. That's if you're quick.

* Assassin's Creed: Takes place during the Crusades when the Templars were working openly, so naturally Robert de Sable was a Templar.
* Assassin's Creed technology left behind which inspired all the religions in the world. The exception is the aforementioned Manuscript.
* Assassin's Creed: Templars The Black Cross does one of these... then ruins the moment by saying that, as much as he does it, he can never stop glass from getting everywhere.
* Assassin's Creed. The Assassins keep stumbling onto Pieces of Eden, artifacts that can bend the fabric of reality, control minds, give supernatural powers, grant visions and resurrect people, and despite their entire ideology being thoroughly against the use of these artifacts to avoid tyranny, it seemingly never crossed their mind to just destroy the damn things. Instead, the artifacts are locked away in wooden boxes, put in convoluted dungeons, or simply thrown into the sea. The only cases of artifacts being destroyed are actually from the Templar Order misusing them, the people who vouch to use the Pieces of Eden to forward their plans.
* Assassins Creed, the better world they are striving for means nothing to him, only the rush of power and the kill. Probably best described by himself when confronted about his misdeeds:
* Assassin's Creed, the Greco-Roman gods Jupiter, Juno, and Minerva, among others, were actually aliens who came to Earth and created humans in their own image. The humans rebelled, led by Adam and Eve, who were human-precursor hybrids. The series plays around with a lot of ancient myths to fit a grand narrative.
* Assassin's Creed: The protagonists typically have this as their way of life. There are exceptions, but in general, most of them are professional killers that you control to do their work. While they're functionally more vigilantes, they are not above putting actual contracts on their Templar targets.
* Assassin's Creed The shade helped keep your head cool if you needed to walk a long distance. It also matches the local scholars' robes perfectly, making it easy to blend in.
* Assassin's Creed: The Templar Order and its precursors tend to be comprised of royals, plutocrats, titans of industry, and other members of the social elite aside from a few exceptions.
* Assassin's Creed. They believe that if humans ever found out the truth about the Isu AKA Those Who Came Before, there will be world wide panic.
* Assassin's Creed, they had triple helix DNA which made them a related but distinct species from their creations.
* Assassin's Creed. This is what Altaïr used to think about assassinating, before he was demoted to novice and forced to kill powerful people with basic equipment as penance for his arrogance. So he stabs Majd in the neck twice.
* Assassin's Creed, this trope applies to the series' versions of Roosevelt, Stalin, and Churchill, who all colluded with Hitler to arrange the war.
* Assassin's Creed: Those Who Came Before were the inspiration for divine worship in many cultures after creating human beings in their image. They were the first Etruscan gods along with inspirations for many other pantheons.
* Assassin's Creed to indulge in recreations of actual historical events, places, and figures in the Animus parts of the games.
* Assassin's Creed to safety after she finally collapses from an arrow wound to her leg. After running and fighting with an arrow sticking out of her leg for quite a distance, mind you.
* Assassin's Creed trailer has Arno racing to stop his friend from being executed by guillotine.
* Assassin's Creed under a lot of pressure, but would it kill him to put his security pen on the inside of his pocket so that he doesn't lose it and necessitate the entire complex's passwords being reset, or punctuate his emails, or treat the Animus subjects like people rather than vending machines for genetic memory?
* Assassin's Creed: Unity, Arno must infiltrate the Cult of Baphomet to kill their leaders. You first have to steal a couple chalices from the Notre Dame to convince them to let you join.

* Assassin's Creed: Unity, a) the game was a buggy mess, and b) the primary topic of conversation was not the game itself but the absurd and abusive embargo.
* Assassin's Creed: Unity avert the trope entirely, as wearing weapons has gone from common practice to illegality, and they now fight with easily-concealable knuckles, staves, and kukris.
* Assassin's Creed: Unity goes back to one blade, but now it has a mini crossbow attached to it; the new moniker is "Phantom Blade".
* Assassin's Creed: Unity has the Phantom Blade, an attachment to the Hidden Blade that silently launches blades from a distance. It's essentially a silent version of Ezio's arm-mounted pistol.
* Assassin's Creed: Unity: It is really, really, hard for a game about the French Revolution to escape this. Especially for a Franchise that has formerly prized itself for historical research and an even handed look at the American Revolution.
* Assassin's Creed: Unity: The protagonist, Arno, despite being a fallen aristocrat, actually isn't all that invested in the French Revolution the game takes place during. Rather, his reasons for fighting the templars are personal, trying to take down the people involved in his adopted father's death.
* Assassin's Creed uses this trope extensively. In all games, the Eagle Vision paints allied characters blue, enemies as red and targets as yellow. In addition, each faction wears clearly distinctive colors so you can tell them apart at a glance. This applies to their minimap icons as well, when it's relevant.
* Assassin's Creed: Valhalla (a major character in the game) as a child long before she comes to power and boots the Danes out of England.
* Assassin's Creed: Valhalla A viking couple has been having some marital troubles and only ever had any affection while they were raiding and pillaging. Eivor offers to light the spark by trashing their home. It's a start, but then to do one better, they light the couple's house on fire! That's enough to set the spark back in their marriage.
* Assassin's Creed: Valhalla had this with finding Nodens' Arc. It involved not only having to decode the in-universe Isu language, but also decode symbols on the Collector's Edition of the game's box.
* Assassin's Creed: Valhalla is the Grand Maegester of the Order of the Ancients.
* Assassin's Creed: Valhalla, now with the option for Eivor to enter an official relationship with one love interest, a change from the series of flings allowed to Kassandra and Alexios.
* Assassin's Creed: Valhalla perfected and transplants it into Norse and Celtic mythology, interspersed with a bunch of powerful human bosses that're part of sidequests.
* Assassin's Creed: Valhalla version launched a week later to coincide with the launch of that console.
* Assassin's Creed via a virtual reality simulation. Prolonged use of the Animus causes something called a "bleeding effect", whereby the skills of one's ancestors imprint themselves upon the user. Thus, someone can learn to be a master Assassin through mental osmosis of a sort, with only a few potential side-effects... like insanity.
* Assassin's Creed was released on the same day it begins in game (30.10.2012) to play into this. The game itself ends on the former date.
* Assassin's Creed was re-released for the PC as the 'Director's Cut Edition', which features a few new types of missions, such as Archer Assassination Challenges.
* Assassin's Creed was taking them out and replacing them with a more natural mission system.
* Assassin's Creed when you skin them—and that's probably the goriest part of the game, since you're able to see red bones and rib cages afterward.
* Assassin's Creed, where Cain was the first Templar and Abel had an Apple of Eden. You know Atlantis? Supposedly an ancient Isu city. A lot of gods and goddesses, both of mythology and actual religion, were just members of the Isu (e.g., Juno, Jupiter, Minerva, etc.). And that's not getting into the Hidden Ones and the Order of the Ancients, the precursors to the modern-day Assassin Brotherhood and Templar

Order.
* Assassin's Creed, where Noctis and his party dress up as Assassins, complete minigames around Lestallum, and assassinate some imperial troopers with hidden blades.
* Assassin's Creed where the Assassins are divided between supporting either Altair or another Assassin named Abbas.
* Assassin's Creed, which allows players to purchase "Helix Credits". A select few items are only obtainable with these credits (namely, several in-game maps that reveal the location of collectibles and missions that, by themselves, can be found by exploration), but everything else is equipment that is also obtainable with the various types of in-game currency (namely, Livres and/or Creed Points that are obtained by performing in-game "assassinly" actions like using Fast Lifts or stealthy assassinations).
* Assassin's Creed, which ended up better received and improved the formula quite a bit.
* Assassin's Creed, which while still expensive, would be low enough for the average person to be able to save up enough to buy one (And for the typical blacksmith to actually be able to find a customer able to afford it).
* Assassin's Creed while at the same time they have slaves in Haiti, which contradicts with their creed.
* Assassin's Creed who operated in fortresses and specialized solely in assassination. Eventually, the Assassins without losing sight of their goal (opposing Templars and using force as and when necessary), take on additional responsibilities and duties (sponsoring revolutions, helping the local infrastructure, building communities and so on and so forth) that nonetheless creates problems when they try and fail to reconcile the gap between their original purpose and new responsibilities.
* Assassin's Creed, who said the only difference between him and the revolutionary leaders is that "I do not feign affection."
* Assassin's Creed with Isu technology and temples scattered throughout the world. The present segments also incorporate sci-fi elements as well with the protagonist reliving the lives of an Assassin inside the Animus, a virtual reality machine developed by the Templar-run Abstergo Industries.
* Assassin's Creed, you can finish the 3-part boss battle in about 10 seconds if you use the hidden blade to counter, or if you get a knockdown-type counter with a sword, sprint over while switching to the hidden blade and nail 'em when they're prone/supine.
* Assassins frequently interacts with the villainous men whose ballads he sings.
* assassins guild. According to legend, the Night Mother was once a mortal woman who sacrificed her five children in the name of Sithis and became the wife of Sithis after her death.
* Assassins' Guild Diary inverts the "bizarre parallel explanation" trope; it doesn't try to justify the word "byzantine" at all, but does claim the politics of the ancient Komplezian Empire were so byzantine, they led to the modern Morporkian word "complex".
* Assassins' Guild Discworld Diary, reveals that a few Polly Olivers had enrolled in the then all-male Guild school, by means of a short haircut and a note excusing them from gym classes. One former SPO became head tutor for Black Widow House after the Guild school went co-ed, and now teaches Edged Weaponry and Fencing.
* assassins guild she is. (There have been a few hints dropped, but so far, not enough to piece together anything close to a complete picture.)
* Assassins handsy with Sara Jane Moore while giving her shooting tips. This backfires on him when he tries to go for a kiss and Moore fires her gun near his ear to make him back off.
* Assassins have a loose association with the truth at best, but this exchange takes the cake:
* assassins have make it absolutely clear they're scared by how skillful Corvo is. God only knows what the ordinary mooks think of him, seeing as they don't have access to supernatural powers.

* Assassins have the same deal with the Assassins Guild. They have to
* Assassins, Hinckley fires his gun repeatedly at a photograph of President Reagan. Each shot causes the Reagan photograph to disappear, then reappear brighter than before.
* Assassins in general are known to conceal so many knives on their person that they could qualify as a live-in kitchen.
* Assassins in "Something Just Broke," which strips away the humor and focuses instead on the precise moment when those same everyday people heard the news of successful presidential assassinations—"I'll remember it forever...where I was, what I was doing..."
* Assassins is all about attempted assassinations of U.S. presidents, both successful and failed.
* Assassins is an amusement park in some sort of temporal limbo, where people from all periods of American history meet and mingle. The reason why it’s dangerous? Eight men and women who each attempted to assassinate a President are also there, and they become inspired to kill their targets by the Proprietor of a shooting gallery.
* Assassins) is searching for rival hitman Miguel Bain. On hearing that a priest wants a cab to take him to the airport, Rath instantly says "That's him", implying that it's an old assassin's trick.
* Assassins, is the only bass among them — possible subversion. The Proprietor is also a bass, and certainly a wee bit sinister himself.
* Assassins Miguel Bain dislocates his thumb to escape police handcuffs after being arrested.
* Assassins: Miguel Bain is almost casual about blowing away any law enforcement officer who gets in his way. When there's a manhunt underway for Miguel, his rival Robert Rath berates him for being so stupid/psycho to attract attention by killing cops.
* Assassins, Miguel Bane uses his empty water bottle to relieve himself while in his sniper nest. Justified because he can't look away from the front of the bank across the plaza, although he ends up spilling some when he thinks he sees his target.
* Assassins of Gor has Tarn races — basically the same thing, except with giant birds people ride.
* Assassins of Gor, Tarl is once again condemned to gladiator games, this time as a part of a group of alleged prisoners, all of whom are allegedly blindfolded so they have to swipe about with their swords more or less randomly. In actuality only Tarl is a prisoner and is to be genuinely blindfolded; the other "prisoners" are all part of the King's guards and have gimmicked blindfolds they can see through.
* Assassins opens with a corny circus waltz arrangement of "Hail to the Chief" as the curtain rises on a shooting gallery of American presidents.
* Assassins ploy. Neither can get out of the taxi without being killed, so the younger (and crazier) hitman breaks the stalemate by threatening to shoot an innocent bystander unless he starts driving. Then follows a car chase to avoid pursuing police vehicles while at the same time each hitman is trying to kill the other.
* Assassin's Pride"; rather than being the story, it's some text describing and discussing it. Since the anime is otherwise in Japanese, English texts seen elsewhere in plain writing could be counted too. These all have the feel of filler you're not supposed to look at too closely, like the pages that all contain the same text in Episode 8.
* Assassins, Sara Jane Moore attempts to bond with Squeaky Fromme by using terms like "groovy" and "psychedelic". Fromme comments that she sounds like a nark.
* Assassins. The title of the play makes it rather obvious as to why these two ladies fit the trope, even if Fromme is the most incompetant assassin on the stage.
* Assassins were a character class in 1E, with a chance of achieving an instant kill if they attack with surprise. In 3E, they were a prestige class with a "death attack", which could either paralyze
* Assassins, where Squeaky Fromme reads the inscription on the back of the photo of

Jodie Foster without any pauses, ending with:
* Assassins, with his part starting with "I am nothing/you are wind and water and sky/Jodie/tell me Jodie how I can earn your love/I would swim oceans I would move mountains/I would do anything for you/what do you want me to do?"
* "Assassin": While busting a passport forger, the FBI discovers evidence of a plot to murder the last member of an influential South American political family.
* Assassin Zer0 has a ranged combat style entirely defined by these. The B0re upgrade, among other things, highlights weak points, and most of the Sniper tree buffs critical hit damage in one way or another. This can get particularly nasty with a Jakobs sniper rifle, which has a much higher damage multiplier against weak points than any other brand of gun.
* assault and battery to get his Golden Crisp. He was basically Popeye with cereal instead of spinach.
* Assault Android Cactus, Starch is asleep on her character select screen. When you select her, she jolts awake and yells "Pineapple!"
* Assault and Temporal drones are purchasable Minions that aid in attacking. Assault drones attack enemies directly while Temporal ones slow down enemies.
* Assault at Selonia has Han trying to fly a horribly-built Selonian ship. Nearly all the lights on the control panel are green, but that's not good - for Selonians, red is positive, green is disaster. It's noted the reason for this is because Selonian blood is green, as opposed to human red.
* assault cannons and AV14 laughs off even autocannons and plasma fire. It takes a lucky rocket or something even more powerful (meltagun, railgun) to even scratch it. As of 8th Edition, this is no longer the case.
* Assault Cannons would fire thousands of rounds per minute — if said ammo supply was large enough. No terminator model or art ever looks like he's carrying around more than a few seconds' worth of assault cannon ammunition.
* Assault Cube. With booming "Headshot" announcement, and double kill-score.
* Assaulted Nuts something. The customer asks for a can of beans. The owner sighs, and his hideous wife appears, eating the beans.
* Assault/Escort carriers: Many classes of smaller Yuuzhan Vong ship, plus there's an actual Imperial ship called an "escort carrier" that does nothing except haul around a couple squadrons of fighters.
* Assault Guns, where their heavier firepower makes it easier to level buildings filled with enemy troops. They differ from Self-Propelled Artillery in that their gun fires directly at a target, and they tend to have heavier armour.
* Assault Horizon, we have a mission where you have to avoid pockets of enemy radar in an attempt to slip into an area undetected.
* assaulting and kidnapping Jeff, Hickey, and Britta by claiming that they learned a valuable lesson.
* Assaulting castles as a first resort. This was only done very rarely, and even then they usually just waited outside the castle walls until the enemy starved or surrendered, though this failed as often as it succeeded due to logistical issues on the part of the besieging force.
* Assaulting convoys full of goodies is one of the many open-world activities in the
* Assault Lily Bouquet from Moyu, which annoys her. When Moyu calls it cute at one point, Miriam responds that it's creepy.
* Assault Of Darkness against a rare Irish mummy, preserved in the peat bogs near Dublin.
* Assault of Raven's Ruins. The Sceptre of Truth forces anyone to speak the truth for as long as they touch it.
* Assault of the Mountain Man The newspaper headlines reporting on the robbery the next day do not shy away from poking at how the robbers were fooled in this manner not once, but twice.
* Assault on a Queen, and the characters are showing discovering the issues involved and working out ways round them. Even then, they acknowledge that the plan is risky and relies heavily on the fact that ships officers are trained to be cautious and take no unnecessary risks

* Assault on a Queen. As the U-boat is designed to operate underwater, it has suffered little damage from sitting on the seabed; although they do comment that they were lucky none of the valves had failed and flooded the boat. By emptying the ballast tanks, they are able to refloat the U-boat and tow it to shore, where they spend considerable time cleaning barnacles and other crud off the hull and replacing all the components (gaskets, batteries, etc.) that have perished in the last 20 years.
* Assault on a Queen (he's already hauling a crateful of gold bullion) and gets shot dead by one of the ship's officers.
* Assault on a Queen, the sub surfaces too close to the Coast Guard cutter for them to use their main guns. Instead, the captain orders the cutter to ram the sub
* Assault on a Queen, the treasure hunters find the body of the U-boat captain still at the periscope. Eric explains that he would have ordered the crew off and then submerged the sub and blown the ballast tanks to keep it out of enemy hands.
* Assault on Dark Athena: The sadistic Jaylor expresses his intent to rape Silverman, and asks Riddick to "rile her up" for him. Riddick refuses and replies that he just murders people.
* Assault on Dark Athena. When Santana gets on top of Dahl to rape her, Riddick grabs his knife as if preparing to intervene, even though this would signal his presence. It turns out that he didn't need to anyway, as she can easily beat up Santana.
* assault one. The author tried to depict them more realistically then a solid shell build around a star. In this setting Dyson Spheres (there are four, formerly five before one was destroyed) are constructed from a flexible material. They are practically bubbles around a star kept inflated by the solar wind. Habitats are anchored to the interior of the sphere. The setting also has widespread gravity generators, so that's not a problem either. Of course, when we say "more realistic"... the galaxy's general populace assumes the buuthandi to be more like the cloud or network of orbiting satellites envisioned by Dyson. One character goes nearly catatonic upon learning that they are fully contiguous.
* Assault on Precinct 13 (1976) had a similar trope where a guy goes into a precinct that was in the process of being shut down. He tries to warn them about a gang of murderers that's trying to kill him. But he's in too much shock to get the words out.
* Assault on Precinct 13 (1976), in once of his first appearances, Bishop is listening to radio news about "Street Thunder," the oddly gigantic, multiracial, murderous, and well-armed gang that ends up performing the unexpected "assault" of the title.
* Assault on Precinct 13 (1976), the gang attacking the eponymous station isn't united by race or much of anything really. The police officers even mention how weird it is. It fits though, they have no dialog and almost seem like a supernatural force.
* Assault on Precinct 13 (2005): Marion Bishop. The show starts with him brutally killing an undercover policeman in a church. He later fights alongside cops who have him under arrest in the interest of "self-preservation". But at the end of the show, he walks away from the downed Good Guy, Sgt. Joe Roenick, despite the Good Guy now being his Sworn Rival.
* Assault on Precinct 13 (2005). Most notably when two of the prisoners decide to abandon the group and make a break for it, and Bishop coldly points out that they could use them as cover to let two others get to a vehicle to get help.
* Assault on Precinct 13 (2005) with very superior firepower attack a lonely police station in order to silence the gangster who could expose them. However, they're staggeringly incompetent, carry their badges during the assault, and use police vehicles, leaving one to wonder how they expected to get away with it.
* Assault on the Aerie of the Slave Lords. The illusionist Wimpell Frump uses an illusion to pose as the demon lord (and gnoll deity) Yeenoghu in order to command the loyalty of the gnolls guarding the underground Throne Room.
* "Assault on the Broken Shore," the first quest that involves joint Alliance-Horde operations lampshades it: "You think a few mortals with gaudy weapons can

stop us?"
* Assault on Vampire Island and aim to finish the game before the night finishes.
* Assault on Wall Street: Jim goes on a one-man crusade to assassinate people responsible for the 2008 financial crash.
* Assault on Wall Street: Jim is an army veteran. The skills he acquired in the military come in handy both in his initial job as an armored truck driver, and later when he becomes a domestic terrorist and assassinates various high-profile targets in the financial sector.
* Assault on Wall Street: Jim kills an Assistant District Attorney who refused to help his case by shoving him in front of a taxi after he gets out of a bar, causing it to end up looking like an alcohol-induced accident.
* Assault on Wall Street: Jim's cop friends clearly realize or at least strongly suspect he was involved with the murders at the end, but still let him go (presumably from sympathy due to his losses).
* Assault on Wall Street: Takes place during the midst of the 2008 Great Recession.
* Assault on Wall Street to at least temporarily make Stancroft look like the killer, and is safely escorted out by the police.
* Assault on Wall Street. Using his military training he targets professionals in the financial industry and caps it off with a shooting spree inside the bank that screwed him over.
* assault rifles and suggests shooting Cowl in the back. Ramirez, young Warden poster boy and owner of a Desert Eagle and multiple grenades says this is why the young wizards like the way he thinks.
* Assaults by corrupt Green-level police goons is one of the many many dangers faced by inhabitants of Alpha Complex in
* Assault Shuttle / Gunboat, but can carry bigger guns and tougher armour and shielding.
* Assault the first war movie to not receive support from the military.)
* As season one progressed, Dean went from pure comic relief to being a sad, lost little boy who really just wanted his family back together and who wise-cracks only to mask that nasty pain.
* As seen above, it's very common for people afflicted with mental illnesses (especially bipolar disorder, major depression, schizophrenia, and OCD) to actually have a great sense of humor. It sounds contradictory, but mental illness isn't all sadness and darkness. One thing that is common to many mental illnesses is severe self-doubt about your value as a person. Cracking jokes and making people laugh can temporarily ease some of those feelings. Not to mention that humor is a very effective coping mechanism; if one were to observe interactions between patients in a mental hospital, one would hear a lot of
* As seen by web archive sites, the Internet also contains (incomplete) copies of the Internet, making it partially recursive.
* as seen here, with various degrees of fluency, as he indicates for each one, respectively.
* As seen in a few above examples, many police departments (at least in North America) include boxing as part of rookie training. The ostensible point of which is to get the recruits used to taking a punch. Rare is the officer on regular patrol who doesn't get swung on, eventually.
* As seen in "A Very Pentatonix Christmas", Constantine is aware of his status in the "Evil Kermit" meme, and he's not a fan of that being what he's famous for, compared to Kermit's fame as a pop culture icon.
* As seen in chapter 6, even Rainbow Dash thinks baby hares are "cute little fuzzballs" when she sees them.
* As seen in "Hearthbreakers", this goes for Pinkie's other sisters as well. Pinkie is friendly, welcoming, and fun-loving, while Limestone is gruff, bad-tempered, and serious. Pinkie is talkative and outgoing, while
* As seen in season 4's episode "The Quest", Robin's mask looks cool on everyone.
* As seen in the above picture, the Practical Joker once did this to Superman by rigging the bucket
* As seen in the image atop this page, the first film heaped a great big steaming

pile of shit at the protagonists. Dr. Ellie Sattler went elbow-deep in it, too. The trike's excrement isn't really played for laughs, however — the animal's gastrointestinal distress is due to the poisonous plants and berries placed around its paddock, and is one of the first (of many) signs that the Park wasn't as well-designed as its creators thought.
* As seen in the movies, if your will is high enough, even the mass production models can grow into galaxy sized bots, a la "Tengen Toppa Grappal/Gulaparl" and fire planet system-sized shotgun rounds.
* As seen in the Osaka and Italy arcs, there is a bigger, tougher Gantz armor that's
* As seen in the page image above, the entire point of the classic Windows game
* As seen in the page image, In "Summer Belongs to You" Ferb unfolds a map from a roughly two-by-two inch square into a world map larger than the house it was leaning on.
* As seen in the page image, this happens to Snowy too... and that is not the only instance... he once saw two Tintins yelling at him when he got drunk in the middle of a chase scene.
* As seen in the page image, this occurs in one strip drawn for a series of paperbacks.
* As seen in the page quote, Celia (a sylph native to the Elemental Plane of Air) objects to being called an airhead.
* As seen in the page quote, in British speculative fiction using the metric system in the future is usually a hint of dystopia. Oddly this is a much more common use than in American fiction, perhaps because the metric system has never been (in parts) imposed by government in America.
* As seen in the page quote, this is Roy's reaction when, in response to his question about how the dragon they'd encountered was known to be a young adult, Durkon holds up the dragon nudie mags they'd found under his hoard.
* as seen in this concert video at 6:48. She often is barefoot in concert and in her music videos.
* As Seen On TV company won't ship to Wisconsin, but still advertises there.
* As Seen On TV" has SpongeBob (who had just recently appeared in a TV commercial and was letting it go to his head) overhearing part of a conversation between two fish as he was cleaning the restrooms: "Well, I knew this guy's acting was good, but his singing is phenomenal! I'm telling you, if this guy were to cut a solo record, it would be a hit!" He assumes they were talking about him (thus letting his fame go to his head even more), but they were actually talking about someone completely different.
* As seen when Charles unwittingly unleashes the Red, and it's all-consuming inferno, in episode 34.
* As seen when Jade used it to run from California to Florida in a few minutes.
* Assemblage 23's "30kft" ends with the singer's phone call cutting out.
* Assembling a RAW team for the "Bragging Rights" PPV, HHH noted that "we have millions of dollars of talent and Cody Rhodes."
* Assembly had an American special effects director. He plays an American tank commander the main characters meet during the Korean War.
* Assembly, has two political officers, both on the Communist side. The first one dies in combat after effectively leading an attack on a Nationalist-held town, and this so enrages the protagonist Captain Gu Zidi that he tries to have the Nationalist prisoners executed (his soldiers refuse to shoot, likely because they could simply recruit the poorly led and demoralized Nationalists into the Communist army instead). In the aftermath, he is posted to a more dangerous battlefield and requests a new political officer to stop him making that sort of mistake again. The new man is a former teacher, whose main qualification is being able to read and write, rather than any sort of ideological rigour, and while is unused to the rigor of combat, is still enormously popular with Gu's men mostly due to being literate.
* Assembly Line Fast-Forward: Characters work at an assembly line and end up making a mess when the conveyer belt's speed is drastically increased.
* Assembly. The Chinese characters dress in South Korean uniforms for a scouting

mission. They encounter an American tank, and the tank commander asks them for directions. The Chinese-dressed-as-Koreans reply with what the subtitles calls "Korean sounding gibberish," and it all ends peacefully. An earlier scene takes place during the Chinese civil war: Communist soldiers steal helmets and boots from better-equipped Nationalist prisoners. This causes confusion later.
* As serious-minded as Allura is, she wanted to go shopping for something sparkly when they stopped for said supplies, then pouted when Coran forbade her.
* As Sertrous returns to life, the earth vomits forth torrents of snakes. This begins with of normal snakes, but as the sign grows they're joined by serpentine monsters such as hydras and nagas. As his resurrection becomes imminent, the serpents grow more and more deformed — some have multiple heads, others are inside out, and others still are simply masses of coils with no ending or beginning.
* assert their status toward pack members make aggressive eye contact with a wolf or unfamiliar dog, lest they mistake it for a challenge and attack.
* "Asses of Fire" is hated by parents, causing them to murder Terrance and Phillip. The movie isn't even aimed for the main four's targeted audience, which is the main reason Shelia hates the movie.
* assets, he remembers they are insured, helping him figure out the case — it's an insurance scam.
* Assetto Corsa is also mod-friendly as well, despite being a paid game unlike the former two. In fact, the game was designed to support a wide array of game mods from cars to tracks.
* As set-up for the Batman RIP Arc, the phrase "Zur-En-Arrh" shows up occasionally as background graffiti. During the arc, it turns out that Batman has been psychologically conditioned not to be able to see it, and by seeing it, is being primed for Dr. Hurt's attack on his psyche.
* As Shadow watches the space station Ark fall to Earth, Amy Rose begs him to help the others to stop it. She mirrors his long-deceased friend so well to Shadow that she is able to make him regain his true memories, which leads to him making a
* As Shaggy and Scooby escape a villain (a supposed ghost of a Chinese emperor), this exchange occurs as they board up a door to hide behind:
* Asshai is one of the oldest cities in the world, but it is so ridiculously huge that it can hold the next four largest cities combined within its walls, suggesting that it was built as a gigantic city from the very beginning, although its current population is no larger than a market town.
* Asshai's Flames: Asshai only has the reputation we see in canon because it's comfortable for the residents (mostly sorcerers and Red Priests/Priestesses) this way. In fact the city is fairly average, if more soaked in magic than the outside world, and most of the rumors are false or just misinterpreted (for example there is no agriculture, but because the city can afford the import, not because the plants don't grow there).
* as she’s turned Greece into a winter wasteland due to her daughter Persephone leaving her.
* As she is being dragged to a cell, Supergirl taunts Splyce until the villain shoots an energy bolt at her. Splyce starts mocking her, unaware that her solar blast has recharged Kara, who is just pretending to be knocked out.
* as she is dying, Fred deliriously cries out "I sinned. I've sinned, and I'm being punished. I don't know what's wrong. I never got a B- before."
* As she is having an affair with Don Armando, her handsome boss, she tells him that she has been wary of men who show interest in her because of what happened a year before. The neighborhood bully suddenly showed remorse for his actions, and dated her for a while, and she felt so comfortable around him, that they eventually slept together. However the next time she tried to talk to him, he bragged to his friends about how he won the bet of who was the first guy to have sex with "Ugly Betty."
* As she is listening to their story about futures gone awfully wrong and
* As she is very protective of Becky, Sue attempts to torpedo her relationship with Darryl, thinking he is using Becky.

* As Sheriff Sam Cade in one of the episodes of his 1971-1972 modern western TV series,
* As she usually does, Vicky pulls this act, pretending to be Timmy's loving babysitter in front of Miss Cheerilee.
* As she was at the aquarium with Yukito, she stares at his ice drink for a bit...then realizes that, since Watery is
* As she was originally envisioned Diana was just another Amazon and was born through natural means. Her father was inconsequential and presumably long dead since he couldn't attain immortality on Paradise Island and he was never named, this has lead to theories that
* Asshole Victim) and three (it maximizes the number of possible suspects) . . . because he was the perfect embodiment of the planet's social code ("a good Solarian"), that is, an anti-social a-hole. Everyone had a motive to murder the man who reminded them all of their imperfections, and in the end Elijah Baley decides to sit on the knowledge of who murdered the victim.
* Asshole Victim: An unlikable character suffers a horrible fate, but the other characters don't feel sorry for them because of how unlikable they are.
* Asshole Victim: A person who got killed had it coming because they were very unpleasant and unsympathetic, even though that's not actually the reason they were killed.
* Asshole Victim: A person who suffers or gets killed deserves their fate because of how unpleasant and unsympathetic they are, even though the reason they suffer/are killed has nothing to do with their unpleasant nature.
* Asshole Victim are depicted by the authors as assholes who deserved to die and shouldn't be mourned: Ouranos, Kronos, Agamemnon, Amnon, Absalom, Jehoram of Judah, the entire populations of Sodom and Gomorrah...
* Asshole Victim: Bad person becomes the victim of a crime for reasons unrelated to their nature. Because he was bad, no one cares.
* Asshole Victim gamer was killed after playing a virtual reality fighting game in an arcade, where the aforementioned victim was poisoned instead.
* Asshole Victim go, commenting that were he in the man's shoes, he might very well have done the exact same thing.
* Asshole Victim in Case 3-2, used his own company as a way to gather and sell information about his own clients for a profit.
* Asshole Victim ruined the career of a promising young pitcher by (falsely) claiming that there was something wrong with his pitch, after which the poor kid destroyed his own shoulder trying to figure out what was wrong.
* Asshole Victims in Book 3, and in Book 7, he backs away from Oscar Reilly when they first meet, even before the man proves to be a total jerkwad, showing that Diesel's instincts are spot on.
* Asshole Victim: Something terrible happened to this character, but nobody cares since they were a bad person, even though their badness may not have had anything to do with what happened to them.
* Asshole Victims stories tend to be blackmailers who had the misfortune of trying to blackmail the wrong person.
* Asshole Victim tirade on how the law does very little to protect people from stalkers.
* Asshole Victim Unfortunately, some sympathy is lost when those involved try to pin the murder on one of the Travellers and accidentally kill him in the process, though Barnaby says he'll do what he can to help them.
* Asshole Victim: We will generally start with these to raise our appeal to more of society (and not because we actually want to make bad people pay for their actions). After all, who wants to defend an animal abuser or a rapist?
* Asshole Victim: When a victim of crime deserves their fate because they were very unpleasant and unsympathetic.
* Asshole Victim When Martha runs off in tears, Veronica tries to justify her actions to Heather Chandler by saying she had to protect Martha from getting too nosy about J.D, causing Heather to retort:
* Asshole Victim, where almost every victim is made to be sympathetic.

* Asshole Victim who has managed to piss off literally everyone in the cast before being killed.
* Asshole Victim. Yara still hates him for this and for stealing her claim to the throne.
* Asshole Yakuza Boyfriend is one of these, relying mostly on her ability to out-think or out-talk much more physically dangerous enemies. She's yet to win a fair fight in two books.
* As Shooter himself noted later, the original ending would be comparable to capturing
* As shouldn't come as a surprise considering the name, a variant of this is the catalyst for the entire plot of
* As shown above, Carl Sagan's famous quote, "Extraordinary claims require extraordinary evidence," is an excellent summary of skeptics' treatment of claims with this magnitude.
* As shown above, the newspaper that mentions "Queen Diana" also suggests a female president. If it's referring to the President of the United States, that still hasn't happened (as of 2020).
* As shown here has this as part of his origin story. This is also the metaphorical response many Marvel inhabitants have towards mutants in general.
* as shown here. This retains the "wisdom controlling strength" message of the salute
* As shown in Act VI, several of Gyokuro's subordinates are scared of her and try to avoid crossing her in any way.
* As shown in "A Head in the Polls", the two main political parties of the United States apparently mutated into the Fingerlicans and the Tastycrats.
* As shown in "Descent", Borg drones that are severed from the Collective end up at a loss as to what to do with themselves. To the extent that Data's
* As shown in page image above, FOX banned the eighth season episode "
* As shown in the case of Robert Durst, even this doesn't always work.
* As shown in the episode "Crime and Punishment," Chuckie takes after his father.
* As shown in the page quote, Ishimaru is so wrapped up in being a good student that he's inexperienced with regular social interaction and makes his first real friend at his new school.
* As shown in the page quote, the song "Fuck tha Police" in the album
* As shown in the picture at top, it's not uncommon for a person who has never used a dishwasher before (especially if they are from a country where they are uncommon or rare) to use dish washing liquid instead of dish washer liquid. While you can certainly get the suds all over the floor, it can also force suds and water into the motor compartment, ruining the dishwasher.
* As shown in the songs "Capriccio Farce" and "Master of the Court", Marlon's
* As shown under Web Original above, there's an entire Twitter feed devoted to terrible jokes written by young children, titled "
* assign adopts his chosen name as a grudging joke, after he claims that naming people is just as foolish as naming the sky or naming a river (only for Elisa to tell him that New York's river is, in fact, named "The Hudson").
* Assigned Male. Despite the amount of mockery and criticism it gets online, the comic has been one of Patreon's top 10 earners for several years and shows no signs of slowing down.
* assigned superpower package speaks English, Japanese, and some Spanish.
* assigned to Africa when the team's manager tries to convince the trainer to get his not-too-bright son in the team, saying that there ain't no rule a human can't play in an all-ape team (and suggests that his son might wear a gorilla suit to not stand out too much).
* Assignment 1 features Sapphire almost being killed by Roundhead soldiers while stuck in a painting.
* Assignment 2 levels. But without the eye-gouging spelling atrocities. A sample:
* Assignment 4 is mostly about people who belong in photographs being taken out of them and people who don't belong in photographs being taken into them.
* "Assignment: Earth". A Saturn V rocket carrying Apollo 6 was launched on the same

day that King died.
* "Assignment Earth". The U.S. puts a nuclear warhead platform in orbit. During the episode it falls out of orbit and drops toward an enemy country: it will go off on impact.
* Assignment Gestapo. 2 Section have spent the past few days lugging their dismantled still around Russia, with the contents distributed among their water bottles until they can get it fully fermented. Their officers know better than to interfere, but one feels the need to mention the fact that they're not filtering it.
* As Sikhs reject altering a person's natural appearance apart from clothing, making them well known for turbans and beards. Add the martyrdom/militancy that tend to follow the monotheist/monist faiths and you have some badass bearded men.
* assimilated by the Borg. Riker, who has just refused a third potential command, is field-promoted to Captain in his place.
* assimilated by the Jahns and subsequently driven away), as well as Wii Fit Trainer (who is evicted by Vinny under the Jahns' control; she's said to have been killed).
* assimilated the almost-dead Seliah of Tartaros' Nine Demon Gates after the arc was over.
* Assimilation Academy: A school that discourages creativity and crushes spirits.
* Assimilation Backfire: Be careful what you absorb or take over, or you could get hurt.
* Assimilation Backfire: The attempt to assimilate something goes wrong because the assimilated being added an unwanted weakness to the gestalt.
* assimilation episode showed some Borg children who had come out of their development chambers early and so were only partially assimilated. It's possible that children who are assimilated are kept in the incubation chambers until they reach maturity, for whatever reason.
* Assimilation Plot: A creature or machine wants to subdue humanity and turn them into more of itself.
* Assimilation Plot: A plan which revolves around doing this to everyone.
* Assimilation Plot: A type of ploy where the end goal is the elimination of all individual identity
* Assimilation Plot: A villain attempts to eliminate all differences between people.
* Assimilation Plot: Let's turn everyone into a single entity, whether they wish it or not!
* Assimilation Plot until they completely consume the planets they're on.
* Ass in a Lion Skin: An animal pretending to be another of a different species.
* "Ass" in Ambassador: A dignitary who is very mean towards their host nation.
* "Ass" in Ambassador: A diplomat who acts as undiplomatic as possible.
* "Ass" in Ambassador: I come from another country to tell you foreigners that your country sucks and y'all can fuck off!
* As Sir Walter Raleigh approached the executioner's block, he looked at the ax and whispered to the executioner, "Tis a sharp cure, but good against all ills."
* Assistant Chief Pope has received numerous complaints about friction between Deputy Chief Brenda Leigh Johnson and other legal departments, and so has ordered her to apologize to the offended parties.
* Assistant Director of the Andromeda Initiative's Colonial Affairs William Spender is colossally incompetent, and acts like he's just the outright head of Colonial Affairs, while making decisions that endanger the lives of everyone onboard the Nexus (at one point, he's found stopping an engineer from trying to repair the station's life-support systems). He gets away with this crap because his boss, despite acknowledging his incompetency, also notes he'll do difficult jobs regardless. It takes Ryder bringing serious proof that he's ridiculously corrupt to boot,
* Assistant Director Skinner is an older sexy guy. Tall and physically fit.
* Assistant Surgeon William Brydon was not the only survivor from the British Army's infamous 1842 retreat from Kabul, but he was the only British person of the

army not to have been killed or taken captive.
* Assistant trainer Arc Campbell is listed as "Arc Campbell (Ass Train)".
* Assist Character: A video game character who only appears to help the player.
* Assist Character is a typical white-magic user, using "light bullets" as his assist attack.
* Assist Character, who is chosen at random from the remaining five heroes.
* assist her during delivery — while he himself has an appointment to make with his girlfriend.
* Assist Kill accessories show up on the killfeed as getting assists to players in Pyroland, indicating they at least THINK they're alive. All of them are a stuffed animal of some kind, except the Medic's very real pet bird, Archimedes.
* Assist Me at this point is that it's still a fanmade work and not official.
* Assiti Shards (the Assiti themselves make unwilling contact with Elizabethan England), but only two has seen any publishing. The first one has, however, seen a lot:
* Assiti Shards (the Assiti themselves make unwilling contact with Elizabethan England), but only two have seen any publishing. The first one has, however, seen a lot:
* As Skaia knows its own fate, it's always and indisputably set in stone from the start whether or not a session will succeed. If your fate is to be in an unsuccessful, or null, session,
* Asskicking Equals Authority and doesn't have 'royals', only 'whoever can kick the most ass at 'mech combat and politics'.
* Asskicking Equals Authority effect. The expense of quality equipment helped that end as well. Later relative peace and hereditary nobility ended this.
* Asskicking Equals Authority for as long as they could until the Clanners wised up.
* Asskicking Equals Authority for the Clans. A few Clan leaders try to not be Frontline Generals, and tend to be among the most despicable Clanners you'll ever meet. . . and the results for them are generally quite unpleasant when the truth comes out that they aren't "true" warriors.
* Asskicking Equals Authority him out of power and take the reins yourself.
* Asskicking Equals Authority: Kick enough asses and you can rule the rest.
* Asskicking Equals Authority: The best fighter becomes the one in charge.
* Asskicking Equals Authority. Theodore's love for fighting extends to the point of getting distracted when he comes upon one of his teachers fighting with a trio of students — instead of intervening to stop what is clearly a strange situation, he stands on the sidelines and cheers them on.
* Asskicking Equals Authority), while Jackals got different colored shields and some minor armor changes. There were also special classes, like Honor Guards and Elite Councilors, with more distinct (and often far more ornate) armor.
* Ass Kicks You: Attacking someone by hitting them with your rear end.
* As slaves are the legal property of their master, there is nothing preventing slave-owners from betting their slaves whenever slavery is legalized, as shown in
* As smartphones were technically portable computers, those smartphones which could blow up due to various reasons from overheating to poor power management count, but Samsung's Galaxy Note 7 takes the cake with how hyped, how pricey, and how good performance and feature wise it was. Except the power regulations were poor and the battery quality was also poor, leading to the phone catching fire or popping up into a bar of hot metal in the most unfortunate situations. The backlash was tremendous, the phone quickly became a contraband, and Samsung
* associate a certain actor or director with their latest work.) So they are still recognizable to many people, but mostly for being tabloid mainstays or interviewed on the red carpet.
* associated RPGs, but that it has enough of a reputation and association with evil that most people that master it lie on that side of things — if nothing else by having to associate with such people to learn from them.
* Associated Shades series conjectured on the afterlives of famous dead people.
* Associated Space features the Free Realm of Sarmatia, a planet whose colonists

hide their high tech (aside from medical scanners and such) underground so they can all have fun pretending to be nomadic Horse Warriors like the Mongols.
* Associated Space features Ursula Urquart, leader of the loyal opposition, who is apparently out to either take over, or secede her worlds from the Terran Associated States.
* Associated Space has an opening scene involving "Mobile Siege Fortresses", gigantic hovertanks the size and shape of ancient Egyptian pyramids. Which Fatebane sabotages for comic effect.
* Associated Space has the following exchange as two characters are debating strategy before an upcoming space battle:
* Associated Space has the planet of New Tau Ceti, where a religious cult believes that only humans can sin, so the members put on pelts and pretend to be sheep. Of course, they still sin from time to time, so who to blame? The Shepherd, of course. So passing travelers are abducted, given shepherd's crooks, told they are shepherds...and forced to fight a genetically-engineered super-wolf in an arena. If they fight well enough, they have defeated sin, and may depart in peace. If not, well, they are a blood sacrifice to atone for sin.
* Associated Space notably averts this trope when Fatebane and David Urquart crash-land on the Free Realm of Sarmatia, and are promptly surrounded by fierce-looking horse-warrior nomads...who promptly get them medical attention and help them on their way.
* Associated Space, to the extent that his companion lampshades this tendency:
* Associated Space uses Catapult Points for interstellar travel. These are giant metal circles placed in orbit around a sun, which gives the devices the immense amount of power necessary to use the things. Once a ship goes into the circle, the gate activates, creating an effect that zaps the ship to another star system, which catches you with similar catapult point, using its immense power to disrupt the effect.
* Associated Space was founded as a "pastoral enclave" by a religious movement that decided only humans could sin, so if humans became animals again, they could live without sin. So the cult members turned themselves into sheep. But the sheep still sometimes did stuff that would otherwise be considered sin, so the solution was that the sheep were blameless, but the shepherd had to pay the price for the actions of the sheep under their protection. Random visitors to the planet are thus conscripted as shepherds and forced to fight for their lives in an arena against a genetically-engineered super wolf. If they do well enough, they have defeated sin and may depart in peace. If they die, well, they've paid the price for sin, as is only proper.
* Associated with ogres in most settings. Taken to its logical extreme with
* associated with red and blue respectively) has become a staple of villainous duos in both anime and western animation.
* Associating the heart, an organ that propels blood, with the capacity for love is an even older example. Ancient peoples noticed that its beat sped up when someone's emotions were aroused, not realizing this was a secondary effect of feelings arising in the brain.
* Association Football, a.k.a. soccer, became highly popular in the United States during the late 1970's with the New York Cosmos's signing of several big name international stars such as Pelé and Franz Beckenbauer. After Pelé's retirement, the game's popularity declined and the league folded. Interest revived somewhat with the 1994 World Cup, when the U.S. hosted the event and the men's team reached the knockout stage for the first time in over 60 years, and again in the 2010 World Cup when the men's team won their group on a stoppage-time goal. The establishment of Major League Soccer, and more recently the National Women's Soccer League, may eventually make soccer less of a fad and more of an ongoing niche interest.
* Association Football, apart from the usual results of a win or draw over 90 minutes, or the 120 minutes of extra time, there are a handful of other ways to win or lose a game.
* Association Football back in 2016, after being asked about his then team Roma's

off-pitch tribulations between the players and the owners.
* Association Football" between the country's major league organization and FIFA. This sport's naming has also reigned true in some other countries like Canada, the Caribbean, Australia, South Africa, and New Zealand; who have adopted or invented another football code, either as their "main" football or alongside Association Football. However, the British have since grown to hate this word, and have been hell-bent on lambasting the U.S. for it, never minding that the word came from the same place the modern rules of the game were made, the latter fact the British embrace and the former fact the British will often deny.
* Association Football clubs sometimes get along especially well with fans of certain other clubs, especially in Eastern Europe. Fans of CSKA Moscow and Spartak Moscow tend to respect Partizan and Red Star Belgrade, respectively, and the feeling is mutual. Fans of the Polish club Śląsk Wrocław are friendly with the Hungarian Ferencvaros, and CSKA fans also respect PAOK fans in Greece. This also extends to Western European fans, examples being Liverpool fans getting along with the fans of Borussia Dortmund and Borussia Monchengladbach, Chelsea fans having amicable relations with Rangers and Hellas Verona fans (though it has cooled down in recent years), Tottenham Hotspur fans being generally respectful of Ajax fans, or Celtic fans having good relations with fans of FC St. Pauli, PSV Eindhoven, Rosenborg, and Napoli. Again, the feeling is generally mutual.
* Association Football (CONMEBOL) celebrated their 100 years of existence with the Copa América Centenario (Centennial America Cup), celebrated in the United States and played by all South American national teams as well as the best teams from the Central American, North American and Caribbean side. It was won by Chile.
* Association Football fan named Billy Harris dreamed that Middlesbrough would win the English League Cup 2-1, and Boudewijn Zenden would score the winning goal. No prizes for guessing the actual outcome of that match.
* Association football: Frank Lampard (son of Frank Sr.), Erling Haaland (son of Alf-Inge "Alfie")
* Association Football has a few. Most of them are ignored except Broxi Bear for Glasgow Rangers and Hoopy the Huddle Hound for Celtic.
* Association football managers Guillermo and Gustavo Barros Schelotto are twins, with Guillermo being the manager-in-charge and Gustavo being his assistant. One time, while they were managing at Club Atlético Lanús, Guillermo was sent off by a referee for misconduct. They take advantage of the fact they look identical and
* association football match ends with a spectacular last-minute goal, usually from a free kick. Or sometimes a last-minute penalty, or a penalty shootout.
* Association Football", "middle-aged white recently retired ex midfielder/defender/goalie", "just-retired black forward/midfielder". Sometimes they even try to claim "Scottish" as equivalent to "black". Infrequently but annoyingly, the channel ends up with someone from Francophone Africa whose grasp of the English language simply isn't up to the job, making the tokenism at play especially obvious (and presumably depriving Francophone viewers of the much better standard of commentary he could offer in his native tongue).
* association football must wear uniforms that make them distinguishable from other players. This has occasionally led to customized uniforms.
* Association Football player El Hadji Diouf, while with Liverpool FC during the 2002/03 (following his appearance in the 2002 World Cup) and 2003/04 seasons, became so unpopular due to both his attitude and a lack of goals scored in competitive fixtures (which is exceptionally poor for someone intended to play in a striker's position) that teammate Jamie Carragher attested to Diouf always being the last one picked during training and team practice.
* Association Football puts a much heavier emphasis on the role of captain than most team sports, with the captain wearing a special armband and — officially — being the only player on their team allowed to initiate a conversation with the referee. The role is considered sufficiently important that each team must not only have a captain, but a vice-captain, and often, two more deputies in case the

first two are unavailable/not selected. Also unusually, they are almost invariably selected for leadership qualities rather than general talent (meaning that some of the greatest players in the game's history never captained their team).
* Association Football rule was implemented in 1993, where if the game is tied at the end of regulation time and there must be a winner, and extra time is played, the first team to score a goal during the extra time period would win; with a penalty shootout taking place if neither team scored after 30 minutes. Said penalty shootout consists of five chances for both teams—if they're tied in the penalty shootout, additional chances are given for both teams until one team gets a goal in while the other does not. In major tournaments like the FIFA World Cup, this replaced the original rule where the full 30 minutes would be played regardless of how many goals either side scored, with penalties if the score was still tied. A lesser form, silver goal, was later implemented in 2002, where a team that led after the first half of extra time won. Both were scrapped in 2004 due to leading to very defensive play, among other reasons.
* Association Football's metagame has evolved massively, so much that even a cursory examination of the changes can result in long essays and even longer discussions.
* Association Football (soccer), a team that's a goal down in the dying minutes of a game may choose to send their goalkeeper up front for a set play, such as a corner kick. The downside to this is that if the other team manages to gain possession of the ball, the goalkeeper probably won't be able to sprint back to his own goal in time to prevent the opposition from scoring easily. Therefore, this tactic is only used in times of urgent desperation. In the indoor version futsal, the alternative is a combination of this and hockey: the goalkeeper is removed, and a line player that can play goal becomes a "line keeper", guarding the net but more focused on attack.
* Association Football (soccer for Americans), because of a reputation for
* Association Football team Hereford United have a pitch which is actually on a slope. The slope is slight and almost un-noticeable - but it is still a slope. Visiting teams unaware of this are frequently disorientated by the behaviour of the ball as they kick it—it will travel faster and further downhill and slower and shorter uphill. This has allowed Hereford to collect the scalps of many fine teams, including Manchester United and Liverpool.
* Association Football, the rivalry between Japan and Australia has been made up of constant ribbing and fierce games, with both teams tied for wins as of writing. Japan was a prominent supporter of Australia's move to the EAFF Cup, and players happily perform in each other's leagues.
* Association Football when, more often than not, said player gets up and runs off at full tilt when their pleas are ignored.
* Association Football, where the World Cup began to be recognized as a true sporting event and draw a huge worldwide press coverage beyond the host country.
* Association Football you even kick the ball, and by the time they realize what you've done, it's too late for them to change course. It doesn't always work, but when it does, the goalkeeper is left humiliated.
* As society is constantly changing, a prohibition is (in other words, if something becomes legal, the perpetrators are released from jail).
* As solvents go, water is pretty strong — lots of stuff dissolves in it. We don't notice because
* as someone has already taken the care to murder his double. Or perhaps the original.
* As someone who never wanted to be there in the first place, Rincewind emphatically does this in
* (as some pictures have him flickering in and out), Xander's shocked to realize Willow has a picture of them having sex in her wallet.
* As some scientific studies and anyone who has chased pigeons will tell you, many ground-feeding birds won't fly unless they have to. Until they decide they can't reach that raised platform or can't escape that pursuer without flying, they'll try to do it on foot. Most birds will run up slopes while beating their wings for extra

speed, rather than flying to the top, until the incline is almost completely vertical. This is because powered flying —particularly the takeoff part— is a rather energy-intensive activity, so the more a bird flies, the more food it needs to ingest afterwards.
* As something of a thematic continuation, the music video for "Learn to Fly" is bookended with a muzak version of "Everlong" playing in the background.
* As soon as Calliope and Caliborn's personalities split, Caliborn became an insufferable little brat whose first act was to bite into his adoptive father
* As soon as guns made it to Japan, the Samurai became Musketeers. Miyamoto Musashi's famous Book of Five Rings covers the importance of the gun and of using it well as an essential part of a samurai's training. Guns saw heavy action in the Sengoku Jidai period before the unification of Japan under the Tokugawa shogunate. The Battle of Nagashino is the most famous example of what happened to those who didn't see the writing on the wall, where already-common firearms were used by Oda Nobunaga from behind wooden fences in rotation to deliver devastating fire that destroyed Takeda Katsuyori's cavalry.
* As soon as he becomes willing to reveal what he knows to Historia Reiss, members of the 1st Brigade torture and murder him.
* As soon as it was technically possible, cell phones were produced to have a clamshell case design because Star Trek communicators popularized such a look. In fact, you can even get phones that look
* As soon as Jade has a chance to make her own weapons, she immediately goes for
* As soon as Order 66 is brought up, the troops accompanying Aayla Secura shoot her in the back.
* As soon as the Dark Towers were destroyed, there was a flashback explaining about how the
* As soon as they met, Shinji took note of Asuka's beauty and hotness. During the party in chapter 3
* As soon as they realized her power, whenever the Evronians encounter Xadhoom (a
* Assorted sporting events that banner themselves as "World Series" - especially since they universally neglect to specify which world and almost never have representation from the whole world. Baseball is among the worst offenders of the latter type.
* Assorted weirdos, freaks, and lunatics (Superintendent Chalmers, Willie, Crazy Cat Lady, Jasper, Cookie Kwan, Captain McCallister, Duffman)
* As souls travel through the Astral Plane on their way to the afterlife, they are beset by numerous supernatural predators such as astradaemons, night hags and sahkils. As these creatures feed upon passing souls, however, they are themselves hunted by the Outer Goddess Nhimbaloth, who consumes predator and prey as one.
* As South Park tends to do, though, the treatment of lawyers is surprisingly fair. They're in it for the money, not
* As Space Nazis, the Daleks are certainly not democratic. The Daleks are ruled either by a Supreme Dalek or by their creator Davros, depending on how favorable they're feeling towards Davros on any given week. He's been the cause of at least one civil war over whether they should obey him or not, but even at his lowest popularity dips, they can never quite bring themselves to kill him or let him die. Though "Asylum of the Daleks" reveals that the New Dalek Paradigm decided to govern themselves via a
* Asspen is that Stan (who's not a good skier) insists he doesn't wants anything to do with their plot but none of them want to hear it.
* Ass Pull, and even Yuya needs 291 more duels to figure out how to Pendulum Summon again. Since the various Special Summonings play a major part in the setting and the plot, this trope is played straighter than anything above.
* Ass Pull: An explanation or solution that comes out of left field and disregards what had already been established in the story, named from the idea that the writer just pulled an answer from their ass.
* Ass Pull: An explanation or solution that comes out of nowhere and completely disregards what the story has already established, named from the idea that the author just pulled an answer from their ass out of desperation for a quick and easy

way to resolve the conflict.
* Ass Pull, as it's been explicitly established in the series that shapeshifters exist — of course, they're all a secret order of death-obsessed assassins).
* Ass Pull, as she sees the puzzle and says, "Remember that field trip [to a history museum] we took for magic history class?... Remember that civilization that spoke with colors?... They used hue and pattern to communicate, something I'm quite fluent in." She solves the puzzle, prompting one of the non-main pixies to comment, "She's so knowledgeable about magic history. I'm impressed." Having Stella be fluent in hue and pattern allowing her to solve the puzzle is understandable, but for it to hinge on a previously unmentioned, much less seen, field trip (not to mention Stella suddenly demonstrating knowledge of magic history)? Not so much.
* Ass Pull: Fans don't like a plot twist or plot development that wasn't properly foreshadowed.
* Ass Pull. Generally, this trope and its subtropes needs to be approached carefully and handled masterfully in any form of media where they appear, to avoid pulling the audience out of their suspension.
* Ass Pull. It happens so often that the swerves themselves become this.
* Ass Pull: We just pull anything out of thin air just to advance the plot because we're too lazy to explain where it came from.
* Ass Pull, where various utensils are pulled out off Sherry's tush... including a ladder!
* As Stalin's biggest fan, Albania's former communist dictator Enver Hoxha also carried out 5 purges during his rule. The country's tiny population meant that 1 in 3 Albanians came under suspicion at some point in their lives.
* As stated above, "mpreg" is commonly associated with hackney fan fiction in which
* As stated above, the trope namer is the Fidelius Charm, a spell that makes one individual a literal Secret Keeper; as long as they keep the secret, it cannot be found out by anybody else. In addition, even if the Secret Keeper does tell someone the secret, that someone is unable to pass on the knowledge unless the original Secret Keeper dies, in which case they become the new Secret Keeper. If the Secret Keeper dies without passing the knowledge to anyone else, then the secret will remain secret forever. This is most often used to conceal locations.
* As stated above, this is a signature move with some musicians, such as
* As stated earlier, Elijah Burke became "The Pope" D'Angelo Dinero in TNA, who was another swing at the "wrestling minister" gimmick. However his kind of made sense since he was played up as an inner-city street preacher, meaning his place in the wrestling business was just another venue for him to expand his flock for all the evils and debauchery that made up the wrestling industry.
* As stated in the current page quote, it's never clearly stated how old
* As stated in the trope description, this is actually a rather nasty fighting technique: people put sharp things in their hair not for their own use, but place them there
* As stated previously, people that go out of their way to correct the spelling and/or grammar of others tend to get called out on it since most people see it as someone with a huge
* As stated, the feudal systems of both Western Europe and Japan were prone to this. The
* As Steed, Mrs. Peel and Alice infiltrate Sir August's estate, Alice suggests that they split up while going through a maze. This allows Mrs. Peel to fall into a pit trap and be captured and Steed to be knocked out by Mrs. Peel's
* As stereotypical as the mascot is, many Latinos are fond of the Chiquita Banana campaign.
* as strict as she is, Sae seems unusually gleeful at the prospect of "using" the man's grief-stricken daughter for information, causing Akechi to sigh and walk away. "Dark Sun" also omits Sae's apology to Futaba for putting pressure on Sojiro.
* As such an iconic move it is subject to an incredible amount of similar moves and imitations. More than a dozen functionally similar moves exist just within the
* assumed-employment, where yes Alice has a job, but it's part-time and/or minimum

wage (or close to it), so she still relies on government assistance like food stamps or Medicaid. The true figure that people are looking for—the percentage of working-age adults looking for a full-time job that supports them without having to be on welfare—is difficult to pin down.
* Assumed Heteronormativity: When someone is assumed to be straight unless proven otherwise
* Assumed Win: Someone assumes they've won before being informed that they actually lost.
* Assumed Win: Someone assumes they've won before learning that they didn't.
* assume it's from the protagonist himself and awkwardly tries to turn him down before the protagonist clarifies.
* assumes of an airship in a rather bad situation, she calls for a meeting of the ship's senior crew once they're out of immediate danger, and adds that "somebody had better have rum!"
* assumes that Gilgamesh is trying to pull this trope on him, but Gil is quick to tell him to stay right where he is so that he can pull himself out of the aforementioned sphere of nothingness.
* assume the positions and they see that the man they arrested is actually Shrek.
* assume you withdrew because you missed a ton of classes without an excuse. This is usually worse than a regular "W", especially because it leaves you in kind of a registration limbo for future classes.
* assuming Captain Falcon or Claus aren’t around. But even then, those exceptions are subverted towards the end of the story.
* assuming he is real, it's possible he's just acting infatuated to get under Calvin's skin.
* Assuming he's still alive, a big assumption to make, under the circumstances, guitarist and songwriter for the alternative rock band
* assuming human form. They retain their extreme vulnerability to cold.
* assuming In the final scene, it's shown that Elmer has turned Daffy into a watch.
* Assuming it isn't just propaganda by mainstream Christians, the Borborite Gnostic sect would have hit this button to the extreme, since their version of the Eucharist included eating semen, menstrual blood, and abortions...
* Assuming life on alien worlds evolves at roughly the same rate as it does on Earth, we likely won't ever find an Earth-like planet with native complex multicellular life orbiting a star much larger than about 1.4 solar masses because the amount of time a star spends on the main sequence falls rapidly with increasing mass. At 1.5 solar masses, a star will spend less time on the main sequence than it took for complex multicellular life to evolve on Earth.
* Assuming that an intelligence service (with an openly active branch serving as elite bodyguards) can count as 'the military', and that there is an allowance for the one telling you that you are in command now to note that it doesn't actually mean much,
* Assuming that Middle-earth is a made-up planet, instead of the actual Earth in an imaginary distant past, as intended.
* Assuming that the dream that opens the first chapter and is referenced multiple times after is actually the canon ending of
* Assuming that the work is equally popular around the world. Different parts of the world like different things, and some things may be
* Assuming that the work is more popular than it really is — people familiar with it agree on the
* Assuming the Australia house even has a basement — a rare thing. The Queenslander style house will frequently have enough space beneath for a de facto basement, but that space is usually taken up by hordes of spiders and snakes.
* Assuming the creators are as knowledgeable about the work as they are — or, to put it another way, that they obsess over the details to the same degree. Think of the fans in the
* Assuming the creators behind the work care as much as the fans do, which shakes out in several ways:
* Assuming the holodeck's rendition of the Adashake Center applies to the whole

planet, Orion foliage is teal instead of green like on Earth, and the tree trunks are pink.
* Assuming the "image of God" applied to their bodies as well as their souls, this would mean their genes would have been perfect and mutation free, at least in the beginning, and incest would not have been a problem until later down the line... like the time of Moses, when the first Biblical laws against incest were established. Not to mention, God's declaration of "very good" at the end of the sixth day translates more closely to "flawless", rather than "above average".
* Assuming the trailers are accurate, this trope is out in full force for
* (assuming they're humanoid in the right ways. Making devices for female pilots is evidently hard enough). However, X-Wings are hyperspace-capable, meaning that they'd have to either hold #2 in for hours if not longer if they couldn't find a safe place to land.
* assuming they're male), where every unfamiliar cat was referred to as female until proven otherwise. In the past couple of decades this has reversed, so that now the trope is played straight.
* Assuming you can tear your eyes from the physics-insulting boobs, you may notice the terribly animated hair.
* Assuming you haven't concussed yourself (or worse, lacerated yourself), it's a fun quip to follow walking into a glass door.
* "Assumption" by Desmond Warzel makes brief reference to a planet named Gehenna.
* "Assumption" (scroll down) (in that they worship an actual piece of cargo), but eventually becomes more like this trope — a person becomes an object of religious awe because of her advanced technology (she descends from the sky).
* "Assumption" (scroll down) — a person becomes an object of religious awe because of her advanced technology (she descends from the sky).
* Assumptions. Everyone assumes this about the athletic, tomcoltish Rainbow Dash. Even her friend Pinkie Pie thinks this, and was hoping to "experiment" with her. One of the reasons she's falling for Caramel, who she'd ignore otherwise, is because he's a nice conversation partner that doesn't judge her.
* "Assumption" (specifically, the Frank Mentzer-edited boxed sets from the 1980s).
* Assumptions. Unusual for this trope, he's completely unconscious, and Rainbow just leaves him there. It says a lot about Caramel when he forgives her despite her not apologizing, and taking advantage of his generosity for almost two weeks.
* Assurance Backfire after the assurance is made. Best case scenario this will only make the attempted recipient of the assurance even more nervous/angry/sad. Worst will often have them in immediate danger.
* As Sure As the Dawn and he is able to help her experience true love for the first time (she was a prostitute as a child and her first husband was a kindly older man for whom she never had romantic feelings).
* assures you's presence in Riften. It doesn't take you three seconds of playing the Thieves' Guild questline for you to realize that Maven is the single biggest sponsor of the Thieves' Guild's activities.
* as Susan notes. (He funneled the budget for maintaining the fire alarms into wall murals, and as a result the sprinklers don't work.)
* Ass won multiple awards. It is just a close-up of some guy's ass with the occasional fart sound effect. The filmgoers laugh uproariously. Actually based on a real movie, "Taylor Mead's Ass", by Andy Warhol.
* Assy McGee revives a clinically dead Assy by shocking him over and over.
* Assy McGee. While walking down a corridor identical to the one in the movie, Assy warns Sanchez not to let the prisoner they're about to question "get inside his head." Pegfinger immediately does so in seconds with little more than a racist joke ("A wedding ring? How many oranges did you have to pick to pay for that?) and Sanchez goes berserk and shoots him to death.
* Assyria is both a scientific and militaristic civ due to their Treasures of Ninevah ability, which lets them outright steal a technology each time they conquer a rival's city. They're also encouraged to build research infrastructure, since their Royal Library grants bonus experience to any units trained in the same city, so long as said library contains a Great Work of writing.

* A stable in TNA called Shore (Rob Eckos and Becky Bayless) were two wrestlers who were
* A stack of bills with plastic googly eyes sitting on top, representing "the money you could be saving with Geico." Hey, nobody bats a thousand.
* Asta, from the poor village of Hage in the Forsaken Region and is a peasant with no magic before getting his Grimoire, is who Noelle Silva, being royalty, in love with but is a
* A stage like this, appropriately called Vacant Warehouse, appears in
* A stage whose microgames' music is overridden with a continuously-playing song.
* A staggered formation was virtually king in the second game however since it allowed you to take less area of effect damage from siege weapons with virtually no real issues (as attacking-moving melee units would have them break formation to go toward the closest target which will stop enemies from slipping by to the best of their ability regardless of how close the formation was before). In the third game, other formations became more useful - a packed line formation could be better for musketeers attacking cavalry in the third game due to being more able to use their hand-to-hand attacks easier when the cavalry close in which are superior against them as opposed to shooting. Still, the light infantry of the game tend to be always pitiful in melee compared to firing from afar, meaning a spread formation remained the only logical thing to use for them to reduce area of effect damage and causing less ranged units to be forced to use melee against a unit next to them from being more spread out — especially since everything was
* a staggering list of his professional achievements. by younger athletes.
* A Stainless Steel Rat is Born, Jim, remembering how he decided to pursue a criminal career, recalls a childhood episode in which he framed an Obnoxious Oscar schoolmate for shoplifting. This lad was known to the student body as Smelly, and tattled on other children for the simple pleasure of it.
* A Stainless Steel Rat Is Born, the main character bases his plan for a concert hall burglary around the musical composition to be played, so that the noisiest parts of the job take place during the noisiest part of the concert.
* As Takei notes in the DVD commentary of one episode, every time Hiro says Nathan's name, it sounds rather like
* A stalker of a Japanese idol singer tracked down his victim's residence by observing reflections in her eyes, then used photographs showing the position of windows and the angle of incoming sunlight to determine which apartment was hers.
* Astalon: Tears of the Earth — In their true forms, most of the gorgons appear as hideous, fleshy monstrosities.
* a standalone program for easier editing. Also, the standalone program allows for sharps and flats. The original could only compose in C major. Or possibly A minor, but...
* A standard intelligence technique when contacting an agent suspected to be compromised is making an innocuous statement or question and expecting a specific response, also innocuous. If the agent is under duress or has been replaced, the absence of the right response is an indication something may be wrong.
* A standard in the United Kingdom; whenever a BBC channel suddenly stops broadcasting and an announcer says "This is the BBC from London", sometimes coupled with "Normal programming has been suspended". This usually means someone significant has died — such as a Royal or the incumbent Prime Minister — or that
* A standard old-timey joke involves someone offering his dim-witted friend a choice between "a shiny coin" or "a straggly bit of paper" (usually a £1 coin and a £5 note respectively). The idiot takes the coin of course; if they're feeling subversive, he'll also take the paper "to wrap it up in".
* a standard plotline for dreams of personal insecurity and humiliation.
* A standard police investigative technique used when a seriously large theft of money is accomplished, usually in an armored car or bank robbery: keep eyes open on the street and see if all of a sudden someone is making unusually large purchases and take a look at them.
* A standard trick by private investigators or spies to gain someone's trust is to

stage a fake barfight or street mugging, with the investigator as the Good Samaritan coming in to "save" him or her.
* A standard trope of most TV action shows of the era, due to Network Standards regarding violence. Yes, they considered car wrecks to be

* A standout example is the F'sherl-Ganni, a species of giants who were
* A Stand's strength is inversely proportional to how far away from its user it can operate, making this trope common among long-range Stand users. Despite lacking a lot of raw power, creative use of their abilities allow long-ranged Stand users to threaten the heroes every bit as effectively, if not more so, than short-ranged fighters who get up close and personal. Often enough, most of a Stand fight is attempting to
* A stand-up comedian once said, "There is a direct correlation between being a serial killer, and being born. Show me one murderer who was never born."
* A stand-up comic once joked that if Prince could change his name to an unpronounceable symbol, then
* A staple food source for the Dunmer (Dark Elves) in Morrowind are a species of social subterranean insects known as the kwama, whose eggs are "mined" and used in a number of dishes. The kwama eggs are very nutritious but apparently have a very sharp and sour taste and gummy texture, which can make them revolting to human tongues, but the Dunmer have developed recipes to make them much more palatable. They also hunt scribs, which are a late larval form of kwama, and are harvested for their meat and jelly, the latter of which has a very sour taste and unpleasant texture without proper preparation.
* A staple of all BBC Radio comedy, ever. On programme featured a spoof letter from someone objecting to the amount of double entendre on the airwaves, saying "I don't wish sex to be forced down my throat. It leaves a nasty taste in my mouth, and I'm not swallowing it."
* A staple of American professional wrestling companies is to have the heel color commentator blatantly pretend to miss obvious cheating by the heels and even justify their most atrocious behaviour, much to the chagrin of the face play by play announcer.
* A staple of cheap romance novels of the "Rake meets Virgin" kind — of course, the hero would never rape a
* A staple of comedy shows set in the days where telegrams were the norm (especially in the present day) is the
* A staple of fairy tales has a poor man try to win the hand of a princess (or otherwise high-born or rich girl), only for her father to refuse to give permission unless the man can prove he has the means to keep the girl in the life of luxury she was used to living in. This usually comes from the father demanding the suitor build a house as fine as his own, which the suitor manages using some magic item or another.
* A staple of his humor, especially on Vine, is that he likes to make fun of and exaggerate tropes or real-life trends, from his As-Seen-On-TV parody "Water In Your Hands", where the pitch is that water bottles are far too convenient to use, to his sitcom parody where the
* A staple of Krusty The Clown's archaic, offensive comedy routine in "
* A staple of many war films, particularly those depicting World War I. Used to show that a character has been in the trenches for a long time and been covered in grime from shelling.
* A staple of wrestling from its earliest days. Several times, one wrestler might be expected to compete in two or three matches a night. For instance, someone might be "severely hurt" in one match and carried out on a stretcher (to sell the injury), only to come out an hour later in full health to compete in a battle royal. During the television era, two wrestlers might compete in a main event-caliber match early at a television taping and sell a bloody brawl, only for one of the wrestlers to come out 25 minutes later and make short work of a jobber, with no evidence that he had even been hurt, much less involved in a match. (This was the

case when segments were taped out of order, rather than sequentially, especially before the Internet era.)
* A Staples Business Depot TV commercial from the '90s directly references the trope with a different scenario.
* A staple side effect of hitting zombies with a cutting or bludgeoning melee weapon (except for the
* A staple. The first episode, in particular, revolves around a single, continuous, episode-long chain of one disaster causing another.
* A staple trope of many large wrestlers, especially monster heels. For them, ordinary punches and kicks are more powerful than such moves by "normal-sized wrestlers," with the finishing moves or more powerful set-up punches/kicks frequently knocking the opponent from one side of the ring to the other with a single blow ... and sometimes clear outside the ring! Of course, said impact of moves are always greater on jobbers, as top-shelf wrestlers are always more able to absorb the blow and thus it doesn't have as great of effect.
* A Starfleet officer in a wheelchair (well, hoverchair) made background appearances in several first- and second-season episodes. He is played by wheelchair-using actor George Alevizos.
* As'taris: Ass, Asshole, Santa's Ass, and Jeez-Ass (after he's resurrected).
* A Star Is Born (1976) received mixed to terrible reviews from critics upon its original release. For starters, critics thought the casting of Barbra Streisand as a rock star was ridiculous. Even today the movie has a 36 percent Rotten Tomatoes rating. Nevertheless, it was the second highest-grossing film of 1976, and the signature tune from the movie, "Evergreen," won the Oscar for Best Song.
* A Star Is Born and starred Janet Gaynor. The first two were set in the movie industry and the last two in the world of music.
* A Star is Burns": As described in John Ortved's book, there was an incident when showrunner David Mirkin and writer Bob Kushell got into an argument about the episode, saying it hurt the integrity of the series. Mirkin replied, "That's why you're an asshole." Stunned, Kushell proceeded to chew out Mirkin in front of the writers present and stormed out. He was convinced he was going to be fired for it, and although he wasn't, he wasn't given any writing assignments either. Kushell also mentioned that many writers came up to him privately and thanked him for standing up to Mirkin.
* A Star Is Burns attempt at stand-up comedy, where he cracks unfunny jokes and carries enough firepower to violently put down hecklers.
* A Star is Burns", when the film festival judges are voting on which film should win, Mayor Quimby and Krusty votes for Mr. Burn's film. The camera then pans to a sandwich where it's revealed that the olive on the sandwich is actually a camera and then the scene cuts to Mr. Burns who is watching the judges on the monitor to see if they're voting for him.
* As'taris, dying to take the newly revealed Kansael from John, threatens to cut it out of his chest. Ringo
* As'taris is never more than half-dressed in Ehndris (and is fully naked in his last appearance).
* A Star Is Torn", Lisa states that the reason her family got sick from organic food is because they're not accustomed to the "vitamins, minerals, and trace amounts of bug feces."
* Astarotte No Omocha: Naoya manages to receive a text message and picture from his sister... after he's been taken to the Youkai Realm. More bars in more places, indeed.
* A Star Shall Fall by Marie Brennan, the London faerie court uses Britain's shift from the Julian to the Gregorian calendar (which meant skipping eleven days) to build a room like this. Anyone who goes in and locks the door will come out eleven days later from the perspective of the outside world, no matter how long they view themselves as spending in it.
* A Starstruck Phantasmic Romance: Dash's attempt to justify a defeat.
* A Starstruck Phantasmic Romance: In "Bound Together", Danny tries to make Starfire stop loving him by pointing out she's a Princess and he's basically a

peasant with no money to his name other than what he carries in his pockets but she doesn't care about titles, is allowed to marry whomever she wishes regardless of status, and also lacks Earth money and lives off Robin's charity.
* A Star Struck Phantasmic Romance, so that she can have the Human/Ghost hybrid to herself.
* A Starstruck Phantasmic Romance, which unfortunately means that she has forgotten her relationship with Danny.
* Astarte by concluding that maybe they're actually zombies... noting that they can still eat cake... and amending it with "cake zombies."
* Astartes Apothecaries are just as combat effective as their battle-brothers while having the ability to keep their comrades in the fight, unless they are mortally wounded. Then they just euthanize them and rip out the organ responsible for growing new genetic material for the chapter. Depending on the edition of the game, the rules for Apothecaries allow them to make their fellows tougher, heal wounds or even bring them back from the brink of death.
* Astartes are in relatively short supply due to the Imperium's technological limitations.
* Astartes are said to speak and advise little, as to not undermine the authority of the Captains despite how they are likely even more experienced than them, but this gives their words considerable weight to all of their battle brothers, even the Chapter Master.
* Astarte shows up at the start of the story, guides Nagi to Cecil, and then is never seen or heard again once Nagi buys her. Yet if it had stayed silent, Nagi's prospects in this new world would have been quite grim, and Cecil would still be a "useless Dark Elf" slave, waiting for death in a cell.
* Astartes physiology will keep them somewhere between young and middle age, in theory, forever. In practice, their bodies take strains and wounds that even their bodies can't keep up with indefinitely, and they do age, albeit very slowly. Except for some of the most senior members of a chapter, their age is more told not by wrinkles and lines, but by scars and bionics they accrue over the years.
* Astartes, Sergeant Kohren loses his right hand when he tries freeing himself from the Orb with a point-blank plasma blast that simply explodes the plasma pistol in his hand.
* Astartes, the veteran Retributors kill the Inquisitorial agent when it looks like he's getting possessed by the alien orbs he's been interacting with. They do this by punching his head off and perforating the remains with a bolter.
* Astartes was not only made an official GW product, the original Retributors chapter was made canon as well.
* A startling example occurs in the second season of the ghost-and-swordmanship filled
* Asta's Book production about the (still unsolved) murder. She notes that journalists covering the show are obsessed with Edith: "Children are always of interest, girl children for some reason more so, and missing girl children consumingly so."
* "A Stash from the Past" sees Roseanne discovering a bag of weed hidden in the house. Dan reminds her that it's actually
* A state body in Western Australia regularly uses this in its road safety PSAs. In one, what begins as a car commercial highlighting the car's safety features goes on to show the car suddenly running over a pedestrian as the driver was going too fast. In another, an ad for a kid's toy scooter ends with the child riding out into the road and being hit by a car.
* A stated benefit of being a vessel for the Power of Grayskull in both
* A State Farm commercial starts with a guy at a party with his bros, loudly bragging how he's never going to get married. Cue
* A State Farm radio commercial from 2013 has a young man speaking to a female associate on the phone. He looks at the time and in response tells her that State Farm is there 24/7. His mother, on another line, at home, takes this literally, and asks him where were they when he needed to be changed, and tucked in (past the year of ten). The son, obviously, is very annoyed, tells her to hang up, and the female

associate is flabbergasted that she tells him that she should end the phone conversation, but he pleads her not to disconnect.
* A statement or noisy action, such as a sneeze, with a common response, which is replied to, rather than repeated, by the echo.
* A statement that something is nonsense (again, based on the meaning below).
* A static discharge can be pretty painful without inflicting any noticeable injury.
* a stationary means he's for the time being limited to providing information and access to a (very dangerous) place where the heroes can find tools they'll need for the final battle.
* A station in Philadelphia called the Playstation Portable a source for online porn from kids (for context, smartphones weren't yet mainstream). Of course, they were mostly showing people with the concern that a kid would own a device with no parental controls, and showing screens of websites showing how to make a bomb. If your kid is searching for such articles, perhaps his troubled nature is the problem, not the game system.
* Astérix and the Cauldron, Astérix and Obélix are in need of money and discuss what to do:
* Astérix and the Roman Agent like almost everything here: the main characters of the series doubting that one of them is interesting enough to carry the series. Impedimenta and Vitalstatistix, though, really are secondary characters, and apparently they realize it!
* Astérix in Belgium has a contest with Astérix, Obélix, and Vitalstatistix competing against a Belgian village to see who could wreck more Roman forts.
* Astérix the Legionary, but collecting of helmets of defeated Romans instead. Obélix always won, because Astérix would never bother to actually collect the helmets.
* a) steal something, b) deliver something, c) kill someone, d) surrender to the villain, and/or e) lead his allies into a trap.
* A stealth version: Las Vegas Ballpark, which opened in 2019 as the new home of
* "A steaming pile of lazy assumptions or outright lies" is a good description of
* A steam locomotive gets its boiler supercharged to the limit of its pressure capacity and then explodes in a quite realistically violent manner after it goes hurtling off a cliff. Steam locomotives occasionally exploded spectacularly in real life, sometimes hurling pieces of themselves tremendous distances.
* A Steam port was announced in 2015 by Console Classics. With no further news, it is assumed to be cancelled.
* A Steamy Romance Novel: Forbidden Love, the book clearly indicating that she's a loyal member of the Horde.
* Astebreed: The feats for its achievements range from completing the tutorial stage, clearing the game without dying, to no damage running the game, and they are split between difficulties.
* As Ted prepares to leave New York forever because he can't get over his feelings for Robin, he takes the opportunity to do some things around the city that he'd always wanted to - including correcting some graffiti that said "your a penis" to "YOU'RE a penis"
* A Stella Artois ad on TV had a man hit on a woman at a hotel rooftop pool, only for her husband to show up. The guy hops over the wall, falls past several clotheslines and ends up
* A stenograph-like record of the last few dozen lines that were spoken, so if you zone out and miss a bunch of dialogue, or are forced to save and quit and come back at a later time, you can look over the past several lines to re-initiate yourself with the context.
* "A Step at a Time": During a flashback of Tommy taking his first steps. He is walking toward the camera and his diaper fills up the screen and then he walks back out ending the flashback.
* "A Step Between Stars" is initially just between the Voth and the Dyson alliance.

* A step up from the above tours are arena productions based on live-action or comic book properties, featuring elaborate special effects and/or stunts to put characters and creatures through their paces.
* Aster Asks!: The story has some conflict, but it's driven entirely by Aster's awkwardness and insecurity.
* A stereotype is that opera is just a bunch of controlled screaming. If you say this, even jokingly, to an opera fan, you will be pulverized and forced to listen to their entire playlist until you concede defeat and tell them that opera is beautiful. To be honest, though, how could anyone call
* Asterion doesn't outright state it, but it's clear that he wished that he was born a human and didn't have to deal with the trials his life gave.
* Asterios is 298 cm (9'9 1/3") who's also a mass of muscle outright called a
* Asterios is a Berserker, but he is moderately intelligent since he rejected his feral instincts. However, he has an
* Asterios the Minotaur is strong enough to grapple with Heracles himself.
* Asterisks had been using a camera in their center field bleacher to steal the opposing catcher's signals to the opposing pitching, in order to signal the Asterisks' batter when an off-speed pitch was coming by banging on a trash can (or allegedy sometimes by a buzzer under the jersey), the Dodgers have been justifiably less graceful about it. As have the Yankees. And their fans. And every other team and fanbase in the league.
* Asterix…), Asterix himself switches to Guile Hero mode when punching stuff isn't the best answer — such as when there's no magic potion available (Asterix the Gaul springs to mind), or using subtlety gets the villain of the book a far more appropriate fate than mere pulverisation, such as in "Asterix La Zizanie", also known as "Asterix and the Roman Agent" or "Asterix and the Green-Eyed Monster".
* Asterix, a de-aged Obelix meets a group of Roman soldiers and tries to attack them. The Romans (naturally) don't believe the little boy attacking them really is Obelix. One of the legionaires then claim to be Queen Cleopatra to mock Obelix's claims.
* Asterix) adventure together all the time. And as Lewis points out about friends, Astérix and Obelix are usually side by side, looking at a common goal (usually pounding some Roman legionaries, Germanic warriors of various sorts, or turning the pirates' latest ship into driftwood) or common interests.
* Asterix, after a potion causes the Romans' hair and beards to grow uncontrollably:
* Asterix; after the place is in total disarray, they give Asterix Permit A-38 just to get rid of him-and then goes insane when he realizes someone actually got a permit.
* Asterix: A hazard when running at full speed thanks to the Magic Potion.
* Asterix, a humorous series set in New France (Canada) in the 18th century. The series has been collected into three and five albums.
* Asterix album, our hero and Obelix pass by a fisherman at the river, complaining about all of the amphora jars he keeps catching.
* Asterix, all the Britons came off as this, due to speaking in French but keeping the words in the English order.
* Asterix, all the French wordplay is replaced with equivalent English wordplay, but all the Latin wordplay remains in Latin. One of the main joke templates involves three recently defeated characters each making a pun on the situation, with one usually in Latin.
* Asterix, a merchant asks a butcher for a steak after getting badly beaten up. Given afterwards the merchant has to run from the title character, the butcher chases him wanting to get paid... and eventually gets punched, requiring a steak of his own once returning home.
* Asterix & Obelix: God Save Britannia) kisses the hand of Miss Macintosh. The contact between their bodies creates a big electric arc.
* Asterix & Obelix: Mission Cleopatra: Artifis and Ceplus have a protracted argument where they're just repeatedly saying "Yes" and "No" to each other until

they're simply hissing in each other's faces.
* Asterix & Obelix: Mission Cleopatra, is said to be less good than the second but better than the first.
* Asterix & Obelix: Mission Cleopatra when Cleopatra announces her palace will be built in three months. Most of the people in the scene get a reaction shot and mutter "Three months?", including a kitten whose meow sounds close to the word "month".
* Asterix & Obelix, where the person being escorted is a Spanish Prince, who tried holding his breath to get what he wanted. Obelix learned the same trick as well.
* Asterix & Obelix XXL, upon hearing that the Romans had Cacofonix chained up, gagged, and locked in a soundproof dungeon, Obelix's response is "Oh, why didn't we ever think of that?"
* Asterix and Caesar's Gift, Caesar decides to award him the title deed to a certain little Gaulish village. Tremensdelirius sells it to an innkeeper for more wine when he's broke.
* Asterix and Caesar's Gift, it's notable that the reason Obelix feels attracted to Influenza is because of how small and light she is. He mentions how light she is several times, annoying his dog.
* Asterix and Cleopatra, a furious Cleopatra, stung by Caesar's taunts, insists that Egypt is still a great country and bets him that she can build a palace for him in Alexandria within three months. An Egyptian architect is charged with it, Panoramix gets called to help, and Asterix and Obelix go with him. Unlike in a lot of stories, these bets are not just a pretext for a plot; they also represent the wider conflict between national pride and imperial arrogance.
* Asterix and Cleopatra, a soldier tries to prevent this by rolling a large stone in front of the door — only to have Obelix crash through the wall right next to it.
* Asterix and Cleopatra, Cleopatra swears by "Ammon and Helios", Helios being the Greek god of the sun. Cleopatra and her family were Greek and worshipped Greek gods.
* Asterix and Cleopatra he added the sulfuric acid. His expression as this happens makes it even funnier: He's first surprised, before grinning at the mixing bowl.
* Asterix and Cleopatra: he tried to climb the statue and kicked it loose.
* Asterix and Cleopatra. In the comic, he's simply dressed as just another Egyptian worker. In the film, he's introduced wearing a robe that blends with the wall decorations behind it, and gets more elaborate with each scene.
* Asterix and Cleopatra — the latter a particularly impressive feat considering that the Colosseum wasn't built until over a century after Caesar's reign.)
* Asterix and Cleopatra taken the antidote), and he's better able to eat large quantities than his two companions.
* Asterix and Cleopatra, we see the latter discussing her latest portrait:
* Asterix and Obélix frequently play their inhuman strength for laughs.
* Asterix and Obelix All at Sea Baba to be the drummer, at which point he pulls off a high-speed drum solo before being replaced with a standard drummer.
* Asterix and Obelix are named after the punctuation marks designating first and second footnotes.
* Asterix and Obelix do this many times when they singlehandedly and casually beat the crap out of Roman legions. It certainly helps the fact that they are powered by a magic potion which grants them superhuman strength.
* Asterix and Obelix's Birthday: The Golden Book is full of this, such as parodies of famous paintings and the Vitruvian Man.
* Asterix and Obelix's Birthday: The Golden Book wasn't in effect and the village aged fifty years. Obelix wasn't too happy with it (Since in that future, the Romans tore down the nearby forests where the boars used to live, depriving him of his favorite food), and when Albert Uderzo himself showed up to take credit, the permanently-empowered Gaul makes his displeasure known with a swift uppercut.
* Asterix" and "Obelix" went to court, forcing the open source project MobiliX to

rename to TuxMobil.
* Asterix and Obelix: XXL and its sequel incorporate this: whenever an enemy is defeated, they fly off the screen at high speed, stretching like elastic. However, only a helmet (which constitutes in-game currency) is left behind, as opposed to a full set of armor.
* Asterix and Son ends with Brutus getting punished, the Gaulish village he destroyed getting rebuilt, Caesar hosting a banquet for the Gauls and he and Cleopatra reunited with their adorable baby son, Caesarion. The narration notes that Caesarion will become the last pharaoh. Those who know anything about classics (most of the readership...) will realise that all of this will end up in a horrible, murderous disaster. Caesarion certainly would have had a happier and longer life if he'd continued with Asterix and Obelix as his guardians, terrible parents as they are.
* Asterix and Son, Impedimenta is told to "get back to your pots and pans, woman." She promptly smashes the offending Roman over the head with a pan.
* Asterix and the Actress completely derails Pompey's plans when he accidentally sets both Caesar and the Gauls on Pompey's trail. At one point he is released from jail and given an alternative punishment: water corvée. He immediately pleads to be sent back to jail as he can't stand water, something his superiors are well aware of.
* Asterix and the Banquet, they let themselves be captured, but as the roman attempt to wrap them in chains, they keep moving and breaking them because of the magic potion, to the Roman's smith's great distress.
* Asterix and the Big Fight as General Caous and is sadly long out of print.
* Asterix and the Cauldron, Asterix and Obelix sign up for some prize fights in order to raise money. However, the Magic Potion makes the fights so one-sided that people quickly lose interest, and the fight promoter runs out of other fighters willing to fight the pair.
* Asterix and the Cauldron briefly shows a chariot race in Roman Gaul as Astérix and Obélix attempt to win the money they need by betting.
* Asterix and the Cauldron despite Caesar's best efforts, they naturally do not consider themselves bound by Roman tax law.
* Asterix and the Cauldron when Asterix and Obelix are trying to make money, Obelix suggests that they could tell tales of their adventures and call them, "The Adventures of Obelix the Gaul." Asterix then replies that nobody would pay to listen to that.
* Asterix and the Chariot Race resolves around the heroes participating in a huge chariot race across Italy.
* Asterix and the Falling Sky's dislike of manga and its popularity in France. Both critics and fans derided the book as little more than a crass and xenophobia-tainted rant against manga and it dealt a fatal blow to Uderzo's reputation from which he never quite recovered.
* Asterix and the Golden Sickle, when they are going into the forest to look for the dolmen where Clovogarlix is, Asterix and Obelix bet wether they will encounter wolves first, or bandits. With the loser having to buy the other a round of beer. Asterix bets on wolves, and wins. But just barely, since the wolves are sitting around a tree, in which a bandit is hiding.
* Asterix and the Goths, at least seven of the rival kuningōz are bald.
* Asterix and the Goths is also done in a history book style, explaining in abbreviated style the complicated political fallout of Asterix's meddling.
* Asterix and the Great Crossing, Asterix and Obelix accidentally drift off on the ocean and unknowingly discover North America.
* Asterix and the Great Divide, of course featured a scene where handsome young Histrionix climbs up to the beautiful Melodrama's balcony. Interestingly, the original reason she invited him there was just to warn him about her father's nefarious plan to conquer the village with Roman assistance rather than for any romantic reasons, but the mood gets the better of them and after quoting "Histrionix, Histrionix wherefore art thou Histrionix" she kisses him. Then the villainous Codfix raises the alarm and a startled Histrionix falls off the balcony

and lands on him.
* Asterix and the Laurel Wreath, a drunken Chief Vitalstatistix bets his nouveau-riche bore of a brother-in-law that he he can serve him a stew seasoned with Caesar's Laurel Wreath; naturally it's Asterix and Obelix who are sent off to Rome to do the dirty work.
* Asterix and the Laurel Wreath taking place in a misty street at night are drawn in a monochrome, pontillist style, apparently more as an artistic experiment than anything.
* Asterix and the Magic Carpet), before settling on soaking him overnight in a mix of elephant milk, stool and hair. It does nothing to cure him. Near the end, Asterix gives him some of the magic potion so he can help fight off the villains, and it clears up his voice right away.
* Asterix and the Magic Carpet boils this trope down to its fundamentals with the following quote.
* Asterix And The Magic Carpet, his singing is so bad it causes rain to start falling. An Indian mage hears of this and asks for his help to fight a drought in the Ganges.
* Asterix and the Missing Scroll, Libellus Blockbustus is a choleric little man who's in the habit of doing this to his servants. Including with a mute scribe, while ordering him to talk (he has to be reminded twice that the scribe can't).
* Asterix and the New Class, a flashback to the births of Asterix and Obelix shows that Vitalstatistix had a large mother and a small father, as an inversion of the size difference between him and his wife Impedimenta.
* Asterix And The Normans, he ends up teaching a bunch of Vikings the meaning of fear (they aren't afraid to die or get hurt, but the thought of sitting through another of his recitals turns their legs to jelly).
* Asterix, and the remaining crew got increasingly grotesqued until they all ended up looking really different to their original inspiration, especially Baba.
* Asterix and the Roman Agent and, especially, a building full of bureaucrats, of which the latter nearly drives them insane.
* Asterix and the Roman Agent because the battle is explained as being the most intense, dramatic battle in the village's history, but is riddled with plenty of fun gags.
* Asterix and the Roman Agent has a few panels where Impedimenta laments that Asterix received a valuable vase from a Roman for being "the most important man in the village." When Vitalstatisix mutters that he's the most important, she retorts, "If anyone was fool enough to write down the story of our village, they won't be calling it The Adventures of Vitalstatistix the Gaul!"
* Asterix and the Secret Weapon ends with both the village's men and women compromising in a way that could be read as a call for a focus on understanding and collaboration to solve social injustice, or just being outrageously sexist, depending on interpretation. Either way, it's very difficult to side with the story after it specifies that women are allowed at the final feast (as they do not attend feasts usually), but they remain absent from all feasts afterwards.
* Asterix And The Secret Weapon, his singing is the last straw for the female Roman legionaries, who refuse to fight any longer.
* Asterix and the Secret Weapon ode transcending the verbal dimension"). It caused a near-apocalyptic storm that caused most of the animal population of the forest to run away, including a dragon.
* Asterix and the Secret Weapon when the village calls for a new bard to improve the education of their children. They get Bravura, an independent woman who bucks social norms by wearing breeches as well as taking up a traditionally male career. Needless to say, the male inhabitants of the village are equal parts amused and irritated, especially when Bravura starts to influence their wives into becoming more proactive.
* Asterix and the Soothsayer, when the soothsayer offers to "read" the entrails of Dogmatix, Obelix retorts "No one has ever read us, and no one will!"
* Asterix and the Vikings, after Obelix punches out one of the Roman guards he says "Second door on the left... you passed the test..." before falling unconscious.

* Asterix and why even the more shrewd Gauls really enjoy beating people up on potion.
* Asterix animated films, just like in the comics. Usually the magic potion-empowered villagers' response against agression attempts by the Romans.
* Asterix, an otherwise cel-animated film, look like part of a video game. The opening sequence is even more out of place.
* Asterix, a panel at the beginning shows children picking up apples from a branch of a tree going above the ditch separating the village in two halves, with a grumpy old man yelling at them. The panel is reused at the end, near-identical save for the ditch now filled with water.
* Asterix are on board. It can be Phoenician, Egyptian, or Roman, but it's all the same.
* Asterix: As expected from pirates, they are a motley crew of several nationalities and one inclination: get gold through the easy cutthroat way. Also one tendency to run away from a certain pair of Gauls.
* Asterix: A soldier recalls how he was given the choice of crucifixion or being assigned to Corsica.
* Asterix: Asterix and druid Getafix (Panoramix), who are always the only ones in the village who remain calm, wise, and above all moral panic and fights.
* Asterix, Asterix and Getafix talk rather loudly next to the Romans about how they're not allowed to drink the magic potion sitting in the cauldron in a certain nearby shed whose door doesn't shut properly and isn't guarded by night, in order to trick the Romans into drinking the magic potion and thereby disqualifying themselves.
* Asterix, Asterix and Obelix are about to sit down to eat some wild boar, but when Asterix steps out for a moment, he returns to find that Obelix had devoured both boars.
* Asterix: Asterix and Obelix are chasing an ox cart on a Roman highway, but since the cart goes at a leisurely walking pace, they easily catch up with it. Yet the ironic caption for the panel is "And the breathtaking chase begins!" Obelix stops the cart by dovetailing it and stopping in front of it, which obviously is not impressive at all when done at 5 MPH.
* Asterix, Asterix and Obelix are enjoying luxury food while waiting to be thrown to the lions. The jailer explains that this is to ensure they taste nice for the lions. If they were to be thrown off the Tarpean Rock, they would get solid, heavy food.
* Asterix, Asterix' and Obelix' ignorance about monetary and economic matters proves almost fatal when they, in spite of their supernatural abilities, continuously fail to earn money when they suddenly have to. While it could be argued that they never would have slipped into that situation to begin with if not for the deceit of a greedy rival chieftain, the message the average reader most likely takes from the story is, especially on rereads, that at least some skill with money and trade is indeed useful, even if you live outside the economic hotspots.
* Asterix. Asterix delivers a barrage of verbiage that occupies three-quarters of the panels and ends up putting Obelix to sleep.
* Asterix", Asterix spits out his food when chief Vitalstatitix announces that they're going to cook a stew with Caesar's laurel wreath as ingredient.
* Asterix, Asterix travels to Great Britain, where they are suddenly (as in, in between saying "the fog falls" and "fast") caught up in fog and can't see anybody or anything. Anticlimax says it is a natural phenomenon in his country.
* Asterix, Asterix' village decides to participate with the Olympic Games since they could technically be considered to be "Romans", as being part of the Roman Empire. They celebrate this by shouting "Hurray! We are Romans!". A Roman centurion who spies upon them is flabbergasted and then borrows Obelix's catchphrase: "These Romans are crazy!"
* Asterix as the final sign that Uderzo just didn't care anymore. He quit drawing the strip after that, and new artists have continued the series.
* Asterix at the Olympic Games, after the Gaulish villagers have taken their place

in the stands, they are as raucous and excited as a typical sporting crowd, cheering loudly for their champion, Asterix... until they realise he has been shut out of the top three in his race. Their behaviour contrasts sharply with the Greeks, especially the Spartans, whose reaction to seeing their athletes sweep the top three is as follows:
* Asterix at the Olympic Games at the knowledge that the Gauls have entered with their magic potion and are neglecting their training) and demands a "proper" meal, to which his companions agree.
* Asterix at the Olympic Games, the Gauls hire a ship to transport them to Rome only to find the ship they hired is a galley, where they're expected to do the rowing. The ship's captain explains that these are the "deck games and sport" promised. He then confirms that it's usually a slave ship: "You got the better deal, normally rowers are chained and whipped!"
* Asterix at worst and is usually regarded by other characters as more attractive than Asterix.
* Asterix: Besides granting super strength, the magic potion is occasionally shown to grant super speed as well, usually depending on the plot of a story.
* Asterix book, a Roman athlete runs in a stylish pose, in contrast with Asterix and Obelix.
* Asterix book in which the heroes journey outside the village will feature at least one punch-up in a restaurant.
* Asterix both of them plan to get rid of the other to, as Crismus said, "become a triumvirate all on his own".
* Asterix brother-in-law Homeopatix. His wife Impedimenta mentions Vitalstatistix wanted to bring a menhir as a gift.
* Asterix, but their chieftain acknowledges it gave them courage enough to defeat the Romans.
* Asterix, by a new team of creators (Jean-Yves Ferri and Didier Conrad).
* Asterix. Caesar, at one point, tells him to put it away before he hurts himself.
* Asterix. Caesar sends three triplet Egyptian mercenaries to capture Getafix on the building site. They stack at the corner of a tent.
* Asterix chief of the village), Asterix decides to make sure the others have learned their lesson and starts going around being carried on a shield by Asterix. When Vitalstatistix venomously asks what he thinks he's doing, Asterix cheerfully replies he's testing out the shield he intends to give Vitalstatistix for his birthday.
* Asterix Cleopatra breaks the vases closest to her when she gets into an argument with Caesar.
* Asterix comic books, the 93-year old Geriatrix has a young and beautiful wife.
* Asterix comics doesn't like Tragicomix and is jealous of him being Panacea's fiancee. But Tragicomix isn't aware that Obelix is in love with her, let alone that he's jealous of Tragicomix. In fact, he has lots of respect for Obelix after being saved from the Romans by him and Asterix, and seeing Obelix charging at a Roman army all alone. When Tragicomix sees Panacea again he actually praises Obelix to her for his feats.
* Asterix comics. Since he's very small, he also has no trouble clinging to the butt he's biting, which usually results in the subject (most often a Roman) running around while yelling.
* Asterix comics, the title character and his friend Obelix do this a lot, including in the animated adaptations:
* Asterix comics, the village bard Cacofonix's singing is so bad, it was used once to teach invading Normans the meaning of fear.
* Asterix completely shifted the focus, theme and and tone of the series, transforming a historical comedy into a science fiction pop culture reference smorgasbord.
* Asterix Conquers America have up to three, as some were released by different VHS companies with different dubs, and then five of them were released on DVD with a whole new dub.
* Asterix Conquers America: The introduction shows the Earth to be "as flat as a

pizza". However, as the story goes on, the Earth is revealed to be round.
* Asterix: Depending on the story -and gag- Obelix is strong and nearly invulnerable but slow, or unexpectedly fast.
* Asterix. Does not stop him from kicking ass when properly motivated, though. Of course, compared to Obélix, he may look slim...
* Asterix), Dubbleosix (a Sean Connery parody) and Spartakis (based on Kirk Douglas) to non-caricature characters like Fulliautomatix or Caligula Minus and the difference is obvious. This is occasionally really useful, since a lot of the "cameos" are French celebrities that no-one outside of France would identify.
* Asterix. Essentially, don't threaten anyone he likes or is protecting, because he will mess you up.
* Asterix: Even when other Romans are the episode's main antagonists, Julius Caesar is very often behind their actions directly or indirectly.
* Asterix), finding him, and convincing him that it is a terrible idea and that he needs to go back home without hurting his feelings.
* Asterix for all things Roman) show little girls being educated alongside little boys, being taught things like language and Maths - and young adult Panacea is said to have returned from studying in the city with the implication it was at something like a university. We don't know very much about how the Brittanic tribes educated their children, but we do know that the Romans very rarely educated girls.
* Asterix. For instance, mention the word "druid" and everybody will envision Panoramix (Getafix in the English version). The same goes for the idea that all the Gauls had moustaches, wore winged helmets and had names that ended in "-ix".
* Asterix, fudging dates for the plot to work and occasionally just total mistakes. It was extensively researched by the creators, who both visited museums to speak with expert historians and read primary sources, and then all of the research was ignored so they could do something they found funny instead.
* Asterix: Fulliautomatix the blacksmith and Unhygienix the fishmonger are forever at each other's throats and often the cause of the village brawls due to the former making unflattering remarks about the dubious freshness of the latter's fish.
* Asterix gaining a green background) that quickly escalates into shouting and fistfights.
* Asterix, Gaul's governor has been skimming off the taxes the province sends to Rome. To illustrate the depths of his embezzling, when the taxmaster arrives, the governor gives him a lapful of gold, chucks most of the money in his private coffer, and throws a couple of coins into a small moneybox for Rome. This is what forces Rome to send an inquisitor to check the accounts, so the governor proceeds to poison the inquisitor. The poisoned man manages to call for Getafix, who sends Asterix and Obelix to Helvetia to collect an edelweiss for the antidote. It turns out Helvetia's governor is just as corrupt as Gaul's.
* Asterix gets his first compliment on his music, ever — a hip young teen who tells him that he would probably do better in the city. This goes to his head in a huge way, and he decides to pack his bags and leave for the city at the worst possible time, without having any idea what he's doing. He ends up leaving a trail of people he's alienated, annoyed, and property that he's destroyed, and ends up penniless nowhere near his destination, where he's found by Obelix and persuaded to come home.
* Asterix, Goscinny and Uderzo run into Obelisc'h, who shows them a family tree tracing all the way back to his famous Gaulish ancestor; excepting clothes and hairstyle, every branch looks the same.
* Asterix has a lot of general slapstick, running gags and situation comedy that both parents and children can enjoy. But it is as much a comic for adults as it is for children, with many puns, double entendres, satirical gags, cameos and references to classic literature, the Ancient Greek, Roman and Gaulish time period, francophone culture and 20th-century society. Additionally, virtually all the characters' names are some sort of pun, most of which wouldn't make sense to children (such as Vitalstatistix the chief, Getafix the reclusive druid and even one-off character like Crismus Bonus the Roman centurion).
* Asterix has Centurion Caius Bonus, whose actor, Jean-Pierre Castaldi, was clearly

chosen based on his ability to make faces that say "today is not going to be much fun", which get pulled out in every scene when he and Obélix interact, typically by means of Obélix punching him.
* Asterix has Panacea, who returns after many years studying outside the village.
* Asterix has received quite a few animated movies based on the albums, as well as several with an original story.
* Asterix has the title character coming upon the Sega logo, then adjusting his hat.
* Asterix has Tortuous Convolvulus who plays with it, as he most often utilises his unique talent for psychological warfare, strife and anger for his own Machiavellian enjoyment. However at times he seems to cause that naturally by his mere presence. Sort of an indirect jinx, as a lot of destruction comes in the wake of that.
* Asterix, he mentions his cousin, Iznogoud, and uses the phrase "I'll be Rajah instead of the Rajah.")
* Asterix his foot for hours, and Getafix doesn't even break a laugh. Later, they threaten to torture Asterix to force Getafix to prepare his magical potion: both Asterix and Getafix say that there is no way they are going to do it, but as soon as he starts to be tied to the table, Asterix starts to beg for mercy and Getafix decides to do what the Romans say. This is all a way for the Gauls to play the Romans like fools.
* Asterix his sister, getting progressively angrier until the officer runs for his life. For a moment, it seems he was just pretending to frighten the Roman away (since he was, in fact, sheltering three enemies of the state). He then turns around and scolds Chipolata for "flirting with Romans," clarifying that nope, he is a murderingly overprotective brother.
* Asterix in 2013 to take over the series, ensuring that the Gaul lives on after his death.
* Asterix, in any comic, manage to gain the smallest durable advantage over the Gauls.
* Asterix in "Asterix and the Goths" described his troops as "They're all quite thick, and I'm their leader! [sobs]"
* Asterix: In "Asterix and the Great Divide", the Romans get their hands on some of the magic potion, but make the mistake of drinking it in combination with another potion from Getafix (one that can instantly heal injuries). The mixture of different potions in their bodies has the side effect that they swell up like balloons before shrinking in size.
* Asterix in Belgium, a poem written about the Battle of Waterloo. A double joke in the sense that Caesar, too, loses the battle and that Waterloo is located in Belgium.
* Asterix in Belgium when a Belgian chieftain sees a cauldron with oil boiling in a Roman camp and when Obelix later finds a piece of the pirates' ship with mussels on it.
* Asterix in Britain) and a direct confrontation would put them or it at peril. Otherwise, plot tension happens only when Asterix loses his flask of potion.
* Asterix in Britain has a scene where an English gardener stands back to admire a lawn that has taken generations to train into its current immaculate state — just in time for a chase scene to go pounding across it.
* Asterix in Britain In a setting supposed to be ancient Celtic England.
* Asterix in Britain of messengers sent to General Motus always arriving at his headquarters after the floors have been waxed, resulting in slips, slides and crashes into various marble statues (explaining why so many Greco-Roman era statues in museums nowadays are broken).
* Asterix in Britain, the pirates manage to avoid having their ship sunk by the Gauls, only to accidentally run it aground.
* Asterix in Corsica hell for legionaries, to which being thrown to the lions in the circus is preferable.
* Asterix in Corsica volunteer, very much despised and considered an idiot by his fellow legionaries. Tellingly, one of the grunts mentions that he was offered the choice between crucifixion and serving in Corsica.

* Asterix in Spain) and is little better when Asterix and Obelix offer to take him home to his father.
* Asterix in Spain, Asterix battles a bull with a red cape which accidentally fell in the arena, thus inventing bull fighting in Spain. In the same book, Unhygienix asks Obelix to make a payment in menhirs because he wants to "develop" a property in Carnac (Stonehenge in the English version).
* Asterix in Spain Unhygenix is named responsible for Stonehenge (the original French version name-dropped Carnac instead).
* Asterix in Switzerland suggest multiple contradictory and potentially fatal treatments (one of which has "if the patient survives..." in the middle). Thankfully, the Quaestor is brought to the Gaulish village and "kept hostage" by the Gauls until Asterix and Obelix return with the cure.
* Asterix in Switzerland, the plot is kicked off when governor Varius Flavus is faced with an audit by the Roman Quaestor (inspector) Vexatius Sinusitus, and poisons him in an attempt to avoid the audit. Atypically for this trope, Sinusitus is actually portrayed as just an honest official trying to do his job, while Flavus is corrupt, and genuinely was doing things that were grounds for an audit (embezzling from his district's tax revenues).
* Asterix in the hopes that Caesar will attend in order to obtain the titular laurel wreath.
* Asterix. In the latter album, the legionaries are served their first military meal in the barracks, and it's so bad that they refuse to to eat it, voicing their disgust in many creative ways. The Belgian says: "That is food for the Goths", the Goth says: "In my country we've had people drawn and quartered for less!" Cut to the British recruit who not only ate all of his serving, but is licking the last bits from his fingers saying "Mmmh, delicious, isn't it?"
* Asterix, in the titular short story, Obelix is forced to go back to school by Getafix after he fails to answer the question when the battle of Gergovia was.
* Asterix, in what is definitely a parody of the French Foreign Legion.
* Asterix is a bit of a subversion. She is much younger than her husband, but he isn't particularly rich. Their marriage is happy, but there is always the status of being married to the oldest man in the village.
* Asterix is almost unknown outside France. You have a shot at recognizing them if you've seen one of the 90s cartoon shows, but the parody characters have such a distinct look that it's not obvious.
* Asterix is also quite short, but that book was drawn by a different artist.
* Asterix) is more prominent in the culture, architecture, and landscape. Still, it has been universally translated and sold. Only in Japan and in the US it never caught on (you can find the comics pretty easily in the US; just don't expect anyone else to be familiar with it unless they're a Europhile). It's more popular in Canada (which has stronger European, especially French, cultural connections) but still isn't anywhere near mainstream (except in Québec).
* Asterix, it's revealed that Cacofonix has a special instrument called the Moomoophone for this purpose. When the Romans show up in large numbers at the village to demand the scroll back, he uses it to send a warning signal, which is passed on by other Gauls who hear it, until it reaches Asterix, Obelix and Getafix in the forest of Carnutes.
* Asterix Jacques Chirac, though the parody was focused on his largely-forgotten-outside-France stint as Prime Minister.
* Asterix: Julius Caesar and other high ranking Romans are fond of sentencing underlings who failed them to the lions, or threaten them with this fate if they are uncooperative.
* Asterix. Julius Caesar, military genius that he is, responds to this and their habit of taking two-day weekends with the highly effective, albeit terribly unsporting, tactic of beginning his attacks at mid-afternoon and on weekends.
* Asterix lasts so long that all the spectators leave. The next dawn finds both of them lying on the ground, and the fight is called with no winner and no loser.
* Asterix). Later stories lampshade this, with Obelix noting that their adventure can't quite be finished if there's no banquet.

* Asterix leader Jellibabix leads the troops of Prefect Poisonus Fungus on a wild goose chase that gets them hopelessly lost in Lugdunum's labyrinthine streets, the prefect decides to go in after them but leaves a trail of pebbles so that he can find his way out again. Then, as Asterix and Obelix leave the city, we see the prefect's plan hit a snag...
* Asterix, Legionary Infirmofpurpus blows his cover (disguised as a tree) and runs off yelling "MUMMY!"
* Asterix looks for the Gifts of the Gods who was lucky enough to be asleep, and thus not participate in any of the one-sided skirmishes with the Gauls, but unlucky enough to have enough of a protruding belly to make for an excellent jumping point.
* Asterix looks like he's about to sing, there is usually another gaul, almost always Fulliautomatix the blacksmith, ready to spare everyone else the horror by pummeling him into giving up (or unconsciousness, whichever comes first).
* Asterix", Macaroon the Pict is found frozen in a block of ice by Asterix and Obelix at the start of the story. At the end of the story, the same happens to the Roman centurion leading the invasion of Caledonia.
* Asterix — Based off the popular comic book series. 10 animated film adaptations since 1967 and 4 live-action since 1999.
* Asterix—to dissuade him. Obelix returns to Asterix and reports, "I didn't learn anything. He saw through me before I could get any ideas."
* Asterix movie it is established that Getafix's magic potion works only for "about ten minutes", this is a big contrast to the original comic books where the magic potion did in fact work for many hours.
* Asterix movies, Obelix does this, but with a faintly-remembered variation.
* Asterix not by dropping his weapons at Caesar's feet... but on his toes. And then Caesar "went away to other conquests"... by hopping on one foot.
* Asterix: Numerous references to antiquity and Latin language that only history buffs and Latinists will understand. Little jokes referencing French literature and linguistic brain-twisters are also thrown in.
* Asterix: Obelix and chief Vitalstatistix certainly fall into this trope. Obelix is dimwitted, naïve and often does stupid things because he underestimates his own strength. Vitalstatistix is pompous and a bit brighter than Obelix, though often gets carried away by his big mouth and as a result blunders a lot too. Though it can be argued that at least Obelix, despite his shortcomings, has a certain charm and innocence that made him very popular with readers, both young and old.
* Asterix, Obelix causes the partial destruction of the Colosseum by accidentally backing into a support pillar. This is despite the fact that construction of the Colosseum didn't start until 120 years after the time period those stories take place in.
* Asterix, Obelix decides that he needs to lose weight, and so he'll only have a lightly garnished cracker at the end-of-story-banquet. When Asterix asks what the cracker will be garnished with, Obelix declares "A roasted boar!"
* Asterix, Obelix has a crush for Panacea (Falbalà), but she's engaged (and later married).
* Asterix, Obelix often punches out Romans and collects their helmets, although he doesn't kill them, he just knocks them unconscious.
* Asterix, Obelix once whistles to fool a Roman legionary. That guy isn't fooled, but tells Obelix everything he needs to know. Obelix still doesn't get it.
* Asterix of the magic potion allows the Gauls to merely beat their armed enemies with their bare arms to unconsciousness. They end up (most often the Roman legionaries and the Pirates) surviving the skirmishes in one (if rather pummeled) piece and ready to live another day, their clothes and their dignity not so much.
* Asterix of them leaving commanding officers sobbing in frustration with their antics (said sobbing is almost always mistaken for homesickness/missing the missus).
* Asterix, once Cacofonix has no voice to sing, the angered crowd throws onions and tomatoes at him.
* Asterix, once tanked up on Magic Potion, becomes more than a match for any would-be babysitter, tossing people around like rattlers. When a Roman legionary

disguised as a rattler pedlar offers to watch the baby...
* Asterix on the nose from Panacea for bringing back her fiance Tragicomix. Obelix faints, but recovers in time for the ending banquet. Asterix on the other hand is seen sitting in a tree with a dazed expression.
* Asterix opens with Asterix and Obelix in Rome, and Asterix complaining to Obelix about the mess they've gotten into. The story then briefly flashes back to explain what's going on.
* Asterix, our hero learns that Obelix still thinks storks deliver babies and concludes they need to have a discussion. And they do, at the end. But judging from what Asterix is saying, he doesn't know what he's talking about or is laying the metaphors on too thick (or it could be the wine, this Talk is happening at a feast);
* Asterix, Pectine stows away in... Getafix's cauldron, being small enough to fit in, as the druid travels to the Carnutes Forest with Asterix and Obelix. Well, Obelix did know she was here, but she made him promise not to tell.
* Asterix pidgin (Obelix eventually comes to think this is how businessmen talk). At the end of the book, this pattern becomes used whenever someone had trouble understanding something straight away.
* Asterix portrays garum, the popular Roman condiment made of fermented fish guts, as this.
* Asterix Race is about a chariot race through Italy, which Asterix and Obelix participate in.
* Asterix reasons (the aim was to be like how children imagine the history they learn at school).
* Asterix results in two armies using a shared pool of tactics and the signal for tactics, leading to the comedic spectacle of identically dressed legionnaires getting confused and constantly asking whose formation they're in (Caesar's troops ending up in Scipio's formations and vice versa) as a goofy send-up of the historical Battle of Thapsus.
* Asterix' right hand man and Asterix being sentenced to die in an arena filled with wild animals, unable to give Obelix the signal since he is out of hearing range. And then Detritus unknowingly helps Asterix give Obelix the signal because he is curious what exactly Asterix is shouting to Obelix and uses his skills of lip reading to find out.
* Asterix: Roman soldiers are portrayed as a bunch of weak and incompetent losers. And quite a few centurions aren't that better. The army is very lacking in efficiency and organisation, the spirit is that everyone is only out for themselves and everyone treats their job as a chore. A good part of this stems from the fact that since everyone in the camps surrounding the village who has had an encounter with the Gauls (which is everybody except recent transfers) knows that fighting the Gauls will just result in them getting beaten up, they don't see any reason to even try to be proper soldiers.
* Asterix's closest friend besides Obelix is the druid Getafix, who had his long white beard when all the rest of the cast (save Geriatrix) were children.
* Asterix series, village blacksmith Fulliautomatix is often wielding his hammer when charging into battle with Romans or a fight with his fellow villagers (most likely Unhygienix the fishmonger).
* Asterix shaped most people's impression of Gaul and the Roman Empire.
* Asterix. Squareonthehypotenus gets introduced to him when feeling his teeth embedded in the buttock while marking a tree, which Dogmatix strongly objects to.
* Asterix starts like this: The roman official in charge of maintaining Italy's roads is accused of not doing his job properly, to which he counters that, of course, the roads are in perfect condition! In fact, they're in good enough condition to have a chariot race on all around Italy! Except that he has then to actually organize the race, despite knowing the accusations were right.
* Asterix status is sometimes used to save the day (to his chagrin, as he's convinced he has real talent that's wasted on the village barbarians):
* Asterix stories. At Obelix's insistence, they always look for two enemies, one small and one... medium-sized. Note that Obelix is a big man by any standard

imaginable, in case you didn't know.
* Asterix stories, often admitting his defeat and acknowledging the Gauls' worth. In "Asterix the Gladiator", and "Asterix the Legionary" he provides Asterix and his friends passage back to Gaul and in "Asterix and Son" he even rebuilds the burned down Gaulish village as thanks for the Gauls rescuing Caesar's son.
* Asterix stories, where Chief Vitalstatistix angrily yells, "This is the end! Anyone not happy with my position [as leader] can push off!" Immediately, one of the men holding up the shield on which Vitalstatistix stands walks away, dumping the chief in the dust.
* Asterix story The Great Divide, the two chieftains are finally convinced to fight each other for who gets to lead the village, instead of having their villagers do it. Their fight starts with the entire village watching and taking bets, but as it consists of nothing but the two punching each other, they get bored and leave, and even Asterix falls asleep while refereeing as they keep punching each other. When he wakes up, he finds they've both fallen asleep leaning onto each other, so he calls it a tie.
* Asterix takes it even further when the dustcloud becomes mushroom-shaped after Obelix jumps in.
* Asterix than real druids, way too cozy with the Roman invaders, just not trustworthy enough to be given a secret as precious as the Magic Potion, or seemingly more interested into circus tricks than real druidism.
* Asterix that he wouldn't have said it. As the question of whether he's really a soothsayer becomes more and more complicated (because the centurion wants to believe the predictions about himself becoming Emperor, while insisting to his optio (adjunct) that it's okay to work with him because he's a fake), increasingly convoluted versions of this logic are applied to every prediction he makes, whether it's accurate or not. (At one point, the optio tries the dice test again, and he gets it wrong, prompting the centurion to tell Prolix not to get too clever, or even the optio might suspect something.)
* Asterix that the Roman spies use to communicate, making the "crash lands" sort of deliberate.
* Asterix, the ancient world considered red capes as indicators of office...Vitalstatistix, Getafix, Caesar, and Cacofonix (plus any visiting druid or chieftain) were hardly seen without such.
* Asterix. The bank's owner, Zurix, has the Gauls moved to someone else's safe. That someone else turns out to be the Roman centurion who comes searching for the Gauls, finds the broken safe and questions the bank's security (while sheepishly justifying why he has such an account to his men).
* Asterix!"). The Camulodenum player later takes magic potion and exacts his revenge, by this point the chaos on pitch renders the druid umpire ineffective.
* Asterix: the cauldron had landed on his head and he refused to leave it and be sent back on patrol. His squadmates start a fire and put him over it, and he leaves once things get too hot for him.
* Asterix the entire village tends to get into food fight... involving mainly fish.
* Asterix: The Gauls who remain undefeated against the entire Roman Empire. Asterix, in particular, is also an example of a very small man defeating opponents who are taller than he is.
* Asterix the Gaul. This trope is also a running joke in several other albums. Basically, no Roman legionary ever becomes a volunteer by his own choice.
* Asterix the Gladiator, Cacofonix is captured by a Roman prefect to give to Caesar as a gift. The suffering of the kidnappers only increases on their journey as they spend more and more time with Cacofonix's singing which however ends up giving them a much more effective threat that the whip for the galley slaves who promise to do their best if this inhuman torture stops, which it does in the old-fashioned way. And as for Caesar, he doesn't deserve pity either, as he is not the one guarding Cacophonix's cell but rather some poor soul of a legionary.
* Asterix the Gladiator, when being transported to Rome as a prisoner of Odius Asparagus on board the latter's galley, Cacofonix offers to lift the galley slaves' spirits with a song. The slaves consider his singing to be even worse than getting

whipped, and promise to put extra effort into the rowing if Cacofonix shuts up.
* Asterix, the heroes get imprisoned and break out of their cell during the night to search the palace above, only to return once they don't find what they're looking for.
* Asterix. Their lawyer isn't evil but doesn't care about getting them off and is taking the case for publicity. He gets into an argument with the Prosecutor when they start their speech with "Delenda Carthago Est" like he planned to. Then again, Asterix doesn't care either and actively torpedoes his own case and Obelix doesn't really grasp the situation.
* Asterix the Legionary). Cassivelaunos's troops lost to Caesar and Britain was occupied (in reality, his troops won twice, with Caesar's successor Emperor Claudius instead finally conquering Britain). The Colosseum appears and/or gets mentioned numerous times; it was commissioned by Emperor Vespasian more than a century after Caesar's death. Cleopatra and Caesar are husband and wife (Caesar had a different wife and Rome did not recognise marriages between Romans and non-Romans, although the upshot of this was that Cleo and Caesar's relationship was not considered adulterous)...
* "Asterix the Legionary" has a character whose catchphrase is "Old hairy [body part that rhymes with what someone else said]".
* Asterix the Legionary section below). The voyage ends up quite pleasant, driving the captain nuts by countering his orders (heading straight for the pirate ship, for instance). He also tells the drummer to beat faster... only to be told the little Gaul has already requested it.
* Asterix the man into submission... or, rather, distract him with talk and an interest in the man's fighting style that gets the poor German to give Asterix instructions and allow himself to be used as a training dummy, realising he's helped Asterix subdue him only after having his arms and legs tied into knots.
* Asterix then do likewise, leaving a bewildered Ceramix facing Vitalstatistix again.
* Asterix. Then it rains and the paint peels off, revealing it's a beaten down pale horse, shortly before the carriage's wheel falls off.
* Asterix. The only way to take them out is to do so one at a time with stealth.
* Asterix, the pirates are getting set to take a vessel—uh-oh, guess who are on board!
* Asterix. The pirates frequently run into the Gauls on their brand-new ships which they just paid for or had to leave some of their crew as hostages/sell into slavery for.
* Asterix", the plot is kicked off when the heroes find a pict named Macaroon frozen in a block of ice. Other than a temporal loss of his voice, he suffered no ill effects.
* Asterix). The proof is that they all have blue tongues because of the blue coloring Getafix added to the potion.
* Asterix, the protagonists try to get their stolen barrel of magic potion back from a cart thief. Not only does said thief reside in a street with exactly identical houses, his address being number LVII, but Asterix, Obelix and Teefax accidentally break into number LVIII where the last I has fallen off at some point in the past.
* Asterix: There are many gags about the Roman Empire. One, for instance, is Brutus claiming: "I would never betray Caesar!"
* Asterix: the renowned Secret Potion that turns the Gauls into unstoppable fighters. Plus other druidic beverages.
* Asterix, there's a clifftop shot of the Indian medicine man, who tried to extort the Magic Potion recipe from Getafix earlier, collecting herbs with his spear. When he sees the Gauls leaving, he shakes his spear at them.
* Asterix, the Romans use tightly packed, highly disciplined formations — initially. Unfortunately for them, the magic potion gives the Gauls enough power to smash through the formations and then crush the legions in the chaotic melee that follows.
* Asterix, the seasons Winter and Spring are personified as tiny, humanoid

creatures.
* Asterix: the secret parchment bursts into flames when spy Doubleosix is done reading it.
* Asterix, the sign pointing the direction to Parma turns out to be reversed, resulting in Asterix and Obelix + several other racers ending up in Venice. At least Asterix and Obelix realize the mistake in time to turn around.
* Asterix the village is going to be thrashed... Immediately followed by the Romans themselves-hence why they usually do it only when they believe the Gauls are without their magic potion that makes them invincible, with the one exception being Brutus' men who didn't know what would happen.
* Asterix, the villagers begin suspecting Asterix of being a friend of the Romans. Eventually, a fight breaks out over it, but everyone tries to "act natural" when Asterix starts approaching. The villagers stop fighting, but stay in the same big pile, which confuses Asterix further, because the villagers are more likely to be seen fighting than they are relaxing.
* Asterix, the villain schemes to outwit the other dumber vikings. He's clearly more civilized and competent than his intended victims, who, true to viking tradition, attack a town in the opening scene and keep the skulls of their victims all over the place. His plan however requires at least one murder.
* Asterix. They do seem to have a problem understanding the words "order" and "discipline."
* Asterix, they stop by a Roman legionary camp and ask for directions. A drunk legionary, upon seeing the group on their flying carpet, promptly has his head soaked and swears off wine.
* Asterix, this is a talent shared by every Corsican male, and they're not shy about using it on pesky foreigners.
* Asterix this portrayal and the few Goths appearing later in the series are not putting on the Reich at all.
* Asterix to change the military meal to fit their tastes, and generally overriding their commanding officer's orders. By the time the group leave Rome, everyone have gotten used to following the Gauls' pace (while blatantly ignoring their superiors' authority), and they pretty much do what they want.
* Asterix uses a burning torch or an oil lamp, since the series plays nearly two thousand years before the invention of the light bulb.
* Asterix uses his ordinary lyre as a blunt instrument whenever he fights, be it in a village brawl or combat with the Romans.
* Asterix was Jewish and survived World War Two- he knows firsthand what it feels like to be persecuted.
* Asterix, when Asterix and Obelix join the army, they are served soup, which everyone hates except for the British conscript (who, in one of Goscinny and Uderzo's many pokes at British cooking and the people who make and eat it, says it's just like the food back home).
* Asterix: Whenever the Gauls meets people from other countries they are bound to be portrayed in a stereotypical way, but always in a respectful manner.
* Asterix, when the workers are on lunch break, Artifis addresses them. One turns his head towards him but keeps moving his spoon, sending food into his ear until it comes through.
* Asterix. When wearing the same clothes as Panacea and, most important, a blonde wig, the Roman actress Latraviata looks exactly like the real Panacea. Without the wig however, not so much.
* Asterix, where he's working for a wrestling promoter who actually describes him in his 'roll-up' pitch as being 'of indeterminate age'. (One short story strip of dubious canoninity - due to being outside of an official volume and containing some inconsistencies with other stories – states Asterix and Obelix are 35 "when their adventures begin".) Many other characters have ambiguous ages too.
* Asterix, where the battle lines are literally a trench cut through the town.
* Asterix (which conveniently allows the pirates to survive in their rowboat since they didn't see anyone).
* Asterix, which was left until near the end because it was felt many of the jokes

about French provinces would be lost on their readers).
* Asterix, while covered entirely in gray dust. It is surprisingly effective.
* Asterix), whips around and punches innocent bystander Cacophonix in the face.
* Asterix, whose entire personality is pretty much 'I love poetry, I love Lovesix, I don't want to marry Brutus'. The person chasing after her, Lovesix, is pretty static as well.
* Asterix, who were inclined to play the trope straight. Asterix and Obelix manage to break them by taking them literally, and by using their magic strength. In the end, the two centurions actually soften up and gave in.
* Asterix with every other character who witnesses his freak-outs assuming the same thing.
* Asterix with the album "Obelix and Company" in which only Obelix' birthday is celebrated.
* Asteroid 16 Psyche is believed to be laden with quite a significant amount of gold, silver and other valuable metals.
* Asteroid Annie and the Aliens, as the only hands the player can assemble are Royal Flushes.
* Asteroid Annie and the Aliens has green hair for some unspecified reason.
* Asteroid Annie and the Aliens: Many of the aliens have insectile exoskeletons and carapaces.
* Asteroid Annie and the Aliens was made in order to use up some outdated leftover components.
* Asteroid in Love, adapted as part of the first episode, Moe encourages Mira to speak to Ao and says "You know, what I always consider to be your best quality? You take action without over-thinking." But when Mira immediately runs to Ao's classroom and shouts into that class to invite Ao to have lunch with them, Moe has to correct herself:
* Asteroid in Love, "armed with a specific solution about how you want to live your life".
* Asteroid in Love. As a results, she insists her schoolmates call her "Suzu".
* Asteroid in Love aside, her idea of a maid cafe embarrasses most other club members during Mira's first year at Hoshizaki.
* Asteroid in Love, as well as being curious how they act in different situations (especially Mira and Ao).
* Asteroid in Love. At home, she drinks coffee with five sugars. Away, she drinks a canned coffee that has as much sugar — by volume — as Coca-Cola.
* Asteroid in Love, but there are four episodes to go in the anime. Mira and Ao manage to get Ao to stay with Mira's family near the start of the next episode.
* Asteroid in Love, but they share one thing in common: their insistence on self-reliance.
* Asteroid in Love enjoys a hot pot and stargazes. The girls of the Newspaper club get in on this, too, dressing up in seasonal costumes.
* Asteroid in Love) for astronomy, the Geological Survey of Japan for geology, and the Geospatial Information Authority of Japan for cartography.
* Asteroid in Love, gives to Mira's incoming first-year class at their high school.
* Asteroid in Love has endless enthusiasm for just about everything. Despite initially joining the Earth Sciences Club (formed from the merger of Astronomy and Geology clubs) as an astronomy enthusiast, she becomes just as excited as Mikage about rocks and fossils, too.
* Asteroid in Love have one of these, to the point the characters that don't start to find it distressing.
* Asteroid in Love in Chapter 23, but waited until Chapter 27 to tell Mira.
* Asteroid in Love. Ino acts as a mediator between Mikage (of the former Geology Club) and Mari (of the former Astrology Club) to make sure the astronomers and geologists in the club can work together.
* Asteroid in Love instead of school-issue blue-grey totes, while Mai always put on a pink sweater over her uniform.
* Asteroid in Love in the Shiny Star Challenge arc; she doesn't get into the eponymous science summer camp because she wrote the entrance essay that

way—she wrote dozens of pages, and cut it down to two.
* Asteroid in Love is initially shocked to learn that the "boy" she'd been daydreaming about for years is actually the girl sitting next to her in the club she just joined.
* Asteroid in Love is more mellow and soft-spoken. Also, while Mikage is firmly focused on the study of geology as it pertains to real life, Chikage is more interested in the fantastical elements associated with geology, particularly fortune telling.
* Asteroid in Love is not only serious compared to the other members, but she got into meteorology out of a sense of duty toward others, rather than genuine enjoyment of the subject. Despite that, when she sees a rainbow, she enthusiastically shares what she knows about it, indicating she may have genuine enthauiasm in the field.
* Asteroid in Love. Mature, composed and easygoing, she does her best to look after Mira. Moe immediately takes a liking to her when they meet. In addition, she eagerly helps out with promoting the Earth Science Club's newsletter, albeit embarrassing Mira in the process.
* Asteroid in Love, Mira and Ao had a chance meeting when they were kids, which had a lasting impression to both, to the point that Mira developed a long-standing crush on Ao... before knowing Ao is actually a girl when they reunited many years later.
* Asteroid in Love, Mira makes one to the reader as she starts to doubt whether Mai and Sayuri really get along as Mai said.
* Asteroid in Love, Moe deliberately gives Mira a list of pick-up lines for girls, and tricks Mira into saying it to Ao. Mira's clumsy delivery, however, neutralizes any potential effects of those lines to Ao...
* Asteroid in Love, Moe "Suzu" Suzuya mentions Mira's tendency to give others nicknames, including her own. Mira proceeds to give nicknames to everyone except Ao, which are used throughout the series.
* Asteroid in Love, Monroe attempts to invoke this by asking Mira if she could lobby for more funding for their club. This is never followed through, so it's assumed to be averted.
* Asteroid in Love), Nana is interested in meteorology and bluntly says that she thinks it's more useful than the other two fields of earth science.
* Asteroid in Love nature of this is not forgotten; Misa just calls this arrangement cohabitation.
* Asteroid in Love needed to take make-up exams in her first trimester of high school. She is especially poor when it comes to anything mathematics-related, and she also needed to take make-up exams on English. Despite this, she's quite knowledgable when it comes to astronomy.
* Asteroid in Love of the Ishigaki arc that are anime original. For example, the debriefing session at the end of Episode 12 is never in the manga, although it is implied Sayuri does interview Mira and co. regarding the Shining Star Challenge. On the major storyline, though, the adaptation covers the events properly, albeit in a more sentimental tone.
* Asteroid in Love. She comes off as overly serious and even cold, but she gradually becomes closer with her fellow club members.
* Asteroid in Love, she tends to avoid speaking as much as possible, and would use nonverbal communication when practical.
* Asteroid in Love, since Moe and Mai are checking out an enclave of a neighbouring city on their own.
* Asteroid in Love, since she's confessing to another girl) is considered more important of the chapter.
* Asteroid in Love, so members often have to pay out of their pockets.
* Asteroid in Love, something Mira didn't know about, she cheers up for a moment.
* Asteroid in Love soon, which is one of the most serious scenes of the series. Yet, in 5 pages of manga, the author is able to put in 3 gags.
* Asteroid in Love Space Center in Tsukuba, Mikage asks the staff about the requirements for an astronaut for Mari, and Mari thanked with a "Thank you very

much" in heavily accented English. Since one of the requirements mentioned by the staff is being good in English...
* Asteroid in Love," states she's totally okay with Mira entering into a relationship with another girl, and without her intervention the main duo may become more awkward.
* Asteroid in Love. That said, the cast treats her as a great friend and have tolerated all these.
* Asteroid in Love. The fact that Mira mistook Ao for a boy for years and had a crush on "him", and the tendency for her to call joint outings "dates" make the romantic nature of their friendship more obvious.
* Asteroid in Love, the Newspaper Club interviews the geology team's attempt to perform boring (as in drilling) at the school playground using a makeshift bore.
* Asteroid in Love, the plot in the seventh episode about Mai's problem in taking pictures boils down to this. She is familar in taking pictures with a smartphone. When she needs to use a camera to take pictures for the club, though, she hold it in such a way it always shakes when she presses the shutter, causing a persistant shakey cam problem.
* Asteroid in Love, there is a certainly level of glee in her face, and she immediately whips out a costume catalog and give out recommendations as if she's more interested in that than the club members.
* Asteroid in Love), this is why Mira mistook Ao as a boy for years after seeing her once as children. "Ao" is an unisex name, but more likely used by males.
* Asteroid in Love). While Berry did play Ao in a softer tone, it is still much deeper than the original.
* Asteroid in Love, who is otherwise relatively static, also sees improvement in her intellitual side.
* Asteroid mining in the Empire and other core worlds has made gold worth about as much as iron is in the present day, while most mining corporations will give you iron for the cost of transporting it. Though on some undeveloped border worlds and recently contacted planets gold and platinum are still used as currency.
* Asteroid mining on asteroids big enough to support habitats are a common part of the Imperium. Unfortunately, their isolation makes them perfect locations for genestealers to infest.
* Asteroid Monitors are giant hollowed-out rocks with huge numbers of gun turrets on them that have been left in orbit for hundreds (or thousands) of years. And they're still running on full automatic. You can hack unowned Monitors to gain control of their weapons platforms,
* "Asteroid Named Rest Stop", a song by Julia Ecklar and Leslie Fish. The lyrics can be found
* AsteroidQuest (accompanied with a noticeable shift in narration style), then we see her through the eyes of everyone else, discovering the database's title for her: "biological reincarnation of the Sapphire Emperor".
* AsteroidQuest, but competent leaders save it for truly colossal, faction-endangering fuckups:
* AsteroidQuest, currently looking for an important witness in a mall. When he's spotted in Santa's chair, Polo is extremely displeased, because it means that the only way she can talk to the witness without attracting suspicion from nearby crooks will be through making use of her diminutive stature to approach him a a kid.
* AsteroidQuest: Hok adds a resting "mildly annoyed" half-lid to his Pip persona, to set if further apart from his real self's perpetually cheerful expression.
* AsteroidQuest, when protagonist Itcher's latest fling turns out to be a plant as he suspected, he asks her "how much of it was a lie?" Her answer is a cheerful "Surprisingly little!"
* Asteroids (and all the clones and remakes of it) you can teleport to a random place on the screen. This might take you from the path of a rock to safety…or simply into another rock.
* Asteroids are too small to be pulled into spheres by their own gravity, often taking lumpy, irregular sales instead, and double as

* asteroids at planets. Two or three is usually enough to depopulate a world, although environmental damage will be extensive. In most cases, the planet will be rendered uninhabitable by such bombardment.
* Asteroids involves shooting asteroids into tinier and tinier chunks. The game doesn’t quite state openly this is for mining, however.
* Asteroids Monster: A creature that divides into smaller versions of itself when defeated.
* Asteroids) mostly abandoned this trope in favor of "shield" buttons.
* Asteroids: What spaceship pilot in their right mind thinks parking their ship in the middle of an asteroid field is a good idea? Well, when your ship is armed with shots that can blast those asteroids into the next millennium, who cares? Have fun!
* Asteroids, you can drift for about 2-3 screen's worth before coming to a stop, depending what speed you're going. The arrow buttons work like thrusters, requiring reverse thrust to slow down.
* Asteroid Thicket: An area in space with a lot of dangerous asteroids.
* Asteroid Thicket from a tactical nuke while outracing the blast radius.
* as thanks for helping her deal with her mother's death. She also shares her homemade sweets with Kaze and he notes how good of a cook she is.
* A's that she's planning on taking Chrono and Fate to visit her husband's grave (something which is actually shown in the epilogue of the movie adaptation, with Amy and Arf also in attendence).
* As the 1955 Doc looks at Marty's camcorder, he says "Now this is truly amazing: a portable television studio. No wonder
* As the '70s progressed, 10cc became increasingly disillusioned with everything about international touring. The 1978 album
* As the above examples illustrate, "going berserk" is a rare but well established phenomenon that manifests as one of several responses to a person being pushed to their psychological limit. Instances have been recorded throughout history across many armies and battles.
* As the additional pages of the final chapter showed, after the Outside World recovered from Eren's rampage roughly 100 years later, Paradis Island was bombed into oblivion, rendering Eren's plan completely ludicrous in context.
* As the Alicorn god of Psionics, Prince Healing Song has great psychic powers like
* As the Amazons have a strict no-killing rule they have to use their fleet of spacecraft to get close enough to board the ships of Uvo's fleet and take those on board hostage in order to defeat them.
* As the Ancient Romans conquered areas, they would incorporate the local mythology into their own, leading to a state religion in which nearly every god and creature from Britain to India coexisted, and one was free to worship whatever they wanted so long as they worshiped the Emperor and they weren't planning on rebelling against the authorities as well.
* As the article points out, it became Zeerust very quickly as the economy of the Soviet Union took a dive it would never recover from after 1964. The idea of the last imperialists being confined to a remote island in the pacific by 2017 would become antiquated with the Cuban Missile Crisis and, to a greater extent, the Kennedy assassination. After these events it was clear that trying to incite a communist revolution directly in the United States, even by accident, would most likely result in the destruction of the Soviet Union.
* As the author is a big fan of Spider-Man, readers were wondering when Peter Parker would get bitten, gain his powers, and join the story. In Chapter 29 of the sequel,
* As the author Scott Adams noted in one of his annotated Dilbert compilations, he's glad women don't know what men are really thinking.
* As the Avatar of Wrath, Jeri makes Rika look like a pacifist in comparison.
* As the band's elaborate stage set collapses around them, an electrical failure sets a stagehand on fire. He runs flaming across the stage until some technicians put him out with fire extinguishers. James Hetfield calls a halt to the show while EMTs tend to him and someone else who was injured.

* as the basis for a sitcom character - "Everyone loves a pretend jerk who's not being mean to them."
* as the blueprinted robots have different body proportions compared to a humanoid, less mass in the upper body.
* As the children of the Shepherds, all of the second generation units were raised together and thus are generally close, though not everyone shares the same level of affinity for another and some pairs are unable to interact outside of the Harvest and Hot-Spring Scrambles. However, a handful of the children (namely Kjelle, Severa, and Gerome) became increasingly more aloof as they aged, not helped by
* As the Crawfords travel down the draining Lake Powell, they encounter a capsized boat with an empty life jacket. There is nobody to be seen and Julie is sure the boat's passengers are dead.
* As the crew sails away from Little Garden, with Eternal Pose that will show them the way to Alabasta, Nami falls ill with a life-threatening illness. Vivi is faced with a
* As the Crow Flies Charlie Trumper starts making higher bids on the auctioneer property to force Mrs. Trentham to bid up to her total cash reserves. Once that happens, his wife Rebecca accidentally bids again. It works out as Mrs. Trentham also bids again and is eventually forced to sacrifice her bid deposit as she can't honor the hammer price. Charlie is able to buy the shop at a much cheaper price afterwards.
* as the Cube transforms into some kind of creature and starts digesting them
* , as the development of the Sea Harrier gave the ships fixed-wing capability, and the Sea Dart system was eventually removed in favor of a CIWS gun.
* As the devs frequently give out thousands of Platinum per week (at least two of these prizes plus a single Prime Access, which also comes with Platinum, during weekly Prime Time) and Platinum can be traded, it's entirely possible to obtain everything in the game with some savvy trading and persistence. However, due to the way Steam Workshop works, Tennogen cosmetics can only be obtained via cash purchases with steam wallet credits (which does not exist in the console versions). Some have joked that due to "Fashion Frame being the endgame", this is the true "pay to win".
* As the Doctor faces long-term consequences of huge decisions — such as turning a Viking girl Ashildr into a virtual immortal — Clara becomes his distaff counterpart and he's determined to never.
* As The Eldar fell deeper into depraved hedonism, the sane ones warned them that a new entity is forming in the warp, quite possibly a god. The hedonistic Eldars increased their efforts, because a god of hedonism is what they want now. They got it alright, and found out that eternal hedonism
* As The Eliminators were walking to the ring for the opening match, against
* As the English-backed slave revolt in Cuba overruns Havana, the Spanish governor leaps from his mansion into the sea, taking his chances with swimming to safety over being captured.
* As the evacuation proceeded, it came under heavy fire. A Coast Guardsman,
* As the examples above and many below can showcase, it probably would be easier to count the times when this Trope

* As the fifth book shows, the Ministry of Magic isn't afraid of squashing the
* As the film begins, the titular white cell has been assigned to patrol Frank's mouth after a bad incident. ("I should be out in the veins fighting disease, not up in the mouth on tartar control!") Later, the mayor threatens to demote him further by sending him to the next nosebleed.
* As the final indignity, Andy (who's just learned that the officer was questioning him "because he was making some of the mums nervous") asks Becky if he looks like a pedophile. After mulling it over, she decides he does have "a bit of a look about him", but concludes he looks more like a drug dealer.
* as the first to find out that Yoshikage Kira killed and stole the identity of his father, Kosaku Kawajiri.

* As the flashback sequence in throughout the movie keeps extending, showing us more and more of what happened on that rainy night, you realize just how creepy this is, since El Indio got it from a woman whose husband he killed and whom he then raped,
* A's). The Forwards' transformation sequences were used twice, but the second time was shortend.
* As the franchise has developed significantly in terms of its themes and complexity over the years, the games often play with
* As the Galaxy Network crew is reviewing tapes of the battle between Superman and Faora, Steve Lombard expresses disbelief at Superman being defeated by a woman. Lois Lane -who is a Klurkor practitioner- guesses Faora knows some type of martial art that uses pressure points to disable and hurt her adversary. Then she demonstrates it on Lombard.
* As the game goes on, it becomes more and more apparent that something happened that messed with Mae's mental state. Bea suggests that she might have depression or anxiety after a traumatic event in her childhood; said event matches up with a textbook description of dissociation. The near-end of the game seems to imply that Mae has psychosis.
* As the game is based on D&D 1st edition, the weapon is fairly underpowered.
* As the game's lifespan was nearing its end and the popularity was nearly milked dry, one final re-release was
* As the gods descend into the realm of the nibelung dwarves in the first opera, we hear a percussion extravaganza of
* As the Gods Will is revealed to be a boy when Akashi solves a puzzle by finding a mannequin that most closely resembles Tenma; all the other mannequins were women, while the solution was the male mannequin.
* As the Good Book Says...: Appeal to religion. Make up interpretations or embrace an obscure fringe group if you have to.
* As the Good Book Says...: Religions also suffer from this. Various people who claim to be religious authorities will base their opinions and viewpoints on certain quotes from their religious manuscripts that are usually 1) too literal interpretations 2) taken out of context 3) not in the holy manuscript in the first place.
* As the Great Cable TV/Internet/Voice wars began ramping up, they tended to fish from similarly

* As the leader of SEES, Mitsuru Kirijo holds herself responsible for the well-being of the rest of the team — reinforced by her persona being of the Empress Arcana, which represents motherly qualities. She actually
* As the leading lady Chun-Li has been held in the arms of male characters in this way a good amount of times.
* As the legal system has turned into a for-profit business, prisons aren't around anymore due to the expenses involved, and convicts instead get a shot that removes a certain number of years from their life; this means the Punisher's private prison is also the only one in town. New arrivals have rarely even heard of locking criminals up before.
* As the liaison between his fellow Lanterns and their higher-ups, the Guardians of the Universe, the four-armed bug-headed alien Salaak fills this role for the
* As the Literature section mentioned, this trope pops up occasionally in the background material for
* As the Llama goddess of Enlightenment, Satori possesses extrasensory perception,
* as the main backdrop, an owl mascot, two bad guys who don't look like wizards, plus the protagonists' problem of being in the nude if they don't transform together. Despite being lumped in the "parody" section, it's probably the straightest take on a Magical Boy series there is.
* As the main character points out, these types of operations run on this type of trope. Getting people out of countries is not something to ever be taken lightly as the stakes are so high that you have to be above reproach in your operation. The fact that he tore apart the problem with the initial plan (biking through a very mountainous country during winter for 300 miles) results in the following conversation:
* As the main character, Taylor Hebert progresses through the story, she gets more and more creative with her powers, ranging from being able to create her own clothes to
* As the main plot, Asagami Fujino takes violent revenge on the gang of hoodlums who've repeatedly raped her in the third movie of
* As the male/female population slowly goes back to normal in the wake of an effective Redface Pox vaccine, the Yoshiwara district starts to become more female, however, there is still a demand for male prostitutes. It's how Masahiro Abe meets Takiyama: he was working as a kagema.
* As the McAllister family wonder about Kevin from Paris, Megan asks Buzz if he's not the least bit concerned about his well being, or something bad happening to him.
* As the military arm of the Ecclesiarchy (the Imperial state church), the
* As the Mole Clan attacks the heroes while mounted on bats, a banjo version of "
* As Themselves there is good enough to be raptured. The implication is dampened somewhat as the film goes on, however, since it's gradually revealed that this version of Heaven forgives people's sins pretty easily, and the conditions for being allowed into Heaven are unusually specific.
* As the music itself, drums of war are presented in "Swedish Pagans" during the chanting parts.
* As the mysterious World's Heart pierces the planet like a rod, two entities inhabit the ends - the Spirit of Kholomi in Echo and an unnamed entity on the opposite end. Both are probably immortal unless the world is destroyed.
* as the name implies) contain a portal that teleports you to a hand-crafted location. In these areas, you have a limited selection of blocks you can break, and

you'll have to rely on other skills to get through. You'll need to meet certain requirements to enter Portal Dungeons, though.
* As the name implies individual units, superheavy tanks roam freely, oh and this is the scale where Titans (the largest of which stand 130-170 scale feet tall) start stomping their enemies. Literally.
* As the name implies, the Colt M1911 was introduced in 1911. While it's been phased out as the US Military's standard issue pistol, it's still in use with the FBI, the US Marine Corps, and about two dozen other militaries.
* As the name of the trope suggests, any team of outlaws in any retelling of
* as the name suggests, a form of violent insanity brought about by excessive or defective cybernetics. However, in practice the media and the general public tend to attach the term to any violent assailant with cybernetics.
* As the name suggests, brought in by the FBI to investigate this sort of crime.
* As the name suggests, the graduate moves on to more permanent, heterosexual relationships afterwards. The reaction to LUGs in the "real" lesbian community varies; some see the phenomenon as stated and treat it with anything from amused tolerance to outright hostility, while others view it as being a natural expression of bi- or other fluid sexualites. There have also been instances of males doing the same thing. So the whole "GUG" Gay (male) Until Graduation is a thing that has happened as well, that also causes hostility in the the gay community among gay males of course.
* As the new series is being produced by BBC Wales, Cardiff has California doubled for London several times. Cardiff quayside is nearly always the setting for any urban filming.
* As the No Man's Land arc finishes Bruce Wayne ends up becoming more important than Batman as it's only his downright massive spending on rebuilding Gotham that keeps Luthor from taking control of it like Metropolis. Well, that and the recovery of records that prove land ownership that prevented Luthor from taking land for himself.
* As the now first chronological story gives a source for the "destiny".
* As the numerous modern examples make clear, the Musketeer has largely vanished from the battlefield in favor of the pure rifleman. It seems plausible that the trope is now more relevant to the civilian world, where carrying a firearm at the ready is considered unacceptable and any attacks will probably come by surprise. This is becoming more commonly stressed by trainers, who are finally branching out from the old pigeonholes of "shooting", "martial arts", etc, and addressing the need for a more well-rounded skillset. This is not uniform, of course, and there are abundant martial arts schools and firearm training ranges that work exclusively with one form of defense or another.
* As the old adage goes, the most dangerous opponent is a complete newbie because you don't know what he's going to do.
* As the Oseans invade and occupy the Yuktobonian mainland, the Scinfaxi’s sister ship, the Hrimfaxi, is deployed to sufficiently damage the Osean occupation forces.
* As the others on the crew escorting Padme from Naboo to Coruscant get roped into a card game, Obi-Wan initially disapproves before admitting he's rather fond of the particular game.
* as The Other technology sidestepping the whole loyalty thing. Anyone she has indoctrinated will follow her orders to the letter, something she abuses. At one point she ordered a servant to die, and the servant choked on her own tongue.
* As the other Wiki discusses,). Ancestral Africans also have admixture, although the species involved are basically unknown, due to the rapidity of human evolution there during the period.
* As the other wiki notes to writers who forget. However, in Europe, "stetson" is still used instead of "cowboy hat", regardless of the actual brand.

* As the saying goes in the U.S. Army: "You can shoot down all the MiG's you want, but if the enemy tank commander has a beer in your officers' club, then you lost the war."
* As the saying goes, WGG—Firebase White, Geth opponents, on Gold difficulty. The old version of the map had a fantastic place for camping and geth opponents initially had no grenadiers (and thus no good way to flush players out of cover), making it about the easiest way to get through a Gold-level match there was. Updates to the map and new enemy types have made the Firebase White camping strategy more difficult, but it remains a popular tactic.
* As the scene of Shirley and Victor's piano duel fades out, the orchestral scene change music that follows (and repeats in the entr'acte) is based on snippets of Victor's fugue and Shirley's novelty piece.
* As the Schoolbus Turns, one girl is talking about her problems with her best friend. She keeps whispering embarrassing things to her friend, who then repeats them, making everybody on the bus turn and laugh. The third time, she covers her friend's mouth before she can repeat. The other kids turn in anticipation but don't laugh.
* As these comics are all newspaper-style, it could be argued that the art, at least, is less time-consuming than it might otherwise be; each strip consists of a few panels, often using talking heads, simple/reused poses, and other shortcuts,

and someone else does the coloring. On the other hand, a comic must be written before it can be drawn, and the time involved in conceiving, writing, and polishing the scripts for so many comics per week is considerable; Holbrook estimates that the writing accounts for three-quarters of his workload.
* As the series began production right when the severity and long-term effects of bullying were becoming a hot-button issue, characters who tend to act cruelly to others tend to be painted less sympathetically compared to more "fantastic" villains like Nightmare Moon and Discord. This is perhaps best exemplified in "Flight to the Finish", in which Diamond Tiara and Silver Spoon mock Scootaloo for her inability to fly; this, along with her subsequent downward spiral, is presented as being akin to someone being bullied for being disabled. As a result, Diamond Tiara's
* As the series continues, it becomes more and more obvious that Light versus Dark isn't good versus evil so much as Utopia for everyone versus Utopia for few, among other things,
* As the series goes on, a few other characters do the same: when minor character Ai Sapphire decides to follow Kekko Kamen's example she makes her own costume consisting of boots, gloves, Venetian-style mask, musketeer hat, and a ribbon to cover her crotch because she's too embarrassed to go out completely naked (and finds out too late that the ribbon ruins the combat value of going around naked); after suffering a
* As the series goes on and as Bolan is eventually recruited by the U.S. government, the villains become more diversified, bringing in everything from Soviets to international and domestic terrorists to Third World dictators, as well as different organized crime syndicates. The most notable of the new recurring villains is MERGE, an international crime syndicate formed by elements of
* As the series goes on and the characters get older this becomes more apparent in
* As the series goes on, Gordon becomes more manic and unhinged thanks to being attacked by numerous horrific monsters and being stuck with the Science Team, a bunch of deranged weirdos who harass him constantly and murder anyone they come into contact with except him.
* As the series goes on, it's more likely for clues to be found by other people (such as CPD, who gradually become more adept at dealing with the supernatural) — but those people don't know what the physical evidence
* As the series goes on, more and more Jaffa are fighting alongside the Tau'ri rather than against them, and the ones that aren't are following the orders of the Go'a'uld, who with a few exceptions are
* As the series goes on, Rachel (no longer split) gets more and more worried about her emerging
* As the series has progressed, more and more authors have focused on the mental illness aspect of Riddler's clue-leaving, giving him a severe case of OCD (which explains his compulsion to give puzzles) and narcissistic personality disorder (he has to prove that he's smarter than Batman no matter what). In one story, he tries to subvert the problem by leaving simple messages rather than riddles...but Batman discovers that Nygma
* As the series progressed, it became profoundly clear that this trope more or less forms the
* As the series progresses, a balancing act is formed as Merlin is able to bring more local Safeholdians into the knowledge he possesses. The Empire of Charis wages its open war with the technology and innovations Merlin's introduced, but the "Inner Circle" is given access to far higher technology such as near-omnipresent spying capabilities and long-distance communication among each other to better plan and strategize. This frequently imposes limits such as not being able to react to events they've seen happen until official word reaches them, or Merlin having to fake travel time when he could (and has) simply used his recon skimmer to get where he needs in hours. Also, despite his loyalty to Charis, his duty to his ultimate mission requires him to make sure the Church gets the chance to make those same innovations and level the playing field since that breaks the
* As the series progresses, the Attack Titan becomes an antagonistic force,

seemingly influencing Eren to turn on his friends and try to claim the other Titan powers for himself.
* As the series progresses, this becomes less and less prominent, with the main characters getting recognized for their work more consistently.
* As the series progresses, this is an increasingly common response by
* As the series took 25 years to finish, many fans dropped off after reading the most recent book and waiting years for the next to come out. Due to said
* As the series went along, things became more polarized overall on this subject. Season 4 has Quinn refer to his home Earth (the one the show started at,
* As the series went on, other Pokémon took the role of Team Pet from Pikachu, usually the weakest Pokémon of the female member of the party. Thus, Pikachu was succeeded by
* As the series went on, we learned how the Celestial prophets ensured the birth of Ben Sisko.
* As the setting is slightly more grounded than its Japanese basis, Mothra, who was previously always an unambiguously divine being with psychic powers, is instead only implied to have a telepathic connection to
* As the show got in to its final two or three seasons the writers took every opportunity to showcase Megan Mullally (As Karen)'s singing voice, towards the end of the show they stopped even trying to be subtle about it.
* As the show progresses, it becomes increasingly obvious that Shinji's estranged father, Gendo, is ultimately not that different from his son. He clearly dislikes having to deal directly with other people for prolonged periods of time and never says a single word more than what he feels he absolutely has to. It is also ultimately revealed to be his reason for abandoning his son: After his wife's death he didn't know how to take care of Shinji because he was afraid of Shinji. His self-hatred made him frightened of the idea that he could be loved by anyone, even his own son; so he foisted Shinji off on other people.
* As the show reaches its later seasons, this trope starts occurring almost
* As the Silver Age passed it became a retcon subversion. "Doom" would still die, but invariably when he returned the "death" had actually been a Doombot. At one point someone pointed out that there had been 41 Doombots who apparently thought they were Doom that had died.
* As the sole Ghost-type Mythical, Marshadow is somewhat more ghostly, as it is a timid warrior spirit who hides in shadows and studies the techniques of powerful martial artists.
* As the song goes on to make clear, "altered" includes being sliced up with knives and boiled.
* As the Soviet Union began to collapse, Mikhail Gorbachev tried to keep the country intact. In March 1991, a national referendum was held and the people overwhelmingly voted to keep the union together in a reformed state. The New Union Treaty would have turned the nation into the Union of Soviet Sovereign Republics, decentralizing the government, but maintaining a common president, foreign policy, and military. Unfortunately, the day before the treaty was to be signed, communist hardliners staged a coup. In its aftermath, Gorbachev's power disappeared and any hope of keeping the Soviet Union together evaporated.
* As the standard of living in the developed world has risen since the middle of the 20th century the cost of labor-intensive products have risen dramatically to support this standard, while technology improvement has made the cost of products that can be mass-produced fall dramatically. The result is that products once made by skilled craftsmen are now virtually unobtainable, while anything produced by machines are often so cheap to be completely disposable. One of the handful of exceptions to this is clothing. Cloth is an unpredictable material compared to metal and plastic, so sewing machines still require human operators. However, those operators don't have to be highly trained or educated to produce cheap, low-quality products quickly. This is why very little garment manufacture happens in the developed world.
* As the Starforce soldiers close in on them, Goose sprouts a bunch of giant tentacles from her mouth and grabs all the Kree. Cut to a shot from an adjacent

hallway, where the waving tentacles pull them out of sight, and screaming and slurping are heard as they get eaten.
* As the stories go on, it's shown from time to time that she does in fact have a human side as well. She's nonetheless quite possibly the most difficult actual member of the school staff to get along with, and there's not much love lost between her and Team Kimba in particular.
* As the story goes on, however, its perspective expands, and we are introduced to the world-scale
* As the Straw Hats approached the end of Paradise, Cross and his co-collaborators are unsure how to explain to Luffy that the crew needs to be temporarily disbanded so they can train for the two years needed to survive the New World. But thanks to
* As the Straw Hats are escaping from the Navy in Alabasta, Usopp's cannons hits a Navy ship, causing it to blow up, and then causing the ship
* As the students leave the room, they actually pass a sign that says "NOTICE: Blinker Fluid Does Not Exist". They come across an
* As the superfamily rushes to save Metroville from said rampaging robot, they do what
* As the tales where this trope does pop up can tell you, it's generally
* As the telegraph began to allow rapid communication across the globe, some newspaper editors complained that it was destroying the art of journalistic writing. Instead of spending days or weeks on a story, reporters had to write quickly while the news was still new.
* As the text of the article itself makes plain, science fiction was at that time still not universally known or accepted as a genre in the first place. Had Vonnegut been writing today then he no doubt would have found his doubts about the validity of the very idea of there being such a thing as sci-fi (which he thought was a stupid and generic term applied to anything that happens to "notice technology") too much of a minority or obsolete view to try to get any readers to take seriously. At that time, though, he was not the only person uncertain that the classification had any justification for existing in the first place. It was still a relatively young and less widespread label that was perhaps not yet fully defined.
* As The The Kitchen Sinks. This is balanced by a few like Mirage and Huffer who don't like Earth much at all.
* As the third page quote indicates, Stephen Lynch's "Best Friend's Song" subverts this. Mark Teich is fine with Lynch sleeping with his sister...he just has to pay first.
* As the Thousand Years Old Blood War advanced, Ichigo and Renji Abarai kinda fell into this trope. The biggest example is towards the end, when Renji explicitely promises to back Ichigo up as thanks for helping him rekindle his bond with Rukia, and immediately keeps his promise as they join a
* As the three fiends prepare to watch Vaarsuvius fight a dragon, one of them pops some corn.
* As the title suggests, this is the crux of "Accidentally in Matrimony," a
* As the Toa Metru journeyed through the Maze of Shadows, they were frequently attacked by Rahi running in their direction. After a few battles they realize these Rahi were fleeing
* As the top layers of skin heal faster than lower layers, a scar can hurt for a while even after it appears healed because the surface has closed but there is still an injury healing underneath.
* As the troops were planning to disembark for the Normandy landings in
* as the village thinks he's their baby. It only gets worse for her as his first word just so happens to be Mommy. Sadly the story hasn't been updated in four years so who knows how the plot was going to fold out.
* as the voice of the titular cat because he loved the film when someone showed him a rough cut.
* As the war progressed this trope became a win condition for the North instead once they started winning their strategic objectives, and the naval blockade of the South started straining their resources - while the Army of Northern Virginia had

repeatedly defeated the Union Army of the Potomac by inflicting greater losses and stalling their advances, once Grant took command he simply
* As the Well World's creators had the means to re-write the laws of physics as they saw fit, it was easy for them to invoke this trope on designated low-tech hexes, with tech-failure kicking in at whatever point seemed appropriate to the destination planet (Stone Age, Iron Age, Clockwork, etc).
* As the Western Allies invaded Germany in the closing months of the war, Berlin was left to the Soviets, who proceeded to take it in one last bloody battle. Quickly surrounding the city and brushing aside its 85,000 defenders were some 1.5
* As the Winter Knight, his broken back and other injuries return immediately since Mab's Mantle vanishes when he violates Winter Law.
* As the Witch points out, the Baker's father was stealing vegetables from her garden for his pregnant wife without even asking to buy them; she let him off "easy" by telling him she just wants the baby as payment but then his father stole magic beans which weren't supposed to be touched, which cursed her with old age and ugliness. The Baker really has no response to his father's misdeeds and agrees to the witch's bargain to get her four ingredients for a potion. Later, she tells off the whole cast for blaming each other as the Giantess is rampaging because they all had a part to play in her coming down from the land in the sky. Much later, she tries to break up her adopted daughter and the prince who's coming to visit her, telling Rapunzel that princes come and go, and the world is as dangerous as it is lovely. She's proven right when Rapunzel comes to her in Act Two, revealing that her prince is a philanderer and impregnated her with three twins; then the giantess crushes Rapunzel, with the Witch lamenting
* As the world becomes more global and mixed, knowing people who are "ambiguously brown" is only going to become more common. Anyone who is darker than olive tone is often assumed to be Mexican even though they can literally be from anywhere in Central and South America, Oceania, Asia, and the Middle East. People who are mixed race can live on any continent of course, and have a variety of looks.
* As the World Turns, a bunch of people came to his funeral just to be sure that his body was found and that he was really dead that time.
* As the World Turns as heretofore normal, decent people, usually women, go completely off the deep end in an effort to hang onto or seek revenge on former love interests.
* As the World Turns: Bonnie and Derek (the only two black characters) were paired up.
* As the World Turns, by the way), the FBI was called in to investigate.
* "As the World Turns" describes being an outsider in the spiritual sense:
* As the World Turns ends with the globe on Dr. Bob Hughes's desk spinning quietly in the dark of his office, alluding to the rotating Earth present in all of the soap's various opening sequences.
* As the World Turns has Colonel Mayer, who jumped into the ocean to avoid being captured by the police. He is presumed dead by the entire cast, but the viewers just KNOW he'll turn up again the second something is needed to drive (another) wedge between Luke and Noah.
* As the World Turns: Holden and Lily are one of the show's biggest supercouples. Lily is also the biological daughter of Holden's sister Iva. Who fortunately turned out to be adopted herself so it was not incest after all.
* As the World Turns, its signature supercouple, Holden and Lily, are actually uncle and niece, because her mother was adopted by his family. The ickiness is undercut by the fact that she did not grow up knowing him as her uncle—she and her twin sister, the product of their mother's rape, were themselves given up for adoption.
* As the World Turns: Katie married Simon so that he could stay in the country to be close to Lily, who he had fallen in love with, but unusually, Katie and Simon eventually fell in love. A few years later, Noah married Ameera, a girl from Afghanistan, whose family his father Colonel Mayer was trying to help. This ends up failing and the girl gets arrested.
* As the World Turns loves this trope because of its legacy families. Many of the

characters, even just with ties to super couples and their parents/children, tend to be able to get away with anything on connections alone.
* As the World Turns, pulling increasingly horrific stunts that included attempted murder, kidnapping, and RAPE, giving Jack the perfect excuse to return to Carly — with whom he proceeded to have an on-again, off-again relationship that was just as unhealthy and destructive as their previous one (and included the sacrifice of even MORE examples of this trope for both of them) before finally marrying for good in the series finale.
* As the World Turns remember Dan and their love. Susan failed and Kim and Dan were reunited.
* As the World Turns: Simon and Katie entered a Citizenship Marriage so that he could stay close to Lily and eventually fell in love.
* As the World Turns's Jessica and Duncan. Shockingly, it was one of the town's most beloved citizens, Lisa, who had a problem with it. They eventually married and had a daughter, who herself played this out when she grew up.
* As the World Turns this and promptly begins a secret life as an escort. Not until she gets beaten up by a client does she realize how dangerous her behavior is.
* As the World Turns thought she was pregnant but it turned out to be an ovarian cyst.
* As the World Turns, which is the first male/male kiss shown on American daytime.
* As they are working together, Supergirl grows quickly tired of hearing
* As they can pull off even something with 0 chance of success, it doesn't really matter...
* As the years have gone by and the latter series became multi-platform instead of a PlayStation-exclusive, good relations have started to develop between fans of the
* As the Yellow Guy drowns in oil in the sixth episode, all the Lamp can do is happily cry "Looks like somebody's having a bad dream! A bad dream! Bad dream! Bad dream! Bad dream..."
* As they eventually left Marvel Comics, Millar and Bendis do not have any control of the
* as they go about their jobs...in the middle of a battle where aliens board the ship.
* As they had learned on their own skin back when they too used the phalanx and suffered a devastating defeat against the Samnites, who used proto-manipular tactics.
* As they jettison the Lunar Expedition Module that they took shelter in
* as they knew in intricate detail what was going on and how it was being carried out. As a result, Sonderkommandos were regularly gassed and replaced, with the first duty of the replacements being to collect and burn the bodies of their predecessors.
* As they look now - rotted, filthy, partially skeletal and covered in worms or maggots, wearing the clothes they were buried in.
* As they're all improvised it gets hard to really pin it down, but around 30% of Ross Nobles shows will involve monkeys.
* As they're wont to do, the fandom has turned this into a meme, and it's now the stock response when you're commenting on someone's poorly designed pony OC.
* As they search, and as Phineas monologues, they interrogate their father, Lawrence, after which this happens:
* as they see the unimaginable dangers and ravenous monstrosities as welcome distractions from the monotony of getting to yet another planet to loot and burn.
* As they size each other up, bandit leader Abu Hassan yanks off Popeye's belt without unclasping it. Not to be outdone, Popeye reaches out and snatches Hassan's underwear right from under his clothes.
* As they were announcing the new #1 contender for the WWE Championship, John Cena stood up, assuming he won (justified as he had by far won the fan poll), only for Kurt Angle to say "John... Bradshaw Layfield!"
* As they were stranded on the other side of the galaxy, Voyager sought various means of getting home faster than possible using its (already highly-efficient) warp drive, ranging from transwarp and quantum slipstream technology, to a graviton

catapult which can catapult a vessel across space in the time it takes to say "
* As things get worse and worse, it seems the Universe itself is conspiring to give Lundi and Jeudi trouble. Specially
* As things go, by endgame the three active physical skills that don't suck (RapidFire, Finisher, and Jump) pretty much become your bread and butter due to the sheer damage you can do with them, especially since you can only use two skills at a time anyways (unless you're a mime).
* as this, after it was deactivated. She was allowed to keep both, and she wears them as accessories.
* As this arc reveals, a major part of Aiden Price's job as the Counselor of Project Freelancer was manipulating the freelancers into following orders.
* as this determine which way to go to escape the maze. Making it more frustrating, is that the exit has a chance to loop you further instead of letting you exit, which means you have to retrace the coordinates again.
* As this is a transformation trope, it has appeared multiple times in
* As this very page shows, there is a lot of diversity in what's called "Social Darwinism"-with six major varieties, how coherent can it be? This has been a criticism of the term in real life as well. Many scholars no longer feel that it's ever been a single, coherent philosophy. The modern idea that it was is traceable to the American historian Richard Hofstadter in his 1944 book
* As this video shows, it is perfectly possible for a momentary lapse in judgement to result in people defenestrating themselves through ground-floor glass windows and doors. While some ground floor windows and doors are reinforced with this in mind, it doesn't take much force from someone running against a thin plate-glass window to send it crashing down.
* asthma, inherited from his Missing Mom Keep in mind the series takes place in the 1880s and that such a condition would be much more life-threatening than it is today.
* As Thousands Cheer, a newspaper headline-themed Broadway revue of 1933, had newsboys chanting: "Extra! Extra! Man bites dog!"
* as through Ectobiology, Scratch was created with a magic Cueball and Lil' Cal, who had a green suit made for him by Kanaya.
* A Sticky Situation likes this concept and plans to make his own destiny starting in chapter 205. It also seems to be his biggest talent, though he can only do this on a relatively small scale.
* A Sticky Situation. The first one is only for a few girls that work for the Dark Acolytes. The second occasion involves freeing almost one hundred Twi'lek women. And a third occasion at the start of chapter 217 involving the slaves of Jabba the Hutt.
* As Tiger Woods and all other great athletes have found out, you can be the absolute best, with no one better,
* Astigmatism is a defect in the shape of the lens or cornea that prevents a sharp image from being projected on the retina, making vision blurry regardless of distance - although they may also have a 'sweet spot' where everything is clear. The unusual shape of their eyeball also makes it very difficult to prescribe contact lenses for them.
* As Time Goes By and claims it's Old English. All of the preceding are words, although 'flug' is German.
* As time goes by and people learned proper tactics for handling witches, serious
* As Time Goes By. As Rocky's son Lionel puts it, "she's as crackers as he is."
* As Time Goes By can't do it. The button at the end of the episode? Sandy, unaware of this argument, casually opening it with just a little effort.
* As Time Goes By convinced she's going to die during a minor operation and half-convincing (or really convincing her poor husband Stephen) everyone else of that too. So when they find her bed empty and the senile patient in the next bed says "She's gone—they took her away!" Stephen faints. (They wheel Penny in a few minutes later; the staff had moved her to a different room because the other patient was making a racket all night and she couldn't get any sleep.)
* As Time Goes By has Madge, who sings country music, goes bungee-jumping, protests

fox hunting, and plays the drums, all in her early eighties.
* As Time Goes By husband Dennis McMillan (who was her fiancé in each of the other two worlds). In the third parallel universe in which time flows backwards, Daelin is a police officer whose murder Quinn prevents, thereby completely disrupting that universe's timeline.
* As Time Goes By is when Jean, out of pride, convinces her sister-in-law that her relationship with Lionel is not old-timers' companionship so much that her sister-in-law insists on giving up the master bedroom to them. Rather than spend an uncomfortable night in the chair, Lionel suggests they share the bed and not get hung up on any immature implications... and once they're settled, he and Jean lock eyes.
* As Time Goes By, Jean laments "God, give me strength!" after Lionel is curt to the point of rude towards a TV producer in charge of greenlighting his script. When Lionel snaps "I heard that," she unabashedly replies, "I hope God did!"
* As Time Goes By. Jean tries in vain not to laugh as Lionel proves so inept an oarsman they end up having to be towed back to shore by another boat.
* As Time Goes By, Lionel's extremely dull autobiography about planting coffee in Kenya is given a "pick-me-up-and-buy-me" cover (as his publisher Alastair puts it). What this translates to is a buxom blonde in half-open safari gear clinging to Lionel's legs while he holds a rifle against a jungle background, which infuriates Lionel and amuses Jean greatly.
* As Time Goes By, Lionel writes a miniseries based on his and Jean's romance when they were young. The American producers proceed to make a travesty of it, laying on every English stereotype in the rewrites, hiring terrible actors, poor production values, everything.
* As Time Goes By listens to the Shipping Forecast. As she's a no-nonsense, stoic housekeeper, her love of the Shipping Forecast is just another way of demonstrating that what's utterly boring for other people is important to her.
* As Time Goes By, Lol Ferris—the amiable gardener at the country house—insists that he fell over to explain his bruised face. Jean, a former nurse, notes that he should have bruised hands if that were the case. In truth, the obnoxious, posh, townie weekenders incited their younger fellows to beat him up after he shouted at them for driving their ATVs through his garden. Jean and Lionel threaten to buy some dogs specifically to set on them.
* As Time Goes By, rugby enthusiast Harry sputters out his confession of love for Sandy just before he is going to emigrate to Canada. Something he's been too tongue-tied to do up to that point. She accepts and the rest of the episode involves her rushing to pack so she can go with him that afternoon.
* As Time Goes By", Ruth Bader Ginsburg is the Chief Justice of the United States rather than an Associate Justice of the Supreme Court.
* As Time Goes By shows up dressed as a Knight in Shining Armor to help him win Judy's affection.
* As Time Goes By: Subverted, since she is secretly quite nice, just extremely strange. Lionel does, however, make a Mrs. Danvers joke at her expense. As is revealed in the wedding episode, she also has a secret crush on Rocky, her employer.
* As time goes by, the Avengers' attitude and inclination towards moral relativism starts to rub off on Harry, especially with all he's put through. This only gets worse after he starts spending more time around Doctor Strange. The narration all but states that this is
* As Time Goes By They're all very relieved when Harry shows up in costume to pick Sandy up.
* As Time Goes By when they're already having a rough time because of romantic woes; Lionel's unsympathetic reaction helps kick off the episode's plot.
* "As Time Goes By" will forever be known as the song Sam played (and played again) in
* As Time Goes By, you can't help but say, "Hey, they live in Jean and Lionel's house!", or vice versa.
* As time goes on, it's clear that the magical faction wasn't that innocent

either. Apparently, the High Priestesses had a magical tower where they sent people to be brainwashed, a serpent they'd summon from the depths of the underworld if they needed to do it quickly would tear the veil between life and death every solstice (although the summer one was quite tame if done right, the winter solstice set hundreds of depraved souls loose on innocents), and had extremely harsh methods of keeping the non-magical in line. Of course, the remaining high priestess who does all this is
* As time goes on, Willow seems to have her Super-Powered Evil Side under control. It's more that she turns evil when she uses powerful magic, but then she turns back good when she stops. A scene in Season Seven demonstrates this effectively: while using a powerful barrier spell to protect an innocent girl from a spider demon, Willow gets the black eyes and black hair, and also calls the girl a bitch. After the demon leaves, she goes back to normal, and apologizes to the girl.
* As time has gone on, he's progressed to often just blinking at things.
* As time has gone on, however, it has become more and more clear that the concept of tactical nuclear weapons is fundamentally flawed; all nuclear weapons are strategic because the decision to use nuclear weapons is made at the level of grand strategy, and by extremely senior political leaders rather than anyone who would be managing a battle.
* As time has gone on, with more members introduced and their family relationships expanded on in the wider
* As time passed, the Wii also gained more traditional games that also proved to be bestsellers, such as
* As time passes, Sakura herself evolves into one for Hinata and even to Naruto himself.
* As time went on, between the output of Nintendo's internal development teams and
* As time went on, "Nothin' on You" and "Billionaire" have become more and more associated with Bruno Mars, as his career launched into the stratosphere, and less and less with respective lead artists B.o.B. and Travie McCoy.
* As time went on, Todd's ethnicity became less ambiguous. We now know that he's "not black" (he said it himself in his review of
* As to be expected, this has always been an integral part of pro wrestling. It wouldn't be surprising if something along the lines of "Go Johnny Go" was omnipresent during the very first match.
* A stock and trade for the Twiggets, one of the major allies of the Rebellion. Individually they're no match for the Horde, but they're extremely crafty, very resourceful, and expert marksmen who have no problem using strike and run tactics against more powerful opponents.
* As Told By Emoji series is a rare modern example of this trope. Although written text frequently appears, the characters "communicate" through facial expressions, physical actions, and emojis, without spoken dialogue.
* As Told by Ginger about being true to herself. Though she looked quite nice with her hair done and wearing some of Courtney's clothes.
* As Told by Ginger because she's so ditzy and spoiled she can come off as ignorant.
* As Told by Ginger blackmailing Ginger in "Cry Wolf" when she threatens to reveal Ginger's secret about her not being allowed to shave her legs if Ginger doesn't do her bidding. Another "B" plot has Carl and Hoodsey blackmail Blake over an embarrassing baby blanket.
* As Told by Ginger counts as this, despite being the most popular girl in school, and despite being shallow, ditzy, and attention-hogging, which are more due to her rich, sheltered upbringing. Courtney feels real sympathy for people in less-than-enviable situations and is genuinely interested in the world outside her own, one of the reasons she befriended Ginger in the first place, and over the course of the series, becomes more and more of a friend to her. She's even proven on several occasions to be a better friend to Ginger than Dodie is.
* As Told by Ginger: Courtney thinks this of Sasha in the summer camp episode.
* As Told by Ginger, Dodie and Macie conspire with Miranda and Mipsy to break up the new relationship between Ginger and Darren—the former because they feel

left out by Ginger's preoccupation with Darren and the latter because they're petty, jealous, often reprehensible people. Ginger eventually finds out about it, stops talking to Dodie and Macie, and the episode ends on a rather sour note, but afterwards the three of them act as if it never happened. It's implied that they decided to deal with it by just never talking about it.
* As Told by Ginger episode "Of Lice and Friends", Ginger does one of these to prevent Dodie from revealing to the whole school that Courtney Gripling has lice.
* As Told by Ginger episode "Stealing First", as the popular girls ask Ginger how far she has gone with a boy. She held hands once, but since it was "hands cupped" rather than "fingers interlocked", it counts for less.
* As Told by Ginger episode "The Easter Ham" had Joanne overreacting after waiting for test results that confirm whether she has heart trouble or not after a tug of war between Lois for the last ham, it turned out she merely had esophageal hernia and merely needed to change her diet.
* As Told by Ginger episode "Wicked Game" has Dodie and Macey teaming up with Miranda and Mipsy to break up Ginger and Darren. Courtney overhears their plans and warns Ginger about it, and sets up a conference call with everyone so she tricks them into discussing everything they've done with Ginger and Darren on the other line.
* As Told by Ginger episode "Wicked Game", Noelle loses Carl (along with her glasses and shoe) in a bet with Polly Shuster, meaning he has to spend the weekend playing Parrot World with Polly.
* As Told by Ginger. Funny thing is, when the characters finally got there, the show got canned.
* As Told by Ginger, Ginger confesses that she has a crush on her teacher, who is also her quiz team coach and the host of an upcoming school quiz competition that will be televised on public access. One of her best friends convinces her that the teacher loves her back and that she should ask him out. She agrees to do so, but has trouble finding the right moment. The temptation distracts her for the entire competition until she finally asks him out on a movie date during a question...on stage...in front of an entire audience...and on local TV. To add salt to the wound, the competing team answers the next and final question and wins the game by one point.
* As Told by Ginger has an in-universe example. Miranda and Courtney catch an older boy called Jake giving Ginger back her house keys (after hearing that Ginger and her friends had crashed a party he was at). When they ask Jake about Ginger, he refers to her as "clean mouth" and that he bumped into her under the snack table. They naturally assume that Jake and Ginger made out. But the audience knows they only were coincidentally under the table at the same time because Ginger was looking for her dropped keys, and "clean mouth" refers to them both having the same dentist where Ginger's picture was hanging on the wall as 'Clean Mouth of the Month'.
* As Told by Ginger has Carl Foutley and his best friend, Hoodsey, with Carl acting as the brains of the operation by coming up with various schemes like trying to make invisibility powder or make enough money to be a lie detector and is considered creepy and weird by the majority of the cast. Hoodsey meanwhile is Carl's sidekick who is something of a worrier and very gullible and naïve, but much nicer than Carl, though Carl is very rarely mean to Hoodsey and saves his tormenting for his favourite targets, Blake Gripling, Brandon Higsby or some unlucky teacher.
* As Told by Ginger has Darren calling his older brother Will "Wilbert". This results in him angrily throwing Darren in a swimming pool.
* As Told by Ginger, in the episode "No Hope For Courtney", Mrs. Gordon dies. Originally, Mrs. Gordon was supposed to come out of retirement, but her voice actress (Kathlyn Freeman) died, so the writers redid the ending to reflect this (and dedicated the episode to Freeman).
* As Told by Ginger invokes this trope in the Thanksgiving episode "Ten Chairs" where she invites Jonas (her mother's ex-husband) to the Thanksgiving dinner where Lois's fiancee Dave will also attend.

* As Told by Ginger: In "Wicked Game," Noelle loses her glasses in a bet to Polly Shuster, who later wears them for a little while.
* As Told by Ginger is an unusual boy who loves bizarre things. His prized possession is a petrified eyeball.
* As Told by Ginger; it happens but there are other forces at work. Ginger's brother paid off the operator to stop it in order to break the world record for the longest time stuck on a ski lift.
* As Told by Ginger, "Losing Nana Bishop" has Hoodsey eulogizing his late paternal grandmother. He happens to be wearing an iron mask that he and Carl got, but they lost the key. Also, the service is being held on a boat and the casket's cart is accidentally knocked loose, causing it to sway back-and-forth during an otherwise appropriate eulogy.
* As Told by Ginger: Macie's father, on realizing Ginger's right and he and his wife have forgotten Macie's 13th birthday, drops the stylus to his PDA — and then lets the PDA fall.
* As Told by Ginger may as well be considered the Caucasian version of Dijonay Jones mentioned below. Whenever she wants to gain popularity of some sort, she'll see it as an opportunity to stab Ginger and Macie in the back each and every time. You know you're considered a bad friend when even arguably the most popular girl in school treats your friend much better than you do.
* As Told by Ginger—her and Carl's mom is getting remarried to a kind, friendly and successful physician named Dr. David Dave while Ginger's new boyfriend, Orion, is making it clear that he wants to commit to a more serious relationship with her. While Ginger's happy for her mom and Dr. Dave getting married and also really likes Orion, she seems worried that her mom's current relationship might not work out and she also feels uneasy about committing to a more serious relationship with Orion. She talks it all over with Dodie and Macie, who suggest this trope, noting such things as her parents being divorced and how her romantic relationship with her old friend, Darren, didn't work out (since he ended up leaving her for a cheerleader named Simone). When Ginger questions her mom on how she can take getting remarried despite having already been in a marriage that ultimately didn't work out, Lois admits to her daughter while nothing is certain at the moment, she genuinely loves David and is happy to get remarried anyway, ultimately telling Ginger that it's important to take risks in life rather than staying in your comfort zone all the time.
* As Told by Ginger, Miranda, who's the mean one, particularly because Miranda is jealous of Courtney's friendship with Ginger.
* As Told by Ginger showing Ginger as a successful author, and Darren in the crowd at her book signing - holding a ginger-haired baby.
* As Told by Ginger so that her character Ms. Gordon would be dead as well.
* As Told by Ginger, the characters go to a farm. Off-screen they see a newborn calf and are grossed out by the afterbirth.
* As Told by Ginger. The girls' bathroom is fairly mundane. The boys' bathroom in Lucky Jr High however is like a flea market, complete with under-world-esque trading of school projects.
* As Told by Ginger), the other is bitter and resentful at being abandoned, and both children seem to have issues with trust linked to their father's lack of reliability. To top it off, Jonas is very awair of how much of a flake he is and eventually gives his ex-wife away to a second husband who is far more reliable than he was.
* As Told by Ginger to help her keep up with her demanding study schedule. It turned her into a jittery, neurotic, stuttering insomniac in no time, and she had to have a serious talk with her mother about kicking her habit.
* As Told by Ginger were divorced, though it was never made clear why, but was implied due to changes in their lifestyles. Lois and Ginger can still accept Jonas despite him not always being there, but the divorce has made Carl distant from his father, and this conflict appeared in a few episodes, since he wasn't even around for the first season or two of the show and completely failed to keep up on events with his kids. When he suddenly came into the picture it was as a hesitant, awkward

but trying man, and fits with the theory of someone who ran away from a problem but is now trying to fix it, but is aware they don't really deserve a second chance.
* As Told by Ginger: Whenever Ginger was troubled over something, or just lost in her thoughts she would sit on the swing set in her backyard.
* As Told by Ginger, when her friends come to babysit Carl, Ginger tells them that the numbers for emergency services are noted near the phone and adds: "They know him at the hospital."
* As Told by Ginger where Ginger soon imagines herself and Darren in place of the characters in the song and she finally drowns.
* As Told by Ginger", while the campy and effeminate Brandon also has eyelashes.
* As Told by Ginger, who died of cancer during the making of the episode.
* As Told by Ginger why they never do it. Miranda glomps her for a moment before deciding "there, there, that's quite enough of that"
* A Stolen Life (1946), when a woman's twin sister is drowned, she assumes her identity in order to be close to the man she feels her sister took from her years before.
* A stolen rare coin is found inside Bugs Meany's hot dog. How did Encyclopedia know where to find it? Because he saw Bugs spread mustard
* Astolfo is a male who wears a dress. It amuses the others and he finds the outfit cute, so he doesn't mind wearing it.
* Astolfo's reaction when Archer proposes a tag team fight with Archer and Cinder Fall vs Astolfo and Ruby Rose. In contrast, Ruby, oblivious to his worry, gets excited.
* A stone giant fighting in a ritual challenge accidentally hitting the spectating paladin. Twice. The giant now had to fight the paladin and was promptly
* astonishing catch (and subsequent winning touchdown) game between the Green Bay Packers and the Minnesota Vikings.
* Astonishingly Appropriate Appearance: A character's physical appearance matches their powers or personality.
* Astonishingly Appropriate Appearance: Having a character's appearance coincidentally match their personality, occupation and powerset is a good way to convey what they're all about at a glance.
* Astonishingly Appropriate Interruption: A character sees something that causes them to suddenly shout something while they were talking, but the abruptly hollered word just happens to be what they were probably going to say or at least makes sense as part of the interrupted sentence.
* Astonishingly Appropriate Interruption: A character's statement is interrupted by suddenly shouting something in reaction to being surprised or shocked, but the word they suddenly shout has a good chance of being what they were about to say or at least makes sense as part of the interrupted sentence.
* Astonishingly Appropriate Interruption: Interrupted words still manage to form a coherent sentence.
* Astonishingly Appropriate Interruption: Someone is shocked or surprised by something while they're talking and the word they suddenly shout could very well be what they were about to say or at least makes sense as part of the interrupted sentence. Alternatively, someone interrupts someone else and it finishes the sentence.
* Astonishingly enough, Ghouls themselves have their own underclass: Shambling Ghouls are considered the lowest on the pecking order, not merely for being weak, short-lived and
* astonishingly long time to realize just whom they are both, in fact, talking about. Millerna, to her credit, catches that Hitomi's basically repeating her earlier discussion, although it takes her a while to catch why that's important. Which the ditzy Catgirl Merle calls them both on.
* Astonishing Swordsmen and Sorcerers of Hyperborea takes place in the titular world, which is flat, hexagonal and wanders through space.
* Astonishing X-Men #19, after being told of a prophecy that he is destined to destroy the Breakworld:
* Astonishing X-Men. As this happens, Professor X, who's in exile on Genosha and

has been out of the plot for nearly the whole series, is shown holding his head and crying, signifying that he's feeling the pain. Justified in that he's one of the most powerful psychics in the world, and implied to be directly connected to all of the X-Men.
* Astonishing X-Men stops him. When Colossus recognizes Kitty's voice, he falls to his knees and sobs "Am I...God please...am I finally dead?"
* Astonishing X-Men stories where famous Marvel characters are killed.
* Astonishing X-Men (the genuine article); not believing it's really Colossus, back from the dead, she tells him that if he's a robot or a clone, she'll understand, but if he's a shapeshifter or illusionist, he's in for a new meaning of pain.
* Astonishing X-Men variant to destroy a Sentinel attacking the school in issue #8.
* Astonishment when two versions of Kyon from two parallel realities meet in a closed space.
* Aston Merrygold in the 2017 series. He's a young boy and member of a boyband who once was a judge on a dance show and was a preshow favourite. One poorly marked dance later and he's booted in tenth place.
* Aston Villa in the Martin O'Neill era is an excellent example. They would look like they were going to challenge for the Champions League places, and every year, specifically in March, they would go on a bad run of results and drop out of the challenge. They were in the Championship - English football's second tier - for a couple of seasons, but they returned to the Premier League in 2019.
* a stool from there; Also invoked for the passersby of the same strip, who are showing reactions ranging from disgust to pervert faces.
* a store brand known as "No Name"), whose products are typically contained in bright yellow packaging with plain black type.
* A Storehouse of Knowledge, made by a former Conservapedia administrator who got fed up with the site.
* Astoria, another suburb, is the resting place of a slumbering dark god, and naturally attracted said god's worshipers trying to raise him. They eventually took it over and killed everyone who wasn't able to get out. A few years later, the god woke up,
* Astoria: Fate's Kiss, as well as non-binary love interest Alex Cyprin, a demigod.
* Astoria: Fate's Kiss. Here, however, they are depicted as attractive men and women who look fully human, with their traditional monstrous appearances relegated to the supernatural Auras that give them their powers as godly monsters.
* Astoria: Fate's Kiss, is an androgynous demigod referred to by the neutral pronouns "they" and "them". They are stated to be gender-neutral.
* Astoria: Fate's Kiss - is the main antagonist of Hydra's route, taking advantage of his status as the son of Zeus to use H.E.R.A. resources while acting outside of their chain of command. He turns out to have assaulted several people, including his own ex-wife, in order to steal the Auras that are the sources of their power for his own use.
* Astoria: Fate's Kiss. It was changed to its current title in October 2015, upon the completion of the Season 1 story release schedule.
* Astoria: Fate's Kiss special, the protagonist was shown as pregnant.
* Astoria: Fate's Kiss's plans immediately, and one gets the impression that the whole trouble could have been avoided by simply going to Hades about it from the beginning.
* Astoria: Fate's Kiss. The Nemean Lion and Erymanthian Boar, also among the monsters fought by Hercules during his Twelve Labors, are similarly recast as friends and allies of the main characters.
* Astoria: Fate's Kiss, which for some reason is headquartered in New York City.
* Astoria: Fate's Kiss, you have Astraeus. During the Hades season 1 and 2 storyline, Astraeus is the villain. He's a Titan who is working to overthrow Olympus and the Top Tier Gods, and actually tries to kidnap your character on several occasions. In season 3, he is a romantic option himself.
* Astoria the Ephebian Goddess of Love. According to the Great God Om, "
* A storm descends on a small town, and the downpour soon turns into a flood. As the waters rise, the local preacher kneels in prayer on the church porch,

surrounded by water. By and by, one of the townsfolk comes up the street in a canoe. "Better get in, Preacher. The waters are rising fast." "No," says the preacher. "I have faith in the Lord. He will save me." Still the waters rise. Now the preacher is up on the balcony, wringing his hands in supplication, when another guy zips up in a motorboat. "Come on, Preacher. We need to get you out of here. The levee's gonna break any minute." Once again, the preacher is unmoved. "I shall remain. The Lord will see me through." After a while the levee breaks, and the flood rushes over the church until only the steeple remains above water. The preacher is up there, clinging to the cross, when a helicopter descends out of the clouds, and a state trooper calls down to him through a megaphone. "Grab the ladder, Preacher. This is your last chance." Once again, the preacher insists the Lord will deliver him. Predictably, he drowns. A pious man, the preacher goes to heaven. After a while he gets an interview with God, and he asks the Almighty, "Lord, I had unwavering faith in you. Why didn't you deliver me from that flood?" God shakes his head. "What did you want from me? I sent you two boats and a helicopter."
* A Storm in the Neighborhood" That's easy enough, as Mom Kittycat came over with her.
* A Storm of Swords, and inflicts poisoned wounds that eventually lead to Gregor's death, but he lets down his guard and is killed by Gregor.
* A Storm of Swords Arya in a dress for the first time, he laughs so hard that wine comes out of his nose. (He does admit that she looks nice later, though.)
* A Storm of Swords: Daenarys tries to buy off a mercenary company and offers a casket of wine as a goodwill gift. The mercenary captain complains that this is not enough and demands a whole wagon of caskets instead, to which Daenarys obliges. The captain wasn't aware that Daenarys *did* just loot an entire city famous for (among other things) its wine.
* A Storm of Swords, during Tyrion's second trial, he notes that there are six Kingsguard in the crowd. Since there are only five active members of the Kingsguard currently in the city—the others being either dead or in Dorne—the sixth member can only be his beloved brother, but he doesn't make this connection.
* A Storm of Swords has a more lighthearted example with the woman who tries to seduce Gendry claiming to be a bastard of Robert Baratheon. Arya notes that her hair is the same color as the late king's, but that lots of people, including Gendry, have black hair, so it means nothing. It's ironic on several levels, because Gendry himself is unknowingly a bastard of Robert's.
* A Storm of Swords in-universe before it was delayed, then after not coming out for five actual years, the action picks up immediately where it left off.
* A Storm of Swords is described this way. Being a free folk raider, she has a muscled and shapely body, and she's "fire kissed" (red-haired) but her face is rather lacking, and her teeth are crooked.
* A Storm of Swords Jaime dreams of a woman (implied to be his mother) who laments about how her family has fallen down. The dream turns quickly into the late Kingsguard and Prince Rhaegar blaming Jaime for the death of Rhaegar's family, something that has been haunting Jaime for years.
* A Storm of Swords King Robb Stark having heard that his brothers Rickon and Bran are dead seeks comfort in his nurse, Jeyne Westerling. As she is a lord's daughter and he took her maidenhead he feels obligated to marry her. Even though the two like each other this has disastrous consequences.
* A Storm of Swords. Nevertheless, when Tyrion escapes, he has to flee Westeros, since he has been branded guilty.
* A Storm of Swords, Robb explains his offscreen (offpage?) marriage to Jeyne Westerling by telling his family that she "gave him comfort" after he found out his younger brothers had been murdered. Catelyn (the viewpoint character for the chapter) thinks to herself that she knows exactly what kind of "comfort" Robb is alluding to.
* A Storm of Swords, Roose Bolton and his men storm into the room. Catelyn thinks they're there to help her and Robb: however, Bolton is really in league with the Freys, cuts down his fellow northmen, and stabs Robb in the heart.

* A Storm of Swords, Sam's messages to Castle Black during an attack by wights take this form, as they start out informative but become terrified and hasty as the battle turns against them.
* A Storm of Swords, since all his full siblings were either presumed dead, or in Lannister custody.
* A Storm of Swords. The musicians at the wedding even turn out to be soldiers in disguise.
* A Storm of Swords, they lack trees to make siege weapons thanks to a scorched earth policy of the defenders, so they break up the only ships they have to make a 'turtle' covered in horse hides (against burning oil) protecting the battering rams (made from the masts) they use to break down the gates.
* A Storm of Swords this, but the character's debut in the TV series makes it clear that — at least in the show continuity — the two are one and the same.
* A Storm of Swords, Tyrion Lannister responds with an angry and contemptuous "Your son was a monster. Of course, I did it" when asked by his brother Jaime if he (Tyrion) poisoned Joffrey (Tyrion's nephew and Jaime's incestuously born son). Tyrion actually had nothing to do with the murder other than being the one who unwittingly gave Joffrey the poisoned wine. He was confessing in order to cause Jaime maximum pain, as Jaime had just admitted that Tyrion's first wife, Tysha, hadn't been the hired whore Tyrion had been told she was.
* A Storm of Swords you see him do this to one person repeatedly, who continually loses more and more of his original self in the process.
* a story about a sentient computer program published in 1984, is interesting because it rather accurately predicts the Internet, online gaming culture, and the use of emoticons in text messaging.
* A story about Malia Obama being arrested along with a "gang of thugs" in Chicago was first posted by a satirical website called The Last Line of Defense. While the website has a disclaimer (in small print) saying "All articles should be considered satirical and any and all quotes attributed to actual people complete and total baloney", many of Obama's detractors cited it as legitimate news. (And this is not even the first time this has been the case with The Last Line of Defense.)
* A Story About My Uncle: The otherworldly caves which the player explores are populated by a species of blue-skinned, four-fingered humanoids which resemble amphibians.
* A Story About My Uncle, when you find the last abandoned campsite of Uncle Fred, the narrator points out that the fire is still smoldering and he can feel the distinct smell of Fred's aftershave.
* A story about the nineteenth-century chess champion Emmanuel Lasker holds that he once visited a chess club and played some games unrecognized by anyone there, including a man who called himself "the Lasker of this club". Sometimes it's told about Max Euwe playing with a guy during a train ride.
* A story about Wiener (admittedly second hand). He was on sabbatical when his office was needed for a visiting professor. One look at the piles of papers and the admins hunted up his daughter, who was a student at MIT at the time. Some time later she was heard laughing and asked what about. She replied that near the bottom of one of the piles she had found a note congratulating Norbert on the birth of his daughter, her!
* A story about windows and the Cultural Revolution was that of the famous mathematician Chen Jingrun (whose
* A story arc had Calvin sending away for a motorized propeller beanie. When it finally arrives, he's disappointed that it doesn't let him fly around town as he had imagined, and kicks it away in frustration. Fortunately, it came in a cool cardboard box, and he and Hobbes begin to make plans for the fun they'll have with it.
* A story arc in the eighteenth season upped the ante with a trip to the pocket universe E-Space — where, of course, all the planets had a particular sort of alien sky at night — space is green in that universe (and since it's later established that inter-universe portals were built to drain off entropy,
* A story by the Polish satirist Krzysztof Jaroszynski has an American visit

Poland and ask why the Christmas decorations still haven't been taken down by February. The protagonist answers that these are decorations for
* a story emerged where a man was beaten and humiliated online, after asking a number of people if they had lost a two year old girl he was walking with.
* A story explaining them: An author asks, in jest, each clan what the most important virtue is. Each clan picks one, and the Scorpions pick loyalty, while the Lions pick honor. The other clans laugh at the Scorpion talking of Loyalty, since they are traitorous bastards. The Scorpion proposes that each Daimyo will call his greatest warrior in, and give him a task. The one whose warrior does not hesitate, loses. The others are suspicious, but he talks them into it, offering to demonstrate the task first. He calls his warrior in, stares at the author, and gives her a look that says, "You know what I am about to do." He then says his command. "Kill me." Without hesitation, the Scorpion Warrior kills his Daimyo, then draws a knife and commits
* A story featured a peaceful, agrarian planet... where the local farmers had such bioengineering skill that the plants could eat the invading spaceships, let alone their organic crews.
* A story from the chinese book <Hedong ji>(河東記, 'Records from East of the River'), by Xue Yusi tells of a beautiful innkeeper who is actually a wicked sorceress. She would serve travelling merchants breakfast of pancakes which would turn them into donkeys, and then she would sell them and take all their belongings. A merchant saw this, escaped, and managed to trick the innkeeper into eating her own pancake, thereby turning her into a donkey and putting a stop to her scheme.
* A story from the "Tales of the Ten-Tailed Cat" comic has three adventurers releasing a Lord of Change, who grants them all one wish. The first wishes to live forever, and is turned into a vampire and then killed by the dwarf. The second wishes for the power of flight, and is turned into a fly. Finally, the dwarf wishes to be worth his weight in gold and is
* A story goes that the Americans once took a Japanese soldier prisoner, but the guy would not talk and had an unshakable belief that Japan would win the war. He only broke when he saw the Seabees at work, using bulldozers and heavy machinery to finish major projects in a fraction of the time the Japanese military would have needed with slave labor.
* A story in #11 called "Three's a Crowd" had a paranoid man believing his wife was cheating on him with his brother and he murders them both.
* A story in Tales from the Crypt called "Concerto for Violin and Werewolf" had the main character figure out the plot twist of the story because it was similar to one he had read in an American comic book called Tales from the Crypt. The story he refers to, called "Midnight Mess", was an actual story that had been published a few issues before.
* A story in the fifth novel, animated in S2E08, is about Nicol trying through an entire
* - a story in the form of a Twitter account detailing the life in Neverwhen, Nova Scotia; The Town of Lost Things.
* A story in Warren Publishing's 1984 magazine features this trope in the story "Scourge from the Spaceways", where it is revealed that females are unique to humanity. As a result, an interstellar war is triggered as the entire universe fights over Earth's women.
* A story is heard about a Finnish pilot who makes a forced landing between the lines and is fired at from both directions, and being wounded and confused, he himself can't tell where the friends are since there's a Swedish-speaking unit on the Finnish side.
* A storyline example happens in the story "Skies Over Ghirapur". The pirate captain Kari Zev tells the crew of her ship, the
* A storyline from 2009 involved Pig and his "bitter x" (a refrigerator magnet in the shape of a literal letter x), culminating in
* A storyline from the 1990s in which an ambulance ended up going off the road and laying across a railway line was very obviously based on

* A storyline has the team finds themselves in America in 1907. There, they meet a girl named Klara Prast. Klara is more upset at the possibility of them recruiting her for a union than the fact that she was forced by her parents to marry a man who is old enough to be her father, and who beats her and is implied to rape her. Molly fails to realize this when Klara alludes to it;
* A storyline in the late 70s employed Moses Magnum, a villain who had previously fought
* A story line spanning Seasons 8 and 9 features Rebecca striking a friendship with another boss named Robin Colcord. Then Robin is convicted of embezzling from Lillian, having used Rebecca as a patsy to do so. After taking a loss by selling the bar back to Sam for pennies, Lillian fires Rebecca, only to have Sam take pity on her and hire her as an assistant manager, but it becomes a running gag from thereon out that despite this, Rebecca becomes
* A storyline where the current line-up of Avengers are decimated, with a few members of the team even dying or getting badly injured, in order to set up a more high-profile roster under a new creative team. Did I just describe
* A Story Of Fire. They both begin as callous, murderous oni, but after recovering their human memories they follow completely opposite developments which puts them at odds in the finale.
* A story of questionable truth tells of a nurse named Pika Bu who very briefly worked in an Intenstive Care Unit. She didn't last long because she frequently had to aswer the phone when it rang:
* A story often told around the fire at Cub Scout camp-outs tells of a Native American chief who challenges three rival suitors named Big Rock
* "A story of two friends who didn't know they were supposed to be enemies." —
* A story on has a librarian shooting rubber bands at students who use cell phones in the library.
* A story taken from Reddit about how a High School principal who transferred from a reform school really laid down the rule about how hats were
* A story tells about a pastor who wanted to say "Jesus rid us of our sins," but instead of "sin" (tsumi), he said "wife" (tsuma). Apparently all the men started clapping...
* A story that Arthur killed his own son in battle is actually one of the earliest recorded; presumably Mordred's villainy was developed to make this okay (though it should be noted said son was not Mordred but Amr who is absent from most later legends, while Mordred himself in these legends was Arthur's Nephew).
* A story that is often told regarding the strength of the human spirit; before Roger Bannister broke the 4-minute mile, it was believed to be so impossible anybody who attempted would die in the process. After he proved it was possible, within a short time, high-school kids were doing it.
* A story Thom Merrilin tells Mat: When Thom was young, he encountered a blacksmith's wife whose husband would control who she talked to and beat her up if she so much as looked at other men. Thom gallantly offers to rescue her — and is forced to hastily leave the village when she immediately runs and tells her husband! Thom later finds out that she would control the money, and beat her husband up if he as much as had a single beer at the inn. The moral of the story is to not judge before you have heard both sides.
* A story titled "A Date with Suzy Stringbean!" had Betty set up a date between Reggie and an old classmate who had a crush on him, Susan Starn (or Suzy Stringbean, nicknamed because she was the skinniest girl in the class). Reggie fakes an illness to get out of the date, so Betty sends Archie in his place. When Reggie sees Suzy the next day:
* a story where a man complained his lights turned off whenever he tried to install a certain program. Turned out the start of the music sounded just like a clap.
* A story widely told is that a fundamentalist priest/pastor/whatever called on Mr. Rogers to castigate a nearby group of homosexuals. Without missing a beat, Rogers turned to said people and said: "God loves you just the way you are."
* As to the powerful cosmic beings embedded in it: if you try to breach it and

fail you wind up
* Astounding Science Fiction issue. Editor John W. Campbell went along with the joke by commissioning the authors mentioned to write stories under the titles given in the letter, thus making the actual November 1949 magazine resemble the imaginary one as closely as possible.
* Astounding Stories His day job? A chemist specialising in rocket propellants.
* As to whether or not characters who didn't appear in the episode after the
* As to why this is a "curse", this power is the external manifestation of his own soul. His soul manifests as a desolate
* Astraglomancy or Astragyromancy: Making of decisions based on the throwing of dice, similar to Cleromancy (see below).
* A straight and kind of subtle example occurs with the villain of the first
* A straighter but downplayed example so far only revealed in the webseries storyline is
* A straighter example from the same game would be the stepmother of
* A straighter example in Season 4. Susan Ivanova stumbles litter-strewn out of a transport tube, using a cane to stay upright.
* A straighter example is found in the Messengers. Introduced at the end of Season 1 as mysterious
* A straighter example is Garak, the Cardassian tailor in exile on Deep Space Nine. Over the course of the series it is revealed he was (and might still be) a spy for the empire, that he was exiled after he betrayed his spymaster except he claims he didn't,
* A straighter example is Gwen making out with a (female possessed by a) sex-gas alien in "Day One". Given that there are many same-sex relationships and
* A straighter example is King Cheherazad, who is trained since childhood to lead the battle against Jade and the Shadow Walkers.
* A straighter example is Luis Guzman's appearance on the show, where he plays himself as Greendale's most famous former student, who still loves the place because he "got so much pussy" there.
* A straighter example is Snape blaming Lupin for an almost-fatal prank Sirius played on him. He also assumes James was in on it, thinking James saved him for the sake of his own neck.
* A straighter example is Tarquin casually snapping Haley's arm — in her case, she's a mortal female.
* A straighter example is that the entire planet was frozen for several decades before the formation of Crystal Tokyo. Who or what did the freezing wasn't really explained.
* A straighter example is the whale Laboon, who was Team Pet of the Rumbar Pirates, who eventually had to leave him behind because he couldn't handle the dangers of the Grand Line.
* A straighter example occurs in "Traitor", when the Autobot Mirage steals Energon cubes from the
* A straighter example occurs when Barney tells Ted that GNB plans to get the residents of the Arcadian Hotel to move out by filling the place with snakes... then immediately saying "I don't recall saying 'snakes'." when questioned.
* A straighter example of this is a virus that turns living things into clockwork, which is believed to be the breath of god by a cult of machine worshipers.
* A straighter example was Op. MUNCHIES. The kids and their villains spend the episode at the supermarket fighting over the last box of Rainbow Munchies cereal.
* A straighter example would be Euphemia li Britannia, who disguises herself amidst hostages under a pair of Clark Kent glasses. Nobody, not even the perpetrators know it's her until she takes them off and says who she is.
* A straighter example would be Hawk and Robby. Hawk absolutely hates Robby for insulting his mohawk at the All-Valley and kicking Miguel off the balcony, and is disturbed when he sees Robby joining Cobra Kai and eventually gaining Kreese's favor as the top student. Robby on the other hand...doesn't take him seriously, given his reserved hatred for Johnny and Miguel, as well as his far superior skill as a fighter.

* A straighter example would be her accomplice Hifumi Yamada, who killed Kiyotaka Ishimaru only because Celes made a False Rape Accusation.
* A straighter example would be his mother, Mary, an ordinary woman conceived without sin
* A straighter example would be Italy. He's very vocal about his love for Germany, but his incredibly affectionate nature towards everyone in general (including their friend Japan and random pretty girls on the street) and his overall
* A straighter example would be the Dream Bubbles, which float through the Outer Ring and are “glubbed” into existence by the
* A straighter example would be the series of Artificial Humans Gero created/developed before Cell. However, #17 and #18 were normal human twins until Gero messed with them (hence why #18 and Krillin have a kid later on), while #20 (Gero himself) is an entirely robotic construct, except with Gero's
* A straighter example would be when Hama bloodbends Katara and the poor girl can only frantically move her eyes in fear.
* A straighter example would be when you pick up a certain key in the basement. If you don't close the door behind you, he will rush you with no chance to move.
* A straighter version of the trope within the same cartoon is that Penry has to go through a vending machine which doubles as a secret door with his janitor's cart.
* A straight example appears in the fourth movie in the form of Captain Gutt, who believes that the best way to survive in an ever-changing world is by pillaging and plundering and is such a Narcissist that he openly claims that he is the best because he can and will do it.
* A straight example happens in the 12th novel (episode 13), when second-grader Nako says she's going to give
* A straight example in Professor Membrane's arms. At the start of the movie, the fact that they're mechanical prosthetics was just a quick punchline to a gag about how he thought sharks were his friends as a child.
* A straight example is used later on between Mina and Akira during the former's
* A straight example occurs in the third film. The room in which Lupin teaches Harry to defend against dementors is a rather obvious redress of Dumbledore's office. Some fans were even confused as to whether it was meant to be Dumbledore's office.
* A straight example of the Trope was made in the same episode by Negative Numbuh Three towards Numbuh Four, saying she didn't like him (a subtle clue that the
* a straight example of this cartoon, which in turn was based on the video games—but it was canceled.
* A straight example; the episode "Operation Rich in Spirit" is dedicated to
* A straight example was when the episode featuring the destruction of the Guide offices was broadcast on
* A straight example when Tank reappears with the lightning gun trained on Cypher:
* A straight example would be Charlie, who bullies Eggsy throughout training for his upbringing, and is of enough standing for
* A Straightforward Boy is a 1929 short film about two kidnappers who grab a Japanese boy, only to send him back after the boy proves way too irritating.
* A straight-forward example by the Rolling Stones, "It's Only Rock and Roll" ("But I like it, like it, yes I do!")
* A straightforward in-universe example is Peeper, who uses his X-ray vision exactly the way you'd expect a lecherous outright jerk of a teenager to. (It turns out that he can't turn it off, but his attitude appears to predate his power; in one story, upon being given a computer monitor he can actually
* A straightforward version comes later as the group are jarred to hear Warwick claiming the Princess "is so into me," having mistaken Ciara's encouraging words in her other guise as professions of love. When he discovers Ciara is the Princess, Warwick is jarred as he doesn't think of Ciara that way at all. Even afterward, when Ciara turns into the Princess, Warwick will hit on her and then go "sorry, old habit."
* A straight in-story example in the old series. The Black Guardian tells Turlough

that the Doctor is evil and must be stopped. When called out on it he claims he was not actually lying because "the Doctor's good is my evil".
* Astra includes a creature called Parmaelosthu, a giant floating blob that looks exactly like a small island until you try to climb onto it and discover it's made of slime. The book leaves it an open question whether it is intelligent or not.
* A "strait" is also a geographical feature; specifically, a narrow channel or river that connects two larger bodies of water, like the Straits of Magellan.
* Astrake is stuck in Silvana's body, which has a lot of magic power. While he can learn all her offensive spells gameplay-wise, he can't use certain spells that she created in the story,
* Astral Aves: Mages become capable of casting a shadow into another dimension and fighting other beings' shadows/lights.
* Astral Aves starts with two ravens appearing to the protagonists, launching an ominous prophecy and periodically reappearing.
* Astral Cafe is considered the most dangerous bartender in the universe. He spent years training to be the ultimate warrior under the greatest masters alive and then five years honing his abilities in constant battle against alien monsters.
* Astral Chain and immune to conventional weapons is bad enough without their existence causing mass panic. The problems with this are shown during the first investigation, as two PO'ed cops refuse to say much of anything; eavesdropping reveals witnesses reported large, shadowy hands dragging people through gates, which they dismissed as hysteria and therefore didn't report, but is vital information to Neuron.
* Astral Chain cubes. Many things that come from it subtly incorporate cubes in their designs as well; Chimeras and Aberrations disintegrate into cube-like pixels when killed, and Legions warp the ground below them into cube-like deformations when released.
* Astral Chain is revived upon running out of health. Apparently, a shock to the heart with the AED you carry while on duty is all you need to get back up and running after chimeras beat the snot out of you. Your AED is good for a difficulty-dependent number of charges (higher difficulty means less charges, Pt Ultimate turns off charges entirely).
* Astral Chain must stand on the other at the same time to unlock a door.
* Astral Chain: police officers fighting monsters with a monster of their own? Nice!
* Astral Chain, studio was arguably both aware and invested in averting the unfortunate trend by barraging the audience with dozens of gameplay trailers and development updates for months, up until the game's actual release.
* Astral Chain, there are two playable characters to choose from, a twin brother and sister, and whichever one you choose to play as becomes a customizable silent protagonist. The character you don't choose is given the name "Akira Howard" and becomes the deuteragonist of the story, and speaks normally. The player character does do a voiceover narration during the ending, speaking in the voice they use as Akira when you're playing as the other character.
* Astral Chain who otherwise had no interest in getting the console. In short, it's not a "killer app" in the sense that it's a blockbuster, but one in the sense that it attracted a good portion of non-Nintendo gamers and usually finds itself on a list of "must haves" for the console.
* Astral City: A Spiritual Journey), the titular city is this. Populated by souls who aren't bound by time or material constraints, the buildings look majestic and crystalline, while the inhabitants wear simple robes as a sign of humility and detachment. One of them was a Roman senator in his past life and still wears his toga.
* Astral creatures, particularly from the darker recesses of the astral world like the
* Astral Dawn accomplish this by travelling through time as ethereal beings. They also take temporary residence in physical bodies along the way.
* Astral Dawn: All spirits and the Aash Ra can naturally move through 3-dimensional matter. They can remain geosynchronous with a planet while in an intagible state.

This is possible through their higher dimensional states, which are not subject to 3-dimensional physics. For them, walking through walls, other objects and people is as simple as a 3D person or animal walking over a 2-dimensional surface.
* Astral Dawn are considered dream worlds. Another astral world belonging to a high spirit god named Hypnos sets a perfect example of this trope. His world is an island with a golden beach called the Land of Nod. The sand from Nod's golden beach serves as sleep sand for the Sandman.
* Astral Dawn by Adam R. Brown tackles this in a somewhat different way, as the multiverse is referred to as the Nursery of Dimensions. A race of extradimensional aliens called the Aash Ra are charged with safeguarding the Nursery. A single universe out of the multitude lies at the heart of the Astral Dawn saga. Because of its nature, it is called the anomalous dimension.
* Astral Dawn, Caspian learns the old myths and legends were inspired from beyond the mortal plane by the actual beings those myths and legends were based on.
* Astral Dawn, Caspian unwittingly fulfills his destiny by traveling to the Moment of Creation, a point in space-time he was warned never to go.
* Astral Dawn features ethereal beings with many abilities. The high spirits can perceive a mortal's aura. Caspian can go even further and perceive a spirit's aura outside of a body. The Aash Ra can perceive auras at this level as well.
* Astral Dawn: If one counts the many children Ixchel has had in previous lives, then she too could be considered an "action mom". The same is true of other goddesses in the series as well.
* Astral Dawn is an example of this. It has a silver blade and is made from his center. He later creates a more powerful version with a gold blade. Another awesome sword is the sword Caspian has to find in order to defeat Devlyn, Magali's crystal blade Sword of Fracture.
* Astral Dawn. Maganu has taken on many forms, including that of three giant blue stars. Maganu is actually the creator of just one of many universes within a collection of universes called the Tapestry. How he went about this is actually pretty wild. Though he is not the one total God, as humans might think of it, as far as the "anomalous dimension" goes, he's pretty much it.
* Astral Dawn, more specifically his own energy, forged within his center. Caspian's sword goes from having a silver blade to bearing a golden blade after he experiences several upticks in power.
* Astral Dawn plays this straight with an interesting interpretation of Hell.
* Astral Dawn series. Caspian Knoll and Ciaran Devlyn were once the best of friends in another life. After their deaths, Caspian went on to be reborn in other lives while Devlyn went straight to Hell. That put a pretty big gap between the fellows who would eventually become deeply at odds over the fate of Celestial City.
* Astral Dawn series, even though they work with each other for common goals.
* Astral Dawn series in which Caspian is revealed as one of the Destined Ones. It is explained there are many Destined Ones throughout human history, but that he was different because his great destiny lie on the astral plane rather than the mortal plane. Due to this revelation, he became known as the Destined One of Heaven.
* Astral Dawn series, many of whom are deities, fight against each other during what is called the Astral War.
* Astral Dawn series.The most notable goddess of love is Ixchel of the Mayan pantheon. She's also ironically Caspian's love interest.
* Astral Dawn series. Time passes much more quickly on the astral plane than it does on the physical plane. Caspian learns an entire month can pass by in Celestial City while only 8 hours passes by on the physical plane.
* Astral Dawn serves in this role for Caspian. In addition to being a goddess of the moon, love and virtility, Ixchel is a master combatant. She even trains Caspian in spiritual combat.
* Astral Dawn. She saves his life on multiple occasions, starting with taking on an angry Tyr while keeping him hidden away in her dream realm.
* Astral Dawn's second entry could be considered an example of this trope. They possess people without permission and use them for their own purposes for a temporary period.

* Astral Dawn, the high spirits have psychokinesis. Their power is actually the projection of their energy directed by their thoughts.
* Astral Dawn universe. Everything eventually dies and when people die, their energy and thoughts survive in various ways. Some remain on Earth as wandering, playful or malevolent ghosts. Others may make a pit-stop in a higher dimension on their way to being reborn. The most fortunate, however, ascend to a higher dimension called the astral plane. From here, the high spirits have dominion over time and space and can go anywhere they want. The high spirits were once just ordinary spirits who simply enjoyed their various eternal paradises. However, they eventually became more aware and took control of their worlds after the angels mysteriously vanished during a time called the Astral Dawn.
* Astral Dawn universe has this trope. Hera grew tired of Zeus's wandering eye and adultery. She boldly declared that she would spend her time away from him in the same way he had spent his time away from her. This led to Hera intentionally giving into Agamemnon's advances. However, she unexpectedly fell in love with the high spirit she had only intended to use as a means of getting back at her husband.
* Astralis would start 2018 in terrible fashion, with an early elimination at the ELEAGUE Major: Boston 2018 courtesy of eventual champions Cloud9, finishing 12th-14th.
* Astra Lost in Space. Each and every one of the kids turns out to be a clone of someone else in the story, usually the person they are raised by. It was all part of an immortality scheme for the originals.
* Astra Lost in Space that they reappear near a derelict spaceship, and the mysteries of why that singularity appeared, and why they were able to find that ship, drive the primary conflict of the series.
* astral projection, along with being capable of other small spells. Her personality is unfalteringly serene, compassionate and wise.
* Astral Projection: A spirit/soul acting elsewhere while its body lies unconscious.
* Astral Projection for certain attacks, though that leaves him vulnerable to threats designed to attack astral beings. He also has Irminsul's precognitive abilities, which he inherited from his father. By his own admission, though, he believes that his friend, Prince Crimson Star, is the better psychic among them due to embodying Psionics and being more adept with his powers. He is also dwarfed by Crimson Star's father, Golden Scepter, who also embodies Psionics but is much more ancient and powerful.
* Astral Projection separate elements, but specific disciplines of Waterbending and Earthbending developed by some tribes to better suit the areas they live in (swamps and deserts, respectively). Similarly, Waterbending is shown to include ice and snow by default since both Water Tribes are located near the poles.
* Astral Queen; they were primarily shown on the surface of Kobol, during renegade Roslin's alliance with Zarek.
* Astra Militarum is this, distracting Ork forces from one side while other Imperial forces attack elsewhere.
* Astra Militarum tank companies, Leman Russ battle tanks are described as slow and lumbering but powerful and durable. How the games rules represent this changes with the edition with the 7th Edition making it a Heavy Vehicle, allowing it to fire at full effect when moving but reducing its top speed. The 8th Edition rules on the other hand give the Leman Russ higher Toughness and Wounds characteristics than any other, non-Titanic, Astra Militarum vehicle and allow it to fire its main gun multiple times at full effect if it moves under half its, already reduced, movement distance.
* Astra Militarum, that fires a cloud of toxic chemicals capable of killing almost all infantry in a single blast.
* Astra Militarum when the Gunheads arrive. He immediately asks if the tanks can open up a corridor where he and his men can escape.
* A strange alien lie-detector appears on several episodes, which is somehow capable not only of discerning when the person is telling a lie, but also when they're lying

* A strange (and terrifying) version similar to this trope occurs in
* A strange case: Gerald Mayo was very infamous, for many reasons, in the early 1970s. You should see the number of news articles printed about him at the time; it was
* A strange example appears in the episode "Bart the Murderer", where Neil Patrick Harris plays himself, playing Bart in an
* A strange example comes from "The Savage Curtain": The Excalbian recreation of Abraham Lincoln asks if they still measure time in minutes, to which Kirk responds that they "can convert to it".
* A strange example occurs in the Cargo Room: if you haven't already followed the
* A strange example of the trope being both played Straight and Inverted in his
* A strange example of this: on Australian program Rove Live, Sacha was playing
* A strange example of this Trope is the death knights of Krynn from the
* A strange example: "The Wreck of the Relationship" is, to date, the only
* A strange friendship forms between Toph (12 years old) and Iroh (64 years old) before they realize they're both on opposite sides; Toph, who has joined the Gaang since they last saw Iroh, encounters him while having a brief falling-out with the others. And when they
* A strange inversion: Born Joseph Lane, a name that was already in use by another actor,
* A Strange Loop "gospel play," but Usher hates Tyler Perry and all his works. Finally Usher caves and says he'll do it, "but only for the money."
* A Strange Loop. Thought 3 gets to the end, where Usher turns his back to the audience, and says "That's seriously how the show ends?"
* A Strange Loop: Usher and the Thoughts (his thoughts, personified) are aware that they are in a play called A Strange Loop. Near the end, Thought 4 urges Usher to make a decision about his life and wrap things up, because the white people in the audience want to go home.
* A strangely endemic situation in the Philippines, owing to the existence of warlords and
* A strangely popular pursuit is taking one RTS game and making a total conversion mod to essentially turn it into another RTS game 'as seen through the first game's engine'. For example, there are mods that turn
* A strange mix of anterograde and retrograde amnesia is played for laughs in
* A strange mythical creature in North American folklore was the Sidehill Gouger, a mountain-dwelling creature that resembled a wild boar save for the fact that the legs on one side were much longer than the other two, allowing it to walk on steep hillsides. However, they are unable to turn, and spend their whole lives rotating the mountain in a single direction. Should two opposing Gougers meet, they must fight until one falls off.
* A strange old PC game called "How to be a Complete Bastard" (based on a book of the same name by
* A Stranger Among Us right underneath a huge "No Smoking" sign while she waits for word on her injured partner.
* A stranger case occurred in "Sons of Mars": Abraham Lincoln exchanges his immortality to Death in order to bring Jake
* A strange result of this was the case of Ink, a character who thought he had the mutant ability to simulate others' powers by getting an appropriate symbol tattooed on his body (it turned out he was a normal human - it was the tattoo artist who had super powers). One of his tattoo powers was telepathy, which he got from having lightning bolts tattooed on his head, just like the ones used to show Professor X using his powers in old school
* A strange subversion comes from the heyday of the British Empire. Although the UK military was famous for handing out floggings eagerly, it was strictly confined to British troops. This is remarkable considering the racial inequalities and tensions throughout the imperial period; in Indian service, British infantrymen could be subjected to hundreds of lashes while flogging the native sepoys was strictly forbidden.
* A strange subversion of this exists in the West Bank/Palestinian Territory, as

Israeli citizens (regardless of race or religion) fall under Israeli law, while the Palestinians who are not citizens are under martial law, especially in zones B and C. Things are kept so separate that if an Israeli soldier actually witnesses a citizen commit a crime against a Palestinian in the territory, that soldier cannot arrest the citizen but must call the police.
* A strange subversion of this trope is used in the Doctor's regeneration in
* A strange thing about Apu is that while he has been criticized by Indian-Americans or rather South Asian Americans (since even Pakistanis and Bangladeshis who aren't Indians are confused for the stereotype and accent), Apu is well-liked in India itself for the fact that Apu was one of the few Indian-origin characters in American TV, and that he was in the context of his time, non-stereotypical i.e. not defined entirely by religion, not overtly submissive, and generally shown with the same flaws and quirks as any Springfielder, compared to most Indian characters in Western media.
* As Transformers don't reproduce sexually, there are no taboos or stereotypes regarding sexuality or gender. Two Transformers of the same gender being in a relationship is not viewed as any different to two of the opposite gender being together.
* Astra, received very little promotion from Geffen Records at the time of release. Keyboardist Geoff Downes claims it was because of distribution changes the label was going through in Europe at the time, and the album's release happened to be caught in the middle of it. The album's sales disappointed as a result, and it would cause Asia's lineup to become splintered for over two decades afterword.
* Astray3, Fidolus has a machine gun instead of legs. He's not happy about this.
* Astray3 has bird-like creatures usable as mounts as well as a whirling bug creature that pulls carts.
* Astray3. Water is an acid (technically) in real life, but to them, a gulp of water is like a gulp of etching solution would be to us.
* Astray Blue Frame Second L and a Gatling gun. For the latter, the blades serve as a bipod for the Gatling gun.
* Astray series have shown off other imperfect Coordinators. Recurring character Elijah Kiel of Serpent Tail ended up coming out without the usual superior physiology of a Coordinator and only became a competent pilot once he joined the mercenary team. Another minor character, ZAFT test pilot Riika Sheder, has very poor eyesight and must wear a pair of glasses.
* AstraZeneca has entire ads built around this, with fancy and science-looking CGI effects designed to evoke concepts of blocking proton pumps in the background as words like "clinical strength" or "proven effectiveness" are bandied around without a whole lot of meaningful information.
* A Streetcar Named Desire and after Stanley tears off the paper lantern.
* A Streetcar Named Desire and then lies that he never once touched her afterward.
* A Streetcar Named Desire, a young newspaper fee collector receives a sudden kiss from Blanche, for no reason that to further establish her ephebophilia.
* A Streetcar Named Desire becoming the dominant school, for better and worse.
* A Streetcar Named Desire, Blanche's story about her ex-husband's suicide changes from homosexuality (as in the play by Tennessee Williams) to "weakness".
* A Streetcar Named Desire, Blanche tries to cheer up Stanley and Stella by telling them a story about "a parrot that cursed a blue streak and knew more vulgar expressions than Mr. Kowalski." They are not amused.
* A Streetcar Named Desire, but Blanche, who's already a little nutty, has a total breakdown instead and falls into permanent insanity. It really is as heartbreaking and disturbing as it sounds.
* A Streetcar Named Desire chooses to stay with Stanley, who is violent, abusive, and beneath her social class. She reasons that what goes on between the sheets makes everything unimportant. Even her sister Blanche flirts with him.
* A Streetcar Named Desire for not having roles despite Hutz himself playing Mitch.
* A Streetcar Named Desire has Stella on the receiving end of this from her husband Stanley, which she explains away.
* A Streetcar Named Desire, he explicitly cited the "Simpsons scenario" ("Stella,

Stella, can't you hear me yell-a?") as an instance of what he tried to avoid; its libretto simply sets the original text of the play to music.
* A Streetcar Named Desire implies very strongly that Blanche's former husband was a closeted homosexual. It was flat-out stated in the play.
* A Streetcar Named Desire involved Stanley dunking a radio through a window.
* A Streetcar Named Desire is a deconstruction of this type of story, questioning why Stanley needs to see Blanche brought down. It's because he's a bully who can't stand the fact that, after all that's already happened to her, she's still an idealist.
* A Streetcar Named Desire keeps New Orleans as the setting but updates it to the post-Katrina present.
* A Streetcar Named Desire, Mitch is Blanche's last chance for a normal life. Just when their relationship is going steady, Stanley intervenes, leading to Mitch denouncing Blanche.
* A Streetcar Named Desire screams "STELLAAAAAAAAAAA" at one point in the game in a very over the top manner.
* A Streetcar Named Desire she takes a really long one. Only at this point she's too permanently traumatized for the bath to be much help.
* A Streetcar Named Desire: Stella towards Stanley though it crosses the line when he's violent towards other people.
* A Streetcar Named Desire the Varsouvania Polka is an example of this, showing up every time Blanche loses her mind a little more.
* "A Streetcar Named Marge" being a horrid, run-down hellhole. The episode also angered residents of New Orleans on original airing, prompting an apology in Bart's chalkboard punishment the following episode.
* "A Streetcar Named Marge" opens with the family watching a pageant which cleverly re-purposes Janis Ian's "At Seventeen" as its theme.
* A Street Through Time, the page dedicated to the 1500's is titled "The Plague Strikes!" Illustrations show guards armed with crossbows on the city bridge — they've been posted there to prevent the spread of the plague through any means necessary.
* Astreiant: The planet on which the novels are set orbits the larger star of a binary system. The inhabitants call the smaller star the Winter-Sun.
* A stretch due the short period of time, but the Norma living in Aura lived a period of peace away from the fighting.
* Astrid Ellison is the absolute Queen of this trope. Many characters (most notably Howard, Quinn and on occasion even her boyfriend Sam), have called her out on being too expressive with her knowledge. Many of the Perdido Beach kids end up resenting her for it, and even the fandom has an Astrid hate club on Facebook. (On the other hand, she has many militant fans too).
* Astrid Gaiden ends with Astrid accepting Mabel's offer to train under her.
* Astrid has a habit of brushing back her bangs, but only around Hiccup. She also has the habit of deliberately injuring (or sometimes, kissing) Hiccup and saying, "That's for (
* Astrid is initially set up as a competitive student who's determined to ace Gobber's training and become a fully fledged Viking. Hiccup's aversion to fighting irritates her and his sudden improvement makes her suspect foul play, resulting in her following him into the forest to find out what his secret is. After their first romantic encounter, she becomes much more subdued, existing solely to provide Hiccup with support and advice.
* Astrid Leong, a rich, fashionable, and beautiful heiress coming from
* Astrid Lindgren although no one dies, and the kids aren't exactly romantically involved.
* Astrid Lindgren, and she would (mostly) remain faithful to them for the rest of her career. And it was a good career too, as she became one of Sweden's most-loved writers of children's literature.
* Astrid Lindgren, drawing enough attention for Sweden to do a very thorough reworking of its tax agencies.
* Astrid Lindgren, opera singer Birgit Nilsson and diplomat, politician, General-

Secretary of the UN and all-around national hero Dag Hammaskjöld. He was given the spot since a collection of his poetry was found and posthumously published, thus technically making him an author.
* Astrid Lindgren's books, Astrid would often step in and narrate the stories, reading selected quotes from her original books.
* Astrid Lindgren. The trader tries to back out of the deal, but the crowd forces him to keep his word.
* Astrid Lindgren, this happens to Karl Lionheart. He overhears some of the bad guys talking at their campfire, while hiding in a cave. In reality he can hear quite a lot. When they find him the next morning, he claims to have slept all night and not heard anything. "You can't be serious", says one of the bad guys, "have you really not heard anything of our partying and singing last night?" Karl squirms: "Well, maybe I sorta heard you sing a bit" - and they release him to (what they think is) his home.
* Astrid Lindgren was herself a Daddy's girl to her father Samuel August, and quite a few of her characters are this too.
* Astrid Lindgren when her daughter, who was sick with pneumonia at the time, wanted to hear a story about a character with that name.
* Astrid says this in a roundabout way to Hiccup when she explains why she asked her
* Astrid's cousin Nick is a male version. He's second in line (after his father) to their family's fortune while his girlfriend
* A strikingly realistic depiction of a gravity turn, a real-world technique for achieving a stable orbit, appears in
* A striking point...the people who made the game showed us part of how you would die if you were within about 3 miles of ground zero and not vaped in the blast. Yes folks, expect your death to include barfing your organs out in your last moments on earth to the sound of radioactive wind blowing away the last of your Organ of Corti, that is, the organ that does the actual hearing in your ears.
* A string of tragedies and scandals that followed the cast and crew of
* A String Of Words: Chapter nine, "summon", involves Trent buying an old book supposedly used for "communing with the forces of Hell", though he doesn't believe it. After a few drinks, he and the rest of the band accidentally end up summoning a demon for real.
* a strip and still has time to catch her drink before it hits the ground.
* A strip by Joan Cornellà had a boy's mother catch her son watching porn, then smiling approvingly after getting him to watch a video of
* A strip from 2000 has Paige channel-surfing very slowly, to the point that Peter grabs the remote and start channel-surfing very quickly, saying "
* a strip from: Greg learns that he and his wife are going to have a daughter, and instantly starts making a mental checklist of things he'll need in order to prepare ("They sell single-barrel shotguns at Wal-Mart, right?")
* A strip from has the title character giving Krampus cookies while her friends run in terror.
* a strip from like the modern conception of what dinosaurs looked like.
* a strip from makes it funnier: "I just wanted to talk about your poor smoke-bomb techniques."
* A strip had Garfield finding things in the couch, such as a pencil, some change, a comb, and a fork before finding the remote control.
* A strip has a human standing in an alien bar and being completely baffled by the bizarre symbols on the restroom doors.
* A strip has Calvin roller-skating down a hill and not knowing how to stop. Of course, taking that suggestion from Hobbes about steering into a gravel driveway isn't all that helpful.
* A strip has Jeremy bring drinks so big his mom flips out. When she asks why he bought such huge drinks, his response is "
* A strip in October 2015 featured Cooper looking at a Halloween display on one side of the store and a Christmas display on the other, and commenting that
* a strip, Joyce and Dina use a more specific version to pretend to be Jason.

* a strip, Luigi denies knowing Daisy, only to be found out when she calls him by his name.
* a strip. Not only does Wildy stare at her wrist while not wearing a watch, she claims to be in a hurry because "It's leaving o'clock!"
* a strip of, Peter claims to have spent his youth playing 1980s LCD games, even though he was born 20 years too late to have done so.
* a strip of, T-rex and Utahraptor enter a talent show with a performance of "Push It" in "the original french".
* a strip of, two goblins disguise themselves as a human teacher, using this method.
* A strip once featured a random media watchdog badgering Milo to listen to a Billy Joel song backwards to discover its hidden "evil message." Milo does so, and promptly recounts the message, "No matter how thin you slice it, it's still baloney." ("A Satanic riddle!!")
* A stripper named Cynthia Hess a.k.a. Chesty Love once filed augmentation surgery that left her with a 56FF bust as a business expense on her taxes. When the IRS disagreed, she took the matter to court and defended herself by saying that the surgery was to help bring in better tips. She won the case after she becomes the rare person to fulfill all three prongs of the rule for a business deduction. She showed that 1) the breast enhancement (H cup) was too big for non-business/personal use, 2) that they only had a business use. She showed that she had to wear a specially made bra and spent her non-working hours in bed or sitting because they caused pain, and 3) she had the implants removed after she finished her career as a stripper.
* a strip: Spitfire gives Soarin a motivation to fly by dangling a pie before him.
* a strip. This is a parody of a real-life sentiment among the Nazi Party (see below).
* a strip where Linus asks Lucy about what would happen if a baby was in heaven waiting to be born but its parents decided that they didn't want any more children. Lucy decries his theological and medical ignorance. It was meant to be a parody of people who ask really weird hypothetical questions, but people on both sides of the abortion debate seized on it as proof that Schulz supported them and asked him if they could have permission to reprint it in their literature. He said no. It may or may not be coincidence that Rerun, younger brother to Lucy and Linus, was born a few years later.
* a strip, where the idea warranting a lightbulb is to use the lit bulb to see in the dark.
* A strobe light easily demonstrates this. If you can't get one, blinking your eyes
* Astro Blaster can have you lose the entire game if you crash into the mothership during the docking sequence at the end of every level.
* Astro Blaster has the player's ship flying through a meteor shower at the end of each level.
* Astroboy (2009): The title character does a scene like this, even though he realizes it could give away he's a robot.
* Astro Boy, about alien refugees from a destroyed planet almost identical to Earth, had a similar premise, though in this version both versions of Tobio had died but the alien Dr. Tenma was never able to create a robot version because he was working on the evacuation ships instead.
* Astro Boy and a way to distinguish if someone is good or evil, Professor Ochanomizu will ignore his cries that someone is up to something evil, and when Astro tries to stop them on his own, he will be yelled at despite his consistent track record of stopping evil.
* Astro Boy, and perfectly summarizes how both lonely and delusional he is.
* Astro Boy and was actually firing at the communications antenna that would relay the remote detonator's signal.
* Astro Boy anime, a thief and real estate mogul are trapped on the Moon with Astro. The thief berates the businessman in an argument, saying that at least he's an honest crook who has the decency to break the law when he robs people.

* Astro Boy anime episode "The Light Ray Robot" Astro does this with Denko so Denko will help people.
* Astro Boy arc, we see Astro's demise - which is directly linked to his birth.
* Astro Boy are still being produced, over 20 years after the man's death.
* Astro Boy are two of the most iconic and historically important anime in Japan. In other countries though, they get scoffed at due to their cute, Disney-inspired aesthetic and Western styling. Some people don't even think they're anime at first.
* Astro Boy argued as far as he was concerned, the soul or spirit of the being always endures, even it if is mechanized.
* Astro Boy a sentient race of dolphin people threaten war on humanity if they keep developing on their land.
* Astro Boy. Astro had to rescue him and his friends when they decided to ride on an under-construction rocket coaster.
* Astro Boy: Astro's spiked hair is one of the most iconic haircuts in anime.
* Astro Boy by having him simply retool an existing "ultimate robot" model to look like his son, or claim that he will not only make his son a robot, but the "best robot ever".
* Astro Boy called Nuka) but that's because he was a nuclear powered robot. The effects of nuclear energy on humans however are portrayed fairly realistically. One story "The Coral Reef Adventure" for example, involves nuclear testing in the Pacific and features animals & people who are hideously deformed & dying due to radiation.
* Astro Boy episode "Mission to Mars" features starfish-like aliens with four extremities.
* Astro Boy featured a sport called "Rocket Ball" being played by robot players.
* Astro Boy features a race of aliens resembling grasshoppers whose social structure is somewhat extrapolated from grasshopper behavior. For example, it's perfectly legal for them to fight to the death over a mate.
* Astro Boy he eventually shuts down due to the fuel he runs on not having been invented yet. He winds up at the bottom of the Mekong river and isn't found for decades, but a quick refill has him up and about again with no difficulty (though he was in a box at the time). When he runs out of fuel a second time due to its prohibitive cost, though, he falls down on a mountain and by the time his "birth" comes around again he is nothing more than a rusted-out shell.
* Astro Boy his friends catch him out of the air in a flying car. They all start asking if he's okay. Then he wonders who's driving. Cut to the robot dog at the steering wheel.
* Astro Boy in Japan). In short, Tezuka is the reigning king of this trope.
* Astro Boy in the 2003 series. Before that, he had rocket hands, but rarely used them, as his weapon of choice was instead a pair of machine guns that popped out of his tush.
* Astro Boy is an incredibly iconic anime... It's just most people only know of it, and haven't actually watched any of the anime (or read the manga).
* Astro Boy is Astro's arsenal. One of his staple weapons, aside from the small laser guns in his fingertips (and the infamous machine gun barrels in his butt), is turning his arms into laser cannons.
* Astro Boy). Later stories went a little crazy with the alien invaders, though.
* Astro Boy: Most versions of the story (including the Manga and TV shows) had Tobio/Toby, the basis for Astro, die in a car crash. The animated film has Toby vaporized by an out of control military robot.
* Astro Boy of the island he crashed on, killing everything for miles around with the poison gas meant to be the planet's new atmosphere. Although in Garon's case it's not really hostile, as he was only doing what he was programmed to do before the space mail order package he was in crashed on Earth by accident instead of the planet he was supposed to help his owners colonize.
* Astro Boy: Omega Factor and supported by the World's Strongest Robots, and in both cases Astro fights against them.
* Astro Boy: Omega Factor just pulls in another copy from another timeline, triggering one of Astro's friends to step in and keep it busy so he can move on.

* Astro Boy: Omega Factor, you have the Arm Cannon (mentioned above in regards to the Astro Boy anime & manga series), which, when fully upgraded, has an area that takes up around half the screen. The game even identifies this in the introductory stage as Astro's strongest weapon.
* Astro Boy: One episode has "Yellow Horse", an intravenous drug made from "Space Dust" that causes euphoria & compulsive dancing followed by horrible withdrawal pains. The gang that created it, the bizarre Phantom Club (a group of mostly space colonists dressed up in ridiculous ghost costumes), in typical over the top cartoon villain fashion, apparently intended to get the entire population of Earth addicted so they could take over the world.
* Astro Boy over the death of his son, announces his plans to create a robotic son.
* Astro Boy series' episode order has been completely ignored for all English broadcast and home video releases, with some of the very last episodes airing among the first, and some of the very first episodes airing among the last. Fortunately, the very first and last episodes remained the same.
* Astro Boy's head is apparently not that well attached, judging by the frequency of which it detaches. Though it's stated that his electronic brain is in his chest and not his head, which is just for talking, hearing, and sight.
* Astro Boy, since it's too old to be affected by the anti-tech shields surrounding the prison he was in.
* Astro Boy's re-take on one of the story arcs in the original manga, has Gesicht filling in both the detective and the robot role.
* Astro Boy's Star System. He is also know as "Old Man Moustache" or "Dr. Walrus".
* Astro Boy story "The Greatest Robot In The World" not only chews scenery figuratively, but in one scene he does it literally.
* Astro Boy-style to get a piece of scrap metal containing the AI of Astro's love interest into the sun so she can stop the pieces that have already fallen in from causing a chain reaction that'll destroy the solar system.
* Astro Boy's younger sister Uran seems to have this kind of relationship with the giant robot Pluto in at least one of the alternate timelines in
* Astro Boy that helpfully includes both "Atom" (his Japanese name) and "Astro" (his English name).
* Astro Boy. That's not just a crass joke tacked onto the 2009 CGI movie; it dates back to the original manga.
* Astro Boy, the big robot at the beginning makes the Fighting-Machine's "ping-ing-ing-ing..." sound.
* Astro Boy; the chorus of children sing "What can I do, to be like you, and become a real Astroboy?"
* Astro Boy, the power goes out in the floating city during the climactic fight, which causes it to start falling. Astro slows down the fall enough to avoid a catastrophe.
* Astro Boy, there was a cyborg (half human, half robot) that was detested by both the robots and the humans, back when they weren't on so good terms. He resented that, and plotted revenge.
* Astro Boy, the rocket boots activate under similar circumstances, while his weaponry activates in moments of crisis during the final battle.
* Astro Boy, the three robots' underground hideout is marked by a garishly painted sign.
* Astro Boy), they gave it a chance on Syndication and it was quite successful for them.
* Astro Boy, Toby was killed by the Peacekeeper after being trapped in containment with it.
* Astro Boy treatment that will supposedly turn him into a human. Also subverted in that the villain of the piece is trying to steal the titular jewel so he can pay for an operation to become a cyborg.
* Astro Boy two-parter "The World's Strongest Robot", after grabbing onto Pluto's horns.
* Astro Boy were routine. When that date rolled around, the flying cars and robots were absent, but we did get a new television series, first broadcast on that exact

date in Japan. At the very least, the Japanese government granted full citizenship to Astro Boy.
* Astro Boy. What's interesting is that he comes to accept his differences and decides being the best robot he can be is better than trying to be a fake human.
* Astro Boy. When the day of Astro's original creation rolled around, Dr Tenma's first attempt to activate him failed for no technical reason because the universe couldn't contain two Astros.
* Astro Boy, which addresses the ridiculousness of his various built-in gadgets by giving him a highly modular construction that reconfigures itself in response to danger. He gains his iconic rocket boots after tripping and falling out the window of a high rise office tower.
* Astro Boy. While Hitlini is still portrayed as a dangerous dictator, he also constantly trips over himself and consistently makes a fool out of himself.
* Astro Boy, who also defined the style of manga and anime for decades with it and other works.
* Astro City #2. Astra's boyfriend tries to persuade her to indulge, leading to this exchange:
* Astro City: According to Jerome Isaac "Ike" Johnson, he's not the genius his father and grandfather were, though he's perfectly intelligent in his own right.
* Astro City. A cyborg monster hunter whose missing body parts were destroyed by occult creatures, Chalk makes quite an impression for a character who was only 'on screen' for a handful of panels.
* Astro City after the Mock Turtle is killed, one issue after being introduced.
* Astro City a mid-level telekinetic who briefly considered becoming a super-heroine with the codename "Mind Over Maddie".
* Astro City and prevent King-In-Chains from breaking through the dimensional barriers and menacing Earth, Samaritan acknowledges Chibi's heroism by making her a full-fledged member of Honor Guard.
* Astro City are a brother/sister martial arts team who can summon a giant dragon by lining their arms together.
* Astro City as a background reference. Check out how extensive the main works page (and its various sub-pages) is.
* Astro City Astra Furst says her specially-prepared synthetic breakfast tastes "manganese-flavor," after her mother tells her it is supposed to be grape-flavor. Still, if anyone is going to know what manganese tastes like, it's probably Astra.
* Astro City: Aubrey Jason was already evil to begin with, but later acquires dark energy powers to become Lord Sovereign.
* Astro City because she would have tried to stifle her dreams for him.
* Astro City, beings described as "myths whos believers have died out" manipulated the subconscious mind of a video-game designer Marguerite Li, compelling her to create a new game, only for the Unbodied to take the forms of villains of the game to attack the heroes of Astro City. By coercing Li to create this game, they ended up also creating their own worst enemy, the heroine of the game, American Chibi.
* Astro City, both in the story and prominently on the cover, when Astra runs away from the First Family.
* Astro City, both the Silver Brain and Lord Sovereign can read the thoughts of people nearby. The First Family are able to use electronic dampeners to stop the Silver Brain's attempts.
* Astro City can control and weld the mysterious dark energies that empower him.
* Astro City centers on Winged Victory being falsely accused of masterminding villainous activities to promote a pro-feminism agenda.
* Astro City character The Steel-Jacketed Man, who later shortened his name to Steeljack.
* Astro City: Crackerjack laments that his on and off ladyfriend Quarrel is mad at him for flirting with other women, as he flirts with Nightingale.
* Astro City event. The Hanged Man offers to erase the memories for him, but he refuses. Before leaving The Hanged Man reveals that he's offered this service to numerous people who suffered similar losses, and that so far no one has taken him up on his offer.

* Astro City features an animated lion character, Loony Leo, coming to life and discovering the ups and downs of Hollywood stardom.
* Astro City flashback stories use framing devices of one of the participants telling of their experiences many years later, notably "Shining Armor" and "The Dark Ages".
* Astro City gorillas live under this because they live under a rift in reality.
* Astro City had some sort of time-related powers, which got him sent back to his own time. He discovered that he'd succeeded in his mission and that the future was now one where humanity was thriving, but the changes he'd made were so extensive that he'd become a temporal anomaly — the rest of his family were never born, and what was his home had become a taco stand.
* Astro City had The Twin Dragons, a brother-sister martial arts team. Each sibling had a dragon tattooed along one arm; when put together, the two summoned a spiritual dragon to attack their foes.
* Astro City has a superhero called the Old Soldier, who seems to turn up whenever America needs him most. He was seen in combat in 1812, 1862, 1915 and 1942. However he stood against American soldiers in Vietnam, which was a massive propaganda loss for Richard Nixon and was seen as a general sign that times were getting worse.
* Astro City has Pyramid, a recurring worldwide organization with an Egyptian theme.
* Astro City has Sticks, an intelligent gorilla who abandoned his militaristic gorilla nation to pursue a dream of becoming a rock drummer. Regarding Sticks' first appearance, Kurt Busiek commented, "I've always said that a superhero universe that doesn't have talking gorillas in it simply isn't finished yet, so it's good to get such an essential element established here, after almost twenty years."
* Astro City has the Broken Man, a (possibly) insane being who directly addresses the readers to enlist them in his quest against the Oubor.
* Astro City has the cosmic-powered superhero, Starfighter, who retires from heroics and writes about his past adventures as a hobby.
* Astro City, has this as his theme. After being forced to retire, he decided to show the world the foolishness of throwing things away. He robs a bank with toy soldiers made into miniature robots, an Etch-a-Sketch repurposed as a fluoroscope, and other equally recycled equipment.
* Astro City, he has this effect on the citizens, stirring up the sparks of love in the hearts of those around him.
* Astro City hero) appears to the man, explains the situation, and then gives him a choice: he can either have all his memories of her erased so that he'll no longer be haunted, or he can continue to remember the perfect, pure love of his life — knowing full well that he'll never get to experience it. The man chooses to remember. When the Hanged Man excuses himself and says that he has others to visit, the man asks:
* Astro City hoping to impress the heroes and become a sidekick, and he hadn't been working there as long as them.
* Astro City: Infidel uses magic to replicate technological functions, including audio/video recordings of events and artificial servants.
* Astro City. In his world view all crimes, from murder to jaywalking, warrant the same punishment: death.
* Astro City: In "Pastoral", Team Carnivore tells Roustabout that their bosses will take him apart to figure out how their experiments worked on him.
* Astro City. In the last, the knight speaks to him; it appears that he was controlling it.
* Astro City, invoked by name by a police officer forced to retire — he didn't look up a superhero he had known because he didn't want to be two old men bragging about their glory days. The superhero, who really had retired because he no longer had it, helps him come to grips with it.
* Astro City, Irene Merriweather's fanatical obsession with proving her coworker Adam Peterson is Atomicus (due to being under the impression that this was a game that she was supposed to win and prove herself to him) drove Atomicus to leave

Earth forever, because "if this is humanity, I don't want any part in it!" Of course, Atomicus was technically a child in a man's body, born just a year or so before; the glint in his eye that she interpreted as a dare was actually him trying to communicate fear of a world that he doesn't understand. As she would later put it, "I chased him, so he ran."
* Astro City Irregulars, whose bombastic proportions are evidently a side effect of his powers.
* Astro City is an adult-sized robot replica of a popular children's toy. She fights crime even as she wonders about her own enigmatic origins.
* Astro City is an outspoken advocate of women's rights and equality and predictably draws controversy to herself as a result. She flies into battle with a broadsword and full armor.
* Astro City is a time-traveler who averted a catastrophe, but rewrote his history so that he has no place in the future. Also Infidel, Samaritan's arch nemesis, is a time-lost villain whose own timeline was inadvertently destroyed by Samaritan's actions. Interestingly, neither of them has much trouble adjusting.
* Astro City is backed by the Council of Nike, a worldwide psychic network of thousands of women. Their unified goal is to help women everywhere, with Winged Victory being a vessel for their collective power. She becomes considerably weakened when they question her devotion to the cause.
* Astro City is convicted of murdering supervillain Mad Maharajah. Not only is it proven that Mad Maharajah not only framed Silver Agent, but he had also faked his death entirely. Moreover, due to time-traveling shenanigans, Silver Agent would go on to save the City repeatedly after his death, but still voluntarily went back to the past knowing he will be executed for fear of affecting the timeline. Upon learning what they had done, a statue of him is built with the inscription "To Our Eternal Shame".
* Astro City is implied to be this. It's an energy field that is implied to be attracted to (or induces) feelings of vengeance and malevolence in others, and can empower beings like The Pale Horseman and Lord Soverign with paranormal abilities.
* Astro City is willing to frame his ex-girlfriend as being a mass murderer simply because he's never forgiven her for marrying someone else.
* Astro City it at least once. Unfortunately, he has been involved in so many historic events (including several in the future) that his longtime enemy Samaritan has been unable to come up with a punishment that would suit the crime without damaging the timeline. On the other hand, Infidel has been unable to find a way to kill Samaritan without causing similar damage. As a result, they've been at an impasse for years, so Infidel has agreed to go into retirement in a pocket dimension, while Samaritan agrees not to interfere with whatever he does there... for now, anyway.
* Astro City, late in Volume 4 we see that Michael Teniceck from "The Nearness Of You" now runs "Miranda's Friends", a support group for people who have lost loved ones in superpowered struggles.
* Astro City legal system, some superheroes make a living by registering as bounty hunters with the local authorities. They are sanctioned to capture criminals (super-powered and otherwise), and are paid by picking up checks made out to their real identities (which are kept secret from the public).
* Astro City. Leo then spent a few years as an actor before his career hit the skids.
* Astro City Loony Leo. It's noted that it doesn't particularly matter how good the food, drink, or entertainment is; the novelty of going to a restaurant owned by a cartoon character is plenty.
* Astro City mainstay The Hanged Man has a body that is a featureless silhouette.
* Astro City, Manny Monkton is abducted along with the entire building he was in, leaving a neat hole where the basement was, and never seen again. He really should not have made up stories about cosmic entities.
* Astro City — and he actually tells the audience the kinds of things he'd have thought of back in the day — he simply beats it to death, ploughing through six residential city blocks in the process. Afterward, he shouts at the

policeman who thanks him for his help, telling him to look at the destruction and claim that his actions actually helped anything.
* Astro City, mention is made of the time Supersonic simply revived at the morgue despite being to all medical appearances 100% dead. A lawyer uses this as precedent to suggest that the woman his client "killed" could have been still alive before her autopsy was performed.
* Astro City. Mercifully, Hanged Man manages to give the poor guy some peace of mind by explaining this, but it’s no less horrifying.
* Astro City; much of the plot hinges on subverting and lampshade hanging this very trope.
* Astro City needs a piece of the Sekmeht Stone to contain and focus his energy powers.
* Astro City of Tawky Tawny. A Golden Age theatrical cartoon character brought to life by a mad scientist's machine, he's had a rough time of it, but seems to be getting by okay these days.
* Astro City, other characters appeared, including the Blue Knight, the Street Angel, Hellhound, Stone Cold, and the Pale Rider.
* Astro City par excellence but has found that, between his age and his many blows to the head, he's no longer able to think of a tactic more complicated than crushing his opponent with pure brute strength.
* Astro City: Plenty of characters simply vanish from the timeline with no obvious cause. Given the difficult line of work they live in and the lack of Comic-Book Time, it's not quite clear if they've died in battle or simply retired.
* Astro City premiere detective, the Black Rapier, battles foes with an electric rapier.
* Astro City Pyramid has aspects of this, with their worship of the living Sekhmet Stone that leads them.
* Astro City Pyramid have ranks named after animals native to the Egyptian deserts.
* Astro City Pyramid is believed to be this, running schemes that go back centuries if not even further.
* Astro City Pyramid typically wear helmets that partially or completely cover their faces.
* Astro City refines this to a fine art. An early issue had a recent immigrant to the town (from Chicago) witness to an attack by a gigantic storm elemental. Heading to the roof to watch the fight between the monster and all of the town's superheroes, he sees a bunch of the people in his building have gathered. When he asks one woman where her kids are, she tells him that they're working on their homework. Since if the city isn't destroyed, there'll still be school tomorrow. This almost terrifies him into leaving town the next day, but when he sees how quickly the place is cleaned up and how everyone pitches in, it charms him into staying.
* Astro City, Samaritan uses the alias Asa Martin in order to maintain a cover identity. Granted, he only bothers with the civilian identity because he needs regular access to an Internet connection in order to run the alien computer that keeps him up-to-date with the world's crises.
* Astro City's Dark Ages arc has a huge, colorful demon inside him. When it comes out, well, the demon isn't one of the good guys.
* Astro City; she realizes that the Unbodied helped create her from the subconscious of computer game designer Marguerite Li as part of a plan to invade the Earth from their dimension, so she decides to stay to fight them on their own turf in order to foil their invasion plans. The Assemblyman is working on a transdimensional communicator so she can contact Honor Guard, and Li is writing additional code into the game to provide Chibi with friends and allies and give her every advantage she can.
* Astro City, Silver Agent's first girlfriend got over him and married his brother.
* Astro City some of Honor Guard's members technically count, as the team has a stipend available (via N.R.Gistics) for those who need financial support to offset their time being heroes.
* Astro City Steeljack didn't like associating with him even before all this came

to light, but because Ferguson didn't have a record he was one of the very few people he knew with whom he could freely mingle without violating his parole. He never gets what's coming to him, but he's not the same man after the Conquistador incident, either.
* Astro City stories are more character studies than they are superhero epics.
* Astro City story "A Little Knowledge", a small-time crook discovers the secret identity of local crimefighter Jack-In-The-Box. As he tries to figure out how to use this for his gain, he becomes worried that his colleagues will also find out... and screw him out of the proceeds.
* Astro City story "A Little Knowledge", when a small-time crook discovers the secret identity of local crimefighter Jack-In-The-Box. He considers getting rich by selling the information to a local crime lord, then realizes that his life could be forfeit once the deal is complete.
* Astro City story arc, "The Dark Ages," with Charles and Royal Williams spending years on a vendetta against the man who killed their parents twenty years ago.
* Astro City story arc "The Tarnished Angel", Steeljack finds that almost all of his fellow low-rent supervillain peers are constantly lining up for that one last job, the one that will lead them to greatness and riches... but it never works out.
* Astro City story featured an actor who played the superhero "Crimson Cougar" on a soap opera. After he foils a convenience-store robbery while in costume, people start treating him like a real superhero... including supervillains out to kill him.
* Astro City story featured Mitch Goodman, a soap opera actor playing a superhero who foiled a convenience store robbery. He rode the ensuing publicity to promote his acting career, but things turn sour when he soon becomes targeted by real supervillains.
* Astro City story involves a man who is haunted by dreams of a woman he can't remember ever meeting, but whom he somehow knows intimately. At his wit's end, he finally gets an audience with the supernatural Hanged Man, who informs him that the woman was his wife in a previous continuity. Thanks to a time-travelling supervillain, history was changed just enough that her parents never met and she was never born, and thus she never met him, let alone married him.
* Astro City story "Pastoral", Cammie's younger cousin, bubbly and enthusiastic, wears her hair in twin braids.
* Astro City story "Pastoral", not all of Roustabout's backstory — treated in-story as speculation — comes up, but enough does that Cammie realizes he may have told the truth all along.
* Astro City story "Pastoral", Roustabout claimed to be the sole survivor of a group of kidnapped experimental subjects.
* Astro City story "Pastoral", Roustabout escaped the experimenters who made him superhuman and killed the rest of their subjects. Team Carnivore, their apparent next attempt, came to track him down because they were not so successful, and their bosses hope to take him apart and learn the trick.
* Astro City story "Pastoral", Team Carnivore wants to flush the hero Roustabout out, so they arrive at the carnival and start to menace the crowds there, including threats of violence if he doesn't show up.
* Astro City story "Sorrowsday" introduces the Moleculands, an entire set of microscoping realities like Subatomia and the Quarkrealms.
* Astro City story, "The Nearness of You", averts the trope. A man is haunted by dreams of a woman that he has never met; he knows her well enough to draw her picture, yet utterly fails to track her down. A supernatural character explains to him that the woman is/was his beloved wife, erased in a time-war, and offers to erase his residual memories of her; he declines, and is told that "no one forgets".
* Astro City superheroes. One thing that confuses him about his "dream girl" is that she really isn't what he would normally think of as his type; one of his friends notes the same thing about his own wife.
* Astro City Supersonic is brought out of retirement by a nostalgic old friend, but proves to be a shadow of his former self. Thanks to a combination of senility and lack of practice leaving him unable to use the clever and silver-age-y tricks he

preferred during his career, Supersonic is reduced to wailing on his enemy until it stays down, causing massive collateral damage in the process.
* Astro City's use of these creates problems: namely, while their "translation field" does affect those in close proximity, it doesn't go through recordings or broadcasts. This means that the Zirr Empire can easily manipulate footage of the Family for propaganda purposes, since almost nobody in the Empire speaks English. The spotlight character of the issue, an alien boy who learned the language through a chance encounter, watches a propaganda broadcast that proclaims the Family was defeated before being graciously and mercifully exiled by their Emperor despite their unprovoked attack, when in reality, the Zirr attacked the Family and the Family crushed their army in retaliation before leaving once they had what they needed.
* Astro City, tearing a hole in reality and leaving the gun unavailable for future use.
* Astro City the Agent still uses time travel to repeatedly return to the city and save it through several major crises, and his selfless sacrifice shames the citizenry for decades.
* Astro City the brilliant Mock Turtle is blinded by love for his childhood sweetheart Lucia, who he constantly imagines as an innocent girl to be sheltered from his roguish life. She, in turn, easily exploits his intellect and engineering talents for her own gain.
* Astro City. The city is frequently attacked by hundred-foot-tall monsters or rampaging gods, but most collateral damage either occurs off-screen or with scenes showing heroes rescuing civilians. Most aftermath is limited to broken windows and litter in the streets, and the residents take this all in stride, praising the city's robust public works services.
* Astro City: The Deathwalker robots, made by mad South Korean scientists in the 50s. Steeljack dryly notes that even if they weren't lumbering, entirely black death-robots, the name would still be a hint as to what they're like.
* Astro City: The Honor Guard shows up after Steeljack puts the villain out of commission, and just get to lug him off to prison and send for an ambulance for Steeljack.
* Astro City, the Junkman has trick marbles that are attracted to a target and adhere to him. The more the target tries to dislodge, the faster he attracts them.
* Astro City, the main crime syndicate is run by The Deacon. The "Dark Ages" story arc included a gang war between groups led by The Deuce, Bamboo, and Josef "The Platypus" Platapopulous.
* Astro City: Theoretically, this applies to PYRAMID, an international terrorist organization bent on world domination, who recruit from all races, nationalities and genders, the only prerequisite being that said recruit is enough of a social malcontent. Practically however, PYRAMID is implied to be both ageist and ableist, as they have no use for anyone who isn't physically fit enough for combat, and murder any recruit who do not pass their fitness tests to avoid security leaks.
* Astro City, the original Confessor wears a cross on his costume, which leaves him in constant pain because he's a vampire. He does this because he's a fallen priest who acts as a superhero for penance.
* Astro City. They do it so well that Cammie feels like they are in a Masquerade that only she can see through.
* Astro City), they get Roustabout convicted of breaking and entering.
* Astro City, this is the reason Silver Agent gave to his first girlfriend. It was a lie; actually, he was sterile, but knew if he told her that, she would try to stifle her dreams for him.
* Astro City to the heroine Winged Victory, his goal is to defeat her and assert the inherent superiority of men over women.
* Astro City tracks the effects of the end of the Silver Age on Astro City, as exemplified by the Silver Agent being put on trial and sentenced to death in a cynical ploy to distract the public from the failed Vietnam War and the Watergate scandal.
* Astro City: used by Atomicus, who developed a power to duplicate himself and

almost immediately used it to try to conceal his (rather obvious) secret identity.
* Astro City. Variations include a superpower-making scientist's body being recovered after being killed by a darkness-powered hero, Steeljack's superpowered vending machine wanting to keep to individual and unique results, Mock Turtle being the crazed mad scientist who finds out it'd be better to keep his work to himself...
* Astro City villain Slamburger looks like a half-ton of sulfurous ground beef and has the personality to match.
* Astro City, we meet the Silver Adept, the premiere sorceress of the Astro City universe in this manner. Raitha, the Silver Adept's personal assistant, finds her sprawled on her bed after a long night partying, reminding her that it's after 8:30 am.
* Astro City, when Black Velvet is mortally wounded by Jitterjack, her body releases black energy that infects the populace and starts a riot.
* Astro City who grab whatever's handy to attack. (They buy the hero the moment needed to regroup.)
* Astro City, who is essentially Batman with the Zorro influence magnified dramatically. His sidekick Bravo wielded the relatively similar bola.
* Astro City, whose constant super-heroing leaves him with only a few hours of sleep every night and nearly no time to relax. Having a bio-organic computer that constantly monitors the news doesn't help.
* Astro disguised himself as his sister Uran in "The Greatest Robot in the World" (Tetsuwan Atom, 1963), which likely makes him anime's first crossdresser.
* Astro Empires, Ion Frigates have more advanced weapons and shields, Cruisers are effectively bigger Frigates while Heavy Cruisers are bigger versions of them, Carriers can transport Fighters and Bombers but are nearly defenseless by themselves, Fleet Carriers are the same but bigger, Battleships are just what you'd expect: Big and strong.
* Astro Empires nonmembers can only build one thing and have two things in the queue to automatically build, but members get 5 queue slots. Also, members can construct unlimited bases, but nonmembers only get to build up to 9 before having to conquer other planets to expand.
* Astro Fighter Sunred when Florsheim decide to create a horrible cyborg monster to defeat Sunred by... Fusing a moth monster with a piece of lead pipe. Yeah, they replaced his right forearm with the lead pipe. Sunred is unimpressed.
* Astro Kid. All the conflict comes from protagonist Willy having to survive on an unknown planet, facing ploblems like hostile weather, finding enough food, dangerous terrain, and predatory animals that just follow their instincts.
* Astro Kid, is this to Willy, a boy stranded on an alien planet. It's because of Buck Willy learns the basics of surviving.
* Astro Kid: Willy and his parents have to deploy escape pods when their ship is destroyed by asteroids. Willy's pod is equiped with various survival gear, including a survival robot named Buick.
* Astrologer: A character who claims to have the skill to see the past, present, and future based on the positions of the planets and stars.
* Astrologian draws upon the infinite power of space and stars, and thus have some of the better mana conservation of the healer jobs. Their star-charting ability also allows them to see into the future, and as such many of their buffs and healing strategies in-lore and in gameplay play them to be preemptive healers ready to get a spellcast out before damage is done even though their kit is better served towards being a reactive healer like White Mage.
* AstroLOLogy shorts were done in Flash while the later prototypes and final products are in CGI.
* AstroLOLogy. The Japanese dub, however, adds voiceovers with proper Japanese speech to the characters and the messages at the end of every episode.
* Astro Marine Corps, there are certain places that have to be jumped over to avoid plants that will come up out of the ground and eat you.
* Astro Marine Corps, when a Ballthrower breathes fire on you, you get skeletonized.

* Astro Monster Holiday is a strage film that has Santa and Krampus celebrating Christmas with other characters such as The Queen of the Galaxy, The Queen of the Unicorns, The Dark Lady, and the literal devil.
* Astronaut Alan Shepard and his wife, Louise, raised the daughter of one of Louise's sisters when that sister died. They never formally adopted her, though.
* Astronaut and U.S. Air Force officer David Scott named the Apollo 15 Command Module Endeavour after Captain James Cook's ship. He felt that the Apollo 15 voyage was similar to Cook's in that they were both travelling to unexplored areas to discover new things. All other U.S. moon landings were commanded by naval officers or former naval officers.
* "Astronaut Blankets", or metallic Mylar sheets, come in a pack no bigger than say two of those tissue packs stacked on their side, and can fold out to cover about a 8'x4' area. Considering these are normally meant for campers, it's better if they're tiny. On the other hand, any camper who has actually had a reason to open one has discovered the joys of trying to fold it back into that size. (It's not possible, by the way, not without machines.)
* Astronaut Brice Rogers became the Moonman after passing through a comet's tail while traveling to the Moon. During the day he was Brice, but exposure to moonlight forced the emergence of his criminal alter ego.
* Astronaut Chris Hadfield released a video of himself performing the title track of
* Astronaut ice cream in Nov '10 got this reaction from writer Carl Binder; "It's like eating a shoe. Including the aftertaste."
* astronaut jetpacks was exception to this, however. It used actual chemical rockets fueled by hydrogen peroxide monopropellant, and as a result it required one to wear a special spacesuit with chromium fabric pants.
* Astronaut Jim Lovell, during his flight on Apollo 8, remarked that he could use a portion of the Earth as a reference point to control his spacecraft's altitude should his guidance computer fail. During his Apollo 13 flight, an explosion forced the crew to shut down their guidance computers to conserve power. When he had to fire his engine to correct his craft's trajectory, he used the very same technique he came up with a year and a half earlier.
* astronaut literary scholar imagines he sees extra eyes in weird places on the inhabitants of another planet. The people actually look entirely human.
* Astronaut Michael Collins (born in Rome to a U.S. military attache)
* Astronaut Scott Parazynski did a Darth Vader impression and told his son "
* Astronauts in orbit are actually in a state of freefall for the entire duration of their mission — it's just that the smart guys at NASA have figured out a way to
* Astronauts Mark Kelly and Scott Kelly are the only twins (and only siblings) to have flown in space, both as commanders of Space Shuttle missions. Scott Kelly also commanded the International Space Station from November 2010 to March 2011. At one point, a space shuttle flight to the ISS commanded by Mark Kelly was scheduled to launch within this window. Aside from being the Twin Commanders
* Astronauts that went aboard the once-functioning Skylab satellite wore magnetic shoes during work so they could have a simulated feeling of gravity while doing tasks that zero g would make complicated, but since the Skylab was decommissioned this technique has never been replicated.
* Astronauts training for zero G and often experience vomiting. Unlike most examples it is not due to disgust but because the movement disrupts the inner ear and induces extreme nausea.
* Astronauts who spend a long session in space will get used to the absence of gravity and develop the habit of just letting things go when they're not immediately in use. After returning to Earth, it can take them a while to remember that
* Astron Federation use ships and costumes straight out of Buck Rodgers.
* A strong anthropological hypothesis for the origin of the myth is that it could have originated as a way to reinforce the taboo against cannibalism. Again, the power of suggestion plays a role, and people who have violated the taboo

* a strong cultural dislike, but one exception is necromancy as Redguard religion forbids their warriors from raising arms against the honored dead. They do have a specialized order known as Ash'abah dedicated to fighting the undead, but they are shunned despite the necessity of their role and mostly wander the Alik'r desert as exiles until needed.
* A strong desire to "prove" their gender identity, or a lack of faith in their gender.
* A stronger case can be made for the French Navy winning because Germany didn't accomplish its goal of absorbing them. If Germany had done this, then the Axis navies in Europe would have been strong enough to potentially oppose the Allied navy. So the French just blew their navy up when the Germans tried to take it, essentially ensuring an Axis naval defeat.
* Astronomers are on look out for asteroids, charting their path and trying to predict if any of them will be a danger to the Earth. Their hope is to find them and alter their orbits so they do not crash into the Earth, although the technology to stop the asteroids is limited at the moment.
* Astronomers DO see the alien ships, but the government tells elaborate cover stories, and most people choose to believe the stories and think that they misinterpreted what they saw other than accept the reality that aliens do exist. The ones who don't turn conspiracy-theorist and attract the attention of the government, who in that case tell them the truth and have them sign a confidentiality agreement.
* astronomical for larger lenses. Mirrors in reflector telescopes are easier to manufacture thus not as subject to this.
* Astronomic Zoom - A very long shot covering a huge change of area, for example, focusing on a house, then zooming into a blade of grass, or showing the earth, then zooming out to other planets or galaxies
* Astronomic Zoom out which reveals the world is the Universal logo Earth, and in the distance is the Orion Pictures logo as a constellation.
* Astronomy has a bunch of these, including goggles/lenses that cut out certain frequencies of light, and glasses that let you safely view a solar eclipse.
* Astronomy magazine once mentioned a magazine-sponsored trip to see a total eclipse of the sun where one man proposed to his girlfriend just as the moon had almost covered the sun, i.e., during the optical effect known as "The diamond ring". According to the reporter, she said yes. Nerdy, but oh so romantic.
* Astronut The short ends with the crooks sitting on the satellite as it floats through space, whereupon one crook asks the other, "I know this is a stupid question, Clyde, but, how are we gonna explain this to our parole officer?"
* Astro Pop. They can't be grabbed, and you can only get rid of them by making a match next to them. They also "infect" other blocks, turning them into more virus blocks. You can interrupt the transformation if you grab the block before it's transformed.
* Astrosaurs example, which said that dinosaurs and other prehistoric creatures discovered space travel and left Earth before the meteor struck.
* Astro's Playroom is this for the console's controller, the DualSense. It has been nearly universally praised for selling the concept of the controller's gimmicks and innovations.
* AstroTurf: Hire a bunch of puppets to pretend to be ordinary consumers while singing your product's praises in public.
* Ast the end of season three, Elsa had only been in one scene. It was about thirty seconds long, there were no other characters present, and she didn't have any dialogue. By the time season four started, she was being shipped with Regina, Ruby, Mulan, Hook, and Emma.
* A student arrives drunk for his exam and sees two identical professors sitting in front of him.
* A student film called "Employee Of The Month" entirely centers around this conceit. The Boss is looking for
* A student harangued by the tax board finally decides that if they're going to be taxed as a resident of California, then they need to receive the services their

taxes pay for... like a refund on the $10,000 out-of-state college tuition they've had to pay as a non-resident.
* A student mage in the Kamigawa novels tries to explain the strength of water by talking about the strength of a
* A Student Out of Time: Nagito is treated by Kanata Inori for his lymphoma and it leads to the duo falling in love to the point where they want to get married after they both graduate Hope's Peak.
* A study done decades ago in a real class promoted and demoted blue- and brown-eyed pupils to show the effects and issues of racism and other -isms. The children, regardless of being told about the study, stated that they came to feel superior or inferior, and had trouble re-adjusting even years later.
* A study examining the effects of simulated suffocation on people with amygdala damage included the note that "the heart rate data for AM and BG during the first CO2 inhalation could not be analyzed because of contamination by motion artifacts secondary to the patients' escape behavior." (i. e. patients trying to flee messed up the instruments connected to them)
* A study in awareness once did this as part of an experiment — subjects spoke with a clerk behind a counter and at some point during the conversation the clerk would duck down behind the counter, ostensibly to retrieve a form. The person who stood back up was in fact a completely different person wearing different clothing, but only a minority of the subjects noticed.
* A Study in Charlotte: The Moriarty family and the Holmes family have been fighting since Sherlock Holmes pushed Professor Moriarty off a cliff. August has attempted to try to reconcile them, but it hasn't been successful so far.
* A Study in Emerald” ending where a priest is beaten to death with his own crucifier).
* A Study in Emerald plays with a similar concept: The Old Ones rose and took over the European monarchies at some point in the past. Life goes on...even if the Old Ones tend to munch on the occasional mind now and again (something treated with a shrug in the story).
* A Study in Emerald the moon is blood red. It's been this way for about 700 years now, ever since the Old Ones showed up, so naturally no one sees it as anything to get worked up over.
* A Study In Moonlight, werebeasts are an exotic, and sometimes poorly understood, but well-known minority. The narrator is half werewolf, a minor character is a wererat, and werebears have been mentioned. Therianthropy can be infectious or inherited, therianthropes can only take mammalian forms, and they have to obey the conservation of mass.
* "A Study in Pink" has Sherlock deduce that the former owner of John's mobile was his brother and a drunk runs entirely on these. He assumes that people not wanting to pay the entire rent of a flat would be frugal in every other aspect of their lives despite flat mates being quite common among people of varying financial backgrounds. He assumes that older people don't have cell phones, which was sort of true in the time period when the show was made but the phone being a gift explains that. The scratches on the power connection are a shout out to the same deduction being used in the original stories but for watch winding. However as most cell phone owners can attest, the tiny plug of that style of cell phone is difficult to find and people often plug their phones in in the dark, most cell phones over six months old will have scratches around the outlet, whatever the owner's intoxication level. In fairness, he did admit the last one was a "shot in the dark," and later explicitly stated he wasn't expecting to get
* A Study in Pink," John asks Sherlock if he has a girlfriend or a boyfriend. When Sherlock makes it clear that he's single, John replies, "Right. Okay. You're unattached. Like me. Fine. Good.".
* A Study in Pink", Sherlock confronts the man who will, indeed, turn out to be the culprit, and point-blank demands to know how he's conducting his murders and doesn't seem to notice he's been jabbed with a needle; the man comments on how he's "resilient" as it takes him another minute to lose consciousness, and wakes up (sooner than most) with a forecast that he'll be weak for another hour.

* A Study In Scarlet claims that the reason he is so ignorant of such things as astronomy is that he's trying to save brain-space for forensic knowledge.
* A Study In Scarlet, despite Holmes (correctly) describing the murderer's appearance and even how he got to the scene of the crime in detail from the clues in the room, nobody even slightly resembling the murderer turns up until the last chapter of the London-based narrative.
* A Study In Scarlet. Her true love had finally tracked them down and killed them.
* A Study in Scarlet mythos, and is fairly famous. The second half is an American-set flashback detailing the motive of the crime, and even many people who have read the book remember this part hazily if at all.
* A Study in Scarlet, shortly after Dr. Watson moves in with Mr. Holmes, Watson spots an oft-read short idiotic article. After Watson ridicules the article's content, Holmes says that he wrote it himself. Watson's incredulous response: "You!"
* A Study in Scarlet's second half took place during the Mormon immigration, when all the Mormons were more or less literally driven out of the rest of the country and forced to move to Utah, which was apparently the only place people hated enough to actually send Mormons to; and the book itself was first published only a couple of decades after. It's not outside the realm of possibility that Doyle had only ever heard of Mormons from Americans, who, this being the 1870s and 1880s, would not have nice things to say about Mormons.
* A Study in Scarlet wrote RACHE on the wall to make the police think of a revenge killing by a secret society ...or that the murderer's name was Rachel.
* A Study in "S", William frames Sherlock for murder to see if can wriggle his way out and find the true culprit.
* A Study in Terror, Angela Osborne and Max Steiner are blackmailing Lord Carfax: threatening to reveal that his brother Michael had married a prostitute, which would ruin the family name and possibly kill his father.
* A Study in Terror ends with a mysterious hat arriving in the mail and Holmes launching into a series of deductions about it, while Watson stands by with a 'here we go again' expression on his face as the credits roll.
* A Study in Terror, Polly Nichols is shoved into a horse trough and held under before being stabbed. A shot from under the water shows the blood floating upwards to the surface of the trough.
* A Study in Terror, the Duke of Shires enters and leaves his library through a passage concealed behind a bookcase.
* A study in the 1890s pointed out that cities would soon be overwhelmed by horse manure. Luckily, we were saved by the automobile.
* A study noted that the behaviour associated with the initial stages of romantic love is functionally indistinguishable with the behaviour associated with obsessive-compulsive disorder.
* A study of cancer patients showed that in many cases where the prognosis was presented in a negative way, some patients simply gave up and lost hope. These patients tended to succumb much more quickly, in some cases well
* A study of the process used to turn men into torturers for the Greek military junta showed the recruits were subjected to this. The random punishment not only brutalized them, it made them
* A study on gender-integrated combat units suggests this trope. Seeing a female squad member injured would often see the male soldiers going a bit... berserk in response. Though given that communist nations have been using women in combat roles dating back to at least the Communist Revolution in Russia without having serious problems, it suggests that the issue might be more due to the cultural idea that
* a study published by the Psychology Department of the University of California-Berkeley found that wealthy drivers were more likely to commit traffic violations.
* A study showed that the average female porn star's bra size was a B-cup.
* A study showed that when it came to a Jury Trial, there is a little truth to this. When an attractive man or woman did a minor crime, they got little or no sentences. However, when it was a major crime, there was no deviation at all in sentences. Some studies have actually shown that attractive people who commit

crimes that involve deception actually get harsher sentences for using their looks in such a way.
* A study with mice showed that rodents trained to fear the smell of cherry blossoms passed on that fear to their descendants via epigenetic changes to their sperm.
* A stuffed SS Standartenfuhrer is a prized possession of Cristobal Junta, the
* A stun grenade, or flashbang, is a grenade that emits both a blinding light and deafening noise - so much, that looking away from them as they go off really isn't going to help if it's anywhere near you (plus the deafening noise from up close will leave you so woozy you barely able to stand and walk even if you weren't blinded), especially in a room that will reflect the light anyway as grenades are liable to be used with. They are designed to non-lethally incapacitate a foe (though they can cause permanent damage). Used by everyone from your local SWAT team to special forces like the Navy Seals and SAS.
* A stunt performer drowned off the coast of Malibu during the filming of the skydiving sequence in wacky sex comedy
* Astute falls under will probably take much longer than the actual trial.
* as Tuxedo Mask protects Usagi as Sailor Moon from Zoisite’s attack that was meant for her, and ends up severely wounded after already being injured from a previous battle. Sailor Moon rushes to his side and cries out a tear that forms the Legendary Silver Crystal.
* As Twilight Falls every time Twilight uses Chaos Magic, especially after her fight with Calamity and confrontation with Celestia in chapter IX.
* As two thugs assault a little old lady, she turns to the audience and asks, "Have you ever seen such cruelty?"
* A style of dress shoes typically worn by children during the early 20th century
* A stylised insignia based on Celtic knotwork used by the Vogans in "
* A Su-9 caught the U-2 in her slipstream, breaking off the wings. The missiles hit the aforementioned MiG-19.
* A subatomic particle is driving a car down the highway, when a cop pulls them over. The cop walks up to the car and asks, "Excuse me, do you know you were driving at 90 miles per hour?" The particle responds, "Oh great,
* A subdivision of creationists is Babelists, who believe in Eternal English.
* A subgroup could take or leave the Snakes themselves, as long as they can keep
* A Submarine, meanwhile, uses ballast as its primary depth control, and can either release it or intake it slowly to gradually ascend and descend, or quickly in order to sprint to the surface (known as an "Emergency Blow") or to dive away from danger (known as a "Crash Dive"). These emergency maneuvers can themselves be dangerous due to A) Being about as stealthy as dropping a ship into the ocean, that is, not very, and B) the risk of the sub crashing into something unseen (as has happened in the past). Further, if the sub's hatches are not properly secured, a sudden crash dive could quickly turn into unplanned scuttling.
* A subplot in the story "The Aztecs" involves the Doctor accidentally getting engaged to a local woman - because he accepted a drink of cocoa. She offered it because he'd been charming her to get information. Cameca understands that the Doctor must leave her but he's so upset by the pain he inadvertently caused her that he carefully avoid romantic entanglements for several centuries and incarnations afterwards.
* A subplot involves some Americans trying to acquire the lighthouse. They witness the madly laughing scarecrow and are too frightened to force the Twists out. Harold wants to sell them some farmland instead, but as there's a (regular) scarecrow present, the terrified buyers leave mid-sales pitch.
* A subplot of an episode in which the victim of the week was a Tibetan immigrant. The detectives suspect her husband, as he's vague about his alibi and when credit card records indicate that she had lunch with another man the day she was killed, they suspect her presumed lover as well. As it turns out, the detectives are wrong on all counts. The man was the
* A subreddit has been dedicated to the incident, with several other theories, such as the broadcast being experimental music. Also of note is that one of the

obituaries was for Frank Oppenheimer, a victim of the Pan Am Flight 103 terrorist bombing. A few users think the recording is a fake, even being part of a
* A subsequent encounter had him trap multiple heroes in a deck of cards and challenge the Southwest Sentinels to free them. When the Sentinels proved less than gifted at dealing with Wager Master's usual nonsense, they opted to get the deck off him by challenging him to a game of poker and cleaning him out instead.
* A subsequent storyline looks at legal services in Shadow Hill, the city's supernatural district. Ghosts can be called up to settle their disputed wills; when a magician discovers their spells are contracts with higher powers, they can get a lawyer to figure out the terms; and vampires and other quasi-immortals can hire professional Renfields to help with their financial holdings, transferring the holdings to the Renfield when they die (or appear to), and the Renfield transferring the holdings back to them when they show up with a new identity.
* A subsequent story showing how Mesmero managed to catch the X-Men revealed Jean's Phoenix powers flared up automatically when Mesmero tried to make a play for Jean, threatening to undo his hypnosis and putting her firmly on a "look but don't touch" rule. The other women Mesmero was holding captive at the time however...
* A subset of fans feel that revealing Michael Myers to be Laurie's brother in
* A subset of hotshot booking is "hotshot" title changes - title changes that happen fairly quickly and result in a number of different title reigns, often for no real reason. Like with hotshot booking, this is done either to cover for an injury or to change an angle on the fly. Unfortunately, such title changes - if they happen too often - can "devalue" the belts (in other words, fans will stop caring about who holds the titles, and thus stop caring about seeing wrestlers compete for the titles, making them worthless as an attraction). These kinds of title changes can also become somewhat predictable if used very often; if you know the belt's going to change hands every other week, why even bother to watch the champion defend their title? Hotshot title changes are one of the many reasons WCW is now out of business, and it's one of the many, many, many, many,
* A subset of the above, the answers you give to certain questions (often of the "who do you want to go with you?", "do you think the
* A subset of this trope that occasionally shows up in more fantastical works is to introduce the idea of a mastermind who can remotely control one or more puppet-bodies. If he's only controlling a single body, then he can focus all his attention on that one body and fight very well in it, but if he's trying to control ten different bodies doing ten different things at once, he's going to be pretty distracted and none of the individual bodies will be very competent.
* A subspecies may be fics written by Americans using American names for food that is called differently in Britain; so you get fluffy stories of Hobbits baking
* A substance rather than an object, but otherwise, Dark Energon from
* a subterranean temple to Cthulhu, where you eventually go insane and possibly kill yourself if you spend too much time near the statue of the Eldritch Abomination.
* a subterranean tunnel drill release, it's now matched by Rhongomyniad.
* A subtle and possibly intentional example of this in an otherwise unremarkable
* A subtle example in the massive fan project "Let's Read Homestuck":
* A subtle example that lacks the heart motif and is entirely missable if you
* A subtle joke in the episode "In Darkest Night": Green Lantern is accused of destroying a planet and killing its three billion inhabitants. (To be fair, it was an accident.
* A Subtle Knife, but Edge can't help feeling emasculated when she gushes over his subconscious babbling.
* A Subtle Knife, Jacob Rodrigo's name and "nut-brown" complexion imply he's a Latino, but his facial features are described as Oriental. Note that Jacob himself isn't very sure of his background due to amnesia.
* A subtle one, but most if not all games in the series will have an NPC ask Link to keep something, "Secret to everyone," in reference to the Moblin in a cave from the first game.
* A subtle one. David Kenyon Webster at first is simply known by his last name.

After his POV episode, he shares a small
* A subtler example from the same series: Fitz is the last main character in the first season to have his first name (Leo, short for Leopold) mentioned on-screen, and seems genuinely a bit annoyed whenever it's brought up, which is usually only in the context of formal introductions. Even his best friend and
* A subtler example is Yuri Sakazaki. She only started training when she was 16-17, and yet she mastered the basics and low techniques of the Kyokugenryu Karate
* A subtler one, but the description for "The Greatest Hope 2018" ends with:
* A subtler one: Jabba is already well known to enjoy humanoid females, and after meeting with Bria to coordinate
* A subtler usage of this shows up from time to time in the comics of
* A subtle variation: There are frequent stories by recipients of donor organs (particularly heart transplants) where they report taking on personality traits or habits of the deceased donor, such as acquiring a taste for the donor's favorite foods (even if it was something the recipient despised before the surgery).
* A subtle version in "Live Free or Twi Hard". When Dean is infected with vampire blood and is
* A subversion: a man with an orange for a head walks into a bar. He gets chatting with the barman, who, consumed with curiosity, asks, "So... why do you have an orange for a head?" The man with an orange for a head replies: "Well, it's like this. I was walking along the beach one day when I tripped over an old lamp that was sticking out of the sand. In a flash of light, a genie appeared in front of me! The genie said to me, 'For a thousand years I have been imprisoned in that lamp. In gratitude for freeing me, I shall grant you three wishes'. So I said, 'I would like more money than I can ever spend'. There was a puff of smoke, and all over the sand there were piles of gold and jewels. 'Your second wish?' asked the genie. 'To help me enjoy all this money', I said, 'I want an intelligent, beautiful woman to spend the rest of my life with'. There was another puff of smoke, and there next to me was the loveliest woman I have ever seen. 'What is your final wish?' asked the genie. And I said, 'I'd like an orange for a head'".
* A subversion appears in a somewhat obscure POW narrative from WWII called
* A subversion are the elephant koi; despite their name, the only elephant-like attribute of theirs is size. Otherwise, they just look and act like normal koi.
* a subversion, as it is actually being sent from the distant past by a time-travelling group of Lost Lighters, after having done all the things that the message was trying to warn them about.
* A subversion bearing the trope name: the traditional song "Buried Alive" as performed by musicians like the Dropkick Murphys is not about someone doing this to someone else deliberately, but the occupational hazard inherent in being a coalminer.
* A subversion comes every year around Halloween these days, though, when little old lady Agatha dresses up as Medusa, including
* A subversion comes in the form of Kara Sloan, who only acts cold around her troops out of guilt over the fact that she's in a relationship with one of her junior officers.
* A subversion: Dwarfish words are occasionally used in such a context in a conversation that the non-Dwarfish-speakers present assume they're swearwords. Example from the novel
* a subversion examples of gross incompetence and stupidity. Burns never fired Homer for suing him after he hit Bart with a car, or for standing up to Burns when he sexually harassed Marge, or even for thwarting Burns' campaign for governor. Another way it's a subversion is that Homer seems to be able to get his job back despite his incredible incompetence and gross stupidity.
* A subversion: Garibaldi stumbles into a particularly nasty one while on the run from EarthForce security officers as the result of a frameup. A somewhat shady looking patron recognizes him and calls security to deal with him!
* A subversion happened when Ben & Jerry's said they wouldn't release the "Stark Raving Hazelnuts" and "Hunka Hulk Burning' Fudge" flavors discussed in
* A subversion happens in the episode "Two Face Part Two": An employee of the mob

boss Thorne was a neutral female up until she tries to hit Two Face over the head with a container, when she is tackled by Two Face's fiancée (another previously neutral female, and a
* A subversion happens when Rico is at OCS. We find out one of his fellow officer candidates received a battlefield commission as a 1st Lieutenant some time prior (In case anyone didn't realize it, graduates of OCS start out with the rank of 2nd Lieutenant, so Rico's classmate would actually be
* A subversion in "Freak": when Chloe asks Daniel what happened last night, he somewhat apologetically asks if they had sex because he was really drunk and didn't remember anything.
* A subversion: in one episode, a character's abnormally perfect health (as in, she wasn't just
* A subversion in that he's still an abysmal driver, and nearly gets himself and Stephanie killed several times within a span of a couple minutes. Since he only knew how the car was supposed to work, and not the rules of driving, it's still this trope.
* A subversion in the fashion show episode; Simon is wearing ludicrously small, tight pants for aforementioned show and his friends repeatedly warn him of the perils of an unwanted erection. Instead one of his testicles falls out.
* A subversion involves one of the game characters coming to life and Rimmer ends up shooting him with a bazookoid, helping to gain the confidence to become Ace Rimmer. Turned out, Lister had dressed up to play the part and loaded the gun with blanks.
* A subversion is Holly from Series 3-5, played by Hattie Hayridge. The character admits in one episode to being a "deranged, half-witted computer" and in another can't even count without banging her head on the screen. That being said, Holly still seemed smarter as a female, especially in episodes like "Backwards" with her theory on "The Big Crunch" and in "Polymorph" she is actually able to recognize the creature (a shapeshifter) when even Rimmer (who is always insulting Holly's intelligence) is too distracted by its current shape (his mother).
* A subversion is mentioned in the Ep 8 manga where it is mentioned that even if
* A subversion; it is widely believed that those insects that look like giant mosquitoes, known as crane flies or mosquito hawks, prey on mosquitoes. This actually isn't true. They actually are incapable of killing other insects as adults and many of them don't even eat. However, mosquitoes of the genus
* A subversion kicks off the plot in the first postscript season episode of
* A subversion occasionally comes up in the more roleplay-oriented crowd in
* A subversion occurred with photographer Reid Blackburn, another victim—
* A subversion occurs in the episode, "Dude, Where's My Eggman?". Dr. Eggman tries to return a burnt umbrella, but the store's owner refuses to give him a refund. Outraged, Eggman kicks the bottom two cans of a pyramid... and the rest of the cans completely stay stacked, much to his surprise.
* A subversion occurs in the episode "Who Shot Sherlock?", where the victim is the Holmes of a Sherlock Holmes club. Greg finds the gun attached to an elastic cord, concealed in the fireplace. It looks like
* A subversion occurs later on when Yuna's father is reading something related to his job as a mage and hides it under some Ero Magazines when Yuna comes in (and promptly has a stack of books and papers fall on her because she's opened the wrong half of the door) and so was using porn as a distraction in the name of
* A subversion occurs much earlier in the Buggy Arc. In the town Buggy's crew have occupied, there's a little dog called Chou-Chou, who's standing guard at a shop his master founded. Said master went to the hospital several weeks ago and never came back, having died. Most of the townspeople think Chou-Chou's still waiting, but not the mayor, Boodle. Boodle thinks that Chou-Chou knows his master isn't coming back but watches over the shop because it's all he has left of his master.
* A subversion of the "replay with last-minute change" occurs when Helga is a finalist in the same spelling bee as her sister before her and gets the same last word, "qualm". Like her sister Olga, Helga
* A subversion of the trope may be Poledra and Belgarath. Though she appears

little, she's described quite favourably. On the other hand, her husband is an old wrinkly man whose grooming habits only seem respectable in comparison to his aforementioned associate Beldin. Then, near the very end of the series, he appears in a loincloth and every woman in the party who isn't his daughter notices just how well the 7000-year-old man has taken care of himself.
* A subversion of the trope occurs in "Legion". With the crew being held captive by the titular character, Lister comes up with a "truly award-winning escape plan" from the movie
* A subversion of this is that all offers in South Australia are usually extended to Broken Hill, which is in New South Wales. Among other things linking SA to Broken Hill is the time zone, because during the late 1800's so much of mining industry and SA were tied together. Even more to the point, when Australia adopted standard time in 1895, Broken Hill's only rail link to the outside world ran to Adelaide. (Broken Hill would not be connected to Sydney until 1927.)
* A subversion of this trope happens in the book Time Trap before any of the other examples. Vakama wakes up in an alternate timeline where he and the rest of the Toa Metru never became Toa and six others became toa in their place. At first it seems like he accidentally changed the past with the mask of time, but
* A subversion of this trope occurs in one storyline in which the killer mistook a note written by his victim for one of these. It turned out to be a normal message about the guy's dry cleaning, "Bring my tux," but it was written in English which the killer couldn't read. He stole the note and was proven guilty when it was found on him because he hadn't dared throw it out for fear it would be found and incriminate him.
* A subversion: Riley thinks that Claude is pulling this when he orders her not to fight in one level, but he turns out to have a perfectly sensible reason: Their transport was crippled, and in addition to being a grenadier she was also a skilled mechanic, so the best way she could help the unit at that time was to help fix the engines so they could escape rather than fighting. She concedes the point, sits out that level, but returns to the list of playable characters in the following level when that justification no longer applies.
* A subversion: Rowling considered opening the second book with a scene where Draco Malfoy and Theodore Nott are hanging out together at Malfoy Manor and discussing recent events from their point of view. She later reworked the scene as an opening for the fourth book, but she decided to cut it that time as well. Ultimately, it was never used in the series at all.
* A subversion similar to Shakespeare's "My Mistress' Eyes are Nothing Like the Sun" is
* A subversion sometimes happens in the form of the "Dusty Finish", named after
* A subversion used to exist amongst sailors in the Mediterranean, back when people had all sorts of superstitions about what was in/on/near the ocean. To protect them from mermaids (who, in most myths, lean decidedly towards
* A subversion was reported in one of the Time Life book series on dreams. A teenage boy reported dreaming that he showed up to class and started stripping to the cheers of his classmates.
* A subversion where everyone believes that Clorinda and Lord Raxdell are an example of this, but she's actually
* A subverted example during the Battle off Samar: A large Japanese surface group consisting of the giant battleship
* A Subway ad does this. It says "Spot the non-Subway sub" and it flashes through impossibly perfect subs, with a monkey on a yellow submarine about halfway through.
* A successful example of this trope: Eric Barone, having just graduated from college (computer science) decided to start making a game for fun and to practice his programming, he was a big fan of
* A succubus-like monster who was using him to get to Jessie so it could consume her life force, and
* A sudden-death overtime, in which any play that results in a score is by definition the last play.
* A sudden fog appears (and disappears just as quickly) during Mother Gothel's

* A Sudden Wild Magic one below — travel into alternate universes is possible, but causes instant death for anyone with a counterpart in that universe.
* A Suffusion Of Yellow" halfway around the first lap. It had blown the engine block open, so they took it out into the desert to be crushed under a Chieftan MBT. They still have the Gremlin.
* A sugar cube named Suga who performs with his band Ghee-TS at the Bhelboard Awards. (Suga from
* A suicide bomber gets to heaven and tries to cash in on his promise of seventy-some-odd virgins.
* A suicide bomber rushed a tank. This happened. The tank suffered no damage.
* A suicide is made to look like murder so the family will not lose the life insurance payout in
* A suicide staged to look like a murder was the official conclusion in the 1978 death of Leonard Fagot.
* Asui Tsuyu got a whole anime original episode focusing on her internship, titled (funnily enough) 'Everyone's Internship'.
* Asuka. After almost killing Shinji her behavior completely changes and she becomes
* Asuka, after returning to the past with full knowledge of how disastrous and self-defeating was her "drive everybody away in order to avoid pain" strategy, allows herself to be nicer.
* Asuka after Shinji desperately tries to connect to her during Instrumentality. Unfortunately for that time she has become so frustrated with him (due to Shinji never getting her hints that she liked him, never helping her when SHE needed HIM, leaving her alone during and after her
* Asuka and Misato the narration explicitly tells that his sanity shattered.
* Asuka and Shinji also took this into account back when they were keeping their relationship a secret, only having sex when Misato was either out of the house or had gotten drunk before going to sleep.
* Asuka and Shinji can fall into this at times, especially due to that scene in the movie, in which he
* Asuka and Shinji get married between the events of the series and the first chapter.
* Asuka and Shinji meeting for the first time in a restored world where Second Impact never occurred.
* Asuka and Shinji talk about their daughter after Asuka has a nightmare.
* Asuka and well into her main roster run, even surpassing Goldberg's streak.
* Asuka becomes one temporarily during the second season when she becomes a member of the
* Asuka becomes Wonder Woman. Her predecessor warns her that bullets can harm her.
* Asuka blushes while she tries to find a way to tell Shinji that she wants to spend more time with him.
* Asuka complements Rei's smile after Shinji is rescued from Unit-01's core, though she deliberately words it in such a way that everyone other than Rei would mistake it for an insult due to having to stay in character.
* Asuka couldn't initially confess that she liked Shinji because she was frightened of opening herself up and getting hurt.
* Asuka defines herself as very clingy and possessive. So, how can she practice polyamory? Easy. She is clingy and possessive to both Shinji and Rei.
* Asuka did not know how hers worked, but whenever she required a weapon it appeared on her hand, and it disappeared when she no longer needed it. She keeps as many weapons as she wants of all shapes and sizes, although she shows preference for axes.
* Asuka died fighting to the finish. She was trashing the MP Evas but then they recovered, plucked her right eye out, impaled her, chopped her into pieces and ate her alive. Her death -and the vision of the MP-Evas chewing her Eva's bloody remains- triggered Shinji's final breakdown.
* Asuka displayed this trait around Kaji and later Shinji. When she saw a picture of Kaji surrounded by Misato and Ritsuko she wrapped her arms around his and asked

who those women were.
* Asuka does not appreciate people hurting Shinji either. And she has way less restrain than him. After all, she joined a coup to protect Shinji.
* Asuka, especially in her fight against the Mass-Production Evas in
* Asuka fell into a coma, Shinji kept watch over her relentlessly. He spent the whole of his free time beside her bed, and you needed a crane to pry him away from that room.
* Asuka gets even angrier when she realizes that NERV tried to do the exact same thing to her, raising her since she was three to be a good, obedient little soldier.
* Asuka gives a well-deserved one to Shinji when he begins having doubts about himself and breaks up with Asuka because he thinks he is not fit to her boyfriend and Teri's father since he thinks he cannot protect them:
* Asuka gives him "the first one in years that had been anything but playful" when
* Asuka had a crush on her guardian Kaji because she longed for being acknowledged and treated as an adult and he was the only decent father figure she had known. After hooking up with Shinji and realizing Kaji was infatuated with Misato, she dropped her crush right away.
* Asuka has an obvious and vocal crush on Kaji, her guardian. She's 13/14 (her birthday is partway through the series), he's somewhere in his late 20s. To Kaji's credit, despite his
* Asuka Hybrid into a girl. She wets herself the first time she tries to use the toilet because, out of habit, she peed while standing up.
* Asuka in his tracks from trying to kiss her in her sleep by calling this out from a nightmare.
* Asuka is dead he stops fighting, not caring what happens to the rest of humanity.
* Asuka is dead he stops fighting, not caring what happens to the rest of the humanity.
* Asuka is described as a World Class beauty, according to Shinji's friends, who nonetheless dislike her because of her personality.
* Asuka is making him pass a test to check his progress in his medicine studies).
* Asuka Kazama is mostly known for being a Kazama in the story and her association with Jin. She has even become a
* Asuka Langley Soryu is a traumatized, insecure kid with no self-esteem that has no idea of how to interact with other people and is frightened of them. So that she resorts to being loud so that nobody ignores her and intentionally acts obnoxious so that nobody wants to befriend her.
* Asuka Langley Soryuu and Misato Katsuragi qualify. Their counterparts in the
* Asuka later gets glowing blue eyes when she puts Unit-02 into Beast mode, even her left eye (under the eye-patch) glows.
* Asuka leaned behind Shinji and wrapped her left arm around him to show him an image on her wristband, accidentally embracing him and pressing her front-side against him. Shinji crossed his legs quickly, but she saw it and she smacked him on the back of his head.
* Asuka liked teasing Shinji because she loved seeing him smile after everything that they'd been through.
* Asuka might count as well. One of her sore points is that Shinji always saves the day before her; when she's undergoing the
* Asuka never was good with people, and her social skills get poorer after being disfigured by the MP-Evas, since she becomes angrier, more hostile and more resentful.
* Asuka. None of this has stopped her becoming arguably the most dominant female wrestler in WWE history.
* Asuka passes away in 2080, Shinji dies shortly after. Sixty-five years of arguments, fights, and reconciliations, and he could not live three days without her.
* Asuka pulled one off in her debut episode when Gaghiel attacked the UN fleet carrying her Eva.
* Asuka Quest has Aisuka, Asuka's AI clone. She was created to help out during the

Matrix battle in the simulators with Iruel, and survived that to join the heroes full-time. She's as moral as any natural-born human, and the characters treat her as if she was Asuka's sister.
* Asuka Quest has the Angels nicknamed Giant Alien Starfish because they're actually this trope rather than anything actually religious in nature, so the original name came off as pretentious.
* Asuka Quest insults Asuka's vocabulary during their fight, which results in a long, colorful, and creative rant about him.
* Asuka Quest work and end up causing problems, like getting Shinji drunk before the Matariel fight.
* Asuka reluctantly has Shinji trim her hair down to shoulder-length or so in one post-3rd Impact chapter of
* Asuka's bed. Shinji is unable to get any sleep that night, but he blushes as he stares at her sleeping.
* : Asuka Shinoda died in childbirth because of radiation exposure to the second Godzilla during the 1984 attack. However whereas her now widowed husband Yuji doesn't at all blame the child Asuka left the world to bring into it, said daughter Io blames herself both for "killing" her mom and making her father so lonely.
* Asuka slaps Rei when her confidence continues to spiral downwards and Rei confirms her obedience towards Gendo to the point of not fearing death and reminding Asuka of her disgust towards dolls.
* Asuka slaps Shinji and his two friends after they accidentally saw her panties during their first meeting... and then she slapped Toji again when he pulls his pants down in retaliation.
* Asuka's mother and Misato's father rekindle their relationship after he returns from Instrumentality.
* Asuka's narration sits on both sides of the fourth wall—it's not only the non-dialogue text of the fic, Shinji hears at least some (if not all) of it in his head, and comments on it at least once.
* Asuka stood by her bedside in the hospital room until she regained consciousness.
* Asuka tells Shinji at one point: “Third, you had better start making sense, or I’m going to lock you in a room with geek-Stooge and have him jabber about his mecha at you until your ears bleed.”
* Asuka thought their new teacher, Kaoru, was pretty hot, but her feelings were nothing but a short-lived crush, which vanished when she and Shinji got together.
* Asuka threatens Kensuke with telling his girlfriend about his pervert exploits back in middle school if he does not stop taunting her.
* Asuka to Kaji at the beginning. After the fifth chapter, she and Shinji became a couple and she forgot about her crush.
* Asuka Tokugawa is always seen tending to and caring for animals. She can sense their feelings and it seems they are attracted to her instantly.
* Asuka uses her infamous "Wall of Jericho" line on two separate occasions in
* Asuka vs. Zeruel. She empties three pallet rifles and two rocket launchers at the Angel, who never even balks... then Zeruel counterattacks and cuts off her arms in a single attack
* Asuka was afraid of saying "I love you" to Shinji for a long while. She did not dare to spit it out until they
* Asuka was dying, he was completely broken. When he realized that she couldn’t answer when he talked to her, he felt his heart breaking.
* Asuka. Where he is a timid conformist, who usually just keeps his head down and does as he is told, she is hard-nosed, strong-willed, prideful, and refuses to let herself be pushed around by anyone, and it is evident that he admires her quite a bit for these traits.
* Asuma's way: "Here's a porno video. There's the TV. I'll be back in an hour."
* Asumi's face lights up when she sees Hiroki, all the more so when he compliments her looks or thanks her for a gift. Unfortunately for her, he's completely
* A summer 2015 commercial for Banana Boat sunscreen begins as a commercial for the "Super Slim Summer Sun Screen Suit" from GLAMCO, a full body suit which is designed to cover the whole body from head to toe, face and all, from the sun. Here

the commercial actually plays until the very end. Then the screen glitches out and the real ad for Banana Boat sunscreen begins.
* a summer camp. A rowing crew is seen competing on a lake. Then a Viking longboat overtakes it at a staggering speed, with the barbarians rowing to a drumbeat.
* A summer re-run of the 17 January 2000 episode was dedicated to the memory of Peter Jones, who had died earlier in the year and one of whose last professional appearances had been for the recording of the episode in question.
* A Summer's End — Hong Kong, 1986 complete with 4:3 aspect ratio, VHS degradation effects, and rapid jump cuts.
* A Summer's End — Hong Kong, 1986 goes into the effort and research put into the set design of the game, and it shows.
* A Summer's End — Hong Kong, 1986 The game developers cite several anime of the 80s as artistic and aesthetic influences.
* Asumu Ushiromiya mother, is often talked about but she is never shown, not even in flashbacks.
* Asuna also delivers a Megaton Punch to Jack Rakan, knocking him off of a
* Asuna also has a similar attraction to the mid-to-late-40s Eishun Konoe, the father of her best friend Konoka, and had a bit of a similar reaction the first time she saw Nagi
* Asuna, by erasing her memories and taking her to Mahora Academy so she'd live a normal school life, watched over by Headmaster Konoe and Takahata-sensei, who also sorta got to live a normal life after being one of the two kids from Ala Rubra.
* Asuna cars in Canada were this, do you remember the Asuna SE and GT? About the only ones anyone can remember were the Asuna Sunfire and Asuna Sunrunner but that's about it. Ironically, there's a small campaign to revive the brand.
* Asuna, due to her being "on stage" from chapter one but have a past which suffers from Laser-Guided Amnesia.
* Asuna franchise, with a dropped walkie-talkie lying in a dark hallway beneath a flickering light fixture.
* Asuna gives one to Negi. Rather bittersweetly, it doubles as a Last Kiss
* Asuna has one of these in her hair, and she's a member of Class 3-A's "Baka Rangers" clique for the students who consistently get the lowest grades.
* Asuna has this response when she wakes up from a nap to see Kirito smirking at her, and after she draws her sword on him, he confesses that he
* Asuna is Negi's ministra magi and thus responsible for protecting the
* Asuna is noted to have a very similar face to Negi's cousin Nekane, causing him to be drawn to her. He's initially shocked because their personalities couldn't be anymore different.
* Asuna Kagurazaka (14) is crushing on Takamichi (mid to late 30s). May be subverted as
* Asuna made several attempts to confess to Takamichi, finally succeeding during the Mahora Festival Arc.
* Asuna, once she lets her hair down and stops being overly violent for a bit.
* Asuna says something similar when Kotaro first breaks out his demon form. Also a
* Asuna says this to everybody after an unfortunate incident involving
* Asuna's date with Takahata also has more than a few spies trailing along. Plus, Asuna and Negi's date in practice of
* Asuna's Infernal Depth Blade,a sword that can set itself on fire for added damage.
* Asuna's Magic Cancel ability. It is initially somewhat spotty and unpredictable, but she eventually gets control of this and can extend it as a field, punching out 100% unbreakable seals and dispelling giant falling pillars with a wave of her sword. Not to mention that
* Asuna's mother, Kyouko, wants to ensure a good future for Asuna, but her methods of doing so are by trying to control every aspect of her daughter's life, from her education institution to her future spouse. She mellows out over time.
* Asuna was emotionless in the backstory. She was still emotionless upon arrival, but ten years of being bugged by Ayaka taught her emotions, albeit mostly emotions regarding irritation.

* a Sunday strip, a future version of Wally, conducting some highly unethical time travel, accidentally telefrags a past co-worker when attempting to get a fresh cup of coffee from the past.
* A Sunday strip starts with Linus putting something from a squeeze bottle onto something else in a bowl. He takes it over to the TV and starts eating whatever it is by the handful, crunching noisily. The sound gets Lucy's attention...
* Asunder accidentally tore the Veil, leading to every building but the Keep being burnt to the ground, the inhabitants killed and their corpses possessed by demons.
* Asunder. After his personal quest, in which he resolves his biggest trauma and fully embraces either his human side or spirit nature, he settles down considerably.
* Asunder. It's also been confirmed by the developers that Rhys was fathered by Greagoir, the Knight-Commander of the Fereldan Circle of Magi.
* As universities were considered part of the Church, students were to be tried in Church courts for any offense they did, which often created tensions with local authorities.
* A Super Bowl 2018 commercial for E-Trade had a group of elderly people going to work in generally unsuitable jobs (such as a lifeguard, a firefighter and a
* A Super Bowl commercial for a rather obscure candy bar called the Take 5 ran off a whole string of these, as an office worker raves about the candy, but nobody has heard of it, yet she offends them all by using cliches about unawareness that are all happening around her, such as a guy "living under a rock" (who lowers the rock over himself), being "born yesterday" (who starts crying from their cradle at the desk), "from another planet" (
* a supercomputer designed to find the Ultimate Question of Life, the Universe, and Everything imprinted in their subconscious.
* A super hero LARPing group appear in Season 1, Episode 12 episode of. Booth and Brennan each compare the other to one of them (specifically to the victim of the week).
* A superhero who was turned into a robot by alien nanomachines has used his sensors to scan various female superheroes' bodies and then combined their best features in a sexy image for fapping.
* A Super Mario Thing with no arms, blue hair, and a face composed of a single giant eye).
* A supernatural authority says that some being shouldn't exist—or the individual believes that it says so, based on personal revelation or scripture—so they consider their Hunt a
* A supplemental book also introduced "Ki Blast," a moderately damaging blast of energy that ate up a Monk's use of Ki. As soon as
* A supposed hidden boss called "Ghost Sigma", which was claimed to resurface upon the release of
* a Supreme Court decision about whether the tomato should be considered a fruit or a vegetable for tax purposes. It was decided that it was legally a vegetable, despite being botanically a fruit.
* Asura and Yasha dynamic, but by game's end, it's patently obvious that they have had nothing but respect and compassion for each other.
* Asura believes that civilization itself is a failed concept that takes man away from his "natural" state and that only in barbarism can humans live properly. His method for creating the "proper" world is the
* Asura Cryin' are this, while they're usually formerly human beings who communicate with their handler via ghost-like astral projection, when summoned into battle, they went into a deep-sleep like state as the Asura Machina is summoned.
* Asura Cryin'; they're both considered equally real, though there's still only one Tomoharu between them.
* Asura He only had reason to concern himself with Shinigami since he defeated him prior to the series.
* Asura, he's so angry about almost everything that the only parenting he knows is of the two step variety: 1) Find reason daughter is crying. 2) Apply punch to the face of said reason.

* Asura himself is not a very subtle or tactical fighter. He frequently charges headlong into things and smashes them with insane, brute force, relying on his
* Asura in fact was reportedly spitting up blood from the recording sessions for the game's English dub. Dude's a trooper.
* Asura's three eyes symbol appears wherever his madness is taking hold. Medusa has a major penchant for arrows as a symbol, to the point of her
* Asura's Wrath, a game with a story not constrained by reason or logic in all other aspects, Asura can no longer understand the language of humanity after 12,000 years in limbo, although he can still understand his fellow gods just fine.
* Asura's Wrath: All the random gameplay changes through the game between several different styles is an intentional version of the principle behind the trope, in that it's meant to keep you on your toes. None of them feel tacked on either, like a lot of other examples of this trope.
* Asura's Wrath are revealed to be the will of the planet itself corrupted by hatred and rage.
* Asura's Wrath are transhuman, as well as descended from transhuman beings.
* Asura's Wrath are transhuman cyborgs, but Asura is the only one after 12,000 years that stands up against them for humans after they start slaughtering them to obtain their souls for more power.
* Asura's Wrath as big as he is, he is the largest and dumbest of the Seven Deities.
* Asura's Wrath aside from the ends of each act to make the parallels to being an interactive Anime or Japanese Drama series more obvious.
* Asura's Wrath as well as the rest of the Shinkoku Trastrium civilization. All the buildings and sculptures fits the look of Ancient Hindu and buddhist buildings and sculptures that would seem far too advanced for their time, but in a twist, the story takes place several thousands, if not millions of years in the future that merely is made to look like an ancient civilization.
* Asura's Wrath Augus thinks the way an escapist character should; fighting, eating, drinking, and sleeping with babes, Asura seems to not like it much, and is only focused on retrieving the daughter the 7 Deities took from him.
* Asura's Wrath: Chakravartin is the only character who doesn't reincarnate.
* Asura's Wrath comes from this law, though with a more Hindu and Buddhist Twist.
* Asura's Wrath destroy their armies are absolutely terrified of him, and can only watch in horror as he rips through everything in his way.
* Asura's Wrath do carry smaller gohma that can't fly into space to fight.
* Asura's Wrath does this intenionally, with the Eyecathes being just like anime ones, and is episodic like a real anime.
* Asura's Wrath, due to the sheer number of in game cutscenes with QTEs that are really intuitive. In fact, this particular model is exactly what the developers were going for to deliberately avoid this, as it was made to feel like you're still doing all the stuff in the cutscenes via intuitive button presses.
* Asura's Wrath equivalent of this, though played around with in that the story is specifically set in the extremely far future (or the extremely distant past) and that the main race of beings, Demigods, were based on upon said mentioned mythologies.
* Asura's Wrath gain the power of mantra. Or they can just kill you and take your soul, that works too.
* Asura's Wrath gives off this vibe and shares the look, as it comes up from the earth and fights Shinkoku ships by piercing beyond the earth's atmosphere to do so.
* Asura's Wrath: Gongen Wyzen. "AAASSHHUUURRAAA THE TRAITOR!!! AAAASSSSHHUUURRRAAA THE DESTRUCTOR!!! YOU DO NOT BELONG TO THIS WORLD!!! (Commences finger poke of doom) DDDDDDDDDIIIIIIIIIIEEEEEEE!!!!!!!!!!"
* Asura's Wrath has similar monsters to the space monsters above, at least the space faring ones. Played with in that a lot of the other members of the Gohma also consist of monkeys, flying squid and lion fish, elephants, turtles, a king cobra/turtle, yet there's not a bug to be found.
* Asura's Wrath has some of this. It's mixed with South Asian Mythology.
* Asura's Wrath have these, to emphasize the fact that the game is South Asian

Mythology meets Scifi.
* Asura's Wrath, having Hinduism and Buddhist tones for the game's mythology, has Naraka, depicted as an endless realm of golden clouds with bottomless abyss and towers made out of stone faces. Asura climbs up a tower in here multiple times throughout the game after dying many times.
* Asura's Wrath incorporates these, making the game even more like the interactive anime it was designed to be. You can even customize them from the main menu.
* Asura's Wrath, in which you fight the true mastermind behind the story.
* Asura's Wrath is full of this, with Asura himself and his mentor Augus being stand out examples.
* Asura's Wrath is the only character with a name left alive by the end of the game.
* Asura's Wrath. It's also seen in many other moments in the game. It helps the original creator of Macross was a key animation director for this game's cutscenes.
* Asura's Wrath level, as the final form of the first boss turns to the size of a planet and tries to CRUSH YOU TO DEATH WITH A FINGER THE SIZE OF TENNESSEE!
* Asura's Wrath: Made to look more like Hindu and Buddhist art than a Cartoon, and not quite as pronounced as other examples, but it's occasionally noticeable.
* Asura's Wrath many of these include flashbacks to the time when Asura's family was still whole and his wife durga was alive. There are several other instances, too.
* Asura's Wrath. Oh, and the next few levels, Asura fights enemies with just his feet, head, and rage, since he destroyed his arms taking out the last boss. But Asura doesn't care, that's more than enough. Asura only has five weapons: his fists, feet, head, his rage, and his planet sized cojones. In a bit of irony, the game itself is rated T and C in America and Japan respectively, though it is rated M and Pegi 18 in Australia and Europe.
* Asura's Wrath received criticism for its story being only 6 to seven hours. Migitated somehow by the episodic formula it has, as well as some future DLC that adds in a few chapters amongst other new stuff.
* Asura's Wrath streak to him. Unfortunately, he's also one of the Seven Deities who Asura has sworn vengeance against for betraying him. The battle you have against him is one of the most awesome ones of the game.
* Asura's Wrath, that has the power of the other deities Septentrion flagships, with speed similarly fitting for his fighting style.
* Asura's Wrath, the Generals knows for a fact that Asura is innocent of the Emperor's murder (having committed the crime themselves), yet every single one of them repeatedly and, seemingly, with absolute sincerity calls him a traitor.
* Asura's Wrath tropes similar to the anime examples above in it's final DLC chapter.
* Asura's Wrath was the one who murdered him and proceed to attack. The multiple battles that immediately follow, along with Asura's subsequent execution, are what fully kick off the plot of the game.
* Asura's Wrath, where the entire gameplay style changes depending on the situation and story.
* Asura's Wrath, with Gohma Howlers, which are anything but nice, as they kill humans without hesitation in packs.
* A surefire way to avoid a hangover is abstinence or moderation...which,
* A Surfeit Of Guns, by historical whodunnit writer P.F. Chisholm, plays on the historical example of Ulfbehrt/Ulfbert (see Military, below). The King of Scotland has been scammed by a German armourer promising the best quality pistols and muskets for his army. These are sold on the basis of having been created by the best gunsmith in Germany, who has signed every weapon with his name. But the name on the guns is mis-spelt, which alerts the hero to the scam. At first inclined to let the Scots find out the hard way, the (English) Border Warden, Sir Robert Carey, is prodded into action when the defective weapons are smuggled to the English side, and start blowing up in the hands of English users...
* A surge of adrenaline during a life-threatening situation can be seen as this. Some have reported spontaneously committing feats of strength and agility such as

ripping steel structures apart, lifting
* A surgeon's spouse who's working in a public area is covered by a sniper to force the surgeon to 'accidentally' kill a high-profile patient while he's on the operating table. What makes this invocation so noteworthy is that it is one of the first examples (possibly
* A surprising 25 Language sample from Mario of Voces et Manus Mundi
* A surprising amount of traffic laws are meant to counter the politeness of most people. In fact traffic laws were
* A surprising inversion of the trope happens when the March Hare's cousin April (
* A surprisingly benign example: a doctor in Dallas wants to show heart transplant patients their old hearts in person in order to encourage them to eat healthier and exercise more.
* A surprisingly consistent point of future history foretells the mass evacuation of Earth around the thirtieth century, to avoid solar flares. The Fourth Doctor encounters a wheel-type space station full of sleepers in
* A surprisingly dramatic version happens when Jacob Marley visits Scrooge in
* A surprisingly large number of people are unaware of the fact that
* A surprisingly realistic version, considering all the magic. Equestria was dependent on coal for most of their industry, but Equestria doesn't have any coal deposits, so they had to trade with the zebras. When relations broke down with the zebras, the supply of coal was cut off, and a massive war started. Littlepip lampshades that building your nation on the back of something you don't even
* a surprisingly skilled baker who is known for his pies. likes to beat the snot out of villains with a giant cudgel. At least he's relatively moral about it; he prefers fights that don't endanger innocent bystanders.
* A surprising male example would be Kurt Wagner AKA Nightcrawler from
* A surprising non-military example: the Crazy Horse Saloon in Paris includes among its shows a routine based on the changing of the Queen's Guard at Buckingham Palace. To train the nude dancers in the proper moves, the Saloon hired an authentic British drill instructor, who went all Drill Sergeant Nasty on the girls during the repetitions.
* A surprising number of drugs have both weight gain and weight loss listed as possible side-effects
* A surprising number of medical procedures involve going into the exit. Let's just say that the colonoscopy itself isn't nearly as bad as the preparation.
* A surprising number of people are convinced that the artificial sweetener aspartame, often used in diet soda, is extremely harmful, or going to control their minds, and that there is a massive conspiracy to cover this up. Though a certain percentage of the population may develop headache and/or upset stomach upon ingestion due to an inability to properly metabolize phenylalanine (one of the chemicals into which aspartame breaks down), fueling the conspiracy theories further. A study did prove that using too much increases cancer risk considerably, but bear in mind that the lethal dose was equivalent to a human drinking hundreds of cans of diet cola
* A surprising number of people who were kidnapped by organ harvesters in Brazil have been released voluntarily by their kidnappers unharmed. At least once, it was because the woman kidnapped screamed so loud for so long that the guard forcibly threw her out.
* A surprising number of quality actors have worked for Uwe Boll, partially becasue of this and partially becasue he is apparently a nice person to work for.
* A surprising number of students at the Beacon Hills High School on
* A surprising real life example: Once, when police were entering a house to look for a burglar, one of them said "Marco" in order to inject some humor into the situation. The burglar said "Polo" and was promptly caught.
* A surprising subversion to this occurred in real-life tragedy. Dedrick Owens found a handgun in his uncle's home and took it to school with him, and wound up shooting and killing Kayla Rolland when they were both only 6 years old. While Dedrick was at the police station, only fifteen minutes after the shooting, one police detective gave him a set of crayons to occupy him. Dedrick drew a picture of

himself outside his house, smiling and the detective had the picture framed, keeping it hung in his office. Preserving the last moments of innocence, it could be supposed.
* A surrealistic variant occurs in the big fight scene at the end of
* As Ursula Le Guin noted, in writing fantasy to be used sparingly, if you yourself are not a 19th C. Anglo-Irish aristocrat.
* A Survey of Radial Velocities in the Zodiacal Dust Cloud's doctoral thesis".
* A survivor of the Oklahoma City bombing described having this feeling upon awakening in the hospital.
* Asuryani Swooping Hawks have advanced mechanical wings that generate an anti-gravity field, allowing them to fly with greater manoeuvrability than the jump pack equipped troops of lesser races.
* Asuryan, king of the Elven gods, is usually depicted wearing a faceless mask divided laterally into white and black halves. This represents his role as keeper of balance and order.
* As used by faces, it is often used when in the midst of a comeback after several minutes of being dominated by his heel opponent. Often the heel will back off but be caught before he can land a sucker punch.
* Asus' F2A-55M Micro-ATX motherboard has two versions as well- The first world country version has one PCIe x16 port, two PCIe x1 ports and one PCI port. The ROW version not only lacks one PCIe x1 port, the port that was removed is the boneheadedly the one furthest away from the PCIe x16 slot. Meaning if you use a dual-width graphics card, you lose access to the only x1 slot on the motherboard. Why they did not remove the one closest to the X16 slot instead (which is the sensible option) is a riddle for the ages.
* Asus' motherboards often have inferior versions that are sold in greater Asia. For example, the TuF Sabertooth 990FX motherboard. The versions meant for first world countries has additional circuitry to allow PCIe 3.0 cards to run at full speed. The versions meant for second world countries don't have the circuitry, meaning devices are crippled to only run at PCIe 2.0- owner of such motherboards don't benefit from newer graphics cards. Those in third world countries have it worse, the versions sold in those areas don't even get USB 3.0 support...
* A suspect in a murder investigation is about to enter witness protection in the
* A suspect in the DLC case "The Naked City" claims to have served with the 6th Marine Regiment at Okinawa but struggles to provide details like which company he'd been with and what engagements he took part in. Cole,
* A suspect who happened to be a psychology expert identified Abby as married to her job as well.
* as usual, Bruce is right. It's actually Willie Watt, who gained psychic powers and was using them from juvie.
* As usual, opossums are referred as "possums" and sleep by hanging from their tails.
* As usual, this happens to Team Rocket, though not as often as in canon since they're not actively trying to steal Pikachu from Ash.
* As usual with Greek myths, there are actually several explanations why Artemis demanded Iphigenia's sacrifice, including one that was because Agamemnon's father had failed to sacrifice the first lamb of his flock to her, while according to Aischylos it was because two eagles (who symbolized Agamemnon and his brother Menelaos) had torn a pregnant hare to pieces, which enraged the goddess. And in the Iliad, Iphigenia wasn't sacrificed at all (Agamemnon offers the hands of all his three daughters in marriage to Achilles), while according to Euripides she was saved at the last moment and transported to Tauris (on the Crimea) to become a priestess at the local temple to Artemis...
* As usual with Moses and the Ten Commandments' adaptations, this happens in
* As vehicle-mounted weapons, the RPG shows that kinetics fare well in planet-bound environments, and the major armies all have some sort of artillery. In space they're also devastating, but suffer from reduced range.
* As very little guidance (save various video games) exists to the pronunciation of a variety of

* As Victorian-era sexologists like Havelock Ellis and von Kraft-Ebbing were vocally frustrated with their society's squeamish refusal to acknowledge
* As Virgil and Dante rise out of Hell, they witness an angel moving across the ocean so fast "its motion by no flight of wing is equalled."
* (as Vito), they're both still quick to grab any opportunity to do so.
* "As Voltaire said: Fuck off." is said in the Swedish Youtube video "Knappnytts Guide till OS-grenarna."
* As Volume 5 makes it increasingly clear that he can't handle leadership without retreating to a bar, the comedy elements become less noticeable; as the pressures the team are facing start to take their toll, he becomes increasingly reliant on the bottle until Volume 6 focuses exclusively on the disadvantages to himself and everyone around him of his vulnerability to emotional stress. After spending Volume 6 as The Load
* A swarm of bats shows up at various points, including the title screen and inside the Batcave.
* a swarm of spiders that inhabit a human body. The main spider was the size of a human head.
* A swarm of tiny insect-like aliens able to infest humans and walk around in their skin makes up the first abomination encountered, with the novel's characteristic sense of tact. "Just call me 'Shitload.' Because there’s a shitload of us in here." (A clever
* A Swarovski ad kept on playing during every other ad break of the 93rd Academy Awards. Sometimes, as was the case during the preshow, the ad would be played twice in the same break.
* As Warren gets darker, he dominates Andrew and Jonathan, reserves all of the gadgets and artifacts they steal and/or make for his use alone, and ultimately leaves them to take the fall.
* as was demonstrated in canon's swimming knowledge mean Viv and San fare better in waters.
* As was Moz of the Mozquitoes in Season 3. The Guardian, leader of the religious cult "The Chosen," had the elite Praetorian Guard.
* as was necessary to adapt Negima faithfully) and were disabused of this notion with only 1/3 of the season left to wrap it up.
* As was that time when they found his head buried in a cavern under San Francisco, having apparently been there for five centuries. Which was creepy as hell, to boot. Though, technically, since that was the end of the season, he
* As was Wally West, who dreamed of being like the Flash as a kid (helped along by a visit from his time-travelling future self). Then, in a repetition of the accident which gave Barry Allen his powers whilst visiting his lab, Wally became Kid Flash, Barry's protege and eventual successor.
* As we are on the subject of WH40K the Imperium of Man would like to bring forth the Old Ones for judgement. The Old Ones left around a number of sentient species, like the Eldar who
* As we are writing, the only characters whose voice actors always did their singing are Spike (Tania De Domenico), Princess Cadance and Trixie (both Marisa Della Pasqua), and Cheese Sandwich (Paolo De Santis).
* "As we come through the cabin for our final safety check, please let us know if you have any questions."
* A Swedish campaign for the relaunch of Cuba Cola ran with this, proudly proclaiming "The market leader* is back!
* A Swedish chocolate drink is sold under the trade name "Pucko". In the years since this was introduced, the expression "pucko" has acquired the meaning "stupid" in slang. This would seem unfortunate for advertising, but they actually managed to work with it. Their most memorable commercial had a young dressed-up lad asserting that he didn't blame the girl for breaking off the date, since "if you've promised your parents to stay home and help systematizing the [diapositive] slides, you have to keep that promise" while buying a Pucko for himself.
