* Babylon 5 G'Kar gets a prosthetic eye that relays images into his brain even when removed from the socket. He leaves it on a shelf in Sheridan's quarters just before Sheridan and Delenn have their wedding night. Then again, by Minbari tradition, a wedding night is supposed to have witnesses to the consummation.
* Babylon 5: G'Kar has a vision of an angelic being (in the form of his late father) telling him that it's up to him and his fellow Narns to break the cycle of violence between themselves and the Centauri, or both sides will be destroyed. G'Kar asks "Who are you? Where have you been all this time?" The response comes: "I have always been here" — and that's when the audience realises the angelic being is actually Kosh.
* Babylon 5, G'Kar is nearly killed by the Centauri when the Emperor orders him whipped. The laser-whip used to punish him delivers a harsher shock with every lash. The Emperor sits and rapidly counts out the lashes to be administered while Lando watches.
* Babylon 5 go in any direction they want, and try to take shortcuts, but then they run the very real risk of joining the ranks of ships that have gone off the beacon never to be seen or heard from again. Larger ships, which can create their own jump points, have more sophisticated navigational equipment which allow them to travel more freely. Even the larger ships will find themselves in trouble if they lose their navigation systems or engines in combat in hyperspace, drifting helplessly into the void. For this reason, most commanders, if given any real choice, will avoid fighting battles in hyperspace, instead preferring to mass their forces near strategic key points such as jump gates or planets.
* Babylon 5 had a vast back story. In the first season, events such as Earth's first contact with alien life, the Dilgar War that established Earth as a major power and the Earth-Minbari War that came within a hair's breadth of exterminating Humanity only to have the Minbari inexplicably surrender at the last moment. And that's just the Earth-related stuff: all the major alien races also had impressive back-stories, as did most of the characters.
* Babylon 5 (had his personality and memories removed and replaced as punishment for the capital crime) and joined Brother Theo's monastic order, until Brother Theo reminds him of the value of forgiveness.
* Babylon 5 had independently suggested that such a story would be cool.
* Babylon 5 had Jha'dur, a Dilgar war criminal infamous for exterminating a whole planetary population with Stafford's Plague (among many other things).
* Babylon 5 had someone caught in a temporal anomaly die of old age, even though his ship didn't have enough supplies for him to live that long. And then there was the affliction Sinclair had in the two-parter "War Without End"...
* Babylon 5 had steam vents occasionally, notably in "Grey 17 Is Missing", where Garibaldi used a broken steam pipe to build an improvised gun.
* Babylon 5 had telepaths among us (as do the other major races), it just wasn't academically proven until the early 21st century.
* Babylon 5 had the commander of the space station, Jeffrey Sinclair, played by Michael O'Hare, permanently replaced by John Sheridan at the beginning of the second season. This made some important overall changes to the overarching plot of the show since Sheridan had a very different personality and background. Originally it was hinted that this had been planned all along, but after O'Hare's death, it was revealed that during the course of the season he had been suffering from increasingly severe mental illness, which finally made it impossible for him to continue working.

* Babylon 5 had used the red and yellow suits (the blue belonging to a dead crewmember).
* Babylon 5 had Vice President Clark of the Earth Alliance, who was a front man for the Shadows and arranged the assassination of the President so he could step in and run Earth to their specifications.
* Babylon 5 has a device that is, apparently, supposed to be a futuristic defibrillator. It looks like a ribcage and is attached to the stretcher. The patient jerks when jolted. However, no wires are shown being attached to the patient.
* Babylon 5 has a discussion between Garibaldi and Delenn on the matter that mirrors their real-life actors' viewpoints.
* Babylon 5 has a downplayed example at the end of season 1, as the Minbari ambassador Delenn decides to enter a chrysalis for unknown purposes. A fair bit of suspense comes from the expectation of what, exactly, will emerge, even if nobody expects a horrible space monster.
* Babylon 5 has an interesting case with "In The Beginning", which was basically recapping the established history of the Earth Minbari War, complete with whatever flashback footage they'd used to depict The War on the show (which took place 10-15 years after the end of the conflict). Quite a bit of the movie was original footage specific to the plot, filling in the blanks in what we had been shown about the war, but there are still quite a few recognizable scenes spliced in from the show, leading to things like Michael York appearing in the movie for all of one second, with no lines.
* Babylon 5 has a number of episodes involving intrigue, notably feuding between rival Centauri clans. It is often high-class martini level but some events take place in the Down Below section, where it's not so much Stale Beer as Homebrewed Moonshine.
* Babylon 5 has a number of first contacts not going as well as they could:
* Babylon 5 has a scene near the end where a Narn security guard's arm is set ablaze during a brawl. Rather than try to extinguish it, he continues to beat on his opponent.
* Babylon 5 has both a Glowing Eyes Of Doom mode when under Vorlon influence and a glossy black eyes mode when resisting (or influenced by) the Shadows.
* Babylon 5 has flashes of this from time to time. Picked up, bizarrely enough, by G'Kar of all people.
* Babylon 5 has fun with this one. The Vorlons have used their technology for millennia to manipulate younger races into reacting favorably to them, passing off as "magical" beings of light. It is only at the "Dawn of the Third Age" that we finally see who they are, and "They are not Gods." Then there are the Technomages, who use technology to give the appearance of magic, and this famous discussion:
* Babylon 5 has his memories forcibly returned to him because the people hunting him down want to make damn sure he knows why they're after him.
* Babylon 5 has it that Nightwatch even absorbed Homeguard, a well-armed terrorist group opposed to alien affairs.
* Babylon 5 has Ivanova and Brother Edward assessing how much trouble the Captain is in and whether his skill for tactics are up to the task. He gets checkmated one move later.
* Babylon 5 has Londo Mollari, an aging politician, in a brief but passionate romance with Adira Tyree, a beautiful dancer a few decades his junior. Despite the age difference and the hyper-sexual nature of the relationship, the show makes it clear that she is truly the love of his life.
* Babylon 5 has some interesting examples among the alien ambassadors.
* Babylon 5 has Technomages, to the point that Marcus named his familiar Galen.
* Babylon 5 has the station be decommissioned and blown up after it stops being the center of the universe, which has been moved to Minbar.
* Babylon 5 has this between the Narn and the Centauri. While some individuals manage to overcome it (e.g. Londo and G'Kar), it plays a major role from the first season to the last. Londo at one point compares it to Newton's Third Law of Motion:
* Babylon 5 has this in the one-shot character Sergeant Major Plug. He comes aboard

as the chief enlisted Marine in a battalion of several thousand, and is first seen arresting several Marines for brawling, regardless of who had the moral high-ground. He shouts constantly, seems to treat his men like trash and likes phrases like "mutant maggots," but, at the end of the episode, is decent enough to give a female Marine a minute to give her lover a kiss goodbye as they head off for combat.
* Babylon 5 has three wives and a mistress, but it's kind of an aversion since he would gladly toss the polyamory and his three wives out the window, and marry just the mistress he truly loves (his marriages were political). He sums it up rather bluntly:
* Babylon 5 has two. The fourth season finale extends out to about a million years after the series and everyone has presumably died a couple segments in (100 years later). The series finale goes about twenty years and deals with how Sheridan passes on.
* Babylon 5 has Vir and Lennier commiserating over being put-upon ambassadorial flunkies, with the implication it's a regular event for the two.
* Babylon 5 have moved pretty much any way he wanted to in his true form (even through bulkheads), but chose to present himself in this way. He could seem to suddenly appear to a character due to this silent movement — not necessarily to scare but to make a dramatic impression.
* Babylon 5 have six prehensile tentacles that grow out of their backs, and apparently act as the male genitalia. At one point a Centauri is caught using it to cheat at cards, meaning that one can apparently extend several feet.
* Babylon 5, having escaped catastrophe four times. Either way, it fits; good fortune for Jinxo to escape, and bad luck for the first four stations he helped build.
* Babylon 5, he accepts his upcoming death as proper punishment (at least he gets the answer to the question he was seeking for spiritual enlightenment right before they pull the trigger).
* Babylon 5). He admits that the guns creating sound does not make sense, however. On another occasion, Straczynski claimed that the "sounds" heard during a space battle were actually part of the background music.
* Babylon 5, he always knew where he stood. For her part, Timov secretly finds that respect for her honesty rather charming.
* Babylon 5, he ends up returning multiple times in the later seasons.)
* Babylon 5, he is hailed by his people as a prophet, gaining a following in the hundreds of thousands. Hundreds (at a minimum) of Narns travel to the station to learn at his feet, to his utter horror. He ends up ordering the Narn who created the G'Kar religious statuettes (which he despised) to leave him be and go back home. Shortly before G'Kar leaves the station for good (to get away from his followers), that Narn tries to shoot him and ends up wounding Garibaldi's fiancée by accident.
* Babylon 5. He then invokes the trope by name, and they name absent friends to toast to. Garibaldi names G'Kar, Vir names Londo, Delenn names Lennier, and Dr. Franklin and Ivanova name Marcus.
* Babylon 5 hinges on a Kirk Summation that actually works. Kirk Summations also appear at other points in the series and often work, most notably during the early stages of the Earth Alliance civil war.
* Babylon 5. Humanity suffered 90% casualties while inflicting minimal losses and were about to break when the Minbari, mysteriously, withdrew and sued for peace. Why they did it is a recurring mystery for the series' first season.
* Babylon 5, humans are relatively new to interstellar travel: the first other race they met was the Centauri (who were, from the interstellar perspective, the ones who discovered them), and the Minbari have reportedly been a spacefaring race for millennia.
* Babylon 5. Human vessels on the other hand, are rather more functional-looking (unless it's the rare luxury liner or the president's ship).
* Babylon 5 humor, but it is unclear if this is a matter of cultural difference or is simply just Mollari. Likewise, Sheridan completely fails to understand a Minbari

joke that cracks Delenn up.
* Babylon 5 if anyone tries to land—likely taking the station (and the quarter-million people living there) with it. When the captain of the cruiser insists upon attempting a landing despite the warnings of Sinclair and Varn, he makes a flippant remark:
* Babylon 5 immediately assume that aliens were capable of breathing oxygen and speaking English. On the other hand, there are some species, such as the Soul Hunters, who can process both nitrogen-oxygen and alien atmospheres.
* Babylon 5: In "And the Rock Cried Out, No Hiding Place", Refa is confronted by a group of Narns led by G'Kar, who plays a holographic recording of Londo explaining that he's shown them proof that Refa was responsible for the death of several million Narns. When Refa protests that Londo is lying, the next thing Londo says is "On the off-chance that G'Kar might not believe me..." (and goes on to explain that he's freed two thousand Narns to ensure G'Kar's cooperation).
* Babylon 5 in Centaurian history. Babylon 5 is probably one of the few examples in which other civilizations have reached The Final Empire and The Final Fate.
* Babylon 5 in each episode, instead of which ones are missing as usual. It wasn't until a couple of seasons in that a normal episode featured every regular. On a more serious note, Michael O'Hare and his character Jeffrey Sinclair went AWOL after season one, and only appeared in tiny guest appearances, even when it would be appropriate to have him return. After O'Hare's death, it was revealed that the reason O'Hare left was an increasingly severe case of paranoid schizophrenia. O'Hare was offered to seek treatment before season one wrapped, but declined, saying that getting rid of the lead character mid-season one would kill the franchise before it got off the ground and that he would not be responsible for putting the rest of the cast and crew out of work, and chose to grit his teeth and bear it.
* Babylon 5 in his quarters. It's just too bad he never got the chance to actually deliver it.
* Babylon 5 in hyperspace, and the telepath pushing the button treated it as both a rite of passage and a loss of her virginity. This ultimately culminated in the Telepath War, which the telepaths lost, resulting in the Earth Alliance creating the Psionic Monitoring Commission to hunt down the remaining Psi Corps members and to re-integrate telepaths back into mainstream society to avoid a repeat of this trope.
* Babylon 5 in its most realistic form, it continues to have UN-ish elements, like preserving national states back on Earth.
* Babylon 5: In one episode, Sheridan is sleeping on a White Star for the first time and discovers that the beds are Minbari ones, which are slanted at a variable angle (supposedly because Minbari culture equates lying horizontally with being dead). He finally gets his bed balanced horizontally and lies down in it... at which point it slowly tips and leaves him with his head down and feet up.
* Babylon 5 Instead, the station was about to go under martial law and Garibaldi needed his security out on the beat, not guarding an otherwise model prisoner.
* Babylon 5. Interestingly, his most powerful statements are usually his shortest as well, in large part because they generally make more sense than usual. Often the emphasis he puts on words carries more meaning than the words themselves.
* Babylon 5 Interestingly, the Minbari war is a double-dose of this trope on both sides: the attack that killed Dukhat was started because the human ships assumed the massively powerful Minbari sensors (which were wreaking havoc with the human's less-advanced computers), sensor stealth technology (which prevented the humans from getting any readings from the interior of the ships, like energy buildup of charged weapons) and open gun ports meant the Minbari were preparing to attack, and the humans struck first in perceived self-defense. Half the Grey Council wanted to try and figure out if it had all been just a tragic misunderstanding, but Delenn was having none of that.
* Babylon 5) in the B5 universe, but time travel is so rare that even the ancient races don't really know how it works.
* Babylon 5 in the bodies of later generations of Minbari (and there is some

evidence — although not perfect evidence — to believe that this is literally true), and that the Soul Hunters' preservation process prevents that reincarnation.
* Babylon 5: In "The Coming of Shadows, when G'Kar finds out about the Centauri attack, he starts rampaging his way through everything standing between him and Londo while screaming and crying about his people being targeted and victimized again.
* Babylon 5: In the episode "Shadow Dancing", a ritual (one of the 333 Minbari marriage rituals) is mentioned whereby Delenn must watch Sheridan while he is sleeping in order to see his "True Face". A Usenet user commented "So a man's true face is all mushed up against the pillow and drooling?". A few months later, this is referenced in the episode "Atonement" by Sheridan when the ritual is performed.
* Babylon 5 in the form of Vir's unswerving loyalty to Ambassador Londo Mollari. In spite of all the harm caused by Londo's decisions, and his repeated dismissal of Vir's pleas not to do whatever, Vir insists that he has a good core and that 'someday he'll surprise you'. Turns out he was right.
* Babylon 5) in the past, and that the power of their love had something to do with it.
* Babylon 5 in the Season 4 finale. A future propagandist is using holographic versions of several main characters to engage in some historical revisionism. When Evil Capitan Sheridan is making a speech in front of a group of about-to-be-executed prisoners, Bruce Boxleitner hams it up for all he's worth.
* Babylon 5 in the sense that it is a way for an engaged couple to "test the waters" without going beyond convention.
* Babylon 5 in this case)—although he has much else to redeem himself for—and the total loss of control represented by the Keeper could be read as the "greatest fear" which is then his final chance at redemption. At any rate, he bears the Keeper to avoid the Drakh detonating fusion bombs all over Centauri Prime, potentially killing millions. The Keeper is a living symbiote that can neurally exert control over his actions, as directed by a Drakh controller.
* Babylon 5". In this case the tech worked, but an alien showed up and ate one of the two.
* Babylon 5: In "War Without End Part I", Sheridan tells Garibaldi this when the latter wants to follow them to B4.
* Babylon 5", in which the appearance of Caitlin Brown's name in the opening credits spoiled the episode's revelation that her believed-dead-for-two-seasons character Na'Toth was still alive.
* Babylon 5, in which the weapons officer enters a holographic chamber in which she sees everything from the ship's own point of view, and fires weapons by throwing punches.
* Babylon 5 is a fan of some aspects of the 20th century, such as its 20th century cartoons and motorcycles. He notably has a large portrait of Daffy Duck over his bed. He also occasionally carries a .38 "slugthrower" which was a gift from his Boston cop grandma.
* Babylon 5 is averted most often. One case provides an instance of "Pardon My Minbari": Lennier is complaining that Sheridan ruined a ritualistic dinner and grumbles some words in Minbari with a tone of frustration, to which Delenn replies, also in Minbari, in a tone that seems to convey a need to be more understanding and patient.
* Babylon 5 is from an odd angle a quirky version of this. Both the Vorlons and the Shadows seem to have, in different ways, regarded themselves as gamekeepers and the Younger Races as stock that had to be culled from time to time. It is not about a chase scene per se, though.
* Babylon 5 is implanted with an alien symbiont that forces him to comply with all orders from his real masters. Having been a heavy drinker for most of his life, he can still think relatively clearly while the symbiont has passed out completely drunk.
* Babylon 5 is pretty good that way, at least in the early seasons. From about the middle of the third season ("Severed Dreams" and on), space battles became rather

more 2-D than they had been (likely due to increased scale of opposing forces). Still, there's at least one example of a Narn ship being bushwacked by a Shadow ship from directly below; the attacker even flies right through the space where the Narn was before it got blown to pieces. There are also multiple shots of Starfuries (the human fightercraft) spinning around their centers of gravity to get a shot, without changing the speed or direction of their travel.
* Babylon 5 is revealed to be partly due to this, with a Minbari warcruiser using tractor beams to disable and pull in his ship.
* Babylon 5, is still in existence. It doesn't talk about Marcus very much any more, but it has a distinctive voice and staying power.
* Babylon 5 is that he also happens to be the kindest person you will ever meet.
* Babylon 5 is that this was at the request of Claudia Christian, who wanted a chance to be funny with her character.
* Babylon 5. It also included the "Air Dome", a premiere pilot training center and its Officer Training School.
* Babylon 5 it and Londo gets the credit, he finds himself getting pulled deeper and deeper into questionable moral territory, as he now owes quite a bit to some very powerful creditors who aren't shy about collecting.
* Babylon 5. It can be assumed that almost all species have their own time units, but the Babylon station runs on Earth time. Some early episodes referred to on-station time in terms of "cycles" (the writers never quite agreed how long a cycle was; the Drazi example was meant as a joke about that), but this was dropped in favor of standard Earth time units.
* Babylon 5. It never comes, and Neroon concedes to Delenn she is more worthy of leading the Rangers, because they would not hesitate to die for her while they would for him. He respectfully visits Marcus in the infirmary later, and confesses, "one warrior to another", that the victory belonged to Marcus, not to him.
* Babylon 5. It's likely that their superior never even realizes this happened, as he only appears when another soldier stands up for Delenn, causing a fight, which is what he breaks up; blink and you'll miss Delenn saying something to Garibaldi out of earshot before the latter intercedes on the soldiers' behalf, presumably asking him to do the interceding at least for the sake of the one who defended her.
* Babylon 5, it's not a signal that the good ending isn't as good as it seems, it's a signal that the bad ending is about to get worse.
* Babylon 5. It was the protagonists, Sinclair and Ivanova specifically, who are obstructing Major Lianna Kemmer's attempts to locate and arrest Garibaldi on suspicion of sabotage.
* Babylon 5 I've ever seen." And both these examples are just from the First Season.
* Babylon 5. Jeffrey Sinclair. According to his backstory, he comes from a family of them: The tradition of Military Brats started with pilots in the Battle of Britain, making that family tradition 318 years old.
* Babylon 5: John Sheridan and Delenn. Mira Furlan is actually 5'6", but looks quite petite next to 6'2" Bruce Boxleitner.
* Babylon 5, John Sheridan and ex-wife Elizabeth Lochley not only get along but have an implicit trust in each other that makes them an ideal command team. According to Elizabeth, they both realize that the marriage was a horrible mistake due to their aggressive command personalities. The divorce saved their friendship.
* Babylon 5: John Sheridan, to Delenn, in "Ceremonies of Light and Dark".
* Babylon 5, just her back on the station being admonished for trashing her fighter.
* Babylon 5 justifies this trope by having the station be a crossroads for many different space-faring races.
* Babylon 5 Justin just seemed intrigued or intoxicated by the sheer power they possessed, regardless of the evils it would be put to use for.
* Babylon 5 laid bare the depths of the hell his childhood was, including domestic, emotional, sexual and verbal abuse, child molestation, rape, incest, attempted murder, suspected infanticide, and attempted suicide. He is still relatively sane, by the way, if a bit asocial.

* Babylon 5 Lampshaded in one episode when a shopkeeper asks members of the Nightwatch if they were "late for their Bund meeting", invoking the Nazi collaborationist German/American Bund.
* Babylon 5: Legally gray/grey tactics are used for political and/or personal reasons.
* Babylon 5, Lennier and Vir are shown sitting at a bar commiserating on a number of occasions, having similar concerns about their jobs and various ongoing situations. It is implied that this is something they actually do on a regular basis, despite their bosses spending a significant portion of the show on opposite sides of the larger conflict.
* Babylon 5, Lennier declares his love for Delenn while they are aboard a crippled White Star that is apparently about to be attacked and destroyed. The attack is aborted at the last moment, and they are rescued.
* Babylon 5, Lennier is injured saving Mollari from an explosion and spends the rest of the episode unconscious in MedLab. Mollari visits Lennier and tells a joke. At the end of the episode, Dr Franklin starts telling the same joke. Lennier wakes up, tells the punchline, and mentions that he'd heard that one before.
* Babylon 5 let her remember, and then translate, the phrase properly.
* Babylon 5, like the Vorlons and the Shadows before moving beyond the Rim. Humans and other species of the Alliance are to take over the cycle for the next group of species to evolve, before they too move beyond the rim.
* Babylon 5. Londo attempts this with G'Kar for the assassination of Emperor Cartagia. Starts to be subverted when Cartagia replaces G'Kar's rigged-to-break chains with real ones on a whim, but G'Kar breaks them anyway.
* Babylon 5: Londo describes his wife Mariel as being drawn to men of power like a moth to flame, but in the end, she burns them.
* Babylon 5. Londo is visibly annoyed when the article on him becoming Emperor of the Centauri is overshadowed by banner headlines about comedy duo Rebo and Zooty.
* Babylon 5, Londo Mollari, especially towards the end of the series, does his best to avoid his prophetic dream of one day being strangled by G'Kar while he is Centauri Emperor from coming true, it tragically does not work as his past mistakes catch up to him, and by the end of his story arc, he clearly is unable to avoid what lies ahead of him.
* Babylon 5: Londo Mollari in the first season, where he uses cheer and wisecracking to cover up his bitterness over his current career and the failing nature of the Centauri Republic.
* Babylon 5: Londo was an accomplished duelist and member of a prominent duelling club in his youth, and owns a matched pair of cotari (Centauri duelling swords) from that period of his life. They adorn the wall in his quarters on Babylon 5, and see occasional use throughout the series.
* Babylon 5, Lorien mentions that his naturally-immortal species had a very low birthrate, "less than a handful each year". Since their immortality only made them ageless, not indestructible, their population was kept in check by injury or illness.
* Babylon 5, Lyta Alexander is Kosh's suit whenever he wants to travel or run errands incognito.
* Babylon 5 - Lyta covers her walls with "There is Danger, Remember", over and over again.
* Babylon 5 makes it onto an escape ship, even if Garibaldi has to knock her out and bodily toss her in. Fortunately this proves unnecessary.
* Babylon 5, making rather difficult to actually score a hit on a target.
* Babylon 5 managed to actually be somewhat cool by taunting a bullying lurker to punch him in the face. The lurker obliges, so Byron asks him to hit him again. And again.
* Babylon 5 Marcus and Ivanova could be considered this to Sheridan and Delenn. Subverted, since Marcus dies before Ivanova can ever reciprocate.
* Babylon 5: Marcus Cole has been known to frequent bars in the Downbelow when looking for information, typically getting it via being the only one in the room left standing. G'Kar had a similar method, on occasion.

* Babylon 5: Marcus Cole is knightly but Ivanova is not particularly ladylike, at least not in the classic sense.
* Babylon 5, Marcus knows exactly the right time to hide and set up an ambush before some guards appear. When asked how he knew, he says it would have been the most inconvenient time to be discovered, so of course that's when it would happen.
* Babylon 5, Marcus takes an increasingly frustrated Franklin through B for "boxes", M for "more boxes", and E for "even more boxes". Franklin is heard to mutter, "'And that's when I shot him, Your Honour'."
* Babylon 5, massacred thousands of races in their home universe and continue doing so every day because they believe only they have the right to exist.
* Babylon 5, Matthew Stoner's empathic powers are discovered when he manipulates Lou Welch into giving him supper an hour early.
* Babylon 5—and that before this episode, his fighting ability had not been shown or even hinted at — Garibaldi's reaction is understandable.
* Babylon 5—he doesn't want to burden her with his problems and thinks he has to do it all himself. She disabuses him of that notion rather quickly.
* Babylon 5 — in his bed. He questions his newly arrived assistant:
* Babylon 5, meaning that among the Younger Races only another Minbari ship (whose sensors can break through the Minbari stealth) can take advantage of this weakness.
* Babylon 5: Michael Garibaldi goes on a mission to the Drazi homeworld. He meets a human friend working as a bodyguard. He tells Garibaldi that rich aliens hire human bodyguards as a status symbol.
* Babylon 5, Michael Garibaldi rounds up the most vocal critics of the company to serve as the new board of directors because they certainly won't have any shortage of ideas on how to reform the company. If their idea works, they get a bonus; if it doesn't, he'll "eat them for lunch."
* Babylon 5: Minbari battle staff instantly extends from a small hand-held cylinder when you shake it.
* Babylon 5 mind-wiped as a sentence, and while seeking forgiveness for his crimes he gets his chance to answer his earlier comment.
* Babylon 5) minor characters will also fill this role for various parties.
* Babylon 5 more vibrant and motivated than Centauri, the (ruinous) extent of which they had trouble grasping.
* Babylon 5. Most of them are not shown to be any more psychic than the other races otherwise, but they all each apparently have one psychic dream at some point in their life, which shows their death. Some women are prophetesses.
* Babylon 5: Mr. Morden will give you a big jovial-looking smile, just as he's about to screw you and your entire species over.
* Babylon 5, Narn ambassador G'Kar does this when introducing an Earth food to his colleague, which he then proceeds to justify:
* Babylon 5, Narn opera apparently sounds like a lot of loud screeching, and on a couple of occasions Minbari are shown to pluck a few strings on some kind of harp. Early episodes featured what sounded like a few bars of a medieval dance tune played on a harpsichord ... over and over. The Centauri, on the other hand, seem to have something resembling the traditional style of Western classical music (hardly surprising). One fourth-season episode had a scene in a seedy club on Mars where they were playing an angsty 90s-style grunge ballad.
* Babylon 5, Na'Toth was played by Caitlin Brown; she left the show at the end of the season, and was replaced by Mary Kay Adams. The showrunner thought Adams' performance didn't suit the character as well, and Na'Toth was written out. She returned for a single guest appearance in the final season, once again played by Caitlin Brown.
* Babylon 5. Next scene, he joins the Earth Intelligence Agency to avoid serving prison time.
* Babylon 5 no private interstellar ships are shown, but commercial ships are available for common people (at least middle class) in a way similar to modern commercial flights.
* Babylon 5 novel reveals that a standard punishment at the Psi Corps academy is for a miscreant to have to stand still in the courtyard all day and remain silent

except for giving a detailed description of their infraction if anyone asks.
* Babylon 5 novels are plagued by this, because while some of them are noted as taking place after the events of specific episodes, they aren't necessarily sequential, and are all written by different authors.
* Babylon 5 novels reveal that, when the existence of telepaths became public knowledge, many telepaths were lynched simply for fear of having this ability. This is even after the Pope proclaimed that telepaths are still children of God and should not be harmed, although one Italian mobster does let a card-cheating telepath live because of this in exchange for help in catching other cheaters.
* Babylon 5 novel, the station maintenance department calls in Garibaldi when they declog a jammed waste disposal chute and find a severed human foot in the waste backed up behind the jam. The mystery deepens when security runs a DNA scan on the foot and finds that it matches a man who was reported as having left the station several days previously.
* Babylon 5 of such a crippled ship and hunted by the Minbari flagship, The Black Star, makes them pay for that policy when he places nuclear bombs in the area before sending out a distress signal, knowing that the Minbari who come to finish them off. Once the Minbari ship was in range, the nuclear weapons were detonated and they destroyed the ship; a fate the Minbari could have avoided if they were more merciful in that regard. Even so, the Minbari still believe years later that Sheridan was actually the dishonorable party.
* Babylon 5 of the show in which almost nothing is important to the overall arc of the show.
* Babylon 5 once told someone "I intend to have other plans" in response to an invitation.
* Babylon 5: One Mimbari ritual involves watching your loved one sleep, leading to a comment from Sheridan about how romantic it is to be staring at someone drooling on their pillow.
* Babylon 5 only a trained Shakespearean actor with no directorial restraint can.
* Babylon 5 only half a season in, leaving the Drakh plague story arc unresolved.
* Babylon 5 operated a planet whose power source was the core of a planet, retrofitted for space travel. It even appeared to have a ring of moons.
* Babylon 5 originally sported large canine teeth like all other Centauri, but they quickly disappeared because it made the actor talk like this.
* Babylon 5 Pilot show, this is notable averted when Kosh got poisoned and a telepath saw the events as seen from Kosh's eyes.
* Babylon 5: Plasma-based weaponry was used by both starships in the form of large-scale plasma cannons and PPGs, "Phased Plasma Guns", which were handheld weapons that varied from the size of a small pistol to an assault rifle-sized device. The in-canon justification of this is that they are safer for use inside a spaceship or space station than kinetic weapons, as the bolts will dissipate harmlessly if they strike a large conductive object (like the inside of a hull). Shipboard plasma cannons have fallen out of favor following the Earth-Minbar War, as the powerful but short-ranged weapons proved to be of little use to humans against advanced Minbari tech. Post-war, newer ship designs favored longer-ranged yet slightly less powerful weapons.
* Babylon 5 plays with it: the Ch'lonas may be insectoid and hostile to Earth, but they're so outmatched it's more an annoyance than outright war.
* Babylon 5 plays with this trope in spades: the Dilgar were a basically race of Nazi-like humanoid felines responsible for massive genocide and experimentation on sentient beings. However, they ended up extinct when their sun went nova, as they had been forced back to their homeworld.
* Babylon 5, practically all the human representatives are from the US or have US connections:
* Babylon 5 prequel "In the Beginning", Sheridan uses a false distress signal to lure a Minbari ship into a mined killzone. Subverted in that the Minbari were not accepting surrenders in any case, and the "distress signal" was simply a lure to come and destroy a supposedly defenseless enemy. However, Sheridan's ship was in fact in distress, having suffered severe damage and lost its Hyperspace capability,

so it wasn't the more traditional "fake injuries to sucker the other guy" version of this trope.
* Babylon 5 previous arcs viewers are more invested in the current one.
* Babylon 5 produced when the station rotates, with no need for a motor to close them. In the event of a hull breach or life-support failure, the doors would slam shut on their own without any active safety system required.
* Babylon 5 PsiCorps trilogy, Bester defends himself in a war crimes trial. His closing statement actually gets an ovation. While he doesn't get himself completely off the hook, his sentence is reduced from death to life in prison while on sleeper (telepathic suppression) drugs.
* Babylon 5, responsible for enforcing the rules on the other telepaths, who have the biggest problem about breaking rules.
* Babylon 5 (revival) crossover seemed to indicate that NCAA basketball was a major obsession of the Earth Alliance.
* Babylon 5 said currency (the Centauri ambassador is a friend of his and helps him out when he's on the run) doesn't help.
* Babylon 5 said wars. Who's got time to get bored with a romance when you're on the brink of annihilation every week?
* Babylon 5 says "She just forgot to mention the worker caste. That's my story and I'm sticking to it." Just how often the other two castes forget the worker caste eventually became an important plot point. The in-canon novel "To Dream In the City of Sorrows" goes into more detail about the marginalization of the worker caste: there was an objection to them joining the Rangers, members of the other two castes would lose face if they spoke in worker dialect, and before Valen came there wasn't even a pretense of them being an equal caste.
* Babylon 5's Chevron Locking Guy, and ended up as the station's second in command. The first season also featured a French-accented woman who shared Corwin's duties of announcing whenever the Jump Gate opened.
* Babylon 5, several of Sheridan and Delenn's off-screen encounters, particularly the 'problem solver' scene, fit into this category.
* Babylon 5 Shadows, her eyes turn pure black, but return to normal when contact is broken. After prolonged contact, she also began to weep black tears. Similarly, when she makes psychic contact with the Vorlons, her eyes glow green.
* Babylon 5. Sheridan also likes doing this, mostly with Delenn and/or Ivanova, when he's coming up with one of his "clever ideas" — generally Type 3 conclusions, with a bit of Type 1 occasionally thrown in for laughs.
* Babylon 5. Sheridan mentions getting the name from the French Resistance.
* Babylon 5, Sheridan pulls an elaborate troll move on the League of Nonaligned Worlds in order to get them to agree to let Whitestar ships patrol their space. A classic case of reverse-psychology on a group who would normally argue the toss about anything that was for their own benefit.
* Babylon 5, Sheridan sarcastically tells him that if he can't deal with it he should put his fingers in his ears and hum really loud until it's over.
* Babylon 5 show, full of sex and violence, which JMS had zero interest in doing. It was cancelled after 13 episodes.
* Babylon 5 shows a DRAZI wearing a rubber mask to look like a HUMAN (he's first played by a guy without prosthetics, then the camera pans to Ivanova, and when it pans back another actor in Drazi makeup removes a mask modeled after the first actor). And vice versa. Ivanova gets a little shocked.
* Babylon 5: Shows up quite often, though it's usually justified in some way.
* Babylon 5, since these changes were caused by organic growth. It was supposed to be a gradual change, and it worked. Characters weren't "revealed as suddenly evil" so much as gradually became as such.
* Babylon 5 since Valen's time. But in a season four episode, Marcus challenges Nehroon to a battle to the death under the Minbari ritual of denn'sha. Since Nehroon immediately knows what it is, that implies that the Minbari have been killing each other in formal duels for quite some time, despite this 'Minbari do not kill Minbari' principle. In one of the books they hand wave it by saying that by agreeing to fight a denn'sha duel, you agree to take responsibility for your

death on your own hands if you lose. This means that every single Minbari who died in a duel has technically committed suicide, which doesn't count.
* Babylon 5, Sinclair is put in this situation, having infiltrated a fanatical pro-Earth group, and is asked to prove his sincerity by killing an alien (and one he met previously at that). Defied—Sinclair and Ivanova start a firefight instead; Garibaldi and security soon locate them and secure the scene.
* Babylon 5's insistence that his character be visually different to reflect his development.
* Babylon 5. So far they've built 'only' one city-sized domed attraction, but given it's already a financial success...
* Babylon 5 species tours Down Below - the station's slums - and is impressed because he believes humans have deliberately segregated the inferior of their species, going further than even his species. Of course, the slums are simply the result of poverty and neglect.
* Babylon 5, Starfury cockpits can be ejected to serve as escape pods. The odds of being picked up aren't all that high. Other human and alien craft probably have similar mechanisms.
* Babylon 5 station orbits a planet called Epsilon 3. Only it's not a planet — it's a planet-sized machine.
* Babylon 5 subverted this when they had to sacrifice a ship to give the Shadows the impression that this is what was happening. The reality was that the information they were carrying was engineered to lure them into a trap.
* Babylon 5 syndication network crumbled around it and the show was not renewed for a fifth season, the fourth season storyline was reworked to complete the entire arc. The show was subsequently granted a fifth season, but with almost all of its major plot threads resolved. The fifth season that resulted was much weaker, and was composed of a lot of stories that had been cut from earlier seasons for various reasons.
* Babylon 5 tabletop game, kinetic weapons ignored armor and did standard damage, which means that you could deal the attack's full damage to the component you hit, so if you hit the hull, there was a good chance you could tear a giant chunk out of it. It's main downside was that if you hit a less-than-vital component (like one forward gun out of thirty), then the damage would not transfer to the hull like the other weapon types.
* Babylon 5 takes advantage of this trope to get out of having sex with an alien race that traditionally uses it to conclude negotiations. He goes away with the impression that human sex consists of putting your hand on someone's head and dancing around them singing. Or rather, he's forced to come to that conclusion; he probably suspects he's been conned, but to admit that would be more humiliating than just going with it.
* Babylon 5 technology to humans after the Earth Civil War, it can be assumed that future EarthForce ships will be using gravity drives as well.
* Babylon 5 technology used by the Centauri's ships, meaning they were still at a marked disadvantage. Similarly, the Minbari were given advanced technology by the Vorlons, and the humans ended up acquiring Shadow technology. In both of the later cases, the younger races were hard at work figuring out how the technology worked so they could apply it to their own designs.
* Babylon 5 that can pick up a man with one hand or fiendishly arrange for the prisoners to be lost in paperwork and found somewhere where they won't be exterminated.
* Babylon 5 that for complicated off-screen reasons ended up as the last episode of the last-but-one season) showed that humanity will eventually do this.
* Babylon 5 that its use in that civilization was as a form of capital punishment.
* Babylon 5 that pretty much everybody raises their game in their presence.
* Babylon 5: "... that's not my leg, that's my airhose!" The joke, whatever it was, was always met with howls of laughter.
* Babylon 5 that they and humans had a common origin, but DNA testing by the humans proved they weren't related. Centauri Ambassador Londo Mollari blames this on a clerical error.

* Babylon 5, the (adopted) Shadow homeworld at Z'ha'dum had most of the features of a Supervillain Lair.
* Babylon 5 the alarm to begin with. Worth noting how the command crew reacts to the Red Alert changes over time, probably as they become more experienced with such situations. In one second season battle, they have to close the blast doors covering the command center's picture window just in time to avoid getting a piece of debris sent flying into them. In the third season, as soon as a battle starts, they immediately shut the blast shield (and sure enough, midway through the battle, a crippled enemy fighter crashes into the shield hard enough to cause the internal bulkhead to buckle).
* Babylon 5 the attempt to free Sheridan on Mars is blown when one of the infiltrators is seen to have fresh blood on his uniform (leaking from a bandaged stab wound obtained previously).
* Babylon 5: The black uniforms of the Psi Cops. And the black armbands of the Nightwatch (some of whom wore brown shirts to boot). Also a man witnessed in the future trying to slander Babylon 5 personnel for propaganda purposes, and the pin on his jacket bears a symbol very much like the SS double lightning bolts.
* Babylon 5; the blow clearly doesn't connect, and JMS apologizes for it.
* Babylon 5, the Brakiri species have a religion based around ancestor worship. One of their most sacred festivals is a "Day of the Dead", on which people are visited by the spirits of the dead who were important to them. The central characters allow the Brakiri to celebrate it on the space station, only to discover that "the dead return" really does happen, and it isn't just the Brakiri that it happens to.
* Babylon 5, the Captain responded by saying that at least she didn't dream that she went to work naked.
* Babylon 5, the Centauri have Arranged Marriages of the forced variety. This results in a culture that believes weddings should be somber affairs with tears and recrimination, while funerals are joyous affairs. To celebrate a wedding is seen as bad luck.
* Babylon 5: The Centauri Republic colony world of Ragesh 3 is identified in discussions as an agricultural colony.
* Babylon 5 the conflict between Order (the Vorlons) and Chaos (the Shadows) like in Babylonian cosmology was an important part of the series mythos.
* Babylon 5: The EarthForce personnnel we see in most episodes are from the Navy and Security branches. Regular Army are informally known as GROPOs (a contraction of "Ground Pounders") and seem to have the standard mix of personal arms & body armor with squad support weapons. Close Support Aircraft are seen in battles that are stated to be pure Army.
* Babylon 5, the Earth-Minbari war started when a human commander misunderstood a Minbari gesture of respect as a signal that they were about to attack. Namely, they opened their ship's gunports while approaching, and as a bonus used scanners powerful enough to fry electrical systems on the human ships. The gesture of respect was the space equivalent of an open hand: gunports would be open but weapons would remain unpowered. Unfortunately, with their sensors overwhelmed by the Minbari scans, the humans couldn't tell that the weapons weren't powered, only seeing open gunports. Minbari leader Dukhat realized the potential misunderstanding but too late. He was killed in the opening volley, and the simple majority (i.e. by one vote) of the Grey Council voted to destroy humanity.
* Babylon 5: The episode “Infection” has an alien organic weapon which takes over a human and gives their body armor and an Arm Cannon.
* Babylon 5. The episode "Intersections In Real Time" consists entirely of Sheridan's interrogation in a dark room with no windows in an undisclosed location. The lack of a B-plot means the audience shares Sheridan's sense of isolation. He has no idea if the war is going badly or well.
* Babylon 5, the eponymous station is consistently described as "five miles long". This is, however, the only measurement on the show that does not use the metric system.
* Babylon 5 the First Ones is true. All the First Ones can do is subjugate them, not "teach" them as the two sides insist they want to.

* Babylon 5: The government and Psi Corps required that any telepath who refused to join the Corps and accept Corps discipline must take drugs to suppress their telepathic abilities. Unsurprisingly, this is worse than it sounds. The drugs also make you suicidally depressed, which is what happened to Ivanova's mother.
* Babylon 5. The highlights are Delenn shaming the Minbari Grey Council out of their non-interference policy, Sheridan similarly refusing to back down from pestering Kosh until the Vorlons give them a much needed victory against the Shadows, and of course Sheridan telling both the Vorlons and Shadows where they can stick it, ending the war by demonstrating to them that there was simply no point to it anymore now that the races they'd been manipulating had caught on to them.
* Babylon 5, the humans were pretty skeptical of the claim to begin with, but decided not to press the issue while the Centauri were willing to do business with the humans and advance their technology base.
* Babylon 5 their tumble. What makes the whole sequence crazy is the complex (and pretty accurate) manoeuvres needed to hook up the two ships, including the use of the 'Fury's 3-D thrusters, coupled with the sudden lurch back into this trope once they've linked up.
* Babylon 5 the liberation fleet must destroy the Earth orbital defense system redirected at the planet's surface by the insane governor before it opens fire.
* Babylon 5; the log is read over shots of fighters launching, White Stars flying in formation, etc.
* Babylon 5: The Lost Tales TV movie, which revolves around a man on Babylon 5 who is apparently possessed by a demon. The priest brought in to deal with the situation gives a long speech about how churches are emptying because people haven't found God in the heavens (apparently people in the future think extremely literally and expect to find some old bearded guy in white robe floating around the crab nebula, while ignoring any kind of significant religious experience down on boring old terra firma). While the possibility that the "demon" is an alien is raised early on, the ending leaves it open and even seems to lean towards the supernatural. Either way this is the creature behind the legend.
* Babylon 5 The main government agent upholding the conspiracy credits and thanks the Humans for cigarettes as he smoked one in victory. Captain Gideon ordered probes loaded with the Interstellar Encyclopedia and sent to the alien world to crack the cover-up.
* Babylon 5, the military factions of the Minbari and Drazi races both sport pauldrons.
* Babylon 5: The Minbari and the Narn cultures are the best examples of mythmaking on this show.
* Babylon 5 then wrote a prose spin-off short story "Time, Death and the Incurable Romantic", in which Marcus does get resurrected, three hundred years after Susan's death. He then steals Susan's DNA from her tomb, has a duplicate of her created, implants it with Susan's memories up to shortly before the incident that led to her life-threatening injury, and maroons them both on an uninhabited planet, deceiving the duplicate into believing that she's the original Susan and it's still 2261. This was apparently considered to be a happy ending for both of them, but it absolutely horrified many fans who saw it as a grotesque, abusive violation of the duplicate's right to self-determination.
* Babylon 5, the only fully canon novel of the B5 universe and considered by JMS an essential part of the storyline.
* Babylon 5, the original plan was to do this with the character of Delenn in season 1. The character would be male, played by a female with a male voice actor. The transformation that occurred between seasons 1 and 2 would also have been a gender change with Mira Furlan then taking over voice duties as well. It wasn't convincing, so they just went with the character as female from the beginning.
* Babylon 5, the power requirements, which would be nothing for a Vorlon ship, are significant enough that everything else on the destroyer powers down for a full minute. This can cause problems if the shot from the main cannon doesn't vaporize the target.
* Babylon 5, the President of the Earth Alliance calls for volunteers to hold back

the final Minbari advance to buy time for civilians to escape. A subversion in that, depressing as it is, the speech does motivate a last-ditch defense.
* Babylon 5, the Raiders fulfill this for a while, until they are promptly defeated for good about halfway through the first season. Afterwards, it uses different adversaries.
* Babylon 5 the recurring "ISN" news station is stormed by government forces during a live broadcast as one of the signs of President Clark's tyranny becoming blatant enough for Babylon 5 to declare independence.
* Babylon 5: There is a brief mention of a Disneyplanet, and the Centauri Republic colony world of Ragesh 3 is identified in discussions as an agricultural colony.
* Babylon 5 There is also fan speculation about a caste system among the Drakh, because of the very different look of the leaders and soldiers.
* Babylon 5, there is a memorial held to honor those who dies in the fighting in which "Taps" is heard in the background.
* Babylon 5 there's the Starshards; weapons from a long-ago war, made up of small pieces of neutronium that literally tear hyperspace apart as they travel through it, leaving a trail of realspace behind it like a comet's tail while at the same time warping the eddies in front of it.
* Babylon 5 the second Vorlon ambassador insists on using the name of the first, Kosh, and his real name is never used on-screen. It was revealed in a spin-off novel as Ulkesh.
* Babylon 5, the Shadows launch a destructive war every thousand years, which the Vorlons help to put down. In the series, the protagonists object to this arrangement, and try to put a stop to it.
* Babylon 5, the Shadow starships all used captured lesser races members as pilots fused with the hull. Which enables them to be disabled by telepaths.
* Babylon 5, the targets being adventure tourists visiting an isolated part of the continent.
* Babylon 5 the Vorlons attempted to force the evolutionary development of the younger races. Disagreement about the best way to go about this eventually led to all out war.
* Babylon 5, the whole plot where Londo could have stopped everything bad that happened to the Narns with "One word."
* Babylon 5, they can open their jump points with a surgical precision, especially if they lay an ambush. An EarthForce task force is obliterated when the humans are lured into an ambush, followed by jump points slicing open ships. The Minbari complete the destruction with their weapons, although Sheridan's ship survives.
* Babylon 5). They end up using the trick in a tricked-out new spaceship that MIGHT be fast enough to get away after using this trick to kill an enemy they DEFINITELY weren't big enough to fight. Also? Considering the amount of damage the enemy would do...going out killing it is a pretty good idea?
* Babylon 5 they had done what they did, they hadn't been evacuated when their sun turned nova.
* Babylon 5. They hold off the Shadows practically on their own while the warrior-caste stays home.
* Babylon 5. They may be unpleasant to be around, being scavangers and carrion eaters, and they are commonly described as "lazy, greedy and obnoxious", but they are pretty much the only race in the setting who were not once involved in some shady or immoral activity or acts of unprovoked violence, and the driving force of their species is curiosity and thirst for exploration. The pak'ma'ra were among the first to join the Interstellar Alliance and the Rangers, and helped other races in times of need. Also, they reportedly have angelic singing voices.
* Babylon 5, they mistook Earth for a lost colony that was in the area.
* Babylon 5. They ultimately avert it, and she leaves before anything can happen.
* Babylon 5 They use a bloody message on a wall (made with the future equivalent of disappearing ink), speakers carefully hidden in walls, and a Centauri telepath to "trigger" a fake memory.
* Babylon 5). This claim lasted for as long as it took for the humans to get a Centauri DNA sample, which proved the claim was utter hogwash. The Centauri blamed

a 'clerical error'.
* Babylon 5: This is G'Kar's reaction when he meets Ko'Dath, his very stiff and over enthusiastic new attache, who finds him enjoying drinks in a Bikini Bar. G'Kar was having a drink with Londo Mollari, who is Centauri Ambassador.
* Babylon 5. This means that any perishables will likely be spoiled when they arrive, and the shipping costs stellar.
* Babylon 5 This meant season-ending story arcs intended to keep viewers intrigued over a hiatus between seasons never lined up with the hiatus. Channel Four in the UK ignored all this and showed each season in weekly order, meaning the UK saw the last four or five episodes of each season weeks or months before the US airing.
* Babylon 5), though rescue is a bit of a crapshoot in space, especially if whatever just destroyed your fighter is still shooting in your direction.
* Babylon 5 tie-in games flesh out the rank systems for most of the races in that universe, including some of the relatively minor players. Some of this work is rather in-depth.
* Babylon 5 "TKO" ends with the champion and challenger collapsing to the floor simultaneously after a final exchange of blows, no longer able to stand under their own power—a Double TKO, if you will.
* Babylon 5 to bend the rules when necessary to maintain long-term order).
* Babylon 5 to consume the universe. And they can make you want to open it when it's still closed.
* Babylon 5 to destroy the serum, Deathwalker and her ship to prevent that (and destroy any chance of researching the process to give the younger races true immortality and become rivals of the Vorlons).
* Babylon 5 to fight the genocidal Minbari. He also constantly criticizes the other, more trigger-happy human protagonists. But then again, as the eponymous station's doctor he's the one who has to clean up after a firefight.
* Babylon 5 to finish his character's arc, he withdrew from acting. It wasn't until after O'Hare's death that JMS (per O'Hare's request) made his mental illness publicly known and talked about the real reason behind his departure from the show.
* Babylon 5 to genocide, over all other races, for the departure of the Shadows. The species has no internal "good guys", deeper motivations, or other redeeming qualities.
* Babylon 5 to get the Independents to let his people escort their shipping pays off.
* Babylon 5. To hammer the point home, much of Maynard's time spent visiting Babylon 5 had him and Sheridan trading stories about what they'd done over the years since they last met.
* Babylon 5 to justify this. It's established in-story that they're expensive and limited in bandwidth, with the result that most civilians have to rely on (hyperspace) snail-mail.
* Babylon 5 took this to new extremes with throwaway lines and scenes to have huge ramification on the entire series. The best example is an early episode of Delenn getting worried about a 'soul-catcher' in a seemingly filler episode, but is actually the answer to the mystery of the first season recurs throughout the show.
* Babylon 5 to prevent war after the Earth-Minbari war. As the later seasons show, it failed.
* Babylon 5 to replace the UN. It took a war to bring some of the smaller countries in (or something like that), and San Diego got nuked by terrorists as a result. The President and Vice President are directly elected, but the various countries of Earth still exist, subject to Earth Alliance law. However, 'Earthdome' is in Geneva, home of many League of Nations entities, not San Fransisco or New York.
* Babylon 5 tried to avert this by hiding the bulky units of CRT screens in the set design and only showing the actual glass screen, giving the impression of being futuristic flatscreens. Sadly, the curvature of the screens are a dead giveaway to what's going on, but points for effort.
* Babylon 5 tried to hide their use of CRT monitors by embedding the screens in bulky, futuristic looking equipment with lots of lights and buttons. Unfortunately you can still see that the screens are curved, like the screens of CRT monitors in

the early-mid 1990s.
* Babylon 5 TV movie "In the Beginning" has the story of the Earth-Minbari war being told by an elderly Centauri Emperor Mollari, with a neat tie-in to the 3rd season two-parter "War Without End".
* Babylon 5 TV Movie "The River Of Souls" features Captain Lochley and the station sued for harassment by the operator of a holographic brothel. The lawyer he hires is referred to as one of these.
* Babylon 5-type ships with most of the ship in zero-g and several habitation areas on rotating sections. It's mentioned that Havenites (that's pre-Peep Havenites, still good guys) are experimenting with "grav plates" to create ships without rotating sections.
* Babylon 5: Ulkesh (Kosh II) and Lyta have a scene with somewhat sexual overtones, amidst a working relationship where Ulkesh was rather domineering and abusive to her in general:
* Babylon 5, understandable as it may be, they're better off looking for another outfit.
* Babylon 5 universe had a Minbari use the phrase "30 of your minutes" when addressing Jeffrey Sinclair.
* Babylon 5 universe vs the Shadows and Vorlons throughout their incarnations.
* Babylon 5 until eight episodes later, from that episode on, they are for all intents and purposes together romantically.
* Babylon 5, until Franklin can't take any more of it and finally screams.
* Babylon 5" use a special high-tech whip that gradually increases the level of pain until dealing a fatal blow at lash number 40. G'Kar stubbornly refuses to scream until the 39th lash, even then only doing it to keep Cartagia from ruining his and Londo's plan to assassinate him and end the occupation of the Narn homeworld.
* Babylon 5 useis able to strip away their top layer of skin, including filth, microbes and dead-skin cells along with it.
* Babylon 5 use living ships that are vastly superior to most of the younger races' vessels, until they start building new ships that incorporate biotech.
* Babylon 5 uses 24 hour Earth days (measured in "Earth Standard Time", apparently Geneva time) and other units, as does the rest of EarthForce. Other races have their own sets of units, although most of them normally use human equivalent names when discussing time due to the nature of the station as being run by EarthForce.
* Babylon 5 uses this fairly frequently, especially in the later seasons. In this case, not only Captain Sheridan keeps a log, but also Commander Ivanova and Doctor Franklin. Sometimes a distinction is made between their personal and professional logs, and occasionally other characters narrate in a similar way, though without the "Log" intro at the beginning of the voiceover. They are generally used to show the characters' thoughts and reactions in a way that couldn't be done through dialogue, and they additionally help with the intended feel that the show is a historical record of events long-past.
* Babylon 5. Usually it will just be a distinctive pattern, but some of the fighters include custom artwork, occasionally taking up the entire top wing.
* Babylon 5 variety. It causes the infected to go berserk on anyone nearby and then snap back into normal without any memory of what happened (possibly, adding halucinations of a shadowy figure doing the dirty deed).
* Babylon 5, Vir and Lennier meet at a bar in the Zoccalo and, in seeming non-sequiter, alternately relate the foibles of their respective ambassadors. They end with a simultaneous "It makes me nervous."
* Babylon 5: Vorlons bioengineered various younger races to have telepathy. The Psi-Corps does extensive experimentation to allow telepaths greater abilities. Gill implants exist that allow the recipients to breathe in atmospheres they usually can't.
* Babylon 5 walks up and stands right next to them. The wind promptly goes out of their sails.
* Babylon 5) was a stockbroker and corporate jet pilot. After his acting career began, he became a radio talk show host.

* Babylon 5 was boarded by Earth troops invading via hull breach at the start of the Earth Alliance
* Babylon 5 was meant to feature a subversion, with the supposed plot hook of finding a cure for the Drakh plague that will kill all humans in five years resolved in just one season. Then the means of finding the cure would lead to more story arcs involving corruption of the Earth government and the manipulation of leftover Shadow technology that were what J. Michael Straczynski really wanted the show to be about; the plague story had been forced on him by executives who wanted the show's core premise to be able to be summed up in a few words. Unfortunately, it was cancelled long before this could happen.
* Babylon 5 was opened and closed mostly off-screen, although they did take care to actually show it open up when it was used for the first time.
* Babylon 5 was uncooperative with the interrogator. As a result, he was denied intravenous nourishment.
* Babylon 5 wear gloves and concealing clothing in public because even accidental skin-to-skin contact can cause involuntary mind reading. Later seasons indicate what when two telepaths get intimate, the resulting mutual mind-reading can get rather intense.
* Babylon 5. We do eventually find out what happened to Babylons One through Four.
* Babylon 5 went out of his way to prepare these ahead of time. While planning the whole series out ahead of time, JMS acknowledged the very real possibility that actors might want or need to leave the show. As such, he prepared what he called a "trap door" built into each character's storyline, a way to discretely end their arc and fill their intended role with somebody else. Luckily, these trap doors only needed to be used a few times:
* Babylon 5 ("What do you want?") and they realize they don't know the answer anymore. The Shadows themselves had no real ambitions.
* Babylon 5: When Commander Sinclair awakens to find the station completely abandoned, save one other, he goes to find out what's going on, only to have the lights start shutting off right before he's confronted by the one responsible.
* Babylon 5. When he hears the door open he says, without looking, "And the third player in our little drama arrives at last," implying he knew it was Sheridan and that he'd been expecting him to show up eventually.
* Babylon 5.) When he sets the trap to capture Sheridan, he even comments, "I think the last guy got thirty pieces of silver for the same job." Flashforward segments in the episode "The Deconstruction of Falling Stars," show that 100 years later, academics are analyzing Sheridan's life in much the same way people today analyze the mythology surrounding Jesus, and 500 years later a group of monks are shown with an illuminated text, in which Sheridan is said to have "risen from the dead" and then "ascended into Heaven." Slight exaggerations in this case, but not entirely untrue.
* Babylon 5 when he tells both the Vorlons and the Shadows to "Get the hell out of our galaxy!"
* Babylon 5. When he was about to lose the station to the forces loyal to the dictator of Earth, she arrives with four of her peoples ships and makes a declaration of protection. When the enemy tries to claim they have sovereign rights here, Delenn maintains her tranquil fury as she says:
* Babylon 5 when Lennier was knocked out while saving Londo from a bomb. Londo sat by his side and spoke to him, and later Lennier woke up by finishing a joke Londo told earlier.
* Babylon 5, when Londo buys the same drink - a light reddish liquid in a martini glass - for himself and Lennier, and when Lennier asks whether there's any alcohol in it, laughs it off as Lennier explains why Minbari don't drink alcohol. When he gets to "uncontrollable homicidal rages," Londo grabs the drink from his hand and pretends to have misheard the word.
* Babylon 5, when Sheridan and Garibaldi are watching her from the security office in an interrogation room. She's staring right at the camera. As soon as they switch to another camera in the same room, she turns to look at it, freaking them out.
* Babylon 5 when she's mortally wounded. And if Claudia Christian hadn't left the

show, she'd then have moved on to a cult leader who killed himself with all his followers.
* Babylon 5. When the Narn fleet was ambushed by a team of Shadow Vessels, the initial salvos of the battle took place very far from each other. The shots were cleverly edited together to maintain the necessary sense of danger. By the end, they had closed to spitting distance, but a lot of Narn vessels didn't make it that far. JMS does explicitly state in the DVD commentaries that he and the production team knew that space combat between large ships would realistically occur at extreme range but that they had to make some concessions to having an exciting TV show rather than a physics documentary.
* Babylon 5 where Doctor Franklin and a Markab doctor compare historical incidences of their respective cultures taking ultimately counterproductive measures in response to epidemics.
* Babylon 5" where he was tortured and mentally abused to near BSOD, Sheridan kills a guard. He then continues to blankly pound PPG blasts into the dead body until his friends stop him and lead him away.
* Babylon 5 where it's easy to wind up dead. Security personnel and, less often, Starfury fighter pilots, were also prone to being killed off to establish a threat in an episode.
* Babylon 5 where they are not expected, allowing them to rip an incoming ship apart as soon as it exits the gate.
* Babylon 5, which was planned in a five-year arc for exactly this reason.
* Babylon 5: While Centauri Emperor Turhan doesn't do very much, something he laments, his wife, Lady Morella, in addition to acting as a prophetess, also personally tends to Vir when he's hurt in a riot.
* Babylon 5 While ships with their own jump engines can technically jump from and to anywhere, doing so other than to/from empty space can cause potentially catastrophic problems.
* Babylon 5. While they can be spoken to, it's debatable whether they can be communicated with.
* Babylon 5 who Captain Lochley refers to in those exact terms. At the end, she takes great pleasure at informing him that, since the business in question was destroyed in the course of the film's events, the grievance was now a moot point and he'd be going home empty-handed. Add to that, part of the lease agreement the owner signed waived rights to sue if damage is done to his property during the course of protecting the station itself, which Lochley has a dozen affidavits attesting to this fact.
* Babylon 5 who masqueraded as holy figures, and at one point, a space station commander and a Catholic Priest working together could not quite determine if the entity that was possessing a person was an alien or a demon.
* Babylon 5 who promptly left the galaxy in search of something he could relate to.
* Babylon 5 who refuses to hand the ingredients over until Garibaldi pays the extra fees for the more difficult delivery.
* Babylon 5 who regularly cleanse the universe using proxy wars, believing it leads to a more evolved lifeform base. And the Vorlons are control freaks who take the form of each species' God equivalent and have a history of meddling with their culture. They're basically locked into a millennia-old debate with one another, using the other races as pawns and proofs of their own philosophies. From "Into the Fire":
* Babylon 5, whose clothing slowly turned darker and more militant over the course of the first two seasons, without ever changing the basic style. Lampshaded by Vir: "...there's no question the ambassador is going through changes. He even LOOKS different."
* Babylon 5, whose interest in each other quickly begins to heat up when they discover that they share not only a gift for military and political strategy, but an innate curiosity about other races.
* Babylon 5, who was among the first TV show producers to consistently interact with fans and answer any of their questions, with the exception of things that would spoil future plot points; on some occasions, he even flat-out lied to avoid

spoilers. This was made possible due to his having planned out in advance not only the entire five year run of the series, but the thousand years before and after that period. However, there are still some plot points he refuses to explain, in case he gets a chance to use them in a spin-off. A case in point is Delenn's toast to the disgraced Lennier in the series finale among toasts to the dead; all we get on the commentary is "That's a very sad story, and maybe I'll tell it someday."
* Babylon 5 will assume that he was bribed and send assassins to kill him.
* Babylon 5 with a sci-fi twist - being from an alien culture she has no idea what an engagement ring is and stands there looking bemused and stroking the ring box while he explains. Very smooth.
* Babylon 5 (with funny hairdos), this is somewhat notable; the Centauri themselves reference this a lot.
* Babylon 5 Within is not canon. That's right, canon and non-canon in the same book.
* Babylon 5 with Sheridan and Delenn. They walked through fire for their love, and after They Do, the series keeps on going.
* Babylon 5 with the addition of a spinning central section and less powerful but longer-ranged weapons.
* Babylon 5: With the ship powerless and about to be blown to smithereens, Lennier admits he loves Delenn. Naturally, in that moment they are saved. Delenn lets him save face by pretending she didn't hear him...which is kind, and appropriate for the Minbari, but makes him feel even worse.
* Babylon 5 would invariably show a shot of the eponymous station, or whatever planet or ship the action was taking place on at the moment, when returning from commercial. (Which incidentally makes it very obvious where the commercial went when watching on DVD.)
* Babylon A.D.: Aurora is saddened to learn from Toorop that tigers have gone extinct in the wild when she observes a tiger pen next to a Russian train station. He explains that they're not "real" tigers, but second-generation clones: copies of copies.
* Babylon A.D. Darquandier's men show these skills when tracking the protagonists through a Russian train station and refugee camp.
* Babylon A.D. opens with Vin Diesel striding through a rain-drenched arms market in Eastern Europe to complain about a pistol he bought for only $20 that misfired on him.
* Babylon A.D. says, "We're all going to die in New York". Sister Rebeka says, "She's just scared" then drinks from the flask.
* Babylon A.D. (that comes later) it's used to show how the characters are loosening up from their previous antagonism.
* Babylon A.D., the last of which is "No foul language." Toorop gives a not-quite amused smile and immediately breaks the rule.
* Babylon A.D. this is used a bit more judiciously. There's an entire wall showing dozens of channels, which makes it easier to accept if at least one of the channels is showing something relevant.
* Babylon A.D.. When the protagonists make camp after crossing the Bering Strait, Toorop has a heart-to-heart talk with Aurora about how tired he is of the wars he's seen and wants to return to the United States to live a quiet life.
* Babylon Babies an outlaw biker war in Canada is the result of two rival religious sects using criminals to wage surrogate war on each other.
* Babylon Babies; within minutes hundreds are killed as their internal organs die of old age.
* Babylon Bee, but it especially loves to make pot shots at people across the political spectrum and ideological lines, including it's "main" conservative Christian audience.
* Babylon Bee, cats wants humans to go back to work so they can get back to doing the mysterious things cats do when their owners are away, such as plotting world domination.
* Babylon Bee: Hillary Clinton has been portrayed several times as some sort of assassin with an inept disguise:

* Babylon Bee in the process, which cannot resist "fact-checking" even its most ridiculous articles.
* Babylon Bee left-wing site despite claiming to be politically neutral.
* Babylon Bee, the Republicans thank the Democrats in advance for all the free publicity they'll get during the SCOTUS nomination of Amy Coney Barrett when they start hounding a conservative working mother.
* Babylon Berlin against the Weimar government) run into each other multiple times and nearly end up wiping each other out.
* Babylon Berlin (and one of the oldest elected statesmen of all times).
* Babylon Berlin. Back then, the Nazis were a small fringe group no one imagined could take power. Only after the Depression hit did they grow popular (even then, they took power as part of a coalition at first, then grabbed it all when the pretext of the Reichstag Fire occurred).
* Babylon Berlin Berlin, a city rife with underground pornographers, gangsters, Communists and Fascists.
* Babylon Berlin: Berlin at the time was something of the queer mecca, because the local government refused to enforce Germany's law then criminalizing same-sex activity and let such clubs operate unmolested there. As a result LGBT+ people from all over Germany came there.
* Babylon Berlin. Even the police has decided that murders involving Russians would no longer be investigated.
* Babylon Berlin, Gereon is much less of a self-serving, ambitious and manipulative ladder-climber than in the novels. In particular, the early relationship between Charlotte and Gereon is flipped on its head - instead of Gereon seducing Charlotte to use her as a source of information on a murder investigation, Charlotte is blackmailed by Bruno to inform on Gereon's investigation.
* Babylon Berlin: In the Armenian's first scene, he suggests that the food being served to a criminal contact is made from that contact's co-conspirator. The man immediately begins gagging. The Armenian later stores Charlotte in his club's meat locker and threatens to butcher her.
* Babylon Berlin: Many Russian émigrés have settled in Berlin. Some are White Russians, and others dissident Communists. There is a lot of infighting among them, including murders. Additionally, the Soviet OGPU runs operations against them from their embassy.
* Babylon Berlin mostly averts the “heroic” part of the trope, as Russian exiles in Berlin are mostly depicted as unheroic (unless you count being against Stalin as a sufficient condition), and the police deliberately turn a blind eye to their infighting as long as it means they don't have to deal with them. An odd exception is Kardakov (and his cell). He isn't a liberal or a noble, but a Trotskyist and therefore every bit as communist as the people he's fighting against. His fight is still against Stalin's tyranny which was definitely worse than what Trotsky had in mind, and he makes great personal sacrifices and apparently also has no aspirations for personal gain.
* Babylon Berlin (not that the rest of the force a lot better), but also shown to be a loving husband to his senile wife.
* Babylon Berlin parked outside the venue, staffed by a small team of policemen overseeing the audio being recorded onto vinyl.
* Babylon Berlin running around, as well as a few Russians (though those are not nearly as funny).
* Babylon had as one of its central plot threads the shooting of an unarmed black teenager by police officers. Rather awkwardly, shortly after the series started broadcasting in Britain (and shortly before its American broadcast), this suddenly became a very, very, hot-button issue.
* Babylon has Japanese public prosecutors as the main characters investigating a pharmaceutical company for rigging fake test results from a university.
* Babylonian. It deals with the conflict between the primordial divine couple Apsu and Tiamat, and their descendants the Annunaki.
* Babylon Rising. The ultimate origins of the Seven reach back to ancient Babylon, where their ancestors were astrologers advising the emperors of Nimrud.

* "Babylon" starts as Islamic terrorists commit a suicide bombing against an art gallery displaying cartoons of the Prophet Mohamed. One of them survives, with Mulder and Scully seeking to communicate with him so they can find his cell, who are planning further bombings.
* Babylon station, it is of a similar but noticeably different design, with a large rotating ring section at one end and a different arrangement of solar panels/radiators/whatever those are that mostly exist to keep B5 from looking like a blueberry sausage.
* Babylon Steel protagonist of the books of the same name. For reference, Babylon is the madam of a high-class brothel and a sometime sellsword.
* Babylon was based on the fatal shooting of Mark Duggan and the resulting riots.
* Baby Looney Tunes and similar spinoffs, one character (usually Sylvester or Daffy) would try to frame another character (Bugs or Tweety Bird, respectively) without being seen. Usually, this would be seen as a misguided yet heartfelt attempt at kindness, such as planting a tree in the middle of the living room rug on what just happened to be Arbor Day.
* Baby Looney Tunes, Bugs Bunny and Lola have an argument over whose flag to plant in a block tower. They go to their rooms and have a "Did not! Did too!" argument over who asked who to help each other.
* Baby Looney Tunes for years kept everything as it is, but since 2017 they started removing the songs that are usually played between each episode, repacking every 10 minute short as a standalone episode with opening and closing themes in order to cram more advertising in between (again, this is another way to circumnavigate the law forbidding commercial breaks during cartoons)
* Baby Looney Tunes is a show meant for little kids, the Looneys are much sweeter and innocent than their adult counterparts.
* Baby Looney Tunes, Melissa decides to become an insult comic after watching one on TV. True to the trope, her inspiration is incredibly unfunny.
* Baby Looney Tunes, Taz gets one while giving Bugs a raspberry in "Things That Go Bugs in The Night". He gets another one when Daffy made him cry in "Mother's Day Madness".
* Baby Looney Tunes: The main characters wonder about the toilet in the bathroom and form their own theories about how dangerous it is, while Petunia assures them nothing is wrong. In the process, they panic when Petunia accidentally flushes it, and puts toilet paper to "Feed the monster," clogging it up. They accidentally leave her in and she comes out wet with toilet paper on her. When Granny shows her what the toilet is really for, and Petunia tells them, they don't believe her.
* Baby Love. There's only a four year age difference but Seara is an elementary schooler while her crush is ending middle school and looks older.
* Baby Mama's chances of conceiving are a million to one. She goes out and gets a surrogate etc, but by the end of the movie, guess who's pregnant.
* BABYMETAL and for the energetic and theatrical live shows they perform.
* Babymetal fans discovered the brand shares the same kanji characters with Moametal's given name. The Yui-no-Mizu mineral water experienced the same to a lesser degree.
* BABYMETAL in "BABYMETAL DEATH"; the only lyrics in the song are Japanese puns on "I am..."
* BABYMETAL: individually Kitsune; collectively The One, which is also the name of the official fan club.
* BABYMETAL (known for being nigh-impossible for Japanese artists to breakthrough), have enjoyed a memetic level of popularity over the internet, and have quite possibly become the most successful Japanese act internationally in over 50 years. While many know who BABYMETAL is, you would be hard-pressed to find someone outside of Japan who recognizes Sakura Gakuin.
* "Baby Mine", when we see the montage on baby animals and their mothers after Dumbo and Timothy visit Dumbo's mother still in the cage, a mother zebra for some reason actually has her head drawn on an individual cel while her body is drawn onto the background! (her colt is also drawn on an individual cel).
* Baby mobs are just the normal mobs with a smaller body and a head of the same

size as the old ones, but they're still very cute.
* baby."); moments later, when he and Marge have walked away and Bart hasn't budged, he tries to pull Bart away from the crib again.
* Baby Monster. The only way to stop its advance is to enter an elevator and reach the next part of the level.
* Baby Morph Episode: An episode where a character gets turned into an infant.
* Baby Moses, you have giant spiders, birds, and men throwing bricks at you.
* Babymouse graphic novels have this kind of narrator, with Babymouse often telling the narrator to shut up when it makes keen observations on her life.
* Babymouse graphic novels, the plot revolves around the title character's dread of an upcoming dodgeball game in PE.
* Babymouse. She wishes for ice cream and gets pickle flavor (since she didn't specify what kind), she then wishes for straight whiskers, only for the genie to make them straight, but so long that they touch the ground. Finally, she wishes for "someone cool" to play with, only to come back to reality, where she only has her baby brother for a companion.
* Baby Name Trend Killer: A name suffers a dip in popularly due to being associated with something or someone controversial.
* Baby Name Trend Starter: People name their babies after a popular character in fiction.
* Baby Name Trend Starter: People start naming their kids after your characters.
* Baby Name Trend Starter: Something in the news or in popular culture leads to an unusually popular name for babies.
* Baby Natasha was voiced by Kevin Clash who also does the voice of Elmo. Merry Monster was voiced by Joey Mazzarino who also does the voice of Murray Monster. Elisabeth's cat Little Murray Sparkles was voiced by Stephanie D'Abruzzo and Alice Dinnean Vernon. In 2002, Phoebe was voiced by John Tartaglia.
* Baby Not on Board and, upon seeing a picture of a fully nude woman, he screams in terror and shoots the magazine with a machine gun.
* Baby On Board. Cue the thug staggering out of the car while the cabbie calmly hands him eye drops and tell him it'll wear off in a few minutes.
* Baby orangutans, gorillas, and several other primates instinctively lock their arms around their mothers and do not let go for
* Baby Pac-Man alternated play between the video game and the pinball game.
* Baby Pac-Man. As a result, most people who try this game get frustrated at either the pinball or the mazes.
* Baby Pac-Man half was worthless), causing them to balk as well. Although it sold decent (7,000 units were produced), Bally Midway would never attempt such a hybrid ever again.
* Baby Planet killed by Cell. King Kai calls Yamcha an asshole for wording his wish that way.
* Baby Pop and his lady friend for the last room in a Love Hotel. That said main characters are father and step-daughter only makes it funnier/more awkward.
* Baby Roberta doesn't know how to say Ramona's name and calls her "Mo-mo".
* Baby Ruth and Butterfinger candy bars were often mentioned in the same ad in the 80's.
* Baby's Day Out as they get pwned by the gorilla in each of their attempts.
* Baby's Day Out, gets knocked semi-unconscious and dropped off a building and into a garbage bin at one point while he and his two co-crooks are chasing after the titular baby. He survives, presumably partly due to being only half conscious and having a bunch of objects to break his fall on the way down.
* Baby's Day Out makes use of this trope after three crooks chase a kidnapped baby into a construction zone.
* Baby's Day Out, the three villains may as well have been named Curly, Larry, and Moe.
* Baby's Day Out, the titular baby is kidnapped, escapes from his three abductors, and makes his way safely through a very busy day in which the kidnappers take such a beating that their eventual arrest is a relief to them since it puts them well away from the baby.

* Baby's Day Out to hurt anyone, he's just going about his adventure. It's the kidnappers themselves who are getting into trouble.
* Baby's First Words: A baby's first words, which are often heartwarming or funny.
* "Baby's Got Her Blue Jeans On" by Mel McDaniel is a good example of this.
* Baby Shark's Big Show! episode "All I Want For Fishmas" had its' title given in early listings as "We Wish You A Merry Fishmas", the name of a song sung in the episode.
* Baby sharks developing in the womb will fight and eat each other before they are born. Only two sharks end up being born, and that's only because there are two separate wombs.
* baby show to some facets of the fandom (both ironic and non-ironic).
* Baby Sinclair after a young man claimed that the two of them had a sexual relationship when he was 16. Clash did not deny the relationship but claimed it happened after the young man had turned 18. The accuser later withdrew the allegations, but a series of other accusers came forward in its wake. Needless to say, the "sabbatical" has turned into a full-on departure, with Ryan Dillon taking over Muppeteering duties for Elmo since.
* Babysitter Bloodbath: Before breaking in to murder her, homicidal maniac Neokalus Burr calls Sarah to deliver the following message to her in his deep, raspy, hard to understand voice:
* Babysitter from Hell: A babysitter who is mean to the children they're hired to look after.
* Babysitter from Hell , they're the ones beating the snot out of the charge.
* Babysitter from Hell, when asked what she would most like to do, the ten-year-old Ariel unsurprisingly replies "kill Syphile".
* Babysitter from Hell: You really shouldn't leave your kid with this person.
* Babysitter from Hell: Your parents are away, so I'm the king around this house, you little runt!
* Babysitters Club books where when their school holds a charity auction, one of the girls confidently declares that she's familiar with how auctions work from movie scenes in which someone sneezes and then has to buy something terribly expensive.
* Babysitters Club book that does this in-universe: Jessi goes to visit Stacey in NYC and overhears two guys discussing their plan to commit a robbery. She and her pseudo-boyfriend then spend the whole book following them around trying to get more concrete evidence, before hearing a repeat of the same scene, except this time with the two men bursting into laughter partway through and one exclaiming "Check your script!"
* Babysitter's Nightmare: A kid is so bratty that nobody wants to babysit them.
* Babysitter's Nightmare: My parents hired you to babysit me? I'll make you wish you were never born!
* Babysitting Bogus", the baby does this to Bogus at the start of the match when Bogus tries to pull off some karate moves against the baby. This leads to Bogus getting tied up to one of the crib's bars.
* Babysitting Bogus". The first time, when the baby falls off the kitchen shelf with his face filling the screen, and the second time when Bogus is flying after the baby while he was bouncing on the pogo stick on the roof, as Bogus's nose fills the screen.
* "Babysitting Bogus" with a straw to suck up a glass of chocolate milk, a whole turkey, a slice of cake, a slice of pie, a bowlful of chili peppers (though accidentally), and an entire pitcher of fruit punch.
* Baby-Sitting Is a Dangerous Job, while babysitting at the Fosters' house, Darcy tries to cook some bacon on a plastic plate in the microwave, causing the plate to melt and make a mess. The book was written in 1985, when microwaves weren't nearly as common as they are nowadays.
* Baby Snooks. Her sole reason for existence appeared to be to drive her father to the very brink of insanity, but she did it without apparent malice — just pure innocent mischief.
* Baby's parents are the leader of the Gerudo and the heir of Hyrulean royal

family. The two have been at war for centuries.
* Baby Steps. He very suddenly finds himself practicing tennis driven by a pushy mother, his own obsessive nature, and a crush on Natsu. Unique example in that he didn't have any apparent talents that made him fit for the sport, his own unique talents (his capacity for observation and his visual reaction speed) are discovered later on.
* Baby Steps is referred to as a stalker and a pervert, much to his chagrin, starting when he was caught watching Natsu in secret while she was practicing for her tennis club.
* Baby Steps is the poster child for this. He's a straight-A student before he starts playing tennis and manages to keep his grades up during his very heavy training schedule. It even leaks into his style of play and he keeps maticulous notes of every point in all his matches.
* Baby Steps: Unlike some other sports manga, not only is tennis portrayed as realistically as possible, but also how the body develops and transforms over the course of training.
* baby switch. Enrico, upon discovering the relation, tried to keep the damage to a minimum by not telling her and instead hiring a third party to make them break up. Too bad the third party's method of doing this was to lynch Wes...
* Baby Talk: Babies and toddlers speak, but have speech impediments because of their age.
* Baby Talk, though it carried over only the film's narrative device — which itself wasn't all that unusual, aside from being done in a live action medium.
* Baby Talk, when Robin asks Ted why he's attracted to her happy, infantile co-host, he says it's because she makes him feel needed–something Robin never did. We then see a series of flashbacks of Robin taking over parts of a romantic relationship usually done by men, such as paying for dinner, lying on top while having sex, and scaring away robbers with a hunting rifle. Ted reveals it bothered him, saying, "it's nice to be needed."
* Baby Taro promptly pees on both Ryoko and Ayeka throughout the eighth OVA episode of
* baby, the CDF force that retook the planet retaliated by barbecuing the alien leaders.
* Baby, Won’t You Please Come Home, Thea’s lowering opinion of her brother Oliver rapidly picks up once she learns that he’s the Arrow, justifying his previously inexplicable absences.
* Baby Yoda from fans. And then Baby Nut evolved into Peanut Jr., leading to even more hostility towards the campaign.
* Baby Yoda is in danger. While he does occasionally cause problems it's the result of his curiosity or not knowing any better.
* Baby You Can't Drive My Car", Homer accidentally crashes his car into Burns' office.
* baby zombies bursting from the bellies of the pregnant zombie mothers.
* Baccano! 2002: Bullet Garden flicks, which devolves into an argument over which one of them gets to be Steve Buscemi.
* Baccano!, a good percent of scenes in the halls of the Flying Pussyfoot have incredibly conspicuous CG'd backgrounds.
* Baccano!. Although the majority of the cast are immortal, some aren't, and since the story takes place over several decades some of them eventually pass away, and their children (or their children's children) make appearances and play important roles later on in the series.
* Baccano! and encountering a large cast of violent and unusual criminals. The story spans several decades, but mostly takes place in America during the Prohibition era.
* Baccano!, and hates him more than anyone else does for the things he makes her do.
* Baccano! and making her deliver an ear drum rattling scream, that lasts until the flashback ends.
* Baccano! and the Russo mafia family set up in Chicago, and part of the reason

Jaccuzi's hitched a ride on a transcontinental train to New York is to escape their interest.
* Baccano!, as demonstrated by Rachel, Nice, Nicholas, Luck, Ronnie (yellow), Claire, Ennis (reddish-brown), Czeslaw, Dallas, Jaccuzi (brown), and Sylvie (gray). Even more so in the books, where color illustrations apply this to Firo, Isaac, Lua, and Eve as well (not to mention the not yet animated characters).
* Baccano! as they are depriving hardened criminals of their ill-gotten gains. Given their general stupidity, this was bound to happen.
* Baccano! before immortality) has to deal with the annoyances of not looking his age, such as getting carded at age ninety, being detained for claiming he was seventy on his passport, and constantly being called 'babyface'.
* Baccano!. Both harmless robbers with a staggering lack of common sense.
* Baccano!, but seeing as it's primarily set in 1930s America, this should come as no surprise...
* Baccano!. Curiously, Ladd Russo and Christopher are on that page too, but they're completely unaffected.
* Baccano!. Damned if we know what the hell he was talking about half the time.
* Baccano! do). Since they're inseparable for their entire screen time, it's impossible to tell how genki they are individually.
* Baccano! do this. The most notable are the years between 1970-2002 in the novels where Maiza, Sylvie, and Czes spend a long time with the broad needle in a haystack reason of finding the other immortals who have scattered across the planet over a few hundred years.
* Baccano! enjoys this trope almost as much as it enjoys dragging people under moving trains and grating their limbs and faces against the rails, which is a lot.
* Baccano!. Ennis has a hard time figuring out what love, marriage, and sex even mean.
* Baccano! enters a train with a knife drawn and orders everyone to get down. At the same time two rival factions of mobsters enter with guns and do likewaise. He promply leaves.
* Baccano! entertain the idea of Jacuzzi being eaten by the Rail Tracer (who, in their minds at the time, is represented as a comical giant green worm terrorizing the train corridors.)
* Baccano!: Even the most innocent and endearing characters in the series have connections to either the Mafia or Camorra.
* Baccano!, expert assassin Claire Stanfield, or both. Turns out both of those roles were taken by the supposedly murdered redheaded conductor.
* Baccano! finally catching on to the fact that they've stopped aging...after seventy-two years.
* Baccano!, Firo does this with his brand-new hat several times while fighting four thugs.
* Baccano!. (For example, they once attempted to steal all of History itself... by stealing the front step of a museum, rendering it impossible to enter. Another theft saw them attempt to steal from the very Earth itself... by mining for gold. For nine months. In a cave that had no prior history of ever yielding gold.)
* Baccano! for her to agree to marriage, and though they're now living together hasn't tried anything.
* Baccano! got 13, although episodes 14-16 were released later as bonus material.
* Baccano! had a bit of an In Love With Your Carnage moment when fighting Chane. Even more so when fighting Ladd Russo.
* Baccano! has a fun standoff as three separate groups simultaneously try and hold up a dinner car on a train. Two groups have guns and the third has a knife. The guy with the knife quickly apologizes, closes the door, and walks away.
* Baccano! has a modified mini-gun that she wields one-handed in combination with an over-sized Gurkha Knife in her other hand, much to the shock of her associates. To be fair, they often compare her to the Terminator.
* Baccano! has both the very talkative Ladd Russo, who is technically an assassin even though his killings on the train are strictly pro-bono, and Claire Stanfield (aka Vino), who is infamous for leaving unrecognizable remains.

* Baccano! have Aging, a roughly seven-foot-tall woman with a physique resembling Michelangelo's David, only with breasts and 50% more muscle definition. While she intimidates the hell out of most men (it's somewhat reasonable to be afraid of a woman who uses a minigun as a one-handed firearm), the text makes it clear that the muscle makes her no less attractive.
* Baccano!. His stepbrothers are more than a little annoyed with this practice.
* Baccano!, in the anime he wear it with button closed, in the Light Novels he wears it open.
* Baccano!, Isaac advises Miria that the two of them should act casual to avoid suspicion. Isaac and Miria's idea of "acting casual" inevitably makes about as much sense as anything else they do - which is to say, none.
* Baccano! is any different other than that she didn't immediately say no.
* Baccano! is his violent reaction to his friends (who, like Dallas himself, are two-bit thugs) ever mentioning his little sister Eve.
* Baccano!) is married to a gorgeous and talented pianist named Kate — who loves him despite his less-than-legal activities, no less. He is aware of his thuggish looks and is kind of defensive about it when it is brought up.
* Baccano! is more often assumed to be Huey Laforet's sister or lover than his daughter.
* Baccano! is New York. There is an exception in the Flying Pussyfoot story, which takes place on a transcontinental railroad... heading to New York.
* Baccano! isn't technically a "demon", much less pure evil, supposedly his true form is such that humans can't even grasp it. Apparently, the only thing that registers in people upon seeing his true form is an utterly overwhelming feeling of fear. In series, this form is portrayed as just a fluttering shadow on a wall accompanied by a creepy, echoing voice.
* Baccano! is the main protagonist and why the series doesn't have a conclusive ending. The anime tells the story in a completely non-chronological order and invites the audience to put all the pieces together, in contrast to the books, which are slightly more linear.
* Baccano!. It also focuses on different types of immortals, with 'incomplete' immortals that don't age but can die and 'complete' immortals that neither die nor age but can be killed by other complete immortals.
* Baccano!, it comes off less as a shocked reaction and more as an exasperated observation.
* Baccano! - it eventually becomes clear that eternal life is exactly what it claims to be: Life, only (infinitely) longer, while the 'devil' they made a deal with for it is more of an amoral observer than a malevolent force.
* Baccano! it's to see him in an alley, reasonably enough but a little overeffusively cowering and weeping in front of three guys with guns, begging them to put the guns down. They're rather puzzled because they were expecting a badass. Then it gets weird.
* Baccano!, just to name a few. It seems on the surface to primarily be a sort of mystery/thriller with a bit of action thrown in, but it's also got a not-insignificant amount of slice-of-life often by way of... interesting characters (like an Irish faerie who lives in a high-class Tokyo apartment), but in a way the best single descriptor for it might actually be a romance deconstruction. With some reconstruction later on. And not in any way that one would normally think of a romance being.
* Baccano! kills several mooks by pulling them out the windows of the train.
* Baccano!, Ladd Russo and Graham Spector. Of course, then there's Claire Stanfield, who's in a category all his own. But he still manages to ham up his philosophy while fighting Graham and Ladd.
* Baccano!: Ladd Russo enters with the line "Thank you! fuck you! The star is here!"
* Baccano!, life is pretty cheap in general, and it's not just the immortal characters who get maimed.
* Baccano! light novels suggest that the mother of Huey's children is his former alchemy teacher, Renee.

* Baccano! like they're picking apart the show you're just about to watch.
* Baccano!: Luck does most of the talking and business for the Gandor family. His friendship with Firo is also the reason the Gandors have a good relationship with the Martillo Family. His brothers are either too quiet or too aggressive for such a responsibility.
* Baccano!, Maiza seems to play something like this role to the Martillo crime family.
* Baccano! makes one realize that he is the one who started his own urban legend. Awesome.
* Baccano! masochist. To them, "I'll kill you last", means "I love you", specifically, "I'm saving you for last because I'll enjoy killing you the most."
* Baccano!, Nice blows up the wall of a warehouse when coming to Jacuzzi's rescue. "But Nice, the entrance was right there, why did you blow up the wall?" "Why did she blow up the wall? What kind of stupid question is that? Boss likes blowing things up, so she blew up the wall!"
* Baccano!: Nice Holystone serves this function in the delinquent gang during the 1932 arc. With gusto.
* Baccano!. One character (Tick's younger brother) had to guess at his gender based on his voice — and, even then, he wasn't really sure. Firo also skirts the trope a bit. Nobody's ever mistaken him for a woman, but cops and FBI members have a habit of taking jabs at his appearance, like insinuating that he only got promoted to Capo because he was pretty enough to sleep his way up the ranks.
* Baccano! one of the white suit's face is ground off from having it held down on the railroad tracks. From a MOVING train.
* Baccano!, on the other hand, stands well over two meters and is described as having a build like Michelangelo's David, but with breasts and 50% more muscle. Luchino barely reaches up to her chest.
* Baccano! on the part of Keith Gandor, but the other two Gandor brothers, Luck especially, recognize that it's also because their relatively small organization is not equipped to compete with the larger organized crime families currently running drugs.
* Baccano! pair, are twice as flakey. For instance, they think the fact that no one has ever found gold in a given hill is a perfect reason to dig for gold there, and that to perform a "train robbery", you take a train somewhere, rob someone, and then use the train to escape.
* Baccano! people immortal just so that he can absorb them in this manner.
* Baccano! pulls a classic shoulder-tap-to-face-punch combo on one of Dallas' buddies.
* Baccano!, Rachel temporarily travels underneath the Flying Pussyfoot train after escaping from the captive diner car.
* Baccano! rather than black (as the result of an extreme and perpetual case of red eye), but nonetheless matches all the connotations of the trope.
* Baccano!) relaying the 1930 story to a Japanese tourist in the present.
* Baccano!, seeing as he's not present like everyone else is. "Maiza" responds...?
* Baccano! seems to completely buy it and apologizes for his earlier rude behavior, saying he didn't realize they were with the church.
* Baccano! separately remarking that, deep down, he's too nice to really be cut out for a life at the top of a Mafia family. He pushes himself to act cold and ruthless in order to be able to properly fill the role.
* Baccano!, she suggests clothes. Upon hearing this Claire immediately jumps to the conclusion that he should get her a military uniform, the suggestion being that he believes anyone automatically looks sexier in a military uniform. Rachel manages to talk him down into getting her a normal dress, but not out of sewing knife-holsters into it.
* Baccano! shortly after the mission, he comes to regret this in 2002 when one of his underlings finds them in a dossier regarding the Lotto Valentino bombings.
* Baccano!, sometimes he likes to switch his Lovecraftian terror aura on while still in human form — it does wonders for negotiations.
* Baccano! spent around 250 years, from the early 1700s to sometime during the Cold

War, trapped in a crevasse in the Arctic Circle.
* Baccano! (such as a scene in the first episode that never gets referred to again. At least in the anime...). Carol's answer? Sequel Hook.
* Baccano! Than Thou (especially since Claire is actually fairly heroic and virtuous compared to Ladd)
* Baccano!. That would seem substantially more difficult than catching bullets with your hands.
* Baccano!, the FBI (or rather its pre-1935 incarnation, the Division of Investigation) has a branch dedicated to affairs regarding immortals and alchemy headed by Victor Talbot, an immortal himself.
* Baccano! them (which gives them their memories in the process). There's also lesser versions of it that grant invulnerability and the weakness to being absorbed but not immunity to aging.
* Baccano! the "number one problem child" for moving around too much and leaving the plot of the third novel "in ruins".
* Baccano! to be yet another reason why Huey Laforet is a terrible person.
* Baccano! uses small throwing knives as her weapon of choice. She's skilled enough to deflect bullets and throw them with pinpoint accuracy.
* Baccano! usually get away with their crimes because they are so absurd that no-one can take them seriously, or believe that they could pull something like that off. For example, they robbed a Mafia money delivery dressed up as Babe Ruth and Ty Cobb, and knocked out the wise guys with baseball bats in the middle of the day on an open street only a few yards from their office.
* Baccano! were already divided in conflict before they received their elixir of life. Immortality should've resolved most of their disputes and rendered the rest futile to continue. But the gifting demon left an escape clause in case they tired of eternal life; they could absorb each other to take all their knowledge and experience. They quickly figured how this might be used against each other.
* Baccano! when they least expect it; freaking the shit out of his uncle by shooting an empty shotgun into his face (and then, in the manga, coming right back to his office to do it for real); punching people's skulls in while rambling on about champion boxers; dancing around like a five-year-old in a pool of a friend's blood; getting his shiny new white tuxedo stained with the blood of his victims; and using someone's corpse as a hand puppet.
* Baccano! when they speculate with horror on Jacuzzi's fate at the hands of the mythical Rail Tracer. Which, by the way, they visualize as a giant green worm with fangs.
* Baccano!), which came across as cheerfully final, the OVA ending says the traditional "What's Next On Baccano!", implying the characters' continued adventures.
* Baccano!, who considers anybody to be disposable, including homunculi created from his own cells, to misfit gangsters given an incomplete immortality serum JUST to ensure they are easy to dispose of — if you think that's a contradiction, you need to watch the show.
* Baccano! within the empty eye socket covered by her eyepatch. A bomb is also how she lost the eye in the first place.
* Baccano!, written by Ryougo Narita. There is only some overlapping here and there, though, and never enough to change plot lines.
* Bacchos ("God/Jove the Father") was identified with Zeus, father of the gods.
* Bacchus orders all his nymphs to dry up their rivers with the exception of one near Nemea. This forces King Adrastus to take his men their and sets up a chain of events that delays the war another few weeks.
* Bachelor Auction: A bunch of male characters auction themselves off to raise money, often for charity.
* Bachelor Auction in a murder case, forcing him to ditch her to save Monk and Marci Maven from a killer. And then Monk and Natalie expose her as a murderer.
* Bachelorette Party: Chapter 6 has the Girl Scouts forced to flee their hotel room when the Norwegian Mafia shows up, despite the fact that all four women are barefoot and Mandy is wearing only underwear.

* Bachelorette Party to have the group dress up in show appropriate cosplay to blend in with the fans.
* Bachelor Mother, in which Acme isn't making products. When Polly gets fired from her Christmas seasonal job, the temp agency she returns to is called Acme Employment Services.
* Bachelor Mother—the supervising floorwalker demotes Freddie, complete with yanking the carnation out of his suit.
* Bachelor Party came from an actual bachelor party thrown by producer Ron Moler and a group of friends for fellow producer Bob Israel. In fact, several members of the cast and crew involved with the production of the movie were at that party when the idea began to take shape.
* Bachelor Party: Debbie's friend Phoebe digs into a bowl of cat food at Debbie's shower thinking it's pate. She keeps chowing down after Debbie's mom tells her it's cat food.
* "Bachelor Party", Doyle attends his ex-wife's fiance's bachelor party. He knows in advance that the man is a demon, but his family has assimilated into human society. Then he finds out that they have a custom whereby they eat the brains of the previous spouse to ensure a happy marriage.
* Bachelor Party. Neither he, the passengers nor the car suffer any kind of damage, but the passengers end up kissing the guy's butt when they lean in to kiss each other.
* Bachman-Turner Overdrive’s “Takin’ Care of Business” found renewed popularity after being used in an ad campaign for Office Depot/Office Max. Composer Randy Bachman has said that he’s made more money from licensing the song for commercials than he ever did during its run on the charts.
* Bachman-Turner Overdrive, a band cited as one of the precursors to heavy metal, hit the US top 10 only once - with the novelty song "You Ain't Seen Nothing Yet".
* Bachman Turner Overdrive's 1975 single "Hey You" blatantly recycles the arrangement and much of the tune from their 1974 single "You Ain't Seen Nothing Yet". Randy Bachman's later band Ironhorse had a hit with "Sweet Lui-Louise", which also was a rewrite of "You Ain't Seen Nothing Yet", including the use of stuttering in the lead vocal.
* Bachman Turner Overdrive were very popular in the U.S. and Canada in the 1970s, but didn't get much recognition from critics in Canada, mostly because of their loud rocking style as opposed to musicians like Joni Mitchell and Neil Young. They complained in the song "Welcome Home":"It doesn't really matter, If we're nothing at home"

* back already been there. The all-too-common example would be asking a stranger, "Want to go back to my place?"
* Back around the time of the second Punic War, the Roman government decided to basically insure ships carrying supplies to legions overseas. Two businessmen deliberately sank rotting ships filled with worthless cargoes, then exaggerated their losses. Upon attempting to use violence to escape a trial before the people, capital charges were substituted for the original fine and quite a number of people wound up exiled.
* Back Arrow, height is measured in "gents", with appears to be an equivalent of meters, since a character of average build states that he's 1,78 gent tall.
* Back Arrow. However, unlike most instances of this trope, most if not the entirety of the villagers survived and relocated to the ship so that they can find a new home.

* Back Arrow, the entire continent of Lingalind is surrounded by a wall so massive, you can't see its top - it just blends into the sky. It's revered as God by the inhabitants and they believe that beyond it there's nothing but void. It's made quite explicit that saying otherwise is heresy and could get you killed. This belief is challenged by the title character, who insistently claims to have come from beyond the wall.
* Back at SDCC 2013, the crew shared some upcoming teasers, including
* Back at the Barnyard as she says "I'm a pretty ballerina" before collapsing to the floor.
* Back at the Barnyard: At the beginning of "The Farmer Takes a Woman", after the animals' party is interrupted when the farmer shows up to mourn his dead wife.
* Back at the Barnyard episode "Chez Pig", after the animals open a café selling Pig's family recipe pies, Freddy gets their place's birthday jingle stuck in his head and sings it when he tries to sing the jingle from another restaurant.
* Back at the Barnyard episode "Dummy and Dummier", Freddy gets a dummy that begins terrorizing the other barn animals and leaving them to assume Freddy was doing it. As it turns out, the dummy was being controlled by the termites that were living in the tree the dummy was carved from and they were taking revenge for their tree being cut down.
* Back at the Barnyard episode "Fowl Play", Otis, Pip, and Pig interrogate a Gopher to find out where Peck is when Freddy was accused of eating him. Otis plays the good cop, and Pip plays the bad cop, leading to this exchange:
* Back at the Barnyard episode "Mr. Wiggleplix". It has been a running gag with Abby; she brings out four books and a magazine article.
* Back at the Barnyard episode, "Otis' Mom" was dedicated to Lee Paulsen, mother of voice actor Rob Paulsen.
* Back at the Barnyard episode, "Saving Mrs. Beady", the plot starts off with using the titular neighbor's car for Abby's driving lesson. She starts to play this trope, only to subvert is as she just activates the windshield wipers. Later in the episode she plays it straight when she accidentally crushes Peck in a hospital bed.
* Back at the Barnyard episode, "The Haunting," Pig gets possessed by the ghost of Winky, a rabbit who lived on the farm 150 years ago, who also captures the rest of Otis's friends. When Bessy orders Otis to suck out Winky's spirit with an ecto-vacuum, Otis objects, worrying he might suck out Pig's spirit by mistake, leading to this exchange:
* Back at the Barnyard had Otis disturbing the spirits of deceased house pets when he built a shack over where they were buried.
* Back at the Barnyard has Freddy attempting to change the "Days since last accident" sign. When he does, he falls off the ladder he was using prompting a long and exaggerated cycle of him falling.
* Back at the Barnyard has Otis posing as a television reporter. When Mrs. Beady tasers him, he declares "This just in: I'm in horrible pain!" before passing out.
* Back at the Barnyard hypnotized to try and kill the Farmer every time he hears a bell ring. (Some context: He's watching a boxing movie where the protagonist’s opponent is named "the Farmer", and the bell refers to the ring bell.) His friends break the trance by setting up a effigy of the Farmer, and he comes to when he destroys it.
* Back at the Barnyard: In "The Good, the Bad and the Snotty", Snotty Boy feeds the animals pizzas laced with hot sauce. While everyone has the standard reaction, Pip (a Mexican mouse) is able to stomach it and calls the others lightweights.
* Back at the Barnyard — comic example: Freddy the ferret is obsessed with eating his best friend, Peck the rooster.
* Back at the Barnyard. Otis and Pip are in outer space, with no idea of how to pilot the space shuttle they are in. Pip makes a remark about how, "that ship has sailed." Otis acts as if this reference to ships gave him an idea, saying, "Wait a minute? Ship? Sailing?" But then he admits, "No, never mind, I've got nothing."
* Back at the Barnyard, Otis disguises himself as a news reporter, and Mrs. Beady, seeing through his ruse, zaps him with a taser.
* Back at the Barnyard, the crows make a fake map to make Otis and his friends

leave so they can get the corn supply.
* Back at the Barnyard: The episode "Little Otis" was written by Chris Hardwick, who voices Otis.
* Back at the Barnyard usually consist of the barn animals throwing on wigs and clothes despite their obvious snouts, paws/hooves, and furs. To top it off, Otis' human disguises have names like "Dick Human" and "Bob Notacow."
* Back at the Barnyard, we have a strange flashback from Abby, after Otis compares another character to the 'crazy uncle they've never had'.
* Back at the Barnyard who wants to redecorate the barn and forces all the animals to relocate to an ad-hoc shack that can barely contain all of them. The shack explodes as soon as Pip (a mouse) squeezes himself in along with the rest of them.
* Backbeat in their Hamburg era, and focuses on tragically doomed Stu Sutcliff and his romance with Astrid Kirchherr (a solid performance by a young Sheryl Lee).
* Back before railroads had crossing gates, they had actual flagmen who would stand at an intersection and swing a lantern to warn approaching traffic of the train. In a lawsuit over damage and injuries due to a collision at night the flagman, who might have been intoxicated at the time, testified that he did swing his lamp to try and warn the approaching motorist. This may or may not have been true, but he failed to mention that his lamp was not lit.

* Backdraft, a BMW is parked in front of a fire hydrant. The firefighters take a certain glee in smashing the car's windows so they can thread the hose through to the hydrant.
* Backdraft, an explosion throws Rimgale backwards into an iron fence. One of the decorative spikes goes into his back and comes out through his shoulder. His reaction is a deadpan:
* Backdraft, as they feared that Japanese audiences would be uncomfortable with the attraction, considering how Japan has been home to many devastating earthquakes.
* Backdraft begins with the main characters, Stephen 'Bull' McCaffery and Brian McCaffery, as kids.
* Backdraft, Brian McCaffery approaches an imprisoned serial arsonist, Ronald Bartel, when in need of assistance in finding the missing links between a string of recent fires that seem to be connected.
* Backdraft: Brian McCaffery is having sex with his girlfriend on top of a firetruck when the alarm goes off. They quickly put on their clothes, but find themselves racing through the streets on top of the vehicle, its sirens blaring. When the firetruck gets to its destination, a fireman unreels the hose (stored on top of the truck) and is surprised to find a bra entangled in it.
* Backdraft. Brian McCaffery is having sex with his girlfriend on top of a

* Backed by the Pentagon: A film portraying the military receives support from the actual military.
* Backed by the Pentagon for the first two seasons because the Navy, following the Tailhook incident and the controversy of introducing females on combat ships and fighter planes, were in a hyper-sensitive mode and didn't want to be associated with a TV-show dramatizing crimes committed in the service.
* Backed by the Pentagon: The entertainment industry maintains business connections with the national government; for example, Hollywood asking the US Department of Defense to loan military equipment for use in films.
* Backed by the Pentagon, the issue usually tilted towards acceptance.
* Backed by the Pentagon. The Stargate Wiki notes that it explicitly made clear that Area 51 didn't have any alien technology stored there until after the Stargate Program became active otherwise the show would have risked losing their collaboration with the U.S. Air Force.
* Backed by the Pentagon with the addition of the two missile pods and the mine pushers.
* Backfire!, and the brother of one tries to become the first male firefighter.
* Backfired horribly when they tried it with Earth Alliance: realizing what the Centauri were trying to do, the human government decided to buy as little technology as they could and reverse-engineer it, allowing Earth Alliance to become a major power-one that rivals the Centauri, and occupied a number of abandoned and resource-rich Centauri systems before they got around to reclaiming them. They also started actively seeking new advanced technologies to do the same with them.
* backfired spectacularly where they began to actively hunt down U-boats and even send expeditionary forces.
* backfired when the Liberals ran their own ads where Trudeau echoed the "just not ready" line to dismiss Conservative complaints and promote his own party's agenda. Furthermore, that attack ad campaign lowered public expectations about Justin Trudeau so much that he was able to easily sail above them and charmed the electorate with his grace and savvy to win.

* Back-formation is what it is called when you make a new word by removing or replacing a suffix or prefix (or something that looks like one but isn't) from an existing word. English has a very large number of these so there can be a lot of surprises when you look what words came first. For example, many english verbs were made by removing the -tion, -er, or -ing ending from a noun.
* Back for the Dead: A character who hasn't been seen in a while returns only to get killed.
* Back for the Dead this was part of his death. He accidentally swallows a whole container of Viagra in a failed attempt to overdose. His penis inflates to ridiculous proportions and he throws himself out of a window, landing face down, with his hips nowhere near the floor.
* Back for the Finale: A character who hasn't appeared in the series for a while returns in the final episode.
* Back for the Finale: A character who hasn't been seen in a while returns at the end of the series.
* Back for the Finale, along with the entire main cast from all past years and multiple recurring characters.
* Back for the Finale, hence the unusually graphic blood effects used when he gets shot. In the end it turned out to be academic, as the mooted fifth season never happened.
* Back for the Finale he now has the requisite cynical demeanor, facial scar and eye damage, though without the obligatory eyepatch (he was originally to have one just like his former arch-enemy Travis, but the actor believed that a scar would be more subtle).
* Back for the Finale: If the written-out character doesn't return until the end of the series.
* Back from the Brink: The hero's home would have had its fate sealed had the hero not returned in time to save the day.
* Back from the Brink: The story begins with the enemy about to kill off the players, then you have to fight back.
* Back from the Dead: A character dies and comes back to life vs. a character dies and doesn't.
* Back from the Dead: A deceased character is resurrected back into the world of the living.
* Back from the Dead a few times after being killed. The net result? Death penalty for even mundane things!
* Back from the Dead after his mother, a nun who worked at an insane asylum, was accidentally locked inside late at night and gang-raped, and that the reason for his immortality is because he's actually serving three dream daemons.
* Back from the Dead again. This time, the Russian Orthodox Church found a more permanent solution: canonizing the real Demetrius as a saint and threatening to burn anyone pretending to be him as a heretic. This time it worked.
* Back from the Dead, and describe his miraculous return with casual arrogance. What with everyone doing it nowadays, not so much. (Doctor Doom prefers to be as unique as possible.)
* Back from the Dead, and from there she offered a fee, introduced herself to Shepard as a fan, left the emotional baggage other crew members have behind and only asked that Shepard consider helping her on a heist to recover her lover's greybox.
* Back from the Dead and having killed a White Walker in single combat does god-like wonders for one's reputation.
* Back from the Dead brief (three whole episodes!) season 4, which immediately undid season 3's finale for the sake of having the Autobots and Decepticons fight again.
* Back from the Dead bring him back as a mindless monster, at which point Domon

steps in, saying that since the fight was over and the dead fighter had been laid to rest, it was no longer a tournament fight (and since it relates to the Devil Gundam, it's officially his business, plus as a martial artist he's offended by how the DG Cells are corrupting the dead man's fighting spirit).
* Back from the Dead comes when her clasped hands twitch and then unclasp.
* Back from the Dead, criticizing Batman for being too "soft" on criminals and wanting more than anything to kill the Joker.
* Back from the Dead for vengeance, or simply to kill you a third time. They develop fears, vulnerabilities, immunities, mental ticks and varying injuries; All in which you can either exploit, use your advantage, realize too late, accidentally trigger and get killed by, or puke while looking at... respectively.
* Back from the Dead friends (Ishida, who committed the well-intentioned but huge mistake of trying to calm him down from such a rage):
* Back from the Dead, he and Celia discuss their different attitudes to violence. Roy notes that Celia, being an outsider, will sort of merge with her native plane of existence when she dies, while most other races have elaborate afterlives and at least the possibility of resurrection. He concludes that in a world where people didn't know for certain the afterlife was a real place, there would be much less war.
* Back from the Dead. He, however, was a ghost or some other sort of psychic projection, and didn't have to worry about falling through the floor because he was essentially imagining himself wherever he liked.
* Back from the Dead; he's shown next to his reflection in the window to let the audience know he's not a vampire. Turns out he's actually a robot.
* Back from the Dead in a yacht sinking. He goes to apologize to his ex-fiancé Laurel Lance, as he was cheating on Laurel with her sister Sara who was on the yacht at the time. Laurel tells Oliver he should have died instead of Sara and he agrees with her, even though she later takes back the comment.
* Back from the Dead looks at a photo montage of the Scoobies on her bedroom wall and sees their faces as skulls. These and other hallucinations indicate that something else came back with her...
* Back from the Dead of souls at the end of the War in Hell rendered the landscape unrecognizable.
* Back from the Dead... once. Since his soul took too long to find his body, he is now a living, still killable skeleton. But with training, he has subverted the trope by expanding on his power, making its ability to revive him only one aspect of his powers.
* Back from the Dead, one each month, in order to spend time with him. They are okay with this because each woman genuinely loves Humfrey in her own way and he's the type of person who's only tolerable in small doses.
* Back from the Dead, to check its own growth through intentional means, and work together to repair the damage done in the past.
* Back from the Dead. Turns out they were suppressed, but it took him a good year in-series to fix that as the Dingos held Angel Island and the Master Emerald.
* Backgammon: Possibly the most ancient game in existence that is still widely played, though waning in popularity; the goal is to move your pieces into your own "home board" while doing everything possible to stop or outrun your opponent. Many of the higher-quality kits have boards that close and latch like a briefcase (with handle) for easy transport.
* Backgammon Rushing toward an easy jump is more often than not a surefire way to lose a game in which your luck depends on a roll of the dice.
* Background Body Part - Framing a character to look like they have an unusual body part, such as horns.
* Background characters Elders Thomas and Church are also popular enough to have picked up fan-chosen first names - Chris and James, respectively.
* Background chatter also reveals that donuts, chocolate, and other confections have been developed for the other protein chirality, as well.
* Background Halo: A character's head placed below a circle or oval or in front of something shiny.

* Background Halo - Placing a silhouette of light around (or above) a person's head
* Background Magic Field is memorably ended with timely intervention by a floating, singing, pastel novelty ass.
* Background material also indicates that full-sized Zentraedi are not permitted to set foot on Earth after the first series, though "micronized" Zentraedi are perfectly fine. Apparently Earth got fed up with Zentraedi revolts after a while and wanted an easier time of keeping dissidents under control.
* Background material also refers to a vampire by the name of "Enhance", who has sided with the Church and works to annihilate his own kind. Apparently he is a relatively "young" vampire and rejects his monstrous nature, holding onto as much of his humanity as possible.
* Background material establishes that mutation will occur faster or slower based on which god a mortal worships primarily. The followers of Tzeench (the Lord of Change) are most prone to bizarre mutations (the Thousand Sons Legion became haunted suits of
* Background material. In an unintentional "screw you" to her supremacist aunt, who despised Hogwarts for allowing Muggle-born wizards and witches to attend, Ilvermorny was founded by the girl with the help of her Muggle (well, No-Maj since he's American) husband and their adopted sons. Thus, Ilvermorny became even more democratic than Hogwarts ever was, accepting wizards and witches regardless of their origin.
* background material says that the Narns deliberately try to invoke this trope with their fancy looking ships, but weapons tech captured from the Centauri aside, are not all that advanced (they don't even have gravity).
* Background materials series establish that after western Europe, the next-largest source of the Manticore System's first wave of colonists from Old Earth was the North American Federation. The NAF's boundaries aren't specified, but presumably it consisted of the United States and Canada, quite probably as well as Mexico.
* Background material suggests that the batarians believe the soul exits the body through the eyes; therefore, mutilating the eyes of a dead batarian is thought to leave them
* background material that tear people to pieces. And they can do this to any shadow. Even the ones in your pupils.
* Background Music: Music played in the background to convey ideas and emotions.
* background novel, but Grand Duke Gaspard attempted to invoke this trope with his cousin, Empress Celene, as a last-ditch effort to take the throne of Orlais peacefully. When she refused him, he declared war, which is going on at the time of the game.
* Background Pony, constantly fading out of perception while technically still existing. Other ponies notice her and can hold conversations with her, but as soon as they walk away, they forget who she is and what they just did. Anything written about her turns blank, and pictures of her fade out while leaving everything else intact. (Twilight has a photo of herself and her classmate Moondancer, and Lyra mentions that it used to hold three ponies...)
* Background: "The information can be published but only under conditions negotiated with the source. Generally, the sources do not want their names published but will agree to a description of their position. AP reporters should object vigorously when a source wants to brief a group of reporters on background and try to persuade the source to put the briefing on the record. These background briefings have become routine in many venues, especially with government officials."

* Back in the 1940s-60s, Hawaiian wrestler Alo Leilani would wrestle his exhibitions barefoot. According to the commentators at the Chicago International Amphitheater, most Hawaiians wrestled this way.
* Back in the 1940s, a boxing match at the Chicago Stadium ended with a controversial call. The crowd became very unruly and a riot erupted. The stadium's organist, Al Melgard, attempted to pacify the crowd with religious and patriotic songs to no avail. His next idea was to open most of the 800-plus stops on the huge pipe organ, floor the volume pedal and slam the keyboards. The resulting sound blew out many of the arena lights and stunned the crowd, which stopped fighting and exited the building.
* Back in the 1960s and 1970s, due to rising inflation and construction costs, many US cities that had both major-league baseball and football teams built "multi-purpose" stadiums to accommodate both of them. These massive concrete fortresses—dubbed "cookie-cutter" stadiums for both their circular shape and architectural similarity to each other—tried to please everyone, but the vastly different dimensions of a baseball field vs. a football gridiron only led to a miserable experience for fans of both sports. Beginning in the mid-1990s, most cities began demolishing their cookie-cutters in favor of purpose-built stadiums for each sport. The last remaining venue to host both an MLB and an NFL team, the infamously-decrepit Oakland Coliseum, finally became baseball-only again when the Raiders relocated to

* Back in the 1980's, Augsburger Beer used to have their Brewmeister, Hans Kessler, do their radio commercials (he always pointed out that, in spite of its German-sounding name and German-accented Brewmeister, Augsburger was brewed "right hier in ze goot old U. S. ov A."). At one point, when they were holding a contest, he gave a brief summary of the rules, then added, "Just remember to drink Augsburger Beer, and
* Back in the 1980s, the State Highway department office in San Antonio, Texas, posted exact-figure speed limit signs on several freeway exits about town. Instead of being rounded to the nearest multiple of 5 mph, they'd say "18" or "17" or what have you. The phenomenon attracted a lot of attention statewide, as well as a few national outlets. Sadly, whoever it was that posted the signs was replaced with a multiple-of-5 guy and the exact signs were taken down years ago.
* Back in the 1980s, Wendi Richter's first gimmick was that of a Texas cowgirl. She had done rodeos and worked with horses for years. The props and costumes she wore were what she had used back then.

They still do that. It's why fights backstage seem to fall a bit flat - the bumps don't have the same 'oomph' as bumps in the ring.
* Back in the 60s, there was a commercial where young women would spot "that cute guy in Levis slacks" and start chasing him. The guy would run away from all the women, though this is somewhat subverted by the point of the ad, which is that if you wear Levi's slacks, the women would chase you.
* Back in the '70s, Gene Simmons was asked if his mother approved Simmons' demonic stage makeup and costume. His response was, "Well, I don't know about that, but I know she approves of the house I bought her, so I guess it evens out."
* Back in the 70s, the islanders reunite and try to detonate the hydrogen bomb and destroy the island by throwing it into the island's pocket. However, this ends up causing the Incident, killing numerous Dharma employees. Juliet breaks up with Sawyer and is dragged into the island's pocket during the events of the titular Incident. Meanwhile, in present day, we finally meet Jacob. The survivors of the most recent flight reveal that Locke is still dead, and that "Locke" is actually the Man In Black, Jacob's rival who just convinced Ben to kill Jacob
* Back in the '70s, there were months of daily reports in the "legitimate" media that Generalísimo Francisco Franco is still alive (at least until his death). At that point,
* Back in the '80s, Apple sued Digital Research and Microsoft for implementing GUIs with overlapping windows, claiming that this was a distinguishing feature of the Macintosh. Microsoft actually licensed some elements from Apple for Windows 1.0, but the interpretation of said agreement was very broad (at least according to Microsoft) so they went ahead with overlapping windows in 2.0. The suit ended up being one of the landmark decisions in US copyright law regarding interface patents: Apple claimed that even if in comparison by separate elements Mac and Windows are clearly different, using those elements in a certain combination can recreate the Macintosh "look and feel". The court ruled that "look and feel" can't be patented. In a way, Google's defense of Android was partially built on that lawsuit, meaning Apple was toasted twice on the ordeal.
* Back in the '80s, when Rogaine was still a prescription drug, television commercials about it were pretty vague about what it did, except inasmuch as it pertained in some manner to an active lifestyle. Absent outside information, the most obvious conclusion to reach was that it had something to do with skiing. Calls to the toll-free number during this era required the operator to mail the information. They couldn't give it out on the phone.

By the mid-2000's, however, they switched to taking measurements while clients are on solid ground
* Back in the days before the Cataclysm expansion pack was released, if you went through a demon-infested gorge, jumping in exactly the right places and using a since-patched glitch known as wall-walking (which was literally jumping up a normally untraversable wall or terrain in a very precise manner to trick the game into thinking you've grabbed a foothold), you could enter the then-uncompleted Mount Hyjal. When you got there, you found a zone that was actually fairly fleshed out, including the skeleton of Archimonde. The actual note that merits this entry: construction signs telling you that you weren't supposed to be here and better get out, and you would receive a debuff called "No Man's Land" that instantly teleported you out even if you somehow manage to enter it. There were even rumors that you would be

* Back in the days of the Hays Office, movie directors would sometimes include in their scripts that were submitted for approval by the censors things that the censors would obviously object to and remove, in the hope that that would distract them from stuff that the directors didn't want removed. For example,
* Back in the days when Player vs Player combat was allowed in the Wilderness, it was common to have "pure" alts, which were characters with levels carefully optimized for PvP combat. PvP matchups were determined based on "Combat Level", which is a formula roughly based on total levels in combat related skills. Since not all skills are created equal, a pure character that carefully managed which skills they leveled in and how much would vastly outfight any normal character of the same combat level.
* Back in the days when telephone exchanges had names rather than area codes (and you needed an operator to make a long distance call), the exchange for Kawakawa Bay was renamed "Ruakawakawa" to distinguish it from the (larger, but still small) town Kawakawa. ("Rua" = "two" in Maori.)

* Back in the early 1900s, an Electric Train collided with another near Newcastle. The body of the driver was found some distance further down the track, and examination of the wreckage showed that the dead man's handle of the train had been tied down. Speculation is that the driver was leaning out of the train to spy on a young couple in the compartment behind the cab, and was struck by a bridge and knocked from the train, which then continued driverless before coming to a halt.

* Back in the mid-2000s, Bell Canada ran a series of ads featuring Frank and Gordon, two CGI beavers, which were pretty popular.
* Back in the mid 20th century, it was Japan that was considered the country that made cheap crap. It was a running joke that a bad product would have a "MADE IN JAPAN" label on it. This changed in the 90s, when Japan became known for high quality tech products and cars. Now China is the country that they make jokes about. The urban legend about the town called Usa used to be told about Japan.

* Back on Earth the ISEA facility is covered with camera too which is used to keep an eye on Molly forcing her to come up with ways to avoid them without being obvious that she's attempting to avoid them.
* Back on Line 1/Yonge-University-Spadina, Queen's Park and St Patrick stations used to have three cross-passages between the northbound and southbound sides of their platforms. One in each station was bricked up after a 16 year-old woman was stabbed to death in one of them in 1975. The passages served as effective hiding places for attackers and served no other purpose (unlike the other two passages, which also provided access to the exits), so they could be closed off without affecting passenger movement.
* Back on the ground, Mission Control spokesman Steve Nesbitt did this as he reported "obviously a major malfunction" and "We have a report from the flight dynamics officer that the vehicle has exploded."
* Back-pedaled/back-peddled. You're trying to recover from making an ill-received statement, not conducting shady business transactions.

* Backronym. The code (...- - -...) is really easy to remember in a crisis situation.
* Backseat Driver legal repercussions for doing this, namely the "passenger" would be fully responsible for whatever they cause the vehicle to do.
* Backseat Drivers from hell as the student gets the hang of it. When you learned driving under such conditions, you can concentrate on driving even in situations of high stress and distractions. Driving instructors were taught how to safely use vehicles that lacked a lot of modern safety features because those didn't yet exist or weren't yet common or required. Someone teaching a teenager how to drive may have first driven a car that didn't have power steering or power brakes.
* Backseat Driver: The driver's seat is in the back (see page image for a cartoon example). It also happened in real life (such as the Woods Spider).
* backs him up the Cure's effects, in hopes of curbing that sort of mentality.
* backslides into evil in Season 4, he enacts a plan to free himself from the Dark One's dagger, leaving him with all the power but none of the weaknesses.
* Backspin Scratches, in which you continously spin the turntable in one direction until the end of the note, then spin it the other way at the very end. It's awkward to keep spinning the turntable, and even moreso to spin it back at the end, especially if there are key notes between the start and the end of the scratching.
* Backstab Backfire: An attempt to treasonously hurt someone ends up with the traitor being hurt/killed instead.
* Backstabbers Ahoy!", Vito tells Anne Maria and Zoey not to fight over him as there's enough of him to go around. As he speaks, he lifts his arms behind his head and flexes his pecs seductively.
* Backstabbing continued to define Kenny Omega's Bullet Club, as the "more loyal" Cody himself soon set his sights on usurping the usurper. Unlike Adam Cole though, Cody really was loyal until Kenny Omega started
* backstabbing going on. Some Dark Eldar actually have become addicted to dying, constantly trying to find new and interesting ways to kick the bucket, with one Haemonculus eagerly awaiting the new and bizarre mutations the process will inflict on him.

* "Backstage Chapter One" is entirely from the POV of Ruben Ashford, whom never appeared in canon and gives his inner thoughts to Marianne and her children, as well as why he allowed Milly to let Rai stay at Ashford.
* "Backstage Chapter Two" gives us the POV of Guildford and Darton on recent events and fleshes out some of Dalton's past that included the Knight of Eight and why he adopts orphans.
* Backstage Pass a gay option exists for the protagonist Sian, if the player goes off the beaten path a little (as it's one of the romances that is not advertised quite as heavily as the main four potential love interests) in the form of the model Nicole Partridge, complete with her own route should the player manage to lock themselves onto it.
* Backstage Pass, confesses to Sian that he really likes her and thinks she's attractive but doesn't feel any of the feelings associated with arousal. They decide to explore their relationship further from that point.
* Back Stage!!, Rei is in love with Seiya, a married man, but ends up with Seiya's son, Shougo. In fact, Shougo is much closer to Rei's age and by the time of the main story they are happily commited.
* Backstage that Kit realizes as far as everyone else is concerned, she just blatantly ripped off the work of a famous artist.
* Backstory: after impregnating first Karen and then Deb, Dan married the latter.
* Backstory, after the Emperor's incarceration in the Golden Throne, his son Roboute Guilliman was essentially promoted to be the new Emperor until Guilliman himself was mortally wounded. Guilliman also assumed the role the Emperor had to the other Primarchs, attempting to tell them how to behave, how to lead their legions, and what to do in general, though he was arguably unsuccessful in this latter role.
* Back Story, a human-again but still dying Darla tries to get Angel and other vampires to turn her again.
* Back Story, all the more effectively hinted at by his refusal to whine over it.
* Backstory, along with smoked cheeses and other very fragrant foodstuffs. The Hivers have vastly different sensory organs and biochemical makeup than humans, and to them, strongly tasting and smelling food is something of a narcotic.
* Back Story, a man claimed to have been a victim of genetic engineering at the hands of Trans Gene International; they were acquitted, and he, convicted of breaking and entry. The main character notes during the story some evidence that he was telling the truth.
* Back Story, an alien named Kukulkan was considered a god by the ancient Mayans.
* backstory and a massive war with the SSM later, both the UN and the SSM cease to exist after Earth and Mezen are bombed back to the Stone Age by AI-controlled warships. The civilization on Earth is eventually rebuilt into the Alliance of New Beginning.

* Backstory and is not detected until two months later ("I think they're back!"), and many more are sent out by civilian ships and aircraft that disappear before the game commences and the aliens decide to stop hiding. In the game proper, aliens attack coastal cities, islands, and occasionally transport ships, all of which send out distress calls for XCOM assistance.
* backstory and side-materials attitude the planet has in the series, the Fae are naturally pretty twisted.
* Back Story and suits. As one would expect, those who control the Greens control the water, and thus the population.

* Back Story, Angel is stuck on a submarine and the only person who knows how to repair it is fatally stabbed by an escaped Nazi prisoner, so Angel makes him into a vampire.
* Backstory arc we see that Sanzo's body's been covered in scars since his teenage years. Thankfully they're all below his neckline and covered up by his abundant robes, so his handsome face can resume charming fangirls like before.
* backstory. As some of the aliens describe it, Hyperspace is "above" regular space, and Quasi-space is "above" Hyperspace. The Orz come from "below".
* Back Story, as the era being emulated is an Asianized version of the 1920s, and that period predated such institutions.
* Backstory: "at some point over a thousand years ago," magic on Earth went away, because it was part of a distinct world that somehow used to be connected to Earth before they drifted apart. Through some unexplained means, the protagonist ends up being instantly transported from modern-day Earth to the magical world, where the story takes place.
* Backstory. Azula was daddy's little girl, while Zuko (the eldest son and heir) was hated by his father just for being alive. (And possibly compassionate.)
* Back Story buried it. The Tollan intangibility technology can go through the iris, so eventually the Goa'uld attempt to blackmail them into using it to bomb Earth.
* Back Story but was persuaded out of it on the grounds that he might end up crippled, which would be unfair to her. He released her from the engagement, just in case, and found that meant she was quickly snatched up by an unscrupulous wooer.
* backstory). By 2160, they are engaged in a war across the Solar System with the ED.
* Backstory can seriously ruin your day) many examples of literal Colony Drops.
* Back Story character, was an Atlantean warlord. In the official timeline, the first civilizations started in Europe around 40,000 B.C., when the continent was known as Thuria, and the greatest nation in Thuria was Valusia. The Thurian age ended after about ten thousand years, and Conan's adventures took place many centuries after Thuria's doom, during the Hyborean age, which also saw the collapse of all civilization.
* Backstory. Curiously, both couple's actions were prompted by the same risk of death due to the war.
* backstory describe the Morrigi as having barely survived through one of these: In Morrigi society, only females spend their whole life planetside while the males live almost entirely on starships. Due to a grueling centuries-long war with an unknown space-faring race, the entire Morrigi starfleet was all but wiped out and left what was left of the species (which wasn't much) with a 10-to-1 female/male ratio.
* Backstory does seem to imply that demons were memories left behind by The Shadows.
* Back Story (e.g. an Air Force fighter pilot and an Air Force Special Tactics operator at the same time).
* Back Story encountered one that had the misfortune of encountering Reavers.
* Back Story, eventually starting the gameplay somewhere in the middle.
* Back Story example. After the coronation of King Jaehaerys in Oldtown, it was noted that the twins Aerea and Rhaella had suddenly switched personalities, leading some to believe that the twins had been switched during the wedding by either their mother Rhaena or their grandmother Alyssa. It's never confirmed, however.
* Backstory follow suit, forcing the Scinfaxi to retreat to the Southern hemisphere. Until nukes are built, this pretty much fits the trope.
* Back Story, Freckles's father hit the problems caused by ignoring it.
* Backstory from Zaeed, resulting in said criminal further cementing his belief in this trope by hiring Zaeed's own men to kill him.
* Backstory game, and thet you were first flagged as potential command talent because the GDI and Nod are monitoring online strategy games for that reason.
* Backstory get briefly sucked into the portal and decides he wants to forget what he saw ("Society of the Blind Eye"). We also see what happened to Lazy Susan's eye

and where Tyler Cutebiker's catchphrase comes from.
* Back Story has John Boone become a worldwide hero-celebrity because he led the first Mars voyage.
* Backstory Horror or in the show itself, it’s hard to look at it the same again.
* Backstory Horror: Something horrifying happened in a character's backstory.
* Back Story in question thought that the peaceful hippies of the Land would be easy pickings. It turned out said hippies wielded powerful nature magic that the Haruchai had no counter for. The invasion didn't amount to much, and in short order the Haruchai found themselves in debt to the people of the Land for their mercy.
* back-story in the episode "Pinkie Pride." It's shown that his only companion was his rubber chicken, and as a colt, he had to deal with a lot of bullying and wasn't happy until he saw Pinkie Pie.
* Backstory Invader: A character who is implanted in the memories of other characters who don't really know them.
* Backstory Invader: A new character alters the other characters' memories, or reality itself, so that they have always been part of the story.
* Backstory Invader: A new character changes the other characters' memories, or reality itself, to make themselves an accepted part of the continuity.
* Back Story, involving a piano, a shop owner with atrocious handwriting and three incompetent piano man. Penny Dunbar tells the story to her son Clay before she dies.
* backstory, is similar. Humans left Earth in AD 2510 due to a space-time anomaly. The only reference to Earth in the game, though, is in the intro, and it is called "the main planet."
* Backstory is the Babylon Project, a massive public works project intended to fill in Tokyo Bay to alleviate overpopulation. This is not portrayed as evil, just a fact of life, though there are numerous protest groups against it, including some eco-terrorists.
* Backstory, known for his temper, who rips Gallean's heart out and throws it into the sun. Soloniel jumps after it but the sun burns her, turning her into Mortis, the goddess of death. Mortis revives Gallean, at which point he tells her it's over, since she's now fleshless.
* Backstory, meaning that many are still up and running even thousands of years after their disappearance.
* Back Story mentions the six Books of Harrow, which tell of the existence and powers of the Horrors. The first man to study them was found dying after ripping out his own eyes and holding them in the fire. Thus far, only one was fully translated; perhaps coincidentally, the Scouring happened a few hundred years later.
* Back Story mistook each other's forces for the enemy and effectively obliterated their allies before realizing it. Sumeragi's love interest died in that battle, too.
* Backstory of the Day: Part of a character’s backstory that has never been implied before is revealed only to fit in with the current episode’s theme or events.
* Back Story: on two occassions she saves lives, but the French MCO spin it that she was the one who endangered those individuals in the first place.
* Backstory" or "tanks" to take up the slack, resulting in social friction. The Silicates revolted due to a corrupting virus which caused them to "take a chance."
* Backstory planted the seeds for almost every major conflict in the series.
* Back Story, police officer Asger killed a young criminal and covered it up, claiming it was in self-defense and getting his partner Rashid to back up his story.
* Back Story, recounts how difficult it was for him to bury them. (Though clearly it did not stop him.)
* Back Story request to send in troops to extract at least 15 marines on a Black Operation from the combat zone are denied by his superiors, forcing him to leave them to die.

* Back Story reveals that the Hiigarans were pretty imperialistic in the old days, boldened by the fact that they had one of the three original hyperspace cores, giving them immense power. They use it to transport their fleet past the Taiidani defense lines right above the Taiidani homeworld, raining destruction on it. After the Bentusi interfered and took away their core, and wiped out a sizable chunk of their fleet, the vengeful Taiidani struck back and drove the Hiigarans from their homeworld, which they took for themselves as repayment.
* Back Story series by O. Gromyko. The heroine discovered her magic powers as a child when her village, after being hit with a plague, was burned to the ground by the King's army, with archers shooting anybody escaping the fire. The heroine only survived by producing a fire protection shield (the army didn't dare to get into the village itself).
* Back Story, Ser Jorah Mormont once won a tournament while wearing a lady's favour. After their marriage, he went broke supporting his new wife's extravagant tastes and losing armour and horses in every tourney he entered afterwards; he later resorted to selling poachers to slavers which leads to his exile.
* Back Story, she approached Phaethon to get to Helion because she was in love with the idea of a man who preserved the life of the sun, and when she met Helion, did not like him at all.
* Back Story. Shinji uses an "SDAT" personal stereo, a fictional product in a similar vein to the Digital Compact Cassette (a format that launched straight into obscurity in 1992) — in other words, a cassette player. Could be explained as the result of Second Impact stalling technological advances in all fields except those relating to the threat at hand.
* backstory specifies that the magical girl motif was inspired by fiction.
* backstory states that Mexico is part of the World Socialist League, and the USSR faked a civil war there to justify a troop intervention — which provided them a base to invade the USA.
* Backstory; the ancestor of the Baronets of Ruddigore was cursed by a witch he was burning.
* Back Story, the Buy-N-Large Corporation has trademarked North. You know... the direction? It's part of their "Directional Marketing" program.
* Back Story. The Decepticons on the other hand were designed as military hardware & after helping Cybertron to gain its independance they decided a military dictatorship would be the best way to run the new regime, a situation oddly similar to the Chilean Revolution of the 1970s. Kind of strange for an American cartoon from the 1980s...
* backstory, the Hiigarans used one of the Great Hyperspace Cores to devastate the Taiidani homeworld. After they lost their Core, along with most of their fleet, the Taiidani retaliated and took Hiigara for themselves, since they were now short a homeworld.
* Back Story, the Talarians wiped out a Federation colony and took one prisoner: a 3½-year-old boy. He was adopted by a Talarian ship captain and given the name Jono.
* backstory the Terraformers; humanity had realized just how bad things would be if the Terraformers ever went out of control, and wanted to get rid of them before that could happen.
* backstory the Traveling Wilburys explains that the group is made up of half-brothers, all sons of Charles Truscott Wilbury and different mothers. With ten canonical Wilbury brothers, Charles Sr. is this trope.
* Back Story. The turnaround is so drastic that the idea of "needing money" is a vague and distant memory. This complete 180 is a major defining plot point in human history, it's Rags To Riches on a planetary scale.
* Backstory. Things like the pyramids and Nazca lines were originally made to seal away the Decepticon Pretenders.
* Back Story to a new height. The implication is that transhumanism is inevitable.
* Backstory to prevent 5 outstandingly powerful mutated demons from the Demon Realm from entering the fluxes and wreaking havoc in other universes.
* Backstory travels back in time from the Horus Heresy to the Dark Age of

Technology where they see a massive destroyed city ripped apart with a giant chasm that reaches all the way to the planet's core. According to Pius it was made by a mechnavores, a giant mech that can hurl entire continents as projectiles and can "eat" spacetime by converting it into data. He also mentions giant ships that unfurl into mechanical serpents the size of Saturn's rings called "Sun snuffers" and nanomachine swarms that can cover entire planets killing billions in seconds. According to him, the entire Horus Heresy is nothing more than a minor skirmish when compared to the war against the Men of Iron.
* Back Story. Unfortunately, the spirits (well, one particularly creepy one) decided he changed his ways just a little too late. Tragedy ensues.
* Backstory want some form of revenge. Including Shepard, if you take the Renegade route, which gives us the quote, "The Collectors are about to find out what happens when you piss me off."
* Back Story was just tired of the slaughter and wanted everything to end.
* Back Story, when Captain Kidd's pirate ship was sunk in ice filled seas the intense cold preserved not only the ship but him and his first mate as well. In modern times they were unfrozen and took up pirating again.
* Back Story when the organization tried to get rid of him; he still has the bullet wound on his forehead.
* Backstory. When the 'troopers rioted, Shane was the only one to remain loyal. However, the Earth Government only allowed him to live on the condition that he hunt down and kill his renegade ex-comrades — or bring them back to Earth to be sent to their deaths in cryo. Shane hates this hellish bargain, but can't see a way out.
* Back Story when they aligned with Russia. In some sense, the US still is in a Civil War, with many of its citizens in open revolt by being part of the NSF. At any rate, some dialogue said by JC hints that the United States may be due for the third round of all-out war.
* Backstory, wore a black hood that covered his entire face, meant to resemble an executioner or hanged criminal. The resemblance to a Klan hood was not accidental.
* Backstreet Boys - "All I Have To Give", and "More Than That", both of which at least present the partner in question as treating her badly, both mentioning him making her cry in the first line.
* Backstreet Boys and Nick Carter has joked that the two groups should do a concert together.
* Backstreet Boys are Hispanics on their mothers' side and Irish on their fathers' side.
* Backstreet Boys - "Back to Your Heart", "Shape of My Heart", "Incomplete", "I Still", "Inconsolable".
* Backstreet Boys because of this. There was a version that made more sense, but they decided that the nonsensical version sounded better and recorded and released it anyway.
* Backstreet Boys comes on. One of them starts quietly singing along...and one cut later, all three are singing at the top of their lungs.
* Backstreet Boys did their respective takes on the theme of "I would be a much better boyfriend to you than your current boyfriend." For BSB, it was "All I Have To Give"; for NSYNC, it was "Girlfriend.
* Backstreet Boys fame) went on the lam fleeing fraud charges shortly before he was captured. The name he used? A. Incognito Johnson. This clearly didn't help much, as he was captured shortly thereafter and sentenced to 25 years.
* Backstreet Boys gain success outside the usual boy-band demographic.
* Backstreet Boys have a tune called "The Perfect Fan". The lyrics of "You showed me how to care / And you showed me that you would always be there" pretty much give the gist of the whole thing.
* Backstreet Boys' highest-charting song on the Hot 100 was either "I Want It That Way" or "Everybody (Backstreet's Back)". It was actually "Quit Playing Games (With My Heart)". Even “As Long As You Love Me” is probably better-known than that song despite not charting.
* Backstreet Boys: In "The Call", the narrator calls his girlfriend so she doesn't

suspect he's cheated on her with a girl he just met in a club.
* Backstreet Boys. Not to mention the fact that the Boys were on hiatus at the time the episode was broadcast.
* Backstreet Boys' popularity in Mexico caused many boys around that time to be named Kevin or Brian (often spelled as "Brayan").
* Backstreet Boys' "Quit Playing Games With My Heart Video" around 2 minutes into this nearly 4-minute long video it starts to rain and everyone is wet but Kevin, Howie, and AJ also have their shirts unbuttoned. Howie eventually loses his shirt entirely and there are several frames of him just rolling his wet, naked, well-built torso on-screen while slowly running his hands over himself. This video is just the most blatant case of the female gaze. A lot of their videos have at least a couple of them shirtless and being totally fanservicey about it.
* Backstreet Boys singing a rehashed version of their hit "I Want It That Way" (which ended with Burger King's "Have it your way" slogan).
* Backstreet Boys' song "Shape of My Heart" is about confessing your love to your significant other after a fight over this trope.
* Backstreet Boys' "The Call" was created when Howie D. farted while recording his vocals, and Max Martin was able to turn it into his signature bassline since it was in the right key.
* Backstreet Boys to hate on, it's become at least tolerable to admit to liking them.
* Backstreet Boys were also this in the late '90s/early 2000s (albeit more in the late '90s).
* Backstreet Boys' "We've Got It Goin' On" derives its title from a line in the chorus, "We've got it goin' on for years". While this line would definitely ring true over 20 years later, when it was released that wasn't quite the case, as it was their debut single.
* Backstreet Dreams, Dean walks into Shane's room to find him asleep in bed, with Stevie asleep in a nearby chair. Dean pulls the blanket farther over Shane and kisses his cheek.
* Backstreet Dreams repetitively bangs on things or waves his hand in front of his eyes.
* Backstreet Dreams was produced with the cooperation of the police, with some officers even playing minor roles.
* Back Street Girls is "I'm not a Devil, after all" typically delivered when he's torturing someone
* Backstroke of the West became a full-length, fully-voiced dub of the entire film.
* Backstroke of the West has a moment where Space General (General Grievous) calls Allah Gold (Anakin Skywalker) "Smelly boy".
* Backstroke of the West, has General Grievous refer to Anakin as a "smelly boy".
* Backstroke of the West has Ratio Tile telling Allah Gold: "Friend you are crazy!"
* Backstroke of the West, this is apparently how Darth Plagueis, now known as "Reaching the Man Cloth Space", actually died, having been killed by "his land".
* Backstrom. And that's on top of all the little short-cuts and perks that make police life easier.
* Backstrom novels. An American procedural that kept the original's cynical edge while softening down some of the protagonist's other flaws.
* Backstrom), sees very senior copper, Lars-Martin Johansson, recuperating after a stroke, reviewing a cold case which was bungled a quarter-century before by Bäckström. As his last piece of active police work, Johansson undoes the damage caused by Bäckström and solves an especially horrible murder. But the effects of his illness are too much and he relapses and dies.
* Back That Light Up: Handheld game consoles can be lit in several ways.
* back the pilot, which many Blackbird pilots admitted they initially found frustrating, since in any other plane, the pilot talks directly to air-traffic control himself, without a middle-man.
* BACK: The Society of Clocks tell Abigail and Daniel that their informant is a man named Nook. When the audience finally meets said informant, she's a woman named Knook.

* Back-to-Back Badasses: When two badass characters back each other up. Two badasses are better than one.
* Back-to-Back Badasses with him and eventually become one of the few people Snake considers a true friend!
* Back-to-back examples in 1995 (Aud Wilken's "Fra Mols til Skagen," a minimalistic, intimate song) and 1997 (Kølig Kaj's "Stemmen i mit liv," the only straight-up novelty song Denmark's ever sent).
* back-to-back levels have you racing to the front of a train to stop it before it reaches a blown-out bridge. You fail to stop it, but jump onto a chopper stolen by Lian just before it falls through.
* Back to Bataan (1943). Erroneously states that national hero Andrés Bonifacio fought the Americans (he was killed before the American invasion); also centres on a fictional grandson of his.
* Back to Bortron 7, it is heavily implied that the other kids know that Mitchell spies on Jet.
* Back to Brooklyn a mobster, the cops use racial slurs, but the villains are REALLY bad.
* Back to Brooklyn, Paul Saetta kidnaps his brother Bob's family with the implication he will murder Bob's young son Michael if Bob crosses him.
* Back to Earth automobile reads ST4R BUG. In a bonus webisode, Chris Barrie comments "You know what I always say? Wanna tell people you're a pillock? Get a personalised number plate."
* "Back To Earth" had a dimension cutter that employed the use of the ink from a dimension traveling monster that lead to a
* Back to Earth mini-series that constituted Series IX, was totally filmed on location (or at the Shepperton soundstage), and has no laughter track.
* Back To Earth, Rimmer claims that one day he'll be First Lord Of The Star Fleet, presumably making the Space Corps a British organisation.
* back to front, the dead Germans. He does have a pretty good case for that, doesn't he?
* back together, then J.D. tells her he doesn't love her at the reception dinner. She shoves him onto the table, where he crushes several wine glasses. No injury occurs.
* "Back to Ghoul" Casper's uncle Fatso does it when he along with Stretch and Stinkie come in to his room.
* back to his own dimension, so the magical/sci-fi element isn't exactly something we have rules for in real life. Yuri's Duel with Yuzu is also ended without a winner or a surrender when the same thing happened to him.
* Back to Life Miri Matteson attempts to return to a normal life after serving an 18 year prison sentence for murder. Besides the standard "I've never heard of this thing that was invented while I was incarcerated", she has to deal with many people in her home town regarding her with loathing for her crime.
* Back To Life revolves around a woman released from jail after serving 18 years for a murder which is ultimately revealed to have really been self-defense.
* Back To Life tries to disassemble a NASA helmet to restore it, which involves loosening screws. The guy working the screw driver turns the screws the wrong way.
* Back To Life, yet isn't bitter or damaged, in fact she comes across as far more well-adjusted than most of the supporting characters.
* Back to Nature For Girl, showcase this trope. The male character's "goal", denoting the end of the game and the point at which the credits roll, is to run a successful business out of his farm. The female character's goal is to get married. Other games in the series allow female characters to continue playing past marriage.
* Back to Nature: For Girl, there's a reoccuring rumor that you can keep playing if you marry Gray. That's not true. Even with him the game ends after marriage.
* Back To Nature has her crush object, Pete—the player character.
* Back to Normal: In a supernatural or superhero show, the main character is robbed of their supernatural abilities/technologies/friends and goes back to living a

normal life (or, at the very least, tells his or her loved ones about his or her powers and decides to go on the run and try to live a normal life while keeping his or her powers under wraps).
* Back to Reality: Planet engineers in an ocean seeding ship had terraformed an ocean moon and created a marine ecosystem teeming with lifeforms by vastly speeding up evolution. Unfortunately it backfired when one lifeform arose that wiped out everything else: the Despair Squid.
* Back-to-School 2014 ads for Kmart parody this trope, with a bunch of kids trading escalating Your Mom
* Back to School, Derek (Robert Downey Jr.), best friend of the main character's son, uses sunlight reflected from a mirror, and then an air horn, to distract divers from the opposing dive team, preventing them from making good dives so that his friend can win.
* Back to School" from memory after almost giving up during his oral exams. He then goes on to (barely) pass.
* Back to School) has an image of Franklin holding one of these in one hand and a book in the other.
* Back to School. Her 5 seconds of screen time earn her 26th billing in the credits.
* Back to School is that Rodney Dangerfield's character goes to college in order to convince his son that it's worthwhile (after the son uses the father's self-made success as an argument that college isn't necessary).
* Back to School. Snooty professor Dr. Barbay looks down at Thornton Melon's outstretched hand for a moment, then turns to chew out the Dean for allowing Melon to enroll at the college. Thorn spends the rest of the movie finding new ways to both deliberately and unintentionally break the professor's balls. Earlier in the film, a snooty guest at his wife's party declines a handshake from Thorn, but mainly because he'd made a show of removing a mouthful of food with that hand before greeting her.
* Back to School: The story has a character having to attend school again.
* Back to School, the Triple Lindy, a dive that involved jumping from the high dive and landing on all the lower boards before hitting the water.
* Back to School to ghostwrite a paper on the works of Kurt Vonnegut for him. The professor who assigned the paper gives him an F, saying both that she knows it was plagiarized and that whoever wrote it "doesn't know the first thing about Kurt Vonnegut."
* Back to School (Valerie); he practically needs to stand on his toes to kiss her.
* Back to School-What NOT to Do! that he thinks that his clothes look good.
* Back To The 50s film, Bradley would've been an easy target because he's black and attacks against blacks by whites in the 50s were common, yet the Rockets and the sheriff only targeted him because he was willing to stand up for himself and his friends. Paul and Jo, who are WHITE, were also jailed along with Bradley and Rachel, who's Eurasian. Tina is half Indo-Guyanese, while Jon and Hannah were also white and they were fair game!
* Back to the Barn", Amethyst eats popcorn while watching Peridot and Pearl compete in their "Robolympics".
* Back to the Bars teases a Cleveland audience by going through a guessing game of which city he's in (Enid, OK etc) before gleefully announcing "Oh I remember, it's Cleveland, Ohio!"
* Back to the Beach where Annette Funicello (known as Dee Dee in the classic Beach films) is called Annette while Frankie (her husband) is called "The Big Kahuna".
* Back to the Early Installment: Characters time-travel to a previous point in their own story, often a previous episode of a series.
* Back to the Early Installment: Revisiting prior installments through time travel.
* Back to the Future (1989), pink-shirted Bullies directly charge Marty when he approaches, whereas blue ones run in circles.
* Back to the Future 2, in the "Hell Valley" timeline, Biff is definitely one of these, very casually planning to kill Marty.
* Back to the Future (5'4.25). Interestingly, it was the female crew which insisted

Marty should be taller than his girlfriend.
* Back to the Future after he visited his parents in St. Louis, Missouri. Searching their basement, Gale found his father's high school yearbook and discovered he was president of his graduating class. Gale had not known the president of his own graduating class, and wondered whether he would have been friends with his father if they went to high school together.
* Back to the Future: After Marty flies backward after destroying a large amp by turning it up too high, a small part of the amp breaks off and falls to the ground.
* Back to the Future: After one of the Lybian terrorists guns down Doc Brown, they try to shoot Marty next, only for their gun to not fire. It's not clear whether the gun jammed or it was out of ammo, or both.
* Back to the Future. All involving Marty McFly being chased by a Tannen.
* Back to the Future, allowing them to introduce, define, and develop the totally new characters and plot. The finished films are all fairly equally connected to each other and each have mostly separate main plots.
* Back to the Future also auditioned to play Biff before being cast as another one of Biff's mooks, Match.
* Back to the Future also have dioramas to show how Marty will get, well, back to the future. They're insanely detailed, which doesn't stop Doc apologizing that the scale isn't quite right, and he didn't have time to paint them.
* Back to the Future and an aversion - we are hearing from Marty's point of view, but the car is an open top convertible and Biff would have the wind in his ears.
* Back to the Future and co-producer/co-writer Bob Gale answering questions from fans, and a screen-specific commentary with producers Bob Gale and Neil Canton.
* Back to the Future and find themselves recruited as a Confederate Army drummer boy. As he is being trained by another boy, Jimmy, he is told that they are positioned in the front lines in the line of fire:
* Back to the Future) and had to lose for the sake of space-time continuum because otherwise people would (according to Doc) revolt against Bifficus, which would prevent Caligula from becoming Emperor of Rome. Doc described it as a key event to the end of the Roman Empire.
* Back to the Future, and he eventually meets an alternate version of Doc Brown, who's got the same balding as Lloyd in real life.
* Back to the Future, and Marty was played by David Kaufman. Tom Wilson did return as various members of the Tannen family, and Mary Steenburgen reprized her role as Clara from the third film.
* Back to the Future, and other works. Unfortunately, it was heavily damaged by a massive fire in June 2008, and the rebuild wasn't entirely a perfect replica.
* Back to the Future and sequels, Biff does this about once in each movie. An example that he uses just once is "Make like a tree and get outta here." And in the second film, he uses "That's as funny as a screen door on a battleship," to which Marty quips from out of earshot, "Screen door on a submarine, you dork." English isn't his second language though, he's just a dumb side of beef. Even his older self gets fed up with his butcherings of idioms:
* Back to the Future and things turn out to go surprisingly well from then on.
* Back to the Future are just a few examples of very important (but seemingly minor) details.
* Back to the Future). As soon as he dropped the letter into the mailbox, the door opened.
* Back to the Future at 88 MPH which is seen with the fire trail after it happened.
* Back to the Future. At the beginning of the movie, Doc Brown's TV is automatically turned on just before Marty arrives. It shows a news broadcast about the theft of some plutonium by some Libyan terrorists. After Marty arrives the audience is shown a box containing plutonium underneath a bed, and it later turns out that the terrorists stole the plutonium in the hope that Doc Brown would use it to create an atomic bomb for them.
* Back to the Future be canon based on the fan's preferences, since the series deals with multiple timelines.
* Back to the Future because he felt that any movie with the word "future" in the

title was box office poison. It took the intervention of Steven Spielberg for Zemeckis and Gale to keep the original title.
* Back to the Future (because it had nothing to do with the movie otherwise). Spielberg responded by thanking the exec for the joke note and telling him how everyone found it really funny — and the executive was too proud to admit he was serious and went along with it.
* Back to the Future Biff is the supremely juvenile "butthead", even in the case of his future self as an old man.
* Back to the Future. Biff spins over on the spot, falls back against the car behind him, and slumps to the pavement completely out cold. One of the most satisfying moments in film.
* Back to the Future, Bob Gale and Bob Zemeckis pointed out this Trope's role in history and decided that having Doc build it in his garage was the best way to go. If the government built one it wouldn't work, and if a corporation built one, that would be too scary. Doc Brown's other inventions are also obviously made in his house.
* Back to the Future both subverts and plays this straight. We can assume Marty's parents lived "happily ever after" once Marty altered their meetup in 1955... if only Doc's time machine would quit getting in the way.
* Back to the Future. But since time travel is a novel, scary, and untested phenomenon, sometimes the characters behave as if San Dimas Time is in effect:
* Back to the Future, but the clerk asks, "On what?" After asking a few more times, Marty goes for the direct approach.
* Back to the Future by one of Stewie's inventions. Back in present time, their brawl resumes in a genetic research facility, which explodes and sends them to a rocket that takes off to outer space. Finally, the rocket crash lands on an oil rig, where Peter emerges victorious.
* Back to the Future called for Marty to take the DeLorean to a Nevada nuclear test site and return to 1985 using the power of a nuclear blast. This was beyond the film's budget, so the now-iconic clock tower climax was created.
* Back to the Future", Clara exiles Doc to Einstein’s doghouse for causing Hill Valley’s electrical problems and getting her and the boys in trouble with the rest of the townsfolk.
* Back to the Future could certainly qualify (though it is one of the more clever examples).
* Back to the Future: Doc Brown needs to connect a power line from the top of the clock tower, where a lightning bolt will strike, to ground level, where the DeLorean will use the energy to travel through time. Unfortunately, the power cord isn't long enough to do the job, so he has to improvise.
* Back to the Future Doc Brown uses the wire to slide down from a clock tower, rushing to connect a loose cable in time for the lightning strike.
* Back to the Future, Doc created a second DeLorean time machine after the first one was destroyed at the end of the third movie; the new version was capable of going through space as well as time. Sometimes, the episode plots directly contradicted the way time travel was established to work in the movie trilogy.
* Back to the Future: Doc gets an idea of how to test his new invention. A lightbulb is behind him - but then Doc walks away, revealing he is standing in front of a lamp, which Verne then switches off.
* Back to the Future, Doc has made presto logs, color-coded green, yellow and red in increasing order of the amount of heat each produced to make their train run faster, with a corresponding gauge showing when it would happen.
* Back to the Future: Doc includes a new security feature on the DeLorean, which makes it fold up into the size of a briefcase, but it still weighs as much as a full-size car.
* Back to the Future, Doc is interrupted by a cop while rigging his lightning rod. The cop asks to see a permit for his "weather experiment." Notice that Doc reaches into his wallet to look for the permit. The deleted scene then shows that the "permit" is actually a $50 bill.
* Back to the Future, Doc is panic-stricken, thinking his son, Verne, has been

crushed under a pile of bricks and begins tossing the bricks aside to try and pull him out. Verne is, of course, elsewhere and completely unharmed, and tries to go up and tell him he's okay, but Doc exclaims, "Not now, Verney! I'm looking for Verney!"
* Back to the Future, Doc visits the asylum where his 1985-A counterpart had been incarcerated. Alt!Doc had been lobotomized, leaving his mind completely destroyed.
* Back to the Future, Dr. Emmett Brown sees a poster for the school dance and tells Marty there's a "rhythmic ceremonial ritual" coming up.
* Back to the Future (driving into a Nevada nuclear test range) was judged too expensive by the studio, so they wrote in the lightning strike at the clock tower instead. Many many classic movies had similar situations, where a unique solution to a budget issue became the most memorable part of the film.
* Back to the Future ends with Doc Brown showing up wearing some very Cool Shades. They're so cool, they're made out of sheet metal! Christopher Lloyd couldn't see a thing out of them. They were only written in as a gag for the first film. When the sequels came around, he ditched them ASAP.
* Back to the Future ensures everyone will remember what decade it's from).
* Back to the Future episode "Bravelord and the Demon Monstrux" had Doc accidentally zapped into Verne's favourite video game of the same title, and the characters from the game transported into 1992 Hill Valley.
* Back to the Future episode "Einstein's Adventure" has a pair of crooks steal the DeLorean as a getaway car after a robbing, and accidentally travel to 1790, Sydney, Australia. When that happens, this is what they see for a few seconds through the windshield.
* Back to the Future everywhere and malls being replaced completely by online shopping), resulting in a sort of composite Zeerust.
* Back to the Future features a photograph which gradually loses photographees. This leads up to the moment when Marty's parents almost don't get together and Marty himself starts to fade from existence.
* Back to the Future film is well-remembered in the popular imagination for many iconic elements, such as the DeLorean time machine, the Spinning License Plate, Marty's performance of "Johnny B. Goode", the clock-tower climax and the ending line "where we're going, we don't need roads". What are the two sequels, which were both really good, remembered for? Hoverboards, Gray's Sports Almanac, and cowboys. But mostly hoverboards.
* Back to the Future films focus on Marty McFly's adventures travelling through time and meeting and interacting with his parents in 1955, his future children in the year 2015 and his great-great-grandparents in 1885.
* Back to the Future films has elements of both the Nostalgic Fifties and the Historical Fifties, but seems to generally lean more in the direction of the Nostalgic Fifties.
* Back to the Future film shown in the movie. In years besides 2015, October 21st is still acknowledged as "Back To The Future Day" on a much smaller scale.
* Back to the Future for its VHS release, but removed for the DVD release. According to the writers, they hadn't originally intended to continue the story. If they had, they wouldn't have put Jennifer in the car.
* Back To The Future for the NES has Marty McFly being slid down the counter of Lou's Cafe and straight toward the door if he fails to stop Biff's goons from reaching the counter.
* Back To The Future for the NES, one of your goals is to fight off Biff's goons at Lou's Cafe, using milkshakes as weapons.
* Back to the Future for the second half, only to end up going back into being "From The Present ending up in The Past" for the last half of the film.
* Back to the Future. From this point on, he no longer allows Biff to bully him.
* Back to the Future game mostly takes place in the year 1931, with a few segments in 1986.
* Back to the Future: George McFly has less skill and experience fighting than a street punk, but he throws a haymaker that knocks out the much larger Biff Tannen with a single blow.

* Back to the Future (George McFly) lost his voice due to nervousness while filming. For some scenes, he had to silently mouth his lines, with his voice being dubbed in later at a recording studio.
* Back to the Future gin. Fox, a teetotaler, did a spit take for real.
* Back to the Future had Marty subjected to the lethal version of the Ordeal of Water. The Browns rescue him underwater with the townspeople none the wiser.
* Back to the Future has been known to cause some viewers to shed a tear or two.
* Back to the Future has Doc Brown and Marty racing in spite of setbacks to implement their plan to cross a certain point at the right speed at the very moment a lightning bolt hits.
* Back to the Future has Jules, Verne, and Clara fit the "past ends up in the present" version. They find the future intimidating, but adapt well thanks to having a father/husband from the present.
* Back to the Future has Marty's older brother, Dave, in a Burger King uniform when Marty comes home at the beginning of the movie. Once Marty gets back to the future at the end, Dave is instead wearing a suit and working in an office, one of the many things that's improved about his family's life.
* Back to the Future has: "They found me... I don't know how, but they found me... RUN FOR IT MARTY!" replayed by Doc Brown. It was this moment that made Marty remember what Doc's fate will be in the future.
* Back to the Future, has written a book inspired by Marty's radiation-suited visit to him in 1955.
* Back to the Future. He certainly gets over it by the third film, however.
* Back to the Future, he gets aggressive and yells "Butthead" at Marty when he thinks he's some stranger stealing his cleaning supplies. If Biff has genuinely reformed, than it shows he still hasn't fully lost his edge.
* Back to the Future, he gets to live his fantasy. He nearly gets killed in the process.
* Back to the Future, he might as well have sex with his mother in the past. The result is that in his picture of himself and his parents, they're replaced with an inbred Marty and the "To Be Continued" card is replaced with "To Be Contondered".
* Back to the Future her away, they solved this problem by making her stay sedated for much of the film.
* Back to the Future. He takes too long doing this and has just connected the plugs when the bolt strikes, resulting in it (partially) being channeled through him [[note]] the vast majority of the tens of thousands of volts went through the less-resistant electrical connection, which is why he's none the worse for wear [[\ note]], but he comes out of it none the worse for wear.
* Back to the Future, he threatens George with it, claiming, "My heat ray will vaporize you if you do not obey me!"
* Back to the Future him. There may be a slight subversion, though, as in the original timeline, the marriage was less than perfect.
* Back to the Future horrified when they overhear the currently four-year-old Doc Brown's Uncle Oliver planning one final stunt for his nephew before "Daredevil Brown" retires from the business: going over a waterfall in a barrel.
* Back to the Future. If the car doesn't get up to 88 mph before it reaches him and Marty, then they're going to get flattened. As it happens, the time machine blinks out about 20 feet before it hits them.
* Back to the Future in film, despite the trope being less a hard and fast rule and more of a general guideline.
* Back to the Future. In one scene were Marty is being interrogated by Biff, he points over Biff's shoulder and asks "What the hell is that?", distracting him long enough for Marty to wind up a punch, then delivering it when Biff turns back around.
* Back to the Future is appalled when he sees how nerdy and socially inept the teenage George McFly is.
* Back to the Future is a pushover, not so much in disciplining his kids (Marty, while in the past, asks them to go easy on their 8 year old son if he sets the rug on fire, implying he was disciplined for doing such a thing), but when it comes to

getting pushed around by people outside the family, especially Biff as he totaled George's car and George didn't even try to stand up for himself. By the end of the movie, Marty's events in the past cause this trait to go completely away.
* Back to the Future is exactly the same. Marty and his siblings still exist and were still born on the same days, they still live in the same house, his room is exactly the same as in the "old" timeline, Marty is still dating Jennifer, and was planning the exact same trip to the lake as "before".
* Back to the Future is framed as stories that Doc Brown tells his sons while constructing the time train in the Old West.
* Back to the Future, isn't nearly as bad. Jules is also a master at it.
* Back to the Future is often known for his tendency to confuse the word "density" with the word "destiny." In one conversation his time-traveling son Marty casually refers to him as "dad," which after some nervous stammering he covers up with "Daddy-O."
* Back to the Future (is the fact that it's primarily a Western good or bad?).
* Back to the Future is used to teach pacing, as all meaningful twists and story beats are spaced almost exactly 30 minutes from each other.
* Back to the Future It's a small moment overall, but most fans find the extended version of the scene where a cop inquires if Doc has a permit for his "weather experiment" to be hysterical and wish it hadn't been trimmed down.
* Back to the Future: "It's your kids, Marty! Something's got to be done about your kids!" They didn't even originally intend that to be a real sequel hook or even a real cliffhanger. It was only tongue-in-cheek at first, and the "TO BE CONTINUED" sign wasn't superimposed over the screen until the film was out on video after a sequel was already in the works.
* Back to the Future, Jules grows a money tree, but the bills wither once they're picked.
* Back to the Future. Just before the music starts, some of the concertgoers steal the DeLorean and travel through time.
* Back to the Future (later confirming with a photograph that yes, he IS the real deal!).
* Back to the Future (Leopold Stokowski), and described him as "conducting the world".
* Back to the Future) let you jump between 1955, 1985, and 2015; doing things in an early period would alter later ones.
* Back to the Future logo, with its fading red-to-orange-to-yellow text and the arrows.
* Back to the Future, Lorraine averts this during the final confrontation with Biff. After pleading to no avail with Biff to let George go, she is filled with rage and jumps on the brute and starts wailing on him, but he just shoves her to the floor. It's nothing spectacular or particularly feminist but Lorraine is a gentle girl anyway.
* Back to the Future, Lorraine pursues Marty with a passion, to the point where his attempt to turn her off by coming on too strong fails because she jumps him first. But when she kisses him, she suddenly feels like she's kissing her brother. This may be her instincts picking up on what she doesn't know consciously — that Marty is her son from the future.
* Back to the Future manages to screw up by only giving himself ten extra minutes and the car not starting, arriving at the mall just in time to see his friend getting shot.
* Back to the Future, Marty and Jennifer finally kiss on the veranda of her family's house.
* Back to the Future, Marty cause Biff to crash into a manure truck and dump the contents on his convertible.
* Back to the Future, Marty does this after the first time travel. As he drives home on the familiar road, then suddenly realizes that the district he is living in is under construction, then hits the brake at full power.
* Back to the Future: Marty, finding himself stuck in 1955, goes to meet the 1955 version of Doc to get his help to fix the time machine so he can return to 1985.

Upon arriving at his house, Marty ends up becoming the subject to Doc's test with a mind-reading device, leading to this exchange:
* Back to the Future: Marty is blown across the room when he tries to hook up to the giant amplifier in Doc's garage. Then the Doc calls and warns Marty not to do that because there's a slight chance it'll overload.
* Back to the Future: Marty, Jules and Verne go back in time to save Pee Wee McFly's career as a baseballer.
* Back to the Future: Marty McFly is a variant of this trope. Note that he is less of a trickster but no less lucky and helpful. The earlier drafts did make him more of this type of character, though.
* Back to the Future: Marty McFly, Marty McFly Jr., Marlene McFly, Maggie McFly, Clara Clayton, S. S. Strickland.
* Back to the Future, Marty recalls accidentally calling Doc "Dad" back in 1985. He even calls it a Freudian slip.
* Back to the Future, Marty tries to set his parents up by engineering a situation where George saves Lorraine from sexual assault (namely, by Marty himself). It goes off the rails when Lorraine is more eager than Marty is, only to be set right when Biff intervenes, genuinely tries to assault Lorraine, and George ends up genuinely saving her by punching Biff out.
* Back to the Future — after Marty has realized that he's in 1955 from a newspaper — had him asking an passing-by old lady to pinch him. It comes out a bit brusque because he's panicking, resulting in him receiving a smack across the face.
* Back to the Future movie as a prom band audition judge... to denounce his own song as being "just too darn loud".
* Back to the Future movie, Biff and his gang bully George McFly while in Lou's Diner and then turn their attention to Marty once he tries to stand up to them on behalf of his dad. Later, Biff and his pals go back to the same diner to beat up George only to have Marty trip them and sucker-punch Biff. This leads to the car chase around the town square culminating in Biff getting a load of manure dumped on him.
* Back to the Future movies have have three Brazilian dubs, a São Paulo one made for TV, a Rio one made for in-flight movies (that have at most appeared on pay TV), and another Rio one made for the DVD that has since become the most common.
* Back to the Future movies start in 1985, go back thirty years to 1955, jump forward thirty years to 2015, and go all the way back a hundred years to 1885.
* Back to the Future", oc calls his memory machine "M.A.R.I.E." so he doesn't have to continually go through all the words in the acronym. When he says it while dazed, Clara slaps him. She later finds out from the televised showdown that "M.A.R.I.E." is an invention, not another woman, and says she should have known.
* Back to the Future of the series, as usually, whenever Marty tangles with a Tannen, manure will be involved in some fashion.
* Back to the Future, only this time it's to lay out their plans for both of them to get home.
* Back to the Future on the other hand, took this trait into overdrive (see "Western Animation" below).
* Back to the Future, originally the garage of his family estate, was crammed full of all types of scientific gear. He even had the old tape drives to (presumably) the 50s/60s style computer he would have used to invent time travel.
* Back to the Future parody episode "Meet the Quagmires", we see that it may have started even earlier, when Peter bumped into the Chicken at the dance.
* Back to the Future Part II — a surprising piece of candor until he pulls out his gun.
* Back to the Future Part II, 1950s Doc Brown is incredulous when Marty tells him "all the best stuff comes from Japan."
* Back to the Future Part II, a car accident ends Marty's rock career before it even took off the ground.
* Back to the Future Part II, after Biff marries Lorraine in 1985-A, Marty is sent to (and expelled from) various boarding schools.

* Back to the Future Part II, after Doc and Marty arrive in 1955, Doc gives some money to Marty to get some 50s clothes as a disguise, instructing him to get "something inconspicuous" as he leaves. The next scene shows Marty sporting an obvious Blues Brothers-esque hat and sunglasses combo with a leather jacket.
* Back to the Future Part II after he and Marty returned from 2015. His only other appearance in the trilogy is as a car mechanic in 1955.
* Back to the Future Part II. Again, in this first timeline, the marriage isn't very happy.
* Back to the Future Part II, all transactions are carried out via thumbprint ID. The filmmakers speculated that this could lead to a new type of crime, where thieves cut off the thumb of their victim and use it to make illegal purchases, like stealing a credit card.
* Back to the Future Part II also mention the real names of Griff's goons.
* Back to the Future Part II, alternate timeline Biff gloats that he owns the police in response to Marty threatening to go to them.
* Back to the Future Part II, although it was the flying time machine instead of an alien craft that time.
* Back to the Future Part II & III can get a hoverboard from Biff Tannen to ride around on, but it only lasts for a short while before it disappears.
* Back to the Future Part II & III. Enemies include giant snails, fish, mutant frogs, birds, bouncing balls, dinosaurs, bullet-shooting clouds, pipe monsters, ghosts, walking trashcans and in certain areas, books, test tubes, teddy bears, heart symbols, graduation hats, and screwdrivers. The list goes on.
* Back to the Future Part II & III section, collision with your temporal copies causes you to lose a life.
* Back to the Future Part II an alternate timeline is created where Richard Nixon is still President in the 1980s following the repeal of the 22nd amendment, the Vietnam War rages on and crime and corruption are at endemic levels as Casinos spread nation wide.
* Back to the Future Part II and Bob Gale give to all pairs of cops who appear in their films.
* Back to the Future Part II are last seen being arrested after their chase against Marty ends with them crashing their hoverboards into the courthouse. The newspaper confirms their arrest.
* Back to the Future Part II as revenge against his rival George McFly, whom he killed in that timeline several years after George fathered Lorraine's children. Biff goes so far as to even abuse his adopted children, and threatened to put his wife and her children in jail alongside her brother Joey if she ever tried to leave him. In a deleted scene from the movie, it is suggested that Lorraine ends up killing 1985-A Biff, which is why 2015 Biff starts to disappear after returning the DeLorean that he stole to give his 1955 self the sports almanac to change history with.
* Back to the Future Part II, as well as the Café 80s, are in-universe examples. The whole 2015 segment in the same movie heavily features this kind of aesthetic, but it's implied that they also have some form of advanced digital technology (though we never see it directly in the movie itself).
* Back to the Future Part II. At the school dance in 1955, Marty dives under a table to escape Biff's gang, leaving just enough time to grab his own Indy-esque hat before trouble arrives.
* Back to the Future Part II, Biff has Marty cornered on the roof of the hotel and is stunned when Marty calmly steps off the roof. A few seconds later, he floats back into view, standing on top of the flying DeLorean. Bonus points as Doc Brown proceeds to knock Biff out with one of the DeLorean's gull-wing doors.
* Back to the Future Part II: Crispin Glover's refusal to do the sequels impacted the plot heavily. For example, George McFly being dead in 1985-A was originally conceived as just an excuse to not show him very much.
* Back to the Future Part II, Doc also "borrowed" some old newspapers from the closed-down Hill Valley Library in 1985-A.
* Back to the Future Part II, Doc rushes to get Marty in position to pretend to be

his son in 2015, and his watch is synced up to 2015 time to make sure he's got his timing right. But if he's wrong, he's got a time machine and can start again — except he doesn't seem to realize this as an option.
* Back to the Future Part II engages in this. Marty needs some money from the timeline they're in, and Doc opens a briefcase with neatly arranged stacks of bills of various colors and sizes.
* Back to the Future Part II featured automobile hover-conversions, "only thirty-nine, nine ninety-nine, ninety-five!" ($39,999.95)
* Back to the Future Part II. For example, a policewoman mentions that Hilldale is "nothing but a breeding ground for tranks, lobos and zipheads". "Trank" seems to mean "drug addict", derived from "tranquilizer": the policewoman tells Jennifer "you got pretty tranked" after finding her unconscious. The future denizens also use "low-rez" as a synonym for "stupid." One of Griff's cronies calls Marty a "bojo", which might be a corruption of bozo.
* Back to the Future Part II gets a quick shot in at this. Doc and Marty arrive in the past trying to keep Biff from getting the sports almanac, Doc hands Marty some age-appropriate money saying, "Get yourself some fifties clothes." As Marty runs off, he screams, "Something inconspicuous!" Cut to Marty wearing a leather jacket, fedora, and sunglasses. Never mind that this makes him look more like a Michael Jackson impersonator than anything else.
* Back to the Future Part II grandson Griff walks in and demands Old Biff, who he calls "Gramps", to finish waxing his car:
* Back to the Future Part II have undergone several rounds of production.
* Back to the Future Part III, and forcing Buford Tannen and his gang to back down. He wears it for the remainder of the movie, and it does look badass, especially when he's enacting the Western archetype of leaping from car to car on a train he's about to hijack.
* Back to the Future Part III back to 1985), Marty takes him back to Doc's house. When the latter wakes up, he recalls that event as having just been his imagination - until Marty also wakes up and Doc notices him. His response? Screaming his head off, tripping over Marty's hoverboard and backing into an organ's keyboard, which carries on wailing as Marty tries to explain what happened.
* Back to the Future Part III, because Buford needs to live long enough to extend the Tannen family line). This explains why Strickland's deputy, now wearing a Marshall's badge, arrests Buford and his gang, with the line "You're under arrest for the murder of Marshall Strickland" redubbed to "You're under arrest for robbing the Pine City stage!"
* Back to the Future Part III, before he travels to the old west, Marty is given a colorful cowboy outfit by Doc. It gets him ridiculed by real cowboys, who think he's a clown or from the circus.
* Back to the Future Part III between Doc Brown and old west schoolteacher Clara Clayton. Notable as its part of a science-fiction comedy movie trilogy that doesn't normally dwell on such things, and that despite the breakup happening over a misunderstanding, no one was really at fault — it's just really hard for someone living in the old west to believe someone who tells them he's a time-traveller from a hundred years in the future.
* Back to the Future Part III broken heart, she realizes she's making a mistake and stops the train, then jumps off and runs to join him as he's firing up his new time machine.
* Back to the Future Part III: Buford "Mad Dog" Tannen and his henchmen are all arrested after Marty beats up Buford at the end.
* Back to the Future Part III: Buford Tannen holds Doc at gunpoint and Marty hits the gun with a thrown pie plate the moment he pulls the trigger. Doc's hat gets a neat bullethole right in the center and is knocked off his head, but he is uninjured. Played completely serious.
* Back to the Future Part III Bull Shot variations (Bull Shot, Bull Shot #4). It consists of one ounce of club soda, two ounces of beef broth, one ounce of tomato juice, one teaspoon of Worcestershire sauce, quarter of a teaspoon of lemon juice, three dashes of Tabasco-Habanero sauce, and some dried garlic. It immediately

causes the Doc to holler and rush to the nearby water trough without waking up. Explanation? "That's just a reflex reaction. He won't be awake for another 10 minutes." Doc does wake up a few minutes later, with a headache.
* Back to the Future Part III, Doc and Clara act out this trope when he helps her operate a telescope. Bonus points because Doc's dialogue about how "everything becomes clear" also doubles as romantic innuendo.
* Back to the Future Part III, Doc hijacks a local train. When asked if this was a train robbery, he responds that it's a "science experiment." In some ways, this is an inversion of the trope. Other robbers would take valuables from the train and leave the train itself undamaged. Doc and Marty took the engine (and destroyed it); the valuables on the train weren't even discussed, much less taken. Although considering the comparative value of gold to that of a locomotive at the time, they actually destroyed something worth a lot more than regular robbers would have taken from anything short of a bank transport train.
* Back to the Future Part III, Doc is trapped in 1885. Since he can't repair the DeLorean with the technology from that time, he arranges for Marty to return to his own time from 1955 by carefully storing his DeLorean in a cave, with instructions for his 1955 counterpart on how to restore the machine to working condition.
* Back to the Future Part III, Doc saves Clara from going over a cliff in an out-of-control wagon, belatedly learning that she died in the original timeline and that the ravine would have been named after her.
* Back to the Future Part III, Doc says this to Marty after Marty finds Doc's grave. "You're not far off, Doc."
* Back to the Future Part III, due to some of the necessary parts not having been invented yet.
* Back to the Future Part III Fox also plays Marty's distant ancestor Seamus McFly.
* Back to the Future Part III happen in the film proper, despite many trivia lists claims to the contrary.
* Back to the Future Part III has a race against distance, in which the protagonists much reach a certain speed before their train topples off of a bridge.
* Back to the Future Part III has a subversion. Doc goes to get drunk after losing Clara and despite telling the bartender to "leave the bottle" doesn't actually drink anything, but acts strangely anyway. Well, to the other patrons, he's acting weird. To the rest of us, he's just moping and rattling off common knowledge about 1985.
* Back to the Future Part III has one deliberately set up my Dr. Brown and Marty, as an out-of-control train is the only way to get the crippled DeLorean up to 88 mph. The point where the train goes from a controlled time-travel experiment to a runaway is when they notice Clara has snuck on board, and the train is going too fast to stop before reaching the gorge with the incomplete bridge.
* Back to the Future Part III, he mentions how much he misses Tylenol in 1985.
* Back to the Future Part III instead of the schoolteacher who "originally" died there).
* Back to the Future Part III intervention) may help simplify matters. In the end they seem to choose option C. Live sort of outside of time traveling through the past and future with their flying train.
* Back to the Future Part III. Its status as a Rube Goldberg Device is primarily due to the fact that Doc was constrained to 1885 technology. Later on in the movie, there's a downplayed breakfast machine which fries two eggs and some bacon.
* Back to the Future Part III, laughs his head off while trying to hang Marty, and towards the end after seemingly killing him.
* Back to the Future Part III, Marshall Strickland was murdered by Buford, which is why he's arrested by Strickland's deputy at the end. The scene was cut because the filmmakers were afraid that it would make the audience root for Marty to kill Buford. The line "you're under arrest for the murder of Marshall Strickland" was redubbed to "you're under arrest for robbing the Pine City stage." The camera cuts away from the deputy in the middle of this line, presumably to hide the fact that his lips don't match it.
* Back to the Future Part III, Marty defeats Mad Dog Tannen by punching him out and

causing him to fall on a manure wagon.
* Back to the Future Part III, Marty discovers that the cave he hid in houses a bear. He runs.
* Back to the Future Part III. Marty eventually beats Tannen without using his gun by out-thinking and punching the crap out of him.
* Back to the Future Part III - Marty, familiar with the drill by now, finishes his line about it not being to scale. Of course, in both movies, the already-complex plan has to be stretched to accomodate a lot of last-minute changes.
* Back to the Future Part III, Marty returns to 1985 in the De Lorean on train tracks (since without gasoline in 1885, it was necessary to use a train to boost the car up to the needed 88 MPH) and notices a nearby crossing signal is blinking red. At first he thinks it's just because of him—but quickly discovers that he coincidentally landed on the tracks at the exact same time as a freight train shows up.
* Back to the Future Part III—the name was on a pie plate, referencing the term's origin.
* Back to the Future Part II: In 1985-A, Doc and Marty take shelter at Doc's home in this timeline, which has been ransacked after his counterpart was put into a mental institution.
* Back to the Future Part II in 2015 and delivers it to himself in 1955. The book reports the results of every major sporting event from 1950 to 2000, and yet it's thin enough to be confused with Biff's girlie magazine.
* Back to the Future Part II: In 2015, Marty McFly is shown to be working for a Mr. Fujitsu, who pronounces his name as "Mock-Fry".
* Back to the Future Part II. In addition, bionic implants are also available in 2015, as demonstrated by Griff and his gang. However, Old Biff is a stooped-over old man with a cane, and Old George McFly has thrown out his back and needs to be inverted for treatment.
* Back to the Future Part II instead of the almanac hiding behind the cover.
* Back to the Future Part II" instead. They stuck the Perry Como song into Part II as their way of referencing this little inside joke.
* Back to the Future Part III on how nations can change their reputations in a relatively short time. In the 1950's Japan had a reputation for putting out cheap, low-quality goods. Their reputation began to change in the 60's, and by the 1980's, the country was considered a powerhouse of top quality craftsmanship and technology, particularly with regards to electronics.
* Back to the Future Part III, so when Marty calls him "Mad Dog", everybody in proximity either flees or makes themselves scarce.
* Back to the Future Part III's writings to attempt the American vernacular of the period.
* Back to the Future Part III the first movie's climax, which is reworked into Part III's intro.
* Back to the Future Part III the kiss might qualify as "taking advantage".
* Back to the Future Part III, though, both have Doc ultimately moving back to the future.
* Back to the Future Part II, it's Biff's grandson Griff who bullies Marty's son, leading to a similar sequence of events.
* Back to the Future Part III, two '50s monster flicks, but also the first two movies Eastwood ever appeared in.
* Back to the Future Part III using a gun of his own construction, with a big scope. He claims it can shoot the fleas off a dog's back at 500 yards.
* Back to the Future Part III was crashing on a tree that was there 30 years ago.
* Back to the Future Part III: When Clara realizes Doc still loves her, she bails from the train to run back to Hill Valley. However, Doc and Marty left moments earlier as when she makes it into town, the crowd is still gathered watching Buford getting arrested. Luckily for her, she finds the model showing their plan to travel back to 1985, and she takes a horse to catch up with them.
* Back to the Future Part III, when he meets the infant who's the first of the McFly family born in America.

* Back to the Future Part III, when Marty and Doc are at the train stop looking at the map of the train and the ravine, Clara is in the background, waiting to be picked up by Doc.
* Back to the Future Part III, where Doc and Marty hijack a train at gunpoint, which they need to make their time machine reach the speed needed for the travel. When the unimpressed driver asks if it's a robbery, Doc hesitates and then answers "It's a science experiment!".
* Back to the Future Part III). While meant to show how uneducated Tannen and his gang is, "Nee-kay" is much closer to the Ancient Greek pronunciation of "Nike".
* Back to the Future Part III, while the original tires needed to be replaced with whitewall tires. How they got a 1985 vehicle to run on leaded gasoline from 1955 is another question entirely...
* Back to the Future Part III, who looks almost exactly like Wild Bill Hickok.
* Back to the Future Part III: "You got a backdoor to this place?" "Yeah, it's in the back."
* Back to the Future Part II, Jennifer becomes one when Marty tells her about the concept of time travel when they and Doc are in the flying Deloran at the beginning of the film.
* Back to the Future Part II, led to a lot of demand for "futuristic" things to come into being in real life:
* Back to the Future Part II: Lorraine uses the line "I have to wash my hair" on Biff. Ironically she wasn't trying to let him down easy, considering she had just told him to "take a long walk off a short pier". At least Biff deserved it.
* Back to the Future Part II, Marlene McFly commits suicide after her brother Marty Jr.'s incarceration. The film has her attempt to break him out of prison, only to get caught and incarcerated too.
* Back to the Future Part II: Marty, after realizing he was responsible for Biff changing history.
* Back to the Future Part II, Marty avoids the auto accident, and a message Jennifer took from the future, telling his future self "You're fired" gets erased.
* Back to the Future Part II. Marty is, naturally, exasperated by this fact after he goes to a great deal of effort to retrieve it. Extra idiot points for Biff by hiding a girly magazine with the cover of a sports almanac that won't even exist for sixty years.
* Back to the Future Part II Marty telephones Doc, leading to this exchange:
* Back to the Future Part II — Marty, in 1985-A, asks the alternate version of his mother to tell him about the alternate version of his father.
* Back to the Future Part II:, Mr. Strickland is in a swivel chair; he turns toward the window and then pushes back, smashing Marty's hand against the desk.
* Back to the Future Part II. Note than you can now re-create this appearance with some brands of modern-day mirror shades. Marty also buys a pair of shades to go undercover in 1955 (specially as he went back to the events of the first movie, so he needs to look different from the other time-travelling Marty).
* Back to the Future Part II, one time-traveling Marty slams a door in the face of another time-traveling Marty.
* Back to the Future Part II, only $1.99 with any Pizza Hut pizza. Collect a different pair each week while supplies last. Solar Shades from Pizza Hut. They're going like there's no tomorrow.
* Back to the Future Part II on March 15, 1973-A; Julius Caesar was killed on March 15th aka "The Ides of March".
* Back to the Future Part II, people interact with several objects using their thumbrint. We can see Biff paying the taxi fare by applying his thumb on some sort of portable paying machine. He gets a paper receipt. Interestingly, it appears that the receipt that Marty got for the Sports Almanac was made of plastic. On the other hand, future Marty got fired by fax machine. The store clerk who sells Marty the almanac implies that by 2015 books are no longer printed on paper. Since the almanac has sports scores up to the year 2000, this suggests printed books stopped being made between 2001 and 2015.
* Back to the Future Part II personal!" All Marty has to say is that the shark

still looks very fake.
* Back to the Future Part II pizza come out of the device a few seconds later.
* Back to the Future Part II playing at a nearby holographic movie house in Hill Valley of 2015. Initially scared at first by the shark, Marty comments afterward that it still looks fake.
* Back to the Future Part II plays it straight. Authors said that the chalk outline without the bodies will be more impressive without being thrilling.
* Back to the Future Part II reused several cars from other "futuristic" movies in its 2015 set.
* Back to the Future Part II, Robert Zemekis said that hoverboards actually existed, but parents groups were keeping Mattel from releasing them. He later said it was a joke and wanted to get a rise out of kids. He even faked "test footage" of the hoverboards in action with special effects to sell the gag.
* Back to the Future Part II scenarios that require multiple time jumps. The different time periods here all feature more fantastical elements than in the other movies; it starts with the protagonists journeying into the distant future (with a lot of broad comedy aimed at the present-day 80s culture), then to the aforementioned alternate crapsack timeline, followed by a jump back into 1955 that has two temporal-fish Martys existing at the same time. The film also starts the franchise tradition of the actors playing multiple generations of the McFly and Tannen bloodlines, rather than just playing the younger or older versions of themselves.
* Back to the Future Part II since he lands on the roof of the Delorean hidden from Biff's view, only a few feet below.
* Back to the Future Part II, so he'll be rich in the future. He also tells him that either a kid (Marty) or an old man (Doc) will come around asking about that book, and to kill them if they do so. Indeed, Present Biff-A tries to shoot Marty down in his own office after he finishes his exposition, and Marty barely escapes with his life.
* Back to the Future Part II, so it's quite debatable how much - if any - of his Jerkassness can be blamed on cybernetics.)
* Back to the Future Part II's overblown and very tongue-in-cheek vision of 2015, but early in the movie Doc Brown gives Marty a set of modern clothing...which looks almost exactly like his regular clothes, except that it's electronic and automatically adjusts its size. One size fits all, indeed! He also mentions that it's become a fad among young people in 2015 to wear their pockets inside-out, and suggests that Marty do so in order to blend in.
* Back to the Future Part II (specially since Young Biff is too stupid to recognize himself).
* Back to the Future Part II sticks out like a sore thumb upon first arrival.
* Back to the Future Part II swoop down and begin taking pictures for tomorrow's paper.
* Back to the Future Part II, the historical preservation society member says that he remembers the day lightning struck the clock tower because it was also the same day that Biff Tannen stiffed him out of a repair bill for cleaning a truckload of manure out of Biff's car.
* Back to the Future Part II, their house is a casino, and she has ridiculously huge breast implants. Onward, to psychotherapy!
* Back to the Future Part II, the man who hands Marty the letter that Doc wrote in 1885 mentions that the post office had a bet as to whether Marty would actually show up on the date specified in the letter. He lost.
* Back to the Future Part II, the next morning, the 1955 Doc thinks he hallucinated the whole thing till he finds Marty, who brought him home, with him in his house, scaring Doc as Marty tries to fill him in on everything that transpired in the previous movie.
* Back to the Future Part II, the old Biff Tannen of 2015 gains the trust of the young Biff of 1955 by starting his car in a way only he knows about.
* Back to the Future Part II, the viewer sees that she would have eventually shot him to death.

* Back to the Future Part II. This was also after a mention that Griff had bionics.
* Back to the Future Part II, though the radio broadcast in the movie could not be authentic as the real field goal was made with 18 seconds to play.)
* Back to the Future Part II to events in the first movie), but the 1955 events in the third act are entirely dependent on the viewer's knowledge of events in the first movie.
* Back to the Future Part II: Upon learning Old Biff chose November 12, 1955 to return, Doc wonders if that day has some cosmic significance or it's just a coincidence.
* Back to the Future Part II uses a fairly innocuous "we're back" conversation (from one of the least stressful time travels in the movie) in the trailer to announce the return of the movie series itself.
* Back to the Future Part II was called "Biffhorrific 1985" during production.
* Back to the Future Part II, when Doc Brown starts talking at length about the rejuvenation treatments he had in the future and mentions that he disguised himself so that his new, younger appearance wouldn't catch Marty off-guard. He then rips off his latex mask to reveal... his exact same face underneath (less rugged, but equal).
* Back to the Future Part II, when going to the future Hilldale, Doc Brown lands the flying DeLorean... on a part of the road with a large "NO LANDING" painted on the ground.
* Back to the Future Part II). When it got hit it wasn't moving. The handwave is that the lightning causes the DeLorean to spin at 88 miles per hour, shown with the trails of fire being spirals in the air (the 1885 date is justified, as the time circuits were shown earlier to be broken, and an 1885 date was briefly shown).
* Back to the Future Part II: When the car first disappears, leaving the fire trails; and when Marty's hand begins to fade in front of his face.
* Back to the Future Part II when two boys in the Cafe 80s watch Marty pull off a Crack Shot in the vintage arcade game Wild Gunman.
* Back to the Future Part II, with synopses for all of the Jaws movies up to that point:
* Back to the Future Part II would tear through theirs "like tin foil".
* Back to the Future. Poor Doc Brown goes from "excited" to "hyperactive teenage girl".
* Back to the Future Prequel: Doc begs Hank to release Marty, telling him "I'll do anything you say." Hank doesn't listen.
* Back to the Future Prequel, young Marty mentions an interest in time travel.
* Back to the Future raising money to repair the town square clock tower, which was struck by lightning 30 years prior, and took a flyer for it. Jennifer later writes her grandmas home number on the back of the flyer (with a "love you" added) so he can call her later, giving Marty incentive to hold on it. Later in the movie, as Doc tells Marty he is stuck in the past he uses the flyer to show that he has a life in 1985 AND it provides concrete information about the lightning strike they use to get home.
* Back to the Future. Remembering his own high school class president, who was somebody he didn't care for, Gale wondered if he would've been friends with his father had they gone to high school together.
* Back to the Future revolves around Marty trying to get his parents to date so he can exist in the future.
* Back to the Future roads!" Played with, in that they're his rearview display, predating actual back-up cameras by 15-20 years.
* Back to the Future, saying that all McFly men are genetically predisposed to be attracted to women who look like Lea Thompson.
* Back to the Future scene in which Marty says "Okay, McFly, get a grip on yourself. It's all a dream! Just a... very... intense dream..." On the DVD, the filmmakers mention that they think the landscape rolling by outside the window in this shot was pulled from the Universal archives, though they can't remember for sure.
* Back to the Future script featured Marty McFly surviving a nuclear blast in a

fridge-time machine, in order to return to the present. This was scrapped because it was too expensive to pull off and they didn't want children climbing into fridges and getting stuck. Spielberg was also executive producer of that film.
* Back to the Future series, especially when unexpected things come up to nearly screw Doc's elaborate plans.
* Back to the Future series every weekend, as well as on holidays and days when kids have school off.
* Back to the Future series. In the first movie, Marty causes 1955 Biff to crash his car into a manure truck, causing $300 in damage. In the second movie, Marty goes back to the past and encounters a Biff still very angry about that damage. Biff tries to run Marty down, but ends up crashing his car again... into a manure truck. Somewhat downplayed, as by the third movie it's clear that the joke is about the manure and not necessarily Biff's car. It is worth noting, though, that the new 1985 Biff's job (after Marty alters the timeline) is auto detailing.
* Back to the Future series Marty keeps borrowing skateboards (and proto-skateboards), but always gives them back (except when told to keep it). In fact, it's how he got the famous hoverboard: Its previous owner had just looted Griff Tannen's higher end model, so she let Marty keep hers.
* Back to the Future so that nobody else can mess with it and their timeline becomes the only timeline. Paradox much?
* Back to the Future sound advice about not getting goaded into fights.
* Back to the Future. Stoltz was lined up for the part but a few weeks of filming showed he wasn't right for it, so they tried even harder for Fox.)
* Backtothe Future suggests Chuck Berry invented rock and roll through a secondhand accoumt from a time traveller from the future
* Back to the Future, takes the local Tannen on a midnight flight to show him the miserable sights of the city so maybe he'll change for the better. After one incident, said Tannen starts crying, but when Marty comments on it, he reveals that it's because what he saw reminded him of a child who still owes him a small amount of money.
* Back to the Future teen comedy that's practically a Best Picture win.
* Back to the Future that Doc Brown burned down his mansion for the money he needed to build his DeLorean.
* Back to the Future that he told the projectionist to stop the film and replay the scene.
* Back to the Future: The Animated Series is mostly set on an interplanetary cruise ship powered by a solar sail.
* Back to the Future: The couple at the dance at the end of the film, who are amazed that George McFly stood up to Biff.
* Back to the Future: The date which Doc Brown invented time travel and Marty accidentally travels back to is November 5, 1955. November 5 was screenwriter Bob Gale's father's birthday.
* Back to the Future: The distinctive blue "time-coils" which line the body of the DeLorean do this when the car hits 88 miles-per-hour.
* Back to the Future: The ending to Part 1 shows that Marty's sister Linda has become this, as she has at least three boyfriends all at once.
* Back to the Future (the first one) pans over a bunch of clocks and a corkboard. Pinned onto the board are two news articles, which hint at Doc Brown's life before the film takes place. Pictured above.
* Back to the Future: The Game a device called the Mental Alignment Meter, which reads a person's mental responses to certain stimuli and is used to determine if they're an upstanding citizen or a hooligan. The test involves wearing a leather cap with red, yellow, and green lights which light up when the wearer has a negative, apathetic, or positive attitude respectively. The player (as Marty) has to run the M.A.M. test while Emmett isn't paying attention and use stimuli such as electric shocks, a song he likes, and smells both pleasant and foul in order to falsely portray Emmett as a bad person, using the lights on the helmet as a guide.
* Back to the Future: The Game between fans of the film and hardcore gamers who want a challenge.

* Back to the Future: The Game continues the tradition established by the movies:
* Back to the Future: The Game in the game she becomes a rebellious bad girl stirring up trouble for the Citizen Brown Regime and actively assists Marty in taking it down.
* Back to the Future: The Game, Marty crashes the DeLorean into a billboard in A-1986. A young woman picking up trash on the highway (who later turns out to be none other than Marty's girlfriend Jennifer) has her back turned and her headphones on.
* Back to the Future: The Game seen even further into the future in the movies) snarks that he hasn't been to that timeline yet.
* Back to the Future: The Game, when Marty appears in the '30s, the DeLorean pops in right in between a booze runner car and a pursuing police car exchanging gunfire. His appearance lets the runner get away, and the copper decides to try and run the DeLorean off the road. Then the DeLorean's reactor system conveniently does a heat flush right in the copper's face as part of its post-time-jump cool-down, allowing for a getaway.
* Back to the Future: The Game: When you return to an alternate 1986 where Kid Tannen wasn't arrested, the Tannen family is now a crime family that rules Hill Valley. If you choose the option that says "Where are the police?" Marty will say "You better get out of here before my dad calls the cops." Riff will respond with "The cops? We own the cops."
* Back to the Future, the kids' room is divided by a red line with "KEEP OUT!" written on each side. Note that unlike most other examples, this is the default state, rather than a one-time thing.
* Back to the Future, the Libyans decide they need to turn their lights on just as they are approaching the mall parking lot, allowing Doc to see them coming, but subverted in that even with this it doesn't give Doc enough time to escape. Even stranger, they had their lights on when they passed Marty and Red so they chose to turn their lights off some time in between, but then turned them on at pretty much the exact time when they would have wanted to have them off. Given the unreliability of the van they were driving (failing to restart for several attempts after a stall), it may have had faulty wiring.
* Back to the Future. The only money they have is a quarter; however, it turns out that a 1983 quarter is a rare and expensive collector's item by that point in time. The cab driver skips away in glee at his new fortune.
* Back to the Future the overdrive, causing all the dials to go off-scale high. Then we see that this things he's powering up is a giant speaker, which blows him across the room, and blows itself up, when he tries to play a chord on his guitar.
* Back to the Future: There are quite a few fans who like to pair Marty up with the past version of his mother Lorraine. There are a few fanfics about it and some sites even discuss how they would (in their opinions) work as a couple.
* Back to the Future), the return of the Delorean from Doc's trip to the future interrupts another kiss.
* Back to the Future: The Ride, Doc Brown sent YOU back (and forward) in time to prevent Biff from messing up the timeline.
* Back to the Future: The Ride, Doc now has his own major research and development facility, plus we get to see more of Hill Valley in different eras. The ride serves as an unofficial "mini-sequel" to the film trilogy that you, the guest, could now be a major part of.
* Back to the Future: The Ride, Doc's "Damn. Damn damn!" is changed to "Darn. Darn darn!" in the queue video when Biff cuts the power.
* Back to the Future: The Ride, one of the dummies in the ride safety film gets this twice, once for using photography, and again for smoking, drinking, and eating.
* Back to the Future: The Ride trilogy in 2010. The last operating iteration of the ride closed at Universal Studios Japan in 2016.
* Back to the Future", the section of a cliff that collapses under Young Emmett (or, in the changed timeline, under Marty) has a rather obvious black outline while the rest of the cliff is a painting.
* Back to the Future, the then-teenage George McFly spies on a housewife undressing

from a tree next to her window. This becomes crucial to the plot as this is the point where Marty alters history. When George falls out of the tree, Marty pushes him out of the way of an oncoming car... accidentally preventing his parents' original meeting.
* Back to the Future, the time machine's Flux Capacitor was powered by Coca-Cola, in a shout-out to the secrecy of Coca-Cola's formula.
* Back to the Future they met and became friends is not explained. That relationship simply exists before the first movie begins.
* Back to the Future trick to appeal to the local Tannen's good nature. Unfortunately, none of the miserable things the teen shows him have any effect. Finally Marty, in disgust, admits defeat. (Fortunately, he manages to find another way around the man's stubbornness.)
* Back to the Future trilogy. Few things are more delightful than Tom Wilson picking on Crispin Glover.
* Back to the Future trilogy, so Doc can explain some of the time-travel mechanics.
* Back to the Future", Verne, sulking, decides to fly his helicopter hat until it runs out of fuel, which happens immediately thereafter, sending him plummeting towards the ground. However, he lands unharmed by accidentally falling on top of Marty, who was practicing his guitar playing below.
* Back to the Future versions. In 1985, the number for Jennifer's grandma is "555-4823". In 1955, "Doc" Brown's number is "KLondike 5-4385".
* Back to the Future was intentional, as Part III was an expanded and developed final act to the original Part II.
* Back to the Future was unaware that the prop drink contained real alcohol, and subsequently spilled it all over himself, then burst out laughing. The "outtake" might not have been an actual outtake, but might have actually been used, with the cut occurring just before Fox went off character.
* Back to the Future, we see that Marty is responsible for the skateboard, the Frisbee, and rock and roll.
* Back to the Future: When asked about the origins of Doc and Marty, screenwriter Bob Gale gives two theories:
* Back to the Future", when Chris asks if Doc will mind that they took his car, Verne casually says his dad lets him drive all the time. When Marty, who was in the backseat hunting for a paper clip, puts a hand on his shoulder, Verne immediately freaks out and begins apologizing.
* Back to the Future When he saw that Marty was all right, he "wanted to forget the whole thing."
* Back to the Future when he uses the same technique to keep from being run down by Biff in 1955.
* Back to the Future. When Marty doesn't see what Verne's problem is with Chris being a girl, Verne protests that the kind of interaction he had before learning her gender involves "major cooties."
* Back to the Future, when Marty stops in Lou's Cafe in 1955 and he tries to order two beverages which don't exist at that time.
* Back to the Future. When Marty tells 1955 Doc he's from the future, a skeptical Doc asks who the president is in 1985. When Marty replies, "Ronald Reagan", Doc utterly refuses to believe him, and is only convinced after Marty tells him about the flux capacitor, which he hasn't finished inventing yet.
* Back to the Future, when they were chasing Marty and realized they were about to run into a manure truck!
* Back to the Future, where changes in the timeline cause the disappearance first of Marty's older siblings, then of Marty himself in a photo that Marty brought from 1985 to 1955. There is no emotional reason for this change of course, nor is it caused by any human agency, just the timeline.
* Back to the Future, where Marty travels back in time to 1955 with a photo of himself and his siblings. As his actions unintentionally prevent his parents from getting together - and thus, his conception - he notices that he and his siblings seem to be gradually vanishing from the photo. Once everything is set right at the end and his parents get together after all, the photograph is restored.

* Back to the Future, which it plays mostly for laughs. Thankfully, she sees him more like a brother before things go too far.
* Back to the Future, which was an interquel series based on the movie trilogy.
* Back to the Future (Zen Studios) avoids using either Michael J. Fox or Christopher Lloyd's voices or likenesses.
* "Back to the Kindergarten": On their way to check on the plants they planted at the Kindergarten, Amethyst remarks "The Kindergarten looks better than ever!" Cut to Steven, Peridot, and Amethyst finding their field of sunflowers dead and slumped over.
* back to the menu in labyrinthine magnitude. A lot of Verizon support vendor operators actually don't have access to billing information for security reasons. If you ask them to, they'll usually stay conferenced on the line with you to walk you through whatever automated system you need to navigate to complete your transaction.
* Back to the Moon in the story is out of loyalty/guilt over what happened to Kate.
* "Back to the Moon": Steven names the Rubies based on the placement of their gems: Army (arm), Leggy (leg), Navy (navel), Eyeball (eye), and... Doc (chest).
* back to the pilot episode version of Peter straight-up announces "here's a cutaway," which is just him on a white background saying, "Matthew McConaughey is terrible".
* Back To The Ship Captain's Logs of Captain Kirk after he ingests way too much LSD. In particular, it does a great job of mocking the precisely numerical nature of the original logs:
* Back to the Woods. The entire audience gasps at this, and Letterman says, "That sounds unbelievably offensive to Americans." The film, Peter claims, focuses on a window washer who sees the plane coming toward him while he wipes the window of the Twin Towers and exclaims, "Aw, c'mon!"
* Back to TV Tokyo, they've done non-news related popups on their kid's shows as well. For example, during
* Back To Us. Alya comes to suspect something's going on with Nino and Marinette after overhearing and misinterpreting a conversation between keeping their superhero lives from her, leading her to break up with Nino right when he was about to propose. She figures out the truth before too long and they get back together. Earlier, the host of the Christmas Ball is akumatized because he believes his supermodel wife is unfaithful, having a lot of private meetings with other men, including Adrien. In reality, she was cancelling arrangements so that she could quit modeling and dedicate her time to their coming baby.
* Back To Us at realizing just how stupid he, Marinette, and Nino are.
* Back To Us: In Chapter 24, Alya becomes one to Adrien after she runs into him when he's about to transform into Chat Noir.
* Back to using substitute swear words in Season 2 Episode 3. (She says "Dang it!" If Troy knocked her out with his rifle.) It's possible the previous unavoidable instance merely "slipped out" on accident due to being surprised by a zombie coming up on her.
* Back to Yankovic: the one at the end of "Smells Like Nirvana" isn't nearly as long as most other examples in this page, but the effect echoes this: the song ends with Al coughing after sustaining the final note (he even faints in the music video).
* Back to You apparent...", and goes on like that until he says he feels like "a proud Allegheny warrior riding...bareback and unprotected..."
* Back To You had both the eulogy issues and a guy losing his cell in the coffin (he was trying to photograph the corpse).
* Back to You, the anchors of WURG realise that they need to "practise their banter".
* Back To Zero: As kids, Butch would tease Jessie and try to get her attention because he had a crush on her. Jessie didn't like this and thought it was a silly way of showing that you liked someone.
* Back To Zero, Butch grew up in the aquatic-themed Celadon City yet he fears water.

* Back To Zero, Jessie and James met at age twelve when they went to Pokémon Tech together. As adults they became teammates at Team Rocket.
* Back To Zero, there is an illegal recreational drug made of Pokémon stun spore. Some people also smoke elements of plant Pokémon, such as Oddish leaves.
* backtrack caught onto this, but apparently no other vampires in the world have.
* Backup Bluff: A character uses a lie as a last resort for when their plans fail.
* Backup novella, the villain hits Thomas with one of these, changing his appearance to match that of the man she'd told Harry had kidnapped her child.
* Backup. Once everyone else has forgotten about a particular being, they wait for a few years, keeping an eye out for any mentions of the being until ultimately erasing their own memory of it as well, ensuring it is well and truly gone forever.
* backup quarterback Frank Reich led a succession of drives culminating in five unanswered touchdowns. The Bills would go on to win 41-38 in overtime.
* Backup, saying that Harry has a "half-divine, half-insane philosophy" about responsibility that "he's cobbled together from the words of saints and comic books."
* Backups can be a lifesaver in case of drive failure, but if the backup media is bad or automatic backups are failing without the I.T. department knowing, in case of data loss, it's game over when the backup can't be restored. Or you fail to make offsite backups and your office space burns down or a pipe breaks over your data center.
* backups (well, he didn't do it on purpose, but his Guile Hero reputation had built up so much by that point that he knew the villain would believe him if he told him he planned it).
* Backup Twin: A character who has been killed off is replaced by revealing them to have a surviving twin.
* Backup Twin: A deceased character is replaced by revealing that they have a surviving twin.
* Backup Twin: Another variant where the twins are never on screen at the same time (as an excuse for a popular actor to come back.)
* Backup Twin? A twin or clone shows up from nowhere to pick up where you left off.
* Backup Twin culture, nobody's entirely sure if their original leader is dead or not or weather the many warbands follow any overall structure anymore.
* backup weapon for the big guns on heavier designs. It's just perhaps the most ubiquitous 'Mech weapon out there, period.
* Backup: When a dog bites a child abuser in the groin even the intended victim's father feels some sympathy.
* backward and he'd still be seen as a hero. This is particularly strange, as the dour expression in this particular portrait is usually attributed to how firmly George had to hold his mouth to keep in the dentures he wore at the time (which had, among other awkward features, springs to help them open, so he had to bite down to keep his mouth closed, and they had a tendency to slip about if he didn't keep his lips held firm).
* Backwarder has a non-lethal but still hopelessly debilitating variation. Anyone hit with her clock hand cane will be forced into rewinding their actions, with Backwarder absorbing their remaining forward time.
* Backward morals, where the characters learn the exact opposite of what you'd expect them to.
* Backwards-Firing Gun: A gun designed or modified to fire backwards, tricking the user into shooting himself.

* Back when travelers checks were issued on Paper in the U.S. (the creation of American Express, Visa and MasterCard prepaid debit cards and near-universal acceptance of them has mostly eliminated paper travelers check in the U.S.) a common scam when the Canadian Dollar was worth US 65c, was to purchase something in a U.S. store and pay with Canadian traveler's checks, because a CAD$20 check was worth about $14, and get the change in U.S. dollars. The checks look almost identical. Today, actually, it wouldn't matter because Canadian money is almost always at or above USD$1 per CAD. Most stores in the U.S. could probably make money, even with the currency conversion charge, to accept Canadian dollars as equal to a U.S. dollar.

* back (with Smee as captain) already in Neverland, to somehow become its captain after the events of the movie.
* Backyard Baseball 2001. Some people say that it is better than the original because of the pros and MLB/MLS teams, making a perfect "Dream Team," and others hate it because of those same pros.
* Backyard Baseball 2005, where you do not control your skateboard at all.
* Backyard Baseball 2007, and the ones left in have a new backstory (with a few exceptions).
* Backyard Baseball, Ashley and Sidney Webber play much better when they are on the same team. They become the best pitchers in the game.
* Backyard Basketball on the PC, released two years earlier, had. There were no glitches, the game never freezes, there are NBA teams, and there are 9 more playable characters (while removing 1). There are even unlockable powerups!
* Backyard Football 2008, the instructions are filled with spelling errors.
* Backyard Football, but knows exactly what to do with football plays.
* Backyard Hockey, the enemy will thaw out unharmed a few minutes later.
* Backyard Hockey which sends the opponent into a Slippery Skid, even though there is no actual banana peel in the powerup except for the icon.
* Backyard Monsters has wild monsters deliver such a horse outside your base. Monsters will come out of it and attack you whether you accept or reject the proposed 'truce'.
* Backyard Skateboarding, Dmitri's goggles stop him from hurting his eyes when he falls.
* Backyard Skateboarding is three tricks (one of which is an ollie). As if the rest of the game weren't already easy...
* Backyard Skateboarding, released a year after the original, has a new level and

new unlockables.
* Backyard Skateboarding, sings "Skate Rock" horribly. However, the backing music is incredibly catchy.
* Backyard Sports become immensely popular with young children even though you could count the white males on one hand.
* Backyard Sports cannot see well without his glasses. Dmitri seems to be like this (he faints if he sees sun without glasses), but the difference is that his glasses may actually be goggles (as they do not break when he falls).
* Backyard Sports characters had Chuck Downfield (animated) talking with live-action NFL stars.
* Backyard Sports does not use puns in his Knock Knock Jokes, but instead stops them in the middle. For example:
* Backyard Sports during the aerial views. Unfortunately, they forgot to make the crowds CG too, not to mention the kids become hand-drawn again in the closeups, such as with batting or doing penalty kicks.
* Backyard Sports: Everything's usually worse with the Polar Bears. Unless you play as them, that is.
* Backyard Sports has a lightbulb on his head which flashes in sync whenever Clanky "speaks."
* Backyard Sports has different stadiums every game, but is always assumed to be a small town (confirmed in Skateboarding), so it is an example of this trope.
* Backyard Sports is that the pros specialize in their respective sports, while the neighborhood kids play many different sports.
* Backyard Sports loves the color pink and plays better when she wears it. In an aversion, Jocinda Smith loves blue.
* Backyard Sports: Luanne doesn't run. She's so fast, it looks like she's teleporting. Oh, and she's four years old.
* Backyard Sports, mostly due to her speed. She's as fast as Pete Wheeler, but lacks his hitting power, mostly hitting infield.
* Backyard Sports plays sports in a wheelchair. Though his legs don't work, he can somehow kick a football or soccer ball very far.
* Backyard Sports series. Several characters allegedly have this naturally, like Pete Wheeler and Luanne Lui.
* Backyard Sports series, to IGN at least. The scores just get lower and lower because the games get easier and easier (and cheesier).
* Backyard Sports series, who always has below average stats in the first few games. A few years after they increased his stats to make him less of a Joke Character, but he still ends up as one of the worst.
* Backyard Sports that she wants to be in the hall of fame next to Cal Ripken Jr. In the 2001 version, Morgan and Ripken are both playable, so you can make this happen yourself.
* Backyard Sports. There are new editions every year and the games keep selling. IGN and G4 continue to hate the series, though (they both thought it was average at the beginning, then they considered it one of the worst game series of all time).
* Backyard Sports: This is the way Sally Dobbs acts toward her brother Ronny.
* Backyard Sports. Unlike, say, Ernie, you cannot tell if Kiesha is African-American or not.
* Backyard Sports, where the playoffs and All-Star Game are always at night.
* Backyard Wrestling: A profession not widely respected among traditional promotions but many of wrestling's biggest stars started out this way, such as The Hardy Boys. More literally, some "falls count anywhere" matches have ended up in actual backyards.
* Backyard Wrestling: Don't Try This At Home features wrestling fan Josh Asbill, who won a spot on the game's roster from a sweepstakes.
* Bacon Cipher, is a source of endless amusement due to his ignorance of pop culture, and the team's protective of him as their Little Brother-type.
* Bacon grown from stem cells halal by local religious authorities, but it can be argued that it is haram on the grounds that it will encourage Muslims to eat actual pork after that. Whether it is Kosher is another story, though.

* Bacon Man: An Adventure is kicked off with the titular character being framed for the murder of his grandfather, the king.
* Bacon Man: An Adventure: The titular character's upper body is larger than his lower body.
* "Bacon" or "bread" - something you bring home after work. It's a cabbage and is given by your big cheese.
* bacteria and anti-magic hate groups and used to "magic-proof" chosen locations, as well as kill spirits.
* Bacteria and viruses that are lethal to humans are a variation of this. They're typically suited to life inside a specific host species, and they try not to kill the host that provides them with warmth, shelter and nutrition for the same reason humans don't burn their own houses down. Measles, tuberculosis and smallpox, for example, are minor nuisances to a cow, but it's their difficulty adapting to human biology that makes them so dangerous if a human gets infected. And that's just transmission from animals to humans. With modern air travel, diseases can spread quickly around the world. The COVID-19 pandemic is a spectacular modern example.
* Bacteria can also easily recover after freezing. Food that is already contaminated by bacteria won't become any better in a freezer.
* bacterial conjugation.. This is why the non-eukaryotic parts of the evolutionary tree are more like a tangle of roots.
* Bacteria, viruses, cells, and amoebas are treated as being nearly equal and all sapient.
* Bacteria will exchange genetic material with one another through a variety of methods. While it isn’t technically sexual reproduction, later generations will have genes from many different parent strains. Viruses do the same thing, but using a host cell as an intermediary.
* Bacteriophages work the same way - being viruses that target bacteria.
* Baculoviruses cause their insect victims to gradually melt into a slimy goo. Ironically, they're actually potentially beneficial to humans.
* Bacurau is about a remote village whose inhabitants start being hunted by rich and sadistic foreigners.
* Bacurau Subverted. The film is set "A few years from now" in a remote Brazilian town, where strange things are starting to happen. About half an hour into the film we see a flying saucer flying overhead, but shortly afterwards an old man says "I saw a drone. It looked like a flying saucer from an old movie, but it was a drone."
* bad and/or inexperienced with modern technology as a way to contrast with Akko's inexperience with magic.
* bad as an unlockable. This one saving grace was also rendered moot when Lucasarts released the game (along with many of their other old adventure games) on Steam a month or so later.
* Bad As Me tells the story of Jeff Lucey, an Iraq War veteran who killed himself due to the horrors he saw and committed.
* Badass Adorable acts very mature for his age and takes his job as a monk seriously. Still, he can be interested in fun things he never experienced, like video games and basketball and his lack of social skills makes him naive.
* Badass Adorable. He's later seen having serious doubts about his being officer material, but he's very good and competent, and he advances further in his naval career.
* Badass Adorable role, and while she's plenty ass-kicking feminist, she's also got an adorable giggle, has a stoner past and says whatever comes into her brain first.
* Badass Adorable to be this as an adult, being described as about the same height as Carol, a little more muscular and absolutely jaw-droppingly gorgeous. By the sequel, when she's a fair bit taller and all dressed up, she can pass for several years older than she is, and is regarded as extremely pretty. Considering who she is, this is hardly surprising.
* Badass and Baby: They kick ass — one-handed, since there's an infant in the other.
* Badass and Child Duo: This badass is guarding a child (who may not even be related to them). Woe betide anyone who tries to target that kid.

* Badass and Child Duo. Variations and inversions of the pairing exist but this is the classic setup.
* Badass Armies. Leto II creates a "crossbreed army" that surpasses either of them.
* Badass Army and adorable, Shao May has one bite for such a tiny thing.
* Badass Army; however, that is because in their case, unlike everyone else, they have almost no honor at all.
* Badass Army the galaxy has, and they are the ones holding out the best against the Reapers, even managing to kill a couple in fleet battles. They report battles with an 85% mortality rate, and their homeworld is on fire within days of the invasion. Everyone else in the galaxy, with the possible exception of the krogan after forming their alliance with the turians, is far worse off.
* Badass Army. While heavily involved in planning and formulation of tactics and training, he often led his own cavalry charges, which eventually also led to his death.
* Badass Bandolier: A utilitarian accessory worn so a badass can keep their tools of the trade handy.
* Badass Bandolier. He's also covered in enough fur that protection from the elements is a non-issue.
* Badass Baritone: A tough, confident male character with a deep, imposing voice.
* Badass Baritone despite his slender build and a rather effeminate appearance.
* Badass Baritone Jorge Ornelas voiced Miles O'Brien in DS9, who, like Castañeda before him, made him sound older and grumpier than in the original English dub.
* Badass Baritone: Men usually have deep voices, so all examples of a heroic character with a deep voice will be men.
* Badass Baritone (who also voiced Miles O'Brien in TNG), who many people felt didn't fit Tom's easygoing and snarky personality.
* Badass Beard and retains most of the powerful Djinn and summons he used on his last adventure. It helps that being exposed to the Golden Sun in the previous game drastically reduced his aging, meaning he's still as spry now as he was as a teenager.
* Badass Beard at first, before his true colors are shown and he only proves to be more and more of a slimy, underhanded prick from there.
* Badass Beard, he carries a FREAKING KATANA everywhere, even ON SCHOOL GROUNDS! It's a pity he and Kenji never meet, and he's a jerk.
* Badass Beard: His facial hair is shorthand for "Don't mess with me."
* Badass Beard, lumberjack beards in the vein of Hipster culture became progressively popular.
* Badass Beard: Men usually have beards, so any examples of a heroic character with a beard will be male.
* Badass Beards. Jesus, although he's the leader of the whole Federation, is one of these.
* Badass Biker: A motorcycle is always a badass mode of transportation.
* Bad Ass Biker / [extended coughing/spitting]" and a chorus consisting mainly of "Oh Yeah!" and "Hell Yeah!" shouted in a macho "Yea-uh!" style.
* Badass Biker from a tree this way. They tried to rescue him by driving their bikes under him and yanking as they went by. It didn't work.
* Badass biker. His devotion towards her does not allow him to see how toxic her influence really is. When her manipulations lead to the death of several club members and club law demands that she die, tough guy Jax breaks down crying.
* Badass Bikers, but any one of them can make a vehicle dance when behind the wheel. In one episode during the War for Armageddon, several of them hijack an ork airplane and fly it back to safety, despite none of them being trained pilots and ork technology being next to impossible for non-orks to operate.
* Badass Biker turn out to be, only really being useful as meat shields in the gang wars side-missions.
* Badass Biker who fences against highly trained psychic Russian spymasters, swings around in trees with monkeys and carries a comb with him wherever he goes.
* Badass Boast by Piccolo. After fusing with Kami and knocking 17 around, 16

informs him of the fusion.
* Badass Boast, if you break his rules, he will come over there, and he will make you regret it.
* Badass Boast is a bit ruined by the couch cushions sticking to his hands.
* Badass Boast: Now you're in trouble, because I'M here to beat your ass down into oblivion!
* Badass Boasts, Ali was a master of this style, leading him to winning multiple World Heavyweight Championship belts in boxing.
* Badass Boast that she never kills them, so they can have a chance to get their ear back, if they dare.
* Badass Boast while dressing up for a diving expedition, including putting on a heavy helmet.
* Badass Bookworm: Athena was the Greek Goddess of crafts, knowledge, and warfare, though her domain was more in the strategic aspect of war. As a female deity, she didn't look the part when not wearing her armor.
* Badass Bookworm). Descartes' 17th-century biographer Adrien Baillet recounts that the philosopher studied fencing in Paris, might have written a now-lost treatise on the art, and fought a duel with a man over a woman. He is said to have disarmed the man and spared him so as not to upset the lady in dispute.
* Badass Bookworm does it on purpose to get an emotional reaction out of Sebastian.
* Badass Bookworm — and generally tries to keep them in order and in good health.
* Badass Bookworm: Primarily intelligent but surprisingly capable in a fight.
* Badass Bookworm Saleh is the last of Eirika's potential husbands that we meet, regardless of route. He fits the trope if they hook up through supports.
* Badass Bookworms hybrids, masters of stealth and deception and launching confusing and terrifying attacks that leave their enemies scrambling to react.
* Badass Bookworm to protect the kids she was babysitting and save Twilight.
* Badass Bookworm who dresses in the traditional Nation of Islam suit and bowtie, and reads heavy and serious intellectual books and magazines between gang killings.
* Badass Bureaucrat A.E. Pessimal joins the Watch, his talent for sniffing out dirty laundry makes him feared across the city.
* Badass Bureaucrat: Master of paper shuffling and the dreaded red tape. Capable of screwing with your life in many ways.
* Badass Bureaucrat were all "real" Warrior Princes. The best that can be said of Gustavus III is that he tried. Later, this trope was subverted when the Swedish parliament brought in Jean Baptist Bernadotte, one of Napoleon's marshals, to be king so he could take back Finland from the Russians. He then joined the anti-French alliance, got Norway as the price, and led Sweden into a 200-year period of peace.
* Badass called "They Never Found The Body" allows the villain to "die" in a way that allows them to come back to haunt the Badasses in the future.
* Badass Cape: A lot of superheroes and supervillains wear capes as part of their costumes.
* Badass Cape: Long flowing capes are the traditional accessory of certain breeds of badasses.
* badass capes "Fashionframe" and developers at one point made a special tool that allows to safely create fancy screenshots.
* Badass Creed Hell. They're still probably paladins in comparison to the rest of the Church's militant orders... which says something about those.
* Badass Creed Punctuating each title with a kick or a smack, no less.
* Badass Creed states that they are dead when they go into battle, with victory being the only way to reclaim their lives. They also have zero respect for any distinction between military and civilian that Starfleet would draw, and will happily exterminate entire species if so ordered.
* Badass Crew: The Greek Argonauts, who included famous heroes such as Hercules among them.
* Badass Crew to survive that, the entire mine they're fighting in collapses on them (after the helicopter escapes- and is in fact why it needed to leave), making

the chances of their survival slim.
* Badass Crew with no respect for the lives of his soldiers or esteem for their opinions and input. He thinks this makes him a properly badass captain when it actually just makes him a regular ass. While he could argue that members of the SRX and ATX Teams are members of the military and ought to follow military protocol, those team members are essentially special forces who generally have more important concerns than minituae.
* Badass Decay, an escalation from his previous instances of Petting the Dog.
* Badass Decay games unbeaten, reaching the 2021 Nations League Final Four, and even winning Euro 2020 beating England on penalties at Wembley in the final.
* Badass Decay kills an extra-powerful Celestial named Exetar the Executioner with nothing more than a cursed axe.
* Badass Decay went through this at the end of 1998 to the beginning of 1999, as they became a low midcard comedy act without a push.
* Badass Driver: Give them a vehicle and they'll do some hardcore stuff with it.
* Badass Driver: These guys can pull things behind the wheel that you'd love to be able to do (though not necessarily to be in the passenger's seat at the time).
* Badasses Wear Bandanas: That one piece of headwear that screams "tough guy".
* Badass facial hair is a longstanding tradition of Jurai royalty: his great-grandfather
* bad ass families not only slay and stay together, they often manage to climb up the social ladder all the way to becoming Kings/Queens over the bodies of their fallen enemies and establishing empires. Empires they keep within their family's possession by slaying and staying together.
* Badass Family: Any family of related gods: i.e. the Egyptian Great Ennead and the Mesopotamian Annunaki.
* Badass Finger Snap: So badass that you can make cool things happen just by snapping your fingers.
* Bad Ass Frank gets a free bottle of tequila from a shopkeeper as thanks for beating up two armed robbers.
* Badass in a Nice Suit to appear shortly after in the king's attempt to one-up the Holy Roman Emperor.
* Badass in a Nice Suit, to the point these became colloquially known as "gangster suits".
* Badass in a Nice Suit: What could make a character be more badass than the concept of powerdressing emerging from this decade?
* Badass in a Nice Suit who will kick your ass without scuffing his bespoke shoes.
* Badass in Distress and needs to get to a friend's house. Completing the random encounter will let you unlock her as a driver for the story's heists. Not only can she ace any of the heists you bring her on, she only charges 5% of the heist's cut, making her the best getaway driver in the game.
* Badass in Distress character who would normally be able to defend themselves still gets captured by the enemy anyways.
* Badass in Distress: Sometimes even tough as nails badasses need to be rescued.
* Badass in Distress, Vernal commenting that maybe she'd fit in with their group after all. Some people have played it up so Vernal has a crush on Weiss.
* Badass in Distress: When a badass is captured somehow. They either have to be rescued by someone else, or be able to escape on their own later.
* Badass Israeli, but was also used for firefighting by burying the fire under the soil.
* Badass Israeli), culture and film. Palestinians on the other hand are generally seen as more gruff, hardened and mostly from the working class even using harsher forms of fighting from stone-throwing to rocket launching. This of course can, to some degree, be expanded to the entire Jewish/Arab conflict however local variants may arise as in some places more sophisticated and luxurious Arabs (like in the Gulf monarchies) will contrast with the more toughened and rough Jews/Israelis.
* Badass Israelis are quite pious Jews. The Druze in Israel have actually requested to be subject to conscription.
* Badass Long Coat. And just like Connor, is just as competent in fighting, but

with street fighting brawler techniques instead of using tactical combat.
* Badass Longcoat and practical shirts and trousers in combat, unlike her canon counterpart's classic leotard and tiara and more recent fancy attire. She also has no aversion to close combat, if it comes to it.
* Badass Longcoat. A number of other swords were planted in the ground surrounding the graves, too.
* Badass Longcoat: Became really popular towards the end of the decade and leading into the first few years of the 2000s.
* Badass Longcoat. Instead, Shaw is captured by Samaritan forces, who carry her off to an unknown fate.
* Badass Longcoat run allows you to use any weapons and artifacts you like, but your only armor is the leather duster, which provides virtually no protection against the numerous threats you'll face — including the high radiation present nearly everywhere in the later parts of the game.
* Badass Longcoat says the right coat makes characters look even better.
* Badass Longcoat; the Eleventh preferred tweed and bow tie; the Twelfth Doctor's primary outfit is a stylish callback to both One and Three, although he's just as comfortable in a hoodie.
* Badass Longcoat: When capes are out of style, certain breeds of badasses opt for an imposing overcoat.
* Badass Long Robe, making him at least twice as old as any of the other three protagonists.
* Badass Minds Think Alike: Two badasses go into battle together without any plans at all. They somehow survive.
* Badass Mustache: All the toughness of a badass beard in just one-sixth of the area.
* Badass Native: Aboriginal/indigenous/native tribespeople are depicted as being more brave and tough than members of more "civilized" foreign nations.
* Badass Natives, in which case the axe of choice will most likely be a tomahawk or hatchet
* Badass Navies attitude is also befitting for those in the high-risk game of intergalactic business.
* Badass Normal: A hero or villain who is strong and capable despite not having any superpowers.
* Badass Normal: A muggle who can hold their own in a fight against those with supernatural powers.
* Badass Normal, and we start to reach the point where he can conceivably be considered her protector...
* Badass Normal: A non-powered character fighting amongst (or against) a group of superhuman beings, who still manages to keep pace nevertheless.
* Badass Normal, an ordinary human capable of fighting regular yoma with ease. Of course, not being a half-yoma warrior himself means he can't locate them to fight them without assistance.
* Badass Normal: A normal person who can kick serious butt and survive dangerous events in spite of having no powers.
* Badass Normal are a mild version of this, although Sorrow became a bit manlier in later strips.
* Badass Normal, a reputation that has affected the comics character significantly.
* Badass Normal at best, while the other heroes throw around military-grade energy attacks, and she can't really do much on that sort of battlefield.
* Badass Normal, but he faces down everyone else through sheer intimidation and influence.
* Badass Normal Caleb, but he's the only non-superhero among the entire main cast, making her justifiably protective when they're facing off against equally magical foes.
* Badass Normal do make for intimidating entrances and are effective on inanimate objects, though.
* Badass Normal), even though the only thing they conceptually have in common is having no superpowers.

* Badass Normal he retired), as he could not compete with the more ruthless criminals and genuinely superpowered villains that were appearing.
* Badass Normal him unkillable. Notably, Games Workshop always gives his models a slight greenish tinge in their official painting.
* Badass Normal in his own right who accompanied Heracles on his military expeditions. Heracles was inconsolable when Iphicles was killed in his war against Sparta.
* Badass Normal in the middle of a war over mutual admiration of each other's fighting skills.
* Badass Normal Jet is planning to destroy an Earth Kingdom village that has been claimed as Fire Nation territory, even though the people in it are civilians. Aang, who has lost his people to the Fire Nation is against this.
* Badass Normal moments, the most major being when she took down a giant, invisible corrupted Gem by herself, while already injured and armed with nothing but a crude wooden fish spear.
* Badass Normal. Most famous is Hector, who could only be defeated in battle by the invulnerable Achilles.
* Badass Normal of training — to the point where she cannot sustain any sort of normal relationship because of the commitments required.
* Badass Normal powers against your Jedi ones at every turn, only to fly away if you manage to damage him enough and return soon after returning to full strength.
* Badass Normal series, is proficient with a variety of edged weapons, but his favorite is the katana. Interestingly, his brother Cal fares as least as well or better when he just shoots monsters with a gun.
* Badass Normal, spending most of the fight on defense and unable to get a hit in until the rest of the Red Lotus come in and overwhelm Tenzin.
* Badass Normals who, armed in medieval technology, routinely fight and slay beasts and monsters bigger, tougher, nastier, and more numerous than them. They're so good at it that when they're tasked with fighting other humans, they complain that they're bored.
* Badass Normal. The following run by Jeff Lemire then made things worse by taking this interpretation and making it canon, with Clint now completely incompetent.
* Badass Normal the only one in the battle who actually has super powers. "All right, I've become what I hate, I'll give you that," the villain says, putting down the car he was about to throw, and departs.
* Badass Normal - Unpowered character in super powered settings that can keep up with the big boys.
* Badass Normal with an awesome 'stach, who regularly punches out Cthulhu using a mass-production mecha.
* Badass Octopus is quite formidable, but mostly he's known for being the smartest member of the team and having a vast knowledge of the universe's history.
* Badass of the Week, as befits its manliness. There are occasional articles about women as well, but those too are more manly than you will ever be.
* Badass of the Week. Being a badass is kind of a requirement for being featured.
* Badass of the Week features articles about badasses. Updated weekly.
* Badass of the Week once featured an article on the rules of Battle Golf: a game played by 4 incredibly drunk people. Each 2-man team attempts to get their ball into the hole while preventing the other team from doing so with BB pistols, butter knives and other weapons.
* Badass of The Week was kind enough to profile Captain Jonathan Davis, who was ambushed along with two of his friends in California in the mid 1800's. They killed one of his friends, and mortally wounded the other, leaving Captain Davis outnumbered 14 to 1. The result;
* Badass of the Week. When his buddies told him what he did, he replied, "No, that can't be... you'd have to be insane to do all that."
* Badass on Paper in their own right, and pale in comparison to their less-human buddies. Hercule/Mr. Satan first uses a flash step to dodge a rocket fired at Buu, appearing to kick one of the attackers in the face (who were a sizable distance away) a few moments later. He then does it onscreen later when he's threatened by

one of the gunmen. Unfortunately, the gunman panics, fires randomly, and manages to hit him anyway, but it still saves Hercule's life by turning a certainly fatal shot into one Majin Buu can heal him from.
* Badass on Paper: They genuinely did something badass as people said... but it might be not so awesome when you actually witness it. They would agree.
* Badass on Paper. While he has done all kinds of amazing feats, he did them while battered, bruised, exhausted, and usually with no idea whether it would actually work, and so his stories make him appear more terrifying than he actually is.
* Badass Pacifist: A character who detests violence but can still defend themselves from their enemies in impressive ways.
* Badass Pacifist: Character is badass for not liking to fight vs. character is badass for liking to fight.
* Badass Pacifist: Does not kill nor even fight. But when the time comes, they'll fearlessly confront hostility from those who mean harm, or even selflessly sacrifice their own lives to save others.
* Badass Pacifist: While they would never beat the crap out of their enemies, they're brave enough to stand up for their beliefs anyways.
* Badass Preacher: A pious priest who defends his flock, and will break you in half with his shepherd's crook if you think about harming them.
* Badass Preacher often breaks down into short bursts of maniacal laughter due to him being driven to insanity after the citizens of Ravenholm have become zombies.
* Badass Preacher preach here today!" Too bad that he became a genocidal maniac after the Civil War, disgraced for crimes against Native Americans that went past the pale, even by the era's low standards.
* Badass Preachers and facing the cruelest tortures and martyrdom with much badassery. Some of the more popular examples are:
* Badass Santa: Saint Nick is gonna find out who's naughty... and kick their asses hard!
* badass suppression drugs. Sorry Kit Fisto, Aayla Secura, Ki-Adi-Mundi, and Plo Koon. You're awesome, but you're not important enough to the plot to get as prolonged a death scene as Padme.
* Bad Ass. This whole movie's existence wouldn't even hold water without this trope.
* Badass Unintentional: Didn't plan to be a badass. Comes out as badass anyway.
* Badass Unintentional: The hero is completely oblivious of their great power.
* badass woman instantly depowered when grabbed by the wrist with subversions, justifications, and parodies.
* bad attorney, he's just morally opposed to hard work and so will usually take any offer from the DA regardless of his client's guilt or innocence.
* Bad "Bad Acting", and obviously received backlash from the crowd; the only ones watching the movie who liked it were SpongeBob, Patrick, Mermaid Man and Barnacle Boy.
* Bad "Bad Acting" from the family, including Grampa as "Old Man Winter".
* Bad "Bad Acting": You fail to give even a remotely good performance.
* "Bad, Bad Leroy Brown" and "You Don't Mess Around With Jim" both have subversions, as the supposed tough guys
* Bad, Bad Leroy Brown" was the baddest man in the whole damn town, until he hit on a girl named Doris, and her jealous husband proved to be a bit badder than him.
* Bad Bedroom, Bad Life: A character, often a kid with an abusive family, has a horrible bedroom as a result of their horrible life.
* Bad Bedroom, Bad Life: The poor state of a character's bedroom reflects their difficult life.
* bad blonde side demanded she do it, Launch just liked Goku’s nicer sounding voice when he pleaded for energy.
* Bad Blood, about the Rizzuto crime family, is set in Montreal, a city known for standing in for other cities in film projects. So naturally it's filmed in Sudbury, a mining city in northern Ontario with about a tenth of Montreal's population.
* "Bad Blood",, and Martha Hunt) wear. Makes sense, since the video was based partly on spy movies.

* Bad Blood as Valentina, the wife of a Montreal mob boss, is being forced to cooporate with the Feds. She covers for a meeting with her handler by telling her husband she's going for a manicure. When the meeting is done, the handler reminds Valentina to get an actual manicure as "the details always matter."
* Bad Blood, badge, and hat. He had a cute smile and prominent cheekbones. And he most definitely did not have big buck teeth nor did he have a slight overbite. Jealous much, Mulder?
* Bad Blood — when Scully wakes up, the sheriff has draped his jacket around her and not tried to feed on her.
* Bad Blood. Mob boss Vito Rosetti got his position because he is the son of the previous Don Nico Rosetti. However, everyone, including Nico, agrees that Vito is the more competent mob boss and is the one primarily responsible for making the Rosetti Family the most powerful mob family in Eastern Canada. Vito always makes a big deal about the importance of family but he actually sidelines his own son Nico Jr and promotes Declan Gardener, a man with no family ties to the Rosetti clan, to be his Number Two. He justifies this by claiming that he is preparing Nico to be the head of a legitimate Rosetti business empire and Declan's loyalty and long service to the Family has made him an honorary Rosetti in Vito's eyes. This all falls apart when Vito goes to prison and an attempt is made on Nico Jr's life. Vito tells Declan that he is just an employee and that Vito would gladly sacrifice him to protect his real son.
* Bad Blood". Mulder presents Scully a new case — dead cows that have been exsanguinated. Scully ironically asks if it wasn't by any chance that Mexican goatsucker.
* Bad Blood series, Freddie Hanger fights supernatural dangers with a research-and-deduction-oriented method.
* "Bad Blood" starts with a man pursuing a teenager and killing him with a stake. The man is revealed to be Mulder. After the teaser, Mulder and Scully meet at the office. We see
* ("Bad Blood"), while performing an autopsy Scully finds that the victim's stomach contents include pizza, and comments that it sounds very appealing right now, to the point of ordering one later that day.
* Bad Boss: A boss who is cruel to their employees, often to the extent of having no problems with outright murdering them for displeasing them.
* Bad Boss: A character is shown to be evil by the way they mistreat their own minions and followers.
* Bad Boss blows his minion out the airlock, and there's a shot of his face stretching as he dies.
* Bad Boss, D'Aronique, similarly ordered waves of his own men into certain death against the Saint. Although at least D'Aronique had no idea who the Saint was, his callousness to the deaths of his men is horrifying.
* Bad Boss in Tim Donst. When Donst is not around, however, this trope is not in play either.
* Bad Boss is the reason Archer is so messed up and who is arguably the primary conflict creator throughout the series,
* Bad Boss moments. A henchvamp is fighting Buffy and shouts for Spike to give him a hand. Spike doesn't move, except to clap after Buffy stakes the vamp, thereby giving him a different kind of hand.
* Bad Boss should any allies happen to be in their way (re: stomping on/smacking them away for being in the way).
* Bad Boss that in the end, every single one of his allies ends up turning on him.
* Bad Boss: They won't give any shits about their employees' safety and welfare, and may indulge in cruel methods to keep them in line.
* Bad Boy Bubby depicts a mother having sex with her simple-minded son who doesn't know any better.
* bad boy rampage. Unlike other examples in the show or on this list in general, the actor in question is generally a nice guy and actually feels terrible for not living up to Eugene's expectations ("Kids need a hero to look up to."). He ultimately redeems himself in Eugene's eyes by saving him and another boy.

* Bad Boy remix of 112's "Only You" is more popular than the original.
* Bad Boys: "Did you hear what I said? I heard what I said, 'cause I was standing there when I said it."
* Bad Boys for Life, and has a less frantic approach than its predecessor, and was very well-received as a result - it even outscored the other two on Rotten Tomatoes!
* Bad Boys for Life. Mike is shot several times, after which Marcus watches over him in the hospital. Next is an outdoor scene in which Marcus is crying while wearing a suit, but it turns out it's his daughter's wedding and he's crying tears of happiness. A similar scene follows Captain Howard's shooting, but he isn't as fortunate and it really is his funeral.
* Bad Boys has been dubbed in Korean twice for airing. One for KBS and the other for MBC.
* Bad Boys II, actually used all the same conventions. Critics hated it while the audience ate it up.
* Bad Boys II, big bad Tapia convinces his business associate to sign over his business to him by having his bodyguard brought back to him chopped up in pieces in a drumcan, with the implied threat that he can either sign the paper or be next.
* Bad Boys II by Mike during the first shootout of the movie. He only gets better after accidentally ingesting some X (the drug whose traffic the two are trying to fight) during a trip to the morgue, leading to one of the most hilarious scenes in the movie.
* Bad Boys II has Mike and Marcus shooting it out with a chapter of the Klan in the movie's first major shootout.
* Bad Boys II has one of these toward the end where the thoroughly improvised plan B consisted of driving what looks like a Humvee through the house, but definitely did not involve a bigass gun.
* Bad Boys II) have a frank discussion about the time (earlier in the movie) when Mike accidentally shot Marcus in the buttocks, and the subsequent problems. Unfortunately for them, the content of their talk makes it sound like the two are in a homosexual relationship... and the video camera just happens to be broadcasting their conversation to the entire store. A woman counsels them to "find Jesus".
* Bad Boys II. One of the vehicles used by the Haitians is a stolen car-carrier, chock-full of cars - it doesn't take long for the obvious conclusion to happen.
* Bad Boys II scene where the two cops have to search various bodies in the morgue, including a well-endowed female corpse.
* Bad Boys II's mansion in Cuba to rescue Marcus's sister and Mike's girlfriend (same person). They have to hurry, though, as the drug lord has friends in the Cuban government, who will send the Cuban army after them.
* Bad Boys is also especially fascinating. He doesn't pull any punches when talking about the hardships faced during the production.
* Bad Boys, Mike Lowrey and Marcus Burnett are discussing that there appears to be no one home at the house of a suspect, and Mike leans in and opens the door, saying out loud "I tripped, and the door just opened. It's like they wanted us to come in."
* Bad Boys movie involves a subplot with Internal Affairs attempting to shut down the Miami PD's Narcotics division because they think that just because a guy was found dead in a police uniform that the Narcotics division had stolen a multi-million dollar drug bust to sell for themselves, despite the police quickly finding out that the dead man in the uniform was not a member of the police.
* bad boy Z started to "take interest" in his little sister. She certainly didn't help her case when she dyed her hair and started wearing different clothes.
* Bad Brains's suggestion, H.R. sang them over the phone, unscrewing the mouthpiece of the telephone to minimize background noise. As a result, the vocals are a bit trebly and distorted, but they managed to make it sound like a deliberate effect.
* Bad Brains was at one time banned at nearly every nightclub and performance venue in Washington D.C.
* Bad Bunny: After doing a reprint of a classic set of strips for Pennsic, it

looked like the author Wolfie was going to get back to the original strip's storyline of pants too tight (this is a strip where the mundane becomes insanely funny). Unfortunately, Wolfie - real name W. Michael Dooley - contracted H1N1, and died aged 41 in December 2009.
* bad. But the important thing is, I beat up a guy who hurt my feelings in high school."
* bad by any means, there's been a lot of flak for them being rather dull and unmemorable; of course, this is a problem people have had with the costumes since the first film.
* Bad Call TV episode "What's in a Name?", both of the executives that oppose changing the name of Ayds Candy in light of the growing AIDS crisis wind up dying of AIDS.
* Bad Call TV Pepsi, but he did manage to convince enough people to give him their Pepsi Points to try for the plane.
* "Bad Case of Loving You (Doctor, Doctor)" was originally written by rockabilly artist Moon Martin in 1978. It has been covered numerous times, but Robert Palmer's cover from 1979 was by far the most successful and is still the version that just about everyone associates with the song.
* Bad Cats: Swarms of cats have descended upon some suburban location and have assembled a party there with no concern for the locals who already live there.
* Bad Choice Road", after Lalo is done visiting Hector at the retirement home and he gets into the car with Nacho in the parking lot, as they depart, the camera cuts to Victor, who is parked several spots away from them, tracking their movements with the tracker that's installed in Nacho's car, again.
* Bad Christmas Mrs. Claus has to save Santa, who has been kidnapped by the Krampus.
* bad coffee, thanks to French soldiers during the Franco-Prussian War made their coffee by boiling the crushed beans in a bucket or a tub, then filtering it through their socks.
* Bad Company (2002) launches, unprovoked, into a monologue lifted word for word straight out of his stand up act.
* Bad Company 2 also included the magical defibrillators, however, all restrictions were now gone. If it was dead, an electrical shock would have it prancing about happily instantly. C4, 50 cal, rockets, tank shells, explosive helicopter crashes, nothing is beyond the fibs.
* Bad Company 2, for instance, players entering helicopters would just keep using their class skin..... so a two-seater helicopter like the Hind flown by two snipers (in ghillie suits) looked like the Wookiee Air Force. In Battlefield 3 and 4, players' skins change to a special pilot skin when they enter a plane. Occasionally, bailing out will fail to reset the skin to infantry, and so you might see pilots running around with assault rifles.
* Bad Company 2 have the MP-412 revolver that kills in 3 bullets, 4 at maximum range, compared to the other pistols that kill in 4 at the closest range at best. It has quite the kick and a small magazine of 6, however.
* Bad Company 2, however, seems to have fixed the climb issue, so one must be a tad more careful when aiming any automatic weapon. It's particularly noticeable on guns like the MG3, which fires so freakin' fast that you shouldn't expect to hit much of anything unless you're firing in bursts.
* Bad Company 2 running an "XP+15" mod, boosting your earned experience to ridiculous levels (a single kill with any kit immediately unlocks every weapon and specialization for it, as well as a good handful of ranks).
* Bad Company 2. The walls and doors are all destroyable by rockets and grenades and the like (and doors and fences can be shot and knifed). There's one level in single player where you're trying to spend very little time outside for risk of freezing to death, and you need to run from house to house to get warm. Typically the fastest way to do this was to take a rocket launcher and blow a hole in the next building. How the buildings don't lose their heat after this you'll never know. If you're playing multiplayer, and moving at all, odds are you'll end up doing this a few times in just one match!

* Bad Company accordingly, it's very easy for any Soldier character to fall into this.
* Bad Company got two miniseries, one from 1995-1997 (5 episodes) and one on Amazon Prime in 2020.
* Bad Company had this exchange between Gaylord Oaks (Anthony Hopkins) and Jake Hayes (Chris Rock).
* Bad Company, Kano was taken prisoner by the alien Krool and subjected to a horrifying experiment: Half of his brain was switched with one from a Krool, and he went nearly insane until he met Mad Tommy and they founded Bad Company.
* Bad Company on her, though to the others she's more of this trope played straight.
* Bad Company, Russia has taken over vast swathes of Europe and South America, and is advancing on the U.S. from the north and south.
* Bad Company's highest-charting song, the #5 "Can't Get Enough", is still a classic, many would be surprised to learn that "Bad Company" didn't even chart.
* Bad Company's self-titled song's vocals were done this way, with the added bonus of recording in an open field at midnight for added atmosphere.
* Bad Company: The Skull Gang stealing the motorcycle that Eikichi and his friends worked so hard to restore is a serious offense to the Midnight Angel gang.
* bad competent at rationing money for her trip and finding the best places to resupply.
* Bad Cop/Bad Cop's "Anti Love Song" consists of the narrator retracting every love song she's ever written.
* Bad Cop/Incompetent Cop: Cops are a combination of corrupt assholes and useless idiots.
* Bad Cop/Incompetent Cop: Cops are not only sleazy bastards; they're useless idiots!
* "Bad Day at Black Rock" deals with a rabbit's foot, taken from a rabbit captured in a graveyard at midnight during the full moon on Friday the 13th. It will grant its owner phenomenal good luck, until they lose it and will then have bad luck for the rest of their life (and after losing it, your luck will be so bad that "the rest of your life" won't be much longer).
* Bad Day at Black Rock heading to the town of Black Rock to pay a visit to Komoko, the father of a Japanese war buddy who died trying to save his life, only to find that the entire town has something to hide — namely, that Komoko was murdered by Reno Smith, the most powerful man in town, a racist landowner who tried to cheat Komoko by selling him some arid farmland with no water only for Komoko to make the farm prosperous by digging a sixty-foot-deep well. Soon after Pearl Harbor went down, Smith got drunk with a handful of others, harassed Komoko, burned his farmstead down and shot him.
* Bad Day at Black Rock off the rack, at his insistence. Also, the script called for Macreedy to light matches one-handed. Tracy had difficulty with this and convinced director John Sturges to let him use a Zippo lighter, as every veteran he ever met had one.
* Bad Day at Black Rock: The 'Day' of the title is literal, with the events of the movie encompassing about 24 hours.
* Bad Day at Black Rock". When Bela runs off with Dean's winning lotto tickets, Jensen Ackles ad-libs his comically furious, "Son of a bitch!" You can see Jared break character and start to laugh before turning his head away from the camera.
* Bad Day L.A. does this to some rude drivers on the highway he's trying to collect food on.
* Bad Day L.A. is full of lewd jokes such as "Mud Butt" and even political satire.
* Bad Days also frequently shows up, and almost always becomes the only person to deliver spoken dialogue.
* Bad Days, Batman tries all the time to be dark and broody... only to have Robin ruins it every time by being so upbeat and colorful.
* Bad Days creators Junaid Chundrigar and Davor Bujakovic have recorded and released commentaries for all the episodes from the third season.
* Bad Days: Downplayed. After Wonder Woman deflects bullets with her bracelets, the

bullets ricochet into the wall she's next to and nearly hit several policemen, as well as breaking one's coffee cup.
* Bad Days, Spider-Man crunches his alarm clock on waking up. A wastebasket full of broken alarm clock bits shows this is a daily occurrence.
* Bad Days steals the Infinity Gauntlet and uses it to turn the Mad Titan into a chicken.
* Bad Days. Supes becomes so mad that he overcomes Zod in only two punches.
* Bad Days": The Vulture feels his back snap just as he's about to take flight. He's still stuck on the same spot when night falls.
* Bad Days using the Infinity Gauntlet, and left to cluck powerlessly on an asteroid.
* Bad Days with a well-placed banana peel (atop a building) in the season 3 premiere.
* Bad Days with bringing coffee to his men rather than dealing with the bad guys. She's not pleased.
* Baddest of the Bands, whenever Bubs suggests Strong Bad could pay off his debt by working at his store rather than jumping through elaborate hoops to arrange, sabotage, and win a battle of the bands, a floating pixelated head of Limozeen's Larry Palaroncini appears over Strong Bad's shoulder and says "Rock and Roll, Strong Bad!"
* Baddie Flattery: The villain gives the hero some compliments, but only as a ploy to confuse them or throw them off guard.
* Baddiel and Skinner Unplanned often incorporated this trope, when earlier topics of discussion would be incorporated impromptu into the current topic, almost certainly as a big punchline.
* Baddie of the Week hidden in the back of a truck (unfortunately the joke is ruined by the establishing shot of the truck which clearly shows a driver).
* Bad Digital Distribution — the digital copies are watered down compared to the physical ones. Typically, this happens because the creator wanted you to buy it physically instead (e.g. a digital album release missing a bonus track), or because rights issues affect specific parts of the work (e.g. a song being removed because someone who worked on it didn't want it to be on the digital version). Alternatively, the digital version is somehow more expensive than the physical release despite having no extra content.
* Bad Dog has Little Vic, the youngest member of the Potanski Family, and the one with whom Berkeley has the closest relationship.
* Bad Dog tends to interpret every order he hears quite literally. In one episode, at a baseball game, he hears someone shouting to see "a real swing", and Berkeley pushes a baby swingset across the field.
* Bad Dog, with the show's dog resembling the one from the screensaver. Guess you can really adapt anything into a cartoon.
* Bad Dragon did a color variation in 2017 for its products called "Krampus Present." It was a marble mix of Tannenbaum green and metallic copper.
* Bad Dream about how this panic is different from all the other ones because virtual reality is so much more "real" than television or video games.
* Bad Dream by Dani Kollin and Eytan Kollin approach the matter similarly, but not as venomously in the former case and not as lengthily in the latter.)
* Bad Dream House (who wasn't a Native American Indian) Crazy Horse and Not So Crazy Horse.
* Bad Dreams, in which he ends up going right off the deep end and getting shot in self-defense by one of his would-be victims.
* Bad Dreams, reveals that he got away with it, but also has him sucked into the orbit of the far more dangerous Anthony Jago, resulting in his death.
* Bad Dreams, the protagonist Cynthia, who went into a coma after barely surviving a mass suicide, is tormented by images of the dead cult leader, Harris.
* Bad Dreams, where there's a detailed scene of him brutally interrogating one of the protagonists to make him confess to a crime he didn't commit.
* Bad Dudes: President Ronnie has been kidnapped by Ninjas. Are you a bad enough dude to rescue the President?

* Baddy harasses the conductor and steals his baton during the title song.
* Bad Education (2004). Ignacio had become heavily addicted and was spending all of his money to obtain it, so his murderers made his death look like an overdose.
* Bad Education (2004). The inner story is about Ignacio's past and history with Father Manolo and his time as a transvestite. The outer story is about Ángel in the present trying to get Enrique to adapt his script to film.
* Bad Education (2004) this priest into giving him 1 million pesetas to pay for his heroin addiction.
* Bad Education (2004), who is very flamboyant despite not being the drag queen of the pair.
* Bad Education in a wheelchair.", while Mitchell's card contains a packet of Wotsits that he apparently payed Rem Dogg's mum with.
* Bad Education: the school ends up with a South African PE master, Mr du Plessis. Among other things, he devises an assault course along South African Defence Forces lines. And wants to bring in Rottweiler and Ridgeback attack dogs to encourage the fat kids to move more quickly.
* Bad Eggs", students participating in a health project raise eggs as if they were children. The eggs end up hatching and the demons inside of them take control of whoever was supposed to take care of them. All of the egg-demons are controlled by the "mother" demon below the school.
* Bad Eggs", Tector Gorch (a vampire) makes the mistake of stopping to admire the Bezoar, thinking it's cute. It eats him.
* Bad Eggs", they have sex for the first time, which reverts Angel back to the original, murderous Angelus. This trope is literally how Angel's curse operates: perfect happiness = no soul.
* Bad Elf by John Rae has an elf that idolizes Krampus and who steals the Naughty List to try and track him down.
* Bad Ending and the inevitable result of playing a character for more than a few dozen XP. It can happen even faster if you make unwise life choices and wisdom degeneration gives you the Narcissism derangement.
* Bad Ending in the face, rather than give him the dignity of a response.
* bad ending is taken offscreen to be executed by firing squad. "Blindfold?" "No." "Ready, aim, fire." (Gunshots, thump)
* Bad End, the Brickster celebrates his victory over the ruins of Lego island (where only building was left standing and the populace is all in tears), declaring that the island is now "Mine!" Then he looks around at the wreck he is left to rule, saying in a concerned voice, "Mine?"
* Bad English: The John Waite-fronted supergroup of the late '80s had two top 10 hits with the power ballads "When I See You Smile" and "Price of Love."
* bad enough. The composer was so traumatised by having to mutilate his baby that unlike "Hop, Skip and a Jump", it has never been released to fans.
* Bad Export for You: The version released in other countries is inferior to the native release.
* Bad Export for You: When a work is exported to other countries, the release is inferior to the release made in the work's country of origin.
* bad fathers (abusers, deadbeats) whereas it would tend to be seen as completely inappropriate to criticize mothers on Mother's Day.
* Bad": Features Mike as a young man coming home from a prep school, and confronting his old friends from the 'hood.
* Badfic is so horrendously bad that unstoppable rage is a common reaction for
* Bad For: Facing cavalry (horses would plow through infantry in line like a bowling ball through pins, and it would only get messier once the swords come out), moving around quickly (it's cumbersome to swing a line of men around, especially in combat, and the formation could easily come apart).
* Bad For: Facing infantry (it's a big stationary target that can only have a fourth of its guns facing an enemy), facing artillery (a well-placed cannonball could cause a
* Bad For: Facing unbroken infantry in line (the column quickly becomes a deathtrap, as a well-disciplined enemy would pour fire into a column at a far

faster rate than the column could return it), facing artillery (a single cannon hit could cause dozens of casualties, especially when in canister range).
* Bad Future, adverts are regularly projected onto the Moon — and it's been that way for at least a generation.
* Bad Future, an adult Timmy went back to his childhood to prevent Vicky from taking over the world.
* Bad Future an alien device exploding suffused the entire planet with radiation that rendered humans, but not mutants, sterile. Humans were forced to cloister themselves in domed cities while cloning themselves to stave off extinction while the mutant populace was forced into the wasteland the rest of the world became.
* Bad Future, and Abomination was killed by the Hulk and his inbred clan of cannibalistic hillbilly gangsters (the "landlords" of Logan's family farm.)
* Bad Future, and a droid made specifically to take on Paperinik's appearance through holograms.
* Bad Future, and discovering that it was caused by the death of Princess Elise, very shortly after the date that Sonic had just left. Sonic travels back to rescue her.
* Bad Future and dismissing Launchpad when the latter suggested arresting criminals prior to executing them.
* Bad Future and into outright tyranny in the name of keeping St. Canard safe.
* Bad Future and the metaphysical loss of his Other has driven Shendu's future self mad.
* Bad Future, and why the Jedi Order fell, Yoda quietly adds Luke to the order's registry as a Jedi Master with hundreds of padawans in the form of the Clone Troopers.
* Bad Future, a Sentinel-controlled future. Trask's son also saw visions of various mutant supervillains' crimes. What he didn't see was mutant superheroes were the ones who stopped them.
* Bad Future, as the Galactic Empire used Sun Crushers to destroy Kryptonian and Tamaranean worlds, and later used the Death Star on Earth itself.
* Bad Future. Black-clad, World War 2 German-like helmets, heavily armed, wearing gas masks and supported by Parademons.
* Bad Future, Bob Cratchit dies instead of Tiny Tim, who instead becomes a zombie who can't die. In the present day, Scrooge himself dies after saving the day.
* Bad Future but also had to shoulder the burden of protecting the planet after Androids 17 and 18 killed off all of his friends. However, he's also a subversion in that while he's a more focused warrior than the mainline Gohan, he is less powerful since he didn't have anyone to help him train.
* Bad Future) but then his 70's self rolls out with it and we're left to assume that, no matter how many options Magneto has, he just has no taste in clothing.
* Bad Future changed the past. Dib quickly points out that that isn't how it works, only to be told to shut up.
* Bad Future comes out to make fun of you, pointing out that the apocalypse has already happened by then and attacking the Omen in that period is pointless.
* Bad Future Crusaders and Princess Luna destroyed most of Ponyville, the surviving townspeople fled the remains of the town, which have since been left to rot, with no one daring to enter even to scavenge or steal what was left behind.
* Bad Future Crusaders) as her spy network, and has ponies of both genders in her Royal Guard (which in canon appears to be entirely composed of stallions).
Astringe, the artist whose pictures the story is adapted from, lampshaded this with the following comment:
* Bad Future Crusaders bickering over who should handle what except for Featherweight, who only provides the other groups with Intel rather than actually acting.
* Bad Future Crusaders, despite being otherwise completely western-themed, who prefers semi-automatics to revolvers because she finds the latter are simply too clumsy to load. Peppercorn, her friend/lover, played it straight with a "Lucky-7" revolver.
* Bad Future Crusaders. Having grown up in a country more technologically advanced

than Equestria (and fought in a civil war), she is very proficient with her hoofgun.
* Bad Future Crusaders, portray Princess Twilight becoming this in the future.
* Bad Future Crusaders (possibly) are able to detect them merely by looking at them.
* Bad Future Crusaders qualities: she likes children and is even protective of ones who are similarly neglected by their parents.
* Bad Future Crusaders relies on his status to intimidate others, and his changeling minions to fight them for him. When neither works, he runs away with his tail between his legs.
* Bad Future, Deathstroke and the Joker. It is safe to assume everyone else that they knew has perished.
* Bad Future due to his paranoia. The falling scene repeats, and nobody catches him this time. The plane lands without problems.
* Bad Future episode "Five Years Gone" — an older, more experienced Matt Parkman has no trouble reading the mind of a confused Hiro Nakamura, who at that point only spoke Japanese. It's possible that Matt learned to understand Japanese in the five years, or that his powers developed to such an extent that they overcame the mental, linguistic barrier.
* Bad Future episode has the World Trade Center as the only piece of the New York City skyline still standing.
* Bad Future, Gohan was the sole survivor of the first battle with the androids. He spends the rest of his life (nearly two decades) fleeing, training, fighting the androids, and looking after Vegeta's son, Trunks, in the hopes that eventually one of them would grow strong enough to end their reign of terror.
* Bad Future" has the Sentinel mutant-hunting robots eventually extend their programming beyond hunting and killing mutants to controlling the source of mutant babies: human parents. All humans are conquered and controlled, in order to prevent new mutants from roaming free.
* Bad Future have shown that the public grows increasingly antagonistic to the people with superpowers, first forcing them under a curfew and then escalating to the government actively hunting them down. The superpowered individuals in question aren't shown to have done anything wrong, instead getting lumped in with one or two supervillains.
* Bad Future, having passed the last fifteen years in hiding because he was framed as a terrorist. He gets back in the game when a chance to change the past arrives.
* Bad Future. He is, without a doubt, far worse than any of the villains who he has already disposed of permanently.
* Bad Future in Episode 12 shows us a few others, like reddish ones with curled horns, fish-like amphibians, archers, and some holding cloth.
* Bad Future in the style of Emperor Leto. She maintains control of the world by keeping control of the spice equivalent, cinnamon. Her empire gets it from cinnamon mines instead of... you know... growing cinnamon trees.
* Bad Future in the time traveler's original timeline, instead creating a whole new alternate timeline running parallel to the original.
* Bad Future is a good ruler). Instead, Nicholas turns out exactly as expected, gets his mother executed for trying to kill him and confesses a guard to kill Darken Rahl during the funeral. By the time Richard arrives to the future, almost everybody in D'Hara and, possibly, beyond has been confessed by Nicholas Rahl.
* Bad Future is kicked off when Jack, Maddie, Jazz, Sam, Tucker, and Mr. Lancer are killed in an explosion. The first five are honored with a statue inscribed "Gone but not forgotten." The last one gets a statue to himself, simply inscribed "Gone."
* Bad Future is shown to be perpetually night-time, despite scenes being spread across multiple days and continents. Apparently the future is so bleak that the sun just stopped shining.
* Bad Future is that all his fellow Smurfs will be captured by Gargamel on Christmas Day.
* Bad Future, it functions as a perfectly habitable and self-sustaining space station.

* Bad Future novel "The Message". Ax reveals that all species of life on Earth will be wiped out by the Yeerks, except for those required to feed their human hosts, if they succeed in taking over Earth. Fortunately, the Animorphs manage to stop the Yeerk invasion before it succeeds at the end of the series.
* Bad Future Orion has usurped his father's throne and has managed to keep his temper down even without the Mother Box. But he is by no means doing well.
* Bad Future or shore up her guard's numbers in the event of a heightened threat.
* Bad Future, Peter kills one of them and steals his brain implant in order to level the playing field and avenge his and Olivia's daughter. The transplant leads to catastrophic changes in his personality.
* Bad Futures Due to the sheer ease that players can doom themselves, every session has a player with the ability to manipulate time. Aradia, the troll's Hero of Time wound up with this trope so many times she was able to make an army - which turned out being essential to defeating the Black King.
* Bad Futures) eventually had this retconned into his origin story. He was once a heroic freedom fighter in his own time, but when he was killed and his specific powers were needed, Layla Miller used her own powers to bring him back to life. But Layla can only revive bodies, not souls. So the Fitzroy that caused so much carnage in his other appearances turns out to have been evil because he was literally soulless.
* Bad Future showed a retired Ultiman, who built up a tolerance to the meteor's rays and kept having to expose himself to them for longer and longer until he got radiation sickness and had to quit the superhero game. His powers gradually faded away due to the lack of exposure to the meteor.
* Bad Futures the Over There universe has already been destroyed and a group called the End of Dayers are deliberately tearing apart the fabric of reality in our universe as well.
* Bad Future that Cyd and Shelby saw in "Fight to the Future: Part 1".
* Bad Future that Future Trunks hails from, it's heavily hinted that this is why Androids 17 and 18 dragged out their fights with Trunks and Future Gohan for so long before ultimately going for the kill. In fact, when Trunks returns to challenge them after the defeat of Cell in the main timeline and Future 18 decides to kill him to blow off steam, Future 17 gives her the okay but nonetheless points out that they'll be throwing away "weeks worth of fun" if she does.
* Bad Future The fact that there are ghouls that are still alive that may have even met them doesn't hurt either.
* Bad Future: The hero time travels to a future where the world is worse off without them.
* Bad Future: The hero time-travels to a future where the world is worse off without them.
* Bad Future thing turns out to be a mind exercise brought on by some other entity that is studying humans. It's not Ellimist or Crayak... So who was it?
* Bad Future, though by the time the movie starts they seem to be able to accomplish little but stay one step ahead of the enemy.
* Bad Future, to force him to marry her (still in Agatha's body!) and use him as a puppet.
* Bad Future version of Candace disappears after Phineas points out she'd be gone after the two Candaces undid that future.
* Bad Future when Bulma asks if Mr. Gohan wouldd like to stay for dinner.
* Bad Future when Nixon solves hunger by dumping the crowd turning them into cans of "Soylent Majority".
* Bad Future, where after the Empire conquers the Milky Way, portions of GaTO (TeTO's successor state) manage to flee to the Pegasus and Ida galaxies.
* Bad Future where Castiel has lost all his powers and now feels useless, so has become a new-age guru losing himself in sex and drugs.
* Bad Future where he manages to take over the world, he occupies the head area of the mech instead, though.
* Bad Future where mankind got complacent due to Supes helping all the time, ending with the human race getting wiped out. His problem is that he thinks his plan

(destroy Supes) is the only option, instead of just cooperating with Supes to fix it. Arion also mocks and puts down anyone who tries to give him advice.
* Bad Future where Victor became the supervillain Victorious, he was Gert's second love; in that future, Chase died and Gert apparently fell in love with Victor while they were both serving in the Avengers.
* Bad Future, who are composed entirely of regular (albeit brainwashed) untrained civilian ponies with no combat training whatsoever.
* Bad Future, who matches him blow for blow in terms of pure power. When Silver starts using strategy in conjunction, Enerjak can't adapt and ultimately loses.
* Bad Future Zachariah is trying to convince Dean to say yes to Michael, but Dean instead resolves to end his estrangement with Sam.
* badge from a dead cop he had in his jacket pocket, protected him from a sniper bullet.
* Badge Gag: Issues when a character tries to display their badge or ID.
* Bad Genius has a foursome of Thai high school students execute an elaborate plan to steal and profit off the answers to an international standardized test.
* Badger: In "Flight", Liam is bullied at school and Ralph's genuine concern makes his ex-wife Steph warm to him. When he takes on the bully's parents and gets beaten up himself, she is touched and they end up in bed together. This fling later puts considerable strain on her relationship with her current boyfriend Tom.
* Badger: In "The Price of a Daughter", Steph's ex-husband Ralph shows up out of the blue and attempts to woo her back; much to the annoyance of her current partner Tom. This subplot continues over the next several episodes.
* Badger is initially shaken by River's assessment, but at the end he settles down and says that "I
* Badger-moles are giant burrowing animals and the original earthbenders (which makes sense considering both badgers and moles are excellent digging animals).
* "Badger"- the Tu-16 medium bomber, used in both a land-attack and anti-ship role, as well as electronic warfare, air-to-air refuelling, SIGINT... you get the idea.
* Badger: While investigating a shipment of counterfeit money in "The World According to Carp", McCabe and Cassidy keep watch on Frankie Moncur, an arrogant local villain who also runs an apparently respectable restaurant. Moncur is aware of their surveillance, and constantly mocks their efforts.
* Badges and Dog Tags: An ex-military veteran who now works in law enforcement.
* Bad Girl Comic swinging swords at each other, but you will not see them hacking each other's limbs off.
* Bad Girl: In her spare time she chugs beer and beats gimps in S&M get-up with a baseball bat...in a lolita getup. She'll also spit booze on to the bat to light it on fire halfway through the fight.
* Bad Girls, Angel isn't as pleased as he should be and makes a point of putting some personal space between them.
* Bad Girls", in the middle of fighting some vampires, Faith asks Buffy if she has ever slept with Xander.
* Bad Girls is a prison lifer for killing a police officer who was trying to rape her partner.
* Bad Girls once held (and may still?) the record for the longest note held in an American Top 40 pop hit.
* Bad Girls - Prisoner Yevone Atkins. Apart from Jim Fenner (her prison officer killer), everyone else thinks she has escaped, which was her plan. The problem: the building plan she and her escape partner had used didn't feature a wall which turned a corridor into a cell because the door to the corridor only opened from the outside. Fenner shut the door behind her and left her there. Her escape partner after spending weeks in solitary confinement (for a different matter) saw the escape route as still being viable as it wasn't discovered by the prison officers. She goes to make her escape only to find the wall blocking her path and Yevone's rotting corpse.
* Bad Girls the character Shell Dockley was raped as an adolescent by both her parents.

* Bad Girls, there was general rejoicing. Even Nikki's ex turned up hoping for another go but was forced to do the same as Thomas!
* Bad Girls" was supposed to end with Buffy confronting Faith in her motel, only to find that she's hanged herself out of guilt for murdering a human. It was decided to keep her on as an antagonist.
* Bad Girls" when they burst into a vampire nest through a painted-over window in broad daylight, setting one vampire on fire and causing the rest to flee in panic.
* Bad GMs will often do this trope intentionally (such as: if a character is specialized in fire magic, they will have them be forced to fight tons of fire immune/resistant enemies). This is usually considered a pretty dick move, as it makes the character almost useless and is basically punishing the player for making their character in a way the GM doesn't approve of. Unsurprisingly, many players on the receiving end of this
* Bad Grandpa Irving Zisman is a dirty old bastard. His first action after his wife dies is to head for the nearest Oriental Massage parlor.
* Bad Grandpa: One skit in the film has the titular grandpa give his grandson, Billy, a wedgie.
* Bad-Guy Bar: Everyone inside is a macho wrestler with an evil look on his face.
* Bad-Guy Bar for no particular reason. She then fights off the guy, his mooks, and leaves, greeting Ruby outside the bar.
* Bad-Guy Bar for where it's coming from, and says, "Ooo, was that a musical cue?"
* Bad-Guy Bar. Rapunzel, who has been overly sheltered for the first 18 years of her life, attempts to leave the bar, and Flynn follows her, but the regulars at the bar immediately recognize Flynn as a wanted criminal and hold him hostage while one of them goes to find the guards. Rapunzel orders them to put Flynn down, asking, "Haven't any of you had a dream?" One particularly scary man stomps over to Rapunzel with his axe... to tell Rapunzel that he does have a dream. He then throws his axe into the wall, signaling a musical number where each regular professes his "dream".
* Bad-Guy Bar that has the villains Joker, Penguin, Two-Face, Ivy and Killer Croc playing pocker has a bunch of gangster-looking clients playing pool.
* Bad-Guy Bar. The players flee when Batman enters the bar and it's later melted by a deflected shot from Trickster's snot gun.
* Bad-Guy Bar: This is the place where bad guys hang out to plot their nefarious deeds.
* Bad-Guy Bar, you see the bartender casually dodge a chair, roll his eyes and lean lazily on the counter, and drag a bowl of peanuts closer to watch the show.
* Bad Guy by Kim Ki-duk. When he does eventually speak, his voice turns out to be a hoarse whisper.
* bad guy of the week is tipped off that the police are trying to track him down. While a shootout proceeds outside in the hallway, Motoko Kusanagi jumps in through the window. One mook notices her and tells two female android bodyguards to fight her off.
* Bad guy Sakyo is almost never seen without a cigarette in hand, but rarely seen actually smoking it.
* Bad Guys creates his own villainous faction and plots to surpass his former idol.
* Bad Guys Do the Dirty Work: The villains do the things that the heroes aren't willing to do.
* Bad Guys Do the Dirty Work: Villains do the things that you, the hero, can't bring yourself to do.
* bad guys get away now, but their current plans have fallen through. The heroes will have to face them again, and they know it.
* Bad guys liked to smash through the windows all the time. Thank goodness Xander develops carpentry skills. Oddly, despite repeated instances, the windows are never armored. To his credit, Xander does eventually realize the futility of repairing windows that were smashed through on a weekly basis and just gives up. What makes it funnier? Once he gives up on fixing the picture window (which at that point was getting smashed in seemingly
* Bad guys once dropped a bomb on Vartox's home planet Valeron, rendering his

people sterile. Vartox attempted to seduce
* Bad Guys, The team find themselves having to play kidnappers/terrorists. Daniel fools nobody.
* Bad guy Umanosuke, leader of the three brothers antagonizing Mugen, however, has a lidless left eye, apparently the inadvertent result of his encounter with Mugen. When his eyepatch comes off, revealing it, he becomes even more unbalanced than before.
* bad habit of this, first dining and dashing in a flashback on Drum Island, then doing so again in the present Alabasta, as well as in his own mini-series in the kingdom of (named much later) Lulusia.
* Bad Habits: Where heroes or villains dress up as a religious figure as part of a disguise.
* Bad Hair Day, due to the fact that Al incorporated their song "Buddy Holly" into the polka medley on the album, "The Alternative Polka". Unfortunately for Al, the band's manager asked the band, at Rivers Cuomo's request, to remove the snippet at the last minute, long after the liner notes had already been printed.
* "Bad Hair Day" has Candace sitting under a hair restorer after a disastrous attempt at styling her own hair. She's supposed to sit under it for an hour at setting 5, but Jeremy says he's coming over in 20 minutes, so Candace decides that 10 seconds on setting 20 will do just as well. After all, "
* Bad Hair Day takes place over the course of one entire day - the day of Monica's prom. Excluding the prologue.
* Bad Ideas shoot bombard from a range like how a bad idea is removed from thinking clearly - they're dealt with mental connection, which lets you face the idea head on, or by using telekinesis to throw their projectiles back at them, making it literally blow up in their face.
* Bad Influence has 1980s-typical behavior towards homosexuality and bisexuality. Jerrica and Aja are fine with Kimber and Stormer's relationship but clearly aren't comfortable with it. They also view it as a sign of Kimber being "homosexual", without any consideration that she could be bisexual.
* Bad Influence. Kimber sees herself as having a close buddy/buddy friendship with Stormer, but Stormer's outright in love with Kimber. Kimber's sisters also do not see their bond as "just friendship".
* Bad Influence like "You really don't want to spill yoghurt on this..."
* Bad Influences is a blogged disaster fiction about a global flu pandemic.
* bad). In the four-way duel between him, Yugi, Kaiba, and Joey, he is the first one eliminated due to him not having access to Ra or his Shadow Games. And in his later duel with Joey, he only won because the latter passed out from the life-draining effects of the Shadow Game before he could deal the finishing blow. He would have been defeated in his first match, if Mai didn't try to use Ra to finish him (not knowing it required to recite a summoning phrase written in a dead language to unlock it).
* bad is about to happen, usually but not always the Creep attacking you. Also, black spiderwebs dancing around the edge of your screen is an indicator that the Creep is close.
* Bad is Good and Good is Bad: Anything that is good, righteous, and pleasant is repugnant to you, while anything that is evil, disgusting, and unpleasant is delightful.
* Bad is Good and Good is Bad: Morality is subjective, at least for villains.
* Bad is Good and Good is Bad, when someone knows the difference between Good and Evil but has mixed up which one is which.
* Bad Job, Worse Uniform: A crappy job with poor pay forces you to wear a humiliating costume.
* "Bad Jubies" is done entirely in stop-motion animation, complete with a stop-motion version of the show's intro.
* Bad Kids Go to Hell, Craig rigs a bowl of punch to the curtain mechanism on the stage so it will fall on Tricia when the curtains are opened.
* Bad Kids Go to Hell is decapitated by the tomahawk on the sculpture of the Indian battling the serpent.

* Bad Kids Go to Hell throws the fire axe to Matt, who instinctively catches it; thereby ensuring that his fingerprints are on the murder weapon.
* Bad Kids Go to Hell, Veronica spikes Dr. Day's coffee with eye drops. While this is supposed to give him diarrhea, it actually makes him puke his guts out.
* Bad Kid's Jokes. Typical examples include missing the punch lines of real jokes:
* "Bad Kiss": There is an actual kiss when Mordecai goes back to the car looking for his wallet and Margaret follows him. Unfortunately, due to Mordecai's bad breath he gets pushed away, instantly freaks out and escapes from the scene. When talking to Rigby,
* Bad Kitty 2006, photographer Red Early is incriminated in the murder of Len Phillips when he is found with a bloody knife, refuses to answer questions, and later escapes after his arrest. He was actually cleaning the room to protect his wife Fiona, who he thought was responsible. However, as it turns out, both are innocent, each encouraged by the real murderer to believe that the other did it.
* Bad Kitty: An ex-cop who uncovered corruption within the police force, had her boyfriend turned into a zombie, and devoted herself to fighting supernatural threats.
* Bad Kitty read "Kitty does not like Thanksgiving. Kitty LOVES Thanksgiving. Kitty loves Thanksgiving for one reason- TURKEY!"
* Badland clones. Other self-imposed challenges include finishing all missions for one level at once.
* Badlands: 2005: Failed pilot from 1985 about a U.S. Marshal and his robot partner who have to escort a group of mail order brides through postapocalyptic America.
* Badlands Charles Starkweather and Carli Ann Fugate (fictionalized as Kit Carruthers and Holly Sargis).
* Badlands kill her father and then murder their way across South Dakota and Montana for a few days. Kit does all the killing, but Holly thinks it's a grand adventure.
* Badlapur due to increasingly good deeds as he tries to redeem himself.
* Bad Liar: Someone tries to tell a lie, but is very bad at making the fabrication sound believable.
* Bad Liar: Unable to lie in a convincing way and comes up with really silly lies that fool no one.
* Bad Liar who gets anxiety attacks if he tries. At one point he hears a suggestion of Frasier's, says he'll think about it, and then a moment later comes back in and apologetically tells Frasier he was getting his hopes up.
* Bad Lieutenant: Port of Call New Orleans questions. This has a much simpler justification than most examples of this trope: all of the interviewees know who committed the murders, and they're terrified of him.
* Bad Lip Reading: During the video "Democratic National Convention", Barack Obama lists several words that sound like real words but aren't, including; hondish, coddlesip, eubillicant, respeciment, complectogram and toelingus.
* Bad Lip Reading got the inspiration for it from his deaf mother, who had learned how to read lips. He started trying it by watching TV with the sound off, but what he thought was being said was so hilariously inaccurate that...
* Bad Lip Reading made from re-recording the audio for music videos, so 99% of videos have no distinguishable plot.
* Bad Lip Reading, since he chooses to remain anonymous so that the humor of his videos doesn't affect his more serious work. The few things he has revealed are that he's male, from Texas, and does all the voices in his videos himself, even the female ones (though he has had guest voice actors in some later videos).
* Bad Lip Reading singing "The Star Spangled-Banner" at an NBA game) has her call herself out on this:
* Bad Lip Reading videos. A shot already in the video proper is shown but with different lyrics, presumably from an earlier draft.
* Bad Luck Blackie near the end of the cartoon (after all, he'd been hit with practically everything else...).
* Bad Luck Bogus afterwards when the effects of the potion cause Mole to have a convulsive reaction and also causes him to rocket all around the attic.

* Bad Luck Bogus", Bogus and Brattus both fall into a mud puddle in the front yard of the Anybody residence.
* Bad Luck Charm: A character finds an item that is deemed to give bad luck.
* "Bad Luck Jack" is a Youtube short revolving around characters from the Web Comic
* Bad Luck Mitigation Mechanic against you? The developers included this mechanic to make sure you eventually succeed.
* badly and ruined their relationship and, more importantly, Sarda's life.
* Badly Battered Babysitter: A babysitter who gets injured while trying to protect their charges from harm.
* Badly Battered Babysitter: The babysitter gets hurt trying to keep the child they're looking after from danger.
* Badly Battered Babysitter: The babysitter gets hurt while trying to keep the child they're watching over from danger.
* badly. Both Souther and Kaioh really did a number on him, his first battle with Raoh was a close call, and his loss to Shin is the moment that sets the entire series in motion.
* badly done "intervention" ads. If only all real-life intervention meetings were that boring.
* Badly Drawn Kitties all crossed over via the characters Lucy Koneko and Zig Zag, although various author dramas try to retcon this out of existence.
* Badly Drawn Roy is a cartoon while everyone else is live-action, including his parents. In-universe, this occurrence is a genetic improbability similar to two parents giving birth to a child of a different race, and while uncommon and remarkable it isn't considered unbelievably impossible.
* Badly Drawn Roy. It's got more genuine drama in it than the premise would suggest.
* Badly. in particular is relieved, because he was trying so hard to remind himself how much he loved his then-wife Mary Jane.
* badly Kyon and company cover their activities, but has stated she's not going to push the issue. It's implied that she herself is hiding a plethora of adventures; if so, she's a lot better at avoiding detection.
* Badly-managed crowdfunding efforts, especially when creators make lots of empty promises, fail to deliver perks, botch the release (
* badly manipulated and emotionally abused by Nakago, mentioned above.
* badly on her ever since they were kids. Sadly, this isn't touched upon later.
* badly, when roommate Lacey casually mentions that the Villain Of The Week is hanging out at the restaurant from which she just quit working. Wendy turns attentively to Lacey, and the viewer hears the spoon clatter to the floor.
* badly who plays Giles actually has a lower-class accent, and the American Marsters used that accent as a model for Spike's.
* Bad Machinery, as not only did this cause noticeable injuries to the victims, it also got Blakey banned from dealing with children.
* Bad Machinery Lottie decides to mark her return by trading in her puffer jacket for a cape. The dramatic effect is somewhat marred by it being a blanket tied around her neck, but it is long and black.
* Bad Machinery Mildred and Jack have a mutual interest in each other, but he's an extremely nervous good boy while she recently stole a car. At the end of "The Case of the Severed Alliance", he turns her down because of this.
* Bad Machinery. Mildred is sceptical about whether it actually works, while Lottie thinks it's supposed to be a reminder that "you're doing pretty good compared to the cow". (In the end, she can't afford steak and buys a pack of frozen beef burgers.)
* Bad Machinery side-story "THAT", a teen couple are attacked at the local make-out point by a giant killer moth.
* Bad Machinery taking these roles. It's made slightly more complicated by the fact that Calvin Goater has been time-travelling before them for as-yet-unspecified reasons.
* Bad Machinery that her mum's new boyfriend is secretly a dangerous vigilante.

* Bad Manor, Boogie Mansion, and the Shakedown Schooner (the Shake King's
* Bad Mojo, as it consists of a newborn baby smirking evilly as he stabs his mother to death. An animated version even plays as you approach, accompanied by creepy music.
* Bad Mojo has four endings; only one is good, though, and to get it, you have to meet certain conditions near the end of the game.
* Bad Moms Gwendolyn in the PTA election, she finds Gwendolyn crying in her car. The two of them talk, and Gwendolyn admits that the reason she's been so obsessed with the PTA is that the rest of her life is a shambles and she's just as big a screwup as everyone else; her rich husband is actually a white collar criminal, etc. The next scene shows Gwendolyn inviting Amy and her friends onto a private jet.
* Bad Monkeys, complete with NC guns (Natural Causes) which make it look like their victims died of either a heart attack or an aneurysm.
* Bad Monkeys homeless woman who makes enough money to live by buying scratch tickets, as she has an unerring ability to pick batches of them with big winners. Narrator Jane Charlotte tries to repeat this strategy after Annie dies, to no success.
* Bad Monkeys, the protagonist Jane Charlotte works for an organization that is the second type. The organization has many branches, and the one that she works for is Department for the Final Disposition of Irredeemable Persons ("Bad Monkeys" for short), which is devoted to ending the lives of irredeemable evil persons. The various branches do almost anything you can think of, such as Panopticon, which has cameras in any picture with eyes and also in library bindings, or Catering, which will always answer if you pick up any phone.
* Bad Mood as an Excuse: A character gets into a bad mood and berates everyone.
* Bad Mood as an Excuse: Something pissed me off! I'll take my frustrations out on everyone, especially you!
* Bad Mood Retreat: A place where the character goes to when they're sad, scared or unhappy.
* Bad Moods are invincible until they open up for clairvoyance to find and destroy the cage locking their heart - bad moods always have something that's caused them, and instead of forcing through them and making things worse, empathy needs to be shown to find the source of the bad mood and remedy it.
* Bad Moon features a werewolf that changes every night, without the need for a full moon, and that doesn't need any special method to kill (or harm).
* Bad Moon Rising book where the bad moon in question led to werewolves.
* Bad Moon Rising has Chloe, who takes great delight in needling people. She's been seen to unkindly tease her lover Madison about a girl she's jealous of, openly spoken of how her friends were social rejects in werewolf society, and has even gone as far as to mock a man's dead relatives — including his father and brother — to the man's face.
* Bad Moon Rising has Chloe, with her long legs and a preference for clothes that show them off.
* Bad Moon Rising has Lee's, a popular hang out for the monster hunter crowd, which has rarely obeyed rules forbidding weapons, magic, and mummies.
* Bad Moon Rising more than qualifies for both students and staff. Deformed werewolves lived in the basement, multiple teachers used their positions to sexually abuse their students, children were used as hostages against their parents, and every headmaster the school ever had met a grisly, violent end at the hands of a student.
* Bad Moon Rising nature of the universe, that meant that the students and staff also included a girl who was more reptile than wolf, a smattering of the magically inclined, more than a few ghosts, and at least two living people who could speak to the dead.
* Bad Moon Rising. Nike is a six foot tall amazonian werewolf. Dale is significantly shorter. This is also the default state for Peter and any girl he dates, thanks to having been born without legs.
* Bad Moon Rising recently showed that Terry was originally sent to Sokolov Academy

to act as a spy for his mother, but was unaware of the real reason he was sent to the school at the time.
* Bad Moon Rising shows Cruel and Unusual Deaths to be the norm when it comes to the Headmasters of Sokolov Academy.
* Bad Moon Rising. There's some in-universe debate about who Chloe's maternal grandfather actually was, and both she and her mother are noticeably darker than their known relatives.
* Bad Moon Rising, this is the dynamic between Chloe and most of her siblings, but most especially her brother Derek.
* "Bad Moon" Rison, it actually was picked up by other announcers. And him. He has a "Bad Moon Rison" tattoo.
* Bad Moon speedruns do put everybody on a pretty equal footing, by temporarily stripping you of those familiars and skills. There's a guide out there for reliably doing one in 12-14 days. (To compare, a 1-day speedrun has been done in regular play, though luck was a significant factor, and there are people who consistently do 4-5 day runs in Hardcore.)
* badmouthes said god, and absorbs part of her divine essence, effectively becoming a demigod herself, just so that Tsumugi can travel with her. Yeah, she's way awesome.
* Bad Movie Beatdown, but in 2013, he started using a much higher-pitched, more energetic delivery. The high pitch later slid back down to his normal range while keeping the newfound energy. According to his Twitter, this was because he wanted to counter criticism of his monotone delivery, but he reined it in a little because he felt he was overcompensating.
* Bad Movie Beatdown, Film Brain signs off with "...and I need a stiff drink."
* Bad Movie Beatdown had Film Brain right at the start showing the cast is terrible ("the characters soon open their mouths, and you wish they stayed silent for the rest of the movie"), and he never even cares to doesn't even bother with their names, instead calling them Whiny, Prick, Bland, and Slut.
* Bad Movie Beatdown has Rap Critic quickly decide watching paint dry is preferable to the film. Film Brain envies him.
* Bad Movie Beatdown twice, first when one of the two most annoying robots nearly gets dismembered by Devastator, and then when Sam Witwicky is shot.
* Bad Movie Beatdown until nightfall to change a flat tire on their car, Film Brain makes a joke about it.
* Bad Movie Beatdown uses this trope by name to describe a gag involving two monkeys slapping the main character.
* Bad Movie Beatdown, we see Film Brain staring through binoculars, head tilted, saying "I didn't even know you could do that."
* Bad Movie Beatdown where Welshy refused to let Film Brain tell any of the victim characters' names, stating that they were just dead meat waiting to be slaughtered and should be treated as such by only being given numbers.
* Bad Movie Night (her final film), "It's really sad to see such a huge star (like her) be consigned to the Z-grade abyss of films like this. But, hey, a girl's gotta eat."
* Bad Nazi Documentaries", Quinton lambasts several Nazi documentaries for focusing on something like "were the Nazis obsessed with the occult?" or "was Hitler gay?" while barely mentioning their crimes.
* Bad News Ballet and bullied by the more serious students who got bigger roles.
* Bad News Brown a.k.a. Bad News Allen got jumped by the Rougeau Brothers backstage at a WWF event in the '80s...after jumping Dynamite with brass knuckles, Bad News saw what was happening and came after them...with a 2-on-1 advantage and brass knuckles, they were terrified to mix it up with Bad News and ran away...
* Bad News Brown often simply got angry when his head was slammed into a turnbuckle.
* Bad News" His response is that "You really want to know what riding a dragon is like? First of all, you don't ride a dragon; the dragon rides you. As soon as you climb onto a dragon's back, you let go of the idea that you are in control. The dragon is the pilot; you are a passenger—no, a barely tolerated stowaway."

* Bad News, Irrelevant News: In a "good news, bad news" situation, the good news is weak and/or irrelevant.
* Bad News, Irrelevant News' parody; the bad news was always something horrible like "You have cancer", "but I've got good news: I just saved a bunch of money on my car insurance by Switching To GEICO!"
* Bad News, Irrelevant News that has nothing to do with the Bad News — like you just found a nickel. See the individual page for examples.
* Bad News, More News: bad that anything else is just some extra information on it — if your friend is dead, you don't feel any better when you're told who did it.
* bad news of telling the public a revered war hero had betrayed them. Needless to say, he took the pill.
* "Ba-Do and the Lantern Festival" ends with Ba-Do and Sagwa separated from their family but enjoying the last of the lantern festival... and then the episode just abruptly stops without any explanation as to how Ba-Do got back home. As a result, we're left to assume the Magistrate and Tai-Tai realized one of their daughters and pets were both missing and were able to find them.
* BAD: Or, the Dumbing of America by Paul Fussell begins with an explanation of what separates "BAD" things from the merely "bad":
* Bad Penny carries a brace of silver daggers, one blessed, the other cursed. When she uses both simultaneously, it's noted that some gods would die from such a blow.
* Bad People Abuse Animals: A character is shown to be evil by having them be cruel to animals.
* Bad People Abuse Animals by needlessly harming and mistreating animals.
* Bad People Abuse Animals: Characters who abuse animals often cross this.
* Bad People Abuse Animals: If a person mistreats and harms animals, they're automatically evil.
* Bad People Abuse Animals: I just love hurting these stupid creatures!
* Bad People Abuse Animals: It's shown how awful the villain is by having them mistreat animals.
* Bad Piggies is to build vehicular contraptions that will transport your pig across the screen. Even if you survive the trip, your vehicle often will not.
* Bad Planet and the closest ones to this trope are the Phaedons, an nearly extinct race of large, grey humanoids with extra eyes.
* Bad Planet that harvested all life on their world and reduced it into a designated "bad planet".
* bad port that is several versions behind the iOS version, and all of their mobile accessories to date are for iDevices only. Many have speculated that they have an exclusivity deal with Apple.
* Bad Powers, Bad People: Evil people have powers that are typically used destructively.
* Bad Powers, Bad People: It can't be any more obvious that the villain is a bad guy if their powers are dangerous and lethal ones.
* Bad Powers, Good People: A hero has superpowers that are usually associated with villains.
* Bad Powers, Good People books, where the Grand Elusa is a white spider. A talking, ancient, size-shifting, teleporting, deeply magical, endlessly hungry white spider rightly seen as terrifying. She also patiently endures the main character's whining, has "love as strong as her hunger", and restricts her diet to evil things, even if she talks a lot about eating any visitors who show up.
* Bad Powers, Good People: Dark powers don't always equal to a dark person.
* Bad Powers, Good People: Forgive me. My powers are terrifying, but I mean you no harm.
* Bad Powers, Good People: The good guys have powers that would be more appropriate for a villain.
* Bad Powers, Good People: Their powers may be either freaky, painful, or too destructive, but they're using them for good reasons.
* bad precise, so counting to two or three seconds may simply result in the grenade exploding in your hands in the middle of throwing.

* Bad Present: Someone from the past ends up in the present and dislikes it.
* bad presents. Open one up and a little raincloud follows you for a while, occasionally zapping you with lightning bolts and draining your health.
* Bad Present: The present is fine for us, 'cause we're used to it, but the time-traveller from the past sees it as bad.
* Bad produced five #1 hits, yet "Smooth Criminal" only reached #7. While none of the album's #1s are obscure, "Smooth Criminal" went on to become one of Jackson's most recognized songs (with an equally recognizable cover in 2001 by nu-metal band Alien Ant Farm), and definitely gets more play these days than "I Just Can't Stop Lovin' You" or "Dirty Diana". The latter especially; many people who weren't around when it came out have no idea Michael Jackson recorded a hard rock song, let alone had it top the charts.
* Bad Rats: the Rats' Revenge to exact gruesome revenge on their cat oppressors.
* Badra wanted to keep Wonder Woman alive to force her to witness the Earth's destruction before killing her.
* bad. Recently, this has started to get subverted, thanks to popularity of fantasy works and the good PR that Neopagans have.
* "Bad Reception in Albany" featured Rob at a hotel at a friend's wedding reception, desperately trying to find a working TV to watch a fashion show to see a model his boss wants as a guest on his show.
* Bad Religion also have "The Forbidden Beat", which is about Hardcore Punk...Or heroin addiction.
* Bad Religion for use in all of your pedantic endeavors into abstruse grandiloquence. An immense plethora of the sesquipedalian tendencies of the lyrics can ostensibly be attributed to vocalist Greg Graffin, the band's resident "Master of Science." Being an English teacher also probably helps.
* Bad Religion has a weird example of this, as they have this going on with two versions of the same song, "21st Century Digital Boy" (which is also their signature). The 1990 original is the vastly more known one among their fanbase and punk rock fans in general, and also puts up vastly superior streaming numbers, but failed to chart. The 1994 re-recording is by far Bad Religion's best charting entry on alternative and the version you'll most likely hear on terrestrial radio, but that's it as far as traction goes.
* Bad Religion has "Punk Rock Song", describing widespread poverty and suffering. It alleges that society ignores this suffering and instead keeps "pushing on." It hence says that it is a "punk rock song" for those who do still see these problems.
* Bad Religion song "Sinister Rogue" contains a mention of this, among other attacks on the Catholic church.
* Bad Religion, which is about overreliance on technology and the negative effect it has.
* bad reputation dubs ultimately started to get), and feel it would be better to have it released only in its original language.
* Bad Robots has TezCorp, a Megacorp created by a malevolent robot, who manufacture all forms of robotics and electronics that screw over human victims.
* Bad Robots: Tez One is pretty much one, being the mysterious head of TezCorp and wanting to teach humanity a lesson for mistreating their electronic appliances.
* Bad Robots uses this as the justification for its pranks. A robot named Tez One has gained sentience, and witnessed humans mistreat their electrical appliances. So he forms TezCorp to manufacture products that torture and screw humans over with this trope as the justification.
* Bad roleplaying character descriptions can invoke this trope as the result of their players evidently consulting a thesaurus every few words in an attempt to sound eloquent or
* Bad Ronald. His mother was sheltering him inside the walls after he'd committed a crime and needed a place to hide, but then she dies and the house is sold, with nobody knowing there's a crazy recluse still living in there.
* Bad Samaritan. Cale seems disgusted and throws her some clean clothes.
* Bad Samaritan: Someone takes in the hero and seems (at first) to be helping, but they have ulterior motives.

* Bad Samaritan: Think this guy is helping you out of the goodness of their heart? Think again.
* Bad Santa featured a thief working as a Mall Santa in order to rob the stores.
* Bad Santa has either gone bad or has a villainous impostor or rival.
* Bad Santa: In one scene, Thurman receives a wedgie from several bullies.
* Bad Santa is oddly touching. Hearing Billy Bob Thornton monologue about how crappy a person he is while Chopin's Nocturn Op.9 No.2 plays is rather moving.
* Bad Santa: Jolly, present-giving, and loves kids? No no no, not this Santa!
* Bad Santa: The Director's Cut. This version is the shortest of the releases since Terry Zwigoff disowned the first two cuts and is said to be much darker. The Blu-Ray has the second and third cuts of the film.
* Bad Santa," which is commonly associated with rednecks and trailer parks.
* Bad Santa, who played the mall manager and passed away before the film was released.
* badscience.net can't prove anything). Unsurprisingly, the areas with traditional relations to snake oil trade suffer most.
* bad sign, though we later learn there's more to it than meets the, well, eye:
* "Bad Situation" and "Far Be It for Me" (two early duets establishing the relationship between Glinda and Elphaba, which were eventually supplanted by "What Is This Feeling?")
* bad smell, of course. However, he denies vehemently that Andalites have ever been known to stink.
* bad spelling gets the word 'huge' wrong often enough and consistently enough that it spawned the pseudo-character Hugh, who shows up whenever a monster is being described.
* "Bad Stretch" with Carmendillo screaming, running towards the camera, and running back out saying, "Gotta hide, gotta hide!"
* Bad Taste, Derek falls off from a cliff, fracturing his skull. To keep it together, he stumbles to his car and puts on a hat, which gets blown off later by a stray bullet, sending him into convulsions.
* Bad Taste, form the nucleus of Jackson's later collaborative team, such as Jamie Selkirk (Editor), Costa Botes (Documentarian), and Fran Walsh (Co-writer & Jackson's wife).
* Bad Taste: Lord Crumb seeks to make humans into fast food for his intergalactic restaurant chain.
* Bad Taste, one character certainly wishes his pants were a darker shade of brown.
* Bad Teacher during a car-wash fundraiser (for the class, but actually for her breast enlargement). She's doing it to seduce her rich colleague, but it works on several others as well.
* Bad Teacher when Meredith and Joel kiss while the overhead sprinklers are on after she gives him a passionate "kiss in the rain" speech.
* "Bad temper" for Hulk and "Doesn't play well with others" for Punisher.
* Bad-Termometer is Swedish for "bath" — so it actually is a decent bath thermometer.
* Bad. They will seem like good King's Men at first, but their inner natures are revealed through nasty swearing and messy quarters. When ordered to arrest the heroes, they'll beat them up in doing so
* bad thing. But Puma-Dyne being Puma-Dyne, they, again, apparently had no backups or countermeasures to the Macro-Bots prepared in the event that they fell into the wrong hands, so once the Metallikats steal them, there's no choice but for the SWAT Kats to destroy them.
* bad thing by any means because it helps your Pokémon get stronger stat boosts when they level up. They stop spreading it after a few days. Any Pokémon that's ever had the virus will retain the speedy growth forever. It also "freezes" when the Pokémon's in a box, allowing you to keep a few virus-spreaders handy for when you need to infect more of your mons.
* "Bad Things" was originally a non-charting single for a very little-known
* Bad Things Will Happen can use Destiny Bond to threaten this. He uses it to stop the battle with Miray the Banette, who, not wanting to die again, has to let them

escape while she waits for its effects to wear off.
* bad thing to encourage in an organization. If the leader is suddenly sidelined due to illness, death or other unforeseen issues, the organization can be left scrambling to fill the roles the leader played. Having a clearly delineated succession plan can help so the other people in the organization know what to do in case the boss is suddenly out of commission.
* Bad Time on the Border": Hannibal lifts Maria's mother Delia under her knees and shoulders as he carries her to the helicopter. Unlike in many cases, there is no intended romantic subtext; he's rescuing her to help her pre-adolescent daughter and she's too sick to walk.
* Bad Time on the Border, he doesn't break down. Exasperated by Hannibal, the villains decide to put him on the truck with the other immigrants and push him out while it's in motion. That way, he dies, but their bosses can't prove they cut down their profits by killing a potentially valuable slave.
* Bad Times at the El Royale: 2018 film set in 1969, but the prologue is set ten years earlier.
* Bad Times at the El Royale) but Rose is so brainwashed that she only wants to get back. And when Billy Lee and his followers arrive to get her back, all hell breaks loose.
* Bad Times at the El Royale, Darlene uses her singing and clapping to cover up the sound of her partner prising up the floorboards in her room.
* Bad Times at the El Royale: While they are searching the secret corridor behind the cabins, Miles is desperately trying to confess something to Father Flynn, who keeps putting him off (for obvious reasons). It turns out that what Miles was trying to tell him would have been really useful information to have when Billy Lee arrives.
* Bad Timing about cop investigating a tryst between a psychiatrist and a married woman that led to an overdose by the latter.
* "Bad Timing" has Princess Bubblegum pour herself what looks like whiskey after watching LSP cry.
* Bad Timing: The film charts the emotional, spiritual, and physical ups and downs of a young couple's relationship that is fueled by their compulsion to attack, manipulate, and humiliate one another.
* Bad Timing: There is not one single scene where someone isn't seen smoking, lighting, or stubbing out a cigarette. All three actions often appear within the same scenes. A case of Everybody Chain Smokes.
* Bad To The Bone. Through it all, her one virtue is that at least she is aware of her depraved and degraded nature and will own up to it on occasion.
* Bad to the Bone: When a certain song is played so many times in movies, that when it's played, the audience knows what it's signifying.
* "Bad to the Bone", where Professor Oak tells Ash that he should leave his lab.
* Bad to the Last Drop: A non-alcoholic drink that tastes bad, most often coffee.
* bad touch good advice and that it was pretty bold of the show to make it.
* Bad Translator, which takes any sentence and completely mangles its meaning.
* Bad Twin is supposedly written by a passenger in the plane crash which occurred in the pilot episode. Remember the guy who got sucked into the airplane engine before it blew up? That's supposed to be him.
* 'Badtz-Maru' means 'cross-circle'. In Japan, a cross ('badtz') and a circle ('maru', literally meaning 'round') are used to signify a bad answer and a good answer, respectively. These symbols are thus associated with Badtz-Maru and they are often featured alongside him in the franchise.
* bad, we find that this entire arc was an elaborate revenge scheme headed up by the leader of the aforementioned church, who was previously a Catholic nun who'd been raped by a priest and wanted to destroy the Catholic Church in retaliation, annihilate mutantkind just because she hated them, and set herself up as a sort of messiah to prove her importance all in one fell swoop.
* Bad with the Bone Kimimaro, made even cooler by the fact only one arc earlier they almost killed each other during the Chūnin Exams.
* Bad with the Bone. The Lich King has skulls in just about every location of his

armor where they would fit.
* "Bad Wolf", after the Controller (the human controller of a Dalek puppet corporation who switched sides to aid the Doctor) says "Oh my masters! You can kill me, for I have brought your destruction!" just before she gets, well, destroyed.
* "Bad Wolf", a reality show about three people having to live with a bear.
* Bad Wolf back, and now the Doctor is fighting them! — but also has a faintly desperate air, as if by dropping the Doctor into a world based on the current TV landscape he'll begin to belong there after all these years.
* "Bad Wolf" earlier. The Daleks cannot comprehend the "meaning of this negative".
* "Bad Wolf" had quit the show leaked a few days after his first episode went out.
* "Bad Wolf", his response is to say, "Yeah. And doesn't that scare you to death?"
* "Bad Wolf". Instead of freeing Earth from the tyranny of the Jagrafess, his actions result in a complete shutdown of the government, followed by decades of chaos before an even worse example of tyranny takes hold, forcing people to participate in deadly games and others to watch them.
* "Bad Wolf" Jack jury-rigged. When one of the technicians, frightened, throws up his hands and begs him not to shoot...
* "Bad Wolf", they're still around, meaning his people died for nothing.
* "Bad Wolf" this later, when he says "Ladies, your viewing figures just went up!"
* "Bad Wolf" was either mentioned or written in the background of every episode apart from "Rose"
* "Bad Wolf": When the Dalek ships are revealed towards the end, the soundtrack features a male choir chanting. The constantly repeating lyrics ("Oh mah koreh") mean "What is happening?" in Hebrew.
* "Bad Wolf", which, given the length of the series, neatly illustrates that depending on the writers so depends the threat. An early Dalek appearance has them burning through a forest while chanting; "Align and advance, advance and attack, attack and destroy, destroy and rejoice!"
* Bad word of mouth: bad, just that enough people think it is to cause the movie to fail.
* Bad Words, 40-year-old Guy Trilby is befriended by 10-year-old Chaitanya Chopra.
* Bad Words, Jenny Widgeon, who helps the protagonist get into a kid's spelling bee specifically because she'd get a story out of it.
* bad writing. If you aren't laughing at either one of those you'll be laughing at the fact you WERE laughing at one of those.
* Baek Morae is terrifying enough as a boss that Orca doesn't feel comfortable with disobeying his orders and it's implied he'd kill Kana if she became useless to him. Even to a lesser extreme, he's rather uncaring about their emotional well-being in the long run and makes them do work he's too lazy to do himself.
* Baelfire/Neal Cassidy seems to avert this at first, living at the edge of society as a petty thief. Flash-forward ten years, and he seems to own a flat and have a corporate job.
* Baelheit, leader of Machina Vanguard and one of two candidates for Emperor, and
* Baelor. In this case, it's not romantic but an act of Yoren's respect for and loyalty towards her father and their family.
* Baelor I Targaryen "The Blessed," had a big relationship with the Faith of Seven. As such, he remained celibate for life by imprisoning his sister-wife Daena and his sisters Rhaena and Elaena to resist temptation. This caused so many problems that his refusal to touch his wife left him without heirs, bringing the worse people into the line of succession, and eventually causing a huge civil war in the long run that saw hostilities that lasted for more than half a century (the Blackfyre Rebellions).
* Baen Books, where a kid fakes being a soldier but ends up doing the job for real.
* Baffled! - a failed pilot starring Leonard Nimoy as a race car driver who gets mysterious psychic abilities from an accident.
* B.A. From averts this. He plays every rule for better or for worse. He eventually seized control of his game through the use of a GMPC and his control over non mechanical story elements (even in the PC's backstories.)
* Bagdad Cafe: After the climax, the film ends on Rudi awkwardly proposing marriage

to Jasmin.
* Bagdad Cafe: Jasmin sees an unusual light pattern in the sky, calling it "her vision". Rudy later tells her it's caused by the local solar panels, and uses the pattern as his signature. Jasmin is no less impressed.
* Bagdad Cafe): the main character, a tourist willing to stay in the country she's visiting, is about to be kicked off the country. One of her friends then runs to her, proposing her to marry him so she can stay. The trick here is that's actually a completely romantic wedding since they had been flirting a lot before that but were actually too shy to admit their feelings. So immigration laws actually made their love story possible.
* Bagdad Cafe. When Jasmin is forced to return to Germany, her magic show goes away, and Bagdad becomes a wasteland once again. When she returns, the magic show returns — as does human spirit in the area.
* Bag Enders featured an adolescent Pippin being upset because his mother had told him kittens would die if he masturbated and he'd found a dead kitten in the garden and been convinced she was right. Merry gave him a kitten so he could watch it and stop if the kitten started looking ill to prove it wasn't true. Unfortunately, Pippin couldn't bring himself to do it with the kitten staring at him, so Merry ended up spending several evenings sitting in the next room and watching the kitten for him.
* Bag Enders has, just as any eternal adolescent would, been collecting porn for six thousand years. (He was twenty-nine at the time of the quest, which to a hobbit is roughly the equivalent of a sixteen-to-nineteen-year-old human, and is now stuck at that age forever.) He keeps it all in his mattress. Unfortunately, he's in the bottom one of a set of bunk beds, and the collection is so huge that his nose now presses against the top bunk when he sleeps. The rest of the Fellowship have dubbed him the Porn Dragon.
* Bag Enders, Merry and Pippin often resort to each other when they can't find anyone else, and sometimes include Frodo.
* Bag Enders story gets kicked off when the porn stash beneath Pippin's mattress gets so high that Merry rolling over in the bunk above him breaks Pippin's nose.
* Bag Enders. Their exploits include getting tricked into traveling across Siberia, selling "special Lembas", and driving an ice-cream van around a block 12 times while looking for the Fellowship's house (with their buddy Dave out cold in the back.)
* Baggage, by having potential dates hope that their embarrassing personal secrets don't leave too much of a negative impression on a potential bachelor(ette). It's even got Jerry Springer.
* Bagged Then Tagged!, this happens to both Dawn and Ash when Team Rocket's decoy robot explodes in their faces.
* bagging boy strike makeshift raft, Homer wonders if the strike back home is over. His rant is cut short when they careen over Victoria Falls. After they survive this, they follow a monkey in hopes of finding their way back to civilization... as Homer continues to rant on why those bag boys don't deserve anything.
* Baggy Pants & The Nitwits revolves around the adventures of Baggy Pants, who is basically The Tramp as a cat.
* Baghban was old enough to understand that he was an orphan before he was adopted. However, since Raj and Pooja took care of him, he acknowledges them as his true parents and claims that his real parents probably would never give him the love he received from Raj and Pooja.
* "Baghdad Battery" test revealed the voltage created by the battery probably wasn't high enough to cause a proper shock, but they posited that under the right circumstances it might produce a tingle or other unusual sensation.
* Baghdad fell to the US Army until 2008 and the firing of the military/police personnel caused anarchy to break out within hours of the Coalition taking control. A lot of these people also took their expertise to the insurgency, thus bolstering its ranks with knowledge and equipment. As the core of the Ba'athist Iraqi Army were Sunni Arabs, thus giving them a nigh-infinite supply of arms and trained men, this contributed to the following insurgency having Sunni Arabs being responsible

for the bulk of killings despite constituting only about a fifth of the Iraqi population.
* Baghead, Matt heads up to his bed with a bottle of shampoo after making out with Michelle, but stopping shy of sleeping with her.
* Baghead, Matt is relieving some tension with the help of a shampoo bottle when Chad and Catherine jump him with bag masks, only to realize afterwards what they caught him in the midst of it.
* Bagheera also takes on a fatherly role with Mowgli; in the live action
* Bagheera in the sequel. Though he's one of the most important characters in both
* Bagi, the Monster of Mighty Nature fear about what happens when people play with genetics.
* Bagi, the Monster of Mighty Nature has a personal vendetta against Bagi — she killed his mother when she promised not to. He didn't know she was set free, however.
* Bagi, the Monster of Mighty Nature has caught a lot of attention with the furry community due to her seductive personality. Helps that this animated film is one of Tezuka's few animated works geared towards an older audience, alongside being one of his last works during his lifetime.
* Bagi. Though as the movie progresses she begins to regress towards her half-animal side and eventually loses speech and coherent thought by the end.
* Bagman", the Twins are grabbing $7 million dollars at a Cartel stash house to pay for Lalo's bail and to meet with Saul to deliver him the money. As they leave in their car, the camera zooms out to reveal one of the workers at the stash house was observing the Twins and he makes a phone call to someone to inform them about the Twins' next move.
* Bag of Bones, Stephen King describes reducing a two page section on Mike Noonan's community-service work backstory to two paragraphs after his wife said it was boring.
* Bag of Holding logic: an outdated subway token for a "rune of transportation", for example.
* Bag of Holding that tries to swallow anyone who reaches inside it. Many players are quick to see the potential in a portable garbage disposal. The general consensus is that any player who can't find a use for a "cursed" item isn't trying hard enough.
* Bag of Kidnapping: Abducting someone by wrapping them inside a big sack.
* Bag of Kidnapping: The classic way to kidnap someone is to get them in a burlap sack.
* Bag of Sharing: Everyone in the team can access the same inventory even when they're apart because forcing the player to micromanage the inventory would be too obnoxious.
* Bag of SharingThere are many characters but they share one inventory.
* Bag of Spilling: A character loses all their items and abilities in the sequel.
* Bag of SpillingSaid sharing most likely won't happen between sequels.
* Bag of Spilling to let the new characters be useful. But they are too old to even try to get their powers back.
* Bag of Spilling: Wait, didn't I have a rocket launcher at the end of the last level?
* Bagpipe Express, quickly cobbled together by Gadget, can shoot small round pebbles from one of its pipes. If you feed a whole lot of them through a funnel (which Chip does), you get fully automatic pebble spam.
* Bagpipes. Later in the episode, Lily and Marshall's bagpiping is seen to have a similar effect on their downstairs neighbors. Then it turns out that it was the couple above the elderly couple.
* Bagpipes were apparently confiscated from the Scottish after the Jacobite uprisings, as they were viewed as weapons. While this had more to do with their use to rally and direct troops (much like other countries used bugles and drums), anecdotes have it that bagpipes were effective at countering British cavalry charges as even trained horses are terribly unnerved by the sound. Completely understandable for anyone who has ever had the misfortune of standing in front of a

half-a-dozen men playing the bagpipes at the same time.
* Bagpuss: Emily, the little girl who owns Bagpuss and the shop, and is seen in the title montage of sepiatone photos, was played by Emily Firmin, daughter of series illustrator Peter Firmin.
* Bags of potato chips (AKA crisps) are about half filled with air, though there is a practical reason for this: Tightly-packed bags of potato-based snacks tend to crumble into dust during shipping as they press up against themselves. Corn-based snacks, like Fritos and tortilla chips, are less vulnerable and are often filled to the brim or at least three-quarters up.
* Bagthorpes Haunted, Mr. Bagthorpe chooses the worst possible bidding sign for someone who spent the night before staying up hoping to see ghosts — a half-stifled yawn. Predictably, he ends up buying a large amount of useless items, including an ancient gramophone that plagues them for quite some time. Due to a lack of coordination, he also accidentally gets into a bidding war with his wife over several pieces of bad furniture they want for the house.
* Bagthorpes Unlimited championship, while Esther is a published poet, and this combined with the fact that they're both dull as dishwater socially leaves their cousins absolutely detesting them.
* Ba Gua further splits the elements, with Metal being divided into Heaven and Lake, Wood/Air into Wind and Thunder, Earth into Earth and Mountain, and Fire and Water remaining the same. Some correspondences are switched (i.e. Earth becomes pure Yin and Metal pure Yang, with Wood/Air being the "in between" element).
* Ba Gua uses intricate footwork to give the impression that the practitioner is closer or farther than he actually is.
* Baguette Beatdown: A long loaf of bread is specifically used as a weapon.
* Bahamut and Matoya's relationship. And that the quest item they had just fetched for Bahamut was actually the last ingredient for a virility drug.
* Bahamut intentionally ruined Ardyn's life so he'd become a vector for a cure to the Starscourge. Ardyn is allowed to consume the minds of humans to become the lynchpin of demonkind, while Somnus' dynasty is strengthened over time so they can defeat Ardyn and activate the cure. When Ardyn attempted to kill Regis, Noctis' father, before he was born, Bahamut stopped Ardyn under this reason; the Caelum dynasty has almost completed its evolution and and Ardyn must spare the bloodline for one more generation to finally be destroyed. Ardyn, one way or another.
* Bahamut Lagoon is an example of the first type, to the degree that after Yoyo is rescued from his captivity, he defects to the rebellion to be with her.
* Bahamut Lagoon loves this. Structures heal, swamps and spikes hurt, and a ton of stuff slows the characters down. And they all be affected by the right element.
* Bahamut Lagoon makes it seem like she has a giant chin, due to her clothes' neckline making her neck look like it's part of her face. (Thankfully, gets a better sprite halfway through the game.)
* Bahamut Lagoon: Palpaleos kidnaps Princess Yoyo, and then they fall in love.
* Bahamut Lagoon: Princess Yoyo of Kahna, an all-powerful summoner, traveling with Byuu, a knight. In Byuu's defense, he's good at what he does — but he's got a supporting role at best.
* Bahamut's base is either right next to your current location, a train ride away in the jungle, or a boat ride away on an island.
* bahay na bato literally means "stone house" in Tagalog, but it's applied as well to those hybrid houses.) On the other hand, other colonial buildings were made exceptionally strong and durable, with squat profiles and detached belfries, in even more earthquake-prone locations; see the Ilocos region, where most colonial houses and churches are at their sturdiest.)
* Bahia Bakari, a 14-year-old girl who was the only survivor of the crash of Yemenia Flight 626 in 2009. The plane crashed into the ocean, and 152 people died; she clung to a piece of aircraft wreckage, floating in heavy seas for over nine hours, much of it in pitch darkness, before being rescued.
* Bahija herself is a former intergalactic warlord named Acutus, who is entirely unapologetic for committing mass murder in the name of conquest, being a complete nymphomaniac, and forcing people to serve her against their will. It is implied

that at the height of her power there were few lines she wasn't willing to cross. When called out on her behavior, she just smiles and daydreams about Callista.
* Bahryn, one of Geonosis' moons, can reach temperatures below freezing, the exact opposite of the world it orbits. One creature that has adapted to the moon's climate is a giant, carnivorous lizard called a bonzami. Oh, and they're
* Bahry One-Hand. He is only present in half a dozen chapters, but his impact of the story is undeniable. If not for the scientific upbringing he gave to his son, Harry would be a completely different person and the story would look quite differently.

* BAil_A_R decides to sell her spinning wheel so her boyfriend can have a proper sword.
* Bailee Madison played Goodwin's character as a child and the actress could easily pass for Goodwin's daughter or young sister. She also nailed some of her mannerisms.
* Bail Equals Freedom: Bail is treated as an easy way to skip a future trial and possible sentencing. In real life, it's a monetary guarantee that the accused will show up for trial and "jumping bail" is a crime in itself. Flight risks or those who pose a clear and present threat to the community will generally not be granted bail, and additional conditions may be attached depending on the nature of the charges; no-contact orders, curfews, travel restrictions, and substance restrictions are all fairly common ones.
* Bail Equals Freedom: Fiction depicts paying or pledging a bail as being the same as paying a fine. Once the bail has been paid, the prisoner is free to go.
* Bailey, after 7 years of trying, gets pregnant right when she's about to become an attending.
* Bailey Hopkins, AKA "X-Ceptional", the protagonist of the miniseries
* Bailey Pickett, while not nearly to the extent as Cody, also has her moments of insufferability.
* Bailey's are trying to rebrand, to lose their fusty, old-fashioned image. As they were trying so hard to prove that they Don't Suck Any More, they were hesitant to accept a request from
* Bailey School Kids books involved the four friends opening a bottle and supposedly freeing a genie who granted them three wishes each.
* Bailey School Kids, depicting their entrance and the facility itself.
* Bailey School Kids: Mrs. Jeepers shows every sign of this, being very suave and ladylike, with a widow's peak, a Eastern European accent, an air for the dramatic when she's not being calm and menacing, and outdated clothes.
* Bailey School Kids Mrs. Jeepers to her childhood home in Eastern Europe, which unsurprisingly turns out to be one of these.
* Bailey School Kids series, the main sports rival of Bailey Elementary (and Camp Lone Wolf) is the Sheldon Sharks, who are usually shown as the typical "rich kids with fancy equipment" variant, against the "average Joes" of Bailey Elementary. (Or, as average as a school that may or may not be full of monsters can be.)
* Bailey School Kids: Students keep getting new teachers and other authority figures who seem to be monsters and aliens.
* Bailey's first girlfriend Kate occasionally nicknames him 'Barley.' He mistakes this for
* bailiff Selma, died after the first two seasons, so her character was also written off as deceased.
* Bail in some states is also known to be set extremely, unrealistically high for people that they have to make overtures of giving a fair choice to due to local laws, like mass-shooters, rapists, and serial killers who if they actually made bond, would likely skip town or commit more crimes because they're going to jail anyway when their crimes are linked. It's not uncommon to hear "in jail on (a 6 or

7 digit) bond" for these types.
* Bail Organa is taken aback and more than a little shocked when confident, self-possessed Jedi Master Obi-Wan Kenobi assumes this position during their journey to Zigoola in
* Bail Organa of Alderaan, Leia's adopted father, was played by the Latino actor
* Bain will usually blame himself or says how he underestimated the cops whenever you fail a heist. He apologizes and even starts working on bailing you out of jail. While the player characters have no reaction to this (being in jail obviously), it makes many players see Bain as quite a nice guy despite the fact that he's the mastermind behind all the heists.
* Baird receives a prophecy that she will be killed by a supernatural assassin in the Library at a certain time, despite the Library being warded against said assassin. She decides to avoid the Library and goes on a case only to be captured in a maze with the assassin stalking her. When the appointed time approaches she discovers
* Baise Moi. Guess who, shortly afterward, turns into a psychotic killer?
* Baise Moi was the first film in three decades to be banned in France. It was eventually reclassified as X (generally a rating for porn), then 18 (which has this film to thank for its reintroduction as an official classification).
* Bait 3D, a group of people are trapped in a partially submerged convenience store with two great white sharks after a tsunami devastates the coastal town.
* Bait 3D: A tsunami engulfs an Australian beach town, and a handful of survivors are trapped in an underground convenience store. Then they discover that a great white shark is there with them, which starts picking them off one by one.
* Bait and Switch aboard. Once they got it into position, though, it blew the other ship away in one shot.
* Bait-and-Switch Accusation: A serious accusation is switched out for a less severe one.
* Bait-and-Switch Accusation: Someone thinks they're about to be accused of the thing they're keeping secret, but in reality, they're being accused of something different.
* Bait-and-Switch all because you pirated something that took a great amount of hard work and money to create...

* Bait and Switch-class starship, carries a complement of 180 quantum torpedoes, and the crew commonly launches them in spreads.
* Bait-and-Switch Comment: It looks like they're saying that statement about one person or thing, but it turns out they meant another person or thing.
* Bait-and-Switch Comment: It seems like someone is saying one thing, but it turns out they're saying another.
* Bait-and-Switch Comparison the other (e.g. "The difference between the mayor and a mosquito is that one is a bloodsucking pest and the other is an insect").
* Bait-and-Switch Comparison: Two subjects are compared, and a description that sounds like one subject is revealed to actually be describing the other subject.
* Bait-and-Switch Credits: The opening credits make it seem as though the show is something different.

* Bait and Switch crew as operations officer because the ship's previous ops officer, Lieutenant Commander T'Var, was promoted and given her first command.
* Bait and Switch, Dul'krah, Clan Korekh, a member of an alien culture who isn't fully assimilated into Starfleet's less formal stylings, uses his species' salute when talking to his captain (the viewpoint character). It consists of pressing your forearm to your chest and bowing slightly.
* Bait and Switch for violating Starfleet fraternization policy the exact same way (having sex with one's direct subordinate).
* Bait-and-Switch Gunshot: A gunshot is heard, but the person expected to be hit isn't.
* Bait-and-Switch Gunshot: It looks like someone is getting shot but it turns out that either the gun is not loaded, the shooter gets shot, or someone else gets shot.
* Bait and Switch has the "Hathon hammer", a cocktail made from bloodwine (a Klingon liquor twice as potent as whiskey), kava juice, and kanar (a Cardassian liquor). It's described as being tasty, but like its name says it hits you like a hammer. Eleya also calls the bartender who invented it insane.
* Bait And Switch, Hieronymus disguises Maerten as a novitiate to help them break into a castle. Maerten later takes advantage of the disguise to escape.
* Bait-and-Switch high — for a successful promissory estoppel request, you have to have sunk a significant amount of time, money, and resources into something that you had every reason to believe was a done deal, only to have it arbitrarily withdrawn and for you to be in a much worse place than you were when you started (e.g., you moved across the country for a job you were offered and bought a house near the job, only for the offer to be withdrawn at the last minute).
* Bait and Switch isn't exactly unfriendly, but he does have a very dour demeanor.
* Bait-and-Switch Lesbians, because homosexuality was less accepted at the time and it was the closest writers could get to writing a gay couple. However, modern audiences see this as queerbaiting, which can come across as homophobic and behind-the-times since acceptance of homosexuality has increased. Accepted so much, in fact, that making the characters in question a gay couple while just outright saying that they're a couple is usually the safer option.
* Bait-and-Switch Lesbians, in which case it may also imply that they're engaging in lesbian-ish behaviour only because they don't know any better.
* Bait-and-Switch Lesbians: Two female friends appear to be lesbians, but aren't.
* Bait and Switch log entry from her executive officer Commander Tess Phohl.
* Bait-and-Switch of a restaurant. Instead he handcuffs her to the steering wheel, grabs a crate of groceries which are being unloaded from a truck, and walks in that way.
* Bait-and-Switch scenario, Homer and Bart had chloroform with them when they broke into a hotel. When they met a guard, Homer offered him the chloroform as a bribe, which the guard accepted.
* Bait and Switch science officer Birail Riyannis serves this role, mixing it up in firefights and providing first aid to an injured civilian and two members of the away team.
* Bait-and-Switch Sentiment: Somebody thinks another character is being sentimental when they're not.
* Bait-and-Switch Sentiment: Someone seems to be being sentimental, but they aren't.
* Bait-and-Switch Sentiment: Something seems like it was done for sentimental reasons, but there's a much more mundane reason.
* Bait and Switch. Ships that suffer a warp core or fusion bottle breach tend to be described as going up in a "retina-searing white flash" or something similar. Other destroyed vessels tend to leave large chunks of themselves behind, such as a Jem'Hadar attack ship that had its front half blown away by a shot to the torpedo magazine.
* Bait-and-Switch Silhouette: An outline looks like one thing, but is revealed to be another.
* Bait-and-Switch song, where you sing to the person about how they are truly and

wholeheartedly loved for all their character flaws by... well, someone who certainly isn't you.
* Bait and Switch starring the same characters, Watkins says the proportion is about a third.
* Bait and Switch (STO)), a highly decorated Starfleet captain and space and ground combat veteran seems to prefer blond men who are bigger and stronger than she is (which takes some doing, seeing as how she's 6'2" and an accomplished hand-to-hand fighter).
* Bait and Switch (STO)), and the science officer is a brown-skinned Trill. The other three members of the command crew are two Andorians and a homebrew alien, none of whom are even on the same color spectrum.
* Bait and Switch (STO) chapter eight, Eleya, a Bajoran, gives a gasp when Gaarra, also Bajoran, strokes the ridges on her nose.
* Bait and Switch (STO) command staff contains only one human, the chief medical officer Warragul Wirrpanda, and he's not even from Earth. The rest of the command crew are two Bajorans (captain and ops officer), two Andorians (first officer and chief engineer), a Trill (science officer), and a Pe'khdar (security chief).
* Bait and Switch (STO), competently plays the vodchakh, an instrument similar to a violin. In chapter eight he's managed to adapt for it a Bajoran harp concerto that's apparently already a challenging piece on the instrument it was written for.
* Bait and Switch (STO): Ens. Kate McMillan to sniper JG K'lak during an away mission in chapter seven. Played for laughs during the second firefight of the chapter, where McMillan's overheard giving the following instruction to K'lak:
* Bait and Switch (STO) from getting married without having invited either set of relatives.
* Bait and Switch (STO) galaxy are now having a hard time keeping the peace because of the losses they took and a massive refugee crisis.
* Bait and Switch (STO) has Eleya frequently using the term "greenskin" for Orions. She also once refers to the Borg as "damned boltheads".
* Bait and Switch (STO) (he fired before she could say what). After the firefight:
* Bait and Switch (STO) LCdr. Reshek Gaarra, who's from New Bajor, is once seen in the ship's gym adjusting the weight set to mimic his planet's gravity so he won't lose the edge it gives him.
* Bait and Switch (STO) line invoking Phelha, which the author's notes explain as an Andorian war goddess.
* Bait and Switch (STO): Main character Kanril Eleya's father Kanril Torvo and deceased grandfather both fought in the Bajoran Resistance, and though she claims he didn't encourage her to enlist in the Bajoran Militia, it's mentioned that her father taught her some wilderness survival skills and how to shoot.
* Bait and Switch (STO) tendencies towards the Klingon Empire and especially the Orion species which is part of it).
* Bait and Switch (STO): When Eleya and her team are gearing up for an away mission, Captain Kanril Eleya turns around to see her first officer Tess Phohl hefting a gun almost as big as she is.
* Bait and Switch (STO): While serving as a character witness while Rachel Connor is on trial for being an illegal genetic augment, Kanril Eleya makes a comment that she's glad she chose the military over going to law school like her grandmother wanted.
* Bait and Switch that the name is a play on Sobek, an ancient Egyptian river god depicted with the head of a crocodile.
* Bait and Switch: The (Futile) Pursuit of the American Dream, describes with some degree of awe watching a fellow job-searcher help himself at a buffet to "a mound of lettuce, covered with canned fruit salad, topped by a desiccated gray hamburger patty and dripping with Thousand Island dressing".
* Bait-and-Switch Time Skip: It seems like a long period of time has passed, but it's only been a little while.
* Bait-and-Switch Time Skip like a long time has passed, but it's only been a little while.
* Bait-and-Switch to act on the sexual tension that had been building for months

(she's married) and their sparse, awkward interactions in this episode indicated that there was no relationship but that they were still trying to work through lingering feelings. Only for the final scene of the episode to show them in bed together and the dialogue make it obvious that this had been going on for months and the aforementioned interactions to be the results of them struggling not to reveal to anyone what was going on.
* Bait-and-Switch Tyrant: Someone seems like they're going to be a tyrant, but is actually a good leader.
* Bait and Switch universal translator has a second or so of trouble with the Gorn language, kicking in in mid-word. The main cast, despite being mostly nonhumans, are indicated to be actually speaking English most of the time rather than using the translator.
* Bait and Switch was badly damaged, but not irreparably, by a rogue Cardassian legate playing warlord.
* Bait-and-Switch was playing a prank... before the actual K. Rool shows up to knock the laughing penguin out of frame. Doubly an example of this, as Dedede is voiced by Sakurai himself. In the same Direct that revealed K. Rool, during the My Music segment, the announcement of the total number of music tracks included came with a tally counter that seems to slow down at around 481... only to regain speed and abruptly stop at the actual total: 800.
* Bait and Switch", when one of her dead noncoms is resurrected as a Kobali, she threatens his adoptive mother that:
* Bait and Switch" when she gives a Vulcan customs agent the name Tesjha Pholhl when her travel papers say Siritesjha.
* Bait-and-Switch where Cloud and Tifa act like Marlene's parents, with her dad Barret never interacting with her beside appearing with her in the group photo in the ending.
* Bait and Switch which are described by an onlooker as "accurate, but badly accented".
* Bait: A pony that's so badly damaged that it's only good for customization.
* Bait Car: A car thief starts the wipers while trying to figure out how to put a vehicle in gear. The cops watching nearby comment that the wipers (and turn signals) are working properly.
* Bait Car has this all the time. The hidden camera footage will show the car thief hollering to his friends "Hey man, check out this car I just stole! THIS IS TOTALLY A STOLEN CAR!", but as soon as the cops show up they put on their best innocent faces and claim "This is my friend's car, he asked me to move it for him." Adding to the hilarity, a rare few will continue trying to act innocent even after the police reveal that they have video evidence.
* Bait is a purebred Russian Blue who has won several awards at cat shows. His eyes, however, are the wrong colour. He has yellow eyes, which are considered a flaw in show cats. Show Russian Blues
* Bait the Dog: A villain sets up a moment that endears them to the audience, only to commit a deed to show how utterly despicable they are.
* Bait the Dog: It looks like someone is having a likable moment, but it turns out that it's not the case; in fact, quite the opposite.
* Bait the Dog: The villain is set up to be likeable, only to be revealed to be the opposite.
* Bait the Dog: The writers set the villain up as being kind of cool, but then make them do something evil so you'll stop liking them.
* , Bait the Jackal suffers some cuts to his hands when a rope he is holding rips out of his grip. Knuckles offers to treat his wounds, but he just says he'll lick them. Knux then insists, stating that only the Chaos Emeralds know where his tongue has been, to which he replies "in my head, where I normally keep it."
* Bai Yue and the General actively work to prevent him becoming the power behind the throne.
* Baja California is also missing from world maps. Background information reveals that a massive earthquake took place on the west coast in the 2030's. Everything south of Lompoc

* BA Johnston, is about the boss of a grocery store not giving an employee a raise, and the employee retaliates by constantly stealing from work. Even the awful toilet paper.
* Bajoran Militia rank insignia consists of a collar pin of Bajor's insignia, with segments removed or added for lower- and higher-ranked personnel. Generals have epaulets added to the standard uniform.
* Bajoran pregnancies only last five months, even if the fetus happens to be a human that was transplanted because of an emergency. Such was the case on
* Bajoran Resistance), but her father didn't join the Bajoran Militia after the Bajorans regained their independence and Eleya wasn't born until eleven years later.
* Bajorans and Cardassians have a sort of dark elf/drow and dark dwarf enmity going on.
* Bajorans, Klingons, Romulans, Vulcans, (with a little bit of plastic surgery and perhaps a haircut) and Trill (bit of makeup to hide the spots) can do this in
* Bajorans use small fighter-types, larger, still aerodynamic Interceptors, and a variety of freighter-like ships as scouts, troop ships, transports, and cargo vessels.
* Bajoran units of measurement include hecapate, kellipate, kerripate, linnipate, tessijen and tessipate.
* Bajoran vedeks have a habit of randomly walking up to a Bajoran and grasping their left ear (the right ear is covered by an elaborate earring) to feel their
* Bajor, a planet that is rebuilding after fifty years of occupation by the Cardassians, is well-established with numerous poets, musicians, and an entire religion explored.
* Bajor-class starship doesn't turn on a dime: it requires firing the side thrusters and reversing one impulse engine, and the ship is still described as slewing hard in one direction as she rotates.
* Bajor his species, which is heavily clan-based, considers the agency to be a clan unto itself that keeps the peace between the other clans.
* Bajor is technically a presidential republic with free elections to choose the First Minister once they got rid of the Cardassian occupation. However, the Kai (equivalent to a Pope or Dalai Lama) has excessive amounts of power and at one point Kai Winn takes over as interim First Minister after her predecessor dies in office shortly before the election (she's defeated by former Resistance leader Shakaar Edon and concedes peacefully).
* Bajtek had a regular section devoted to prices of used electronics at the bargain market. It was accompanied by a drawing of a shady trenchcoated guy with keyboards, motherboards etc. inside his coat.
* Baka and Test: Summon the Beasts accidentally superglues his hand to a table. It remains there for the entire episode, until he shatters it by slamming it on the ground.
* Baka and Test: Summon the Beasts, a fansub group translated a line saying "don't underestimate Class A" as "We're Class A, bitches!"
* Baka and Test: Summon the Beasts Akihisa and Yuuji to play a strip card game with them. And both girls win pretty handily.
* Baka and Test: Summon the Beasts, any unimportant character will just have their class's letter on their face. Some of these characters even have names, too...
* Baka and Test: Summon the Beasts aside. Voyeur and Aiko are probably a more "normal" example.
* Baka and Test: Summon the Beasts certainly qualifies. During an event were the summoned being spoke the characters true feelings, Himeji's confessed to have thought "weird thing" when the other were talking about ecchi things.
* Baka and Test: Summon the Beasts character), and before he can correct his mistake, his friend Yuuji walks by to see what was wrong, and happens to slip on a banana peel. It causes him to slip, and he accidentally steps on Akihisa's cell phone before a reply can be made.
* Baka and Test: Summon the Beasts gives us the "FFF". On the one hand, they'll help out in summon wars just as much as the next student in the class. On the other

hand, if they so much as hear rumors that a girl's been even relatively nice to you...
* Baka and Test: Summon the Beasts. He even concludes that discovering this makes him a genius. Most geniuses don't spend their food money on porn in the first place. He explains that this why he is eating 1/67th of a pot noodle. Nobody is even surprised that he gets the math wrong there. When Hazuki Shimada turns up and calls asks for the big idiot Akihisa Yuuji Sakamoto says he's surprised that everyone in Japan knows of his stupidity. Akihisa insists it's not all of Japan, just the local area.
* Baka and Test: Summon the Beasts, however, things aren't as easy as they seem.
* Baka and Test: Summon the Beasts: It's one of the most extreme examples out there! The two men, Akihisa Yoshi and Yuuji Sakamoto, are abused by their own admirers in just about every episode over the stupidest stuff! Yuuji's admirer Shouko is particularly nasty as she pokes out his eyeballs frequently so he can't look at other girls, tazes him, makes him go to school without his pants, and even drowns him just so she can give him CPR! What's more is that Yuuji's friends support the relationship and even sometimes encourage Shouko to beat on him!
* Baka and Test: Summon the Beasts. Later the main characters go to his house for a study session (and to see why he didn't want to go home), and the two girls who like Akihisa immediately also start questioning him as to why there's women-related clothing and items in his apartment (which turns out to be his sister Akira's stuff, who's visiting him to make sure he's not goofing off).
* Baka and Test: Summon the Beasts. Naturally the students usually try to protect their leader, but sometimes the opposing class will bait them somehow and lure them away so as to weaken the rep's defenses and take them out.
* Baka and Test: Summon the Beasts often does this. He often doesn't fight directly, since he plans his attacks beforehand and has his classmates do the bulk of the fighting, but he's no slouch himself, and when one rival class tries to sneak attack him, he beats them all up himself.
* Baka and Test: Summon the Beasts ran for two seasons, and each season contained 13 episodes.
* Baka and Test: Summon the Beasts reaction to seeing anyone trying to come between her and Minami (who is not even interested in her) is to chase that person down and try to kill them.
* Baka and Test: Summon the Beasts segregates students based on their entrance exams. The brightest students live and learn in luxury in Class A, but the stupidest of the stupid get sent to class F, where they are lucky to have cardboard boxes as desks, chalk is a luxury, and the room itself is structurally drafty and unsound.
* Baka and Test: Summon the Beasts that eventually drags in pretty much all the main characters. The principal glances out the window and notices that they're all just running in a circle.
* Baka and Test: Summon the Beasts (the vice-representative of Class A) in order to goad Class C into attacking Class A.
* Baka and Test: Summon the Beasts. This leads to quite a few awkward moments, especially when he gets chosen to be the official "round girl" for the summoning war in episode two of the anime. One joke is that "Hideyoshi" has become its own gender designation within the story as both men and women object to him changing in the men's room, and Hideyoshi himself refuses to enter the women's room.
* Baka and Test: Summon the Beasts: To Hideyoshi's annoyance his girly looks have him garnering only male attention at regular intervals.
* Baka and Test: Summon the Beasts). Yet, he's always there to lend a hand when Class F's inner circle needs it, albeit only when it gives him the opportunity to indulge in his perversions.
* Baka and Test: Summon the Beasts - Yuuji is the best friend, but Kouta is the pervert.
* Baka and Test: Summon the Beasts: Yuuji's scores are consistently low, but actually shows ability to strategize battle plans very well. And when he actually studies, he can get quite high. Also, Minami since she is bad at reading Kanji.

* Bakaara Market during the civil war there. Gained infamy for being the place where you could buy an assault rifle for less than fifty dollars.
* Baka Test is an unusual example in the the lead guy, Akihisa, is the
* Bakekujira, which is the animated skeleton of a dead whale that brings misfortune and plague wherever it goes.
* Bakemonogatari... and we're suddenly reminded that he does indeed still have vampiric strength when he snaps the chains like rubber bands.
* Bakemonogatari, but its visual style as a whole is so weird and varied that it's really not that conspicuous.
* Bakemonogatari can always tell what supernatural phenomena affected each girl, usually based on Koyomi's secondhand recounting of their story of their problem.
* Bakemonogatari dubbed in French (In the case of Bakemonogatari and Nisemonogatari) and German (in the case of Bakemonogatari and the Kizumonogatari movie trilogy)
* Bakemonogatari episode. The rest of the story whenever it involves the love interest is usually either about someone else or focuses on how their relationship grows.
* Bakemonogatari even though Shinobu never spoke a single word in the entire series. It must be noted, however, that with the recently announced prequel anime, maybe this was a case of extreme foresight in the case of the casting company.
* Bakemonogatari has an entire room full of BL. Interestingly enough, she might be a lesbian (though her behaviour towards Koyomi suggests she may have some bisexuality) but then there are many lesbian yaoi fangirls.
* Bakemonogatari has released five more installments to the Monogatari series and over a dozen other projects with no sign of Kizu seeing the light of day. It finally released in 2016 in the form of a three-part movie series.
* Bakemonogatari in Suruga Monkey. While Senjougahara intertwines their fingers Kanbaru confesses her love. Senjougahara's response is to reply that she knows and that she can't see Kanbaru as anything but a friend.
* Bakemonogatari. It's a highly stylized series as it is to begin with.
* Bakemonogatari: Koyomi and his sister Karen. One notable scene being when he gets on top of her in bed when brushing her teeth which causes her to act like she's having an orgasm the entire time while moaning.
* Bakemonogatari literature, will get excited seeing younger female cast members like Nadeko and Shinobu, often sexually teases Araragi whenever they meet and in one infamous moment, would molest Araragi when he accused her of having become more modest.
* Bakemonogatari lives and breathes this trope. In fact, some episodes focus so heavily on the mundane aspects of Koyomi and Senjogahara's lives and relationship that it's possible to forget that he's an ex-vampire and she was once rendered weightless by a crab god.
* Bakemonogatari may or may not help. It's treated mostly as playful teasing going a little too far.
* Bakemonogatari novel, Araragi is impressed by Senjougahara's vocabulary. She tells him that it's not that she's good with words, but that he's "an illiterate bum." Araragi is fine with her calling him "illiterate", but takes offense to her calling him a "bum". Senjougahara immediately upgrades the insult to "scum" in response.
* Bakemonogatari of all people to not just be a doormat when it comes to certain foes. At the same time, she's serious.
* Bakemonogatari of always mispronouncing Araragi's name in increasingly inventive ways, then claiming she "stuttered". It's implied she does this on purpose to tease him, rather than not remembering his name.
* Bakemonogatari offers to cook for Araragi while wearing nothing but an apron.
* Bakemonogatari. On a date, Senjougahara Hitagi suggests Koyomi has a chat with her father while she gets things ready, who unexpectedly turns out to be the one driving them to the woods. But instead of sweating him, Mr. Senjougahara is ashamed for being a bad father and grateful to Koyomi for curing Hitagi and making her happy again.

* Bakemonogatari on the results of these conversations, it sometimes feels out of character (especially since many problems can in fact be solved by talking).
* Bakemonogatari, Oshino Shinobu wears a motorcycle helmet and goggles, despite appearing to be maybe six or eight years old and spending most of her time sitting around in the shade.
* Bakemonogatari series the lost snail and the remains of Kiss-Shot are both undead children; one a ghost and the other a vampire.
* Bakemonogatari Suruga admits she'd totally date Koyomi if he didn't already have Senjogahara. It may or may not make it an even stronger example since she was in love with Senjogahara herself.
* Bakemonogatari. The depicted Koyomi, as well as his sisters Karen and Tsukihi, have ahoge, but Koyomi's is the tallest.
* Bakemonogatari". The entire show is based in folklore and ghost stories, too.
* Bakemonogatari themselves. And wondering where the stalkers with the cameras had been hiding all this time.
* Bakemonogatari: The protagonist, Koyomi Araragi, is this towards his sisters.
* Bakemonogatari: the recipient takes their sweet time loudly and enthusiastically highlighting how great an opportunity it is, to the giver's disgust, until he comes up with something completely unexpected and rather heart-warming.
* Bakemonogatari uses art shifts all over the place. They happen so often that it's almost like the series doesn't even have a "normal" art style.
* Bakemonogatari, when the protagonist, Araragi, discovers Senjogahara's "condition"... Because she slipped on a banana peel and fell from the stairs into his arms. After their slightly later, slightly more traumatizing encounter, Araragi demands that Hanekawa never eat a banana in school, and if she does, to always throw it away properly.
* Bakeneko. Overarching moral? Cats are sweet, innocent, and only ever want to help.
* Bake Off in the first place largely because she and her husband were so broke that they had to sell their home.
* Baker Street #3, Sharon tastes the substance in the tip of the syringe found by the body and identifies it as very pure heroin.
* Baker Street #5, Sharon and Susan are about to be shot by Davenport and his henchmen when they are saved by the arrival of Domino and the Tower of Hell gang, who have the area surrounded and have just heard Davenport's confession that he is really the one behind the deaths of their members during the recent gang wars.
* Baker Street, corruption is rife among the London police, with Sharon's ex-husband having been a dirty cop. In #2, Sharon sees a uniformed constable dealing drugs to a punk and is visibly disgusted.
* Baker Street: Even though Sharon Ford has not been an active member of the gang scene for years, she is best among punk circles—where she is regarded as an elder statesman—by her gang moniker of 'Harlequin'.
* Baker Street: In "Honour Among Punks", Davenport and his ally Boxe—who is a lieutenant in the Gothics gang—murder members of the Gothics and place the blame on rival gang the Towers: looking to ignite a gang war between the punk factions that they can use as a cover for their robberies.
* Baker Street: In "Honour Among Punks", the killer targeting members of the Gothics gang always cuts off a chunk of their hair as an insult.
* Baker Street, Inspector Pinner is Sharon Ford's former partner in CID, and still comes to ehr for help with difficult cases. She sometimes calls him in at the end of her private investigations to handle the official bit of locking up the villains.
* Baker Street on her and deduces a number of things about her (she is a medical student, the university she is attending, etc.), including that she is American. Susan is astounded and asks Sharon if she deduced she was American from the clues she just listed. Sharon replies "yes", but adds that the accent was something of a giveaway as well.
* Baker Street: Roleplaying in the World of Sherlock Holmes and Moriarty took their joint tumble over the Reichenbach Falls in "The Final Problem". Players take on the

roles of investigators who are asked by Dr. Watson to solve the cases that continue to come to Baker Street during Holmes's absence.
* Baker Street, Sherlock Holmes and Irene Adler disguise themselves as a low Cockney couple, Mr. and Mrs. Brasser Bates of Bethnal Green.
* Baker Street: The Baskerville's club runs ratting pits as 'entertainment' for its patrons. Dogs are pitted against rabid rats; with bets being placed on how many rats a dog can kill before it succumbs to rat bites.
* Bake Turner spent 9 seasons as a pro football wide receiver (mainly with the New York Jets). He also took a few stabs at a country music career and in 1969 was the first singer to record "Is Anybody Goin' to San Antone?", which became a
* Baki kills Hayate after he sees him meeting with Kabuto, learning that the Sand and Sound Villages are conspiring to destroy the Leaf Village.
* Baking Bad" was originally titled "Peter and Lois Open a Store" (the episode is still called that on the DVD set and on Netflix).
* Baking For Dummies, Michelle McCool tries to bake a cake for Layla's birthday. As the title implies, Michelle is inept in the kitchen and winds up making several trips to the store each time she has to start over again.
* baking soda that he explained this miracle substance to his gang. Mighty Baking Soda, powerful enough to defeat the strongest grease and even stinky feet! His men are amazed that humans possess such an incredible product.
* baking soda. Which has no right to be contaminated by gluten in any way during production, because it's made by, basically, mixing two chemical solutions and waiting for the soda to appear.
* "Bakin" is a common Japanese word meaning "germs". But if you look up that word in Japanese, most of the results show Bakinman from this show. It got to the point where the association of the word "baikin" with the character lead to him starring in a commercial for a germ-removing air conditioner aired in the early 2000's.
* Bakiraka the massive Spearman is clearly this, ironically he is killed by Judeah one of the shorter members of the Band of Hawk.
* Baki the Grappler. After nearly suffocating Katou as a counter, Orochi explains that Okinawa Karate has a technique that lets you retract your testicles into your body.
* Baki the Grappler, a young Baki throws himself off of a cliff in order to trigger "endorphins" that enhances his senses.
* Baki the Grappler (Baki: Son of Ogre) the protagonist Hanma Baki is engaging his father in a battle of minds where both try to catch the other in their illusions. This goes as far as the two of them having an imaginary dinner at an imaginary table. Baki eventually wins this battle when he flips the table and gets his father to try to catch it thus proving that the latter was deceived by the vividness of Baki’s illusion.
* Baki the Grappler Biscuit Oliva aka Mr. Unchain has a personal library, is allowed to drink, smoke, and indulge in five-course meals on prison grounds. He basically treats the prison as a personal manor in exchange for capturing criminals for the police.
* Baki the Grappler business being in the ring with these fighters. Yujiro himself is a literal example since his testosterone levels are stated to be so high he considers everyone around him to be a woman regardless of gender and will rape them both equally.
* Baki the Grappler has Pickle. For a caveman, he is pretty Bishounen, though. Not hairy at all, after stealing some clothes he can pass for a common human. A 8 feet tall common human with fangs and claw-like nails.
* Baki the Grappler has several: Doppo Orochi, Gouki Shibukawa, Kaku Kaioh and Ryu Kaioh...and not one of them stands a chance against Yujiro.
* Baki the Grappler. He then goes away, casually telling Baki to get a better lock. The mood utterly spoiled, Kozue and Baki end up making out at a different date, without interlopers in the same room.
* Baki the Grappler: "If one is born as a male, at least once in his life he will dream of becoming the strongest man alive. Grappler is the martial artist who aims to become the strongest in the world!"

* Baki the Grappler, in addition to all the other insane/biologically impossible things that fighters do, Shinogi Kanno can rip out nerves with his bare hands. In a fight with Baki, he blinds him by ripping out his optic nerves; apparently unlike all other humans, his optic nerves are located in his neck. Baki then temporarily repairs them by knotting the nerve endings. Of course, he makes a full recovery. Somewhere, a neurologist is weeping.
* Baki the Grappler: Kureha, in the subs, was obsessed with body building. Kureha in the anime dub, however, is obsessed with body building and beautiful men. The dub also changes the scene Kureha has with Baki after Doppo's loss from Kureha talking about how life and death are natural for a doctor to Kureha going on about how cute Baki is, and gives every line out of his mouth huge amounts of innuendo from then onward.
* Baki the Grappler. Nobody dares to do anything because they don't want to earn his wrath.
* Baki the Grappler one of Dorian's techniques is to hypnotize his opponents into thinking they're beating the crap out of him.
* Baki the Grappler series. Was once very physically strong, until he came to believe that this was the superior way to fight, as his strength would fade with age, but skill would not.
* Baki the Grappler, the title character fights Koushou Shinogi, a martial arts master who can cut nerve endings, causing certain limbs to become unresponsive. During the fight, Shinogi had managed to render Baki's entire right side useless.
* Baki the Grappler. Yet his physical strength and durability are regularly portrayed as sub-par, often being injured by much weaker opponents. This is somewhat subverted by the fact that he can block attacks with his sword. This is exaggerated even further when he uses his 'abstract cutting' and fights without his sword, increasing his offensive power, but no longer even being able block attacks.

* Bakuen Campus Guardress, revealing the secret to everyone in both worlds.
* Bakugan actually ends up subverting this with Ace. While he spends the majority of the fic as a villain, it is justified using evidence from canon and later handwaved as him being brainwashed.
* Bakugan and gravity-defying spiky hair, one character even has green hair except for a small red forelock.
* Bakugan. At least it has a better justification (parallel universe and all).
* Bakugan Battle Brawlers. Eventually, the protagonists decided to delete it and start over with a whole city.
* Bakugan Battle Brawlers. Many people in Belgium have heard of it (though not necessarily liked it) and at least know that Bakugan is a game, but it is rare to find someone who has actually played it, let alone has the materials that are necessary to play with it. When a Belgian says that they exclude someone for not having a Bakugan they are simply searching for an excuse to exclude someone without outright telling the reason.
* Bakugan Battle Brawlers: Prince Hydron’s mechanical Bakugan Droid has one it can access through the “Murasame Blade” ability, which can be upgraded through various fusion abilities.
* Bakugan Battle Brawlers Runo repeatedly screams that she's in love with Dan and is finally comfortable with admitting it as part of a plot point, which was changed

to a loud declaration of being best friends in the English dub.
* Bakugan Battle Brawlers, this happens whenever anyone starts a Bakugan battle. The players are transported to another realm whilst this happens, whilst everything outside the playing field is frozen. At one point, when two of the main characters are sneaking around and are about to be apprehended by an adult, they accidentally trigger a Bakugan battle between themselves; because time stopped, they were able to escape the adult by moving to the equivalent position in the arena and then ending the game to resume time.
* Bakugan Battle Brawlers: This show introduced the "Spin-top" Bakugan that have a top that spins when the Bakugan opens. They've gone on to become their own archetype, albeit they were seldom used before the New Vestroia season (where two of the main heroes use Spin-Top Bakugan).
* Bakugan Battle Brawlers to Julie Makimoto, implying Japanese descent while removing the specific notion that she's from Australia.
* Bakugan Battle Brawlers to keep the fact that Bakugan are self-aware a secret from the rest of the population.
* Bakugan: Battle Planet limits it to just the titular beasts in both forms and the visual effects.
* Bakugan: Battle Planet, the gang has a French Bulldog tagalong named Lightning.
* Bakugan Battle Planet uses a hex grid for the Hide Matrix, made of several small hexagonal Bakucores. Hexagons are a recurring motif in the reboot, including as part of the logo and Energy symbol.
* Bakugan battling was common before the masquerade fell, but everything changed when people learned that Bakugan were sentient.
* Bakugan: Drago, who can actually curl up into a tiny ball when he's not fighting. There's also Dharak, Rubanoid, Plitheon, Avior, Wayvern, Naga, Percival, Hydranoid, and Helios, all of whom are either dragons or dragon-like beings.
* Bakugan episode, Drago's eyes began to glow. And then the stadium exploded.
* Bakugan have wind-based powers and are often based on creatures like birds and flying insects.
* Bakugan, in some respects. Sure, they fight to save their homeworld, but at the end of the day, Drago would rather live in crampy, tiny little ball form with Dan than on his homeworld. To their credit, a few of the Bakugan decide to stay back on New Vestroia instead.
* Bakugan New Vestroia the Bakugan system is down and then Spectra draws an ability cards which activates a beam sword in the gauntlets and Dan and Spectra duel, the duel ends in a draw.
* Bakugan series, the six elemental attributes Bakugan can have are explained as being adaptations to (and named after) the six planets they hail from: Pyrus is a fire planet, Aquos is a water planet, Subterra is an earth planet, Ventus is an air planet, Darkus is a darkness planet, and Haos is a light planet.
* Bakugan. That being said, he doesn't have much personality on his own and even when he was under Masquerade's control, he never fought against anyone else besides Julie (well, they're both Subterra users after all).
* Bakugan, the death of Shun's mother is made clear by the EKG suddenly flatlining. The English dub censored this scene and instead tried to make it like she fell into a coma.
* Bakugan the Video Game wears a black trench coat obviously mirroring Masquerade's white coat.
* Bakugan this trope is that instead of busting his grill, Shun offers his hand to Dan, not only welcoming back him back into the Brawlers, but recognizing him as their leader once more.
* Bakugan to begin with beyond "whoever's mon loses is the loser". How and when you could use the cards and the exact rules of team fights were even more ill-defined.
* Bakugan was destroyed in the first season finale, the next two seasons had extradimensional aliens as their main villains.
* Bakugo also, in the beginning at least, constantly sees Midoriya as some kind of rival, but Midoriya never notices and treats him as a friend. Eventually after some character development, his view of Midoriya wears down into a more friendly

rivalry, and Midoriya reciprocates.
* Bakugo and Kirishima eventually get together and marry one another near the fic's ending. Ochaco is also heavily implied to have married to Iida, having taken his last name.
* , Bakugo calling Izuku "Deku" is this, as it's meant to motivate Izuku to move forward instead of being the outright insult it was used as in canon.
* Bakugo never wears a tie and wears his shirt partially unbuttoned, showing his general disdain for authority.
* Bakugo seem to have no limits to their Quirks. Bakugo responds that every Quirk has limits since Quirks are just functions of the body. In Bakugo's case, his Quirk uses up his sweat and overuse can damage his arms from the recoil. Todoroki's limitation is that overusing his ice powers can cause frostbite if he doesn't regulate his body temperature with his flame powers. What happens if he overuses his fire isn't elaborated on, but it's implied to be just as bad if he doesn't regulate with his ice powers.
* Bakugo tends to bare his teeth at his opponents as a sign of aggression. And he never wears his tie properly.
* Bakugou Katsuki heroes, unable to see their own cruelty for what it is.

* Bakuman。. After Akito Takagi, while meeting with his girlfriend Kaya Miyoshi's parents, mentions the name of his partner Moritaka Mashiro, Kaya's father challenges him to a sparring match to test his determination, but it turns out that it was a ruse to get the two of them away from his wife and daughter to talk about the relationship between Mashiro's uncle and Miho Azuki's mother.
* Bakuman。, after Takagi says that he's confident Yakusa North High will be begging for him to attend in spite of his being suspended for punching Ishizawa, his girlfriend Miyoshi does this to Mashiro, who's walking alongside her, and tells him that she likes him because he says things like that.
* Bakuman。: Akira Hattori isn't a mangaka, but as an editor he serves as an important mentor to Muto Ashirogi, teaching them various important things about the manga industry and advising them how to create a good manga. Generally, all editors should be this, but Hattori is the only one shown to effectively mentor his mangaka he's supervising. Miura attempts that, but his results are lackluster in the end.
* Bakuman。, Akito Takagi and Kaya Miyoshi are the Beta Couple. Their down-to-earth approach to love and marriage and their frequent bickering is a nice contrast to the romantic idealism of the Alpha Couple, Moritaka Mashiro and Miho Azuki. The contrast between the two couples is not lost on any of the people involved, as Mashiro wonders if he and Azuki should be more like Takagi and Miyoshi (who have gotten married despite confessing their feelings later than Mashiro and Azuki), before resolving to keep his promise.
* Bakuman。, Akito Takagi, seeking ideas on how to write female characters, meets fellow mangaka Yuriko "Ko Aoki" Aoki, but keeps the meetings secret from his girlfriend Kaya Miyoshi out of fear that she would get jealous over him turning elsewhere for advice. While there, he meets his former classmate and academic rival, Aiko Iwase, who gives him a copy of her book with a letter inside. Miyoshi then discovers the letter and becomes quite upset until the misunderstanding is cleared a few chapters later.
* Bakuman。, and is seen in-universe as a fitting conclusion to the story.
* Bakuman。 and someone else) even though it surpasses all their previous efforts since it means they will not be able to submit it for serialization. Otherwise, this trope is largely averted with a few exceptions (mainly Iwase), as when the main characters are starting out and want to get up past ninth place, Miura tells them that rather than try desperate tactics to go up, they should

maintain their ranking, as anything above 10th place will not come up for cancellation.
* Bakuman。, a non-fatal variant happens to certain manga series whose cancellation is announced whenever named characters get serialized, often with titles that would make one wonder whether anyone would want to read them. Arai, a minor character, is a recurring producer of "Red Shirt" series, although the fact that his series "Cheese Crackers" got canceled fairly soon after serialization in spite of Miura's confidence in it makes the main characters wonder if they're really safe.
* Bakuman。, but decides not to since it will only serve to make him a laughingstock of the Internet.
* Bakuman。, but has shades of this. He moves his family to Hachioji so that Miho, who goes to high school and auditions there, will not have to leave too early or face potential sexual harassment on the train and the action strikes Takagi as fairly drastic ("How over-protective is he?"). It remains to be seen whether he knows or approves of her relationship with Mashiro.
* Bakuman。 completed, but only the first 7 episodes of the dub were ever released due to Media Blasters going out of business, leaving the license up in the air to this day. While all three seasons are available on Hulu, they are sub only.
* Bakuman。 featured the main characters working on a light-hearted comedy manga, but only a bit more than 10 chapters in, they're already making entire chapters based on the running gag of the main character saying "I dunno about that." This serves as one of the signs that this isn't the right sort of series for them.
* Bakuman。 from Yūeisha, even when they show real-life editors of the magazine that keep their name in the anime. You'd expect Shūeisha to grant them rights to use the trademarks when negotiating the anime adaptation, right?
* Bakuman。 has Mashiro's uncle Nobuhiro, who died of overworking himself before the story began and who appears in flashbacks.
* Bakuman。 in the anime adaptation as several minutes of showing still black-and-white manga frames, and reading its dialogues.
* Bakuman。 is frighteningly recluse, to the point he initially only talks to his editor over the Internet. He gradually gets better.
* Bakuman。 is portrayed as a skilled manga artist who could more than likely end up as a legitimate rival to Ashirogi Muto if he found himself a good writer to make up for his inability to write characters with heart. Unfortunately, he's incredibly arrogant and obsessed with utilizing dubious, underhanded tactics to push his manga up in the ranks, a practice that eventually gets him banned from Jump.
* Bakuman。 is this for a girl he fell in love with during his school years.
* Bakuman。: it's played dead-serious, but undermined by the fact that said character is a human but with a photorealistic otter for a head.
* Bakuman。. Justified because these are, in-universe, seen as exceptionally obscure and only funny to manga enthusiasts.
* Bakuman。, learned a few tricks, and produced manga so good it got serialized on the first try. However, he decided to make manga because he thought that's an easy job and once he finds out it's not a cakewalk, he does everything he can to avoid working.
* Bakuman。 likes to refer to the group of mangaka protagonists trying to get published as "Team Fukuda". He first tried to go for "Team Niizuma" after the fact that, albeit quickly, he, Mashiro and Nakai worked under Niizuma, but quickly changes it to the current form when talking to Mashiro on the phone.
* Bakuman。 making manga and therefore frequently discusses the contents of the fictional mangas inside it.
* Bakuman。, Mashiro's uncle and the woman of his dreams, who turns out to be Azuki's mom, were completely crippled by this. It's likely that Mashiro and Azuki would have fared even worse if Takagi hadn't dragged Mashiro bodily into speaking with her and agreeing to draw manga.
* Bakuman。, Miho Azuki has never been interested in anyone other than her

classmate Moritaka Mashiro, as she has been attracted to him since fourth grade.
* Bakuman。, Moritaka Mashiro, after finding out that his fiancee Miho Azuki's mother Miyuki once loved his uncle, Nobuhiro, and that Miho is unaware of this, asks Miyuki not to tell her. She agrees and asks Moritaka's partner Takagi to do the same. This comes back to haunt Moritaka later, as Miho becomes angry with him for keeping it from her, and does not believe they should have secrets between them.
* Bakuman。, Moritaka Mashiro recalls the life of his manga artist uncle Nobuhiro, who produced one successful hit, but died of overwork trying to get serialized again. Moritaka is rather skeptical, wondering how Nobuhiro could have died of overwork when he didn't have a job for years, and assumes he committed suicide out of despair. When he brings up his theory, his mother(Nobuhiro's sister-in-law) is shocked, and Moritaka retracts his theory. After seeing all the storyboards Nobuhiro made between the end of his serialization and his death, Moritaka realizes the truth, then calls his father(Nobuhiro's brother), who says Nobuhiro "wasn't a gutless coward who'd think about killing himself," seemingly offended that Moritaka thought otherwise.
* Bakuman。, over the course of the 20-volume run, the main characters get a manga launched about a quarter of the way through, and seem ready to get an anime a little over halfway through- the latter is what Mashiro hopes to get in order to fulfill his promise to Azuki, the girl he loves. It's not hard to figure out that neither case pans out for the protagonists if you know how long the series is, although it is somewhat surprising to see what happens.
* Bakuman。 range from "Cheese Okaki" to "God of Catalogs John". Of course, it doesn't help that you have no idea what those series are about.
* Bakuman。 reacts to the idea of exchanging ideas with her rivals the same way Aoki did two years before.
* Bakuman。 should have, the first of which is believing that they are better than others.
* Bakuman。 starts with then-middle-schoolers Mashiro "Saiko" Moritaka and Miho Azuki promising to marry each other when she becomes a seiyuu and he a mangaka (as part of the duo Ashirogi Muto), and she voices the female MC of their manga's anime. Since then, they've had as squeaky-clean a relationship as you can think of, never even kissing, and having a long-distance relationship in which they barely saw each other. Still, when the public got hold of their relationship, both Azuki and the Ashirogi Muto caught a lot of flak, as did Fukuda when he called out those behind the backlash while giving a radio interview.
* Bakuman。, Takagi served this role in the first volume, asking Mashiro about how the manga industry worked (Mashiro happened to have a mangaka uncle). Later on, Miyoshi filled this role as the characters became more familiar with the industry.
* Bakuman。 that he barely seems capable of understanding why he'd consider him his rival.
* Bakuman。 that jeopardizes Azuki's chance of getting the female lead VA role on Reversi.
* Bakuman。: The main characters consistently come really close to accomplishing their dreams, only to have to restart from the beginning due to some unforeseen reason.
* Bakuman。, the main character's uncle, Nobuhiro Mashiro, and Miho's mother, Miyuki Haruno, corresponded via letters for a long time, but could never admit how they felt to each other, possibly because they were waiting for the other to say it (and in Nobuhiro's case, he was unwilling to do it until he was sure he had a hit). Eventually, Miyuki moved on to fall in love with and marry Mr. Azuki, having two daughters with him; Miho and Mina.
* Bakuman。, the reason why Eiji Niizuma can formulate plots so quickly is apparently because he can "see his characters move on their own".
* Bakuman。, the typical response of Mashiro and Takagi to getting serialization.
* Bakuman。, the very magazine for which the protagonists create manga.

* Bakuman。. This belief leads him to be driven to getting a series going, unfortunately to the extent that he pressures Mashiro and Takagi into immediately going for a gag manga rather than proceeding more carefully and finding something that would become a hit.
* Bakuman。 this is happening, when she discovers a copy of Iwase's book with a letter from Iwase to Takagi (which he didn't know about). She then thinks of how Iwase is smarter and more talented in other regards than she is, and becomes very depressed until things are cleared up.
* Bakuman。, to the point that chapters often boil down to the heroes talking about manga.
* Bakuman。, when Miura argues with Mashiro and Takagi over whether they should go into gag manga; Miura believes that if they have no serious stories in mind, they should just do as their editor says.
* Bakuman。, which is supposedly semi-autobiographical, is about a writer/artist team who publish under a single pseudonym. This has led fans to speculate that Ohba is actually two or more people (a theory made somewhat less likely when Ohba's partnership with Takeshi Obata is taken into account).
* Bakuman。, whose only goal apart from becoming a voice actress is getting together with Moritaka Mashiro, and even then, those two goals are intertwined because of her promise to only marry Mashiro when they both achieve their dreams.

* Bakura puts a different tattoo on Aoshi that claims him for the chaos goddess.
* Bakura tends to do this more often than not as his entire strategy. In Battle City, Dark Necrofear works to summon a Field card called Dark Sanctuary, which seems to be activated by the system reading his mind to see what card he designated the target without anyone else knowing. How this could actually be enforced under any situation, period, is not entirely clear though it is worth noting that this is not the case in the Japanese version. And in his final appearance, he manages to be in three places simultaneously and completely flouting the rules in all three. As Zorc, he ignores the effects of four separate all-destroying attacks. As Honda-Bakura, he uses a strategy that works purely by making his graveyard go away. The cards aren't banished and don't go to his deck or hand, which is the only place they can go, but the Graveyard just... goes away. And as the game master,

* Bakuten Shoot Beyblade trilogy. The first is done by Rei in his match against Takao during the Japanese Tournament. Rei participated expecting no actual challenge and, indeed, he breezed through the tournament up until the second round against Takao. Takao beat him there. And needing nothing more than knowing there's still challenges for him out there, Rei walked away from the third round. The

second thrown match was done by Steve, who had orders to stretch his battle against Takao during the American Finals so the PPB could gather data on him. Steve lost that match — it wasn't necessarily supposed to happen, but it did as a consequence of him holding back and the PPB were fine with it, because they wrongly expected they'd win the rest. And the third thrown match was Kai's doing when he went up against Daichi during the tag team round-robin in the third season. He shot Dranzer out of the stadium, giving the BBA Revolution one point by default. The reason? He had been expecting to go up against Takao, but the latter was put on the bench.

* Balcony Speech: A big speech or announcement conducted from a balcony/overhang, but not necessarily a pep talk.
* Balcony Wooing Scene: A lover courts his maiden from below her window or balcony.
* Bald Bull around this Trope. As he says in one of his pre-fight quotes, "My barber didn't know when to quit. Do you?"
* Bald Bull) bosses in the game, but also being a rare representation of a Turkish character in Western media, something Turks generally crave as much as they can get over.
* bald eagle], you will be eating an evolved dinosaur. What most people think of as dinosaurs are actually non-avian dinosaurs, which are quite extinct.
* Balderduck, monkeys seem to have played a huge part in making Shakespeare's works better.
* Balder's death in itself is an example, his mother asked everything in the world

to swear not to hurt him, but didn't see the mistletoe plant and so didn't ask it. The gods made a game of throwing things at the
* Bal des Ardents was a notorious incident in medieval France. At a masquerade to celebrate the wedding of a lady-in-waiting, King Charles VI and five nobles decided to perform a dance while dressed as wood savages. The material their costumes were made from was known to be flammable, so naked flames were banned from the ballroom, only for the Duke of Orleans, the King's brother, to bring a torch. One costume caught fire, and quickly spread to the other dancers. The King himself was saved by his sister, who shielded him behind her skirts, while another found refuge in a wine vat. The other four perished. The incident was widely seen to have been the result of stupidity and decadence on the part of King Charles, who was reduced to a ceremonial role from then on, and of deliberate attempted regicide on the part of Orleans, such that his own eventual murder was publicly celebrated.
* bald-headed, allowing Luthor to take his place as Superman's archenemy. Even later, when the Ultra-Humanite was brought back in the Silver Age as a more minor villain, the writers further differentiated him from Luthor by using his body-surfing abilities to put him in the body of an enormous albino ape—which has remained his default form ever since.
* Baldilocks & the Six Bears and shunned by the other fairies because of it. He discovers that he can get himself hair by killing a bear and melting it down into grease. He decides to live with his unattractiveness, and befriends the one fairy who was kind to him.
* Balding, middle-aged Herschel Bernardi and blonde stunner Sue Anne Langdon.
* Baldi's Basics in Education and Learning (a bit like math in real life, really). There is no right answer to these problems, so you're forced to get them wrong and make Baldi angry at you (speeding him up if he's already chasing you).
* Baldi's Basics in Education and Learning, and if you're a really bad student, he outright bum-rushes you.
* Baldi's Basics in Education and Learning from the 90's, except it takes a horrific turn a few minutes in.
* Baldi's Basics in Education and Learning one correct answer to Baldi's gibberish questions, and getting the questions correct would enable the player to complete the game without ever angering Baldi. If such an answer actually exists, it hasn't been discovered yet.
* Baldi's Basics in Education and Learning" when you finally find all notebooks. It gets worse during the final part of the game where static noises are played incessantly as the player hits fake exits.
* Baldi's Basics in Education and Learning world either as a result of general anxiety from school or possibly from traumatic experiences with an actual abusive teacher.
* Baldmoney, Sneezewort, Dodder and Cloudberry Series started in 1942.
* Baldmoney Sneezewort Dodder And Cloudberry starts out as the leader of an expedition to find his lost brother, and ends up in command of a clockwork paddle steamer.
* Bald of Awesome: A lack of hair does not diminish the badass at all.
* Bald of Evil, frothing beakers of liquid nitrogen and dry ice... the only thing stopping him being a classic mad scientist is that he hasn't actually killed anyone yet. (Well, that, and the fact that he's actually this kind of giggly guy with a childlike love of messing with people's expectations and bringing them massive hits of nostalgia.)
* Bald of Evil, Johnny Mo, manages to last fairly long against the Bride.
* Bald of Evil: This villain doesn't need any hair to instill fear in you.
* Baldo. Hundreds of balloons raise a boy and a chair off the ground just as high as the first-story window of his house, which the wind immediately smacks him into, breaking it and knocking him off the chair and into a thorny rosebush.
* Baldo just a week later, to cement that they were never going to see each other again.
* Baldo: The children are cared for by their father and great-aunt, after having lost their mother in a car accident.

* Baldo, Tia Carmen tell Baldo she made his favorite form of potatoes — and then second favorite — and then that she made potatoes.
* Baldr and his mother Frigg had dreams of his death which they took as prophetic. Frigg, in a display of motherly concern, extracted promises from just about everything on earth that they would not harm him (Baldr was pretty popular). However, she neglected to ask mistletoe, either considering it too young or too non-threatening to pose a threat

* Baldr Sky's and similar technologies) and Anti-AI people (People in favor of the natural body as well as genetic engineering) is a central and recurring theme throught the narrative.
* Baldr Sky there are of course those made with sexual intercourse in mind, most which are able to support a wide range of tastes. The main character Kou end up being quite disgusted by some of these as they are pirated versions of an Avatar based on one of his childhood friends. It is also briefly mentioned that the advent of these lead to a sharp drop in sex related crimes, but that said there are still those that prefer the "real deal".
* Baldr Sky world, believing the world to be a fake one and that the world of the internet is the true one and have an AI named Sophia as their god.
* bald, they're actually pretty handsome. This is the only way they differ from normal humans in 2e, and 4e's versions are scaly like their ladyfolk, so for them the baldness isn't that bad).
* Baldur’s Gate: Dark Alliance, but since avarice is his most obvious trait, he's earned the nickname 'Gold-hand' amongst people who know him.
* Baldur’s Gate: Dark Alliance could be described as a Bolivian Army ending, although in the sequel it is revealed that the protagonists were just taken prisoner.
* Baldur’s Gate: Dark Alliance, if you unplug your controller and then plug it back in, you'll get a sarcastic message saying, "Good job. Now press the start button."
* Baldur’s Gate: Dark Alliance is filled with tons of living shadows. Since he no longer has one (being a vampire and all) he likes to manipulate them.
* Baldur's Gate 2 expansion feature some parts of the Nine Hells, including your own pocket plane and Bhaal's Throne of Blood, which is a series of organic, bony islands in a void of darkness, surrounding the central island, where the 'throne' is.
* Baldur's Gate 2, gnomish trickster Jan Jansen mentions to the bard Haer'Dalis that he's trying to write some poetry and needs some help. Specifically, he needs rhymes for orange, silver and purple. Haer'Dalis does not fall for it.
* Baldur's Gate 2 is a neutral evil drow priestess who believes that the strong are meant to dominate the weak, but that doesn't stop her from being romancable by good-aligned male player characters.
* Baldur's Gate 2", revealing her trick. She later tries the same thing on the player character if they're male.
* Baldur's Gate 2, there's a slave market with a number of human slaves for sale. Towards the end of the chapter, you'll have the option to buy the slaves and have them equipped for an expedition, then turn them loose to make their way to the surface.
* Baldur's Gate 2 topped this though. With Time Stop, Improved Aclarity, the Robe of Vecna, and Amulet of Power, it was possible to cast Magic Missile without

pausing between spells, and very quickly. Quickly enough to cause even the most powerful computers to stutter as they calculated graphics and damage of the various spells, which all occurred as soon as the time stop ended.
* Baldur's Gate 2 version, which tends to be the go-to spell to eliminate invisibility and illusory defenses once the party is high enough in level to cast it. It was intended to be in part 1 as well (it is mentioned in the file spell.ids) but got dummied out, probably because, in a vanilla game, clerics and especially wizards are unlikely to get high enough in level to actually use it.
* Baldur's Gate. After all, when the pantheon includes evil madmen like Cyric and gods who were once fallible humans, why exactly do the gods deserve worship?
* Baldur's Gate, after Sarevok is defeated, we get a shot of his statue crumbling to dust. Then the camera moves away, showing an underground temple of Bhaal, filled with rows upon rows of statues.
* Baldur's Gate, although the one you get just after receiving the Slayer Form is kind of creepy...
* Baldur's Gate and its sequel provide a similar feature in two different ways. First, in any game you may load characters from a different game, meaning you can load your end-game character at the very beginning of a new game, giving you access to awesomeness from the beginning and letting you level further than the normal game allows. The second way is that if you beat the game on certain modes it will provide you with new characters and also the Extreme difficulty level, which lets you use your end-game characters and has the same creatures as in the other difficulty setting but with levels high enough to challenge you. Level 25 rats, anyone?
* Baldur's Gate... and saying something like that in front of the daughter of a drow matriarch would be suicide if she actually paid attention.
* Baldur's Gate, an evil dark elf cleric named Viconia DeVir can be romanced by male players. And she will be attracted to the fact that the player is a child of the God of Murder and is capable of great destruction.
* Baldur's Gate: An Iron shortage due to bandit attacks → plot to spark a war between Baldur's Gate and Amn. Attempted assassination of some nobody orphan → resurrection/replacement of a dead god.
* Baldur's Gate are blown to pieces if enough damage is done to them all at once. Since the damage can come from anything from swords to daggers to bows, this can make sense in some cases—such as when a high-powered magical attack causes this—and in some cases it's ridiculous—such as when a few arrows hit one creature at the same time and it explodes.
* Baldur's Gate are distant with him and prefer their mother's new paramour who at least spends time with them. His Personal Quest determines how he deals with this unhappy situation.
* Baldur's Gate as a subversion, since the doppleganger could simply be straightforwardly trying to catch you not knowing what it's talking about...
* Baldur's Gate... As did Dynaheir right off the bat if the PC was a mage.
* Baldur's Gate beats this one to death in one town. You get things like "Here lies X, who was killed by (long list of summonable creatures)" followed by the Latin for "do not call up what you cannot put down", implying that this was a hapless summoner who didn't know what he was getting into.
* Baldur's Gate beholder. Which makes it less formidable than the normal beholders you had to kill to get the artifact.
* Baldur's Gate Black Whirlwind — don't let 'em near anything breakable...
* Baldur's Gate both fulfills and averts this trope: You meet Aerie much later than either of the other two potential love interests (a game later in fact)
* Baldur's Gate, but it's clear people will attack her when she's just minding her own business.
* Baldur's Gate) campaigns that older fans complain are a cash-in on the genre and give less bang for the buck.
* Baldur's Gate, can throw a damaging fireball known as the Sun Soulray.
* Baldur's Gate, CHARNAME's adopted parents, the monks of Candlekeep, include a few of these, but the two best examples have to be Theodon and Jessup, who, if not

dramatically cut off, will happily ramble on to CHARNAME and their party about what a cute little nudist toddler they were, regaling them with a story of one incident when CHARNAME stole the cloak of Khelban Blackstaff and made it into a cape, giving it back only when Khelban used a spell to catch them, and commenting on how they wished they had a chance to show off some of CHARNAME's baby pictures.
* Baldurs Gate Dark Alliance II created several freaking monsters like those and kept them in her manor. Some of them (the humanoid ones) seems to be zombies (they can be damaged by Alissa's Turn Undead), while others seems to be "living beings".
* Baldur's Gate, despite being even larger in terms of world size, profited from the interim advancements in the asset compression tech and fit on "only" four.
* Baldur's Gate: Dragons never take flight, even as things start to go south for them.
* Baldur's Gate) enemy they killed. By the end of the campaign these numbers will be in the hundreds of not thousands.
* Baldur's Gate. Exactly who kills him depends on which of your party members makes the killing blow, but your party kills him so it still counts.
* Baldur's Gate examples above), is a Straw Nihilist, albeit a rather chipper one. At one point he states that he finds all the destruction wrought by the Bhaalspawn to be marvelous.
* Baldur's Gate expansion there is a quest involving a distant island with some strange inhabitants. They often point at your smell, one of them will refer to the village as a pack and they have uncommon ways of speaking (which at first could be seen as a dialect since they have a strange accent) and reasoning (like the way they give importance to the concept of someone "belonging" to a community). The village leader will task the player to slay some beasts that were harassing the village. She underlines a lot that they are different from villagers and that they look like them but they are not them: "wolf-like but not wolves and man-like but not men, I don't know how to call them, they are like us but not like us", they are "they are animals and live as wolves and carrion feeders" while the villagers "lived as humans as we could". A child says that "sometimes the beasties look like us but they change and get mean". Further investigation in the village will give another hint in the fact that apparently the hostilities between the two sides started with their ancestors shipwrecking on the island, implying that they had some ties in the past. Later you discover that the beasts are obviously lycanthropes (precisely wolfweres, wolves capable of turning humans) but their leader will reveal a plot twist: the villagers are too (although true werewolves). While the hints hidden in the village could lead the player to a final hypothesis that the whole island is inhabited by those creatures, it's evident from the first very dialogue with a child saying "you smell different" that the villagers are lycanthropes too.
* Baldur's Gate EXP is required, but it can be beaten with only a few thousand EXP gained (out of a cap of 8 million)>
* Baldur's Gate fanfic, the NPCs, sick of replaying the same scenes over and over when the human player reloads saved games on her computer, team up and kill the PC. At which point, the human player decides never to play the game again.
* Baldur's Gate features a war between the local thieves' guild and an upstart guild of vampires.
* Baldur's Gate features tutors of the character coming up to the character shortly after assassination attempts. The player can choose to be frightened and honest, or dismissive and evasive.
* Baldur's Gate "fixed" this by letting characters run away from Fireball spells and not get damaged.
* Baldur's Gate follows a young protagonist whose sheltered life is disturbed by circumstances beyond their control, only to discover they are the child of a dead god of murder and find themselves hunted by many powerful foes as a result of their status.
* Baldur's Gate for your crawling needs: Durlag's Tower and Watcher's Keep, both of which have multiple levels, nasty monsters and traps, and of course treasure.
* Baldur's Gate game does this really well; if Khalid is in your party, and your

character is Good, then he will compliment you, saying, "Gorion would be so proud of you" (Gorion is your foster father). Since this usually only occurs when you do some significant Good act, it does make your character feel like a hero.
* Baldur's Gate game featured a lot of pointless trekking across mostly empty maps, although you didn't have to cross the same map more than once. The second game did away with the empty maps but as a result, the map felt less like a contiguous area to explore and more like a selection of randomly scattered questing locations.
* Baldur's Gate games, the mouse cursor turns into a bear trap icon when the player moused over a trap with the "Remove Traps" ability was on.
* Baldur's Gate games was something of a pet if Minsc was in your group, though he was little more than an annoyance to many players as he took up a valuable quick item slot.
* Baldur's Gate games you start as a random kid from Candlekeep, known only by, for lack of a better term, "family". By the second game, a few people in a nation about 200 miles south of Baldur's Gate have heard of your exploits up north. By the expansion, an entire army is sent out to kill you, an extremely powerful Bhaalspawn with an army of her own starts to panic when you come after her, and freaking Elminster says, "Nope, not fightin' ya."
* Baldur's Gate had a magical one in the form of the Wizard's Eye Spell. It could go anywhere the player could and was invisible, though not invulnerable. Anything that could see through invisibility, could kill it.
* Baldur's Gate had enemy skeletons, but you could also summon your own with the proper spell.
* Baldur's Gate has an enormous library of spellbooks and histories which are maintained and patrolled by a fanatical order of monks, as well as having at least one backup copy of the entire library in another dimension.
* Baldur's Gate has huge spiders, giant spiders, astral spiders and sword spiders in Cloakwood and a few other areas. The astral spiders can teleport at will and like to sneak up on your casters, and the sword spiders are crazy fast and pack quite a punch. The sequel lets you summon them with a spell, and they're considered one of the best summons in the early game.
* Baldur's Gate has Irenicus, who opens the game by whittling your party down from six members to four. You don't even stand a chance against him until the endgame, even though you are the child of a god. There's a part after the middle where you need to recruit a bunch of crazy wizards to attack him; if you try to face him without them, he'll insta-kill your whole party. He's level 30 in a game where your characters become really powerful because they can reach levels around 17.
* Baldur's Gate has the Flaming Fist as the de facto police in both the titular city and the surrounding countryside, despite the Flaming Fist technically being a mercenary company. They still take their roles as law enforcement very seriously. So much so that if you ever fight them, their battle cry is "I AM the law!"
* Baldur's Gate he'll just let you go unless you insist on fighting him.
* Baldur's Gate, he loses control over his undead minions and they all fall apart, making the fight against him that much easier.
* Baldur's Gate. Hilariously lampshaded in the original; at one point, you will get the option to say this:
* Baldur's Gate: Hold there, traveler, Elminster just wants some attention.
* Baldur's Gate II (and provided you don't screw it up), there'll come a point where she'll admit to having watched you sleep the night before and how it made her feel safe doing so.
* Baldur's Gate II". As if this wasn't anachronistic enough, the protagonist isn't even the accused, but simply a witness to a crime.
* Baldur's Gate II, as well as shrugging off most attacks. So a balance of both is still very helpful later on.
* Baldur's Gate II by skipping over the "last night" romance dialogue and right into the "morning after" one.
* Baldur's Gate II; by the end, you will either want to marry her or strangle her.
* Baldur's Gate II continued the romances, and the epilogues were different depending on who you romanced and what you did in the end.

* Baldur's Gate II Conversely, the other two possible love interests (Jaheira and Anomen) are a human and a half-elf, so a long-lived player character will outlive them.
* Baldur's Gate II deflates Edwin's ambition for eternal life through godhood by this trope:
* Baldur's Gate II during the 'skinner murders' sidequest. If, after finding the necessary clues, you decide to present the implications of them to the watch inspector on the case first instead of confronting the suspect directly, you'll find the inspector's corpse stuffed in an oven in the killer's house when you finally do it yourself.
* Baldur's Gate II engaging in a cock fight over a girl. After one kills the other, the girl expresses boredom and walks off, much to the puzzlement of the "winner".
* Baldur's Gate II even during the day, but in Amn it's a bad idea to travel at night until you've got a decent selection of magical weapons and ideally a permit from the Cowled Wizards to use magic within city limits, because you will encounter steadily escalating vampire encounters — starting with harmless but intimidating displays and ending in packs of vampires tearing you to small piles of cooling meat — and vampires are resistant to non-magical attacks and inflict Level Drain.
* Baldur's Gate II features a mob threatening to burn Viconia at the stake in the middle of Athkatla. As the protagonist, you can choose either to save her (incurring the ire of the mob in the process), or to be a jerk and let her die.
* Baldur's Gate II, features several floating skulls, which are infinitely more nasty than their full-bodied counterparts.
* Baldur's Gate II for a lady's favour so he can 'champion her'. The subject responds in a predictable manner.
* Baldur's Gate II for some good karma. A few acts later, stumbling into the wrong part of the Underdark results in the whole party being captured by Mindflayers and sent to fight monsters in their arena.
* Baldur's Gate II gets to perform this task in the prologue. He's been caged up and because he'd already broken out once, the villain removed the lock, sealing him in. Talk to him, and regardless of what you say he'll get mad enough that he breaks through. "The bars! They bend and twist with my berserker strength! Minsc and Boo are FREE!"
* Baldur's Gate II had a pre-order edition and a collector's edition; each resulted in a different special merchant with powerful equipment appearing somewhere in the game. These were later added to a simple patch for download. However, the game's manual was very nearly a bludgeoning weapon (and would have been a good one if it had been hardcover instead of spiral-bound), and the collector's edition, at least, came with a cloth map, other versions came with a map-poster and a novel.
* Baldur's Gate II has a much more forgiving opening area. For a start, there's the fact that being a direct successor means you actually have some skills and are tougher than a wounded puppy this time around (and you can actually import your character from the first game). However, the opening dungeon becomes extremely obnoxious and boring for many after the first trip or two through it, let alone if you like making new character builds. Mods have been made that allow you to skip it entirely while still taking everything of note, including experience.
* Baldur's Gate II, has this possibility. In chapter V, the player character is disguised as a Drow to infiltrate their city, and a relationship of sorts can be established between the player and one of the Drow, but ultimately the player will betray them one way or another. Of course, being Drow, most relationships are basically based on betrayal anyway.
* Baldur's Gate II has you commissioning, on behalf of one of the temples, a sculpture from a haughty artist. If you do the quest right, you'll end up pissing off the artist and have a heavy lump of useless Illithium ore on your hands. But never mind: the temple still accepts that shapeless ore as a great work of art. In fact, the senior priest will regard it as far more symbolic and meaningful than anything the haughty artist could have produced.
* Baldur's Gate II having learned the world isn't as nice as she'd like.

* Baldur's Gate II. He flatly replies, "No, you warrant no villain's exposition from me."
* Baldur's Gate II her from using a very good item that she's already wearing—and she doesn't get a replacement to reflect the change.
* Baldur's Gate II hidden from Irenicus's capture party. Supposedly there is ever so much of Minsc to search. Imoen speaks for everyone by going, "Ew, I don't want to know." Not that Minsc looks anything like Richard Gere, but...
* Baldur's Gate II. His reaction to the artifact weapon "Hindo's Doom":
* Baldur's Gate III, allowing the player character to romance any companion regardless of gender.
* Baldur's Gate II, if the PC is female (or male but chooses to romance someone else) Jaheira can be seen as an example of this.
* Baldur's Gate II, if the player character is a Fighter, and takes up responsibility of D'Arnise Hold afterwards, he has to prevent one of these.
* Baldur's Gate II if you attack anyone in the Shadow Thieves secret complex while being allied to them, Arkanis Gath will spawn and instantly kill you. The same in the vampires' guild if you sided with them.
* Baldur's Gate II, if you kill a plot-central character during the opening few acts, an invincible assassin named Arkhanis Gath will appear and gib you.
* Baldur's Gate III has become this for the series ever since the first demo playthroughs were shown to public. Supporters of the game applaud it for it's excellent "turn-based" combat, use of 5th Edition D&D rules, good world building and amazing graphical representation. Detractors, on the other hand, slam it for abolishing the "real-time with pause" gameplay from the previous games, it's lower party size (four instead of six members), it's somewhat lighter looking atmosphere (which reminds them of the Divinity: Original Sin series) and the (relatively) unlikeable character companions. From these points of contention, the juxtaposition between "turn-based" and "real-time with pause" seems to yield the greatest amount of discussion, nevertheless. Furthermore, there is a (relatively small) group of fans who find that this game should have been called "Divinity: Original Sin 3" and who long for a Baldur's III game made by another developer entirely.
* Baldur's Gate II in worship of their god. Once you agree to join, your screen goes black.
* Baldur's Gate II is about the same age as most party members, including the protagonist.
* Baldur's Gate II is alive and well, and is widely known for near-total freedom of choice in the protagonist's options. Imoen is romanceable by both males and females, and to the mod's credit, does not shy away from the incest issue — Imoen in particular has issues with it.
* Baldur's Gate II is an example of an in-story character being one. No one else in his family has such an accent, and the characters eventually decide that he puts it on so that he will sound more cultured.
* Baldur's Gate II is a straightforward party-oriented Western RPG based on the Dungeons & Dragons ruleset — except for one part of the Watcher's Keep area that's a text-based dungeon crawl.
* Baldur's Gate II is for the game to drop a cow on your intended target instead of casting a spell. The impact duplicates the effect of the Meteor spell (an epic-level spell), making it a very good roll to get on an offensive spell misfire but a very poor one if you were trying to buff yourself.
* Baldur's Gate II is mistaken for gay by quite a number of characters. When he denies it, they delight in mocking him, which includes him being called a "fruit" by Cernd.
* Baldur's Gate III, takes acid damage if he crosses running water and his AI will refuse to cross it as it is identified as a hazard (other characters react the same way to fire or poison clouds).
* Baldur's Gate III: The Black Hound (written by Josh Sawyer) was canned due to a lack of time to complete it.
* Baldur's Gate III, the Larian logo turns into an illithid, which are the main

antagonists of the game.
* Baldur's Gate III: The player can discover a male bugbear and a female ogre having sex in a barn. They don't appreciate your intrusion and tell you to get lost: if you ignore their warnings and open the barn door, they will attack you.
* Baldur's Gate II. It is later lampshaded in the expansion (see below the lampshaded hanging section).
* Baldur's Gate III, where every sapient creature has a name, regardless of importance.
* Baldur's Gate II Jon Irenicus. One of these inmates is a young girl with the ability to shapeshift; she does not actually take part in the battle, in which all the other inmates die.
* Baldur's Gate II: Jon Irenicus stands out from the norm by averting this trope; not only does he feel no need to explain his plans to you at any point, he also make good use of sedatives to take you out rather than give you a chance to escape, and he makes sure to have you killed off properly after he no longer need you. Unfortunately (for him, at least) he decided to let his sister Bodhi deal with that. She played the trope straight, and had this interesting maze she wanted to test...
* Baldur's Gate II katanas are one-handed and deal d10 damage, as much as a two-handed sword. The first game also has Celestial Fury, a +3 sword acquirable with minimal effort which stuns opponents, sometimes deals bonus damage, and can shoot lightning.
* Baldur's Gate II—a backroom in the Cornet Inn suggest that it's an Opium Analog, and for a very mercantile city, Amn forbid the selling of it.
* Baldur's Gate II might just qualify for World Class beauty. By the same logic, at least Jaheira and perhaps other female party members as well as qualify for Common beauty.
* Baldur's Gate II; not counting Bhaal, he's the last person you'd think of to act in a gentle manner. However, in Greek the name "Irene" means "peace"; in Christian theology, an irenicist is someone who advocates using reason and peaceful methods to win arguments (as opposed to a polemicist).
* Baldur's Gate II, NPC Aerie can be romanced by both the player character and fellow NPC Haer'Dalis. If she chooses you, he'll back down, but if her romances with both proceed at about the same pace, he tries to settle things in this manner.
* Baldur's Gate II of Athkatla, which is also one of the most active areas for quests and encounters.
* Baldur's Gate II) or avert this trope by offering them a more impressive reward that's still nothing but pocket change for you.
* Baldur's Gate II or two, she can probably wipe the floor with him or her in single combat with her bare hands, while wearing less than required by decency.
* Baldur's Gate II release in 2012 injected new life into the franchise with a corresponding invigoration in modding interest. Most common additions allow the player to complete new quests, recruit new NPCs, and add new dialogue and romance options. More technically, there are mods for new items, shops, character class kits, and adjusted combat and alignment mechanics. Some of the most popular and long-lasting mods include:
* Baldur's Gate II remains stoic for most of the plot, at most displaying a kind of icy annoyance... Until a scene right before the end when he finally cracks.
* Baldur's Gate II remarks "The things in these tanks...they used to be people."
* Baldur's Gate II, requires you to destroy one (in fact, two) in order to make an enemy vulnerable, allowing you to kill him.
* Baldur's Gate II: Shadows of Amn. As a consequence, +2 weapons are everywhere.
* Baldur's Gate II: Shadows of Amn, Irenicus. He doesn't brag about being evil but knows that people views him as such so he doesn't bother denying it, enough to tell in your face that you "warrant no villain's exposition" from him.
* Baldur's Gate II sometimes evokes this reaction in whoever has to listen to his ramblings.
* Baldur's Gate II speaks like this, and uses it as evidence that he is more intelligent than everyone around him. If your own character has a high enough

Intelligence score, you can insinuate (in a similarly roundabout, verbose way) that you think he does so to make up for a rather private "deficiency" on his part.
* Baldur's Gate II) spell. Just like the other D&D examples, it WILL twist your wishes if you are not careful. "I wish to be more experienced." makes it summon a horde of monsters for you to (try to) kill, for instance. "I want to go on an adventure like one I've never been on before!" sends you on a quest to track down someone's grandmother's gong from a variety of improbable characters... Wishing to be prepared against the undead makes it summon a group of hostile vampires while giving you no additional protection against them whatsoever.
* Baldur's Gate II still lacks a gay option, since both of those are quite evil.
* Baldur's Gate II that leaves you free to spell-sling to your hearts' content. You can avoid buying the license by killing enough of the guys they send to enforce the ban, but it's usually easier to just avoid casting spells outdoors until you can afford the license.
* Baldur's Gate II the Cavalier kit for the Paladin class is this. Not as good against the undead as the Undead Hunter (and the game throws at you tons of powerful undead creatures), but still powerful enough to hold them off, and can use a lot of items that neglect such differences. Not as good against spellcasters as the Inquisitor, but its innate abilities compensate and again it can use items that neglect such differences or travel with companions that cover the issue. Can't use ranged weapons, but the limit can be bypassed through magic throwable axes, and you won't use it at range often anyway. As a paladin, won't be as effective in melee as a dedicated fighter with 5 proficiency pips, but the ability to wield the mighty Carsomyr far outpasses anything but dual wielding katanas. Its inherent resistances are useful against spooks, vampires, demons and dragons.
* Baldur's Gate II, the Copper Coronet Inn has a fighting ring that has animal fights that you can bet on. Doing so will cause any Druid or Ranger party members to become upset with you. In the drow city after you're disguised as a drow and get known well enough, you can compete in the arena against various monsters. Played with due to them being mostly creatures of human-like intelligence but still treated as effectively animals.
* Baldur's Gate II the end: Once defeated by the player, banished to the Abyss, and stripped of his magic, we last see him defending himself from a horde of demons with his bare hands, and even taking a couple of them down before being overwhelmed by their numbers.
* Baldur's Gate II. The first time, you can help the gladiators. The second time, you're one of them.
* Baldur's Gate II, the hatred rivalry between Minsc (a kind-hearted, foolish warrior) and Edwin (an evil mage with the highest intelligence score of all recruitable characters in game).
* Baldur's Gate II: Throne of Bhaal, Aerie gave birth to CHARNAME's and, later in the epilogue, his daughter. Viconia also give birth to his son in the epilogue and, if you have installed the Ascention mod, so is Jaheira. If you've installed her mod, Saerileth has a LOT of children with CHARNAME, and if you've installed the Ascention mod, a female CHARNAME can have a daughter with Anomen.
* Baldur's Gate II: Throne of Bhaal, but that would make just as little sense simply for the reason that then she would have been very visibly pregnant already for a long time.) It is possible to play through the whole plot before the baby is born, hiding the timeline absurdity from view.
* Baldur's Gate II: Throne of Bhaal". Cespenar remembers it as a very bad week, all in all.
* Baldur's Gate II: Throne of Bhaal isn't actually given the opportunity to acquiesce.
* Baldur's Gate II: Throne of Bhaal. It wasn't an official BioWare release, but adds or restores content that Gaider, as one of the game's writers, personally wished had made it into the official product.
* Baldur's Gate II: Throne of Bhaal (of the instant regeneration kind).
* Baldur's Gate II: Throne of Bhaal, one of the three guardians for the final seal is an entirely female group composed of Y'tossi (a marilith), Nalmissra (a

succubus), The Hive Mother (a beholder), Amerilis Zauvwir (a drow cleric), The Huntress (an archer) and Xei Win Toh (presumably a kensai).
* Baldur's Gate II: Throne of Bhaal's ability to shift to another plane. But even the player's party is limited by this, because they can only shift back to the Material Plane inside Saradush or at a considerable distance from it; the time it takes for them to approach it from the outside becomes a plot point.
* Baldur's Gate II: Throne of Bhaal: Saradush, although it's a lot smaller than Baldur's Gate or Athkatla.
* Baldur's Gate II: Throne of Bhaal. There's even some emphasis on how this choice means leaving forever while staying a mortal doesn't, even though the game ends there anyway. Also, if you have Keldorn in your party when you finish the game, his epilogue mentions that he got picked to be the right hand man of the setting's god of justice at the moment of his death.
* Baldur's Gate II: Throne of Bhaal, where this becomes a possibility. You can even turn him into an ally for the final battle.)
* Baldur's Gate II, throws the player into one of these almost from the beginning. As soon as the player gets out of the initial pocket plane, he or she winds up in the city of Saradush, which is being besieged by a massive army led by a nigh-invulnerable fire giant. The player can even be hit by random artillery fireballs fired by the besieging army when moving around the city.
* Baldur's Gate II: to defeat Irenicus during your first confrontation at Spellhold, you are told that only an army could manage to give you a chance. And you are also told that there is such an army available: all the inmates of the asylum, mad sorcerers and wizards that in other circumstances would be unwise to unleash. The plan works, although Irenicus manages to escape.
* Baldur's Gate II to rob you. If the protagonist tries to exchange himself with her as a hostage, you'll get arrowed for half your current hit points, Jaheira fights free, and this trope will get evoked once the bandits are dead.
* Baldur's Gate II, Valygar Corthala mentions that he had to kill both of his parents when they turned themselves into ghouls. Valygar is a very bitter man, understandably enough.
* Baldur's Gate II, Valygar, whose family had been long-plagued by necromancy practice, destroyed his parents after his mother raised his father from the dead as a zombie, unwilling to accept his death, and then later joined him in undeath.
* Baldur's Gate II, Viconia does have a concept of what love is but, being from a race where sex is used for either only pleasure or to have power over somebody, is quite unfamiliar with the more intimate aspects, such as cuddling, and is quite confused when she starts to "feel an ache" whenever you're apart.
* Baldur's Gate II, Viconia spends a little while trying to make the player character hate her when she realizes she's not exactly wearing the pants in the relationship (and might be falling in love).
* Baldur's Gate II, when Minsc's weapon isn't powerful enough to affect his enemy...
* Baldur's Gate II when the following dialogue option pops up: "You are just a nameless observer. Of what use can you be to me?"
* Baldur's Gate II), which in turn is connected also to a beholder lair which still qualifies from the point of view of beholders.
* Baldur's Gate II, you become lord of a manor. One of the challenges is to decides who to marry a ward of the estate to, the rich suitor or the poor one.
* Baldur's Gate II, you end up rescuing them (twice, in the case of one of them...) the third? She was sent to help you.
* Baldur's Gate II you're required to find overwhelming evidence of the younger Roenall's wrongdoings, as all complaints about him have to go through...him. So you need something very convincing to convince his superior to break protocol and get rid of him.
* Baldur's Gate, Imoen is rather specifically described by one character like this:
* Baldur's Gate installed, since the solo character gains access to abilities that would normally only be acquired in the expansion and are many, many times more powerful than the standard skillset.

* Baldur's Gate, in the first there is even a shout-out to Fritz Leiber as the code word to let <CHARNAME> inside is "Fafhrd". Two rival Thieves Guilds, one staffed by cutthroat thieves, the other by vampires, play a prominent role in the second game.
* Baldur's Gate. In the Throne of Bhaal we meet a fully grown dragon of about your age (20 years) and even with mature offspring by his side. At least what your stepfather's letter told you about your mother may be explained away as an attempt to not further upset you.
* Baldur's Gate is a much bigger game than its predecessor, and it's likely that it was designed by using the first game as a template.
* Baldur's Gate is a shining example of the trope. He's a tiefling (demonkin) from a wholly different plane of existence who joins the party to do some sightseeing, seduction, and provocation. Jan Jansen from the same game is also an example, although he's much more down-to-earth than Haer'Dalis.
* Baldur's Gate is sociopathic, irritable and has a massive ego but is genuinely cranky to the point of amusement and bumbling enough to be this trope. Half the laughter comes from him being sulky.
* Baldur's Gate is the result of taking too many blows to the head over his career as a berserker.
* Baldur's Gate, it's up to the player whether stopping a war is actually a goal for them or something they just do on the side while defeating their enemies.
* Baldur's Gate like a cat, and he buys your escalating lies for an absurd amount of time- it takes five conversations until he finally catches on.
* Baldur's Gate, lots of people seem to know about your heritage, but pointedly refuse to tell you about it. At most, they offer vague hints.
* Baldur's Gate — not their choice of who to be and what to become, which is free but does not affect the outcome, but whether they or their opponents prevail.
* Baldur's Gate—though he waited much longer than the standard I Surrender Suckers; specifically, until he was brought into prison. Then he broke out and slaughtered every Cowled Wizard he could find.
* Baldur's Gate memes, you say? GO FOR THE EYES, BOO! GO FOR THE EYES!
* Baldur's Gate mode your character eventually gets is that if you keep it on for more than a while, it will start heavily damaging you. Death ensues quickly.
* Baldur's Gate most starting enemies from the onset, you probably won't need it. That character export is actually intended for you to import in the sequel so you can start with your familiar character rather than having to create a new one.
* Baldur's Gate. Not surprising considering his mate was tortured to death by one of the villains.
* Baldur's Gate, often result in players making the leap from video games to tabletop games.
* Baldur's Gate of the Inquisitor and is the sole reason why the Inquisitor kit is so powerful.
* Baldur's Gate only has three options, although due to class and/or alignment you're pretty unlikely to keep them all in the same party...
* Baldur's Gate, on the Core Rules difficulty, causes anyone who is killed with massive damage (i.e. reducing them to -10 hit points with a single blow) to explode into pieces, preventing any possibility of resurrection.
* Baldur's Gate: Random wilderness-dwelling brown and cave bears, while far from the toughest enemies of the game, start off showing as neutral to you, become aggressive if you get at all close, and can serve up a good mauling if you stop to fight. And usually come in pairs or groups. Oh, and you can encounter them right after the tutorial, at level 1.
* Baldur's Gate says this as one of her "command received" lines. It gets very tedious very quickly.
* Baldur's Gate series, characters who take amount of damage significantly higher than their current hit point total, or suffer a one-hit kill due to obscene damage or a vorpal weapon, will often be "chunked" (i.e., explode messily). While this is simply a cooler death animation for your enemies, allied characters who get chunked on harder difficulty levels can't be resurrected and force a reload - and better

tactics the next time around - if you want to keep them in your party.
* Baldur's Gate series features doppelgangers and other shapeshifters who like to impersonate other characters, but all of them shift into their normal forms when attacking, thus disqualifying some interesting scenes from quite exemplifying this trope.
* Baldur's Gate series, the Paladin class has this as the armorless model.
* Baldur's Gate series, the protagonist may encounter Portalbendarwinden, a crazy old hermit living between Beregost and Nashkel. If you're foolish enough to ask him for advice, the resulting nonsense gives the protagonist the choice to go over the edge:
* Baldur's Gate: Siege of Dragonspear illusion and concealment, not villainous deception.
* Baldur's Gate: Siege of Dragonspear series that a goblin has been on your side. (Of course, whether "your side" counts as "heroic" is ultimately up to you.)
* Baldur's Gate: Siege of Dragonspear, the necromancer Korlasz leads the remnants of Sarevok's followers after Sarevok's defeat. Taking her out is the first mission of the campaign, before the new threat emerges.
* Baldur's Gate: Siege of Dragonspear was criticized for introducing several token minority characters. The one that got most attention was Mizhena, a woman who, upon first meeting her in the game, when you choose certain dialogue options about how she got her name, reveals that she's transgender. She does this before providing little else in the context of the game.
* Baldur's Gate. Some of the others that appear in the games have non-human mothers, such as giants and dragons, but many of those only shown briefly in flashbacks and the like appear human. The race of the PC's mother is up to the player.
* Baldur's Gate. Somewhere in the game, Minsc can choose a new "Witch" to protect out of two other potential party members.
* Baldur's Gate, so the fact that the merchants are staying home isn't a problem for them.
* Baldur's Gate, summoning creatures is usually an excellent way to rip medium-low level adversaries apart; however, higher level wizards tend to have spells which allow to quickly "banish" the summoned creatures, making them useless.
* Baldur's Gate: Tales of the Sword Coast draws in and traps anyone teleporting near it. Naturally, it's populated by several angry mages who want to relieve the player of his macguffin that allows for escape.
* Baldur's Gate tends to stutter. A lot. As a result he does sound quite a bit like Porky.
* Baldur's Gate, the canonical ending for Jan Jansen (spoiler tagged for obtrusive wall of text):
* Baldur's Gate. The child is half winged elf, half whatever-the-player-is.
* Baldur's Gate, The Flaming Fist guards the city of the same name — and regardless of your level and divine blood, you have no chance against them. They are literally invincible.
* Baldur's Gate. Then he spots you and decides you would make a good parent...
* Baldur's Gate, the Player Character itself is a child of the God of Murder, and although you are allowed to follow in Daddy's footsteps as a force of evil, the game mostly expects the player to want to be a hero and act in a nice way. The PC's half-sister, Imoen, is in the same circumstance as a Child of Bhaal and is distinctly on the bright and cheerful side of Good. All your other Brothers and Sisters, however, are Warlords and Mass-Murderers to a man/woman/elf/drow/fire giant/dragon/half-dragon/werechincilla...
* Baldur's Gate the Player is lucky enough to meet up with Drizz't (again), Wulfgar and their heroic friends. When you encounter them, they are searching the undergrowth for a misplaced magical hammer that is absolutely NOT 'pink' - it's 'light red'!
* Baldur's Gate. The second game adds Aerie who basically thinks you're the best thing ever.
* Baldur's Gate: The series had a few - brash but idealistic squire Anomen,

relentlessly pious and judgmental Ajantis, and the old but still fighting Keldorn. Oddly enough, perhaps the most outspokenly classical example is a female halfling, Mazzy, who comes as close as a halfling can come to a paladin in a Second Edition-based game. The Knights of the Noble Order of Radiant Heart were an order of this trope, whom the protagonist could join if s/he was a paladin too.
* Baldur's Gate: The two-handed sword +3 in the bottom level of Durlag's Tower. It is one of the few +3 weapons you will ever see in the game, and found in the bonus dungeon you usually won't see the bottom of unless you're at the highest level already.
* Baldur's Gate, the wizard gives the young couple his blessings for their marriage.
* Baldur's Gate, they are described by another character thus: "Two unsavory beings who revel in the violence Sarevok allows them to commit. They are no more than animals in human guise, even by the standards of the company they keep."
* Baldur's Gate they were such a legendary hero that they were owed favors by multiple individuals (including a few gods) who could easily do it for them.
* Baldur's Gate, this is Imoen's last words before her hit points drop to zero.
* Baldur's Gate to flee, which they do. He kills or disables the others and holds off Sarevok for a while, but hasn't really got a chance. When you actually fight Sarevok at the end of the game, at least he's got only about two to two and a half times your levels...
* Baldur's Gate toil in anonymity, unaware of their divine parentage. Sarevok and the PC are among the few who truly stand out.
* Baldur's Gate to Japan) were both major characters of colour, and the profile image for Cernd looked vaguely Native American, and then the enhanced editions added the distinctly Middle Eastern martial artist Rasaad yn Bashir. Notably, all four of these characters were human, and not elves or something.
* Baldur's Gate Trilogy: One of the few so-called megamods, BGT is designed to take all of BG1's content and convert it into the BG2 engine. This, along with some added dialogue options, allow both games, along with their expansions, to be played as a single massive game. This has also opened up many modders to add content to BG1, whereas it was originally neglected as being difficult to modify. But with BGT installed, both games run on the same engine and thus modifications based on the sequel's engine can be introduced into the original game. In the same way, NPCs can be introduced in the first game and be made to run seamlessly through the entire series.
* Baldur's Gate trilogy. Unfortunately, with the closure of the publisher, Black Isle Studios, and its parent company, Interplay, the developer Snowblind Studios was forced to halt development on the project sometime around 2004.
* Baldur's Gate, trying to romance drow priestess Viconia will end with this, as she's targeted by Lolth's Handmaidens and doesn't want to drag the protagonist into her mess. However in the expansion she will be amenable to starting over - she realizes that between having your soul ripped out and reclaimed, going to hell, climbing the path to godhood and having to put down your god-blooded half-siblings along the way, the Handmaidens are a minor trifle. Besides, marrying a god...
* Baldur's Gate, twenty years later after the original instalments concluded.
* Baldur's Gatevert, and then justify then justify this trope. Confused? Just keep reading.
* Baldur's Gate was originally released on five discs plus the Tales of The Sword Coast disc. It was later re-released as a three-disc game, reducing the amount of CD-swapping a player must do.
* Baldur's Gate wear loincloths that look just a little too much like giant flapping dongs.
* Baldur's Gate were beset by doppelgangers who killed prominent people in and around Baldur's Gate and assumed their identities to support the Iron Throne.
* Baldur's Gate, where a Death Course is seen as a training ground for the Shadow Thieves of Amn.
* Baldur's Gate which is based on the 2nd edition AD&D ruleset, Mazzy the Halfling Fighter has a discussion with another NPC who suggests she should become a

Paladin. Mazzy responds by saying Halflings can't become Paladins (as is the case in 2nd edition). Paraphrasing: "It's not as though there's a third edition out is there?"
* Baldur's Gate will have this invoked if you have good and evil characters in the same party.
* Baldur's Gate with the Drow Cleric Viconia. She is an excellent healer, but is evil-aligned and a bit of a bitch.
* Baldur's Gate, xvarts are just the usual low level evil mooks that spawn as hopeless hostiles for you to kill them and get the XP and the loot. Except, one of them shouts that they didn't nothing wrong and they were just minding their own businesses, when you suddenly came and started rampaging their settlement...
* Baldur's Gate yields the delightful phrase 'Someone has noticed you. You heard the guards being summoned'. This would be followed up by high-level, well-equipped guards (though how powerful, exactly, depends on the in-game area you were in) showing up to confront you. Some of them can be bribed to go away, some just kill you.
* Baldur's Gate, you can obtain the golden pantaloons from a noble at the Friendly Arm Inn who mistakes you for the maid. Maybe the real maids wear armor and carry swords, too.
* Baldur's Gate you find a book about Jergal, once-god of the end of everything; as the god of strife, death and the dead he was immensely powerful and fell into despondency as he realised that having absolute power and absolute impotency was practically the same. As such he practically jumped at the chance of being ousted by Bane, Bhaal, and Myrkul and even prevented them from killing each other over his power.
* Baldur's Gate, you're given the option of joining the titular city's thieves guild. If you decide not to (whether because you're a good guy or just not interested), the guildmaster makes it perfectly clear that he runs on a "join or die" policy. Cue boss fight.
* Baldur's Gate you take will take more time than the main plot. This can annoy certain party members, depending upon who you have along.
* Baldur standing near a low wall. Try throwing your axe or a boulder at him and the cursor will disappear, preventing you from damaging him. It’s pretty much impossible to ambush him just in case you were trying to see how clever you are.
* Baldwin Coster is this to Rhuna at the World Martial Arts Tournament in
* Bald Woman, Ilea attractive because her species give off pheromones.
* Bald Women: A woman without hair, and usually all the stronger for it
* Bald Women: Baldness on a woman indicates that something's different with her.
* Baleblades have forcefield cutting edges that will tear through molecular bonds.
* Baleen whales are usually drawn with a single blowhole like a toothed whale. In real life, they have two blowholes.
* Baleen whales, especially Rorquals like the Blue Whale, have massive mouths even for creatures of their size, and open up to
* Balefire by Ken Goddard, a terrorist is planning to infiltrate the United States by swimming from a cargo ship, which is being followed by a shark feeding off the garbage thrown from the vessel. At first, the terrorist is amused by the shark and even feeds it to stave off the boredom of the voyage, but as the time for his infiltration grows near he realises that the shark is being conditioned to regard anything thrown overboard as food. He becomes increasingly paranoid as the shark keeps following them even after he orders the crew to stop disposing of their garbage, and eventually has to resort to shooting it.
* Baleful Polymorph: A character is transformed into a shape that renders them powerless or impairs their ability to pursue their goals.
* Baleful Polymorph, but drastically rarer than depictions of "Ranko".
* Baleful Polymorph-happens on his eighteenth birthday and the days before and after.
* Baleful Polymorph: Transformation used as a weapon or punishment, to disable or dispose of an individual.
* Baleful Polymorph; various gods transformed Procne and Philomela into birds, and

turned some Arcadian guys into werewolves. Zeus turned Io into a cow. Dionysus turned some pirates into dolphins.
* Baleful Polymorph weapon can turn enemies into animals that explode once upgraded.
* Balibo, which depicts the killing of Australian journalists by Indonesian soldiers during the 1975 invasion of East Timor, is banned in Indonesia. The Indonesian government's version of the story stated that they died in crossfire. A local journalists’ association conducted a screening, attended by about 500 people.
* "Bali Ha'i" noticeably puts a lot more focus between Kim's and Mike's plot arcs than on Jimmy's plot.
* Bali in which he's in a boat race and he his friends initially lose to another racer who cheats by doing this, but then ends up losing after an on-camera review of the race shows his cheating. Back at Bali's, Bali tells Tito that he only wants to win if they play fairly. And they do.
* balisong, as opposed to the 925/1000 silver in jewels. Silver is very soft, Mohs hardness of about 2.5, and can be scratched by a human fingernail. Think modern electronics solder, with lead replaced by silver in the alloy, and even this is harder than pure silver.
* Balisse angels are formed from the souls of evildoers who forsook their former ways and embraced benevolence, and seek to help others undergo the same change of heart that they did.
* Baljeet has this reaction when his old childhood friend Mishti comes to visit and looks like she's a
* Baljeet is dependent on routines and clear direction, unsocial, observant but somewhat oblivious and emotionally stunted, and is able to focus for long periods on repetitive behaviors.
* Baljeet is Indian, Holly (Fireside Girls) and Coltrane are African-American, Stacy and her sister Ginger (Fireside Girls) are Asian. The show in general obviously tries to be very cosmopolitic.
* Baljeet is represented by circles and Buford is also represented by rectangles, but this doesn't pop up as often as the others, appearing only in the credits of "Tip of the Day".
* Baljeet says building a portal will take at least a montage. It ended up only taking a scene flip.
* Balkan countries such as Bulgaria and Serbia underwent this in the Middle Ages, too. The Second Bulgarian Empire had various nobles secede since its (re)creation, culminating in what a visiting German chronist called "a thousand Bulgarias": the main kingdom (based in Târnovo, the traditional capital) given to the heir apparent, a province with a long history of secession (Vidin) given as a consolation prize to his disinherited older half-brother, and a despot seceding the Eastern province (Dobruja). The Serbian Empire fragmented into about ten fiefdoms shortly after the death of the ruler who carved it out, Stefan Dušan. All this fragmentation and infighting made the Balkans easy targets for the Ottoman conquest.
* balkanization makes it easy to speculate that the reunification of the Earth Kingdom likely wasn't gentle.
* Balkanize Me: Alternate history where large real-life nations fragment into lots of smaller ones.
* Balkanize Me: A real country gets divided into smaller countries following a major war or other great political upheaval.
* Ballada o Bombere (2011), Linko has to denounce, then shoot a fellow prisoner before he's allowed to join a collaborationist police unit. The German officer in charge says it's the first time he ever saw one of them not hesitate to kill a man for a bowl of soup (the unit gets better rations than the other Soviet POW's).
* Ballad Of A Shinigami: Since the dead can't cry, Momo cries for them.
* Ballad Of A Shinigami, though the two series portray them quite differently.
* Ballad of Solar." That's literally their excuse. "I'm too tired to move without my wine." "I'm too tired to move without my energy potion." It's not even

disguised.)
* Ballads of the Green Berets album is an album of songs about war in general and Vietnam specifically, many written or co-written by Barry himself.
* Ballance ballances, er, balances the two extremes of the paper and the stone form: it's light enough to be easily maneuverable, but heavy enough to manipulate some lighter mechanisms and move most obstacles quite easily.
* Ball and Chain, everybody! This is a case where it isn't remotely intentional on either side. Edgar and Mallory have been married for three years, and every day is a struggle for both of them. "It's like some crazy dance that we can't learn... and we can't stop. Marriage. The Dance of a Thousand Cuts." They spend most of the series on the brink of divorce, going through several degrees of separation before ultimately realizing that they absolutely need each other.
* Ball and Chain is about a marriage on the rocks. A couple that can't seem to get along. But Edgar and Mallory show that they really care about each other occasionally. When Edgar thinks he's going to die, he narrates that you're supposed to see your life flash before your eyes... but all he can think of is Mallory. When Mallory thinks Edgar is dead, she weeps bitterly and says that he was everything to her.
* Ball and Chain is about a married couple whose powers only work when they're together and are triggered by their physical contact. The problem: they were splitting up when they got said powers and have a lot of trouble cooperating. Secondary problem: Neither of them is aware of this caveat for a while, meaning that when Edgar ("Ball") gets ambushed by bad guys, he thinks he is going at them with superpowers that are waning rapidly.
* Ball and Chain — Sunil Malhotra's and Lisa Ray's characters are forced into an engagement by their parents. They do all they can to sabotage the relationship, which is cool until realize they may have feelings for each other. By this time, Lisa Ray's character is engaged to someone else.
* Ball and Chain's Nihilist Greg is a reasonably benign example, played for laughs.
* ball/bawl: a ball is a spherical object (and often part of a compound noun like "baseball" or "basketball"), or a fancy dress party, while bawl is a verb meaning 'to cry noisily'. "I bawled my eyes out when they hit me with that ball of snow. It ruined the gown I had bought for the winter ball."
* Ballerina Mafia, and one of the differences is that BM Joel is actually Julia.
* Ballerina Mafia where roommates Immy and Shugwar are complaining about each other's annoying habits, like leaving out dirty dishes, or not cleaning up the Shub-Niggurath sacrificial site.
* Ballerina: Once per day, one of the girls trying to get a role in the opera must leave the tests. Félicie would be out during the first day if not for the fact one of the other girls got stuck while performing a move.
* Ballerina, the main character learns ballet through doing housework with various unusual poses and steps. (This is largely out of necessity - she and her trainer are both dirt-poor and employed as cleaners, so they don't have access to better equipment and the housework needs to get done somehow.)
* Ballerina, Victor tells Félicie that he has a brilliant plan to escape from the orphanage, a plan so "A" that they don't need a plan B. When things start going wrong, the two start running together, him shouting that they need to activate plan B. Of course, she has no idea what this is.
* Ballerium was an MMORTS developed by Majorem, with beta testing in 2003-2004, to be published by Interplay. The game was cancelled in 2005, relaunched in 2007 by Sleepy Giant, and was defunct by 2008.
* Ballet Episode gave her "a role that was made for her". It's not until the end of the episode she learns that role is the moon.
* Ballet Mécanique includes parts for electric bells and airplane propellers.
* Ballet Shoes: A book about three adopted girls living in 1930's England. Together they are being trained in dance, with varying degrees of success. The youngest sister Posey is the daughter of a ballerina, who gave her up to focus on her career. She's the one of the sisters that have the most success.

* Ballet Shoes herself — she's Russian-Armenian, and speaks Ukrainian with a heavy Russian accent. Her hairdo is an attempt to distance from her roots and lure hardcore Ukrainian nationalists to support her.
* Ballet Shoes, where all three Fossil sisters go on the stage to earn extra money for their family. Pauline and Posy are happy to, loving acting and dancing respectively. Petrova meanwhile hates dancing and performing, and only does so grudgingly. Sylvia and Nana meanwhile want all the girls to be happy and understand when Petrova gives up performing for her preferred career of becoming a pilot.
* Ball Grill Police, they arrive from the woods to aid the policemen against Uncle Sam but are unable to do anything, as they are, well, invalids.
* Ball Index: When a character briefly acts inconsistently (referred to in these tropes as "holding the [trait] ball") for the sake of the plot.
* ballista. Apparently small riots can be cleared by shouting that Detritus is on his way.
* Ballistae, giant artillery pieces which allow you to drop heavy projectiles from long distance. They're their own unique class in
* Ballistae: Have the appearance of a giant crossbow but use torsion rather than tension energy to power their missiles. Often
* Ballista ensues with the two Mentats squaring off against one another, commanding the fleets. Ultimately, Albans proves to be the superior strategist. This mirrors their virtual match earlier when both of them are commanding fleets of hundreds of ships in a video game of sorts throughout the whole system, using gestures to give orders.
* Ballistic Discount: A villain steals a gun from a store and shoots the clerk.
* Ballistic: Ecks vs. Sever, Sever (Lucy Liu) faces Ross (Ray Park), each armed with automatic weapons. They slowly approach each other, then start tossing their weapons to the ground, so they can knife fight, and then eventually fight hand-to-hand.
* Ballistic: Ecks vs. Sever the big bad tricks a lackey into killing himself by giving him a backwards firing pistol. More of a loyalty test with a built-in punishment, since he was told to shoot himself with it.
* Ballistic: Ecks vs. Sever. The title is, in fact, a complete lie, as they fight each other in one scene and spend the rest of the film fighting other people.
* Ballistic: Ecks vs. Sever was filmed in Vancouver and acknowledges its setting as Vancouver, yet all of the characters are American and it makes little sense for them all to be in Canada.
* Ballistic Kiss, a movie about an elite hitman named Cat. One of Cat's targets tries to flee after witnessing Cat slaughter all his guards, but Cat catches up with him, blocks the elevator when it's doors are two inches from closing, and sarcastically asks why isn't he practicing the common courtesy of holding elevator doors open. In the next scene, the elevator door opens to reveal the target dead and Cat smoking a cigarette over his corpse.
* ballistic missile submarine, basically by flying it across the Iron Curtain.
* Ballistic missile submarines have able to launch from below the surface since 1960 and no modern boomer uses surface launch.
* Ballistic missile submarines take the concept to an extreme, in that they are armed with enough nuclear weapons to vaporize a small country, though are virtually incapable of defending themselves if detected.
* Ballistic reentry is in fact the normal reentry mode for Soyuz capsules, it's just not normally used because of the excess stress it puts on the crew. Soyuz's heat shield is massively over-engineered so it can withstand most conceivable reentry angles.
* Ballmastrz: 9009 are frequently injured or killed, but this just results in them getting sidelined while they're healed by the slime secreted by B.E.H.O.s (Biologically-Engineered Healing Organisms).
* Ballmastrz: 9009: The Leptons are bar none the worst players of The Game, and most of the first season is them either getting curb-stomped by another team or nearly winning and throwing it away at the last second. They avert it at the end of the season when Gaz unintentionally gives them a boost in confidence needed to

defeat her former team.
* Ball of Fire a burlesque dancer (Barbara Stanwyck) who needs to hide out from the law winds up staying with a bunch of professors (it's a long story). When the younger, handsome professor (Gary Cooper) decides that it's time for her to leave, she pretends to be in love with him. Naturally, it happens for real.
* Ball of Fire during her shotgun wedding to the gangster she was desperate to elope with and realises that she has feelings for the shy English professor Bertram. Her boyfriend doesn't believe her, so she lists all the little things she finds cute about Bertram, from his waistcoasts always being misbuttoned to his naivety towards love, seen in the scene when she kissed him three times and he ran out of the room flustered.
* Ball of Fire's singing on "Drum Boogie" was dubbed by Martha Tilton.
* Ball of Light Transformation: Transformation into a luminous form shaped as a flame, orb, star, mote, etc.
* Ballonflucht, in which two families escaped in a hot-air balloon they had assembled in their attic with a burner and basket they had built entirely from scratch. Their flight lasted 28 minutes, but it was enough to get them into the West.
* Balloon Belly hang out in public. A disgusted fish shouts "Dude, put that away! There are children here!"
* Balloon Belly: Overeating causes a character to have a huge, round belly.
* Balloon Belly: Overeating causes a person to have a huge round belly.
* Balloon Belly: When someone's belly grows in a short amount of time.
* Balloon Boy is a childlike animatronic who looks like a clown due to his red nose and cheeks, big smile, and colorful clothing. He also has the ability to interfere with the protagonist's various gadgets.
* Balloon Boy" when asked why he didn't come down from the garage when called.
* Balloon-Bursting Bird: A balloon pops after a bird pecks at it with its beak.
* BalloonFight, a Nintendo-produced game which takes heavy inspiration from Joust, has white-balloon enemies, cyan-balloon enemies, and yellow-balloon enemies, in order of difficulty and points earned.
* Balloon Fight, except with kids and... bird thingies flying using a pair of balloons.
* Balloon Fight fittingly plays this sound when a player falls to their death.
* Balloon Fight. The fish also occasionally eats any defeated enemies.
* Balloon Fight, there are actually stars indicating it's night for the entire game.
* Balloons are bomb-toting skeletons in hot air balloons that drop bombs on defenses. They're slow at attacking, but only anti-air defenses can hit them.
* Balloon Shop made good use of this trope in both "The Sargentos" and "The Masked Avenger": In The Sargentos, Olan is overjoyed about the spaghetti that his chef has prepared for "Chris" that he lets out a long shriek similar to the most annoying sound in the world. In "The Masked Avenger", Senor Ortiz's bodyguard adds short bursts of "Oh no!" into the dialogue, at random, finally, he lets it all go for a full 13 seconds. Even Senor Ortiz is a little weirded out.
* Balloon started out as just a character who gets killed over and over, but by Episode 4, he started to gain more of a prominence to the story instead of just a gag.
* ballot/ballet: "They used a ballot to determine who was the best ballet dancer."
* Ballot Box Bunny" involves Yosemite Sam rigging a piano rather than a xylophone.
* Ballot Box Bunny", while drinking from a can of carrot juice, Bugs Bunny is listening to mayoral candidate Yosemite Sam give his stump speech:
* ballot-stuffing.'s IMDB score jumped up from averaging 2/10 to averaging 8/10 over the course of thousands of breathless, copypasted, 10/10 reviews (it's since dropped to 6.2/10). IMDB listings that filter out clear bot or troll accounts (for instance, accounts that have only reviewed one film), such as the Bottom 100, show it holding steady at 2.5/10.
* Ballpoint Universe Infinite: The Logicians are doodles that work on pure logic. Because they are so efficient, in trying to fight them, enemies usually also become

Logicians.
* Ballroom jeans shows a large man squatting in a competitor's brand, and singing soprano while doing so.
* Balls, balls are so much fun! That's why I have two and not just one!
* "Balls" Gag: A joke on the fact that the word "balls" can be slang for testicles.
* Balls Mahoney Still, he made sure to let everyone know, even if it was just with the horn gesture.
* Balls of Fury: In a brief scene, a team of soldiers attempts to break through an armored door with a battering ram. Another soldier off to the side simply takes his gun and smashes through the window right next to the door.
* Balls of Fury, Randy gives his master a gift. He vigorously shakes it before Randy has a chance to tell him that it was a new lucky cricket, which is now dead.
* Balls of Fury standing between her group and their escape route, only to have him gather himself and give her a look that seems to imply a serious ass-kicking is about to commence. Then, he falls over.
* Balls of Fury when a greatly feared ping pong champion turns out to be a cute little Chinese schoolgirl, but the hero easily crushes her and laughs in her face, causing her to cry.
* Balls of Steel depicts a giant scorpion interrupting a human sacrifice ritual.
* Balls of Steel has spiders scurrying around the playfield, as well as a black widow's web at the top of the table.
* Balls of Steel requires the player to collect Air, Earth, Wind, and Fire elements.
* Balls of Steel: The "Devil's Island" table is filled with erupting volcanos, cannibalistic natives, deadly spiders, and giant scorpions.
* Balls of Steel usually when the player hits one of the wandering playfield enemies with his pinballs.
* Balls of Steel who pretended to be this to "get back at the white man."
* Balls Out Bootleg Edition shows a head being used a bowling ball. This doesn't occur in the actual film, which instead has the victim's head get shot out of a ball return.
* Bally And it worked, becoming the fourth-best-selling table of all time.
* Bally depict robots on the playfield with transparent skulls, with their organic-looking brains clearly visible inside.
* Bally has a variation, with two women representing "Love" and "Evil" on the backglass behind Tommy Walker.
* Ballyhoo, and you need a ticket (and a character configuration) to get through. Once you get a ticket, you'll have to punch out a blue dot (for male) or a pink dot (for female) before you can insert the ticket there. Whichever dot you punched out becomes the correct answer.
* Bally includes the Golden Cliffs, and reaching the summit scores the Cliff bonus.
* Ballykissangel for its final series, actor Tony Doyle had died. Rather than kill off a main character offscreen (because theirs was a milieu where Death Is Always Big Onscreen Drama) they concocted a bizarre storyline in which his character, Brian Quigley, had become a fugitive from a federal tax evasion charge and had fled to Brazil. If he ever returned to Ireland, he'd spend his retirement in the pokey. When the plug was finally pulled on the programme, Brian was (apparently) still alive and living in Rio, but Tony was still beyond waiting for his cue.
* Ballykissangel. Midway through Season 3, it took a turn for the soapy.
* Ballykissangel where a man and a woman run towards each other across a grassy meadow. When they meet the woman suddenly punches the man in the face.
* Bally/Midway players periodically stop the pinball game to play a primitive maze game, using the flipper buttons to move Pac-Man (a flashing yellow light) around a grid. It's as exciting as it sounds.
* Bally/Midway's has a pink diamond in the center of the maze in the Tanks mission that would teleport your tank to a random location.
* Bally/Midway's has a Tank mission as one of its four minigames where you drive a tank around a maze shooting at other tanks (and in some levels, Recognizers).
* Bally, people plug wires into jacks in their heads to interface with the titular

supercomputer.
* Bally pinball feature images of the magazine's diminutive "Femlin" mascot all over the playfield.
* Bally pinball features Hugh Hefner and real-life playmates Patti McGuire and Sondra Theodore.
* Bally pinball has the number five as a recurring motif — there are five keys to Hugh Hefner's grotto, five knockdown targets to hit, and five Playmates to collect.
* Bally pinball includes the magazine's tiny "Femlin" mascot straddling a champaign bottle between her legs.
* Bally pinball plays a short version of "Rock and Roll All Nite" when starting a game, and ends the game with a tinny version of "Shout it Out Loud".
* Bally pinball shows the title character in her bedroom, handing over a secret map with one hand while discreetly clutching a small dagger in the other.
* Bally pinball, which depicts the title character as a seductress and German spy.
* Bally requires the player to get the three Elements of Coolness (a Magnetic Personality, the Heart of Rock and Roll, and the Gift of Gab) three times before starting multiball.
* Bally, roll over the flashing button switch at launch to score 1,500 points and knock down one of the four side drop targets.
* Bally's boasted that 49 patents were made specifically for the machine. Like with Williams, they have also since expired as they have not been renewed, allowing other companies to use those mechanisms. That being said, some of them were not very well-liked, like the pulsating magnets throwing the ball in random directions, so no one else wanted to use them anyway.
* Bally's has "Space Station Ko" on the playfield, with the three bumpers representing connected pods.
* Bally. Since the home versions reused the same playfield layout and components, they ended up having completely different playfields, rules, and artwork from their original namesakes.
* Bally's pinball has Spock wearing a green full-body jumpsuit on the playfield.
* Bally's, the left triangle bumper had a picture of a female crewmember sitting down with her bare legs prominently shown.
* Bally; the backglass shows Tommy's mother Nora with a heavy silver ball shackled to her ankle reading "Tommy."
* Bally; the Centaur appear to be grown from pods, including their motorcycle parts.
* Bally. Unfortunately, cerebral logic puzzles and arcade games are two great tastes that don't necessarily taste great together — of the 994 machines produced, fewer than five hundred were sold, and the others were scrapped or salvaged.
* Bally voices him instead, and could very well be front and center on the backglass as well.
* Bally, where the only ties from the game to the television show is the backglass art and a single picture of Lee Majors on the playfield.
* Bally, where you challenge the Fire Gods in pinball using fireballs.
* Bally, which uses blue plastics and lights to give a futuristic Tron Lines-style aesthetic. Some collectors modify their tables with blue LEDs to further emphasize the effect.
* Bally-Williams popping up as competition, meaning Stern no longer had a monopoly, but that didn't happen until 2011.
* Bally. With millions of dollars in pre-order money collected and little results since 2011, he has been accused of defrauding customers.
* Bally, with revised rules, updated artwork, and changes to some of the game hardware.
* Ballz had plenty of innuendo to do with their title, in the tagline ("To be the champion, you gotta have Ballz!"), advertisements ("Tell Santa you want to have Ballz for Christmas"), manual, and even the suggestive opening theme.
* Ballz has the juggler in the PF.Magic logo turn into the game's final boss,

Jester.
* Bal Malogmer Vivec. The quest giver asks that you secretly return it along with a note of apology.
* Balon bitches and moans incessantly about his losses, even though his belief in the Iron Price means everything he lost was taken fairly because he wasn't strong enough to keep it. He's also fond of referring to northerners as a bunch of soft girly weaklings, even though they've
* Balon Greyjoy favors Yara over Theon because Theon spent half his life as a hostage of the Starks. She's the only person he seems to show any affection for. Most of Theon's poor decisions are motivated by a desire to earn his father's respect.
* Balon Greyjoy is one of the eponymous monarchs in the War of the Five Kings. He barely has any time interacting with the POV characters, and appears in only small parts of two chapters in the second book, and doesn't reappear before dying off screen in the third. However, his decision in the second book to go to war with the North rather than joining them effectively ends the chances of
* Balon Greyjoy's response to Robb's offer of alliance is to proclaim that "No man gives me a crown. I pay the iron price."
* Balon passes up a golden opportunity not only to become a King of the Iron Islands again and gain complete independence for his people,
* Balon's son Theon doubles down on this by sneakily capturing Winterfell with only a few men. However, as is pointed out to him, he is too far away from the coast for resupply and reinforcements and holding a city that gives the Greyjoys little of strategic value.
* Baloo and Bagheera actually do this with Mowgli near the middle of
* "Balooest of Blues" has a variation; Baloo inherited a gigantic mansion, including a butler and cook. He stays the night with his friends, only to constantly feel like statues suddenly turned his way, images looking the other way and sometimes signs of assassination attempts such as axes or arrows being dangerously close to his head once he turns around. He switches rooms with the others multiple times to ensure he is just imagining things which doesn't help. Nobody believes him until he actually ends up injured.
* Baloo got buzzed himself once in flight and was not happy about it, especially when he found out who he'd just been buzzed by,
* Baloo in the books is a serious law teacher. In the Disney film he became the exact opposite, a lazy, fun-loving character who loves to sing silly songs, including a
* Baloo is known to do this literally, using his propeller to trim hedges at times, as seen in the show's opening, upside-down, no less.
* Baloo is revealed in one episode to be poor at spelling, and in a later one that he never even finished primary school. He is, however, a top-notch pilot and is capable of coming up with some cunning strategies when dealing with the various villains in the series.
* Baloo's pal Louie has an aunt who, in "The Ransom of Red Chimp", is abducted by Don Karnage... and proceeds to drive him up the wall when she
* Balrog used to be in professional boxing until his ruthlessness got the better of him and killed one of his opponents. This got him banned from boxing and became an enforcer to Shadaloo.

* Bal-Sagoth. Look at "The Splendour of a Thousand Swords Gleaming Beneath the Blazon of the Hyperborean Empire":
* Bal-Sagoth put to heavy metal. And their name is from a Howardian story.
* Bal-Sagoth's "Return to the Praesidium of Ys" has one where the narrator tells his love interest to stay with him. To put it on perspective, he is Zurra, a demonic demigod responsible for the destruction of entire civilizations, lord of the denizens of the Black Galaxy and a being capable to stand his ground against some of the major powers of Bal-Sagoth-verse, yet by the end of the song his tone is one of someone begging the Sylph he is in love with

* Bal-Sagoth tell a lot of original stories in their songs. Many of them end in a
* Bal-Sagoth, we just woke up Cthulhu." This is all the more impressive considering that (actually) awakening an elder god would crush the mind of anyone near it, then plunge the Earth into a neverending night.
* Bal-Sagoth worked this into musical form in their song "To Dethrone the Witch-Queen of Mytos K'unn (The Legend of the Battle of Blackhelm Vale)" on their album
* Baltar, desperate to get any hint of involvement in the Cylon attack off himself, randomly picks someone who was standing on the bridge as being a Cylon. Guess what?
* Baltar is visited by vivid sexual hallucinations of Number Six, and later in the series another Six experiences hallucinations of Baltar.
* "Baltar's Nymph Brigade". Note that by the final season, he had gained an
* Balthasar Gelt, Supreme Patriarch of the Imperial Colleges of Magic, wears a Greek-style gold facemask at all times. As a master of the Lore of Metal it's a reasonable enough affectation to adopt for him, but since he also wears thick robes, gloves and boots at all times, speculation is rife as to what exactly it is he's using the mask to conceal.
* Balthazar saves Castiel from Raphael with Lot's salt in "The Third Man."
* Balthazar was also often this. A good example in "My Heart Will Go On" when he explains to Sam and Dean that he
* Balthazar (who is the only one who can resurrect Bhaal), and then kill himself, ensuring that Bhaal's chance to return dies with him. The player has no choice but to fight him, and he verbally regrets the player character death as a "necessity."
* Balthier can also be heard snarking calmly when he's knocked out in combat:
* Balthier sends one to the Magical Girls Sisterhood courtesy of Tron, and they send Sayaka Miki and her familiars to aid him.
* Balthromaw is still interested in soul-bonding with Rick and/or Morty after the adventure is complete. However, Rick
* Balthus and Hilda's paired ending, in which Balthus has to defeat Hilda's older brother Holst in order to obtain Holst's blessing to let Hilda travel the world with him. Keep in mind that Balthus and Holst are best friends.
* Baltimore, and how the flag over Fort McHenry was still defiantly waving over the fort the morning following a night of shelling by British warships. During the Civil War, the forts' cannons were actually turned on the city, which had southern sympathies, to which the citizens of Baltimore got the message and never tried anything against the Union.
* Baltimore and Washington, D.C. It's common for Baltimoreans to have chips on their shoulders about DC. In DC, by contrast, some people show how PC they are by saying nice things about Baltimore, while most people need to be reminded that Baltimore even exists.
* Baltimore, covering pretty much all of Russia, Scandinavia, the Middle East and Northern Africa.
* Baltimore, Maryland: Ebonics and Greek, to a lesser extent. Italian used to be spoken in this city but the local Mafia presence is now non-existent.
* Baltimore, or The Steadfast Tin Soldier and the Vampire starts in the trenches of WWI, when the protagonist is attacked by vampires, their bloodlust awakened by the slaughter. Eventually, the war is inconclusively brought to an end by the outbreak of a supernatural plague. The comic book series that follows after reveals other... unusual occurrences.
* Baltimore Sun staff in Season 5, after they miss Clay Davis' perp walk.
* Baltimore) to be a young Hitler. Most readers won't realize this at first because he has a different mustache and name.
* Balto — and the nearest rail station is 600 miles away in Nenana. A sled dog team is put together to retrieve the antitoxin, but as the weather worsens the team becomes lost. Canine hero Balto sets off through the terrible snowstorm to find the lost sled dog team and lead them back to Nome safely.
* Balto, a direct-to-video sequel, has Balto's daughter fulfilling this role.
* Balto appeal to fans of cartoon dogs, adult furries, fans of 2D animation, and nostalgia lovers as well as children.

* Balto are afraid to go in the water. They mention that it's the reason they are shunned by the other polar bears.
* Balto are also often mistaken for Don Bluth films, in no small part for being Universal productions (which also distributed Bluth's more beloved works) and actual similarities in character design.
* Balto begins and ends with live-action sequences, where a grandmother is explaining to her granddaughter about the diphtheria epidemic in Nome, Alaska, and how it led to the 1925 dog-sled serum run. The end sequence, where they visit the statue erected to honor the dogs who heroically brought the medicine the town needed, reveals that the grandmother is actually Rosie, the little girl who almost died.
* Balto Futureshock, Tina was genetically altered to be super smart but she still knows how to kick butt is need be.
* Balto gives us Steele: he routinely antagonizes Balto whenever he has the chance and takes extra measures that nobody else but him wins the praise and glory of retrieving the medicine to keep his ego pacified.
* Balto himself is absurdly tame and well-mannered for a feral wolf-dog. The
* Balto II: Wolf Quest, Balto hates it when his children are threatened.
* Balto II: Wolf Quest, Balto is reluctant to give his and Jenna's puppies up for adoption. He discusses his feelings with her while said puppies and Boris the snow goose are playing in the background.
* Balto II: Wolf Quest, Balto's daughter Aleu is noted as being more wolfish than even her father. Considering that she's a second generation wolf-dog (and her mother is a purebred Husky), this is very unlikely. Her fur color isn't even wolf-looking: she has brown fur and blue eyes.
* Balto II: Wolf Quest comes to her rescue. After trying and failing to fight the bear, Aleu realizes that the bear is a spirit guide and discusses the trope with Balto, explaining that the bear was attacking them in order to get them in the right direction of their quest.
* Balto II: Wolf Quest to get any significant screen time. All of the other characters from the first movie who appear at all only do so for a few scenes at the beginning, including Boris and Jenna.
* Balto II: Wolf Quest: When Aleu was about to find her way out after getting slammed by the iceberg, she got herself stuck between the ice glaciers. Luckily, She managed to squeeze through and swam to the surface where Nava was.
* Balto, in which sled dogs helped transport vital medicine to Nome, Alaska to save the town from a diptheria epidemic, with the title character ultimately getting them home. In real life, Balto only ran the last leg of the race (and it wasn't even particularly long compared to what some of the other teams had to endure). For that matter, the real Balto was a purebred Siberian Husky, whereas his animated counterpart is a Wolf-Dog.
* Balto is about Balto and other sled dogs proving their worth when air mail threatens to make them obsolete.
* Balto, leading to a whole speech about the "shame of the polar bear that fears the water".
* Balto, Nikki and Kaltag are eager to see Balto and Steele fight for the medicine. In spite of them helping Steele bully Balto earlier, their amusement turns to genuine concern as Steele uses very dirty moves to get the upper hand, resulting in Balto getting a nasty bite wound. They then become very shocked when Steele carelessly knocks the medicine sled down. After the fight, they and Star decide to abandon Steele and follow Balto.
* Balto of the mess, which, again, the other dogs in Nome eat up. Unlike Gaston, however, he ends up being found out for the monster he is and ultimately shunned by the rest of the town.
* Balto on Jenna, who doesn't reciprocate the sentiment and shows more interest in his rival, Balto. Needless to say, he doesn't take it well.
* Balto Star sneezing at the worst possible moment nearly buries the sled team in an avalanche.
* Balto starts out as a rude, arrogant and egotistical bully who abuses Balto for

his part wolf-heritage and hanging out with Jenna. But when Balto takes his place as lead dog to deliver the medicine, Steele is so determined to stop him that he sabotages Balto's trail, clearly not caring about the poor sick children who'll die without the medicine. And he doesn't even shed even the slightest sign of guilt whatsoever.
* Balto, Steele falls off the side of a cliff while trying to kill Balto, hitting cliffs on the way down. However, he manages to survive and continue to cause Balto trouble.
* Balto: Steele is a malamute, not a husky. He gets mistaken for a large husky because his crush Jenna is one and because he has blue eyes (which are impossible in purebred malamutes).
* Balto that while Balto had rescued a town of humans from a deadly epidemic, he is still living as a stray and is still ridiculed by some dogs in the community.
* Balto, the characters are walking through a vast snow field, and one of them says, "I spy with my little eye something beginning with S."
* Balto). Unlike most other examples, it actually stops the sneeze permanently instead of resulting in a giant sneeze when the finger is removed. Not that it matters much since the cave-in is soon afterward triggered by the sled thudding hard on the cave's uneven icy floor.
* Balto: Upon being exposed as the dirty, callous liar he truly is, Steele tries to justify his actions, but the others won't have any of it and they storm out.
* Balto was made part wolf for his character arc. The real Balto was a pure Siberian husky.
* Balto, which would evolve into the 2D animation arm of DreamWorks (and was a semi-spinoff of Don Bluth's studio).
* Baltoy and Claydol are said to be figures created by an ancient civilization, which later came to life via mystical rays.
* Baltro is an example. It's a foot-tall demon with telekinesis (more specifically, it can telekinetically control anything that has a special kind of flower attached to it). So until its defeat at the end of the story arc, Baltro hides inside an enormous suit of armor that it controls with that power.
* Balzac and the Little Chinese Seamstress is about two college students sent to a remote village during the Cultural Revolution.
* Balzac Asimov later gains 360-degree Fermion Cannons in the shoulders of his Soltekkaman Mk.I
* Baman Piderman, Baman and Piderman's friends Pumpkin and Tuba... except they appear to actually be alive and at least as intelligent and Baman and Piderman themselves.
* Baman Piderman rarely uses the door, usually just smashing through the wall, and using that hole.
* Baman Piderman, the Happy Winter Friends' wish was inside him all along! (Like, literally, inside him. He had a drawer in his chest.)
* Bam-Bam & Celeste) non-stop. Finally, Celeste looks as if she's wet her panties and is trembling as she leans in to say goodbye to her. Lynch just says goodbye, and turns around to leave.
* Bam Bam Bigelow: Debuted in the 1980s, competed throughout the 1990s.
* Bam Bam Bigelow he was but he was not all that much taller or even sometimes shorter than a "smaller" opponent. He was often vertically dwarfed against other "big man" heel wrestlers in this era usually half a head taller than him or more.
* Bamber's mate and newborn cubs die at the start of the book, which leaves him the only survivor of his family. It's also implied that all the badgers in his glades were also killed by the mysterious poison.
* Bambi (2006) — 64 years, currently the record holder for the longest gap between films of a series.
* Bambi after she was crowned prom queen so she could pretend the story ended happily.
* Bambi, all adult bucks are "kings of the forest". What makes the Old Great King of the Forest stand out is his old age and aloofness. In the Disney film, Bambi is treated as royalty and his father is the Great King of the Forest.

* Bambi, all of the pursuing in their relationship, romantic and otherwise, is done by the latter. Bambi actually seems terrified of Faline the first time he meets her.
* Bambi and Faline fall deeply in love, but after they mate and mating season is over, Bambi begins to distance himself from her, though he still loves her in a "melancholic" way. This may be implied in the film, with how he is distantly watching from so far away while she gives birth.
* Bambi and Faline's dance of love through the clouds is rudely interrupted by another stag, resulting in a savage fight.
* Bambi and he leaves the forest with his father. What many people don't remember is the second half, in which Bambi returns to the forest as an adult and has to save the animals from a human-caused wildfire. If anything else comes to mind, Thumper reciting, "If ya can't say nuttin' nice...don't say nuttin' at all" is what most remember.
* Bambi And Her Pink Gun, which include a gang of smuggling truckers in rigs bigger than most battleships, a powerful mafia family, a posse of biker cowboys, a cyborg luchadore, and psychopathic rock star Gabba King.
* Bambi and her Pink Gun) who is obsessed with keeping her body "perfect."
* Bambi and many cartoons portray. Also, their incisors tend to be hidden inside their mouths, rather than sticking out like on a beaver.
* Bambi, as Friend Owl is explaining what "twitterpated" means, he startles Flower, who leaps into Thumper's arms. Thumper promptly throws him to the ground.
* Bambi at least once a month for poaching deer over the course of nine years.
* Bambi. A wild, giggly fawn that completely flips out from a simple, soft "Hello" from Bambi.
* Bambi, Donnie Dunagan, Cammie King and Peter Behn voiced Bambi, Faline and Thumper as children. All three were born in 1934 and the film was released in 1942. Young Flower too is voiced by a child but he went missing at the age of eight.
* Bambi: During Bambi's fight with Ronno, it's easy to tell who's winning by looking at the colors on their shadows and the background. If Ronno is winning, the background colors are dark green, blue and black. If Bambi is winning, the colors are yellow, orange, gold, and sometimes pink.
* Bambietta Basterbine has a habit of sleeping with a random mook, then killing him. Her comrades chew her out for this, saying it's a waste of hot guys.
* Bambietta invites a man to her room with the promise of sex. When he arrives, she cuts him in half after toying with his intentions. She views it as a type of destressing.
* Bambietta's gal-pals fit in here pretty well, too. Specifically Candice Catnipp, who fries
* Bambi, even though he wasn't wearing skates, had a hard time on the ice, despite the fact that other animals were skating around just fine.
* Bambi, Faline just stands against a rock wall and watches Bambi and Ronno fight over her. Justified as in real life, a doe would be fine with bucks fighting over her. Less so when she is utterly unable to do anything when the hunting dogs show up and corner her; in real life, female deer can give predators hell with their hooves, and she's roughly the same size as Bambi, who trashes them.
* Bambi gives more characterization but it's still a xenofiction work.
* Bambi has relatively far more extensive conversation scenes, though retains a larger amount of quiet, visual heavy moments than a standard Disney film.
* Bambi II however, the style is much more akin to Disney's Renaissance-era works that Deja's mainly did work for.
* Bambi II over the deliberate vagueness of the first film for natural perspective.
* Bambi II: Ronno, the bullying dear Bambi encounters, is the dear he fights as a stag in the original film. Following the encounter with the porcupine, Ronno tries to push Faline away as she protests, and they fight each other in a similar manner as they do once they're older.
* Bambi II there is a quick father and son bonding moment between Bambi and his dad, The Great Prince, when the latter blows a raspberry on Bambi's belly while they are rough-housing.

* Bambi In it, Bambi has a lunch date with Faline and planned to serve berries he worked hard to get for her, but an accident that ruins them, forces Thumper to create a fib for him and forces Bambi to improvise by replacing the berries with apples and calling them "Creamed Cherries", while continuously lying to Faline the whole time as she (seemingly) starts catching on to Bambi's ruse.
* Bambi involves Bambi growing up and meeting the inhabitants of the forest, until his mother is killed by hunters and he is taken off to be raised by his father. The second half involves an adult Bambi protecting the animals from a wildfire set off by the hunters, ultimately becoming Prince of the Forest. The 2006 midquel takes place between the two acts.
* Bambi, joined the Marines when he was 18, and, conscious of the prevalence of this trope in the military, concealed his voice acting past from his comrades for fear that if they knew, he would be forever known as "Bambi" Dunagan. (He said in an interview years later that, given how much the film has meant to so many people, he wished he had had the courage to tell them anyway and just put up with the inevitable nickname.)
* Bambi—but this time, the narration explicitly points out that it's the immediate spring and not a later one!
* Bambi Meets Godzilla: Bambi meets one of Godzilla's feet, the only part of Godzilla we get to see.
* Bambi Meets Godzilla the opening credits scroll while Bambi grazes innocently in a field. The credits finish, a giant foot of Godzilla squashes Bambi, and the end credits roll.
* Bambi, most notably shots of ducks swimming and a family of quails running from the rain in the "Little April Shower" number.
* Bambino is about a young, ambitious and hot-blooded Italian cuisine apprentice chef.
* Bambino maintain an amicable relationship as co-workers even after their divorce.
* Bambino that Ban (who knew nothing of their past together) thought they look good together.
* Bambi of a cheery song with chirping, dancing birds and flowers. Any grieving process Bambi might have gone through is kept offscreen.
* Bambi read-along book never mentions the death of his mother. Now, she COULD have died, but it just jumps from Winter to Spring and Bambi being grown up with no deaths. She just disappears.
* Bambi Ronno, love the expanded relationship between Bambi and his father, and enjoy the character designs, which are tweaked slightly from the first film to allow a more human range of expressions.
* Bambi's mother gradually grows more distant and snappish to him as she is weaning him, abandons him temporarily during mating season, and probably would have permanently left or eventually drove him off like real does do to buck fawns had she not been killed. This would have been weird to see if kept in the film, and perhaps would have lowered the impact of her death scene.
* Bambi started a forest fire by leaving his campfire unattended, nearly destroying the whole forest. A cut scene would've shown that "Man" was killed in the forest fire.
* Bambi story about Bambi trying to keep his lunch date with Faline from going awry.
* Bambi: Thanks to this film, many people refer to a baby deer as a "Bambi". The original story is also far more adult.
* Bambi. The 'advice' he gives Bambi and his friends is actually terrible advice to give to young animals. Fortunately, it mostly gets ignored once "twitterpation" sets in.
* Bambi. The film starts just after the death of Bambi's mother. The "There is Life" number shows winter slowly but surely melting into spring ending with a small sprout emerging from the melting snow. At the end of the film, the sprout is shown again, larger and with a new sprout growing entwined with it.
* Bambi, the first dub was made in Argentina (1943) and the second was done in Mexico (1969). Only the Mexican dub is currently available.

* Bambi - the only overt fantasy moment in an otherwise realistic story.
* Bambi: These are the last words Bambi's mother tells him as they try to evade a hunter's bullets.
* Bambi they are first cousins through their mothers. Disney made sure to not mention this in the film, making it vague if they're related or not.
* Bambi, they fall in love with each other and the film ends with them having twins.
* Bambi. This actually led to an urban legend that Gaston supposedly killed Bambi's mother, although both films take place in different locations.
* Bambi, this happens to the title character as well as his friends Thumper and Flower when they get "twitterpated" by their respective female mates. Unfortunately for Bambi, his catatonic state gets rudely interrupted by Ronno, a rival male deer who challenges him for Faline.
* Bambi: We don't actually see Bambi's mother getting killed by the hunter. We just hear a gunshot after Bambi runs away, and later his father tells him that his mother "can't be with him anymore". Interestingly, the hunter himself is never shown in the film either.
* Bambi, when Bambi's mother is killed by the hunters, we actually do not see her dead body once Bambi realizes that she is dead. However, we do get to see a quail bleed to death later in the film.
* Bambi: When Bambi tires of Faline's pranks he gives out a "You!" and chases her.
* Bambi, which shown that following the death of Bambi's mother, the Great Prince mellowed his aloof demeanour and formed a very close loving bond with his son.
* Bambi, with development starting in 1936, but production went slower than expected as animators struggled to get the realism Walt wanted for the film. By the time it was released in 1942, three other features had premiered in the meantime.
* Bambi with more cute banter, though even then it follows the unexpectedly dark construction of the original far more than nearly any of the film's copycats did within that time.
* Bamboo Blade Azuma Satori had to give up kendo and can't join the team. Saya's teammates, unimpressed with her tale, all rate her story a 3 out of 10.
* Bamboo Blade has Kirino, who is often thought of as this by her teammate Saya and Coach Toraji.
* Bamboo Blade is definitely a bit more than just friends with kendo-captain Kirino. It doesn't appear to be mutual, though the two get along extremely well regardless.
* Bamboo Blade Kirino Chiba's concentration by tripping her, even after her coach (who also serves as the referee) warns her before the match to avoid using dirty tricks. Ando winds up losing the match anyway, as Kirino gets a second wind and finds a way to outsmart her.
* Bamboo Blade lose a bout, and not to an adult but to a girl her own age. He feels losing to an equal can teach things that no victory can. Ishida-sensei starts trying to get the team into tougher and tougher bouts in part to give Tama a chance to face others of her own level.
* Bamboo Blade manga, her father wastes no time in breaking out the photo album, much to Tama-chan's chagrin. Then he brings put the video of her bathing as a child...
* Bamboo Blade — Toraji "Kojiro" Ishida, for the Muroe High School kendo team.
* Bamboo Blade named "Bureiba" in order to fulfill his kendo team's five-member quota, his old mentor (who coaches Machido High School's all-girls team) isn't fooled, and notices during a friendly match with Kojiro's team that Tamaki's and "Bureiba"'s fighting styles are similar. After challenging "Bureiba" to an impromptu match (and losing handily), he states that he knew all along, but lets it slide because it was just for practice
* Bamboo Blade, never managed to win, and therefore never confessed his love.
* Bamboo Blade's teacher, Toraji-sensei, uses her position as the superintendent's next-door neighbor to get him fired.
* Bamboo Blade. Tamaki mentions the strongest kendoist she's ever seen, and her

teammates assume she's talking about her father, but she actually means her mother.
* Bamboo Blade: The first sequence where the Kendo teacher is driving his car is CG'd to the point where it looks like it came out of something else entirely.
* Bamboo Blade, there is a scene where Dan and Miya do this to each other (one of them using chopsticks, the other fork) in the schoolyard during the lunch pause.
* Bamboo Blade: Toyama and Iwasa, who were tormenting Dan in the first episode, prompting Tamaki to come to his defense and join the Kendo Club.
* Bamboo Blade Ura Sakaki. The story ends right in the middle of the match, without revealing who won. It's more hopeful than most examples, because what matters isn't who won the match, but that Tamaki and Sakaki finally have proper rivals to test their skills against.
* bamboo cannons. However the villagers ignore the law anyway (and due to the proximity of villages from the main towns and cities, law enforcement is often lax) and still make them, and disaster often follows when they're used. This is why TV stations in the country airs depressing PSAs about the dangers of the weapon during the season.
* Bamboo Pen & Touch Comic Edition pretty much covers the entire front with cartoony stuff with only small bits of white background showing through.
* Bamboo Technology: Everything is made out of what you'll find in nature.
* Bamboo Technology: Surprisingly functional facsimiles of advanced technology cobbled out of naturally occurring junk.
* Bamboo Technology wooden prosthetic arm. However, in the manga, she has no such replacement.
* Bamboozled, hoping he'll get fired. Instead of the show offending people, it becomes a huge hit making the producer rich, much to his shock and disappointment.
* Bamboozled shows how far African-American portrayals on television can really go, and how television network executives will do anything to keep their ratings up, at the cost of racially exploiting and ruining the lives of others.
* BAMF Girls' Club gives her one day before she'd crack. And then she starts watching Hermione around with a bowl of popcorn.
* Bam grew up in a cave before he met Rachel. That is all we know about his past. Nothing about his parents, nothing about how he got there.
* Bamides,, are much more akin to Humongous Mecha, standing at over 11 meters. That said, they also ignore most of the human element, being more akin to giant tanks with vaguely leg-like hover systems.
* Bamimation, a cartoon starring and created by Bam Margera, was pitched to MTV in 2006.
* Bam Margera and his crew used a crane to drop a piano that needed disposing on an episode of
* Bam notices. At one point, he masters a long list of martial arts by letting their practitioners beat him up. Another time, he has difficulty learning a powerful new Shinsu attack because his teacher is afraid that if he'll actually use it on Bam, he might kill him with it, so he has to actually just teach him. Then again, another time Bam is able to partly learn a difficult tehnique after just seeing it rather than being hit with it. Maybe being actually hit with the technique just makes it even easier.
* B&Q, a hardware chain in the UK, ran a radio advertising campaign with E. Grieg's "Morning" from
* B&W Felix the Cat cartoon, which has the bulk of the cartoon centered on a baseball game.
* Bam saving Rachel from Hoh by using a technique he just saw pushes the latter off the far end.
* Bam says he would never betray anyone because Rachel taught him it's wrong with great emphasis.
* Bamse: Averted with Jansson. While he can be harsh and mischievous, he's actually very nice.
* Bamse characters fit into this in Vargen's sad backstory. The first one is a lady, who recognizes the very young Vargen as the boy, who helped a gang of thieves with stealing her purse, so she calls the shop where Vargen works and gets him

fired. And there is also the shop-keeper himself, who tells poor Vargen "once a thief, always a thief" before he fires him. None of these two characters had more than a few lines, but by refusing to give a young orphan a second chance, they were the ones who made Vargen become the most infamous criminal in the area, until Bamse was able to make him reform many years later.
* Bamse got an alarm clock like this. And he always follows it (there has been only one exception).
* Bamse is this to a very literal degree. He's a brilliant inventor and tinkerer with numerous gizmos and gadgets under his belt, however, he outright refuses to move at a pace faster than a sluggish walk (with a couple of VERY rare exceptions where his friends' lives were in danger). He also has a great disgust for people telling him to hurry, even declaring the word "hurry" itself to be the most offensive term he can think of. To bypass these issues he invented a wheelbarrow on legs that he rides in whenever he needs to move fast or go far. His biggest instance of sloth, however, is his crippling adherence to routines. He always carries around an alarm clock that rings to signal nap — or food time and will unquestionably obey it whenever it goes off, immediately dropping whatever he's doing to sleep or eat. There have been instances where he's ignored the clock, but they are vanishingly few and often involve his friends being in mortal danger.
* Bamse most commonly in that female characters tend to have much larger and detailed eyes than male ones.
* Bamse outperforms a passenger jetplane, the pilot and co-pilot wonder why they are having the same hallucination.
* Bamse's grandfather. His ship sank, and as a captain he saw it as his duty to see everyone else to safety before he himself left the ship. It's implied that he was the only one who didn't make it off the ship in the end.
* Bamse (Something smells — but what?) has Knocke and Smocke trying to drive out a just moved-in family of skunks. They get help from other characters by dressing up as Klansmen in white sheets, nighttime meetings, and carrying torches.
* Bamse: Usually, Brum's artwork is pretty cheery, but the trope was invoked in the story where he went through a "dark" period due to a rejection from a girl he liked and was promptly "discovered" as an artist.
* Bam/Viole is a FUG member. His motivation is not to destroy the tower, but because they threatened to murder his friends.
* Banacek, Banacek would gather all of the suspects together at the scene of the crime to explain how the crime was committed and expose the guilty party.
* Banacek have included a 3-ton sculpture and an immobilized DC-8 jetliner.
* Banacek (including Marge, the wife of the man he's supposed to help). Needless to say, he ends up looking like a dinosaur.
* Banacek: In "Fly Me — If You Can Find Me", Felix is attempting to break the world record for the tallest house of cards. The whole thing comes tumbling down when Banacek calls him, and Felix realises that he has built the house of cards over the top of the phone.
* Banacek: In "If Max Is So Smart, Why Doesn't He Tell Us Where He Is?", various flunkies are preventing Banacek from getting into a hospital room to talk to the owner of the stolen supercomputer. Banacek dons a white coat, picks up two bunches of flowers and waltzes into her room unnoticed. Bonus points for him proceeding to arrange the flowers in a vase while conducting his interrogation.
* Banacek involves Banacek investigating some sort of impossible theft; whether that is due to size (e.g. a 3 ton sculpture, location (e.g. a car stolen off a moving train), or security (e.g. a book from a sealed case ringed with alarm systems).
* Banacek, starring George Peppard, was about a freelance insurance investigator who specialized in impossible thefts. For example, one episode involved the theft of a 1970s room-sized supercomputer.
* Banacek; tracking down whatever esoteric piece of information Banacek needs to crack a particular. Interestingly, he is the only character who ever refers to Banacek by his first name.
* Banacek wasn't by any means a dud with girls, but he was often snubbed by dames

he attempted to hit on.
* Banacek were all 'impossible crime' thefts, including locked room mysteries.
* Banagher attempts this with Loni, but a combination of her deep-seated revenge issues and the Shamblo's malfunctioning psycommu renders it ineffective.
* Banahaw Broadcasting Corporation was a Philippine broadcasting channel from 1972 to 1986 when ABS-CBN was shut down under the Marcos administration. The former was in turn shut down when the latter was relaunched in 1986.
* Banana Bob, who is Banana Joe's father. Banana Barbara could also count as a
* Banana Equivalent Dose, since the typical banana, containing trace amounts of radioactive potassium-40, exposes its consumer to 1/10 of a µSv (microsievert) of radiation. A normal broken-arm X-ray, for instance, is 10 bananas worth of radiation, or 1 µSv. Its scientific utility is limited; its real purpose is to put things in perspective for the radiation-averse public.
* Banana Fish, after the latter tries to offer the former some sympathy.
* Banana Fish, Eiji was a talented pole vaulter until he suffered an ankle injury.
* Banana Fish has Dino resorting to recruiting ex-commandos who had seen action in Afghanistan as French Foreign Legion soldiers as a commando force to hunt down Ash and his allies.
* Banana Fish, some more ethnically diverse than others. In particular, protagonist Ash runs a gang that includes white, black, and Asian members, which is noted as being unusual.
* Banana Fish's protagonist Ash is a rare, intentional male example. He frequently uses his charm and good looks to seduce adults (usually middle-aged men) to get information out of them. It factors into his tragic backstory, as it stems from him being a former child prostitute and the sex toy of a mafia don.
* Banana Fish's short story "A Perfect Day for Bananafish", and the story itself is brought up early on.
* Banana Fish, who passed away in August 2018, while the show was still ongoing.
* Bananagrams sounds like a very strained pun on "anagrams", as the middle vowel of "banana" is lengthened.
* Banana in the Tailpipe: Blowing up a car's engine by sticking something in the tailpipe.
* Banana In The Tail Pipe: Lodging something in the tailpipe of a car.
* Banana in the Tailpipe using a literal banana (or similar blockage) in a car's tailpipe.
* Banana Joe actually weaponizes this trope in "The Inquisition", taking off his peel and using it to trip up the villain, who was trying to escape.
* Banana Ketchup, popularized in the Philippines as an alternative/substitute to Tomato Ketchup since
* Banana Kong telling he reached 370 meters. Sales exploded afterwards, even if the tweet was deleted.
* Bananaman, as a parody of the genre, naturally possesses one of these.
* Banana Man. As Eric eats a banana and undergoes his transformation, the banana peel magically disappears (possibly into his pocket).
* Banana Man, brings humor to the world by spreading peels aound and voilà, instant fun!
* Bananaman, Crow, has access to a device that can turn one of the two Bananamans into a banana, so he decides to test them with the trick question of “What’s heavier, a ton of lead or a ton of feathers?” One of the two answers that both are the same weight, while the other replies “What kind of feathers?”. Crow then zaps the latter, knowing that while the real Bananaman is a buffoon, he still is capable of successfully spotting such a trick question.
* Bananaman had the titular superhero busting a counterfeiting operation. At one point, he examines a counterfeit banknote and marvels that he'd never have been able to tell it was a fake — prompting one of his long-suffering associates to point out that it has a face value of £7.
* Bananaman: The bricks the eponymous hero breaks through in "Bananaman Meets Dr. Gloom" are clearly much brighter than the rest of the wall.
* Bananaman: The title character often enters Chief O'Reilly's office via smashing

through the wall. Became a Running Gag at times, such as O'Reilly preparing for this only for Bananaman to enter through the ceiling or floor instead.
* Bananaman with "the muscles of twenty men and the brains of twenty mussels".

* Banana-nana-Ninja!: Haiku Melon's episode takes place on a chain of floating islands on a distant planet.
* Banana-nana-Ninja!, is a banana who slaughters humans for eating bananas and other "innocent" foods.
* Banana-nana-Ninja!'s Feast Master story arc has Sudoku giving an infomercial-style riff about the Omni-Functional Kitchen Gadget on a colosseum big-screen.
* Bananananana Ninja since the voice actor sounds like he's hitting puberty.
* Banana Peel trick) to lift her up to the top floor of a tech institute, sneaks into the laser satellite control room (busting the door down with leftover band equipment), and hacks it to target the cats' DNA in the alley (which they left behind after licking everything).
* Bananarama. Roger takes over as dictator of a small Caribbean island.)
* Bananarama's cover of Shocking Blue's "Venus," repurposed for Gilette's Venus razors.
* Bananarama. With fire, a woman dressed as the devil, a woman with huge bat-like wings, a woman in a beret pushing a man from one table to another, the band dancing and singing, and all those different women being worshipped by men, and a woman in a wedding dress coming out of a casket, and with none of these different elements acknowledging each other, the video for "Venus" runs on this.
* Banana Republic: A fictional developing tropical nation, usually of Central or South America, populated by militias and tinpot dictators.
* Banana Republic names the country as "San Teodoro", at least in the English edition.
* Banana Republic of a Latin American country, usually portrayed as being poor and weak due to being ruled by a cruel and/or incompetent leader.
* Banana Republic, the objective is to pay off enough electors to become President of Banania. Now, the citizens of the Republic are used to corruption, but they're also very patriotic; if some muckraking journalist discovers that an elector has been paid with evil American dollars, as opposed to nutritious home-grown bananas, the elector will be forced to repudiate the bribe.
* Banana Republic with suspects of multiple felonies buying their way out of murders with a slap on the wrist, an income system that doesn't punish you for losing your health (when American health care is incredibly expensive) and allowing a single individual to somehow learn how to drive multiple vehicles on land, sea and air which in real-life only few individuals ever accumulate the required knowledge to do so, leave alone the proficiency which allows for vehicle stunts as the games invites you to do.
* Bananas, and interrogates himself, rushing in and out of the witness stand.
* Bananas, but not a single drop of blood is seen, because it would wreck the comedic mood the film is going for.
* Bananas, Fielding Melish cringes at the mention of the word "castration."
* Bananas: Fielding Mellish meets a political activist and makes a date with her. As he drives home he rehearses later conversation, finishing with "I think the greatest crimes are those against human dignity." and steps out into an open manhole.
* Bananas had both Roger Grimsby (of WABC-7 in NYC) and Howard Cosell (of Monday Night Football) making news broadcasts of a particularly idiotic nature.

* Bananas in Pajamas features this. With B1 narrowly missing B2 as they clean up the beach.
* Bananas in Pyjamas adaptation beginning in 2011 has made the show one of these.
* Bananas in Pyjamas episode "Switcheroo" has the Bananas trade pyjamas as a joke on the Teddies to see if they could tell which is which. It backfires when they slip up and answer to their own names rather than the other's.
* Bananas in Pyjamas had one of these in 1994 in Australia. An album was released compiling songs from the show.
* Bananas in Pyjamas. In the original animation, there were six bananas and ten bears, and the Rat In The Hat wasn't present.
* Bananas in Pyjamas, the title characters get stuck outside after putting their pajamas in the wash. In a twist on the usual, they don't have any other clothes to put on, so they try to steal the other characters' washing to cover themselves.
* Bananas is completely lost on younger viewers since they were all born well after scanner-equipped cash registers and UPC codes made price checks unnecessary.
* Bananas is invited to dinner with the president of the country he's visiting, and as he dazedly lies on his bed harp music starts. Courtesy of the harp player in his closet.
* Bananas is roused after being knocked out, he's moaning "...no more Polish women!"

* Banco from Vichy France were flocking to Venezuela during his time in Caracas. He doesn't know the exact difference between actual French fascists and opportunistic collaborators and just lumps them all together as "Nazis" and won't associate with them.
* Banco he always envisioned, and he's shocked that she even speaks French. He rents a room and takes a cold shower, trying not to panic because she's real, and vows to never tell her that he dreamed of her years before. He eventually marries Rita and they run the hotel together.
* Banco heist; renting a house across the street from a bank and tunneling into it while it's closed for the weekend. The heist is foiled by a heavy truck taking a detour over the tunnel and collapsing it.
* Banco line and arguing that Papillon is a friend of the people and not a stooge

for Jimenez, eventually turning the mob away.
* Banco, Papillon can't resist a little criminal action even while doing honest work. He winds up running the executive's kitchen for an American oil firm and he embezzles from his department's budget. The high-quality food eventually gets the executives to bring their wives along for meals, which only helps Papillon skim more money with less risk — he's already breaking the rules by feeding extra mouths and nobody is paying attention to the extra expenses.
* Banco so low that the cheap metal roofing flies off the building; exposing whores and their clients who scramble around while the plane orbits, Papillon and Carotte laughing their asses off.
* Banco; the metal tube used to hide money and valuables up his ass, after his release from prison. Even on the outside it was a good way to protect his cash and he had gotten used to it after fourteen years, he wasn't bothered by keeping it another year or two while he funds his revenge.
* Banco. They work hard in the tunnel and take care to keep neighbors and passersby from seeing the additional gang members coming or going. The dirt is smuggled into planters in the backyard. The heist fails when a detour forces a heavy truck down the side street and it falls into the tunnel; the gang was celebrating elsewhere and they manage to get away.
* Bandage Babe: In reality, having enough bandages to sufficiently cover areas such as the chest means that rest is a good idea, especially if serious wounds haven't fully healed, and wearing little else can expose the rest of the body to extreme weather and further injury.
* Bandage MummyA character who is badly injured shown completely encased in plaster casts and/or bandages.

* Band Candy" had Ethan Rayne selling chocolate that made people act like particularly irresponsible teenagers. This is notable because "book smarts" weren't affected so much as common sense was. Buffy wound up having to be the responsible, mature one.
* Bandersnatchi are giant slug-like single-celled organisms with a single chromosome as thick as your finger. Also quite possibly the oldest surviving species in known space.
* Bandette. All we really know so far is that its leader is called Absinthe, because he once killed a bunch of people just to get a case of a really good one.
* Bandette. Bandette's costume is mostly red and black because she's a criminal, but it's lightened with the primrose-yellow lining of her cape, which shows that she isn't actually evil.

* "Band Geeks": Patrick kicks Sandy in the shin, angering Sandy, which then results in a big ball of violence.
* Bandidas) throw down in a church over the money they robbed, which Maria wants to use to help the poor, and Sara wants to keep because it belonged to her father.
* Band-in-a-Box, possibly because it originated on the Atari PC before key commands were standardized, is absolutely brutal with these. It's near-universal in audio/MIDI programs for the spacebar to activate the "Play/Pause" transport function, but this one uses "Ctrl-A" and "Esc" for these. It can be very awkward moving between Band-in-a-Box and other programs.

* Bandits , an entertaining prisoners-on-the-run story, ends with the three remaining band members about to board a ship when the police finally catch up with them. Cut to the sound of gunfire and a shot of their hands reaching for the hand of their friend who died earlier. Damn!
* Bandits aren't the only issue. Terrorist and criminal organizations such as
* Bandit sells popcorn to Doc and Roger while they watch a Mountain Dew-jacked up Jinx duke it out with Kasi in a powersuit.
* Bandits has Billy Bob Thornton's character waking up shouting "Beavers and ducks!"
* Bandits has both the main characters falling for their hostage turned ally. When she is pressed to chose she deliberately chooses "not to chose," and is last seen happily with both of them in Mexico.
* bandits, or even some combination of the lot. As noted below, Undead are also common.
* bandits. There's a reason why this story isn't included in compilations of Bible stories meant for toddlers.
* Bandits: The Sleepover Bandits' final heist is on a much larger scale than their previous robberies, and ingenious and multi-layered in nature.
* Bandits they did the sheet thing on a double bed, but it didn't last very long.
* Bandits, which came out a month later and in spite of the having big names and a light subject matter, flopped in theaters. Still, reviews were positive and the performances of Billy Bob Thornton and Cate Blanchett were nominated for some awards.
* Bandits with each other in the middle of what appears to be a robbery gone wrong, then flashes back to the jailbreak which brought them together in the first place.

* Bandit Tribe for help with the theft of the Haven Relic, Raven only agrees after showing how unimpressed she is by Cinder's threats. She later confides with her subordinate that they are going to double-cross Cinder the first chance they get.
* Band Land: A level that is made out of musical instruments or otherwise music-themed.
* bandmate Øystein "Euronymous" Aarseth, claimed that he stabbed Aarseth in self-defense and Aarseth's TWENTY-THREE stab wounds were from Aarseth falling on broken glass during the struggle. It is more plausible when you know that Aarseth was only wearing underwear at the time.
* Band names that follow this trope (see Music, above and below) get spoofed in
* Band of Brothels: a legal organization or union that oversees/regulates prostitution.
* Band of Brothers actor Ron Livingston talks of the cast studying period photos of the characters. The actors were looking at what the soldiers wore, how they held themselves.
* Band of Brothers after he got shot in the Netherlands, then he finally freaked out after seeing two of his friends get hit with artillery fire near Foy.
* Band of Brothers: A group of loyal friends formed by shared dangerous circumstances.
* Band of Brothers along with very convincing replica Jadgpanthers and Sturmgeschutz IIIs built on British FV432 APC chassis.
* Band of Brothers and... smoke a little bit. The two are, understandably, quite shaken up.
* Band of Brothers and then hangs back waiting for more orders from his superiors. This means that he rarely interacts directly with the frontline privates who lose respect for him and start viewing him as a coward. This is contrasted with First Sergeant Lipton who will delegate a task but then supervise to make sure that it is completed correctly. Dike is portrayed as an empty shell while Lipton is considered the true leader of Easy Company.
* Band of Brothers, as he most often is the one looking out for Easy Company.
* Band of Brothers became just as close to each other during filming as the real men of Easy Company did during the war. They hold a cast reunion every year and frequently participate in USO tours and World War II historical events together.
* Band of Brothers. Bill Guarnere is occasionally referred to as "Gonorrhea" (but mostly as "Wild Bill").
* Band of Brothers book tells how soldiers would sometimes play pranks on each other by mimicking the sound of an incoming bomb or artillery shell.
* Band of Brothers, Buck Compton's breakdown in reaction to the loss of his friends in "The Breaking Point" was used to not only relate Compton's personal story, but to help show the viewers just how shitty it was for the troops during the Battle of the Bulge.
* Band of Brothers, but for the most part it's a good representation of what happened, and it's often shown in high school history classes.
* Band of Brothers, but Frank John Hughes (Bill Guarnere) was a full-on method actor. The actors playing the replacement soldiers were ostracised by most of the cast, but Hughes took Robin Laing under his wing because Guarnere had done so to Babe Heffron. Hughes also carved 'Fran' into his weapon because that had been the name of Guarnere's wife. Mark Huberman (Les Hashey) said that when the real Guarnere came on set, he asked what he thought of the real Hashey. When Guarnere said he never liked him, Huberman joked that as soon as Hughes heard that, he never spoke to him again on set (though he did assure him it was for the sake of method acting).
* Band of Brothers, but has entire episodes with no significant combat:
* Band of Brothers by an unnamed sentry. The man in real life was quickly transferred to another regiment for his own safety and does not appear in the series again. Nonetheless this results in the incompetent Norman Dike being put in charge of Easy Company through the Battle of the Bulge. Many men lost their lives (or limbs) due to the man's poor leadership skills.
* Band of Brothers, Captain Herbert Sobel is both played straight and something of

a subversion. His training methods are so brutal that the entire company despises him and becomes motivated to go above and beyond to prove his insults wrong. For half of the first episode, he's shown being extremely tough on his soldiers, revoking their passes for the slightest offenses, making them train longer and harder than the other companies. At one point his battalion commander tells him that his company has the finest performance in their division. However, he subverts the trope somewhat when it's discovered that he's an incompetent commander. While he's great at whipping soldiers into shape in a garrison environment and several acknowledge they would have died without his training, he's not so great when it comes to fieldwork. He's unable to perform simple tasks, such as reading a map properly, resulting in a mutiny by his NCOs who refuse to go to war under his command. Ultimately he's reassigned to a training camp to keep him out of the field, and Easy Company gets a different captain before they mobilize. The real Sobel was apparently a bitter and deeply unhappy man who attempted suicide late in life.
* Band of Brothers. Characters who are established beginning in the first installment are at times killed off abruptly and without ceremony. Although much of the drama of the miniseries centers on the effects these deaths have on the survivors, there is often little attention paid to the deaths as they happen because the other characters seldom have the time to dwell on them.
* Band of Brothers comes from a stereotypically WASP family, which sets him apart from most other members of Easy Company, who are of working-class and/or immigrant backgrounds.
* Band of Brothers cover Easy's retreat in that episode, and the only reason the British tanks do badly is because their orders force them to "avoid unnecessary destruction of property" which would have allowed them to ambush the German tanks, rather than be ambushed.
* Band of Brothers covers the story of Easy Company of the 506th Regiment of the 101st Airborne. Several of the company members, such as Carwood Lipton, cite this trope as the reason they joined the Airborne in the first place.
* Band of Brothers, Cpt. Sobel threatens Lt. Winters with a court-martial, his real intention being to simply punish Winters for personal jealousies. Winters calls Sobel's bluff by endorsing the court-martial, which is for a ticky-tack infraction he know won't hold up. Sobel is dismayed, as he knows this will only undermine his authority further.
* Band of Brothers depicts formal briefings for both D-Day and Operation Market Garden, as well as less formal ones for patrols and individual battles.
* Band of Brothers. Depicts the actions of the 101st Airborne Division on D-Day. While amphibious landings aren't directly shown, the main mission depicted in episode 2 is the silencing of German artillery firing on Utah Beach. The amphibious assault across the Rhine River in March 1945 (Operation Varsity) is referenced; Captain Nixon participates in the supporting paratroops landings off-screen, which is mentioned in dialogue.
* Band of Brothers Dick Winters wakes a drunken Lewis Nixon by soaking him with a jug of water he finds next to his bed. Only, it's not water.
* Band of Brothers did everything that was asked of them - going through a ten-day gruelling boot camp in preparation, relocating to England for nine months and shooting long days - because they got the chance to play real-life WW2 veterans and work with Stephen Spielberg and Tom Hanks.
* Band of Brothers does this in second to last episode, "Why we fight", while the men are on patrol in the woods.
* Band of Brothers. Due to his inexperience, he joins the patrol as an observer with Sgt. Martin as the leader and another Rock.
* Band of Brothers: Easy Company found and liberated a concentration camp in one episode.
* Band of Brothers; Easy Company lacks a moonshiner. The biggest drinker among the main characters has to smuggle his booze in the luggage of a known teetotaler, and later resorts to looting when his supply runs dry. As they were fighting through France and into Germany finding left-behind alcohol wasn't too hard.

* Band of Brothers: Easy Company of the 101st Airborne sings this one as they run up three miles up a steep hill with a stomach full of spaghetti:
* Band of Brothers ends with Winters describing the lives of a few of the men after WWII. Since the series was made over fifty years after the war had ended, this meant explaining how a lot of them had died.
* Band of Brothers: Episode 5 is a strange example. The show begins with a flash forward to the assault on the SS company. The actual assault takes place in the middle of the episode, and later there is a flashback to it.
* Band of Brothers. Episodes 6,7, and 8 show Easy Company's actions in the Battle of the Bulge and the operations that took place right after. Episode 6 shows their stand in Bastogne with the rest of the 101st Airborne Division. 7 takes place afterwards with an assault on Foy. And 8 takes place in February as the Allies approach the German border.
* Band of Brothers episode "Why We Fight" features this exchange while the soldiers are patrolling a forest in Bavaria:
* Band of Brothers fame. As a child, he gave himself the nickname that would follow him through his military and legal careers, and as a kid beat up any of the other kids that called him Lynn.
* Band of Brothers features a soldier on horseback played by the series assistant military adviser Freddie Joe Farnsworth, the only person on the set who knew how to ride a horse and had an American accent.
* Band of Brothers follows a company in the 101st Airborne Infantry, and shows the airborne landings during operations Overlord and Market Garden while Varsity is mentioned.
* Band of Brothers get blown to bits by a shell that landed in their foxhole). His jokes and wisecracks become more bitter and weary than before.
* Band of Brothers got popular (all three of them had small roles in it early in their careers), but the majority of the fandom doesn't seem to mind.
* Band of Brothers had budgets that dwarved even Game of Thrones. Most of episodes have at least one big, sentimental battle.
* Band of Brothers had two real-life examples although the research done in the book that the series is based on has some flaws and thus doesn't fully match with the actual events as they took place:
* Band of Brothers has an accidental example. Joe Liebgott is portrayed as a Jew in the miniseries, to play up the emotional impact of the concentration camp episode. However in reality he wasn't actually Jewish - and his comrades mistakenly thought he was. His family revealed this information after the miniseries aired.
* Band of Brothers has several battles that take place in towns and cities across Europe, most notably Carentan.
* Band of Brothers has the paratroopers getting into the plane, the plane taking off, and then another and another, as the camera pulls back to slowly reveal the whole sky full of planes,and the fleet below, to show just how damn big the invasion was.
* Band of Brothers, Herbert Sobel is the first leader of Easy Company, and excels in the position, training a company that is tougher and more effective in a training environment than any other airborne company. However, when actually out in the field, he suffers from the fact that he has poor leadership skills, all his subordinates basically hate him, and he is completely useless in combat. Fortunately for Easy, he is reassigned to head up a training camp for airborne (his actual strength) before the invasion of Normandy. He's later found still at Captain rank (the same rank he was when he was reassigned) working a menial logistics postion.
* Band of Brothers However, towards the tend, most of them realize the Germans were just regular people fighting for their country, just like they were. Shifty Powers even mentions that they might have been friends with some of them if it weren't for the war.
* Band of Brothers in a cameo. Knowing that Bastogne was going to be surrounded, and knowing that the 101st was going to be really short on ammunition, Rice made nine separate trips in a jeep that was towing a trailer back and forth from a

nearby supply depot to Bastogne in order to bring what ammo he could to the troops digging in against the German advance. He did this on his own volition. His last trip was technically made after the Germans had surrounded the town, and the only reason he didn't make a tenth trip was because he was specifically ordered by his CO to stand down. Rice was nominated for a Medal of Honor for his actions.
* Band of Brothers in episode 3. Easy was under heavy attack and Dog and Fox companies had retreated.
* Band of Brothers (in German, of course) "be good, and you will get a cookie!"
* Band of Brothers in tenor, and another soldier teases him, asking if he was sitting on his bayonet.
* Band of Brothers is a bit of an interesting example, as it focuses on American soldiers in the war, but most of the main cast are played by British actors. Foreign allies do show up in the series, though not necessarily in a positive light.
* Band of Brothers, knocks some sense into a shell-shocked private. For what it's worth, Spiers applies this to himself as well, to great effect.
* Band of Brothers. Lieutenant Jones arrives fresh out of West Point as a replacement for the incompetent Lieutenants Dike and Peacock. Initially disliked by the men, he proves himself an effective leader and quickly earns their respect.
* Band of Brothers: Lieutenant Welsh realizes that the armour on the underbelly of a German assault gun is considerably thinner. When his bazooka man's first shot hits the front of the vehicle, with no effect, he directs the bazooka gunner to hold fire until the SP's tracks are in the air as it climbs a hedgerow, exposing its belly.
* Band of Brothers Lt. Peacock's incompetence is displayed in a cutaway sequence by having him look at a map when the soldier standing next to him turns the map rightside-up.
* Band of Brothers, Martin and Perconte have this exchange in the first episode:
* Band of Brothers, Moose is accidentally shot by a friendly sentry. Winters and Welsh provide first aid until the medic arrives. Doc Roe promptly informs them that they gave Moose a morphine overdose, which is far more likely to kill him than the bullets were, and chews them out for being that stupid.
* Band of Brothers mostly featured genuine grunts on the ground and in the shit. A few people qualified, though.
* Band of Brothers: Nixon, an intelligence officer, is this, having never fired his weapon in combat. He did, however, have a sniper shoot through his helmet in Holland.
* Band of Brothers: One episode shows the men liberating a Dutch city - where the people are taking the opportunity to shave and humiliate the women who slept with Germans.
* Band of Brothers, one German soldier who talks with Easy Company after V-E Day is a veteran of both World Wars One and Two. He very distinctively still wears his World War One uniform.
* Band of Brothers on his first job - with their uniforms on wrong, thoroughly annoying the original actors.
* Band of Brothers: played straight on numerous occasions, especially with the character of Wild Bill Guarnere, who will go to any lengths to drag a wounded comrade off the battlefield.
* Band of Brothers split into individual episodes. In fact, both were specifically filmed with the DVD release in mind. The cast usually refer to it as "a movie" rather than a miniseries.
* Band of Brothers's weapon went off and he suffered damage to his face. He went to Shane Taylor, expecting him to stitch it up since he was playing the medic Doc Roe. Taylor did so and, not surprisingly, the wound got infected and McDonough had to be taken to a hospital.
* Band of Brothers. The 506th Regiment was given leave, but almost none of them returned before curfew. The next morning, the commander had the entire unit form up, and then drummed out one soldier from every company, complete with a lieutenant tearing off their jumpwings, stripes, Airborne badges, anything that would mark

them as a paratrooper, before being sent off to the regular army with their uniform shredded.
* Band of Brothers: The danger of the situation has forged a friendship between the Heroes and his companions that transcends the usual meaning of the word.
* Band of BrothersThe group is formed by a shared dangerous circumstance, normally military.
* Band of Brothers, the more time soldiers spend trying desperately not to die, the more likely they are to get killed, while those who simply focus on completing their mission tend to do better. As in the case of Lt., later Captain Speirs, who runs through occupied Foy to link up with another company assaulting Foy from the other direction, then runs back through in order to lead his own men into the now-coordinated attack.
* Band of Brothers. The paratroopers of Easy Company are superbly trained but D-Day is their first time in combat. By the time they are pulled from Normandy, they are toughened veterans but at a very bloody cost. This is then repeated on a smaller scale when the company gets replacements who are highly trained but have no combat experience.
* Band of Brothers. The rest of Easy Company characters were played by actors who were unknown at that time.
* Band of Brothers, the Team Mom is widely considered to be Carwood Lipton.
* Band of Brothers. They even named the mini-series after the trope naming quote. Fittingly, this series EPITOMISES a band of brothers. Winters, Nixon, Spiers, Bull, Lipton, Malarkey, Luz, Martin, Liebgott, and many, many more. And from what we see, the actors also lived up to this trope during the boot camp prior to filming, and still get together once a year for reunions.
* Band of Brothers, to a certain degree. The other NCOs tease him for his "folksy wisdom," but when the replacements laugh along, they make it explicitly clear that he is one of the most intelligent men in the company. There's also a random paratrooper from F company that Blithe and Hoobler linked up with who isn't too impressed by Hoobler calling him a yokel.
* Band of Brothers: Unlike many of his enlisted fellows in Easy Company, who are mostly farmboys and street kids, Private Webster was actually college-educated when he enlisted, was a good writer, and knew how to speak German.
* Band of Brothers volunteer by his own volition, which is even more awesome as he had a nervous breakdown a few scenes before.
* Band of Brothers when Easy Company is pulling out of a Dutch town swarming with Germans. Denver "Bull" Randleson was separated from the main force and forced to hide until he can escape. Meanwhile, his friends are trying to organize a rescue, and when told he was probably dead "Wild Bill" Guarnere responded, "If there ain't no body then there ain't nobody dead."
* Band of Brothers: When one of the characters declines to salute a superior officer with whom he has personal issues, he is gently reminded, "We salute the rank, not the man." The salutee was Major Dick Winters, and the saluter was Captain Herbert Sobel, Winters' former CO.
* Band of Brothers, where Lt. Welsh asks for volunteers to take a look at a suspicious looking house; although Blithe raises his hand, Welsh also says "You three have just volunteered too", thus ordering them to take a look instead of asking them if they want to.
* Band of Brothers which reveals the post-war fates of the men - as only Ronald Speirs remained in the army.
* Band of Brothers, Winters is informed in writing that he is to face a court-martial. The document he's handed contains a number of misspellings, and Nixon comments on it.
* Band of Gypsys with misleading covers publicizing Jimi's involvement with them to compete with/capitalize on Hendrix' success years later.
* Band of Relatives (all brothers), The Band Perry (sister and two brothers)...
* Band of Relatives in 1974, they didn't perform together in public for the remainder of their lives.
* Band of Relatives, one of the first American vocal groups to achieve nationwide

fame, in the 1840s.
* Bandolero, Don Rodrigo, meets his fatal fate, as he was thrown by the protagonist into a cliff.

* Bandou suffers this fate at the hands of Lucy, but he manages to survive and replace his missing half with prosthetics.
* Bands are littered with spare wheels. Usually a friend of the talented one who works okay with the band.
* Bandslam, the name of one of the main characters is Sa5m (the 5 is silent).
* Bands like Mr. Bungle, Sleepytime Gorilla Museum, Estradasphere, Iwrestledabearonce and uneXpect take genre-busting so far that they can only be vaguely classified as experimental metal.
* Bandsmen were often detailed for medevac duty in eighteenth century warfare. If there was no one assigned to this to many soldiers would weaken the line escorting comrades to the rear, and using bandsmen kept them from losing the firepower of musketeers leaving the line.
* Bands of space pirates are the primary antagonists in the early chapters, and provide fodder for
* Bands other than "Hayseed Dixie" have covered rock music in a bluegrass style. The effect is so strong, even non-parody/non-cover bluegrass is sometimes attributed to them.
* Bandstand: Donny is Julia's second love; her first was her late husband Michael.
* Bandstand was one of the soldiers who liberated Dachau; now he drinks heavily to try to forget the things he's seen.
* Bands will swap instruments among themselves on occasion. Resulting in things like Mr. Bungles' cover of Hit Me Baby One More Time or alternate versions of 'Silver Machine'. Arcade Fire and Irish showbands don't count, as they swap/swapped instruments all the time.
* Bands with a normal line-up who want to sound precisely like the original have to resort to using sequences or outright audio playback for those parts they can't play by hand. An ugly compromise would be to have additional musicians hidden away backstage from the audience's eyes.
* band to comic books and B-movies in their songs, "Goliath and the Vampires" and "Ego, the Living Planet" being examples.
* Band Toon: A TV series, often animated, featuring a famous music act.
* Band vs. Band They do end up hanging out, at which time Honey and Arsenic sing the Krampus carol (much to Turpentine's annoyance).
* Band vs. Band: Turpentine is a punk rocker and Honey Hart is a bubblegum pop singer. They are also girlfriends. In "Tape vs. Mix" they make mixtape cassettes for each other, and even though the songs aren't really to their liking, they appreciate it for capturing the other's personality and feelings.
* Bandwagon Hater, as well. This is what the page quote essentially describes; the person who hates something not because they genuinely dislike it, but because the "cool kids" told them to.
* band). War songs have comprised the lion's share of the band's output ever since.
* band whose last sign of life goes back to 2010. All three have found that most were disconnected (for obvious reasons), but most that worked went to voicemail, and most of those made some reference to the song (ie, "...and no, Jenny is not here." or sometimes "Hi! This is Jenny, leave a message.") At least one extension of the number is held by the company Retrofitness, a chain of fitness gyms. It uses the number for potential franchisees.
* Bandwidth Theater magic: it makes his wife love him, and keeps the moon from falling. (But it doesn't help with movies; it's just the wife and moon thing.)
* Bane. But guess what, he is not! Of course it's the training Bane had in prison, silly.
* Bane catches Penguin's nephew Joshua putting out a hit on a fellow member of the

* Bane, Clayface, Solomon Grundy, and other "melee" villains who were larger than Batman.
* Bane didn't need to do too much. Zannah had just killed a pair of Jedi with the Force after they killed her bouncer friend mistaking it for a threat. When he warns her that he has killed people, including children, she simply answers that she's a killer too.
* Banedon the wizard pops up to help the main character at several points in the series and gains power and prestige at the same rate as Lone Wolf. He's a more prominent character in the
* Ba Nee's Vietnamese name is frequently mistaken for "Bonnie". At least one official book even mistakingly called her that.
* Ba Nee was obsessed with finding her presumably dead father that she never met. In the series finale, she's reunited with him and becomes one of these properly.
* Banefire is especially awesome, because it is depicted in the card art as Sarkhan Vol's hands in the Kamehame Hadoken stance, enhanced by magic to look like a dragon's head breathing fire.
* Bane has this as his main goal and almost all of his followers' failed plots revolve around this to some degree. Indeed, he is the god of tyranny.
* Bane has to, it can spit out 24 shells per turn. Unlike most of the dakka examples here, it's unlikely to kill anything quickly with all those small caliber rounds, but very few opponents are likely to want to stick around for a second go, and it has the ammo, heat sinks, and armor to do it all day if it wants.
* Bane have benefited from this as well, like the time Bane onepunched the aforementioned Cheetah without being on Venom.
* Bane, he gets into it with the Joker over who should confront Batman.
* Bane, he looks disturbingly inhuman, especially when pumped-up on Venom, as it causes his skin to turn red, his eyes yellow and pupil-less and he has the same teeth as Joker, only white.
* Bane is absolutely shocked when he discovers that he is damned to Hell, because he believes himself to be "a righteous man."
* Bane is sometimes depicted as having glowing green pulsing veins when he injects the venom that gives him his strength.
* Bane is the God of Tyranny, Strife and Fear. His church was initially marked by sectarian violence that he encouraged and approved of, believing it

* Baneposting did not start as a forced meme, but it grew out of control and became so forced that people started repeating it unconsciously.
* Bane, Ra's criticizes his lack of flair and implies that Bane learned sword fighting entirely from reading books on the subject.
* Banestorm features a necromantic citystate in their default Fantasy setting of Yrth.
* Banestorm, has achieved a position of political power using social skills and magic, but is in danger of being exposed by his vampire features, and at least one of his mind-controlled victims is going inconveniently insane under the strain.
* Banestorm sect of Christianity that the locals follow makes raising the dead a holy act.
* Banestorm setting, people so afflicted turn into actual wolves. It's also not contagious; either you or an ancestor has to have been specifically cursed.
* Bane this towards Talia, as he was almost married to her when Ra’s considered him worthy take over as leader of the League of Shadows. So Bane was stricken to learn Talia loved Bruce (his nemesis) and to add further salt on the wound Batman defeating him caused his marriage to be annulled. Just another reason to break the Bat.

* Banette is an abandoned doll that sprung to life. It is not happy that it was abandoned, and searches for the child who abandoned it to do Arceus-knows-what to them.
* Banette used to be a doll that was thrown away by a child, and now seeks revenge. By extension, this also applies to its unevolved form, Shuppet.
* Bane was born and raised in an island prison with a less-than-sympathetic warden. Guess how he turned out...
* Bane wears a black costume and his mask is often drawn with red eyepieces.
* Bang a Gong" are instantly reminded of a slew of 1980s Labatt's Blue ads.

* Bangarang jokes, but he also provides convenient time stamps on exactly how far into the video he waited, for the sake of any betting pools anyone had been running.
* Bang, Bang, BANG: Even handguns are expected to sound like huge explosions rather than firecrackers in real life. In real life often the only way to differentiate the two is firecrackers lack the distinct echo of the bullet breaking the sound barrier.
* Bang, Bang, BANG: Even though guns in real life make a wide variety of sounds at varying volumes, in media they'll almost always sound like shotguns.
* Bang Bang Bang finally released it in 1999, and re-released the title track.
* Bang Bang It's Reeves and Mortimer saying something) involved the duo in a car where, at some point, Bob would hit a button that made the bonnet and boot lid blast off into the air - when they landed in a field, they would then detonate in absurdly large explosions.

* Bang Camaro got their name by finding the two sexiest words in the English language.
* Bang Camaro has 16 members for their studio and touring band, but to add to this, when the venue is big enough, they add on some session members to get as many people on stage as possible. Their lineup is basically a typical 4 piece rock band, plus 12 or more singers; part of their trademark sound is that there's a small choir of voices singing the lyrics rather than a traditional "lead" vocalist.

* BanG Dream! Girls Band Party!) does not actually limit how much you can play. Live Boosts are only used to multiply your rewards; once you run out you can continue to play songs, which is useful for getting the one-time score and combo rewards (which are mercifully not affected by Live Boosts) and simply practicing charts.
* BanG Dream! Girls Band Party! got slightly more promotion, with ads promoting it appearing every three ad spaces.
* BanG Dream! Girls Band Party! when she does, usually requiring Misaki to come help her out. One 4-koma, as well as the event 'A Dreamy Promenade', demonstrates how difficult it is for her to go out places with her childhood friend Chisato, who is okay with directions but can't figure out trains (since as a child celebrity, she was always driven around everywhere)
* BanG Dream! has a few examples. Afterglow has childhood friends Ran and Moca, who are stated to be the closest in a band composed of childhood friends. There's also Tomoe and Himari. Rosellia has Lisa and Yukina, also childhood friends, with Lisa frequently baking cookies for the band because Yukina likes them.

* BanG Dream! is half-Japanese and half-Finnish. Having grown up in Finland, she's fascinated by all things related to traditional Japanese culture, especially bushido, the samurai code. Her passion for incorporating bushido into every aspect of her daily life, to the point of it being her catchphrase, is one of her most memorable traits. And although they're focused on less, she also participates in kendo, tea ceremony, and flower arranging.

* Bangkok Dangerous Joo stalks and efficiently kills many gangsters as they grow increasingly jumpy and frantic.
* Bangkok Dangerous (Thailand, 2000): Both versions directed by the Pang Brothers.
* Bangkok Dangerous (the 1999 original and 2008 remake shares the same page)
* Bangkok Hilton, Kat is offered the chance to plead guilty for possession of the heroin that her smuggler boyfriend hid in her camera case, which would result in a life sentence. She refuses, despite being told that if she's found guilty of trafficking, it's a mandatory death sentence.
* Bangkok Hilton territory, as they're sincerely trying to deal with the drug trade. But the fact that they dismiss Kat's story without making any attempt to pass on her information on Arkie Ragan to the authorities in Australia comes across as this.
* Bangkok Hilton. Thankfully, she manages to escape the prison before her execution.
* Bangkok Knockout, let alone the opening premise that they're competing to join a stunt team, is entirely secondary to the individual fights, and the inserted attempts at drama via flashback add very little to the plot.
* Bangkok Knockout to lure the heroes in. When Joy is rescued, she basically rubs her wrists and is fine. The behind-the-scenes footage shows that the actress was in a harness, but the drop was real.
* Bangkok Knockout when Ao grabs one of the gamblers to use as a human body shield against Mr. Snead.
* Bangladesh-based product placement, regardless of whether the products and/or services are available in the UK or otherwise.
* Bangladesh Dupree is a Pirate Queen, a genuine blue-blooded member of the Fifty Families reduced to piracy due to some economic downturns. The other royals constantly look down on her for this—not because she's a pirate, but because she actually
* Bangladesh DuPree, of all people, gets a huge floating heart when she meets
* Bangladesh DuPree of such boundless bloodthirsty anticipation that it impressed even her.
* Bangladesh has been known to prevent the release of certain works not in the Bengali language. Much of what it imports comes through neighboring India, and much of that is made or dubbed in Hindi; the government wanted to fend off the growing influence of the Hindi language in Bangladesh. In particular,

* Bangladesh or Sound Warriors (which sounds much cooler in Bangla...) in recognition of their dedication and their contribution to the War.
* BANG! Magazine has "[a] solar-powered reflective surface, a recharge time of 0.0000, a higher-resolution screen than even the Retina display, [and] DRM-free content".
* Bang's brother Bomb also serves this role, being the creator of his own martial arts style. There's also Nichirin from the Council of Swordmasters, who trained Spring Mustachio and Atomic Samurai.
* "Bang" sees the Nelson & Murdock trio relaxing after work by playing pool at Josie's. While Foggy goes to the bathroom, Karen and Matt flirt, during which Karen ends up making a bad shot. She decides to "teach" Matt how to play. Matt lines up a shot that doesn't sink any balls, so Karen repositions him, tracing her hand along his sleeve. Matt can hear Karen's elevated heart rate, and knows she's feeling as hot-and-bothered as he is. He ends up scoring a trick shot that ricochets the eight-ball into a corner pocket just as Foggy returns from the bathroom.
* Bang Shishigami attitude, he's mostly seen as a crazy old man by most of the cast. Although, there are a few people who do respect him.
* Bang Shishigami. While ninjas normally specialize in speed, Bang is more of an all-around character than anything.
* BANG!: The Dice Game due to keeping the spirit and gameplay intact while removing the clutter and downtime between players.
* bang their head against the doorframe when the couple tries this while walking through a door.
* Bang, the third ranked S Class hero and one of the few individuals who is aware of Saitama is himself this. He is a practitioner of the Water Stream Rock Smashing Fist martial art. Bang does admit that Saitama is on another level in terms of power. His elder brother, Bomb also qualifies as this.
* Bang turns down the hermit's offer for an apprenticeship at the end of
* !Bang! TV and then ended up challenging for and winning the United States Title belt, beating her trainer Adam Windsor.
* !Bang! TV, being that he's a children's and youth minister (among other things) when not wrestling and kids go to see his matches.
* Bang was a murderous, sadistic pirate long before she met Klaus, but he and Gil often look the other way regarding her actions, or at the most act vaguely annoyed with her, usually for jumping the gun or overdoing it when on an assignment, while severely punishing others for lesser infractions.
* Banica Conchita, possessed by the demon of Gluttony, shows affection to her lover Carlos Marlon, and has a child with him.
* Banished depicts a scene where the (alien) protagonist is captured by Amazons and thrown in a cauldron. he pees in the water, telling them "That's what you get for not killing your food before you cook it."
* banished from heaven because he saved a female monster from an evil human. It took Rason's efforts to save Luna and Falla from his fellow angels in Act IV, as well as direct interference from God Himself, to get the angels to start thinking differently, and by the end, they've realized and accepted that not all monsters are bad.
* banished in the moon for a thousand years as Nightmare Moon. At first, it didn't seem to have affected Luna's sanity but the Season 5 episode "Do Princesses Dream of Magic Sheep?" reveals that she created the dream-warping Tantabus as a reminder that she once was Nightmare Moon. With some encouragement from Ponyville, Luna shakes off the ghosts and defeats her creation.
* Banished is all about the original British penal colony in Australia.
* Banished tries to pass himself off as indispensable, but Major Ross clearly wants to avoid this trope.
* Banishers, one of the sample Banishers is a Thyrsus Banisher who engages in cannibalism and is a noted misogynist, especially fearing/hating female mages who are also Thyrsus. This is fuelled by his symbolic connection to spiders; he sees himself as a spider in human form, and if he's a male spider, then that means a female spider is his worst enemy.

* banishes her sister Mary from court when Mary admits that she has secretly married William Stafford and is carrying his child. Although not technically her mother, since Anne was Queen at the time, she could be considered a de facto guardian.
* Ban is killed by the Screaming Author when it wraps its razor wire around his body and yanks him into the attic. He's strangled, impaled, his neck is broken, and his arm is severed before he finally gives out. Otherwise, he can be
* Banjo Gyro! It's about fast food employees trying to get rid of a demon in their restaurant
* Banjo Haran is used to add new context to Suzuoki's large bank of previously recorded lines.
* Banjo-Kazooie, and in the third installment, Nuts & Bolts, there are no characters like this at all.
* Banjo-Kazooie and make your own decision as to whether you're supposed to notice or not.
* Banjo-Kazooie, and once you get past the horror, it’s shown that the guy actually is one of the sweetest and friendliest characters in the game.
* Banjo-Kazooie, are an example of this trope, as one is a male and the other is a female, but they do not pursue a romantic relationship, choosing instead to be close friends. It probably helps that Banjo is a bear and Kazooie is a bird.
* Banjo-Kazooie, a washing machine cauldron, and an ugly Grunty doll. This exchange happens:
* Banjo-Kazooie. But Kazooie is no slouch either, for people whom like Bird Girls, especially ones that are snarky.
* Banjo-Kazooie came out on much more advanced hardware, this little element was retained.
* Banjo-Kazooie, Cheato, the big book of cheat codes hovers in place while flapping his pages.
* Banjo-Kazooie despite the fact that he has gills. His teeth also make him look like a shark.
* Banjo-Kazooie ends with Gruntilda crushed under a boulder too heavy for her to lift. By the time her sisters succeed in lifting the boulder in the sequel, she's a skeleton.
* Banjo-Kazooie features a monkey named Konga, who returns in the sequel as a circus ringmaster.
* Banjo-Kazooie features this trope when Kazooie runs around while Banjo rides on her back. It's incredible how she manages to maintain such fast speed even with the weight of an entire bear on her back.
* Banjo-Kazooie features vicious piranhas and a generally gloomy atmosphere.
* Banjo-Kazooie for free, 2 weeks before it was released to the general public.
* Banjo-Kazooie from the XBLA port, with Mumbo's xylophone now bearing the Microsoft logo, and the removal of the N64 logo leaves an awkward pause before the Rare logo as the Buzzbomb flies around nothing.
* Banjo-Kazooie games were originally meant to take place in the Mario Universe, but when the company was sold to Microsoft, that became no longer true.
* Banjo-Kazooie: Gruntilda, when hosting the game show portion at the end.
* Banjo-Kazooie Gruntile Question. Also, the answer to each question is different and changes with each playthrough of the game. So getting Brentilda to give you the facts becomes necessary each time you play.
* Banjo-Kazooie: Grunty's Revenge, although instead of being revived as a cyborg, she transfers her soul to a robotic body while she is trapped below a rock.
* Banjo-Kazooie has a Halloween level in Mad Monster Mansion, complete with a Ouija Board puzzle, haunted church and graveyard, a big creepy organ in the church, and the Mumbo Jumbo transformation for this area as Banjo and Kazooie being turned into a pumpkin.
* Banjo-Kazooie has Banjo the sensible, level-headed bear and Kazooie the confident, short-tempered bird.
* Banjo-Kazooie has the evil villain Gruntilda, who rather likes to decorate things having to do with her with grand-scale depictions of herself. Her lair itself is

shaped like her head, but the most Our Founder-esque example is the enormous statue of herself she keeps in a swamp, surrounded by a moat guarded by a giant piranha.
* Banjo-Kazooie includes penguins running around the main hub town. Running one over can prompt the unfortunate avian to complain: "How could you? Everyone loves penguins! Scientific fact!"
* Banjo-Kazooie is a vertically sprawling forest which you must enter in four different seasons of weather, via four separate doors. They differ in terms of aesthetic, enemies, and accessible areas, and some puzzles must be solved by hopping among the seasons, affecting future seasons. Such a big challenge is fitting for the last main level.
* Banjo-Kazooie is eventually over, most people will jump on another bandwagon, most of the remainder will eventually let it fizzle out and only the people who have made it so important to their lives that they can't let go will carry the torch.
* Banjo-Kazooie is one, due to spending two years trapped under a rock after the end of the first game.
* Banjo-Kazooie (it was a level with a Christmas theme) both set entirely at night.
* Banjo-Kazooie: Nuts & Bolts: Banjo drives into frame in a vehicle shaped like the Rare “R”, which fades into the actual logo as he leaves.
* Banjo-Kazooie: Nuts & Bolts has a really hard mission where you must pilot a large, clunky ball-shaped car through a course... with the controls reversed.
* Banjo-Kazooie: Nuts & Bolts. His hair is also actually dyed blue.
* Banjo-Kazooie: Nuts & Bolts' Logbox 720, running into the video or sound card will make the screen or sound staticy respectively. It doesn't actually make the game harder to play, it's just a nice touch. It also has a time trial in the Jiggoseum where your rival Trophy Thomas (irritated that you keep besting his times) flips the controls for the custom vehicle.
* Banjo-Kazooie: Nuts & Bolts, the laser doesn't do anything except irritate her.
* Banjo-Kazooie: Nuts and Bolts than actually focusing on Jiggy Challenges.
* Banjo-Kazooie resorted to create her own band of Mecha-Mooks with the Gruntbots. Thanksfully, those crud-looking mechanical mischief makers are more a nuisance than a real threat to the bear and bird duo.
* Banjo-Kazooie's box art features Gruntilda overlooking Banjo and attempting to grab him.
* Banjo-Kazooie seem perfectly happy to provide their services, even if it presumably means their death. The single exception being worms in the level Click Clock Wood, who seem to rue the thought of being fed to an eagle.
* Banjo-Kazooie series. Mumbo could qualify too considering how he looks almost like a skeleton.
* Banjo-Kazooie, she has to gain the ability to glide and doesn't get it until fairly late. She's a reasonably fast runner, though.
* Banjo-Kazooie shows snapshots of the eponymous characters obtaining items inaccessible in the main game. When asked what they're for, Mumbo Jumbo tells them they'll have to wait for the sequel (which was made a few years later).
* Banjo-Kazooie, so they re-made her appearance. She now has long eyelashes, "curly" hair, and a more curvy look, to make her more obviously female. And then, once you beat the game, she starts wearing a bowtie (yes, it's a bow, but it's a masculine bow). Kazooie even keeps her Eyelashes in Super Smahs Bros. Ultimate to show that she is undoubtedly a Girl.
* Banjo-Kazooie sports a pretty impressive pair, and a distinctly waspish waist. In fact, this applies any time a bee- or wasp-like character in a funny animals situation isn't a gigantic engine of stinging death instead.
* Banjo-Kazooie's sixth level, Gobi's Desert, there are pools of sand that have small waves going across them, almost like boiling water. Obviously, entering these pools without the Wading Boots is hazardous to your health.
* Banjo-Kazooie, there is a chance that the bed will flip Banjo out the window, where his landing presumably squishes a cat. Cue noise.
* Banjo-Kazooie, the titular pair invoke this trope despite one-half of the duo

being female; they perform almost all their moves by working together, and are actually literally inseparable all throughout the first game.
* Banjo-Kazooie trappings altogether, introducing customizable vehicles as the central gameplay concept instead.
* Banjo-Kazooie voice", not "dumb voice". She wouldn't insult herself, after all.
* Banjo-Kazooie where the bear and bird get to play Santa and decorate and "be the star" on the Christmas tree.
* Banjo-Kazooie, where you're frequently pitted against bouncing shovels, coin-spitting slot machines, flowers, various nuts and bolts, oil drums that release suffocating gas (which also has eyes and chases you), more crates of TNT, and so on. This even spreads into some of the bosses, such as Old King Coal, a massive, animate lump of carbon; Mr. Patch, a skyscraper-sized, dinosaur-shaped inflatable toy that coughs up exploding beachballs; Weldar, an enormous welding torch; and Terry, a giant pterodactyl that spits out "Mucoids", which are giant blobs of green snot with eyes that try to kill you.
* Banjo-Kazooie, which doesn't have any Game Over cutscenes whatsoever).
* Banjo-Kazooie, which has 100 notes on each level that reset themselves if you die or leave the world. Collecting all of them on one run gets you an extra life (since lives are relatively easy to scoop on their own, the bigger purpose of the notes is to open Note Doors in Gruntilda's Lair to progress in the game).
* Banjo-Kazooie), while Blobelda's voice has almost no trace of femininity.
* Banjo-Kazooie. While there is quicksand in Mayahem Temple and Terrydactyland, it doesn't pull you down, the Dragundas living in it do, then spit you back onto solid ground. The wading boots are used to cross the quicksand. The Dragundas are also in Grunty Industries' toxic waste and polluted water.
* Banjo-Kazooie, whose own final battle takes place at the top of Cauldron Keep.
* Banjo-Kazooie woman, but she has a magic pool and appears to be much taller than Banjo.
* Banjo Paterson by the Billy Tea company, who changed one of the lines from "And leading a water bag" to "And waited till his Billy boiled" for the purposes of promoting their product. The second one is the better-known version, to the point that US kids have for decades thought a 'billy' was a kettle or can or something you'd boil water in to make tea. Since the tea brand was named after the device used by Australian travellers to boil water over a campfire, the line "waited till his Billy boiled" is cunningly ambiguous.
* Banjo-Pilot: Gruntilda flies through the logo, shattering it into pieces.
* Banjo's Backpack. However, these are only works in progress as the tool is still relatively new. Only a few original worlds not based on anything have been released so far.
* Banjo's existence as a newborn god is discussed as a way to thwart stage four by
* Banjo the Woodpile Cat (forced into becoming a half-hour short due to budget restraints)
* Banjo-Tooie: After beating Canary Mary in a minecart race, Mary rewards Banjo and Kazooie with a Jiggy, stating that it was wedged under her wing for days, much to Kazooie's disgust. Later, when they win a rematch and win a Cheato page, Mary begins to say where it was wedged in, and Kazooie promptly shuts her up.
* Banjo-Tooie, and that it will reopen once the authorities have been bribed. A second sign mentions that anyone surviving all the attractions gets a fanclub membership. Current number of members: 0
* Banjo-Tooie appears in a bar, drunkenly ranting about how a bear stole all his glory and how he "Had a dream", a reference to what the game was originally called.
* Banjo-Tooie cartridges). Further rumors suggested that there are totally "legit" ways to get these items without using passwords (which suggests the only reason you don't get rewards for these items is because you used passwords to get them).
* Banjo-Tooie has a Balloon Burst Challenge, though this uses Airborne Egg Aiming rather than Kazooie's beak attack.
* Banjo-Tooie has an opening act that takes at minimum a half hour to complete before you can enter the first level, Mayahem Temple, due to the prolonged length of the cutscenes if you don't skip them. Compare this to the original game, where

you could get into Mumbo's Mountain less than five minutes after starting a new game.
* Banjo-Tooie has a stage called Cloudcuckooland. Despite this, while the stage design is rather weird and random (some believe that it's a dumping ground for all the leftover ideas the devs had after making all the other levels) the NPCs found there aren't noticeably much stranger than the rest of the insane cast.
* Banjo-Tooie has Banjo skydiving. The man in the plane tries to warn him, but Banjo shrugs it off. He jumps, but finds out too little too late Kazooie isn't in his pack.
* Banjo-Tooie has two snack food stands in Witchy World. Both proprietors are unhygienic as hell, coughing and sneezing over the food. Fortunately the bear and bird don't have to eat it, they give it to some kids and some cavemen.
* Banjo-Tooie has Weldar, the boss of Grunty Industries, and is an unconventional case. He is a giant killer welding torch who can electrify the floor and perform a wide variety of attacks during battle.
* Banjo-Tooie, he will tell you that he needs to use the bathroom, but he's too fat to walk there on his own.
* Banjo-Tooie, if you use your fire eggs or Dragon!Kazooie's fire breath on a mook, you can watch him run around ablaze until it stops or you kill him.
* Banjo-Tooie inside their UFO, Kazooie asks them, "Are any of you called Elvis?" No, not this time.
* Banjo-Tooie instead). Given that the boss seems to be a hybrid between a vacuum cleaner and a welding torch, this move is very fitting for him.
* Banjo-Tooie, Jamjars embodies this persona complete with military rhymes to describe new attacks.
* Banjo-Tooie), Mario is merely alluded to as "the famous Italian one."
* Banjo-Tooie. Mrs. Bottles ends up forcing Bottles to eat a heavily burnt meal after he was late for dinner, and Mrs. Bottles is implied to not believe Bottle's sound alibi of having just been resurrected from the dead until meeting Klungo and King Jingaling.
* Banjo-Tooie Old King Coal (a Grubby Boiler Monarch who's not the jolly old soul Kazooie thought he was) won't let you use his train until after you beat him into submission.
* Banjo-Tooie, only there's no elevator and you have to climb a rope to get to the top. Without any elevator to get in your way, however, you can jump off from the top and fall for such a long time that Banjo's falling yell ends before you're even halfway to the bottom. The fall is so long that you will die even with full health (unless you have the fallproof cheat active).
* Banjo-Tooie. Outside of the level are signs that inform customers that the park is closed due to its appalling safety record, but it will reopen once the authorities have been bribed.
* Banjo-Tooie: Sergeant Jamjars' rhymes only work when saying the letter Z as "Zed" instead of "Zee".
* Banjo-Tooie series, one of the most important moves learned in the game is how to split up Banjo and Kazooie.
* Banjo Tooie, the party's already over and they've eaten all the food. So they celebrate instead by playing hackey-sack with Gruntilda's skull.
* Banjo-Tooie, there is a dinosaur in Terrydactlyland whose only visible portion is its foot, as it's too large to depict otherwise. It constantly tries to stomp you if you wander into its "Stomping Grounds."
* Banjo-Tooie, the two protagonists can be transformed into a living explosive with the help of Wumba's magic in the level Glitter Gulch Mine. The only means of attack is self-detonation, which logically takes away one unit of honeycomb each time it's used. For safety reasons, this attack is disabled when only one unit of honeycomb remains. The only way to use it harmlessly is in some scripted areas where this type of detonation is required to explode some obstructing rocks in the level.
* Banjo-Tooie to give yourself a window to navigate the rooms freely before the cameras respawn.
* Banjo-Tooie to score points, with red ones being worth one point, green ones

being worth two, and blue ones being worth three. Collecting enough points will earn the duo prizes. Once unlocked, these mini-games can be replayed at any time for the the best high scores:
* Banjo-Tooie uses these to explain newly learned moves to the main characters. If you talk to him again, he tries a plain English explanation instead.
* Banjo-Tooie was released in 2000, two years after the original game.
* Banjo Tooie when you realize some dinosaurs were dead as long, to others, as they have been dead, to us.
* Banjo-Tooie: While the core gameplay was virtually unchanged from the original (aside from some new moves for Banjo and Kazooie), the worlds were about triple the size, and each was connected to other worlds in some way, thus necessitating some backtracking in order to get some of the Jiggies. While many fans loved and embraced these changes, other fans of the original preferred the smaller worlds and being able to get all of the Jiggies in one sitting.
* Banjo-Tooie you must shoot down a few pesky flies that are eating through an anthropomorphic cow's crops. Upon completion of the task she exclaims, "A-maizing! I corn hardly believe it! You wheatly sorted those flies out!", to which Kazooie quips that she's had enough of the "crop jokes".
* Banjulhu and Giggles, the Clown God of Slapstick, as well as Banjo's rival and brother (who would become the main god for an island of orcs after initially worshipping Banjo). With conflicts between different sects settled by the traditional pie-eating contest.
* bank commercial that later was absorbed into Wells Fargo. The brother and sister duo saw the commercial and liked the melody so much that they contacted the composer to ask if he had a full-length version. He didn't, but he quickly composed one for them.
* Bank Heist for the Atari has you playing as criminals trying to escape the police after having robbed a bank.
* Banking. Back in the day, most transactions required paper checks and people had to "balance the checkbook" to track their account balance, as the bank would only provide it once a month by mail. Nowadays, banks do all the math and provide live balances online. Deposits and withdrawals used to require going to a bank branch during banking hours and interacting with a teller, then ATMs made this possible 24/7, and now checks can de deposited with a smartphone by taking a picture. For the most part paper checks have become obsolete, most employers can direct deposit paychecks into bank accounts, credit and debit cards replaced paper checks for merchant use, and payment apps like Zelle and Venmo for personal payments. Nonetheless, registers in grocery and department stores are still equipped to receive checks, mostly for elderly customers who have grown accustomed to writing them for so long. On the other hand, large purchases like cars and home down payments often require a cashier's check, which is still physically printed, and landlords (especially older ones) might still require cashier's checks and/or money orders for payment. But even this may be phased out, with the aforementioned Zelle and Venmo apps, PayPal, and even card-swiping devices such as Square for phones and tablets. It is unlikely, however, to disappear completely, because one group
* Banking runs are considered to be often impacted by the perception of a bank being solvent. In reality, most banks can't withstand all of their liquid money being hit at once. The FDIC knows this, and their list of banks most likely to fail is considered to be top secret, since publishing the list will cause runs on those banks that will in turn cause them to fail. An example is the Washington Mutual bank failure in 2008 - it was going relatively okay, until a bunch of people heard the bank might fail with the economic downturn. Then, in one day, 10% of its assets were withdrawn by panicky account holders, causing the bank to fail and get bought out by Chase.
* Bank Panic takes place in an Old West bank complete with robbers, customers and bombs to shoot.
* Bank robber George Nelson hated to be called "Baby Face". Bit of a
* Bank Robbery: Also known as a bank heist, a classic crime in which thieves try to steal as much money as they can from a banking firm.

* Bank Robbery: Just what it sounds like, one or more people rob a bank.
* Bank runs, where people believe that their bank is failing and rush to take their money out of it, which causes more people to believe that the bank is failing, which causes more people to take their money out of it, which eventually causes the bank to truly fail, even if the original reason for thinking that that the bank was failing was completely false.
* Bankruptcy Barrel: When the character is wearing a barrel to show that they are poor.
* Bank Shot. Ballentine and Stosh park the stolen bank on a railway crossing. When the signals go off and the guards hear what sounds like a train approaching, they abandon the bank rather than get smashed.
* Bank Shot, Ballentine drives the scraper into a barn in order to hide it. However, El has selected the wrong barn, and it is too small for the scraper. As a result, Ballentine demolishes the entire structure.
* Bank Shot because they don't have time to rack the safe on site. Hermann then sets to work cracking it. He cuts it, drills it and finally blasts into with nitroglycerin before it opens.
* Bank Shot, Dortmunder and his crew steal a bank. (It was a temporary branch established in a mobile home, but even so, it shows some serious ambition.)
* Bank Shot, El prevents the guards from noticing the sound of the approaching truck by revving a very noisy motorbike outside the bank.
* Bank Shot, one of the guards jumps out of the bank's window without opening it first.
* Bank Shot (see "Literature"), a bank has its office in a temporary mobile home, so the crooks decide to steal the whole trailer.
* Bank Shot starts with Ballentine in prison. Karp visits him with plans for a bank robbery and a plan to allow him to bust out.
* Bank Shot, the guards in Streiger's prison wear uniforms that make them look like Brownshirts.
* Bank Shot: When Ballentine breaks out of prison in a 50-ton scraper, Streiger chases after him in a golf cart.
* Banks, like in the case of Walk the Moon ("Anna Sun" in 2012 and "Shut Up and Dance" in 2014, respectively). Even when the free song system was overhauled in early 2015, you can still expect artists featured as "Free on iTunes" to have their popularity boosted by it. Sadly, free songs were finally given the boot in June 2015, after the release of Apple Music.
* Banksy and notorious graffiti artist, makes no public appearances and has never had his identity revealed. This is certainly due to the fact that his artworks, while hugely popular and sought after, are mostly installed without permission and considered by law to be acts of criminal vandalism, for which he could be publicly prosecuted. On the other end of the spectrum, Banksy is also hated by many other graffiti artists, supposedly for plagiarizing their techniques and messages.
* Banksy piece, painted on a wall in Shoreditch in 2003 (the special effects were supplied by deep fat fryer).
* Banksy's paintings was put up for auction at Sotheby's in London, and sold for £1.04 million. Of course, no one told anyone that there was an automatic paper shredder inside the frame, activating itself right after the sale...
* Bank Toaster: Banks don't really do these kinds of promotions anymore, and most of the old targets (the titular toaster) are now too cheap for anyone to put them under consideration.
* Bannakaffalatta had an "accident", and his torso appears to be entirely cybernetic.
* Banned Episode: An episode of a television show is removed from circulation because of a controversy concerning it.
* Banned Episode "Man's Best Friend" ends with Ren beating his owner George Liquor to a bloody pulp with an oar... after which he commends Ren for being such a good guard dog and the cartoon closes with them dancing along with Stimpy to upbeat Raymond Scott music.
* Banned Episode "Man's Best Friend" has George Liquor giving Stimpy a "Lawn Cigar"

chew toy.
* banned episodes torturing the Safari Warden by (among other things) making him listen to Meowth's singing.
* Banned Episodes were also skipped in English and other non-Japanese languages.
* Banned Episode: When an episode of a TV series (or other installment of a media franchise) is prohibited from being shown again.
* banned for women in competition. As of the 2017-2020 quad, rollout skills (except for a simple dive/hecht roll), including the Thomas salto, have been banned for both men and women.
* "Banned From Argo,", and many other filkers started to follow suit. (It was created as a bit of fluffy filler to pad an album out to length. The fact that what was intended as a throw-away song became as popular as a careful crafted and much cared for piece didn't sit too well.)
* Banned from Argo arrive on the planet where the crew is enjoying shore leave, and promptly flee horrified from the carnage.
* Banned from Argo) hacked Argo's main communications net to make all callers appear naked.
* "Banned From Argo" is so insanely popular, it has shown up in fic. As an actual drinking song. The kicker? "Argo" recounts the exploits of the TOS crew, and the song showed up in an
* Banned from Argo reasons the crew in question got kicked off the planet.
* banned from entering the United Kingdom for "inciting hatred" against Muslims.
* Banned from improbable places several storeys off the ground gets old quite quickly.
* Banned in China and even has the Italian-born Maria Grazia Cucinotta reprising her role as Sideshow Bob's Italian wife Francesca (she's the VA for the character in both dubs).
* Banned in China: A work for some reason is banned from ever being released in a specific country.
* Banned in China: A work is banned from being released in another country.
* Banned in China: A work is banned in another country, often because of featuring content that the country finds offensive or morally objectionable.
* Banned in China: A work of media has been (legally) prohibited from being released or distributed in a specific country.
* Banned in China "China" is to circulate the tapes. This kind of thing is especially risky, though, because the pirates who might circulate the proverbial tapes for you might not have access to the work themselves — the only versions you could get are shady downloads with malware in them.
* Banned in China: Media that has been banned from an entire country, usually due to the national government's censorship laws.
* Banned in China: This particular object should be banned due to its inappropriate content.
* Banned in China: When a work of media is officially outlawed in a certain country, and one may get into legal trouble if they attempt to obtain, possess, or distribute it.
* banned in fencing. Refusing to shake hands with your opponent after a bout can result in disqualification.
* banned in France, which was also proven false. For the record, the show has never officially aired in France as of now.
* Banned Move Match — One or both of the competitors is not allowed to use their finishing move or else they will be disqualified. This type of match often forces the banned wrestler to get more creative and use moves they don't normally use in an attempt to win.
* banned on Canadian radio due to the repeated line "two guinea tees", with the second word in that phrase being, in the words of the CBSC, "a disparaging racial epithet referring to Italians". (However, a Canadian station could theoretically air G Fella's 2018 cover of the song, which changes some lyrics including the offending one.)
* Banner, by repeatedly dropping him in populated areas where he wakes up to find

entire square city blocks leveled, complete with strewn body parts.
* Banner does have the Devil Hulk personality inside him, which is pure evil... possibly.
* Banner of the Stars opens with a fierce battle which results in the main characters' ship being destroyed. It turns out it was a mock engagement. It wasn't technically unwinnable, but as Lafiel and her crew were far less experienced than their opponents, nobody thought they'd win and it's made clear there was no shame in losing (Lafiel still feels disappointed in herself regardless).
* Banner of the Stars. The Abh Admiralty use a particularly big one to monitor strategic fleet movements.
* Banner of the Stars, the fall of Lakfakalle, the Abh capital. Up until that point, the war had been pretty much going exclusively in the Abh's favor, and then their enemies turned the whole war around in a single, utterly disastrous surprise attack.
* Banners are dropped by enemies every 50 kills, and there are banners for almost every enemy. They give you a bonus in combat with them when they're placed near you, which is useful for common, predictable enemies like zombies. Less so for obscenely rare ones such as the Nymph.
* Banner Ships: Most factions have ships designated as the flagships of a given force's general or admiral. The Republic simply assigned regular
* Bannertail: The Adventure of Gray Squirrel, wherein Banner and Sue have lots of adorable squirrel babies in the final episode.
* Banning "dihydrogen monoxide" has become a very popular petition any time and place there is an abundance of enthusiasm and a lack of information on scientific matters. Even

* Banshee finale, an army of well-armed hitmen marches on Kai Proctor's home. He calmly meets them head-on, guns blazing, but the outcome is not shown.
* Banshee has great speed and an aerial advantage but once he's been downed, he's out for the count.
* Banshee has trespassed on the site and is sitting inside the building. Even when you make sure that the building is conveniently empty, you cannot be sure that someone will not just wander in attracted by the emptiness.
* Banshee is the longest serving member of the Banshee police department and everyone assumed that he would be promoted to sheriff when the old sheriff died of cancer. When he finds out that the town council hired an outsider instead, he is not happy.
* Banshee: Lucas has had sex with quite a few women in a short amount of time.
* Banshees: In the original myths, their voices weren't harmful in themselves, their wail was only an omen of death to come. In modern versions, however, their blood-curdling screams can kill or paralyze.
* Banshee's Last Cry spies working for various intelligence agencies in Nagano as they try to get the drop on the other rival spy.

* Banshee the main character and his girlfriend Anna plan to steal $10 million worth of diamonds and then assume new identities so they can get away from their life of crime and Anna's mob boss father. The heist goes wrong and he spends the next 15 years in prison while Anna gets away with the diamonds and makes a new life for herself as a realtor, a wife and a mother in the small town of Banshee.
* Banshee the main protagonist's past is so mysterious that after two seasons we still do not know his real name or even the name he was using before the start of the series. He spent the last 15 years in prison but before that we only know that he was a thief working for the Ukrainian mobster Mr. Rabbit. When he was arrested even the FBI did not have any information on who he was or what his birth name was.
* Banshee to Cal Moody that ends in Cal missing most of his front teeth.
* Ban's reasoning for investigating spirits turn out to be much more personal than for the money -
* Ban takes it to the next level with his magical ability "Snatch". He can steal anything without making contact or even seeing the item. And with a weapon, he has a range of hundreds of meters.

* Bao-Dur: "the alien" or "The Iridonian" (which is what other members of the party call him as well)
* Baoh (based on the manga of the same name), features the creation of a humanoid bio-weapon that naturally turns on its creators. Dr. Kasuminome, the head of the project, is Baoh's final victim, and can't help gushing about it's remarkable killing capacity, even while his body's gushing blood when eviscerated by Baoh.
* Baomals, ravenous sea monsters resembling giant sea turtles with two snakelike heads, are stated to have been ravenous predators of aboleths in the distant past.
* Bao was an ex-South Vietnamese soldier who saw action in the Vietnam War. He had fought in the defense of Tan Son Nhut Air Base before he fled Saigon when the North Vietnamese Army captured it. He later settled in Roanapur and founded the Yellow Flag bar.
* Baphomet: A goat-headed, triple-horned, black-winged demon with both female and male attributes
* Baptism clothes are only really required to be predominantly white with trimmings and/or decorations of the color corresponding to the child's birth season. Families very much do what they want with that depending on the resources, money and sewing talent at their disposal. The incident that gets Myne mistaken for being richer than she actually is happens because the alterations brought to her older sister's gown from the previous year so it would fit her much smaller frame wind up making it excessively decorated for a poor commoner's gown. On top of this, she's wearing one of her own elaborate flower hairpins for the occasion.
* Baptism of Fire. Zoltan Chivay tells the gang he'll signal them by making a sparrowhawk's call. When they call him on not even knowing how a sparrowhawk sounds, he points out that if they hear a weird, unidentifiable noise, they'll know it's him.
* Baptiste is an ex-Talon mercenary-turned-combat-medic with powerful healing, boosting, and invincibility tech, as well as pulse rifle. Although his time in Talon taught him how to be dangerous and effective, he has reformed and is trying to save lives.
* Barack and the White House Boiz, consisting of Barack Obama (Melancholic), Joe Biden (Sanguine), Bill Clinton (Phlegmatic), and Mitt Romney (Choleric) in the RPF
* Barack Obama according to the Secret Service after they'd been embarrassed about letting in two uninvited people into the most highly secure building in the world. They wore a suit and evening gown respectively and simply acted like they belonged. When Secret Service agents didn't see them on the guest list they assumed such well dressed folk must have been somehow accidentally left off the guest list and let them in.
* Barack Obama accusations of bigotry since historically white supremacists have used red-baiting to justify hostility towards Blacks and Jews.
* Barack Obama administration, many journalists on both the left and the right responded with articles saying they should learn to code. In early 2019, when a lot of these same journalists were laid off, the line "learn to code" was thrown back in their faces.
* Barack Obama and could only see the stripes on his pants when he was standing next to her. Apparently the chestful of medals didn't register. The General, for his part, thought it was funny.
* Barack Obama, and the name Sasha also jumped in popularity. Notably, this hasn't

affected the popularity of Natasha, Sasha's rarely-used full first name, which has only decreased in popularity since the family came into public prominence.
* Barack Obama at an event because he was standing in her periphery, she wasn't wearing her glasses and all she could see were the stripes on his pants. The general laughed it off, while she was mortified.
* Barack Obama became the subject of a number of memes depicting him coming up with pranks to play on the incoming administration. Biden thought it was hilarious.
* Barack Obama before his presidential run and Oprah famously declared him "The One."
* "Barack Obama" by Radio 1 DJ Chris Moyles was the first verse of "LSF" by Kasabian scored for strings and percussion with the lyrics replaced with the words "Barack Obama" repeated over and over. He would challenge both guests and the people that worked on the show to sing along to this. When he released his album
* Barack Obama during one of the Democratic primary debates in 2008. Others maintain that he was just scratching his nose with his middle finger.
* Barack Obama, Eric Holder and Janet Napolitano to the Three Stooges.
* Barack Obama has an extensive analysis of the claim, including direct quotes.
* Barack Obama: "Hopemonger" was used in his stump speech as a way to characterize how his detractors might respond to his message.
* Barack Obama launched his campaign for the 2008 presidential election and eventually won it.
* Barack Obama of CNN. In the interview, Romney stated, "Russia, this is, without question, our number one geopolitical foe. They — they fight every cause for the world's worst actors."
* Barack Obama, opponents during the 2008 presidential election, to the point where Obama gave McCain’s eulogy at the latter’s funeral a decade later. McCain would also become this to many Democrats during the administration of Obama's successor, Donald Trump, being seen as a more reasonable and honorable man who embodied the values of the Republican Party that Trump lacked.
* Barack Obama, or any Democratic president of the 20th century. But especially Obama.
* Barack Obama's inauguration. A "Dillan Tactical Vehicle", for those who care. The minigun folds in for easy, low-profile travel.
* Barack Obama's mother was named Stanley Dunham, after her father, but went by her middle name, Ann.
* Barack Obama's parents were rarely together even when they were still married, as they were college students who studied separately. Barack was raised by his maternal family all his life. His father left when he was two, and the pair only met once after that.
* Barack Obama Sr. becomes President of Kenya. He later gains custody of his son after his mother and stepfather die in a car crash; Barack Jr. goes on to serve as personal aide to his father's ally Idi Amin and eventually succeeding his father as President.
* Barack Obama stated that he and his wife Michelle had decided to weaponize this trope. They promised their daughters Sasha and Malia that if either of them ever got a tattoo, both parents would get the exact same tattoo, in the exact same place on their bodies, and would show it off at every opportunity, calling it a "family tattoo". By all accounts, the threat worked perfectly.
* Barack Obama stealthily does this to Mitt Romney. While commenting on how it would be awkward to have a 1st, 2nd, and 3rd Lady, he counts off with his middle finger, pinky, and ring finger, in that order.
* Barack Obama. That hasn't stopped people up to and including Senator Claire McCaskill from believing that he's real and completely serious; when called on it, most people who fall for it claim some variant of this trope, saying it's impossible to tell facetious versions of conservatives from the real thing.
* Barack Obama. The line was actually part of a larger speech in which Obama explained why wealthy citizens should pay higher taxes.
* Barack Obama used (and likely lampshaded) this trope at his speech on the White House correspondents dinner, most likely to mock people who claim he can't speak

without a teleprompter.
* Barack Obama used the popular "Thanks, Obama" meme while he was still in office by posting a video of himself trying to dunk a large cookie into a glass of milk that was clearly too small for the cookie. The "Thanks Obama" subreddit promptly shut down, noting that there was no way anyone else could ever top that.
* Barack Obama was asked who gave him the middle name of Hussein, he quipped, to paraphrase, "somebody who never thought I'd be running for President of the United States."
* Barack Obama was very successful with his branding, so much so that even during the campaign,
* Barack Obama!" which he'd gotten from NAACP worker Edith Childs at one of his campaign stops.
* Barack Obama (whose nerd bona fides can be found on his page) is a huge Chicago White Sox fan, going so far as to wear his favorite hat of theirs every time he throws out the first pitch at a baseball game.
* Barack Obama with the weight of being Commander-In-Chief of the U.S. armed forces:
* Barack Obama yelling "Yes we can!" in one of his character songs from the time. This occurred roughly in the range of 2008 to 2015/16, though it peaked from 2009 to 2012/13.
* Barack style-heist to steal a diamond stored beneath the White House. The plan was to get themselves nominated by both tickets so one of them would have to be elected, then swipe the diamond and fake their own deaths. At the end of the episode, Barack decides to actually give being president a whirl, and convinces Michelle to keep their fake marriage going.
* Barad-dur: as a reflection of how long it took to build, the tower has different segments built in slightly different ways, to reflect that a bunch of orcs had "died off" and construction was restarted later.
* Bara fans seem to love any combination of Captain Falcon/Snake/Ganondorf.
* Bara Genre has three possible endings, the best one (the Boyfriend Ending) only being achieved if you do not use any save points.
* Bara Genre, Office of Repression, Streets of Liberation, Garden of Vice, Den of Lust, and Innermost Desires.
* Baraggan Louisenbairn, the Segunda Espada, has a name inspired by a Mexican architect, Luis Barragán. Despite the fact that Las Noches (Barragan's base of operations) didn't even have walls or a roof when
* Barago in the Japanese series Garo has an x shaped scar across his face...and he is evil.
* Baragon. This time, the suits have stayed in good condition for a longer period.
* Bara has welcomed Rillaboom with open arms not unlike Incineroar, due to its buff body and its slight wildman aesthetic.
* bara in general. Bulkmon is looking to be right behind them as well. They still have their female fans, if at least a few.
* Barairo Mitsubachi, a new school teacher, Aoi, accuses his benefactor, Kazoumoi, of being a "dirty old man" when the latter fondles him as he's cooking dinner. Aoi is wearing an apron at the time and Kazoumoi promises to show him what being a "dirty old man" is really about. In the next frame, a protesting and embarrassed Aoi has been completely stripped of his clothes under his apron.
* Baraka also has a number of finishers that involve chopping his opponent's arms off.
* Barakamon, all the child characters are voiced by actual children. This isn't the case in the English dub, where they're voiced by adults.
* Barakamon and both of their parents wear glasses as well. There is also Jou Tatenaga, who is a adorkable glasses girl, and a bit of a doormat
* Barakamon is either older and married with children, or single, and the few times one of those single characters showed romantic interest in another, it wasn't returned. The only non-married characters shown to be in a relationship are two side characters from the later part of the manga, and they are forced to keep their relationship secret.

* Barakamon, the title of the first episode of the anime even refers to her as such.
* Barakamon, which represents how cool and mature she feels after learning how to read katakana. Her face goes back to normal when she realizes she read a word wrong.
* Baraka said it should be the presentation on the "golden record" of the next spacecraft to go outside the solar system, as it is essentially a wordless montage of Earth's greatest sights and sounds. That Ebert included it in his list of the greatest movies ever made is proof-positive that it succeeded with aplomb.
* Baraket, Sword of Pride is a rapier with an invisible blade. It can cast a deadly illusion to scare its target and their allies to death.
* Bara Magna, Aqua Magna and Bota Magna due to the forces of the Energized Protodermis within its core. Although in some media, it's depicted not as a true "Kaboom", but more like a large planet spitting out two smaller ones.
* Barangay 143 (co-production with Japanese & Singaporean studios)
* Barangay 143 instances of these. In the Philippines, Coach B visits the grave of his dead son Baste (captain of the local basketball team who was shot dead by a riding-in-tandem gang) in the pilot; and in South Korea, in the next episode, Bren T. Park (hitherto captain of his own basketball team) visits the graves of his entire family—father, mother, and little sister—who all perished in a frozen lake en route to his last game.
* Bararella, a lesbian love scene between Barbarella and The Black Queen was cut, though it was rumoured to be shown in the International Version.
* Baratheon line is effectively extinguished. The legitimate ones were killed following the Battle of Winterfell, while the King's Landing branch (the three supposed offspring of Robert Baratheon and Cersei Lannister) which is Baratheon in-name-only died one by one under different circumstances. Joffrey was poisoned for being a madman and a threat to the Tyrells, Myrcella was poisoned due to a potentially avoidable rivalry with Dorne thanks to Tywin Lannister allowing Gregor Clegane to kill Elia Martell years earlier (along with her brother's death when the two clashed), and Tommen committed suicide when his mother murdered all of her political adversaries (including his wife) with a massive explosion that killed hundreds (if not more) of his subjects. Ultimately, Lannister pettiness was the King's Landing branch's downfall, and only Joffrey could be said to have invited the fate brought upon him. All that's left of the once great house is an unknown number of bastard children fathered by Robert. Most of the known ones (except Gendry) were purged by King Joffrey in the beginning of his reign and unlikely to ever be legitimized by the current regime in order to not threaten it. As far as could be known, Gendry is the last Baratheon, and he's an unacknowledged bastard with no way to prove his lineage if anyone asked. In Season 8, Daenerys legitimizes Gendry.
* Barba gets a variation when a lawyer asks Olivia if her time as an SVU detective has led her to think all men are rapists.
* Barbapapa as a whole; meaning that it might be working up to Stage X.
* Barbapapa: Barbapapa's name comes from the French term for cotton candy, "Barbe à papa". Some people who don't know that think Barbapapa is spelled "Barbababa".
* Barbapapa. The only downside being that this dub was only made available on DVDs in South Korea.
* Barbapapa who can turn into any shape. They can take the shape of animals or objects, but their colour and face stays the same.
* Barbapapa would feature Detective Barbabravo, his assistant Barbabright, and his dog Lolita.
* Barbara and Lotten, the two antagonists of the Crashtown Arc, and clearly two of the most vile villains in the series, only officially married in the dub version, but still two lovers who were unrepentantly evil. (In fact, there's some debate over which was worse among fans; Barbara seemed loyal to him, while he was willing to leave her to die at the end to save his own hide, but on the other hand, he was the

* Barbara Anne Minerva, post-Crisis, was attracted to men and most recently had shown an attraction to Hunter Zolomon (Zoom, the second Reverse-Flash). Here, she's attracted to women, although it's not clear what her sexuality is.
* Barbara Bel Geddes' character, Miss Ellie, does not appear in the rebooted series, as the actress had passed away in 2005. She is stated to have died of a heart attack sometime between the end of the original series and the pilot of the rebooted series.
* Barbara Billingsley, Ken Osmond, and Frank Bank made cameo appearances in the
* Barbara Billingsley's most well-known role during her heyday was June Cleaver, the housewife in the archetypical '50s
* Barbara breaks up with Jon halfway through the movie over him lying about his porn addiction.
* Barbara Cartland was at one point among the most widely read authors in the world. Yet she only wrote romance novels that literary critics dismissed as shallow and formulaic.
* Barbaracle has eyes on its hands. Then again, each "hand" is an entity in itself.
* Barbaracle is a humanoid mass of barnacles, although it downplays the trope a bit by being only seven creatures.
* Barbara Eden to conceal her pregnancy, and the results were very effective.
* Barbara Goodson pilot, she had to reaudition for the part of Rita Repulsa. Feeling humiliated and frustrated at the producers' comments that she didn't sound "angry enough", she decided to screech at them as loudly and angrily as she could, fully knowing she would fail the audition. And thus Rita's iconic voice was born.
* Barbara Goodson. She mentioned going through a lot of water and cough drops, and we thank her for suffering through.
* Barbara Gordon (Batgirl) after breaking up with Bruce renewed her relationship with Dick. Then she found out that she was pregnant with Bruce's child. This caused a fight between the two men before Barbara miscarried while fighting muggers. Although the offscreen relationship between Bruce and Barbara was already controversial due to the large age difference, many fans felt that this plot would be more at home in a soap.
* Barbara Gordon / Oracle, showing how Commissionner Magret's daughter got crippled following an attack by the villainous Banana-Man... who threw a banana peel at her, on which she slipped (which is shown in slow-motion and with dramatic music).
* Barbara Gordon, the first "true" Batgirl, wore high heeled boots in her earliest appearances. Her cowl was also modified to let her long hair flow out.
* Barbara Gordon was a star student throughout her life, and also took various martial arts classes from the age of 6 up into college.
* Barbara Gordon when she overhears a discussion on Black Canary’s one night stand with Batman.
* Barbara Gowdy's short story, "We So Seldom Look On Love" focuses on a female necrophilic and her affair with a guy who commits suicide to get her to love him for real.
* Barbara had a heartbreaking solo number named "Children We Never Had", which ended with the revelation of her having suffered a miscarriage in the past. Because of this, she would consider Lydia as the "daughter they didn't have". This song was eventually replaced by the much more energetic "Barbara 2.0".
* Barbara Hambly, a character dreams of the ancient ritual in which the cursed necklace was used.
* Barbara Hambly and sequels, vampires can communicate with people's dreams.
* Barbara Hambly, a troupe of girls playing nymphs is entertaining a Roman banquet when a troupe of actors as satyrs burst out on them. Marcus notes that either the girls were consummate actresses, or they had not expected to be actually molested by the satyrs.
* Barbara Hambly authors, and in fact offered to rewrite the setting as a generic Western, but the editor told her it wasn't necessary.
* Barbara Hambly magic is greatly distrusted, as it is so easy to abuse Muggles. Anybody who turns out to be a wizard is not allowed to marry, to own property or to

be in any position of power (regardless of whether or not they use their magic). Not being allowed to marry is sold as a law to protect the spouse from unreliable people who can't earn a wage (due to the other laws) but appears to be an attempt at eugenics.
* Barbara Hambly — despite being a vampire — has a distinctive sense of honor due to his nobility (noblesse oblige).
* Barbara Hambly series has two magicians in a medievalish time setting respond to a call for help from beyond the Void from a world without magic. They travel through the Void to help those mages...and land in the Third Reich. Luckily the hero is pretty smart and quickly realizes they're the bad guys.
* Barbara Hambly shows Antryg and Joanna communicating with an extra-dimensional via Pi and Planck's Constant.
* Barbara Hambly, the eponymous, and previously very traditional, women secure the services of mercenary captain Sun Wolf to train them in weapons use so that they can free their men from imprisonment in the local mines and help to overthrow a vicious wizard/warlord.
* Barbara Hambly was hailed by at least two reviewers as a thrilling "debut" novel... from an author who'd been publishing fantasy and horror novels for fifteen years.
* Barbara Hambly younger — now looks like being forced into the match instead.
* Barbara Havers mean it, it is then a fairly reasonable bet that shit just got serious.
* Barbara in general is like this towards Dick’s other love interests especially Starfire. Though this was played more tragically
* Barbara in. Since then, Barbara has been Dick's main love interest (with Starfire being his second).
* Barbara Keane murdered her parents, claiming this was because they were abusive. It's left unclear if they really were, however.
* Barbara Mandrell and the Mandrell Sisters, Irlene was musically gifted and her "ditz" persona was comedy improvision.
* Barbara Mandrell's "Tonight" (1977) and John Conlee's "Lady Lay Down" (1978) are both lush waltz-tempo
* Barbara Mertz wrote non-fiction works on antiquities under her own name, and fiction with both mystery and romance genre elements. The works that tilted more to the romance genre side were published as by Barbara Michaels and those that had a bigger mystery element as by Elizabeth Peters.
* Barbara Robinson wrote a whole little series of books whose plots depended on this trope:
* Barbara Stanwyck. She kills her aunt as a young child and stops at nothing to make sure no one finds out.
* Barbara Stock, who portrayed Cliff's love interest Liz Adams in the final season, originally played an unrelated character Heather Wilson in two episodes in Season 5.
* Barbarastollen or "Zentraler Bergungsort der Bundesrepublik" (central retrieval site of the federal republic of Germany). The storage location is covered by more than 200 meters of granite.
* Barbara the Fair with the Silken Hair — film adaptation of a Russian fairy tale
* Barbara; they're subsequently "rescued" when a big fuck-you corporation arrives to bulldoze paradise and put up luxury condos, and by the end she's back in NYC, restless and miserable. On the evening of December 7, 1939, Barbara left her home and was never seen again. Nobody really knows what happened that night.
* Barbara too—Henry and Lucille look like they should be grandparents, but their resurrected son Jacob is still only eight.
* Barbara Walters interviewed Herman Cain as one of her most fascinating people of 2011 and gave this when he answered a question about theoretical cabinet positions with he would like to be Secretary of Defense. This from a man who admitted (and demonstrated) he didn't know squat about foreign affairs.

* Barbara Walters regarded that rug as fair game when it came to her snarky comments.
* Barbara Wright from the very beginning ended up marrying her fellow travel companion Ian. Before that, she held a higher headcount than the other protagonists combined and at one point mowed down a group of Daleks with a lorry. Note that Barbara was a history teacher.
* Barbarella: According to this film, in the 41st century, the entire planet Earth will have a single president. There's also something about him having authority over the entire Solar System but it's not clarified.
* Barbarella aliens, though things tend to work themselves out in her favor.
* Barbarella: All the intelligent aliens that Barbarella meets on the uncharted Planet 16 look entirely human.
* Barbarella: At one point Barbarella smokes "essence of man" (made by trapping a guy in a giant hookah). She only smokes briefly before getting caught by the villains, so we don't see the effects.
* Barbarella, Barbarella is rescued by a native of the planet she's on. When he asks that she make love with him in payment for the clothes and transportation he's providing, she describes some kind of ritual involving computers and pills. "Make love? But no one's done that for centuries!" The pill-based intercourse still provides an orgasmic response, though Barbarella finds she likes the old-fashioned version better.
* Barbarella: Barbarella kisses Pygar when they get trapped in the Chamber of Ultimate Solution, which will get them horribly killed in one of many ways since it's a suicide booth. They do get rescued.
* Barbarella: Barbarella understands the Sogoites' language thanks to the multi-purpose bracelet on her left wrist translating it for her.
* Barbarella cannot be consumed by the Mathmos because of her innocence.
* Barbarella character claims to be an angel and is apparently innocence embodied, yet displays no supernatural powers and doesn't appear to be associated with any religion.
* Barbarella comic there's a single-panel gag about Barbarella's current lover — a robot guy — thinking his movements are "a bit mechanical". Might be better in the original French.
* Barbarella: Dildano is the leader of the rebellion in Sogo that wants to overthrow the Black Queen. Barbarella allies with him because if they capture the Queen, she can learn the whereabouts of Durand Durand.
* Barbarella features the eponymous heroine and her extensive wardrobe, which comes in handy as so many of her outfits — often made from perspex, plastic, fur, chainmail, or vinyl — get destroyed during the course of the movie. The citizens of Sogo on Tau Ceti XVI, which Barbarella is sent to investigate, favor bondage-themed outfits, featuring leather and chains.
* Barbarella. He thinks of Earth as the "planet revolutions" and is very admiring of its culture (this being set in the far future where Earth has become ultra-pacifistic). His attempt at a revolution in Sogo is inspired by Earth history and he enjoys partaking in other aspects of the culture, while deriding his own as savage.
* Barbarella. His quite large wings must make it impractical for him to wear upper body clothing, so it's probably justified.
* Barbarella: One of Barbarella's sex partners is the blind (and initially flightless) angel Pygar, who's also her most enduring ally.
* Barbarella: Our heroine wakes up after getting knocked out and thinks she's dead. Not surprisingly, since the first person she sees is Pygar the angel (or ornithanthrope).
* Barbarella: Pygar the angel is extremely ill-equipped to deal with the evil and insanity of the city of Sogo, leading to Barbarella having to save him a couple of times; from a group of Sogoites who want to shred his wings and stab him with a scythe, and from the Black Queen who holds him hostage and crucifies him.
* Barbarella seems to enjoy her experience with the Excessive Machine, until she realises it's going to kill her with sexual pleasure.

* Barbarella, so he would rather be a robot that happens to have sex).
* Barbarella that her people worship. She does this with Pygar, but it doesn't work because the Mathmos can't stomach his purity.
* Barbarella, the BGM is a slowed down music box version of the movie's eponymous song.
* Barbarella: The Black Queen is confirmed to have more than a few screws loose before we even see her. When Barbarella is in the Labyrinth, Prof. Ping explains to her that the reason the Labyrinth's prisoners eat orchids for sustenance, when they are supposedly difficult to cultivate and expensive, is because the Black Queen is amused by resenting the expenses of feeding them. Go figure.
* Barbarella: The Black Queen of Sogo is quite mad and quite evil, to the point that dissidents have taken to calling her Great Tyrant, which she doesn't mind at all.
* Barbarella: The Black Queen wants both Barbarella and Pygar, who reject her. Barbarella and Pygar have already had sex, and while it's dubious to call their relationship romantic (it's a sex comedy), they do feel some loyalty for each other.
* Barbarella: The evil Black Queen is introduced saving our helpless eponymous heroine from two men who have cornered her in an alley, likely to rape her, by driving her knives into their backs. The reason why she'd do this is because she wants (consensual) sex from Barbarella (which she nonetheless refuses). Later the Queen saves Barbarella again from a suicide booth she had accidentally walked into. And at the end of the movie, the Queen saves the entire universe by killing Durand Durand, who wanted to be the despot of the entire universe.
* Barbarella: The evil Black Queen of Sogo would like to "play" with Barbarella, our heroic, innocent astro-navigatrix, but Barbarella is very much not interested. Then the Black Queen tries to turn to the similarly pure angel Pygar, who turns her down as well.
* Barbarella: The insane Black Queen of Sogo wields two double-bladed knives quite adeptly, and she drives them through Barbarella's attackers.
* Barbarella (the star) and Roger Vadim (the director) were married during production.
* Barbarella, when Barbarella first meets the Black Queen of Sorgo, the Queen is in disguise wearing an eyepatch.
* Barbarian featured a spinning jumping backslash move that if launched with the correct timing and distance to the enemy could instantly decapitate them.
* Barbarian feature, which lets you add your CON modifier on top of the standard 10 + DEX for your Armor Class while not wearing any armor. Now, this is explicitly meant to involve you wearing simple clothing or maybe just a loincloth at the minimum, but nothing is stopping you from not wearing a stitch.
* Barbarian Heroes who ride mammoths and other enormous mammals into battle.
* Barbarian Hero game with no interest in retiring, and never complains of back trouble again.
* Barbarian Hero orchestrated a revolt amongst the Cythron's human gladiators.
* Barbarian Hero story indeed seems done with, but that does not mean he can't participate in the story of others.
* Barbarian Hero: Such a hero is likely to be portrayed to possess some kind of "primeval wisdom" that the more civilized characters have lost.
* Barbarian Longhair: Nothing screams badass like a guy with long, unkempt hair.
* Barbarians like Cohen have a number of rules of conduct among them, which they rely on to protect them as "heroes" — the sort known for grand deeds, not good ones, since they're perfectly willing to pillage and rob "soft" civilized folk, or rob temples of gods but never rob the grave of a fallen hero. You obey the rules or else they stop protecting you. Even the villains they face follow rules, like hiring the most stupid mooks, having easily breakable dungeon cells, and giving the Hero a chance to escape because, by the rules, the villain can then
* Barbarians of Lemuria. Since the game fully intends for the player characters to follow in the footsteps of Conan and similar fantasy heroes (see above under Literature), this is entirely genre-appropriate.

* Barbarians Rising: Goth leaders Fritigern and Alaric lost their homelands in what is now Eastern Europe to the invading Huns and crossed into the Roman Empire under an agreement with Emperor Valens promising them resettlement within the Empire. When the local Roman commanders betray their end of the agreement, Fritigern rebels against the Empire and kills Valens at the Battle of Adrianople. In Alaric's adulthood, the Romans initially co-opt the Goths as mercenaries to help battle the Huns, but Alaric gets tired of waiting, sacks Rome, and is finally granted an independent kingdom in modern-day Aquitaine as part of a peace settlement.
* Barbarians Rising, Hannibal and the rest of the Carthaginian people are played by black actors. In real life, Carthage's elite was formed by people of Phoenician ethnicity, a Semitic group closely related to Middle Eastern groups such as Jews and Arabs, while most of its African vassals were Berbers - none of whom are black.
* Barbarians VS Berserkers: Both are classes that tend to live in the moment, and fight in the Red color pie. They are distinct, with "barbarians" being primitive and "berserkers" having some way to increase their power, or being forced to attack each turn.
* Barbarian (Titus) that have charcoal dark gray skin and claws and pronounced canines.
* Barbarian (Titus) who among other misdeeds nearly destroyed her father's domain.
* Barbarian Tribe he calls "Neuroi", who might or might not have been ancestors of the Slavs. He records that they were said to all turn into wolves for a couple of days a year. This is generally interpreted as a reflection of shamanic practices and/or belief in werewolves.
* Barbarian Tribes implying the extent of the barbarian kingdoms go beyond equivalence to just Scandinavia.
* Barbaric Bully: The most common stereotype of bully in fictional works.
* Barbarossa and the other Barbary Pirates were, for a while, technically privateers for the Ottoman Empire. Generally quite successful, many Europeans fled to Algiers and Tripoli to join them. It wasn't until the mid 19th century that they were stamped out, though by then their power had decreased dramatically.
* Barbarossa focus (specifically the Nazi invasion of the Soviet Union), but the art is all WWII-themed cute anime girls.
* Barbarossa Regulations Rear-Area Security Commander's instructions) these were eliminated wherever they were found by whatever forces were available — whether Army, Police, or native auxiliaries in German service ('Hiwis'). The Partisan War in the occupied USSR killed at least 5 million.
* Barbary Coast Bunny", Nasty Canasta (a completely different character, but just as big) has a small donkey who, as Nasty ties a boulder-size piece of gold on his back before riding him, wears an Abe Vigoda-like look of hangdog resignation.
* Barbary Coast Bunny Nasty Canasta was a sore loser. After stealing gold from Bugs in the beginning and using it to open a casino, Bugs comes in seeking revenge and proceeds to win every game in the place, even though most of them are rigged. Finally, after Bugs beats his full house with four aces in poker, Canasta pulls out a gun and tries to rob Bugs - who spins the pistol's cylinder, causing it to shoot coins. (The last scene of this is usually edited; Canasta tries to do the same thing as Bugs leaves, only to shoot himself in the face.)
* Barbary Coast Bunny posing as a rube in order to get back the gold that Nasty Canasta stole from him. At Canasta's gambling palace in San Francisco, Bugs passes off his own skill and prowess as beginner's luck.
* Barbary Coast Bunny". The villain gets a full house, to which a dejected Bugs (disguised as a gullible country bumpkin) moans, "Gee, all I got is two pair. A pair of ones, and another pair of ones." He is referring to a Quad of aces, the second highest value hand in the rules of poker. He also manages to win several other casino games, despite the fact they've all been rigged by the same villain.
* Barbary Coast, government undercover agent Jeff Cable recruits wanted man and casino owner Cash Conover to help him take down a Klansman running a massive extortion scheme.
* Barbary Coast: In "Arson and Old Lace", fishermen on the Barbary Coast are paying protection money to The Shark, though no one seems to know who he is. Cable eyes a

handful of suspects, arranging a boxing match to smoke out the Shark...a match that pits the champion against Cash.
* Barbary Coast: In "Funny Money", Jeff's plan to find a stash of counterfeit money goes sour when the counterfeiter is killed. His solution is to enter a reluctant Cash in a high-stakes poker game.
* Barbary Coast: In the pilot, Lt. Tully arrests Barringer for murder, even though he knows he will be acquitted at trial. Barringer is later seen sitting in his cell with the door open, eating a luxurious meal, including a bottle of champagne. He even attempts to send Tully out to buy him a fresh bottle.
* Barbary Coast into the arms of a press gang waiting below. This is later revealed to be a common practice at Shanghai Kelly's saloon.
* Barbary Coast: Secret agent Jeff Cable disguises himself as a priest in the pilot movie.
* Barbary Coast: The Crusaders use a battering ram to break down the doors of the police station when they drag Diamond Jack Bassiter out and lynch him in the pilot movie.
* Barbed devils, or Barbatu, are rank 5. Hell's guardians and watchers.
* barbed wire board tornado street fight bunkhouse brawl lumber jack match two days beforehand failed to finish him off.
* Barbed Wire ended with ring tech spending ten minutes cutting the two men free of the tangle of wire they ended up in.)
* Barbe-Rouge, a villain claims to have buried the title character (a pirate captain) alive with his treasure. Barbe Rouge's son Eric, the only other one to know where the treasure is, goes straight to the secret cache, with the villain following him.
* Barbershop Episode: An episode where the characters go to the barbershop to get a haircut and/or shave.
* Barbershop features a white guy who actually is from the streets and thus dresses, speaks and acts accordingly - who is offended when a nerdy middle-class black guy implies he's somehow pretending to be something he's not based solely on the color of his skin.
* Barbershop involves an pair of inept crooks who stole an entire ATM and spent the whole movie trying to break it open in their hideout. Unbeknownst to them, the ATM hadn't had any money put into it yet.
* Barbershop is only working at the shop to pay his way through college, and he tends to lord his superior education over his fellow workers. Problem is, he frequently gets his facts wrong, such as when he corrects another character by saying that scallops aren't mollusks (they are) and that a local store owner is Pakistani, not Indian (no, he's definitely Indian and quite resents being called Pakistani, thank you very much).
* Barbershop. They steal an ATM from a convenience store and spend the rest of the day trying to break it open, oblivious to the fact that it has no money inside.
* Barbie: A Fairy Secret: Fairies from Gloss Angeles co-exist with humans on earth, but they keep their identities a secret by hiding their wings.
* Barbie: A Fairy Secret. Raquelle tries to discuss the best part about the film she and Barbie costarred in, only for Barbie to show up. Unfortunately, they're at a live coverage of the premiere...
* Barbie: A Fashion Fairytale, this is one of the hobbies that Barbie's aunt Millicent considers taking up after her fashion house closes.
* Barbie: A Fashion Fairytale Thus the obnoxious director distort the story of a fairy tale because of "fashionable" elements and refuse dialogue to the point of firing Barbie, while the latter tries in vain to calmly explain that the really cool tale is going to be lost.
* Barbie & Her Sisters in the Great Puppy Adventure, every place the girls visit has a clue that leads them to the next area, and, ultimately, the treasure.
* Barbie & The Diamond Castle, Alexa and Liana live together, sing together, and do everything together. They have more chemistry between each other than with their love interests, Ian and Jeremy.
* Barbie & The Diamond Castle, but it was just another outtake of the puppies

and a pegasus painting the titular castle.
* Barbie & The Diamond Castle (co-production with the United States)
* Barbie & The Diamond Castle features a troll that guards a rainbow bridge that reveals itself only if travelers correctly answer his riddle. Otherwise, he eats them.
* Barbie & The Diamond Castle hands, lest the world turn to "shadows and sorrow." The villain's actual goal in gaining the castle is to solidify her position as the only muse and rule all music, but those side effects will occur, apparently.
* Barbie & The Diamond Castle, Jeremy and Ian find Liana's handkerchief after she and Alexa spurn their advances, and they use it as an excuse to follow after the girls.
* Barbie & The Diamond Castle to create a similar barrier that not only guards them, but reflects the spells back on the villain.
* Barbie & The Diamond Castle twins Jeremy and Ian are alternating lyrics in a song to charm the heroines. At one point Jeremy ends a line with the word "orange," and Ian quips, "You know perfectly well nothing rhymes with orange."
* Barbie & The Diamond Castle, while a song is the key to the castle, the lyrics indicate that it's belief in the song that actually makes the castle appear. "Believe/Your song will hold the key"
* Barbie & The Diamond Castle (who live in a castle) into the mix.
* Barbie and her sisters all have naturally blonde hair, but her (currently) third youngest sister, Skipper, has had her hair dyed black with purple highlights for several years now.
* Barbie (and its imitations!) Some of the following are "black label" Barbies, which are marketed to collectors both of dolls and merchandise. But that doesn't stop the "3+" label on some of them (especially the Elektra one) from being funny...:
* Barbie and Ken are often regarded as the perfect couple. So long as one doesn't dwell on the fact that the guy who designed the first dolls used his own daughter and son as models.
* Barbie and the Magic of Pegasus: Annika and Aidan conclude the film figure-skating together in the Cloud Kingdom.
* Barbie and the Magic of Pegasus Annika had to figure that out the hard way.
* Barbie and the Magic of Pegasus has one such scene, where Aidan forges the Wand of Light for Annika.
* Barbie and the Magic of Pegasus is the Netherlands, as some of the outfits look Dutch and the protagonist's name (Annika) is Dutch.
* Barbie and the Secret Door, Alexa and Malucia get into a duel with their magic wands.
* Barbie and the Secret Door, Alexa has the opportunity to return to her world after escaping from Malucia, but the bond she formed with her friends makes her stay.
* Barbie and the Secret Door, Alexa returns to her world just in time for the ball. After dancing classically for a while, she turns it into a dance party.
* Barbie and the Secret Door, Alexa, Romy, and Nori surrender to Malucia's guards in order to be brought before her.
* Barbie and the Secret Door, Alexa's magic is pink and rainbow-colored, while Malucia's is blue and a sickly green.
* Barbie and the Secret Door is a little brat named Malucia who wants all of the magic in the land for herself.
* Barbie and the Secret Door, Malucia drains Romy and Nori's magic, turning them into humans.
* Barbie and the Secret Door, Malucia has a golden statue of herself, and puts a foam hand on it to cheer about her inevitable triumph.
* Barbie and the Secret Door, Malucia has Whiff and Sniff, two Sniffers who can sniff out the scent of magic.
* Barbie and the Secret Door, Malucia plans to take over Zinnia while her parents are away.

* Barbie and the Secret Door, Malucia's singing is so loud and high-pitched it shatters Grodlin's glasses while he's busy covering his ears.
* Barbie and the Secret Door, Nori has trouble walking since she's used to having a mermaid tail, and falls flat on her face when trying to take a step.
* Barbie and the Secret Door's villain is Princess Malucia, the only one in the magical land of Zinnia who doesn't possess magic of her own.
* Barbie and the Secret Door, the first version of "What's Gonna Happen" is about how Alexa would rather stay in her room and read.
* Barbie and the Secret Door, the land of Zinnia is a magical land full of fairies, unicorns, and mermaids, and its entire color palette is very bright and almost like candy. It doesn't stay that way when Malucia drains the entire land of magic.
* Barbie and the Secret Door to be looking after her while her parents are gone, but can't rein her in.
* Barbie and the Three Musketeers: In the end, Corinne, Aramina, Renée and Viveca are called to help against a new threat against the now King.
* Barbie and the Three Musketeers, Viveca, Aramina and Renee make Corinne scrub the ballroom floor with a toothbrush as punishment for the damage she did to each of them earlier in the movie when they first meet.
* Barbie as Rapunzel has Gothel kidnapping Rapunzel as a baby - out of revenge for the girl's father never loving her back. The girl is forced to be her servant for years, though only gets trapped in the tower for one day.
* Barbie as Rapunzel naturally, though in this case, her hair is shorter than most adaptations. It just reaches down to the floor, and there's no need for it to be climbed up since she's only in the tower for a couple of days.
* Barbie as Rapunzel: Rapunzel considers Prince Stefan the most handsome man she's ever seen. Given her upbringing, she hasn't seen many men before.
* Barbie as Rapunzel to spark Kelly's imagination when she doesn't know what to paint. Again, Barbie is the title character, and there are three Kelly counterparts: the Prince's younger sisters Katrina, Lorena, and Melody.
* Barbie as Rapunzel: Two kingdoms are at war. King Wilhelm has his men create a pit trap with spikes on the bottom in King Fredrick's territory. Little Princess Katrina falls in, but she grabs the edge in time. Rapunzel shows up and grabs her hand, but when she almost loses her balance, Prince Stefan grabs her and pulls them both to safety.
* Barbie as the Island Princess is in renaissance Italy based on the buildings, weather, tans, and names.
* Barbie as the Island Princess is the song, "Right Here in My Arms". At the end of the movie, the Queen and Ro realize that they're mother-daughter because the Queen used to sing it to her daughter.
* Barbie as the Island Princess", the heroine washed ashore on an island after a shipwreck, along with a chest assumed to be hers. The broken tag read "Ro" for "Rosella". Either she found it herself, of the animals told her so, as animals can explicitly read in this movie.
* Barbie as the Princess and the Popstar (said identical strangers are Keira and Princess Victoria in the former and Barbie and Princess Amelia in the latter film).
* Barbie: Barbie and Ken broke up for a few years, however they stayed close friends nevertheless. Eventually, they got back together.
* Barbie characters share names, even within their debuts coming less of a decade amongst each other:
* Barbie comic, the eponymous character (a Supermodel in her 'verse) used this as a running gag, usually with someone going "Is that Barbie, the famous model?" "Oh no she's too (tall/short/fat/skinny/whathaveyou) to be her!"
* Barbie convention, you will not find many people there who are too young to buy the dolls with their own money, and only about half of them will be female.
* Barbie Day is March 9, the anniversary of when Barbie was revealed at the International Toy Fair in 1959.
* Barbie does this to an adjacent driver at one point in "Road Rage", at 3:12 PM.
* Barbie Doll Anatomy: Depictions of nudity are kept from being too lewd by making it so the naked character has no visible nipples and/or genitalia.

* Barbie Doll Anatomy: Nude characters lack visible genitalia and/or nipples to prevent the nudity from being too explicit.
* Barbie Doll Anatomy suit, to the point of details like belly buttons showing. Really, clothes hanging like actual clothes is the exception, not the rule.
* Barbie dolls often showed Barbie in professions generally not regarded as appropriately feminine at the time they were made. Later, the dolls faced criticism for promoting unhealthily skinny body shapes.
* Barbie even hired a cute (by Chelsea's standards) little boy, Toby Templeton, to pose as Ken's "baby brother Tommy" in commercials.
* Barbie Fairytopia captures her and takes her place, Sunburst is left trapped inside an underwater bubble until Elina rescues her.
* Barbie Fairytopia, Nalu reveals his feelings for Nori by grabbing for her hand, which catches her by surprise since she thought he liked Elina.
* Barbie Fairytopia when Elina scares a Sea Butterfly and Bibble ends up screaming with her. Fairy Dandelion even joins in.
* Barbie feature got a sales boost (particularly Mr. Potato Head), and they were only too happy to see Barbie used in the second and third movies (with something of a compromise in personality).
* Barbie films. However, quite a few of them were shown as part of Kidtoons.
* Barbie, for a unanimous panel) "advise[d] the parties to chill." Apparently, they did.
* Barbie for the NES is even worse: pizzas, jellyfish (complete with creepy music), clothing, water spouts, kites, tennis balls, skates, soda...
* Barbie had a marketing campaign in 2013 in which Barbie considered selling her Malibu Dreamhouse and moving to another city. After traveling across the world, Barbie ultimately moved back to Malibu and had her Dreamhouse remodeled.
* Barbie has a last name ("Roberts") and even a middle name ("Millicent"), not many people even know she has a last name.
* Barbie has not one, but two kinds of dolls with "growing up" mechanisms that give them taller statures and larger breasts.
* Barbie, however, Chelsea, Stacie, and Skipper clearly live with Barbie.
* Barbie imitations that try (and succeed) to convince older people that they are Barbies or Bratz dolls.
* Barbie in a Christmas Carol, and acts as mean and selfish as Eden does.
* Barbie in a Christmas Carol. Barbie casts her little sister as Tiny Tammy to her Scrooge-esque Eden Starling.
* Barbie in A Christmas Carol (Ebenezer Scrooge is now an Victorian-era opera diva named Eden Starling)
* Barbie in a Christmas Carol: Instead of dying alone, Eden ends up destitute and eventually making her best friend as cruel as she is.
* Barbie in Princess Power, as Super Sparkle, Kara wears a domino mask to hide her identity.
* Barbie in Princess Power, Kara's cousin Dark Sparkle is Super Sparkle's rival and they quickly try to outdo each other.
* Barbie in Rock 'n Royals point when she accuses Erika of hogging the spotlight.
* Barbie In Rock N Royals: When Princess Aubrey and Princess Genevieve tell Erika they have unicorns at Camp Royalty, she sarcastically replies that they have centaurs at Camp Pop.
* Barbie in the 12 Dancing Princesses: Duchess Rowena goes out of her way to crush the sisters' free spirits and confidence, forcing them all to dress alike and engage only in "ladylike" tasks.
* Barbie in the 12 Dancing Princesses: Duchess Rowena is a master manipulator bent on seizing the throne from her cousin, the good king Randolph, by poisoning him and psychologically breaking his twelve spirited daughters.
* Barbie in the 12 Dancing Princesses favorite story (of a princess who dances in a secret magical land) with a unique flower on the cover. When the youngest princesses {triplets Janessa, Kathleen, and Lacey) receive their books, they realize the flowers match tiles on their floor. When danced on, the tiles transform into a staircase to a magical land where the princesses can dance the night away,

just like the story in the book.
* Barbie in the 12 Dancing Princesses: Genevieve and Derek realize that the only way to escape the magical realm is if they waltz together; they are featured in the video examples below.
* Barbie in the 12 Dancing Princesses is technically part of the royal family but acts the part. She wins King Randolph's trust and acts as a strict but loving mentor to his twelve daughters, but behind the king's back, she is slowly poisoning the king and convincing the princesses that they are responsible for his declining health. She successfully manipulates the twelve princesses into leaving the kingdom and persuades King Randolph to make her his successor on his deathbed.
* Barbie in the 12 Dancing Princesses: Royal Cobbler Derek loves Princess Genevieve, but doesn't believe he has any chances with her. "She's a princess."
* Barbie in the Nutcracker expands the Mouse King's battles to extend across the movie, including a chase sequence involving a stone golem and an action-packed climax.
* Barbie in the Nutcracker to give the kid a confidence boost as she rehearses her ballet steps. Barbie casts herself as the protagonist and three Kelly counterparts appear throughout the story: a Snow Fairy, a girl from the Gingerbread Village, and a Flower Fairy.
* Barbie in the Pink Shoes between Odette and her prince, and then fractures the fairy tale when the real Odette shows up during the Odile scene.
* Barbie in the Pink Shoes is largely about the fun and joy of ballet dancing, but there is one scene where dancing is played for horror: the Ice Queen's palace, where she has frozen every "flawed" dancer she could find and stripped them of their identities, compelling them to dance against their will as her perfect ballerinas.
* Barbie in the Pink Shoes: Kristyn does not much care for the stern Madame Natasha and her insistence that Kristyn's unique style makes for improper ballet dancing. Her counterpart in the Ballet Realm is the Snow Queen, a tyrant who viciously enforces "perfection".
* Barbie in the Pink Shoes leads to their transformation into swans, Kristyn and Hailey struggle to use their wings. They figure it out quickly when a pair of hunters show up.
* Barbie in the Pink Shoes, she is pursued by Prince Siegfried and must compete for his love against Odile the Black Swan in order to break the spell she's under. Interestingly, Kristyn herself is not interested in any of them.
* Barbie in the Pink Shoes. When Kristyn reveals that she is 17, the response is "well, better late than never."
* Barbie in The Princess and the Pauper, "A Girl Like You" is a We Are Song for Anneliese and Erika.
* Barbie in The Princess and the Pauper also has eyes on Anneliese so he can become part of the royal family.
* Barbie in The Princess and the Pauper, Annaliese and Erika, in addition to being identical in all but hair colour and a birthmark, were also born at the exact same time.
* Barbie in The Princess and the Pauper: Anneliese is a princess. Julian comes from a family so poor they could only pay the rent for one room. Erika is an indentured servant. Dominick is a king, and so wealthy that the queen decides Anneliese should marry him just for his money. Serafina is a pampered cat who lives in a palace. Wolfie is a street-smart cat...dog...sort of guy.
* Barbie in The Princess and the Pauper, King Dominick overhears Erika (whom he thinks is Princess Anneliese) singing in her room, then walks back to the audience room with a lovestruck smile on his face.
* Barbie in The Princess and the Pauper. The ending shows the two girls in a double-wedding with their respective love interests, and all but states they remain best friends for the rest of their lives.
* Barbie is probably the queen of this trope as far as toys go. The brand has been also licensed to non-doll products as well, and has been going on for almost sixty years.

* Barbie: Life in the Dreamhouse", and Chelsea refer to Starbucks as, "some coffee shop".
* Barbie: Life in the Dreamhouse and her crew as dolls that can talk and move by themselves.
* Barbie: Life in the Dreamhouse begins its first short with Barbie preparing for a date with Ken honoring the 43rd anniversary of when they first held hands.
* Barbie: Life in the Dreamhouse celebrated the 50th anniversary of Barbie's old friend Midge by adding her as a new major character.
* Barbie: Life in the Dreamhouse dolls became alive, which seems praiseworthy in comparison to Barbie's sterile direct-to-video movies.
* Barbie: Life in the Dreamhouse episode "A Smidge of Midge" uses a laugh track in attempt to emulate sitcoms from the early 1960s, the time during which Midge dolls began production. Skipper asks a few times if anyone else can hear the disembodied laughter, but no one answers.
* Barbie: Life in the Dreamhouse, even revealing that she made Ken a card after failing to find one at the store.
* Barbie: Life in the Dreamhouse. Everyone goes out of their way to get Barbie extravagant gifts, but she unfortunately already has them all (although unlike most instances of this trope, Barbie is sincerely grateful to her friends for every present, even if it's a duplicate). Ken then gives her the charm bracelet—and she's genuinely thrilled, as she's never had one before.
* Barbie: Life in the Dreamhouse has Barbie do this in "Gone Glitter Gone": a TV news crew has Barbie appear on their show and tell the other denizens of Malibu to remain calm during the glitter shortage. Right after the crew leaves Barbie's house, she breaks into tears and bawls.
* Barbie: Life in the Dreamhouse, in which they travel to different landmarks to complete various tasks.
* Barbie: Life in the Dreamhouse is often depicted in the airhead stereotype, but given the metafictional aspects of the series (the characters know they're dolls, for example) this falls closer to the lampshading side of things.
* Barbie: Life in the Dreamhouse, Ken tends to faint every time he sees the litter of puppies that arrive at the dreamhouse in "Plethora of Puppies".
* Barbie: Life in the Dreamhouse knows what Barbie's age is, not even her closest friends.
* Barbie: Life in the Dreamhouse. Later, Closet threatens to fry Barbie and her friends in a giant drier, only to hear the oven's timer go off. In response, he tells the girls not to move, then leaves to check on the crème brulee he's baking. The girls seize the opportunity to remove the Dreamhouse's CPU.
* Barbie: Life in the Dreamhouse, Midge claims that in hers and Barbie's old hometown of Willows, Wisconsin, they had to endure "rain, hail, tornados, and snowstorms." In July.
* Barbie: Life in the Dreamhouse, Raquelle panics over the fact that she got locked inside the Dreamhouse, and chipped "one of [her] color-change nails" while struggling to open the door.
* Barbie: Life in the Dreamhouse, Ryan constantly tries and fails to make Barbie love him more than she does Ken. Ryan's sister Raquelle constantly tries and fails to make Ken love her more than he loves Barbie. Midge also has a one-sided crush on Ryan.
* Barbie: Life in the Dreamhouse, she instead ends up starting a fashion trend.
* Barbie: Life in the Dreamhouse sometimes shows Ken and/or Ryan giving high-pitched screams. Teresa admits that she thinks Ryan's scream sounds even higher-pitched than Barbie's.
* Barbie: Life in the Dreamhouse that Skipper dyes her hair, however it's implied due to her being the token raven of her family. In the toys, Skipper was a blonde until she was given a redesign in the 2010s.
* Barbie: Life in the Dreamhouse. The following has been likened to that for My Little Pony, even spurring the epithet "Brobies", but "Dreamhousers" (as they prefer to be called) reject the comparison.
* Barbie: Life in the Dreamhouse to compete. She tasks her twin brother Ryan with

stocking the shop and tells him what she'll be doing:
* Barbie: Life in the Dreamhouse to keep her countless trophies and awards from flooding the trophy room. Skipper also proves herself a competent inventor when she "Skipperizes" Barbie's boutique with new makeover machines.
* Barbie: Life in the Dreamhouse variation also occurs, in which faithful Ken competes with Ryan, Raquelle's boastful brother, for Barbie's affections. Ken always wins.
* Barbie Live! In Fairytopia in 2006 had many flying winged fairies. The title character was played by Erin Elizabeth Coors. Unfortunately, very little of the play has been posted online.
* Barbie looks very little like the traditional Skipper. Her hair is dyed brown instead of its previous blonde and she's also hit puberty.
* Barbiel the Needle gets really angry when Setsuko is freed from captivity by
* Barbie: Many of Barbies outfits include fine gloves, as early as the "Enchanted Evening" doll that paired her fancy pink evening dress with white opera gloves.
* Barbie: Mariposa and the Fairy Princess: Shimmervale appears to be based on Malta.
* Barbie: Mariposa are obsessed with fashion and completely ignore Mariposa's attempts to ask them about the antidote. When Rayna and Rayla offer to bargain with them by giving them rare combs, they're much more interested.
* Barbie: Mariposa, Henna is about to take control over Flutterfield and tells Mariposa that they can rule it together. Not too surprisingly, Mariposa refuses, and one of the Flutterpixies manages to grab back the antidote during her rant so she can heal the queen.
* Barbie: Mariposa. She leaps off the castle balcony only to rise up on the back of a Skeezite, commanding an army of them.
* Barbie: Mariposa, the Skeezites can't invade Flutterfield because they can't stand Marabella's lights.
* Barbie: Mariposa. They want to marry the Prince and think his being locked away is romantic.
* Barbie: Mariposa, Willa may hate going into danger, but she will if it's to protect the kingdom, and she always comes through when it counts.
* Barbie movies often have Barbie tell a story to one of her sisters and/or her friends, with Barbie and her friends shown in the lead roles.
* Barbie novels was published in the 1960s that portrayed the character as a high school student. In 1999, a new series was published for Generation Girl line.
* Barbie of Swan Lake adds a sequence where the heroes help a captured troll escape from Rothbart's manor, defeating his guards along the way.
* Barbie of Swan Lake ballet. The protagonist is turned into a swan via a curse and can only become human at night; the villains can turn into large birds at will.
* Barbie of Swan Lake, Odette and the Prince get a romantic dance on the night they meet, and then the Prince dances with Odile disguised as Odette at the ball, spelling disaster when he proposes to her instead of the real Odette.
* Barbie of Swan Lake to Kelly as a bedtime story when the younger girl is having trouble spending the night at camp. Kelly appears in the story as a cygnet, while several other kids her own age (presumably the other campers) correspond to the rest of the enchanted animals.
* Barbie: People sometimes use 'Barbie' to refer to all fashion dolls, Barbie brand or otherwise.
* Barbie: Princess Charm School, adopted and raised by them, and renamed Blair.
* Barbie: Princess Charm School. Delancy manage to walk with about twenty books. Later, Headmistress Privet exaggerates the trope while, in private lessons for Blair, she teaches the girl how to carry a dozen books on the head. While standing on one foot. With a flower vase in each hand.
* Barbie: Princess Charm School: Isla is Asian, and is voiced by Shannon Chan-Kent (though Isla is Japanese and Shannon is Chinese). It is played straight with two of her dubbers: the late Hiromi Hayakawa in the Latin Spanish dub and Rubina Kuraoka in the German dub.
* Barbie promoting herself through the Girl Scouts. swimsuit issue featuring Barbie

really didn't help matters.)
* Barbie. Really. On the plus side, it's milder than most of the examples shown here.
* Barbie's Candy Striped Summer volunteers at a hospital as a Candy Striper, finds romance, and learns the value of community service.
* Barbie) sends to young girls, creates the Lisa Lionheart doll as a more positive role model. She even gets help in designing the doll from Stacy Lovell, the original designer of Malibu Stacy who was kicked out of the company she created. Unfortunately, Lisa Lionheart flops despite a ton of hype, with everybody distracted by the new Malibu Stacy doll (with new hat!) that came out on the same day.
* Barbie series) has its own line of tie-in products. They even sold plush doll of a cat from the Barbie movie "The Prince and the Pauper" that interacted with said film via a special box-like object.
* Barbie Spy Squad has Percy and Violet, a robot dog and cat pair who help out the agents on their missions.
* Barbie Spy Squad is a lighthearted take on the genre, with ace gymnasts foiling a cat burglar's plot as spies.
* Barbie Spy Squad, the female cat burglar wears a pink cat-ears headband.
* Barbie Star Light Adventure, Barbie and her friends use hover boards to get around. Sal-Lee is even a hover board champion.
* Barbie Star Light Adventure has this as the focus of the plot. One by one the stars are going out, and no one seems to know why.
* Barbie Star Light Adventure, while the setting is the futuristic planet of Para-Den, the story beats are that of a fantasy quest.
* Barbie Super Model, where you switch from being a side scroller where you dodge obstacles, to a matching game, to remembering the correct keys for Barbie's dance moves in a modeling show in the span of a few minutes. However, it was made for children who may have had shorter attention spans and needed the variety of gameplay.
* Barbie, the computers—which were little more than very-low end small form factor PCs with garish, infantile designs painted on them—had a high rate of failure especially with their power supplies which used a rather uncommon form factor. Such was the failure rate that Patriot's support lines were flooded by upset parents whose children's PCs died as a result of faulty hardware, and Patriot spent so much time and effort with addressing these issues—alongside the fact that they still took orders—that the company went bankrupt as a result with 3,100 PC orders remaining undelivered. Mattel had to placate those whose orders were unfulfilled with a “free gift package” containing a $100 toy and gift certificate voucher.
* Barbie; the most common complaint is her body proportions, which just don't match with human ones. At least one version also has molded nipples, supposedly so young girls didn't think that the fact that their breasts weren't featureless lumps meant there was something wrong with them.
* Barbie: The Pearl Princess has the heroine, Lumina, and Madame Ruckus, an octopus who owns a hair salon. Lumina loves to create new hairstyles and clothing, and when she works at a hair salon, she inspires the other workers to try new things.
* Barbie: The Pearl Princess The Pearl Princess" and "Barbie: Pearl of The Sea".
* Barbie, The President, an astronaut, and many more, all while being as attractive and glamorous as they come.
* Barbie. The reason why is a pretty simple cultural difference: international standards for women push them to be physically attractive and sexually appealing, while Japanese ones value youthfulness, cuteness, and innocence.
* Barbie Video Game Hero, Cutie the cloud is the in-game tutorial and tells Barbie the objective for each stage.
* Barbie Vlog: Barbie mentions how she adores eating honey with everything, including broccoli.
* Barbie Vlog, Barbie's friend Harper mentions that she often moved from place-to-place because her father is a soldier.

* Barbie who has also done anything from becoming a model to being president.
* Barbora Škrlová was a 33-year-old Czech woman suspected of child abuse and cannibalism who fled to Norway and pretended to be a 13-year-old boy named "Adam". It worked for a while, though she was eventually arrested and sent back to the Czech Republic. Before that, she had posed as a 13-year-old girl named Anicka, the supposed "adoptive daughter" of one of her Czech accomplices.
* Barbosa, the goalkeeper in 1950 — where they lost the finals to Uruguay in Rio de Janeiro. He's famously quoted as: "The biggest penalty for a crime is 30 years. I'm currently paying 43 for a crime I didn't commit!"
* Barbossa, acknowledging the very real danger of where they're going (Whitecap Bay), but gets the men rallied by saying:
* Barbossa calmly takes a few steps and avoids being smashed by a falling mast.
* Barbossa has this attitude towards Jack Sparrow during the entire series.
* Barbrady then celebrates his new found literacy by beginning to read books...starting with
* Barbra has a jerkish personality and repeatedly needles Jacob for being selfish and ignorant. However, it has been said that she thinks he's cute.
* Barbra seems like she's admonishing Jacob when he doesn't seem to care about Finn being expelled, only to crack a smile and admit that she doesn't care about
* Barbra Streisand (1972). Her character enters the life of musicologist Howard Bannister during his trip to San Francisco, and turns his world (not to mention that of several other people) upside down when she impersonates his fiancée and leads a cast of characters on a madcap chase around on the city.
* Barbra Streisand, a biopic of Broadway and film star and comedian Fanny Brice.
* Barbra Streisand both recorded and released their versions as obscure album tracks during the same timespan. A local radio DJ heard both recordings and, thinking there was something missing with both of them, spliced them both together (it helped that both versions were in the same key and tempo) and played the result on his show. The response was overwhelming enough for the song to be withdrawn from the show because there wasn't a single release of that particular version at the time. Eventually Streisand and Diamond were inspired to rerecord the song as a duet, which became a nationwide hit, so they sort of covered themselves up.
* Barbra Streisand character Rose undergoes a makeover to win over her inattentive husband. Suddenly, whereas no one gave her a second look before, every male within sight is fawning and gushing over her, even her 20-something years younger students, to the point where she needs to stop in the middle of a lecture to chastise them for ogling her. (Streisand also produced and directed the movie.)
* Barbra Streisand has been the perennial giant to Simon's Don Quixote. Even other critics seemed to dislike him, and Simon has boasted of doors being slammed in his face. (“But who cares? It’s wonderful to be hated by idiots.”)
* Barbra Streisand); her last note clocks in at over 20 seconds. Babs in general is famous for these.
* Barbra Streisand in her black dress: "A haunted abandoned jazz club from the 1920s wants its headliner back."
* Barbra Streisand sang a couple of these. "Down With Love" suggests giving it back to "the birds and the bees and the Viennese," while "Love is a Bore" compares it to a number of useless and/or little-desired things.
* Barbra tries to convince Jacob to help her and the other kids in their search for the missing Benjy. Jacob, however, misconstrues her intent and is lead to believe that she's trying to blackmail him.
* Bar brawls have existed for so long in Ankh-Morpork they've become a kind of combination of rugby and gymnastics (complete with a scoring system).
* Bar Brawl. When Olive turns the ticket in to claim her prize, it turns out to be...a silly looking bird.
* Barb Wire, after having a hand to hand to guns to stiletto heels to groin fight and killing a whole crapload of men, Barb Wire (played by Pamela Anderson) looks at her hand, on which is a broken nail:
* Barb Wire, Barb bathes with a gun nearby. When her ex comes in, she prepares to shoot him.

* Barb Wire dollars, and Canada is seen as the place to go for anyone who doesn't want to live in this hellhole. Strangely, prostitution is legal, and prostitutes are required to undergo frequent medical exams and display their med-cards upon request.
* Barb Wire dollars, meaning American dollars aren't worth much, and everyone is trying to emigrate to Canada.
* Barb Wire fleeing from every criminal force in her City on her motorcycle, when her cell phone beeps. After exclaiming that they must be kidding her, she decides to answer with the most sensible line:
* Barb Wire is set during a Second American Civil War between ultra-nationalists and conservatives.
* Barb Wire probably counts because he's head of a group of toughs. Not exactly a kingdom but they are essentially his subjects and he is really fat.
* Barcade chain, who popularized the concept and are very aggressive in enforcing the trademark on their name.
* Barca earns enough money betting on Spartacus and Crixus' victory against Theokoles to buy freedom for himself and his lover, Pietros. Barca makes the mistake of pressing Ashur too hard for his winnings, so Ashur sees to it this also goes awry.
* Barcelona (1988) (a collaboration with opera singer Montserrat Caballé)
* Barcelona Universale Modeles and can very correctly be described as BUM models.
* "Bar Chess" is an exercise in tricking other bar patrons into thinking you're playing a game. You sit in a bar, move things around (like ashtrays or beer mats), and occasionally say things like "Check" or "no, that's against the rules". You can play it outside a bar (college dining halls are great venues). The best players can get others to offer tactical advice.
* Barclaycard ads, agent Richard Latham shoots himself in the leg with his spy-gadget pen and is immediately paralyzed.
* Barclays Bank adverts, which illustrate savings accounts through coin gardens and piles of singing banknotes, and mortgages through herding piggybanks or operating a railway handcar. The humorous voiceover often seems as bemused as the audience ("Is the squirrel relevant?").
* Barda in books and anime is a disgraced guard turned beggar and despite his troubled status is adored by readers and viewers alike. The anime especially makes it very entertaining and gives him some legitimate awesome fights towards the end of the series, complete with Ak-Baba decapitations sadly not present in the books.
* Bardanos could create a field that made sand behave exactly like water, allowing the ship to submerge like a submarine.
* Bardiche. He talks far less than Raising Heart (even less in the movies, while Raising Heart got even more lines). The Forwards lampshade that Bardiche is a really quiet Device. However, Teana thinks his silence is one of his greatest things of him. Doing things through action and not words, protecting his master as her weapon at all times.
* Bardic Voices, as those tricks are supposed to be secrets only her people know.
* Bardiel, a fungus-like angel that contaminates Unit-03 as it's transported through a storm (in which it was presumably hiding) and then takes control during its activation test, with it trying to kill the other Eva pilots. In both continuities, Shinji refuses to fight it because he realises that the human pilot is still trapped inside, and
* Bardin, calls the other four almost exclusively (with little more than 4-5 lines where he speaks one or another's actual name) by the nicknames he's given them in his native Khazalid.
* Bardock: Father Of Goku special, when Bardock charges Frieza and declares that he and the Mook army he's fighting are done taking orders from the tyrant.
* Bardock mentality, he'll rather train to kill him instead of angsting over it.
* Bardock Special "I CAN SEE THE FYUUU-CHURRR!" He proclaims (upon realizing that they can see him) that he must stop Bardock's team from destroying his race "IN THE FYUUU-CHURRR!" and after they point out that they already did, it takes him a moment to formulate a response. He attacks and in return he is fried with a fiery

ki blast, leaving him standing there burning to death for an extended shot... before finally realizing "I'M ON FIRE!" and being finished off.
* Bardock, the father of Goku, is an odd case, as he wasn't written originally by Toriyama. Instead, Bardock was the focus of a special called
* Bar'd: One time we see Roby the Biker crash into the front door of the Leafy Bar, just narrowly avoiding slamming into Vas. The rest of that day, the bar had a gaping hole that needed repairs.
* Bardos-like vision of Mars that came into existence when the Viking rover pictures came back, and the Hollow Earth, which is populated by both every sort of prehistoric creatures and Nazis.
* Bardo: The chalk outline of where poor Erdentsetseg fell after she was struck and killed by a car is still visible when Algaa, the street cleaner, picks up her personal belongings.
* Bard Quest, has multiple paths. However, due to the complexity of the story, it was dropped fairly early.
* Bard Quest's Swamp of Mystery. The Bard's party is stuck in the same poses as one of its last panels.
* bards sang during a warrior's funeral that his deeds will outlast the barrow under which he's buried. Today, the barrow's still standing, but...
* Bardsworth, Fitzpot uses this as a method to giving Mike private tutoring lessons.
* Bardsworth result. A species called the Arbori the same way, as do the all-male demons, though their version is implied to be nastier.
* Bar'd to quell the rage of one of the more violent patrons by... stuffing her face into his new rack. It takes a bit for this to register with him, though.
* Bare: A Pop Opera is Peter and Jason's secret relationship. They go to a homophobic Catholic boarding school, and part of the main tension between the two is that Peter wants to come out but Jason is scared.
* Bare: A Pop Opera, it's no surprise that the love situation is complicated. Here goes: Peter and Jason are dating, Ivy likes Jason and the two hook up at one point, Matt likes Ivy and they're dating in some versions, Jason's sister Nadia either likes Matt or Ivy (it's unclear), and Lucas and Tanya are probably the only people spared from the relationship drama.
* Bare Brita Show, a live talk show starring Brita Møystad Engseth. The first episode suffered from disappointing ratings and critical reception. The creators were hoping that this would improve with time, but the second episode instead had a 32% drop in viewership. As a result, the show was cancelled.
* Bare-Fisted Monk ability when introduced, causing instant death to the target if it had less health than the user (with a 10-minute cooldown, and not usable on other players). Later it was nerfed to only deal 50% of the user's maximum health in damage after an 8 second delay.
* Bare-Fisted Monk, leaving him to rely on his natural demonic brawn in battle. Wonrei's spells awakened through training in kung fu with his partner, and the two meld perfectly. Ted is tough to start with, but his spells focus on amplifying his speed, strength, and stamina, each one more than the last.
* Bare-Fisted Monk where she's carrying her beach supplies one-handed and a love-struck boy offers to carry them for her; cue her dropping the bags on him and the guy immediately folding under the weight that she was carrying effortlessly.
* Bare-Fisted Monk: Wuxia is essentially the source-material for the unarmed combat monk trope, drawn from real-life Chinese monks who practiced martial arts.
* Barefoot Boy With Cheek by Max Shulman offers this string of puns, among others:
* Barefoot Boy with Cheek by Max Shulman, the articles from the Minnesota Daily are filled with references to "Etaoin Shrdlu." One article includes an apology that Petey Loadsafun was "erroneously called Etaoin Shrdlu in yesterday's shrdlu."
* Barefoot Captives: People taken as slaves are forced to forgo shoes.
* Barefoot Captives, where characters are forced to be barefoot while being held in some kind of captivity or other;
* Barefoot Cartoon Animal: The animal character doesn't wear shoes or socks, but is otherwise fully clothed.

* Barefoot Gen, a plant is shown sprouting at the same time Gen's hair is growing back, showing that life can still go on despite all that was destroyed by the bomb.
* Barefoot Gen Gen, his little brother Shinji, and Ryuta were voiced by actual young boys, whereas in the English dub they were all voiced by women.
* Barefoot Gen, Gen's mother Kimie falls into this. It's quite appropriate after watching her entire family burn to death amongst their pleas for help.
* Barefoot Gen, Gen survives the detonation of the nuclear bomb simply because there was a wall between him and it. The people around him were not so lucky. Even more terrifying because it actually happened....
* Barefoot Gen Gen were raised in a house of outspoken and ostracized pacifists and both of them lost nearly all their family members from his burning house except for his mother, elder brothers, and infant sister who died from malnutrition stemming from food shortages.
* Barefoot Gen has *lots* of this, what with people's eyes melting out of their sockets, faces burned off, etc.
* Barefoot Gen has never been banned in Japan at the national level (and never banned from private sales), but it has been banned from libraries at the local level on multiple occasions:
* Barefoot Gen, he was very short tempered and violent and often picked fights with adults, but he did care a lot about his family and people who were suffering from the effects of the atomic bomb, the anime has him being much nicer and he only gets violent once when he's repeatedly mistreated by the painter he was taking care of who was badly burned.
* Barefoot Gen. It gets rebuilt, of course, but hope for a new beginning is enveloped by bitterness, as many surviving residents suspect—perhaps rightly—that the future Peace Park in the center of town is partly supported by land speculators buying up property which conveniently has no one left to claim ownership.
* Barefoot Gen, of course, since that actually happened to those unfortunate to be caught in the blast radius during the atomic bombings.
* Barefoot Gen, the children fight a lot, and even adults beat them regularly. Gen is nearly always thrown into a wall because of a grown-up's uppercut.
* Barefoot Gen, the day before the atomic bomb is dropped, several characters are at a restaurant discussing the tough times they are going through, and one person has his chopsticks standing up in the middle of his rice bowl. (A big taboo at a Japanese dinner table, because of its resemblance to the incense burners used in funerary rites.)
* Barefoot Gen, there is Tomoko Nakaoka, along with Shinji, Eiko, and many children who were vaporized in the bombing of Hiroshima and its aftermath effects.
* Barefoot Gen uses her hair to cover half of her face; in this case, that half is burnt by the atomic radiation from the Hiroshima Bombing and the eye on that side is sealed shut.
* Barefoot Gen was discontinued in 2009 due to author Keiji Nakazawa developing cataracts and vision problems, and he died of cancer just three years later.
* Barefoot Gen when Gen catches Ryuta stealing food from him and his mother Kimie, he tackles him outside the hut and a big dustball with stars and limbs coming out of it occurs, he decides to let him go because Ryuta's a child orphaned by the atomic bomb and he bears an uncanny resemblance to his dead little brother Shinji, he is adopted by them shortly afterwards.
* Barefoot in the Park about how Paul didn't want to take a barefoot walk in Central Park in the winter.
* Barefoot Loon may go barefoot in public because they are either flouting societal conventions or are simply oblivious to them.
* Barefoot Poverty: A character is barefoot to show that they are poor.
* Barefoot Poverty: Some people are so poor that they can't even afford to buy a new pair of shoes.
* Barefoot Poverty, where characters are barefoot because they can't afford shoes;
* Barefoot Sage, for the reason that they know and see more than everyone else does, and are just too wise to care about said social conventions. This may also be

a form of religious asceticism.
* Barefoot Suicide: A character removes their shoes before killing themselves.
* Barefoot, they steal it because it's the only vehicle in the garage with keys. And sure enough, Daisy eventually wrecks it.
* Barehanded Bar Bending: A character demonstrates their strength by bending a metal object with ease.
* Barehanded Blade Block: A character stops a sword being used on them with their bare hands.
* Barehanded Blade Block), which prompts his opponent to question whether the guy is even human.
* Barely anyone during its four-week limited release theatrical run, but it became a cult hit once it hit DVD and strong sales led to a theatrical reissue and extended cut.
* "Barely Breathing" by Duncan Sheik was similar, intended to be a filler song to bring the album up to proper length; it became his only hit (unless you count the music he did for "Spring Awakening").
* Barely Changed Dub Name: A character's name is localized by making it barely different from the original.
* Barely Changed Dub Name: The name in the localization is similar to the original name.
* Barely Cooking, hosted by a couple (a man and a woman) who wore nothing but an apron.
* barely, explaining why Hoppip itself has some vaguely catlike traits (which its evolutions now lack) and why its Japanese name includes the word "neko".
* barely. Fortunately, TV commentators put the issue to rest as early as possible by noting that his name was actually pronounced "Beeler."
* Barely in the scope of this trope, but in another episode Mr. Burns and Smithers use their security clearance to advance through thick steel doors and other obstacles that can only be opened through retinal scanners and the like, only to see a stray dog at the destination who entered through the back door. The back SCREEN DOOR.
* Barely Legal interest in Brian (the family's talking dog) after he drunkenly kissed her at her prom. When things go a little too far, Brian talks to Lois about it, only to earn a few punches to the face. This led to an attempt on her part to kidnap and rape him, only to be intervened by her parents.
* "Barely Legal" pornography runs on this trope, featuring performers who
* Barely less crazy was the British attack on the Italian naval base at Taranto a little over a year earlier. It was an attack considered to be impossible due to the limited depth of the harbour, until the British figured out how to compensate.
* Barely Lethal is a teenage assassin who wants nothing more than to be a regular high school student.
* Barely Lethal, Liz drinks a bit too much at Gooch's party, and winds up with penises drawn on her face after she passes out on the couch.
* Barely Lethal; Liz Larson observes that she likes stabbing people when she takes out a lethal assassin trying to kill her family by stabbing the killer in the leg with a knife.
* Barely Lethal popular at school; Megan is only mortified by it because it means that Hardman, her former handler, can now easily track her down.
* Barely Lethal revolves around girl raised since infancy to be a badass assassin who decides to go to high school. Despite all her research, she is really out of her depth when she gets there.
* Barely Lethal was the one behind it because she smelled the same perfume in the car that was used.
* Barely Lethal: When Liz Larson asks Megan/Agent 83- a former trained assassin trying to lead a normal life- if she's ever killed anyone, their subsequent conversation could strongly suggest that Megan is talking about sex.
* barely managing to survive, in an attempt to get herself to a ship she can use to escape Marco Inoros.
* barely qualifying for the Hakone race in episode 16, Haiji proudly announces to

the reporters that the team is going to train harder than ever before (and not taking a single day of rest), which leads to nearly everyone else in the team to lose color once more.
* Barely-There Swimwear: A character wears swimwear so revealing that they may as well just go naked.
* Bare Naked Ladies as "the most celebrated Canadian alt-rock band of the mid-90s."
* Barenaked Ladies' "Bank Job" is the heist leader dressing down a member of his crew after a (hilariously) failed caper.
* Barenaked Ladies bassist Jim Creegan said his favorite song of theirs was "If I Had $1000000", which former frontman Steven Page later agreed with.
* Barenaked Ladies Dale Gribble. Cartoon versions of the band also made a non-speaking cameo at the beginning.
* Barenaked Ladies do this a lot, but one song, "Adrift", manages to make a laundry list of surreal puns go hand in hand with its wistful, dreamlike tone. Choice lyrics include: "Crescent moon sings me to sleep / The birches' bark, the willows weep / But I lie awake / I'm adrift without a snowflake."
* Barenaked Ladies for the former. They have had consistent success back home, however.
* Barenaked Ladies go into this in "Testing 1, 2, 3". They cover it again in "Running Out of Ink" which is all about a songwriter in the midst of a break-down.
* Barenaked Ladies had this problem in their live performances of "If I Had a Million Dollars"; during the verse "We wouldn't have to eat Kraft dinners," audience members would throw boxes of Kraft Macaroni and Cheese at them.
* Barenaked Ladies have some fun with this in the aptly titled "Crazy":
* Barenaked Ladies. Hilariously, they're having this argument at the exact same time they're arguing over something actually important, and treating it with more gravity.
* Barenaked Ladies is about someone who succeeds at everything he does...until the song takes place. After that, he's actually happy at no longer being perfect.
* Barenaked Ladies is a large annual youth soccer tournament). One of the band members commented that they are waiting for the sign to be changed to read, "Birchmount Stadium: Home of 'Home of the Robbie'."
* Barenaked Ladies' "It's All Been Done" is about time travelers dating throughout history.
* Barenaked Ladies live version of "Brian Wilson" (#68), "The Old Apartment" (#80) or the live version of "If I Had $1,000,000" (not issued as a single and didn't chart).
* Barenaked Ladies' "One Week" as an instance of the narrator's inappropriate behaviour.
* Barenaked Ladies onto the stage during performances of "If I had $1000000". When fans didn't listen they started just collecting the boxes before the show to donate to local food banks.
* Barenaked Ladies ran into this with "One Week", the entirely goofy white-boy rap which finally shot them to international recognition after years of crafting intelligent, snarky pop-rock. A track off a later album hung a lampshade on the pressure they faced to repeat this success:
* Barenaked Ladies' rather nostalgic song, "The Old Apartment", has the following line:
* Barenaked Ladies's "Bank Job", couched in terms of the blame game in relationships.
* Barenaked Ladies' "Shopping" as an ad jingle, either not knowing or not caring about the song's satiric anti-consumerist thrust.
* Barenaked Ladies' "Some Fantastic" apply murder and brainwashing to solve minor problems or make romantic gestures.
* Barenaked Ladies song "Another Postcard" is about a man who cannot escape an endless stream of anonymous international postcards - all of which feature allegedly humorous photos of chimpanzees in various costumes and poses: "Another postcard with chimpanzees / And every one is addressed to me..."
* Barenaked Ladies song called "The Night I Fell Asleep at the Wheel". The line

"you're the last thing on my mind" goes from meaning "I'm not thinking about you" at the beginning of the song to meaning "I die thinking about you" when it's repeated at the end.
* Barenaked Ladies song "Conventioneers", a game of Scrabble between two co-workers staying at the same hotel gets a bit suggestive:
* Barenaked Ladies song "Get In Line" are very reflective of things heard during physical exams, including the phrase "turn and cough."
* Barenaked Ladies song "It's All Been Done" is all about this trope in terms of romantic gestures.
* Barenaked Ladies song "It's All Been Done", which even speculates on the future lives of the singer and his love.
* Barenaked Ladies' song "Light Up My Room" (which earlier brought up that they live near a hydro-field):
* Bare Naked Ladies song "Maybe Katie" is about how the singer doesn't care about the fact that his girlfriend is older than he is.
* Bare Naked Ladies song "The Flag" it's used with pretty dark overtones.
* Barenaked Ladies song, "Tonight is the Night I Fell Asleep at the Wheel" we hear, "You're the last thing on my mind." After the accident, the singer lies dying in his car, saying as the last line of the song, "You're the last thing on my mind."
* Barenaked Ladies, the newsdesk is on fire, and the studio backdrop has collapsed.
* Barenaked Ladies took their own stab at rhyming "orange" in the song "Four Seconds".
* Barenaked Ladies' video for "Shoebox" is a dream of the girl who sneaks out on her date.
* Barenaked Ladies, which opens with the line "Alcohol, my permanent accessory" pretty much sums up the attraction of drinking in the line "Alcohol, Alternative to feeling like myself."
* Ba'ren scientists complain about this policy as they need to be closer to Earth to study the planet.
* baresman, a form of ceremonial mace, usually stylized as a steel rod crowned by a bull's head.
* Baretta: Tony Baretta is always going to Rooster" to get the low-down.
* Baretta, with Robert Blake as a plainclothes police detective, caused a surge in the popularity of sulphur-crested cockatoos as pets (on the show, Tony Baretta has one named Fred). Unfortunately, a lot of people undoubtedly regretted the decision to purchase one, as the birds can be troublesome, loud, demanding pets who chew on just about any solid material they can get their beaks on.
* Ba-reum first appears as a child who's already showing signs of becoming a serial killer.
* Bare Your Midriff and male uniforms with no sleeves and slightly more chest.
* Bare Your Midriff: Continued on from the nineties in fashion and especially in pop music, with midriff-baring made even more extreme by the early-00s fashion for very low waistlines.
* Bare Your Midriff: Crop-tops became commonplace to the point that bare midriff was no longer considered edgy or scandalous, even in more conservative "modest" crowds; most female models and musicians rocked this look. A common variant emerged, almost as if in a trade-off, that while the midriff was exposed, the navel area was often fully (or at least, partially) covered.
* Bare Your Midriff: From female popstars to female athletes to male rockstars.
* Bare Your Midriff outfits, most of the other female characters do this as well at some point, as well as Mako's Fight Club uniform.
* Bare Your Midriff: Someone wears a shirt that leaves their midsection exposed.
* Barf does this at two guards when he and Lone Starr park at the Spaceball Prison Complex.
* Bar Form. It's a common misunderstanding on the part of people who don't know anything about music history—or church history, for that matter.
* Bar Full of Aliens: The clientele of this place is kind of... alien.
* bargain a place/region (Loraine for Olga's deal; all the dark elves in the Black Fortress, as well as the whole kingdom of Eostia for Vault's deal).

* "Bargaining, Part 1": the signoff is actually included in the episode itself, with Tara putting on a zombie finger puppet and going "grrr... argh."
* Bargaining Part 2", Buffy returns from the dead in time to see the sweet innocent Buffybot permanently destroyed when it's ripped apart by demons, showing Buffy's loss of innocence and the need to build herself anew.
* Bargaining, Part 2 to think the old Buffy has returned. Instead she's just acting on instinct — Buffy runs away leaving her friends alone with the demon leader and tries to commit suicide.
* Bargaining: Part One says "That'll put marzipan in your pie plate, Bingo!" after she slays a vampire. When asked about it, Willow replies ""I don't know, I was trying to program in some new puns and I kinda ended up with word salad."
* Bargaining, part one. Willow's attempt to (re)program the Buffy-bot to mimic the real slayer's style fails miserably, resulting in lines of gibberish after a successful slay.
* Bargain with Heaven: Getting what you desire by making deals with angels, deities, or other benevolent/neutral entities.
* Bargain with Heaven repeatedly: in fact, a good third of the Old Testament revolves around it.

* Baritone Robert Merrill in his autobiography described getting ready for a performance and his son said "You're the rat again, aren't you, Daddy?" To which he replied "The baritone is always the rat, my boy."
* "Barkeep, another beer before the shit starts again!" He gets his beer. Later: "Barkeep, another beer before the shit starts again!" The barkeeper doesn't ask.
* Barking Dogs Never Bite: As the homeless man and the janitor share the janitor's stew, the janitor tells him the story of "Boiler Kim". Supposedly, Boiler Kim was in the basement inspecting the boiler, when he got in a fight with the construction workers, stumbled back into a wall, and died when his head slammed into a nail protruding from the wall. The construction workers panicked and walled him up, and Kim's spirit haunts the boiler which moans at night. As the janitor tells this story, the light from his stove lights up his face from below in classic spooky ghost story style.
* Barking Dogs Never Bite of how Boiler Kim's ghost haunts the cellar after he died and was walled up in the basement by his panicky coworkers.

* Barnaby Grimes books mentions a war that was fought (possibly still being fought) to the East, in "The Malabar Kush". It included events such as "the siege of Rostopov", "the fall of Dhaknow", and "the storming of the Great Redoubt".
* Barnaby Grimes. He completely fails to notice when Barnaby is in a hurry to get away and track down the villain, instead prattling on about his latest theory, which involves small birds being turned savage by fruit.
* Barnaby Jones, as shown in the former's pilot episode (Cannon is friends with Barnaby's soon-to-be-murdered son).
* Barnaby Rudge, in possibly the earliest example of the trope on this page. The title character must leave town, and has to say goodbye to a group of vagrant dogs that have served as his companions for several years.
* Barnaby, who rambles on, tells shaggy dog stories, and eventually has to be bribed into shutting up.
* Barnes and Barnes, best known for "Fish Heads", did a little ditty called "Cemetery Girls". For extra creepiness, it samples parts of the
* Barnes And Barnes track called "Gumbyjaws Lament". While the jokes are less obvious than many of their songs, hearing Art discuss his mentally ill mother in a croaky monotone while the accordion saws jauntily away in the background is morbidly humorous.
* Barnes is mercy killed by Michonne after being bitten by a walker, Rick leaves, Sturgess panics and shoots Scott in the leg before running off and getting devoured, Annie sprains her ankle and is eaten alive, David is bitten and later

devoured, and Nicholas kills himself and knocks Glenn into a horde of walkers. The episode ends with Michonne and Heath helping a wounded Scott back to Alexandria, Rick stranded in a stalled RV, Glenn's fate ambiguous, and the other 5 dead.
* Barney actually pulled off the parody in "So, It's Come To This: A Simpsons Clip Show" — after Homer refused beer after being hospitalized from an exploding Duff can, Barney (unsuccessfully) smothers him with a pillow and does the fountain-through-the-window gag.
* Barney also has one where in a video he makes years in advance, he not only predicted some of the responses, but also the seating arrangement (by turning to face Marshall when he reacted to a comment).

* Barney & Clyde we have J. Barnard Pilsbury's second wife Lucretia.
* Barney & Friends, and the second feature film is aiming for Stage X.
* Barney & Friends Barney is unable to find a rhyme for "purple" during a color rhyming game coming up with "turple" and "urple".
* Barney & Friends BJ attempts to stop Baby Bop from sneezing after she tickles her nose with Santa's feather pen. Obviously she still sneezes and wakes a sleeping Santa.
* Barney & Friends, B.J. notes that while he usually doesn't take naps anymore, he may take one today as his "square meal" he had after the square dance (the episode was all about squares and they added the meal and the dance as sort of a joke) has made him sleepy.
* Barney & Friends, both BJ and Riff were voiced by women (Patty Wirtz and Michaela Dietz).
* Barney & Friends cut out or shortened at least one song from each episode to make room for ads.
* Barney & Friends end credits. Since then, Demi both came out as non-binary and embraced a more sexual image.
* Barney & Friends ended with "Home Sweet Earth: The Rainforest", an episode about Earth Day that played out like an ordinary episode.
* Barney & Friends episode "Movement", the children invite the title character to join them for the potato sack race so BJ and Baby Bop decide he'll need their help. They show him several ways to get ready for the big race by warming up and stretching. By the end of the day, everyone finds out that there are many fun ways to exercise.
* Barney & Friends episode "The Treasure of Rainbow Beard" featured the at-the-time head writer Stephen White as the titular pirate.
* Barney & Friends fame) voiced Pasqually and Jasper T. Jowls of Chuck E. Cheese's from the mid-1980s until the late-1990's. The two's voices are incredibly different from each other (as well as from Bob's more notable role of Barney).
* Barney & Friends for "B-I-N-G-O" had the animal actor playing the titular dog refusing to cooperate.
* Barney & Friends had acted prior to the show and/or had an agent. Most of them were from the Dallas/Fort Worth area (where the show was filmed).
* Barney & Friends had Old King Cole come over for a visit in episode 100. Barney is reunited with some alumni to celebrate 10 years of the Barney franchise, and gets a memory book after 20 years.
* Barney & Friends Happens during "I Love You" on the line "with a great big hug". If everyone can't join in on a big one, they'll just hug the closest person.
* Barney & Friends has a few episodes based around seasons as part of its' regular rotation. For example, "Spring Into Fun!" was a spring-themed episode that first aired in October.
* Barney & Friends has attracted some furries, mostly those who watched the show when they were kids. Baby Bop and B.J. seem to be the most popular characters among furries.
* Barney & Friends has its messages directly taught through each episode's plot, as well as having songs to reinforce those messages.
* Barney & Friends has Jason (and thus his actor Kurt Dykhuizen), who is hearing impaired and on rare occasions uses untranslated ASL when he speaks or

sings (like signing his name during a verse in Parade of Numbers).
* Barney & Friends has received two German dubs: the first one was made by FFS Film- & Fernseh-Synchron GmbH in Munich for Polygram, and the newer one by Deutsche Synchron Film GmbH in Berlin for HIT Entertainment. Interestingly, both aired on Super RTL (with the latter dub airing on the channel's Toggolino block). The translation of the Polygram dub seems to be more faithful to the original English version.
* Barney & Friends has two stories per episode. But really, it's two longer episodes from Seasons 10 and 11 shortened and strung together. A few episodes from a few years back followed this format, too.
* Barney & Friends. He shared some ASL, but his hearing aid never came up in conversation.
* Barney & Friends in 1999, he reprised the role for the 2005 PBS Kids Sprout launch event due to Dean Wendt (the current voice of Barney) being unavailable.
* Barney & Friends. In his various appearances in the Christmas specials, it's noted he and Barney are old friends, both being magical beings who help children in need.
* Barney & Friends: In the Season 1 episode "My Family's Just Right For Me," when the kids are showing paintings of their families to Barney, Luci compliments her younger sister Tina on her painting, which leads to this exchange:
* Barney & Friends is never seen without her yellow blankie. Her theme song "My Yellow Blankie" is even about the blankie.
* Barney & Friends knocked it off of the list, JC Penney's had Barney shops inside their stores, and Playskool had a big collection of Barney toys that kept growing every year until the rights were sold to Play Along (now Jakks Pacific).
* Barney & Friends, may as well be the poster child for this trope. Think about it: he's always hanging around kids, "I love you" is practically his catchphrase (to the point he has a song about it; you know the one), and to make matters worse, he sounds incredibly creepy when he talks. All that's missing is a van with "Free Candy" painted on the side.
* Barney & Friends, meanwhile, go even further by portraying the seemingly harmless pink host as a demonic entity that preys on children.
* Barney & Friends: Min is Filipina like her actress Pia Hamilton.
* Barney & Friends of the dinosaur costumes, so as a result the rhinoceroses were photoshopped in for the page featuring them.
* Barney & Friends: People are now more familiar with the opening theme and the closing theme "I Love You" than the songs they were based on: "Yankee Doodle" and "This Old Man", respectively. Additionally Barney's main inspiration was the Wee Sing video series.
* Barney & Friends" sees Barney, Baby Bop, and the kids play around of mini-golf on the playground, using a makeshift golf course (windmill and all).
* Barney & Friends, several characters from the first two seasons make a special appearance in a platonic example. All of them are now teenagers (or in Michael's case, a young adult), and show the current batch of kids some pictures of when they were their age.
* Barney & Friends stars elementary school kids alongside Barney. However, the series is aimed at toddlers.
* Barney & Friends started off with just Barney and Baby Bop, and then added B.J. a short while afterwards. In 2006, the series introduced a fourth dinosaur, Riff.
* Barney & Friends, that pre-dated Barney by almost 30 years by the time it premiered and had an established viewerbase.
* Barney & Friends: The Barney doll and the Barney Bag were made into real products.
* Barney & Friends. The Closing Logo Group, in its Lyrick Studios article, calls that video "a surprisingly non-children's release".
* Barney & Friends, the writer's guide would often include full bios for certain child characters, listing important facts for the writers to know such as if the character's parents were divorced or if they had certain skills or a certain

type of personality.
* Barney & Friends, to the point where this trope used to be called "The Barney". The show was a late 90's edutainment program, marketed for and explicitly aimed at very young American children (ages 2-6). And yet, both the character and his show received a surprising level of vitriol from the public at large.
* Barney & Friends, two characters perform the clown version of this.
* Barney & Friends using the song "Who Took the Cookies from the Cookie Jar?" has the kids find out that Baby Bop ate all the cookies.
* Barney & Friends) very amusing. He actually found the video to be one of the funniest things he's ever seen.
* Barney & Friends videos the series adapted, appeared in the show's first few seasons.
* Barney & Friends where the kids discover the girl they've been playing with is in fact two girls. And a season later, Ashley and Alyssa became part of the cast. Interestingly, not all of their episode appearances were together.
* Barney & Friends, which was in the top 5 children's albums on Billboard's Kid Audio chart for 5 years, went triple platinum in 1998, selling over 3 million copies.
* Barney & Friends will double back and thank the big purple guy for his help, or just share their love with him. They may find that he has reverted already.
* Barney and Betty Rubble are a classic example, playing the generally happier, conflict-free Betas to Alpha Couple
* Barney and Robin. Barney lied consistently and didn't apologize for his lies simply stating the fact that the man who Robin fell in love with was a liar and that magic, lies, and illusions are part of his charm so she should just accept that. I'm paraphrasing of course. It was a clever way of getting her forgiveness without actually apologizing. He also did a cute magic trick with flowers so that makes all the lying okay. However, Barney addresses this at their wedding, where he makes only one vow— that he will never, ever lie to her.
* Barney and Robin divorce after three years. Robin confesses to Lily that she should have married Ted instead; unfortunately, the latter is happily married to Tracy. In 2030, the mother died six years ago which allows Ted to go back to Robin.

* Barney and Robin now that it's revealed they're getting married: Any other relationship one or the other is in is 100% guaranteed to fail.
* Barney and Ted also spend an episode wishing they were gay, and then 'adopt' a child together. While played for laughs, it's also pretty heartwarming.
* Barney and Ted's mother actually did make out, as revealed in "Home Wreckers", after the events of "Brunch". They went as far as second base, although this was all
* Barney and the Backyard Gang, was released this way. Several episodes of the show also aired as specials on Disney Channel.
* Barney announces to the bar that he has a date "with the crazy lady who's always yelling stuff in front of the drug store," and a dejected Moe sighs and says "she told me she was washing her hair tonight."
* Barney are subject to this. The former went through wholesale changes of the child cast (and the voice of the titular character, to a lesser extent) about once every five years, whereas Sesame Street Muppets have been shown to forget things so they can be taught to a new audience.
* Barney asks Robin to play Cyrano when Nora finally calls him, afraid of messing things up again. Robin agrees to this, but what Barney is not aware of is that she has a
* Barney attempts to do this to Ted. Unfortunately, he's wearing a penguin costume

at the time, so he refers to it at
* Barney Bear cartoon, "Barney's Hungry Cousin", Barney tries to hide from another bear, out to steal his picnic food, inside a phone booth. As he is about to take a bite of a sandwich he has, the phone in the booth rings and he answers it. The other bear pops his head out through the mouthpiece of the phone and eats the sandwich, while the rest of his body is standing in another phone booth next door to this one with nothing between the two booths!
* Barney Bear, has the titular character prevent a father cat from spanking his own bratty child, and setting out to raise him properly while reading a child psychology book. When the child proves to be too much of a troublemaker, Barney and the father cat decide to spank him together, only to hurt their hands as the child used the same book to protect himself.
* Barney Bear short "Polar Pest," the title character is hibernating for the winter when his nephew, a polar bear, shows up. Obviously accustomed to the Arctic, the nephew declares that the house is too hot and starts opening all the windows. Barney frantically attempts to keep the windows closed, but eventually loses the battle. In the next scene, a shivering Barney is giving himself a foot bath while his oblivious nephew begs to be taken ice fishing.
* Barney Bunch centers around turning an entire ensemble of characters into this trope.
* Barney Bunch: Drew Pickles and his many, many pals do what they do simply because they're gay.
* Barney Bunch in 2006 and became the semi-affliliated "Speakonia Community". Despite numerous videos and accounts getting terminated, it's still going.
* Barney Bunch: Stage 2. There's a large fandom for it but it's not very vocal outside of YouTube and internet trolling circles.
* Barney Bunch video makers fall under this trope. Then again, it's probably for their protection knowing that the Bunch is a known trolling group.
* Barney, centers around a very friendly sheepdog who goes on adventures with his friends.
* Barney could actually be considered the oddball doppelganger to his counter-part: a renowned, straight laced, consummately professional, fertility specialist.
* Barney envisions pulling one at the hypothetical wedding between Ted and a girl Barney had called "dibs" on earlier:
* Barney fell in love with Robin after having slept with her in a season three episode of
* Barney Gumble drinking a beer after a lengthy stint of sobriety in the series is played up as a massive relapse, and then he simply says "Hey, you're right. I thought it'd get me drinking again, but it didn't."
* Barney Gumble has an exaggerated one because he's almost always drunk.
* Barney Gumble in a cheap clown costume. That proved to be the final straw for Bart, who ended up leading the other campers to rebel.
* Barney Gumble in more recent seasons, because, with his recovery efforts, he does not fulfill his Expectation Lowerer role anymore.
* Barney Gumble's apartment is constantly shown to be dirty, falling apart, and littered with dirty laundry and food.
* Barney has an entire playbook of such schemes which are just about getting women into bed.
* Barney has an outright camera fetish. He records nearly all of his sexual encounters, and has cameras running in his apartment twenty-four seven, just in case. At one point, he has a nightmare
* Barney has a rule for how crazy a woman can be given her attractiveness. He explains this "Hot/Crazy Scale", by drawing a diagram that is only visible to the audience. Amusingly, he gets the diagram wrong. Going by the way he drew it, losing ten pounds and getting a boob job made Vicki Mendoza less crazy and no hotter while stabbing him with a fork made her both hotter and crazier.
* Barney. He also appears to have gotten smarter, as he successfully fooled RM into stealing the Declaration of Independence in "Trapped in the Cage".
* Barney himself is notable for the amount of sheer vitriol leveled against him

for his crime of being big, cloying, purple, doofy,
* Barney in one episode because her apartment was tiny and infested with rats. They pretended to be married so the girls he hooked up with wouldn't want to stick around.

* Barney is having trouble getting a one-night stand to leave, when Lily — who's been staying with him — comes in. The girl asks if Lily's his wife, and he starts to say "No" before switching to "Yes!" The girl storms out.
* Barney is openly this for Ted/Robin when they date in Season 2, presumably because he doesn't want to
* Barney is the only one single in Season 2 after Ted and Robin start dating and Lily and Marshall have gotten back together. It's
* Barney is usually like this, but this is subverted in "Old King Clancy." Ted's project at GNB was cancelled, and Barney and Marshall had been lying to him for a month to spare his feelings. When Ted says they should have been honest with him, Barney reminds him of a time when he did the same thing to Marshall.
* Barney. It's been lampshaded, including several references to a failing liver (including a gag on "The Joy of Sect," in which Barney sees a discarded liver on the floor of an airport bar and thinks that his liver tried to escape—
* Barney Live! World Tour - A Celebration toured exclusively throughout the Middle East in 2015 and 2017, produced by Life Like Touring. Unlike most Barney shows, the voice cast don't reprise their roles.
* Barney Miller: After being arrested for making obscene phone calls a man used his one phone call to make one last obscene call to the policewoman who arrested him.
* Barney Miller, after Jack Soo (Yamana) died, they had a fourth-wall breaking episode where the cast showed their favorite Jack Soo moments.
* Barney Miller: After writers saw Jack Soo eat take-out Chinese food using a pair of pencils as chopsticks, they had his character, Nick Yemana, do the same thing. The bit where Yemana accidentally ate the eraser off the end of a pencil was the writers' invention.
* Barney Miller, a man claiming to be a detective from the 12th precinct is accosting men as they leave gay bars and demanding money or else he'll beat them.
* Barney Miller, a man claiming to be a time-traveller is arrested. He says that in the future (he doesn't specify when exactly), the government encourages homosexuality as a way of keeping the population down.
* Barney Miller a man tried to commit suicide by drinking a chemical. Wojo called Poison Control to ask what to do, but they needed to know what chemical the man drank. Eventually he reveals that it was food coloring. Wojo says "Food" into the phone, then realizes what the man said, and hangs up without another word.
* Barney Miller; amongst her stolen valuables are a pair of silver candleholders she had set up for the dinner she was cooking for him.
* Barney Miller an IRS agent is threatening to take away some money without giving the person a trial. When Barney suggests that that sounds unconstitutional, the IRS agent merely laughs as if Barney has made a joke.
* Barney Miller, a stock broker lost his job and, unwilling to tell his wife, began begging for money in the streets instead. He ended up making more money that way.
* Barney Miller "Asylum" episode, Stevens reproves Wojo for his unauthorized actions in preventing Jininsky from being kidnapped:
* Barney Miller: Averted, literally, when the show actually built a fourth wall. Several episodes in the final season featured reversed shots from the usual setup, with the camera staged somewhere around the holding cell, usually the rear of the set, pointed back out across the squad room, with an actual fourth wall placed where the cameras would usually be placed.
* Barney Miller. Barney's son comes in with a toy gun yelling "Bang", just as Barney is locking up his own gun in a cupboard. Barney gives him a short lecture about firearms being dangerous, gives him a toy truck to play with instead, and the

kid holds it up and goes "Bang". Later he does the same thing with a slice of pizza.
* Barney Miller: Cops sometimes have to go undercover, resulting in this:
* Barney Miller, Det. Arthur Dietrich had the question asked of him when he threatened to quit over a dispute with the Police Commissioner. His squad members listed all the other occupations that Dietrich had attempted and abandoned (including lumberjack and beekeeper — his "wilderness period") and convinced him he was just making an excuse to quit yet another profession.
* Barney Miller Detective Yemana is searching their records so they can track down a professional bomber. He rattles off a list of names, noting how many of them have the nickname "Boom Boom".
* Barney Miller did not exactly Die On a Bus, even though the actor Jack Soo, who played him, died in real life. So the actor got a non-canon memorial-tribute episode, while Nick disappeared from the series and was definitely gone for good; there was an episode where a lot of drama was attached to the removal of his desk from the office, and characters would sometimes mention "back when Nick was here". However, it was never made clear whether he died or just went away somewhere. The final episode has Barney looking around the squad room one last time; he remembers (via flashback clips) the cops who'd left the squad in years past. When he remembers Chano, Wentworth, and Fish, Barney is smiling in fond remembrance. When he remembers Nick, though, his expression is very sad.
* Barney Miller, Dietrich is hooked up to a stress monitor and goes out on a call. Back at the station, the monitor starts going haywire, which alarms everyone, and then flatlines completely, making them assume the worst. Then Dietrich walks back in wearing department sweats—the disturbance was a woman attacking her husband with a fire hose, and in the "crossfire" the sensors shorted out.
* Barney Miller does a lot of these, stopping just short of facing the camera with his sarcastic asides.
* Barney Miller episode "The Judge". Wojo arrests Judge Philip Paul Gibson, who desperately wants to be one of these but is frustrated that the law won't let him.
* Barney Miller episode was made as a tribute to him (with the cast breaking character for this occasion). Sometime later, it was mentioned that Nick had passed on and his desk had been removed. A subsequent episode focused on the desk and Barney's (successful) attempt to get it back.
* Barney Miller features a lie-detector specialist who thinks the machine is infallible, causing problems for one of the detectives, who flubbed the test due to being too nervous. The problem is solved by Detective Dietrich, who is such a Consummate Liar he's able to convince the specialist he's an alien from a distant galaxy and winds up scaring him away.
* Barney Miller, Fish is dressed as a woman while out on purse-snatching detail and gets hit on by an old man who offers "her" money.
* Barney Miller for the show, seeing as a Kevlar vest is standard equipment for police these days.)
* Barney Miller gets arrested and is forced by circumstances to call a pal from work to bail him out. He claims he was mugged and they stole his clothes; but that doesn't explain why he has $50 in his purse.
* Barney Miller had a background character who compulsively confessed to all sorts of crimes. No one ever believed him.
* Barney Miller had several subplot story arcs running over several years. The most memorable is Ron Harris' development as a published author, which lasted most of the series.
* Barney Miller had Zatelli, an unassuming uniform cop who mostly caused anxiety for Levitt, who was convinced he was bucking for his job.
* Barney Miller has an arrested man welcome being put in the precinct lock-up, saying it's better than "the other one." It turns out a tenants' organization has taken their role as dispute arbiters to extremes, creating a kangaroo court and ersatz prison. The arrestee had been charged with "sneaking around" and jailed in a basement storage room. When Detective Miller reminds the tenant council head that he's only allowed to mediate tenant disputes, the reply is "That was boring."

* Barney Miller has a Soviet ballet dancer trying to defect to the detectives at the station.
* Barney Miller has issues with. But the squad, Wojo included, is even more annoyed by the man's old friend, a fellow protester turned yuppie, who tries shilling an insurance policy on Harris.
* Barney Miller has the kidnappers demanding that a police officer drop off the ransom while running in the park, which the victim's family decides to pay. Wojo ends up running for a good few miles before the kidnappers actually show up to claim the ransom and release the victim.
* Barney Miller!"). He's startled when he wakes up from his dream and everybody is staring at him.
* Barney Miller. His depiction of sleazebag lawyer Arnold Ripner provokes a civil action, and he loses everything he owns.
* Barney Miller" Huntsinger, head of security at a local hotel, brings in a college student who took his 17-year-old girlfriend to the hotel. Huntsinger sneers at the young man he arrested for registering the couple as "Mr. and Mrs. Smith." The young man's name? Howard Smith.
* Barney Miller in a New Year episode. A Hispanic lady is going into labor in the squad room. The paramedics are called, but the baby isn't going to wait. Wojo delivers the kid himself (he had field experience in Vietnam) long before the paramedics finally show up.
* Barney Miller - Inspector Luger always called Sgt. Levitt 'Levine', right up to the final episode.
* Barney Miller is an elderly man who only counterfeits small bills so he can pay for groceries and such in between Social Security checks. He's caught when his failing eyesight results in a Lincoln wearing a leisure suit—very embarrassing.
* Barney Miller is occasionally seen doing crosswords. Since he's ethnically Japanese, he's doing the crosswords in the New York City Japanese paper, so he'll ask things like "What's a 6 letter word for 'Ming-yaaa-beh?'"
* Barney Miller. Looking to get her mind off of flubbing the national anthem at a sporting event, Miley finds that every news outlet is running that specific story, including the Spanish one.
* Barney Miller" (Nick's tenure as acting-captain was limited to calling it a day immediately after his elevation and wearing a suit jacket to work—the department sent an interim officer the next day.)
* Barney Miller. Often it's the higher-ups in the department, or the gleefully malicious Scanlan of Internal Affairs, but there are many officials from the state and federal government who get drawn into whatever crazy case is going on.
* Barney Miller. One episode in which New York is experiencing a severe drought:
* Barney Miller one or more of the perps of the week have had a fight in an establishment which is pressing charges, then are informed that the establishment will drop the charges if they'll pay for damages.
* Barney Miller overlooked) gets out of bed and walks under his own power to his CO.
* Barney Miller pipes up with the definition—because Dietrich told him on the way over.)
* Barney Miller, recurring petty thief Marty tries to do this with a small bag of marijuana but fails. Then he tries to claim that he was hungry.
* Barney Miller" Sgt. Fish's reply: "If I can take it, you can take it."
* Barney Miller (social inequity, though improving, still had quite a bit of work to do when the episode aired in 1978)- it's doubtful now that such a scenario, with society's greater understanding of the real impact of rape, even in marriage, could be played for laughs today.
* Barney Miller" the cops had to deal with a serial reoffender in the program that was being held by the officers. His federal minder showed up and got him off (it was relatively minor offenses), and delivered a powerful threat to him.
* Barney Miller", the cops of the 12th Precinct bring in one Mr. Lindquist, who shot a subway vending machine six times. Mr. Lindquist says that he's been feeding

20 cents at a time for years into that vending machine, wanting to get a Butterfinger, but virtually never receiving one. So he shot it.
* Barney Miller. The detectives and criminal suspects in the 12th precinct are confined there after one suspect is believed to have contracted smallpox.
* Barney Miller", the entire 12th Precinct is tested with a lie detector(a procedure that was the Hot Topic of the Day in the 1970s) after a newspaper report of corruption. Det. Wojciehowicz failed miserably due to being nervous and deliberately provoked, while Det. Dietrich passed perfectly (despite claiming to be from outer space) simply by remaining calm.
* Barney Miller", the NYPD is going on strike. Dietrich makes an offhand comment to Japanese-American Yemana about how Japan has a lot of labor unrest. Yemana says yes, he has an uncle back in the old country who's a union activist and has spent time in jail.
* Barney Miller: There's a funny bit where Wojciehowicz briefly interprets for two elderly Polish men, caught dueling with swords in the park until they're able to pull themselves together. Naturally, Wojo's a beat behind and continues translating even after they begin speaking English.
* Barney Miller, the squad come across a woman who escaped from a mental hospital. The doctors are convinced she's speaking gibberish and keep insisting that she is insane despite appearing to be quite lucid. Dietrich finally shows up with the owner of a store from the Greek section of New York City and discovers that she's speaking a rare dialect of Macedonian. Inspired by the similar real life stories below.
* Barney Miller, The two parter, "Quarantine", the are stuck overnight sleeping in the squad room, and Harris has a soliloquy during dreaming, waking up each member of the squad, as he rants in his dreams about Yemana's bad coffee, Fish running to the bathroom all the time, Barney's 'human compassion', finally waking himself to find everyone staring at him - Barney says it's 'coincidence'.
* Barney Miller: they check a perp for priors and he comes up clean, so Barney tries to talk the injured party into dropping the complaint.
* Barney Miller was Barney's own superior (technically) Deputy Inspector Franklin D. Luger, an old-school, out-of-touch cop who rarely took much initiative. (He was encouraged not to.)
* Barney Miller was doing it by the book by reporting the case to Internal Affairs.
* Barney Miller" when Barney suspects some brownies baked by Wojo's girlfriend have hashish in them. He asks Harris to test the brownies, which Harris does... by eating one, rather than sending it to the lab as Barney had expected.
* Barney Miller, when Nick Yamana was convinced that a suspect was turning into a werewolf:
* Barney Miller who became a fan favorite and stuck around for the rest of the show's run.
* Barney Miller who vandalizes an ad agency office out of frustration with this trope. He sarcastically suggests calling kosher dill pickles "the ko-ko-kosherest'', which the agency rep thinks is a seriously good idea. The man's appalled, even though the agency drops charges out of gratitude.
* Barney Miller with a man that tried to electrocute himself in the bathroom and apparently succeeded, but Barney starts compressions after Chano uses a mirror to verify whether he's breathing or not. After the man starts turning blue, Barney resorts to walloping him in the chest with his fist, which restores him to breathing. He does remain unconscious, however, and the EMTs do point out that his ribs are broken.
* Barney Miller Wojo is taken to the hospital to have his stomach pumped. Making the best of a bad situation, Barney has Harris check Wojo into the hospital under the witness's name, and Harris leaks to the press that he died.
* Barney Miller", Yemana, the Japanese detective, tells a joke. Why was the Japanese thermometer factory forced to close? "They found some swordfish in the mercury."
* Barney Miller "You won't have to see her again — not until she testifies at the trial."

* Barney offers a fist bump for a lewd joke, but Ted and Marshall refuse. Barney then vows not to lower his hand until the fist bump is reciprocated, a vow that he soon regrets as his arm starts to tire.
* Barney played with this trope in one episode where Dietrich was investigating someone sending threatening letters to the Mayor of New York:
* Barney rides the subway immediately after finishing a marathon. Because he didn't do any
* Barney Rubble in order to trick Fred out of his Fruity / Cocoa Pebbles cereal, all with the same result:
* Barney's field of study is "five years of modern dance, six years of tap."
* Barney's gay brother has the opposite problem. He used to be just as big a Casanova as Barney but he fell in love and got married. Since Barney hates the concept of marriage, he did not tell Barney about it. When he visits New York, he pretends to still be single and trying to pick up men in a night club.
* Barney's Great Adventure began with the main characters getting ready watch the film in a theater.
* Barney's Great Adventure design and personality prevents him from doing that, however, hence why he doesn't hold up as well as other media for young children.
* Barney's Great Adventure franchise to fall under this trope, as it was filmed in the Montreal area and a good portion of the supporting cast were Canadian. The rest of the franchise falls under a Texas version of this trope, as detailed below.
* Barney's Great Adventure (much like Elmo in Grouchland above) was not a box office success due to the franchise's target demographic, but sold incredibly well on video.
* Barney's Great Adventure spoiled that Twinken was the creature that lived inside the egg a couple months prior to the film's opening.
* Barney's Great Adventure to the Critic, causing him to fall on the ground.
* Barney's Great Adventure, when the Critic questions if the first scene of the titular film is the point-of-view from his blindfold after Barney kidnapped him:
* Barney's Hide & Seek Game is ridiculously easy even for the target audience. It is impossible to lose or die, and if enough time goes by without the player pressing any buttons, the game plays and beats itself for them.
* "Barney's On Fire" is almost always credited to Weird Al, though it was actually composed and performed by Tony Mason.
* Barney speaking French: "Parce que j'ai le jeu, mes chiennes." Translation: "Cos I got game, bitches."
* Barney spends one later episode hunting down a homemade sex tape that Marshall and Lily made. It's at first stated to not even exist, although it's eventually revealed that it is, in fact, real.
* Barney's Space Adventures (based on the namesake album) are just a few examples.
* Barney's stance on children wavers throughout the series, but overall he is against fatherhood. During the entire run of the series, he seduces countless women and none of them get pregnant... until the series finale, set over multiple years, where he accidentally gets a woman pregnant and is horrified. However, soon after his daughter Ellie is born, he completely falls in love with the baby upon holding her in his arms for the first time.
* Barney Stinson's Video Resume (sponsored by Barney's fictional employer Goliath National Bank), which is available in both "awesome" and "not-as-awesome" resolutions. They're not wrong. It's awesome!
* Barney the Dinosaur. In the next episode, however, Yami plays Monster Reborn to resurrect Tristan's original voice, and life goes on.
* Barney the Dinosaur" is an example of a Creepypasta ARG that (appears to have) failed.
* Barney the Dinosaur tying into an ARG. Appears to have died, judging by the comments on the video mocking it.
* Barney the Purple Dinosaur episode "Barney's Internet Adventure", Barney sees this warning as he watches the famous "Diet Coke + Mentos" video. He thinks they're taking a shower, so he decides to go take a shower using Diet Coke and Mentos in the outdoors.

* Barney tries to pull one of these on Marshall's friend Brad when he follows him and Robin to a hockey game and sees them kiss. It doesn't faze Brad much so Barney immediately begins cowering and trying to talk his way out of the anticipated retaliation (which doesn't come, Brad is a chill guy).
* Barney used Ted's name and profession to hit on women and then left a prepared farewell letter when he duked out. Except that he used his real name on the signature, which got the woman confused on who the hell Barney was, and a few episodes later it's revealed that she made a hate website about Ted for dumping her. Well, we now know that Barney hooked up with a
* ...Barney, when asked to envision his life in three years, would describe the exact same thing happening with a different girl. This would then come to pass three years later. After describing 2009 in this manner:
* Barney will alternatively be the only one to tell the truth while everyone else uses one blatant lie after another. It later turns out to be a subversion, because he's the only one that had actually seen it, and watches it regularly.
* "Barn Mates": in an attempt to be friends with Lapis (and make up for imprisoning and interrogating her previously), Peridot gives her own personal swimming hole, but since she forgot that Lapis was trapped underwater for months, it failed. Peridot then tries to give Lapis her tape recorder, on Steven's suggestion that she should give her something personal. Lapis just crushes it in her hand and tells her to get lost.

* Barnstorming: 32.04 seconds, even though that time is impossible even if you remove all the obstacles by hacking.
* Barnum gets two in "There's a Sucker Born Ev'ry Minute" and "The Prince of Humbug".
* Barnyard: After the death of Ben, Otis' father, Duke the sheepdog holds an emergency meeting over who the new leader of the farm animals should be. When Duke nominates himself to be the new leader, Pig objects and tells him that he saw him drink out of a toilet once, to which Duke tells him that he only did that because his water bowl was empty.
* Barnyard, as Otis stages dives, he crashes onto the floor offscreen which causes a yowling cat noise.
* Barnyard, combined with Ben misremembering a moment with Otis as a moment with his non-existent sister, is often used to point to Otis as being trans.
* Barnyard has two Polish dubs. The first was made for Canal+ (with dubbed songs) and the second was made for Polsat. A few voice actors appeared in both dubs, but never as the same character.
* Barnyard he gets fatally wounded from a severe coyote mauling, like Mufasa aside from a bit of blood on his mouth and some bruising he is in otherwise seemingly good condition.
* Barnyard, Pip the mouse gets so nervous over the upcoming battle his bowels give away. Bonus points for being on top of Pig's head.
* Barnyard, when Otis and his friends go surfing, they fly through an oil well and a chicken farm, resulting in them becoming covered in feathers when they arrive at the barn during the morning meeting.
* Barn Yarn depicts the dog gnawing on a string while Tom is raiding the fridge.
* bar of pink soap. One of the minigames on it explicitly asks you to 'Spank the monkey'.

* Baron Corbin, he lost all his money and has been reduced to begging.
* Baron Corbin with the universal consensus being that Kurt deserved better and that Corbin was an undeserving last opponent.
* Baron de Belleme, a icy Satanist Norman aristocrat with Hermetic powers and a tendency to brainwash people, who actively used magic to fight his enemies and sought the limelight at every opportunity.
* Baroness Blackheart probably has a good old fashioned alchemical lab, complete with smoking cauldron and eye of newt.
* Baroness Shelby is a straighter example, if much smaller and also not lacking in brains, skill and agility.
* Baronets:, a new character is also a baronet (and a former cavalry officer, with an MC), though he no longer claims the titles and honors: one of the new curates in the expanding benefice, the Revd. Gilbert Bohun.
* Baron "Gentleman" John Marcone, Lord of the criminal underworld of Chicago, is fiercely protective of children in his domain. Criminals may profit from pretty much every vice except ones involving children. Push drugs on children? He kills you. Use kids to sell or be mules? He kills you. Kidnap children? He'll help Harry Dresden, an enemy, take you down. This all stems from

* Baron High Ridge and Edward Janacek started pushing the Manticoran Navy down this path between Oscar Saint-Just's death and the restarting of the Manticore-Haven War, despite Honor and Earl White Haven's best efforts to the contrary.
* Baron Karl Heironymus Frederick von Munchausen is one of the few non-evil barons out there, helping out European powers maintain order around the world. Also appears in several film adaptions; technically he was a real person as well, but the real Baron Munchausen wasn't fond of the way Rudolph Raspe got him nicknamed "The Baron of Lies".
* Baron Kelvin's obsession with Ciel. It's particularly disturbing since Baron Kelvin is a fat and old reprobate who
* Baron Klaus Wulfenbach also has a reputation, somewhat more negative.
* Baron Klaus Wulfenbach and Agatha Heterodyne < Lucrezia Mongfish + Bill Heterodyne. Circumstances like how Klaus and Lucrezia parted or that he knows
* Baron Klaus Wulfenbach has canonical amorous history with Lucrezia Mongfish
* Baron Klaus Wulfenbach is built up as being incredibly ruthless, and it's early on implied that if his son Gilgamesh doesn't perform to expectation, he'll be broken down for spare parts (which isn't necessarily metaphorical, given that Frankenstein's monster-like "constructs" aren't exactly uncommon). But while it's true that he's quite ruthless, he kind of has to be, since he's in control of all of Europa, and not all of Europa is happy about this. Further, his punishments are harsh but not unfair, he rewards success quite handsomely, and greatly values loyalty; so much so that he actually punishes a man for conspiring against the man who just tried to kill the Baron.
* Baron Klaus Wulfenbach is often shown resolving disputes and coming up with schemes. He's also one of the best combatants in the series, leading some of his armies' assaults personally and out-swordfighting
* Baron Leopold uses a sword as a symbol of his noble status, but is not afraid to use improvised weapons, his bare fists and even his teeth.
* Baron Mordo, in this canon a wayward apprentice of Doctor Strange, and one of

* Baron Munchausen's narrative of his marvellous travels and campaigns in Russia.
* Baron of Jarnac, a far inferior swordsman who learned a tricky cut to the leg from an Italian dueling instructor. Today, "coup de jarnac" is a French idiom for a deceptive or underhanded action.
* Baron Omatsuri and the Secret Island is what it looks like when it's completely run out.
* Baron Omatsuri, until the latter yells at him that if he vaguely remembers it, that means it was someone he knew in his prime, back when he was hunting Gol D. Roger in the New World. Akainu promptly starts helping search the old records.
* Baron Praxis, Erol, ends up with only half his head semi-intact with a mechanical body, giving him his very own bionic eye (and face, and torso, and legs...). For a more heroic example, Sig has yet another bionic eye. Yeah, Naughty Dog Software seem to enjoy this one.
* Baron Roman Nickolai Maximilian von Ungern-Sternberg Civil War so he could try and restore the Qing Dynasty in his spare time. This was not a guy who was gonna let overwhelming odds (or common sense, or sanity) get in his way.

* Baron Strucker is killed by Ultron barely halfway through the film, but in the comics, the character has
* Baron system of logic, as he's willing to take a risk of death against a prize of greatly increasing his family fortunes, as opposed to accepting a certainty of exile and mediocrity in return for a guarantee of life. Accepting a risk as counterbalanced against a higher future gain is not automatically illogical — the Duke's error was not in taking the gamble, but in not having accurate knowledge of just how risky a gamble he was taking.
* Baron Undherbeit and The Monarch are both try to kill Dr. Venture at the same time. After coming to an agreement to combine their forces, Undherbeit asks if they should run the decision by the Guild first. After a brief pause, they both laugh at the suggestion and decide to 'screw protocol'. However, by the time they have finally decided upon this, all of their henchmen have been massacred by one of Venture's specially built robots.
* Baron Vladimir Harkonnen, upon receiving news that Paul and Jessica Atreides were dead after flying into a sandstorm, asks explicitly, "You've…seen the bodies?" He was right to doubt. In the novel, it is more explicit, but his entire plan is based upon the fact that this means of executing Paul and Jessica would not
* Baron Von Barron prefers blue bricks. Especially the third level shield.
* Baron Von Raschke (55 years old, retired after a 30-year career in 1996.)
* Baron von Rottweiler's castle appears to be located in such a place the few times it's seen.
* Baron von Steuben, the spiritual father of all American Drill Sergeants Nasty, was a mercenary officer advising the Continental Army. According to legend, he had an interpreter walk along with him while he conducted inspections to ensure that he had a good enough supply of English profanity.
* Baron von Strucker, a Nazi supervillain and the leader of the global terrorist group
* Baron von Strucker in Marvel Comics, and especially in his early appearances in
* Baron Von Strucker, though he tends to give off the vibe of a man trying desperately to live in the past.

* Baron Wulfenbach and his army (with Gilgamesh torn between this side and Agatha's).
* Baron Wulfenbach believes that Agatha is dangerous, and takes steps to neutralize her even though he knows that she hasn't actually done anything wrong yet. This makes his empire vulnerable both to Agatha, lone
* Baron Wulfenbach employs Castle Heterodyne for this purpose, albeit with more direct lethality than most examples. Repairing and researching the Castle from the inside out is the job given to convicts considered too dangerous for a conventional prison... and guarding those prisoners is punishment duty for lousy Wulfenbach employees.
* Baron Wulfenbach is extremely concerned about Gil's devotion to Agatha, and what it might mean for the Empire once Gil inherits it. He was right to be worried.
* Baron Wulfenbach's daughter and Gil's twin sister), it still hasn't been directly addressed in the story.
* Baron Zemo completely steals the show in Episode 3 and manages to upstage even Sam and Bucky several times after. Zemo’s
* Baron Zemo he suffered at the hands of Heinrich, and a major part of his character is that fact that he disowned his father, the Nazi ideology and all prejudices associated with it.
* Baron Zemo (the original) tried to attack the Allies with his dreaded Adhesive X, but Captain America foiled his plan and caused his pink mask to be permanently glued to his face. Zemo could talk and breathe but needed to feed through an IV. He survived for decades in South America with the mask on his face (imagine the smell!)
* Baron Zemo", you're most likely referring to Helmut, who didn't appear until nearly a decade after his father and didn't actually become Baron Zemo nearly two decades after. If you refer to Heinrich, you're going to have to specify his name to avoid confusion.
* Baroquecore album begins with and features a heavily distorted drumline with shrieking metallic sounds spliced in it.
* Baroque, especially the original release due to a heavy atmosphere created by the limitations of the system.
* Baroque game. It did have survival horror elements, but other than that, it's not.
* Baroque has Lust as a status ailment. It makes all enemies and treasure chests look like women (and the women all look the same).
* Baroque have wings but are never seen flying—not even the Archangel, who has the only wings that look big enough to be functional. The protagonist can also acquire (fake) wings that grant various effects (immunity to Poison, Vitality regeneration, etc.), but never the power of flight.
* Baroque Pop: One of the pop music styles to debut during this decade.
* Baroque RPG often uses the words "please" and "goddammit" in the same sentence.
* Baroque's remake contains the noise one of the enemies on those floors will make. They make this noise only when you can't see them.
* Baroque, there's a bit of well-buried subtext that implies that the Protagonist (12) had feelings for his twin brother (13). The boys are conjoined twins and share a heart; only one of them is conscious at a time when they're both alive, and most of their communication was in the form of notes and playing chess. It sort of gets worse with the manga, which implies 12 has these same sort of feelings for the Absolute God but looks to her as sort of a surrogate for his conjoined twin. So, it's rather complicated and can be mildly unsettling.
* Baroque; they like to thrust those blades into the ground and chase the protagonist with them.
* Baroque Works occasionally pose as Alabastan troops attacking civilians in order to discredit the real army. Later, one agent actually transforms to look like the King of Alabasta to drive people into violent rebellion. Baroque Works agents were also placed among the rebels; agents on both sides are tasked with shooting key

people on the other side if the Alabastan civil war appears to be reaching an end so that the war can continue. The organization's goal is to weaken both sides as much as possible so their leader, Crocodile,

* Barotrauma is an indie game involving a submarine navigating the abyssal depths of Europa's frozen oceans, which contain nightmarish deep-sea predators as well as the remnants of a mysterious alien civilization.
* Barovia in the Ravenloft setting is an entire temple dedicated to this concept. Evil gods upon evil gods (implied to be the Dark Powers themselves in the 5th edition update) sealed in giant blocks of amber. Of course, a temple filled with dark gods sounds like a perfect idea that'll never go wrong, doesn't it?
* barracks rats remained solvent purely by accepting as boarders the sons and daughters of military officers stationed outside the UK. Famous former barracks-rats include:
* Barracora are an unorthodox scaleless hybrid of humans and barracudas.
* Barracuda, a badass hitman, manages to win a brutal fight with the Punisher. Instead of just shooting him, Barracuda throws him into the ocean with a bleeding gangster and a Great White.
* Barracuda: Back in London, Morkham stole Flynn's pistol and used it to murder Flynn's sister Virginia: forcing Flynn to go on the run.
* Barracuda Blackdog has a web of wicked looking scars crisscrossing the left side of his face (and where his left eye used to be).
* Barracuda: Blackdog the pirate wears a tattered red silk bandana tied across his missing left eye, which adds to his fearsome appearance.
* Barracuda: Emilio, now Emilia, is a servant on the Spanish ship carrying Dona del Scuebo and Maria. He cultivates a troubled identity. Dressed as a young girl, he is sold as a slave to Mr. Flynn, who teaches him how to handle weapons and then becomes her lover. Emilia learns that he is being chased by a villain named Morkam. Morkam having killed Flynn, Emilio inherits from his mentor and decides to avenge him.
* Barracuda, Fine Flame is a prostitute who is deeply in love with Raffy, who rejects her. Humiliated, she wants revenge: she helps the Spanish to take control of Puerto Blanco and become governor, using Raffy as bait.
* Barracuda: In an effort to break Maria to his will, Ferrango has her stripped to the waist and flogged so brutally that it tears up her back and almost kills her. It does not break her and, if anything, only strengthens her resolve.
* Barracuda miniseries the FBI, NSA, DEA, and CIA are all cooperating to find Barracuda before he can restore the flow of drugs from Santa Morricone. Naturally, each agency has its own agenda and will make sure to prevent the others don't interfere with it.
* Barracuda stays hidden. He kills the people who know too much, and tries to quietly get out the room when an another person discovers the corpses. Unfortunately, she turns around and he has to kill her too.
* Barracuda, the Governor wears black leather pants that cling to her extremely shapely legs and ass like a second skin. It's a miracle that she can walk at all.
* Barracuda. The series ends with Barracuda and his on-off porn actress love interest stranded in a rubber raft after all their plans have crashed and burned due to sheer random chance. When the actress wonders what they're going to eat since the raft has no supplies, Barracuda implies that he's going to eat her.
* Barragan has an ability in his released form that will rot away all of the flesh, muscle, and organs of a person until all that is left are the bones. the bones turn to dust and vanish. This makes sense since Barragan can age rocks and concrete into nothingness.
* Barragan takes command in Aizen's absence, making it seem to characters that he's the top Espada until it's revealed that he's only the second Espada. It's an

unsuccessful example as Kyouraku admits to his opponent (the real number one) he'd suspected all along that Barragan was number two, but had been hoping otherwise.
* Barrage, Astro thinks 7 minus 5 equals 3. He didn't even know what money or work is until he was taught by a passing alien named Black, but this is justified as Astro is an orphan growing up in the slums who had no chance at a proper education.
* ''Barrage Jamming''/''Universal Jamming''/''Full-Band Interception'', to avoid the sun-ramming part.
* Barrage, with the different races coming from other planets and incredibly advanced science and engineering in place of magic.
* Barraki marine monsters with surprisingly complex personalities who came off as just as, if not even more threatening, than many other villains.
* Barrayaran culture calls for burning offerings to the dead. They get mentioned a few times:
* Barrayaran Imperial Security Headquarters is a place where all the janitors are captains and colonels fetch the coffee. This is entirely justified by the very high security clearances you need to work in ImpSec HQ, especially with the kind of access to most areas that janitors would have — and the commensurate higher salaries they also merit due to that trust.
* Barrayarans also use funeral pyres for the most highly regarded of their dead: a young Gregor Vorbarra lights both his grandfather Ezar and his
* Barrayar. Aral and Cordelia Vorkosigan, in all other respects the book's protagonists, play Beta Couple to Koudelka and Droushnakovi in a minor subplot. (They've already had their turn as Alpha Couple in the first book of the series.)
* Barrayar centered on a siege of Vorbarr Sultana by the loyalist forces led by Regent Aral Vorkosigan against Count Vordarian's attempt to usurp the Imperial throne.
* Barrayar, Count Piotr says that he wishes that Mad Emperor Yuri's death squad had killed Aral, instead of his older brother. This is the final straw in their deteriorating relationship, leading to a five-year estrangement.
* Barrayar, Droushnakovi is very tall and strong and gifted at martial arts and unarmed combat, but lives on a planet where anything like that is largely a male preserve. She has three older brothers who smuggle her into boys' judo classes, and finds a niche as an adult as bodyguard to the Princess. Cordelia (herself a soldier) thinks to herself that on any civilized planet Droushnakovi would be a decorated trooper by now, but instead is stuck babysitting high-class women all day.
* Barrayar for her four year old son Gregor. Emperor Ezar saw through him and arranged for his grandson's regency to be assigned to Lord Aral Vorkosigan instead.
* Barrayar has an interesting twist on the arranged marriage as, while being most common among the Vor elite, some of its mechanics were in common use among the lower classes as well. In particular, the concept of the Baba, a respected 3rd party that acts as a go-between. Even if the marriage isn't arranged by anyone other than the particulars, the bloke might have his family send a baba to the woman's family, who then asks the woman. It is a kind of crutch for the socially awkward, as the woman doesn't need to reject the man to his face, and the man doesn't have to ask her directly.
* Barrayar has been isolated from Galactic culture for centuries and reverted to medieval level.
* Barrayar, in which a pair of young unfortunates cast all manner of aspersions on Count Aral Vorkosigan and his new wife... while seated directly behind the lady in question. She's amused until they start in on Aral's injured aide.
* Barrayar is underpopulated, and has unfettered reproduction (though it is somewhat "backward" and considers all sex out of wedlock to be illicit). During the Time of Isolation however, the Barrayarans practiced infanticide of any child possessed of obvious defects or mutations, as they lacked the medical resources to care for any disabled individuals.
* Barrayar Later, she references Vordarian's words, and assumes he was going to finish with "that."
* Barrayar, persuades a scientist, who considers himself above such superstition

but feels haunted by the death of a colleague murdered in his laboratory, to gain mental peace by making an offering to the colleague anyway, and moves the surviving scientist to a new lab;
* Barrayar, Simon Illyan has a short list and a long list of suspects in an attempted assassination of Aral Vorkosigan, and "Everyone's on my long list."
* Barrayar. Unfortunately, Aral was there because he believed that he needed to witness the execution with his own eyes.
* Barrayar was a Lost Colony at a point of its history when the wormhole leading to it suddenly closed. However at the time when the series takes place, it's already been rediscovered through another route for three generations. It does still bear the barbaric mark of that time, however.
* barred from flying a P-38 ever again. He was shot down over enemy lines in a Spitfire Mk V, then taken prisoner, only to later break out of prison, and fly a Fw-190 to the Netherlands.
* Barred from the Afterlife: A character is unable to go to Heaven or Hell, and is stuck wandering around the mortal realm for eternity.
* Barred from the Afterlife: A dead character cannot enter any form of an afterlife.
* Barred from the Afterlife: A deceased person who can't enter Heaven or Hell.
* Barred from the Afterlife alike refuse to take in someone after their death, thus leaving their soul trapped in the living world.
* Barred from the Afterlife. (This also makes them very worried about dying in vacuum, which leads to the eyes freezing and rupturing.)
* Bar Rescue creepy giant mutilated dolls on nooses. The rest of the décor was equally as unsettling and offensive.
* Bar Rescue has careened into this territory. Early seasons dealt much more with the "bar science" aspect of the show, with Taffer explaining more or less calmly how particular decisions the bar owners made negatively affected the business and how hi changes resolved the issue. Later seasons devolved into Taffer screaming into the faces of owners over even the most trivial of problems.
* Bar Rescue into the act. The letter she reads them aloud is the catalyst for getting the infighting to stop, for the sake of their father's legacy. (Bonus: the unedited letter is the back of the menu.)
* Bar Rescue, one of the bars that the show went to somehow managed to drop a grilled cheese sandwich into a fryer. The resulting fried grilled cheese sandwich was enjoyed by the host of the show and the staff of the bar, who then put it on the menu.
* Bar Rescue taped one in 2010. It aired in 2014 as "The Lost Episode"; of note is the fact that star Jon Taffer didn't wear his usual sportcoat.
* Bar Rescue that involves an infestation, a dirty kitchen, or any shoddy equipment, and chances are something is going to be zoomed in on.
* Bar Rescue The ultimate concept of The End, a pizza bar / club that was heavily upgraded from its tacky Hallowe'en theme (The Underworld).
* Barret also has a chainsaw arm attachment as one of his (melee) weapon options. Very reminiscent of Ash from
* Barret, Cid later takes on the role, taking over the leadership of the party when Cloud is incapacitated and Tifa stays behind to care for him.
* Barret seems to use a combination of his Heavy Shot and Mind Blow attacks.
* Barrett's Privateers, about an ill-fated British privateer crew during the American Revolution. "A letter of marque came from the king to the scummiest vessel I'd ever seen", and it all goes downhill from there.
* Barrett Wallace's "Atomic Scissors" resemble the Power Arm, and he's also got a "Drill Arm", for example).
* Barret Wallace have in common? They all use silly theatrics in one form or another in order to cover their personal tragedy—mainly losing loved ones to a devastating attack.
* Barret Wallace reactor bombing mission, reacting with anger when Wedge asked about his pay, and sending Biggs flying during an impromptu sparring session back at their hideout. Here, he is far more pleasant and openly affectionate with them.

He also intended for them to simply sabotage Reactor 7's Mako pump, rather than blow up the whole reactor like in the original.
* Barret with a chip on his shoulder, uses a gatling gun grafted into his arm.
* Barrier-Busting Blow: A single blow is enough to break past a barricade.
* Barrier-Busting Blow: A super-strong character or monster just punches through a door or wall to reach the victim on the other side.
* Barrier-Busting Blow: The killers in these kinds of films have the abiltity to punch through walls and doors to grab their prey.
* Barrier Change heals Frog, by way of draining the energy from it, just like it did before. (The rest of Crono and Co's arsenal also tend to get some sort of justification for their stat boosts.)
* Barrier Maiden, in which the main characters have to breach the barrier that divides the real world from the netherworld in order to take Gensokyo's spring back. Yuyuko states this before fighting Reimu saying that being at that point of the netherworld basically means she's probably dead. Even if Reimu loses against the non-lethal spellcard rules, all the spring in Gensokyo will resurrect the Saigyou Ayakashi and Fridge Horror will remind you of his abilities.
* Barring a lucky shot, massive animals such as rhinos, grizzlies, or walruses can easily soak up bullets from small-caliber weapons without stopping. Large crocodilians, which have bony armor plates under their skin, can be virtually unkillable with light ammunition; during WWII, Japanese infantry who'd retreated into the Pacific islands' marshes could be heard throughout the night, screaming and firing in vain at bellowing crocodiles. A small few made it back to dry land, for once content to surrender.

* Barring intervention, in a few billion years, the increasingly hot Sun will boil off the Earth's oceans, leaving a desert planet. Before, that is, it gets hot enough to
* Barring some generational gaps, the Ateneo de Manila since the 1960s has also been seen as a springboard for liberal (sometimes even left-leaning) politics—further supported by a) the University's espousal of Catholic social teaching (if not full-on liberation theology); and b) its proximity and institutional cooperation with the secular and activist University of the Philippines-Diliman. The Ateneo de Manila (and by extension, the Philippine Jesuits) therefore have the curious reputation of being seen as liberal and more progressive compared to the rest of the Philippine Catholic hierarchy (especially in comparison to the Dominican-run University of Santo Tomas, and the conservative private schools run by Opus Dei).
* Barring some passersby who briefly show up and leave alive, the only characters in "Cutting Cards" are two men who compete against each other in
* Barring special rules, the Reflex Save for half allows anyone with Evasion to dodge the blast entirely.
* Barring the epilogues of each season's finale and a prologue in the third season's premiere, every episode of
* Barring the Mechagnomes, most of the Titan creations appear to have started as living or magically animated sculptures rather than machines. Some of the apparently uncursed giants can actually be mined like mineral nodes as opposed to dropping parts.
* Barring two homeless men who were trapped there and the remains of a missing family,
* Barristan removes his white cloak and tosses his sword at Joffrey's feet when resigning the Kingsguard.
* Barristan Selmy arguably fits this trope the best, and is presented as something

of a paragon of a by-gone age. This becomes especially clear after he joins Daenerys, and his advising her to morally correct choices contrasts with Jorah's more coldly pragmatic suggestions.
* Barristan Selmy considers his service to Danareys Targaryen to be atonement for failing to protect her father, Aerys Targaryen, during Robert's Rebellion. Or maybe it's for rescuing him from the Defiance of Duskendale, the
* Barristan Selmy, due to Ian McElhinney's deep, slightly scratchy voice.
* Barristan Selmy goes down in an almighty blaze of glory saving Grey Worm from the Sons of the Harpy.
* Barristan Selmy hides his identity with one while shadowing Daenerys in the Season 3 premiere "Valar Morghulis" where he shows up to save her from an assassin. Doubles as a medieval
* Barristan Selmy is one of the oldest active soldiers, as he's a veteran of
* Barristan Selmy is one, though he was also one after taking Robert's pardon after the Rebellion.
* Barristan Selmy is the most respected swordsman of Westeros, treated with equal devotion by fearsome comrades-in-arms and former adversaries. Ned Stark, Jaime Lannister, Jorah Mormont and even Tywin Lannister speak of him with respect. A more subtle example is present when he's stripped of his rank by Cersei. The Hound, who stands beside the throne, is normally
* Barristan Selmy, the Unsullied and some of the Meereenese, and the conspirators are trying to get things back on track.
* Barristan's: "I am the death of your King. Now die, Barristan the Bold, and know you have utterly failed in your duty. Boom."
* barritus, a rolling war cry that (as ever) adapted from the Germanic tribes they fought against.
* "Barroom Hero". Basically it's about a big tough guy who loves to get drunk and fight, but he's a much better drinker than a fighter, apparently.
* Barrow Hill has a variant that ripples when touched, even more like water than the one the picture above.
* Barrow Hill is set in a spooky Cornwall full of creepy ruins and folklore.
* Barrow hounds are black-furred mastiffs with glowing red eyes, grown to the size of jungle cats, which haunt shadowlands and can move between the Underworld and Creation at will. They only hunt the dead and those doomed to die soon, using their supernaturally terrifying howls and their ability to create ghostly copies of themselves to harry the soon-to-be-dead towards their demises.
* "Barr's Irn-Bru. Made in Scotland from girders" and "Scotland's other national drink". More recently "See what Irn-Bru can do for you" and "Get some Irn in you."
* Barr's Iron Brew became Irn-Bru many years ago as it contains neither a substantial amount of iron nor is brewed. The word brew is actually northern word for a drink. Similarly, the drink is listed on the back as a 'Sparkling Fruit Flavoured Drink'. They don't say what the fruit flavour is but this is because it was originally said to be flavoured by iron girders (in actual fact it contains such a low amount of iron as to not be detectable).
* Barry Allen #4, he discovers his superspeed when a diner waitress trips, and he finds he can move fast enough to straighten the tray, catch all the plates and flying food and replace them. He does it so quickly that she doesn't even see him move and is left wondering what happened.
* Barry Allen and his Rogues developed a very close relationship throughout the years. He was genuinely fond of them, and they kind of liked him and mourned his passing.
* Barry Allen and Iris West. They're even married on an alternate earth and in the first timeline of the series. While both are capable of feeling genuine attraction to others and can even fall in love with other people (Eddie Thawne for Iris, Patty Spivot for Barry), it always comes back to them in the end. Barry fully admits that Iris is the love of his life, and she admits she feels the same way, too.
* Barry Allen break the Anti-Life Equation's hold over Iris Allen in Final Crisis
* Barry Allen, his nephew Wally West, and his grandson from the future Bart Allen.
* Barry Allen is a student and the youngest of the League, whereas his comics

counterpart is usually fairly experienced, already with the Central City Police Department, and often
* Barry Allen's (actually called the Rogues in this case) says "We're gonna need more Rogues."
* Barry Allen that Thawne went back, murdered Nora, and Henry died in prison after being framed for it, Barry was coming back to a world where his parents were no longer among the living.
* Barry Allen, the second Flash, takes this to its logical conclusion when as a bunch of soldiers fire their weapons at him he begins moving so quickly it appears from his perspective that
* Barry Allen treasures his life and his friends above anything else. While Jay is a
* Barry also eventually learns to travel through time by entering the Speed Force and visualizing his destination. However, this can result in
* Barry & Todd ultimately won, with the Germans they played against proceeding to shove their paddles up their ass. Cue their reaction faces expressing some form of butthurt
* Barry and Iris' in "Out of Time," with the camera swirling around the two, and Barry's reveal that he is The Flash to her immediately afterwards to stop the massive Tidal Wave,
* Barry and Wally are able to bring Pietro Maximoff back to life after finding him in the Speed Force
* Barry: Barry is a Marine veteran of Afghanistan. This informs much of his character, as he came back with PTSD and didn't know what to do with himself. He became a hitman due to Fuches' influence, and the skills he'd been trained in made it quite easy for him. Over time however his PTSD came back, and he questions not only being a hitman but also his Marine service. He often flashes back to his experiences then and they serve as inspiration for acting too.
* Barry, Barry puts the gun in his hand to make it look like a suicide.
* Barry Benson sues the five largest honey manufacturers on behalf of the bees they exploit. This is a class action lawsuit, where a few representative plaintiffs claim that they are representative of a larger class of people, and as a result, they claim that they should be able to prosecute the lawsuit on behalf of all of those people who are similarly affected. Going with the federal definition of a class action lawsuit, there are some requirements you have to meet before you're able to proceed further per Rule 23 of the Federal Rules of Civil Procedure, which requires:
* Barry B Longyear features a device allowing a prisoner to subjectively serve a 20-year prison sentence in 5 minutes of real-world time.
* Barry Bonds in his later years (when he ironically won most of his MVP's). He lost a lot of speed with age, but he hit homer after homer.
* Barry Bonds was considered this in his late-career "breakout". As a monstrous home run hitter who could take even perfect pitches over the wall in the cavernous Pacific Bell/SBC Field, Bonds was so feared by opposing teams that the Arizona Diamondbacks once intentionally walked him with the bases loaded in 1998, giving his team an automatic run (rather than allow him the opportunity to beat the Diamondbacks). And it wasn't just the raw power; Bonds was only the second player in history to achieve 40 stolen bases and 40 home runs in one season, as well as leading the majors in walks several times, showing excellent plate discipline.
* Barry Bostwick in the late 70s. Though they actually gave away that it was him from the get-go, as he played the aged already-imprisoned serial killer.
* Barry Chechen gangster who doesn't hesitate to kill people but also worries that the other gangsters don't take him seriously enough and prides himself on his hospitality.
* Barry Claude...sitting on a tree branch...missing one of his shoes...while an angry bear and her cub roar at him from below.
* Barry Cryer and Ron Golden's song "Truffles" is about one of these, to a tune that's a mashup of
* Barry Darsow) became wrestling golfer Stewart Pain. Due to the untimely death of

real-life golfer Payne Stewart, where the name was taken, he became Barry "Hole in One" Darsow not long after.
* Barry Darsow/Demolition Smash/Repo Man/Krusher Krushchev/Blacktop Bully (Barry Darsow}
* Barry doesn't remember that he and Dawn met when they were younger. Granted, they're probably only ten or eleven...
* Barry Eisler found himself stuck with various rain-pun titles in his series about hitman John Rain. Then the books had titles based around the word 'assassin' whether or not they fit what was in the book. He's now had them re-released with his own titles.
* Barry: Esther looks very masculine, to the point that Fuches (jokingly or not, it's hard to say) notes "In America, Esther is a woman's name" on meeting her, to Esther's anger.
* Barry fires and exiles his daughter Nora without even consulting Iris first, which would make things much worse than they already are. When she is intending to write the letter, Ralph and Cecille dissuade her from resuming it.
* Barry Gibb is the only surviving member of the Bee Gees band, all of whom were his brothers. The youngest brother, Andy died of mythrocarditis as a result of his drug abuse. Maurice died as a result of complications of a twisted intestine, and Robin died in 2012 of kidney failure.
* Barry goes back and saves his mother from Thawne. He then watches his past self, the one who failed to save her, smile and vanish into thin air. After Barry fixes the above timeline in season 3, Diggle's daughter Sara is erased from existence, and John Diggle Jr. is the Diggle baby now, possibly setting the Bad Future.
* Barry Goldwater (R-AZ): Senator from Arizona (1953-1965, 1969-1987), 1964 Republican presidential nominee.
* Barry has an episode literally titled "What?!" Barry screams the title line at the end of the episode when he discovers that Loach doesn't want revenge for Barry killing his partner, he was just using it as leverage to get him to kill his ex-wife's new boyfriend.
* Barry Heterodyne, Baron Klaus Wulfenbach, Master Payne and the Jäger Generals from
* Barry Horowitz: Debuted in 1979, competed in many different territories before establishing himself in WWE in 1987.
* Barry Horowitz qualifies, not so much because of any feud between the two, but because of how Hansen is one of the biggest foreign stars in the history of Japanese wrestling and Barry is best known, unfortunately, for his long losing streak.
* Barry Humphries, Australian comedian known for his Dame Edna Everage persona, revealed in 2017 that he has Asperger's.
* Barry Humphries' Les Patterson character once remarked that he was informed of this pronounciation by "A plummy-voiced pom who presumably asks his wife every night for a fuh."
* Barry Hyde, who was responsible for the death of his wife, who was trying to drown their son at the time, and
* Barry is a downplayed example. He isn't nearly as affected by the changes with his family in Central City, as his ties amount to three people (his father and the Wests), and the only one who changed significantly was his best friend Iris. Nonetheless, he still feels a level disconnect: for example, when he enters his room in the West House for the first time in years, he can barely stand the sight of it because it looks like a
* Barry Kripke attempted a fist bump with Sheldon who just grabbed his fist and shook it awkwardly.
* Barry Letts" as a deliberate parable expressing his own Buddhist beliefs. He was upset to receive letters from Buddhists protesting about the use of the "Jewel in the Lotus" mantra "Om mani padme hum" in the context of villains summoning up alien monsters, although defending himself on the grounds that the story explicitly described it as the misuse of something usually good.
* Barry Letts felt he was a redundant presence (though he did later admit that

writing him out was a mistake). The reason Turlough spent a lot of time imprisoned is that the writers admitted to just not knowing what to do with him.
* Barry Lyga Nevermind the fact that the teacher had already made moves on high-school students in the past...
* Barry Lyndon courted his cousin, which was a lot more common in that day.
* Barry Lyndon). There's a kind of disturbing scene where in a surprisingly gentle tone he describes a foppish and inexperienced opponent whose skull he bashed in with his musket and whose corpse he looted.
* Barry Lyndon, when the title character's friend is dying, after giving him the final kiss he requested, Barry collapses onto his chest, weeping.
* Barry Manilow and dressed in the same clothes she wore when Tony was alive.
* Barry Manilow. "It makes people disappear" is Barry's insightful take on the matter.
* Barry Manilow released the appropriately titled "Last Duet" as seen by the introductory lines:
* Barry Manilow, singer/songwriter of disco and pop music. Came out as gay in 2017 after years of speculation.
* Barry Manilow's "Mandy" was originally called "Brandy", and it was written and performed in 1971 by Scott English and Richard Kerr. The title change was to avoid confusion with "Brandy (You're a Fine Girl)", an unrelated song by Looking Glass that was a hit around the same time.
* Barry Manilow's second lead singer Jimi Jamison cut radio jingles for Memphis-based jingle company Pepper-Tanner between 1979 and 1983 before joining the band.
* Barry Manilow took one sip of his berry-flavored cocktail, and immediately wanted to bury it. Yuck.
* Barry McGuire is best known for his depressingly cynical anti-war song "Eve of Destruction". His best-known post-spiritual-conversion song is "Cosmic Cowboy", an optimistic song with Jesus in the title role.
* Barry Mitchell did a novelty song entitled "Stallone Again, Naturally" which specifically called out
* Barry Moredock (played by John Cullum) is a rare example of this kind of attorney cast in a positive light: He's a firm believer in constitutional rights and will defend someone whose rights he thinks are being violated, even if he personally thinks his client is a scumbag (one such client was a young Neo-Nazi who was known to have murdered several people for no other reason than their ethnicity).
* Barry "My gun is my partner and my bullets are my backup" Burton wields a Colt Anaconda. The longest model of that gun is 13 inches(!) which judging by the fact that it is bigger than his head in most cutscenes is probably the model he owns.
* Barry N. Malzberg's short story "What I Did to Blunt the Alien Invasion". This story has two tracks, one in which aliens reveal themselves to a man and warn of a coming invasion, after which he does everything within his limited means to warn people, including
* Barry of Afghanistan; after returning home with PTSD and depression and no applicable civilian skills, he is manipulated by a family friend into becoming a hitman. At the start of the show, Barry's depression is back, and he's looking for a way out of his life of crime.
* Barry Pearl, Doody in the film, plays a National Bandstand field producer on the TV Version.
* Barry Pepper as squad sharpshooter Pvt. Jackson speaks in a southern drawl and prays out loud while he blows away Nazis in
* Barry, Rachel's fiancé from before the series. Initially, he was a nice, but boring guy whom she left at the altar because she didn't love him. Later it's revealed he was a
* Barry's arch-nemesis Eobard Thawne killed his mother and has escaped being erased from the timeline not once but twice. Then in Season 5, it seems that someone has finally caught him in the future, and he's shown in an Iron Heights cell watching the clock that's ticking away the hour left until his execution. Ultimately subverted, as it turns out that he's been running a massive

* Barry's father Henry Allen was arrested for the murder of his wife Nora after the Reverse-Flash stabs her with a knife, making it look like he'd done it since no other normal adult was around.
* Barry's grandson Bart Allen takes this to the logical extreme as Impulse; this is a kid who, in the words of his guardian "gets bored waiting for the light to come on after he hits the switch."
* Barry Sonnenfeld (for example, the original comic strip never named the characters).
* Barry starts every episode with "My name is Barry Allen, and I am the fastest man alive." It's telling that, in one episode, after that intro, Barry says, "My name is Barry Allen, and I'm
* Barry's time remnant from the future in a fancy suit), Accelerated Man. H.R. also mentions his world's Flash. It's never made clear if the Flash of Earth-19 is the same person as the Accelerated Man or a different speedster.
* Barry's wife Iris West is originally a redhead but similarly has been made a brunette in live-action adaptations (and in the
* Barry, thanks to their versatility and how easy they are to draw on quick notice. He's particularly fond of throwing them, with contributed to his alias of 'the Lightning' even before he gained his powers.
* Barry the Chopper likes to cut up helpless people for fun, so he carries a giant meat cleaver and a couple of carving knives to help with the process.
* Barrytown Trilogy were adapted, due to a rights issue, the Rabbitte family is renamed for both films, though Colm Meaney plays the father in all three films.
* Barry Trotter series has elements of this (for example, its version of Quidditch).
* Barry Trotter where the Quiddit team that catches the sneech gets a million points and wins the game.
* Barry, we realize that the Bolivians are so far away that they can barely hear what he's saying and even have to ponder among themselves whether Fuches is talking to them or having a bluetooth phone call.
* Barry White's "Never, Never Gonna Give You Up", she goes out onto the streets, nude, after taking a bath. No one gives her anything more than a passing glance. Granted, she does eventually find a coat to put on as she heads to her boyfriend's house.
* Barry Williams, Maureen McCormick and Florence Henderson have legitimate singing abilities and were showcased in multiple episodes throughout the series' run.
* Barry Williams, who played oldest son Greg, began getting his fan mail — most from teen-aged girls — relatively early, but it
* Barsaive Campaign Set, "Gamemaster's Book". On its initial voyage the airship Earthdawn traveled for a year and a day, exploring the land of Barsaive and bringing word to the sealed kaers that the Scourge had ended.
* "Bars And Stripes Forever" (1939) is set in a prison where a prisoner plans an escape past a rather daffy warden. Features a little
* Barsetshire: A bucolic, often English countryside in which tales of ordinary personal comedy and drama take place.
* Barsetshire district include Fleece, Worsted, Winter Overcotes, and Winter Underclose. The main watercourse in the area is the Rising River. There's more on the endpaper maps if you can find any of the books.
* Barsetshire novels. In the novel "Cheerfulness Breaks In," set in the opening year of World War Two, Barsetshire has to accomodate a number of refugees from Mixolydia, all of whom are various foreigner tropes. We learn that the local religion is Orthodoxy, and they have a long list of hereditary enemies among real-world nations. The name is a word-play on the mixolydian mode or scale in music.
* Bars, for ships torpedoed (with several variations, such as white for merchant ships and red for warships).
* Bar Sinister comic, is a humanoid artificially evolved from a vampire bat who has, of course, bat wings.
* Barsk The Elephants Graveyard: The only reason the Alliance maintains any contact with the uplifted elephants of Barsk is that they're the only sophonts in the

galaxy that know how to make koph, a drug that rare people called "Speakers" can use to call up the particles of the dead and converse with them.
* Bar Slide: The bartender slides the cup, mug or shot glass across the bar to a patron.
* Barsoom Circus, one of Lunesby's allies that she tried to arrange a form of witness protection for, posing as a clown, got shot out of a cannon at a cliff by their enemies in UNS intelligence.
* Barsoom Command Sergeant Schlock gets a targeted ad that whispers that he's being followed and should hide in the storm drain. Of course it turns out that the "ad" was hijacked by an AI who wanted his help.
* Barsoom, he discovers it's anything but. (It's Flavors 1 and 3 of the Cynical variety, since the dangers along the way will kill most people, and the few who do struggle through discover it's actually a death trap.)
* Barsoomian (Martian) novels, male or female, will wear a belt and weapons harness (male), jewelry (female) and that's pretty much it. Even when they're going into battle.
* Barsoom instead. The ultimate example is of course John Carter, the Warlord of Mars, which title means basically "biggest badass on the planet."
* Barsoom Martians would love nothing better than to sack any of them.
* Barsoom: Of the five main races inhabiting Barsoom, the Red, Yellow, Black and White Martians are very human-looking, with only their exotic skin colors giving away that they are actually aliens (plus, they lay eggs). The Green Martians are more alien-looking with their four arms and tusks, but still humanoid enough to qualify.
* Barsoom Ras Thavas has done this. As is par for the course, it proved to perhaps be ill-advised, which kicks off the actual story.
* Barsoom series which is named after her. While her character mostly drives the plot in the first trilogy, her number of appearances decreases considerably afterwards. The second book is about her husband John Carter trying to reunite with her, but she only appears at the very end. After the third book, both she and Carter fade into the background completely.
* Barsoom; she dresses like a man to escape slavery and the harem of Tul Axtar. She can also fight much better than most women in the Barsoom-series.
* Barsoom, there are three types of white-skinned Martians, blond haired, bald, and red haired. Justified in that each of them comes from obscure, introverted, and somewhat inbred city states on remote areas of Mars.
* Barstool Van Talk, live from Houston during the week of Super Bowl LI.
* Bart After Dark", Bart is punished for vandalism by being forced to work in the house he vandalized...which turns out to be a burlesque house. He thoroughly enjoys his time there and develops a rapport with the owner.
* Bart, a.k.a. "Stretch Dude", created a hole in his stomach using his rubber powers to dodge The Collector's phasers.
* Bart, along with all of Mrs. Krabappel's class, watched a 1970s film about puberty and sex, titled
* Bart also does this when he lifts Homer's change jar in a specific send-up of Indy's adventures, complete with
* Bart also has shades of this. From the episode "Postcards From the Wedge":
* Bart and Homer deliberately space themselves when their rocket (full of Earth's most irritating people) wasn't flying into the sun fast enough in another Treehouse of Horror episode.
* Bart and Lisa mention in one episode that Homer occasionally calls to the radio to give fake accounts about car accidents.
* Bart and Lisa Simpson have occasionally invoked this when anyone else goes after the other.
* Bart and Lisa spent most of a long car trip continuously asking "Are we there yet?" and Homer countering just as continuously "Just a little further." when the family travels to Detroit to visit Homer's long lost half brother in "
* "Bart and Lisa vs. The Third Grade" featured a flag, which was originally supposed to read "To Fraternal Love". Bart tampered with it, and as a result it now

reads "Learn to Fart!"
* Bart (and sometimes Lisa), gets to do this, displaying uncanny reasoning skills you wouldn't associate with him, whenever Sideshow Bob shows up, notably in his first two appearances when he frames Krusty for robbery and tries to kill Selma. Even though his third appearance in the episode
* Bart apparently tried to invoke this trope after getting in trouble at school; his chalkboard line from "Marge In Chains" is "I do not have diplomatic immunity."
* Bart attempts this in the short "Shoplifting" when he's caught trying to steal a literal pantsload of candy bars and the security guard leaves him alone with the goods. When the guard returns, Bart claims he can't be held accountable without evidence — then sees himself in a mirror and realizes there's chocolate smeared over his face and hands.
* Bart Baker - YouTuber known for his parodies of popular music videos.
* Bart barely convinces a group of children from Shelbyville that he is one of them. "No, not in my mouth! ...Uh, is what that kid would say." To be fair they don't have a clue who he is even after his reveal.
* Bart becomes one of these (and converts most of the other kids in Springfield) in
* Bart Braverman started out playing the Italian boy Giuseppe in the "Lucy Gets Homesick in Italy" episode of
* Bart can also be viewed as a sad clown. In "Lisa's Sax", when he was in kindergarten, he was verbally abused by the teacher that told him he would always fail in life when he simply struggled with naming the alphabet, causing him to get depressed and draw a picture of him being dead. However, he cheered up when he started making jokes; this can be further proven given that Bart is constantly abused by Homer and is bullied on a regular basis. At one point he was bullied by the town and attempted suicide in "The Boys of Bummer" as an attempt for forgiveness for failing to catch a baseball that caused the team to lose the match, but still makes jokes and pranks every episode.
* Bart Carny", a father/son carny team takes over the Simpson house. In trying to think of a way to take back their house, Bart, Lisa, and Homer are each keen on fire as an option - one that Marge keeps vetoing.
* "Bart Carny", Hitler's car is destroyed by Bart during a carnival. Nelson Muntz punches Bart and asks him: "That was Hitler's car. What did he ever do to you?"
* Bart creates his own legend about a man at the school who one day snapped and
* Bart decides to quit the Junior Campers because they don't let you have a knife until you pass an exam and read a book on knife safety. Then he walks past Moe's Tavern, and Moe chases out a customer with a knife. Then the customer draws a massive
* Bart does quite well because he isn't given an SMG, but a multiple grenade launcher, a weapon with limited recoil (though how he adjusted for the grenade arc is another matter, especially the shot that destroyed Skinner's car when it was a several hour car ride away. Additionally, Lisa was given an M16 pattern assault rifle, and a full sized one at that, thus her difficulty controlling an extremely unwieldy weapon for an eight year old girl with, as shown in a later episode, the physique of a gymnast (small, with the weight of her head off-setting her balance point to her torso rather than her lower body, meaning a much higher center of gravity than most of the recruits, especially Bart who has always had a gut reminiscent of Homer's (though no way near as flanderised, ironically, excluding the episodes when he was rendered obese via snack foods.)
* Bart draws a seriously disturbed illustration expressing his first days in school in "Lisa's Sax". Fans commonly refer to it as the
* Bart dreams that the bus crashes at the start of the second act of "Treehouse Of Horror IV".
* Bartemius Crouch, Senior was the head of magical law enforcement during the time when Voldemort fell from power and gave those under him the power to kill, rather than capture, fleeing Death Eaters. Typically, they were sent to prison without trial, but those that were lucky enough to receive them would find Crouch the definition of a Hanging Judge, holding no sympathy whatsoever for those accused or

any belief that they might be innocent. Fortunately, the jury involved in these trials were typically more level-headed. This all came back to bite Crouch when his son was captured with a group of Death Eaters and put on trial with them. Crouch was just as unsympathetic and condemnatory to Junior as he was to everyone else who came before him, and his cold demeanor toward his own son lost him his standing with the Wizarding public, which cost him his potential bid for Minister of Magic.
* Bartender: According to Hanegashima, every cocktail is a Tough Act to Follow. Either you underperform, and the customer will never return, or you do your best, and your customer will come back, and expect you to do even better.
* Bartender, even with age and the after-effects of a severe stroke taking their toll. Ryu's sempai Kitagata has the skills, gives off the "seen-it-all" vibe and has the world-weary attitude and disrespect for the "young whippersnappers" of an Old Master, but is in his mid-thirties at the oldest.
* bartender-in-a-box explodes. Eating enough of the first and drinking enough of the last get you trophies.
* Bartender is a manga series that focuses on a genius bartender who uses his talents to ease the worries and soothe the souls of troubled customers.
* Bartender: It's only hinted at, but Ryu's backstory has a strong flavor of this. Piecing together what we've learned so far, Ryu's father was a high-ranking politician referred to as "the monster of Nagata-Cho", and Ryu grew up in a privileged home, but threw away his father's support in order to become a bartender.
* Barter Kings uses Bachman-Turner Overdrive's "Takin' Care of Business".
* Barter Kings, where the two hosts each pick a starting item, go on their own chain of deals, and then reconvene at the end to compare who ended up with the higher value final item.
* Bart fakes his kidnapping in order to cover up that he had sneaked out of the house to go to a rap concert.
* Bart Gets an Elephant", after getting stuck in a tar pit and rescued by Stampy the elephant, Barney Gumble thanks him as he lights a cigarette, and due to being covered with tar, he catches on fire. It doesn't seem to bother him much.
* Bart Gets an Elephant", kids keep knocking at Homer's door, and as he turns them back, Milhouse offers him money to see it. Homer goes "That gives me an idea!" and he proceeds to plant a sign on his front lawn that reads "Go away"
* Bart Gets an F", a season 2 episode, he promises to do better on the next history test, as the teachers were saying he might have to repeat his grade, and when he really sits down at his desk (which he put in the basement so he would not get distracted by the fun snow day everyone else was having), he finds he cannot remember anything and cannot concentrate. Even after studying hard he still fails the test, and only scrapes a D by remembering a bit of information that was historical and a fact but was not really relevant.
* Bart Gets an F, but some media still thinks "Cowabunga!" is Bart's catchphrase.
* Bart Gets Famous", Kent is so pissed that Bart has stolen his cheese danish that he refuses to do a news story. The network replaces him with Bumblebee Man, who turns out to be a much better anchor... at least initially.
* Bart Gets Famous show skit. He trips and brings down much of the set, and when he innocently declares "I didn't do it", the audience loves it. For a few weeks, the "'I Didn't Do It' Boy" is a regular on the show and a national phenomenon.
* Bart Gets Hit by a Car". When he shows up beside Bart's hospital bed, Homer mentions that he saw Hutz literally chasing Bart's ambulance. After they initially decline his offer, he leaves the room and immediately goes after some paramedics pushing a gurney. "Lionel Hutz Attorney at Law!... Is that a broken neck?... great!" And later, when Homer visits him in his office, he hears an ambulance go by and starts to leave, before suppressing the urge and resuming his talk with Homer.
* Bart gets sent to military school in "The Secret War of Lisa Simpson" as punishment for pulling a literally disastrous prank at the police station while he and his class were on a field trip there. The prank involved stealing every bullhorn in the station and lining them up end to end, creating a mega-mega-
* Bart gives Homer an altered report card containing straight A-pluses. Homer

quickly realizes that they were previously D-minuses and chides Bart for getting greedy. "You know, a D turns into a B so easily." Before that on the bus ride home, Lisa lamented that he should have at least forged
* Bart going fishing with Flanders (not really Bart's father, but in this specific instance clearly acts as father figure) in
* Bart got in on this once. After being told of winning $500 in a lawsuit, he imagines hitting Vegas, betting it all on roulette. And loses. He still chuckles after the dream plays out.
* Bart had lice and Milhouse got some disease from being bitten by a monkey...
* Barthandelus the fal'Cie changes forms but the basic setup of his body is the same. He can be best described as gigantic turret-like torso with an oversized human-like head in the middle and several smaller human faces on his shoulders.
* Bart has actually abused so many babysitters that the family is effectively blacklisted by everyone in Springfield (and one who is convinced to come back has post-traumatic flashbacks on seeing Bart - who, as a baby, tried to
* Bart has a similar dream sequence where he is called before the Bird Court and confesses that he killed the mama bird, orphaning her eggs. They had really just called him there to change their newspaper, it was filthy and covered in bird poop. After his confession though, they sentence him to death and try to peck out his eyes.
* Bart has just been "taken" by a monkey at a local zoo, and Homer tries to save him by putting a tranq-dart into a tube and putting it into his mouth. He then inhales, and it gets self-explanatory after that.
* Barthe DeClements' "Elsie Edwards" young-adult novel series (beginning with
* Bart himself was subject to this in his first appearance in the 90's - chronologically, Bart was two, but appeared about 12 due to hyper-accelerated metabolism. He was initially raised in a virtual reality machine to offset the mental age difference, and then brought to Wally so the older speedster could shock Bart's metabolism into a normal pace by challenging him to a race. In the short space of time between his removal from the machine and Wally fixing his aging, Bart aged up an additional two years to 14 - any longer and he would have likely died of old age within a week.
* Bart himself was suspected of having Principal Skinner murdered by gangsters after Skinner's keeping him in detention prevented him from getting to work at
* Bartholomew Enderson became a father figure to Silencia Venomosa, or at least the closest she had to a father since the murder of her parents.
* Bartholomew got an earlier start in his pirating career and is known as "Black Bart" instead of "the Cannibal". That became the name of his ship.
* Bartholomew Kuma, and in each of the two or three major encounters since the injuries have slowed him down considerably.
* Bartholomew Kuma, except for Luffy, because he wasn't conscious when the others first met Kuma on Thriller Bark. From their point of view, it was a miracle that they survived their initial encounter with him and out of nowhere.
* Bartholomew Kuma has an enormous chest, but his arms and legs taper quite heavily, giving him a profile strangely similar to a starfish.
* Bartholomew Kuma rockets the Straw Hat Pirates away from each other.
* Bartholomew Kuma's powers to push anything gives him a variation on the trope, as he can push a person's pain away, giving it physical form as a paw-shaped bubble. This doesn't "heal" the person's wounds per se, but it does allow them to feel good as new.
* Bartholomew Kuma teleports resident living skeleton Brooke to an island right in the middle of a Satanic summoning ritual. Given that he is a walking, talking skeleton, they mistook him for the demon they meant to summon and ask him to smite their enemies. Of course, the first thing he does is see a young lady and request to see her panties. And then he starts composing a song while the (male) cultists show him their boxers, apparently desperate to get him to do some smiting.
* Bartholomew Kuma uses his Devil Fruit power for short-distance teleportation in battle.
* Bartholomew Kuma, who's also a cyborg, albeit much more advanced, and broken, a

knife pops up to replace it). And lastly Movie 10 villain Shiki, who cut off his legs to escape from prison and replaced them with swords!
* Bartholomew sheds tears and sobs like a baby while Ratigan talks about his history with Basil during "The World's Greatest Criminal Mind" number.
* Barthomeloi Lorelei, one of the leaders of the Magical Association, harbors a fanatical hate for vampires and the power to kill even the Dead Apostle Ancestors.
* Bartimaeus also mentions how being confined to a bottle via the spell of indefinite confinement is a relatively common punishment for spirits who give their masters too much lip, and one he has extensive experience with. Of course it's not always a bottle;
* Bartimaeus has a bad habit of doing this. The first time he arises from the pentacle in a whirl of malicious special effects and spouts off a three-line list of titles, it's rather impressive. Thereafter it becomes progressively hammier as new achievements of dubious accuracy get added to the list, especially since we only see him do it with the one guy who's heard the spiel already.
* Bartimaeus Trilogy and all of magicians' power is based on demon magic, one is often enough.)
* Barting Over", this trope was evoked even when the law was involved. A judge emancipated Bart because Homer was such a bad father, saying she had no choices besides that and letting Homer keep custody of Bart.
* Bart, in the "Bartificial Intelligence" segment of "Treehouse of Horror XVI" episode, shouts "
* Bart is also a bit overcome when he sees her in her wedding finery, in the future-based episode about marrying a boy she meets in college. He tells her that seeing her makes him want to get married for a third time.
* Bart is bribed into facilitating Principal Skinner and Mrs. Krabappel's relationship in "Grade School Confidential" after catching them making out in Martin Prince's playhouse.
* Bart is even more noteworthy, as he's sometimes depicted as being not too bright...yet he's been shown to be a remarkably gifted linguist, learning the French language by mere observance and more than couple times acquiring at least competent grasp of an entire language in record time. He can just as quickly unlearn however. Bart also creeps into the
* Bart is portrayed as a dumb boy most of the time, but he's also more talented and smarter then he lets on sometimes despite
* Bart is sometimes portrayed this way. Milhouse once told him that the world needs a clown. In one episode, he even expresses disdain about this role:
* Bart is still a ten-year-old fourth grader and Lisa is still eight and in the second grade.
* Bart is wearing a fancy Batman-style utility belt and the bullies are chasing him. He presses the belt's "Emergency" button, which gives off a siren (telling the bullies his location) and shoots off a flare which parachutes to the ground with the words "Need Help Call Police" on the 'chute. When the bullies run up to him Bart says "Can't you read? Call the police!"
* Bartje on BNN with Bart De Graaff, where the little farmer boy was always trying to get in the hay with the beautiful farmer's daughter from the nearby village.
* Bartleby is a young rat creature who runs away because he doesn't like the harsh life of his fellow rat creatures. Fone and Smiley Bone help Bartleby rejoin his kind, but he likes the Bones better and eventually runs away again to permanently join them.
* Bartleby Tales fantasies. (This is explored as early as the first chapter, when a character gets off on swallowing a live grenade.)
* Bartleby was marketed as a zany comedy. It resembles one at the beginning, but it soon becomes apparent just how messed up the title character really is, and things take a downwards turn from there.
* Bartles & Jaymes wine coolers: "...and thank you for your support."
* Bart loves to call up Moe's and ask to speak to people with names like Al Coholic. Moe always asks his customers for that person, then realizes the pun when they start laughing. One time he used it to sic Moe on his babysitter's boyfriend.

(He had a crush on the babysitter.) This backfired on him once when Bart called Moe looking for a Hugh Jass... only for a man actually named Hugh Jass to pick up on the other end. Hugh takes it in stride. The first time viewers saw Bart meet up with Moe had him recognizing the voice... of Homer's sweet ragamuffin kid Bart.
* Bart made prank phone calls to Moe frequently in the early years of the show, with occasional stumbles such as when the bar becomes popular in "Flaming Moe's" and a patron by the name of "Hugh Jass" is actually there.
* Bart Mangled Banner". He continues asking the Simpsons if they hate America (and what specific part of it, as well) by yelling in their faces until Marge snaps.
* Bart-Mangled Banner": The whole episode is a satire of post-9/11 American patriotism, taking specific potshots at the American Republican Party. Despite the fact that the show has often mocked the United States and both Democrats and Republicans, quite a few Americans were not amused. Which is odd, because near the end of the episode the Simpsons do migrate back to the USA, because they miss it, despite everything that happened.
* Bart-Mangled Banner". When actually his shorts were eaten by a donkey and bends over to cover his privates and a photo was taken with a large flag behind him.
* Bartman, which they bought at regular price, selling at a mark up of several thousand percent. When they ask why it's so expensive, Comic Book Guy says that it is one of a few dozen that does not have the publisher's metallic logo. As Bartman, Bart discovers that Jimbo, Kearny, and Dolph are part of a scam at a particular paper mill that purposefully misprints a small number of issues so that they can be sold at an astronomic mark up.
* Bart of Darkness. Krusty interviews George Meany on America's labor crisis.
* Bartok the Magnificent, actually goes on a rampage and is lured to the top of a water tower, which then collapses because of her weight, causing her to fall to her doom.
* Bartok the Magnificent Ludmilla barely notices her transformation into a dragon.
* Bartok the Magnificent: The cage Bartok is locked in is clearly given wide enough bars for him to slip through, yet he never does. It also appears Prince Ivan could squeeze through his cage if he tried really hard and was good at contortions.
* Bartok the Magnificent. The preceding scene, where she gradually transforms from a lean, graceful physique into a humongous monster and is blissfully unaware of it, is very grotesque and unsettling—but the final result, a fat pink dragon with pajama button like bumps on her belly, is downright laughable.
* Bartok the Magnificent: The villain steals and drinks a potion that is supposed to "bring out the inner self", which turns her into a cartoony anthropomorphic dragon.
* Bartok the Magnificent variant. During one of his attempts to get Piloff free from being frozen in place, Bartok winds up stuck between holding her tail and part of her body after it has been stretched out, leaving him exposed for Piloff to playfully tickle him with her hair.
* Bartok the Magnificent, Vol, to kill Prince Ivan, but phrases it "Get him out of the way", so he does just that, locking him at the top of the tallest tower in the palace. When she finds him, the exchange goes like this:
* Bartolls/Valtols from the OVA and Original Generation Gaiden. Attacks become useless on them after they've been used once since they can dodge any future attempts of that attack pattern.
* Bartolomeo ate the Bari-Bari no Mi (Barrier Barrier Fruit) which lets him create translucent barriers. Aside from defense, he can use the barrier powers to attack, such as sending it to collide with the enemy or coating his fist with barrier to empower his punches.
* Bartolomeo inspires Ezio to another Eureka Moment when he realizes that they have no chance of storming Baron de Valois's fortress to rescue Pantasilea. He starts wondering if it would just be best to just give himself up, leading Ezio to his idea of disguising the mercenaries as French soldiers and
* Bartolomeo is not only a sociopathic asshole who may be worse than Eustass Kid but also a massive
* Bartolomeo was present for Luffy's would-be execution in Loguetown in canon. In

this fic, Cross takes the opportunity to temper his passion to be a pirate like Luffy, and suggest that he actually do it right (in canon, while he and presumably his crew had the necessary power to survive in the New World, they had very poor seafaring skills, making it an outright miracle that they made it as far as they did).
* Bart once demonstrated how to walk in high heels to help Lisa prepare for a beauty pageant. He was surprisingly good at it.
* Bart once found a $1000 bill Mr. Burns lost and made an additional $2000 showing it to people, then fantasized it letting him having "Bart's Moon Party
* Bart once ordered an original Itchy and Scratchy cel over the mail. It turned out to be a mostly empty cel with a tiny little arm painted on it.
* Barton Fink are connected through featuring the same fictional studio, Capitol Pictures.
* Barton Fink: Fink is forced to write an inane wrestling movie when he comes to Hollywood after a successful theatrical career.
* Barton Fink is a desert. Mosquitoes do, in fact, live in Southern California.
* Barton Fink, the main character is an arrogant, self-righteous writer, who is very far removed from the "common man" he supposedly admires. Also, the movie's not subtle about the lack of respect writers get in the business.
* Barton Fink wrestling film, and his screenplay gets his supervisor fired and Fink himself locked into a contract in which he is promised that none of his scripts will be produced.
* Bart on the Road" had Bart and his friends travel home in a shipment crate. Bart was the courier, and pranked the others by pretending they had to stay in the cramped box to stay hidden even though the cargo hold was otherwise empty.
* Bart On The Road", Lisa, who's spending the day at the nuclear plant with Homer, decides to liven things up by spinning in swivel chairs wearing hazmat suits. Homer replies that, "This is a lot more fun with a second person."
* Bart pulls it once when Skinner discovers him running a card shark operation at the school fair. "Goodbye gentlemen."
* Bartre and Karla, though to be fair Bartre's not so much ugly as he is homely (especially compared to
* Bart's Comet", Bart manages to rig a weather balloon to make it look like a mooning Principal Skinner.
* Bart's Comet", he predicts that a meteor heading for Springfield will probably burn up in the atmosphere until it's the size of a chihuahua's head. At the end of the episode, it gets lampshaded. "Dad was right!" "I know, kids. I'm scared, too." For added hilarity, the meteor even lands right next to a chihuahua for comparison.
* Bart's Comet", in which a comet Bart Simpson discovered is on a collision course towards Springfield.
* Bart's Comet", Skinner shows Bart the star sign of the Three Wise Men. In Bart's imagination he sees the Three Stooges in the sky.
* Bart's Dog Gets an F"). The vaccine came out in the early 1970s, meaning that people the age of the writing staff at the time could have had the mumps as children.
* Bart sees this in the episode "Bart Gets Famous", where he becomes the "I didn't do it kid" and is exposed to the full force of showbiz, "a hideous bitch goddess".
* Bart Sells His Soul", after Bart sells his soul to Milhouse, Santa's Little Helper and Snowball both growl at him.
* Bart Sells His Soul" after Moe loses his temper and repeatedly uses the word "freakin'". Todd cries "Ow, my freakin' ears!"
* Bart Sells His Soul, and spends the episode trying to retrieve the piece of paper.
* "Bart Sells His Soul" features two mustached "Sarcastic Middle-Aged Men". One working as a bug exterminator at Milhouse's place, the other driving a street cleaner car, running over Bart's car, then driving it down a subway station staircase.
* Bart Sells His Soul in which she has advised a friend to commit suicide.
* Bart sells his soul to Milhouse. But it's never firmly established if he really

did lose his soul.
* Bart's first day of kindergarten is chronicled in "Lisa's Sax," and things start to look up for him when he wins classmates over by clowning around on the playground. When principal Skinner shows up he sings "Skinner is a nut! He has a rubber butt!" When Skinner cues him to apologize," he follows it up with what's implied to be his first utterance of Eat my shorts!", then follows it up by singing
* Bart's Friend Falls in Love", Bart's class is shown a Troy McClure movie about puberty, with Troy narrating as "Fuzzy Bunny" meets new girlfriend "Fluffy Bunny" and they start dating. As he describes their activities, they're shown onscreen.
* Bart's Friend Falls In Love", where Troy McClure mentions starring in an educational film dating from the early 70's titled "Here Comes the Metric System!".
* Bart's Girlfriend", Bart Simpson has had this kind of relationship with Jessica Lovejoy, who not only wants to preserve her "sweet girl" reputation, but finds keeping it secret exciting. Bart eventually ended his relationship with Jessica because she was a worse troublemaker than he is.
* Bart's Girlfriend" has Bart trying to impress Reverend and Helen Lovejoy when he's invited to dinner by their daughter Jessica. But it goes very wrong:
* Bart's Girlfriend tries to blame Bart, claiming that he somehow transplanted his bedroom into the Lovejoy household, at which point Jessica finally confesses (while admitting that it was just a stunt to get her father's attention).
* Bart Simpson: Attorney at Law drive him back to the bottle, forcing an intervention by Milhouse and Alex.
* Bart Simpson: Attorney at Law: Upon learning Moe is placing bets on the outcome of Bart's trial, Homer places two firm fists against his hips and says he'll "give that bookie the talking of a life-time". He then phones Moe to "Put me down fifty on the boy".
* Bart Simpson "confessed" to Lisa stealing textbooks in an episode of
* Bart Simpson does a sinister version in the episode "Bart's Friend Falls In Love":
* Bart Simpson featured a few instances of characters baring their behinds.
* Bart Simpson has this reaction when he hears Ned Flanders singing falsetto.
* Bart Simpson himself used to come off this way, if only by default because he was so disobedient and disrespectful but
* Bart Simpson is a good example. He can be pretty cunning, deductive, and intelligent when he puts his mind to it, particularly when up against his nemesis Sideshow Bob, but in school, he'd rather do the bare minimum (if that). He mastered two languages (Spanish and French) in a relatively short time. Only to 'forget' French and literally have Spanish knocked out of him. And Japanese along with Homer after a short while in jail. This also shown mixed with his
* Bart Simpson is clearly an excellent example of this — at school, he is falling behind everybody else, barely managing to stay in his own grade, whereas in his spare time he thwarts criminals and solves mysteries, often displaying intuitive thinking skills on a par with his sister Lisa. Further proven in the few situations where he
* Bart Simpson is proud to be America's Bad Boy, but he really does love his mom Marge. Examples:
* Bart Simpson, of course. His career highlights include inciting a media frenzy by pretending to be trapped in a well, answering his teacher's personal ad, replacing the hymns in the church with "In-a-Gadda-da-Vida," turning the school weather balloon into Principal Skinner's "rumpy doppelganger," trapping the teachers in their cars by repainting the lines in the parking lot, and getting an Australian boy to accept a $900 collect call by impersonating a drainage commissioner. And then there's all those
* Bart Simpson once tried to bribe the officer with a hairdryer or some other house appliance. The cop showed him his badge: "cash bribes only".
* Bart Simpsons Escape From Camp Deadly. Surprisingly, this was also one of the more lethal cases of the trope: Bart has to defend himself from the other campers by throwing various food items that are strongly implied to be at best unappealing and at worst completely inedible without getting caught (if he does get caught,

he's forced to eat all of the food he currently has on his person), and the other campers throw, not food, but knives and forks at Bart.
* Bart Simpson uses it in the dub). Use it in reference to women's genitalia, however, and you will get shocked looks.
* "Bart's Inner Child" has a montage of past moments in which Marge was opposed to the ideas the rest of the family had.
* Bart's love interest (through arranged hillbilly marriage), Mary Spuckler, runs off to New York between Seasons 19 and 24. Come her next appearance, Mary's physical appearance has changed dramatically with
* Bart's prank phone calls to Moe's Tavern in the early seasons were all about this. He'd ask Moe to page such improbably-named patrons as Al Coholic, Amanda Hugandkiss, I.P. Freely, Bea O'Problem, Oliver Clothesoff, Hugh Jass, etc. That last one (Hugh Jass) turns out to be a real person who was in the bar at the time.
* "Bart Star" subverts this: Lisa boldly declares her intent to join her brother Bart on his football team, but becomes reluctant when coach Ned Flanders welcomes her with open arms, mentioning the four
* Bart's teacher, Edna Krabappell, was dating Ned Flanders in one episode of
* Bart still writing lines on the blackboard as a punishment is another example. He lampshades this in one chalkboard gag by writing: "Do children today do this anymore?"
* Bart stole the engine from Skinner's car by tying it up to helium balloons. To which Skinner replies "That's a rebuilt Yugoslavian engine; there isn't even a Yugoslavia anymore! Bring it back at once!"
* Bart's "You can actually pinpoint the second his heart rips in half" is sometimes misquoted as "You can actually pinpoint the exact moment his heart breaks in half".
* Bart the Daredevil": Despite trying to convince Bart the dangers of daredevil stunts, Lance Murdock is instead impressed by Bart's interest in it, which causes Lisa to tell Homer about it, fearing that he may get hurt or die despite getting the most attention.
* Bart the Daredevil", Dr. Hibbert says a lot of children imitate violence they saw on TV: "I won't even subject you to the horrors of our Three Stooges ward."
* "Bart the Daredevil" has Rasputin the Friendly Russian, who apparently used to go by Rasputin the Mad Russian. Lisa muses that the fall of the Soviet Union impacted wrestling forever.
* Bart the Daredevil", Homer spends most of Lisa's recital impatiently waiting for the end so the family can get to a monster truck rally. On the ride after, Homer hums the 1812 Overture (the cool part, with the cannons). "I reached him!" says Lisa, satisfied.
* Bart the Daredevil" of the school bus driving down a winding road and past a prison. The Season 1 gradient-style backgrounds are especially noticeable.
* "Bart the Fink": Bart not getting a check signed by Krusty the Clown himself → Krusty is arrested for tax fraud.
* Bart the Fink" had Krusty going bankrupt and faking his death to avoid his debt. Once Bart and Lisa discover his new life and talked him into coming back to being Krusty, he then faked the death of his fake identity commenting that it was insured for quite a lot of money.
* Bart the Fink", where the family have to spend the night in a haunted house. Homer, foolishly, says it's perfectly safe since there's no such thing as ghosts. The spooky music rises and the door slams behind them, complete with a flash of lightning... Next morning, the sun is shining and it's beautiful out, and they've had a pleasant night's sleep and absolutely nothing's happened.
* Bart The Fink, which is expected to take the rest of his life. Inexplicably, they also take most of his show's budget, which is not legal (Krusty doesn't own the station) and is a stupid idea (the show can't make any money if they can't make anything for people to watch).
* Bart the General", Bart — fearing a run-in with the feared bully, Nelson Muntz — imagines his funeral. As the parade of mourners pass by, Nelson spots the cupcake that Lisa had just left on her brother's forehead, cheerfully remarks,

"Hey, they've got food at this thing!" before grabbing it for himself, and then declares "Here's one for the road, dude!" before starting to thuggishly punch Bart's corpse.
* Bart the General has the perfectly reasonable moral that war is bad, but stated in a rather ridiculous and rambling way:
* Bart the General, which, despite the title, appears to be mainly about how Omarn deals with Marge having an affair, Barton dominates the second part of the last episode and the third episode, which is longer than episodes 1, 2 and 4 combined.
* "Bart the Genius" also gave us Kwyjibo: A fat, balding, North American ape with no chin (and a short temper)." (In context, it's a word intended to cheat in Scrabble, which was the
* "Bart the Genius": Bart causes a classroom to fill up with green goo by mixing chemicals.
* Bart the Genius if you know enough about algebraic formatting to know that "RDRR" would never appear using proper formatting, and you would have to purposefully go out of your way to write out the expression the wrong way to make the joke work.
* Bart the Lover", Bart blurts out "I didn't do it" after he accidentally destroys the class aquarium trying to do a yo-yo trick... with the string still tied to his finger.
* Bart the Lover", Bart finds out that his teacher, Mrs. Krabappel, has a classified ad in the paper. He answers it with a fake name and picture, gets her to really fall for him, then stands her up when they're set to meet, breaking her heart. At this point, he realizes that the joke has gone too far and, with his family's help, writes a letter that breaks off the relationship in a kinder way.
* Bart the Lover), he says "Fiddle-de-dee. That will require a tetanus shot."
* "Bart the Mother", also from Season 10, was the last Simpsons episode to use the production code "#F##", the last episode to feature
* Bart the Mother" has two Bolivian Tree Lizards hatching in Springfield, where their population explodes and they end up eating almost all of Springfield's pigeons, much to the delight of the population of Springfield (who view pigeons as disease-ridden "flying rats"). When Lisa points out that now Springfield is full of Bolivian Tree Lizards, Skinner outlines Springfield's solution; first, they will import large numbers of lizard-eating Chinese Needle Snakes, and then when the snake population becomes uncontrollable, they will import snake-eating gorillas; they don't need any animals to deal with the gorillas, because the gorillas will freeze to death when winter comes.
* "Bart the Murderer", Bart leaves his permission slip to visit the chocolate factory at home, so he ends up spending the day in Principal Skinner's office licking envelopes; Skinner suggests that Bart could "make a game out of it", by seeing how many envelopes he could lick in an hour, and then try to beat that record.
* "Bart the Murderer", we see the hands of a group of mobsters playing poker. The first one has four aces and a king. The second has five aces. The third has six aces. And then it pans over to the discard pile, which is nothing but aces. Most of them aren't even standard card suits.
* Bart the Murderer. With greater awareness of hoarding, this isn't a bad message.
* Bart to the Future. At the time of the episode's airing, he had just ended an attempt to win a nomination of a third party, so the idea of his going from failed third-party candidate to elected president was perfect as a humorously far-fetched throwaway joke. The timeline of the episode implied that it'd take him over 20 years to make that transition, but in fact it only took him 17.
* Bart to the Future of his ridiculous cases (among them: suing a restaurant for an over-salted french fry, Disneyland for a spider bite received on the premises, and a messenger company for refusing to pay him for his first two weeks of employment) ever goes to court, and it's implied Bart can't find a lawyer to take them all.
* "Bart to the Future" presents three ideas for America's political future that have since become more considerable issues: the U.S. has handled its increasing foreign debt like an irresponsible person shrugging off bill collectors, marijuana legalization has been given more actual consideration, and we did indeed get a

President Trump.
* Bart to the Future" where Bart and Ralph perform a cheap rip-off of "Margaritaville" and get pelted with beer bottles — which hit a laser grid force field.
* "Bart Vs Australia" about the US government's plan B for Cuba. Realizing his mistake, the diplomat eats the slide.
* Bart vs. Australia, "Booting" (administered by an angry-looking man wearing an over-sized boot) is a form of corporal punishment. It's even on the country's flag (shown atop this page). Also, disparaging the boot is a bootable offense.
* "Bart Vs. Australia" has an Australian museum with a giant statue of a Snake lookalike with the caption "Our First Prime Minister" (a reference to Australia having been used as a penal colony).
* Bart vs. Australia", having written "Don't Tread On Me" on his cheeks, as they attempt to punish him with a booting.
* Bart vs. Australia Homer mistakes a U.S. Marine posted outside the American Embassy for one of these guards:
* Bart vs. Australia to tell him is that he will also get a swift boot in the ass, provided by a shoe roughly the size of him.
* "Bart vs. Australia," when everyone in the family is being chased by an array of living Australian stereotypes and characters — including a character from the movie
* Bart vs. Australia": When the family flees back to the American embassy in Australia the staff tries to stop them from entering by activating an electrical fence near a sign that says "Made with pride in the U.S.A." The fence malfunctions halfway, causing the Simpsons to enter after all.
* Bart vs. Lisa vs. 3rd Grade, in the end, Bart goes back to 4th grade and Lisa chooses to go back to the 2nd grade.
* Bart Vs. Thanksgiving" when he is sent to his room without Thanksgiving dinner for destroying Lisa's centerpiece. He sneaks out and gets a meal at the homeless shelter.

* Baryonyx as a species is only mildly aggressive and used to be part of an attraction where visitors would go kayaking at its territory.
* Basalt City Chronicles subverts this: The Empire of Smilodons has a reputation of allowing fights to the death for sport. Holding fights to the death for sport is actually VERY illegal, and is one of the very few capital crimes in the Empire. Not that their legitimate tournaments aren't brutal...
* Basalt Golem, on the other hand, turns enemy creatures to stone. In an emergency, your opponent can still use them for blocking (at least, blocking creatures that aren't Basalt Golem).
* Basara, neither of them is aware that they are the person the other wants to kill. It takes a very long time for them to eventually find this out.
* Basara takes place in what at first appears to be a fantasy world inspired by feudal Japan. As it's later revealed, it's actually Japan in a post-apocalyptic future.
* Basara: The story takes place in a future Japan, reduced to a barren desert by a catastrophe at the end of the 21st century. The main character is Sarasa, a girl whose twin brother, Tatara, is prophesied to be the "child of destiny" who will bring back the country's independence and stop the tyrannical rule of the Empire, namely the Red King. When Tatara is killed, Sarasa pretends to be him in order to keep the downtrodden from losing hope.
* Basco ta Jolokia also had a 3 million Zagin bounty on his head before coming to work for Zangyack. His actions in betraying them in episode 43 result in it being reinstated and upped to 10 million, while his monkey partner Sally got a bounty of fifty (the same as Navi's).
* Baseball. At higher levels of play, home teams try to gain an advantage over visitors by altering the field conditions. For example, if the opposing team has fast base runners the home team will heavily water the infield to slow them down.
* Baseball: Barry Bonds (son of Bobby), Ken Griffey Jr. (son of Ken Sr.)
* Baseball Bats) and has to grab the closest thing to them they can use as a weapon. Thus it can suggest either brutal, simple, unsophisticated violence or the desperation of someone clutching one in a time of crisis.
* Baseball Bugs has many moments that are obviously unrealistic, the ending deserves a mention. Bugs makes the last out by throwing his glove in the air and catching the ball. Throwing your glove at the ball trying to catch it in such a manner is illegal and results in a three-base penalty. Not that it would have mattered, because, putting aside the fact that a tree was used as a bat in this case, once the ball left the field of play, it would have been declared a home run.
* Baseball catchers: they squat nearly the entire time they're on defense, which has the side-effect of ruining their knees, so you're hard pressed to find ones that can run fast. There are, however, quite a few catchers who are power hitters.
* Baseball catcher Yogi Berra had a reputation for coining bizarre turns of phrase that sounded profound, so much so that "
* Baseball celebrated the game's centennial in 1939, by having all sixteen teams wear a commemorative patch, one of the first such anniversary patches in sports.

This was all based on the widespread lie that Abner Doubleday had invented the game in Cooperstown, NY in 1839. The National Baseball Hall of Fame and Museum had been established in Cooperstown in 1936.

* Baseball Episode, Manzou the Saw is narrating events, including scenes in which our heroes are learning the mysterious art of baseball in a single night. "At this point things get rather boring, so I'll skip the details."
* Baseball Episode "Take Me Out to the Holosuite" features a somewhat more lighthearted example—after Sisko gets ejected from the game by yelling at and touching the umpire, O'Brien (as third-base coach) ends up in charge of the team.
* Baseball Episode who even has trouble opening a drink can herself. While completely failing to actually hit the ball, she managed to steal a base, which directly led to a one-point victory.
* Baseball features some of these, as, unlike most other sports, ballparks tend to have unique layouts, which can affect a team's performance (most notably, a closer infield fence generally favors hitters, while a farther one favors pitchers, but there's plenty of variability). Additionally, there's the ground-rule double, which treats the ball being hit into a certain feature of the field as being a double (i.e., the batter and any baserunners on base are permitted to advance two bases). These include:
* Baseball fell out of favor on Earth in the 21st century, with the last World Series played in the 2040s. However, Ben Sisko is a fan, and first becomes attracted to his
* Baseball: From youth leagues through semi-professional, a common standard for mercy rule is for the winning team to have a 10-run lead after the end of the fifth inning, although some leagues end games before that (usually, the earliest is the third inning) if the winning team has an even larger lead, such as 15 runs after four innings, with the home team, if they are trailing, having a final at-bat. Youth baseball games like Little League have it after the fourth inning, since those games usually last six innings rather than nine. This is a rare aversion to post-secondary teams having a mercy rule in place, as the college level and many semi-pro leagues often have some sort of mercy rule in these sports (although professional does not have this rule).
* Baseball games sometimes come down to whether or not the final hitter's high fly is caught by an outfielder, who desperately leaps or dives to intercept it.
* Baseball great Will Clark had B.B. King's "The Thrill Is Gone" on his answering machine. (He was known as Will "The Thrill" Clark.)

* Baseball has this at times, but the 2008 Tampa Bay Rays have to take the cake. They play in the AL East division, home to the New York Yankees and the Boston Red Sox (teams with virtually limitless coffers and very solid teams; their payrolls are about $200 million and $150 million, respectively). With a payroll of ~$40 million, they
* Baseball in the US endured three moments when it seemed like it was on the road to oblivion, only to prove itself more resilient than people thought.
* Baseball is also the most competitive scene in the world, and many of the best players are Americans. However, players from certain Hispanophone Caribbean countries—particularly the Dominican Republic, Cuba, and Venezuela—also have a reputation for excellent and hardworking players (and fanatical fans).

* Baseball legend Ted Williams' body was preserved with cryonics at the insistence of his family (and against his own wishes to be cremated), in the hope that advancements in medical science can one day enable them all to be reunited. Mr. Williams' head was also frozen separately from his body, meaning medical science now has
* Baseball loves the number 3 and its multiples: 3 strikes for a strikeout, 3 outs in an inning, 9 fielders per side (3 in the outfield and 6 in the infield), 9 innings in a (regulation) game, 3 bases plus home plate, 90 feet between the bases...
* Baseball Memories is a master of baseball statistics, which he often uses to win trivia contests at bars. When he finally loses one night, he redoubles his efforts to be the worlds' greatest...and floods his mind with so much baseball information he ends up erasing all his other memories AND destroying his short-term memory capabilities; baseball stats are the only information his mind will hold now. And we mean ALL it will hold; when he eats breakfast in this state, every bite is like the first because he forgets the taste as soon as he swallows.
* Baseball never became America's pastime in the TL-191 series. However, Turtledove is a baseball fan, and from time to time you'll find classic baseball players appearing in the story as football players, factory workers, soldiers, etc.
* Baseball pitcher Sandy Koufax blossomed into a star in 1961 and retired five years later at the age of 30. Those six seasons won him three Cy Young awards, three pitchers' Triple Crowns
* Baseball player Fred Merkle spent almost his entire professional career being blamed for costing the New York Giants the 1908 National League pennant because he failed to touch second base after a game-winning hit. What most of the fans who blamed him conveniently forgot was at the time the rule requiring runners to touch the next base after a hit was rarely enforced on "walk-off" hits and customarily ignored by veteran players. It was Merkle's misfortune that Cubs player Johnny Evers was a stickler for the rulebook, and that umpire Hank O'Day was willing to enforce it.
* Baseball players train with weighted bats so that swinging a game bat is effortless. Training with a game bat would cause the muscles to experience a plateau.

* Baseball pundit Dan McLaughlin once said that "Nate Schierholtz is by far the best MLB player from Nevada not born in Vegas." That's a category that includes just 17 players in all of MLB history (Schierholtz was born in Reno).
* Baseball-Reference.com, a very popular database of baseball players and their statistics, lists players by the first five letters of their last name and the first two letters of their first name. No problem, except for Boston Red Sox star Kevin Youkilis. The result: YoukiKe. Yeah. They changed his entry real quick...to YouklKe, which isn't much better. Particularly unfortunate because Youkilis is Jewish.
* Baseball slugger Mike Piazza and the NHL's Brett Hull have appeared
* Baseball star Ichiro Suzuki has a father who aggresively pushed him towards the sport since birth. Most of his childhood revolved around baseball, with his father preventing him from even playing with other children in favor of additional batting practice. Fortunately for both Ichiro and baseball fans everywhere, Ichiro did enjoy the sport and went on to become the greatest player Japan has ever produced, but it's very telling that despite Japan's traditional, family-obsessed culture, he has completely cut his father out of his life.
* Baseball Stars for the Genesis. It was explicitly called a "10-run Rule", and the talking commentator would say the team won "by domination".
* Baseball teams do silent versions of this. For the battery (the pitcher and catcher), the catcher flashes a certain number of fingers to indicate what kind of pitch (such as "one" for fastball). For the team at bat, coaches deliver hand signals to tell the batter and any baserunners what to do (i.e., hit and run). Stealing these signals is known to happen.

* Baseball teams do this, especially after walk-off wins. If a game goes into extra innings, players start using the bucket as a trash can- bubblegum, sunflower seeds, and peanuts in addition to the Gatorade gets dumped on the night's hero. The longer the game goes, the grosser.
* Baseball was also the subject of a couple TV specials: "Little Big League" in which Fred and Barney competed against each other coaching Pebbles and Bamm-Bamm's teams, and "Windup Wilma" in which Wilma becomes a baseball pitcher.

* base defense game, which is strong enough to knock down your base's outer walls in 2 hits. This culminates in the Avatar, a robotic tank with top-line armour (even heavy autocannons with the most penetrative ammo can glance off it), a pair of plasma cannons for smashing through your base and it's further protected by a force field so standard missiles and railguns are ineffective. Unless you develop energy-based attacks, don't expect to win a battle against a single Avatar, let alone a line of them.

Even if the PCs succeed in preventing an all-out eruption, the tremors still do quite a number on the town.
* Based on the context, the words in question were most likely, "This is My Body."
* based on the famous "Abracadabra" incantation. Most official English sources romanize the name as "Dabra" to make this clear, and even Bruce Faulconer initially called him "Doubler" in the Faulconer Productions team's soundtrack music titles because that's kind of what it sounds like; however, the Funimation dub, presumably mistaking the "u" as being more pronounced than it was, began saying his name as "dah-BOO-rah", and despite correcting most other mistakes, have mostly stuck with that.

* Baseketball features a scene where the main character is depressed and driving down the road listening to the radio. At first the lyrics are vaguely inspirational, then become progressively more specific:
* BASEketball of the BASEketball postseason. Al is passed out in the booth, and when Bob wakes him...
* BASEketball seems to suffer from this. It serves as a demonstration for one of the reasons Ted Denslow is so interested in his Coop Cooper's new sport.
* Baseketball starts this way — the protagonists invent rules on the fly to make it impossible for their competitors to win (all while pretending they were perfectly obvious). But eventually, the game gets codified rules and becomes a national phenomenon.
* Baseketball. The game is a combination of H-O-R-S-E and beer league softball, mixed with a little streetball smack talk. The object of the game is to make your way around the bases by shooting a basketball into the hoop for a variety of distances. The longer the shot, the more bases you earn. Players are allowed - and encouraged - to insult and troll the opposition with foul language, the dirtier the better. It's based on a real game invented by writer/director David Zucker.
* BASEketball, this is Coop's philosophy when founding the NBL. By creating a league where teams don't relocate and all players are paid the same, he hoped to create an environment where the athletes are motivated by pure passion for the game.
* Baseketball, upon encountering the apparently very well-endowed heroes naked in a gym shower, the hero's (rather sexually repressed and simultaneously sexually frustrated) girlfriend finds herself struggling to remain on topic with the furious rant she has prepared for them.
* Baseketball was based on a real-life game that David Zucker created with his friends, literally played in the driveway of his home. Many of the reappearing teammates are friends of Zucker and actual original players of the Zucker-driveway game, asked by the director to be in the movie to pay homage to origins of BASEketball.

The Freemasons are the secret society that's best-known and there have been stories about what their Secret Handshake might be. This was because when the Masons were still a society of architects and builders, the members had to travel long distances for jobs and the only way someone at each job site can determine whether you are a qualified architect is to check if you have been taught the secret codes and gestures of the society.

* Basically the principle behind a "stiff arm" (or "hand-off," depending on geographic location). In tackle sports like American football or various forms of Rugby, a ball carrier might hold his arm out stiff (thus "stiff arm") in order to use his hand to keep a defender off (thus "hand-off") his legs and prevent him from making a tackle. This works primarily because the ball carrier continues to run away from the tackler, and even if the defender recovers and makes the tackle, the stiff arm invariably gave the runner a moment to get his ass farther down field, potentially into a scoring area.

* Basic ("Green Hell") both in Czech and Slovak, given the film's jungle setting in Panama.
* Basic had so many inconsistencies and non-military actions, that the film was hard to follow. For example:
* Basic Instinct about a woman accused of committing murders based on her best-selling novels and a police detective who can't resist her.
* Basic Instinct. After Nick has had sex with Catherine, he walks over to the bathroom and splashes some water on his face. When he looks up, the mirror reveals that Catherine's jealous girlfriend Roxy is standing behind him.
* Basic Instinct: As the cops prepare to take Catherine to the station for questioning, she is asked several times if she wants an attorney present. She brushes off the suggestion, saying she doesn't need one. Earlier, she refuses to come to the station with them, knowing that she doesn't have to unless she's under arrest. It's clear that she's guilty as sin, she's just flaunting her ability to get away with it.
* Basic Instinct. Catherine Trammell indirectly seems to be tired of male chauvinism. It's more explicitly implied in the reason Roxy killed her brothers and father.
* Basic Instinct detectives and that it's the most natural conclusion to come to.
* Basic Instinct: During Catherine's interrogation at the station, she offers to take a polygraph test, which seems to confirm that she's innocent. Nick counters that she simply manipulated the results, because he knows people who have done it before—not mentioning that he's talking about himself.
* Basic Instinct is fond of tying her lovers up to the bedposts with a silk scarf, and sometimes uses it as a setup so she can murder them with icepicks.
* Basic Instinct is laden with references too—Catherine Tramell's outfits and French twist hairstyle are very reminiscent of Kim Novak's.
* Basic Instinct, Kate manages to deceive everyone, and is even able to fool a polygraph.
* Basic Instinct killed her parents after writing a book detailing her plan to do so, then used, "right, I wrote out this plan for killing my parents, published it in a book, then did it — I'd have to be crazy to do that" as a defense. Whether she actually did murder her parents or not is not actually stated, though several characters express their opinions that she did.
* "Basic Instinct" Legs-Crossing Parody came out in 1992, introducing this iconic

pose with it.
* Basic Instinct, Nick is called "Shooter" by a lot of people. It refers to a previous incident in which he accidentally shot and killed a bunch of tourists, which he is still haunted by.
* Basic Instinct reference. Megara talks about having weak ankles, uncrosses and recrosses her legs, and says, "Do you have a problem with this?... weak ankles, I mean."
* Basic Instinct revolves around a female serial killer who goes to bed with men and women and murders them afterwards.
* Basic Instinct was being filmed in San Francisco, a group of lesbian activists tried their best to impede progress and protest the film before release, as they did not like the depiction of lesbians in the movie. Their protest actually helped give the production free media coverage before it was even complete.
* Basic Instinct was the movie that put unrated editions into the mainstream. Not only was there more violence and nudity, but it was also the director's preferred version of the film.
* Basic Instinct who becomes obsessed with a beautiful mysterious blonde woman in San Francisco. Catherine's white coat and white dress with black gloves and her French twist hairstyle are very explicit references to Madeline's appearance.
* Basic Instructions. According to later commentary, the real Scott apparently developed a dislike of birds from having been around raised peacocks in his youth.

* Basic Instructions Before Leaving Earth, the warrior angels have a fairly simple rank structure:
* Basic Instructions comic pokes fun at the Rolling Stones song for saying "You might find that you get what you need", as implying with the word "might" it's possible you don't even get that either.
* Basic Instructions features a superhero named Rocket Hat. Guess what his superpower is.
* Basic Instructions gives us simple step by step guidelines to this practice, including how to deal with the rude assassin when he's already escaped your trap and has a gun pointed at Kitty.
* Basic Instructions he nearly did, as described in the commentary, was what convinced him it was time to hang up the comic.
* Basic Instructions once did a strip entitled "How to Pronounce 'Oregon'", including the statement "You can remember it by thinking 'I'll defend myself with a knife OR A GUN'" and claiming that the "OR-eh-GONE" pronunciation was wrong.
* Basic Instructions philosophy, and his sanity and intelligence have been called into question several times.
* Basic Instructions Rick getting his own comic. It was never meant to seriously take off, but the man who inspired Rick did use the character's popularity to briefly run his own spin-off blog called "Asking the Wrong Guy", playing Rick answering reader's questions.
* Basic Instructions, Rick goes to a tarot reader for advice. He got the death card and the ten of swords. Scott tries to assure him those aren't necessarily bad, but it's the "unmarked shallow grave" card - which even the card reader didn't know about - that convinced him he was doomed.
* Basic Instructions Rocket Hat, who never moves or speaks when the audience can see him. (Actually, he does speak one time.. in a guest comic written by someone else.)
* Basic Instructions runs on this. The advice text is usually genuine, while the pictures usually show it applied badly.
* Basic Instructions, Scott meets himself (without a precise explanation of how), and soon the two of them unintentionally (and to their mutual annoyance) mirror each other.
* Basic Instructions strip, the Moon Emperor delegates the task to executing Rocket Hat to the Moon Minion. The Moon Minion delegates the task to his only subordinate, Rocket Hat himself. After the pummeled Moon Emperor demands to know why the Moon

Minion thought Rocket Hat would kill himself, the minion explains that he was just being a good boss by giving his subordinate the chance to exceed his expectations.
* Basic Instructions suggests offering a mint for hinting someone about the problem.
* Basic Instructions, who dishes out constant effortless beat-downs of the Moon Men (or at least their emperor), but when the reader can actually see him, he never moves or even speaks. In fact, throughout the entire run of the comic, he only appears in two poses.

After causing the not defendant to break down in tears and confess, she is celebrating while Jeff is pointing out that he didn't fully confess and that someone else actually did it.
* Basic operational security training for all military and DOD personnel overseas pretty much demands this mindset when you are somewhere an attacker could reach.
* Basic programming stores dates as a double-length decimal number representing the number of days since 1 January 1900. It's easy to see if you use Excel or Access, because if you accidentally convert a small number to a date it will give you a day in 1900, and it's also how you can add whole numbers to dates. It doesn't, however, take into account daylight savings time.
* Basics", the crew are in a cave and decide to follow a breeze to what they think is the outside world. Turns out they're walking into the lair of a large and hungry lizard, and are following its breath.
* Basic Straining". Courtney thinks that the s'more-covered underwear Harold accidentally drops in front of her is actually covered in poop.
* Basic training for any branch of the armed forces probably covers all four bases; a long period of extreme physical and mental exhaustion with occasional bouts of ritual humiliation by your instructors if you screw up, relieved by the odd moment of comedy as you and everyone else in the same predicament bands together to make the best of it, with a solemn and dignified ceremony at the end when you join your unit.
* Basic West uses this as a threat to all of the potential recruits looking to get into his elite Ranger unit.

* Basilisk and Cockatrice: Basilisks and/or cockatrices, another type of monstrous and often winged reptile.
* Basilisk and Cockatrice: Glimpsing these creatures can kill you or turn you to stone.

* Basilisk and Cockatrice — half-chicken, half-snake, all lethal.
* Basilisk and just tossed the animal away and sucked the poison out of Saemon's finger by herself!
* Basilisk as a child, which are perhaps the only comedic moments in the series.
* Basilisk, during their first meeting, a hiccup causes Oboro to stumble and spill a tray of tea she was serving all over Gennosuke.
* Basilisk features some downright grotesque character designs. Tokugawa Ieyasu has a deformed chin that looks like a huge scrotum.
* Basilisk, has the ability to alter his voice and physical appearance to match another's. More than just wearing disguise, he can shape his face like clay.
* Basilisk has two feuding ninja clans who had been in a tense peace, until given a reason to engage in open warfare. And anyone who didn't have a personal reason before, gets one.
* Basilisk: Hotarubi can distract her enemies by summoning a swarm of butterflies so large it completely blocks their eyesight.
* Basilisk, Iga-no-Oboro's ninja ability is the power to negate the abilities of another ninja she makes eye contact with.
* basilisk is apparently still in top form at the age of one thousand. And if the shed skins are any sign, she's still growing.
* Basilisk: Kagerou is dead set on killing Oboro so she can have Gennosuke. (Much more in the anime than the manga, though.) Tenzen also wants to kill Gennosuke so he can have Oboro as his puppet wife, which would grant him full control of the Iga Tsubagakure.
* basilisk. Lucian described it thusly: "What though the Moor the Basilisk hath slain, and pinned him lifeless to the sandy plain, up through the spear the subtle venom flies; the hand imbibes it, and the victor dies."
* Basilisk not only strangles people to death in the nude, he spends most of his screen time like that. His ninja ability allows him to fuse with his surroundings, an ability that apparently doesn't apply to his clothes.
* Basilisk, Oboro not only trips on her future fiancé Gennosuke, but she dumps the contents of a tea tray she was bringing for him and the elders. Ouch.
* Basilisk: Once, as Oboro and Gennosuke walk through a very thin path in the mountains, we follow Oboro's gaze as she looks at Gennosuke's back...
* Basilisk, one of the ninjas from the Iga clan whose power is to turn into a slug-like thing in the contact with salt kill a ninja from the Kouga clan by jumping in his mouth, inside his throat and breaking his neck.
* Basilisk or Cockatrice is the crowing of a rooster—roosters also tend to be one half of the parentage of a Basilisk or Cockatrice (the other being a snake or a toad).
* Basilisks are venomous reptiles that kill with their bite, not their glare.
* Basilisk: The Iga and Kouga ninja clans are in hostilities with each other. Iga-no-Oboro and Kouga Gennosuke are engaged to each other, in part to end the conflict and because they are truly in love with each other. Their respective grandparents Iga-no-Ogen and Kouga Danjou have bad blood and when the opportunity comes to annul the engagement and one-up each other in a trial of champions to the death, the grandparents eagerly accept. Ironically the grandparents were once this trope and were originally engaged to each other to resolve the conflict.
* Basilisk were engaged since childhood as a part of the truce between the Iga and Koga clans. It certainly helped that they came to genuinely like the idea when they knew each other better.
* Basilisk, when Oboro and Gennosuke are crossing a very narrow bridge, we follow Oboro's gaze as she stares at Gennosuke's back.
* Basilisk, which is essentially a Japanese Tokugawa-era send up of "Romeo and Juliet", has its star crossed lovers: Gennosuke from the Kouga and Oboro from the Iga. They even make reference to the old belief that star-crossed lovers will be reborn as twin siblings.
* Basilisk. While he has no problem committing rape several times, this is NOT what makes Tenzen undeniably evil, but rather, the way he does it, his motivation, and his love of emotional abuse.

* Basilisk. While very useful, not very helpful to Kagerou as she can never even embrace the man she's deeply in love with.
* Basilisk who does the same thing as Wilhelmina. In fact his hair is so strong that when it gets turned against him he ends up suspended in a doorway with all his limbs shattered.
* Basilisk zombies have a glowing red eye effect that paralyzes anyone who sees it. Anyone affected by it will be forced to lay there, fully conscious,

* Basil protective of her brother, and she even supports his decision to become a superhero rather than joining the Dark like her.
* Basil Rathbone as Sherlock Holmes, who was very witty and showy in the stories but became increasingly a straightlaced hero-type throughout the films (although he did have some moments of hilarity, like impersonating a music hall performer singing "I Do Like To Be Beside the Seaside.")
* Basil Rathbone film series, Rathbone was nearly impossible to identify most of the time, other times his nose gave him away. Also, just scroll down a little to the literature section for more info.
* Basil Rathbone's sharp and decisive Holmes in 1940s film and radio. Even so, in the radio series Bruce's Watson was given a few occasions to explicitly show that, while he was a lousy detective, he was an extremely competent doctor, able to diagnose medical problems as quickly and easily as Holmes could deduce anything else.
* Basil the Bat Lord uses them all dangerously well, but appears to ever so slightly prefer green bricks and the occasional lighting wand.
* Basil the Macedonian was born a peasant. In spite of his lack of education and limited experience in military and administrative matters, he became a favorite courtier of Byzantine Emperor Michael III and eventually succeeded him as emperor. He reigned successfully for 19 years, founded the Macedonian Dynasty, and started the Macedonian Renaissance.

* Bas isn't pronounced like either of these words — indeed, it sounds like the sound a sheep makes — but your spelling checker doesn't know that.
* Basketball and the Bulls started winning titles, to the point that Bulls players took to the airwaves basically begging the fans not to riot.
* Basketball fans of Seattle have been in Expansion Hell for more than a decade, as the league doesn't want to expand and allow the Supersonics to return - at most, there were threats to relocate both the Sacramento Kings and the Milwaukee Bucks

there.
* Basketball features deadly B-Ball spiders, which have heads and bodies made out of giant basketballs. Their bites can inflict glaucoma on your characters.
* Basketball from the kids on the court and one of them throwing him the ball.
* basketball game ends with free throws with no time left or a three-pointer made in desperation. Often from across the court.
* Basketball game is televised. The first broadcast of its kind. The game was between the teams of Fordham University and the University of Pittsburgh.
* Basketball is easily the most competitive in the world, with the best players of the game being Americans themselves.
* Basketball Jones, a gay African-American romance novel by E. Lynn Harris featured a smart, studious man carrying on a secret affair with a basketball player.
* Basketball legend Shaquille O'Neal considers his stepfather Phillip Harrison to be his "real" father, as that was the man who raised him alongside his mother. Shaq's biological father wasn't present in his life growing up and even signed away his parental rights to Harrison when Shaq was still a baby. Say what you want about Shaq's short-lived rap career, but his song "Biological Didn't Bother" was a heartfelt dedication to Harrison and spelled out how Shaq viewed him as his father "'cause my biological didn't bother."
* Basketball lends itself to these moments quite often; it is common for a team to go from defeat to victory on the last shot.
* Basketball: Many state high school athletic associations use a "continuous clock" after a score differential is achieved after halftime. In this instance, the clock doesn't stop for things that it would normally be stopped for, such as going out of bounds or moving the down markers in football, or fouling in basketball, although the clock would stop for such things as time outs. States with continuous clock rules still often have the discretion to end a game early, provided that it is halftime or later.
* Basketball: Much like football, state high school athletic associations have implemented "continuous clock" timing rules if the winning team is ahead by a certain margin (usually 30 points) after halftime. There are currently no known states that end a game before the end of the fourth quarter if an even higher point difference is reached.
* Basketball player Ron Artest had his name legally changed to Metta World Peace to well, promote world peace.
* basketball players can become spot monkeys by choosing to go for the highlight reel dunk shot instead of simply scoring, sometimes to the point of refusing to make passes to teammates who have wide open shots.
* Basketball player Shaquille O'Neal; Shaquille means "little warrior". Shaq measures 7'1" and weighed around 280 lbs. in his prime and up to 320 at times.
* Basketball players Pau and Marc Gasol have a rivalry of necessity; they play for different teams (the San Antonio Spurs and the Memphis Grizzlies, respectively). That said, when they go up against each other they don't hold back. Pau, the older brother, is probably "winning", being on much more successful teams (he had spent most of his pre-Spurs career with the Los Angeles Lakers) and dwarfing Marc in nearly every positive stat category. On the other hand, they play together on the Spanish national team, and they lead it. "Gasol to Gasol...and it's in" is pretty common whenever Spain is playing.
* Basketball Such subs are on the court just about as much as any of the starters, and so the chemistry between the Sixth Man and the starters is just as important as the chemistry between the starters themselves. What takes the subversion further is that these subs are more often than not part of the team since a moment, not recent additions.
* basketball, there are multiple unishments related to fouls and freethrows.
* basketball tournament. Every year there were complaints about teams with a high RPI being left out or teams with a low RPI making the field, all concluding that the RPI is deeply flawed and the NCAA should get rid of it. But the NCAA always said that the RPI was just meant as a simple table to compare teams early on in the process, and that their decisions ultimately come down to who the team in question

beat and who they lost to. The NCAA finally concluded that the RPI had structural flaws and replaced it with the new NET ratings starting in the 2018-19 season, but again tried to emphasize that it was one evaluation tool of many.
* Basketball uniforms, up until about the late-1980s/early-to-mid-1990s usually consisted of fairly tight sleeveless shirts and short shorts. Those uniforms were more durable versions of what a man would have worn underneath formal wear to protect Sunday Best outfits from sweat stains. For a time (mostly during the 1970s) players were encouraged to wear cotton socks which extended almost to their knees so that they could dry their hands during stoppages of play because the early polyester uniforms (which were lighter, more durable, and easier to clean than previous ones) did not carry away sweat as well as their cotton predecessors.
* Basket Case film, although Belial's titular "attic" is portable and he doesn't seem to complain about staying hidden. Furthermore he's even said to prefer to keep to himself in the sequels.
* Basket Case is about a man and his malformed, murderous twin that he carries around in a basket and finds victims for.
* Basket Case trilogy works as a stand-alone, whereas the second two are connected more by tone, cast and plot development.
* Basket Case who tries to rape Duane, much to the sheriff's annoyance.
* Baskets is always unfazed and casual at anything which contributes to the recurring dry humour in the show.
* Baskets is an especially literal example: He started clowning as a way of coping with his father's suicide and keeps it going as a way of fighting his insecurities. His initial clown character "Renoir" is even a stereotypical sad French clown.
* Baskets of Guts Ancard is built on a mountain, and the walls enclose the entire city. It is also a quarter for a large military garrison.
* Baskets of Guts: Ancard, though some events of the plot take place in its surroundings.
* Baskets of Guts, but it's still the most long-living servant of the Lich.
* Baskets of Guts can control those who are infected with their spores, and they're well aware of this fact.
* Baskets of Guts cannot be really killed again, save for killing the one who raised it. This is a nasty surprise for those who rely on this trope.
* Baskets of Guts: Starting off with two protagonists, the number of characters involved in the story dramatically increases, after said pair reaches the city.
* Baskets of Guts to turn the entire world's population into walking corpses.
* Baskets plays twins Chip and Dale Baskets. In contrast, their twin brothers by adoption Cody and Logan are played by actual twins Garry and Jason Clemmons respectively.
* Baskets: Trinity seems like a MPDG at first; a sexy, alternative young woman who takes Chip under her wing when he joins a clique of fellow hoboes in Season 2. It quickly gets subverted when she turns out to be a bit of a neurotic mess (getting upset when he upstages her in their clown act), and she quits the group after making a failed pass at him. They reconnect later, and Chip ends up helping Trinity get her life in order and introduces her to her future husband.
* "Bask-ice Ball" is a hockey-basketball hybrid played by Marshall's family. Marshall admits to Lily that there are no rules; it's just an excuse for everyone to whale on each other.

* Bas-Lag Cycle, due to the Robot War that was looming in the earlier novel taking place and the robots losing.
* Bas-Lag Cycle explores a magical discipline called "golemcrafting", wherein magicians channel power into anything that isn't living. Most of the Golems created

are fairly standard (blade, flesh, metal, clay, wood), However the main character of Iron Council creates increasingly more fantastic golems some of the more memorable ones being: poison, light, dark, and time.
* Bas-Lag Cycle has a sort-of example in the form of a golem made of shadow, which is somehow able to engulf and choke people.
* Bas-Lag Cycle has Isaac dating Lin who has a very attractive body, minus the scarab head.
* Bas-Lag Cycle main character of the first book views Torque as an uncontrollable and terrifying force.
* Bas-Lag Cycle. Most of Miéville's "Xenians" seem to fit this trope to some extent. The hotchi (hedgehogs), the vodyanoi (frogs), the grindylow (eels), the Weavers (spiders) and the beetle men (guess) are just a few examples that spring immediately to mind.
* Bas-Lag Cycle robots, Demons, elementals and Wyrmen who seem to be a borderline case.
* Bas-Lag Cycle. Tesh appears to use thaumaturgy very heavily in its military, with its soldiers inflicting surreal wounds on the militia forces and its most powerful thaumaturges able to destroy entire cities through elaborate rituals.
* Bas-Lag Cycle the occupants of Armada. Except he may not be lying. It's complicated.
* Bas-Lag Cycle, use rather bold-faced names for the days, such as Skullday, Chainday, and Fishday. And this is only for the city of New Crobuzon, alone. In the floating city Armada, they have completely different names for months and days of the week.
* Basler BT-67, a rebuilt Douglas DC-3 with such upgrades as a strengthened and lengthened fuselage, new turboprop engines to replace the old piston engines, new avionics, and modifications to the wings. The end result is an aircraft with all of the strengths of the DC-3, but with greater carrying capacity, range, speed, and of course a renewed service life for the 1930s-era DC-3. Given that over 16,000 DC-3s were built (including military variants, licensed copies, and even foreign knock-offs), there are more than enough airframes and parts to keep the popular aircraft in service.
* Basquash!. Actually, all signs point to Dan being able to actually control the ricochet of his shots in real time, so...
* Basquash!, Dan realizes — a little later than Miyuki would've wished — that the busty mecha mechanic he's been hanging around with for the past few hours was his childhood friend from years ago.
* Basquash! features Bigfoot Basketball which, despite its name, is played by mecha.
* Basquash! has an extended sequence between Dan and Miyuki in its first episode that turns piloting one of the Bigfoot mecha into a much sexier experience, at least from the point of view of Miyuki's grandpa, who thinks that she's "doing it in the wrong order."
* Basquash! has Sela and Navi. While Sela is normal-sized, Navi is a literal Giant who's as big as the Bigfoot mecha.
* Basquash!, Iceman Hotty has some made by Thousant after getting his left arm and leg cut off by Price.
* Basquash! this show focuses on are later revealed to be created originally with the purpose to be a Mobile-Suit Giant, allowing the humans to mingle easier with the race of the giants.
* Basquash!. Though they're hardly the first pair of equipment to be alive in the series.
* Bassanio wants to marry Portia in part because she's wealthy and Portia's father had set up the whole "three caskets" thing to assure that she doesn't get stuck with one. Like everything
* Basshunter - "Now You're Gone," "All I Ever Wanted," "I Miss You," "Please Don't Go," "Camila" (
* Bassie & Adriaan. Because of it, the two accidentally set up their tent on a soccer field rather than the camping place they were looking for.

* Bassie & Adriaan: Besides playing Adriaan, Aad van Toor co-directed "Het Geheim van de Sleutel" and "De Diamand", and as of "Het Geheim van de Schatkaart" completely took over the director duties.
* Bassie & Adriaan did a series of on stage tours throughout The Netherlands in the 1980's, 90's and early 2000's.
* Bassie & Adriaan featured a robot named Robin in several seasons.
* Bassie & Adriaan. First, he accidentally leaves his footprints in wet cement next to the hotel they are staying at. Then, when fixing his mistake, he manages to get himself stuck in the cement and has to be freed by Adriaan. Later, after Bassie again fixes the concrete, the 3 crooks following them get stuck in it.
* Bassie & Adriaan: Had a comic strip based on them drawn by Frans Verschoor, and direct involvement from one of the comedians themselves: Aad van Toor (who played Adriaan).
* Bassie & Adriaan: In one of the shorts, Bassie goes camping for the first time, but when setting up his tent he holds the instructions upside down and sets up his tent accordingly. He doesn't even realize his mistake until Adriaan points it out to him.
* Bassie & Adriaan often had the villains plotting to take out the titular heroes with a bomb, which more often than not ended up exploding in their faces instead.
* Bassie & Adriaan spawned a lot of merchandise and was sold to several countries.
* Bassie & Adriaan; take a broken alarm clock and a broken radio. Try to not only fix them, but also combine them into a clock radio. A bit of short circuit, and presto! Intelligent, talking robot. Then add some arms and legs for good measure.
* Bassie & Adriaan: The Baron is frequently full of anger because his henchmen keep making the same stupid mistakes over and over, managing to blow stuff up in his face or have Bassie and Adriaan escape.
* Bassie & Adriaan: "The Baron" (no real name given) is a recurring enemy, although it's unknown if he actually is a baron or simply gave himself this title because he considers himself to be a criminal mastermind.
* Bassie & Adriaan: This is how the bad guys (de Baron, B100 en Handige Harry) were arrested at the end of "Bassie en Adriaan: De reis vol verrassingen" (or "Bassie en Adriaan op reis door Amerika", depending on when you watched). After an adventurous journey through the U.S. (during which the villains secretly tried to sabotage them), Bassie and Adriaan finally figure out that they're being followed. Hence, Bassie and Adriaan come up with a plan to get them arrested for a crime the villains committed prior to the eponymous journey (a burglary shown near the start of the season). They decide to lure the bad guys to Sint Maarten (which has a French and a Dutch jurisdiction). There, they taunt the bad guys into leaving the French jurisdiction and entering the Dutch one, where they're promptly arrested by the Royal Marechaussee.
* Bassie & Adriaan; when Bassie tells the audience why he and Adriaan have a new caravan, he recalls how they once ended up on a narrow road due to him reading the map upside down, and when they unhooked the caravan to try and turn around, it rolled off the road and into a ditch, completely destroying it.
* Bassie & Adriaan, where the villains would often just barely miss the duo.
* Bassist Abraham Laboriel Sr. lost the tip of his left index finger when he was four years old. His father taught him how to play guitar with his three remaining fingers. However, it became difficult for Laboriel, so he ended up switching to bass guitar.
* Bassist John Deacon is an electrical engineer who built an amplifier good enough for Brian to record with it.
* Bass-o-matic is a strong contender for "best-known SNL parody commercial". It's also one of the first.
* Basso Profundo, who is notably strong, look puny, whereas Harry is all wiry muscle.
* Bass Reeves, Deputy US Marshal for the Western District of Arkansas. Credited

with over 3,000 arrests, Reeves is often considered one of the greatest Marshals to ever serve.
* Bass that he isn't contacting Superman because he's pretty sure the god-level entity tearing up Nexus has magic powers, and even if he didn't Kryptonite is so common that the ice cream vendor they're meeting in front of probably has Kryptonite-flavoured ice cream. He in fact has two kinds.
* Bass (the fish) is pronounced differently from bass (the musical instrument/voice). The fish rhymes with "class
* Bass to Mouth. The school staff tells Cartman they want him to ensure Pete Melman won't kill himself like a previous student did after being ridiculed for crapping his pants. His solution is to give Jenny Simon a laxative-laced cupcake; Cartman figures this will guarantee that attention is diverted from Melman, but now Jenny ends up attempting suicide. Cartman decides to fix everything by having all the students eat pizza with laxatives so no one gets singled out.
* Bastard!! (1988) in 2000 (with a seven-year hiatus between 2001 and 2008) and as a result, only a relatively small set of 26 volumes have been published.
* Bastard Angst: A child of unmarried parents faces a tough upbringing.
* Bastard Angst: I get a hard time from others because my parents never married each other.
* Bastard Bastard 8:29-9:56, was the illegitimate son of Gideon who murdered his 70 legitimate brothers (he had a lot of step-mothers), then conquered his father's kingdom.
* Bastard Bastard: A person who is a bastard in both senses of the word (i.e.: they were born out of wedlock and they're a jerk).
* Bastard Bastard: I'm an asshole because my shithead parents aren't married!
* Bastard Bastard of fiction. Also Edmund shows he isn't entirely evil, as while dying he tries to do some good and save Cordelia.
* bastard Blackfyre branch of the family. However there were decent Targaryens, such as Jaehaerys I, who married his sister and none of their children were outright evil, or Daeron II, the son of the cruel Aegon IV and their sister-wife.
* Bastard Boyfriend: A male character is sexy because he's sadistic or abusive.
* Bastard Boyfriend: A man who abuses his girlfriend/wife, but it's portrayed as romantic and/or sexy.
* Bastard Boyfriend: A man who treats his love interest poorly, but it's portrayed as romantic and/or sexy.
* Bastard Boyfriend: Extreme examples of abusive boyfriends can end up as outright rapists.
* Bastard Boyfriend. She is a fairly decent person deep down, however.
* Bastard Boyfriends, who are infamous for their abusive treatment of their victims.
* Bastard!!" but has been deliberately kept in the dark by his father in regards to sexuality, likely to keep him from acting against him out of romantic or sexual passion.
* Bastard!!, but still wants to gather every beautiful girl he can find and recreate his harem, much to the chagrin of his current love interest Tia Noto Yoko and Arshes Nei when she finds out he is alive.
* Bastard!!: Dark Schneider borrows 500 yen from Yoko. Even though he gets himself killed, he comes back from the dead, because Lucien always returns borrowed money.
* Bastard!! devils try to wipe out humanity, while fighting each other.
* Bastard!! Dongsoo Seon seems like a friendly business man and a good father...but he's also a vicious serial killer who has used his kindly persona to fool many people, including the police several times.
* Bastard!!: Even as a child, Jin didn't seem to have any friends, as most people found him creepy and unapproachable while being charmed by his charismatic father.
* Bastard!! father at first was she was the only person to smile at him.
* Bastard!! Gil Alien realizes how much his family (and most of all not his mother, but his stepfather and step-siblings) means to him after he gets thrown into the past with hardly a hope of return.
* Bastard!!. Gil reflects on the countless brilliant duelists who lost their lives

in wizarding wars: since wizard duels are practically a sport and have a very strict set of rules, most of the duelists weren't prepared for the real battlefields at all.
* Bastard Girlfriend: A female character is sexy because she's sadistic or abusive.
* Bastard Girlfriend: A woman who abuses her boyfriend/husband, but it's portrayed as romantic and/or sexy.
* Bastard Girlfriend: A woman who treats her love interest poorly, but it's portrayed as romantic and/or sexy.
* Bastard Girlfriend with visions clear". Apparently the song is based on real events as well, as Sophia is bisexual and had a female friend this was happening to. Whether they ever got together is unknown.
* Bastard!! had Gara proclaim that you never defeat a major enemy while off screen.
* Bastard!!, is also known as 'The Immortal', for very good reasons. When he tears his own heart out to save his adopted daughter/lover, Arshes Nei, we are treated to a double-dip into this trope. Not only does his heart continue to beat for a while outside his body, splattering blood all over her, but later, when he regenerates, he couldn't just regrow his heart inside his body, nooo... instead, his heart reforms in the air over his gaping chest-wound, and starts BEATING, before tendrils shoot out of the hole to grasp the newly-formed heart...
* Bastard!! Jin has his first one at the end of episode 22 when he realizes he's developed a crush on Kyun. He begins to blush with more frequency after this.
* Bastard!!: Jin, not having much social interaction with his peers (due to finding him creepy) has little clue on how to act around other kids his age, and has only a child's understanding on certain topics such as sex, even flat-out asking Kyun what porn was without realizing how it could have been interpreted as a perverse gesture. This works to his Dongsoo's advantage of keeping him under control.
* Bastard!!. Kyun does draw Jin out of his shell, but it's not only her who does it; Manny helps too, and it's mostly Jin himself who decides to make friends. Plus, she has her own problems to deal with, and doesn't exist only to help Jin.
* Bastard!! Later his motivations become much more complex, but showing everyone who's the top banana remains one of the main among them.
* Bastardly Speech: Would be a Rousing Speech, if it weren't a complete lie.
* bastardly. When Ian found out, the Master justified himself by claiming that angry-and-grieving-Ian was in a more useful frame of mind for taking on the enemy. Ian was rather justifiably annoyed by this, but then one should never trust the Master in the first place.
* Bastard!!: Manny Kim, Pann Han, and Beau Park are a trio of bullies ranking from most to least powerful with Beau being a bully victim himself. Manny eventually grows out of this.
* Bastard!! — completely naked — pretty much the first thing he says is "What are you looking at, Miss Yoko?" The fact that Yoko is on her hands and knees in front of him doesn't help.
* Bastard Operator from Hell against every machine and establishment they felt had wronged them, ending with their being trapped in an elevator after accidentally setting the device off.
* Bastard Operator from Hell as a method of dealing with annoying users and bosses, including this threat to a pestering boss
* Bastard Operator from Hell following the boss suffering "a tragic accident" in his office.
* Bastard Operator from Hell has caused this to happen to annoying lusers a few times, although more realistically, often not without injury.
* Bastard Operator from Hell", including one about UFO sighting in the vicinity of the building... which he successfully used... more than once.
* Bastard Operator from Hell is on it. Its hard disk failed a long time ago; the machine has been running from memory for untold years. Other stories also make fun of various outdated equipment, like one where he made a few bucks by selling users the right to chuck their crappy old hardware from the roof of the building. It's all good fun until an old mainframe lands on the boss' car...
* Bastard Operator from Hell refers to these people as "huggy-feely" types, and

considers it his sacred mission to prevent them from wreaking havoc in the office. One of his greatest joys is breaking them little by little, when he doesn't outright kill them.
* Bastard Operator from Hell regularly meets these, so there are plans for such a case.
* Bastard Operator from Hell series regularly brings up the topic usually in regards as to its application to various users, consultants, or bosses. Usually involving carpet and lime, though occasionally building sites or other methods feature.
* Bastard Operator from Hell that he'd get his boss fired instead, going through a series of them over the past few years.
* Bastard Operator from Hell The number of bosses he's gone through, due in no small part to stress-induced cardiac arrest, is uproariously funny.
* Bastard Operator from Hell these. He and the PFY have discussed making recursive ones in at least one story.
* Bastard Operator from Hell, we find out that the cattle prods have two settings. "Stir Fry" operates normally, while "Stun" causes the high voltage to fry the person brandishing the device. This is then used by the Bastard when he suggests the Boss use the cattle prod to stun the PFY.
* Bastard out of Carolina Bone's stepfather Glen frequently whips her savagely with a belt. When her uncles find out about this they give Glen a beating with his own belt.
* bastardry Mufasa and convinces Simba that his father died in an accident for which Simba was to blame, then tells the rest of the pride that Simba also died in the same accident after driving him away.
* Bastard!! setting, they're both pretty much immortal by definition (one being a demi-deific sorcerer, the other being a Drow) - at the very least, they each have potential lifespans that reach well into multiple millennia, so the years matter less.
* Bastard!! something very wrong with the man who helped his grandmother and that his comments about there being many kinds of weirdos out there were justified.
* bastard son best friend Ned — and is hinted to be developing feelings for her, who (as noted above) is similarly Generation Xerox of Lyanna Stark, the woman Robert spent his life in love with.
* Bastard Sword/Hand-and-a-Half Sword: Smaller in blade and hold than a longsword, but longer than a shortsword. These swords can support about a hand... and a half. It is designed to be used primarily one-handed, but can easily switch to two-handed for more powerful strikes. The pommel of the weapon can hold the back half of the non-dominant hand. Primarily used in medieval and European settings. Compare longsword and arming sword.
* Bastard Swordsman, after learning the forbidden martial arts technique of the Silkworm kung-fu, have his hair turning silver white.
* Bastard!!: The main character, Jin, has this hairstyle, covering his glass eye.
* bastard to the PC; s/he is the only other Warden left in the entire country.
* Bastard Understudy: A villain's underling biding their time until they can betray the villain.
* Bastard Understudy — A villain's sidekick secretly planning to betray their master.
* Bastard!! was all about this. A virgin maiden's kiss and a spell released him from his childish body and transformed him onto the cruel, evil and horny black mage. Dark Schneider only cares about himself and his desires, and Tia Noto Yoko, the person who freed him, is the only person who can cow him into some semblance of behaving himself.
* Bast are going this way, from the harsh, severe, jagged asymmetrical contraptions of the first game to the insectile designs of the second.
* Bastet, the goddess of cats, whose worship as a goddess of fertility and protection was the reason for the popular association of Ancient Egypt with cats. She was usually depicted with a cat head, but otherwise had a fully female human body.

* Bastian spends 100 years in Fantasia while only about 12 hours pass on Earth.
* Bastila and her estranged mother, Helena, have a chilly reunion on Tatooine. Helena then requests that you go out to the desert to retrieve her
* Bastila Shan has mastered a Force technique called battle meditation that raises the effectiveness of her allies; she works closely with the Republic Navy to coordinate fleets in battle.
* Bastila starts off captured by a street gang on Taris. She ends up saving the
* Bastille: "Laughter Lines" is about a couple vowing to stay together until they're both old; considering the usual, much gloomier tone in their songs, it's pretty heartwarming.
* Bastille's "Laura Palmer" involves the frontman Dan Smith being kidnapped by two masked men and a masked woman riding ATV's. They bind him with duct tape and put a bag over his head, torturing him by shouting into a megaphone right next to his ear, placing a tarantula on his face, and hitting him over the head with a bottle.
* Bastille song "Doom Days" features the line "We're gonna rabbit hole down". This is a metaphor for the partying lifestyle the singer falls into to distract him from the problems in the world.
* Bastion. A hammer, shotgun, rifle, bow, flamethrower, machete, spear, indestructible shield, and an OP cannon. More than Enuff Dakka for such a young Kid, huh? Even the Narrator thinks so.
* Bastion archons to place physical barriers in their foes' way. They are also highly sedentary beings, and the most difficult part of dealing with one is to convince it to budge from where it is now — most bastion archons spend their eternal lives guarding the very location where they were created.
* Bastion evokes this with its old-timey narrator and most of the soundtrack, which is full of banjos and the occasional voiced song that sounds like a traditional folk song.
* Bastion fits this to a T. Spanning at least an entire nation, if not the entire planet, it wiped out a large majority of the population. Only a handful of people, some monsters and wild animals were left surviving. The land itself has been shattered and each place now exists as a separate floating island, accessible only via flying. Interestingly, these islands are not actually complete when you land on them. As you progress through the levels, the areas rebuild themselves before your feet: earth, plants, buildings and all.
* Bastion, full stop. As you traverse through the assorted levels, the ground underneath the Kid's feet comes together and falls apart at the slightest whim, even disregarding his habit of wantonly smashing everything he sees into bite-sized chunks.
* Bastion has the Kid dropped from the sky onto objects that really shouldn't be used to break a fall. When the Sundown Path opens on a bale of hay, he lands off to the side of it.
* Bastion is capable of using both a variety of guns and various melee weapons. In the setting, the Slingers were known to use machetes and dual revolvers.
* Bastion. It's been over for a while, but a lot of the Ura and the only living Caelondian old enough to remember it (Rucks) are still a bit sore over it.
* Bastion specialize in speedy movement, using multiple quick steps to approach (or, in the case of the gunmen and archers, back away from) their targets.
* Bastion start at the beginning of the story and continue on normally, but eventually it's revealed that Rucks' ongoing narrative is being told to Zia while The Kid storms the final dungeon of the game. When the player finally reaches that point, Rucks runs out of story to tell, and instead starts talking about their present situation and speculating what's going on on The Kid's end.
* Bastion that was so costly, it bathed a portion of the realm in blinding, searing, perpetual daylight.
* Bastion The further along the game goes, the more the Kid levels up and the more booze he can equip at once, which also coincides with the increasing level of terrible crap the Kid experiences in a post-apocalyptic hellhole.
* Bastion, the narrator says, "And then he fell to his death... I'm just foolin'." You magically reappear as if you never fell; you haven't met the narrator yet, so

dying isn't an option.
* Bastion Wars novel shows a rebel insurgency of Chaos cultists trying to liberate their planet, and they have a tendency to cut out and eat the livers of their Imperial counterparts.
* Bastion, Zulf has one of these after he reads Venn's Journal. The second half of the game revolves around stopping what he does afterward.
* Bastøy Prison in Norway is basically an island colony with just over a 100 inmates on it, accessible by ferry. The inmates walk free and spend most of their time working the island farms. Even the ferry is operated by one of the inmates and during the night there are only five guards. While most of the inmates are nonviolent, there are some with murder convictions. The most bizarre case is the man who killed another person with a chainsaw. He's the one in charge of all the land clearing on the island, due to his tremendous skill with the chainsaw.
* Bast persona [an Egyptian goddess] forcibly switched bodies with Flare's Eos persona.
* Bast, the Egyptian Goddess of Cats doesn't exactly say Morpheus is
* Bat*21, after a rescue mission has gone disastrously wrong, Captain Clarke walks in on Colonel Walker hunched over a chair holding a mostly empty bottle of whiskey. After the colonel finally notices the intrusion he says, "We lost six people today, Clarke. Kids, all of 'em. Just kids."
* Bataan had this ending. After the last member of his squad is killed, Sergeant Bill Dane (Robert Taylor) digs his own grave and continues firing his machine gun until the credits roll.
* Bataan in the last couple minutes as the last remaining soldier digs his own grave, hops in it, and resumes his last stand as the credits roll.
* Bataar. Notably, it's actually the younger brother who's the Cain is this case.
* Batalha De Guararapes: The Dutch East India Company is the direct antagonists of the movie, representing the Dutch Republic's interest to take sugar plantations from Northeast Brazil.
* Batallion Wars shows us different salutes of the armies in the game. The Solar Empire salute is the left hand raised to the chest, palm open and pointing up, followed by a short bow. The Western Frontier and The Anglo Isles share the same salute, similar to real life Britain. The difference is how it is carried out. The Western Frontier soldiers bring their hand to the forehead, before straightening their hand to a Roman salute. The Anglo Isles salute is the same, but in reverse (Hand straight to the Roman salute, then to the head). Finally, the Tundran Territories has the right hand closed to a fist, the arm straight forward before bringing it to the chest, held vertically. It should be noted that apart from the Solar Empire, all CO's do this salute with their right hand, while soldiers (who carry their weapons in the right hand) do them with the left hand.
* batarians and geth, and rip apart any number of the enemies that have been handing your ass to you in singleplayer.
* Batavia of anti-magic fanatics and encounter the forces of Avalon for the first time.
* Batavus Droogstoppel considers theatre to be evil due to the fact that everything played on it is a lie. Ernst Stern, the character that writes the book for him because even he considers his own style to be dry, he decides to add more romantic snippets about the heroes that saved poor people and tragedies in his book that should go about the coffee trade and how to help the future coffee men for the days to come. When Batavus Droogstoppel realizes this he is mad and goes as far as to show him that romanticism is futile by analysing a theater piece. It should be noted that the author considers Batavus Droogstoppel to be morally wrong.
* Bat Boy: The Musical, Meredith reassures Shelley about taking Bat Boy to the tent revival, telling her to "just imagine (the townsfolk) in their underwear".
* batchalls The Clans that fought like warriors generally inflicted heavy losses due to the superiority of their Mechs and pilots, but were outmaneuvered strategically by the Comstar armies.
* batchall to fight in "dishonorable" battles since survival was at stake and they couldn't beat the Clans individually.

* Batch. They even get into rather comedic situations involving Ms. Loon.
* "Bat-Credit Card". While at first amusing and became his most memetic and famous joke, he got really tired of it when people make him re-enact his rage by saying "Bat-Credit Card" within his vicinity that his lungs were in danger of being damaged so he asks that people stop telling him to re-enact that joke, or he'll just find ways to subvert it without going into rage. Personally, he liked the joke enough that it's amongst his Top 10 favorite Nostalgia Critic jokes.
* Bat Deduction and its film adaptation, who mentions that Australia is entirely populated by criminals.
* bated/baited (as in, you wait with bated breath — it means you're holding your breath, not stuffing maggots into your windpipe)
* Bateman, fully recovered from the injury that caused his elimination, was reinstated in the competition during season 5. As that season's gone off the rails, it's impossible to know if he'll win.
* Baten Kaitos actually reach 3300+ HP in the course of the game (assuming you level her up), but at the time when this pitched battle occurs, it's still more than the high-three-digit HP values your party will probably have at that point in the story.
* Baten Kaitos And that's when you realize you've judged the entire plot the wrong way from the minute you hit Start.
* Baten Kaitos can simply leave the game running and get on with their lives.
* Baten Kaitos don't have these, and use mechanical wings instead; the hero has one real wing and one metal one. Notably, these wings aren't used for actual flight, except for short distances; long-distance travel is done in flying boats.
* Baten Kaitos: Eternal Wings and the Lost Ocean, every single boss in the game is 100% immune to every status effect; the only exception is the two tentacles used by the Tree Guardian in Anuenue, though the boss itself is still immune.
* Baten Kaitos: Eternal Wings and the Lost Ocean, which removes a tremendous amount of money. Fortunately, you don't have to sell it, and the game shows the price of selling it clearly.
* Baten Kaitos explains it better; the wings used to be powerful enough to fly around all the time, but they have atrophied greatly over the years. Trying to use them for anything more than a few seconds results in the wings giving out. There's a reason these people use flying boats to get around. Granted, this still doesn't excuse Kalas turning around in Moonguile Forest because a log is blocking his path.
* Baten Kaitos for the power to defeat Wiseman at the cost of sanity, gaining the ability to fuse into one temporarily in the process.
* Baten Kaitos game isn't a party member — she's a little seal-like creature that rides in the neck of Xelha's shirt. And is used in several of her super moves.
* Baten Kaitos game seems to have this. Kalas with blue hair and eyes, Xelha with blonde hair and yellow eyes, Lyude with red hair and red eyes, and, finally, Savyna with dark purple hair and dark purple eyes.
* Baten Kaitos games where you take the role of the main character's spirit companion and frequently get prompted to comment on his statements or answer his questions. The more often you agree with him, the more lucky you'll get when it comes to drawing effective cards in combat. You'll even occasionally see an unusable card blatantly change into a useful one if you're setting up a good attack chain, such as a LV.1 Weak Attack become a LV.8 Special if you've set up a good 1-7 attack chain.
* Baten Kaitos Giacomo has a particularly awful one right before the final boss fight with him:
* Baten Kaitos, Guillo's strongest special attack, Aphelion Dustwake, showers enemies with the ice trail of a comet. It's quite overpowered.
* Baten Kaitos had limited items, though after a while they would restock.
* Baten Kaitos, has a particularly cool one, which only comes off once (not counting the epilogue).
* Baten Kaitos have such things as "bunnycats" (long-eared cats), "pows" (pigs that give large quantities milk, and are white colored with black splotches) , as well as Dog/Deer and Sheep/Goat hybrids.

* Baten Kaitos, he defects to the hero party when the empire attacks the island he was sent to under false pretenses of protecting the empire from the other kingdom's non-existent imminent assault.
* Baten Kaitos in a sublevel with oddly familiar 8-bit look and sound. The "Golden Hero" near this area is implied to be Gilgamesh, and all the items you need to get through here are from that game.
* Baten Kaitos initially couldn't care less about the end magnus, he just wants to take down Giacomo
* Baten Kaitos, insists on being called "the Great Mizuti," rarely conjugates "to be" (i.e. "the Great Mizuti be invincible!") and will occasionally string together two related words after the end of a sentence.
* Baten Kaitos is an ambassador connected to the Imperial Army, so he can be somewhat forgiven for his extravagant military-esque outfit and apparently brass-plated gun-horn - although his brother and sister, actual soldiers, have no such excuse.
* Baten Kaitos, is far and away the hammiest character in the game and (unintentionally) probably the best-voiced character, just because it's so amusing.
* Baten Kaitos, is the sound test being fully unlocked. There are a lot of cards you can't get until the final dungeon, by which point you'll have most of the music tracks unlocked in the sound test anyway.
* Baten Kaitos, it constantly fluctuates between dimensions and is home of the most bizarre areas of the game.
* Baten Kaitos just gets annoyed with you if you do. After exploring a bit, he finds a gate he can't figure out how to open, but Xelha can.
* Baten Kaitos, Kalas seeks to kill Giacomo because the latter killed Kalas's grandfather and little brother.
* Baten Kaitos kicks his ass during the excape from Mintaka in the beginning of the game. Sagi, meanwhile, just feels sympathy for Giacomo's obsession.
* Baten Kaitos mode, he has an eye in his crotch. Which shoots ludicrously-powerful laser beams.
* Baten Kaitos Origins), and abusing this is probably the most reliable and commonly used way of beating it.
* Baten Kaitos Origins. And as it turned out later, the Guardian Spirit had an even more significant role in this game.
* Baten Kaitos Origins, and the only incentive for the former is "the sword is a status symbol within the military".
* Baten Kaitos Origins, creating a deck gives you the option to lock characters out of it, meaning they can't participate in battle. Depending on who you choose to lock out, this can make the game quite a bit harder.
* Baten Kaitos Origins has a brief stealth segment, as well as a couple of scenes where you have to collect evidence to solve a bombing.
* Baten Kaitos Origins, he'll tell you that you shouldn't be able to do it in a fairly passive-aggressive way. This is particularly odd as other characters just give generic "no dialogue available" messages:
* Baten Kaitos Origins, he tells Sagi that he planted the bomb in a nearby building after the election speeches... not knowing that the real Mourning Mistral broke their pattern of targeting buildings to target an airpod instead.
* Baten Kaitos Origins. In short, rejecting the supernatural and focusing on science — or vice versa — is a Very Bad Thing, and the best way to live is with both in tandem with each other.
* Baten Kaitos Origins), no specials run, specials-only run, basic attack only run, you name it.
* Baten Kaitos Origins that can't really be beaten down with brute force anyway.
* Baten Kaitos Origins, the characters are investigating a series of terrorist attacks from a neighboring town, and hold several of these as new information comes to light.
* Baten Kaitos. Special mention to the character whose voice actor seems to have put his full emotive talents into sounding vaguely Brazilian, resulting in a sort of silly-clearly-fake-accent-monotone.

* Baten Kaitos, the evil god you've been trying to stop the whole game, who's ravaged the home of the Children of the Earth...and he hits about as hard as the regular encounters in the area, moves once per turn, and only has one finisher.
* Baten Kaitos). The Headache status just shifted the numbers from the corners over to the edges, which was a minor nuisance at most. Strangely, it was also possible to inflict these conditions on the enemy (even though they had no interfaces to screw with) causing them to either use half as many attacks or skip every other turn.
* Baten Kaitos. The true final battle that ensues is much more climactic and satisfying.
* Baten Kaitos video games is an interesting example in that there's no resistance against it. The reason: the empire works to instill extreme civic pride in all of its citizens, so that the idea of acting against it has all the attractiveness of stepping on one's own foot.
* Baten Kaitos was reassigned to Nashira, because he unfortunately was too much of a decent human being.
* Baten Kaitos were originally created by a great whale, but the whale and the oceans were swallowed by the ancient evil Malpercio.
* Baten Kaitos, where characters fly around with wings outside of battle, and the main character uses them to dash about and jump over large gaps.
* Baten Kaitos", which appear on the body at will—except for Kalas, the main character, who was born with only a single wing. His foster father made an artificial wing for him as a replacement.
* Baten Kaitos. You'd be spending all your time at the coliseum if it weren't for the fact that you can only fight a few matches per class. Once you clear the class, you have to wait for the story to progress before you are notified you can continue fighting new coliseum matches.
* Bates and Anna: They used to be one of the most popular couples in Series 1 and Series 2, before they got together and interest faded away.
* Batesian Mimicry is when a harmless species mimics a harmful one, for example, a moth larva looking like a snake head.
* Bates Motel (1987) was intended as a pilot to a supernatural anthology series set at the titular motel, but was never picked up due to a poor audience response.
* Bates Motel: After Norma dies by Norman's hand he digs up her body, glues her eyes open and talks to her.
* Bates Motel and hides his family's screwed-up secrets. It naturally has a high number of mysterious disappearances surrounding it as well. It really doesn't help that throughout the series it always appears abandoned despite the vacancy sign reading open for new guests every day.
* Bates Motel is how the town of White Pines Bay is full of people with secrets. For starters the town's economy is based on illegal marijuana farming, and the shady business of that means no one looks for other things, like prostitution and gun running. It makes the Bates' activities easy to fly under the radar.
* Bates Motel: Mother does this to Bradley when she was getting close to Norman.
* Bates Motel , Norma and Norman are basically a codependent married couple, head over heels in love with each other.
* Bates Motel: Norman admits he has a sexual attraction to his mother Norma and after she's dead, he carries her around and talks to her like she's still alive.
* Bates Motel Norman Bates. However, Norman is the most dangerous one as he views her interest in Romero as a serious act of betrayal. Romero, meanwhile, truly loves her and is concerned only for her safety, and Norma is torn between her genuine love for him and her toxic relationship with Norman.
* Bates Motel" Norman ends up in the home of his beautiful teacher Mrs Watson. He's shown running away from her home and she is shown on the floor with her throat cut. Norman himself can't remember what happened but it is strongly implied he slept with then killed her. Even more so when the police discover an unknown semen sample in her body. In the 10th episode of Season 2, Norman has a flashback that confirms he did indeed slept with and then murdered her.
* Bates Motel seems to be one of these. She is every bit as hot as Bradley, but

Norman just likes Bradley better.
* Bates Motel, turned down the opportunity when she was asked if she wanted to direct as well.
* Bates send letters to each other almost daily regardless of whether they have received another one, so they find the sudden drop off in contact very suspicious. Eventually, he figures out what happened and remedies the situation.
* Batfamily, and anyone else who knows him, even those on Oa and in Hell. He's even teamed up with his enemies, just because he asked nicely.
* Batfamily characters fit this trope at one point or another of canon:
* Bat Family Crossover: A crossover that only affects people in one immediate in-universe location.
* Bat Family Crossover. In the end, this all turned out to be an elaborate misdirect, and the Robin who "rose" was a resurrected Damian Wayne (the previous Robin).
* Bat-family) outright refused to derail their storylines for this and, thus, had no part in it.
* Bat-Family tells him (and only him) all of his secrets and asks for dating advice from him.
* Bat Fink cartoon had a villain whose main gimmick was a magnet. He was defeated when he turned it on Batfink's sidekick karate, and the metric tons of random gadgets and doodads up Karate's sleeve crushed his machine. Batfink comments that it was a good thing Karate had in his sleeve "everything but the kitchen sink!"...to which Karate responds by pulling out a kitchen sink, saying he'd put it there last week!
* Batfink episode "Party Marty" asks Karate to cut the first slice of a loaded birthday cake. Karate sings "Karate cuts the cake...Karate cuts the cake" (to the tune of "The Farmer in the Dell") as an ersatz "Happy Birthday To You."
* Batfink has the heroes—Batfink and Karate in a dire strait with the scene frozen as the narrator intones what they can do to save themselves. The action resumes afterwards and justice is served.
* Batfink: "Your bullets cannot harm me! My wings are like a shield of steel!"
* Batgirl (2000), Alfred gives Cassandra Cain this speech on Batman's behalf.
* Batgirl (2000): A supporting character sees Cassandra Cain meeting with Alfred, and interprets it the wrong way, despite Cass's attempts to correct her.
* Batgirl (2000). The issues where she appears are almost always much more lighthearted, and she provides most of the humor in the book.
* Batgirl (2000).) to deliver his daughter a knife as a birthday present, and then casually waltzes right back in during the middle of the investigation into how he did it.
* Batgirl (2009) bantering with each other while Dracula is strangling both of them simultaneously. The next page goes back to the beginning of the story to explain how both heroines found themselves in that situation.
* Batgirl (2009)- helped and mentored Stephanie Brown, who was determined to take up the title and the Batgirl mantle.
* Batgirl (2009): Referenced when Stephanie goes to England for a mission with Batman, Inc. She asks Squire to warn her about any impending feet in a Shout-Out to Monty Python, but Squire assures her that Knight caught the foot last week.
* Batgirl (2009): Stephanie Brown's father, the supervillain Cluemaster, had a friend who tried to sexually assault her. Cluemaster found out, and soon after, the man died. Stephanie accepts that she'll never know for sure if her father was behind this.
* Batgirl (2009) story, Stephanie Brown was framed for murdering a fellow collegiate she'd actually tried to help before his death.
* Batgirl (2009): The Bad Cop/Worse Cop routine was invoked in the 6th issue of the series.
* Batgirl (2009) with an ill-thrown ice batarang. We don't see how he's thawed, but he's fine afterwards.
* Batgirl (2011) hunt him down and will not stop until he's behind bars.
* Batgirl (2011); Mirror was the only survivor of a car bombing that took the lives

of his wife and children. He becomes a killer targeting other "sole survivors", believing that people should wish to die, not to survive.
* Batgirl (2011) tones the craziness down but it's still more light-hearted than the beginning of the 2011 series.
* Batgirl #35 Barbara moves to the cool hip area of Gotham. Her friend jokingly warns her not to get run over by a fixie.
* Batgirl after Babs who had her approval and got to hold on to the mantle for more than two outings, was about sixteen when she first donned the costume.
* Batgirl also gives off some of this air in her interactions with Robin III and Wonder Girl. She hugs Cassie after a successful mission and is usually paired with Robin for covert ops, including knocking him out of the way of attacks. When complaining about how all the other kids have mentors, Jaime includes Batgirl as one of Robin's.
* Batgirl also has purple accents, though considerably less than Stephanie's.
* Batgirl- also wear their capes this way. It's to be expected since Batman trained them.
* Batgirl, a seriously disturbed and self-centered scientist called Kenneth Anderson is transformed into a psychic mutant, whereupon he renames himself "The Annihilator" to show off both his destructive powers and his intention to obliterate Gotham.
* Batgirl, at one point Clayface forms into an exact copy of her to try to escape a bank robbery. After the two Batgirls shout the standard "Shoot her!" "No, shoot HER!", one Batgirl turns to the detective and declares, "Shoot me. I'll bleed." Detective Gage promptly shoots the other one because no one else would come up with such a stupid plan.
* Batgirl. At one point the serum also granted its users immortality, but this has been glossed over in recent years.
* Batgirl, Batgirl breaks up a group of car thieves working the parking garage of a high-class charity event, only to stop in horror when one of the fleeing thugs triggers a bear trap that nearly slices off his leg at the knee. People claiming to be security for the event explain that it has become a new part of gang warfare for one gang to follow another as they commit crimes and leave traps to capture them afterwards.
* Batgirl, Batgirl tries to apologize for how their night out has been sidetracked.
* Batgirl, Bruce calls her out on her hypocrisy of running around in costume yet not wearing the emblem of the Bat.
* Batgirl, but he's unaware of Batman's true identity (which Barbara knows, of course).
* Batgirl comics. Barbara Gordon is a beautiful, learned and mature woman and kickass fighter who owns a cool bike and all kind of fantastic toys for fighting crime.
* Batgirl creates psychic shields to bounce Supergirl's blasts back at her.
* Batgirl did when he paralyzed her. He probably hadn't known how effective it would be.
* Batgirl even explicitly forbade anything like hidden missile launchers when taking suggestions for a new chair. The fanciest thing she's had are holders for her eskrima sticks.
* Batgirl gets in the middle of a fight between Batgirl and Clayface in Batgirl's shape, one of them says to shoot her, because she'll bleed and that will prove who she is. He shoots the other one, because only the real Steph could possibly think that was a plan.
* Batgirl, has this too. She was trained by her assassin father to a punishing routine from literally birth, taught to read body language like speech, while never learning to write or read. By the time she's seven years old she is capable of murdering a man with her bare hands... but when she does, her skills at understanding body language means she has an almost empathic awareness of what her victim was thinking in his last moment - the sheer terror of his death horrifies her and she spends the rest of her life alternately learning and being taught that she is not simply a weapon.

* Batgirl III by the assassin David Cain, who intended for violence to be her only language.
* Batgirl III (Cassandra Cain) was brought up under Training From Hell so over-the-top it entered the realm of self-parody at times. Her workout program was said to have killed or driven insane all others who tried it. Of course since it included never learning to read or speak and only having contact with one person, social maladjustment at the very least would be expected. When Cass trained Stephanie Brown in turn, the training mostly consisted of her being knocked down with one punch, over and over again, although this may be because at the time Cass was more interested in moping than sparring.
* Batgirl III is even able to pull this off. He's easily able to outrun hails of gunfire similar to Cassandra Cain.
* Batgirl III once asked "why does everyone I love die?", to which the person she was speaking to responded: "because you love everyone, and everybody dies."
* Batgirl II, while Cass has been unable to have a relationship last longer than two issues.
* Batgirl in order to make sure she's the "default" Batgirl in people's heads.
* Batgirl in the Shea Fontana series wears a dark blue suit, while in the Lego projects, she wears purple. In the Lauren Faust series, she keeps the purple suit, but now has green eyes instead of blue.
* Batgirl is best known for Barbara Gordon, however within the comic community many preferred her under the identity of Oracle, the wheelchair-bound
* Batgirl is used to explain how she can dodge bullets being fired directly at her head from less than a foot away, and even ones she can't hear or see being fired from, perhaps, miles away. Even when she is actually hit by a bullet, she can do so without flinching, because she was conditioned from when she was very young to ignore the pain. As a means of explanation that strains credulity, she was not taught to interpret speech or writing but instead taught human movement as a language (e.g. through recognition of tensing in specific arm and hand muscles, avoids gunfire by reacting first away from the direction of a pointed gun). She is shown on multiple occasions as basically having Spider-sense. It's implied that there might be something more to her abilities, given that her mother (who did not go through that training) has similar abilities (and it's confirmed multiple times that neither of them are metahumans), but it's never really explored, save for a brief mention by some government agents that her hormone levels are incredibly odd.
* Batgirl. It's been a roller coaster ride to say the least, but her fanbase never gave up on her.
* Batgirl it was so important that the woman in the Batgirl costume he saw talking to Babs was the real one.
* Batgirl , much more so than other media. It's probably due to not having Batman and Superman around, so they're much freer and more emotional around each other. For example, while all the girls except Cheetah were welcoming towards her in "Super Hero High", Barbara Gordon was the only one shown going out of her way to help her adjust. Supergirl takes note of this, and gives her a special suit, which prompts her to become Batgirl to help her save the other students. There are plenty of episodes where their dialogue and/or interactions can be seen as flirty, like "Batgirl V Supergirl", "Batnapped", and the Lego Brain Drain movie.
* Batgirl needs to make her way in a rebel hideout. At the door, she's asked the password. Barbara doesn't even answer anything. She just kicks the door down.
* Batgirl (pretending she got a run in her tights as an excuse to stretch out and caress her leg), to distract a criminal so Batman and Robin can catch him.
* Batgirl probably bring to mind Helena Bertinelli and Kate Kane rather than the first two women who used said codenames.
* Batgirl (Rebirth): In the very first issue, Supergirl accidentally gives Batgirl a wedgie by grabbing her by her pants when she's about to fall.
* Batgirl (Rebirth) sneak in a clandestine black site to free a prisoner. They need to open a cell door but have no key, so Supergirl rips the door off its hinges.
* Batgirl (Rebirth) tells a childhood friend in love with her alter ego that he doesn't know anything about Barbara's current self.

* Batgirl reboot in 2011, she eventually returned to the comics in 2014.
* Batgirl's, despite the before mentioned lack of any superhuman genetics.
* Batgirl series is Stephanie's narration as she swings into the Gotham night for her next adventure.
* Batgirls pretty skinnier but can keep up with males Bat-Family members easily.
* Batgirl's's randomness. Cassandra triumphs after Oracle explains that the Joker's body language is "gibberish".
* Batgirl, Stephanie Brown, also has purple on her costume, and as Spoiler it's the primary color. She seems to fit the "feminine" aspect of this trope.
* Batgirl story featured a serial killer who used a computer dating service to find his targets.
* Batgirl team up to protect Dr. Leslie Thompkins at a charity ball Steph has to modify her dress a bit for better mobility.
* Batgirl that began with a new team as of issue 36 (2014) has little red hearts appear next to the person crushing after showing a panel of the person they're crushing on, though not so much with the idealized visualization.
* Batgirl the Bat-Girl from the '50s and '60s), was dressing up in a costume for a Halloween party when she stumbled into crimefighting. Prior to this, she was either disinterested in costumed adventuring or was planning to emulate different superheroes (different continuities give different backstories, but most at least agree that, whatever her specific plans were, they did not involve bats). That first encounter earned her the label "Batgirl" and she was automatically associated with Batman in the public consciousness. Only her subsequent refusal to stop got Batman involved in training and working with her.
* Batgirl, the titular villain attempts to burn his former co-workers to ashes during one of his rampages.
* Batgirl, the titular villain's energy blasts are powerful enough to bring buildings down, but physically he is still a regular human, for which a simple punch or kick can hurt him.
* Batgirl, this is part of Cassandra Cain's backstory. She spent her whole childhood being trained to kill someone as easily as other humans talk, but when her father actually forced her to go through with it, the experience was so traumatic that she immediately swore never to kill anyone again.
* Batgirl was Bette Kane, but she was completely overshadowed, and eventually retconned by Barbara Gordon, who became a recurring guest star in Batman comics, had her own ongoing feature, and appeared in the popular 1966 show.
* Batgirl was first orphaned and ended up living on his own in Bludhaven she frequently snuck in and took all of his from his cupboard.
* Batgirl while trying to reconcile her choice to go through treatment to walk again. Eventually she reasons that she feels survivor's guilt because she can walk again, although there're many people who will never do.
* Batgirl Year One and Black Canary are captured by his kidnappers while attempting to release him.
* Batgirl Year One: As changing channels idly, Dick Grayson hears of a newscaster reporting a hostage crisis in the Bristol Country Club.
* Batgirl Year One, Barbara Gordon is underestimated by everybody, including her own father. She considers it annoying, but also a weakness which she can -and eagerly does- exploit.
* Batgirl Year One costume and facing Killer Moth and his goons in a charity ball; then it quickly moves to Babs remembering how she ended in that situation.
* Batgirl Year One evades an armed goon by quickly rushing into an aisle, climbing up the shelves and clinging to the ceiling.
* Batgirl Year One's first attempt at roof-jumping. Then Batman uses a sleeping gas on her. When Barbara wakes up, she is lying on a slab on the Batcave, and Batman is looming over her, demanding answers.
* Batgirl Year One shoves her father out of the way in the nick of time.
* Batgirl Year One's secrets he drags her into the Batcave and tries to unmask her. When she tells him off, he walks out, leaving her guest to Robin, who is considerably friendlier.

* Bathe Her and Bring Her to Me: The villain has the damsel cleaned up before... well, you know.
* Bathe Her and Bring Her to Me: The villain orders his goons to capture a woman and groom her so he can rape her.
* Bathe Her and Bring Her to Me: The villain orders his minions to groom a woman held prisoner so he can rape her.
* Bath House Death Match. Besides regular wrestling rules, if they leave the pool, they are disqualified. The pool is heated by a fire that is regularly fed more logs, making staying in it harder and harder.
* Bathilda Bagshot had also been killed sometime between Rita Skeeter’s interview over the summer and Christmas when Harry and Hermione go to visit her thinking she was entrusted with the Sword of Gryffindor by Dumbledore.
* Bathilda Bagshot was Dumbledore's neighbor as a kid and a great aunt of his contemporary/old “friend” Gellert Grindelwald. She almost outlived them both. She might have outlived Grindelwald if Voldemort hadn't sicced his snake on her.
* Bathing Beauty: A character that enjoys baths and showers a lot and is often shown bathing frequently.
* bathing in his blood rendered Sigurd/Siegfried invulnerable. Apart from a spot on his shoulder where a leaf had stuck to him.
* Bathing in hot springs has been a popular activity worldwide for thousands of years. However, there are some places where it absolutely can't be done safely. Yellowstone National Park is a well-known example: many of the hot springs are so hot that they can literally cook a human in minutes.
* Bath Kick: A female character extends her leg to its full length while bathing.
* Bath of Poverty: Bathing isn't a good experience due to being unable to afford proper plumbing.
* Bathory and history, creating and popularizing the thematic genre viking metal.
* Bathory, but has also written a number of songs about her that also hint at this practice - notably, "Woman Of Dark Desires".
* Bathory. The fact that he went on to create viking metal on a whim only helps.
* Bathos The lofty or serious juxtaposed with the ludicrous or commonplace.
* bathroom adultery scene to be specific, but this is the basis of the whole song "It Wasn't Me" by Shaggy:
* Bathroom Break-Out: A character makes his escape by ducking into the John.
* Bathroom Break-Out: Someone takes the opportunity to escape after they are given a bathroom break.
* Bathroom cleaners and the like often do a demonstration where a dirty coin is left half dipped in the product and comes out looking shiny and new looking. This becomes a lot less impressive when one talks to an actual numismatist (coin collector) - or someone with a knowledge of basic chemistry. They'll be able to tell you that plenty of stain producers (such as ketchup, toothpaste, or—as the
* bathroom graffiti. It's common to see comments like "See me after class!" scrawled alongside poorly-composed comments.
* Bathroom Search Excuse: Someone using the excuse of finding a toilet for why they're in an off-limit area.
* Bathroom Search Excuse: Using a bathroom break as an excuse to snoop.
* Bathroom Search Excuse: When caught snooping, a character claims to have been looking for the bathroom.
* Bathroom Stall Graffiti, where the "Zombie Genocider" achievement required 53,594 zombie kills (which is equal to the entire population of the town the game is set in).
* Bathroom Stall of Angst: A character angsts and deals with their grief in the bathroom because it's the only private place available.
* Baths Are Fun: Bathing is considered fun due to bubble baths and bath toys.
* Baths "Lovely Bloodflow" is about a guy singing to his girlfriend about how they deliberately upset each other in order to make themselves feel more alive, hence the "Lovely Bloodflow."

* Bath Tangle...and then is persuaded to go back by the heroine, who argues that a loveless but comfortable marriage to the hero (who isn't nearly as horrible as he seems) is much better than a hasty elopement with the hero's poorer nephew.
* Bath Tangle doesn't have a job, exactly, but she has to deal with her ex-fiancé on business matters when her father's will names him as her guardian.
* Bathtub Gin by The Floating Men. Apparently, Jeff Holmes needs a half a tank of gasoline, some chocolate bars, some nylons, some cigarettes, some magazines, some raw meat, some bed sheets, a window and a little less wind, a hammer, some Vaseline, some Haagen Dasz, a steel trap, a road map, a thumbtack and a way to cut in, a q-beam, a mickey, a SWAT team, some ammo, some Thorazine, a hacksaw, and a golf ball.
* Bathtub MermaidMerfolk and other aquatic creatures kept in stationary tanks and other containers.
* Bathtub Scene in early Volume 2 gives shots of the abs of Ja Wangnan, Hon Akraptor, Kang Horyang, Rapdevil and most importantly, Viole.
* bathtubs outdoors. It's never explained and has no apparent connection to erectile dysfunction.
* Bathtubs USED to be made out of heavy cast iron. If you're dealing with handgun fire or shrapnel/fragmentation and you jump into one of those tubs, you're golden. If you dealing with rifle fire... it can get dicey.
* bathtub to find Birdway and Lessar next to him. Not only does he get bitten by a furious Index, but he finds that the two made a massive hole in his wall to get in.
* Bathyscaphe, Kanaka's ship and guardian, is a serious and matronly type...but she has her softer side.
* Batiatus and Lucretia have a great and loving relationship, but are the
* Batiatus, despite being very cunning and having some of the best gladiators around, is still looked down upon by people of higher standing because he's not a blue blood and his work involves cooperation with unsavory characters. At one point, he goes to great lengths to win over Magistrate Calavius, but when he finally asks Calavius to support his run for political office the Magistrate politely but patronizingly advises him to stick with the job appropriate to his standing.
* Batista aside, it was a really disrespectful send-off for a wrestler who, for the past five years, had been second only to Cena in popularity.
* Batista but was disqualified for refusing to relent while Benoit was tied up in the ropes or Paul Burchil's literal curb stomping of Mr. Kennedy. They do not lose as much credibility this way and at times makes the curbstomper look incompetent for ultimately being unable to do their job (win matches) correctly.
* Batista. Debuted in 1997, made his WWE debut in 2002. Peaked in 2005.
* Batista did a good job of turning that into actual X-Pac Heat. His work rate hadn't measured up to the current roster, the matches he had since the Royal Rumble had shown him tiring quickly and botching simple moves like clotheslines, and of course, telling fans that he was going to main event
* Batista got X-Pac Heat for a while, with his match with The Big Show on ECW being his worst offense, but it was nothing compared to the backlash over him winning the Royal Rumble in 2014 when fan favorite Daniel Bryan wasn't even in the match. It certainly didn't help that he had been back on television for less than a week beforehand after being gone since 2010 and won the Royal Rumble altogether, which in WWE parlance is the biggest push a wrestler can receive.
* Batista, his third in a row. He was reported to have left due to not liking the direction WWE was going in.
* Batista". It pretty much came to an end once he was allowed to hold a microphone for over a minute. He remained a tough competitor, but lost the invincibility and the mystique.
* Batista refers to beautiful women as his real-life "drug of choice". While most wrestlers would develop addictions to painkillers or alcohol while on the road, Batista became frequently seen with a new female wherever he went.
* Batista: Retired in 2010. Made a brief, and failed, comeback in 2014. Started acting shortly afterwards, and retired again at WrestleMania 35 in 2019.

* Batista's famous theme music, I Walk Alone by Saliva, begins with it. YEAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAAH!!!!
* Batista soon — all Michaels could do was fulfill his friend's wishes and be the one to end his career. It's implied that Batista was jealous, because Flair asked Michaels and not him.
* Batista, they improvised a scene in which Kumail's character fails to guess Batista's character's background.
* Batista visit the house of Doomsday Adam, realizing only too late that he and his wife are working with the Doomsday
* Batista was 45 during his 2014 run and 50 for his 2019 retirement match with Triple H.
* Batista was part of a growing trend of fans turning on what they see as "part-time" wrestlers, similar to

* Batman (1966) consisting of a 15 foot deep pool of quicksand. At the beginning of the next episode "A Ridding Controversy", Batman realizes that they won't sink deeply enough into it to drown. The Dynamic Duo escape by using the experimental "heel and toe Bat Rockets" in their boots.
* Batman (1966) crime left his whereabouts uncertain, and he never showed up in court to pursue the case.)
* Batman (1966) crossover. Bruce Wayne and Britt Reid go to a fashion show and Bruce asks a model for her measurements. She answers "555-555-5555". When Bruce quizzically asks if her measurements are really "five hundred fifty five, five hundred fifty five, five thousand five hundred fifty five?", the model corrects him and says that it's her phone number.
* Batman (1966) did episodes in which the (human) villains of the week attempt to run an "invading aliens" con which involves using a flying saucer prop.
* Batman (1966) did this once with the Bat-answer phone. While Bruce Wayne was in the room with the Commissioner, a prerecorded message was able to respond to a call

from the Commissioner, greet him, ask him what the problem was, then tell him they'd be right there.
* Batman (1966) ended every other episode with Batman and Robin in some dangerous situation, with the narrator saying to tune in "Same Bat Time, Same Bat Channel" to see what happens next.
* Batman (1966) episode "Batman Displays His Knowledge", when Batman ponders whether the reported bad luck associated with a particular treasure (phrased as an "amusing old wives' tale") will hold true. Robin's reaction is shock that Batman, of all people, might believe in superstition.
* Batman (1966) episode "Batman Is Riled". The Joker broadcasts from his lair to the TVs of Gotham City, saying that he will kill the captive Batman and Robin unless he is given the ocean liner S.S. Gotham.
* Batman (1966) episode "Fine Feathered Finks". The cliffhanger ending has Bruce Wayne captured in a net, rendered unconscious by Penguin gas and put on a conveyor belt to be run into a 10,000 degree furnace. In the next episode "The Penguin's a Jinx", he wakes up and escapes by rolling off the conveyor belt.
* Batman (1966) episode, "Penguin's Disastrous End," the Dynamic Duo and the police have the Penguin and Zelda trapped in a gold vault waiting for them to surrender for lack of food and/or air. However, the Penguin has a completely unexpected plan to escape: using his gold loot to have it fashioned into a fully functional tank and smash his way out. Although it is a shock at first, Batman and Robin give chase and easily stop it with their Batzooka.
* Batman (1966) episode "That Darn Catwoman," pop singer Lesley Gore (of "It's My Party" fame) played the villainess Pussycat and sang one of her songs to Catwoman's henchmen.
* Batman (1966) episode "The Joker's Last Laugh". Batman realizes there's something strange about a bank teller. He twists the man's nose and the top of his head blows off, revealing springs and other mechanical parts. The teller was actually one of the Joker's android robots.
* Batman (1966) go after planting a "bug" in her purse. Amazingly, in this case, the villain finds it.
* Batman (1966) had the Riddler used a different method: he obtained a supply of a rare wax that becomes powerfully corrosive when exposed to flame to eat through locks and simply poke them clear of the door itself to open it.
* Batman (1966) had this. Batman and Robin were tied up in a room while the Penguin had his mooks removing all the air from the room with a "giant reversing bellows".
* Batman (1966). He had no interest in the series until his agent mentioned a salary of over $100,000. Though Napier expressed pride and fondness for the role later on.
* Batman (1966) in front of everything Batman did or used, and for Adam West's portrayal of Batman as a constantly emoting expositionist who had but one tone of voice no matter the situation. However, many of the people involved with the production debate the label as needlessly denigrating to the hard work they put into the show's elements of farce.
* Batman (1966): In one episode, a jury declares the Joker and Catwoman innocent in spite of their lawyer doing little to nothing to defend them. When the foreman's mustache falls, Batman recognizes him as one of the villains' henchmen and pays enough attention to the other jurors to recognize them as other henchmen.
* Batman (1966). It was never adequately explained how Bruce and Dick changed into Batman and Robin as they slid down that pole, though at least once, we see that there is an "automatic costume change" switch on the wall behind the poles, which can be thrown as one descends to allow Bruce and Dick to enter the batcave uncostumed.
* Batman (1966), John Astin replaced Frank Gorshin as the Riddler. For the third and final season, Gorshin returned to the role.
* Batman (1966): Justified, as Barbara Gordon has pixie-cut brown hair and uses a red wig as Batgirl.
* Batman (1966) live-action series had three goons who wore thematic uniforms and more often than not had their name on their shirt.

* Batman (1966) manga was published in Japan. Some stories were loosely based on DC characters, but the plots, art, and dialogue were largely new.
* Batman (1966), Mr. Freeze forces Batman and Robin to dine with him before attempting to kill them.
* Batman (1966) of one of the Parker boys as the gang is escaping and later confirms that the cloth came from the penitentiary.
* Batman (1966) often had the titular hero and Robin get captured in the first part of episodes, just so in the next week we'd see how they escape at the beginning of the next part.
* Batman (1966) of the week has Batman and Robin tied up and sent up in a hot-air balloon. When the balloon reaches 20,000 feet, the basket they are in will disconnect. The Dynamic Duo escape by 1) plugging the altimeter on the balloon with a piece of used gum a mook dropped, and 2) Robin attracting a bird via bird calls to puncture the balloon so they'd be able to get back down.
* Batman (1966): One of the villains in series one was Ma Parker (played by Shelley Winters), a villainous mob boss based on Ma Barker. Ma Parker along with her three sons and one daughter almost manage to defeat the Dynamic Duo.
* Batman (1966) police commissioners' offices are essentially the same!
* Batman (1966): Robin gets eaten by a giant clam and continues to wiggle around in it in the resolution to the cliffhanger.
* Batman (1966) series episode "King Tut's Coup". While Robin is waiting beside the door to Tut's hideout, two of Tut's henchmen slam the door open and smash Robin against the wall, knocking him silly. They then capture him and take him inside.
* Batman (1966) series, the Batmobile was initially played this trope straight. However, when the series was criticized for the Dynamic Duo not buckling up, the producers thought it could be a good joke to have the goody two-shoes doing so before driving. As it is, the joke backfired in a positive sense with the series being rapturously praised for setting such a good safety example.
* Batman (1966) series. The Gotham police always arrive after Batman and Robin have subdued the Guest Villain and his henchmen to take them into custody. From the episode "Rats Like Cheese":
* Batman (1966) show had one of these every other episode when the Dynamic Dunderheads would be captured and put in a Rube Goldbergesque deathtrap.
* Batman (1966) silent film captions was used in later episodes, and found to look even better.
* Batman (1966)'s two part episodes always begin with the footage of the Dynamic Duo arriving in the Batcave, getting into the Batmobile and driving to Gotham City Police Headquarters.
* Batman (1966) that since Batman is often in close contact with criminals he is probably a criminal himself).
* Batman (1966). The bat symbol (with a spinning psychedelic background sometimes) would flash on screen with a snippet of the theme music. Whenever idiosyncratic wipes are played for laughs, this is the one most often parodied.
* Batman (1966), the comic later turned up the camp because of the TV show's success.
* Batman (1966): The direct line from Commissioner Gordon to the Batcave (and the Batsignal too, obviously).
* Batman (1966). The first time the Dynamic Duo used the Batmobile's drogue parachutes to execute a 180-degree turn, they simply drove off and left them lying in the street. After letters of complaint pointing out that this made Batman a litter-lout, the next time they carried out the manoeuvre they alerted the Batmobile Parachute Pickup Service (a van with that label on the side) to clean up for them. One wonders how long the van's crew spent just sitting waiting for a call.
* Batman (1966), the Joker (chasing a series of clues) has it in him to comment that someone's iambic pentameter is "a little off" and start to correct it before another villain cuts him off.
* Batman (1966), the Penguin, and six of their henchmen can all fit in the Batmobile's trunk.

* Batman (1966), The Riddler can be seen toting around a bag labelled LOOT SACK.
* Batman (1966): The series was cancelled in 1968 by ABC and picked up by NBC a few days later for the fall. Unfortunately someone destroyed all the sets (over 200K in 1968 money) and NBC voided the deal.
* Batman (1966) the trial even begins, and a provable close association with the defendants is an automatic disqualification.
* Batman (1966) to solve crimes themselves as opposed to just telling the police and detectives under them to do it (they're administrators, not investigators).
* Batman (1966) TV series, Alfred Pennyworth goes into action against Penguin (with his fists) and the Joker (fencing) on separate episodes.
* Batman (1966) TV series Batman, Robin and Batgirl are tied in a "Siamese Human Knot" by Nora Clavicle.
* Batman (1966) TV series, in keeping with his Western motif, the villain Shame pulls a train job.
* Batman (1966) TV series, the Riddler spikes the lemonade at a fancy party with "Temper Tonic" which causes the party guests to have an all-out brawl with each other.
* Batman (1966) TV series, used a laugh track in his crimes, his henchmen carrying the device around and turning it on at appropriate moments. He stole it from a "producer of so-called comedies".
* Batman (1966) TV show) have been successfully used to obscure people's identities at everything from masquerade balls and swinger's parties to bank robberies, even though by rights they shouldn't work. They still work today even though digital technology allows anyone with a computer and Photoshop the ability to erase the mask from any images of a person's face.
* Batman (1966). Two heroes vs. the episode's main villain and their henchmen? Seems like fair odds.
* Batman (1966): Used a few times by the villains of the show to surprise the Dynamic Duo.
* Batman (1966) version is also parodied several times, once for Child Safety Services.
* Batman (1966), was 5'11"/180 cm. Wearing heels, she even towered over her own henchmen.
* Batman (1966), when Robin is offered a cigarette when he tries to blend in with some rough types.
* Batman (1966) where they were locked in a box while water dripped onto a drum, which was amplified by 10,000 and the noise pumped into the box they were in. Once they managed to escape:
* Batman (1989) and is already bleeding and at least partially physically weakened; he does manage to dispatch all three of the mooks — indeed, killing all but one of them! — but it isn't easy.
* Batman (1989) and is how Bruce realizes the Joker is the thug who killed his parents. He repeats the phrase to Joker at the beginning of their final confrontation just before decking him.
* Batman (1989) and show that, while they may both be functioning Sociopaths (more so in Batman's case) and/or Psychopaths (more so in Joker's case), they handle their game and life overall differently.
* Batman (1989) because she couldn't handle it. This ends up haunting him for the rest of the Burton-Shumacher quadrilogy.
* Batman (1989) begins with a family walking through the streets of Gotham when they're accosted by muggers in an alley. This seems to be showing the tragic origins of Batman/Bruce Wayne, but instead, we see Batman swooping in and subduing the muggers, saving the family.
* Batman (1989). Bruce tries to tell Vicki he's Batman, but he just can't bring himself to actually say it. When she walks away to answer the door, he disgustedly mouths "I'm Batman" to himself.
* Batman (1989)"; complete with him posing with carboard cutout models, shopping in a fake grocery store, and doing a side-by-side comparison with a "Brand-X".
* Batman (1989), despite the potential risk of revealing Batman's identity.

* Batman (1989) did in '89, it turns into a phenomenon so awesome that no amount of backlash can truly hurt it.
* Batman (1989) does it after Jack/Joker falls into the vat. He combines it with the batline to make it look like he's flying away.
* Batman (1989) during the film, with him going way off the deep end near the climax when he is taunting Batman and Vicki while they are hanging for dear life. Joker even lampshades it in the same climax, where he goes into a fit of laughter, turns to a gargoyle behind him and yells "What're you laughing at?!" and then resumes laughing.
* Batman (1989) from "huge mass-marketing machines that were as much made to sell merchandise as they were to sell tickets" to "huge mass-marketing machines that were as much made to sell merchandise as they were to sell tickets, and are based on an existing property that the audience already has an attachment to".
* Batman (1989) gives us gangster Carl Grissom, who looks like he's in his seventies - and is in a relationship with Alicia Hunt, who cannot be any older than 30 or so. It's never made clear whether Carl and Alicia are... uh, "active", but it's not likely given that Jack Napier calls him "a tired old man."
* Batman (1989) giving the cops under him orders to shoot to kill. During the shootout, Jack ends up falling into some chemicals, becoming the Joker.
* Batman (1989) had an exchange like this between Bruce Wayne and Vicki Vale towards the end, when Vale is shown into the Batcave.
* Batman (1989) has a tourist family failing to get a taxi. This one's especially bad because they were getting ready to board a cab when someone else butted in and boarded, even though they were there first. This would eventually lead the father to try to take a shortcut through an alleyway, leading to them being victimized by two muggers at the end of the scene.
* Batman (1989) has the bullets hit everything around him while leaving him completely unharmed. The incident is never brought up nor reflected upon as Batman breaking his one rule.
* Batman (1989), has the mistress offed as well when he grows bored of her.
* Batman (1989) has the song that played during the casino scene. The lyrics are never heard in the movie, but they're from Bruce Wayne's point of view, where he regretfully admits he loves Vicki Vale, but his sense of duty to protect Gotham as Batman always wins.
* Batman (1989) have been plotting Grissom's murder sometime in the future, or at the very least was waiting for the old man to die. So it seems more of a foregone conclusion
* Batman (1989) have the people of Gotham City find out that the "free cash" that the Joker was giving away at the city's 200th birthday celebration parade he was hosting was all counterfeit bills with the Joker's face on them.
* Batman (1989) in - but then he turns around and says, "BOO!" and laughs, with his skin-colored makeup now partially washed away by the water to reveal his bleached actual skin underneath for effect to boot.
* Batman (1989) is able to murder a man in broad daylight and walk away with minimal henchman intervention. But when the Batmobile guns through the streets, the Gotham City Police Department remembers how to make roadblocks.
* Batman (1989) is introduced sitting with her legs conspicuously propped up on a desk, the rest of her mostly hidden from view by the newspaper she's reading. Alex Knox comments, "Hello, legs."
* Batman (1989) is left standing. Batman makes a taunting gesture towards Bob; Bob decides against it, drops his knife and high-tails it out.
* Batman (1989). It's the first sign that Jack, who was "just" a sociopath, is now completely unhinged.
* Batman (1989) - Jack Napier as the Joker wears makeup over his white skin that doesn't have the depth or shading of real skin and gives him a creepy mannequin look, not to mention the fact that his permanent grin-like disfigurement is still easily visible beneath it.
* Batman (1989), Jack Napier, the man who becomes the Joker, is the man who murdered Bruce Wayne's parents. (Dick Grayson, before he was written out of the

movie, was supposed to also have his parents killed by the Joker.)
* Batman (1989) Lieutenant Eckhardt leads the Gotham police officers into Axis Chemicals, he shows them a picture of Jack Napier, who Carl Grissom wants dead for canoodling with his mistress Alicia, and tells them "Shoot to kill. Know what I mean?" When Commissioner Gordon arrives on the scene, he immediately takes over command of the cops from Eckhardt, telling everyone that he wants Napier taken alive and that any man who opens fire on Napier will answer to him.
* Batman (1989). Many walk away in good shape, thanks to Batman taking the gas balloons away, but at least some disregarded warnings until it was too late.
* Batman (1989): "New and improved Joker products! With a new secret ingredient: Smilex!"
* Batman (1989) News anchor Peter McElroy is well-groomed in his first scene, but in his second, he's unshaven and has several zits due to avoiding shaving cream and skin products because of how Joker has been poisoning household products to kill people.
* Batman (1989) of Bullock, more or less) who is hired by Grissom to kill Jack Napier.
* Batman (1989) of his first line of the movie, spoken to menace a Gotham thug.
* Batman (1989) of the murder, which shows young Jack Napier as the killer in this continuity, comes in a later scene.
* Batman (1989). On top of the cathedral Batman and Vicki Vale peer over the edge to see if the Joker has truly fallen, only to be pulled over themselves by the Joker who had been hanging from the ledge.
* Batman (1989) shoot Batman while he's on the ground, then turn away. He rises up from the ground behind them, then proceeds to beat them up.
* Batman (1989), some news anchors are discussing the Joker's act of chemical terrorism on Gotham with the death of two models, both of whom have the Joker grin on them. A paper is slipped to the male anchor informing them of three more chemical deaths, when suddenly a female anchor starts laughing uncontrollably, and then falls over dead with the victims' characteristic grin on her face, becoming one of the at least 19 victims of the chemical.
* Batman (1989)'s performance enough that they not only spared him, but gave him a Heroic Bystander moment during the climax.
* Batman (1989). The former alludes that she couldn't handle his double life as Batman.
* Batman (1989): The goop that Jack Napier falls into is astroturf-green and has the consistency of a milkshake. It's later casually described as "acid". Later in the same film, the Joker's trick flower squirts acid strong enough to eat through thick metal in seconds (when he sprays it on the bolts holding up the church bell).
* Batman (1989), the Joker stands still and lets the Batwing take a long strafing run at him, but not one bullet touches him. They all go to both sides of him instead.
* Batman (1989)) Then he walks to a corpse with a hideous Joker grin and says, "But with new Joker Brand, I get a grin, again and again!"
* Batman (1989), the title character confronts and fights two robbers on the roof of a building where they're counting their ill-gotten gains.
* Batman (1989), the total of two people who get electrocuted more or less leave behind their skeletons in whatever suits they were wearing at the time.
* Batman (1989), this was the Joker's favorite method of killing people. He did it twice, once in the museum where Bruce was supposed to meet Vicki, and once in the big parade scene with big parade-float balloons full of the Deadly Gas. Batman took the balloons away in the Batwing and sent them well away from the city in order to stop him.
* Batman (1989), Vicki Vale corners a man at a swish party at Wayne Manor and asks whether he's seen elusive billionaire Bruce Wayne. He says he hasn't. Later, as she and Alex Knox are in one of Wayne's rooms, making fun of the statues, the man appears behind them and informs them that the elaborate antique armor they're currently laughing at is Japanese. How does he know? "Because I bought it in Japan. Bruce Wayne."

* Batman (1989) was a flop in Norway. After three weeks in theaters, it was removed, even though the movie got a lot of advertising in the country.
* Batman (1989), when Alfred regales Vicki with the story of his one attempt at teaching a young Bruce Wayne horseback riding and the disaster that resulted, while Bruce facepalms at the memory.
* Batman (1989), when Batman attacks a criminal at the beginning, it's said that "all he could do was piss in his pants."
* Batman (1989). When he brings Alicia in, she says "Jack, you said I could watch you improve the paintings." Then there's Jack/The Joker's fashion sense. The first thing he does on seeing Knox is critique his tie.
* Batman (1989), when pre-Joker Jack is preening himself in the mirror:
* Batman (1989), where the Joker hosts the party — and then releases the Smilex gas.
* Batman (1989) who appears to have a high rank in the gang hierarchy. Inverted with Lieutenant Eckhardt's squad of crooked cops, who are all white; Commissioner Gordon, meanwhile, has at least two Black men working for him, one of whom appears to have the rank of captain, as he reports to Gordon personally.
* Batman (1989) who got fried alive during a crimelord meeting. ("Oh, I got a live one here!")
* Batman (1989) who has taken over the museum and is about to do something to Vicki Vale.
* Batman (1989) with the Joker at the Museum, and then the Joker kidnaps her at the climax of the film.
* Batman (1989) wore flesh-colored makeup to cover up his face, which toxic waste had earlier bleached white.
* Batman #1, Batman ensures a peaceful Halloween by inviting the Penguin, the Scarecrow and the Mad Hatter to the abandoned Arkham Home for Youth. Each has received a note, seemingly from the others, inviting him to meet at Arkham for a some sort of lucrative business. Immediately, they suspect Batman is setting up an ambush, and thus become paranoid. Through the course of the story, the three villains manage to freak out, agitate, gas, and in the end scare the daylights out of one another. The comic ends with the discovery that Bruce Wayne sent the notes, knowing that the three villains would play to each others’ worst fears and stay occupied throughout the night, thus guaranteeing Bruce, and Batman, a restful Halloween.
* Batman #27) uses this trope. A son finds his father stabbed and dying, and reaches down and pulls the knife out of his back in an effort to save his life, ensuring he is found crouched over the body with the murder weapon in his hand. Unusually for this trope, when he explains what happened to the police, they seem to believe him, especially after one of the man's business partners is also killed, apparently while the son had an alibi.
* Batman #291-294, The Riddler disguises himself as Bruce Wayne to crash a party his gang was robbing. This naturally surprises Batman when he arrives to stop the gang. He later claims that he received a phone call from Bruce Wayne in Florida earlier in the evening and thus knew that the Riddler wasn't the real Wayne.
* Batman #34, 1939) features a man whose face has been erased by the villain. Weirdly he could still speak and there is no indication in the story that the condition is reversible. Hilariously, he hardly even seems to care. He scares Bruce Wayne in the first few panels, but both men shrug it off like he just stepped on his foot or something.
* Batman #356, Batman claims Hugo Strange is as good as blind without his glasses. He uses this to his advantage whilst fighting him: Strange takes his glasses off in order to dress up as Batman and then blows up the fake Wayne Manor they're fighting in, however he can't see Batman and Robin sneak away
* Batman #372) turned into a full-on boxing detail concerning a minor prizefighter getting a shot at the title and hardly had the Dark Knight in the issue at all.
* Batman #3, a fraternity hazing gone wrong results in a pledge being accidentally injected with a random mixture of chemicals. Miraculously, this somehow does not kill him, but he vanishes afterwards, becoming a recluse and returning years later

to extract vengeance on those he blames (rightly) for his disfigurement.
* Batman #400 is the last story of the pre-Crisis Batman, and ends with: "And so the night of resurrection nears its end, but when next he strides forth from this dark womb of bats... it all begins anew. 'Hello again. Beware... forever.'"
* Batman #401, Robin tries to grab the villainess Magpie. In doing so he accidentally rips down the top of her costume. With a blush, he hurriedly averts his eyes.
* Batman #424 we have Felipe Garzonas the son of a wealthy diplomat, he's an obnoxious jerk who is very abusive to his girlfriend and is also involved in a drug-smuggling ring, he is arrested twice for his crimes but quickly released and it is later arranged that he won't serve any jail time because of his father's diplomatic immunity, after his second release he harasses his girlfriend to the point where she commits suicide and Batman can't do anything about it, Jason Todd the second Robin is furious so he takes manners into his own hands, when Batman arrives on the scene Felipe has fallen to his death from his apartment, he asks if he pushed him but Jason claimed he slipped.
* Batman #64, June 1942), the Joker turns himself in and confesses to his crimes. He is sent to the electric chair and executed. The Joker’s gang retrieves his body and revives him. Then Joker returns, but Batman can’t arrest him because he has legally paid for his crimes. Joker then pretends to be an honest citizen while his mob carries on. The clown then tricks Batman into breaking the law, and nearly gets him arrested. However, Batman shows the police proof of the Joker’s new crimes. Joker is forced to flee and return to hiding.
* Batman '66 #19, a mob of torch and pitchfork-wielding Gothamites attempt to hunt down Batman and Robin while under the effect of Professor Ffog's mind-affecting fog.
* Batman '66 #25, the Harlequin (the setting's version of Harley Quinn) is shown doing this as part of a montage depicting her one-woman crimewave.
* Batman '66 #41, a robot Batman is created, gaining the nicknames "Cathode Crusader" and "Spark Knight".
* Batman '66: Harlequin asks if Batman knows how much balloons like hers cost when he tries to puncture hers. She also asks, if he knows, to tell her because she stole that one.
* Batman '66: Heroic example. Alfred beats up his evil cousin because he feels like, since they're family, he'd not be able to face himself if he let others decide his cousin's punishment.
* Batman '66 In one story, False Face creates a TV series about Batman and Robin and plans to use it to kill the real heroes on live TV. He says it's thanks to "viewers like you" when he announces their upcoming demise.
* Batman '66: In "The Conqueror Bookworm", Bruce Wayne donates $ 4,999.99 to a charity.
* Batman '66: Issue #24 starts with Batman and Robin buried in the sand and surrounded by scorpions. The scene changes to two days before.
* Batman '66: Issue #52 features a case with a headline about the Joker becoming a crimefighter.
* Batman '66: Professor Overbeck while explaining why he doesn't think his brain regulator "could have been used to make a whole group of people... hysterical".
* Batman '66's escapades, Bruce exclaims, "Blast!" Alfred reacts with a shocked admonishment for using such foul language, and Bruce apologizes with "I'm sorry you had to see my dark side this way, my friends", as though he'd done something grave like using excessive force against a perp or something.
* Batman '66 underestimates Batman's detective skills because he's from a "primitive" era and doesn't expect Robin to be useful to them because he doesn't have superpowers.
* Batman, able to survive and heal immediately when he was shot with bullets, his soul in exchange for his need to protect Gotham.
* Batman about how frail and pathetic man is, in an attempt to drive Gordon insane.
* Batman about me killing anyone," or pointing out that he may not kill you, but he can make you hurt for a very long time.

* Batman, action-packed martial arts fights are interspersed with quiet talks between, for example, Bruce and Selina, or Selina and her alternate reality daughter Helena.
* Batman actually talked about this and claims that for all the talk about how much of a fantasy Superman is, Batman is even more so:
* Batman adds a scene where Batman agrees that there's no factual plan to take him down if he goes rogue... because he believes that the Justice League is all the "plan" he needs. There's little sense to Batman creating a plan to take himself out because he'd know the plan. It would be incumbent on the others to make a plan to take him out.
* Batman Adventures, both sets of Rogues hold their heists in the same building, allowing Batman to catch both. When Riddler asks how Batman solved his riddle, Batman just tells him, "I didn't" and Riddler is so happy to think he stumped Batman that he goes to jail singing a jaunty tune.
* Batman afford to pay the grounds crew responsible for maintaining the Fortress of Solitude while he's living in Metropolis? It's possible to explain this away — Superman, for example, had a horde of robots he had built using his superpowers to maintain the Fortress — but most don't bother.
* Batman after a bat crashed through his window, which he interpreted as an omen. He strikes from the shadows, wears a costume that makes him look like a giant bat, and has a variety of occasionally-used gadgets that can simulate things like sonar. The similarities pretty much end there, since bats don't punch things very often.
* Batman. After taking over his family's cosmetics company, Black Mask runs it into the ground and, in desperation, begins pooling his resources into a new product; the end result of is the creation of a waterproof makeup. He rushes it onto the market without testing, leaving hundreds of women permenantly disfigured after it turns out to be toxic.
* Batman, after the Joker suddenly walks into the commissioner's office:
* Batman, after Vicki Vale asks Batman that people will die because the entire shipments have poisoned, and Batman replies to her with a Little No, because the chemicals have to be mixed.
* Batman a green-haired laughing madman), they "managed to get out a string of frightened obscenities" before running away.
* Batman, Alfred and several members of the Batfamily are desperate enough to grab firearms when an army of Kobra troops invade Wayne Manor.
* Batman). Alfred, the Wayne family butler, also has a bit of this going on, though he tends to be a lot more empathetic than Bruce.
* Batman also became something of a linguistic expert, and is fluent in several languages including English, Spanish, French, Russian, German, Japanese, and Chinese, and can read and understand (to varying degrees of proficiency) others.
* Batman also crossed into the real world, with the villains holding the writer at gunpoint and trying to make him write the deaths of the heroes. Batman and Rock couldn't hear the narration he wrote, but he could indirectly help them if the villains were distracted.
* Batman also enjoys Diet Coke to the point where Catwoman gets the last can from a vending machine just to troll him.
* Batman also uses the cape to make himself appear more intimidating, which given his
* Batman, although Catwoman is downplayed as she's a anti-heroine while Batman plays it straight.
* Batman: Although False Face is supposed to be an expert at this, pretty much anyone in this series can pull it off.
* Batman, although potential love interests have occasionally discovered the secret anyway; and depending on the actual universe, bad relationships in the past (he maintains that one of his few actual lovers, Talia al Ghul, drugged and raped him).
* Batman & Captain America discover that their signature poisons are so alike that each is immune to the effects of the other.
* Batman & Mr. Freeze: Sub-Zero, Dick grabs a bystander's motorcycle to make chase. Unlike most examples, he gives the guy something else in exchange: his

Corvette.
* Batman & Mr. Freeze: Sub-Zero has blond hair. This may have been done to distinguish her from Barbara Gordon in the same scene.
* Batman & Mr. Freeze: Sub-Zero occasionally uses CGI for the Batplane (and cars on the freeway during a chase scene).
* Batman & Mr. Freeze: Sub-Zero shows some signs of crushing on college-aged Barbara Gordon when she's been kidnapped by Kunac's guardian Mr. Freeze. Barbara clearly picks up on this, and makes a point of throwing in a compliment on his maturity when trying to get him on her side.
* Batman & Mr. Freeze: Sub-Zero, since they both featured Mr. Freeze and the studio was afraid the connection would hurt sales of the animated film.
* Batman & Mr. Freeze: Sub-Zero, though in this case it wouldn't have been their first kiss.
* Batman & Mr. Freeze: Sub-Zero uses this in the same manner as the below example from "Pretty Poison", only with Commissioner Gordon describing his daughter Barbara.
* Batman & Mr. Freeze: Sub-Zero, which includes Barbara Gordon. She (correctly) points out that he could use any negative blood type to save her until it's revealed he's actually kidnapping them for this trope, and being as obsessive as he is is going after the same blood type to reduce the risks of rejection.
* Batman & Robin. After the battle, he's seen in Wayne Manor with his feet in a bucket of warm water to help him recover.
* Batman & Robin, Alfred uploads his "brain algorithms" into the batcomputer to give the new sidekick a briefing.
* Batman & Robin. (although its high budget made it not very profitable)
* Batman & Robin and offers to let him continue his research from Arkham Asylum rather than do it illegally, in exchange for the cure for the early-stage variant of the disease that Alfred has.
* Batman & Robin as she is now Alfred's niece instead of Jim Gordon's daughter.
* Batman & Robin: Batgirl crashes through the ceiling window of Ivy's hideout to stop her escape.
* Batman & Robin, by unplugging her cryotube, but Batman managed to save her life.
* Batman & Robin Commissioner Gordon before deciding to spare him, saying that he's way too old for her.
* Batman & Robin doesn't see Jason Woodrue don the look of his alter ego, the Floronic Man.
* Batman & Robin driving the Nostalgia Critic to homicidal rage over a Bat Credit Card, "the Riddler suit here is kinda clever."
* Batman & Robin for his wife's condition. Poison Ivy wants to reclaim the world for the plants of the world, but that quickly falls by the wayside in favor of getting Freeze for herself, which she tries to do by means of trying to kill Nora and blaming her deactivation on Batman, resulting in Freeze deciding to try to ice the whole city in revenge.
* Batman & Robin for Mr. Freeze, another villain). After she finally kisses him she drops the act and taunts him, but after realizing Robin tricked her she angrily shoves "her love" off the romantic rose throne they were sharing and into the pond to drown him.
* Batman & Robin fought Mr. Freeze in a very public battle with a whole lot of collateral damage.
* Batman & Robin is an ice cream factory lit up with a bright neon sign and moving spotlights lighting the place up like it's a Hollywood premiere. Really, if Batman and the police can't figure out that's where he's hiding they really don't deserve to defeat him.
* Batman & Robin is removed from all his methods of suicide, but they forget his Cyanide Pill. It doesn't take long for him to try to consume it... and gets thwarted by the security guard.
* Batman & Robin lenses) and wearing a 75-pound armor which he described as "suffocating". He also endured battery acid in his mouth as the LED that made a

blue light come out as Mr. Freeze spoke would disintegrate after at least 20 minutes.
* Batman & Robin love dust to get anyone who smells it to fall in love with her. She conceals it in a small leaf hidden in her palm and blows it into the face of her victims.
* Batman & Robin. Mr. Freeze's wife suffers from a fatal disease called MacGregor's Syndrome. He keeps her in suspended animation in a liquid-filled tube while he works on a cure.
* Batman & Robin Mr. Freeze wears a powered armor that allows him to toss people around. The suit was, of course, powered by diamonds.
* Batman & Robin, namely the final act, where Batman, Robin, and Batgirl raided the observatory.
* Batman & Robin precisely because the execs wanted a Hollywood star in a cast full of unknowns and character actors (only declining due to her pregnancy).
* Batman & Robin revealed that the main reason he did it was that the salary had effectively given him lifelong financial stability, thus allowing him to pretty much do whatever films he wanted for the rest of his career. Even now he says he doesn't regret taking the role because it made him a movie star but he also keeps a picture of himself in the infamous Batsuit in his office to remind himself to never take something solely for the money ever again.
* Batman & Robin: Robin heads to Poison Ivy's lair, pretending to be under her spell. Ivy has poisonous lips and has been trying to kiss Batman and Robin the whole film. Ivy kisses Robin, at which point he pulls off rubber coating on his lips, demonstrating how he survived the kiss. Ivy then pushes him into a sea of vines that try and drown him instead of having the vines hold him in place so she could kiss him again.
* Batman & Robin's kiss and reveals to her he was wearing rubber lips. Robin is still sitting right next to Ivy as he says this with their faces still only a few inches apart, but instead of grabbing Robin and giving him another more forceful and less romantic kiss to kill him for sure she just glares at him for tricking her and shoves him off her throne and into the pond to drown him instead. Then instead of staying to make sure Robin drowns so her plans remain a secret she attempts to leave, just saying a mocking "see ya!" to Robin. It's like she was treating the whole thing like she was breaking up with Robin instead of trying to kill him.
* Batman & Robin still isn't as smart as his comics counterpart, who's a strategist on par with Batman and even figured out Bruce was Batman.
* Batman & Robin that the suits also featured, but these got barely any reaction.
* Batman & Robin, that was praised as a return to form for the series.
* Batman & Robin: "The Iceman Cometh!", "Ladies and gentlemen of the un-United Nations. And our mystery bidder." and "Hello, Jason. I think I've had a change of heart. "
* Batman & Robin), the villains are beaten, and even the end shot is the same: the heroes running towards camera with the Batsignal behind them.
* Batman & Robin to help sell more toys. At worst, Schumacher just turned what would have been a very poor film regardless into an even bigger mess.
* Batman & Robin to make the film "more toyetic" (a word the director had never heard before then). The films oft-derided visual design choices were partly a result of the art design being rushed so that they could start producing the toys.
* Batman & Robin was interested in bringing her back in the planned sequel.
* Batman & Robin, when Mr. Freeze sends his minions to attack while claiming the Wayne Diamonds, Batman actually pulls off a Force Kick on one of the hapless hockey hooligans (about 44 minutes 13 seconds in.) Bruce's foot is almost as close to his own face as it is to the bad guy.
* Batman & Robin where Batman and Robin ride the doors of a rocket ship after Mr. Freeze.
* Batman & Robin, which really raises questions considering her self-proclaimed role as the defender of all plant life.
* Batman & Robin. While Poison Ivy is seducing Robin she claims she can see him

having his own "Robin Signal" in the sky. Later, she steals the Bat Signal and replaces it with Robin's symbol, and Robin, remembering the conversation, instantly realizes it is Ivy calling him, believing the signal to be a sign of her love to him.
* Batman & Spider-Man: New Age Dawning: Ra's Al Ghulthe Kingpin's wife with a man-made virus that imitates cancer, all so he would could essentially Blackmail Kingpin into working for him and destroy New York City.
* Batman & the Ghost Dragons have going in Gotham's Chinatown. The Gotham borough known as the Hill is completely overrun with this type of gang rather than the more organized mafia and related groups that run the eastern section of town.
* Batman: an acrobat who parents are killed by a criminal (in this case, Killer Croc).
* Batman: Anarchy for All, (in no small way because he's jealous of Selina reconnecting with an old friend who's obviously carrying a torch,) when he buys a building to preserve a mural on the property that Selina's old street kid gang painted. It backfires when Selina is insulted and thinks he's trying to buy his way back into her good graces.
* Batman and Batman has to save him from the criminals he was working for. In fact, Batman has fought crooks dressed as Santa several times.
* Batman and Dracula's fight. Batman finds himself unable to match Dracula's strength even with his own vampiric powers, but is able to do some damage with his silver Batarangs.
* Batman. And finally, by his wife Gilda as part of a dramatic plot twist on the very last page.
* Batman, and finally on-page kissing and them being an acknowledged couple.
* Batman and Harley Quinn. A customer grabs her ass, and she decks him. This cues in Nightwing that she's the real Harley rather than a lookalike.
* Batman and Harley Quinn. A customer tries to grope Harley and she breaks his arm. When he complains about it, a cook points at a sign that reads, "Look All You Want, But Don't Touch The Girls".
* Batman and Harley Quinn and seeing Harley in her underwear. She most definitely notices it (his legs are spread and he's wearing superhero tights) and decides to take advantage of him.
* Batman and Harley Quinn as one of the film's main villains and is pretty good in a fight. Harley Quinn was one before she retired.
* Batman and Harley Quinn: Harley is annoyed at the fact people (such as Batman) call sociopaths as "psychopaths".
* Batman and Harley Quinn has introduced a number of people to the song "Don't Pull Your Love" by Hamilton, Joe Frank & Reynolds.
* Batman and Harley Quinn: In a restaurant where waitresses dress like superheroines, some pervert costumer gets the brilliant idea of grabbing Harley's ass and she flips him over as result.
* Batman and Harley Quinn indulge in some light-hearted mockery of Batman.
* Batman and Harley Quinn—basically Hooters, but with the servers dressed in skimpy superheroine/villainess costumes. Despite Harley's psychiatric background, no one would allow her back in the field and no one else was interested in employing a former supervillain. Aside from offers to do porn, Superbabes was her only option.
* Batman and Harley Quinn while tied up and in the presence of an underwear clad Harley. Amused, Harley says she's surprised because she had always assumed he and Batman were a couple. Shocked, Nightwing says that is definitely not true, and he and Harley have sex.
* Batman, and has had terrible romantic relationships due to the second identity, which eventually became his first.
* Batman, and has more experience as a hero than anyone but possibly Robin.
* Batman and is unable to comprehend the feeling, resulting in this funny exchange:
* Batman and of course sets about instigating an all out war with them.
* Batman and other members who get faces and characterization it is mostly made up of ninjas wearing matching black outfits and masks that hide everything but their

eyes.
* Batman (and possibly other members of the superhero community), thus knowing the countermeasures for when a hero should go rogue.
* Batman and reflection of what he could've become had just one thing gone wrong with his upbringing.
* Batman and removes her heart, keeping her alive by elaborate machinery, and uses her hostage heart in order to blackmail Batman.
* Batman and Robin Adventures, the Mad Hatter fakes his death as part of a plan to abduct his love interest.
* Batman And Robin has The Joker facing off against the equally villainous Dr. Simon Hurt. He places a gun just out of his reach and they have a contest to see who can get to the gun first, but Hurt fails to notice the banana peel Joker had left on the stone steps; he ends up slipping on it and cracking open his skull, allowing The Joker to bury him alive.
* Batman And Robin there's a page with Batgirl blindfolded and holding a set of scales, with Batman on one and Robin on the other.
* Batman and Robin, when the publishers had Dick Grayson's Aunt Harriet move in with him and Bruce Wayne and introduced stories where Bruce dated women.
* Batman and Robin with Bat-Mite: "Youthful ward? Is that what they're calling it these days?"
* Batman and sections of the city were rendered uninhabitable, it was still a rather busy city.
* Batman and Superman were created right in the middle of this period, hence their underwear of power.
* Batman and symbolism (or who own a copy of the fifteenth anniversary edition with Morrison's annotated script) will get much more out of it.
* Batman and that there are dozens of unstable individuals with the power of the gods at their fingertip and held back only by a modicum of restraint.
* Batman. And the death of Bruce Wayne's parents isn't done being reenacted in many cases.
* Batman and the Outsiders. After she was rescued, best man Geo-Force admitted he had lost the rings during the battle. Metamorpho used his powers to form two gold rings out of his body so the wedding could go ahead.
* Batman and the Outsiders, as well as expressing disappointment that he wasn't at least involved in the writing process.
* Batman and the Outsiders, investigating a rich man's murder, declares the butler the killer by directly quoting this trope, calling it "the greatest cliché of all".
* Batman and the Outsiders, much less maligned than said Bludhaven bout.
* Batman and the Outsiders, one storyline had Halo having a recurring nightmare where her face was pulled off like a mask, revealing her to be faceless underneath.
* Batman and the Outsiders, Tara Markov's brother Brian (aka Geo-Force). He is able to manipulate the Earth itself by vibrating and transforming it's crust (the ground). He can use this power to create earthquakes, tap into lava flows, and levitate or create shapes out of solid rock.
* Batman and the Outsiders, the title superteam is frozen by a villain inside a mass of ice. After one of the team members uses her powers to thaw them out, they're all fine.
* Batman and the Outsiders to hunt down a massive organized paedophile/child prostitution/slavery operation. The arc began with one of the female team members admitting to have been a captive of this gang during her teenage years.
* Batman and the police will keep foiling his attempts to help her, because then he has no motivation anymore.
* Batman) and the SVRmiger (named after the Russian Federation's intelligence service, combined with a slightly forced play on "armiger" - arms-bearer in Latin).
* Batman...and while she survives, in subsequent scenes, she is shown to be physically weakened from loss of blood.
* Batman and wished he would've done it had he introduced the Joker at the same time as Batman.

* Batman. And with Talia, the daughter of Ra's Al Ghul. It's pretty obvious it's not going to work out, despite the fact that they have been explicitly stated to be the only two women he has ever loved.
* Batman Annual #20, New Gotham is surrounded by a dome. The City Controllers tell the populace that it is for their own protection as the air outside New Gotham is poisonous. However, this is not true. The dome was constructed for the sole purpose of keeping the people inside the city.
* Batman Annual #20, Old Posea tells three children of the Bat-Man's heroic deeds in Gotham on Old Earth in order to teach them life lessons.
* Batman, an unnamed young man training under Batman, likely one of the Robins, thinks about how many rules Batman has, but he can't remember if rule number one is no guns, or no killing. And when his motorcycle is stolen, Batman tells him about another rule number one: Never leave the keys in the ignition. He concludes that there are a lot of rule number ones in the vigilante business.
* Batman, a private eye, or just a resentful guy trying to lash out at his former employers.
* Batman arc by painting over the territory markers of Gang A with the markers of Gang B and vice versa.
* Batman arc, for instance, may only take place over the course of a single night or a couple of days at most, which allows the character to (at least somewhat) realistically appear in four or five books at the same time.
* Batman archfoe Ra's Al Ghul and others can rejuvenate the dying. Ra's Al Ghul is hundreds of years old thanks to the Pits.
* Batman... are better known through their movie and TV series adaptations than the comics they originally appeared in. Most of the general audience - especially outside North America - knows up to nothing about these characters but: "yeah, they are superheroes who fight crime, I guess." Compare them to series like Superman, Batman, and Spider-Man, where a majority can at least tell you something about the characters or the backstory.
* Batman are kidnapped and forced to fight one another in a series of cage matches.
* Batman: Arkham Asylum. After you take down a mook such that the others all run over to see it, they will inevitably go back to patrolling with "Now split up and find that Bat!"
* Batman: Arkham Asylum Also, no matter what order you collect the audio logs in, they are always the next in the set, as are the Spirit of Arkham messages.
* Batman: Arkham Asylum and its sequel Arkham City, you have to use a special takedown move to make sure a mook does not get back up (and most of the time, they will).
* Batman: Arkham Asylum, and the fact that he's a Nine-Foot-Tall lizard man. When you face him, he's more a stage hazard than an enemy, where all you have to do is slowly walk across platforms, occasionally tossing a batarang if he decides to show his face.
* Batman: Arkham Asylum are this, thanks to copious amounts of fear toxins.
* Batman: Arkham Asylum. As you solve the Riddler's puzzles, he occasionally throws out different comments. When you've got most of them he demands to know if you're cheating by looking up their locations on the internet.
* Batman: Arkham Asylum attempts to invoke this trope while Batman is under the effects of Scarecrow's fear gas.
* Batman: Arkham Asylum, Bane and the Titan Henchmen have glowing green Venom/Titan pulsating throughout their bodies.
* Batman: Arkham Asylum, Batman doesn't actually suffer any terribly noticeable injury to himself if he runs into an electric field, unlike mooks who get knocked right out. Batman's armor takes the brunt of shock. Same thing happens with getting too close to explosive gel blasts.
* Batman: Arkham Asylum, Batman imprisons Harley Quinn in such a cell.
* Batman: Arkham Asylum, Batman must move slowly and quietly as Killer Croc is lurking under the surface. He'll still pop up time to time, but making too much noise will let him pinpoint your position, allowing a point-blank attack.
* Batman: Arkham Asylum, Batman tracks him down by the trail of tobacco clumps

Gordon was leaving behind. Throughout the games, Batman also tracks down certain places and people by following various DNA evidence, although in those cases they weren't intentionally leaving a trail.
* Batman: Arkham Asylum, Batman using a self-defence technique which injures the pelvis to make it painful to stand and impossible to walk.
* Batman: Arkham Asylum but the story takes the series in an interesting direction.
* Batman: Arkham Asylum crafting Bats’s cape making sure it was fluid as possible and tuning the wind effects to it so it would be extra badass.
* Batman: Arkham Asylum. Doesn't stop him from running off to stop Two-Face in the epilogue.
* Batman: Arkham Asylum each time the camera wanders away from him and tries to trick you into releasing him. Good thing the game doesn't offer you the opportunity to free him or quite a few people would.
* Batman: Arkham Asylum either from above or the side for extra awesome.
* Batman: Arkham Asylum, every move that Batman does in cutscenes is available to him in actual gameplay — except the explosive gel-powered punch (admittedly, it's implied that this breaks some bones in Batman's hand, so it only works once).
* Batman: Arkham Asylum has Amadeus Arkham, aka the Spirit of Arkham. Batman must collect journal entries of the founder of the Asylum throughout Arkham Island in a side mission, where we learn the secret history of Gotham's greatest prison and its chief doctor's eventual incarceration within his own institution.
* Batman: Arkham Asylum has Detective Mode, which has functions including X-ray, forensic tracker, vital sign monitoring, weapon detection, and point-of-interest detection. This is treated as a combination of a scanner in Batman's cowl, and "seeing the world through Batman's eyes". The Joker, in the PS3-exclusive content, has X-ray specs which have that function and nothing else.
* Batman: Arkham Asylum has Joker take over the Arkham island, trapping Batman inside and forcing him to confront some of his major arch-enemies and a lot of henchmen. By the mid-point of the game, Batman displays that he could have left Arkham any time he felt like it, but refuses to do so until he gets the island back under control.
* Batman: Arkham Asylum, he says it to Batman as he's driving him back to Arkham Asylum. Batman answers by punching him in the face without taking his eyes off the wheel.
* Batman: Arkham Asylum his actions by pointing out that if the residents of Gotham weren't so stupid they wouldn't die in his traps.
* Batman: Arkham Asylum hits whenever The Scarecrow's fear toxin causes Batman to have some rather disturbing hallucinations. For many players, these sudden horror sections were the high point of the game. The gameplay was unchanged, but the tone was completely different.
* Batman: Arkham Asylum. If you lose in combat during these levels, Batman goes insane. (And when you defeat the giant Scarecrow in the final one, Batman breaks through the illusion and beats Scarecrow senseless).
* Batman: Arkham Asylum, in order to obtain the spores needed to make an antidote for Joker's Titan formula, Batman has to traverse the sewers underneath Arkham Island, while being pursued by Killer Croc.
* Batman: Arkham Asylum is already building challenges, starting from things like no detective vision (meaning you have to be much much more observant), to no upgrades during the main game.
* Batman: Arkham Asylum, Joker escapes from custody by strangling a guard with his handcuffs:
* Batman: Arkham Asylum, Joker gets multiple opportunities to cleanly kill a helpless Batman throughout the game, but declines to do so until Batman truly becomes a thorn in his side later in the game. At one point, Joker even goes so far as to demonstrate that he could kill Batman easily by blowing the brakes on the elevator in which he trapped him. He decides it wouldn't be fun.
* Batman: Arkham Asylum Joker pulls one as one of his looping taunts after beating challenge mode.
* Batman: Arkham Asylum off to Arkham after thwarting a hostage situation that

involved the Mayor that was instigated by the latter, noting that it was suspiciously easy this time around. Turns out, he's right and it was all part of the Joker's plan to take over the madhouse. Turns out that when you take an insane person to the asylum, you're just taking him home.
* Batman: Arkham Asylum on Batman's gliding ability, making it impossible to reach some key areas and frustrating the owners to no end. This caught at least one player who had posted a thread on the developers' official message board asking how to get past this exact problem, outing themselves as using a pirated copy; the developers simply replied that "it's not a bug in the game's code, it's a bug in your moral code."
* Batman: Arkham Asylum reveals that at least one of the Joker's mooks is nervous about dumping a suspicious contaminant into the Gotham City water supply because his beloved mother, who lives down by the docks, might get affected by it. The other men laugh at him and imply his mother is an ugly whore.
* Batman: Arkham Asylum sees the Joker and his men kill several guards.
* Batman: Arkham Asylum series has shoulders the size of his own (and everyone else's) head.
* Batman: Arkham Asylum" She then turns the whole of Gotham Chemicals into a veritable man-eating jungle.
* Batman: Arkham Asylum the Joker will frequently quote the Stooges short "Men in Black".
* Batman: Arkham Asylum. The "party" is a number of gun-toting henchmen who are initially confident that they can kill the Batman (which they can if they find him). The room is full of vantage points, ventilation shafts, blind corners, and fragile walls that Batman can use to pick them off one by one, reducing the henchmen to an increasingly-smaller number of increasingly-terrified whimpering children.
* Batman: Arkham Asylum: There are a set of stairs near Clayface's cell that lead to a cell where a creepy prisoner is held; he is actually the winner of a GameSpot contest, and is mentioned on Joker's party list as Luke Oliver.
* Batman: Arkham Asylum, there's an overwhelming amount of things to do aside from the main quest.
* Batman: Arkham Asylum, the Riddler constantly mocks and insults Batman's intelligence as he solves his hidden riddles. However, once Batman completes over half of them, Riddler starts to get angry and accuses him of cheating and looking up the answers online.
* Batman: Arkham Asylum (the voice of Batman) mentions that this is how most of the WB's animated shows are produced. By comparison, trying to give a comparable performance alone in a recording booth is much harder.
* Batman: Arkham Asylum. They gave it a semi-catchy tune that we all know!!
* Batman: Arkham Asylum. They must be turned off before Bats can go further.
* Batman: Arkham Asylum to use the Explosive Gel as a booby trap with the right upgrades, it's especially effective when planted at the top of a ladder which results in a flying mook and an instant KO.
* Batman: Arkham Asylum trapped in his arms; if you are seen, miss your Batarang, or if you wait too long, Zsasz kills her, with the Joker mocking you.
* Batman: Arkham Asylum, we see Batman using the Batmobile early on, a sleek little number reminiscent of the '89 Batmobile. Sadly, the thing is set into the ocean saving Batman from Bane.
* Batman: Arkham Asylum: when you first visit the morgue, one of the bodies stored there is that of Ra's Al Ghul (which you can find out by investigating). Knowing who Ra's is, when you come back later, he's long gone from the morgue.
* Batman: Arkham Asylum, where Batman, being against killing, gets rid of the thugs by combat, which consists of many kinds of strikes, some to the head, and takedowns, which include bone breaking and hitting heads against the floor, letting the enemies lie "unconscious" but totally still on the floor, just breathing and with a blood pressure half the normal. Also, if Batman had decent medical skills, he would surely be aware of the fatal effects of hits to the head.
* Batman: Arkham Asylum where Batman has to battle through the nightmares in his

psyche created and ruled by Scarecrow.
* Batman: Arkham Asylum who carries a knife whenever he shows up and uses it to cut a tally mark on his body for each of his victims.
* Batman: Arkham Asylum will end with Batman performing a random finishing move on the last mook in the battle, in slow motion.
* Batman: Arkham Asylum with Dr. Young. She's horrified at his reply, though the reasoning he offers showcases his sociopathy front and centre.
* Batman: Arkham Asylum, you cannot get into Joker's Party if you are not on the list as a Thug explains to Batman. He looks down his list through all the B's and seeing Batman is on it, lets him through. Ironically if you look at the list yourself, you will see it just has BATMAN!!! written on it.
* Batman: Arkham Asylum, you can overhear one of Joker's goons telling his buddies that Joker once ordered him to kill his sister to prove his loyalty. He did so with zero hesitation, claiming he never liked her anyway. Another mook one-ups him, saying that Joker made the same request of him even though he had no sister, but Joker kept asking him anyway. So he got in his car and ran over the first woman he saw.
* Batman: Arkham City, after using a gadget to create a platform in the water, Batman will automatically aim straight for it if you glide at it.
* Batman: Arkham City also arranges for his mooks to arrive after claiming that Batman won.
* Batman: Arkham City and at one point is fighting Mr. Freeze and sees his face turn into that of the Joker.
* Batman: Arkham City, a renovated factory once owned by Black Mask, turned into the Joker's base, complete with a deadly rollercoaster which new recruits to his gang must ride and survive.
* Batman: Arkham City are slightly misogynistic to the same degree they're also trying to slightly hurt Batman's feelings. There are a lot of taunts thrown at Harley and Catwoman.
* Batman: Arkham City as a combat upgrade, though it just stuns mooks.
* Batman: Arkham City: As discussed in the comics section, this is Catwoman's weapon of choice.
* Batman: Arkham City as the "Armored Edition". It consisted of the original game, along with the "Game of the Year Edition" DLC. In-game, both Batman and Catwoman sport new armored designs, to justify the game's "Battle Armored Tech" mode (which provides a temporary boost in strength). There are also optional touchscreen and motion controls for Batman's gadgets, a sonar to highlight nearby villains and Riddler trophies, and the Cryptographic Sequencer has a new touchscreen-based hacking minigame.
* Batman: Arkham City, Batman can visit the spot in Crime Alley where his parents were gunned down, and pay his respects (it's even a Steam achievement). Hugo Strange has even left a taunting message there for him.
* Batman: Arkham City, Batman has to go through one in order to find Wonder City.
* Batman: Arkham City. Bonus points since the missions actually involve racing as well - Batman has to race across the city to another public payphone each time in order to prevent Zsasz from killing a random person. Zsasz is actually careful enough to never stay on the phone long enough each time to be traced, either, but Batman can build up enough detail from his repeated calls to eventually find his lair.
* Batman: Arkham City, Bruce beats criminals in light clothing to a pulp in the dead of winter, often inflicting crippling injuries and leaving them exposed to the weather and rival gangs. But he's not killing anyone, honest!
* Batman: Arkham City: Bruce Wayne at the beginning. Played quite realistically, as the suit coat gets torn along the shoulder seams, demonstrating how restrictive and, well, unsuited to combat a suit can be.
* Batman: Arkham City, Deadshot is smuggled into the city by pretending to be an ordinary Blackgate prisoner. He was part of Hugo Strange's plan to exterminate the city.
* Batman: Arkham City, drawing random-looking patterns in the ground wherever

Batman encounters him until they all line up and make a map to where you can find him.
* Batman: Arkham City earlier), Batman attacks him, forcing Mr Freeze to go all-out in self-defense. They immediately go back to being allies after the fight and never mention it again, and thanks to their fight, Harley Quinn steals the cure.
* Batman: Arkham City features these with Zsasz when he plays his payphone killer game. Every payphone in Arkham City has a (455) area code and 555 prefix, and neither has a real world counterpart.
* Batman: Arkham City, give an anonymous tip to Vicki Vale to lure inside Arkham City then have his thugs shoot down the news copter after she arrives. Batman saves her of course but the rest of the news crew aren't as lucky. She still manages to continue the broadcast even after getting shot down though.
* Batman: Arkham City had a clear line of sight and we're explicitly told later in the sidequest that Batman was one of his targets, and the game even has you to stand around investigating the crime scene for a while before leaving.
* Batman: Arkham City, has him saying this to the security guard pushing his wheelchair, although the guard takes it in stride, most likely because he and his friends are planning to torture the Joker as revenge for the amount of people he killed during the takeover.
* Batman: Arkham City: "Hush, little baby, don't say a word, Momma's gonna kill for you the whole damn world..."
* Batman: Arkham City includes sequences where a horde of ninjas leaps at Batman from all directions, with the action slowing down while they are still in mid-air. The player must rapidly press the "counter" button to account for every single ninja before they land; if this is done right, the player is rewarded with the sight of Batman exploding out of the dogpile.
* Batman: Arkham City, including electrocution in a giant vat of liquid.
* Batman: Arkham City in his cell on specific holidays, and he will happily recall one of his past murders committed on that day. Two of these holidays are Mother's Day and Father's Day. You can see where this is going.
* Batman: Arkham City in that, even years later and having a clear memory of the game, Zsasz never realizes that he's been cheated.
* Batman: Arkham City (in the main story, you face their male counterparts, Arkham Knight's militia combat experts), although this time around the League of Assassins started to recruit regular thugs into their ranks; unlike combat experts, however, they also had one more extra new move, although they never made it into challenge maps like in previous games.
* Batman: Arkham City in the Wonder City levels/Maps. Built by Ras al'Ghul, only the central tower still rises aboveground, the rest (Along with the Wonder City Guardians) being buried belowground as Gotham was built over it. Backstory implies his early experimentation with a proto-Lazarus pit may have started the slightly insane tinge to Gotham citizens that reflects itself in its criminals.
* Batman: Arkham City: In this case, Solomon Grundy is an immortal, electrically powered revenant who recites a children's rhyme.
* Batman: Arkham City invokes this trope with the lieutenants. If you're not careful to flip over their heads after getting in your half-dozen ineffectual punches, they'll smack you down with one hit. There are also enemies wearing body armor, which require either a beatdown, a special move or a ground takedown to go down.
* Batman: Arkham City is an instant takedown. A body shot on an unarmored henchman is just a normal knockdown.
* Batman: Arkham City is entirely dictated literally by the flip of a coin.
* Batman: Arkham City is to destroy all the TYGER security cameras of Arkham City.
* Batman: Arkham City. It doesn't stop him from clubbing a number of mooks with his bound hands (Although he can't fight quite as well as he does once he manages to break the cuffs off).
* Batman: Arkham City lash out at Batman when she believes he's following her; he swiftly ends the match with a head-butt.
* Batman: Arkham City missions that unlock it). As far as the gameplay is

concerned, the upgrade works fine.
* Batman: Arkham City. Mr. Freeze's gun results in levels of frostbite that requires several characters to take steps towards warming themselves back up. However, Batman later acquires a subweapon that can inflict this on opponents, and the Iceberg Lounge features a shark tank that's mostly iced over with a fairly active shark inhabiting it (which should've been seriously sickened, if not killed, by water cold enough to support a layer of ice that could hold up the 210-pound Batman).
* Batman: Arkham City/Nightwing is equipped with wrist darts that stun his targets, but a headshot is an instant takedown. Unfortunately, Nightwing's aim constantly sways, which is aggravated if you zoom in for a better shot.
* Batman: Arkham City of the Joker and a cure for his Titan poisoning found and distributed to his victims, and also with the defeat of Hugo Strange and the strong implication that Arkham City will be shut down, its legitimately criminal prisoners relocated, and its political prisoners freed. But just in case you don't feel quite done, you can download the "Harley's Revenge" DLC and smack around some goons for a few more hours.
* Batman: Arkham City reveals a lengthy history of feuding between the Wayne and Cobblepot families, and Penguin blames the Wayne family for ruining the Cobblepot family.
* Batman: Arkham City's henchmen are waiting at the top with guns pointed at the doors. Fortunately, the access hatch is open, allowing Batman to climb out of the car and walk out onto the glass canopy above the armed henchmen and perform a takedown.
* Batman: Arkham City: Solomon Grundy. I mean, you beat the thing down twice, take all the fight out of it, hop on top of it, and are about to deliver the final blow. BAM. Suddenly, you're in this long-dead monster's grasp, and it's angry, and you're backing away from your TV in fear because of that stupid chord.
* Batman: Arkham City, Solomon Grundy is powered by an electric generator, so shooting him with the Remote Electrical Charge refills his health bar.
* Batman: Arkham City teaching you all of the 4-5 different ways that you can do this to take out mooks without being seen.
* Batman: Arkham City : The bosses in the Catwoman and Harley Quinn's Revenge DLC episodes have health bars. The player must drain them with attacks that would often knock out a henchman, even though the bosses have no physiological differences with their mooks.
* Batman: Arkham City the crime rate in Gotham reaches an all-time low, with Batman spending most of his time building tools and gadgets he rarely uses. Upon seeing the modified Batmobile the Arkham Knight comments on how bored he must have been.
* Batman: Arkham City the entire game revolves around this as Batman is injected with a sample of blood from a Titan-poisoned Joker in the beginning of the game and over time gets sicker and sicker, even coming close to death, and only surviving because of his determination.
* Batman: Arkham City; the killer's third discovered victim has had all trace evidence left by the killer destroyed with bleach, but Batman is able to track the traces of bleach used to find a vital witness.
* Batman: Arkham City, the Penguin has a museum featuring several of Gotham's finest criminals, although most of them are either dead or have broken out by the time Batman gets there.
* Batman: Arkham City The Penguin has this in his museum. He has a member of the League of Assassins, Mr. Freeze and Scarface on display, bodies of cops and members of Joker's and Two Face's gangs, and exhibits ready for Bruce Wayne and Batman. Some of them, such as police fed to sharks and Harley's hyenas killed and stuffed, show how utterly sadistic he is.
* Batman: Arkham City, the prequel game, so possibly he's had this policy for awhile.
* Batman: Arkham City. The Ratcatcher, a D-List supervillain with the power to control rats, ran afoul of the Penguin. For irony's sake, the Penguin tried to kill Ratcatcher by feeding him to hungry rats, only for the rodents to just leave him

alone. The Penguin ended up settling for feeding Ratcatcher to his pet shark.
* Batman: Arkham City, things just keep happening to keep Batman in the prison area rather than figuring out some kind of escape route. While the auto-targeting machine-guns and heavy guard presence, both on land and at sea, aren't in principle insurmountable, a) Hugo Strange knows his secret identity and will leak it if he leaves, b) he only has ten hours to figure out what's going on before "Protocol Ten" starts, and c) after a little while Joker poisons him and quite a few other people in Gotham, and the only hope of a cure in a meaningful timeframe is located within Arkham City.
* Batman: Arkham City. Though the usual format is "husbands, fathers, and sons".
* Batman: Arkham City to rush into the traps to get the Riddler Trophies hidden inside, but if you have the right tools, you can save yourself from it all. As well, if you die from the traps, the Riddler will taunt you for it but will be aghast if you manage to outwit him.
* Batman: Arkham City to when Batman saved Catwoman from Two-Face early in the game (the following exchange is after Catwoman finds Batman in the middle of wreckage at the Steel Mill):
* Batman: Arkham City, Two-Face puts on a mock trial to rally his troops and gain their support by sentencing Catwoman to death. Fortunately, his courtroom is adjourned when Batman shows up.
* Batman: Arkham City, two mooks will discuss a rumor that Harley Quinn used to be a man. Rocksteady motion-captured Quinn with a male actor, and even posted a fake reveal of this to tease fans.
* Batman: Arkham City uses custom rounds with his moniker on them. It's one of several mistakes that eventually lead the Dark Knight straight to him. However, Deadshot somewhat sensibly applied his moniker to his rounds' casings rather than to the bullets themselves.
* Batman: Arkham City Victor Zsasz begins a series of serial killings in which he calls random payphones and kills whomever answers them. In Batman's case he makes him track down another payphone somewhere else or else he kills innocents.
* Batman: Arkham City, which involved being cleaned out by the Penguin at a game of Five Card Draw (or some variation). Zzasz has four 6s, the Penguin beats it with a straight flush... to the 7. This cannot happen together because it involves five 6s. One or both were cheating.
* Batman: Arkham City, who hits very hard, moves surprisingly fast, and has three stages, The Penguin decides to fight you himself. Alone. One quick Batarang and a few punches later, he's down for the rest of the game.
* Batman: Arkham City. You can pick up on random thugs conversing with each other when going through the city. More often that not, it's just nonsensical (although sometimes hilarious) banter.
* Batman: Arkham City you get a gadget that acts as a wireless taser. Given that it causes enemies to spasm and hit each other, though, it might be an aversion...
* Batman: Arkham City, you need to finish all other sidequests in both the main file and the New Game+.
* Batman: Arkham City you track one of the League of Shadows ninjas using the blood trail left when she cut herself on glass while making her escape. Rather than a thick obvious trail, it's a series of tiny drops that you have to use detective mode to highlight.
* Batman: Arkham Collection being pretty hard Ts, was enough to bump the rating up, or that the ESRB didn't bother due to the collection's abrupt release.
* Batman: Arkham Knight after Riddler lays off a number of his henchmen and replaces them with robots.
* Batman: Arkham Knight ala the comics, he was instead tortured by The Joker for a period of at least one year, before Joker seemingly shoots him and mails a videotape of it to Batman. However, when the Arkham Knight reveals his identity as Jason, the Joker hallucination plaguing Bruce's mind tells him that he lied about actually killing him and that the videotape didn't show him everything.
* Batman: Arkham Knight.") and his desperate attempts to keep the police from realizing that he isn't actually talking to his lawyer.

* Batman: Arkham Knight army and can be taken down as easily as anyone else, and at any time.
* Batman: Arkham Knight, Batman finds Penguin's numerous hideouts by attacking his goons, then following them when they fall back to said hideouts.
* Batman: Arkham Knight, Batman gives Professor Pyg one of these on their way to the GCPD Lockup.
* Batman: Arkham Knight, Batman hauls out a brand new tank-like Batmobile, armed with various weapons for crowd control, cool stunts and just about anything else.
* Batman: Arkham Knight between two street thugs has one of them talking about Riddler firing his goons...without paying their severance. The second one gripes that he's saying for some time that the "muscle" in this town seriously needs to unionize.
* Batman: Arkham Knight both plays this straight and subverts it. One of his stealth takedowns from behind just quickly snaps his opponent's neck. However, corner takedown victims lose their balance, giving Red Hood enough leverage for a more powerful snap.
* Batman: Arkham Knight, can be found in other criminal teams, there are some exclusive enemies within the Militia that can overwhelm Batman, such as the Medics (who not only can heal other soldiers, but supercharge them as well), the Combat Experts (who fight like the League of Shadows assassins), and in the predator missions, the powerful Minigunners, which are hulking soldiers that are completely immune to silent takedowns, and carry miniguns. Some Militia exclusive soldiers do have camo suits that enables them to hide from Batman's detective vision, and some soldiers can track down batman if he uses detective vision. They are also seen as this in-universe, as the villains invested 3 billion dollars for them, and are trained by the Arkham Knight to go up against Batman.
* Batman: Arkham Knight cannot, and surviving electrocution is more reasonable than surviving getting bulldozed by a tank.
* Batman: Arkham Knight contains a scale replica of the Batmobile from the game, complete with the ability transform into its tank mode. No spoilered-out polybag goodies this time, though.
* Batman: Arkham Knight continues the tradition, and even adds to it. Now, you'll lose your fear takedown charge if you are seen in predator, and you get bonus points in combat; The latter can even be turned on in challenge maps, turning off counter icons but allowing higher scores.
* Batman: Arkham Knight Day. Eventually, he can't resist the urge and decides to cheat by committing a crime on Halloween...the day the events of the game take place. His journal entry for October 31 simply says "Damn Scarecrow."
* Batman: Arkham Knight does this sometimes, but it's a lot more realistic in nature. The Arkham Knight will specifically order his men not to split up, as it makes them easy prey for Batman, and they do their best to follow these orders. Given time, though, they'll start to separate as they get distracted by various things, i.e. a teammate's unconscious body, or are lured away by tricks in Batman's arsenal.
* Batman: Arkham Knight-esque beard, and tattoos on his chest rather than the short-haired, clean-shaven, lacking tattoos look of the comics.
* Batman: Arkham Knight, even if Batman is too far away for the grapple gun to work, he'll instantly reappear back on a platform anyway.
* Batman: Arkham Knight for the Batmobile, and half of the Riddler's subplot is forcing Batman to drive through obstacle courses, like obstacle courses are riddles..
* Batman: Arkham Knight from the Scarecrow-backed militia occupying Gotham.
* Batman: Arkham Knight had the Joker set up shop in an abandoned off-shore park amusement park which he took over after the owner himself didn't bother to finish it. It's implied Joker had manipulated the man to make it before killing him.
* Batman: Arkham Knight has a few Game Overs that are different from those of the previous games.
* Batman: Arkham Knight has several examples: The game director Sefton Hill can briefly be seen during the beginning and end of the game. (Modders have even made

him a playable skin!). In addition, after completing the story, This exchange can be heard said by thugs: "First Asylum, then City, and now Knight. I wonder what's next? -I'd say we leave Gotham for a while. -I dunno, Gotham has been good to us. -Yeah, it has." Referencing how the developers are not planning another Arkham Game.
* Batman: Arkham Knight. Hell of a way to retire, but Batman's allies had finally leveled up enough to take on the Rogues Gallery on their own.
* Batman: Arkham Knight her as she futilely kicks, hits him, and cries like a baby.
* Batman: Arkham Knight in which you get to shoot unmanned drones in the Batmobile, the cannon mounts of drones are their "heads", and a shot at those with the 60 mm cannon will instantly destroy non-Mamba drones, as opposed to a shot at their chassis which will only drain half of their "life". Mamba drones always require at least 2 shots (except with the Missile Barrage), although rapid firing at their "heads" with the Vulcan Gun also seems to kill faster.
* Batman: Arkham Knight is to rob every bank in Gotham used as a laundering front for the mob, taking advantage of Scarecrow's mass evacuation to ensure that he'll have no opposition (save Batman, of course). Although his "Harvey" personality is aware that they're also robbing the honest civilians who just happen to use those banks and there's no real way to sort the "good" money from the "bad", they still see it as fair.
* Batman: Arkham Knight, it's shown that if the Mad Hatter can't find a suitable girl to kidnap to be his "Alice", he'll make do with a man until one comes along.
* Batman: Arkham Knight it, thus protecting themselves from being on the wrong end of a Bat-beatdown. Being that the Arkham Knight is Jason Todd, who wants Batman to throw his code against killing to the winds, this is quite intentional.
* Batman: Arkham Knight made this a gameplay element. Build up enough of a hit streak during a fight where an ally is also in the melee, trigger a character switch, and the two characters will perform a ridiculously cool cooperative maneuver to take out one of the opponents before control switches to the second character.
* Batman: Arkham Knight. One of the skins available is also the very first prototype.
* Batman: Arkham Knight on one of his victims. Also, after being arrested and deposited in the GPD lockup, Pyg can occasionally be heard repeating the song - much to the annoyance of the other captured supervillains.
* Batman: Arkham Knight, Poison Ivy is killed during the climax. Black Mask also dies when the Red Hood kicks him out a window.
* Batman: Arkham Knight's Batmobile has anti-car missiles and can switch to a Tank like battle mode, where it can go toe to toe with the Arkham Knight's drones.
* Batman: Arkham Knight Season of Infamy DLC: Ra's Al Ghul has developed severe complications from extensive use of the Lazarus Vector (as seen in City). He can't be moved from the city and Batman blew up the local Lazarus Pit, so he's forced into a giant life-support throne while his army of ninja bunnies guard him. This has caused Nyssa Raatko, Ra's other daughter, to attempt to take control of the League of Shadows and sparks a civil war within the organization. Batman can choose to save Ra's with what little remains of the Lazarus Pit liquid, or destroy the life support and send him to police custody until he dies.
* Batman: Arkham Knight sees the Scarecrow and titular Arkham Knight take over Gotham with tank drones. Fortunately, the Batmobile can turn into a tank, too.
* Batman: Arkham Knight self. The various mooks eventually comment on it, with some commenting they're half hoping for a power outage so they don't have to listen to them anymore.
* Batman: Arkham Knight). Some love the enhanced visuals, the expanded combat, the bigger world and find the story to be compelling and a fitting finale to the series. Others, however, find the story to be lacking, criticize the handling (and frequency) of the Batmobile, miss the on-foot boss battles that the series was well known for, and are disappointed of inability to use other characters in challenges. (Which, by now is fixed)
* Batman: Arkham Knight suit is possibly the clearest example of this). Many other suits don't count simply because Batman's gadgets are contained externally via

pouches: if they were then they would easily qualify!
* Batman: Arkham Knight, this is actually very dangerous, and would have a high chance of breaking their necks.
* Batman: Arkham Knight, trying to hijack Batman's mind via his infected blood after Batman is exposed to Scarecrow's fear gas, appearing as a hallucination that, for the most part, simply makes jokes and heckles Batman, but gets stronger as the night goes on and tries to assert control. He even nearly succeeds couple times, most notably on Stagg's airship when Joker temporarily takes over and beats several militia soldiers nearly to death.
* Batman: Arkham Knight version of the Batmobile has a pair of fold-away harness chairs in an armored compartment, used to get civilians, injured cops and the like to safety.
* Batman: Arkham Knight villains (Scarecrow, Man-Bat, Professor Pyg) in greater or lesser roles.
* Batman: Arkham Knight wasn't kidding when it opened with the line "This is how the Batman dies." Following the events of the game, which the reveal that the titular Arkham Knight is really Jason Todd and Scarecrow outing Bruce Wayne as Batman, it appears as if Batman and Alfred have decided to blow Wayne Manor up with them in it.
* Batman: Arkham Knight, when Batman and Nightwing investigate the scene they find out Croc wants revenge because the prison staff tortured him through scientific experiments and worsened his condition as a result. Nightwing understands why Croc wants revenge but Batman points out that he still killed people and he needs to face justice for that.
* Batman: Arkham Knight. When in Harley's Detective Vision you see the walls covered in crazy writing.
* Batman: Arkham Knight, where the player is once again given an option to pay their respects when faced with Talia al Ghul's equipment in the GCPD building.
* Batman: Arkham Knight, with gruesome, terrifying, and undead-looking results. It's impossible to tell the difference between grafted-on burlap and actual flesh.
* Batman: Arkham Knight, you can murder anyone and everyone. Except Harley Quinn. The targeting reticle will not stay on her and the trigger will not work. There is one line the developers would not let even the Joker cross.
* Batman: Arkham Knight, you can overhear some militia more thrilled about their popularity on social media than their actual assault on Gotham.
* Batman: Arkham Knight. You have to do it to get the real ending, and you can't do the whole thing and fight Riddler until Scarecrow's captured.
* Batman: Arkham Origins: 15-year old Barbara Gordon hacks into Batman's comms in order to ask him to help with Penguin weapon shipments. Is it any wonder that she later discovers Batman's identity and becomes Batgirl (and later Oracle)?
* Batman: Arkham Origins, and has a side mission in which you get to wander through a crack-trip Wonderland with electrified floors courtesy of the Mad Hatter.
* Batman: Arkham Origins (and likely others) will have the AI take pity on you if you're being beaten too badly in a fistfight. Jump into a huge crowd of enemies and quickly lose all your health by playing extremely poorly. When you're down to one hit left, the enemies will basically turn into punching bags, offering no threat whatsoever until you're down to about five enemies, at which point normal AI resumes. You might still lose, but at least you still beat a bunch of guys, right?
* Batman: Arkham Origins and once again The Joker's thugs shoot at her. This time, however, the thugs don't have any rocket launchers so the chopper leaves as soon as the camera is shot out.
* Batman: Arkham Origins and spread out throughout the room, allowing them to be picked off one by one.
* Batman: Arkham Origins are arguably justified, as this early in Batman's career and before he became a legend, so they have no reason to really fear him.
* Batman: Arkham Origins, Batman heads to the Gotham Merchants Bank, which is owned by crime boss Black Mask, and discovers that the Joker has kidnapped Black Mask and assumed his identity, taking over his operation and his men; the Joker proceeds to escape with a truck full of money stolen from the bank.

* Batman: Arkham Origins Blackgate in an office with Waller and thus, we don't get to see him in combat.
* Batman: Arkham Origins comes down to a young Batman surviving eight of these while catching the man who put a price on his head, Black Mask, a mob boss who has an interest in keeping crime high in Gotham.
* Batman: Arkham Origins, Commissioner Loeb is locked into a poison-filled chamber by Black Mask while Batman watches helplessly behind glass.
* Batman: Arkham Origins fan is waiting for a gas attack or some trap, but she calmly stands up and has a quick chat with the bat.
* Batman: Arkham Origins for its supposed horribleness. Yet, it got only slightly lower scores than the original two games, and some players feel like it has the best story in the series as well as the most badass boss fights.
* Batman: Arkham Origins gave Shiva, who normally has flowing hair that reaches almost to her waist, a short bob cut. She's had similar cuts in the comics, however.
* Batman: Arkham Origins had a very tight schedule, and the game was released only 8 months after its announcement. Even though it re-used the engine, gameplay, props and even a portion of the map from Arkham City, it was very glitchy when it was released. Although it did receive multiple patches, and is generally considered to be a bit better now, it didn't help that the developers outright stated that they would stop patching minor bugs in favor of developing the story DLC.
* Batman: Arkham Origins had the Joker somehow turning the top of a penthouse suite into this via parts he got old amusement park.
* Batman: Arkham Origins has a female version of Copperhead as one of the boss characters. Batman even lampshades this by stating that all of the data he had thus far collected in relation to Copperhead indicated a man.
* Batman: Arkham Origins has this after Batman grapples a news helicopter that Vicki Vale is on, and then glides off to resume fighting Bane's goons. The first 15-20 seconds of the fight are from the camera of the news chopper as Vale talks about how Batman is on his way to becoming a household name.
* Batman: Arkham Origins: Information came by during a sidequest about Cyrus Pinkney, Gotham's original architect, implies that Bruce's ancestor, Solomon Wayne, was one of these.
* Batman: Arkham Origins is the ability for Batman to step up crime scenes and use Detective Mode to digitally reconstruct them.
* Batman: Arkham Origins itself falls into this, as the game was notoriously glitchy, bug-filled, and typos-filled at the time of its original release and even with updates, they weren't completely fixed.
* Batman: Arkham Origins makes a slight change; all gadgets need to be reacquired, but their upgrades still stay. Additionally, the game has a second NG+ called 'I am the Night' mode which is even harder, as you only have one life, but thankfully it doesn't have to be completed in one sitting- the game has autosaves that kick in at predetermined points so long as you don't die.
* Batman: Arkham Origins member of the medical staff working the night shift on Christmas Eve.
* Batman: Arkham Origins method of feigning innocence, but he still gains credit for its theatrical performance.
* Batman: Arkham Origins My Alibi. Presumably everyone there will cover for another patron.
* Batman: Arkham Origins novelization mentions he stopped training Bruce because Bruce refused to forsake violence forever).
* Batman: Arkham Origins out of a high-riser window, along with the chair he was sitting on. He takes at least ten seconds to reach the floor.
* Batman: Arkham Origins, punching through the roof of an elevator to grab Bats then throwing him to the floor.
* Batman: Arkham Origins see Batman also search for the journal entries of Cyrus Pinkney, another deceased founding father of Gotham.
* Batman: Arkham Origins. She's a very attractive blonde with a squawking voice and heavy Cockney accent like her boss.

* Batman: Arkham Origins takes place on Christmas Eve, with the clock hitting midnight and thus making it actual Christmas Day.
* Batman: Arkham Origins that the Glue Grenade formula was unstable and all the grenades from the main game set just a few days earlier are nothing but dust.
* Batman: Arkham Origins the Joker has rigged several buildings in Gotham to explode. He detonates the first one while Batman watches. After Batman tackles him and demands to know how many people he just killed, the Joker replies "None. I think." It was a construction site during a city-wide curfew.
* Batman: Arkham Origins. The two eventually team up to defeat Batman, forcing the Dark Knight to take them both down in the game's finale. Notably, Bane and Joker were also the leaders of the opposing factions in the game's multiplayer mode.
* Batman: Arkham Origins: The whole Gotham City Police Department is on the take somehow, with the rest being too afraid to stand up. Especially prominent in Commissioner Loeb and Branden. The only exception is James Gordon (who is not yet commissioner at this point), as one of Edward Nigma's extortion tapes has Anarky call Gordon the only clean cop in Gotham.
* Batman: Arkham Origins, too. Once the main plotline is over, the player can continue the game, tying up all the loose ends.
* Batman: Arkham Origins to the player. Cue Batman dropkicking him in the face and laying him out in a single blow.
* Batman: Arkham Origins unrealistic), but after taking TN-1 he turns into a walking mountain of muscle and seems to lose some brainpower in the process.
* Batman: Arkham Origins (using mostly modifications of the City resources to build upon). Still, the change in production company and story writers is noticeable. The premise is more bare bones, telling a story that isn't overly convoluted and allows more emphasis on Batman's interaction with both enemies and allies. Many fans consider the story, taken by itself, to be the best of the series, even if the gameplay itself is underwhelming.
* Batman: Arkham Origins, where it looks like you're about to have a difficult battle against him, only for him to go down with a single punch.
* Batman: Arkham Origins, while exploring Cyrus Pinkney's crypt you can find a red-tinted doll missing an eye in a basin. There's absolutely no explanation for what it is or why it's there.
* Batman: Arkham Origins" while he is doing the atrocity. Enraged, Batman grabs the Joker as the explosion rocks the building, cutting out the TV signal.
* Batman: Arkham Origins" while laughing his ass off. Batman simply says "No" in a tone somewhere between deadpan and irritated before punching the convict's lights out.
* Batman: Arkham Origins who argues against using it as it's still unfinished and untested, Alfred insisting on its usage, and that Batman has Alfred finish it up and run some tests before deploying it.
* Batman: Arkham saying this to one of the characters, presumably to annoy them.
* Batman: Arkham Series and other games in different genres. The tradition movie tie-in also declined in popularity and the idea of a licensed character separate from movie and literary source material has become the norm.
* Batman: Arkham Series: Batman, again. More observable in the first two Arkham games, as he figures things out in his own thoughts without any visual aide, besides the use of Detective Vision to analyze evidence, like when he figures out how to isolate Deadshot based solely on the specific type of paint used in the boxes where he hid his gear. Whereas in the prequel, his cowl can recreate crime scenes based on evidence, be it a shooting scene or a helicopter that was sniped by a ricocheting bullet.
* Batman: Arkham Series, Batman can use this to get away from gun-toting mooks should he be spotted. For even more fun, toss a pellet into an unaware group and watch them freak out and fire at each other.
* Batman: Arkham Series: Batman has built-in lenses in his cowl that when activated give him an almost X-Ray like view of any nearby characters or surroundings. Enemies carrying guns are marked as entirely red. Anyone else, whether they be enemy or not; are marked as light blue. Objects that can be affected by one of

Batman's tools are similarly highlighted. Every other playable character has a version of this. The Joker in Arkham Asylum has to stand in place to use his X-Ray Specs as well as be in First-Person mode. Others have less advanced vision, especially those without access to WayneTech such as Catwoman and Harley Quinn, whose vision doesn't highlight armed enemies apart from unarmed ones.
* Batman: Arkham Series. Beating up people as Batman is a top-notch manly activity!
* Batman: Arkham Series, but it's primarily focused on the Scarecrow's attack on Gotham and his alliance with the mysterious Arkham Knight.
* Batman: Arkham Series DLC, Red Hood murders him and destroys his gang.
* Batman: Arkham Series (except TYGER guards and Arkham Knight's militia) always have pervy dialog when talking about the female characters, despite the fact that they will try their best to punch Catwoman and Batgirl to death while making those remarks in combat challenges.
* Batman: Arkham Series: Explosive gel will at worst knock someone out and often just stuns them.
* Batman: Arkham Series had a few of these, not surprisingly all focused on the Joker.
* Batman: Arkham Series, had him take over as Tim Drake, one of the heroes and playable characters in the game.
* Batman: Arkham Series has "Beatdowns", a move in which Batman (Or anybody else) confuses an enemy with his cape (or with something similar), and then proceeds to punch them in this fashion. The move has been part of the series from Arkham City onwards.
* Batman: Arkham Series have essentially taken the different forms of media that Batman and his world have appeared in, selected the best bits from each one, glued them together, filed the edges down and then cast the player as Batman. It's generally considered one of the key reasons the games have been so successful.
* Batman: Arkham Series indulge in this a bit, which is especially noticeable since the 90s animated series, a touchstone for most modern Bat-fans, famously made Gotham an anachronistic hodgepodge of contemporary and early 20th century styles to evoke the early comics.
* Batman: Arkham Series, is left with a missing left hand, and a deep burning hatred for the supervillain.
* Batman: Arkham Series, moreso than other versions of the character. He wages a vigilante crusade against a corrupt society, is bound by a strict personal code of honour and tends to use fighting techniques originating from medieval Japan against foes using modern weapons and tactics. Given this particular incarnation's constant use of advanced computer tech (his mask's detective mode, the disruptor, the remote hacking device) and the notably cyberpunk-influenced plots of the series (City's focus on government control and surveillance, Knight's focus on drone warfare, the prominent role the Bat-family's resident hacker Oracle has throughout the series), this version of Batman is actually one of the purest examples of the trope.
* Batman: Arkham Series pointing out how utterly screwed his men are).
* Batman: Arkham Series, which played a big part in his desperation to find a successor:
* Batman: Arkham Series, while playing the game with the normal skins will avert this trope, playing the game with the special DLC skins will play this trope straight — Batman can get shot, beaten up, thrown out of windows, survive explosions, the works and he and his costume will look pristine. Doesn't matter how far into the past or the future that suit is, it will be clean and Batman without even a split lip.
* Batman: Arkham Series who's 5'2". In particular, there's Poison Ivy (5'8"), Christina Bell (5'9"), Copperhead (5'10") and adult Barbara Gordon (5'11", though she is wheelchair-bound by that point).
* Batman: Arkham Unhinged game continuity have been released since then.
* Batman: Arkham VR, it seems that the rating was inevitable this time.
* Batman: As a kid, Martin Mantle, Jr. was not interested in sports, which annoyed his father, who was a notorious scientist. Mr. Mantle developed a serum to improve his son's stamina and physical abilities and he used it against Martin's will. When

his mother learned of this, she and Martin abandoned Mr. Mantle and moved away. Martin grew up and the effects of his father's serum became notorious when he became a top athlete. After getting his engineering degree, Martin's health started to deteriorate and the doctors diagnosed him with a deadly disease, which was caused by his father's serum. Seeking revenge against society, Martin adopted the costumed identity of Sportsman and started killing top sports personalities.
* Batman as Alfred begins riffing on the show, with obvious knowledge of previous plot points.
* Batman. A secret society that manipulates Gotham City from the shadows.
* Batman as research shows that people who had some sort of childhood trauma grow up to be controlling adults. When something bad happens to you when you're a kid, there's nothing you can do because you're just a kid, however, once you're an adult you can control things better to not have it happen again.
* Batman: Assault on Arkham — she had just fought Batman hand-to-hand, so why would her heart-rate be steady?
* Batman: Assault on Arkham, and fires a shot into the ceiling, giving Deadshot an opening to sucker-punch him.
* Batman: Assault on Arkham are dropped from a plane to Gotham City in pods that break apart when their parachutes are deployed.
* Batman: Assault on Arkham, Batman gets to a bomb the Joker set up. Inside is a note saying to cut the red wire, but all the wires are red.
* Batman: Assault on Arkham between Deadshot and Captain Boomerang escalate to the point where they're about to fight it out right then and there. It takes several attempts for Killer Frost to get their attention and tell them that Batman just showed up.
* Batman: Assault on Arkham by Killer Frost for hitting her head, prompting from him "Ahh! My goolies!".
* Batman: Assault on Arkham get intimate at one point. We don't see most of it, but the sounds of crashing and furniture breaking are audible from outside.
* Batman: Assault on Arkham help her pass as a corpse when the bag is scanned and confirmed to be cold.
* Batman: Assault on Arkham is triggered and his head is blown off. Surprised, Joker comments, "Best gun ever."
* Batman: Assault on Arkham keeping her body temperature well below that of a living person, so the asylum staff's scans are fooled into thinking her dead.
* Batman: Assault on Arkham. Killer Frost and the Riddler are cornered by the Special Crimes Unit, who commands the two to return to their cells. After a pause, Killer Frost flips them the bird, causing them to open fire on the two.
* Batman: Assault on Arkham: King Shark has human bodies hanging up in his hotel room like sides of beef in a butcher shop.
* Batman: Assault on Arkham: King Shark is made into an augmented cyborg with tough skin and metallic jaws instead of a half-human/half-shark demigod.
* Batman: Assault on Arkham, of course, the warden seriously freaks out.
* Batman: Assault on Arkham options have pragmatic motivations — letting someone get away with attacking his business would make Penguin look weak, but double-crossing a client by killing one of their operatives would be even more damaging.
* Batman: Assault on Arkham, the Joker has stolen a dirty bomb and hidden it somewhere in Gotham City.
* Batman: Assault on Arkham, the surviving members of the Suicide Squad fight over a helicopter even though it's big enough for all of them and they'd have a better chance of using it to escape if they cooperated.
* Batman: Assault on Arkham when Amanda Waller manages to swiftly and easily answer The Riddler's quip about doors:
* Batman: Assault on Arkham, when a nurse takes away Harley's iPhone because Harley is supposed to be focusing, Harley responds by biting the woman's ear off.
* Batman: Assault on Arkham when Harley commits a robbery and allows herself to be arrested so she will be returned to Arkham. Deadshot then disposes of the cop taking her there, and accompanies her as her escort.

* Batman: Assault on Arkham. When Harley Quinn is attempting to pilot a Blackhawk helicopter, she goes looking for the "gas pedal" and starts randomly pressing buttons on the console. She gets this trope along with several other functions, including launching anti-heatseeker flares.
* Batman: Assault on Arkham: When the police burst into King Shark's hotel room and find all of the bodies strung up, one of the cops can be seen spinning around about to vomit.
* Batman at least one disguised panel in the rear entry of the house leads to a secret armory instead.
* Batman: Bad Blood, Batman gets brainwashed by the bad guys and is equipped with a gun, which doesn't count as Batman is not in his right mind. What does count is that after he's been snapped out of it, he fires the gun to destroy Talia's sword right before she would have stabbed Nightwing in the back.
* Batman: Bad Blood, Batwoman is more willing to resort to lethal force and unlike the comic, when Batman rescues a pre-Batwoman Kate, she's shown to be resentful of it.
* Batman: Bad Blood, Dick Grayson mentions that he used to have a crush on Kate Kane when they were kids, until he found out she was a lesbian.
* Batman: Bad Blood: Firefly has a beard and has no problem mind probing Bruce.
* Batman (Bane taking over Gotham City and controlling an army of villains).
* Batman, Batman finally does shout Bane's name. It's not for mercy, though, it's in frustration—the villain escaped capture.
* Batman: Batman is an obvious example. They're often more utilities than weapons in the comics, but the movies and video games in particular show off an impressive number of traps and gadgets to supplement bad guy nabbing. This applies to the entire Bat Family.
* Batman, Batman is convinced Superman is a threat to mankind and must be destroyed at all cost. In his mind, he is saving the world from a potential alien dictator. What he would be actually doing is killing a genuinely good man trying to make a difference. He only comes to regret this attitude in the climax.
* Batman: Batman is granted a single wish; reluctantly, he wishes for "the only thing he could" — that Gotham be safe. His wish is granted, and much more: "Even though he wished for what he thought he had to, he still got what he wanted. That's what we do."
* Batman Batman movies which had him training with the League of Shadows.
* Batman: Batman prefers to operate at night, because in Gotham that is usually when the majority of crimes that need his attention occur. Batman himself has wryly noted on several occasions that his costume is much more effective at night.
* Batman Batman's plea to try to get rehabilitated, which he dismisses with surprisingly humane sadness (it's "far too late for me", he says) rather than rejecting it instantly.
* Batman, Batman (who is unmasked) saves Jim Gordon's baby. Jim Gordon has suspected Bruce Wayne of being Batman throughout the whole arc. Gordon tells Batman that he's blind without his glasses, and that Batman should leave him before the police arrive. Batman leaves. Whether Gordon was lying is unknown, although other stories hint that he might know.
* Batman Batman who requires a procession of stunt doubles. At the end, she's been allowed out of Arkham for long enough to accept an Oscar.
* Batman: Bat-Mite, who tends to show up only at the most annoying or inconvenient times.
* Batman becomes this whenever the timeline allows for it (usually in Elseworlds). The most famous example being
* Batman Begins. After Lucius Fox finishes explaining exactly how he derived the antidote for Crane's fear toxin:
* Batman Begins. A lot attendant, upon seeing the Batmobile and the police cars enter the parking structure, looks down at his drink as if there's something wrong with it.
* Batman Begins: A more benign example than most when Bruce Wayne bought a fancy restaurant when a staff member told him his dates couldn't play in the fountain.

* Batman Begins. And in the climax, Ra's and his men enter the Narrows posing as a SWAT team.
* Batman Begins, and many Disney films are accused of plagiarizing from anime, the latter of which is ironic because Walt Disney's style inspired early anime and manga and that Disney has "plagiarized" from many other sources that hardly get fussed over.
* Batman Begins attempt to poison Gotham City by sending an uncontrolled monorail train, which carries a device that supposed to cause fear-inducing gas spew everywhere, towards Gotham's central water source.
* Batman Begins, Bruce and Alfred are ordering the components which will eventually be assembled into the batsuit:
* Batman Begins, Bruce seduces the secretary at Wayne Enterprises with this technique under the pretense of showing her how to play golf. He managed to do this in only a few seconds.
* Batman Begins: Bruce Wayne became Batman because nearly all the public officials of Gotham were in the pocket of the crime lord Carmine Falcone, preventing Falcone from facing justice.
* Batman Begins, Bruce Wayne has a party on his birthday. Before that he has to save Rachel from the baddies and demolish half the city escaping from police. Nevertheless, he makes it home in time for his celebration party... only for the League of Shadows to set Wayne Manor on fire and nearly destroy the city with Scarecrow's fear toxin.
* Batman Begins, Bruce Wayne saves the unconscious Ducard in this manner. He can only use one arm because he is flat on his back, with the gauntlet on his other arm wedged into the ice to hold him in place. At least Bruce yells to let the audience know it was really hard.
* Batman Begins But these are idealist conspiratorial ninja with a taste for what sound like neo-Marxist theories of history (and for burning down cities).
* Batman Begins: Discussed. Seven years after Bruce Wayne's parents were murdered, he returns to Gotham City to attend the public trial of Joe Chill, who agreed to cooperate with Gotham's DA in taking down the Falcone crime family in exchange for early release from prison. When Rachel Dawes, Bruce's childhood friend and the DA's assistant, tries to dissuade Bruce from going (as she was the one who was going to drive him to the trial), Bruce firmly insists on going, as unbeknownst to Rachel, Bruce had fully intended on killing Joe Chill himself. Shortly after the trial's conclusion, one of Falcone's hitmen gets to Joe and kills him before Bruce could. Frustrated that Falcone had escaped justice again, Rachel and Bruce later discuss how Falcone managed to pull it off, which Bruce noted that he should thank Falcone for it, only for Rachel to point out that what he wanted was revenge, not justice, and imported the importance of an impartial judicial system, which Bruce complains as being broken. Disgusted, Rachel drives Bruce up to a diner that Falcone frequents, making sure to drive him by the countless homeless encampments along the way to show Bruce just how bad Gotham's crime families have been making things for Gotham citizens and how much they're destroying everything Bruce's parents have fought for and pointing out that Joe Chill himself was a victim of Falcone's criminal empire, despite his crime. She then promptly slaps Bruce after he reveals the revolver he planned to kill Joe Chill with, and tells him how ashamed his parents would be of him. Bruce ultimately takes the lecture to heart, and it's the starting point on his journey to becoming the Dark Knight.
* Batman Begins does this after Batman foils his plans to destroy Gotham. When Batman leaves him on an el-train that's about to crash, thanks to Gordon destroying the tracks, he simply closes his eyes and waits for the inevitable.
* Batman Begins, Ducard explains that the use of smoke bombs and similar gags are only theatrics to confuse an enemy.
* Batman Begins. During his training by the League of Shadows, he rebels against them when asked to do the same. His claims that executing a man without a proper trial is wrong shows some character development from when he was about to do the same to Joe Chill.
* Batman Begins example was deconstructed by stand-up comedian Reginald D. Hunter,

pointing out that it was just a way to do what you want. Point in hand, he uses it as an excuse if someone takes offence to his Josef Fritzl routine.
* Batman Begins fits this genre in the second half of the movie, as the first half focused on Batman's origins.
* Batman Begins gets bonus points — the trigger is plunking out a couple of notes on the nearby piano.
* Batman Begins. Granted, this was prior to him gaining extensive martial arts training, but his complete acceptance of her punishment made the scene very effective.
* Batman Begins had the brilliant line "To conquer Fear; You must become Fear."
* Batman Begins has an electric monorail crash. It explodes spectacularly, what with all the combustible material in a monorail and a microwave emitter.
* Batman Begins) has been suspicious of Dr. Crane for a while. When Crane's thugs ask her why she was in the basement looking at the canisters, she claims she got lost and doesn't know anything about the toxin. The thug replies "I never said anything about a toxin."
* Batman Begins has some surprisingly freaky hallucination scenes as a result of Scarecrow's fear gas, with characters turning into demons and things.
* Batman Begins, he even uses a leap onto an escaping van as a means of stopping it.
* Batman Begins, he gave away one of his gadgets when a boy said that "No one would believe [him]" about meeting Batman.
* Batman Begins: Henri Ducard goes into hand-to-hand combat in a suit and tie.
* Batman Begins, Henri Ducard shows Bruce Wayne how to use a pinch of gunpowder to achieve this effect.
* Batman Begins he places a hit in her. When Crane says that murdering her might bring even more attention, he says that they could make it look like a mugging gone wrong.
* Batman Begins, he was essentially given a blank check to do what he wanted... that being "create a highly rated film that made everyone lots of money". Good things do sometimes come to those who wait.
* Batman Begins. In order to get the needed training for his war on crime, Bruce seeks out Ra's Al Ghul, the head of the Asian League of Shadows. He ends up dealing mainly with Henri DuCard, the League's second-in-command. Ra's tends to sit in the background and be imposing while DuCard does all the work of testing and advising Bruce. When drama ensues and everything starts exploding, Bruce saves DuCard; he doesn't discover until much later that DuCard was really Ra's Al Ghul all along, using another man as a decoy.
* Batman Begins in the sequence on the docks, where Batman pulls a mob goon into said dark space.
* Batman Begins, in which it is even more ridiculous because it is done by actual bats. Little animals like that aren't gonna be able to break through glass windows.
* Batman Begins is a prototype armor suit that was rejected by the army because it was too expensive. The same with the batmobile, which was designed for jumping gaps to lay cables for bridges.
* Batman Begins is burning hot enough to crack the ceiling beams, but falling beams are the only real danger.
* Batman Begins isn't going to save him. His reaction has this expression written all over it.
* Batman Begins, is presented as a terror-loving maniac who enjoys too much of his illegal jobs.
* Batman Begins is Ra's al-Ghul is given this explanation in the novelization, in which the name Ra's al-Ghul is a title handed down to the leader of the League of Shadows from generation to generation to carry on the League's work.
* Batman Begins is this after he's been given a massive dose of his own fear toxin and Batman, who's already kind of intimidating, is interrogating him.
* Batman Begins, it is "explained" that the Batmobile has "life sign scanners."
* Batman Begins—they are asking him to prove his commitment to a cause they think is right.

* Batman Begins obscure their faces, though they also ditch the masks when they infiltrate normal society. The masks actually become a plot point during Bruce Wayne and Ducard's duel: both don masks and hide among a throng of similarly-masked mooks.
* Batman Begins persona and he tried telling her that that wasn't the real him.
* Batman Begins photographers are seen trying to get around a wall of cops so they can get a picture of young Bruce Wayne alone in the police station after his parents were murdered.
* Batman Begins pointed out how jarring it seemed that the enemies the player faces in the game are very racially mixed).
* Batman Begins: Producer Larry Franco appears as a cop during a chase scene.
* Batman Begins. Rachel is being followed by two Falcone's thugs, and they confront her outside the subway. One is behind her and another in front. She smacks the one behind her with her purse, then turns around and points a taser at the one in front of her. He looks afraid and runs off, which causes her to jeer at him ("Yeah, you better run!") until she turns around and sees that Batman was behind her. (And had taken care of the other thug.)
* Batman Begins. Ra's al Ghul and his men walk right into the manor as guests at Bruce's birthday party. When he realizes who they are, he's quick to get everyone else out. Good thing, too, as they burn the house down immediately after.
* Batman Begins sends 4 serious-looking ninjas in full metal body armor to fight Batman. They do marginally better than everyone else who's tried to fight Batman up to this point until they pushed him into a mob.
* Batman Begins showed an old elevator hidden behind a bookcase that opened from playing a certain short tune on the nearby piano. The costume was in a wardrobe at the base of the elevator shaft.
* Batman Begins starts, Bruce's war on crime as Batman, and his alliance within Jim Gordon and Gotham PD, have very nearly rid the city of the Mafia's grip, dealing a massive blow to the city's crime rate in the process. As such, Gotham has not only visibly improved, but it's citizens have a renewed sense of hope and faith, the first they've felt in years.
* Batman Begins's younger days as a boxer can be seen in Ducard's fighting style, especially the climactic battle towards the end. He goes into boxing stance when fighting Batman in the train.
* Batman Begins that wants to leave because "a little opera goes a long way."
* Batman Begins, the Batmobile has a stealth mode. Despite being right in the middle of several cop cars on a two-lane highway, somehow nobody notices the gigantic all-terrain military vehicle. To be fair, it was night and most of the streetlights were out, but still ...
* Batman Begins. The British Empire was getting too big for its britches, you see. Which is bizarre, since the British Empire had barely started in 1666.
* Batman Begins. The following dialogue refers to stuffed animals being used to smuggle in drugs.
* Batman Begins, the League of Shadows claims to have sacked Rome and Constantinople, engineered (or at least spread) plagues, and caused the Great Fire of London. Whether there is any truth to these claims is never answered.
* Batman Begins: The new Batmobile is manual transmission, and Batman makes a point of asking whether Jim Gordon can "drive stick" before letting him use it. It's actually controlled with a Throttle lever like that in a boat or plane. It's the same sort of joke, though.
* Batman Begins: The Scarecrow wears a burlap sack sewn into the form of deranged scarecrow. He uses a gas that induces waking nightmares.
* Batman Begins. The scene was also the basis for one of the film posters, in which it was not clear if Rachel was dying or merely unconscious.
* Batman Begins, the titular character's wonderful toy allows him to latch onto a monorail car as it makes its way towards Wayne Tower in the finale of the film. It also established a bit of slightly more realistic tech to the gun; the gun fires the projectile but it is anchored to the suit and the belt has a motor for the ascension. Since his costume is likely built with a harness that means it isn't

reliant on his physical strength to hold on and allows him to snatch mooks and pull them to the ceiling.
* Batman Begins. This is exemplified by Bruce's statement of intent when he enters the League's headquarters:
* Batman Begins this is Falcone's response when Crane sprays the fear toxin in his face. And it's unending too, implying that he descended into insanity out of fear.
* Batman Begins though not as much from aging as from injury and inactivity. The knee that he hurt in the fall at the end of the previous film never healed properly and he, at first, used a cane to get around. When visiting a doctor a startling list of injuries and damage is given, least of which is that the cartilage in his knees is destroyed. Defying recommendations from Alfred, he tries getting back into fighting shape using a bionic brace on his knee, but it's repeatedly mentioned he is off his game and out of practice.
* Batman Begins to be over the top powerful and that the whole point is that you need to use stealth and fear to tip the battle in your favor.
* Batman Begins to further explain the danger of the situation, and perhaps for visual variety.
* Batman Begins toys with this trope in the dialog between Bruce and both Alfred and Lucius — the former suggests he take up polo to explain his bruises, the latter receives a very flimsy handwave for why Bruce had been drugged with a weaponized hallucinogen.
* Batman Begins: Used as a plot point when a young Bruce Wayne falls into a disused well and disturbs a colony of bats that live there. This causes him to develop a phobia of bats that he conquers when he becomes Batman. He later weaponizes it by including in his gadget repertoire a bat swarm lure, which he unleashes to escape from Arkham Asylum when surrounded by a mass police response to his appearance.
* Batman Begins was attacked by some for being rated 12 as well, thanks to it seeming more brutal than it is.
* Batman Begins was just as corrupted if not more, but he also was much taller and muscular, blue-eyed with a blonde well kept haircut.
* Batman Begins, Wayne Enterprises applied science head Lucius Fox invokes this when Bruce Wayne becomes concerned that his increasingly "unusual requests" for materials for his prototype Batsuit may cause Fox to out him: "Mr Wayne, if you don't want to tell me exactly what you're doing - when I'm asked, I don't have to lie. But don't think of me as an idiot."
* Batman Begins. When Bruce Wayne comes home bruised after his first night as Batman, Alfred suggests he should take up a suitably injury-prone hobby as cover against future mishaps - polo.
* Batman Begins, where Bruce Wayne begins to sympathize with the criminal element when he encounters people who have to commit crime in order to survive (and, having cut himself off from home, having to do so himself), and then finds himself feeling a thrill when he expands his motivations from survival to profit. This is countered by Ducard, who notes that criminals look for, thrive on, and encourage society's tolerance and understanding of their motivations. Bruce eventually settles on something somewhere in the middle, and he tends to restrict his hunts to those who cannot claim it is society's fault.
* Batman Begins, while in prison, Falcone tries to blackmail Crane into allowing him a part in the upcoming fear toxin project. Crane instead gasses him with the fear toxin, causing him to have a screaming fit.
* Batman Begins (with the exception of Gordon). Flass is the most notable one, to the point of such pettiness as pocketing money from street vendors because he doesn't want to cough up a few dollars for some fast food. Even Gordon is not particularly upstanding, as he ignores clear evidence of corruption (though it's because he has no recourse, he still doesn't try to fight it). Flass warns Gordon to get a little dirty so that other cops can trust him, but Gordon points out that he won't point out corruption even if he won't get dirty himself.
* Batman being a world-class butler is of course a great chef as well. Anyone who stays at Wayne Manor usually comments on his delectable meals. Alfred passed on his culinary talents to Dick, Tim, and eventually Damian.

* Batman, believe it or not. Though he never becomes specifically open and warm, his cold and authoritative demeanor works in tandem with deep compassion and fairheartedness that only reveals itself in certain situations — most often in regards to his adopted "sons" and Alfred.
* Batman below some notable female characters. To add insult to injury, he also jokingly ranked Jason below Ace the Bathound in terms of intelligence.
* Batman. Besides being an actual foster father to the Robins, he attempts to counsel Aqualad regarding his homesickness (correctly guessing it's more about a person than the place), pays for Artemis to attend the same prestigious private school as Robin, and keeps a close watch on kid Leaguer Captain Marvel, revealing that he knew all along and, in the tie-in comics, gift-wrapping him an opportunity to come clean.
* Batman Beyond, a doctor specializing in robotic prosthetics was forced by a gang to give them weaponized versions. He secretly put a trigger phrase in the limb's coding, which would make them fall apart. Batman figured it out at the end battle ("April Moon", after the favorite song of the doctor's wife), and defeats the gang.
* Batman Beyond against the poacher that kidnapped him and his mother.
* Batman Beyond, a group of gangsters are having a card game, despite the new Royal Flush Gang staging various crimes themed around cards. After being attacked by them, one mobster smacks another.
* Batman Beyond, an aged Bruce Wayne is about to be attacked by a random criminal when a dog jumps towards Wayne...and attacks the criminal instead. Bruce adopts the dog and names him Ace. Because when a dog is badass enough to save BATMAN you know he's awesome.
* Batman Beyond, and his future self didn't seem the least bit surprised.
* Batman Beyond and his son Paxton was arrested for an assassination attempt against Bruce, he was able to regain full control over his company once more, and renamed it back to Wayne Enterprises.
* Batman Beyond, and indeed during the fight operating the suit is taking its toll on the older Batman.
* Batman Beyond, and not only gets the guy who actually did the job, but ends up nearly getting Powers killed, causing him to become his archenemy Blight. When Terry later finds out that Blight is Powers, he confronts him again in the season finale:
* Batman Beyond and plans to get back to the real world by replacing his grandson's mind, attempting to kill Batman in the process for getting in his way. At the climax of the episode, Terry manages to get the data comprising his consciousness deleted. As he does, Vance very rapidly mentally regresses to an infant state, and the last thing he says before he's permanently deleted is to call out for his mother.
* Batman Beyond and still cared about two things: his fights with Batman, and being remembered as a symbol of chaos. Joker King on the other hand couldn't care less about anything at all, because in his view, because no matter how hard you try to preserve your legacy, the universe will eventually end and nothing whatsoever matters. All he wants is to kill as many people as possible, preferably including his own family, then die himself. He achieves this by organizing an enormous riot with Jokerz-members from all over the country, killing thousands of people and leaving Gotham in ruins. He dies falling off a building while fighting Terry.
* Batman Beyond and the resulting retaliation taint the entire Bat Family's demeanor forever.
* Batman Beyond, appropriately named "Babel", Shriek messes with soundwaves, preventing anyone in Gotham City from being able to communicate intelligibly.
* Batman Beyond asks for Batman's help uncovering a traitor in the JLU. Guess who the traitor is?
* Batman Beyond as the elder Bruce Wayne's limousine, but they flipped it upside-down.
* Batman Beyond, a vengeful weapons developer who took some samples home from work.
* Batman Beyond Batman anymore, Bruce just says "tell that to my subconscious".
* Batman Beyond, Batman begins to succumb to the serum, growing fangs, frothing at

the mouth, viciously attacking said mooks and nearly attacking Barbara before snapping out of it and flying away. He makes it back to Bruce just as he changes completely, and has just enough control left to beg Bruce to help him before he loses it and attacks.
* Batman Beyond Batman's trust once again before going straight, and Terry wasn't interested in leaving his steady girlfriend for her. As a conciliatory note, the end of the episode reveals that her actions convinced her brother to leave the gang as well so she's not entirely alone. However, in the follow-up comics, they did date, on and off, and remained good friends - Melanie even became a hero.
* Batman Beyond being mass produced and refined into a nicotine patch-style form colorfully known as "slappers", the hot new street drug for athletes who want a leg up on the competition and gang bangers who need a quick pick me up before a rumble alike. Just watch out for that 'roid rage. Bane is also briefly seen and it's clear that he has paid the price for a lifetime of Venom usage. He's a withered and comatose husk hooked up to life support who is so dependent on Venom that he needs it just to stay alive.
* Batman Beyond both Terry and Maxine assume that she's being targeted by the Jokerz because she was working on a program that could identify them. The truth is they targeted her just because she had a higher grade on a test than one of their members.
* Batman Beyond. Bruce is disgusted when he finds out, and him taking back control of his company becomes a minor plot thread for the series.
* Batman Beyond: Bruce is telling Terry about an incident from his days as Batman:
* Batman Beyond, Bruce Wayne and Barbara Gordon had a romantic history, and now she leads the GPD.
* Batman Beyond, but it's the armor that ended up damaging his heart due to the strain.
* Batman Beyond; but that character is an avowed Psychic Supremacist criminal foot soldier (in other words, exactly the wrong person to be giving scientific exposition).
* Batman Beyond, but the creator decided to have them stay purely as friends.
* Batman Beyond, but wearing it actually aggravated his heart condition.
* Batman Beyond case, he says, because it sounds too "high school". Terry eventually discovers that it's not a ghost behind the bizarre happenings, but rather a telekinetic teenager who got his powers when a robot's remote control malfunctioned.
* Batman Beyond characterization into an outright villain who orchestrates Max's kidnapping out of jealousy over Terry.
* Batman Beyond Chelsea and Blade seem to have a new boyfriend every episode, frequently each other's previous flames. Nelson Nash also bounces between girlfriends more than once.
* Batman Beyond CMOA page and find all of the Old Bruce Entries. 99.9% of those are this, the other .1% is ass-kicking resulting from this.
* Batman Beyond convinces him that it's time to hang up the cowl, setting the stage for Terry to take it up years later.
* Batman Beyond Dana, as she is almost never in danger at the same time as some bigger problem.
* Batman Beyond Derek Powers sees that he has transformed into a glow-in-the-dark radioactive skeleton man, his immediate reaction is to begin laughing maniacally. The doctors are appropriately freaked out.
* Batman Beyond Derek Powers' son Paxton initially seems concerned for his father's health and safety. Paxton later reveals that he purposely set up the protest by the Verdeza activists in order to expose his father as Blight. He then hired Batman to search for Blight pretending to plan to help him when he was actually intent on killing Blight and taking control of the company for himself.
* Batman Beyond did this to make the future seem more real, by having slang terms being slightly different. Terry would often utter 'slag it' when he was agitated. It's not a new slang term (being used in both real life British and in ''Beast Wars').

* Batman Beyond: District Attorney Sam Young's reelection campaign in "Eyewitness" had it mentioned that, during his tenure, the District Attorney's office had a decrease in the ratio of plea bargains for violent crimes.
* Batman Beyond doesn't last, Melanie wearing Terry's iconic jacket is a visual cue of how serious their whirlwind romance is. Terry's longtime girlfriend Dana is also spotted wearing the jacket on occasion in several different episodes.
* Batman Beyond dressed in the remains of a purple suit and boutonniere, implying that it is the corpse of the original Joker.
* Batman Beyond, during a conversation about Terry's girlfriend, an elderly Bruce Wayne admits that he had relationships with a lot of women over the years, including known superheroes like Wonder Woman all the way down to Barbra Gordan during her days as Batgirl, before she moved on to follow in her fathers footsteps as a police officer. He explains that all the relationships ended because the women gave up on him after realizing he would never give up being Batman and settle down with them. He tells Terry this now that he is Batman as a warning about his own relationship.
* Batman Beyond (e.g. cutting a moving car in half). Examination by Wayne reveals that the blade terminates in an edge thinner than a molecule.
* Batman Beyond ended up winning, and his stint as president was many things, though it's probably safe to say that "boring" wasn't one of them.
* Batman Beyond episode "Curse of the Kobra" after Zander kidnaps Max.
* Batman Beyond episode "Disappearing Inque". Aaron enjoys it, as he is infatuated with Inque, but she simply used it to get out of a sticky situation and she hits and threatens him right afterward. She's not a nice lady.
* Batman Beyond episode "Disappearing Inque" has spent months talking to the frozen Inque as if she were his confidant; he's fired when it gets to the point of kissing her ice block. Inque, who was conscious the whole time, is not happy about it after she gets out. He'd later be on the other end of this at the end of the episode.
* Batman Beyond episode "King's Ransom" has both Melanie and the Royal Flush Gang she left working this way. Melanie has a traditional hard times job working food prep in a restaurant, while her family laments that they have to steal for hire instead of for themselves.
* Batman Beyond episode "Out of the Past", Bruce Wayne walks out of a campy musical depiction of his days as Batman.
* Batman Beyond episode "Out of the Past", the incident that convinces the elderly Bruce Wayne to give a chance to the obviously-quite-fantastical youth-sustaining Lazarus Pits... is when he tries to save a fallen pedestrian from being run over by a truck, only to almost be hit himself because age has slowed him down that much.
* Batman Beyond episode "Out of the Past". They said in the commentary that he would have been around mid to late eighties.
* Batman Beyond episode "Revenant", an invisible force is terrorizing the school, which Terry's friends think is a ghost.
* Batman Beyond episode "Shriek", where Walter Shreeve, a sound expert, demonstrates his powerful sound weapon to the corporate head, Derek Powers. Shreeve finds he has a tough job selling his technology when Powers notes that for regular tasks like demolition, conventional tools like dynamite are just as effective and cheaper than some exotic new technology.
* Batman Beyond episode "The Final Cut," the last surviving member of the League of Assassins blackmails Batman into protecting him from the villain who has wiped out the rest of the League by hiding a bomb in Gotham City, programmed to go off if he does not enter the proper code every twelve hours. It doesn't do him much good.
* Batman Beyond, even for his secret identity. Conveniently, the issue is settled for them when the reporter loses control of his powers, ultimately helplessly falling through the floor... and presumably continuing to fall until he reaches the Earth's core. Bruce also figured out that the reporter murdered the scientist who invented the intangibility technology and stole his work, making his final grisly fate quite karmic.
* Batman Beyond. Even the music is a contrast, favoring dirty industrial rock and electronica as opposed to the orchestral themes of before.

* Batman Beyond featured the animated debut of lesser-known Batman villain Spellbinder, but changed his first name from "Delbert" to "Ira".
* Batman Beyond flat out states that this was to introduce more mystery and tension into the book.
* Batman Beyond, fully absorbed finale episode, "Epilogue", when Terry decides he's going to propose to her at the end of the episode.
* Batman Beyond: Genetic splicing and other kinds of augmentation were a running theme on the show.
* Batman Beyond. Gotham City's evolution seems quite natural- still crowded, dirty, and corrupt, only now the cars can fly.
* Batman Beyond. Guess which of the three goes down without landing a single hit on the bat. Granted, the placement of the chainsaws makes their use in combat awkward at best — Kneejerk's primary function seemed to be slicing open safes and vault doors.
* Batman Beyond had a body made of a black viscous fluid, and could shape herself at will.
* Batman Beyond had a similar case with the supervillainess Inque and a random sap named Aaron Herbst who supervised her while in prison. Aaron ends up requesting to be given shapeshifting powers like Inque, to which Inque responds by giving him only half the treatment, causing him to mutate into a liquidated, powerless blob, and in the end being on the receiving end of this trope.
* Batman Beyond had the Stalker, an African hunter whose spine had to be cybernetically replaced after a run-in with a jungle cat, granting him such unnatural strength that he was able to exact his revenge with his bare hands and soon tired of hunting normal animals. His intro episode had him playing this trope with the show's titular character, believing him to be the inheritor of some sort of "bat totem" that would be the ultimate test of his strength.
* Batman Beyond has a father who pressures him into fighting the guys who are bullying him. He ends up snapping and sending a giant remote-controlled robot after his tormentors and, later, after his own father.
* Batman Beyond has Shriek's lackey Ollie. He has pale skin, purple hair, pointed ears, and black sclera, but it isn't stated whether or not his unusual appearance is because he's an alien or if he's partaken in "splicing".
* Batman Beyond, has the titular robot equipped with a card that can generate unlimited money, which often becomes a plot point.
* Batman Beyond... He doesn't end up with any of them and remains a single, old man.
* Batman Beyond he put an end to his personal and crime-fighting partnership with both of them.
* Batman Beyond: He's an old, bitter ex-vigilante. He's a young, reckless ex-con. They fight crime.
* Batman Beyond, he tries to remedy this by killing Maxine Gibson, the student that got the highest score.
* Batman Beyond, Howard has a synthoid girl custom made, with the assertion that, personality-wise, she would be completely devoted to him (This one comes back to haunt him).
* Batman Beyond individualized its background characters, but colored their clothes and sometimes their skin and hair uniformly so that foreground characters would stand out.
* Batman Beyond in her first episode. She's still wearing it when they part, but somehow Terry manages to be wearing it in the next scene.
* Batman Beyond: In "Hidden Agenda", after scoring second-highest on an exam, one character was told by his mother "that would make you the winning loser." Said boy then strikes a vendetta against the top scorer, who happens to be Batman's best friend. To point out how ridiculously high the standards of the guy's mom were, he got 2391 out of 2400. The only person above him got a perfect score.
* Batman Beyond in his wrists and knees. The latter proved to be a liability as they got stuck on walls and floors.
* Batman Beyond. Inque was vulnerable to freezing and water in her first

appearance, but in later appearances learned to curl herself into a ball, protecting the bulk of her mass from being frozen and breaking free in short order, or modifying her chemical makeup to resist water. Batman himself uses this against Inque, protecting himself from being enveloped by her with an electricity based contact defenses.
* Batman Beyond, into the super-powered Blight was actually therapy for a dose of his own experimental nerve gas. Somehow, their combined effects turned him into a glowing green skeleton, possessing explicitly radiation-based superpowers and weaknesses, with a half-life of one season.
* Batman Beyond is the son of Bruce Wayne, the original Batman, though not exactly by the traditional means.
* Batman Beyond It'd probably be easier if it weren't for his condition acting up at inconvenient times, and that annoying kid in a batsuit messing up his plans.
* Batman Beyond: It's revealed in the episode "Ace in the Hole" that every year, on the anniversary of his parents' murder, Bruce Wayne travels to Crime Alley, the site of said murder, and leaves a bouquet of flowers on the spot where they died. It was during one such visit that he met his loyal dog, Ace.
* Batman Beyond, it still significantly damaged her form and it only took the one shot to put her out for the count. A later attempt to freeze her failed when she compressed herself into a ball, keeping the majority of her bodymass safe from harm.
* Batman Beyond, Mad Stan puts a bomb on oblivious Zeta and sets him loose in Gotham.
* Batman Beyond: Ma Mayhem's sons were reported to have been "freed on technicalities from a 10-year sentence".
* Batman Beyond, Melanie/Ten goes to Terry in the morning, then the two of then are passionately kissing on his bed. Cue to the evening where they are talking before she leaves.
* Batman Beyond moment for Terry when Bruce arrives to bail him out in a fight with Inque while wearing the aforementioned exosuit.
* Batman Beyond: Most episodes have Terry fighting one-shot villains, though recurring villains such as Inque, Powers, Shriek and others are also fixtures of the show.
* Batman Beyond mutant capable of assuming malleable or even liquid forms, hence why she chose the alias "Inque". However, she remains vulnerable to electricity, which messes with her cells, and water, in which she dissolves.
* Batman Beyond Naturally, it became an allegorical aesop for drug abuse and extreme body modification.
* Batman Beyond nature of the device itself means mass-producing it will be too expensive.
* Batman Beyond, Nelson complains it's not fair, so Willie agrees to fight him without powers. However, when Nelson gets the upper hand, Willie goes back on his word and uses telekinesis to block Nelson's punch and then send him flying.
* Batman Beyond Nelson is bullying Willy Watt. When Terry steps up to defend him (Nelson has witnessed Terry kicking the asses of a Jokerz gang), Nelson considers it for a moment and backs down.
* Batman Beyond, not at all like the dangerous and ruthless tycoon his father was. Squandering his newfound position on wine, women, and song, neither Bruce Wayne nor Terry took him seriously at all, and when he eventually got greedy and double crossed the Royal Flush Gang after hiring them to steal artifacts, he was hauled off to jail. (And he pretty much ruined the Royal Flush Gang's once stellar reputation in the underworld in the process.) Paxton did threaten to buy the courts and have Barbara Gordon and the rest of the police department working in the sanitation department when his lawyers were done, but that was likely an empty threat. The important thing is, Wayne was finally able to regain full control of his company again.
* Batman Beyond, one of Mr. Freeze's ice ray guns comes in handy against a villain who can turn into liquid.
* Batman Beyond only appears in unrelated comics. No word on what happened to their

children.
* Batman Beyond powerful pyschic whom they want to join their ranks. She's so powerful that she pretty much curbstomps them on her own once she starts actually fighting back.
* Batman Beyond predecessor Clayface (though, being denser, it took a while for it to work on him.)
* Batman Beyond pretty much in flux by that point for unrelated reasons.
* Batman Beyond: Ra's Al Ghul loves immortality so much he's gone through three separate methods of beating back the grim reaper.
* Batman Beyond), regardless of gender and ethnicity, and of the three spliced hoods in "Splicers" one's female and one's black.
* Batman Beyond resulting in no ill effect to Ramrod. No blood, no nothing, he's perfectly fine.
* Batman Beyond: Return of the Joker: After Joker attacks Bruce at Wayne Manor, Terry comes in to find the house a wreck and Bruce slumped over the Batcomputer with the telltale rictus grin of Joker venom. As Terry checks his pulse and heartbeat, Bruce springs back to life long enough to tell Terry about the antitoxin, which ultimately saves his life.
* Batman Beyond: Return of the Joker: after Jordan Pryce helps the Jokerz with their thefts, the Jokerz inform him that he's become a loose end. And loose ends should be tied up...
* Batman Beyond: Return of the Joker and Harley. It's pretty damn creepy.
* Batman Beyond: Return of the Joker, and NOT coincidentally they form a smiley face.
* Batman Beyond: Return of the Joker and promises to "break [Joker] in two" before Joker uses a sleight of hand to escape and gain the advantage.
* Batman Beyond: Return of the Joker, and then throws the knife at Joker's face. He ducked, but jeez.
* Batman Beyond: Return of the Joker: Arkham Asylum has become this in the future.
* Batman Beyond: Return of the Joker a teenaged boy. There is also one conspicuous Noodle Implement: a plunger. Somehow, the presence of the plunger takes the scene from creepy up to nightmarish.
* Batman Beyond: Return of the Joker, Batman and Batgirl return to the condemned Arkham Asylum. As they walk through the dilapidated halls, they hear Harley Quinn singing "Hush, Little Baby." And it only gets worse from there.
* Batman Beyond: Return of the Joker be the Bat. Chucko even casually remarks that he can't understand why they've been sent after some "random" kid, but shrugs it off because it's at least fun.
* Batman Beyond: Return of the Joker fans that lasted for over a year. That unrest was thankfully quelled when the film developers retained the original version and eventually released it on DVD as "the original, uncut version" under the PG-13 rating on April 23, 2002 (just three days after the third anniversary of the Columbine tragedy) following an online petition to have it released. The same uncut version would be digitally remastered and released on Blu-Ray nine years later.
* Batman Beyond: Return of the Joker, flashes were added to all the fight scenes. They were removed for the later PG-13 version.
* Batman Beyond: Return of the Joker him, and wanted to prove that he had broken Robin's mind.
* Batman Beyond: Return of the Joker him into "Joker Junior", and ultimately hand the kid a gun and tell him to shoot Batman. At the last minute, "J.J." shoots Joker instead, and the Clown Prince of Crime's last words?
* Batman Beyond: Return of the Joker in an effort to break the clown mentally in a manner Batman never envisioned.
* Batman Beyond: Return of the Joker. In fact almost every time he defeats them, it's by slamming them into each other in one way or another.
* Batman Beyond: Return of the Joker invoked this trope twice. First was at the beginning of the movie, where Batman was trying to stop the Jokerz from making off with advanced equipment. One of the pods smashed into a building causing an explosion, as well as another one with the equipment itself exploding.

Realistically, people would have been killed by the explosion. The second is near the end of the movie, where Joker was using his hacked into defense satellite "toy's" laser to gun down Batman and kill anyone nearby, even demolishing a theater that was implied to be full of people (in the uncut version, the edited version made the building abandoned), and later activated it (albeit accidentally) to have it target his own lair. Realistically, people would have died even before Batman managed to stop him once and for all.
* Batman Beyond: Return of the Joker, it's heartwarming to see at least one continuity where their counterparts settled down together.
* Batman Beyond: Return of the Joker: Joker's eyes glow red in the shadows. So do his teeth.
* Batman Beyond: Return of the Joker, Jordan Pryce is obviously supposed to make the viewer think he's the Joker in disguise. He has similar features and the same voice actor.
* Batman Beyond: Return of the Joker laugh, he's laughing at how pathetic the Joker really is. The façade cracks, and only the unhinged monster remains from that point on.
* Batman Beyond: Return of the Joker: One of the Jokerz mouths off to the Joker for not telling them his plan after they fail a heist...
* Batman Beyond: Return of the Joker sent out promotional copies of the movie before they decided to edit it, so certain animation sites were able to spot the differences in the retail version and report them to the public. WB eventually released the "Original Uncut Version" with a PG-13 rating to accommodate the content, which ranged from minor things such as extra punches to major things such as an alternate death scene.
* Batman Beyond: Return of the Joker. Terry, however, doesn't allow it, and locks the door out to force him into one of these.
* Batman Beyond: Return of the Joker, Terry is contemptuously dismissed by the Joker before their final confrontation:
* Batman Beyond: Return of the Joker, the beam passes over what seems to be an abandoned building. Originally, it was a full, operating movie theater, until the animators were forced to change it. Similarly, the commentary sarcastically notes that all the cars knocked off the road by the beam were empty robot-driven cars.
* Batman Beyond: Return of the Joker: The box art has the Joker's (green-tinted) head doing this.
* Batman Beyond: Return of the Joker the Comissioner either somehow didn't know or was lying out of fear that the Batfamily might try to take revenge if they knew.
* Batman Beyond: Return of the Joker. The flashback ends with Barbara/Batgirl trying to console him.
* Batman Beyond: Return of the Joker - then pulls it again, ejecting the flagpole at high speed and impaling the guy in the chest. This is based on a scene from the comics, in "Dreadful Birthday, Dear Joker!" (Batman #321).
* Batman Beyond: Return of the Joker, were more of the "slightly better than the series" variety, as opposed to feature quality.
* Batman Beyond Revisited: A lot of what Chainsaw does seems to be purely sadistic pleasure.
* Batman Beyond Revisited and an honorable fighter…which is how Jake manages to defeat him.
* Batman Beyond Revisited, and seems to rule over his flunkies with fear.
* Batman Beyond Revisited: Chainsaw, though in an unusual example of this trope, his girth is pure muscle.
* Batman Beyond Revisited: Jake’s first day off in years, on a date, and Payback interrupts it by crashing their limo and killing their driver.
* Batman Beyond Revisited: Jake’s reaction to Inque’s elegant dress.
* Batman Beyond Revisited: Or with ice; it’s the way that both Jake and Chainsaw first try to defeat Inque.
* Batman Beyond, Robert Vance does this because of an uncurable brain disorder. However, after being shut down for 35 years, he explores Gotham, discovers Terry's suit, and decides to find a new body.

* Batman Beyond: Said in its entirety by Inque about Terry McGinnis. It is also the motive behind Derek Powers's murder of Terry's father, which prompted Terry to become Batman.
* Batman Beyond seemed reasonably amicable until Warren's death. Terry however had some issues with the divorce and living with Warren, and joined a street gang before the start of the series and was caught shoplifting, prompting Warren to spend more time with both of his sons.
* Batman Beyond seems this way. She's a deadly combatant with a sword, incredibly fast and agile, and very hard to lay a glove on, but when Batman actually manages to do so, it seems to hurt her badly.
* Batman Beyond. Several present day characters briefly pick it up from her.
* Batman Beyond's future, the streets of Gotham City are plagued by a gang called the "Jokerz." Bruce is not impressed.
* Batman Beyond shapeshifting blob Inque uses this as her primary method of attack and they're stronger than steel, no less, though in some instances, her body usually slides into either one single, thick tendril or a plethora of them at once.
* Batman Beyond. She knows his secret identity by then, so at some point, she either figured it out or Terry wised up and just told her.
* Batman Beyond, she turns out to be a robot that he commissioned from the same company that makes Batman's robotic training dummies. Eventually he gets her reprogrammed to act more like a real girlfriend, which results in her becoming lethally jealous of the new female friends that the nerd gains through his new-found popularity.
* Batman Beyond shown the harmful effects it has on those who are sent there.
* Batman Beyond shows a group of kidnappers watching a TV news report about their crime. This is preceded by a business news item that introduces two bits of exposition: Bruce Wayne is now considerably older, and a rival named Derek Powers has been trying to take over his company.
* Batman Beyond shows people from the criminal organization KOBRA dressing up as cops to get Batman to willingly hand over a boy they've been targeting, who knows what Batman looks like under his mask.
* Batman Beyond shows them when interfacing with the Batmobile, or under its surface when damaged.
* Batman Beyond, since this is an elderly Bruce Wayne who retired from being Batman decades ago.
* Batman Beyond's Inque. A woman with a sexy voice who's been turned into a living but shapely blob. Creeee-pyyy...
* Batman Beyond sneaks into the Batcave by covering and blending with the outer surface of the Batmobile.
* Batman Beyond, so when the action comes close to her, she usually focuses on staying out of the way. But when she can't get out of the way, she fights back. She actually successfully protected Batman at one point.
* Batman Beyond speak or just chooses not to. (She does cry out in pain a couple of times if she's hit hard enough in a fight.)
* Batman Beyond steals an intangibility belt, kills its creator (albeit accidentally), and uses it to walk through walls and get dirt on Gotham City's celebrities for his tabloid newscast "The Inside Peek".
* Batman Beyond, such robots are banned by law. Naturally, in the episode "Terry's Friend Dates a Robot" we actually see one. It goes berserk and has to be taken down by Terry.
* Batman Beyond, Terry argues with his girlfriend. A couple of their friends eat snacks and watch.
* Batman Beyond, Terry defeats Shriek in their first encounter by throwing a batarang onto his suit, amplifying its range making him hear everything in the city at full blast, effectively turning him deaf.
* Batman Beyond, Terry encounters a new recreational drug called "slappers", transdermal patches which grant super-strength and occasional fits of "roid rage". When Bruce identifies the main chemical as Venom, he immediately suspects Bane is behind it; and Terry visits Bane, where we see what years of Venom use does to you.

It isn't pretty. The real villain turns out to be Bane's orderly, who dies during his battle with Batman after he falls onto a box of slappers, overtaxing his heart.
* Batman Beyond, Terry has to resort to this in two stories to Paxton Powers and Inque's daughter respectively when they screwed over their parents, profited from it and Batman can't bring them to justice. Namely, he visits them and suggests most heavily to each that their supervillain parents would possibly come after them for revenge and may strike at any time. While Paxton isn't fazed, considering he could afford increasing his security detail, Inque is unsettled.
* Batman Beyond, Terry is told that there's a ghost in the girls' shower (and he has a batsuit that has a built-in camouflage system).
* Batman Beyond: Terry nearly says this to Blight before Bruce interrupts him.
* Batman Beyond, Terry pretends to be a pizza delivery boy in order to infiltrate Shreeve's laboratory. Although Shreeve is initially suspicious - the classic "I didn't order any pizza," - Terry manages to smooth it over by pretending that he got the address wrong and now the price of the pizza has to come out of his own paycheck, appealing to Shreeve's sympathy (Shreeve is desperate for funding for his work and can understand a minor act of rebellion against an unsympathetic corporate overseer) and offering to split the extra-large pie. They manage to have a very cordial conversation for a while over the pizza, until Terry pushes his luck with one too many probing questions about Shreeve's technology and rouses his suspicions again.
* Batman Beyond, Terry rescues his best friend Max from the Cobra cult and she's so glad to see him that she gives him a very cute glomp... which is ruined seconds later as he breaks free because he had four cracked ribs from trying to save her the first time.
* Batman Beyond. Terry too; the batsuit might enhance his strength compared to a normal human, but considering the sort of opponents he tends to go toe-to-toe with, he still is usually outmatched in terms of sheer physical force. One episode even has Terry take down the new Batsuit, which has been taken over by a malevolent AI, using nothing more than his skills, Batman's old utility belt, and Nightwing's old mask.
* Batman Beyond, Terry tries to invoke this trope upon meeting a new Catwoman. She refuses. This trope is later played straight when she ends up sleeping with Dick Grayson.
* Batman Beyond that Batman had during the campy Silver Age, when animal sidekicks were something of a fad in comics. But instead of taking him as a sidekick, Bruce simply adopts Ace after he retires from crime-fighting, and Ace gives the elderly Bruce some much-needed companionship, with Alfred dead and Bruce having fallen out of touch with his old friends from his days as Batman.
* Batman Beyond, the assassin Curare owned a scimitar, sharpened by lasers to an edge no thicker than a molecule, and she damn sure knew how to use it, cutting everything from park benches, steel poles, and reinforced doors down! However, not a single person felt the steel of her blade.
* Batman Beyond: The episode "Rats" has Terry's little brother saying this about Terry and Dana, but Terry interrupts it at the last minute, throwing one of his shoes at the door.
* Batman Beyond: The episode "Shriek" briefly revisits some abandoned buildings Bruce remembers from his youth, including the old police station where a wanted poster for the Joker still hangs on a wall.
* Batman Beyond: The fate of the Terrific Trio from "Heroes". 2D Man and Freon were sucked into a ventilation system (the latter notably coming apart due to her body being vapor) while Magma was hit by water and solidified. Considering there were plans for 2D Man and Magma to return in the comic tie-in to restore Freon, the implication, despite how horrifying it is, is that they did not die.
* Batman Beyond, the popular music portrayed is mostly a combination of metal and techno—but with the visual production values cranked to even more insane levels in videos and concerts.
* Batman Beyond: There is an organization of people with naturally occurring psychic powers, and Willie Watt's telekinesis was treated in an oddly normal

manner, although he wasn't born with it.
* Batman Beyond, there was Curaré, the best (supposedly) member of the Society of Assassins, a group who themselves who were notorious for being the best. Accepting an assignment to assassinate DA Sam Young brought her perfect record to an end at the hands of Batman and Barbara Gordon, and made her a target of the rest of the Society... which in turn led to the destruction of the whole organization.
* Batman Beyond, the "Royal Flush" villain group flies on giant playing cards. Spellbinder, another villain, has his own mechanical device to fly on as well, although it's more spherical than board-shaped.
* Batman Beyond. The title sequence highlights the scale by initially showing Old Gotham, a city whose skyscrapers are on par with a modern-day metropolis, before Neo Gotham comes into focus and literally dwarfs the older buildings in comparison. In addition to public transportation which travels from building to building, there are also elevators that go up-and-down as essentially vertical trams.
* Batman Beyond. The villainous audio engineer, Shriek, has invented a tuning fork that uses soundwaves to stimulate the pleasure centers of the mind. Instead of paying his mooks with money, he allows them to spend time with it.
* Batman Beyond thing, forcing him to go it with just a utility belt and domino mask rather than flight, invisibility, super strength, etc. Turns out he picked up a few of the bat-skills from Bruce after all.
* Batman Beyond, thinking the film would have had a stronger impact with Tim snapping due to his past torture and becoming the Joker entirely by himself.
* Batman Beyond this in one of the DVD special features, saying that their big fashion statement of the future was "a world without lapels". The one notable exception to the lapel rule, in fact, is Terry McGinnis, whose regular brown jacket sports a little lapel/collar on it.
* Batman Beyond to confront Inque and save Terry McGinnis. At one point he punches Inque with it, sending her fly accross the arena they're in.
* Batman Beyond to flatten his car, Terry tells him that "The line starts with me and goes around the block. Twice."
* Batman Beyond top-secret part of the Batcave (where he keeps all of his Kryptonite). Is there a trope for this sort of thing, where a character walks past something every day and they have no idea that there's actually something there?
* Batman Beyond to sabotage competitor Foxteca, by oozing herself into computers and machines to damage them.
* Batman Beyond to save himself. Bruce's reactions after the fact indicate that it was horror at this act rather than his failing health that finally convinced him to quit.
* Batman Beyond), tries to suffocate Terry by forcing herself down his throat.
* Batman Beyond, tutor, and Alfred. She is also a strategist and thoroughly understands tech. There's also that highest-scoring student in the school thing.
* Batman Beyond: Using his camouflage gear, Terry (aka Batman) goes into a station monitored by laser shooting cameras. He ends up compromising his position when he tries to shoo a curious cat away from the building. Also reinforces his position as a hero.
* Batman Beyond was programmed to be this way, but his A.I. eventually evolved into an actual personality and he decided he no longer wanted to continue killing and imitating his victims.
* Batman Beyond weapon is a scimitar with an edge that has been sharpened with lasers to the thinness of a single molecule.
* Batman Beyond. What transpires thoroughly creeps both Bruce and Terry out.
* Batman Beyond. When Barbara Gordon (former Batgirl, now commissioner) returns to the Batcave to warn Batman, she isn't sure which of them she should be speaking to.
* Batman Beyond when Bruce wonders aloud if the poor guy is doomed to fall to the Earth's core; kind of a harsh punishment for a relatively minor baddie.
* Batman Beyond when it lands in the corner pocket. Then Batman drops in, at which point Fat T promptly attacks him with the cue. It doesn't take.
* Batman Beyond: When Mad Stan blew up the City Hall (in a virtual reality simulator owned by Spellbinder) one of the things he expected from this was "no

more jury duty".
* Batman Beyond when you realize the tablet that he's painting with is devoid of paint and the canvas he's vigorously moving the brush across is completely blank...
* Batman Beyond, where he stops being simply apathetic and starts being straight up merciless.
* Batman Beyond, which is even more disturbing than it sounds. Ra's can speak with his Ra's voice, even though he has the body of a woman... the transition is outright creepy. Furthermore, Ra's still acts in a very effeminate manner, despite the voice. Remarking on the situation:
* Batman Beyond, which is set several years later and depicts the reunion and rekindling of the romance between the two, she still has the jacket and is in fact wearing it when she first appears in the second chapter.
* Batman Beyond, which leads to Batman tracking him down and finding out he's only gotten worse over the years, using an experimental growth hormone on the dogs to turn them into monsters. After fighting the biggest one, Batman puts him out of business.
* Batman Beyond, which was definitely a "near-apocalypse", but the instigator of that conflict was Darkseid, not Al Ghul.
* Batman Beyond, while the show itself wasn't an example, the original pitch from the network specifically requested a "Batman in Highschool" series. The creators, being forced to make the show, decided to make it dark and adult, in response.
* Batman Beyond who everyone likes and always eschews unnecessary fighting. Bruce Wayne, on radio contact with Terry, has only a suggestion for him: "Fear the one you love most", suggesting he consider Aquagirl with extreme prejudice because of the crush every male hero, including Terry, usually has on her.
* Batman Beyond writer, and finding a typewriter. He pokes at it and asks, "What is this? Some kind of word processor?"
* Batman Beyond, Zander falls for Max because she is tough and sassy, unlike his sickeningly submissive servants.
* Batman bin Suparman ("Batman, son of Suparman") is a Singaporean criminal.
* Batman: Black and White: "A Black and White World" has an out-of-nowhere cameo by Lobo near the end. Art for the story was by Simon Bisley, who made his name in America doing the art for Lobo's first solo title.
* Batman: Black and White, "A Matter of Trust": A doctor friend of Bruce's talks him into babysitting her young sons when she has to go deal with a medical emergency and can't get a sitter at short notice. He and the boys completely fail to get on intially, but when she gets home she finds Bruce asleep with the two boys curled up asleep in his lap.
* Batman: Black and White, "A Matter of Trust": Bruce Wayne agrees to keep an eye on a doctor friend's twin toddlers when she has to deal with a medical emergency and can't find a sitter at short notice, and rapidly finds himself in a domestic situation that's entirely beyond his experience or training.
* Batman: Black and White, "A Matter of Trust": Bruce Wayne gets stuck babysitting a friend's rambunctious toddlers. At one point, he considers calling in Alfred to help and pictures him immediately taming the toddlers charges with "secret butler knowledge".
* Batman: Black and White: "A Matter of Trust" features a one-off character named Robbin Carnahan, who was a friend of Bruce Wayne's when they were in school together. When he grew up and started distancing himself from his old friends so he could do his loner vigilante thing, she resolutely refused to be distanced because she knew Bruce was a good friend and worth holding onto. He values her friendship accordingly, and even agreed to be the godfather of her firstborn, which is where the plot starts.
* Batman: Black and White, and as they head to the canteen after the shoot, Joker points out that Batman always gets the big dramatic splash pages, while Batman admits he wishes that he got to make speeches.
* Batman: Black and White and Simon Bisley called "A Black & White World" shown Batman and the Joker working on a movie-like set, reading over their lines and commenting on the corniness of the dialogue, as well as the general way characters

in comic books are treated and/or mistreated; the Joker comments that he never gets big dramatic splash panels like Batman, while Batman retorts that he is the one who gets to make all the big speeches. Oddly enough, Lobo is their director.
* Batman: Black and White anthology series, Batman tracks a serial killer with some kind of split personality condition, including an alternate personality who's dramatically muscled and capable of superhuman feats of strength and agility. At the end of the story, Batman manifests his own similar alternate self to confront him.
* Batman: Black and White anthology series, reprises the parable of the Good Samaritan, with Batman in the role of the gravely injured man whom nobody will stop to help. In this updated version, the passersby include an African American teenager, an alcoholic, and a policeman who refuses to help because he doesn't want to deal with the paperwork he'd have to do. In the end, this being Gotham, there is no good samaritan, and Batman has to summon up his heroic willpower and drag himself to an emergency room.
* Batman: Black and White: "A Slaying Song Tonight" has a scene where Batman stands on a rooftop looking down on a crowded street, reflecting that any one of the people below could be the hitman he's searching for, while scraps of conversation float up around him. A couple of the scraps of conversation are hints to the hitman's activities, such as a shopkeeper puzzling over someone breaking into his shop and stealing a single pillow.
* Batman: Black and White: "Blackout", set in World War II, starts with Batman investigating a window that's showing a light in defiance of the blackout order, which leads to him discovering a jewel robbery in progress, which leads to him learning that the owner of the jewels was using them to fund a Nazi spy ring.
* Batman: Black and White: "Broken Nose" features a one-off villain who robs banks in a home-made suit of powered armor. Batman's first fight with him lasts around two minutes and ends with Batman limping away with a broken nose, but Batman also spent the time assessing the armor's weaknesses; the second fight lasts around the same amount of time but ends in a victory for Batman.
* Batman: Black and White by their real names; a moment later, he adds, "You'll forget all these names in a minute, by the way", and Batman does. (The fact that this is ethically a bit dubious may be deliberate; he goes on to explain that the reason he retired was that he was worried that being able to avoid effort and overcome any problems just by wishing them away was beginning to erode his morality.)
* Batman: Black and White: "Devil's Trumpet" opens with a two-page account of how the legendary trumpet's first owner was dragged off to hell by a demon. Near the end of the story, the man who murdered the trumpet's latest owner to possess it for himself is captured by Batman, in another two-page scene that visually echoes the composition of the opening, with Batman in place of the demon, and features very similar narration.
* Batman: Black and White: Early in "Monsters in the Closet", there's a newspaper front page with the headline "Langdale heiress missing" and a photograph. The missing woman turns up later as one of the mad scientist's victims, with a close-up framed to resemble the newspaper photograph (she's even, somewhat improbably given what she's been through, still wearing the same elaborate earring).
* Batman: Black and White featured a story where a woman faked her own death by murdering her twin sister and stealing her identity.
* Batman: Black and White (five short Batman stories in each issue, each from a different writer and artist)
* Batman: Black and White hired to put in an appearance for the target's daughter. Batman figures it out in the nick of time and stops the hitman just before he reaches the house — then puts the costume on and does the Santa appearance himself.
* Batman: Black and White: In "Dead Boys Eyes", a criminal lures Batman into a trap and shoots him in the back.
* Batman: Black and White: "In Dreams" opens with one-off character Karen having a nightmare in which she's menaced by the Batman.

* Batman: Black and White: In "Fortunes", a private detective is hired to find a missing woman and discovers that there's been murder done. His client is the murderer, who hired him apparently on the basis that having an independent third party discover the body would make it less likely for suspicion to fall on her than if she'd "discovered" the murder herself; unfortunately for her, it doesn't take him long to see through the false clues planted at the crime scene and identify the real culprit.
* Batman: Black and White: In "Fortunes", a woman murders her identical twin sister and takes her place, planning to collect on her own life insurance.
* Batman: Black and White: In "Fortunes", Batman teams up with a private detective named Ashraf Batna. Batna dresses like a stereotypical private eye, but is an immigrant from Algeria who brought his family to America looking for a better life. He tells Batman that Gotham City is only slightly less dangerous than their old home in Algeria, but he sticks with it because there's not much call for a private detective in safer places.
* Batman: Black and White: In "Funny Money", a criminal gang hijacks a shipment of the special paper that real banknotes are printed on so that they can use it to print undetectable counterfeit hundred dollar bills.
* Batman: Black and White: In "Good Evening, Midnight", an escaped prison inmate hijacks a school bus, and the driver's attempt to fight back causes the bus to veer off the road and end up hanging precariously half off a bridge. Batman is called in to save the day.
* Batman: Black and White: In "Good Evening, Midnight", the Bat-Signal summons Bruce to deal with a bus hijacking just as he was about to sit down to dinner; the presence of a cake with a candle indicates that it's his birthday.
* Batman: Black and White: In "Greetings from... Gotham City", a small-town boy who's moved to Gotham writes postcards home to his mother to let her know he's settling in all right, but doesn't mention what he's doing for a living. After the criminal gang he's running with gets busted by Batman, he writes a postcard from his cell apologizing because he's not going to be able to make it home for Thanksgiving, but not mentioning why.
* Batman: Black and White: In "Greetings from... Gotham City", one of the gangsters Batman fights is a dreadlocked brute who does his level best to beat Batman to death with a two-by-four. The last page of the story shows him in his cell sending a nicely-worded postcard to his mom back home apologizing for not being able to make it home for Thanksgiving this year.
* Batman: Black and White: In "Guardian", a police officer, seeing that the Golden Age hero who used to protect Gotham has temporarily come out of retirement, remarks that they could do with someone like him around all the time, "not like that psycho bat-guy" — unaware that Batman is standing right behind him. Batman doesn't make his presence known, but the reader gets a good look at his irate reaction.
* Batman: Black and White: In "Heroes", set in 1937, a pioneering inventor is approached by an agent of German military intelligence with a job offer. When he refuses, the German captures his ten-year-old son to force his compliance.
* Batman: Black and White: In "Monster Maker", Batman battles a gangster who recruits children, while reflecting that mad scientists creating scaly mutants are "kid's stuff" in comparison.
* Batman: Black and White: In "Monsters in the Closet", the mad scientist tries to kill Batman with a shotgun, but aims wide. The shotgun blast hits the containment unit Batman was examining, letting all the monsters loose.
* Batman: Black and White: In "Petty Crimes", a serial killer targets people who break small rules. The first of his victims to be shown is a woman who took twelve items into the Ten Items Or Less lane.
* Batman: Black and White: In "The Black and White Bandit", the villain disguises himself as a nun (in a black-and-white habit) for one of his robberies.
* Batman: Black and White: In the comedic "Batsman: Swarming Scourge of the Underworld", the climactic fight scene takes place in a museum. One of the museum displays is a large vase labelled "Priceless Ming Dynasty Vase", which inevitably gets used as an improvised weapon and doesn't survive the experience.

* Batman: Black and White: In "To Become the Bat", a senator with an election campaign coming up has his lover murdered because she's become pregnant and he's afraid she's going to try and blackmail him.
* Batman: Black and White made out a life insurance policy payable to her twin sister, then murdered her sister in a way that made it look like she herself had committed suicide, intending to impersonate her sister and claim the insurance money. In describing his conclusions, the detective Ashraf points out that she was apparently unaware that life insurance doesn't pay out on suicide, one of several reasons he sums the plan up as "poorly conceived".
* Batman: Black and White: Near the beginning of "Devil's Trumpet", an old bluesman comments about "the soulless crap that these records stores blare at you", gesturing at a nearby store playing the latest popular jazz album — not knowing that the man he's talking to is the headline performer on that very album.
* Batman: Black and White: Non-comedic example in "To Become the Bat", which follows Batman through a murder investigation, intercut with single-panel flashbacks to him learning each skill or piece of esoteric knowledge he uses. There's also a moment where he looks at the female murder victim and gets a single-panel flashback to his mother's death.
* Batman: Black and White opens with a splash panel of a skinny, wild-eyed Santa Claus hiding a machine gun in his sack, going on to reveal that this is a hitman who plans to get near his target by taking the place of a rent-a-Santa hired to put in an appearance for the target's daughter.
* Batman: Black and White powers. After Batman and Green Lantern discover a murder, Green Lantern says that they should report what they know to the police, and Batman argues that given his reputation he can't just walk into a police station to report a crime. In the next panel, they're both standing in a police station — with Batman's reaction making it clear that it's not a time skip and that Green Lantern has just casually teleported them both there.
* Batman: Black and White shows the bullet plowing through Batman's head and causing a fountain of gore.
* Batman: Black and White, the story "Monsters in the Closet" has Batman facing off against a mad scientist who is depraved and entirely bald.
* Batman: Black and White: The villain of "Heroes", a Nazi spy, gets in a fight with the Batman at the top of a skyscraper, and falls to his death.
* Batman: Black and White who fight each other in comic books for a living but are friendly when they're not on set. In one scene, while they're waiting for their next scene to start, the Joker does a crossword puzzle to pass the time.
* Batman: Blue Bunny released an ice of Batman's face, which has silver gumballs and a blue cowl.
* Batman, Bruce is spending the morning sitting beside Wayne Manor's pool, discussing the Gotham Gazette's coverage of last night's Batmanning with Alfred.
* Batman: Bruce Wayne chose the bat as his symbol due to its fear-inducing properties (because bats specifically scared him as a child, and/or the superstitious nature of criminals in general). One of his villains, Man-Bat, is a Were Bat.
* Batman, Bruce Wayne discovers that his mother had investigated child molesters and child pornography as a social worker. The book revolves around him going after the same group his mother had found out about, who are now organizing sex tourism to a thinly veiled Thailand stand-in.
* Batman. Bruce Wayne had promised his friend Thomas Elliot that his parents would be saved by his father (Dr. Thomas Wayne). After Dr. Wayne was only able to save Mrs. Elliot, Thomas lashed out and attacked Bruce for the false hope he gave him. When Bruce tried to fight back he was reprimanded by his father, who consoled Thomas.
* Batman, Bruce Wayne is the only Wayne heir as he is an only child of an only child father. His dad had a brother prior to the 80s named Philip but now Uncle Philip is his mom’s brother. Somewhat subverted in the third generation as he only has a biological child, Damian, but he has four other adopted children (three boys, one girl). Young Damian will be the first Wayne in three generations to have

to split the inheritance.
* Batman. Bruce Wayne, targeted by the Joker and under police guard, takes a non-lethal dose of the Joker's venom so that Alfred can spirit him away in an ambulance and allow him to change into costume. However, before the antidote Alfred gives him takes effect, Wayne has a brief psychotic episode in which he blames all of Gotham for his parents' death and swears revenge. Upon regaining his wits, Batman suddenly understands the Joker's paranoid thought process and deduces that the villain means to kill the entire city.
* Batman. Bruce Wayne took over his late father's corrupted company and turned it into a force against poverty, unemployment, and other societal ills he couldn't handle with a Batarang. Like Luthor's company, it controls most business in Gotham City. This probably explains why Gotham is still a bustling growth city considering the fact that people like Joker run amok on a nightly basis. It is usually second only to LexCorp in international clout, as well; similarly, Wayne is usually described as the second-wealthiest man in the world.
* Batman, but let's be honest, he's just fooling himself. He's a part-timer, you know.
* Batman, but realizes it's taken too. He eventually comes up with the character of Angry Dad after watching Homer's buffoonish antics through the window.
* Batman but she has a more affectionate relationship with him since he never tries to murder her.
* Batman, but the kids now look to be a lot older — their actors were seven and ten at the time of the film's release. This was apparently done so that Gordon could have a deeper relationship with the son but it causes a headache trying to figure out exactly what the timeline for the two films was.
* Batman. But today, Joker's demand for a patent doesn't seem that unreasonable at all, considering that many corporations routinely use genetic mapping to patent animal species as a matter of course.
* Batman by making him do something seemingly impossible, no matter how little sense it makes.
* Batman by Martha Kent. She tells Jason that you don't have to actually look like your parents, biological or adopted, to have a resemblance, citing the fact that Clark smiles like Jonathan Kent. She also remarks that Jason has his father's eyes and suggests he sees Taila in Damian because of his mannerisms.
* Batman. By the mid-2010s the DC Film Universe emerged, while other studios have begun to build their own inter-connected universes.
* Batman calling himself "Batman" proceeded to kill those whom he perceived as "sinners", claiming that it's what Batman would've done. The comic book writer stopped making any more by the third issue, claiming he wouldn't bear the responsibility for any further killings.
* Batman Can Breathe in Space that makes the Saiyan unaffected by different atmospheres.
* Batman Can Breathe in Space, which led the aliens to declare they'd have to postpone the invasion of Earth if they have that sort of technology.
* Batman can fantasize about Poison Ivy in the shower... until Alfred turns the water cold.
* Batman: Cataclysm. Every Waynetech building survived the titular giant earthquake because Bruce Wayne made sure all his building were quake-proofed. Unfortunately, the Batcave and Wayne Manor were not.
* Batman, Catwoman meets up with Helena Wayne, her daughter from a parallel reality who looks about ten years younger than Selina.
* Batman Chill nearly is able to croak it out, but Batman barges in at that moment.
* Batman' climatic final battle involves a bunch of Batman's villains plus an army of Kobra soldiers storming Wayne Manor.
* Batman: Clouds of bats often appear when Batman enters the Batcave. On at least a few occasions he has weaponized this, using bat-influencing ultrasound to set up a Bat Scare which distracts an opponent.
* Batman Cold Open does an audio test on his responses to check for deception. She gets Oliver to ask what color his shoes are to get a baseline. Oliver complies

despite knowing how silly he's going to look asking the question.
* Batman Cold Open in which the Doctor is fighting an alien Space Pirate named Lucifer Van Volk.
* Batman Cold Open of one episode, the Sport Master traps a championship bowling team in giant pins and rolls an oversized bowling ball at them. Batman saves the day by breaking the ball, with his fists.
* Batman Cold Open, only to have that thing finished off by Luffy himself once he gets sick of this. This is inverted with the giant shark from said opening, who is devoured by a group of ravenous ant warriors.
* Batman Cold Open, Sonic mistakes it for actual begging and doesn't realize what's really going on until the trap is sprung.
* Batman Cold Open: The episode begins with the heroes dealing with a threat that isn't connected to the main episode's plot.
* Batman Cold Open yellow eyes swivel to watch it, behind the semi-transparent crystal.
* Batman collects items he gained from his enemies like weapons and costumes. In fact the giant penny was from a case where the Penny Plunderer tried to steal it. It was later changed to Two-Face trying to steal it.
* Batman: Colonel Blimp commanded a small army, with whom he built several dirigibles capable of lifting battleships from the sea and captured several of these, holding the Navy officers inside for ransom.
* Batman comic, Batman and Ras al-Ghul are talking, with a bunch of his assassins revealing themselves around the two (they were buried in the sand).
* Batman comic book, when three punks are confronting Batman. Their leader points his gun and brags that in just a few seconds, Batman will look "like a plate of spilled Spaghetti-O's!" And then, after an awkward pause: " - without the plate!"
* Batman comics, Bruce Wayne had a bodyguard named Sasha Bordeaux who fell in love with him and fell even deeper when she found out that he was Batman.
* Batman comics carves a tally mark into his body every time he kills someone. His whole body is covered in them.
* Batman comics give us "Venom", a highly addictive "super-steroid" which gives the user incredible strength, alertness, and agility temporarily. When first introduced, Batman himself is using it as a way to cope with his imperfections. He soon realizes he's made a terrible mistake, and must endure a horrific withdrawal before returning to normal. But Venom is most famous as the power source of Batman's enemy Bane, who wears a tank full of the stuff with tubes hooked up to his veins, giving him a constant, steady dose of Venom. The result is that he's incredibly strong (so much so that he once broke Batman's back… he got better) but totally dependent on the stuff, and Azrael eventually beat him by cutting off his supply.
* Batman comics. In one issue, Stephanie kisses Tim and then pins him to the floor ("Isn't this romantic?" "...Not really"), while armed kidnappers stands outside the door, waiting to crash the door down.
* Batman comics, Mr. Freeze has hijacked an ice cream truck on at least one occasion. Though he stole it mainly to survive, as he can only live in cold temperatures.
* Batman comics, Robin's tackling of a bad guy from behind places his face too close to said bad guy's posterior to be comfortable.
* Batman comics, there is a phonograph playing a recording of a scream. It continues screaming even after Batman lifts the needle off the record.
* Batman comics, the vigilante Pagan got her start by exacting violent revenge on the men who raped her sister (who later committed suicide).
* Batman comics, the western themed villains the Trigger Twins try to pull off a train job by robbing the money train that collects the takings from the Gotham subway.
* Batman comics usually go with the staircase, although there have been variants. The clock is also fairly consistent, with the combination needed to unlock usually being the exact time that Bruce's parents were shot.
* Batman comic where Batman is fighting a vampire, but can't stake him because he

transplanted his heart somewhere else. He has to find the heart by listening for a heartbeat when he gets the vampire excited. Batman notices that a clock is ticking louder. The vampire put his heart into the clock...
* Batman composite mecha created by one of the many people that go by Toyman. This particular Toyman is a Japanese teenager, so it's at least understandable.
* Batman Confidential covered up the incident and forced Gordon to go to Chicago.
* Batman contradicts the earlier films in various details (e.g. the identity of the mugger who kills Bruce Wayne's parents) and definitely seems separate from any of those earlier films.
* Batman criminal known as The Penguin was given an effeminate giggle.
* Batman: Crimson Mist: Though now little more than a walking skeleton, the now-vampiric Batman is nonetheless strong enough to easily overpower Killer Croc and nearly kill him.
* Batman: Curse of the White Knight, Ruth and the Elites' plan was for Azrael to quietly kill Bruce Wayne and take his place as Batman. She's quite miffed when he instead goes rogue and causes a major scene by killing Gordon.
* Batman: Curse of the White Knight, the Joker could not help but note the irony that his children were born in the crypt where Laffy was buried, the place where his persona (and by extension, the legendary history between him and Batman) was born.
* Batman: Curse of the White Knight, the moment the Joker sees that Harley was pregnant, he correctly guesses that she is having twins.
* Batman: Curse of the White Knight was the one who gave Alfred the journal that revealed the truth behind the Wayne family fortune to give to Bruce.
* Batman: Cyber Revolution was a 5-part miniseries written by Ron Perazza and meant to tie in with a toyline from Mattel. The comic was solicited for publication in 2004, but both the toyline and comic were scrapped.
* Batman, Damian Wayne, son of Bruce Wayne and Talia al-Ghul, was raised in the League of Shadows since birth with his father never knowing about him until years later.
* Batman: Damned coming out of the imprint being scrutinized much more heavily by editors.
* Batman: Damned. Much like Etrigan, it is left ambiguous as to whether he is just a normal person or if there is more to him than meets the eye.
* Batman: Damned wasn't POV character Jonny Frost, but the Clown Prince himself.
* Batman: Dark Knight Dynasty trilogy looks at Vandal Savage developing a long-term interest in and vendetta against the Wayne family; while he admires their resolve and personal strength, his ambition to acquire the meteor that gave him his immortality inevitably leads to the Waynes opposing his efforts due to the collateral damage he causes in his efforts. The "Dark Present" timeline depicts a world where 'Valentin Sinclair' scares Joe Chill away from the Waynes during the confrontation in Crime Alley, but despite lacking the same incentive, Bruce apparently still underwent at least some of the training he experienced in canon over the next few years, with Martha explicitly wishing that Bruce could find what he had been looking for all his life. As a result, after Savage kills Thomas and Martha to stop them interfering with his plan, Bruce is able to become Batman and at least be a suitable physical threat to Savage's minions, even if he doesn't show the incentive to go after any of Gotham's more standard criminals.
* Batman: Dark Victory likewise has the first issue take place on Halloween, with the failed attempt on Two-Face's life, his escape from Arkham Asylum, and the first Hangman killing occurring all on the same night.. The final issue subverts this however as the climax takes place a few weeks prior around Columbus Day and only the epilogue takes place on Halloween night.
* Batman: Dark Victory, which her aide recognizes as an "old style message," meaning that someone means to take everything from her, "piece by piece." At the end, the person who stole the body is revealed to be Two Face who, throughout the story, was acting leading nearly all of Batman's rogues gallery to take down the Falcone family and its associates.
* Batman (Data East) has a board with the Joker's face, but with sinkholes where

the eyes (and mouth) would be. Shooting pinballs into the holes yields million-point bonuses.
* Batman: Dead End starts with this sort of a news broadcast about the escaped Joker.
* Batman/Demon: A Tragedy, Bruce Wayne learns that he is actually the "host" for the demon Etrigan, summoned to Gotham centuries ago to punish the wicked but bonded to Bruce to keep him in check when he began to turn on innocents. Every few decades, the spells keeping Etrigan trapped inside Bruce begin to weaken and he attacks Gotham’s criminals as a ruthless bat-demon, but eventually Merlin (currently acting as Bruce’s butler Alfred) will explain the situation to Bruce and renew the spells once Etrigan starts to turn on innocents, essentially ‘resetting’ Bruce’s memory and trapping Etrigan once again.
* Batman depending on the situation, making him a gold mine of different merchandise to produce and sell.
* Batman: Depending on who's writing him, during Dick Grayson's formative years, he was so absorbed in the mission that he was completely unaware of Dick's neglected emotional needs unless Alfred pointed it out.
* Batman. Despite this, Bob Kane considered Kilmer to be the best actor to play Batman. (Kane is widely reviled throughout the comics industry and fandom for stealing credit for creating Batman from Bill Finger and others though, so this is probably not the best indicator of quality.)
* Batman, developing a number of realistically unflattering character traits, including an extremely vengeful attitude and eventually alcoholism and a bad smoking habit. It should also be noted that Renee Montoya stopped being a token in the 2000s: her parents and brother started appearing, so she was no longer the only character of Latin descent in Gotham, and former Superman supporting character Maggie Sawyer moved to Gotham in this time, so Renee was no longer the only lesbian.
* Batman: Digital Justice describes how video news footage can be digitally altered to "edit reality".
* Batman dimpled and protuberant. It's certainly more prominent, at any rate, given that it and the lips are all we actually see of his face.
* Batman. Dinah is still understandably pissed, but Ollie finds it hilarious.
* Batman does it to a mook on a rooftop in the short pilot/promo that was made for
* Batman does the same in the first part of the "War Crimes" arc, while watching a videotape of a show detailing Stephanie Brown's death.
* Batman does this to a mook at the beginning of "The Fate of Equinox!" At the end, Batman does it again, to Equinox, while they're both the size of skyscrapers.
* Batman does wear a bullet-proof suit that protects him from most fatal injuries. And he wears a Bat-shaped target on his chest, where the heaviest bulletproofing can be found.
* Batman, doing what he does best in the pilot episode (and in his first appearance) and later in "Downtime".
* Batman Doom, one such maze pops up near the beginning of the level with the Scarecrow boss fight. It's full of gangsters and even spotting the passages is a problem, though the automap helps. Once you're past this part, the rest of the level is thankfully free of confusing view-obfuscating maize.
* Batman Doom, several types of enemies wear sunglasses: Shotgun Thieves, Slum Lords, and Snipers.
* Batman Doom's firearm weapons need to be somehow translated into Batman terms, after all—most of Batman's ranged weapons in this mod are gun-like weapons, set in glove-like frames worn on Batman's arm. They include the Blastguns and Azrael's Glove (both of which fire some unspecified kind of "shells"), the Shuriken Glove (a rapid-fire weapon which oddly enough uses Batarangs as ammo), and the Flamethrower which is, well, exactly, what you'd expect.
* Batman do this quite often. It was especially common in the live-action Batman series.
* Batman: During the Club of Heroes reunion that turned sour with the murder of host John Mayhew, el Gaucho stabbed the robot scorpion creeping up on the

Musketeer, recognizing it not only as deadly but as the calling card of his enemy Scorpiana.
* Batman: Earth One, Gordon and Bullock "interrogate" a criminal on the location of Gordon's daughter with a crowbar and a baseball bat.
* Batman: Earth One to sniff out the source of the gangs' weaponry when he proves unable to do it himself in the limited time available.
* Batman: Endgame has the Justice Buster, a large suit of armor designed specifically to battle the Justice League.
* Batman: Endgame: Implied to be the case in the epilogue to the final issue. While Bruce Wayne's Batman and the Joker are presumed dead, there is a man on crutches with many bandages including one over an eye (the same eye that was seriously wounded by a razor sharp card on Bruce) with a young child with an R on his shirt with him, and the garbage man who throws out the trash behind the theater looks suspiciously similar to the Joker's disguise in this storyline as Eric Border. The implication appears to be that while their physical bodies are probably not dead, their identities as Batman and the Joker are, for the time being, gone.
* Batman episode "The Purr-Fect Crime", Catwoman uses her glove/claws to carve a hole through a museum display case.
* Batman) escapes death row this way, by asking for a bathroom break some time before execution.
* Batman, especially in the 2011 "New 52" release of Detective Comics (Issue #1), and the Scarecrow, who operates off of creating fear and loves what he does.
* Batman, etc.) will outnumber the collective total of every other Justice Leaguer. This was especially noticeable during the New 52 reboot, when DC wanted to have 52 titles... and filled out 25% of the lineup with Bat-books, either staring Batman himself in a starring or supporting role, or showcasing several characters related to him, leaving other characters scrambling to be noticed in any way, shape, or form. This is also noticeable in terms of the creative teams — more often than not, DC will put popular and big-name writers on the Bat-books.
* Batman Eternal Alfred mentions being former British SAS in the comics also.
* Batman Eternal, by taping her mouth shut and handcuffing her. When the ruse works, Catwoman feigns offense and says that Lark isn't nearly sexy enough to pass for her.
* Batman Eternal... DC had a thing for year-long weekly series for a good decade or so.
* Batman Eternal: Hush is confirmed to be Jason Bard's real boss in Issue 32. Then, Cluemaster is revealed to be Hush's real boss in issue 34... with Lincoln as the man behind him.
* Batman Eternal if she reciprocated. Thankfully, she never did, and the plot thread was ended in that same series.
* Batman Eternal of his feelings... in a voicemail which he then deletes. About a year later, Dick comes back and goes back to having mutual sexual tension with Babs.
* Batman Eternal: Someone manipulates Gordon, a henchman, and the subway trains under Gotham to make it appear that Gordon opened fire on an unarmed man, hit an electric box and somehow caused two trains to collide head-on. Gordon is then arrested and removed from being Commissioner of Police. It's a minor villain who is responsible using tech derived from the Mad Hatter, but he's killed by a knife that links to Carmine Falcone, who states it was someone else pulling the strings. Bard is also working for Hush, who is working for the same person who got Falcone to return to Gotham.
* Batman Eternal technology on him to cause him to see a gun when the henchman was unarmed.
* Batman Eternal, the newly reintroduced Spoiler tricks her father, the Cluemaster, into a motorcycle chase. When he crashes his bike and tells the authorities the GCPD are supposed to be on his side (as corrupt mole Jason Bard had taken over Jim Gordon's usual duties), the police inform him he has run out of Gotham miles before. This is all according to Spoiler's plan.
* Batman Eternal: While investigating in Brazil, Red Hood admits that his

Portuguese is rusty and that he might have just called the boy he was questioning a small horse. He had, but he managed to get the gist of his question across.
* Batman even cross over, however Superman ended up visiting Batman at night (and Bats usually took the night with him to Metropolis).
* Batman even got one of their later bases by looting and plundering Overmaster's escape pod.
* Batman even in their own medium, which makes these easier to swallow.
* Batman every night, so she abandons him and Gotham. This seems to be the source for many other examples from Batman adaptations in other media.
* Batman example involves him escaping from a mill that is rigged to explode using millstones, sacks of rice and a fire hose.
* Batman fans could tell you, The Penguin can drift into this territory in his various incarnations.
* Batman fans were understandably outraged when Stephanie Brown, the fourth
* Batman features a nice, friendly gay bar called the Lavender Dragon, to contrast the wholesomeness of consenting adult homosexuals with the sleazy business of paedophilia (the Ultimate Evil of the title).
* Batman features several uses of the grappling hook, including a scene where Batman uses it to win a foot race (don't ask).
* Batman fight for 28 hours straight. Fighting for 28 hours straight is basically impossible for the human body, and much more so if you've got the oxygen-sapping physique of a power-lifter. Consider that top professional fighters carefully regulate their training to enter the ring at their absolute physical peak, yet still need to rest every 3 to 5 minutes to fight at their maximum capacity.
* Batman fights a human trafficker who has a basement full of terrified women in the beginning of
* Batman figures out, not one second too early, that the guys in clown masks with guns duct-taped to their hands are Joker's hostages.
* Batman films could go toward either end of the scale, depending on the director.
* Batman Film Series is named after the Joker for a reason, Napier got resurrected or even somehow managed to fake his death.
* Batman Final Crisis story arc, evil scientists working for Darkseid put Batman in a Lotus Eater Machine so they can take advantage of his psyche for their own ends. (Not a pleasant one... the machine runs him through slightly off-kilter events from his life as Batman, with a focus on the worst experiences.) Batman deduces what is going on and is able to completely destroy all of their equipment and ruin their plans without even waking up.
* Batman flashback to before the death of the Waynes, they send Bruce to bed without supper for reading a comic book. Alfred secretly brings a tray of food to the boy ... just slightly ahead of Thomas Wayne, who was doing the same thing.
* Batman Fledermaus, who spends most of his time making failed passes at superheroines.
* Batman foe, Cap'n Fear, had a robot parrot that was designed to randomly record and repeat phrases said around it. Capturing the parrot and accessing its memory provided Robin with information to allow him to track down the pirate's hideout.
* Batman foe Mr. Freeze has to wear a sealed, temperature-controlled suit to even survive in lukewarm environments, due to his cryophilic physiology/disease/disorder/whatever. Many writers offset this by outfitting Freeze's suit with a powered exoskeleton capable of breaking a man in half.
* Batman foe the Cavalier is an expert swordsman, who sometimes wields an electrified rapier. In "Where Were You on the Night Batman was Killed?", he claims to killed Batman in a sword duel, and he is good enough that people are willing to give serious consideration to this claim.
* Batman foe "The General" is a violent war obsessed kid who started causing trouble for them when he returned home to Gotham from Military School.
* Batman foe the Gorilla Boss was created when mobster George "The Boss" Dyke had his brain transplanted into the body of a gorilla following his execution in the gas chamber. And that's awesome.
* Batman foe the KGBeast cut off his own arm with a fireaxe after Batman snared it

in a loop of cable and was holding him pinned until the police arrived. Since the cable was too tough to cut with an axe...
* Batman forced DC to tone down the violence and the seriousness of the earlier years.
* Batman forces Darkseid to release Supergirl into the heroes' custody by threatening to destroy his planet. Darkseid commends him on such a ruthless maneuver, stating that it was believable coming from him (and would've failed were it done by a certain Kryptonian and Amazon) because humans are renowned for killing their own kind in order to win.
* Batman Forever applied this trope to the iconic Robin outfit, which had become a source of some mockery for being a bright red, green, and yellow outfit that contrasts sharply with Batman's black, blue, and grey outfit. The film depicts the traditional Robin outfit as the uniform of the Flying Graysons in the circus, so when Dick Grayson becomes a costumed fighter in his own right, he wears a suit of body armor just like Batman's, but bearing the colors of the circus uniform to honor his family, and the colors are muted and metallic to be less gaudy.
* Batman Forever: Batman knows he wouldn't be able to save either the girl or Robin, then he goes and saves both anyway because he's just that good.
* Batman Forever Bruce Wayne and Edward Nigma meet at a gala event; Nigma has a sick admiration for Wayne, and has been trying to emulate/show him up. As they converse, Wayne casually removes his glasses, then puts them back on, etc. Whatever he does with them, Nigma immediately apes with his own pair, in a more dramatic fashion.
* Batman Forever Bruce Wayne hides the fact that he's Batman from Dr. Chase Meridian...even as she demands to see Batman. She gets her wish, and Bruce still almost would've kept his Masquerade in force...until Two-Face and The Riddler kidnap her.
* Batman Forever, but all things considered, he managed to figure out who Batman was on his own and launched an assault on Wayne Manor that completely destroyed the Batcave and left Bruce for dead. If not for his need to utterly screw with Bruce serving as his downfall, the Riddler came the closest to killing Batman far beyond what any of the other villains in the pre-Nolan films achieved, not counting the amount of damage he inflicted alongside Two-Face and his successful gambit to play the people of Gotham City for saps with his Box devices.
* Batman Forever calls The Riddler's saucer "Mr. E" (mystery), while one of the game modes is named "Face Two-Face" (face-to-face).
* Batman Forever: Chase falls in love with both Bruce Wayne and Batman, and doesn't realize they're both the same guy until she's kidnapped.
* Batman Forever despite being in his 70s and Bruce having ridden a bullet tube down, and didn't even stop to get changed or anything.
* Batman Forever, Dick Grayson rolls a bomb off the roof of a building and it explodes in the river.
* Batman Forever: During their brief fight after Robin gets in over his head against a vicious gang and is saved by Batman, Robin takes out his frustration upon Batman. Two-Face had placed a bomb in the circus where Robin's family had performed, threatening to set it off unless Batman revealed himself. Robin's family tried to reach the bomb, but Two-Face killed Robin's parents and brother during the attempt.
* Batman Forever: Edward Nygma does this. "WHY HASN'T ANYBODY...put you in your place?"
* Batman Forever, Edward Nygma has at least one picture of Bruce Wayne in his office (which is really a cubicle that he put glass walls around to keep the other workers out) and his home is filled with yet more pictures and newspaper clippings of the same. As The Riddler, he starts sending crazy riddles to Bruce's home and office made out of newspaper clippings. He thinks Bruce Wayne is the only man who can understand his genius- when Bruce brushes him off, he snaps, murders his supervisor (after using his device on him, unintentionally stealing his brainwaves to make himself smarter).
* Batman Forever, Edward Nygma subconsciously idolizes Bruce Wayne, so when he

pretends to be a rich industrialist, he copies everything Bruce does, including having a (fake) mole.
* Batman Forever features the Riddler who naturally toys with Bruce Wayne's mind by sending him riddles in elaborate packages. During the climax of the film, he even prevents Two-Face from executing Bruce Wayne, instead leaving him with a final riddle that eventually reveals the letters M-R-E...Mr. E...mystery...enigma...Edward Nygma.
* Batman Forever, Gossip Gerty's nickname for Bruce Wayne is "Brucie".
* Batman Forever had Batman covering himself with his fire-proofed cape in order to shield himself from the flames of a burning building that Two-Face trapped him in. Only Batman could have pulled this off.
* Batman Forever had the Riddler's "Box" devices which sapped people's intellect/thoughts and fed it to him; they didn't notice because they were so transfixed by the virtual reality imagery it beamed into their minds.
* Batman Forever, has Bruce Wayne confront a giant bat in a secret, hidden chamber in the Batcave.
* Batman Forever is this: It looks ordinary enough, but just underneath it there's a tunnel which leads to Wayne Manor, accessed by super-high-speed capsule.
* Batman Forever iteration, the facial scarring was the result of an acid attack by underworld kingpin Boss Maroni.
* Batman Forever moments, such as being responsible for the deaths of Robin's parents and brother.
* Batman Forever of a safe that is being filled with boiling acid. He borrows a security guard's hearing aid to listen to the tumblers and crack it open.
* Batman Forever, Robin does this to save the villain Two-Face from a deadly fall, preferring to see him rot in jail than to be responsible for his death. In an unusual twist, as soon as he's safe Two-Face pulls a gun and takes Robin hostage.
* Batman Forever, Robin's entire family was murdered by Two-Face, which prompts the young sidekick into a life of crime-fighting. A major plot is his need to overcome personal revenge, though.
* Batman Forever's main villain, The Riddler, wanted to use The Box to learn Batman's identity and everything else related to everyone, as well as get revenge on Bruce Wayne for rejecting him. Two-Face, in contrast, just wants to kill Batman in revenge for having acid thrown on his face by Boss Maroni (something which wasn't Batman's fault, but which he'd gone insane enough to blame on him following the attack).
* Batman Forever: The Batmobile is chased by a pair of '50 Buick Roadmasters, each with two miniguns mounted on the hood. Not that they ever reach real Gatling fire rates, let alone do any halfway realistic damage to anything.
* Batman Forever The film itself attempts to tread both lines; it features some fairly dark scenes recalling Bruce's past and transformation into Batman, but on the other hand, Jim Carrey is the Riddler. Notably, several deleted scenes reveal that the film was originally darker, closer to Burton's films (including an original opening in which Two-Face ties up and gags a guard, writes "The Bat Must Die" on the wall in blood, and escapes from Arkham Asylum), further fueling the flames.
* Batman Forever. The title seems odd to many audience members until they realize it is in reference to a line of dialogue that was in a deleted scene. Though the word "forever" was used in two different dialogues:
* Batman Forever). Thing is, they're actually both right - Sugar made the favorite meal of Two-Face's normal personality, and Spice cooked for his...other one. He's entirely delighted and declares that they spoil him.
* Batman Forever: This is how Dr. Edward Nygma AKA the Riddler started out. He idolized Bruce Wayne and wanted Bruce's approval of his "Mind manipulation Box." Bruce rejects Dr. Nygma's project, stating that it "raises too many questions." As his idol leaves, Nygma vows revenge, the first step toward him becoming the Riddler.
* Batman Forever: Though a bit vague, Riddler seems to be doing this. (That, or using other people's brainpower to amp his own mental function, or both.) It makes

him a megalomaniac and a malfunction of the machine physically warps him.
* Batman Forever - Two-Face and the Riddler break into Wayne Manor. Two-Face and his thugs deal with Bruce and his girl-of-the-movie while Riddler starts lobbing bombs around the Batcave.
* Batman Forever: Two-Face's men blast away at the elevator which arrives at their floor, perforating the door and riddling its interior with bullets. The doors open to reveal — nothing. Three seconds later, Batman bursts out, starting the first fight scene. It's not explained how he avoided the gunfire, although he probably just hid above the car.
* Batman Forever uses GNN, "The Gotham News Network" to provide exposition.
* Batman Forever using a helicopter to pull a bank vault out of a building.
* Batman Forever was a big-time one of these for Bruce Wayne, but when Bruce turned down his offer to be a partner in his pet project (which his boss Stickley had shut down), his admiration turned to bitterness and downright loathing, turning him into the Riddler.
* Batman Forever was blamed for the film underperforming, the studio forced him to make a much more lighthearted film.
* Batman Forever, when Two-Face attacks the circus performance that Bruce Wayne is attending, Edward Nygma excitely scarfs down popcorn while watching the chaos unfold on TV.
* Batman Forever, where both films open with the titular heroes suiting up to face the movies' villains. The latter also has one for Batgirl when she suits up.
* Batman Forever, where Dr. Chase Meridian, based on two of the riddles the Riddler left for Bruce Wayne, diagnoses Nygma as "A total whacko."
* Batman Forever, which allows him to suck the neural energy of everybody watching TV with the thing. Taking hits from Nygma's machine is apparently quite addictive. The Riddler himself spends hours on a stylized throne shaped like "The Thinker", jittering like a coke fiend as he sucks up more energy.
* Batman Forever, with one providing the brawn and the other the brain.
* Batman Forever: "You're counting on the winged avenger to deliver you from evil, aren't you, my friend?" and "I hope you made extra."
* Batman for Sarah Essen, Gordon's lover and second wife in the comics but just a mildly crooked superior in the show.
* Batman: Fortunate Son depicts Batman as exactly this sort of (surrogate) parent towards Robin.
* Batman fought a one-shot villain called the Racer, who would make getaways in a customized high-speed racecar, and then seemingly vanish. It turns out he was driving his car into a moving van once out of sight of the witnesses.
* Batman franchise, The Penguin has come to fill this role after going semi-legitimate with his owning a nightclub.
* Batman from her skin. In her first canonical appearance, it's enough (combined with her generally desirable appearance) to make a man leave his wife on the spot to accept a hallucinatory kiss from her. Batman himself is affected, and later on in the Batcave he won't stop talking about how beautiful and sexy Ivy is...until Alfred turns the water in his shower freezing cold.
* Batman from obscurity, the Riddler himself is considered a core villain in Batman lore, with most adaptations drawing heavily on Gorshin's version of the character.
* Batman from the animated series, details about him are better provided in the Western Animation section.
* Batman Gambit all dress the same to create confusion about their numbers and who they are.
* Batman Gambit all season via his manipulation of Nora, which he sees him escape and go free at the end of the season.
* Batman Gambit as he pretends to date her co-worker Patrice and leaving the final steps in the hands of Ted, because having also dated Robin if he didn't approve he wasn't going to go through with it.
* Batman Gambit for the plot and arrange for them to capture it. But she hasn't actually gotten around to triggering the booby trap inside it and sending in her legions to mop up...because she finds war terribly boring.

* Batman Gambit, he was certain Dwight would try and use that information, invoking the trope full force and making him lose the account.
* Batman Gambit on NCIS. He did not want the case so he made a big stink about jurisdiction specifically so that the NCIS team would go above his head and take the case from him. However, in the end, the joke is on him since the directors decide that the FBI should be represented in the investigation and Fornell is assigned back to it.
* Batman Gambit), suggests having lunch as if nothing whatsoever was happening. As businesses and authorities run on fear, he reasons, not showing any will impress and scare the Americans and they'll possibly back out of the deal and leave, or at least allow more time to find a new home for the collection.
* Batman Gambit to beat Nanny Mite while also drawing out Chameleon. All we get is Rabbit saying, "I have an idea… But it’s dangerous and stupid and we have to split up." Cut to them implementing it almost perfectly — the akuma is defeated and Chameleon falls for their trap by trying to impersonating Ladybug, but he gets away at the last minute because none of the heroes have enough time on their Miraculous for a fight.
* Batman Gambit to capture Adria. She leaves a Note To Self for after she is brought back, knowing she would be... rather upset with her teammates otherwise.
* Batman Gambit who've never known a love they didn't pay for... except one:
* Batman gathers together various people that feel like they've been injured or wronged by Batman. Almost all of them were injured through the results of their own actions and stupidity, or in one case, were simply embarrassed. The lone female of the group is also the only one whose injuries were purely the result of Batman's actions towards her, thereby making her the only one with some small amount of legitimacy to her anger. Her injuries are also relatively minor and no more disfiguring than many body piercings... that apparently she simply decided to keep rather than have them removed.
* Batman gave away Tim's real identity to her. In a fit of rage, he told Batman that he felt betrayed that Batman gave away his identity so easily (while all the time he hid the secret for Batman's sake), and it affected their relationship because they were in love. It so happened that Spoiler was standing right next to Batman and she was startled by this sudden confession from Tim.
* Batman generally assumes this, pointing out people trying to use smoke-and-mirrors to appear mystical, or some ancient artifact that was thought to be "cursed" or "enchanted" having a rational explanation, like a rage-demon-possessed mask that actually had a few small poison-tipped spikes that drove the bearer mad. However, he's also explicitly encountered ghosts, wizards, gods, and demons who were the real deal, so it's less a case of "There's no such thing as magic" as "I won't believe it's magic until I prove it one way or the other."
* Batman genuine insights on an ongoing investigation, but Batman mentions that their interference had earlier "fouled up" several cases.
* Batman, Geo-Force can control the ground... which means he can form a volcano under your feet.
* Batman gets one back later on Waller when he reveals that if his identity is outed, he'll drag Waller's secrets out into the public as well, and which one of them is going to look worse? Bonus points for telling this to Waller while they're standing
* Batman gets overwhelmed by his mission, becomes more of a loner, alienates his "family", and learns to play with others again.
* Batman gets this too, just like in the comics — notably from Dr. Destiny in "Only a Dream":
* Batman, giving him the chance to stop the murder of the parallel Thomas and Martha Wayne. At several points, Batman and Robin wonder if this means there will never be a Batman in this universe. But Batman, understandably, decides it doesn't matter, and stops the shooting regardless. In the epilogue, the readers are informed that the parallel Bruce was inspired by the masked man who saved his family in the alleyway, and would grow up to become a Batman fueled by hope instead of despair.

* Batman: Gotham Adventures #26 featured an almost identical cover, Batman rooftop-jumping with a baby in his arms. In a mild subversion of the trope, instead of the baby surviving Batman's patrol against all odds, Batman actually avoids a fight by threatening violence far in excess of his usual if the thugs he's captured make him do anything that might hurt the baby. They surrender, and one even tells him he's holding the baby's head wrong.
* Batman: Gotham Adventures, attending the ceremony with a police escort.) Of course, the only reason the movie was released was because the company had no choice due to all the money Harley and Ivy sunk into it, and the reason it was a hit was because people thought it was supposed to be a parody of overblown action movies and considered it epic.
* Batman: Gotham by Gaslight added several action sequences that weren't in the original comic.
* Batman: Gotham by Gaslight as this trope, unrelated to Bruce saving them from their gang boss at the start of the movie.
* Batman: Gotham by Gaslight, Bruce steals a horse from a warder at Blackgate when he escapes. It is not established what happens to it afterwards, but it probably wasn't returned to the prison.
* Batman: Gotham by Gaslight, Selina suffers almost no ill-effects from being trapped in a burning Ferris wheel car.
* Batman: Gotham by Gaslight, sparks from the burning Ferris wheel ignite a trail of oil leaking from the barrel Selina punctured with a batarang. The flames burn back along the trail to the barrels, causing an explosion.
* Batman: Gotham by Gaslight. This is averted with Dick Grayson, with 14-year-old Lincoln Melchoir voicing him.
* Batman: Gotham by Gaslight: When the police stop Selena Kyle's carriage to search it while she's attempts to help a wounded Bruce Wayne out of his Batman costume, the two of them simply strip to the waist and begin kissing. When the police officers open the door and see the half-naked couple, they're unsurprisingly embarrassed enough that they let them through without a search. Helps that Bruce and Selena had been flirting earlier.
* Batman Gotham City is a thinly-disguised Newark. In current continuity, the city is now confirmed to indeed be located in New Jersey.
* Batman, Gotham City is hit with a cataclysmic earthquake and quarantined. Batman is in the city trying to clean it up, having sent Superman away. But Superman has come back as Clark Kent, trying to help people on a different scale. He tells Batman that he did his best to rough up his clothes so as not to stand out and asks Batman how he did. Batman looks him over and says "The toes of your shoes are scuffed, but you forgot to scuff the heels. Your shirt is dirty but bears no evidence of sweat or epidermal oil secretion stains. And no one around here has smelled of deodorant, soap or laundry detergent for over five months." Clark asks how he looks to someone who isn't the world's greatest detective. Batman says he looks fine.
* Batman: Gotham City is shown as a deadly city mostly by night, which is the moment when the Caped Crusader defends the city from threats ranging from thugs to supervillains.
* Batman: Gotham Knight at the sight, he starts gathering them all up. Meanwhile Alfred has come to look for him.
* Batman: Gotham Knight Deadshot leaves initialed bullets as a calling card.
* Batman: Gotham Knight: In the final segment Batman fights Deadshot on a moving train.
* Batman: Gotham Knight is created by a different studio, all of whom showcase their own unique art styles.
* Batman: Gotham Knight turns every bullet fired at Batman into a stray shot that no one has any idea where it's going. When a mobster gets hit, Batman realizes how dangerous ricocheted bullets are and refuses to use the deflector again.
* Batman: Gotham Knight writer and editor Dennis O'Neil commenting on the different perceptions of the character over time.
* Batman Grabs a Gun: A hero ends up forced to resorting to breaking their own

rules.
* Batman Grabs a Gun: Characters do something that breaks their own rules.
* Batman great-grandmother setting trained crows on him as a punishment.
* Batman, gunning for the Joker near the end, runs into the ex-Robin Tim Drake instead. Before Batman can take him to a hospital,
* Batman hacks every cell phone in Gotham into a listening device/sonar array.
* Batman had a drug that was described as unifying the conflicting halves of a person's identity. Apparently everyone secretly wants to murder, torture, and/or cannibalize the nearest primate. Huh.
* Batman) had Alberto Falcone get out of Arkham, only to become convinced that his home is haunted by the ghost of his father when he keeps hearing voices, and even receives a gun like the kind the Holiday Killer used. When he reports this to his siblings they think he's nuts, but it's actually the Calendar Man who has been talking to him through hidden speakers throughout the house in an attempt to drive him to kill.
* Batman had a reporter interview various Gotham citizens on what they think of Batman's rogues gallery. The responses ranged from "They scare me" to "The death penalty is the only language these animals will understand!" to "Dude, I'm behind on my mortgage and the garbage strike is in its third week. You think I've got time to worry about that crap?".
* Batman had Batman eavesdropping on a conversation between a police officer and a coroner who is in process of snacking on a chicken wing amidst an autopsy.
* Batman had the Villain No-Face, who had no face, and whose evil plot was to disperse the same chemical which caused him to lose his face throughout the city.
* Batman had to take care of the Manor and his sons while his butler is sick in Mr. Bat-Mom in
* Batman half the time. Naturally, the first time Batman and Ra's fought, they were both shirtless.
* Batman: Harley Quinn is shown to wear glasses and have her hair in a bun prior to meeting The Joker. When she goes crazy and springs him from Arkham she loses the glasses and begins to wear her hair in pigtails.
* Batman has accumulated a small army of much younger assistants who all have their own unique skills and abilities, but can never seem to get out of the Big Man's shadow. What kind of adventures will they have in the future as adult superheroes, when their mentor's inevitable death and/or retirement forces them to carve out their own identities in the DCU?
* Batman has Batman tries to fight a (much younger, stronger, and faster) leader of the Mutants on his terms and ends up battered and with a broken arm. For the rematch, Bruce accepts his age and fights the way an old man should fight a young upstart: by choosing the battlefield to his advantage, using precise, practiced techniques to disable the opponent — and avoiding direct brute force stand-offs.
* Batman has been deputized by the Gotham police department. Depending on the version, either it's official or unofficial. In either case, he has received first-rate detective training, making him a professional in all but title.
* Batman has been known to have pride issues, especially as his paranoia has been played up more and more over the years by writers.
* Batman has been retired for years at the beginning of the film, but he gets so antsy that he's back in the Batpod's saddle within thirty minutes.
* Batman has come together as a "Murdermoms" fandom, bonding over the fact all four characters are extremely deadly assassins, have complicated relationships with their good-aligned children (Damian Wayne, Emiko Queen, Lian Harper and Cassandra Cain, respectively) and suffer from numerous writers trying to make them more villainous than their fans actually like them to be.
* Batman has displayed a sense of humor, the rest of the League find it unsettling.
* Batman has him indulging in this, violating attorney-client privilege in order to get the crime family he was family lawyer to (at the behest of Batman and Gordon) in order to get them convicted.
* Batman has him overstrained by a breakout at Arkham and eventually crippled by

Bane, which took him a year to recover from. Even in his older characterization (multiple Robins, involved with the Justice League), it's mentioned that the next injury he has will likely put him out of commission.
* Batman has just captured Joker and gives Batman a choice. Either he kills Jason to stop him, or he lets him kill the Joker and avenge his death. Jason begins counting down, and just as he's about to shoot Joker, Batman yells out and reaches for him—to disguise the fact that he was throwing a batarang, knocking Jason down.
* "Batman has prepared for the unexpected, but is he prepared for the unthinkable?" —
* Batman has pulled this off several times, usually on those rare instances where he is without his utility belt.
* Batman has several core tenets of its most popular characters. Each lane follows internal stations consistently if they get enough screen time. How fast they move relative to other lanes is up for graps.
* Batman has "the caped crusader", "Bats", "Dark Knight", "the Darknight Detective", "The Masked Manhunter",
* Batman has the Joker trapping Harley Quinn in a rocket ship, and explaining that this is his dilemma with her. His affection started out as a ploy to get her to follow him, but ended up becoming sincere attraction and fondness...and since he thought he didn't need those feelings anymore, having them makes him upset.
* Batman has the tools, the clothes, the attitude, the moves, even the backstory of training in Japan for it!
* Batman have him lowering his voice while in costume to sound more menacing.
* Batman having to combat were the Troika, a faction of three (technically four, but one of them defected to the West) ex-Soviet terrorists unwilling to admit that the Cold War was over.
* Batman. He also generally acts like a loon in a poor portrayal of his adaptation specific mental illnesses.
* Batman, he decided to pick Gotham's most infamous and self-aggrandizing mass-murderer to bite off from — The Joker. No bonus points for guessing how it ends for him.
* Batman, he finally regained his confidence and put on the batsuit again.
* Batman, he intentionally spills his drink on an important control panel.
* Batman, he laughs uncontrollably while clutching his hair in anguish. The Joker is also frequently shown laughing excessively long after he's gone mad.
* Batman - held by Bruce Wayne, Dick Grayson (Bruce's first adoptive son), Jason Todd (Bruce's second adoptive son), and Terry McGinnis (Bruce's second biological son and Jason's younger brother/adoptive son) in turn.
* Batman. He leaps off the roof a castle (transported stone by stone from Europe and reassembled in Gotham City) into a nearby lake.
* Batman, he may also have them on other parts of his body too, like his head.
* Batman, he often has his helmet in the same shape as his iconic mask, with his mouth completely exposed. Amazingly, no one ever sends a super strong/super fast punch right through his unprotected mouth.
* Batman, her backstory is at the centre of the first book, and, despite Damian Wayne being the official protagonist, she is in the spotlight the most and given some of the best lines going forward.
* Batman. Her ex-con of a father is starting to cause trouble again? Her mother's an addict? Her dad's trying to kill her? The father of her baby abandons her and she almost dies during delivery? The boy she's got her eyes on and who happens to be Robin's not interested in her? Batman tries to get her to quit being a crimefighter again and again - then fires her as Robin? She gets tortured, humiliated and almost killed and is forced to leave Gotham to heal? ... C'mon, you don't actually think that's gonna stop her, do you?
* Batman: He's a dark, brooding millionaire using a bat-symbol to strike fear in criminals. He's a young, lighthearted, wisecracking teen acrobat. They Fight Crime!
* Batman. He then drags the Penguin by the collar up to the roof of the police building and threatens to throw him to his death, while the Penguin begs and

blubbers. But before anything else can happen, Batman shows up with the rescued Sarah and persuades James to get a hold of himself.
* Batman, he was stabbed about eight or nine times by a member of the Court of Owls, pitched off a building, and trapped in an isolated maze for god knows how long. He was a little squirrelly afterwards, but He Got Better. Not really a comic reference, but watch the two promo videos for DC Universe Online that shows him take a missile to the face, and return in the second one as one of the three remaining superheroes on earth. Ironically, it lends Lex Luthor's cockroach analogy slightly wrong...
* Batman himself as he is covered in scars from his many battles, but they are usually only shown when he talks about them or shows them to someone.
* Batman himself comes across as prideful, self-obsessed, antisocial, and trying way too hard to be cool. He makes up for it with his impressive competence and is considered famous and beloved by the general populace, but it's suggested that most of the League doesn't really like having him around. Fortunately, he does mellow out.
* Batman himself comes right to the edge in an early episode of the series. After chasing down a man who keeps children underground and uses them to steal things for him, he tells him that, while he'll never betray his values of
* Batman himself counts as this. He watches his parents gunned down in front of him,
* Batman himself has tried to put one together on a couple of occasions, the most recent being "Batman Incorporated" which seeks to recruit other characters to act as Batman-like individuals to fight crime anywhere in the world. They also act as his representatives in this role. Most members have their own superhero names, but Batman is the one uniting them. They operate as individuals, which is fitting as Batman himself kind of likes to work alone or with whichever sidekick he has at the moment.
* Batman himself is almost always an incredibly skilled driver. Of course, driving the
* Batman himself is an ascended fanboy, although for meta reasons. In the first Batman comic, the film he goes to see with his parents is
* Batman himself is experienced and Genre Savvy enough to be fully aware of this, even remarking on it when the situation calls for it. Once, when he hiding in the shadows and preparing to take down a drug dealer, he glanced at the man's two bodyguards and immediately dismissed them.
* Batman himself isn't really a cozy guy, but in his earliest comics, he was a straight-up murderer. The Golden Age Batman is legendary for using guns on criminals, letting crooks drop to a painful death in a vat of acid, and a lot more.
* Batman. His penchant for bad girls once convinced him that his girl of the week was evil due to her being a bit too vanilla.
* Batman: Holy Terror takes place in an alternate timeline where Oliver Cromwell survived a decade past his death to establish an theocratic empire over Britain and the United States called the Commonwealth. Puritanism is the state religion and other forms of Christianity like Catholicism are considered heretical.
* Batman, however, examine how physically and mentally taxing it is to live a double-life as Batman.
* Batman. However, his apparent "deaths" are faked by using an extreme yoga technique to slow his metabolism down to an undetectable level.
* Batman. However, later writers portrayed Jason as the "bad Robin" for disobeying orders (something every Robin has done, including Dick Grayson, the original), which ended up giving off the implication that Jason deserved his own death.
* Batman. However, she uses the kiss to give him an antidote to the scorpion venom, allowing him to recover hours later.
* Batman: Hush, Batman is questioning The Riddler, who's currently under custody. When he doesn't like the answer he gets, he punches Riddler so hard he ends up on the floor. The noise prompts a couple of guards to enter the room.
* Batman: Hush: Hush stops Poison Ivy from attacking him by saying his vitals are hooked up to a herbicide bomb.

* Batman: Hush is considered this, even by its many detractors. It features a huge number of characters, all of whom Batman will introduce to the reader, and Jim Lee's art is very mainstream in its appeal.
* Batman: Hush is explaining how he roped the majority of Batman's Rogue Gallery into a grand, convoluted plan. For some, there were various motivations, like Joker thinking the Dead-Robin gag hilarious, but he dismissed almost half of them, including Catwoman, Clayface, Poison Ivy, and Killer Croc, as being in it solely for the money he paid them.
* Batman: Hush sees Two-Face in a montage of Batman and Catwoman working together and that's it.
* Batman: Hush storyline, both Batman and Catwoman at one point say, "Faster than a speeding... you know."
* Batman: Hush when the titular villain fires a single bullet at the Batmobile which promptly explodes. Moments later Hush remarks that Batman hadn't noticed him strapping C4 to it.
* Batman". In another story, Batman managed to find a clue in the Joker's scribbles.
* Batman incarnation is a literal "dark knight", a cursed suit of armor that stands stalwart against evil.
* Batman Incorporated and then pointing a gun at her students, was deemed insensitive in light of the shootings.
* Batman Incorporated reveals that Kathy is not only alive, but she's the leader of a major spy organization which was leading a sting operation against Talia al Ghul for years, which Kathy concludes by killing her.
* Batman Incorporated, with Damian Wayne, the new Robin that Morrison had created a few years prior, killed off and the apparent end of Batman Inc. itself. At the same time, the last few pages of the series repeatedly remind readers that members of the al Ghul family never stay dead, and indeed Damian came back to life about a year later.
* Batman: In Darkest Knight. Bruce Wayne is Green Lantern, and fights alongside heroes such as Super-Martian, Wonderhawk, and Aquaflash in the Justice Titans.
* Batman infecting him with a mutagenic virus. The end result is the crocodilian monster we all know and love.
* Batman: In his introductory storyline Henri Ducard is called back to Gotham to testify against Bruce Wayne. His hosts send a limo to pick him up and ask what name he'll go by. He tells them to pick one at random. The chauffeur stands at the airport holding a sign that reads "Random".
* Batman in JLA, when after some time-traveling caused him to get sick and she took care of him.
* Batman: In Mr. Polka-Dot's first appearance, his crimes mark out a stick figure on the map. Batman deduces that the next crime will be at the point that marks the head.
* Batman in My Basement: A character hides out in someone's home. One resident has to keep the others from finding out.
* Batman in My Basement: When someone highly conspicuous hides in a "normal" location.
* Batman in one episode. In fact, "rope climbing up a building that looks suspiciously like the camera was set on its side" is one of the hallmark TV Batman scenes (bonus points for surprise pop-up celebrity cameos).
* Batman in Pre Crisis times. Though only one of them was called Batman.
* Batman. In the course of his campaign he refused to discuss any actual issues other than his "Batman's-a-criminal-and-I'm-a-hero" plank ("Issues only confuse people"); instead, he spouted all the usual clichés, kissed babies, adopted "Yankee Doodle" (with rewritten lyrics) as his campaign song, and even had a rock band dressed as Revolutionary Minutemen (Paul Revere & The Raiders) perform at one of his rallies.
* Batman: In "The Malay Penguin", the Penguin rents the theatre next to a museum and hires a lot of tap dancers to stage a rehearsal so the sound and vibration will constantly trip the alarms in the museum.

* Batman involves the Joker deciding to kill half of Gotham's population. Batman decides that involves piping poison from a utility. The Joker is always at the first utility one chooses to investigate.
* Batman is able to persuade Ra's from killing her and convinces Vicki to destroy the evidence.
* Batman is about to be dragged into one of these deaths by way of a
* Batman is about to come on. We don't get to see any of that, as Joker breaks into the TV channel's signal to gloat and taunt Batman over the airwaves.
* Batman is also able to hack into the militia's drones and make them fire electricity at their own controllers, seemingly to no permanent damage.
* Batman is a mastermind when he works with Robin or the extended Bat Family, but most of his proteges also lead groups of their own:
* Batman is an especially obvious example of this trope. In comics where he had to fight, he was drawn larger than average (
* Batman is a suit of armor specifically designed to allow it to work as a countermeasure for Batman to use if he ever has to fight the Justice League themselves. The last one was used by Jim Gordon during his Batman tenure, and grants super strength and a bunch of nifty gadgets to compensate for Jim not being in the greatest shape, not having the training of the Bat-family and for good PR given its police sirens and the like — however, Jim himself notes it looks idiotic and it resembles a bunny more than a bat.
* Batman is captured by a group of criminals and is restrained, without his utility belt, in a full-body restraint made of inch-thick metal cables. He doesn't go anywhere at first, preferring instead to
* Batman is giving Robin a boner and he is repeating to himself "think clean thoughts, think clean thoughts..." while Batman uses a metal cutting beam to get them out.
* Batman is insane some way or another, and Batman himself is often described as being insane in his own special way.
* Batman is referred to by people as The Batman, mostly to emphasive how scary they find him.
* Batman is shown to have news clippings covering one of his walls. He says jokingly that compared to some of his other obsessions, that one is only about a 2 on the Richter scale.
* Batman is sometimes depicted as being more incorruptible than Superman. The difference between them seems to be that Superman doesn't want to cross the line, where Batman
* Batman is sometimes portrayed this way, as a sociopath using his riches to beat the crap out of criminals instead of investing in social programs. Then there's that whole "train a twelve-year-old in combat, then shove him in front of armed criminals wearing nothing but tights, repeat as necessary" thing.
* Batman issue, a low-level crook fires a bullet through his own hat (which he's holding in his hand), while yelling "Drop it, Wayne!" He proceeds to put the hat back on and tosses the gun to Bruce Wayne, who catches it. The police barge in and see Bruce Wayne with a smoking gun in his hand, and a hole in a bystander's hat.
* Batman is the most dangerous man on the planet. Not Luthor, not Supes himself, but Batman. And Batman's too good of a friend to turn Supes into a liar.
* Batman is the most famous of any superhero's, and each one of said rogues has their own dedicated fanbase who love and root for them, knowing full well what scoundrels they are. We wouldn't have 'em any other way.
* Batman is the mugger who killed Bruce Wayne's mother and father, therefore making him the creator of Batman.
* Batman is the only one without superpowers. But who needs that when he's Batman?
* Batman is the protagonist. He wants to not be necessary to Gotham and to retire, and ultimately gives up on his goal.
* Batman. It goes by quickly, but on closer inspection, it's not so much a gadget he had lying around as a mounted device aimed directly at the television, as if he was just waiting for a reason.
* Batman, it is caused by a riot instigated by the Joker's appearance on Murray

Franklin's talk show.
* Batman. It should be noted, though, that "Suparman" is a semi-common Javanese name, though "Batman" is not.
* Batman: "It's me, Sugar bumps. (...) Jack? Jack is dead, my friend. You can call me... Joker. And as you can see, I'm a lot happier. "
* Batman. It was created when a carnivorous plant that Poison Ivy fed her victims to absorbed the personas of the people it ate. In this form it was able to rapidly regenerate and transform itself into any plant-life it chose to, and would manifest itself with the faces and other physical characteristics of Ivy's victims across its surface. Harvest attempted to take revenge on Poison Ivy by attacking her inside Arkham Asylum although Batman intervened and protected her. Harvest was seemingly destroyed in this battle although Batman remarked that its regenerative abilities meant it could come back and attack again at any time.
* Batman: Jason Todd (aka The Red Hood) is a definite example. While Commissioner Gordon normally relies on Batman to do the dirty things he won't, Jason will do the dirty things Batman won't. He will kill criminals, initiate crime wars, recruit gangsters (only to betray them at the right moment), resort to torture to get information (or just because he feels like it), and so on and so forth. It is all part of his vendetta against crime and vision of a better world. Or something like that. While he does truly think he's doing some good for Gotham, his actions sometimes cause innocents to be casualties. He (tries) to kill whoever gets in his way, even his former mentor and foster parent (Batman) along with his "siblings" (the other Robins). Sometimes it isn't even just about them being in his way but him just feeling competitive. It is hard to classify him as hero or villain, but it's clear he is not someone to be messed with.
* Batman. Jokes about Robin's short-shorts aside, for most of the time the two are the most important people in each others' lives.
* Batman Jonah Hex takes on Arkady Duval, who is using a saber, and beats him using only a knife!
* Batman know that he might know their identities (how was he supposed to know he'd figure it out?)
* Batman, Kobra's troops have invaded Wayne Manor and are rapidly closing in on Alfred, Robin and other masked heroes when Superman crashes through the manor's ceiling and starts delivering a beatdown.
* Batman: Last Knight on Earth after ultimately defeating and killing Omega.
* Batman: Last Knight on Earth) until their actions lead to a post-apocalyptic world.
* Batman last words are him calling out for his mother. In a dark twist, he's actually begging his mother to call off the insane warrior (actually, an aged-up mindless clone of him) who is brutally killing him, desperately trying to confirm that she has at least a shred of humanity left. She does nothing to stop her own son's death.
* Batman later abuses Ragdoll's immunity to this trope to get around his
* Batman later uses the same trick against The Penguin in their final fight at Arctic World; The Penguin eventually falls into the toxic pool.
* Batman laughing together in the rain. It's unsettling, and definitely not the way this trope is normally played.
* Batman lectures the Flash on picking up items with unknown powers does what Batman says.
* Batman: Legends of the Dark Knight, Doctor Randolph Porter believed that he had successfully manipulated Batman into becoming a junkie dependent on the early samples of venom he had been giving the Dark Knight, to the extent that he reasons that Batman will be nothing more than a whimpering wreck after a month without access to the pills, incapable of considering the idea that Batman could have beaten the addiction. Even after Batman tracks Porter to his island base, Porter attempts to force Batman into a scenario where he will have to take the pills again to survive to prove Porter's own belief in his drugs, underestimating Batman's strength of will to resist the temptation and never even considering the idea that the other man is smart enough to find another way out of the trap that doesn't

require the pills.
* Batman liberates a group of children enslaved by the Sewer King in the
* Batman likes to throw himself through glass to surprise his opponents, usually with his cape spread out like a bat for added effect. Being heavily armored like he is, glass cutting him up isn't a problem, especially since he's dropping down from a ceiling. He'll usually cover up with his cape if he's throwing himself through a window, especially if he has someone with him.
* Batman, long after he finally tracked down the murderer of his parents, Joe Chill, discovered that Chill was actually an assassin hired by the mobster Lew Moxon who wanted revenge on Thomas Wayne for getting him arrested. Batman reopened the case to hunt his parents' true murderer down, a discovery that was especially galling considering Robin pointed out that by leaving him alive, Bruce was manipulated to be Moxon's alibi since a 10-year-old could not be expected to know that a simple stick-up gone murderous was more than it seemed.
* Batman lost both his parents to a random mugger by the name of Joe Chill. Although this is the major cause for Bruce's decision to become a superhero, he's able to focus on the big picture. Naturally,
* Batman: Mad Love, looking over his elaborate ideas for killing Batman in a "funny" way, gleefully cackles and carries on about "The Death of a Hundred Smiles," which would involve Batman getting dunked in an aquarium full of piranhas and then torn to pieces - and then suddenly becomes depressed when he realizes that the plan wouldn't be funny at all, because piranhas can't smile.
* Batman manga climaxes with Batman invading a wrestling show to challenge a heel wrestler who's been committing real crimes to a "loser unmasks" match.
* Batman - many stories are noir at their core. Gotham City is obviously a very noirish setting.
* ''Batman: Masked Souls'' ends with Bane trying to tell a coast guard officer that Bruce Wayne really is Batman before Bane falls dead (or unconscious?)
* Batman: Mask of the Phantasm: A favored tactic of the Phantasm. It works.
* Batman: Mask of the Phantasm: Alfred uses this to show us why he is the most awesome butler alive.
* Batman: Mask of the Phantasm as it tells the story of how Bruce Wayne becomes Batman. Whether the parts of the movie set in "present" are before, after or during the events of the show is open to fans' interpretation.
* Batman: Mask of the Phantasm: Batman watches Andrea and Arthur Reeves while they're on a date. Gotham's gargoyles once again provide excellent cover.
* Batman: Mask of the Phantasm Blu-ray was released in October 2018, but with the much less well-received Canadian French dub instead of the European one. Many upset fans recently signed a petition to make the film's distributor release the still hard-to-find European French dub on video.
* Batman: Mask of the Phantasm, Bruce jumps and clings on to the back doors of a fleeing truck.
* Batman: Mask of the Phantasm: Chuckie Sol. In the book, it's explained that he deliberately cultivates that image because he believes it'll be taken as a sign of weakness if he ever lets anyone see him smile. The one time he ever smiles in the story is explained in the book by his belief that Phantasm, who's the only character seeing him do it, won't live long enough to tell anybody.
* Batman: Mask of the Phantasm full of the high-grade variety in his casino before his encounter with Batman (and Phantasm).
* Batman: Mask of the Phantasm has Joker being taken away by The Phantasm, presumably to be killed. Guess who showed up later in the series, unharmed? Go on, guess!
* Batman: Mask of the Phantasm, has this multiple times. Both times including Alfred walking in on Bruce having a makeout session, and Alfred making a quick 180 to give Master Wayne some privacy.
* Batman: Mask of the Phantasm in action. Bonus points for spitting the coffee all over his windshield.
* Batman: Mask of the Phantasm is a borderline case. Intended as DTV, it received a short theatrical run with no alterations.

* Batman: Mask of the Phantasm or a processed Bologna log. Guess which one he chooses.
* Batman: Mask of the Phantasm reflects Bruce's relationship with Andrea, and the happiness he finds in it, though inevitably he leaves it behind to become Batman.
* Batman: Mask of the Phantasm shows the Joker using a jetpack with exhausts on the shoulders.
* Batman: Mask of the Phantasm that also enclosed the engagement ring.
* Batman: Mask of the Phantasm, the audience is led to believe that the Phantasm is Carl Beaumont. In-story, many characters initially believe the killer to be Batman. The best part is that Andrea Beaumont went out of her way to make everyone think this in-story. She stole into Gotham as the Phantasm in order to kill her first victim, then left and returned a few days later as Andrea (this time on an airplane) before resuming her killing spree. She hoped that this would allow her to plausibly shift the blame for the murders to her dead father, but the Joker (and Batman) eventually caught on. Also in-story, the Joker theorizes that Arthur Reeves hired the Phantasm to kill the mob bosses (and Joker himself) to hide his past deals with them. He confronts Arthur about it and they are interrupted by a call from Andrea which clues the Joker in to the real identity of the Phantasm.
* Batman: Mask of the Phantasm: The Phantasm is styled after the Grim Reaper, with a black cloak, skull mask and scythe blade on a gauntlet.
* Batman: Mask of the Phantasm to talk about her family's connection to Phantasm. Andrea is not impressed by the schtick.
* Batman: Mask of the Phantasm when available on video the following year.
* Batman: Mask of the Phantasm when he decides he can either marry Andrea Beaumont or become Batman but not both, refusing to go out on his nighttime vigilante missions if there's someone worriedly waiting for him to come home.
* Batman: Mask of the Phantasm, when The Joker attacks Arthur Reeves and injects him with Joker Venom with a needle, the injection is shown in shadows.
* Batman — gotten a "bank wet" — to defeat its pressure-sensitive locking mechanism and was looting it in scuba gear.
* Batman: Melody for a Mockingbird Bruce and his bride-to-be Selina punish Damian for fighting in school by making him go wedding dress shopping with the girls where he's slowly bored to death. It's so effective that he's tempted to drink complementary champagne just to make the trip less painful.
* Batman mini-series had this running as B plot. An open bounty on Batman brought a variety of hitmen to Gotham to attempt to collect.
* Batman miniseries, which is liked for using underutilised characters while also working in some a healthy amount of world-building for Gotham. Then came the "Court of Owls" arc, which is generally liked for having a neat conspiracy angle and some more world-building, although it's considered overly long and wordy by some. After that is where the rot may or may not set in, depending on who you ask:
* Batman, Mister Freeze and the Calendar Man). Here's a few examples of Batman stories set in Christmas time, both in comics and other media:
* Batman. Money is not the only reason Bats is surrounded by women. The apple doesn't fall far from the tree as his adopted sons follow in his footsteps. Dick adds in his magnetic personality, Jason has his Bad Boy charms and Tim is one in the future he's shown in. Damian is the exception since he's still a kid, but in the future, he does get his father's looks.
* Batman movie had the Joker lace beauty products with the ingredients for his trademark Smilex poison. The twist was that the contaminated products weren't poisonous on their own; they had to be mixed when the consumer used multiple products together, making it harder to find the cause of the poisoning.
* Batman movie is remembered for its deluge of merchandise, which arguably set the stage for the way subsequent superhero movies were marketed. It was estimated in 1992 that the movie had brought in around $500 million in merchandise sales.
* Batman movies had more than a few of these on the part of its main villains:
* Batman movies: One of the few good things to be said for George Clooney's turn in the cowl is that his lantern jaw fit the physical requirements better than his predecessors.

* Batman much unrepentant/crazy) and is always one step ahead of Batman who can do little to stop the clown from killing boatloads of innocents.
* Batman: Murder at Wayne Manor is a mystery story that comes with various pieces of evidence that Batman finds, such as a party invitation, a photograph, a drink coaster, and more. The solution is sealed, so the reader is urged to try to figure things out on their own first.
* Batman: Mystery of the Batwoman delivers a slang comment in his usual prim-and-proper tone:
* Batman: Mystery of the Batwoman, having been recruited by Hawkman to police his town between incarnations.
* Batman: Mystery of the Batwoman put into the wall when they came to rescue. An interesting case, as the sharp thing was not present when he got tied up.
* Batman: Mystery of the Batwoman: When Roxanne accidentally misspoke about Bruce's playboy reputation concerning women during one of her ramblings.
* Batman?!" Needless to say, many a Batman fan was angered by this less than tasteful joke from Smith, feeling it completely degraded and humiliated the character for the sake of a cheap laugh instead of humanizing the character.
* Batman nemesis Clayface requires treatments to keep his body from dissolving. Regardless of the situation, he's always looking for something to give him better control of his form.
* Batman never kills Chill, but Chill is killed by his fellow mobsters, who blame him for creating Batman.
* Batman never stops trying to rehabilitate his former friend Harvey Dent aka
* Batman, new vigilante Baphomet holds Deadshot at bay by pointing a medieval crossbow at him. Deadshot points out how archaic the weapon is. Baphomet however points out that the crossbow has a 21st century firing pin, making it fully capable of sending a bolt through Deadshot's skull.
* . Batman, Nightwing, and Superman joined together to give the talk to Robin (Tim). They gave a special type of superhero talk that involves body armor.
* Batman Ninja, Bruce, as a Westerner in medieval Japan, creates a cover identity as a Catholic monk. With a bat-shaped tonsure.
* Batman Ninja, first with a bunch of monkeys in golden armor making a giant monkey to face off a mech, and then THAT fuses with a large legion of bats to form a giant Batman (with said monkeys forming the belt). Because why not?
* Batman Ninja: The Joker has a massive Gatling gun mounted on his ship which he uses to sink Batman's ninja ship.
* Batman: No Man's Land after failing many robberies because everyone knew he had an empty gun. Three guesses on why this was the last "The Punk" story.
* Batman: No Man's Land, describing how Harvey had been hit with acid that made one half of his face completely repulsive to look at. One half of his face has wispy white hair and is blistered and discolored in a permanent angry scowl, and the repulsive half being Harvey's untouched side.
* Batman: No Man's Land flat, the government (influenced by covert supervillain activity) decides that any further aid and reconstruction would just be throwing good money after bad and orders the city evacuated and left to rot. Anyone refusing to leave is no longer their problem. Gotham is left to the mercies of the Arkham inmates, criminal organizations, and street gangs for over a year, and the government actually goes so far as to declare Gotham to no longer be part of the American territory (something that's not possible under the US Constitution) and shot down any attempts to bring relief aid to the people who insisted on staying!
* Batman: No Man's Land foes including Mister Freeze, Gearhead, Killer Croc and the Ratcatcher. He also came across a group of High School students living underground who were treating the whole situation like an opportunity to really get into their role-playing, and did manage to find the stash of goods which were then distributed to the hungry of Gotham.
* Batman: No Man's Land has a scene where the Joker, one of his past torture victims (that is alive at the time of the scene), and some of his goons threatening said victim with yams. The victim's reaction says it all: "No please, not the yams!"

* Batman: No Man's Land. His Blackened face, though was already there, since he accidentally got his face burnt in a housefire. Most adaptations cut this out and give him the skull look from the very beginning.
* Batman: No Man's Land:'' In a flashback story, Dr. Thomas Wayne breaks into a closed drug store to get the medicine to treat a dying child, leaving behind a note and promising to pay for it. The druggist spends the next month blackmailing him over this. Ultimately, Alfred disguises himself as a cop to scare the druggist into handing the incriminating note over.
* Batman: No Man's Land) is introduced in a three-part story that he spends trying to take out the mutant Man-Bat with a sniper rifle. Pettit seems to care more about making the kill (and finding out just what Man-Bat is) than ending the crime spree, tries to shoot Man-Bat while he's carrying an innocent woman who could fall to her death if Man-Bat dies, and spends a lot of time yelling at Detective Kitch (who serves as his spotter).
* Batman: No Man's Land likely receive more and faster aid than New Orleans if similarly damaged, but the point remains.)
* Batman: No Man's Land, seismologist Jolene Relazzo tries to spread warnings that Gotham is due for a 7.7 quake. No one believes her except Bruce Wayne, who makes as many buildings as he can earthquake-proof. When Jolene calls him to warn him that the quake is hours away, he's unable to spread the warning due to being busy with his Batman duties.
* Batman: No Man's Land was never revealed and Dick doesn't believe it was really her, but the novelization likewise depicts her as dead.
* Batman: No Man's Land, while the Gotham City Police Department is essentially dissolved, many of its members remain in the city to provide a militia that supplies security and law and order for the citizens who couldn't afford to leave after the city-devastating earthquake.
* Batman: No Man's Land, with Gordon and Bruce trying to protect the innocent as Gotham is cut off from the outside world after the events of the previous season finale and carved up by the various villains and gangs.
* Batman occasionally uses the "Matches Malone" persona as an additional secret identity to infiltrate the criminal underworld.
* Batman offer him a chance to get that off his chest by saving another Thomas and Martha Wayne on a parallel world, and unknowingly inspiring that Bruce to one day become Batman for psychologically healthier reasons.
* Batman of herself for Freeze to display, and then fled the country before it all started.
* Batman of "POW!"/"ZAP!"/"WHAMMO!" etc., etc. This was because the show's brutal production schedule didn't allow much time for fight scene rehearsals.
* Batman of regular folks in the DCU (outside of Gotham, anyway) tend to think he's a myth, so as to avoid scrutiny from law enforcement outside of Gotham.
* Batman of scum and villainy all on its own? Hints at various supernatural origins for the city's woes and the Asylum's troubles come and go, but none are ever confirmed and there's always a mundane or comic-book-mundane explanation for everything else.
* Batman often have a sequence where Bruce dons the batsuit, punctuated with dramatic angles, closeups, and movements. This convention has since trickled down into some of the animated series.
* Batman often play around with the fact he wears a bullet-proof suit. Usually for dramatic effect.
* Batman often squares off against or teams up with Man-Bat, a who looks like human-bat hybrid but can transform — with varying levels of control and success — back into a human form.
* Batman of the Batcave; a souvenir of a case called "Dinosaur Island".
* Batman of Western superheroes. Until 2000 or so, when superhero movies started being huge, any outside journalism on the genre would invariably feature "Bif! Pow!" in the headline, as if Adam West was the last word on the subject.
* Batman on a newly-acquired henchman who, through statistics, "proved" that a broad daylight robbery had a 0% chance of being foiled by Batman.

* Batman once did this when first dealing with the bespectacled and nerdy efficiency expert
* Batman, once thought to himself that it's easy to think of Clark as a god while watching him lift up buildings to rescue people.
* Batman, one of his own daughters and her family were among the victims — she survived, they did not, and she was rather upset with him for it.
* Batman. One of the main characters was a famous musician who applied this trope to himself, feeling that his fame prevented him from keeping it "real". This didn't work too well
* Batman on his payroll, Lieutenant Eckhardt and orders him to kill Jack, making him a more direct perpetrator than most examples of this trope. This backfires magnificently when Eckhardt is killed by Jack, and Jack is dunked in chemicals following a battle with Batman and becomes the Joker.
* Batman. On one occasion, Batman actually (temporarily) entices him to leave by giving him a mere Batarang with his autograph.
* Batman on the few occasions Batman is confirmed to be absent from the city.
* Batman or some beach resort just hanging out and probably doing a variety of recreational drugs. When they finally showed up, they had more or less the same backstories as before.
* Batman page. Una was shot in the head by gangsters and now has an enormous hole in her forehead and extending all the way through, with no visible brain, yet functions just fine, and may be smarter than before the hole happened. It appears to be a combination of a previously undiagnosed freak medical condition (which resulted in the brain lining the skull rather than sitting in the middle of it) and Gotham City's water supply being seriously tainted.
* Batman people have nightmares about accidentally heading to school in their underwear. He doesn't. His nightmares involved accidentally going to school in his Robin uniform.
* Batman plays the Anticipator on many occasions. One such story has Batman entering an apparently unoccupied room. After standing there a beat, he says "you four men may come out now". Cue four ninja assassins.
* Batman: Poison Ivy usually has long red hair, but Tim Sale draws her with masses of ivy vines instead of hair.
* Batman practically runs an orphanage with the way he keeps taking on kids under his
* Batman precisely to provide an emotional center to his stories and an element of vulnerability.
* Batman putting him out of action for quite a while. In fact, the Game-Breaking Injury was Bane's entire plan to get Batman to the point where he could give him that broken back. He deliberately got all the other villains in Gotham causing chaos in a very short period of time, thereby ensuring that Batman wasn't running at anything close to 100%.
* Batman ran for Gotham City Mayor under the slogan, "Vote for Me or I'll Kill You!" Given that this was the Joker, at least he was being honest.
* Batman, Ra's al Ghul accidentally shoots himself when he grabs a gun from Batman's trophy room, not realising that it is a booby-trapped weapon rigged to fire backwards.
* Batman: Ra's al Ghul's early appearances threw in the occasional reference to his history before introducing the Lazarus Pit:
* Batman. Ra's Al Ghul very calmly explains that if he wanted to hurt Batman through Catwoman, he wouldn't kill her; he'd hold her hostage until the Dark Knight met his pre-release conditions.
* Batman, rather than just re-reading it, so got some important details wrong when (re)introducing Damian (Like it being a consensual encounter).
* Batman (Rebirth) #86, two Joker henchmen in masks are burning several other Joker henchmen alive. As they leave, one of them comments to the other that they've proved their loyalty, and the other responds by shooting him in the head. He then phones the Joker to say all the henchmen who knew the plan are dead. The Joker replies "Not quite all", and his van blows up.

* Batman (Rebirth) are all titled "I Am..." (Gotham, Suicide and Bane). The pattern is then completely broken by "The War of Jokes and Riddles" and "Rules of Engagement".
* Batman (Rebirth) provide a humorous example when Alfred announces that Bruce has proposed to Selina Kyle and she's accepted.
* Batman (Rebirth) storyline "Their Dark Designs", Cassander Wycliffe Baker was once the world's greatest detective — until his Moriarty counterpart, the Designer, pushed himself to advance through ten years of experience in a single year, and left Wycliffe humiliated and broken.
* Batman (Rebirth) that became so hated that he was disowned by a number of angry and disgruntled fans. When it was announced that the run was going to be cut short at Issue #85, with the rest of King's story being relegated to a Batman/Catwoman miniseries, many felt it was a mercy kill.
* Batman (Rebirth) the more Bruce became obsessed with it post-wedding.
* Batman (Rebirth) towards Bruce Wayne, which he took to the logical conclusion.
* Batman rejuvenate him every century or so. Various adaptations depict the process as having diminishing returns, putting more pressure on him to find a "worthy heir" before it stops working and/or he goes totally feral.
* Batman, reporter Alexander Knox does this on the hood of Vicki Vale's car.
* Batman: Return of the Caped Crusaders, being an homage to the 60s TV series, brings back the labels.
* Batman: Return of the Caped Crusaders, Catwoman is faced with the possibility of being sent back to prison. Instead, she opts to leap off a blimp and into a factory smokestack.
* Batman: Return of the Caped Crusaders playing Two-Face, who was deemed too gruesome for the TV show.
* Batman: Return of the Caped Crusaders rather than merely subduing his foes as usual.
* Batman: Return of the Caped Crusaders sees Commissioner James Gordon voiced by Jim Ward, with Jim simply being a less formal way to say James.
* Batman: Return of the Caped Crusaders: The Joker, Penguin, and Riddler attempt to dispose of Catwoman by jettisoning her through the airlock on the space station.
* Batman: Return of the Caped Crusaders to send them into a giant flaming oven.
* Batman: Return of the Caped Crusaders: When attacking the Gotham Palace, the Joker uses an electric guitar that fires entangling streamers that tie up the audience.
* Batman: Return of the Caped Crusaders will succeed "when Heck freezes over".
* Batman: Return of the Joker for both the NES and Game Boy feature stages where Batman fights on top of a train.
* Batman Returns (after Bruce has just apologized for suddenly leaving during their previous date, and they are pressed closely together while dancing on a ballroom floor):
* Batman Returns. After the second time, he spitefully tries to kill her, but she gets better.
* Batman Returns; all we hear is "Red Triangle Circus", "Red Triangle Gang", or just "Circus Gang".
* Batman Returns and become Catwoman in a very disturbing destruction sequence.
* Batman Returns and trashes of her apartment before her transformation into Catwoman.
* Batman Returns apartment is all pink with way more dolls and stuffed animals than you'd expect a grown woman to own. Her breakdown makes it very clear that she was the kind of person who used excessive optimism to mask her unstable mental state.
* Batman Returns: Batman recorded remarks the Penguin made believing he was more or less in private, only to replay them for Gotham City. The gibberish rewind noise was there even though the recording was on compact disk. Going for a cheap laugh, Bruce even did some scratching with the disks, as if they were vinyl records.
* Batman Returns, Batman's use of this is used by the Penguin to make the populace think that he pushed the Ice Princess off a building to her doom.
* Batman Returns, besides having a rearranged Redbook soundtrack, interspersed the

stages of the Genesis game with all-new driving stages.
* Batman Returns, Bruce Wayne and Selina Kyle accidentally expose their identities as Batman and Catwoman to each other by unthinkingly reenacting a snippet of banter from their previous fight. In a slight variation, they switched lines in and out of costume.
* Batman Returns, Bruce Wayne and Selina Kyle are at the same party when they realize that they are enemies (i.e., Selina figures out that Bruce is Batman, and he that she is Catwoman) while they dance together.
* Batman Returns Bruce Wayne and Selina Kyle are dancing at the Max-squerade Ball when each figures out who the other is.
* Batman Returns, Bruce Wayne is dating Selina Kyle; he doesn't know she is Catwoman, and she doesn't know he is Batman. In the book of the movie, Selina even wishes that she'd met Bruce Wayne before she'd become Catwoman. They accidentally reveal their identities to each other when they repeat a bit of flirty banter from their costumed personas while in their civilian identities. They both realize simultaneously who the other person is and that they've blown their own cover as well.
* Batman Returns capitalist millionaire department store owner who has slowly gained influence over the Penguin; and the Penguin himself increasingly grows fond of the finer things of Gotham City life as he becomes complicit in the political scheme, wearing a fine suit and sipping champagne.
* Batman Returns: Catwoman kicks Batman down there with a heel-heeled boot, but he barely reacts. Considering that the Groin Attack is one of Catwoman's favorite attacks, she may realize that this attack isn't very effective against Batman, as he isn't showing much flinch after receiving the attack. But, of course, Batman should be wearing a protective cup at the time, not to mention he's also been trained as a ninja and all.
* Batman Returns: Catwoman. She's pushed out a window to the street below, burned on the arm by a vial of acid and sent plummeting down into a truck full of sand, nearly strangled by one of the Penguin's umbrellas and sent crashing through the roof of a glass greenhouse (which rips her costume to shreds), and finally shot four consecutive times in the stomach. But all this just makes her angrier and crazier than before.
* Batman Returns could have", then pins one of his mayoral campaign buttons to the chest of her sweater, taking additional time to cope a feel there.
* Batman Returns crashing Gotham's tree-lighting ceremony, complete with clowns with Uzis, a Gatling gun mounted on a barrel organ, a fire breather setting a toy store ablaze, and the strongman beating down a Salvation Army Santa with his own sled.
* Batman Returns. Even canaries are (nearly) chewed along with the scenery.
* Batman Returns: Even though Selina Kyle is in love with Bruce Wayne and wants to spend her life with him, she can't let Max Shreck live.
* Batman Returns film that ran afoul of controversy, though it was presented to the public as just an escapist fantasy.
* Batman Returns had an organ grinder with a minigun in his organ, which he used in the Red Triangle's terror campaign at the tree lighting ceremony.
* Batman Returns had been cast to play the character (meaning the toy would have been made with him in mind), the figure allegedly had to be repainted to match the Caucasian skin tone seen in the comics.
* Batman Returns had the Penguin secretly running the Red Triangle Circus Gang, a gang of crooks who, like him, were former circus performers. It is hinted that they abducted children when they were a legit circus, likely the reason they shut down.
* Batman Returns has a chute disguised inside an iron maiden (although Alfred still takes the stairs).
* Batman Returns has the deformed penguin being abandoned as a baby by his parents during christmas and comes decades later to seek vengeance on Gotham.
* Batman Returns. He fondles a girl's breasts as he's pinning a button to her coat, rudely stares at a voluptuous woman's posterior for an excessive amount of time, sniffs Catwoman's spiked heel, and agrees to run for mayor only after learning that

being mayor in Gotham City entitles one to "unlimited poontang."
* Batman Returns: "I believe the word you're looking for is... AAAAAAAGH!" and "I am Catwoman. Hear me roar."
* Batman Returns: In the scene where Bruce asks Selina to watch the Tree Relighting Ceremony at Wayne Manor with him, you can see the Ice Princess being briefed on how to light the tree in the background, and based on her facial expressions, she seems to be annoyed at it. The next scene, the Ice Princess goes over the instructions inside her dressing room, before she gets kidnapped by The Penguin.
* Batman Returns, is revealed to love his son and his deceased wife, and also seems to have some hidden resentments towards Bruce Wayne and the rest of the silverspoon crowd.
* Batman Returns) it's possible that Catwoman/Selina is no longer human, but some kind of avenging angel/zombie/feline hybrid.
* Batman Returns Max Shreck. The Penguin is clearly the main villain and certainly the main threat as his plans increasingly escalate to mass murder and eventually destroying Gotham City itself, but the other two (especially Shreck) are formidable problems and all three engage in double-dealing, backstabbing and triple-crossing.
* Batman Returns. More to the point of this trope, they function as a sort of highly anarchic guerrilla fighting force with every weapon known to man: machine guns, rocket launchers, ninja weapons, and various incendiary devices.
* Batman Returns of these on the part of the Penguin, the primary villain of the film:
* Batman Returns old Batman panel was probably supposed to be ominous.
* Batman Returns on the Mega Drive/Genesis also has this. The second Penguin boss fight starts off with him dropping a giant ball, which chases you down several flights of stairs. You have to keep ahead of it, and then finally jump a gap which the ball will then fall into before you can fight against Penguin.
* Batman Returns opens with Penguin being dumped in the river on Christmas. The film's present-day is set during Christmas time as well.
* Batman Returns originally has Catwoman and Penguin working together to turn Batman into a villain. This ends when Penguin proposes to Catwoman.
* Batman Returns outfit, she's not actually modeling anything, but it makes her look good.
* Batman Returns: Penguin counts as this played straight. He's as pale as it gets but averts the usual tall, lanky build being short and squat.
* Batman Returns proves to be the final straw that pushes Selina over the edge and drives her to trash her apartment and become the dark and dangerous Catwoman.
* Batman Returns, Selina Kyle has a neon sign in her apartment that says "Hello There!". After becoming Catwoman, she smashes the O and the T, giving the sign a very different meaning.
* Batman Returns. She then also looks very attractive when dressed up in civilian evening dress as well.
* Batman Returns spends his early years as this, before his parents get rid of him by throwing him to the river.
* Batman Returns takes place during the Christmas season, but was released in June of 1992.
* Batman Returns the charred body of Max Schreck at the end has creepily intact eyes.
* Batman Returns the Christmas tree lights up. She's also unaware on who The Penguin is, despite all the attention he's been getting for "rescuing" the Mayor's baby and his mayoral campaign.
* Batman Returns: The first time we see Selina Kyle's apartment after her transformation into Catwoman, we are actually looking into her eerie, pink-hued dollhouse. She later spray paints it black and attempts to smash it up, making it creepy in a whole other way.
* Batman Returns.) The Ice Princess, meanwhile, at least wears fishnet pantyhose that give her good lower coverage, but her fur-lined top still leaves a lot of skin exposed to the wintry Gotham City air.
* Batman Returns. The mayor hangs a lampshade on this at the end of the movie.

* Batman Returns the weapons. Two men on stilts with heavily scarred faces toss flaming sticks back and forth during a gang-style riot - in the process burning the clothes of terrified bystanders rushing past.
* Batman Returns tie-in commercial for Diet Coke where someone is stealing Gotham City's power supply. What's Batman going to do? Look around desperately to grab a Diet Coke from a working vending machine.
* Batman Returns to the conversation, is only one part romantic but three parts sinister.
* Batman Returns vs. Catwoman. When Batman pushes Catwoman off him, she ends up in a pile of broken plant pots. Batman removes the sharp metal nail from his suit and tosses it at her. Catwoman picks it up and examines her hand back to front and lets out an irritated "Damn..."
* Batman Returns? We sure don't.) They also included Robin in the line, a character who doesn't appear in the movie at all!
* Batman Returns, when Max Shreck announces that the Penguin is running for mayor (not having gotten the Penguin's approval yet) a campaign aide makes fun of the Penguin's appearance, saying, "There must not be a lot of reflective surfaces down there in the sewers." (He meant mirrors, obviously.) Everyone laughs, including the Penguin, then the Penguin says, jovially, "Still, could be worse! My nose could be gushing blood!" Everyone laughs again... And then the Penguin bites the guy on the nose.
* Batman Returns, where Bruce gives Catwoman the offer to live happily ever after with him in his mansion. Her answer, she could never live with herself.
* Batman Returns). You can see in the quotes section that when Selina and Bruce are dancing and they realize her other identities, they are very afraid.
* Batman Rhino's constantly repeating the name of every tool the Ventriloquist asks for.
* Batman RIP, an amnesiac Bruce Wayne is helped out by a strange homeless man, Honour Jackson. It's not until Jackson and Bruce part ways that Bruce discovers Jackson died some time before Bruce met him.
* Batman R.I.P. during a rorschach test. It involves the death of billions from airborne Joker Virus, the lunatics escaping Arkham, and the Joker cutting Batman and Robin's throats with a straight razor. Their blood forms a flower shape.
* Batman R.I.P.. To extend the computer metaphor, the Zur-En-Arrh personality is so single-mindedly focused on crime-fighting that it has been described as "Batman on DOS." We also do see a bit of Bat-Mite so it is wondering how sane this Batman is (though given what Bat-Mite said, there is possibly no one right answer.)
* Batman: RIP, where the Black Glove attack Batman in the Bat Cave, and after throwing him out on the street drugged up and mentally unbalanced, they briefly coordinate the remainder of their plan from there until relocating to Arkham Asylum for the endgame.
* Batman RPG had a sample adventure where Joker puts Batman on trial for supposedly killing a man during one of their fights. It's clearly one of these (complete with a "jury of his peers" — twelve mannequins in Batman costumes), but unless the players can prove Batman's innocence, he'll willingly turn himself over to the police.
* Batman's acid by spraying the target with a strong base. Realistically, mixing a strong acid and a strong base together would result in a violently exothermic reaction.
* Batman's also responsible for Superboy. In one of the episodes Superman mentions that Batman has been responsible for helping Superboy adjust to his powers/get used to being on the Team. He also makes an effort to assure Connor he's doing good work at least once, regardless of what Superman's silence looks like. And let's not forget Batman also
* Batman saying this, and considering his career (which he is more-or-less retired from at this point), it should say a lot.
* Batman says that, in the case of Englehart and Rogers' version of the Joker, he's really that crazy.
* Batman's biggest weak points as far as emotion goes are his children, but

especially Dick. At one point, when exposed to the Scarecrow's fear toxin, he runs through his worst fears checklist in an almost bored manner, with everyone close to him dying. Then it comes to Dick, and Batman's only response is a very determined "No."
* Batman's cape is so awesome that it has the ability to change size. (Particularly evident in
* Batman scenarios. In adaptations where Bruce does manage to settle down, it's usually with Selina.
* Batman's continued ability to move without agony, do incredible gymnastics, and avoid of brain damage can all be attributed to this.
* Batman's detective skills are regularly put to the test in the overall
* Batman seems to be the in-universe version of this trope in an episode of
* Batman, Selina often expresses angst that Batman and Bruce are out of her league (and not just because he's a hero and she's a thief).
* Batman series, as the rookie comes around a corner just in time to watch Bats deliver a spine-snapping kick to a thug (and not soon enough to have seen the gun the thug was holding to Batman's head). Batman ignores him in favor of shaking down the thug. The rookie's senior partner offers sage advice: "Don't try it, kid. He's being patient with you as it is."
* Batman series had comic book sound effects appear on-screen during fights.
* Batman's eyes, but since her husband Jack (who wasn't paying any attention to his son) was in between her and Tim she couldn't reach him in time to prevent him from seeing their deaths.
* Batman: Shadow of the Bat Annual #4, Nu-Gotham is a city ruled by King Bruce the 23rd of the royal Wayne line, also known as the City Hero, the Batman.
* Batman share one kiss on what they thought would be their last battle.
* Batman's health not regenerating between consecutive fights to fight on equal footing.
* Batman's help to take on the Human Torch?" If you ever met (or if you are) a comic book nerd, you know the debate will be better than any presidential election debate.
* Batman she wants to reveal the secret identities of the entire Bat-Family. It isn't until a disguised Bruce Wayne Batman is able to snatch her away and tell her the severity of the situation is she able to settle down slightly.
* Batman short story collections feature this. A few times Bruce Wayne shows up in a Batman costume. How silly!
* Batman short story set during WWII has Batman briefly detain Catwoman, who claims the latest heist she's planning is against a Nazi sympathizer. Batman voices his doubts... only to be interrupted as the mark greets his guests with a hearty "Heil Hitler!"
* Batman shot of adrenaline to the heart, which actually does revive him this time.
* Batman shoves her out a window. They try to make it more reasonable by Batman unfolding his cape and gliding down with Rachel, but there's not nearly enough time with the way the film is edited for them not to have at least some kind of injury when they land.
* Batman showcased Brenna "Batwoman" Wayne's incredibly advanced 25th-century power armour, before destroying its power cells so she had to swap it for a bat-costume that was just a costume.
* Batman shows himself to be one, as Superman points out in the battle against Darkseid in
* Batman; Silver St. Cloud in the Seventies, and Jezebel Jet in the modern age. No, wait, scratch that last one...
* Batman's mechanic, Harold, when he is shot in the head by the villain in question.
* Batman so Batgirl takes the role instead, acting as one of the show's few normal characters.
* Batman. So he wants her and Batman to marry to give him a true male heir.
* Batman: Some stories have Batman in this position compared to the rest of the heroes. While most of the heroes tend to be more straight up heroic and try not to

commit morally questionable acts unless they have to, Batman has no problems doing that and while he is better than most of his rogues gallery, tends to have problems such as trusting issues, being too harsh and using brutal methods to get what he needs to stop them while keeping to his no-killing rule most of the time.
* Batman: Son of the Demon practically whole cloth and applies it to Batman. A hero allies with the head of a known criminal organization to stop a mutual enemy. The hero marries his criminal ally’s beautiful daughter as part of their pact (but also because he kind of wants to). Due to the machinations of the villain, the marriage quickly ends in tragedy.
* Batman: Soul of the Dragon and Bronze Tiger stuck in the Naga's realm preparing to fight his demon horde with no plan of escape.
* Batman: Soul of the Dragon die during her training years, long before she could even adopt her comic book persona of Cheshire.
* Batman: Soul of the Dragon himself die after killing Jade Nguyen during his training years, long before she could even adopt his comic book persona of Judomaster (and by extension, long before the point he'd meet his death at the hands of Bane).
* Batman: Soul of the Dragon: In the comics, Lady Eve is black-haired while King Snake is blonde, but here they're blonde and redheaded, respectively.
* Batman: Soul of the Dragon (not the Batmobile, but a disguised civilian car) to blast herself onto an overpass that the villains are using to escape. Without bothering to ask for Batman's approval first.
* Batman: Soul of the Dragon scenario. But then Richard tricks him into a gated area on the pretense that they'd fight there and just locks the bouncer inside when he enters it without a though. Richard then casually leaves the area while ignoring the man's angry screams.
* Batman: Soul of the Dragon, Schlangenfaust escapes with the sword after his car is picked up by a helicopter with a large electromagnet attached to it.
* Batman's own troubled romances with Catwoman and Talia probably count.
* Batman's paranoia, manipulative tendencies and reluctance to be open with people has also caused many problems for himself, his allies and the entire world over the years. The biggest example of this would be the
* Batman's parents were kidnapped with Batman showing up to save them, it looked like it would help their relationship recover since Tim had said they'd been fighting and implied they were looking at divorce and their shared trauma has pushed them closer together. Instead, Janet is killed and Jack is left paralyzed in a coma due to poisoning.
* Batman special focusing on Batman had one questioning if the Batcave has any bathrooms or if Bruce has to run back up to Wayne Manor for a bathroom break (though this is averted in canon as one of the comics shows someone on the toilet).
* Batman's Power Ring can't extract the poison out of her body. Hal Jordan glumly reckons some of its components must be yellow-colored.
* Batman sprays Explosive Gel over his fist to power up his punch. Though it is explained why he can't do this normally as he severely injured his arm doing that in said cut scene.
* Batman's stories. In truth, it was editorial director Irwin Donenfeld's fault for having sci-fi be put into the DC output. Schiff recognised that aliens, spaceships, and the like had no place in Batman's detective storylines, and in fact, sci-fi is outside his aptitude as an editor. He argued against the management, but eventually gave in to pressure.
* Batman (Stern) uses a set of unidentified voice actors to do custom clips in place of the movie actors. Oddly, the game uses a mix of movie clips and re-recorded dialog, making the transition more jarring.
* Batman story "Batsman: Swarming Scourge of the Underworld", in which his upper limit for "we've been going out too long" is about twenty minutes.
* Batman story called "The Corpse Came C.O.D." (issue #271), when Alfred receives a carpet with a corpse rolled up in it and brings it to the attention of his master Bruce Wayne as well as to the police, leading to Batman investigating the matter.
* Batman story involves a young man who is committed to Arkham Asylum after being

wrongfully convicted of murder. His constant protests of innocence are dismissed as the rants of a crazy person and he is subjected to increasingly brutal treatments in attempts to "cure" him; instead, they end up making him incurably insane.
* Batman storyline, a mad Joker-wannabe hurls himself into a chemical vat in an attempt to replicate the transformation. However, as Batman unsuccessfully warns him, the industrial acids therein are much stronger than the ones that disfigured the Joker years ago, and the wannabe simply disintegrates.
* Batman storyline, James Gordon took on the Batman mantle to protect Gotham in the hero's absence.
* Batman story, Maxie Zeus hires construction workers to build a copy of Ancient Rome. When one of the workers suggests building traps for the lion pit or using a lion that turns into a velociraptor to make things more interesting, Zeus refuses because he doesn't want his Ancient Rome to have anything the original one didn't. The worker comments that just a normal pit with a lion isn't scary and Zeus reacts by throwing the worker at the pit and daring him not to feel scared once the lion arrives.
* Batman story "The Autobiography of Bruce Wayne", the Scarecrow crashes a wedding that Bruce is attending, and hits the congregation with fear gas, causing everyone to relive their worst fears. When Batman suddenly sees his allies (Robin, Batgirl, Commissioner Gordon, Superman) disappear before his eyes, Scarecrow actually mentions this trope by name: "So, Batman, your greatest fear, your Room 101, is autophobia!"
* Batman story, "The Sacrifice", the Phantom Stranger shows Batman what it would be like if his parents didn't die. He gets the family that he's always dreamed of, but without Batman, Gotham City has fallen to ruin under the constant gang wars controlled by supervillains, Commissioner Gordon has become a bedridden quadriplegic after being tortured by one of these gangs, Ra's al Ghul has conquered much of Eastern Europe, resulting in the deaths of hundreds of thousands, and Dick Grayson is on death row for the murder of Tony Zucco.
* Batman (Sunsoft) before you begin battling leaping goblins in sewers that didn't happen in the film.
* Batman/Superman crossover "World's Finest" has a male example played for laughs. Harley Quinn, chauffeuring a limo, picks up Lex Luthor. She then goes into "hubba hubba" mode when she sees the Joker at a curb, hitching a ride and rolling up his pants leg, showing off his gam.
* Batman/Superman Hour episode "Freeze's Frozen Vikings", a number of Mr. Freeze's henchmen are frozen inside an iceberg. When he thaws them out they're perfectly fine.
* Batman's villain the Penguin (real name: Oswald Cobblepot) is one of the first that started the whole Penguin-palooza. He is also probably the most popular of all the ridiculous supervillains with ridiculous gimmicks that do not look threatening at all.
* Batman: TAS where he is a sympathetic figure trying to cure his wife, Mr. Freeze is a thug who enjoys robbing banks.
* Batman taunts him at one point that after all this time and delusions of grandeur, Ra's hasn't mastered death at all; he's ruled by the fear of it.
* Batman, Taxes, Tofu, and Jelly Beans. The sheer amount of times he's faced Superman and lived would qualify him here even if nothing else would.
* Batman/Teenage Mutant Ninja Turtles loss that motivates him to be a hero.
* Batman/Teenage Mutant Ninja Turtles: Raphael doesn't say "Cowabummer!" when Batman shows him the alley where his parents died—that was a parody fan edit that was widely circulated online. In the original comic, Raph is silent for that panel.
* Batman/Teenage Mutant Ninja Turtles: This slowly happens to the Turtles and Splinter; after analyzing a sample of their blood Batman managed to acquire, Lucius Fox discovers that the mutagen that transformed them is incompatible with the laws of physics in the DC Universe, and thus, they're slowly reverting back to ordinary animals. Part of the plot is the Turtles and Splinter trying to return home before that happens.

* Batman/Teenage Mutant Ninja Turtles; when the Turtles are trapped in the DC Universe, analysis of their blood reveals that the mutagen that transformed them is losing its potency as it's incompatible with the laws of physics in this universe, putting the turtles on an unknown time limit to find a way back to their universe before they revert to normal turtles.
* Batman. That being said, most of his arsenal (including the Batsuit) is designed and built by himself.
* Batman that eventually Nora contracts the rare disease that results in her being placed in suspended animation while Victor feverishly works to save her...before he himself is turned into Mr. Freeze. The fact that they share their first kiss while snow falls around them is romantic...but still bitter irony considering the mutation that Victor ends up undergoing later on.
* Batman that he thought wasn't "American" in his eyes. He escapes and Batman deals with him, but when the government kills the soldier, he calls them out and vows to reveal everything.
* Batman that he was prejudiced about the case because he was actually Batman — and after everyone stopped laughing, the judge told him to stop jerking around and take things seriously.
* Batman that listed its contents used to include a set of skeleton keys that could unlock 90% of known locks.
* Batman that more resembled a bunny than a bat. And since his identity was kept secret in solicitations, and fans needed a nickname for him (e.g, Azbats for Azrael Batman, Dickbats for Dick Grayson Batman), people resorted to calling him Batbunny. Thankfully, he wore a more traditional batman suit underneath. The bunny resemblance was also mocked in-universe.
* Batman that since Batman is often seen in contact with criminals while he himself is often surrounded by police, he is the more trustworthy character.
* Batman. That's still quite a huge step down from a suit of armor that can stand up to some of the Marvel multiverse's most powerful beings.
* Batman: The Adventures Continue, the Joker actually hires a henchman named Straightman. Ironically, he's terrible at being one and Joker continually chastises him for ad-libbing.
* Batman: The Animated Series: A criminal named Lock-Up has a truck with robotic arms inside that grabs cars and pulls them inside it.
* Batman: The Animated Series. After the theme of the "Jokers Wild" casino is revealed on live television (complete with revolving laughing Joker head), reporter Summer Gleeson is caught on camera muttering, "Just disgusting."
* Batman: The Animated Series after this trope; interestingly enough, these ads often took pains to mimic what an in-universe newspaper would report on, which sometimes led to headlines only tangentially related to the episode's plot (the ad for "Joker's Favor", for instance, focuses solely on the banquet for Commissioner Gordon).
* Batman: The Animated Series, a giant half-human cat man, on a decaying rope bridge. The bridge snaps with Tygrus deflects one of Batman's batarangs, cutting the rope.
* Batman: The Animated Series. A later episode features a full-scale zeppelin.
* Batman: The Animated Series" Alfred tells Bruce he's in London, in which Bruce asks 'London England?' and Alfred replies 'There is only one', though there is a city of London in Ontario, Canada, and at least 8 Londons in the United States, among others.
* Batman: The Animated Series, all designed to keep him busy so the villain can kidnap and kill the mayor.
* Batman: The Animated Series allowed anyone to look young again... but if you stop using it, you suffer horrible withdrawal. When an overdose was applied to a particularly recalcitrant actor, he became Clayface.
* Batman: The Animated Series, all while only experiencing moderate dizziness from the sedative. He finally goes under after falling down a waterfall.
* Batman: The Animated Series, "Almost Got 'Im": An episode in which the villains describe their elaborate schemes to get Batman, Killer Croc describes how he faced

off with Batman in a quarry, and then...
* Batman: The Animated Series, a (momentarily) reformed Harley Quinn encounters Bruce Wayne in a clothing store and recognizes him by his chin...
* Batman: The Animated Series, and he had to be constantly reminded to be flat and robotic.
* Batman: The Animated Series and her career just ended, driving her to take on her Baby Doll persona as a criminal.
* Batman: The Animated Series and holds a toy so she can tell where he is. When the little girl tells him they're moving, he drops the doll in shock.
* Batman: The Animated Series and is caught off-guard by Freeze's return:
* Batman: The Animated Series, and Joel Schumacher's much-maligned "Batman in a tight rubber suit" movies. (The kids themselves are Classic Dick Grayson, Carrie Kelly and, er, a kid version of Joel Schumacher.)
* Batman: The Animated Series and swapping stories. Cue the Penguin's story:
* Batman: The Animated Series and the other is a guy who looks like a humanoid croc).
* Batman: The Animated Series and the Scarecrow being the obvious examples, the latter especially since his crimes are almost entirely based around spreading terror and driving people insane with fear. There is also the one-shot villain Lock-Up, a cruel and power-mad guard at Arkham who thinks that criminals deserve to be tortured and clearly enjoys doing it — and when stopped, expands his definition of "criminals" to those who got him fired or condemned his actions, as well as Gordon, the Mayor, and Batman, because he thinks they are too "soft" on criminals. He is so scary the other Bat-rogues tried to escape Arkham solely to get away from him.
* Batman: The Animated Series and the various films are all separate continuities.
* Batman: The Animated Series and too different from the source material).
* Batman: The Animated Series and wants to put him on trial. The inmates of Arkham kidnap her and Batman and put Batman on trial, accusing him of creating them, and Janet is given the task of defending him. By the end of the trial, Janet realizes she was wrong; Batman may have inspired some of their gimmicks, but even without him, they would have become criminals and caused trouble for Gotham regardless.
* Batman: The Animated Series", an explosion temporarily blinds Bruce Wayne. He carries on anyway with a headset that sends visual information directly into the brain that plugs into a power-cell on his belt or a port on the Batwing's main console. Naturally, the power cord breaks right before the climax. Batman still saves the day by determining the Penguin's location with sound (banging on walls, throwing wrenches, etc.)
* Batman: The Animated Series appear as men singing "Auld Lang Syne" in a diner on New Year's Eve, when Batman and Gordon sit down for their once-a-year coffee.
* Batman: The Animated Series are likely to be hit as well and beg him not to.
* Batman: The Animated Series as karmic justice for their environmental destruction. She has no qualms about going after their friends or loved ones as well.
* Batman: The Animated Series as opposed to Joker's deranged sociopathy. From a production standpoint, the crew decided to introduce Creeper the DCAU, had trouble designing him as he kept looking like the Joker, and decided to just run with it.
* Batman: The Animated Series), as well as Killer Croc, Scarface and Ventriloquist, and redefined and updated the likes of Mr. Freeze to the point that it quickly became his origin in the comics and wider media.
* Batman: The Animated Series at first. However, the episode "Beware the Creeper" later retconned this into one of many aliases the hitman pre-Joker used before his transformation.
* Batman: The Animated Series attempted to use her own device for that. It didn't have enough punch to throw the hook high enough, but turned out useful for knocking people out.
* Batman: The Animated Series: At the end of "The Last Laugh", the Joker is dangling over an incinerator:
* Batman: The Animated Series, a war between Batman and her father as a result of

it, all because she had kept her heroic identity secret from him until that point.
* Batman: The Animated Series, Baby Doll rigs the power plant to explode by shutting down the coolant and regulators.
* Batman: The Animated Series, Baby Doll takes an interest in Killer Croc, (wrongly) believing they are kindred spirits because of their physical deformities. On the day of his scheduled execution, she pays him a visit. He initially isn't interested until she starts tossing him raw chickens, which happen to be his favorite food.
* Batman: The Animated Series, Bane, having been fatally electrocuted by Batman, uses the last of his strength to throw the Batsignal at Batman and Jim Gordon, knocking the two off the roof to their deaths.
* Batman: The Animated Series Batman blames himself for the death of his parents, despite having no logical reason to do so.
* Batman: The Animated Series. Batman comments that they're worse than the Joker (who has the excuse, or at least the explanation, of being completely insane).
* Batman: The Animated Series batshit-insane clown-based criminal in Gotham City", rather than who is Harley's man.
* Batman: The Animated Series: Before Terry, Bruce went through this while fighting one of Scarface's goons.
* Batman: The Animated Series blows up the papers he needs for his hearing, and a playful dog accidentally gets him to fall into a park fountain. While he's physically unscathed by it all, he still ends up late to court and loses.
* Batman: The Animated Series: Both parts of the "Two-Face" episode have one. The first opens with Harvey Dent trying and failing to escape from "Big Bad Harv" persona, foreshadowing his eventual fall. The second features Bruce suffering from a nightmare early on of his guilt for failing to keep Harvey from becoming Two-Face.
* Batman: The Animated Series bounty hunter with a hideously scarred face and gruff manners that hide his heroism.
* Batman: The Animated Series breaks into a thrift shop to assemble his costume - the clerk, a young woman in a green sweater, is unfazed and assists him. Fans took a liking to her and nicknamed her "Thrifty".
* Batman: The Animated Series, Bruce explains to fellow prisoner Summer that they escaped because Batman arrived and took down the bad guy. Hey, his voice changed so it was mostly true...
* Batman: The Animated Series, Bruce pulls one of these when his friend Harvey Dent tells him he's planning on proposing to Pam Isley (not knowing she's evil yet).
* Batman: The Animated Series", Bruce Wayne realizes that a series of bombings are copied from the Grey Ghost show he enjoyed as a kid. The actor who played him hands over the episode, which Bruce enjoys watching while searching for clues until he finds out that the bombs were driven in toy cars, leading to an unbelieving reaction and Bruce to comment, well, You Have Got to Be Kidding Me.
* Batman: The Animated Series, but are you expecting flawless villainy for an insane criminal?
* Batman: The Animated Series. But because Harley had still been willing to kill him, the Joker gives her a sincere smile and says "Baby, you're the greatest!", followed by the two of them embracing.
* Batman: The Animated Series, but it had to be replaced because doing so hurt his throat.
* Batman: The Animated Series, but not quite so much as Batman himself.
* Batman: The Animated Series by Penguin and Joker wondering if Batman covers his head with a mask because someone blew part of his face off.
* Batman: The Animated Series. By the end of the episode, the Joker is begging Batman to save him from the lunatic.
* Batman: The Animated Series by the inmates of Arkham Asylum and district attorney Janet Van Dorn helps him as best she can by sowing discord among the criminals:
* Batman: The Animated Series by the later revelation that Task Force X exists in the DCAU, so villains are released in exchange for top-secret work, and then they have to lie about it to the public.

* Batman: The Animated Series called HARDAC captures several prominent citizens of Gotham City and replaces them with androids.
* Batman: The Animated Series carries a laugh track on tape with her everywhere and plays it at moments she thinks are appropriate (along with "Ohhhh..." and "Awww...").
* Batman: The Animated Series catches him with his grappling hook, but Joker ends up with his pants around his ankles, making all the bystanders laugh at him as he's dragged away by the police. Humiliated, he puts the trophy he stole over his head.
* Batman: The Animated Series clause kept their demise from being outright stated.
* Batman: The Animated Series comes with postcards depicting key moments from the series and POP! figures of Batman, Joker and Harley Quinn.
* Batman: The Animated Series comics). In another episode, she gives him a lock pick.
* Batman: The Animated Series comics). In the animated series, Lyle Bolton was once the new Head of Security at Arkham Asylum, but whose methods were so harsh and extreme that everyone at the asylum was afraid of him, particularly Scarecrow. After being relieved of his post, he would go on to "arrest" those who he deemed to be at the root of Gotham's problems, including the mayor, Commissioner Gordon, reporter Summer Gleeson and the chief doctor of Arkham — the very same people who exposed his abuse of power at Arkham and got him fired — before being stopped by Batman and Robin.
* Batman: The Animated Series could assume human forms, and then change to a blob to attack if he is found out.
* Batman: The Animated Series, creating a flood that knocked Joker down and gave Batman the chance to free himself.
* Batman: The Animated Series. Cue the camera panning out slightly to show Batman standing right next to the master switch, which he promptly flips.
* Batman: The Animated Series deals with an inventor who has secluded himself in his own little Tomorrow-Land. It does look heavily Zeerust, but then, most "modern" buildings and fashions in that series tend towards the early 20th century, so who knows how they see it.
* Batman: The Animated Series delivers one of these to him to snap him back to his senses.
* Batman: The Animated Series, despite Selina's countless attempts to seduce Bruce with her catty double entendres.
* Batman: The Animated Series did this all the time, particularly in any episode introducing a new villain. There would always be a line at the end in which Batman suspects he hasn't seen the last of the new foe. Perhaps most blatant is the ending to the Ra's Al Ghul two-parter, in which Ra's falls into the Lazarus Pit and is presumed dead, but the final shot shows a hand rising up out of the pit while maniacal laughter is heard.
* Batman: The Animated Series discovered his), while Dick Grayson (Robin and later Nightwing) and Barbara Gordon (Batgirl) also dated in college for quite some time before they figured out each other's secrets.
* Batman: The Animated Series does help him open up somewhat but his jadedness never truly fades.
* Batman: The Animated Series does this perfectly, with the booms and flourishes matching up perfectly with the action on-screen.
* Batman: The Animated Series dubbed "Dark Deco" to make Gotham look as sinister and oppressive as possible.
* Batman: The Animated Series E23 "Vendetta" Vendetta", Batman realizes the nature of his foe due to Alfred's offhand comment that he was going to keep dinner in a Crock Pot to keep it warm.
* Batman: The Animated Series", Earl Cooper was a Whistleblower William who was nearly killed by his bosses for trying to go public about a potential lethal safety defect in his company's newest model of car and was saved by Batman. He lost his job and was living on the streets when Batman saved him again... by tracking him down and hiring him to design the Batmobile.
* Batman: The Animated Series ended abruptly by, "You little fool. The Joker

doesn't love anything but himself. Wake up, Harleen. He had you pegged for hired help the minute you walked into Arkham."
* Batman: The Animated Series enthusiasm, the commercial barely seems out of place.
* Batman: The Animated Series episode "Almost Got 'Im," where Joker rigs one up to an electric chair, straps Batman to it, and lets laughing gas leak into a studio audience.
* Batman: The Animated Series episode "Appointment in Crime Alley" took place in real time, with frequent shots of clocks counting down to a dramatic explosion. The episode came to be because the network wanted to see an episode showing a day in the life of Batman, hence the numerous events that pile up in the fifteen minutes of the countdown.
* Batman: The Animated Series episode "Fear of Victory", Scarecrow tosses a vial of fear-inducing powder off the overhead scaffolding at a Gotham Knights football game. Robin fights through a previous exposure to the powder and snatches the plummeting vial in mid-air. Lampshaded (kind of) by the sports announcer's simultaneous narration about a "fumble" and a "recovery" on the playing field.
* Batman: The Animated Series episode "Harlequinade" the Joker plots to level Gotham City with a nuclear bomb. When it's clear that his plan is going to fail due to Batman's interference, he aims the gun turret of the plane he planned to escape with on the bomb, vowing that, "That bomb's going to go off even if I go with it!" Fortunately, he doesn't succeed.
* Batman: The Animated Series episode "Heart of Ice," Batman does some sleuthing around GothCorp's facility and finds a videotape inside Viktor Fries' case file. The videotape has him documenting on a revolutionary process that he developed of cryogenesis that he is placing his terminally ill wife, Nora Fries, in until he can develop a cure for her. Suddenly, Ferris Boyle bursts in and demands that he shut down the experiment due to his stealing money from him to commit the experiment. Viktor attempts to reason with and eventually is forced to point a gun at Boyle to stop him from halting his experiment. Boyle then tries to reason with him, before promptly kicking him into some vials containing chemicals relating to the cryogenic process, causing a biohazard, with Fries also visibly deteriorating from the accident while calling Nora's name in a lamenting manner as the tape ends.
* Batman: The Animated Series episode "Holiday Knights", which had three vignettes about the Bat-family dealing with holiday crime.
* Batman: The Animated Series episode "I Am the Night." Already wondering if his crusade is doing any good at all, Batman snaps when Commissioner Jim Gordon is wounded after he's late helping Gotham Police during a bust, due the the Dark Knight visiting the site of his parent's death as it happens to be the anniversary. He's so broken by this, he considers hanging up the mantle of the bat even when Dick Grayson comes by to give him some moral support. Later on, word gets out that the man who put Gordon in the hospital is now looking to finish what he started. Dick attempts to rally Bruce to the scene, but he is unresponsive, and in the end Dick heads out as Robin to guard Gordon himself. And then just when Robin's getting ready to leave the the Bat Cave, he's stopped by Bruce, decked out once again in his Batman costume.

* Batman: The Animated Series episode "If You're So Smart, Why Aren't You Rich?", Robin knocks a thug standing on a table off his feet by pulling out the tablecloth. "I love that trick, but I can never make it work."
* Batman: The Animated Series episode involved the Clock King using a portable device to slow down time so he could sneak in and plant a bomb. Batman winds up grabbing the bomb, slowing time down and driving it out of town. There's a nice shot of Batman holding the bomb as it detonates in super-slow motion.
* Batman: The Animated Series episode "Joker's Millions", the impoverished Joker is living in a cheap apartment due to money issues. When heading in, he's addressed at the front desk as a "Mr. Ker" implying he signed his name as "Joe Ker" when renting the place.
* Batman: The Animated Series episode "Joker's Wild", The Joker, after hearing that someone made a casino based on his likeness, goes to said casino to wreak who-

knows-what sort of havoc... but another guy dressed as him mistakes him for a fellow casino employee, shoves some chips in his hands, and tells him to man the blackjack table.
* Batman: The Animated Series episode "Judgement Day", courtroom-themed vigilante The Judge tells The Riddler, "It's about time someone threw the book at you!" and drops a car-sized book on him, nearly killing him.
* Batman: The Animated Series episode "Mudslide", Batman wonders about Clayface's new female accomplice:
* Batman: The Animated Series episode "Prophecy of Doom", during the confrontation at Gotham Observatory. Unable to save the girl and still stop the bad guy from fleeing down the planetarium's main aisle to the exit, Batman drops a huge hollow globe of the Earth from a giant orrery, which rolls down the aisle and collides with the villain. It shatters, but it knocks him down long enough to be caught.
* Batman: The Animated Series episode, Robin meets a girl, "Annie," running from Clayface who eats her later on in the episode. This of course ticks Robin off and he tries to kill Clayface when he says he can’t bring her back.
* Batman: The Animated Series episode "The Cat and the Claw", Bruce Wayne meets Selina Kyle for the first time and blushes, even stumbling over his words a little speaking to her.
* Batman: The Animated Series episode "The Cat and the Claw" has a straight dramatic example. Bruce Wayne participates in a bachelor auction and while there is some competition for him, the auction is won by Selina Kyle (Catwoman). Ironically, Selina is only interested in making a showy donation to charity and not (at first) in Bruce; she agrees to go through with the date only after he turns on the charm.
* Batman: The Animated Series episode "The Forgotten", homeless people are being kidnapped and forced to work in a mine run by one of these types, pictured above complete with a piece of fried chicken and a fan. (All he lacked was a Southern accent.)
* Batman: The Animated Series episode, to the disgust of the attorney defending Batman.
* Batman: The Animated Series episode "What is Reality?" the Riddler traps Commissioner Gordon in a deathtrap-themed virtual reality game, forcing Batman to enter to rescue him. (Of course, the Riddler seems fond of video games in general in this continuity, having become a villain in the first place after being cheated out of the royalties for one he invented, as revealed in his first appearance. That game was harmless, but the amusement park that was based on it sure wasn't.)
* Batman: The Animated Series. Even though the man ruined his and his wife's lives, Batman still tries to save him out of principle. The caped crusader does give evidence of Boyle's wrongdoings and leaves him to be arrested.
* Batman: The Animated Series event "World's Finest", when Lex Luthor and Bruce work together on a tech project developing robotic spider drones. Lex tries to sell Bruce on military applications, but Bruce forcefully and authoritatively shuts him down.
* Batman: The Animated Series example. DuVaul was sentenced to 50 years of hard labor for his part in trying to conquer the old west with the intention that he wouldn't survive it. Unfortunately (for DuVaul that is) he was given extended life by the Lazarus Pits and by the end he was a broken shell of his former self.
* Batman: The Animated Series "Feat of Clay" — A has-been actor who was disfigured in an accident began using an experimental cosmetic cream to help him look good again for roles. The stuff turns out to be addictive (with painful physical withdrawal symptoms), and when he tried to blow the whistle before it went on the market, Daggett's men fed him an overdose, turning him into Clayface.
* Batman: The Animated Series featured Baby Dahl teaming up with Killer Croc. The two are even compared to Bonnie and Clyde at one point. (It didn't last long.)
* Batman: The Animated Series featured the Batmobile jetting out of the Bat Cave.
* Batman: The Animated Series features Batman confronting bank robbers on a rooftop.
* Batman: The Animated Series" feels very much like a backdoor pilot for a Jonah Hex cartoon, seeing as how Batman's only in the framing device of Ra's Al Ghul

telling a story about a cowboy who thwarted one of his plans once.
* Batman The Animated Series for the Game Boy sees the third level take place during Christmas, right as Poison Ivy takes a pre-Two-Face Harvey Dent hostage while Batman gets tangled up with Catwoman when he crosses her path during a robbery.
* Batman: The Animated Series"; Fox actually let this through, but the team chickened out at the last second and changed the word to "bees."
* Batman: The Animated Series from very rich families who committed crimes simply for fun (brutally injuring more than one person in the process) and thought they were untouchable because of it. Batman's opinion of them summed it up perfectly:
* Batman: The Animated Series Fugate isn't as mentally sharp as he really turns out to be.
* Batman: The Animated Series", Gordon got shot during a raid and Batman blames himself for it because he arrived too late due to it being the anniversary of his parents' death (he was putting two roses at the spot their bodies lay). Later, Batman visits Gordon while in critical condition to apologize for not being there in time, then Bullock appears and agrees with him, and then says maybe the shooter Jazzman would have gotten Batman instead.
* Batman: The Animated Series), Gordon releases Bane to bring in Batman.
* Batman: The Animated Series: Gotham citizens first laugh at Mayor Hill when the ceremonial first train to Gotham Central Station doesn't arrive when he announces it. Then they hear Fugate's voice asking them to "clear the platform", and the lights of two trains at one appear. Everyone panics.
* Batman: The Animated Series had hard-nosed gumshoe Harvey Bullock going undercover as a mall Santa. Let's just say there have been better candidates.
* Batman: The Animated Series had some (plot-crucial) moments that were too intense for the censors. Rather than show these explicitly, this technique was employed — and often, was done well enough that it was more disturbing than seeing it outright.
* Batman: The Animated Series happening and suffer cardiac arrest. In the same episode, Riddler himself gets his brain fried when the computer crashes while he's still hooked to it.
* Batman: The Animated Series, Harley Quinn asks Poison Ivy if she's "that plant lady, Poison Oaky".
* Batman: The Animated Series, Harley Quinn bakes a gigantic cream pie for the Joker... and lies in it waiting for him.
* Batman: The Animated Series, Harley Quinn ended up being chased by one driven by General Vreeland after accidentally kidnapping his daughter Veronica.
* Batman: The Animated Series: Harley Quinn has a New Jersey accent, which mixes with the implications of Gotham City in relation to New Jersey.
* Batman: The Animated Series. Harley Quinn has his utility belt. Batman's reluctant ally manages to smash the only light in the room.
* Batman: The Animated Series, Harley Quinn meets Bruce Wayne after she's been set free for having served her sentence at Arkam and covers the top half of his face, saying she recognizes that chin. Bruce thinks that his secret identity has been blown, but it turns out that she was recognizing him as Bruce Wayne- the man who's gala she and the Joker had crashed during a heist.
* Batman: The Animated Series: Harley Quinn really was trying to go straight, but after her first day out of Arkham ended with her taking a hostage she pointed out that, with her history, even she would not believe the story that it was all a big misunderstanding.
* Batman: The Animated Series, Harley Quinn usually refers to the Joker as either "Mistah J" or "Puddin'", and Poison Ivy as "Red".
* Batman: The Animated Series Harvey Bullock each tell of the frightful events that happened that night.
* Batman: The Animated Series has a more understated version: a grandfather clock that slides to one side, revealing a long, dark, winding, probably treacherous staircase leading into the Batcave.
* Batman: The Animated Series has a very subtle one in the "Terrible Trio" episode.

About halfway through the episode there's a car chase with a very brief scene of the villain's car turning a corner. The very right edge of a diner called "Joe's Eats" which looks very much like Phillies from the painting, and a red brick building in the background. You could very easily think that the painting was chopped in half and the lone man at the counter was removed.
* Batman: The Animated Series has Calendar Girl, who hides her face out of disgust of being disfigured, wearing a mask. However, when the mask is revealed, she's still has model looks — despite this, she breaks down crying at how hideous she is.
* Batman: The Animated Series has him show how much of a threat he is by smashing up the Batmobile with his bare hands. Batman takes this particularly badly:
* Batman: The Animated Series has quite a few examples—some particularly notable ones are:
* Batman: The Animated Series has the Joker do this to Lex Luthor — granted, Luthor tried to kill him, but it's implied that Joker knew that would happen and had been planning this: this being stealing Luthor's prototype flying wing and blow up half of Metropolis.
* Batman: The Animated Series" has the Riddler erasing all of the records of his existence as Edward Nygma, including birth certificates, drivers licenses, employment records and so on.
* Batman: The Animated Series have both used Arnold Wesker and Scarface (see entry in Comics section). In its last appearance Arnold finally guns it down with a machine gun before it falls into a high-speed fan.
* Batman: The Animated Series, he kidnaps two gangsters while disguised as Detective Bullock to frame him as part as an elaborate revenge plot against all three for getting him arrested in the past.
* Batman: The Animated Series He orders his gang to take nothing and leaves empty-handed.
* Batman: The Animated Series, her father, a general, comes to the rescue in a tank, prompting Harley to make a hairpin turn the opposite direction.
* Batman: The Animated Series); her real name was later revealed as Harleen Quinzel, with her first name being just one letter away from Arleen's.
* Batman: The Animated Series, he's faced with having to clear his name some other way.
* Batman: The Animated Series. His breaking of the fourth wall was subtly treated as part of his characteristic insanity and also included such examples as occasionally whistling his own theme music.
* Batman: The Animated Series his job and doesn't want to leave, Bruce starts to see how similar it is to how unfairly Calendar Girl was treated, neglected simply because she was considered too old for the career she loved. Eventually, Bruce decides to change the retirement policy, telling Bernie, much to his delight, he can do his job for as long as he is able.
* Batman: The Animated Series: In a few episodes, the Joker has a trio of henchmen who resemble the Stooges and are named "Mo", "Lar", and "Cur".
* Batman: The Animated Series: In "Bane", Rupert Thorne's moll, Candace, suggests that this might be a way of getting rid of her employer/lover.
* Batman: The Animated Series In "Beware the Creeper", when the Creeper first meets Harley Quinn, he sees her through a heart-shaped iris against a lush tropical background.
* Batman: The Animated Series included a demon mask, thus spoiling to non-reader viewers that Ra's was the demon-masked villain from "Demon's Quest".
* Batman: The Animated Series: In "Harley and Ivy", a car full of fratboy-types pulls up alongside the two villainesses at a traffic light. The guys make obnoxious leering comments, until Harley pulls out a grenade launcher and blows up their car as they run for their lives.
* Batman: The Animated Series: In "Mean Seasons", Calendar Girl's second heist is at a car show where the owner is displaying the summer line. After she captures him, the showgirl, dubbed "Miss Solstice", tries to sneak away only for Calendar Girl to grab her.

* Batman: The Animated Series: In part 2 of "Heart of Steel", the trope comes in for Randa after she accidentally blows up the Rossum robot with a stungun. Her damage is shown when she has Batman in a hold.
* Batman: The Animated Series insane, and as alluded to under Comic Books not the sort who'd take well to being told he's wrong.
* Batman: The Animated Series: In "See No Evil", Batman pursues an invisible thief, who gives away his location by running through wet cement and leaving a trail of footprints.
* Batman: The Animated Series. In "Sins of the Father", Batman has taken on a new member of the Bat-Family: Tim Drake.
* Batman: The Animated Series: In the episode "The Laughing Fish", the Joker is doing a commercial for his new brand of Joker Fish, and tries to get Harley to eat one to show how good they are. Harley sheepishly protests that she's got a problem with fish, but Mr. J just shoves it in her mouth. She manages to grunt out, "Yummy-yum-yum," before running offscreen to hurl.
* Batman: The Animated Series: In the Scarecrow's first appearance, he exposits/rants about how his superiors at the university objected to his methods of conducting research on fear:
* Batman: The Animated Series is accompanied by a cheesy commercial for the "Joker Fish" he's trying to copyright.
* Batman: The Animated Series is in her cell at Arkham, and she sees a rose from Joker next to her bed.
* Batman: The Animated Series, is known as "The Man Who Killed Batman."
* Batman: The Animated Series, is often shown in reruns as additional episodes to the original series, resulting in 24 more episodes for a total of 109.
* Batman: The Animated Series is one of the only characters who can pose a real threat to Batman hand-to-hand... and would've killed him if Bats hadn't sort of cheated. He's also a complete lunatic who just likes beating people up.
* Batman: The Animated Series is that Harley and Ivy are indeed in such a relationship, off and on.
* Batman: The Animated Series, it is accompanied by a series of detailed stills showing the world being saturated by the Lazarus Pits, in chaos, and finally at "a blessed peace."
* Batman: The Animated Series, it's pretty obvious it's him from the get-go.
* Batman: The Animated Series. Joker is doing a commercial for his new brand of Joker Fish, and tries to get Harley to eat one to show how good they are. Harley sheepishly protests that she's got a problem with fish, but Mr. J just shoves it in her mouth. She manages to grunt out "Yummy-yum-yum" before running off screen to hurl.
* Batman: The Animated Series. Joker is understandably incensed, a breaks out of Arkham to punish this act of image-theft by blowing up the joint. As Batman discovers, the businessman had spent too much on his building, and gave it a Joker-theme so the Joker would do just that, and then cash in on the insurance. Joker gets more incensed when Batman reveals this to him.
* Batman: The Animated Series: "Joker's Favor" reveals that, for all his daring heists and death defying stunts, the Joker himself will beg given the correct circumstances. When Charlie Collins catches the Joker outside the police station after spending the episode under the clown's thumb, he threatens to use one of the Joker's own bombs to.blow the villain up. While at first Joker thinks Charles is bluffing, he's ah kky disabused of that notion and begins calling for help from Batman of all people. Played with in that the bomb was actually a fake and Charlie was trying to force the Joker to give up the information he had on Charlie's family. But then Joker didn't know that...
* Batman: The Animated Series keeps some of Superman's timeless feel from the 30/40's.
* Batman: The Animated Series kidnaps Lisa Lorraine this way. Lisa knows she didn't order pizza, but offers to buy it anyway, which is when the Joker opens the box, which contains knock-out gas.
* Batman: The Animated Series Kyodai Ken realizes Bruce Wayne is Batman after

fighting him in both identities; as Batman tells Alfred, to a trained martial artist, a fighting style is "like a fingerprint".
* Batman: The Animated Series: Lampshaded by the Joker while making his escape from Arkham in "Joker's Wild":
* Batman: The Animated Series, leading him to realize that he must be dreaming.
* Batman: The Animated Series looks like a cute little girl but is a really a psychopathic adult.
* Batman: The Animated Series, made the pairing canon, to generally very poor reception.
* Batman: The Animated Series magazine regarding the episode "Mudslide", which ends with Clayface slipping through Batman's fingers as he melts::
* Batman: The Animated Series makes reference to action star Donald Shaltenpepper.
* Batman: The Animated Series — found it cheaper to import and dub Japanese series than to produce their own action cartoons in-house, and during the 2000s, the majority of American action cartoons had strong comedy elements. By the time the "anime boom" of the early to mid-2000s finally petered out at the end of the decade, the damage had been done, and American cartoons were limited to comedic works.
* Batman: The Animated Series—"Heart of Ice" has at least two shots where Batman's insignia inverts (yellow bat/black oval).
* Batman: The Animated Series: "Mean Seasons" is about a former model who was fired because she was too old and avenges herself by kidnapping her former employers; in the B-plot, Bruce is upset at losing an employee because he has hit the mandatory retirement age (Bruce is also feeling a bit sluggish, and starts checking himself for gray hairs). In the end, Bruce does away with mandatory retirement.
* Batman: The Animated Series moment... just in time. It's even lampshaded:
* Batman: The Animated Series: Mr. Freeze himself was not cryonically preserved, but his condition and powers resulted from an 'accident' while cryonically preserving his wife.
* Batman: The Animated Series occurs, but once it turns out that rediscovering the past is vital to solving a crime, the actor fortunately rediscovers his passion, saves Batman's life and aids him on his quest, and the episode ends on a very high note with Bruce going so far as to trust him with his identity.
* Batman: The Animated Series of his Love Hungry nature and is able to initially withstand the temptation of brainwashing Alice; despite that self-awareness, though, he ultimately gives in to his darker impulses and ends up lonelier than ever.
* Batman: The Animated Series of the staff) into getting them a seat and the romantic usuals (violin/flowers/etc.). After she reconciled with her boyfriend the same night, though, he uses brainwashing to break them up again, then does the "extravagant Flower surprise" in her house... which he didn't have a key for. Alice is, understandably, creeped out - but mostly because Jervis had no way of knowing that the two had broken up.
* Batman: The Animated Series: One episode featured a doctor who lost his license and only got to practice because his gangster brother set him up as "the Crime Doctor". At the end of the episode, Bruce bails him out, and the doctor is instantly suspicious about what he wants in return — until Bruce says this trope's name (the doctor had been good friends with Dr. Thomas Wayne in medical school).
* Batman: The Animated Series on her attempt to get Mistah J interested in "making whoopie".
* Batman: The Animated Series on the real money, and he'd either go to jail for tax evasion or reluctantly admit that he got conned by a dead man.
* Batman: The Animated Series opened with Killer Croc being transported to prison with his arms and legs in shackles. He escapes by biting through the chains and uses their remains as evidence that he was a prisoner in a freak show. After Batman recaptures him he is taken away chained, straight-jacketed and muzzled.
* Batman: The Animated Series" originally aired on November 13, 1992—weeks before the Christmas season even started.

* Batman: The Animated Series or something like that?), where the words filled into the crossword are actually the names of writers and artists who worked on the episode.
* Batman: The Animated Series", or whether his patriotism for Britain makes him think only one London is worthy of the name.
* Batman: The Animated Series: Particularly in an early episode, "The Underdwellers," near the very end. Bats is threatening the episode's villain, the Sewer King, who "took in" a large number of abandoned and orphaned children, only to abuse them and teach them to steal:
* Batman: The Animated Series plays this for the tragedy it actually is when Mr Freeze, after his body decays beyond use and leaving him a disembodied head, costing him the last hope he had, sets out to make everyone else as miserable as he is by destroying their life's work. The cases we see has him destroy a painter's masterpiece and an archeologists greatest discovery.
* Batman: The Animated Series: Poison Ivy once made a series of plant-human hybrids that began their life as a plant before taking on a human appearance, quickly aging from child to adult, and then transforming into a humanoid plant before they died. She used the monstrous form to commit robberies and the human form to act as her family (husband and stepsons at the various age points) to provide the illusion she'd reformed.
* Batman: The Animated Series: Poison Ivy's greenhouse in her introductory episode has a giant Venus flytrap, complete with tentacles which could grab any passing Batmen and pull them in.
* Batman: The Animated Series presents him with the inheritance tax bill for the money he inherited.
* Batman: The Animated Series put this to the test, giving the show a prime-time slot, it flopped miserably.
* Batman: The Animated Series: Ra's Al Ghul is immortal through the use of Lazarus Pits. One episode reveals that he had a son during the old west who is still alive today and looks appropriately ancient, whereas Ra's himself looks closer to late middleaged.
* Batman: The Animated Series rather than omnivorous), much like the rest of Brown's livestock. (Fortunately for Bullock, Batman shows up in time.)
* Batman: The Animated Series) really hits it home. The episode was written specifically for West - if West hadn't been available then the episode wouldn't have been made at all.
* Batman: The Animated Series relies heavily on this trope for the stylistic views of Gotham City. And yes, it is often night, but that's when the bats take wing...
* Batman: The Animated Series rule, and so the minion meets his doom in a trash compactor.
* Batman: The Animated Series says that after his laughing gas, people are even laughing at a phonebook. Harley Quinn proceeds to read a few entries; all the numbers, naturally, start with 555.
* Batman: The Animated Series, Scarecrow was drugging star athletes with fear chemicals so that they'd lose key games, allowing him to make money wagering on their opponents to fund his research.
* Batman: The Animated Series scars of being cast aside by the modeling industry for being "too old" cause her to see herself as a hideous old crone.
* Batman: The Animated Series. See also Catwoman in the episode "Almost Got 'Im".
* Batman: The Animated Series seems to blame Mayor Hill for ruining his company; instead, he's more upset that Hill made him late.
* Batman: The Animated Series series, and adult animation, in general, increasing in mainstream attention that it got more interest.
* Batman: The Animated Series: Several times from The Bat himself, like when Batman stops "the Jazzman" from killing Gordon by flinging a batarang right into the muzzle of his gun in slow motion.
* Batman: The Animated Series, several villains receive intelligence upgrades:
* Batman: The Animated Series shoots out their tires and arrests them both.
* Batman: The Animated Series shortcomings the man is at least an honest

uncorrupted cop.
* Batman: The Animated Series society." At least Vreeland had the decency to feel bad about her role in it by the end though.
* Batman: The Animated Series sometimes takes on this role. Lois Lane in the spinoff Superman animated series is the more traditional example.
* Batman: The Animated Series's theme for its opening and closing sequences.
* Batman: The Animated Series technology on her and takes her on a "date" at a Wonderland-themed amusement park.
* Batman: The Animated Series, telling them he was laying low and they forced him out early.
* Batman: The Animated Series that Batman has planted on the Ventriloquist's suit, he throws it on the ground and start jumping on it. Justified and subverted because Scarface is a Ventriloquist's dummy and this is one of the obvious ways to show emotions, like angry, but the Ventriloquist has to kneel to the ground to help Scarface.
* Batman: The Animated Series that is in the middle of a court hearing appeal about a $20 million dollar judgment against his company and is haggard and nervous. Fugate is aware that his personality plays against him, but not of what to do to change that.
* Batman: The Animated Series that requires him to always keep his body at sub-zero temperatures. When outside of his special prison cell, he has to wear a costume that constantly keeps him cold.
* Batman: The Animated Series that she's not a real blonde. DC consistently depicts her as a natural blonde in comics.
* Batman: The Animated Series that will suck all the air from the vault Batman is trapped has a countdown of 15:00:00. Batman escapes with 00:03:00 left.
* Batman: The Animated Series that would ruin his life started falling.
* Batman: The Animated Series. The alertness lines are thin and almost unnoticeable, which may suggest that that episode's animators misinterpreted their appearance on the storyboard.
* Batman: The Animated Series - the Batmobile turns a corner and Batman thinks he's just managed to run Robin down, though in fact it's a hallucination caused by the Scarecrow's fear gas.
* Batman: The Animated Series, the brother of a boy who grew up to be one of Gotham's top mob bosses lost his leg when his foot got caught in the rails of a train track at the wrong time. Said brother grew up to become a priest and convinced his mob brother in the present day to finally turn himself into the police so he could begin the atoning for the crimes and guilt he'd built up over the years.
* Batman: The Animated Series. The camera closes in on the Joker card that Harley has thrown into the ocean in mourning and then it's eaten by the same shark, managing to make the viewer certain both that the Joker survived and that he did so only by the skin of his teeth (so to speak) at the same time.
* Batman: The Animated Series", the criminals hold a funeral for Batman, who is believed dead. The Joker attaches a "Kick Me" sign to Batman's empty cape and cowl before it is to be sealed in a coffin.
* Batman: The Animated Series", the daughter of a recent victim is sitting by her father's bedside when a nurse comes in and tells her she should get some rest since her father isn't likely to wake soon. Considering he's significantly more detailed, and therefore part of the background, the nurse is probably right.
* Batman: The Animated Series: The Demon's Quest, when Ra's al Ghul comes out of the Lazarus Pit.
* Batman: The Animated Series. The difference being that Scarecrow's was creepy and Question's was hilarious.
* Batman: The Animated Series: The episode "Love Is A Croc" has Batman punch Killer Croc about a hundred feet across a spacious room at a power plant Superman-style that sent Croc crashing against pipework. The enraged Croc attempts to retaliate by ripping out a piece of pipe, but it was a steaming, hot water pipe, which erputs a near-fatal burst of water that delivers Croc right back to Batman's feet.

* Batman: The Animated Series: The episode "P.O.V." revolves around an Internal Affairs investigation into a failed sting where the intended target, a Gotham drug lord, managed to escape and take the two million dollars in seed money that the police had laid in as bait.
* Batman: The Animated Series: The famous opening sequence where Batman foils some bank robbers is similar in the general style of their animated pitch.
* Batman: The Animated Series". The first time Batman confronts the titular villain on a rooftop, Batman attempts to corner him only for Clock King to leap off the roof and land on the top of a train that he knew would be passing by due to his superhuman sense of timing.
* Batman: The Animated Series the grudge for the time she tried to poison him because he unintentionally and indirectly caused a species of rose to go extinct.
* Batman: The Animated Series. The irony is his methods and Batman's are similar, yet the two can't stand each other and would both flip at the thought of being considered similar.
* Batman: The Animated Series", The Joker has inherited a large sum of money from a former criminal rival and has used some of it to bribe a psychiatrist into declaring him sane. He left his hench-girl Harley Quinn behind in Arkham Asylum, but she is confident he'll come back for her ... until Poison Ivy shows her the newspaper she'd been reading.
* Batman: The Animated Series", the Joker inherits a small fortune from a rival gangster and lives a life of luxuries and general happiness until he receives a letter from the IRS demanding, well, taxes. Cue desperate attempts to raise the money to pay the IRS as a large chunk of the money was fake, as a final screw you from the dead gangster to the Joker, and he cannot just admit that to the government without becoming the laughingstock of the criminal world.
* Batman: The Animated Series, the Joker pulls of a more family-friendly version on a copyright official.
* Batman: The Animated Series The Joker seemingly faces his demise, only to turn up later unharmed.
* Batman: The Animated Series", the lights are knocked out just as the assembed criminals are about to kill Batman. When Two-Face gets out his lighter, they see that Batman has escaped.
* Batman: The Animated Series. The main punishment for failure to work is being placed in a corrugated iron box in the hot sun. Being Batman, he regains his memory and breaks out.
* Batman: The Animated Series "The Man Who Killed Batman", so he can follow the two-bit gangster who supposedly kills him back to the central boss of a drug ring.
* Batman: The Animated Series, the missile requires two codes. Alfred knows one and Freddie knows the other.
* Batman: The Animated Series. Then Batman comes along on a case and ropes him in to assist him. Much to his own surprise, Trent make a passable superhero (and more importantly, learns that the Big Badass Batman is primarily inspired by his portrayal of one).
* Batman: The Animated Series... then sees a flower that he had smuggled into her cell.
* Batman: The Animated Series. Then the camera zooms in on Klarion's cat...
* Batman: The Animated Series The real kicker is that most of the money Joker received was fake, but admitting it would be telling the world he got played by a dead man. And the balance due?
* Batman: The Animated Series: there must be quite a few people in her audience who are interested, else her ratings would tank and the station would have her doing something else.
* Batman: The Animated Series the rest of the Gotham underworld (looking to take him out because they now see him as a large threat) on his head.
* Batman: The Animated Series), the sad organ music slowly becomes much more sinister.
* Batman: The Animated Series, the villain's "distractions" include tampering with the city traffic system and causing a subway crash, acts that could quite

reasonably be considered a main plot in and of themselves.
* Batman: The Animated Series, thinking that Batman's there to punish him for double-parking.
* Batman: The Animated Series. This causes Batman to wonder to Alfred, in the final lines of the episode:
* Batman: The Animated Series. This is scheduled to happen at 9:00 sharp, while Dagget himself is attending a business meeting. As explained above, this is not actually an alibi, but Mr. Dagget isn't a legal expert.
* Batman: The Animated Series. Though this is justified, as it was to show that they had absolutely no money and could barely afford this empty room with a bed.
* Batman: The Animated Series thought was over-the-top in its ludicrous villainy, but that's just showmanship according to him.
* Batman: The Animated Series, though whether or not he actually follows through on this threat is rather unclear.
* Batman: The Animated Series to a rather similar event in which Batman duped the Joker with that button.
* Batman: The Animated Series to bring her back after she launches herself into him and dissolves.
* Batman: The Animated Series to certain death (the pits are lethal to healthy humans, and only work on the dying).
* Batman: The Animated Series to kidnap someone: the back opened up and two claws came out, snatched her car and dragged it inside.
* Batman: The Animated Series took over for the rest of the series and its spinoffs.
* Batman: The Animated Series to really understand why he's bad for her. Depictions set chronologically after the series in the DCAU do show that she ends up finally realizing how bad the relationship is after a stint in jail and permanently leaves the Joker as part of her attempt to go legit.
* Batman: The Animated Series to some of his rogues. When the deal goes south, Strange begs for his life with it (and Harvey unintentionally defends Bruce):
* Batman: The Animated Series to turn on the wipers (to get rid of junk the Joker is throwing at him from the car ahead) and launches the rear missiles. To be fair, he's driving the Joker's car, the controls of which are more than slightly non-standard.
* Batman: The Animated Series) tried to expel Mr Freeze's wife after he found out that Freeze was using company equipment to cure her fatal disease, an act which killed her and caused Freeze's condition.
* Batman: The Animated Series turns out to be a cop. The gathered cops, led by Commissioner Gordon and Detective Bullock, take down the villains, leaving Batman free to save Catwoman.
* Batman: The Animated Series: Used for laughs. The Dark Knight is burning rubber to make it across town to stop a mobster from demolishing an old building (with people inside) when he sees a city bus shoot past him, completely out of control. Batman can't leave them to die, but he reacts the same way one would if they had just hit a red light.
* Batman: The Animated Series used this to reveal Two-Face at least once, notably in his debut appearance. The shot starts out with him in profile, with only his good side visible.
* Batman: The Animated Series used this trope. Fugate's tape perfectly predicted what Batman would do, down to the second. Of course, this is Fugate's gimmick:
* Batman: The Animated Series usually stuck to its realistic, Dark Deco style, but it used some truly weird animation to great effect. Notable examples: Clayface's first demise, and any time the Scarecrow appeared.
* Batman: The Animated Series, virtually every conversation Batman has with Alfred while pondering the crime du jour leads to a Eureka Moment (and an "Alfred! You're a genius!" declaration, and a bemused "Of course, sir" response).
* Batman: The Animated Series voice of the character, and hear just about any dialogue from Batman in Conroy's voice.
* Batman: The Animated Series was a supporter of Batman. In the Telltale game,

she's against the Batman and tries to arrest him, though she's sympathetic to him as Bruce Wayne.
* Batman: The Animated Series were also used for a number of characters.
* Batman: The Animated Series were by Dong Yang Animation, which was decent quality at a better price.
* Batman: The Animated Series) whenever she went back to him. Even Batman once tried to convince her that the Joker didn't see her the way she saw him.
* Batman: The Animated Series when he got his hands on time manipulating technology, placing one on the Batmobile then setting it moments out of sync with time so the on-board trap sensors wouldn't find it.
* Batman: The Animated Series) When he's investigating for clues inside, the cape comes down to his knees, but when posing on a rooftop dramatically, it grows longer than his whole body. Now that's badass!
* Batman: The Animated Series when he takes advantage of a temporary breakup to try courting Alice himself, only for her boyfriend to come back into the picture with an engagement.
* Batman: The Animated Series. When Mr. Freeze himself shows up immediately afterwards...
* Batman: The Animated Series, when several of Poison Ivy's "children" (and seemingly herself) come in contact with weed killer.
* Batman: The Animated Series, when the founding members (except Batman) agreed to be arrested because of an accident involving a giant laser, one of the officers asks where Batman is. The Flash says "Running late. The Batmobile, it lost a wheel. The Joker got away. That's what I heard."
* Batman: The Animated Series when the police assume Batman has gone rogue after vaguely bat-like figures are seen leaving the scene of violent crimes.
* Batman: The Animated Series, where the first volume features a cameo by Dr. Crane, sans costume, pretending to hang himself in a attempt to scare the guards at Arkham.
* Batman: The Animated Series, where the game of choice for the series' villains in the episode "Almost Got Him" was quite clearly poker, with a pot involved.
* Batman: The Animated Series. Which actually makes sense, considering the Scarecow's MO.
* Batman: The Animated Series, which cements The Dark Knight as one of the manliest heroes ever.
* Batman: The Animated Series which eventually led to him becoming Clayface.
* Batman: The Animated Series, which in turn, mirrors the West show helping to launch Batman into the greater mainstream where it maintains a very strong following.
* Batman: The Animated Series, which is often lampshaded by writer commentary. One episode in particular has the Joker show fellow villains a recording of a time he took over a late night television show - a video that includes camera shots backstage and all around the studio, in angles that shouldn't be possible. Another has Batman watch security videos of Mr. Freeze's origin, which for some reason includes close ups and camera cuts, as though someone not only used a film camera but edited it as well.
* Batman: The Animated Series, which stick out like sore thumbs, compared to the rest of those series.
* Batman: The Animated Series while looking at a series of pictures, becoming each one in turn. He is completely unaware of this, and probably wouldn't have even noticed it happening if someone else in the room hadn't pointed it out.
* Batman: The Animated Series, who embraces the path of ninjutsu. At one point, Kyodai attempts to persuade Batman to embrace the same path, as the Caped Crusader's methods are very ninja-like, only for Batman to reject it and identify himself as a samurai. When Kyodai is defeated and seemingly dies, Bruce Wayne and Yoru further discuss the differences.
* Batman: The Animated Series, who in turn had stolen it from a government transport.
* Batman: The Animated Series who's yellow, super-strong, agile, and crazy enough

to scare even the Joker.
* Batman: The Animated Series who then saves Superman by destroying the Kryptonite.
* Batman: The Animated Series with an episode where he took a studio audience hostage and hooked Batman up to an electric chair. The chair was directly connected to a "laugh meter" and since he knew he would never get the audience to laugh legitimately, he got the audience so high on laughing gas that Harley reading the phone book had them rolling in the aisles.
* Batman: The Animated Series would do this, wrapping around a flagpole or other object rather than embedding itself into or hooking onto something.
* Batman (the batmobile had a single seat to easily replicate as a toy), and in fact many working on the movie would comment that it was the first time they learned of the term "toyetic."
* Batman: The Black Mirror, Batman discovers an underground society named Mirror House run by a man named the Dealer who hosts auctions of super-villain objects as a way to celebrate the belief that cruelty and malevolence is humanity's "divine spark."
* Batman: The Brave and the Bold" a balance-obsessed supervillain named Equinox set up a scales-themed death trap. Equinox planned to use the scales to kill one hero and one villain to balance the universe, but Batman stopped him before he could carry out his skewed sense of justice.
* Batman: The Brave and the Bold accomplished a lot in his career and risked his life on many occasions for the rebellion.
* Batman: The Brave and the Bold according to his own ideas of "balance."
* Batman: The Brave and the Bold actually morphs into a Mini-Mecha (and a plane, and a boat, and a submarine...).
* Batman: The Brave and the Bold admits to this himself in the episode "Cry Freedom Fighters!" after Batman expresses his skepticism about him joining the eponymous team.
* Batman: The Brave and the Bold: A DVD advert claimed that it was one of the most popular shows among boys ages 6-12 and among men age 18-49. Most people, upon hearing this, simply wondered what the hell was wrong with 13-17-year-olds.
* Batman: The Brave and the Bold (after the Hunter had already drained him to revive it in the first place).
* Batman: The Brave and the Bold, allowing Kalibak to hone in on their location and forcing them to improvise.
* Batman: The Brave and the Bold and a stolen Demon Blade against some summoned fire demons.
* Batman: The Brave and the Bold and Batman's old sensei mock Batman's costume.
* Batman: The Brave and the Bold and effeminate. Batman, meanwhile, acts the same in either body.
* Batman: The Brave and the Bold and getting in a good few physical blows, Batman's no match for Superman and the Kryptonite wears off just before Superman crushes his head like an egg.
* Batman: The Brave and the Bold and has to save the day by being brave and using his brain. At the end of the episode, he is asked if he has learned his lesson. Cut to him telling kids that he now knows that non-powered humans are the most fragile and pathetic beings on Earth.
* Batman: The Brave and the Bold, and that Franklin is a household name not just in America, but the world over, that is actually aiming quite high for a third-tier gimmicky villain.
* Batman: The Brave and the Bold and The Weeper watching Batman on TV.
* Batman: The Brave and the Bold and turn the tide in the heroes' favor.
* Batman: The Brave and the Bold any special equipment. First, he gets punched through the air in the regular manner, and later Darkseid just hits the ground, letting the pressure wave blow Batman away.
* Batman: The Brave and the Bold as Thomas and Martha Wayne. West later voiced Proto in the episode "The Plague of the Prototypes".
* Batman: The Brave and the Bold, a temporarily super-powered Calendar Man sends a stampede of 'killer Easter Bunnies' to attack Batman.

* Batman: The Brave and the Bold: Babyface and his gang try to do this to Batman and Plastic Man in "Bold Beginnings!".
* Batman: The Brave and the Bold, Batman and Green Arrow have one of these... much to Merlin's annoyance.
* Batman: The Brave and the Bold, Batman and the Blue Beetle face the villain Kanjar Ro, who is harvesting the Gribble aliens because apparently their bodies can be used as fuel. The process doesn't sound particularly pleasant.
* Batman: The Brave and the Bold: Batman punches the Joker through a window and across a street where he lands in a dumpster in "Joker: The Vile and The Villainous!".
* Batman: The Brave and the Bold", Batman teams up with Superman and Wonder Woman when their arch-enemies Joker, Lex Luthor and Cheetah team up to defeat them by adopting a strategy of attacking a different hero: Wonder Woman vs Joker, Superman vs Cheetah, and Batman vs Luthor.
* Batman: The Brave and the Bold; Batman tells him "Now, wrap it up", and Jaime unwittingly uses that as the closing line of his speech. Amusingly, this leads to the little amoeba-like aliens to whom he's speaking cheering "NOW WRAP IT UP!"
* Batman: The Brave and the Bold". Blue Beetle protests that Pluto isn't considered a planet anymore. Planet Master's response?
* Batman: The Brave and the Bold. Blue Beetle wisecracks that he doesn't want to see the power of Uranus.
* Batman: The Brave and the Bold, Booster Gold fails to take answering Riddler's riddles seriously in the episode "A Bat Divided!".
* Batman: The Brave and the Bold brain rather than transplant it into a new body (it doesn't make much sense, but Grundy isn't very bright and his henchmen presumably know better than to raise objections).
* Batman: The Brave and the Bold) briefly in "Chill of the Night!" because Two-Face's appearance was minor and it'd been easier and cheaper to get Moll, who was voicing Lew Moxon, to do the voice.
* Batman: The Brave and the Bold, Bronze Tiger does this to turn the tables on a trio of mystically empowered martial artists in command of an undead army.
* Batman: The Brave and the Bold, but it fails... until the climax of the episode.
* Batman: The Brave and the Bold, B'wana Beast could be considered an example or an inversion. On one hand he's certainly a more obscure character who they could get away with killing off for real. On the other, his final scenes were both heart-rending and extremely heroic, giving it far more weight then is usual for the trope.
* Batman: The Brave and the Bold cartoon can take its place, complete with replacing one character's voice actor.
* Batman: The Brave and the Bold: Catwoman does this to Batman and Robin in the teaser to "Shadow of the Bat!".
* Batman: The Brave and the Bold cleverly played with this one. During an excursion to a parallel universe, Batman's partner of the week, Red Hood, is captured by the bad guys. As their leader, Cyclone, attempts to interrogate him, Batman (who is eavesdropping via comlink) is simultaneously sneaking through the building to rescue him; Red Hood phrases his responses as coded directions to lead Batman to his location. Although successful at first, the trick soon breaks down; Cyclone quickly detects the pattern in Red Hood's answers and realizes what he's doing. Fortunately, Batman has already arrived by then.
* Batman: The Brave and the Bold creators Bruce Timm and Paul Dini (Who actually wrote Legends of the Dark Mite) dressed as Joker and Harley Quinn respectively.
* Batman: The Brave and the Bold: "Darling, I don't have to answer to you. I'm Batman!"
* Batman: The Brave and the Bold: Degaton's robotic army in "The Golden Age of Justice!"
* Batman: The Brave and the Bold, despite saving everybody without them.
* Batman: The Brave and the Bold Different in that it sympathizes more with Plas than Ramona, and Ramona doesn't take her husband's heroic commitment to bringing justice very seriously, mocking him quite a few times onscreen. On the other hand,

her attitude is somewhat justifiable - Plas can be rather ineffectual and irresponsible.
* Batman: The Brave and the Bold discovers that quartz, a ludicrously common mineral, has the same effect on Batman that Kryptonite does on Supes.
* Batman: The Brave and the Bold disguises himself as a priest at the beginning of one episode. To sit in at the deathbed confession of a sick mobhead to learn the name of the man hired to kill his parents, Joe Chill.
* Batman: The Brave and the Bold does this often — rather appropriate, with its regular dropping of the phrase "World's Greatest Detective".
* Batman: The Brave and the Bold does this with pieces of Grodd's loot when the need arises, which he hoped to keep for himself.
* Batman: The Brave and the Bold do this to Batman after he recovers from a near-case of dead. Making it funnier, Batman has no idea who she is (time-travel's involved), or why she's hugging him.
* Batman: The Brave and the Bold episode "Bold Beginnings!" as he repeatedly tries to tell the story of how he first met Batman.
* Batman: The Brave and the Bold episode "Darkseid Descending!", Skeets's attempts to fix the air-conditioning on the satellite results in it spouting out flames.
* Batman: The Brave and the Bold episode "Gorillas in Our Midst", in which The Spectre turns a supervillain into cheese but leaves him alive and conscious, and then releases a swarm of mutant rats to eat him alive.
* Batman: The Brave and the Bold episode implies that that's sort of true too.)
* Batman: The Brave and the Bold episode "The Criss-Cross Conspiracy!".
* Batman: The Brave and the Bold, episode "Trials of the Demon", a demon lord who is banished to his own personal pocket dimensional prison turns out to have a giant stone throne covered in spikes in there. Keep in mind that he's the only being in the entire prison, so you have to imagine: at some point he had to have formed a throne himself from the rocks just because a demon lord's gotta have a throne.
* Batman: The Brave and the Bold, Equinox wants to reset the universe, as he wants to make order and chaos balanced. After a short talk with Batman, he realizes that he's too chaotic to make a fair judgment on reality.
* Batman: The Brave and the Bold" Even sporting lines like “You’re a fool if you think you can stop my master plan!” The 'plan' was a device that tracks crimes as they happen, summoning the police or himself to the scene.
* Batman: The Brave and the Bold: Every episode has a vignette in the form of an unrelated teaser sequence before the main plot, but there are also at least two special vignette episodes: "Bat-Mite Presents: Batman's Strangest Cases!" and "Four Star Spectacular!"
* Batman: The Brave and the Bold (except here, Adam is betrayed by a fellow villain).
* Batman: The Brave and the Bold features a group of humanoid tigers that worship a still-active nuclear warhead, referring to it by the letters painted on the side; "ICBM". The Joker, when traveling to said future, invoked the old "What does this button do?" gag, promptly blowing the planet to smithereens.
* Batman: The Brave and the Bold for a brief moment when the Joker restores him to life again.
* Batman: The Brave and the Bold for Batman, and this marks the turning point of the episode where Batman starts fighting back as well.
* Batman: The Brave and the Bold for James Tucker and Michael Jelenic.
* Batman: The Brave and the Bold; freeing himself while Robin's back is turned.
* Batman: The Brave and the Bold gets his powers from drinking water contaminated with nuclear waste (in the comics, it comes from a special elixir and helmet).
* Batman: The Brave and the Bold) getting Touched By Vorlons in the form of Bat-Mite, an imp from the fifth dimension, just like Mr. Mxyzptlk. The imp attempted to transfer his powers to Batman in order to help him fight The Joker; unfortunately, he does that by firing them in the form of an energy ball and he hits the wrong target.
* Batman: The Brave and the Bold gives us Bronze Tiger taking all comers in the ring. He even warns Batman that he never loses. But Batman says if he wins, Tiger

helps him protect the temple. Batman cheats to win the fight, and after the temple is safe, Tiger says "you owe me a rematch". Smiling, they rush at each other to begin fighting.
* Batman: The Brave and the Bold Gorilla Boss join up with Grodd to form a group called G.A.S.P. (Gorillas and Apes Seizing Power) and turn everybody into monkeys. The episode's name? Gorillas In Our Midst!
* Batman: The Brave and the Bold has an ejector seat in the Batplane. He hovered a finger over the button because Plastic Man was getting on his nerves.
* Batman: The Brave and the Bold has a vision of a future where an older Batman get married and starts a family. He then passed the mantle of Batman to Nightwing, and it gets passed down the line.
* Batman: The Brave and the Bold has Mrs. Manface, the wife of Babyface. She looks exactly like a dude, complete with five o'clock shadow.
* Batman: The Brave and the Bold has the "Tiger Tonic", which comprises bananas, raw eggs, tuna and hot sauce.
* Batman: The Brave and the Bold has this during an argument about how well heroes treat their sidekicks.
* Batman: The Brave and the Bold , in 2018, which is roughly 7 years later.
* Batman: The Brave and the Bold: In "Aquaman's Outrageous Adventure!", Aquaman promises his wife, Mera, that he will stop crime-fighting and take a family vacation. Cue a montage of him travelling and continually encountering supervillains who are foiled by other heroes.
* Batman: The Brave and the Bold in expressing the owner's, uh, preferences, but this episode revels in it.
* Batman: The Brave and the Bold. In fact, any weapons he had followed this theme.
* Batman: The Brave and the Bold. In fact, most of the characters in the show have one. Including the women. It's kind of weird.
* Batman: The Brave and the Bold: In "Four Star Spectacular", 'Mazing Man causes a fireplace to collapse, covering himself and the homeowners from head to foot in soot.
* Batman: The Brave and the Bold: In "Game Over for Owlman!", where Batman has to fight an evil alternate universe version of himself (Owlman) who is the leader of an evil alternate universe version of the Justice League, he manages to gather (Page image!) a team of heroic Batman alternates to fight the villains.
* Batman: The Brave and the Bold: In "Menace of the Conquerer Caveman!", Booster Gold pretends to take a call from Batman during a meeting with a toy company. No one buys it.
* Batman: The Brave and the Bold: In "Mitefall!", the steam-powered cyborg assassin John Wilkes Booth has twin Gatling guns.
* Batman: The Brave and the Bold. (In the comics, it was because the scarab was infused with magic power while on Earth, which distorted its actual powers, and it only "awoke" after the second Beetle - who never actually used it - started experimenting on it.)
* Batman: The Brave and the Bold: In "The Last Bat On Earth", Batman chases Gorilla Grodd to Kamandi's future (see above in comics), with Grodd's plotting to conquer the other evolved animals with both his new Gorilla army and Twenty-First Century technology.
* Batman: The Brave and the Bold: In "The Last Patrol!", Batman lectures Negative Man on why he should return to the Doom Patrol, oblivious to the fact that Negative Man is attempting to tell him that he is willing to do so.
* Batman: The Brave and the Bold: In "The Mask of Matches Malone!", Catwoman throws 'Matches' Malone (a.k.a. Batman) of the roof of a building and he smashes through the roof a car.
* Batman: The Brave and the Bold: In "The Mask of Matches Malone!", 'Matches' (actually an amnesiac Batman) attempts to lower the Birds of Prey into a shark tank.
* Batman: The Brave and the Bold is a regular occurrence). He frees the captured heroes, who are now being led by Red Hood, and the villains have been defeated. Batman only leaves when he feels like the native heroes have a good handle on

things.
* Batman: The Brave and the Bold is a woman with the face of a man with a huge, stubbly chin.
* Batman: The Brave and the Bold is done as a badly dubbed eighties anime.
* Batman: The Brave and the Bold it focuses on coolness above all else.
* Batman: The Brave and the Bold, it gave the Joker a crown in the shape of a whoopie-cushion. However, there are a few people who say his crown looks more like a giant pink condom.
* Batman: The Brave and the Bold. It's this clear love of the character and the DCU that has made a show that could have been a disaster into a show that is widely adored by comic fans.
* Batman: The Brave and the Bold. It was at this point he began his vengeful crusade with other hero as Justice Underground against the tyrant Owlman and his Injustice Syndicate of Amerika.
* Batman: The Brave and the Bold kind of the same way, but not quite as severe.
* Batman: The Brave and the Bold look like an accident, this shows the blurry line between "make it look like an accident" and "make sure it can't be traced back to me".
* Batman: The Brave and the Bold, making no attempt to resist as Batman arrests him.
* Batman: The Brave and the Bold, Malone is shown with several other henchwomen/bodyguards.
* Batman: The Brave and the Bold mass into energy to hit with that kind of force. Otherwise he's literally punching energy out of nothing, which is, admittedly, pretty badass. Not to mention the amount of energy that is. In order to regrow a gram of mass, he'd have to punch with an amount of energy comparable to a nuclear bomb. If he was punching anything that wasn't hyper-efficiently absorbing it, the energy would most likely be released with pretty much the same effect. He's also violating a few conservation laws by creating matter without creating antimatter. Admittedly, he could make the electrons by making an equal number of anti-neutrinos, which would largely go unnoticed, and baryon (proton and neutron) conservation is most likely more of a guideline. There might be one or two more he can't get around, though.
* Batman: The Brave and the Bold, "Mayhem of the Music Meister": The heroes sing throughout it due to a music-based villain who controls them through his music.
* Batman: The Brave and the Bold "Mayhem of the Music Meister," we get to hear her sing, and it's beautiful. Apparently, Catwoman was just messing with her.
* Batman: The Brave and the Bold: Mongul does this when explaining the rules of his race in "Death Race to Oblivion!":
* Batman: The Brave and the Bold must use his bumbling beta-test robot "Proto" to combat his Bat-Robots that have been taken over by Black Mask.
* Batman: The Brave and the Bold not knowing how his suit works and unintentionally creating a wormhole to the other side of the Milky Way.
* Batman: The Brave and the Bold of "The Eyes of Despero". Batman is largely unfazed by the shifting gravity, and actually uses it to good effect.
* Batman: The Brave and the Bold once Aquaman starts singing whale songs at the party the Justice League is hosting for the Justice Society. He was earlier shown eating a boxful out of nerves, and even pours the rest of another box into his mouth before joining the massive brawl breaking out between the two teams. So while it's more kid-friendly, the effect is the same. In the comics, it's explained that due to his physiology that Oreos are literally as addictive as drugs to him. So for him, it is a "drink".
* Batman: The Brave and the Bold one!") and Riddler ("The answer to all your riddles is THIS!").
* Batman: The Brave and the Bold on Plastic Man, he asks, "How does he do that?"
* Batman: The Brave and the Bold: Ra's al Ghul uses a flying island as his base of operations in "Sidekicks Assemble".
* Batman: The Brave and the Bold reveals that Bruce Wayne's parents were murdered on Christmas, while Bruce was sulking over not getting the toy he wanted.

* Batman: The Brave and the Bold rode on a sleek mechanical horse-like robot after being dragged from his timeline by Mongul to have warriors fight in his "War World", again taking place in a futuristic Wild West setting.
* Batman: The Brave and the Bold sends his thralls to their deaths by having them line-dance into a rocket engine's exhaust. Fortunately Batman intervenes.
* Batman: The Brave and the Bold shows that been Batman is a quite literal Heroic Lineage since Prehistory.
* Batman: The Brave and the Bold. Since he can transform into liquids and gasses he can get inside people... don't tell me that's not perverted.
* Batman: The Brave and the Bold, Slug captures Wildcat and Batman and begins lowering them into a pit so they can be eaten by mutant snapping turtles. Wildcat starts insulting Slug, stinging his pride enough to make him pull Wildcat back out so they can fistfight.
* Batman: The Brave and the Bold. Someone in the DC animation team must like this trope.
* Batman: The Brave and the Bold's season 3 episode "Bold Beginnings!" features stories told by Green Arrow, Plastic Man, and Aquaman as they each take turns explaining to one another how they first met Batman.
* Batman: The Brave and the Bold stated that the entire Starro storyline was pushed upon them by Mattel in order to sell toys. The writers were also usually forbidden from doing solo episodes about female heroes, as they did not have figures in the tie-in toyline.
* Batman: The Brave and the Bold than any actual lack of suffering, but after he's freed he fights perfectly handily with his impressive acrobatic abilities undampened.
* Batman: The Brave and the Bold that featured Plastic Man and Elongated Man going after a criminal while arguing over which one Batman prefers to work with (Elongated Man also makes the "I'm even a detective" argument here). At the end of the segment, Batman gives his opinion: "Between the two of you, I prefer to work alone."
* Batman: The Brave and the Bold that takes place during Halloween, but the episode first aired during March. The main plot doesn't actually take place during Halloween, but it might as well have been considering the dark atmosphere of the episode.
* Batman: The Brave and the Bold. The 2D drawing style being close to circa-1970 comics style could be part of what makes it Conspicuous, as then anything 3D stands out as being Conspicuously Modern.
* Batman: The Brave and the Bold: The creepy usher does it in "Bat-Mite Presents: Batman's Strangest Cases!"
* Batman: The Brave and the Bold, the Global Peace Agency was basically SHIELD.
* Batman: The Brave and the Bold, the Joker drops Batman into the acid, and we hear a splash offscreen before the scene cuts to inside the acid... where his skeleton is shown, moments before the villain brings him back to flesh and blood again.
* Batman: The Brave and the Bold, the Joker once again falls off something tall, this time a bridge. He survives and returns years later, even lampshading his ludicrous survival rate, but the fall left him crippled and reduced to using a hover-chair to get around.
* Batman: The Brave and the Bold: The 'Mazing Man story in "Four Star Spectacular!" revolves around 'Mazing Man repeatedly demolishing and rebuilding a fireplace in an attempt to rescue a cat, with predictable results.
* Batman: The Brave and the Bold...then it irises back in as they continue laughing, and Batman walks away.
* Batman: The Brave and the Bold, the sidekicks were forced to fight a training simulation as punishment for fighting each other. Speedy was one of them even though it was Robin and Aqualad who fought each other.
* Batman: The Brave and the Bold: The teaser for "Joker: The Vile and the Villainous!" ends with Joker pressing the button on the Omega warhead. Which blows up the Earth.
* Batman: The Brave and the Bold: The troops of General Zahl in "The Last Patrol!"

wear uniforms that are very strongly reminiscent of Nazi stormtroopers. Of course, in the original comics Zahl was a former Nazi.
* Batman: The Brave and the Bold. The trope is lampshaded in the Batmite episode where the little imp reads a "prepared statement" in response to some 4th wall breaking humor, explaining that this incarnation of Batman is just as legitimate and true to source material as the "tortured dark avenger crying out for mommy and daddy".
* Batman: The Brave and the Bold. They were later joined by teen versions of Halo and Geo-Force as the series progressed.
* Batman: The Brave and the Bold titled "Powerless!", Captain Atom comes up with several scenarios in which Batman is defeated easily. One of them involve him confronting a rampaging Giganta, who simply stomps on him.
* Batman: The Brave and the Bold to get help from Deadman, Speedy, and Green Arrow.
* Batman: The Brave and the Bold to Red Tornado, taunts the Red Hood with his backstory, noting that his psyche "bent but did not break". At the episode's climax, where Cyclone's speech pronouncing his hatred for all humans is interrupted by Red Hood destroying his head, the latter throws the bit back at him.
* Batman: The Brave and the Bold to take its place, which, ironically, only made it to 26 episodes.
* Batman: The Brave and the Bold, two crooks aim their guns at Batman... only to give up, knowing that, no matter what they do, Batman will beat them up anyway. And if they can avoid getting beaten up, they will. Bat-Mite, however, has other plans for them.
* Batman: The Brave and the Bold: Used by Per Degaton to age Batman and the Justice Society into decrepit old codgers in "The Golden Age of Justice!".
* Batman: The Brave and the Bold was broken and so everyone kept complaining about the heat.
* Batman: The Brave and the Bold waste time trying to capture the fake Star Sapphire while the real one carries out her nefarious scheme.
* Batman: The Brave and the Bold. What takes it to Master of Illusion level is when Batman exits the simulator and sees Psy Pi off-handedly kill the Outsiders, and flips out. Turns out Bats is still inside the sim, and the apparent deaths were an illusion to trick him into powering Psy Pi with his rage.
* Batman: The Brave and the Bold when Batman points out that it's actually incredibly unsafe to consume raw eggs.
* Batman: The Brave and the Bold: When Batman tracks down the members of the Doom Patrol in "The Last Patrol!", he finds Negative Man working as a sideshow freak in a seedy carnival.
* Batman: The Brave and the Bold when Black Mask's guy Taboo reprograms them for evil.
* Batman: The Brave and the Bold when he has a heart attack. It probably helped that other measures were taken, such as having Metamorpho turn into oxygen and fly into his lungs.
* Batman: The Brave and the Bold. When she does speak, her Outsiders teammates immediately stop whatever they're doing and listen to her. In the episode "Inside the Outsiders", there's a flashback dream sequence to a time when she was chattier. It's revealed that she doesn't speak in the present in order to honor her sensei's memory... and because she blames her loose tongue for indirectly causing the sensei's death.
* Batman: The Brave and the Bold which dedicates its entire runtime to the main story.
* Batman: The Brave and the Bold, which would have featured an A.I. Butler named Alpha-Red.
* Batman: The Brave and the Bold (who voiced the current Batman) and his son Robin is voiced by Sebastian Bader (Diedrich's real son).
* Batman: The Brave and the Bold Wildcat makes a blenderful of Tiger Tonic. He gulps his down contentedly, but Batman pours his into a potted plant. The plant loses all its leaves save one.
* Batman: The Brave and the Bold with Batman, he (begrudgingly) saved a child.

* Batman: The Brave and the Bold with him saying old catchphrases and TV Memes in-between jabs.
* Batman: The Brave and the Bold with the song "Drives Us Bats", in which the Music Meister — and eventually the DC Universe — expresses hilariously the frustrations of dealing with the omnipotent god-dammed Batman.
* Batman: The Brave and the Bold: Zigzagged when crime boss Babyface mounts a jailbreak. He's hiding his hulking frame in a stroller to fool the guards, but is actually wearing a three-piece suit beneath the disguise.
* Batman the car in mid-air, into the open driver-side window, and out the passenger side.
* Batman, the cerebral nature of the Riddler's modus operandi was less likely to involve murder. Though that depends somewhat on the writer; sometimes he's as much of a homicidal maniac as everyone else.
* Batman: The Clan of the Cave Bat tend to have multipurpose lenses in their masks.
* Batman The criminal element runs rampant in this city, and the law enforcement seriously cannot deal... Lucky they have Batman.
* Batman: The Cult, Bruce is well aware not to take the chance the totem is indeed a mystic artifact and so proceeds to pour gasoline on the totem and set it on fire to keep Blackfire, who was killed by his own followers, dead.
* Batman: The Cult, Deacon Blackfire bathed in blood, supposedly to make himself immortal.
* Batman: The Cult, Gotham City is overrun by homeless cultists. Batman and Robin are picked up from their hiding place by Alfred in the Bentley. When Batman asks whether Alfred had any trouble getting to them, Alfred replies "None sir." and holds up a pistol. To put it another way, Alfred is Battle Butler incarnate.
* Batman: The Cult the reporter in the studio gets shot at the back of his head while reporting on-air.
* Batman: The Cult which saw a wounded Bruce captured by the titular cult led by Deacon Blackfire, who drugged and brainwashed Bruce into joining their group and it's implied that many of the other members were the same way, given they scattered once a freed and recovered Bruce and Jason defeat Blackfire and don't remember what they did.
* Batman: The Cult, who claims to be a 500-year-old Native American mystic. On one hand, his methods of recruitment are clearly shown to be based on psychology and drugs, just like documented cults. On the other hand, evidence suggests Deacon Blackfire really was immortal. Whether he was a complete fraud or merely a partial fraud is never fully explained.
* Batman. The Dark Knight himself though has both Wayne Manor and The Batcave, with the rest having Gotham City, Arkham Asylum, or Joker's Asylum.
* Batman: The Dark Knight Returns (a direct reference to the above) became more fitting an end.
* Batman: The Dark Knight Returns after being sent by the government to defeat Batman.
* Batman: The Dark Knight Returns, after the Joker's massacre of the audience at the David Endochrine Show, Commissioner Yindel is told that one of the rookie cops has gotten sick; she says for him to be sent home and told it's all right.
* Batman: The Dark Knight Returns and in the ensuing fight, he would have nearly killed Batman had Robin not intervened, and even in their second fight where Batman has the upper hand and begins fighting strategically, the Leader still holds his own. He may be a violent psychopath, but anyone willing to take on the goddamn Batman has some serious brass ones.
* Batman: The Dark Knight Returns (and millions of dollars) to synthesize the little bit that he has, implying that the naturally occurring stuff is far too rare to be practical as a weapon. And despite having several days to prepare for their confrontation, Superman seems genuinely surprised that he was able to get his hands on any at all. It's possible that since we don't know Kryptonite's half-life, the time-skip meant that the amount had diminished.
* Batman: The Dark Knight Returns and several other sources, most likely due to his orphaning at such a young age. He does NOT like people to mess with kids.

* Batman: The Dark Knight Returns, a newly-resurgent Batman chases three bank robbers to an abandoned apartment complex. He pulls one robber beneath the floorboards, then uses him as a human shield while the other two open fire.
* Batman: The Dark Knight Returns: At the beginning of the film, Gotham has slowly become this since Batman's original retirement. Crime is out of control. In addition to the normal thieves, rapists and murderers having relatively free reign due to a now impotent police force, the new Mutant gang is murdering men, women and children For the Evulz with the intent to take over the city and impose their own violent, blood-soaked despotic rule. Everyone else lives in fear for their lives. Finally, Bruce can take it no longer and decides that Gotham will get better because he will force it to.
* Batman: The Dark Knight Returns, a young girl becomes the new Robin. News reports about Batman's new sidekick don't know any better, and continue to call his assistant "Boy Wonder".
* Batman: The Dark Knight Returns, Batman sits in the Batmobile, his weapons aimed at the Mutant leader. Goaded by the Mutant leader's taunts, Batman exits the Batmobile to fight him hand-to-hand. This proves to be a very bad idea.
* Batman: The Dark Knight Returns. Batman throws a mook through a window, then gives him a choice between bleeding to death from the resulting injuries or Batman taking him to the hospital if he talks.
* Batman: The Dark Knight Returns Batman tricks the world into thinking this happened while he was battling Superman.
* Batman: The Dark Knight Returns breaks out the massive tank-like Batmobile after coming out of his ten-year retirement to deal with the Mutant Gang.
* Batman: The Dark Knight Returns Bruce grows a moustache and looks like an older version of his father, until he shaves it off.
* Batman: The Dark Knight Returns. Bruce Wayne is trying to live with his retirement, but keeps getting either news reports on the crime wave in Gotham, or the movie that was playing the night his parents were murdered.
* Batman: The Dark Knight Returns came out, whether you accept it as a prequel or not.
* Batman: The Dark Knight Returns: Carrie, the new Robin, is mistaken for a boy by the police and the media.
* Batman: The Dark Knight Returns comic had a massive teen gang called the Mutants terrifying Gotham. The leader was probably the only Mutant who might actually be a mutant. Well, that or a plain old sociopath with filed teeth.
* Batman: The Dark Knight Returns feature superheroes coming back from retirement.
* Batman: The Dark Knight Returns gives us this (somewhat infamous) gem:
* Batman: The Dark Knight Returns is this, saving a woman who a man who'd just grabbed her.
* Batman: The Dark Knight Returns qualifies, as he genuinely tries to do the right thing, but he's a bit too willing to bow to authority for Batman's liking.
* Batman: The Dark Knight Returns, referring to the Mutants gang. When Batman returns to the dump to take charge of the Sons of the Batman:
* Batman: The Dark Knight Returns sees Rob, a member of the Mutant Gang, voiced by Rob Paulsen.
* Batman: The Dark Knight Returns segment of the episode "Legends of the Dark Knight", which perfectly encapsulates Miller's style and the tone of the book in five minutes of animation.
* Batman: The Dark Knight Returns subscribe to troll philosophy, given his words to Batman.
* Batman: The Dark Knight Returns teases Superman's appearance with news stories of people being saved by a red/blue blur. The news anchor keeps trying to say lines from the opening of the Fleischer Brothers cartoons, but is warned against finishing them each time due to legal concerns.
* Batman: The Dark Knight Returns. The entire thing was about Batman retiring, dealing with his retirement, and returning to the job, despite problems with his age.
* Batman: The Dark Knight Returns, the final fight between Batman and the Joker

takes place in a Tunnel of Love ride.
* Batman: The Dark Knight Returns The first time he hides under the floor, shoves his hand up through the floorboards, grabs the ankle of a nearby mook and pulls him down and probably beats on him even more. The second time he rams his arm through a wall (looks to be made of concrete, though the art makes it difficult to tell), pulls a mook through it, and beats him up more.
* Batman: The Dark Knight Returns; their vernacular is still impenetrable.
* Batman: The Dark Knight Returns to make her Asian, they also changed her name to "Ellen Yin".
* Batman: The Dark Knight Returns What we get are panels of him warring on horrified criminals, news reporters talking about a man dressed like a bat kicking the asses of criminals all over the city, among other reactions. And this is all in his first night back.
* Batman: The Dark Knight Returns, where Batman dives after a figure that he believes to be Two-Face, who had seemingly been rehabilitated but now plotted to destroy the Gotham Twin Towers, which he falls from thanks to his disloyal henchmen.
* Batman: The Dark Knight Returns. With Superman's help, the US Government manages to drive the Soviet Union off of the island of Corto Maltese, but the Soviets respond by nuking the island, the fallout of which could easily spill over into the United States. The president is tasked with informing the American people, and he does so by appearing on TV and chipperly saying (whilst wearing a full radiation suit), "Well folks, I've got good news and bad news. Heh... The good news is that the Soviets have withdrawn their forces from the island of Corto Maltese.... And the bad news, well... It looks like those Soviets are pretty bad losers, yes they are..."
* Batman: The Dark Knight Returns wrote her, Tim, Stephanie, and Damian had never been Robins. So one could make an argument for her being the sixth Robin.
* Batman: The Dark Prince Charming orders Bruce Wayne to buy an enormous diamond and hand it over to him... so he can give it to Harley.
* Batman. The dialogue that follows is surprisingly funny, given the otherwise dark storyline.
* Batman The Doom That Came To Gotham as written by Mike Mignola- our caped crusader in a shadowy 1920s setting. With Cthulhu.
* Batman the framing device for a real Silver Age story; RIP just expanded it to cover others as well. An alternative explanation provided for some of these episodes is the insinuation that they were hallucinations brought about by exposure to Joker toxin, Scarecrow's fear gas, etc.
* Batman: The Killing Joke. After Barbara Gordon/Batgirl has sex with Batman, she argues that they can go back to their previous student/mentor relationship. Batman thinks otherwise, and it breaks up their partnership.
* Batman: The Killing Joke had a Batman/Batgirl sex scene, the backlash overshadowed the entire film.
* Batman: The Killing Joke: Paris Franz has a massive interest in Batgirl.
* Batman: The Killing Joke singing about insanity to a man being forced through a carnival dark ride.
* Batman: The Killing Joke to pad out the runtime, as the original story was only 45 pages long.
* Batman: The Killing Joke without any semblance of independence or heroism whatsoever.
* Batman ("The Londinium Larcenies"/"The Foggiest Notion"/"The Bloody Tower"), Batman and Robin travel to Londinium (the Bat-universe's analog to London; actually the Roman name for London) to battle Lord Marmaduke Ffogg and Lady Penelope Peasoup. Not only is Londinium depicted as very foggy much of the time, but Ffogg's weapons are also all fog-based.
* Batman: The Long Halloween as the voice of Selina Kyle/Catwoman. She died in July 2020, over a year before release.
* Batman: The Long Halloween sees all three members of the Falcone family who appear, Carmine, Alberto, and Sofia, undergo this.

* Batman: The Long Halloween was a thirteen-issue series where each issue was set on a holiday in the month it came out. The first and last issues, as the title suggests, were Halloween.
* Batman: The Movie (1966). During the battle on the submarine, the Penguin uses his umbrella to slide down a wire and knock down Batman with a kick.
* Batman: The Movie (1966). Lair of combative sailors, pirates and the United Underworld organization (Catwoman, the Joker, the Penguin and the Riddler), apparently so irredeemable that Robin questions why Batman would risk his own life to save them.
* Batman: The Movie (1966). The Joker uses his electric hand buzzers on the Penguin and the Riddler with no permanent effect.
* Batman: The Movie, and animated film based on the 1966 era, sees the return of this 4-man band.
* Batman: The Movie and lead them to the United Underworld headquarters.
* Batman: The Movie, Batman proposes he and Robin leave the top floor office of a skyscraper "inconspicuously... through the window" and they proceed to climb slowly down the side of the mammoth building in broad daylight as the credits roll.
* Batman: The Movie, Bruce falls in love with Kitka only to find out she's Catwoman (and definitely a villain in this incarnation).
* Batman: The Movie: Commodore Schmidlapp's "instant whiskeymaker" can be used to remove all of the water from living creatures, reducing them to dust.
* Batman: The Movie, Commodore Schmidlapp sneezes causing all the people's DNA's to get mixed up delaying Batman's and Robin's chances of bringing the people back to life.
* Batman: The Movie has a machine that dehydrates living people, turning them into piles of powder which can be reconstituted with water. Accidentally mixing the powders leads to swapping of languages and personality traits. And when The Penguin accidentally reconstitutes some of his mooks with heavy water, this makes the mooks so unstable that a single punch from Batman can completely vaporize them.
* Batman: The Movie has a scene where the Joker, the Riddler, the Penguin and their accompanying goon squad burst in on Bruce Wayne and Catwoman (disguised as Russian reporter Miss Kitka), with the intent to kidnap them. Bruce initially does pretty well for himself before the numbers become too much and the villains dogpile him, with the Penguin climbing on the very top with an open umbrella because that's how he rolls.
* Batman: The Movie prepares a device to turn the members of the World Council into a powder and send the world into chaos.
* Batman: The Movie's famously hyperactive Riddler provides a surprisingly good example. The manic, perpetually giggling supervillain can't enter a room without laughing or push a button without a flourish, but when he checks his skywriting missile and discovers that it's sent the Batcopter into an unrecoverable fall, his immediate reaction is to stop giggling, shake his head and blink. Upon looking again and confirming, he shrieks "Look!" to get Catwoman's and Joker's attention, but as they begin to laugh and cheer, Riddler just stares at nothing and quietly mutters, "I got them. I got them."
* Batman: The Movie starring Adam West, Batman at one point (as Bruce Wayne) threatens to kill the members of his rogue's gallery when he hears they've kidnapped Miss KITKA. The effect is less-than-imposing.
* Batman: The Movie, the caped crusader tries to get rid of a lit bomb, but cannot find a place to discard it that doesn't endanger someone, causing him to run throughout the city trying to find a safe detonation zone. Some days, you just can't get rid of a bomb.
* Batman: The Movie: The Dynamic Duo has escaped death once again! What do the bad guys do? Run around screaming, as expected. Except for the Riddler, who calmly sits down and begins plotting out the next scheme.
* Batman: The Movie, the Penguin uses a dehydration machine to temporarily turn a group of minions into powder (so as to be rehydrated later to attack Batman). As the powdered remains are collected for transport, the Penguin takes pains to tell his mooks to be careful because "every one of them has a mother" (which actually

makes their later implied deaths during a later fight scene a little disturbing).
* Batman: The Movie version of the United Nations. The villains' main plot in the film involves kidnapping United World diplomats.
* Batman: The Movie, was indeed coming after them and showed up just after they had left.
* Batman: The Movie: While investigating a yacht at sea, Batman is attacked by a shark. After he uses Bat Shark Repellent to make it let go of him, it falls into the water and explodes: one of the villains had planted a bomb in it.
* Batman. There is a reason his dead parents get mentioned on average every second issue.
* Batman. There is rarely a few years that go by without some new incarnation.
* Batman the resident stab-happy assassin of the Bat clan we're talking about here.
* Batman: The Return of Bruce Wayne, after one of his time jumps, Bruce is captured by Blackbeard, who believes him to be a rival pirate of his. The issue is narrated by another character, who reveals Bruce could not possibly be the Black Pirate... because he is.
* Batman, the scene between Alicia and Jack Napier (not the Joker but a conceited A-1 nutball of a gangster) gets a comment from the Critic that it's Jack's "warm compassion" that draws her to him.
* Batman. These marks are so important to him that, on one occasion when he thought he'd killed the Bat and made his mark, he went crazier than usual when he found out Batman had survived. Ditto when he made a mark for Alfred.
* Batman: The Telltale Series after Lady Arkham injects him with the same psychoactive drug other characters have been injected with prior to this. It makes the victim more aggressive, acting on impulses they would not act on otherwise. Naturally, this gets him into some trouble.
* Batman: The Telltale Series, and had a damn good time doing it too from how the crime scene looks.
* Batman: The Telltale Series, Batman finds a matchbook to the Skyline Club on a dead goon.
* Batman: The Telltale Series: Batman tries to convince the captured Penguin to give up his masters plan.
* Batman: The Telltale Series has a villain who plays an important part in the first episode and, even though they are taken out of action afterwards, have an impact on the rest of the season. The first season has Carmine Falcone, a mob boss who has some connection to Bruce Wayne's late father; and the second season has the Riddler, a villain from Gotham's past whose reappearance attracts not only a new group of villains, but the government as well.
* Batman: The Telltale Series has John Doe as this, and he only becomes worse when he becomes Joker. The main source of his anguish depends on whether you pick the Vigilante or Villain route. Harley is also this because of her father who "ate a shotgun lunch" when she was younger.
* Batman: The Telltale Series is Willingham's best friend, and was their Best Man at the wedding.
* Batman: The Telltale Series John was written as bi, to the surprise of no one who played the game.
* Batman: The Telltale Series sees Carmine Falcone die after his first encounter with Batman.
* Batman: The Telltale Series. Thanks to this drawing, Batman was able to figure the plan of the big bad.
* Batman: The Telltale Series, which does little more than conceal Batman’s identity.
* Batman: The Telltale Series within Dent: One is his normal self and the other is a cruel, violent man lashing out at the problems he sees in Gotham - including Harvey, who he views as "weak". Good Harvey is terrified of this dark personality, and at one point, begs Bruce not to leave him alone with the voice.
* Batman: The Telltale Series with the other members of "The Pact", Gordon remarks "Maybe we'll get lucky and they'll kill each other". Batman doesn't say anything, but the look he gives Gordon and Gordon's innocent shrug say it all.

* Batman: The villainess Nora Clavicle manipulates Gotham City into hiring only women police officers, then unleashes an army of tiny mechanical mice. At least Batgirl remains "immune".
* Batman, they still have to give the Joker a boxing glove bazooka, with the card back proudly declaring, "He deals a mean right!"
* Batman they will become the best of friends in due time but many fans are enjoying their tense relationship.
* Batman this as being a mutation in his disease that grants him traits of more primitive animals.
* Batman this by commenting that it's nice to see Alfred lose his cool British demeanor once in a while.
* Batman, this is what Joker says happened when he first met Bats in several versions.
* Batman. This last seems more like taking credit for something in retrospect, as Princip was so incompetent as an assassin that Ra's would only want to be associated with him because of the results.
* Batman). This stems mainly from the fact that the first time Harley was put in Arkham Asylum, Wesker was the only inmate who treated her nicely, using his puppets to try and cheer her up. After Wesker was killed, the second Ventriloquist (Peyton Riley) tried to recruit Harley for a job, but she declined out of respect for her friend.
* Batman". This was during an interview in about 1992, and the story is still yet to appear.
* Batman: This was the setup for almost every two-episode cliff-hanger; the villain would subject Batman and Robin to some ridiculous death trap (being turned into giant ice cream cones, or giant postage stamps, etc.) and then leave. "Tune in tomorrow, same Bat-time, same Bat-channel."
* Batman though. Batman, a 6 ft 2 (without his cowl) and is often much either taller or at face-to-face height with him.
* Batman, though, it's been customary to give him a bigger slice of the fight-scenes.
* Batman: Thrillkiller ends with Bianca dead and her operation shut down, but Harley Quinn manages to escape.
* Batman time he was directly credited for any Batman work during his lifetime.
* Batman titles features a borrowed single-pilot police attack helicopter with an ejection seat, which is odd, because there are very few helicopters with ejection seats. There was only one single-pilot attack helicopter produced ever.
* Batman to death row and he's executed via electric chair. When his face has been burnt away and he appears to be dead, his body suddenly spasms and his head explodes.
* Batman to narrow it down to the East Wharf, goes from bar to bar in the guise of Matches Malone, buying books of matches until he finds the right one (and explaining he can't use the one in his mouth, because it stays there "for purposes of trademark").
* Batman took up the mantle as he generally just used cuss words instead (though milder ones, like saying "Crap squared"). Damian makes no attempts to avoid cussing either.
* Batman to this, it's been suspected it's a tacit requirement to being Robin.
* Batman to this kind of treatment is "You're a real nice girl, and I like you a lot, but right now? Shut up." In this case, Bruce was trying to tell Vicki that he was Batman, but Vicki kept talking over and interrupting him.
* Batman town". Many of his fellow Bat-Family crimefighters were not actively recruited or trained by him. Rather, they became involved on their own and were absorbed into the larger Bat-Family afterwards.
* Batman treatment… it's sort of a wonder the Estrogen Brigade for Batman isn't bigger.
* Batman tries very hard to pull this trope off. He usually fails, but on occasions, he does succeed quite well.
* Batman, two stories like this are told. In one, he passes a baby to Harvey

Bullock and then is swept away by floodwaters and drowns, and in another, he throws a bomb and himself into Gotham River to explode so no one else is hurt.
* Batman: Under the Red Hood’s gang (Many of whom used to work for Black Mask) in the truck they’re bound and gagged in.
* Batman: Under the Red Hood: After being beaten horribly by the Joker and left in a warehouse Jason is barely able to make it to the door, only to find he can't open it and realize there's a bomb with hardly any time left on it locked in with him to seal his fate.
* Batman: Under the Red Hood, although executed better than in the earlier days of DC Animated films.
* Batman: Under the Red Hood arc "Under the Red Hood" removed almost all plot points not related to Jason Todd's Death/Resurrection to create a much tighter storyline. It also expanded the Joker's role and gave a much more movie-friendly reason for said resurrection.
* Batman: Under the Red Hood averts this when Red Hood fires the rocket launcher at Black Mask's office. There is no recoil, but the backdraft of a recoil-less rocket launcher is correctly shown, and he is sensibly firing from an open rooftop with nothing to his back.
* Batman: Under the Red Hood has some of this while Batman and Nightwing are chasing Red Hood.
* Batman: Under the Red Hood has the Joker do this to Black Mask — who hires him to kill the Red Hood. In order to get Hood's attention, he ties up the mobsters of Gotham, both the ones that work for Hood and Black Mask himself, and set them all on fire. Luckily Batman shows up this time.
* Batman: Under the Red Hood. However, Red Hood admits he's long since forgiven him for what happened. He's really angry The Joker is still alive and Batman hasn't killed him for it yet.
* Batman: Under the Red Hood it usually is, with a foul-tempered Black Mask controlling the city's crime and the Joker causing chaos. However, it's made worse than usual by the implication that Batman's crusade will never succeed and nothing will change.
* Batman: Under the Red Hood: Red Hood even cites the trope by name ("We're a pair of walking armories") while he's fighting Batman at the start of the movie's climax.
* Batman: Under the Red Hood: Revolves around the conflict between the protagonist and his (second) adopted son.
* Batman: Under the Red Hood's line and concrete. Batman makes a note of it as he explains not many blades can cut through his line.
* Batman: Under the Red Hood. The Red Hood has captured the Joker, who is rambling on as always.
* Batman: Under the Red Hood when Batman and the Red Hood fight the armored assassins, the Red Hood breaks one of their helmets and sticks a taser into it, the man screams and writhes in pain just before his head explodes, we then cut to his blood splashing on a wall.
* Batman: Under the Red Hood with The Joker but having tested the Red Hood's DNA and discovered a match, He and Alfred break into the grave to verify that his body is still there. To their surprise, it has been replaced with a stunningly accurate latex dummy...
* Batman universe, Harvey Bullock is usually one of these. As was late 1980s supporting character Joe Potato.
* Batman Unlimited: Animal Instincts sees the Flash as a less experienced hero compared to the Bat-Family and Green Arrow.
* Batman Unlimited: Mechs Vs. Mutants with freeze breath instead of atomic rays).
* Batman Unlimited: Monster Mayhem, based on a kids' toyline by Mattel, both plays this straight and averted with the Joker. Played straight in the sense that he doesn't resemble the figures from the toyline these movies are based on, which feature the Joker in militaristic gear with jagged teeth. Averted in the sense that his depiction is far more in line with traditional versions of the character.
* Batman Unlimited: Monster Mayhem: It actually comes off as a big surprise toward

the end, but the Joker reveals he has a purple and green Iron Man-like armor which he uses to fight Batman for a short time. Despite coming out of nowhere it is still very awesome.
* Batman until Gordon becomes the commissioner at the end of the second season.
* Batman used harmless hand buzzers. From the '70s and onwards they received a deadly upgrade.
* Batman used the drug Venom to boost his already considerable strength to titanic levels. In the animated continuity he eventually withered into a coma from overuse. He gave up the drug for years in the comics, but post-reboot he's back on the stuff.
* Batman uses a vacuum cleaner the size of a truck to suck up loot (and Batman).
* Batman uses his connections in the US government to shut Gotham City off from outside aid after a cataclysmic earthquake so he can swoop in, buy up most of the real estate, and look like a hero.
* Batman uses his day job as a gravedigger at Potter's Field to hide the bodies of his victims by interring them in paupers' graves he is digging.
* Batman Vampire about to kill an innocent child is what enabled Tanya to break free of his control and escape.
* Batman Vampire featured Selina Kyle as a were-cat after she was bitten by a vampire, with Batman's occult expert Ariane speculating that the were-creatures turn into their totem animals, with wolves just being the most common.
* Batman Vampire- the first book in the trilogy- saw Batman allied with renegade vampire Tanya and her followers, but Tanya's group sacrificed themselves to destroy most of Dracula's brood when Batman destroyed Wayne Manor.
* Batman Vampire trilogy basically sees this happen to Batman after he is transformed into a vampire, his determination to continue acting as a hero eventually faltering as he succumbs to the thirst for human blood, only able to control himself just enough so that he doesn't kill innocent people but only targets Gotham's existing criminals.
* Batman Vampire trilogy, was originally called Earth-1191 in the first Multiverse before the Crisis.
* Batman vat of acid (which did wonders to the rest of his body and hair too). Later, he disfigures his girlfriend Alicia by corroding half her face.
* Batman: Vengeance actually had this as a recurring minigame, where the player would have to guide Batman as he dived to catch a falling character, switching between a diving-pose for speed, or a skydiving style spread-out pose for control, until you caught the target, whereupon Bats would automatically grapple to safety - 'twas pretty cool.
* Batman: Vengeance, Batman is forced to use Mr. Freeze's cryo-gun after defeating the madman, whose helmet had started to show cracks. After encasing Freeze in a block of ice, the Dark Knight rather irritably throws the gun to one side.
* Batman: Vengeance has the Batwing do this while chasing Mr. Freeze's helicopter. Batman has to fly very, very low to the ground through Gotham's expressways on an incredibly busy night.
* Batman: Vengeance of this is that it flaps around wildly whenever he's standing still, and it looks about as realistic as the cloth capes on the old Kenner action figures.
* Batman version, along with his sidekick Harley Quinn. It goes wrong one time when Harley tries to headshot Supergirl with a boxing glove gun, and it rebounds off Kara's head harmlessly to score a direct hit on Harley herself.
* Batman version of Gordon on-air. However, Gordon does have a logical in-universe reason: Gotham PD is so incredibly corrupt that anything important enough for Batman is probably also something any corrupt cop would be working to cover up.
* Batman, Vicki Vale thinks that Bruce Wayne stood her up for dinner at the museum. In reality, Joker had set it up. After Joker gasses the other patrons and trashes the museum, he menaces Vicki for a while until Batman shows up and rescues her.
* Batman video games love to break up gameplay with Batmobile driving levels, dating back at least as far as Ocean Software's
* Batman villain Amygdala is named after a bundle of nerve cells in the brain

controlling emotional associations, which was removed in an attempt to cure him of his homicidal rage, a surgery which backfired and had the exact opposite effect.
* Batman villain called the Sportsman was murdering famous athletes. One of them was an ice hockey player he murdered on the rink during a game by throwing him an exploding basketball.
* Batman villain Catman. When he was created, he was a campy male version of
* Batman' villain Clayface (every version). Being chemically altered gave him the ability to regenerate his body mass, change his shape, size, density and shape-shift into any form he could think of.
* Batman villain Clayface was in love with Helena, a cheerful blonde... mannequin. In his first appearance there's a creepy yet humorous moment where he says he would have gone insane if he hadn't met her. Batman seems sympathetic by the second time they met: he pulled strings so Clayface could keep Helena in his cell at Arkham. By then, though, the spark in their relationship was gone and Clayface kinda wanted a divorce.
* Batman villainess Nocturna, who used a narcotic perfume and went through two criminal "Black Knights" called the Night-Thief and Nightshade before trying and failing to make Batman her champion.
* Batman villain Hush kidnapped Catwoman, used his surgical skills to remove Catwoman's heart, leaving her on life support, and showed it to Batman. Luckily, he was able to get it back.
* Batman villain KGBeast, a Soviet super-assassin, has been described by the CIA as a participant in the assassination of Egyptian president Anwar Sadat.
* Batman villain Roman Sionis — better known as Black Mask. It seems to be his hobby.
* Batman villain Sterling Sliversmith went from the swordsman runner of a criminal enterprise who just happened to be obsessed with silver and who nearly got away with his brother's murder to a deranged High School teacher whose lessons are useless and who can't control his students, instead spending time whining about them.
* Batman' villain The Penguin can fall into this trope, often while taking time out from his pretentious rhetoric to crack a bird-related pun.
* Batman villain The Scarecrow is often shown with a stitched-together outfit, and sometimes his burlap mask is included.
* Batman villain was Dr. No-Face. No prizes for guessing what his gimmick was.
* Batman villain Wrath has a similar origin to Prometheus (see below), but predates him; his parents were thieves that a young Jim Gordon was forced to kill after they drew their guns, earning him Wrath's hatred. Wrath tried to convince Batman that Gordon killed his parents without provocation, but Bats refused to believe it.
* Batman virus genetically engineered during the Cold War escaping from government custody and coming to Gotham. As part of their genetic traits include the ability to disperse an infectious version of the virus, meaning they risk transforming every human in the city into a mentally addled killing machine like themselves, they really fit the "nuke" part of the trope.
* Batman vs. Robin until Green Lantern forced him to break off from it to deal with the plot of the movie proper).
* Batman vs. The Teenage Mutant Ninja Turtles, Donatello and Batgirl are pitted against Bane, who boasts about being "The Man Who Broke the Bat", and proceeds to demonstrate this by attempting to break Donnie's spine. However, since Donnie is a turtle, his spine is actually a hard, outer shell, so all Bane ends up doing is taking out his own kneecap.
* Batman vs. The Teenage Mutant Ninja Turtles has both Batman and the Ninja Turtles exist in the same universe rather than meeting through dimension hopping, which streamlines things a bit.
* Batman vs. The Teenage Mutant Ninja Turtles, it becomes clear that the Turtles can't beat Batman, who has been handily beating the brothers, Donatello declares that he's calling it and drops a smoke bomb, allowing them to escape.
* Batman vs. The Teenage Mutant Ninja Turtles: Not only does the Batmobile appear, but so does the Turtles' Party Wagon. Both cars get to show off their awesomeness.

* Batman vs. The Teenage Mutant Ninja Turtles: The fate of an unfortunate Arkham guard.
* Batman vs. The Teenage Mutant Ninja Turtles: The Shredder and the Foot Clan set up shop in Gotham City with the Turtles on their tail. Batman, Robin, and Batgirl and the Turtles have never heard of each other, so they assume the other team are villains and fight before the misunderstanding is cleared up.
* Batman vs. Two-Face being like Two-Face. We don't see the gesture because Batman's body obscures Robin's hand from view, but the raising of his arm and what he says when he makes the gesture gives a good hint.
* Batman v. Superman. A cheap plastic flute that has a plastic circle with the film's logo stuck on it. And it's an actual licensed product. What this has to do with the movie is a complete mystery.
* Batman v Superman: Dawn of Justice alone, Lois has to be rescued by Superman three separate times. The first was Lex, by proxy, testing if Superman would come for her if she were in danger. The second time was Lex using her to summon Superman.
* Batman v Superman: Dawn of Justice and classic hot rod Batmobile designs.
* Batman v Superman: Dawn of Justice) and has been using his knowledge of their real identities to manipulate them.
* Batman v Superman: Dawn of Justice and just find the resulting trainwreck to be worth the price of admission.
* Batman v Superman: Dawn of Justice: A shade of this is present in the "Knightmare", Batman's dream of an apocalyptic future where Superman took over the Earth. He uses guns in the setting to kill Superman's human soldiers, whether as he doesn't in the real present, but it's not as far a moral departure for the character as usual as this Batman explicitly kills his enemies, including with guns (such as using his vehicle-mounted machine guns to blast through a car and using an enemy's M60 to shoot a flame thrower mook in the gas tank).
* Batman v Superman: Dawn of Justice. Batman also considers Superman a threat to the planet instead of a hero.
* Batman v Superman: Dawn of Justice Batman carries an assault rifle and sidearm, using them without hesitation on Superman's soldiers.
* Batman v Superman: Dawn of Justice: Batman ends up this to Lex Luthor, who exploits his jaded and violent vigilantism and the existing fears of Superman to manipulate Bats into trying to kill Supes. And it almost works.
* Batman v Superman: Dawn of Justice, Bruce uses this to justify attacking Superman, claiming that even if there was a 1% chance that Superman could turn rogue, he has to take him down or there would be an even worse casualty number than the Battle of Metropolis.
* Batman v Superman: Dawn of Justice, Bruce Wayne acknowledges that humans are flawed, that they fight, kill, and betray one another, but they're still good and can rebuild and do better.
* Batman v Superman: Dawn of Justice by the Kryptonian genetic council.
* Batman v Superman: Dawn of Justice chose to keep the R rating to drum up publicity, even though it just barely qualified.
* Batman v Superman: Dawn of Justice, complete with a warning from a future/alternate reality Flash. Cool as it was, it didn't make much sense in the context of the film, and was one of the most widely criticized parts.
* Batman v Superman: Dawn of Justice corrects this as Supes readily smiles and chuckles just like in the comics.
* Batman v Superman: Dawn of Justice didn't fit in a film that took place before the formation of the Justice League). The result was overlong (the extended cut in particular nears three hours!), and was widely panned as a disjointed, thinly plotted mess that cared more about satisfying loyal fans than about trying to tell a good story.
* Batman v Superman: Dawn of Justice, Doomsday is a living weapon of mass destruction. He is capable of generating dome-shaped explosions of energy that can level entire city blocks.
* Batman v Superman: Dawn of Justice. Doubly ironic, considering Wonder Woman used

to be considered as the least popular (or the least well-known) of DC's Big Three heroes.
* Batman v Superman: Dawn of Justice during a chase scene. Later, Batman ambushes Superman with several remote-controlled Gatling guns. After groaning in pain for a few seconds from the impacts, Superman destroys them with his heat vision.
* Batman v Superman: Dawn of Justice: During a melee, a mook runs up behind Batman and shoots him in the back of the head at point-blank range. Fortunately his cowl is bulletproof, though Batman flinches in visible pain.
* Batman v Superman: Dawn of Justice ends with Batman, Superman, and Wonder Woman taking on Doomsday.
* Batman v Superman: Dawn of Justice, even going so far as remotely controlling the Batplane when needed.
* Batman v Superman: Dawn of Justice, even wears suits in the Batcave.
* Batman v Superman: Dawn of Justice) faced some criticism for being both borderline incomprehensible to non-fans and taking such a radically different approach that a lot of fans were turned off.
* Batman v Superman: Dawn of Justice has a habit of leaving a batarang at places he's been, such as the hideout of a human trafficker.
* Batman v Superman: Dawn of Justice has cameos from newscasters like Soledad O'Brien, Anderson Cooper, Nancy Grace and Charlie Rose.
* Batman v Superman: Dawn of Justice has several scenes where no one speaks and the actors convey not only emotion but a sense of their unspoken histories. The most famous is when Bruce Wayne stares at his Batsuit and it actually appears to stare back at him, highlighting what a struggle it is for him to not wear it. In the same scene, he stares at the Robin suit in the case, which lets the audience know a big piece of this Batman's past (i.e., the Joker killed Robin) and even hints that this may contribute to his decision to abandon his principles.
* Batman v Superman: Dawn of Justice he knows any of` this; he just enters the scene already omniscient.
* Batman v Superman: Dawn of Justice helping turn public opinion against the Man of Steel, Lex has them all killed in an explosion.
* Batman v Superman: Dawn of Justice incarnations were named "Alexander" (pre-Crisis Earth-1's Lex was short for "Alexis" and Earth-2's was short for "Alexei"), they weren't named after their dads and thus weren't "Lex Luthor Jr."
* Batman v Superman: Dawn of Justice. In the "Must there be a Superman?" montage, a family is shown sheltering on the roof of their house surrounded by rising floodwaters. Painted on the roof is a large "S" logo. Needless to say, Superman answers the call.
* Batman v Superman: Dawn of Justice is heard during Superman and Doomsday's battle as the President giving orders.
* Batman v Superman: Dawn of Justice is spewing black fluid from its mouth.
* Batman v Superman: Dawn of Justice: It is revealed that even if a Kryptonian is dead, their bodies are still almost indestructible. The scientists studying General Zod's corpse explain that they couldn't cut him open until they discovered kryptonite.
* Batman v Superman: Dawn of Justice, it was outfitted with heavier firepower to deal with Steppenwolf and his Parademons.
* Batman v Superman: Dawn of Justice, lined up and ready to take on a threat together for the first time in live action.
* Batman v Superman: Dawn of Justice: Made in 2016, prologue set in 1981.
* Batman v Superman: Dawn of Justice makes him the new kid on the block.
* Batman v Superman: Dawn of Justice mentions is uninhabited. Then Batman lures him to the Gotham Port, and explains to Wonder Woman he knew the Port was abandoned due to his previous fight with Superman, and that is where the battle ends.
* Batman v Superman: Dawn of Justice mother was also named Martha, and her name was his father's last word as he died.
* Batman v Superman: Dawn of Justice movies there) and getting rave audience scores.
* Batman v Superman: Dawn of Justice. Not so much in the actual movie, though some

people might have preferred him being this way.
* Batman v Superman: Dawn of Justice: One of the reasons Lex Luthor gives for wanting to destroy Superman is that God didn't save him from his abusive father when he was a child... not that Superman ever claimed to be a god, and Superman was himself a child at the same time, and could not have known about it.
* Batman v Superman: Dawn of Justice" over a picture of a destroyed skyline. In the final action sequence of this film, the heroes make the effort to limit the destruction: Superman throws Doomsday into space so he can be nuked, and when the monster comes back on Earth, Batman lures him into the practically-deserted wharf district of Gotham City (the battle is at night; people tend to not hang around wharfs at night).
* Batman v Superman: Dawn of Justice respectively. Another hashtag used in the promotion was #WhoWillWin.
* Batman v Superman: Dawn of Justice, she becomes Wonder Woman once more to help Superman and Batman.
* Batman v Superman: Dawn of Justice's Kryptonite by pointing out Superman "has the power to wipe out the entire human race," making his existence too great a risk.
* Batman v Superman: Dawn of Justice speech at the Library Gala. It starts off well but soon becomes derailed as Lex's own philosophical musings and psychosis begin to rear their head, causing Lex to quickly cut himself off.
* Batman v Superman: Dawn of Justice spends two scenes wearing dresses that bare her back. Those scenes are high-society parties so she fits right in.
* Batman v Superman: Dawn of Justice Superman because he thinks Superman is a threat to the planet.
* Batman v Superman: Dawn of Justice Superman including, you guessed it, a kitchen sink.
* Batman v Superman: Dawn of Justice, Superman suffers greatly from Doomsday, so much so that he is declared dead. They hold two funerals, one in Metropolis and one in Smallville, the Smallville coffin being the only one occupied. After Lois Lane drops a handful of dirt on the coffin, it starts levitating like when he learned to fly.
* Batman v Superman: Dawn of Justice, the back of Batman's cowl is tough enough to deflect a point blank shot.
* Batman v Superman: Dawn of Justice. The film then jumps forward 18 months, when the rest of the film is set.
* Batman v Superman: Dawn of Justice), the girlfriend of criminal Cesar Santos and a tramp who talks to Clark Kent about Batman being on a hunt.
* Batman v Superman: Dawn of Justice, their intervention was more of a detriment than anything else- if they hadn't launched the nuke at Doomsday, nearly killing Superman in the process, Superman would've been able to simply punch him into space and end the whole thing there. In the extended cut of the film, the military also tries to drone strike a militia base in Kenya with civilians (including Americans) inside, forcing Superman to destroy the drone to stop them.
* Batman v Superman: Dawn of Justice theme is whether Superman is accountable to anyone but himself.
* Batman v Superman: Dawn of Justice: the New God Steppenwolf appears as a hologram to Lex Luthor in the Ultimate Edition, along with the three Mother Boxes that he's seeking.
* Batman v Superman: Dawn of Justice, then him running off in grief at their funeral and accidentally discovering what will one day become the Bat Cave.
* Batman v Superman: Dawn of Justice. This is a key factor in his hatred of Superman, an actual God-like figure he can direct his anger toward.
* Batman v Superman: Dawn of Justice to be more like the trailers. Unfortunately, this caused the film to have a distracting uneven tone and inconsistent editing and be panned in reviews too.
* Batman v Superman: Dawn of Justice to do a Dr. Frankenstien and create Doomsday, an almost unstoppable killing machine.
* Batman v Superman: Dawn of Justice to hide from the police who've caught him beating up a sex slave trafficker. When one cop spots him, he crawls along the roof

and out of the room in a surprisingly creepy rapid-fire scene.
* Batman v Superman: Dawn of Justice was panned by critics, but became incredibly successful, grossing over $870 million worldwide. It opened with $166 million and, due to bad word-of-mouth, ended up with a domestic gross totaling $330 million (less than twice).
* Batman v Superman: Dawn of Justice was torn to shreds when first released to theaters but the extended version of the film, labeled the "Ultimate Edition", was better received than its theatrical cut, due to a clearer explaining of certain plot points and smoother pacing. Some viewers even said it was like watching a different movie.
* Batman v Superman: Dawn of Justice we see the climactic fight between General Zod and Superman from Bruce Wayne's point-of-view, with their heat-vision casually cutting large swaths of entire buildings down without any trouble, leading to a large amount of wanton devastation in Metropolis and the deaths of thousands of innocents.
* Batman v Superman: Dawn of Justice will restore parts of said arc). Most notably, the "Nightmare Sequence" is virtually incomprehensible to anyone who isn't familiar with Darkseid, Darkseid's symbol, Parademons, and the New Gods.
* Batman v Superman: Dawn of Justice would later claim the movie was a niche film that wasn't intended for mass audiences, despite the marketing saying otherwise.
* Batman v Superman: Dawn of Justice younger man. He's still in charge of a very rich tech company though, which gives him vast resources with which to oppose Superman.
* Batman v Superman, most don't consider the extended cut a great movie but it at least makes sense.
* Batman Walks the Last Mile", the Clown Prince of Crime says this line to a cop who is leading him to his execution: "So this is the famous Last Mile, eh? Don't cry, boys...this will hurt me worse than it'll hurt you! Ha! Ha!"
* Batman: War Games, seeing as she is limping and half dead after being shot and tortured for many hours after trying to make a contingency plan of Batman's work and accidentally causing a gang war instead.
* Batman was a dead language), Urdu, Arabic, Vietnamese and presumably many more.
* Batman was a one-shot about Cluemaster orchestrating a Great Escape from Blackgate Penitentiary.
* Batman was created in May 1939, and has been powering on ever since.
* Batman was instrumental in stopping it. Whether or not that is an example of this trope is unclear. 2009 has passed, so it looks like we'll never know what happened.
* Batman was literally called via the Bat-phone in the 1960s' television series, and usually to battle only bizarre supercrime.
* Batman was lobotomized via Superman's heat vision. The Ventriloquist briefly appears, and his Scarface dummy has the lobotomy marks instead of him.
* Batman, wasn't originally Christian, but when he reappeared in The New 52 (the original Blackfire died when his cultists turned on him and tore him apart) he had been changed into an evangelist leading a cult out of Arkham Asylum. This version is also killed by his followers when he refuses to kill himself to prove his piety.
* Batman was pretty bad, so the writers decided to have quantity if they couldn't have quality.
* Batman was seen as this too, as an overdose of crossovers, questionable storylines (Hush, War Games, and War Crimes) and fans getting sick of the modern "Bat-God" take on the character had soured fans on Batman. Enter Morrison, who rejected the Bat-God formula he created in favor of a run built around the much-reviled 1950s era Batman, introduced a fresh new element into the book in the form of Damian Wayne and giving fans stories such as "The Club of Heroes" and "Batman RIP".
* Batman was the one who made the train uncontrolled since he knew Gordon would blow up the rail supports.
* Batman: Wayne Family Adventures: Bruce is at first nonplussed at his kids fighting each other over a cookie. But when it lands onto his coffee cup, he's more than willing to leap into action to defend it.

* Batman: Wayne Family Adventures Cass, Jason, Duke, Tim and Damian gather round for some of Alfred's baked goods and award-winning cookies. And then they notice there is only one cookie left and proceed to get into a brawl.
* Batman: Wayne Family Adventures: Played for Laughs. Barbara acts as the traditional Mission Control to the Batfamily as Oracle (providing offsite tech support and intel) but the scenarios seen in "Eyes and Ears" are comedic: she stops Damian from driving the Batmobile since he's too young, and when Tim and Stephanie wind up at the wrong bank, she points them to the one that's actually being robbed.
* Batman, we see a couple of crooks mugging a couple and their child. We're led to think this is the young Bruce Wayne and his parents Thomas and Martha, and we're about to see the murder of his parents, but suddenly, Batman swoops in and beats up the crooks.
* Batman, when a female newscaster starts laughing uncontrollably and her astonished partner looks on in disbelief, trying to ignore her, before she collapses dead on the ground. Turns out she'd been given a dose of the Joker's poison.
* Batman, when Carmine Falcone hires Ivy to put Bruce Wayne under her spell and get him to agree to let Gotham Central Bank to launder Falcone's money (Wayne's on the board of directors and the lone holdout in keeping the gangster at bay). While enchanted, Bruce is essentially a passenger in his own mind, but he feels oddly content and calm while connected to "the Green."
* Batman, when he fights with Amazo, who at the time had the powers of both Superman and the Flash. Rather than trying to hurt Amazo with regular punches and weapons, he strikes exclusively with explosives and high momentum strikes to major weak points, e.g. a flying knee to the underside of the chin and plastique to the eyes.
* Batman when he runs into them and he proves to be much less useful than any of the previous crossover characters.
* Batman, when he trained briefly under Shiva, didn't get as much out of it.
* Batman, when The Joker manages to join the Dark Judges, his power is a laugh so mighty that it kills people.
* Batman when the Scarecrow forces him to have a flashback of his parents' death.
* Batman where Batman and Robin are pursuing King Tut and find a woman tied by the villain in a way that will suffocate her. Batman proceeds to lecture Robin on why the hero must always stop to save the innocent while the woman is still suffering.
* Batman, where he came full circle from his previous epic Jerkass characterization, even stories set before that happened have him as one of the nicer guys.
* Batman, where Robin keeps trying to "hide in the shadows" in broad daylight while insisting he's a myth.
* Batman, whether its Lego, the Silver Age, or the Adam West TV show, still have the same grim origin; a man who dedicates his life to fighting crime after his parents are shot and killed in front of him as a child.
* Batman, which depicts her shooting repeatedly at Batsman and missing because having one eye covered means she has no depth perception.
* Batman, which had the Bat-family try to find out if Bruce really did kill someone or if it was all planted.
* Batman, which is pretty disturbing, considering that he just kills all villains and uploads it on Internet.
* Batman, which the handler briefly reexamines clearly thrown by its inclusion in the weapons. Given that its The Joker, we're probably better off not knowing what he uses it for.
* Batman while fighting Batman. Batman picks it up and fires it at the Penguin, only to discover that umbrella is booby-trapped, and fires a dose of gas back in the firer's face.
* Batman. While Wayne Enterprises is referred to as "his" company, it's also generally portrayed with a board, occasionally at risk of a takeover, and other things that suggest that like most large companies it's a publicly traded corporation, or at least has multiple shareholders, and Bruce Wayne is simply the

majority shareholder. Consequently Batman has embezzled, or caused Lucius Fox to embezzle on his behalf, millions of dollars.
* Batman: White Knight: During his meeting with the GCPD, the cured Joker breaks free of his cuffs, and the following panel where he rests his arms on the table in front of him as he tears down Batman and the police force piece by piece makes it clear that Jack Napier has the upper hand whereas the GCPD no longer has any power over him.
* Batman: White Knight had one where he asked "how many GCPD does it take to change a light bulb?". The answer is "it only takes a Batman!".
* Batman: White Knight Jack Napier's sanity allows him to dress much more stylishly, as opposed to the garishly dressed and messy-haired Joker.
* Batman: White Knight: The first few pages show Jack Napier visit Batman's cell in Arkham Asylum and ask for his help. The next page starts detailing the events one year earlier.
* Batman: White Knight, The Joker is cured of his insanity and his skin tone is restored to its original color, allowing Jack Napier to emerge. He stops wearing goofy or garish clothing and instead dons much more stylish clothing and combs his now brown, formerly messy hair. The colors associated with being a Secondary Color Nemesis are also downplayed, limiting them to his neckties.
* Batman who doesn't support his father yet is still treated as an outcast for their relation, while he moonlights as one of the city's beloved ninja heroes combating his father, and ultimately learns more of his father than the villain he presents himself as.
* Batman who interfered with Victor's experiments and ended up turning him into the coldhearted monster he is today. Freeze's body count and crimes have long surpassed Boyle's singular action, but fans have a ton of sympathy for Victor and absolutely no love for Ferris.
* Batman, who will often intimidate thugs and send them running back to their bosses, following them right to them to deal with them personally.
* Batman why he didn't just shoot her in the head). She avoided bleeding to death by using her blood to write out a healing incantation, made extra-strong by its medium.
* Batman with early morning sunlight to get him to remove his cowl and finally cause him to snap out of his psychotic break.
* Batman with "enough prep time". As such, he's the second form of this trope, at least within his own franchise. It's a bit questionable in the DC Universe as a whole.
* Batman with Robin the Boy Wonder: In one episode, the Joker and his thugs, disguised as a filming crew, were looking for a treasure. It was later revealed the only treasure was a fake. The Joker thought he'd get off because he couldn't be convicted for looking for a false treasure he never found. He was then told he could be nailed for making a film without proper authorization.
* "Batman with Robin the Boy Wonder" is drawn in the style of a Golden Age Batman comic and is written accordingly as well. Batman and Robin smile throughout the story, deliver wisecracks and best the villains via a clever scheme. The first page is a splash panel that looks like an old comic book cover, with the title appearing in the same style it used to on actual covers in those days.
* Batman would be better than to risk testing the patience of a guy who could do that, he decided.
* Batman would occasionally disguise himself for undercover work in the criminal underworld. Clayface, a shape-shifting villain, appeared in the same series.
* Batman, written and penciled by Howard Chaykan, featured Bruce Wayne as a self-made industrialist in the late 1930s, going up against the White Legion, who wore Klan hoods with swastikas on their foreheads. The Legion was secretly backed by Senator Pewtie (this universe's version of Two-Face) who, along with the Joker and the Penguin, plotted to assassinate both Franklin Roosevelt and Adolf Hitler, in a bid to install the fascist Pewtie in the White House.
* Batman wrote to his father describing just how little they knew each other due to the fact that Jack had essentially abandoned him for the first fourteen years of

his life, a confession that Tim was now Robin and his wishes that they could start over even though he knows they can't. His father never saw it as Tim never truly intended to give it to him.
* Batman: Year 100 places Batman in a dingy sci-fi Gotham against corrupt government agents utilizing Big Brother-esque tech and psychic powers to keep their shady dealings under wraps.
* Batman Year One adventures that Bruce decides his company will no longer do weapons, after he fights many technological threats.
* Batman: Year One all his crime-fighting gear from parts he bought at a local hardware store. As in the comic, Batman battled non-superpowered gangsters only. It ended with Bruce inheriting his fortune and moving into Wayne Manor with Little Al, though.
* Batman: Year One. Although as the story is essentially a retelling of Batman's origin with a large amount of focus put on Gordon's first year as a member of the Gotham City Police Department, the two are optional for both positions.
* Batman: Year One and quickly realizes "She knows Karate... only Karate."
* Batman: Year One, Bruce Wayne is arrested after his first unsuccessful attempt at crimefighting and has to break a pair of handcuffs after being shot in the shoulder. Once he develops the Batman identity, he makes sure there are plenty of lockpicks in the suit.
* Batman: Year One, claiming they might dangle the carrot of good integrity but after the day is over everyone still treats you like any other scum bag if you take down a cop.
* Batman: Year One) contains a panel which imitates the painting, featuring Lt. Gordon and Essin eating in a diner after their shift ends. In a later, daytime shot, it's even revealed that the diner is named "Hopper's".
* Batman: Year One, Falcone wants Batman hunted down and killed for tying him up in his underwear inside his own home.
* Batman: Year One: Gotham PD is almost entirely corrupt, with SWAT teams having no problem in leveling city blocks if they can get away with it. There is also Harvey Bullock, who manages to unite both evil AND incompetent (for a corrupt cop whose task is to hinder detective work, this can be an effective combination indeed). That is before he eventually turns over a new leaf, upgrading into a good and on/off incompetent copper.
* Batman: Year One has a particularly notable Smoke In, leading to this moment:
* Batman: Year One) has this law be the explanation for why Batman is a vigilante and not a badged police officer. One of Bruce Wayne's law professors poses a hypothetical situation where two teenagers steal a car for a joyride and end up hitting and killing a pedestrian. When Bruce states that only the driver should be held responsible for the death, the professor corrects him that both teens are responsible because they both participated in the felony which led to the death of the victim. Bruce finds this shockingly unjust, leading him to decide to work outside the law.
* Batman: Year One is a borderline case. Miller uses a lot of news broadcasts to further/hand-wave certain plot developments, but these are more for the readers' convenience; few if any of the characters are shown directly responding to them.
* Batman: Year One, James Gordon uses having dropped his glasses as an excuse not to recognize Bruce Wayne after Wayne saves his son's life.
* Batman: Year One laws, specifically a getaway-car driver being judged equally guilty of murder if his partner kills someone during a bank robbery, even though the driver wasn't even in the bank and doesn't know it happened.
* Batman: Year One sleep with her or that she spoke a word of English, making it pretty believable that she didn't know he was pulling anything shady, whereas in the movie, it's kind of weird that she would keep quiet after this weirdness or wouldn't piece together that Bruce is at least connected to Batman.
* Batman: Year One, who was in special forces. Gordon muses it had been some time before he'd kicked a Green Beret's ass.
* Batman years before she gained acceptance and started to trust the others, and Damian's problems start with being raised in a clan of assassins... they're all

waifs, misfits, and strays that would belong nowhere if not together.
* Batman yellow to have a 'talk' with Green Lantern. While sipping lemonade.
* Batman. Yes, he is a top martial artist. Yes, he is a great chemist. But first, he's the world's greatest detective.
* Batman: Zero Year GCPD is dirty; no exceptions. After all, when he was a kid, he got taken home in a police car and saw a young Jim Gordon get "given" the trenchcoat he always wears. He thought this showed everyone liked the police and only realised the truth later. (He later learns that Gordon keeps the coat as a reminder that it's easy to give in to corruption if you don't keep your guard up.)
* Bat Masterson, later in life, was appointed a Deputy Marshal for the Southern District of New York (Manhattan, the Bronx, and the lower Hudson Valley) by Theodore Roosevelt, to give him a relatively peaceful post where he'd still be a lawman.
* Bat men also exist. They only have four limbs — their arms double as wings like in real bats — and live in tribes underground, being one of the few underground animal people capable of flight. They can also be found on the surface, where like the other surface-dwelling animal people they don’t form tribes and are essentially bipedal animals.
* Batmetal had Batman playing in the bath with figurines of himself and Aquaman. After having the latter kiss the former's ass, he realized in horror the camera was still rolling and hastily shut it off.
* Batmetal plus more. Features such ridiculous displays of manliness such as Batman beating people up with his scrotum. Really, just watch it, it has to be seen to be believed.
* Bat-Mite at once in a Dali-esque world. Batman had to talk him down / bail him out.
* Bat-Mite existence. Two stories by Alan Grant show Bat-Mite appearing to a criminal named Overdog. Both times Batman (who doesn't find Bat-Mite) rationalizes that these were just Overdog's drug-induced hallucinations, but the reader is left wondering...
* Bat-Mite miniseries, Bat-Mite believes that the villain Gridlock is a senator who uses "gridlock" as part of his campaign slogan.
* Bat-Mite, sadly tossing aside his previous characterization (and development) in the process.
* Batmite use this to take out Gorilla Grodd, while pretending to be Batman, in "Legends of the Dark Mite!" ("Irony' good.")
* Batmobile's to put the torch on the Fire Breather in the opening fight.
* Batmobile was first revealed to the world, fan opinion was mixed. Then the movie came out. Gordon wants one.
* Batons: Utilized by cheerleaders as a sort of mini-staff. Can sometimes act as a boomerang for some reason.
* Batou acts like this when training some new recruits for Section 9 in
* Batou is riding in a vehicle with Gohda when the latter starts questioning Batou about his
* Batou reveals that he has a cannon (well, a single-shot large-caliber firearm) built into his arm.
* Batou's rank in his military days, long a subject of debate in the GitS fandom, was finally stated in
* Bat Out of Hell. Gligar, at least, has a tendency to fly straight at its targets' faces and clamping on tight before injecting them full of poison.
* Bat Out Of Hell III. Dion's version is probably the most familiar in America; Meat Loaf's version, however, a duet with Norweigan singer Marion Raven, made #1 in her home country, where the Dion version never charted.
* Bat Out of Hell, Steinman was all but blackballed from Broadway. He faced yet another setback in 2006 when Meat Loaf successfully sued for the rights to the title. Though Steinman still claimed he would get the musical made, he ultimately never did; whether anyone will take on the effort following Steinman's 2021 death remains to be seen.
* Bat Out of Hell was intended to be the music for a Rock Opera that never

happened. At some point, Meatloaf must have decided to release it without the stage show because it was a lot of work to not get published.
* Bat Pat, all the books are supposedly written by Bat Pat himself as retellings of his many adventures.
* Bat Pat, he is rather annoying because his loud snoring keeps Martin up all night. So the kids try to find him some other place to sleep.
* Bat People: Either humans with bat-like traits or humanoid bats who, depending on the work, may be connected to vampires.
* Bat People: Monstrous, anthropomorphic creatures with a mixture of bat and human features.
* Batrachomyomachia genre by using epic conventions for a rather non-heroic story: a battle between mice and frogs.
* Batrean women that are just this side of mind control. Luckily, not only are most Batrean women nice people, but the pheromones can be countered by wearing nose plugs.
* "Bats About You" was sung by a young couple at the graduation dance in the
* "Bats!", a camera zoom at the end reveals that she still has a hint of fangs.
* Bats and Thomas Elliot/Hush have this going as well. The two were childhood friends, but Tommy's mother would constantly tell him to be more like Bruce, which annoyed him. Eventually, Tommy tried to murder his own parents (his father was abusive) and gain their fortune, but Bruce's dad saved Tommy's mom, which he never quite got over. When Bruce's parents later died, Bruce went around travelling the world and living the life Tommy wanted to live, while Tommy was stuck at home caring for his now frail mother. After his mother tries to cut Tommy off from the fortune, Tommy kills her. He leaves for med school and to travel the world soon after, and when the Riddler eventually tells Tommy that Batman is Bruce Wayne, he tries to ruin his life on a consistent basis.
* Bats are definitely the losers in the "real life giant flyer" competition, as even the largest living flying fox species' wingspan is 1.7 meters at most. Fossils of Eocene bats of approximately flying-fox-size have been found, but as yet there are no specimens with sufficient wing bones to tell us if they exceeded that scale. Weirdly enough,
* Bats are the most common fauna of the Realm of Shyish, ranging from swarms of regular bats to the monstrous Fell Bats. These bats are often afflicted with the Soulblight curse turning them into bloodthirsty hunters who accompany the armies of the Soulblight vampires.
* Bats, but still you have to wonder why the protagonists accepted that justification so well...
* Bat Scare: Characters are exploring an environment void of other people but where animals are present, then a group of flying animals fly out, scaring them.
* Bat Scare: When characters who are exploring an apparently-deserted location unexpectedly disturb a colony of winged animals.
* bats dangerous, you're more likely to be bitten by a rabid dog due to bats being nocturnal and encounters with them being quite rare.
* batshit-craziest of the Buus, and pretty much 95% of his dialogue is either grunts/screams or deranged laughter to show just how far off his rocker he is.
* batshit insane, and they all involve raucous laughter and/or smashing ribs.
* Bat Signal: A means of summoning a superhero by shining their insignia into the sky.
* Bats in fiction often suffer the same problem as pterosaurs: being depicted as bipedal instead of quadrupedal like in real life. They will also sometimes lack the thumb on their wings or have three small fingers similar to a pterosaur.
* Bats, it is revealed that Dr. McCabe created the bats with the specific intention of killing people (rather that is being an accident as he originally claimed). He is killed attempting to communicate with them.
* Bats, it turns out that the only bunch of people crazy enough to fund Dr. McCabe's research was the U.S Government searching for a bio-weapon to unleash on their enemies. The government agent that tells so (to the lieutenant in charge of the detachment sent to hunt the bats) even does it with a matter-of-factly "yeah,

we did it".
* Bats, leaving the main characters to do the job. The government operative that went with it is also perfectly aware of the project that made the bats omnivorous and homicidal, delivering in a matter-of-factly "yeah, we did it" when confronted about it.
* Bats, Sheriff Emmett Kimsey is not well-equipped to deal with a horde of killer bats, but the people of his county is under threat and it is his duty to protect them.
* Bats: Sheriff Kimsey turns out to be a fan of opera. He even lampshades that it'd make him lose points as a badass if anybody else in town knew it.
* Bats, the intelligent, omnivorous, killer bats were the result of genetic experimentation by a rogue scientist. Had the movie been made 30 years earlier, it's easy to imagine they would have the product of atomic tests in the desert.
* Bats. Their wings are actually made up of extremely elongated fingers, which nowadays are all but unrecognizable from what they once were. On a less extreme level, the now extinct pterosaurs had wings supported by elongated
* Bats uses a home-made flamethrower to (quite gleefully) burn several bats when they come to attack the school the heroes turned into their headquarters.
* Bats was coming out. They had the "Bat-Ass of the Week", which made no sense at all.
* Bats!. When Applejack sings about them they are drawn as hideous buck-toothed gremlin things, and when Fluttershy sings about them they're drawn as fluffy and cute. Applejack sees them as monsters because of the threat they pose to her farm and livelihood, while Fluttershy sees them as cute because she sympathizes with them.
* Battal Gazi, is filled to the brim with sword battles. The titular protagonist notably uses a sword to kill over 100 enemies per film.
* Battalion, actually nicknamed "the Drill Sergeant from Hell", from the
* Battalion Wars, a handlebar moustache is a matter of regulation among Anglo Isles veteran infantry, and by gum do they wear it with pride (though it's noted that a bazooka veteran should be careful to not grow his moustache longer than 4 1/4 inches or it's likely to be singed by his weapon's exhaust).
* Battalion Wars features a good guy version — the Doomsday Weapon used by the Solar Empire to put an end to the Iron Legion in the game's backstory.
* Battalion Wars features Grunts and Heavy Weapons specialists of various types for infantry, and recon, Light and Heavy Tanks, specialized vehicles such as Anti-Air and Artillery, and Multipurpose Fighters and Bombers. It also includes a Supertank in the Battlestation and a Flying Fortress for many factions. The sequel adds naval craft as well.
* Battalion Wars good at ship-to-ship and ship-to-shore combat, they are almost helpless against air and submarine attacks. This makes escorts absolutely crucial to getting the most out of your Dreads.
* Battalion Wars has the Xylvanians, who are a cross between WWI Germans, Nazis, and, of course, vampires.
* Battalion Wars series of games are chock-full of references to nearly everything under the sun.
* Battalion Wars's unit dossiers, a Tundran battleship's political officer is also its head cook. Naturally, his having control over the quality of the food means the sailors never step out of line.
* Battalion Wars takes it a step further with the Battlestation, a small Land Battleship.
* Battalion Wars that devastated units in the air and on the ground alike. Other nations' AA units are inaccurate against ground troops for various other reasons — for instance, Tundran Anti-Air missiles use a dated tracking system.
* Battalion Wars; The Xylvanian Kraken-class Dreadnought sports incredible size and a pointed, titanium-tipped prow, but is noted to be "relatively ineffective when used to ram other naval units."
* Battalion Wars to world shattering effect? Drop it off a cliff. Problem Solve- oh wait, the other villains are now looking for it. Oops.

* Battalion Wars' Xylvanian Iron Legion. They even went so far as to make the already terrifying flamethrower emit a maddening, shrill wail.
* Battat Colossale Carousel Bells, a spinning children's toy with chromatically-tuned bells in his percussion duet composition "Paper Covers Rock."
* "Batteries", as Ryuuko is noted to be a stripper and a prostitute but, generally, the story treats her as a flawed but complex person with issues who resorted to those things to provide for herself. Likewise, the other characters see her someone as who needs help and really wants to help her, worrying about her well- being, and, like Satsuki, would like her to come home, while Nonon goes so far as to call her "the Hoe" in one chapter, to which she's called out on.
* "Batteries" mentions prostitution (and stripping), as Ryuuko did strip and sleep around for money and, later, Satsuki was mentioned as to have worked in a red light district, however, we don't know specifically what she did (we do know she didn't sleep around or strip). From what's implied, Ryuuko is living in or near a red light district, as she's mentioned to be staying in the "shitass part of Tokyo", which, from what we can read, is probably closer to a Type 2 and a little bit of Type 3.
* *batteries not included can not only fall in love with each other, they can even procreate.
* *batteries not included, Harry has Little Guy and won't let him go, and the parents keep zipping over their heads until he does.
* *batteries not included: The little robots can eat scrap metal and use it to build accessories for themselves, or even baby robots.
* *batteries not included was also executive produced by Spielberg, yet directed by Matthew Robinson.
* battering a person until they accept Nurgle's love is irrelevant to the affection he feels for them.
* Battering Ram, as its barely-above-melee-range gun is unable to target units (one upgrade gives it a Macross Missile Massacre against air units).
* Battering rams and screws: For knocking down or breaking through gates, and less commonly used on stronger points in the wall.
* Battering Rams deal huge damage to buildings, but only buildings. They're best deployed in large numbers to ensure some of them make it to the buildings thanks to their slow speed.
* Battering Rams, whose only functionality and purpose was to knock down walls. They were slow and heavy, and unless they were constructed with an outer shell, they were completely helpless against ranged and melee combatants. When carried by people, as opposed to supported by ropes or chains, those carrying the ram would be defenseless themselves, as both their hands would be occupied. In spite of these drawbacks, they continue to be used by modern-day police forces and fire brigades to enter locked doors; the latter even benefits from being used in a non-combat context, with the raw power of the battering ram only helping them in their goal to extinguish the fire as soon as possible.
* Battering Ram. They end up running all the way to the top floor, then fall out the window into a well.
* battery acid even said that it's probably the closest thing our galaxy has to hell.
* Battery has had an audio drama in 2000, a manga in 2004, a live-action film, a live-action series, and an anime.
* Battery Man, who, if one is still alive when the Minor Robot runs out of power, will remove itself from the battlefield to repower the Robot.
* Battery parks, inverted in that they started as bunches of really powerful weapons, then the ground that they were on/in later became landmarked parks.
* Battery's power relies on her staying still in order to charge up her speed and strength - so she gets an

* Battle Amongst the Flames, located next to a giant lake of lava on the (then-unnamed) Imperial capital world. McQuarrie wasn't involved in the prequels, having retired in the 1990's, but some shots on Mustafar are recreated almost entirely from his drawings.
* Battle Angel Alita, after Alita's climatic final battle with Zapan, her broken and nearly destroyed body collapses in the ruins of her former home... and she sees a single flower sprout, under a beam of sunlight, where she planted Ido's seeds days before.
* Battle Angel Alita after a ruined skyscraper falls on tuned Alita and company:
* Battle Angel Alita: Alita got these when she thought some thugs had killed Figure Four.
* Battle Angel Alita, and finished in 2014 with the sequel being far longer than the original manga.
* Battle Angel Alita and spins on all three axes like a gyroscope, turning himself into a giant whirling sphere of death.
* Battle Angel Alita are this — with their facial flesh included.
* Battle Angel Alita: A wide variety of new drugs are available, as is typical of futuristic dystopias.
* Battle Angel Alita contrasts the dirty, chaotic world of the Scrapyard with the sleek and clean Tiphares.
* Battle Angel Alita, despite the film including a lot of elements from the rejected OVA.
* Battle Angel Alita Desty Nova traps Alita in a VR simulation in which she's a normal, innocent girl and he's the scientist who rescued her from the Scrapyard, setting himself up as her father-figure. (As a nod to the original Japanese, Nova also gives her a different name: 'Gally'.) Nova's intention is that Alita's personality will be altered by the experience, and she'll find herself unable to kill him after he releases her from the simulation. However, this backfires in two ways — Alita recognizes that it's only a dream from the start and plays along, relishing the chance to briefly live a normal life; meanwhile, having genuinely come to love Alita as a daughter during his time in the simulation, Nova can no longer bring himself to shoot her in the real world. (Later in the series he becomes more-or-less a good guy, but his motives were always so obscure anyway that it's impossible to tell if it's a direct result, and he actually claims to have no memory of this incident due to the way he resurrects. He just backs up his mind and downloads to another body, but only backs up at certain time periods.)
* Battle Angel Alita does this a lot, although due to Alita being a full conversion cyborg the amputations or dismemberment are less than permanent.
* Battle Angel Alita, eventually extending her protection to the whole of humanity.
* Battle Angel Alita, features a 500 ton Jovian combat cyborg among other things armed with a miniature wormhole connection to the inner parts of the planet Jupiter. You may try to imagine the scale of destruction caused by the pressurized plasma-or-whatever-may-be-the-next-state-of-matter-after-plasma in there being released in a focused beam, but it's probably nowhere close.
* Battle Angel Alita features this sort of information on all sorts of props and elements of the Scrapyard.
* Battle Angel Alita had elbow blades during her Motorball days, and although they

later got mounted on a blade for a time, Gally later recovered them in their implanted form with her Imaginos body.
* Battle Angel Alita had shades of this very early on, though it was not a straight example in that Dr Ido saw Alita more as a daughter than a would-be bride. The protagonist's name in the original Japanese, Gally, is actually a refference to this.
* Battle Angel Alita has an important train whose escorts are given guns. Since having a gun of your own is a capital offense, they come with bombs that explode if they wander too far from the train.
* Battle Angel Alita has gladiatorial combat between giant cyborgs as one of the major entertainments in the Scrapyard.
* Battle Angel Alita has Motorball, a deadly high-speed sport where racers fight to carry a heavy motorized ball across the finish line. Between racers' attacks, track hazards, and the ball trying to wriggle free, the casualties come fast and bloody in that particular arc.
* Battle Angel Alita He recognizes this as evil, and potentially the wrong decision, and leaves behind a means to end the undying dictatorship he created.
* Battle Angel Alita is a noften very serious manga, with gory deaths and no character being safe from getting killed; however this doesn't stop it from constantly adding jokes or over the top elements. Even the normally very serious main character Gally/Alita has moments in which she cracks jokes, does silly things or accidently reveals that she is not as smart as she pretends. Last Order drives the point home when one character got heavily injured and the distraction to get him away results in a super sonic thumb fight between two martial arts fighters.
* Battle Angel Alita, is... well, not a cyborg, but a separate personality of another character who operates a drone body via radio waves; he maintains two different lower bodies, a humanoid one and a horse-like one, which makes him resemble a centaur when he uses it. It's a bit of a mystery why, since he's about twelve stories tall and attaching the two halves of his body is a big operation.
* Battle Angel Alita it has become the leading cause of death. Much like cancer and heart disease in modern times, it's said to be something anybody can die from. It's explained that before medical technology became more advanced, most people just died of other things first.
* Battle Angel Alita long to notice her admiration of Alita and start teasing her relentlessly.
* Battle Angel Alita — for example, the horses of the roundabout are real horses, pinned by the metal poles going through their bodies, but still living.
* Battle Angel Alita most characters only use flash step and attack just for fun or when they want to psych their opponent out. The more seasoned fighters instead mainly use attacks that are weak but come in large numbers and for the main characters, the faster the attack, the bigger windup it has. This is especially apparent in Alita's fight with Gavit of Gadokai where he effortlessly BLOCKS her when she fires off a supersonic punch noting that with a windup that she has for it, he can easily just absorb the kinetic force.
* Battle Angel Alita on his readers, but it's still not the most elegant arc of the series.
* Battle Angel Alita) or Nova Pod (AKA Porta-Nova), can fit this trope pretty well.
* Battle Angel Alita's leading characters Ido and Alita are both bounty hunters, along with half the cast in the early books.
* Battle Angel Alita's titular character's new Imaginos 2.0 body (and accompanying outfit) comes with a cat tail... which she proceeds use to knock out three different characters at once.
* Battle Angel Alita, the name of the sport is rendered in English as "Moter Ball", and the name of Alita's manager, Esdoc, as "Esdog" (even managing both mistakes in one case - "Esdog Moters"). This was corrected in the flipped Viz releases, but left untouched in the later unflipped Kodansha releases.
* Battle Angel Alita. They are of the cyborg variety of super soldiers.
* Battle Angel Alita the young girl Koyomi, moved by Den's tirade against Tiphares' callous treatment of the surface dwellers, stands in Alita's way as Alita is

prepared to finish Den off. Koyomi declares her intention to join Barjack, and Alita, still remembering Koyomi as the orphan baby she rescued, decides to leave. Den is amused that he was rescued by someone so small and he welcomes Koyomi to Barjack.
* Battle Angel Alita to disagree with him, no matter how extreme his actions are.
* Battle Angel Alita) TUNED body, it was easily masculine enough to be confused for male, especially considering the manga's art style. Compare and contrast with the twins, who, despite having the same series TUNED bodies, are easily identified as females.
* Battle Angel Alita universe, or at least the region where the story starts. Quite common elsewhere.
* Battle Angel Alita uses a calendar dating from the launch of Sputnik in 1957 AD.
* Battle Angel Alita uses a rocket hammer (it accelerates during the swing).
* Battle Angel Alita uses backwards-pointing blades attached to the "künstlers" forearms.
* Battle Angel Alita uses this early on, except with cyborg spines, which are probably much more removable than any human organ.
* Battle Angel Alita was a huge success; it was translated into English and became a must-read manga classic for people getting into the genre. The sequel is nowhere near as successful and only survived mainly because of dedicated fans of the original giving it a cult following.
* Battle Angel Alita, when Alita is surrounded by enemy covered by smoke bombs, Lou sends the location of her assailants and booby traps which superimpose on her vision.
* Battle Angel Alita, when Alita jacks into Melchizedek her avatar has jet-black skin but glowing green hair and cybernetic markings.
* Battle Angel Alita When she demands that Desty tell her where he is, he casually tosses her a head-sized metal box and tells her to take a look for herself.
* Battle Angel Alita, where the action goes into space, there are guns galore.
* Battle Angel Alita, which has both characters with cybernetic bodies and human brains (like the protagonist) and ones with human bodies and cybernetic brains, explores this sort of question a lot.
* Battle Angel Alita, with the distinction that it's set in a far off future in which Earth is barely recognizable.
* Battle Angel Alita, Zalem (Tiphares) is at the bottom of a space elevator.
* Battle Arena. Their attack patterns are fairly simplistic, but they make up for it with fast attacks that can easily shut down approaches if the player isn't quick on the draw.
* Battle Arena Toshinden 2 prints Eiji's special move list twice: once on his own page, and again on Sofia's page. This had the odd habit of moving the move lists of all of the odd-numbered characters back two pages, leaving newcomer Chaos without a list to call his own (his page shows Gaia's moves).
* Battle Arena Toshinden. According to the manual, he's 103 when the first tournament starts.
* Battle Arena Toshinden ends with a generic "you win" message following the defeat of Gaia. But if the player makes it all the way past Gaia on Hard difficulty or above without losing a match, the battle with Gaia is followed by a battle with Sho, followed by a character-specific ending after Sho is defeated.
* Battle Arena Toshinden for the chainsaw-wielding David is Judgement, a former childhood friend who has now become this trope.
* Battle Arena Toshinden is largely forgotten and disliked by those that remember it, with the game being held up as a prime example of style over substance. Illustrating the game's fall from grace is EGM's (the authors of the 100% review mentioned above) statement in its 2005 "most overrated game" feature:
* Battle Arena Toshinden's decision to develop it for the PlayStation over the N64 playing a huge role in Sony's victory over Nintendo during the 32/64-bit era. The system's sheer number of killer apps is the main reason it was able to take the video game throne from Nintendo in the mid '90s.
* Battle Arena Toshinden's intro sequence has sequences with Eiji, Ellis and Sofia

portrayed in live-action.
* Battle Arena Toshinden (which explains the outfit she's wearing) and uses a whip as part of her profession, as well as in the ring.
* Battle Arena Toshinden, which was only released in Japan and Europe) were kept in Japanese.
* Battle Armor are banes to unarmored infantry. Clan Elementals are 10 ft juggernauts capable of surviving hits from mech weapons, and will easily mow down infantry with flamers, machine guns, and anti-personnel weapons (typically a sub-machine gun of some sort). Some suits also mount fearsome infantry-killing melee weapons like
* Battle Armor, or whatever, but also gain enhanced reaction time with your machine. Of course, the human brain wasn't intended to interface directly with technology, so they burn out your brain in only a few years. Of course, the Clans, especially the Crusaders, are pretty much built on Death or Glory, so they don't really mind.
* Battle Assault of the Zeta) and a plotline centering on Heero Yuy kicking everyone else's butts to bring peace.
* Battle Athletes to themselves). All of the aforementioned excesses are utilized for track-and-field games such as Lacrosse, half-mile runs and triathlons that have not changed much (if any) from what we see in the modern-day Olympics.
* Battle Athletes, with the manga being more upfront with its Girls Love than the two anime series.
* Battle at Martian Orbit. In later novels, this practice pretty much ceases to exist, as shields make missiles (even nukes) largely useless in space battles.
* Battle Aura, at which point they become even deadlier, and fight until either they're dead or everything else that might be considered an enemy is dead.
* Battle Aura, Frieza's is blue, but it's sometimes purple when he fights with 100% of his power.
* Battle Aura from others with her special technique, but can, by holding her hands in front of her face, forefinger and thumb tips pressing, also expel the gathered energy as a crackling meteor of electrical energy, a move she calls the Happo No Yen Coin Return.
* Battle Aura that corrupts and takes control of anything it touches, so when Shirou tries to attack him with weapons, he simply takes control of them before they can hit him and adds them to his arsenal.
* Battle Aura to illuminate their surroundings. Some, like Solars and Lunars, have it easier than the others.
* Battle Aura wanna take a hit from it, trust me.) can do horrible things to you.
* Battleaxe Nurse in the book and a tender-hearted, friendly woman in the series.
* Battleaxe Nurse: The nurse is cruel, cold, and overall not very nurselike.
* Battleaxe play "decoy" to lure away anti-ship missiles from their respective ships, after it was determined that the Soviets were focusing on the escorts to make the job easier for other Soviet forces to get at the convoys the escorts were defending.
* Battlebabes that protects them from harm when unencumbered; the actual rules are Armour +1 when wearing normal clothes, and Armour +2 when naked or nearly naked.
* Battle Ballgown: An armored dress would rarely work well as armor or a dress.
* Battle B-Daman had a similar premise, based on increasingly ludicrous games involving marble-shooting chibi robots.
* Battle B-Daman launchers cause some pretty painful (if minor) injuries in the anime. Real life versions can put an eye out under certain circumstances.
* Battle Bears act all kind but don't fall for their facade, or they'll hug you so hard you get crushed to death.
* Battle Bears huge that you can only see his large legs in the first phase of the boss, and even when he picks you up, you don't even see his entire arms.
* Battle Beasts figures were like this, with their cybernetic armor sporting crotch fins, guns, sliding panels, or just highly suspicious protrusions.
* Battle Beneath The Earth a renegade general who'd already set up nukes under Beijing.

* Battle Beneath the Earth to the soon-to-be-demolished-with-atom-bombs United States.
* battle between Cinder and Jaune, where Jaune is stabbed and fuses with a sword,
* Battle Beyond the Stars. After delivering his ultimatum to the peaceful world of Akir, Sador orders his crew to murder a few of them just to drive his message home.
* Battle Beyond the Stars collects limbs from people he killed - and use them to replace his own. This comes back to bite him when one of his victims was a member of a hivemind who could still control the arm and tried to strangle him.
* Battle Beyond the Stars) features a weapon called the "Stellar Converter". It appears to be exactly what it says on the tin, in that when the villain uses it, the weapon appears to ignite an inhabited planet into a small white dwarf star.
* Battle Beyond the Stars Gelt (who's only there because he's hiding from everyone else).
* Battle Beyond the Stars, he's now going to feed her to an alien who's purchased her body for more carnivorous purposes.
* Battle Beyond the Stars into letting him escape. She orders the android with them to step into the "captor grid" that guards the door, causing it (and the poor android) to short-circuit.
* Battle Beyond the Stars literally shined before being destroyed, due to whatever material it was made of.
* Battle Beyond the Stars needed for this job. He is also the only character in the whole movie who is actually from the planet Earth...
* Battle Beyond the Stars proudly tells everyone he's from Earth but no one has ever heard of it.
* Battle Beyond the Stars rather than any particular desire to live the simple, agrarian life. They seem perfectly comfortable about the one spaceship they do have, and the other spacecraft and aliens who come to their aid.
* Battle Beyond the Stars responds to Sador's demands by returning his emissary as a jar of powder. A furious Sador destroys their entire planet to encourage the others.
* Battle Beyond the Stars. Sador promises to return in "seven risings of your red giant" sun to the planet Akir to plunder its harvest for his army. Of course that does equal an arbitrary measurement of time we humans call a week.
* Battle Beyond the Stars: Space Cowboy is a character like this, down to his broken-down cargo ship with a Confederate flag on the hull. He even watches old westerns on long hauls, and plays the harmonica. He's delivering a cargo of hand weapons, albeit legally.
* Battle Beyond the Stars), Space Cowboy's (which roughly resembles an overgrown Lunar Landing Module), Gelt's (which resembles a flying manta ray), and Cayman's (which has a design that makes it look like a flying mouth).
* Battle Beyond the Stars that dispenses Scotch, soda and ice; identifying to the girl he's with that he's drinking a Scotch and soda. Later, upon realizing that he can't flee because Sador's spaceship is already too close for a ship to leave the planet undetected, he pours straight Scotch.
* Battle Beyond the Stars. The Malmori ground troops have a Sonic Tank that causes the Akiran defenders to bleed through the ears. Fortunately two of the aliens defending the planet are from a species that communicates via heat, not sound, so are able to get close enough to destroy the tank.
* Battle Beyond the Stars who use the opportunity to attempt to assassinate Sador by using the hand to grab a knife and slit his own throat. Sador's doctor is forced to chainsaw the arm off without waiting for anesthetic.
* Battle Beyond the Sun Russians as the antagonists and conveniently allowing all the Russian characters to have Anglicized names (yet weirdly, American-sounding accents rather than Antipodean ones).
* BattleBlock Theater. Naturally, nothing of this makes any sense at all, despite what the narrator says.
* BattleBlock Theater. Since the game is presented as a cutout puppet-show in the cutscenes, there are often references to terror and horror (along with warnings) followed by totally underwhelming visuals.

* Battleblock Theater. Unusually, they don't actually harm you if you do this, and this feature is actually necessary to progress through the levels.
* "Battle Board": Players surf along an artificial watercourse, using magic to propel their board against the current and hinder other players. Direct attacks are not allowed, but things like making waves and temporarily blinding opponents with light magic are. Whoever completes three laps first wins.
* Battleborn Alani is capable of glowing her eyes and the tattoos on her body in a manner to certain bioluminescent deep sea fish.
* Battleborn Applies, Although Ambra in particular would like to remind you to WASH your FILTHY HANDS.
* Battleborn are all grown from within vats and come out as fully adult soldiers ready to be quickly trained and then deployed into battle.
* Battleborn are the aristocratic merchant class of the galaxy at the end of the universe. They are the money and manufacturing arm of… well, everything that is left. They are makers, and bankers, and entertainers, and traders, and sellers, and inventors, and war profiteers. Their ingenuity is only surpassed by their desire to turn a profit.
* Battleborn. As such, his holographic skull is huge. During the last phase of the boss fight, his robot body implodes and he's reduced to to simply a huge holographic head.
* Battleborn called the Fortune's Favor, a massive capital ship which serves as both Reyna's home and the head of the Rogue fleet when it needs one.
* Battleborn consciousness first gained sentience over a million years before. They are thus in a sense the oldest living being in the entire Battleborn universe having even been sentient during the time of the ancient precursor Aztanti civilization.
* Battleborn. Considering they look like vampires, are a extremely long-lived race with certain members being at least 20,000 years old, and drawing their vitality from life-force and blood, it pretty hard to argue they aren't.
* Battleborn decided to drain Alani's freshwater ocean planet of Akopos for a Jennerit reservoir fleet.
* Battleborn. Even another piece of lore of his seems to imply this as it mentions him having fought an Ankrosa warrior, something stated to be nearly thrice his size, and that some had described him as an angry hornet.
* Battleborn faced a number of robotic revolutions. Fortunately these were solved through tentative, but profitable, peace negotiations. Since then, they have accepted and recognized artificial intelligences (known as "Magnuses") as equal members of their society. Now, the faction is split nearly equally between humans, Magnuses, and hybrids of the two, and they have avoided additional robot revolutions for nearly two centuries.
* Battleborn. Fortunately, though, he was able to eventually squeeze back to the top.
* Battleborn. Free Trial is basically all of the game's competitive multiplayer modes made free to play accompanied with all the character and account growth and progression one would find in the full game. Free Trial players have access to a subset of the game's playable heroes through a rotating roster of six that changes weekly but can unlock heroes permanently from the in-game Marketplace using Credits earned while playing matches, or through Platinum premium currency. Not all aspects of the game are available in Free Trial however and requires upgrading to the full game. Upgrading to the full game unlocks all 25 base characters, all eight Story Mode missions as well as the Prologue, and permanent access to private matches. Upgrading also carries over all player progression stats earned from Free Trial.
* Battleborn has DLC character Ernest, a pudgy pink bird of the military-themed Peacekeeper faction who serves as the demoman of his faction. While he uses primarily explosives in his kit, he also has some support options with his Power Egg, which buffs allies around it.
* Battleborn has her rapidly spin her entire head around 360 degrees while sporting a very nightmare inducing face in a very horror movie way.
* Battleborn has his Battle Throne, MK. 1, a hovering high tech chair that he

prefers to ride around and deploy his gadgets from rather than walk and get his hands dirty.
* Battleborn have a massive moon-sized starship called the Exodus which houses the Sustainment Engine and massive power facilities capable of storing energy from other planets like Tempest the Jennerit throneworld for use in Sustainment. Despite its massive size, Exodus is capable of faster-than-light travel and often moves from planet-to-planet to collect vast amounts of energy to power Sustainment procedures. Many of the Sustained and those worthy of being Sustained live aboard Exodus, though some still reside on Tempest.
* Battleborn have a strong appreciation for warfare and martial combat. As a society, they venerate warriors of all stripes and participate widely as a culture in observing the events held within the numerous Jennerit Fighting Pits found on almost any settled Jennerit world, both within the lower settlements and the floating cities of their throneworld of Tempest.
* Battleborn have different aesthetics when it comes to their technology.
* Battleborn immortals but also grants them immunity from natural illnesses.
* Battleborn. In "The Renegade" level however, you have to protect Caldarius from waves of enemy minions while he is recharging his power cells. During this time he is immobile and unable to defend himself.
* Battleborn is making money. The faction only does anything as long as a profit could be made. It's the reason why the LLC split from the UPR for "Where's the profit in defending every sentient race if we can't sell our drones to everyone left in the universe?" It's so much so in fact the only reason the LLC's against Solus being darkened is that it no longer existing means no more profit. While they certainly wish to preserve the universe, if it were to come to a sudden and dramatic end however, the LLC would be the group selling tickets to the live stream to watch the last battle.
* Battleborn is more than a challenge. As a playable character, he's just on par with the rest of the Battleborn. The downgrade's justified though as the giant robot body he had as a boss was destroyed in the battle and he was given a new body.
* Battleborn is one. A lore challenge of his reveals that he had deserted his post in the UPR. The report states that he should be considered ARMED and DANGEROUS and ANGRY. For this, he was given a bounty of 589,000,000.00 credits. Considering that he joined Reyna and the Rogues who despite their desire for freedom tend to sometimes engage in questionable acts such as space piracy, the caution is warranted.
* Battleborn is one of the hordes of Jennerit Thralls that commonly swarm against the eponymous Battleborn on the battlefield. Due to opposing the game's villain Rendain and being a Battleborn himself however, he's this.
* Battleborn is the training boot camp that all Mike clones must go through upon "birth". Consisting of a series of arena style battles, the Battle School must be completed before Mikes can be deployed into battle proper. In order to rejoin Mike society, Oscar Mike's trial is to go through the Battle School again. Due to General Mike exercising his Clonestitutional right to bureaucratically make things more difficult than necessary, Oscar Mike has to go through the Battle School 10 times.
* Battleborn is this. Some cataclysm fractured the planet several thousand years ago. While still basically spherical, huge geological chunks of the planet are separated from one another, exposing the molten core of Ekkunar. The brightest scientists in the remaining universe are still trying to ascertain why the planet hasn’t flown apart or settled back in on itself. The best guesses still fall back to near mysticism, citing the universe-law-bending Varelsi or some arcane machinery of Ekkuni Dwarves.
* Battleborn is Toby, a small penguin whose adorableness cost him the ability to be a soldier in the UPR. So he built a personal mecha to get revenge and make sure no one ever calls him cute again.
* Battleborn known as the Battleborn to stop the Varelsi and save Solus.
* Battleborn-like alien race which the main antagonist of the DLC Toby's Friendship

Raid belongs to.
* Battleborn-like canisters, and large shard crystals as well as occasionally as dropped loot from defeated enemies. In missions, the large shard crystals tend to used to power obstacles which open up once said crystals are destroyed. When enough shards are obtained, they can be used to purchase turrets, traps, and drones; activate gear; and in certain Multiplayer modes, buy more powerful Minions. In The Void's Edge, they can be used to give Wolf a temporary upgrade from among three options with one upgrade per person.
* Battleborn, many of it also resembles like it's made out of ancient stone structures and such. This is best seen with the ancient but still functioning tech of the Aztanti, the ancient precursors of the Eldrid. While Eldrid tech as these on the surface look ancient and primitive, they are actually quite advanced if not much more than others due to being several millennia old. This look pretty much aligns with the Eldrid's philosophy with being one with nature rather than imposing on it.
* Battleborn, one of Ambra's taunt animations has her performing the Egyptian mural inspired stance. The name of said taunt, "Walk Not Unlike an Egyptian".
* Battleborn, Orendi's discipline hearing in one of her lore challenges was presided by a Magnus named Gendarme. The hearing however ends up as a chaotic mess as Orendi immediately starts attacking everyone and everything upon entering. As Orendi causes more and more damage, the Hon. Gendarme becomes too preoccupied with updating on the fly the growing list of charges against Orendi to do anything else. The recording of this incident then comes to an end with Orendi having destroyed Gendarme's remote access node.
* Battleborn provides and sells the robots, turrets, and other weapons the other factions use.
* Battleborn, Tempest the throneworld of the Jennerit Imperium is an artificially tidally-locked planet, set in orbit around the star, Solus.
* Battleborn, the bones and fossilized scales of enormous dragons frozen eons ago litter the icy moon of Bliss.
* Battleborn, the Detritus Ring, the asteroid belt home of the Rogues has asteroid mining going on. In particular is Chunk Braxon III which is a major mining base on one of the larger chunks. They produce some semi-rare ore used in manufacturing of robots that gives Minion Robotics (and therefore the LLC) a stake in protecting the colony. Enough wealth flows through this colony that many notable Rogues frequent here as a mainstay of embezzling, theft, and other dips into the LLC cash flow.
* Battleborn, the Jennerit have a process called "Sustainment" which makes a being all but immortal. Discovered tens of thousands of years ago by Empress Lenore, the process involves harnessing the dark energies of the universe and using the Sustainment Engine, a device housed in the massive moon-sized starship Exodus, to expend enormous amounts of power in order to make a single being an immortal. This however is extremely energy-expensive, consuming stored energy on a planetary scale just to alter one being. Therefore, Sustainment isn't done often and candidates for sustainment are vetted through a rigorous process before finally being approved by the Empress herself. What's even rarer, and quite unusual, is when a member of a non-Jennerit race is allowed to become Sustained.
* Battleborn, the upper castes of the Jennerit live in floating cities above the Jennerit throneworld Tempest's surface, collectively known as the "Echelon." Here, visitors can view the opulent artistry of the Jennerit culture, featuring ornate gold and red spires and spikes among the spacey-gothic architecture.
* Battleborn, the various Mike clones are grown and kept in large glass vats before being "born".
* Battleborn, thinks he's an actual superhero. Specifically, he was originally designed by Phoebe to be a childcare providing robot, a thing that came about from the lack of a proper playmate in the rich heiress' parental affection deficient childhood. During Kid Ultra's initial startup sequence however, the connection to the Magna Carta was severed leaving him no external reference or personality data banks to draw from. He thus instead drew info from the only other available source, the marketing-approved entertainment holo library pre-loaded into his memory which

contained over 60,000 cartoons, comics, movies, and video games intended for placating and educating children. As a result, he thinks he's an actual superhero in a cartoon universe.
* Battleborn. This is best seen in the second and third chapters of the web motioncomic where the UPR's bureaucracy causes problems such as not giving supplies immediately, and almost killing Rath and Ambra in the respective chapters.
* Battleborn, this is the case for the Mike clones. As they were originally designed to be rapidly made and deployed onto the battlefield, Mikes come out of the vats they were grown in as fully adult clone soldiers. While it's efficient given what Mikes are, a slight consequence of this though is that clones such as General Mike have never even seen an actual baby before.
* Battleborn to a point that only one star Solus is all that remains in the entire universe.
* Battleborn uses smoke bombs to attack enemies and instantly cloak himself. Said smoke bombs also happen to deliver poison damage.
* Battleborn Varelsi darkened its sky. The last remaining bud of this massive organism, Miko, now serves as a member of the Battleborn.
* Battleborn was somehow able to broker an alliance with them in order to save his people the Jennerit from the Varelsi's onslaught as he came to the conclusion that the complete heat death and darkening of the universe was inevitable.
* Battleborn was the most far-reaching civilization in existence. The star-spanning empire was originally ruled by Empress Lenore and fought against the Varelsi. That was until the Empress' right-hand Lothar Rendain led a coup against her, feeling that it would be better to join up with the Varelsi instead in order to survive. The coup resulted in the darkening of the Jennerit's then throneworld of Jennar and everyone on it, including the Empress Lenore. With that, the Jennerit Empire under Rendain was renamed the Jennerit Imperium. Although Rendain had seized power, not everyone within the empire decided to abide by his regime as evidenced by a growing resistance that's been rising throughout the Jennerit Imperium.
* Battleborn was the single most important part of the LLC's entire heavily technology based society that kept everything running smoothly. It's creators barely understood what exactly they created and as far as lore goes, made no contingency plans or backups in the event should something happen to it. As such, when this cornerstone that the entire LLC heavily depended on just suddenly went dark, everything went wrong.
* Battleborn wears a dope pair of sneakers for sneaking. Said sneakers have a subtle squeak regardless of terrain.
* Battleborn which aids her when fighting; and a cybernetic implant which allows her to telekinetically control four of her five rapiers. She's also a skilled roboticist, having been the brains behind her fellow Battleborn Kid Ultra's original design and purpose.
* Battleborn who's the titular group's ship. She typically uses a holographic blue skinned female avatar when talking to characters. Although simply a ship AI, in the pre-mission briefing of The Saboteur mission, she mentions wanting to being put in a robot suit.
* BattleBots' 2018 competition, the Icewave vs. Vanquish battle ended with Vanquish literally ripped in two after a particularly strong attack from Icewave: Its wedge, top, left two wheels, and the parts connected to them were separated from the rest of the robot. Jack Tweedy, captain of Vanquish's team, said that this was due to some weak welding he discovered later.
* BattleBots and were never shown on TV, while Dr. Inferno Jr. and Son of Whyachi proceeded to become champions and wound up being a lot more recognizable among fans of combat robotics.
* Battlebots: Aside from the ones equipped on some robots, there was the BattleBox's own Pulverizers.
* BattleBots, but got brought back by CBS College Sports in December of 2009. It then ended up getting uncanceled again, getting a six episode revival series on ABC, beginning on June 1st 2015.
* BattleBots, ComBots, and Steel Conflict due to their versatility and durability:

Because there are weight caps, weaponless robots can allocate all of their weight to pushing power whereas other bots need to set some aside for weapons, which gives them the advantage for when their opponents' weapons invariably break down. This allocation also tends to give weaponless robots the edge in speed and maneuverability, rendering many weapons useless against them as they can drive circles around their competitors. For instance, by ComBots V's semifinals, Last Rites was the only remaining robot that had a weapon, and even then, its operator also registered The Great Pumpkin, a weaponless robot, into the competition, which did almost as well.
* BattleBots competitors have chosen to equip their bots with weapons that can only be used once per match:
* BattleBots contestants, who thus had more of a vested interest in keeping the results of the competition close to their chest.
* BattleBots: DUCK! had its entire "face" (= front plow/shield) ripped off by a massive hit from Cobalt in the show's second Discovery Channel season.
* BattleBots entry Chomp, which as a walker is a marvel of engineering, but it is slow, the power source (compressed air) barely lasts for a 3 minute match, and even a moderate dent in the skirt protecting the legs (such as by any vertical spinner) presses against the leg, rendering it useless.
* BattleBots featured a 12-year-old driver who made it to the lightweight quarterfinals because his video game experience allowed him to be one of the best drivers at the event.
* BattleBots is only possible in certain, relatively small areas. This has been executed at least once, with Wrecks's gigantic saw sending Witch Doctor flying into the air and landing in one of said small areas.
* BattleBots is perpetually in this mode during a match. HyperShock is blindingly fast and maneuverable, able to run circles against most other robots. However, its mechanisms are so strained while doing this that HyperShock rapidly destroys itself from the inside and will become inoperable long before the 3 minutes of a match are up. This is a known weakness of it; builder Will Bales always seeks to defeat the opponents before that can happen and is ready to make repairs on HyperShock to get it back to full working order before its next scheduled match.
* BattleBots knows that any weapon that cannot strike low will be useless there too.
* BattleBots Not only that, but said vertical-spinner (Nightmare) was originally going to do a quick spin right before impact, but the Hell Razors popped up the wheels.
* BattleBots reboot. The name also doubles as a play on builder Jonathan Juarez's last name, making the "Ju" to "W" switch part of this trope too.
* BattleBots, rendering Bite Force's spinning drum useless less than 10 seconds into the match.
* BattleBots season had the commentators demonstrate how powerful these weapons actually are by having them attack normal, everyday objects to show the force they actually carry. For instance, the Pulverizer hammer is 100 pounds (about 45 kilograms) and is shown to smash a VCR into shards in one hit, even though the robots have such good defense that the hammer just bounces off ineffectively.
* BattleBots seems to be an unintentional example. More often than not, something happens in Lucky's fights that causes it to break and stop working, whether that be the opponent's weapon managing to hit a 2-millimeter gap that disables its wheels or unexplained malfunctions that never came up during pre-match testing. As the unofficial blog puts it:
* BattleBots that, in anticipation of this happening, numerous bot-builders soon installed in various means of getting their robots back upright after being turned upside-down, ranging from flipping arms and panels of their own, angled rods on spinners to tip them back over via centrifugal force, swinging axes and hammers strong enough to push the body back to normal, to arc-shaped metal cages so they can roll back upright on their own. Since there is a weight limit to these bots, installing a srimech onto a robot means a sacrifice to its speed, power, or defense, but getting overturned is so common that most consider it worth

installing.
* BattleBots, with nearly all of their weaponry limited to flamethrowers to maintain balance and none of them so far having any meaningful effect on the battle except getting struck down and destroyed (with one possible exception, but it's ambiguous).
* Battle Brawlers, the battle didn't take place in a pocket dimension, even on Earth, leading to a lot of post-battle destroyed buildings.
* Battle Brothers has the player running a mercenary company in a low fantasy medieval setting. The player can seek out and negotiate contracts including acting as animal control for villages, fighting the undead and other monsters, hunting bandits, or augmenting military forces in conventional warfare.
* Battle Brothers, keeping your mercenaries in a formation is essential to victory, as your men getting surrounded will quickly get them killed. This is especially useful when you have shields, as they allow your frontline fighters to form a shield wall, which boosts defense for both themselves and for adjacent allies who are also forming a shield wall. A disciplined formation is actually the best way to win against far less disciplined and haphazard opponents like barbarians and undead.
* Battle Brothers of medieval Holy Roman Empire and medieval Arabia/Persia) fighting each others for the control of several holy sites.
* Battle Brothers than helping the peasants, violent death is a regular occurrence and the only kind of magic is vile necromancy. You might not save the world, but you might be able to save enough coin to retire comfortably.
* Battle Brothers that used to rule most of the known world, before it expanded too far and its nobles discovered the necromantic traditions of the southern cults, and preferred to preserve themselves as vampires in charge of skeleton legions over preserving the empire itself. All of these skeletons might have low actual health, but they also suffer no bleed damage, no bonus damage from head strikes, only 20% ranged damage and 50% piercing damage (since arrows rely on bleeding and organ damage to kill, which is irrelevant to them.) Like with real-life Legions, their weakest variety are lightly armed and armored Ancient Auxiliaries, most fighting is done by the proper legionaries, while Honor Guard are rare, but highly skilled and fully encased in the toughest armor.

* Battle Butler, clearly had a complex as well as mysterious past. And his present was none too clear either, WAS he the real Robin Masters?
* Battle Butler fights with a pair of retractable blades under his sleeves.
* Battle Butler is shown to adore cats of all types because "there is nothing cuter." It's later revealed that he actually picked up several stray cats and kept them in his wardrobe.
* Battle Butler — A fighting sidekick who is also employed by the hero as a servant.
* Battle Butlers are a cliché of British military tradition. A British officer in
* Battle Cats, one can find a temporary episode in December with Christmas themes where one actually fights against Satan dressed up as Santa, with each level mocking this.
* Battle Chasers. And besides, doing up covers for PSM resulted in faster, easier

paychecks.
* Battle Chasers: Nightwar in Harm's Way. The general difficulty level is higher, and there is a new "Mythic" difficulty for dungeons.
* Battle Chasers: Nightwar: You can find a magic one in the Deadheart dungeon. It has a small choice of routes for confronting an evil sorceress, and your choices determine your loot. You can only play it once per attempt on the dungeon.
* Battle Chasers: The last published issue begins Sebastius' flashback about his childhood idolizing his absent father, until his hero reveals feet of clay in two of the saddest ways possible:first, by having a child with another woman after leaving Sebastius and his mother behind. And then, by leading his men to slaughter everyone in Sebastius' village (including his mother), only sparing Sebastius to sell him as a slave (after taking the pendant that his mother orignally received from Aramus long ago — a pendant frighteningly like the one Gully keeps as a keepsake of her parents).
* Battle Chasers was meant to be Joe Madureira's magnum opus, spanning several years and hundreds of issues. However, thanks to his obsession with playing video games and, in the early 2000s, pretty much abandoning the industry to draw concept art for start-up game publishers, it petered out at about ten issues, with the final issue having a delay of about 1 1/2 years and ending on gigantic cliffhangers. A continuation had been promised, but going on eight years and beyond later it still hasn't materialized.
* Battle Chef Brigade is a platform action game with puzzle game mechanics presented as "fantasy Iron Chef".
* Battle Chef Brigade is such a massive spike in difficulty that many people have rage-quit the game over it, and the game needed to be patched to reduce her difficulty.
* Battle Chess 4000: The King stops a Rook by wanding it back into its standby position...Then a big one of these cranes up from behind the Rook and slams straight down upon the King. Checkmate!
* Battle Chess computer game was a comedic version of this, with animated scenes when one piece took another: The elderly king pulled out a gun and shot the knight, the rook turned into a stone-golem and ate the pawn, and so on.
* Battle Chess cutscenes were usually funny, though you'd almost never see them.
* Battle Chess show the queen in a much skimpier dress than in the actual game.
* Battle Chess, the Queen says this during her tutorial after defeating another piece.
* Battle Chess, the two pawns trade blocked swings on their pikes for a while before the capturing pawn has enough, throws his own pike on the ground and just walks up and finishes the other pawn with a right hook.
* Battle Chess, the unfortunate king is stripped of his robes from a couple of well-aimed sword strikes, covering himself in shame while the knight just laughs.
* Battle Chess when a pawn captures an enemy pawn. The former stomps the butt of his spear on the latter's foot, and after he hops around for a few seconds, gets stabbed through the visor.
* Battle Circle by Piers Anthony, the heroine is trapped in a Minotaur's maze. The hero goes in to rescue her. He finds her but they are unable to escape and the Minotaur is closing in on them. The hero remembers that the Minotaur is only interested in virgins and he can save the heroine's life by another means.
* Battle Circle Trilogy, Neq the Sword, the titular character has his hands cut off by bandits. The surgeon who he rescued at the same time agrees to replace his left hand with a simple prosthetic claw, and his right with a sword. Unfortunately, his bad temper, coupled with a sword permanently attached to his arm, wind up causing unnecessary deaths. He remedies this by welding a glockenspiel to the sword so that it would never kill again. !
* Battle Circuit: Cyber Blue fits the bill with balance in health, speed, and power. His power-up gives him and everyone else the ability for stronger attacks.
* Battle Circuit. You have to finish the game in one credit or get a high enough score.
* Battle Clash, and especially wants to add Mike's (or Carol's) to his stash as he

Since there was little left of Fry, Leela created a robot Fry. A malfunction, however, killed Leela forcing the Professor to use the rebirth machine on her along with the other dead crew members, and destroyed Robot Fry's memory. The issue is resolved when Fry is resurrected, and Robot Fry and Leela decide to hook up with each other.
* Battle Engine Aquila is based during a war over the 13 remaining islands after the sea level rises.
* Battle Fantasia, another game by Arc Systems, Marco Van De Land considers Princess Olivia like a big sister. The feeling seems to be mutual, as Olivia will gladly join in Marco's games. This stems from the fact that Olivia and Urs (Marco's older brother) have known each other since they've been very young.

* Battlefield 1942, a total conversion mod based on a speculative conflict between Sweden and Norway, just to name a few.
* Battlefield 1942, in a (staged?) gameplay clip, a pilot stalled his plane in a vertical climb and chose to bail out to activate his parachute. Fortunately for him, a two-seat dive bomber was conveniently flying passed a hundred feet below him, in perfect timing for him to hitch a ride.
* Battlefield 1942 make this exact sound. Because bombs do more damage to soldiers on the ground in the game, everyone stands up and starts running away while jumping up and down.
* Battlefield 1942. The speed of all weapons and vehicles was absurdly increased and alternate fire on all vehicles activated a rocket boost. Multiplayer games with this tended to devolve into goofy stunts like a never-ending loop-the-loop with jeeps or jumping over Midway island using a battleship.
* Battlefield 1942, which was an extremely mediocre effort that didn't rise to any great heights, certainly not anything close to the love their Desert Combat mod inspired.
* Battlefield 1 also has plenty of weapons in the game that were either exceedingly rare but did see limited frontline service (such as the M1918 Browning Automatic Rifle and Selbstlader 1916), mass produced but never saw combat (such as the Huot Automatic Rifle) and weapons that never got past the prototype stage and never saw mass production (such as the Selbstlader 1906, Hellriegel 1915 and Mars Automatic Pistol).
* Battlefield 1 as early British tanks were almost as temperamental as shown in the game.
* Battlefield 1 features the trench periscope; while it doesn't increase any damage potential, it is able to mark enemies by painting a bright red outline for all your teammates to see while netting score bonuses for the spotter.
* Battlefield 1 for some elite classes that are unable to equip a gas mask.
* Battlefield 1 has maps in the Arabian desert, and the final War Story campaign occurs there.
* Battlefield 1 has Sinai and Amiens, the former of which is a sprawling vehicle-heavy desert map and the latter an urban map. Oddly, the Metro-esque Argonne Forest and the even more Metro-esque Fort De Vaux aren't nearly so popular.
* Battlefield 1 period, even lampshades the ironic nature of its name in the opening narration, used as the quote above.
* Battlefield 1 players spawn into vehicles as specialized tanker (who also captains destroyers, oddly enough) or pilot classes with their own models and gear. Although any class can still operate (but not repair, unless they're a support with a wrench) them should the actual driver abandon it for whatever reason.
* Battlefield 1. This is averted in the game mode "Back to Basics" in which the all classes are equipped with only the unscoped bolt-action rifles used by their respective nations (e.g. the British can only use the SMLE and the Germans can only use the Gewehr 98).
* Battlefield 1: This is the only practical way to kill the opposing flamethrower troops, since they are heavily armored.
* Battlefield 1 Tilkici does this to Zara as he's getting ready to kill her but she turns the tables BIG TIME.
* Battlefield 1 War Story: "The Runner" has the player storming the beaches of Gallipoli in its first mission.
* Battlefield 2042 when the US and Russian forces in Incheon immediately stop fighting when they saw an incoming tornado and decided that they better evacuate the area as fast as they could.
* Battlefield 2142 are equipped with a shield that can destroy rockets and missiles. The shield has to be toggled on manually, lasts for a second or two, and then is inactive as it recharges. It probably doesn't protect vehicles from EMP weapons.
* Battlefield 2142, as it is always a one-shot kill. Although lag will sometimes require you to make a second swipe, despite the "stab" noise.

* Battlefield 2142) between a futuristic European Union and the Pan-Asian Collation.
* Battlefield 2142 can shrug off most everything short of a suicidal transport pilot. However, there is a flimsy vent underneath that potentially allows someone with a pistol to inflict massive damage. The Titan supercarriers present a similar situation: they can only be damaged from outside by BLOC-3 missiles, but can be infiltrated to get to its creamy nuclear core.
* Battlefield 2142 contains painkillers named "Dicepirin", among other things.
* Battlefield 2142. EA decided to merge some of the Battlefield 2 classes together, and that game's Assault and Medic classes were combined into the Assault kit in 2142.
* Battlefield 2142) get the added bonus of taking down any aircraft, troops, or light vehicles that you meet on the way down. If you're in a squad, and the squad leader deploys a spawn beacon, you can be pod-dropped (from really high up rather than just titan height) at the beacon's location.
* Battlefield 2142 has drop ships for both factions that also have drop pods as well. A full drop ship with competent gunners can usually be effective enough to be a lethal threat to gunships, infantry and light vehicles.
* Battlefield 2142 has Titans, flying bases that are the center of a certain gamemode. The goal is to bring the enemy Titan down either by missiles launched from silos on the ground, or by invading it and destroying vital elements. The Titans launch fighter craft and dropships from their decks.
* Battlefield 2142 is set in a new Ice Age, so a lot of maps will be set in snowy environments.
* Battlefield 2142. It usually takes a lot of heavy firepower to put that beast down.
* Battlefield 2142 missile silos, on top of any additional lag caused by a large, moving object with multiple other objects chugging across the map.
* Battlefield 2142: One of the most dangerous scenarios is a fully-loaded Air Transport. Though less menacing than planetside drops (since there are at most two transports available per side), there is more than enough destruction aboard in the form of two vehicle-mounted cannons for infantry, engineers with anti-vehicle weapons and mines, as well as two engineers designated as mid-flight repairmen (who can easily repair most damage). Only a concerted attack by the enemy (or an extremely lucky kamikaze transport pilot) can hope to stop the assault.
* Battlefield 2142 prides itself on modelling all Star Wars assets to scale — from 300 metres long corvettes and other small ships to the immobile, but very heavily armed 1600 metres Imperial Star Destroyer. To get a sense of how big this is, a BF veteran can consider that BF 2142 maps were typically 1–2 kilometres in length.
* Battlefield 2142 showed a map of Europe in the background of an evacuation scene that showed where the glaciers had spread.
* Battlefield 2142: The engineer class can place an anti-vehicular railgun turret for fellow soldiers to use. The railgun takes a short time to recharge between shots, however.
* Battlefield 2142. The former is much more useful than the latter, as it needs a complicated lock-on to attack enemies.
* Battlefield 2142: The manual mentions that global warming hastened the Ice Age which has left most of Earth inhabitable. What is left is now being fought over in a global war. Meanwhile, sea level has gone down, in certain levels, you can find beached ships laying where water once was.
* Battlefield 2142, the other air vehicles, hover tanks, speeders (for the PAC at least) the Goliath, the anti-ground vehicle and anti-aircraft emplacements, and gadgets you could unlock, the EU guns still slung lead (The PAC technically use plasma weapons but for all intents it still functions like a bullet because it requires a delivery system to hold the plasma energy). Hell, the side arm for the EU was a revolver which had a speedloader cylinder. The developers stated in interviews that a gun firing bullets "felt more real to them" than just "pew pew you're dead."

* Battlefield 2142 the strongest handgun is the revolver, balanced out by the fact it has less ammunition and truly awesome muzzle climb.
* Battlefield 2142 which could be launched from air transports, Titans, APCs and the player would spawn from one if you selected a spawn beacon for your spawn point. Before the most recent patches, they could be used to destroy vehicles, and a glitch allowed you to fly around the map.
* Battlefield 2142: With the Air Transports filled with various members of a squad. Most commonly being Engineers, a Medic/Soldier, and Supports.
* Battlefield 2 among the remaining squad, who likely joined so they wouldn't have to command.
* Battlefield 2: "Cartillery", air-dropped ground vehicles that crush anything they lands on. Also done supply crates.
* Battlefield 2 different playable tanks, ranging from the rustbucket T62 & T72 all the way up to the cutting edge, hell on treads M1A2 Abrams and Challenger 2.
* Battlefield 2 features an EU Army, which implies a somewhat more unified Europe than today.
* Battlefield 2 gives some classes a crossbow that fires a cable that can be used as a zipline. Grappling hooks are also available to some classes, though they're the old-school hand-thrown variety.
* Battlefield 2 of some kind of structure to prevent the enemy commander from lobbing artillery at you.
* Battlefield 2, the defibrillator is a tool available for medics. It can revive the injured or kill enemies.
* Battlefield 2. The Medic class was basically an Assault soldier, but trades his assault rifle's under-barrel grenade launcher and heavy armor for healing capability (Both Assault and Medic classes within a faction use the same base rifle).
* Battlefield 2. There are no special forces units are present in the game, nor are there plans to introduce them. The devs wanted the game to be focused on the rank-and-file gameplay.
* Battlefield 2 you can kill players with the backblast of rocket launchers. However, you are more likely going to kill a teammate than an enemy player, as very few players are going to stand still for you to cook them.
* Battlefield 3 appears to show what might be the beginning of that World War occurring on the Iran-Iraq border.
* Battlefield 3 are banned in Iran for portraying Iran as one of the primary antagonists.
* Battlefield 3, bullets whizzing past blur the screen, which makes suppression fire effective. The HUD of tanks will also malfunction somewhat when the tank gets hit. Also, getting knifed from behind wrenches the viewpoint from whatever you were looking at right at the enemy who stabs you in the neck or chest then takes your tags.
* Battlefield 3 by a stolen Russian bomb, and since you and your squad were within reasonable distance of the Eiffel Tower, it's pretty easy to imagine what happened to it. Thankfully, you manage to avert the same thing from happening to Times Square by the end of the game.
* Battlefield 3, despite there being a DLC challenge to make a kill with the defib.
* Battlefield 3 far beyond their normal effective range, as long as the spotter maintains the lock-on.
* Battlefield 3; Gordon acts calm and implores Black to take his time and give the best explanation possible, while Whistler repeatedly hounds him with accusations and insults.
* Battlefield 3 has a U.S. assault on Tehran during a fictional U.S.-Iran war.
* Battlefield 3 has one specific application in the "Going Hunting" campaign mission, where you play as the weapon systems officer of an F/A-18F Super Hornet and shoot down enemy planes while an NPC does the actual flying.
* Battlefield 3 making the same announcement a year later likely helped as well.
* Battlefield 3 manages to be pretty scary with its first-person Australian rappel.
* Battlefield 3 maps are just a slightly different shade of blue instead of black.

* Battlefield 3 of playtime on Karkand (all the maps added have such a challenge, but Karkand is the first one players are allowed to do for obvious reasons).
* Battlefield 3, several weapons can OHK with a headshot and will get a headshot bonus for it. The bonus for Snipers is a marksmanship bonus for doing it at extreme ranges.
* Battlefield 3, Staff Sergeant Henry "Black" Blackburn and Private First Class David Montes go rogue after they were detained by the CIA for what happened in the Middle East concerning the PLR's terror plot for France and the US in using dirty bombs. They break out of their custody and try to stop Solomon in New York, but Montes get killed in Times Square.
* Battlefield 3-style FPS games, which he doesn't consider to be true shooters, "spunk-gargle-weewee".
* Battlefield 3 the unlock-able flashlight attachment for most guns. This flashlight is literally brighter than the in-game sun (at least on Xbox) and if glanced from a close distance, can completely cover the screen in white.
* Battlefield 3 the USA goes to war with Iran to track down a terrorist leader.
* Battlefield 3 (though this is only if the patient accepts the revive by standing up). This Combat Medic class is so strong at killing infantry and surviving, it's the dominant class in any deathmatch modes.
* Battlefield 3. Vladimir has a hideous scar across the left side of his face and a blind eye. He is the good guy however.
* Battlefield 3, where both teams have almost enough tanks for every player in the fight.
* Battlefield 3 where the first Iranian fighters are encountered. You don't hear their planes' cannons until well after the bullets start hitting and/or passing by you. At the same time, though, the introductory sequence for the mission has the player character and her partner not bothering to put on their helmets, thus getting any sort of ear protection, until well after they've arrived on the flight deck, just feet away from their own already-running F/A-18 and a few more away from their wingmate launching from the catapult.
* Battlefield 3 you have to perform a quicktime event to kill a rat. If you fail, the rat makes enough noise to interest a guard, who then comes over and shoots you. As your character dies, he manages to flip off the rat.
* Battlefield 4 by Bonnie Tyler) as your car is sinking, saying he doesn't want to die to the tune of this song.
* Battlefield 4 DLC and post-release support and the games are in the same engine.
* Battlefield 4 got slammed for this, with a campaign that is merely 7 missions long and plagued with bugs. Most Youtube playthroughs of the campaign can barely crack 3 or 4 hours.
* Battlefield 4, there is a near verbatim example. One of the collectible dogtags (named "Shopping List") reads: "EGGS MILK BREAD BLOOD OF MY ENEMY"
* Battlefield 4, though the maps can only be played with two factions at once.
* "Battlefield": Ancelyn and Mordred spend some time exchanging insults before charging at each other, even though they're in the middle of a battle.
* Battlefield and Sea Sparrow missile system that can be operated by the player.
* Battlefield, APCs are referred to as "light tanks", but that name is misleading. With 3 machine guns and 1 autocannon, a fully-crewed "light tank" can murder infantry in any direction and it never runs out of ammo. With the alternative weapon upgrade, it can also utilize its wire-guided missile launcher to fight off enemy tanks.
* Battlefield, as the levels that take place in New York are about stopping a terrorist attack, not an invasion.
* Battlefield Bad Company 2 can use their drill as a weapon. While its very damaging on vehicles, it can also be used on humans for a quick kill and an achievement.
* Battlefield: Bad Company 2 : Crouched beside a tree with a bead on a running enemy across the map, adjust for distance, lead the target, squeeze the trigger, and watch as the falling tracer round collides with the unsuspecting head.
* Battlefield: Bad Company 2 is right. (it's been serving for over 37 years; the

gun was introduced in 1979).
* Battlefield: Bad Company 2, Pvt. Sweetwater says it "smells like Jersey" when your squad goes into a drainage ditch.
* Battlefield: Bad Company 2: Vietnam, gives you a mystery syringe full of chemicals capable of reverting cardiac arrest. Given that it's a game, a shot to the big toe is just as effective as a shot to the heart.
* Battlefield: Bad Company actual Spec Ops units. Well, they already were, but for different reasons.
* Battlefield: Bad Company, and merrily hops across a border chasing the same gold the rest of the squad has to persuade itself to chase.
* Battlefield: Bad Company and react to Preston's arrival with equal indifference.
* Battlefield: Bad Company: at one point, the armored convoy the player is currently fighting alongside is ambushed, and they take cover behind their Humvees. Despite the torrent of enemy bullets, said Humvees remain undamaged no matter how long the player hides behind them.
* Battlefield: Bad Company, but the majority of them are only usable in multiplayer.
* Battlefield: Bad Company can be seen throwing a grenade in this manner.
* Battlefield: Bad Company centers around B Company, an army company where the most troublesome members of the Army are sent in the hopes that they get killed in their assigned suicide missions.
* Battlefield: Bad Company example, a storyline mission sees you providing sniper fire support at night with a huge thunderstorm right overhead as the rest of your fireteam sneaks into an enemy camp. In order to avoid alerting the guards to your shots, you time them to coincide with the sounds of the storm.
* Battlefield: Bad Company for an auto-injector that refills Marlowe's health when he stabs himself straight in the chest with it. The auto-injector always refills his health to full and replenishes itself after a relatively short time, making it a wonder why medical technology continues to exist in the Bad Company universe.
* Battlefield: Bad Company green-clad personal guards. They're no more durable than most mooks, but they are, indeed, faster, and carry some weapons that are normally available only to the player.
* Battlefield: Bad Company has you jumping out of a hole in the side of a crashing aircraft after two other people who are fighting over a parachute, shooting one of them and then taking the parachute.
* Battlefield: Bad Company: Most walls and fences, any military vehicle, red barrels, any fuel tank, bright-red crates with explosive placards and more.
* Battlefield: Bad Company none of the weapons have discernible muzzle climb in-game (ie. the aim doesn't change). However, if you watch the gun when fired from the shoulder without using the sights, it kicks very aggressively in the shoulder. This is particularly noticeable on the automatic weapons like assault rifles, SMGs and machine guns.
* Battlefield: Bad Company: one of the four core protagonists, Haggard, has a terrible case of pyromania, which was what threw him into B-Company to begin with.
* Battlefield: Bad Company: Private Marlowe is given a hypodermic needle (full of adrenaline, presumably) that he can use to keep himself alive near the start of the story.
* Battlefield: Bad Company series hard enough and it really is possible to keep an entire team alive.
* Battlefield: Bad Company show a world map detailing the Russian advance.
* Battlefield: Bad Company's singleplayer level "High Value Target" there is a part where all of the two-story houses have random bathtubs blocking the stairways, preventing you from going to the second floor. Even if you destroy the houses, the normally climbable rubble becomes this trope.
* Battlefield: Bad Company. The machine guns literally become more accurate the longer you hold the trigger, so standing still and hosing the air works out the best for effective MG use.
* Battlefield: Bad Company) the titular B-Company is fashioned like a US Army-only version of the FFL, composed of all the criminals, disgraced soldiers, and other

refuse from the Army's ranks to fill a contingent of fodder troops sent in to do the really dirty and dangerous work, and likely get killed in the process.
* Battlefield: Bad Company, The US vs Russia in a conflict that also involved Serdaristan.
* Battlefield: Bad Company They possess a distinctive creaking sound prior to that happening, giving you a chance to sprint out of the building. Better try it, no matter how many people are firing at you at the moment.
* Battlefield: Bad Company, where three military screw-ups and their long-suffering sergeant go AWOL to hunt for mercenary gold.
* Battlefield Baseball, an inexplicable plot, and a few musical numbers, all wrapped up in a martial-arts package. It's weird.
* Battlefield consisting of metal plates to protect the driver from small arms and reactive armor blocks to protect against RPG.
* Battlefield doesn't have a proper recoil system, but attempts to emulate one with some of the most exaggerated random spread in any shooter. Try firing a machine gun while standing and be amazed as bullets leave the barrel at 70-degree angles.
* Battlefield Earth about Johnnie Goodboy Taylor, the leader of the human resistance on Earth that eventually destroys the Psycolo Empire.
* Battlefield Earth: A Saga of the Year 3000 that causes the big boom.
* Battlefield Earth as punishment for falling in love with mortal women. In the book, the bald eagle on the Great Seal of the United States (as seen on coins, belt buckles, etc.) draws the same reverence.
* Battlefield Earth back to the planet Psychlo of an evening just to go to a bar.
* Battlefield Earth beat down humanity in about nine minutes. Presumably all the mighty warriors responsible have since left to conquer other galaxies and left the dregs on this backwater; it's the only possible explanation.
* Battlefield Earth, but during the timeline of the book it was "one alien uses the humans for personal profit and then is going to wipe them out".
* Battlefield Earth, but not from the performances. The only wipe was the centre-screen split. Which made the other three or so transitions look like masterpieces.
* Battlefield Earth does seem to be a characteristic of humans in this film.
* Battlefield Earth Even the defense wasn't that pathetic; they teleported in a massive number of gas weapons in a move no race had survived in three universes of conquests.
* Battlefield Earth every member of their race has a secret chip in their head that makes them become violently psychotic and eventually suicidal if any non-Psychlo asks them about teleportation.
* Battlefield Earth has an insane set of Van Allen belts to protect it from any stellar radiation.
* Battlefield Earth has an obsession with finding "leverage" over his opponents that rivals J. Edgar Hoover.
* Battlefield Earth has the Psychlos universally refer to humans as "Man-Animals". Creativity is not a Psychlo's strong suit.
* Battlefield Earth have forgotten that aliens invaded Earth and destroyed all human civilization 1000 years ago, instead believing that demons came down from the sky because the gods were angry.
* Battlefield Earth, he addressed a heartfelt thank-you to "the dozens and dozens of people… who went to see the movie."
* Battlefield Earth is notorious for containing an alarming number of plot holes, which are quite ridiculous even inside the framework of the story. A few, for the record:
* Battlefield Earth moment. To be fair, he didn't know that all female Psychlos were sterilized before being sent offworld or that the bomb he sent to their planet would do more than take out the capital city.
* Battlefield Earth, most of the aliens live inside a large artificial dome that was constructed over the city of Denver, along with thousands of human slaves and lots of old human buildings that have been repurposed for Psychlo rule. The heroes plan to shatter the dome to suffocate most of the Psychlos since many of them will not be wearing their protective masks; very little time is given to the incredible

collateral damage of shattering foot-thick glass all over the tops of everyone, humans included.
* Battlefield Earth: Most of the Psychlo-centric scenes are shot like this. It is possible they are taking their lead from the novel where Pyscho "breath-gas" has a purple tint.
* Battlefield Earth movie, John Travolta and Forest Whitaker walked on stilts to appear 10-foot tall as the alien Psychlos.
* Battlefield Earth: Much of the Psychlos' technology was stolen from their rivals — at one point they had a slave race of scientists which they later destroyed. They get away with this by using massive and sudden deployments of chemical weapons in their conquests, so that enemy races were defeated by the time they knew they were under attack regardless of technology. The humans end up this way towards their own and Psychlo technology.
* Battlefield Earth originally believed they were the last people left on Earth.
* Battlefield Earth prefers odd hyphenated versions of common words; e.g. "man-animal", "picto-camera", "skull-bone".
* Battlefield Earth, set 1000 years in the future, a group of now cave-dwelling humans come across a group of Harrier jump-jets, still miraculously working, and after some second-hand experience from books and a few days with a flight simulator, also miraculously working, they learn to fly them to defeat the group of Aliens currently controlling the planet. These humans had no education whatsoever, only one human was partly educated by the aliens, yet they still managed to learn to read English. In the original novel there are no Harriers: the bad guy teaches the protagonist how to pilot alien aircraft and the protagonist, in turn, teaches other humans.
* Battlefield Earth. Since he's speaking Psychlo, the girl has no idea what he's saying. Johnny goes further and tells Terl that he finds the female repulsive. Terl agrees with the latter, being an alien, but then shows a picture that the girl drew, which is clearly of Johnny.
* Battlefield Earth since they had the humans chauffeuring them around. They also note that dogs, while much more cooperative than "man-animals", which the Psychlos interpret to mean higher intelligence (after all, dogs recognize who their betters are), are almost useless for manual labor (further proof that dogs were the masters of "man-animals", who did all the work).
* Battlefield Earth Terl is assigned to Earth for some incident involving a senator's daughter.
* Battlefield Earth than an all-out invasion in the second case, as the alliance is more interested in leftover Psychlo plunder and selling the humans into slavery than the planet itself.
* Battlefield Earth (the book), Fort Knox is one of the first places the gold-loving Psychlos hit. The humans get the gold for their plan from an armored car, which still leads to the same problem as in the movie, of how the Psychlos missed all the gold that humans had already mined.
* Battlefield Earth: The film is clean of blood, despite limbs and head being blown off of both Psychlos and humans.
* Battlefield Earth themselves and despite having taken over Earth 1000 years ago they know absolutely nothing about humans.
* Battlefield Earth, the Psychlos are an alien race advanced enough to take down Earth's entire armed forces in a matter of minutes, but Terl is using humans to mine in the radioactive areas (where Psychlos wouldn't be able to breathe) instead of traceable machinery; because he's running a thoroughly against the regs side project. This being a bad idea is kind of the whole point of the film.
* Battlefield Earth, the Psychlos claim to have crushed all of humanity's military and defenses in only 9 minutes.
* Battlefield Earth, the Psychlos have a device that can teach humans their language, which they only use on one human because they didn't consider the "man-animals" intelligent enough to teach, despite all contrary evidence.
* Battlefield Earth, the Psychlos interpret surveillance photos of humans with dogs in car passenger seats as evidence of the dogs being the superior species, since

the humans "chauffeur them around". They also mention that the dogs have proven themselves much more willing to cooperate with the alien masters than the man-animals. Unfortunately, dogs have proven ill-adapted for manual labor (which, once again, proves that they are a superior species, as they don't need to work). They can fetch, though.
* Battlefield Earth the story of Earth's invasion and occupation by the Psychlos is remembered as a religious purge of the planet by "the gods". Their legends speak of a deadly cloud that swept over the land (the initial barrage of poison gas) and then a wave of monsters and demons that hounded and pursued the survivors from the cloud (the arrival of the Psychlos themselves, who exterminated whatever humans they could find). This was all done by the gods in order to remove the sinful and impure from the planet, and their ancestors survived because they honored the gods and were righteous (they lived in the shadow of a massive military complex that served as a government retreat and survival bunker, surrounded by last-ditch nuclear explosives whose radiation kept the Psychlos away). When Jonnie Goodboy Tyler, the protagonist, encounters other isolated people, they each have their own legend of what happened. The Scots, who have managed to retain a semi-accurate history because their territory received less attention from the Psychlos, remember America as a distant village that some other Scots went to and settled a long time ago.
* Battlefield Earth. They get bonus points for being chiefly interested in gold.
* Battlefield Earth through brain surgery and mind control drugs, to prevent them from allowing advanced technology from falling into the hands of less-advanced species.
* Battlefield Earth, U.S. military equipment stored in an underground base for 1,000 years is put into action to defeat the alien Psychlos.
* Battlefield Earth was filmed in Montreal, doubling for a generic Sci-Fi setting.
* Battlefield Earth, wherein civilization was pretty much completely gone, buildings crumbling, machines rusted to junk, books decayed to the point of falling apart.
* Battlefield Earth where we are treated to a scene of essentially shell-shocked cavemen staring at the ruins of the (not dome-shaped) dome that had been the base of the bad guys.
* Battlefield Earth: You can hardly ever sympathize with most of the Psychlos. Except maybe Ker and the Bartender.
* Battlefield Earth? You have a planet completely under your thumb, and one greedy mid-manager does an experiment on a subjugated race, which ultimately results in it gaining the knowledge and power to wipe out your home world and all of the occupying forces.
* Battlefield expansion pack, the Spec Ops class's zipline is showcased, and the end of the commando's zipline trip results in this. It is not possible in game.
* Battlefield explodes into tiny bits after it either suffers enough damage or stays there long enough.
* Battlefield featured actual broadcasts from Hanoi Hannah in the loading screens for certain maps. Some of them were rather pretty, actually — "Your helicopters will fall like broken butterflies, GIs."
* Battlefield. Fortunately, her costar Sylvester McCoy also noticed, and called for her to be pulled out.
* Battlefield Friends, Which is something he expected the black Assault/Medic to do...
* Battlefield games are well-known for this kind of stunt being done online, where people will fall, unharmed, into the cockpits of aircraft, which they then proceed to fly.
* Battlefield games take realistic damage; shooting rockets to the front of the tank does minimal damage, more damage to the sides, and the most damage to the back. Smart players with this knowledge will always try to flank around to the back of the tank rather than take it head on.
* Battlefield: Generally, only the sniper rifle can really nail a OHK with a headshot, other weapons will just deal out more damage. Bad Company 2 gives you ten

more points if you finish an enemy off with a headshot though (a kill is normally 50 points).
* Battlefield Hardline has Marcus Boone, who deserted the US Army after the Iraq War and used his experience as an intelligence analyst for various criminal groups in the East Coast as a hacker, although he prefers to be a grey hat hacker.
* Battlefield Hardline once he declared that Roger should've been more polite and learn something from being criticized.
* Battlefield Hardline will occasionally say phrases to this effect in firefights.
* "Battlefield" has him dealing with an alternate universe loosely based on Arthurian myth. After wandering through what looks like a futuristic tomb, Ace is surprised that this is supposed to be magic. The Doctor asks Ace if she knows Clarke's third law, when she quotes it he tells her that it also applies in reverse, and she exclaims "Any sufficiently advanced magic is indistinguishable from technology?"
* Battlefield has World War III between the US, the European Union, China, and the fictional Middle Eastern Coalition. The cause of the war is never explicitly stated, but one map description hints that it was over oil. Russia was originally going to be a faction too, but they were downgraded to a spec-ops faction in the expansion pack.
* Battlefield Heroes allows players to see an aura outline of other players through walls and buildings.
* Battlefield Heroes available to all players, but some of it must be bought. Strictly cosmetic, though.
* Battlefield Heroes has a skill called I Eats Grenades. Not only that, he gets HEALED by eating grenades in this fashion.
* Battlefield Heroes. The nationals apparently cheated during an Olympic cycling event and then mocked the king's mustache. The royals proceed to launch a full-scale invasion.
* Battlefield Heroes, the soldier class has an ability called burning bullets that makes your opponents burst into flame when they're hurt. (But you can put yourself out using a bandage).
* Battlefield manages to offend Ace by referring to her as "the latest one", and a line about how looking after the Professor is her job reveals that she may feel a bit threatened. By the end of the serial the Brig has managed to prove that he can be trusted to take care of the Doctor and the two bond over a nice big explosion. In the Brig's case, at least, it's less "mutual hostility" on his part and more "old-fashioned stuffy social awkwardness":
* Battlefield. Never mind the fact that none of these vehicles have working canopies or doors, and some have no visible point of possible entry, your basic grunt can drive/fly/hover it with ease. In the series after Battlefield 2, entering a vehicle even magically transforms the clothing grunts wear into appropriate attire for that vehicle (i.e, flight suits and helmets).
* Battlefield. Not only this, but the demand for this map was so great it lead to the developers adding the 'infantry only' game-mode to the game.
* battlefield nuke, and her magic could result in "thaumonuclear devastation" if misused.
* "Battlefield" "Oh, shame!" suggests she's thinking of another word starting with "sh".
* "Battlefield" one-punches the Seventh Doctor and faces the Destroyer on his own.
* Battlefield Play4Free is several types of sunglasses for the player-character.
* Battlefield Play4Free. It's most egregious with sniper rifles, where there are paid sniper rifles that are longer range than the free ones and do significantly more damage. Headshots that don't kill? Never mind that bodyshots from those guns should put thumb-sized holes in people...
* Battlefield Play4Free were rewarded with a fancy beret for one of their player-characters which was unavailable any other way.
* Battlefield series features this sort of mechanic in most of their games.
* Battlefield series, for example, the various class options only covers infantry roles, yet every character can jump into any vehicle at will and take control of

them. Players are also able to easily switch classes by taking and swapping kits with a fallen player - your engineer's apparently also qualified to be a medic, he just needs the equipment on-hand for it.
* Battlefield series has been subject to this trope ever since its first installment. Examples:
* Battlefield series have these as available clothing customization options for the player-character; ranging from a simple bandanna, to ski masks, to gas masks.
* Battlefield series makes this possible with explosives and vehicles.
* Battlefield series will automatically put the player into a head-down skydiving pose if they fall from a certain height. If the player doesn't have a parachute handy or doesn't deploy it in time, this can result in an invariably fatal faceplant.
* Battlefields Stiles is asked what he did for a living. He unhesitatingly responds that he worked in a slaughterhouse... before saying it's what people always expect, and in fact he worked in his father's pub.
* Battlefields stop calling him that or he'll kick the shit out of the next person who does. Then one day a new soldier to the unit jokingly calls him Kosher. The newbie finds himself staring at a knife being held less than an inch away from his face. "See those assholes? They can call me that because they're my friends and I like them. I don't like you and you can't call me that." The squad sergeant had to break it up before the newbie got killed.
* Battlefield surgery until surprisingly recently could be like this. They would amputate with a saw and cauterize with a branding iron
* "Battlefield": The Doctor comes in to find Brigadier Bambera and Sir Ancelyn — last seen having a knock-down drag-out brawl — leaning on each other, fast asleep.
* Battlefield, the player character would whimper and then proceed to defecate if you let yourself fall without using a parachute for a long enough time.
* Battlefield". Unfortunately. (In part because they'd rehearsed with a different kind of sword to the ones they got on location.)
* Battlefield V’s segment The Last Tiger ends with Panzer commander Peter Muller surrendering to the Americans while Schroder, the youngest member of the tank crew and who believes in the Nazi resolve, turns his MP-40 on him. We cut to black and hear the gunfire. So it’s unknown if Schroder killed him or if the Americans killed Schroder.
* Battlefield Vietnam had an artillery vehicle which new players tried frequently to use as a tank, giving disappointing results.
* Battlefield V that the game was going in. This strategy backfired on them, as the game failed to meet EA's sales targets.
* Battlefield was a return to form, and an even bigger hit than the first game.
* Battlefield: We are losing this battle! Start fighting or I will find someone who can! A few games (including some in this series) offer one player on each team a "command" role. Depending on the game, this role's importance varies from pivotal to merely important. Some games (thankfully) offer mechanisms to depose commanders who fit this trope.
* Battlefield, which for a fair few gamers might be the thing they associate with the song.
* Battlefield will blur the screen, amplify the player's heartbeat, and put in a ringing sound for your hearing.
* Battlefleet Gothic, almost all fleet can setup impressive torpedo volleys, but the Tau Fleet fits this trope to a 'T'. Instead of launching torpedoes, the Tau launch volleys of guided missiles that can both turn and change their speed midflight. What really cements it for the Tau is that each missile on the table is actually a cluster of ten missiles, which means whenever a Tau Battleship launches a Firepower 8 volley, it is really launching a deluge 80 missiles.
* Battlefleet Gothic Armada 2, and Adeptus Astartes ships can use unique boarding torpedoes with slight homing capabilities that're launched from torpedo tubes. Each method varies in its range, the amount of troops it deploys, as well as the type of countermeasures it has to defeat to reach its target.

* Battlefleet Gothic Armada 2: The opening cinematic depicts Chaos ships pushing the Imperial Blackstone Fortress out of orbit of Cadia and crashing it into the planet.
* Battlefleet Gothic: Armada, although now there's an upgrade available for your fleets that makes ships immune to the damage inflicted by asteroid fields.
* Battlefleet Gothic: Armada has the player's Imperial cruiser use its boarding torpedoes to send troops aboard a space station that has been taken over by Chaos.
* Battlefleet Gothic: Armada: Imperial Navy (Balanced) vs. Fleets of Chaos (Subversive) vs. Ork Freebooterz (Powerhouse) vs. Eldar Corsairs (Cannons).
* Battlefleet Gothic: Armada is, these are likely realistic depictions of very real dangers in those areas of space.
* Battlefleet Gothic avert this, stating that ships continue on the exact same vector as they were on before shutting down unless the ship uses minimal thrusters to slow down.
* Battlefleet Gothic, Eldar Craftworld and Corsair starships are propelled by large solar sails. In game this is represented by Eldar ships having three movement speeds representing whether they are moving towards, away from or parallel to the sun, meaning that they have to tack like a sailing ship to get the best speed across the battlefield.
* Battlefleet Gothic game waves of bombers are powerful enough to destroy a battleship. Hence fighters are required to counter the bombers. However, the biggest carrier, the Emperor class, is still technically a battleship, and carries only marginally less weapon batteries (total; it can actually concentrate more firepower to one side due to most of it being carried in dorsal turrets) than the Retribution class, which is a dedicated "ship of the line". The difference is mostly the Emperor's lack of lances.
* Battlefleet Gothic gives most fleets a mix of Frigates, Cruisers, Assault Carriers, Battleships, and Battlestars supported by fighters, bombers, and drop pods. Most factions also have a Missile Boat frigate class, some have Space Guns, and Chaos and the Imperium also get Worldships in the form of the Blackstone Fortresses.
* Battlefleet Gothic have a chance of opening a portal to hell when their reactors blow, sucking everything nearby in along with it.
* Battlefleet Gothic have wimpy armor, no shields, ridiculously powerful engines, and some of the nastiest guns possible.
* Battlefleet Gothic, however. There is also a second kind of boarding action, using so called "Assault Pods". They are launched like a squadron of fighters, and can make an attack. Of course, since these ships are crewed by thousands and thousands of people, in general, it's about causing damage rather than actually taking over the ships.
* Battlefleet Gothic) must take a command check, and if failed can take crippling damage in a single instance.
* Battlefleet Gothic. On the downside, the poorly distributed mass of the ship considerably reduces its manoeuvrability.
* Battlefleet Gothic such as the Repulsive-class Grand Cruiser and the Carnage-class Cruiser. The Imperial Navy is reluctant to use these fleets due to their ships' lack of regular maintenance and their hastily assembled crews having a tendency to be unreliable at best, if not outright mutinous. The game rules represent this by allowing the player to choose certain ships from the Chaos Fleet list but makes all Reserve Fleet Ships more likely to disengage from combat or, when fighting against Chaos, defect to the opponents control.
* Battlefleet Gothic. The major differences for the Imperial Navy and Chaos are the presence of effective prow-mounted weapons and the independence of the ships on variable winds.
* Battlefleet Gothic, you'll have to keep track of which side of the table is sunward and adjust your movement rates accordingly.
* Battlefleet Mars, since it was a wasted effort. There was simply no tactical advantage to maneuvering in more than two dimensions. Plus, it had the players doing the Pythagorean Theorem, by hand, every time they wanted to take a shot, or

plot a maneuver. They also had to track movement (with counters) on two maps, one for the vertical, one for the horizontal; keeping track of the two data sets meant a lot of fiddle factor, for no real boost in playability.
* Battle Fleet Mars. The human colony on Mars revolts against Earth's control and tries to become independent.
* Battle for Azeroth acts as a Spirit Healer on Zandalar. For Horde players, there is a quest where they seek his help in exchange for 1,000,000 million souls. Naturally, Bwonsamdi would willingly send the players back to the land of the living to continue to pay off their debt; but why would he extend the same courtesy to Alliance players? Shits and giggles apparently.
* Battle for Azeroth, although as a historical epidemic rather than a recent one.
* Battle for Azeroth brought the witch infested woods of the non-mountainous parts of Drustvar, on the continent-isle of Kul Tiras, specially if one gets closer to Waycrest Manor.
* Battle for Azeroth.. Especially notable as a fellow soldier found with Derek, was in poor condition with bones sticking out their body just like all other forsaken.
* Battle for Azeroth expansion. When you use it, there's an emote in chat, "[Your character's name] munches on some popcorn", with accompanying visuals.
* Battle for Azeroth gave us Priscilla Ashvane playing this role to Katherine Proudmoore, the Lord Admiral of Kul Tiras. Blizzard decided to make the two women contrast physically, which is great character design, but
* Battle for Azeroth how they've already laid siege to their own city before). To top it off, the villain ends up escaping and setting the stage for the next expansion, being in league with that expansion's villains.
* Battle for Azeroth, only to be mortally wounded moments later by his target. Saurfang tries to comfort the youth in his last moments, but in a final expression of defiance, the youth refutes Saurfang's aid, using his last breath to spit on Saurfang's boots.
* Battle for Azeroth opens with a devastating loss for both factions. The Alliance successfully sieges Undercity and drives the Forsaken out of Lordaeron. Meanwhile the world tree of Teldrassil is burned down and the Night Elves driven out of Kalimdor.
* Battle for Azeroth the Horrific Vision of Orgrimmar shows a future where Thrall is driven mad by N'Zoth and convinced that the only way to save Azeroth is by drinking the Old God's blood. Those who obey his order are twisted by the Void into slaves of N'Zoth while those who refuse are executed.
* Battle for Azeroth was about the faction war and that there were no Old Gods in BfA. Out of the five raids in BFA (Uldir,Crucible of Storms, Battle for Dazar'alor, Eternal Palace and Ny'alotha), only ONE (Battle for Dazar'alor) does not feature Old Gods in some form or another, and the final boss of the expansion is N'Zoth. In fact, patch 8.3 is almost entirely focused on combating N'Zoth and thwarting his visions of a corrupted and twisted Azeroth.
* Battle for BFDI, it's revealed that the Announcer, the host of the first season, has returned to Earth to take the prized BFDI away from the current host, Four, but he has a genuinely good reason to. He had seemingly left after the first season finale, but he wanted the show to continue, so he funded BFDIA in the background on an extremely tight budget, until it just couldn't be supported anymore. After he returned to his home planet for good, he caught wind of the fact that Four was hosting a new season of BFDI, and was offering up the BFDI as a prize, which turned out to be the last remaining archive of the first season in existence. Without it, Announcer had basically just lost ownership of his own creation without his concern, and he wanted to get it back no matter what it took.
* Battle for BFDI of zero, if you know what I mean." Then he and Golf Ball wiggle their eyebrows suggestively before Donut points out that there's not even a second meaning behind that.
* Battle for BFDI, the entire show split and nearly all ongoing arcs were voided like Book's Arc to be a better leader for Taco and Team Ice Cube as a family unit. The only arc carried over to Battle for BFB is Leafy and Firey's Arc, continuing from SEASON 1

* Battle for Dream Island: (2010-present); although 2014-2015 had no episodes, and 2016 only had one.
* Battle for Dream Island abruptly ends after the final part of episode 5, without an actual conclusion. Some say this is because Cary and Michael Huang were blocked out of their Adsense account for several years which gave them profits from displayed advertisements. IDFB does continue from where BFDIA ended, but the entire story is dropped come BFB.
* Battle for Dream Island A bunch of female characters are voiced by male actors and in BFB, There are a few male objects voiced by female actors.
* Battle for Dream Island Again Their roles in the team also serves to be a fun time.
* Battle for Dream Island and David... Then, because of the double-digit point system, she falls to the bottom of the scoreboard and finally gets ejected from the game.
* Battle for Dream Island (and more recently, other popular, well-known object shows) have also made cameos.
* Battle for Dream Island, and one of the longest running web-series of all time, which spawned hundreds of other similar shows.
* Battle for Dream Island big time, the fact that they are objects doesn't help things either, as the only thing to go off of is voices
* Battle for Dream Island by fan voting) because she acted like a commandeering jerk to her team.
* Battle for Dream Island: Currently at Stage 4. The show is hugely popular on the Internet and Scholastic has even published an Official Character Guide. It even spawned a whole genre of "object shows".
* Battle for Dream Island episode, Lofty, after Snowball pops one of his teammates balloons due to being pink, Eraser claims that pink is manly too which they have a short argument about.
* Battle for Dream Island had lots of characters to begin with. Then Jackenjellify (the creator) gave people the choice to send in their own characters, and there's over 100 of them. The new season, BFB, has 65 contestants. With Four, X and Two included, that's 68 named characters excluding all of the recommended characters.
* Battlefor Dream Island has an very reclyced sound used by the contestants, it has been used in the entire series.
* Battle for Dream Island, however, this is more for the early episodes. Later episodes have the assets refined and thinner, as well as the outlines being thinner and hand drawn in TPOT.
* Battle for Dream Island: In BFDI 1a, Pin tells Leafy that only one person can win the island. She holds up a finger for extra emphasis on the "one," but it wasn't the finger you would expect.
* Battle for Dream Island: In BFDIA 5c, after Pencil yells at Ruby, Ruby starts to cry, and first it's single tear drops... then insane waterfalls.
* Battle for Dream Island, including Bell, Bubble, Cake, Ice Cube, Price Tag and Ruby.
* Battle for Dream Island. In season 1, she was picked by the contestants to be eliminated over Snowball, despite having 5 votes in the elimination against the latter's 18. In season 2, she got the prize on her first elimination, but also had the most dislikes due to AnimationEpic (under an alt named Derpy Hooves) asking his subscribers to vote her, and ended up in measly 20th place. Fortunately, she is currently having a third run.
* Battle for Dream Island is best known for dissecting BFDI and BFDIA to show all kinds of interesting trivia within the show.
* Battle for Dream Island is equivalent to that of a plastic spork, there's way too many examples to list (at least in one or two sittings.)
* Battle for Dream Island: Match has Bubble act like a tree in order to fool the Puffball Announcer (Bubble is not an official contestant at this point, but Match and Pencil wanted him in anyway). At one point, Bubble makes leaf blowing noises directly towards the Announcer. It somehow works even when FreeSmart is at the summit of Yoylemontain.

* Battle for Dream Island, Needle adds so much yeast to her cake that it eventually becomes its own planet that easily dwarfs Earth in size.
* Battle for Dream Island: Profily is introduced late in Season 4 and claims that they have "been part of the gang" forever. Flashbacks are shown where they are in previous episodes.
* Battle for Dream Island's 4th season, BFB, is infamous for having many characters that get the spotlight much less than others. Notable examples include Gaty, Basketball, Ice Cube, Rocky, Puffball, Naily, and Firey Jr..
* Battle for Dream Island states that if he were to win Dream Island, he would name it "Pen Island, no spaces, all caps!" He probably doesn't realize it, but he's naming it PENISLAND.
* Battle for Dream Island. Subverted when a Hand-Powered Recovery Center is created and everyone starts reviving their dead friends. Woody is the last contestant to remain dead until IDFB.
* Battle for Dream Island, there will probably be one after the voting screen. So far, there are 41 stingers and counting.
* Battle for Dream Island, this is Yellow Face's way of being more hearable, as his voice is a little too quiet.
* Battle for Dream Island. Though she has spoken, however that was with the other contestants when they all shouted "Cake At Stake" in the finale.
* Battle for Dream Island to the channel up until that point. In a really tiny font. It goes on for over twenty seconds.
* Battle for Dream Island to the other characters, he’s even a jerk to his best friend X!
* Battle for Dream Island was loved by Mestizo audiences, she later developed to be far less offensive and more of her own character while still keeping her Mestizo fanbase.
* Battle for Milkquarious. Near the end, it is revealed that the villain is White Gold's son.
* Battle For Money Sentouchuu has ninja androids (Actually stuntmen trained to handle ninja weapons and martial arts) meant to assist players battle each other. Players can get one, but you need 600,000 yen for it.
* Battle For Money Sentouchuu is basically this as a game show, with ninja themes and cash on the line.
* Battle for Naboo, Lt. Sykes pilots a wide range of vehicles: landspeeders, gunboats, a Naboo police cruiser, the iconic Naboo Starfighter, and a Naboo Bomber.
* Battle for Terra activates, and it is stated that Terra will run out of Native Air, killing all native species, unless it is destroyed; however, the humans are running out of oxygen. The situation is resolved with Jim's heroic sacrifice, and a compromise between species.
* Battle for Terra, and its air scrubbers are predicted to fail within a few months of entering Terra orbit.
* Battle for Terra civilization with a cache of advanced tech left over from the old days.
* Battle for Terra, Earth, Mars and Venus have all been blown up, so humans go to the eponymous planet to find a new home.
* Battle for Terra: General Hemners terraforming operators are seen running from the control room before the kanikazie attack hits it but given the size of the explosion it’s doubtful (although not impossible) they could have gotten clear in time.
* Battle for Terra is a subversion. Terra here is an alien planet named so by the humans fleeing the destroyed Earth. Its real name is unknown.
* Battle for Terra is Mala talking Giddy into helping the Tarren forces by explaining the logic of his own orders to him.
* Battle for Terra: The aliens can fly and use their tails in a fashion similar to how fish use their tails to swim underwater.
* Battle for Terra: The humans sends a machine that can convert the air on Terra to be human breathable in seven days. This would leave the air unbreathable for the Terrians.

* Battle for Terra to be colonized quickly before the aging ship fell apart, since the humans don't have time to search for another, uninhabited world.
* Battle For The Ancient Robot, has Zanleer from Venus as one of the human player's allies. His vital stats are given as 7' 6" and 169 pounds. As an aside, the surface gravity of Venus is about 90% of Earth's.
* Battle for the Cowl event has multiple people dressed up and claiming to be Batman. Jason Todd's "hat" is being the Batman who dual wields guns.
* Battle for the Cowl Tim survived the near-fatal injuries Jason gave him by accidentally faking the dead when he slowed his heart rate to slow his blood loss, it meant Jason didn't have a reason to keep trying to kill him when he found his "body".
* Battle for the Planet of the Apes, and he starts to increasingly resemble Cornelius by the end of it as he tries to find non-violent solutions to the problems around him, including trying to see the best in humans - something he has a lot of trouble with.
* Battle for the Planet of the Apes by the human characters for his condescending and paternalistic treatment of them, showing that even the good guys can fall into that kind of thinking.
* Battle for the Planet of the Apes has a statue of Caesar, the ape civilization's founder.
* Battle for the Planet of the Apes where characters wonder if human astronauts from before the apocalypse could travel through time in faster than light ships. A scenario is presented where a musician could do a broadcast in London, FTL travel to New York and listen to it live and then go back in time to cancel the performance if he didn't like it.
* Battle for Wesnoth abilities to become Paladins. While they are not as strong in melee as the Grand Knights, and not as good healers as White Mages, they are fast, can still hit very hard with their lance charges, and have "arcane" anti-magic damage and resistances that make them very good at fighting the undead.
* Battle for Wesnoth, although it is unique as it is a open source project.
* Battle for Wesnoth as new updates often add animations to units which didn't have them before.
* Battle for Wesnoth calls its zombies "walking corpses", which makes sense, given the term "zombie" would not have existed in the medieval setting used. One scenario in an included campaign even parodies the Shaun of the Dead "zed word" exchange mentioned above. It makes a little less sense when a Walking Corpse kills and reanimates a mounted unit. You then get a new mounted "walking corpse" that never walks.
* Battle for Wesnoth, has a similar categorization. Brown is for apprentice magi, red for master (fire) magi, white for holy magi, silver for teleporting magi, and black for dark (necromantic) magi.
* Battle for Wesnoth has six factions in the Default era: Rebels (elves), Knalgan Alliance (dwarves and outlaws), Loyalists (humans), Northerners (orcs), Undead, and Drakes (dragonmen and lizardmen). The balance of powers oscillates with the day cycle. But in general Knalgan Alliance acts mostly as a powerhouse, Rebels as subversive, Undead and Drakes as cannons, Northerners as horde, and Loyalists as balanced.
* Battle for Wesnoth has the player fighting either Orcs or the undead at some point. Even the one in which the protagonist is a necromancer. And the campaign in which the protagonist is an Orcish warlord.
* Battle for Wesnoth: has the prince murder the king during a war. Said prince ends up killing himself later, so she takes over instead.
* Battle for Wesnoth, in which any newly-recruited intelligent living unit will have a random name appropriate to its type assigned to it. (Undead and animals remain nameless by default, though Liches will retain the name they had as living wizards.)
* Battle for Wesnoth: Isar's Cross is a very popular despite being hideously unbalanced. Even when the developers wanted to remove it in version 1.6, they just couldn't because of its popularity.

* Battle for Wesnoth. Necromancers, both alive and undead, have been involved in so many wars and battles throughout the various campaigns, since before the creation of the titular kingdom to hundreds of years after it's fall, that they have become somewhat of a cliche in Wesnoth.
* Battle for Wesnoth no non-combat medics; even the comparatively lowly Elvish Shaman and Saurian Augur have useful attack powers and the motivation to use them (to earn XP and advance, of course, just like other units).
* Battle for Wesnoth normally have green scaled skin, but the Burner family, with their stronger connection to their inner fire, have gray skin. As their fire gets stronger, it shows more and more through their scales and their veins that they eventually become blazing red, as in the case of Inferno and Armageddon Drakes.
* Battle for Wesnoth. Not withdrawing near the end of your strong time-of-day generally results in heavy losses, unless you're already in an overwhelmingly strong position. Particularly important for the Loyalists, Undead and Drakes, whose strength varies drastically with the time-of-day.
* Battle for Wesnoth, only orcs, undead and outlaws have units with the ability to poison, and only the former two can recruit them directly.
* Battle for Wesnoth skill cause the day/night cycle to act one stage closer to day (night is like dawn/dusk and dawn/dusk are like day).
* Battle for Wesnoth sources, including tactical manuals and characters' journals.
* Battle for Wesnoth splash screen which is also used for most storytelling segments of the campaigns.
* Battle for Wesnoth's Walking Corpses, and their level-up, the Soullesses. They follow the Russo rules, for the most part: any unit killed by a Walking Corpse or Soulless becomes a Walking Corpse or Soulless on the side of the Corpse that killed them, simulating The Virus.
* Battle for Wesnoth's wizards and other magic users are generally fairly squishy, particularly at lower levels. Taken to extremes with the Dark Adept, who has no melee attack at all.
* Battle for Wesnoth. The first farmer to attack this way reveals his/her motivation: "You killed my family! Die!"
* Battle for Wesnoth there's a monster who's basically this: the tentacle of a larger, unseen underwater monster.
* Battle for Wesnoth. They're strong in ranged casting, especially against magical creatures and the undead, and fairly decent in melee for a unit which mainly heals and (with its light aura) buffs its allies. A chaotic-alignment enemy that tries to attack the Mage will also have its damage reduced at night or evening by having to stand in that same aura.
* Battle for Wesnoth to each side's ability to recruit, support, and heal its units.
* Battle for Wesnoth unit, one of the levelled-up forms of the aforementioned Dark Adept, is skeletal and loses its old human characteristics in exchange for skeleton characteristics.
* Battle for Wesnoth where many antagonists are heroes trying to defeat the necromancers.
* Battle for Wesnoth, which has varying defensive bonuses and movement rates for each unit type on each terrain type. Elves are best deployed in forests, merfolk really have no business being out of the water, and may the Gods help you if you try to fight a dwarf on a mountain tile!
* Battle for Wesnoth, which is described as the tentacle of a larger, unseen monster.
* Battle for Wesnoth which ride skeletal 'chocobones' which are a clear parody of the Final Fantasy birds.
* Battle Frontier: 60 episodes. Inverted in that most of the filler was in the beginning, leading to a faster pace with the rest of the arc.
* Battle Frontier or two like Misty's Togepi, and even then the cameos were presented as one-of-a-kind in the region).
* Battlefront II, where smashing your ship against the side of an Imperial Star Destroyer on Mon Calamari cruiser does absolutely nothing.

* Battle Garegga, especially on the Stage 4 boss and Stage 5 midbosses.
* Battle Garegga has the boss Black Heart, one of whose attacks is moving down to you and letting the afterburners flare up.
* Battle Garegga is home to a very popular scoring trick involving using bombs on the penultimate boss's grenades.
* Battle Garegga (known more commonly as "rank") counter, as keeping rank managed is one of the most important aspects to securing a no-continue clear.
* Battle Garegga was released not only in Japan for PS4 and Xbox One, but the rest of the world as well (including regions that never got the arcade version).
* Battle Gear arcade games have options for fully manual transmission with clutch as well.
* battle-girl has the Great Machine, a massive computer at the center of the universe which acts as "source of cosmic order and enforcer of natural law."
* Battle Girls: Time Paradox. And they wonder why Hideyoshi's fever gets worse.
* Battle Girls: Time Paradox, everyone is trapped by ghost samurai and not allowed to leave until they tell the ghosts 100 scary stories. When they are done, they find Mitsuhide, who had been freaking out the whole time, had passed out and wet herself. She embarrassingly carries her wet pants on a large stick when they leave.
* Battle Girls: Time Paradox, Ieyasu acquires the Crimson Armor and goes mad with power. She declares she doesn't need her minions anymore and blasts them out of the building. Despite this, they remain loyal to her, and return to her service when she is defeated and the armor is destroyed.
* Battle Girls: Time Paradox, Ieyasu, previously a bitchy homicidal maniac, falls in love with Nobunaga after she defeats her, turning moe, clinging to her, and calling her onee-sama.
* Battle Girls: Time Paradox look and sound exactly like Hideyoshi's classmates Akerin and Tokunyan. Even though their personalities are completely different, Hideyoshi keeps calling them by her classmates' names and tries to treat them like her friends.
* Battle Girls: Time Paradox. She manages to prove her worth with her skill at staff-fighting. She was a fan of a show that involved staff-fighting.
* Battleground (1949). A jody call used by the protagonists' glider infantry platoon is the theme music of the movie.
* Battleground (1949), Hollie cracks under German bombardment, runs back into the town of Bastogne, and gets himself put on KP duty. This backfires when Bastogne is surrounded and the "rear" disappears, and backfires even worse when Hollie is killed by a German bomb.
* Battleground (1949) is about American soldiers besieged in Bastogne during the Battle of the Bulge.
* Battleground (1949), which also deals with the Battle of the Bulge, is a more realistic depiction featuring plenty of snow and then some.
* Battleground (2012), Hulu's one-season show about a political campaign, the primary election occurs halfway through the series. Unless things had taken an unusual turn (such as having the characters all join the same-party opponent's campaign), only a primary victory for the protagonists could provide any story for the rest of the show.
* Battleground (2012) with Jordan who is the son of the candidate's wife. While he believes that he is in a position of importance, he actually doesn't do anything and merely is given an office to keep him out of the way.
* Battleground 2016 Triple Threat for the WWE Championship on it, and that was an amazing match as well. The fact that Zayn and KO managed to steal the show from one of the most anticipated matches in WWE history is nothing short of astounding.
* Battleground 2017 had a variation where after capturing their respective flag, they had to plant it on a stand on the stage to win.
* Battle Ground (2020), Harry gets roped into a duel with a fire giant named Svengar. Harry, who, at that point is running on adrenaline, caffeine and pure unbridled cussedness, acts on instinct and hits Svengar with his default attack, a nice big blast of fire. Svengar asks him what he thinks he's doing, seemingly genuinely confused about why Harry thought hurling fire at a being made of fire was

a good idea.
* Battleground Europe) pretty much have to know the weaknesses of every tank type they might possibly come up against, because the game tries to realistically model armor penetration. Trying to pound away at the front armor of a Panzer MIGHT work, but it's far less dangerous to aim for exhaust vents, the cupola, or anything else with thin armor. If you are driving a vehicle (or pushing an anti-tank gun) with small caliber shells, this might be the only way you will ever damage them at all. Then, of course, your gunner could very well get shot in the neck by an infantryman because you forgot to close the hatch.
* Battle Ground: Harry tells the Erlking he is Margaret LeFay's son. The Erlking's response is a deadpan "Much is explained."
* Battle Ground: Marcone and Harry each take up a "banner" leading hundreds of members the makeshift militias of Chicago, and in Marcone's case his own men. They are also fighting in the thick of the battle with the two of them being embroiled in some of the heaviest fighting.
* Battleground scavengers were part of the reason that medieval weapons were built to have spiked ends, the rules of chivalry would often say that if time permitted you were to
* Battle Ground's remaining forces, turning the tide in the heroes' favor again.
* Battle Ground: The titular battle ground is Chicago, which has been targeted by the attackers specifically because it is a large city. Their plan involves slaughtering every person in the city, which they fail to do partially because they do not expect the citizens to put up much of a defense.
* Battle Ground while rescuing innocents—he's decided to embrace the supernatural world's fear of him in order to use it to help others.
* Battle Harem. The elven Elder is also surprised that both Sato's and the wives' power increases when the wives become more friendly with each other, without Sato entering into it.
* Battle Harem who has no romantic feelings towards Kazuma, and the feeling is mutual, but they have the closest bond amongst the party members.
* Battle Heater is about the rampage of a small electric space heater.
* Battle Hymn of the Republic) "Gory, gory what a hell of a way to die! He ain't gonna jump no more!" later on.
* Battle in Outer Space the Earth forces use appear to shoot bolts of electricity.
* Battle-Interrupting Shout: Somehow, someone manages to shout loudly enough over the noise of battle to interrupt it.
* Battle in the Center of the Mind, he considers visiting someone like Doctor Strange to probe his mind to find a way to defeat the villain, but decides against it at the last second, feeling the risk that Strange could discover he's not really Peter is too great. He did the same thing he accused Peter of that made him "inferior": prioritizing his own identity over someone's life.
* Battle in the Center of the Mind" is produced in studio but shot on film to convey its surreal nature.
* Battle in the Center of the Mind is when two or more little guys fight it out to see who's driving.
* Battle in the Center of the Mind, or some other internal or external threat to the mind's integrity.
* battle in the Fourth Ninja War everyone dons the uniform (except for Naruto, who isn't there).
* Battle Intro is "Loading... Loading... Loading... Complete. ... Activate termination protocol."
* Battle Intro: The introduction a character has before a fighting game match.
* Battle Is An Art: In chapter 6 of this web serial, the MC, Herah, precedes to kill a group of Oni after having her clothing blown away in an explosion. Later in this chapter, she gets into a fight with one of her teammates still unclothed.
* Battle Is An Art is a serial about a dragon-girl trying to please her Maker, who she hates, so as to not get her universe destroyed.
* Battle Is An Art this is actually the basic story structure, with these scenes being arguably better than the actual fight scenes.

* Battle Jackets. Everyone the Red Ribbon Army throws at Goku is defeated with ease and are only able to inflict a defeat on him when they hire the mercenary Tao Pai Pai, an assassin who also has extensive martial arts expertise. Also amusing to note that one creation of the Red Ribbon Army, Android 8 (who has a resemblance to the creature from Frankenstein (which is under Literature below), developed its own free will and decided against serving his creators and instead protect people and nature from the RRA.
* Battle Kid and its sequel. Other than his infrequently-updated YouTube channel, he has no online presence to speak of. Almost nothing is known about his personal life (other than that he's an American currently working in Japan), to the extent that nobody even seems to know his real name.
* Battle Kreaturez are designed this way. Notable examples include Geksaur, which combines attributes of lizards and dinosaurs; Scuthon, which combines traits of boas, pythons and crocodilians; and Silkiure, which resembles a furry wingless dragonfly/hornet/moth.
* Battle Kreaturez features Kraaster and its meta-form Kraaspine; Mons based on Solifugids, embellished with traits from scorpions, wolf spiders and harvestmen.
* Battlelords of the 23rd Century. A Snap-On Interface allows the user to swap his weapon cybernetic limbs with normal-appearing limbs to avoid attention.
* Battlelords of the 23rd Century. Fighter bases are part of the defensive structure protecting Alliance planets. Fighter types include Superiority, Advanced Superiority, Multi-Role, Fighter Bomber and Interceptor.
* Battlelords of the 23rd Century If a flamethrower's tank is punctured, it has a 20% chance of exploding.
* Battlelords of the 23rd Century. Protein tablets provide 2 units of nourishment to anyone who eats them.
* Battlelords of the 23rd Century: There are 10 different types of Pulse Weapons, each of which fires accelerated plasma pulses. There are also three different types of plasma grenades.
* Battlelords of the 23rd Century. Truth serum puts the recipient in a highly suggestible state for two hours and is 95% effective in getting them to tell the truth.
* Battlelords Of The Twenty Third Century have to fight the giant Spiders of the planet Driscoll VII. Adults are up to 2.5 meters tall and weigh up to 300 kg.
* Battlelore off of a Rousing Speech for the Last Alliance of Men, Elves and Dwarves.
* Battlelore's entire videography. It's not hard to imagine that if they had the time and budget, they would just make a
* Battlelore, where pretty much 90% of their material is about Middle-Earth somehow.
* Battle: Los Angeles and are no less squishy than humans, for that matter; the human Marines only have trouble taking down enemy soldiers because their vital organs aren't spread out through the upper body like with a human target, not because of superior armor.
* Battle: Los Angeles and brutally ruthless, but retain enough humanlike characteristics (such as caring for wounded, taking cover, using intelligent tactics and hand signals, etc.) that the similarities between them and the Marines becomes disturbingly apparent. At one point, one of the Marines asks another if he thinks the aliens were like them: just grunts who really had no idea what was going on, but given orders and sent to fight.
* Battle: Los Angeles are apparently after Earth's water; they set up massive machines to drain the ocean and seem to be powering their devices, and even their own bodies, with it.
* Battle: Los Angeles barely get a few seconds showing strange figures coming out of the water before a missile hits the camera.
* Battle: Los Angeles don't make any attempt at contact before they crash in and start killing people.
* Battle: Los Angeles, fast roping is used by the Marines twice. The first is to get off of an exposed freeway, and the second is when Nantz discovers the location

of the alien command center, but his helicopter can't afford to land. There's also a moment when after Nantz reaches the ground, more ropes suddenly drop from the sky as his squadmates loyally follow him on what could realistically be considered a suicide mission.
* Battle: Los Angeles has American troops discovering the aliens' vulnerability, and transmitting that information to the rest of the world.
* Battle: Los Angeles has a scene that could be seen as commentary on "enhanced interrogation" techniques in the war on terror: The soldiers have captured a wounded alien soldier, and they cut it apart (while still living), trying to find the vital organs so they can know where to aim to kill aliens. There is no dialogue condemning or justifying this act (although the information they find does put them on even footing in the battle).
* Battle: Los Angeles having a good time, an officer saying goodbye to his wife, and a soldier remembering his fallen brother.
* Battle: Los Angeles is as good a tactic for them as firing their guns. And there's thousands of them.
* Battle: Los Angeles. It isn't until Nantz delivers a sharp, confidence-boosting lecture to him that he shapes up. By the time of the highway battle, he's confidently giving orders and deploying his men.
* Battle: Los Angeles. Many of the traditional problems of urban warfare are omnipresent; multiple times the human soldiers are taking fire from unknown directions, the buildings herd them into lines of fire and killboxes, they have to take rooftops to get clear lines of sight, and combat damage destroys roadways and limits mobility. The urban terrain is eventually used to the humans' advantage later on, with them using the sewage systems to sneak up on an alien installation and the broken landscape as cover while holding a position against an attack.
* Battle: Los Angeles. Played with in that it takes several minutes to perform and the character is shown having difficulty with it.
* Battle: Los Angeles positive light; the viewer is left to determine whether or not the act is justified or heinous. The aliens themselves have a take-no-prisoners policy, and dead civilians can be seen throughout, as it's stated the aliens shoot up everything living in sight.
* Battle: Los Angeles, such as calling a helicopter a "helo" instead of a "chopper".
* Battle: Los Angeles. The alien invaders are ferocious opponents on the ground and are driving back the US military from Los Angeles and other coastal battlefields even before their drone support shows up overhead. The drones themselves are controlled from a large command center that, when taken out, causes the drones to crash and the United States military to regain air superiority over Los Angeles, but the war is far from over and the aliens remain a tenacious force on the ground.
* Battle: Los Angeles: The alien invaders land off the coast of California and immediately launch a military offensive. The movie is notable for being reasonably accurate in its presentation of the military and the aliens operating as a military force. They also bring in tens of millions of soldiers, something that would be required to take over and control a planet of billions.
* Battle: Los Angeles the alien invaders seem to be sucking up the oceans.
* Battle: Los Angeles, the military decides to deal with the aliens by evacuating the civilians then bombing the coastal cities being invaded. The aliens thwart this.
* Battle: Los Angeles: the squad dissect one of the alien troops (while it's still alive) in order to find its weak spot.
* Battle: Los Angeles use seven-barrelled arm cannons rather than the usual death rays.
* Battle: Los Angeles was set in... well, look at the title, but was filmed in Shreveport and Baton Rouge.
* Battlemachines infused biggy gun can be upgraded to have explosive rounds. Of course its just one of the many weapons you can make.
* Battlemachines with Carman Skiric, whose personal mech has no less than four chainsaws, and if he hits with one of them, the rest will hit automatically.

* battle managed to kill, and absorb the divine power of, a lesser god that literally fell right into his lap during the Spellplague. Using his new power, Asmodeus took advantage of the shifting planar cosmology caused by the Spellplague to forcibly "shove" the Abyss from its previous location to the bottom of the Elemental Chaos. While the Abyss and its inhabitants remain intact, there is no longer any easy way for demons to assault the Nine Hells in force from their new location.
* Battle Master glitches, player absence, cheating, and other instances where out of character events effect the game it is usually hand waved as some mysterious magical incident.
* BattleMaster which are designated "Command 'Mechs," because they have extra communications and command equipment to allow their pilot to both coordinate a sizeable force and shoot any enemies that present themselves (this is largely a fluff designation, though the Quirks rule provides Command 'Mechs with an Initiative bonus).
* BattleMech are usually powered by exhaust from the mech's fusion reactor (contrary to some of the novels, neither flamers nor Jump Jets actually pull plasma straight from the reactor, which is a near-vacuum. Instead, they run air through vents that allow waste-heat from the reactor to superheat it). Vehicles and industrial mechs with combustion engines engines make do with napalm.
* Battlemech crews, Dropship crews and Aerospace pilots, Mechwarriors and Aerospace pilots, Mechwarriors and Dropship crews, Mechwarriors and tank crews, Mechwarriors and infantry units, and Mechwarriors and other Mechwarriors.
* Battlemech Manual, a recent rulebook, with a flavor quote for the Machine Gun:
* BattleMech, or ejection system failure. Gladiatorial combat in the Periphery worlds or in the unrestricted and unregulated "blood pits" of Solaris (which is to Solaris fights proper what backyard brawling is to sanctioned MMA) is much more violent.
* BattleMechs are actually fairly safe to fight in (relative to conventional vehicles, anyway, to say nothing of service in the infantry); you can't actually
* battlemechs assault mechs drew such a huge crowd that it became an annual tournament. The sourcebook where this is first mentions includes some rules for simulating the games on the tabletop.
* Battle Meditation is spelled out in the first game as a technique for increasing the skill and harmony of a military force, although in that game Bastila couldn't use it for squad-level combat like every fight you get into. If you learn it in the second game, where it's an available power, you can use it to support your chosen side in the final battle on Onderon.
* Battlements, you get a warning message warning about possible “buggy collision detection at such heights”. However, if you strive for ascension to the very top of the Tower (which is very unlikely, since it may require stacking 20 double jumps with increased jump height or obtaining an exceedingly rare gun with recoil so strong that it can serve as a jetpack), after climbing those humongous clockwork-like steampunk mechanisms, there is another message from the dev that congratulates you with “breaking the game”, and a reward consisting of even more perks that are, well, quite useless if you are so good to have reached the top.
* "Battle Metal" by Turisas, although this does predate the use of it as a term for bands in a similar style.
* Battle mode isn't immune to this either. Funky Stadium (Wii) is always picked because it is huge and easy to stay out of everyone's reach. Wuhu Town (7) is picked the most due to the buildings giving players cover, thus they are harder to hit.
* battle monster, becomes aroused... his tail springs upright and then becomes engorged and veiny, just to make the point.
* Battle Monsters with his own disembodied head, complete with spitting out fireballs and swinging it around like a weapon.
* Battle Moon Wars (being based on Super Robot Wars below), whenever a new attack is introduced, it will either kill or heavily wound the enemy it's being used on.

Which is usually a boss. Which means it often does tens of thousands of points of damage in one attack. They're less effective in the actual gameplay.
* Battle Moon Wars features several characters from various Type-Moon shows dressed as magical girls.
* Battle Moon Wars. She was pretty goddamn torn up afterwards but she wasn't completely atomized.
* Battle Moon Wars, which kinda explain why he is unfazed by a cast of three five galge games around him.
* Battle Network 3 powerful, to the point that practically every metagame Mega Man was wearing it, halved HP or no.
* Battle Network 6 has some pesky sharks that must be avoided in order to progress.
* Battle Network. In both cases the shoulders are used for protection and performing special attacks so they're not exactly superfluous.
* Battle Network, is dropped, you can expect a MASSIVE increase in power.
* Battle Network series, Rock is his human Operator's dead twin brother. This relationship does not exist in the anime. The two are shipped. It is about as squicky as it sounds.
* Battle Network taking effect. That said, there really isn't anything that stops people responsible for the aforementioned Navis' creation from making more Navis capable of dealing with the danger, so the point stands.
* Battle Network which are most commonly acquired by defeating an enemy and most commonly involve using that enemy's attack. What's notable is that this is a basic ability of all characters and enemies but for the most part all characters except the main character prefer to use abilities directly related to themselves rather than the wider array of battle chips they could have.
* battle nuns who, in order to counter Index's spell, sticks pens into their ears to break their eardrums.
* Battle of Adventurers. It was ruined city with random vehicles suspended in the sky, everything was a shade of red, you could float around, and while it appeared submerged in liquid you breathe and talk normally.
* Battle of Adventurers movie attempts this trope with Gulfmon, but it looks like Gulfmon is looking away from the characters because of where his eye is.
* Battle of Bosworth Field once and for all. It had Richard III and Henry Tudor literally feet away from each other, fighting for the throne of England, and ended with a climactic betrayal by Lord Stanley which resulted in Richard's death and Henry's victory. Now king, Henry symbolically united the two houses by marrying Elizabeth of York and very effectively established his dynasty's power.
* Battle Of Bramall Lane, where Sheffield United had their goalkeeper sent off in the 9th minute, followed by two players who had been substituted onto the pitch being involved in a scuffle with the opposition that resulted in both being sent off only minutes after coming on. This left them with 8 players. They went down to 7 players when one was injured in the 79th minute minutes right after their opposition took a 3-0 lead, followed by another player going off hurt in the 83rd. Reduced to 6 players, the referee abandoned the match, which was subsequently awarded to West Bromwich Albion.
* Battle of Britain - A depiction of the very first major victory of the allies. A must for aerial battle scenes
* Battle of Britain air battles that they are keeping track of. At least until one of those calm collected scenes is interrupted by the roof of the command center caving in during an air raid.
* Battle of Britain, a pilot parachutes into a greenhouse in someone's back garden. A boy who lives in the home rushes inside, returning with a box of cigarettes.
* Battle of Britain, based on actual events, the British air forces have a HQ which controls all fighter squadrons that gets hit and almost destroyed.
* Battle of Britain contains a number of aces who are expies of real-life pilots like Adolf Galland (who was hired as an advisor for the film), Werner Mölders and "Sailor" Malan.
* Battle of Britain: "Leave the flaming fighters! It's the bloody bombers we want!"
* Battle of Britain showed a command center where personnel (many of them female

auxiliaries) had a giant map of Great Britain and the surrounding areas (coastal France, Norway, etc.) using croupier sticks to move counters representing friendly fighters and enemy bombers. Britain's dire situation is clearly illustrated partway into the film when this command center has part of the roof cave in due to a near miss, with the table getting smashed by fallen roof supports.
* Battle of Cannae on the Carthaginians, broke through the enemy forces... And kept running before the enemy finished the bulk of their forces and killed them too.
* Battle of Clavijo or sell them as slaves. They were saved by Santiago (Saint James the Greater as he is known in the legend) when he descended from heaven to intervene the Spaniard behalf against the emirate forces.
* Battle of Coruscant, Anakin bets Obi-Wan that he can blast twice as many vulture droids.
* Battle of Cowpens attempted and failed to use this tactic, then succeeded in using it later on by accident. The Americans were in 3 lines. The first two lines were to fire and retreat to the 3rd line, in order to tempt the British to charge in headlong for the kill. This trap didn't quite work, and resulted in a stalemate. When the British hit the third line, it buckled and fell back, prompting the British to charge for real. The American line halted, about faced, and fired at point-blank range into the British, with a bayonet charge as a follow-up. The battle ended quickly after that.
* Battle of Crecy. The Genovese crossbowmen, ordered by their French paymasters to fight without their pavises (huge shields that protected them from the murderous English longbows as they reloaded), were massacred by the English. When they began to retreat, the French knights charged right over them, either because their commanders were angered by the "cowardice" of the Genovese or were simply too impatient to wait for the exhausted Genovese to withdraw. The French knights paid for their king's arrogance and commanders' bad tactics, however, as they were also crushed by the English forces, faring little better than the crossbowmen had.
* Battle of Culloden was the final serious attempt at Scottish independence from England, and ended in less than half an hour.
* battle of Eylau. He was trying to stab Captain Marbot with his bayonet, but he was so drunk that he hit Marbot's horse instead, and the horse in question (a ferocious mare called Lisette) bit his face off.
* Battle of Flodden Field. The military bill was developed from the bill-hook, a hedging tool widely used in Europe at the time (and listed in tool-catalogues to this day as the "brush axe" or "brush hook"), by adding a thrusting point to the tool's hooked chopping blade, and extending the shaft to around six to eight feet. A foot-soldier armed with this versatile weapon could thrust with the point, use the hook to pull a knight from the saddle, and deliver powerful chopping blows with the edge of the blade.
* Battle of Germany: Most scenarios pre-1989 will feature the Soviets invading West Germany - quite realistic, as the Soviet Army's response to war (or NATO mobilisation for war) would be to execute its North German Plain Offensive Operation/Campaign to destroy as much of the 'forward' NATO forces as possible before NATO could fully mobilise.
* Battle of Gettysburg: On the first day of the battle, part of the Union army's XI corps had taken up a position in the town's cemetery as a reserve position. During the events of the first day's battle, the rest of the Union troops were driven back into the cemetery by the Confederates. On the second day of the battle, a junior officer to Gen. O.O. Howard (the XI corps commander) jokingly pointed out a sign in the cemetery saying "Shooting and Use of Firearms is Prohibited". The officer asked if they would get in trouble for violating the sign. Shortly after, a cannonball struck the sign and destroyed it. Gen. Howard reportedly quipped, "It appears the ordinance has been rescinded, and the shooting may go on."
* Battle of Gods, because Beerus is only there in the first place so he can find this mythical being and have a good fight, so he has nothing to gain by interrupting them.
* Battle of Gods even worse than before, like Frieza did in his first arc.
* Battle of Gods has left them behind. Meanwhile, Trunks introduces Mai as his

girlfriend, and they seem to be hitting it off by the end of the movie.
* Battle of Gods him, he joined in Bulma's birthday celebration before threatening to blow up the Earth.
* Battle of Hogwarts Also, several characters express disgust at the fact that Voldemort broke open Dumbledore's tomb to obtain the Elder Wand.
* Battle of Jutland, when the Royal Grand Fleet and German High Seas Fleet embarked on a campaign to either destroy the other or drive them away from their own shipping lines. The Germans ended up claiming a tactical victory as they sank more ships and lost fewer men, but overall it was a strategic victory for the British, as the German fleet would never be in a position to threaten the British like that again.
* Battle Of Kasserine Pass was impressed when he next encountered Patton.
* Battle of Khalkin Gol. According to the public Soviet official history, the Japanese took 61,000 casualties; according to the Soviet military's own estimations (kept secret), the Japanese took 29,085 casualties; and according to Japanese records, the Japanese took 17,716 casualties.
* Battle of Kulikovo), purportedly granting privileges to the bearer. In modern Russia, a "Battle of Kulikovo veteran" is a colloquial term for a phony veteran or a fraud in general.
* Battle of Lang Vei, Col. Lownds of the 26th Marines refused to send reinforcements to support the Green Berets and South Vietnamese militiamen being attacked by North Vietnamese tanks out of fear that his men might be ambushed en route, contributing to the disaster.
* Battle of Las Navas de Tolosa, 1212. The Christian forces were half the Muslim's. Instead of engaging them directly, the Christians took a long detour through a mountain passage
* Battle of Lepanto and their formation was in disarray, and the galleasses were intact.
* Battle of Lepanto had a side of this, as the rowers on the Ottoman fleet were enslaved Christians and upon capture of a ship the Holy League would free the slaves.
* Battle of Lepanto in both the Turkish and Venetian fleets were offered their freedom if they behaved. The Venetians were actually given weapons and told to fight whereas the Turkish galley slaves were just told to row - perhaps because while the Venetians were convicts, the Turkish rowers were kidnapped Christians and could hope to be welcomed back as war-heroes if they mutinied against their captors and thus could not be given arms.
* Battle of Lepanto of 1682 for the Ottoman Empire: the near complete destruction of their fleet and the loss of all their experienced crews at Lepanto signaled the end of the Ottoman supremacy over the Mediterranean (the fleet was quickly rebuilt in terms of ships, but the crews weren't even half as competent as their predecessors, and the Ottoman fleet never recovered), and the defeat at Vienna marked the end of the Ottoman expansion in Europe.
* Battle of Lepanto The Ottoman fleet was decimated by the brand-new Venetian galleasses at the start of the battle]] and continued to suffer losses in ships and manpower to the Holy League's heavier artillery and longer-ranged musketeers while unable to retaliate much as many Christian soldiers wore heavy armor that could take the Ottoman arrows, and when the Ottoman flagship and its escorts were about to overwhelm and capture the League's flagship the crews were reinforced by their convicts who had been promised pardons upon victory and knew would remain at the row for life if they were defeated, decisively turning the tide against the last Ottoman chance at winning (the Ottoman admiral's attempt at pulling the same failed miserably, as his rowers didn't trust him to keep his word and knew that the Holy League would free them on the spot).
* Battle of Lepanto who knew they'd be free if the League won. The Ottoman rowers turned on the Ottomans the moment they were given weapons and helped the League slaughter them.
* Battle of Lepanto, with the League losses in terms of personnel more than replaced by the slaves freed in the battle and the Ottoman naval power being

crippled for centuries due the loss of so many experienced sailors.
* Battle of Leuctra for Greece. Sparta was considered effectively invincible after centuries of reputation and their recent defeat of Athens. However, once Epaminondas applied this little thing called "proper tactics"... the conservative Laconians lost a thousand of their elite, irreplaceable Spartiates (peers of the realm and citizens, trained for war from birth, allotted a landed estate from the public treasury upon achieving the age of majority, and of which there were never more than 8,000 even at the zenith of Sparta's power) in that single battle, their reputation and hegemony over Greece both shattered forever.
* Battle of Lissa Navy a decisive victory over an Italian Fleet. Afterwards, battleship constructions tended to include ram bows. Unfortunately this led to the next generation of battleships causing increased damage in accidental collisions rather than being effective in battle.
* battle of Lützen (1632) being the work of a treacherous officer of his own army.
* Battle of Mahora showed up. Things quickly went downhill from there.
* 'Battle' of May Island collided with K17, sinking it, and damaging itself. K14 and K22 collided, though both survived. K6, in an attempt to avoid a collision with K12 after some miscommunication, ran into K4 seriously damaging it, and itself. K4 later sank with all hands after a collision with K7, which also damaged the latter. Altogether 270 men were killed.
* Battle of Midway, and essentially shifted the war from an offensive one to a defensive one for Japan as they could no longer project airplane-based force in the Pacific Theatre to rival the US.
* Battle of Midway became this for the Japanese, as their loss in the battle effectively halted their expansion and put them fully on the defensive for the first time. US Naval Supremacy was only a matter of time, however; the Empire couldn't stay lucky forever in the face of the Allies' overwhelming economic and industrial superiority.
* Battle of Midway own bomber planes were being fueled and armed. This resulted in setting off the munitions inside the hanger and, even worse, the aviation fuel supplies. This started an uncontrollable fire that forced it to be abandoned and scuttled later that day.
* Battle of Naboo were entirely by accident and a result of his incompetent screwing around? As long as he is free to be a complete klutz, that guy is a walking, er, stumbling disaster zone.
* Battle of Prague in 1648, the Swedish army looted many of the treasures collected by the Holy Roman Emperor Rudolf II, including 472 paintings, which became war trophies of Sweden. Some are still on display at Drottningholm Palace, though Queen Christina took much of the collection with her into exile after she abdicated in 1654; they ended up in various hands after her death in 1689.
* Battle of Ramree Island are any indication, saltwater crocodiles were responsible for killing five hundred Japanese soldiers out of a group of about nine hundred that tried to escape from British forces through a swamp.
* battle of Rorke's drift, soldiers held off a force of 4,000 Zulus through proper use of fortifications and sheer tenacity. The soldiers inflicted enough casualties on the Zulu warriors to convince them that taking the outpost was unnecessarily costly, and most of the defenders escaped with their lives.
* Battle of Salta he let the prisoners from the royal army go free after making them swear to never take arms against the patriotic forces ever again. He met them again in the next battle fighting for the king once more.
* Battle of Saragarhi. Twenty-one Sikh warriors fought to the last man to delay TEN THOUSAND Pashtun tribesman who were launching a raid into then British India, which would have undoubtedly meant the deaths of many civilians. Their Havildar (sergeant) put it to a vote, and they all voted to stay. They defended the mud-walled post with bolt-action rifles, and delayed the invaders long enough that they were met with British reinforcements and heavy artillery at their next obstacle. All 21 Sikhs were awarded the Indian Order of Merit, the the highest medal they could receive, the modern equivalents being the Param Vir Chakra or Victoria Cross

(which existed then, but was restricted to British forces).
* Battle of Savo Island was the worst defeat suffered by the US Navy in history, and led to a number of operational and structural changes to prevent such a disaster from happening again.
* Battle of Stalingrad, for the German forces in the Soviet Union. The Sixth Army was one of the largest German field armies, and the battle was soon painted by propaganda as an intense clash of ideologies: Nazism vs communism, Hitler vs Stalin. When the army was cut off, the Nazis immediately put a lid on all media reports regarding Stalingrad. Finally, the last remnants of the Sixth Army surrendered in February 1943. Nearly 100,000 Germans were captured, out of an initial force of 250,000. The scale of the catastrophe was so great that even Goebbels could not camouflage the defeat as he had the numerous other setbacks on the Eastern Front. It was the first time that the Nazis publicly acknowledged a failure in the war effort, causing German civilians to begin doubting their promise of final victory.
* "Battle of the Afflicted" and how it was tension all-around: Grêmio, a traditional team relegated shamefully the previous year, visited Náutico for the final game of a four-team group, top two receiving the promotion to the top level. At the 70th minute, Grêmio already one player down, receives a controversial penalty (the ball hit a defender's elbow) that leads to a second red card. The team surrounds the ref to complaining... and two are expelled, leaving Grêmio with the bare minimum of seven players. Chaos ensued, with the whole thing being interrupted for 25 minutes, meaning that if the game was restarted, there would hardly be any time for anything other than the penalty. And Náutico managed to have the kick saved, with Grêmio's counter-attack resulting in a goal that gave them the title!
* Battle of the Atom cause a little fallout, and they're still not sure what's going on between them.
* "Battle of the Bands" is the last major breather of the season before what happens in the finale, "
* Battle of the Bands, the Canterlot High students reward their last attempt at singing with booing and throwing fruits and sandwiches at them.
* Battle of the Beams. The Germans invented ever more complex systems of radio guidance for their bombers, only to have the British deploy even more complex counter-measures to successfully thwart them.
* Battle of the Bulge (1965). During the attack, German infiltrators switch the road signs around, making it appear that the road to Malmedy leads to Ambleve. The U.S. troops going to Ambleve follow the sign and are captured by the Germans, leading to the Malmedy Massacre.
* Battle of the Bulge (1965). Lt. Colonel Kiley (Henry Fonda) shoots the commander of a German tank, climbs up the tank and drops a grenade through the open hatch, killing everyone inside.
* Battle of the Bulge being filmed in Spain - in particular, the flat, arid, sunny, relatively tree-free part. Note that the actual Battle occurred in the Ardennes - which is hilly and heavily forested - during winter.
* Battle of the Bulge, but the effect was mostly psychological, as the actual operation was a failure.
* Battle of the Bulge depicts one the last major German offensive on the Western front Second World War using real tanks of the war.
* Battle of the Bulge doesn't understand what the Northern Lights are. She refers to them as dogs, because she thinks they look like dogs fighting in the sky.
* Battle of the Bulge. During the climactic tank battle, Sergeant Guffy's tank loses its main gun. His commander tells him to get back to the assembly area. Guffy refuses, insisting that he can ram the German tanks. His commander again tells him to retreat, this time adding "That's an order!"
* Battle of the Bulge, early days of the battle. As related by Hugh M. Cole in
* Battle of the Bulge era Chaffees. In reality only two Chaffees saw battle in December 1944.
* Battle of the Bulge: German army headquarters has a flat map of the campaign area

with symbols of the military forces being moved to indicate their progress.
* Battle of the Bulge, Gregor's beard is called "lip-fur" by the dogs.
* Battle of the Bulge had American M47 Patton tanks (painted in grey - which is completely incorrect for the period of the battle) standing in for German King Tigers and M24 Chafees standing in for the M4 Sherman.
* Battle of the Bulge has the fanatical Colonel Hessler: after disabusing his driver of the idea that the Ardennes offensive will allow Germany to win the war:
* Battle of the Bulge. Instead the dramatic tension is over the German efforts to capture fuel supplies from their American opponents.
* Battle of the Bulge is exactly like this. Either the Germans are completely succeeding or they aren't. In a battle that included over 800,000 soldiers, the battle was completely one-sided. Throughout most of the film, the Germans are succeeding in every single thing they attempt. Weather, machinery, and even the attitudes of the American leaders are on the side of the Germans almost to the point of being comical. At one point, a general even chastises a lieutenant colonel for suggesting that the Germans may intend to attack. When they do attack, the Americans are surprised. The only thing that turned the tide on the Germans was that they ran out of fuel. At that point, they completely gave up, despite still having weapons and ammunition and the ability to fight.
* Battle of the Bulge The American commander knows the German forces are low on fuel, so he sends a group of American tanks on a suicide mission to attack the Panzer spearhead and "run them out of gas".
* Battle of the Bulge The German tanks are depicted as all being the famous Tiger. Tigers were very rare in the real battle — they were too wide for the narrow roads and too heavy for the bridges. Panzer IVs were much more common.
* Battle of the Bulge when the Combat Engineers are summarily slaughtered by the SS infiltrators before they can do anything.
* Battle of the Bulge, with English-speaking Germans parachuting behind Allied lines to perform sabotage and disinformation missions.
* Battle of the Domes: A recently applied name to the long-standing rivalry between Idaho and Idaho State. The reference is to the fact that both schools play football in domed stadiums (and, at least through the 2020–21 season, also play men's basketball in said facilities).
* Battle of the Everfree is primarily focused on the Loyalists storming Titan's Citadel in the heart of the titular forest.
* Battle of the Fang, the defenders, for all their knowledge, are alone, with little to no chance of reinforcements and an army of sorcerers led by a daemon prince of Magic as their enemies. Regardless, they decide to make the Thousand Sons pay for every inch of terrain they get with blood.
* Battle of the Fang, the Space Wolf called Blackwing ejects from his heavily damaged scout ship seconds before it blows up. Drifting away from the blast, he soon finds himself in the path of one particularly large piece of fast-flying debris. He has just enough time for three thoughts, the last of which is "This is really going to hurt.". Cue plasma drive shaft smashing into armored Space Marine at a couple hundred mph.
* Battle of the Golden Spurs (1302), and demoralize the French cavalry thanks to several tactical advantages:
* Battle of The Hexes", the Golden Belt of Hyppolita granted Billie this power too.
* Battle of the Hürtgen forest lasted even longer for the US Army and saw significant numbers of men locked into a WWI-style battle of attrition that lasted between September 1944 and early January 1945: autumn rain and mud turned into winter snow and ice. Survivors remember the wet, cold and murderous misery.
* Battle of the Network Stars, who somehow didn't know it was a rug, poured a bottle of champagne over his head while celebrating her team winning a tug-of-war contest, ruining his toupee and royally pissing him off.
* Battle of the Planets and ships, fighting evil across the spaceways.
* Battle of the Planets in this first episode, while David Jolliffe voiced Jason. For some reason or another, Sandy Frank recast the parts after that, leaving Schell to take on the more prominent role of Jason (and voicing the character in a higher,

somewhat raspier voice than Jolliffe's take), while Dinehart took over Tiny.
* Battle of the Planets, the bad guys are able to retract the head of George Washington inside the mountain from Mount Rushmore where it becomes the face of a giant lava-monster thing.
* Battle of the Planets there was a move known as the "whirlwind pyramid". It could work with as few as two of the team.
* Battle of the Planets Zark even had his own robot buddy, a little robot dog named 1-Rover-1.
* Battle of Thermopylae. Note that Spartan law forbade them to retreat.
* Battle of the Sexes: A dramatization of Bobby Riggs' (in)famous challenge match against Billie Jean King.
* Battle of the Sexes, Billie Jean King is alerted by a friend that her husband is on the way. King scrambles to hide all evidence of the other woman who spent the night with her but forgets a bra, which he finds in the bathroom. As it isn't her size, he realizes immediately what's been going on.
* Battle of the Still Frames - Fight scenes are represented by freeze-frames instead of actual animation.
* Battle of the Teutoburg Forest named the 17th, 18th or 19th after that.
* Battle of Trafalgar by sailors of HMS Pickle. They chivalrously gave her some clothes and listened to her story. She was sailing with her husband in disguise aboard the French ship Achille. When her ship caught on fire she removed her clothes and jumped overboard. She swam toward some shipwrecked clinging to a spar. When they kicked her off she floated in the water until she was picked up by the British.
* Battle of Trafalgar is often cited as the most important naval battle of all time.
* Battle of Vukovar featured a force of around 2,200 Croatian infantry (with next to no armor, air support, or artillery) fighting against a much larger Serbian force that had significant armor and air support. Despite being horribly outmatched and surrounded, the Croats held out for 87 days and inflicted heavy casualties on their enemies in brutal street-to-street fighting.
* Battle of Waterloo is a pretty straight example though. Two almost evenly matched armies, with total victory in the war up for grabs. The defeat of Napoleon's army was so devastating that he abdicated the French throne just 4 days later. Ever since then, the word "Waterloo" has been synonymous with final and permanent defeat.
* battle of wits between the cops and the killer to try to find them before it's too late.
* Battle of Wits. Both of them have umbrellas, both of them want to share, but neither of them wants to be the one to offer since they view that as a "loss". So they both pretend to not have one and try to prove that the other does.
* Battle of Wits when they're paired up in art class. Kaguya ends up producing a photo-realistic drawing with roses on the side without even thinking about it, then deliberately tries to make it less appealing in order to hide her feelings for him (but keeps on finding the end result attractive no matter what she does). Shirogane, meanwhile, becomes engrossed in his work and accepts nothing but perfection, repeatedly tearing up his work until he manages to produce something that he feels captures her beauty.
* Battle of Wizna. Outnumbered over 58:1, with no tanks or air support, in only half-completed fortifications and horribly outgunned, the Polish commander "swore that he would not leave his post alive". And the Polish forces proceeded to inflict remarkably severe casualties upon the Nazis - before, of course, ultimately being annihilated.
* battle of Wörth), who was beheaded by a Prussian shell. The horse continued to charge with the headless body standing on it.
* Battle of Z will do this by having simultaneous four-player cooperative battles. The game trailer even suggests making teams out of Goku's whole family, or just of a single character's many forms.
* Battle over Hokkaido with Japan vs. USSR. The former depicts a Soviet invasion of

Hokkaido concurrent with a NATO vs. Warsaw Pact war in 1995, while the latter covers a Soviet invasion of Tokyo and Niigata following a U.S. military withdrawal from Japan.
* Battle Ox, a monster without a listed effect, was resistant against FIRE monsters, just so Jonouchi would get a disadvantage against Kaiba. Additionally, Dinosaur-type monsters were weak against FIRE monsters for no reason (perhaps a reference to the Cretaceous extinction?), giving Jonouchi an advantage over Dinosaur Ryuzaki. This is later dropped.
* Battle pets representing different regional variants of the same species generally use the same model with different colors. For example, the house cat model is used for twelve different battle pets, each with a different coat color or pattern. Many pets are also vastly downscaled versions of actual enemies, often with the explanation that they're a child or runt.
* Battle Pirates recently introduced a set of single-player campaigns, the first four of which introduce the player to certain basic tactics. One of these focuses on the use of fast ships and short-range weapons to exploit the minimum firing range of certain long-range defensive turrets; appropriately enough, this campaign is called "Run The Trench".
* Battleplates are starfaring triangles with 8km sides and a hull 1km thick. They were built to either prevent catastrophic meteor impacts, or to cause something closely resembling one, depending on deployment.
* Battle Pope is about a one-man version of this trope, though he does get help from others in the task.
* Battle Princess Madelyn: In the game's opening cinema and promotional material, Madelyn is pretty clearly a kid or young teen. However, her sprite and portrait in the actual game suggest an older teen, if not a young adult. This may be a spoof on games from the 80s and early 90s, where consistency in character design wasn't exactly a top priority in a lot of titles.
* Battle Princess Madelyn is based on the creator's real-life daughter, Madelyn. For that matter, Madelyn's in-game family is also based on her real-life family members.
* Battle Princess Madelyn, the main character is the creator's daughter Madelyn, and the character's family is based on their real-life family.
* Battle Princess Madelyn, which discards the Story Mode and beefs up the Arcade Mode, which was frequently mentioned as being the superior mode in reviews.
* Battle Programmer Shirase has a technique called "Three Sisters Deathblow", where three scrapped Cosmos satellites are programmed for re-entry. The first two serve to shield the third from atmospheric heat, so that it can enter the atmosphere intact and precisely hit a target on the ground (or sea).
* Battle Programmer Shirase's main character Akira has a 'special attack' where he drops three decommissioned Russian satellites in a row, insuring that the last makes it intact through the atmosphere on the target of his choice.
* Battleragers are dwarves enamored with battle. While they also protect their home clanholds, the fight is what they desire most, and they run towards it with a fervent glee that give even drow pause.
* Battle Rapping: Now let me give you some advice, you can't step to the flash/Because I'll smoke you like a blunt before I blow your ash/I'm just a rap champion sticking you in my shadow/Because you got no chance to outshine me in this battle!
* Battle Rapping's videos are full of puns referring to the historical figures themselves.
* Battle Realms, a unit will explode into red mist, and leave a puddle of blood on where they once stood.
* Battle Realms feature these heavily. The Serpent Clan, being an offshoot of the Dragon Clan, have their more insidious variation.
* Battle Realms gains a pistol halfway through the campaign to complement his sword, and will fire it when he's not engaged in a melee or ordered to attack.
* Battle Realms games, you can not actually purchase new units (aside from Heroes). Instead, you train the worker units (aka Peasants) into different schools to get

the units you want. Training them again in one of the remaining schools mixes their education and makes them into different units; and so on.
* Battle Realms has a passive ability called "Ye of little faith" that makes him nigh-immune to magic attacks. It's implied that his inherent pragmatism, skepticism and belief in material things (and his lack of faith in fantasy concepts like magic and dragons) is so powerful that it simply makes magic stop working on him.
* Battle Realms isn't popular, but due to its complexity and variety of units, also qualify.
* Battle Realms is ruled by a cabal of immortal Warlocks. In-game the Warlock (which consist of lesser members of the cabal) is one of their higher-tier units and the leaders of the cabal are their hero units.
* Battle Realms, no one knows where they came from or what they are, other than they kill everything in their path, and leave nothing alive, not even trees.
* Battle Realms. No rules are forthcoming, but it speaks volumes that one of the playing positions (the "hurler", who has a gigantic two-handed Atlatl) does double duty as a military unit in-game.
* Battle Realms of feudal Japan) is an Arnold reference, constantly talking with the accent and making references to his giant muscles.
* Battle Realms, Otomo, is one as well. Kenji will also begin resembling a Samurai in the Dragon campaign and will don a hakama in his final incarnation.
* Battle Realms: Soban can create small golems out of mud, who then act as free peasant units.
* Battle Realms: The 4 Clans; Dragon (Balanced), Serpent (Subversive), Wolf (Powerhouse), Lotus (Cannon).
* Battle Realms the Wolf Clans culture is based around a brutal sport called wolf ball. The sport involves the competitors throwing rocks at each other, no one outside the clan could survive the first round of it.
* Battlerite be exaplained as stage trickery, but considering the rest of his abilities they're probably actual magic too.
* Battlerite in terms of design. She probably has the most fanart of any character.
* Battlerite is much smaller than some characters, most noticeably Rook.
* Battlerite's Halloween events include a limited edition Cursed skin for Pearl, which makes her into this.
* Battlerite the team that destroys it by landing the final blow. Rewarding players for using one powerful attack to finish off an orb that the enemy team chipped away is deliberately made to encourage this behavior.
* Battle Royal Also expect at least one elimination by someone who's already been eliminated (or occasionally by somebody who's not an actual participant). There will also often be one wrestler who's universally hated by faces and heels alike, who everybody teams up to eliminate immediately.
* Battle Royale and he still survives it. Even after getting a shotgun blast to the stomach, a throwing knife into the eye and being shot through the cheek, he still gets up for the next hit.
* Battle Royale, and while the film adaptation's depictions of violence are more understated, it is no less frightening.
* Battle Royale crush on Noriko) ended up taking the cookies and eating them.
* Battle Royale doesn't feel her up, despite giving him ample opportunity to do so.
* Battle Royale explaining the backstories and motivations of the children.
* Battle Royale fans countering that both books draw from similar influences. And on that note...
* Battle Royale fic "Heads is Heads," only to Mitsuko Souma. Her last words are a shout of defiance.
* Battle Royale, for instance, features 50 students, all of whom get their own chapter.
* Battle Royale Game: A multiplayer mode in which players (often a very large number of them) eliminate each other until only one remains.
* Battle Royale Game art design, and incorporation of shelter-building mechanics.
* Battle Royale games invoke this figuratively, by having a group of players dropped onto an island to fight to the last one standing, and literally by having a

circle of damaging energy/fog close in around them at certain intervals to ensure that the dwindling players meet at some point and keep fighting.
* Battle Royale has aspects of this, both of the indirect type and the very direct type. There are several "groups" involved- Mitsuko, Kiriyama and 3 or 4 minor characters, all out actively hunting all the other students (and thus, each other), although 3-way confrontations are rare. However, there is the moment when Kyoichi confronts Shuya/Noriko, and Shogo appears, aiming at them both (although mainly at Kyoichi because he has clearly snapped. And, obviously, who could forget the Melee a Cinq/Six in the lighthouse?
* Battle Royale has a tendency to tap his nose when he doesn't know what to say. Lampshaded by his friend Takako Chigusa.
* Battle Royale has had a manga made. The manga series differs from the novel in three areas. It is far more graphic (not surprising, considering it's in a visual format), spends much more time on developing the whole cast of characters, and ramps up the action as it approaches the conclusion.
* Battle Royale has Memories, played by Shiori Kitano on a piano she finds in Shuya's base. As she plays, the scene cuts between her in the present, and her remembering how horribly she treated her father in years gone by.
* Battle Royale have exploding bomb collars attached to them that go off if they stray into areas of the island that are marked as off-limits, or just generally if they do anything to piss someone with a detonator off.
* Battle Royale in the 2010s, it was very easy to read a metaphor for violence in schools and political apathy towards the plight of the young people who suffered from it, even though Koushun Takami wasn't thinking about life in the US when crafting the story.
* BattleRoyale.io which describes the background of the setting, items and monsters.
* Battle Royale is a Kiriyama fanboy, that promised to serve him after being saved from a beat down.
* Battle Royale: Kiriyama, one of the most psychopathic students in the game, never says a word. The only noise he makes is blowing into a loudspeaker.
* battle royale literature, would later become revolutionaries after surviving the game. The only differences are the obvious country setting, and the fact that in the Japanese book the students face off against their classmates, while the American novel has strangers fight each other. There is also a lack of guns in the American book (which is ironic).
* Battle Royale manage to leave the confines of the island, forcing them to compete in the titular Battle. Moreover, as the "game" goes on, more and more zones of the island are made off limits, tightening the circle.
* Battle Royale manga is an Emotionless Boy. He was rendered incapable of emotion when he was brain-damaged at the age of six (since birth in the original novel) and is described in-story as a sociopath. Add to this his phenomenal analytical ability and intelligence and you've got a very tough match-up.
* Battle Royale manga. Shougo insists that the heart is just a muscle. Everything about humanity, whether good, bad or indifferent, comes from the brain.
* Battle Royale, Mitsuko sits on a swing after disposing of her mother's dead body.
* Battle Royale; most of the pupils are delinquents and dropouts-in-waiting.
* Battle Royale movie subverts this horribly. Sugimura spends all of his screentime looking for a girl he never had the courage to confess his love to. When he finally finds her, she panics and sends several bullets into his chest, something she wouldn't have done if he had confessed his feelings earlier... He still has the time to express his feelings in his agony, however. To quote Kotohiki's reaction, "what the hell am I supposed to do now?"
* Battle Royale never speaks a word and is shown as mostly blank. His character's expanded on a bit more in the movie's novelization — and is still mostly cold and emotionless.
* Battle Royale novel, the teacher throws chalk at students who talk in "class". The first time. The second time, it's a knife.
* Battle Royale Of course, she likes him more than he does towards her at this

point... but nonetheless, he still has a crush on her.
* Battle Royale of Shogo Kawada, his class were forced to fight in an abandoned urban ghetto.
* Battle Royale provides scenes such as the heart-to-heart at the clinic, with wonderful performances from the real school-age actors.
* Battle Royale, said survivor gets a life-time pension meaning they're set for life.
* Battle Royale: Several characters have nightmares, usually in the form of dreaming about discovering their classmates mutilated corpses. In the manga version, Shogo Kawada says that a nightmare is the brain's way of working through the experienced horror.
* Battle Royale's facial expressions are hard to illustrate other than using question marks for confusion.
* Battle Royale, she was stunned to find out that someone had already done the whole "youngsters killing each other" theme. Her editor encouraged her to publish it anyway.
* Battle Royale, Shuuya has an admirable tendency to jump into a conflict to help the underdog. The problem is that he never thinks about what he'll do after he becomes part of it. He usually reveals his Indy Ploy after the conflict is already resolved and the other person asks what he was thinking.
* Battle Royale: Some of the more capable girls become this by necessity. Most notably, Mitsuko Souma and Takako Chigusa.
* Battle Royale sticking up from a broken wooden pole. To make it more ludicrous, he stands as if he were standing on solid ground, both feet spread wide apart..despite under a square millimeter of one foot (if that) actually having support.
* Battle Royale takes this to an extreme. After children in Japan start refusing to go to school, the government starts kidnapping entire classes of teenagers, putting them on an island, give them guns and other weapons, and tells them to all go kill each other, last one alive gets out free. Many of the teens, instead of fighting against the government, see this as an opportunity to wreak havoc and start mercilessly killing off their classmates. Not to forget that even before the games began, we saw them do cruel things like lock the female protagonist Noriko inside a bathroom (with insulting graffiti on the walls) and stab a teacher in the buttocks.
* Battle Royale that both help the Supervisors locate them and track their health condition, and would extract materials from their bloodstream to construct a tiny bomb (just big enough to cause a fatal stroke) and blow it up in case they try to leave the battlefield, venture into a forbidden area, or if they're remotely triggered. One of the vital steps of any plan to "cheat the system" and escape involves finding some way of shutting the nanomachines, usually by finding a radio and the correct codes.
* Battle Royale that goes off if they try to escape the island or try to remove it.
* Battle Royale: The author tried to make the readers believe Shinji Mimura and not Shuya Nanahara was the male lead. As such, his death in the middle of the book would come as a big surprise. This sometimes failed because Shuya appeared on the cover designs of certain editions.
* Battle Royale, the members of each class selected for the Program have exploding collars placed round their necks. These collars will be detonated under the following conditions: if a student attempts to remove or otherwise interfere with their collar, if a student gets caught in a forbidden zone, or if twenty-four hours pass without any deaths. In the latter case, the collars of all the students who are still alive will be detonated and there will be no winner.
* Battle Royale. There's been a notable surge in new fans ever since he declared it to be his favorite film made since 1992.
* Battle Royale: This happening to Shogo Kawada is the reason he had to participate in the Program not once, but twice.
* Battle Royale, this is a constant occurence with practically every character. Generally the steady-stream of thick rivers of tears.
* Battle Royale, this is Hiroki Sugimura's reaction to stray cats...and his

classmate Kayoko Kotohiki.
* Battle Royale: This is the main premise of the film and the book it's based on: a totalitarian Japanese government dumps a bunch of Japanese high schoolers on a deserted island and forces them to kill each other for sport.
* Battle Royale to become monsters and kill each other. Some take quite easily to this new role, others never do.
* Battle Royale to enforce their compliance with the government's "game". One student dies when his collar goes off when he's stuck in a forbidden area.
* Battle Royale took a fatal shot from another student late in the story. He would survive long enough to help the protagonists escape off the island in a boat.
* Battle Royale to prevent the children from refusing to kill one another. Or as punishment speaking out of turn, as demonstrated on one boy.
* Battle Royale towards Sugimura. When she asks him if she was ever more than a friend to him, or if they could ever have been more, he hesitates. She then proceeds to joke, "Too intimidating for you, huh?" As Takako is known for being a more aggressive woman, it's later shown that the girl Sugimura likes, Kayoko, was a more gentle, shy girl.
* Battle Royale traditional. Action-adventure? That's perhaps the best when combined with horror, but given the deep, requires-substantial-thought satire and themes "action" seems misleading. When you go to buy a copy you could end up in the Sci-fi section, the horror section...If that's not confusing enough, many people also characterize the film as a VERY dark comedy.
* Battle Royale when she enters the hut where poor Megumi is hiding out.
* Battle Royale with more accuracy than you'd think he would. The injuries didn't seem to do a thing to him.
* Battle Royale, with the "Nana" in his last name meaning seven. Used to be nicknamed "Wild 7" when he played baseball, which is also the brand of cigarettes Shogo Kawada smokes.
* Battler takes Beatrice (and a gold ingot) with him, even though she thinks she won't be able to fit in the world outside Rokkenjima. When they are on the boat in the middle of the ocean, she asks him to close his eyes, kisses him... and jump into the sea with the 10kg ingot. Battler's response is to jump and drown with her, saying "I won't let you go" (in reality though, he somehow survives, and loses his memories after an accident on the land).
* Battler would have kept his promise to Shannon/Yasu, Yasu would have still thought him/herself as furniture and so it still wouldn't have saved him/her.
* Battles between capital ships often fit this trope closely, as large ships can't manoeuvre very well, and have
* Battles between the upper-level mutants in the Marvel Universe tend to play out this way, especially when uber-telekinetics, powerful energy projectors or Omegas are involved. Fights between ultimate enemies and heroes empowered at the last second to fight them also become as spectacular. There are even occasions where both sides have weaknesses that they try to avoid or exploit and the outcome is decided when someone gets lucky with the 'rules'.
* battle servitors capture an enemy with a trio of tractor beams known as gaol-fields that then rotate in different directions to tear the target apart.
* Battleship appear to be an advance scout force whose task is to notify their homeworld about humanity's defenses in preparation for an actual invasion.
* Battleship, assuming that enough crew, fuel, and ammunition for its main guns are on hand for that.
* Battleship can be seen from the outside, especially since it cuts through the clouds. However, a naval fighter jet still ends up slamming into it moments after it goes up.
* Battleship carrying fighters. This is essentially a capital ship with the primary offensive options being its own big guns, with the fighters to serve as interceptors against incoming enemy strikes or to provide utility and ability for surgical strikes when main cannons are too blunt of an instrument. The Battlestar
* Battleship deck armour in general was significantly thinner than the belt (side) armour, making them vulnerable to attack from above. Hence the

* Battleship, Earth found another planet in a "Goldilocks" zone around another star, not realizing that if they can actually come here, rather than merely sending a radio signal like us, they might want the planet instead of becoming friends. By stopping the advance scouting party from reporting back our weak defenses, a full scale invasion, which we had no chance of winning, was prevented.
* Battleship engages the alien ship at close enough range that they not only can see each other visually, the shells can be fired directly at the alien ship without having to go through a ballistic arc.
* Battleship gun could fire seven-ton shells almost 30 miles), but to move it you either have to already have a rail line handy or build one for it and once you get it there it still takes a team of 250 men over two days to actually assemble it.
* Battleship have hands that are apparently four opposing fingers. Also their feet appear to be similar to dogs' or cats' feet, in that they appear to walk on their toes.
* Battleship Kotemkin and are then sentenced by the court to re-enact the Odessa stairs sequence on a weekly basis, the exec ('dottore') posing as the director and Fantozzi literally appearing as the baby in the pram.
* Battleship: Not built by Manticore in centuries, but serve as something of a jack-of-all-stats for the Havenite navy, which has many more systems to protect and would otherwise tie up much of its wall of battle in picketing said systems.
* Battleship Potemkin is a movie that lasts several hours, it's hard to understand and generally liked only by snobs.
* Battleship Potemkin is pure fiction, worked into the story for propaganda purposes. Which didn't stop one of the soldiers involved from coming to the police and confessing about a double murder after watching the movie.
* Battleships are bigger and better (and slower) than cruisers, and can uniquely use "XL"-sized weapons in a spinal mount, turning the entire ship into a self-propelled
* Battleships compared to other types of warships, at least until the
* battleships could dream of, but they can't be moved at all without railway tracks and a locomotive to tow them.
* Battleships Forever adds a damage multiplier to the base damage when fully charged, causing it to deal +150% damage while making the beam much larger.
* Battleship/Ship of the Line: Rare, compared with the below options. Some older ships, such as the
* Battleship tactic to overwhelm the defenses. Their aforementioned Aegis systems also failed to work given that the attackers were often too close and failed to properly show up on radar.
* Battleship, the main character Alex is a directionless loser who's all but forced into the military by his older brother in the hopes that it'll straighten him out. The older brother is successful and straightlaced... and his death early on in the movie motivates Alex into becoming a better soldier.
* Battleship, the US Navy bent over backwards to provide both locations and personnel for the shoot. Those extras and even most of the named characters in the film? Serving personnel, some of them playing themselves.
* Battleship to deliver a deadly barrage at point-blank range (for a warship).
* Battleship Yamato to withdraw from the fight, and was ultimately a contributing factor in the decision to withdraw the entire Center Force from the fight.
* Battles of the Clans, Morningstar asks his warrior if a mangled, frozen bird is all the prey he could find. The warrior says "No, actually. There are squirrels and mice all over the place out there, but I thought you'd prefer this." Morningstar apologizes.
* Battle Space universe, avoids most of these aspects. While played on a 2D board, ships act in 3D space, there is no friction so all movement must be countered by spinning the ship around and applying thrust, some larger ships (jumpships/warships) have ambiguous hulls to hide the bridge (though, it should be pointed out that every captain would have intel on all non-top secret ships, so this would be moot), and fighters, dropships, and a few landing craft are the only things that can enter the atmosphere without being destroyed. There are still many

that are unavoidable (space travel times, ship class names), but most of that is handwaved as otherwise it would be horrendously boring.
* Battle Space universe. What makes it more confusing is that it's a 3D space game played in 2D, so you have to take notes to each ships position, inertial direction, its pitch, yaw and roll rates, usually playing on a map which is about 300 times too small for any space encounter. A movement phase for a single fighter might take up to around 5 minutes (or more if the player needs to calculate ahead a few turns, which they undoubtedly will have to), which is probably one of the reasons why the game never took off.
* Battle Spirits Brave, the two scientists Kenzo and Stella serve this position to the crew of the Beautiful Sophia. They're essentially informants. In Kenzo's case it's surprising, because he was one of the main heroes in the previous season, and has mostly retired from battling.
* Battle Spirits Saikyo Ginga Ultimate Zero: As long as you have a ship, you can warp from planet to planet at impressive speeds in this world.
* Battle Spirits Saikyo Ginga Ultimate Zero, there's Magical Star Saki. She also plays card games in her spare time.
* Battle Spirits Shonen Gekiha Dan, managing to even be admired by arch-enemies as time goes on.
* Battle Spirits Shonen Toppa Bashin and is certainly overjoyed when they're able to become friends.
* Battle Spirits Shonen Toppa Bashin, both Number Nine and Smile have their hair like this. It's likely to show that they're both villains with a hidden agenda.
* Battle Spirits Shonen Toppa Bashin manages to befriend his rivals, including the champion battler J and mysterious Suiren. He pulls this off simply by being brutally straightforward in everything he does.
* Battle Spirits Shonen Toppa Bashin. She can even get lost in her own workplace. For inexplicable reasons, she's always given delivery missions.
* Battle Spirits Shonen Toppa Bashin: This is applied to Card Sensei and Masako, the protagonists' male and female teachers, in their younger days. Flashbacks show Masako wearing Card Sensei's signature blue sweatsuit, but in pink. These are also their eye colors.
* Battle Spirits Shonen Toppa Bashin, Toppa Bashin is a huge fanboy of the champion battler, J. When he finds out he's a chosen card battler, as is J, the two get to work together.
* Battle Spirits Shonen Toppa Bashin to try and catch a runaway Aibou, beating all his school’s runners, all the sports teams try to recruit him. Of course, he has no interest in joining any team.
* Battle Spirits Shonen Toppa Bashin to try and lure My Sunshine to the Battle Spirits Center.
* Battle Spirits Shonen Toppa Bashin (Unlike Seven, her personality doesn't change, but she does intend to come off as cooler/sexier that way.)
* Battle Spirits, there are numerous cards that allow you to regain spirits from the trash (discard pile).
* Battle Stadium D characters can fly, which makes sense, since the game would be kinda broken if they could, due to its gameplay. To make up for it, they can do quick dashes in the air.
* Battlestar: Any capital ship worth its salt carries fighters, but the Imperial Star Destroyers and Mon Calamari Star Cruisers make big business out of it.
* Battlestar Galactica (1978) a lower rank for commissioned officers with flight status; in some real-life militaries the rank of Lieutenant j/g or Ensign is only given to non-pilot aircrew or ground support personnel, at least in peacetime.
* Battlestar Galactica (1978) and many other shows, was also a member of the Four Preps, a vocal quartet which enjoyed some success in the late 1950s with hits such as "26 Miles (Santa Catalina)", "Big Man" and "Down by the Station", all of which he co-wrote.
* Battlestar Galactica (1978) and move small items across a table if he concentrates hard enough.
* Battlestar Galactica (1978), and wants to launch an offensive. Cain is brilliant,

but wrong; as Adama (Lorne Greene) points out, two Battlestars, encumbered by a refugee fleet that is essentially defenseless and that houses the last survivors of their people, can't win a war against the Cylon Empire. They must run or die, and Cain eventually realizes that Adama is right.
* Battlestar Galactica (1978) are another example of absolute alien xenophobes, dedicated to wiping out all forms of alien civilizations they perceive as a potential threat, the humans being their top target.
* Battlestar Galactica (1978) as the Earth unit: "microns", for example, were time units in BG (as opposed to distance units on Earth).
* Battlestar Galactica (1978) Colonial Viper missile into his mouth, resulting in Mattel being sued and recalling the toyline.
* Battlestar Galactica (1978) Commander Cain carries a swagger stick as part of his larger-than-life military maverick persona.
* Battlestar Galactica (1978), episode "Lost Planet of the Gods" part 2. The planet Kobol has pyramids, the remains of an ancient civilization. Caprica also had pyramidal buildings.
* Battlestar Galactica (1978) episode "War of the Gods Part 1''. Count Iblis claims to have great powers and knowledge. The Council of Twelve gives him three challenges: to deliver their greatest enemy (Baltar) to them, to lead the fleet to Earth, and one more to be named later.
* Battlestar Galactica (1978), especially in the episode 'Fire in Space' except for almost losing Muffit. He is initially downtrodden by the loss of his daggit during the Destruction but soon lights up when he gains a robotic replacement and has never been without smiles and giggles since.
* Battlestar Galactica (1978) featured an asteroid penal colony that had gotten lost in the shuffle of the Thousand-Yahren War some generations before the start of the series. The prisoners are the descendants of the original convicts sent there, ditto for the guards. The locks on the cells haven't worked in ages; people stay where they are because of being stuck in a rut. The guards, lacking real training and conviction, would not be able to stop a prisoner from escaping if one really tried. By chance, Starbuck ends up in a cell there, and the mold is broken; he escapes easily and manages to summon the fleet to his location, and with the arrival of Commander Adama the colony is closed and the prisoners' sentences commuted.
* Battlestar Galactica (1978) featured laser bolts that would arbitrarily explode after traveling a certain distance.
* Battlestar Galactica (1978), had the Twelve Colonies with greater gravity than Earth so the Galacticans were considerably stronger and could jump much higher.
* Battlestar Galactica (1978) had this happen regularly whenever the Cylons attacked.
* Battlestar Galactica (1978) has a fairly straightforward system using familiar sounding ranks. A Commander commands a Battlestar. Immediately beneath him is a Colonel. A Captain leads the Viper wing, and leads a squadron, and has a Lieutenant as a wingman. Other Lieutenants command two-Viper elements, and have a Flight Sergeant wingman. There are also Flight Corporals. Weirdly, Lieutenant Zac dies to evoke pathos in the first episode, on his very first Viper patrol. Nepotism? He is Commander Adama's son, after all.
* Battlestar Galactica (1978) has the requisite rush for the warriors to get their flight gear. In addition, a battlestar is so big a ship that the scramble run includes an internal railcar system running the length of the ship to ensure that pilots report to the launch areas at once.
* Battlestar Galactica (1978), having been produced at the height of the craze, strongly implied that this was the case in its universe, as the Galactica encounters sufficiently advanced aliens with more than a passing similarity to angels as perceived in the Mormon religion. The 2000s series goes a step further, explicitly identifying the "Lords of Kobol" with the Twelve Olympians of classical Greek mythology, though how the Colonial religion and Greek religion are linked has yet to be explained.
* Battlestar Galactica (1978): in cheaper, 1970s computer graphics, you saw the

same in the original Galactica's bridge.
* Battlestar Galactica (1978): In issue #12, Starbuck, Boomer, and Athena, on recon patrol, stumble across Scavenge World, a planet composed entirely of spare parts and inhabited by alien scavengers. They are captured and brought before the throne of Eurayle, the leader of the scavenger "family." Meanwhile, the Galactica is buffeted by an unexpected Cylon attack. The Cylons are momentarily averted, and the Fleet arrives at Scavenge World. Learning of the Galactica's situation, Eurayle makes a proposal - she will use her powers of the mind to free Commander Adama from the Memory Machine if she can receive Lieutenant Starbuck in return. Starbuck eventually agrees to her offer. After the Cylons are defeated, Starbuck stays behind with her while the Colonial fleet moves on. Starbuck escapes from Scavenge World and returns to the fleet in issue #19. Eurayle pursues the fleet in issue #20, and Starbuck and Apollo meet with her. Starbuck agrees to fight her in a duel to the death. Eurayle wins, but after she leaves it is revealed that Starbuck faked his own death. The Scavenge World ship that Starbuck used to escape winds up giving the Colonials the coordinates to Earth and the series ends with the fleet making a hyperjump to their final destination.
* Battlestar Galactica (1978). Initially shocked by her size, he resumes his rhetoric after finding out that she's the last of her kind.
* Battlestar Galactica (1978): In one episode, Starbuck was assigned to the "Recon Viper", a fighter with more powerful engines at the expense of being completely unarmed. It was run by an AI named C.O.R.A., who acted like Starbuck's pouty girlfriend.
* Battlestar Galactica (1978): In the episode "The Living Legend", the Galactica encounters the battlestar Pegasus, whose captain is the Colonial military legend Commander Cain.
* Battlestar Galactica (1978). In "The Gun on Ice Planet Zero", the surface of the planet Arcta is entirely covered by ice and snow, with a constant blizzard blowing overhead.
* Battlestar Galactica (1978) of "lightspeed" — and usually slower since not all ships could manage that pace — and yet they passed through at least three different galaxies in the course of the series. Although that's as much bad research as Speed of Plot.
* Battlestar Galactica (1978) often did this unironically. We don't actually see the light source.
* Battlestar Galactica (1978) scale. Both had their share of movies and spin-offs.
* Battlestar Galactica (1978) series, despite Sheba's initial agitation over her father dating young women.
* Battlestar Galactica (1978), Terror groups also play a prominent role, for both sides. Pilots often take the role of grunts.
* Battlestar Galactica (1978) than it is to ignore the latter few seasons of the reimagined series).
* Battlestar Galactica (1978): The angelic-like ascended aliens (called Beings of Light) from the original series did this when they needed Apollo's help with a mercy mission. He got a sidekick that only he (and later Starbuck) could see called "John".
* Battlestar Galactica (1978), the Council of Twelve decides to lift the state of emergency the fleet has been operating under ever since the destruction of the Twelve Colonies. They also appoint one of their number, Siress Tinia, to serve as Adama's "aide" to ensure he complies with Council policy. She spends her time countermanding any military action she deems too aggressive.
* Battlestar Galactica (1978). The Cylons in the original series were not created by humans, but by a different and now-extinct race. They were more like a weapon that got out of control than a species in their own right, as the newer series' Cylons were.
* Battlestar Galactica (1978), the Cylons were originally a race of lizard people. They built robots to act as their servants, but the robots rebelled and wiped the lizard people out. Eventually, these robots ran into humanity. Humans have already been at war with these robots for a thousand yahrens when the series opens.

* Battlestar Galactica (1978), the Cylons were originally meant to be reptilian humanoids who wore robot-like armor and spoke in synthesized, robot-like voices. By the time the Pilot was filmed, however, their backstory had been changed so that they were now the machine descendants of an extinct reptilian species.
* Battlestar Galactica (1978) the Cylons were. The pilot movie, in turn, turned out oddly prophetic about events following the 9/11 attack.
* Battlestar Galactica (1978): The episode "Lost Planet of the Gods" part 2. After Adama, Apollo and Serina escape from the tomb, a Cylon Centurion suddenly appears and shoots Serina, mortally wounding her.
* Battlestar Galactica (1978), the humanoid Cylons sport glowing red eyes as well, though this isn't in the actual show.
* Battlestar Galactica (1978), there's a female singing group whose members each have four eyes and two mouths (and apparently they can each sing two different notes).
* Battlestar Galactica (1978) the Seraphs are this to the Colonists. Interestingly, the Colonists regard the Seraphs as exactly this — technologically advanced aliens.
* Battlestar Galactica (1978) The small observation dome on top, where courting couples go to gaze at the stars, was originally used to take navigational fixes.
* Battlestar Galactica (1978): The war with the Cylons has been going on for millennia, except when it's been going on for only many years. One episode specifically says Starbuck was orphaned about 20 years ago, in one of the first Cylon raids.
* Battlestar Galactica (1978): Upon seeing Starbuck with another woman in a Viper launch bay, Athena vents steam from the catapults on him.
* Battlestar Galactica (1978) was the eschewing of the cheesy storylines and character designs for a tone that was deadly serious. The silly names were now just callsigns. The Cylons had upgraded to look human, and even the foot-soldiers didn't speak, thus no "By your command!" And Baltar was a scientist rather than a scenery-chewing villain.
* Battlestar Galactica (1978)) When launching their nukes, the Commandant even tells his subordinates to only put the most "critical and loyal" citizens into bomb shelters, citing the projected casualties from the Western Coalition's nuclear retaliation as "acceptable".
* Battlestar Galactica (1978)). When they tell him that they're aboard a ship, he doesn't believe them, as no ship could be that large.
* Battlestar Galactica (1978) where the pilots wore much more practical helmets that nonetheless included lighting whose only purpose was to make actors' faces visible.
* Battlestar Galactica (1978), you were probably an ace pilot. Justified in that only the very best pilots survived the destruction of the fleet.
* Battlestar Galactica (2003) (Admiral Adama), Lymari Nadal (Giana) is Olmos's wife, Susan Hogan, the wife of Michael Hogan (Saul Tigh) plays the lead judge in Baltar's trial, and Kerry Norton, Jamie Bamber's (Apollo) wife plays a medic.
* Battlestar Galactica (2003). After Adama is shot, Tigh's wife is telling him that he is in charge now, even though he does not have the character or charisma for being in charge. Then, let's just say things go downhill...
* Battlestar Galactica (2003). After President Laura Roslin interferes with Commander Adama's authority over his own people, Adama stages a military coup and assumes total authority. Unlike other examples however, he eventually realizes the situation has gone too far and willingly hands power back to the President.
* Battlestar Galactica (2003) aft of the giant mushroom-shaped shield cap at the bow. Even the Navy SEALs are still around, except the acronym was updated to SEALS (the second 's' being "space").
* Battlestar Galactica (2003) a genius. He has in-universe fans. He also (indirectly) caused the nuclear holocaust of the Twelve Colonies and if you say you never wanted to strangle him you're lying.
* Battlestar Galactica (2003), all in the name of her suicidal quest to obliterate the Cylon fleet.

* Battlestar Galactica (2003)" allows the much more competent Chief Tyrol to take over.
* Battlestar Galactica (2003). "All this has happened before and all this will happen again."
* Battlestar Galactica (2003). All those cliffhangers will be much easier when you can watch the entire show on DVD. Not to mention dispensing with week-long breaks between setup episodes and payoff episodes, and that seven episodes exist in their full form only on DVD, having been truncated for airing.
* Battlestar Galactica (2003), although generally Cylons don't get a trial, and are murdered on the way to and from the specially-constructed holding cell. Notably, shortly after Boomer had shot Commander Adama and was being transferred, Cally pushed through the near-riotous crowd of crew and shot Boomer herself. The writers confirmed this was a reference to Lee Harvey Oswald. Cally got 6 weeks in the brig for "unauthorised discharge of a firearm".
* Battlestar Galactica (2003). And although the Cylons initially hold it over the humans, they eventually show themselves to suffer from the same problem.
* Battlestar Galactica (2003) and attacks people still clinging to such things, including Roslin. Later in the same episode, Starbuck and Apollo arrest a would-be assassin who has a wallet full of banknotes. During interrogation, they rip them one by one while referring to Zarek's earlier speech (the guy claimed he had a lot of money so he needed a gun, but the guy was pro-Zarek and was believed to be in his service, which is why they tore into him like that). Money doesn't completely lose its value in the fleet as the show goes on, but barter is important.
* Battlestar Galactica (2003) and find that the Thirteenth Colony is a mighty space power capable of helping them fight the Cylons.
* Battlestar Galactica (2003) and just looks a bit silly. Not to mention a continuity nightmare for the props department.
* Battlestar Galactica (2003) and reprogrammed his siblings to forget about him and their parents.
* Battlestar Galactica (2003), and ships often fire at relatively close distances, even despite homing missiles. Even nuclear weapons are deployed at this sort of range.
* Battlestar Galactica (2003) and Sky TV, and filmed in Canada. Sky TV only actually co-produced the first season but their name is still in the credits because the show still uses sets that Sky built during season 1.
* Battlestar Galactica (2003) and the surviving civilian leadership was either greedy or treasonous.
* Battlestar Galactica (2003) anyway, and Apollo was attracted to her long before the clean-up.
* Battlestar Galactica (2003), a prequel spinoff which follows the creation of Cylons ~50 years before the setting of the parent show.
* Battlestar Galactica (2003) aren't impressed and Apollo rejects the suggestion they start doing the same thing.
* Battlestar Galactica (2003) are responsible for humanity not only recreating colonial culture 150,000 years later, but also (for the Mediterranean offshoot) reinventing their script and belief system for no good reason whatsoever.
* Battlestar Galactica (2003). As discipline aboard Galactica starts to break down, we occasionally see the pilots partying and boozing wildly in the pilot common room. Since the pilot roster consists of mixed sexes and Kat accuses Starbuck of sleeping around, they presumably get wilder than just boozing.
* Battlestar Galactica (2003), as the Colonies had forgotten the reasons behind the war and their responsibilities to the Cylons. You know how this ends.
* Battlestar Galactica (2003) at first glance seems to have a Greek pantheon, but as the series goes on it becomes more apparent that it's similar, but not quite the same as the real life Greek pantheon.
* Battlestar Galactica (2003), at least in the traditional "can't warp near a planet" way. In one episode, as part of a sneak attack, the Galactica jumps into the atmosphere of a planet, falls like a stone for a while while launching its fighters, and jumps back out when sufficiently close to the planet that it is

identifiable from the surface. However, "slamming the ship through the atmosphere" caused severe structural strains to Galactica that led to quite a few problems down the way. So, jumping near a planet is not impossible, just extremely ill-advised.
* Battlestar Galactica (2003) began as hard science fiction and slowly acquired more and more religious/fantastic elements: precognition, incorporeal beings, restoration of destroyed objects and resurrection from the dead. The series ended with the characters putting the events of the series down to divine intervention, although strictly speaking the viewers are left to make up their own minds.
* Battlestar Galactica (2003) begins with the near-obliteration of the human race in a surprise attack that's over before anyone's realized what's going on.
* Battlestar Galactica (2003) begins with the nuclear annihilation of humanity by the Cylons. And toward the beginning of Season 3 when liberating New Caprica, Adama decides to attack by jumping the Galactica into the atmosphere and launching its fighters and shuttles from there, jumping back out just before hitting the dirt.
* Battlestar Galactica (2003) Blu Ray release came with a little booklet giving a little bio for all the main characters, including call-signs and aliases... including if they're a Cylon or not. This was a major driving force of the series as Cylons are sleeper agents and many not being exposed until near the end of season three.
* Battlestar Galactica (2003)) but other than the Cylons themselves (heck, even compared to a lot of the Cylons) is one of the most antagonistic characters on the show.
* Battlestar Galactica (2003), but perhaps not coincidentally, he becomes a significantly more formidable character at more or less the exact same point at which he loses his eye. In what may count as a subversion, Tigh forgoes a classic black eyepatch for a distinctly more medical flesh-colored patch with transparent cords. Moreover, he spends several episodes beforehand with a very uncool chunk of gauze taped to his face. It's also worthy of note that there was an episode where he was having a great deal of difficulty putting his "uncool chunk of gauze" on by himself, subverting the "no loss of depth perception" addendum above.
* Battlestar Galactica (2003) came from the tendency of the writers to draw thematic and symbolic parallels to real-world events, even when it didn't make sense for the world of the show. Many saw the show as a 9/11 allegory, even though the damage the Cylons inflicted on the humans was incalculably greater than that of the terrorist attacks on America. The absurdity of a room full of reporters questioning the president was pointed out many times — it was meant to resemble the real-world political situation, but a population of less than fifty thousand could not possibly need that many competing news organizations. The abortion storyline was meant to challenge the audience's ideas about real-world abortion, but the fact that the fleet would have a very hard time supporting a bunch of helpless infants clearly made Roslin's decision unfeasible.
* Battlestar Galactica (2003) chief engineer and Galactica's Landing Signal Officer) have been Captains or Majors. Majors have also been shown to serve as executive officers, like Colonels, though it's not clear if this is standard practice or due to personnel shortages.
* Battlestar Galactica (2003) CO at the time, comes to believe this may have reignited the conflict.
* Battlestar Galactica (2003) Condition One, and it was just a slip up.
* Battlestar Galactica (2003): Cylon Centurions from the re-imagined show have hands that transform into guns. They are apparently bladed, as seen in one particularly ugly moment during an early sequence of the second season.
* Battlestar Galactica (2003) does not use silent space, but sounds in space are muffled. This is meant to represent the way explosions and fired weapons sound from the interior of the ships. Demonstrating the aforementioned "law of cinema", if a scene intercuts between shots outside and inside a fighter, the muffling increases inside the cockpit. The producers stated in interviews that they tried soundless space but it made transitions too jarring.
* Battlestar Galactica (2003) download into new bodies, so long as there's a Resurrection Ship in range. Even the dog-level-intelligence Raider ships resurrect.

* Battlestar Galactica (2003): Factors in big time in the last season: The Cylons have had forty odd years of using resurrection tech, and are shown as having multiple Resurrection Ships for their Basestars. But apparently, they never thought to even keep plans around for the Resurrection Hub — without which, every Resurrection Ship becomes useless. (And guess what the Leobens, Boomers, and Sixes do after they rebel from the other Cylons? That's right — they blow up the Hub.)
* Battlestar Galactica (2003) finds plenty of ways to reveal that characters are not quite human:
* Battlestar Galactica (2003) for someone going in the opposite direction; from space down to a planet's surface. According to the episode commentary, the air-blowing method is dangerous due to the risk of creating an embolism.
* Battlestar Galactica (2003): Gaius Baltar gets a taste of this after realizing it was his lover Caprica-Six who frakked up the colonies' defense systems through his gullibility and — let's face it — horniness. He deals with it by blaming the rest of the universe, and ultimately God.
* Battlestar Galactica (2003) gets killed while piloting a Raptor, causing her dead body to hit a missile launch button that adds fuel to an already nightmarish fire.
* Battlestar Galactica (2003) had painted on the wall of the set of Starbuck's apartment for the Caprica arc in Season 2. Which is kind of spooky if you think about it...
* Battlestar Galactica (2003) has a cleaner look to it, as it's a newer model, but still looks more utilitarian.
* Battlestar Galactica (2003) has a number of recurring background characters that are popular among fans; one of the more easily recognizable ones is the "tattooed pilot".
* Battlestar Galactica (2003) has Bill Adama's habit, when making speeches to the whole crew, of holding a telephone handset upside down like a one-way microphone with his hand gripping the ear end. Later on in the show other characters started copying it.
* Battlestar Galactica (2003) has Greek and Roman themes side by side.
* Battlestar Galactica (2003) have built-in automatic weapons, Cylon boarding parties can be seen hand-carrying heavy machine guns in "Razor" and "Daybreak".
* Battlestar Galactica (2003) have pop music and indications of different subcultures. They also have sports, card games, nude magazines and novels that have nothing to do with the Sacred Scrolls.
* Battlestar Galactica (2003) have shades of this. The war between Humans and Cylons basically boils down to this:
* Battlestar Galactica (2003): Head Six does this to Gaius when he calls her "insane" during an argument. Since Six isn't really there it looks to the guards standing nearby like Gaius randomly grabbed his own tie while shouting at himself.
* Battlestar Galactica (2003) Helo and Sharon find that the Cylons have discovered her Raptor and are stripping it. Helo asks what her Plan B was. Sharon replies that it was the same as Plan A — get back to her Raptor and fly the frak off this planet.
* Battlestar Galactica (2003) himself) Saul Tigh has to snap him out of it.
* Battlestar Galactica (2003) if they agree to retrieve badly-needed water from an ice moon.
* Battlestar Galactica (2003): In "Blood on the Scales", Apollo tricks a group of mutineers by throwing a grenade with the pin still in down the hall. Starbuck, who thought it really was about to go off, tells him that it wasn't funny.
* Battlestar Galactica (2003) in "Exodus, Part 2" is able to do this to a room full of Cylons on Colonial One with two simple words: "Adama's back."
* Battlestar Galactica (2003): In one of the final episodes, Starbuck uses the term, "Semper frakkin' Fi," in a scene where she's talking to Lee Adama.
* Battlestar Galactica (2003) in order to sustain a decimated human species was broached soon after the destruction of the Colonies.
* Battlestar Galactica (2003)-inspired microcassettes were a common storage medium for music, at least on Caprica, before the Cylon Holocaust.

* Battlestar Galactica (2003) in the episode "A Measure of Salvation". He really hammers home the point when talking to his Cylon wife, after she says she "chose to be a person."
* Battlestar Galactica (2003). In the first season Dr. Baltar appears to be this, with his odd habit of rambling on to himself. No one gives him more than a funny look as, after all, he's just the usual quirky genius, right? It's not as if he's got an imaginary Cylon in his head or something.
* Battlestar Galactica (2003). In the webisode series "The Face of the Enemy" Felix Gaeta and a mixed company of humans and Cylons make an emergency jump in their Raptor and (due to a computer error) get stranded far from the fleet. One of the Cylons murders the others (with the exception of Gaeta, her former lover) so they'll have the maximum chance of survival.
* Battlestar Galactica (2003) is an on-again, off-again example. While he regularly visits all segments of the personality spectrum save outright, unmitigated evil, when he does get into bad-assery mode, he does it spectacularly.
* Battlestar Galactica (2003) is practically king of this trope. The entire current series itself is structured around an Arbitrary Rules Robot Revolution and purpose of war. Basically the entire series can be broken down like this:
* Battlestar Galactica (2003) is their use of a captured Number Six Cylon as a sex slave.
* Battlestar Galactica (2003) is vaguely recalled in Colonial history as having happened due to a war between the gods.
* Battlestar Galactica (2003) it's implied that every attempt to break a prophecy ended in this. Lucia was the first one who could trick the system.
* Battlestar Galactica (2003) It's one of the first hints that Starbuck is not quite what she seems to be.
* Battlestar Galactica (2003) joins the fleet, the precedent set by Major Inviere leads to them immediately concluding that Cain and the crew have committed war crimes based on their treatment of Gina Inviere, as the legal precedent to classify Sarah as human explicitly grandfathers in the entire Cylon race.
* Battlestar Galactica (2003) "jumps" are limited to certain distances for safety reasons; in order to keep the fleet together, coordinates and vectors have to be carefully synchronized on a regular basis, and failing to do so could result in ships being separated from the fleet and stranded in deep space. For this reason, long journeys are done in a series of shorter jumps that are easier to coordinate.
* Battlestar Galactica (2003)". Laura's reaction suggests she definitely caught the subtext.
* Battlestar Galactica (2003) living passengers when the ship was destroyed.
* Battlestar Galactica (2003), mainly the miniseries: the Cylons don't exactly occupy battlestars. Rather, they take over control of them through the computer networks.
* Battlestar Galactica (2003) makes reference to a (new) calendar system after the exodus from New Caprica. After passing a guilty sentence on a Cylon collaborator, the date is stated as the "third day of the Second Exodus."
* Battlestar Galactica (2003) miniseries. Most of the cast, including Boomer herself, didn't find out until the end of season one.
* Battlestar Galactica (2003) not moving that fast (it appears to be merely falling for a few seconds from a standing start), yet it bursts into flames instantly. Also, the fighters they launch don't seem to have the same reentry issues that the ship has, even though they're moving at the same speed.
* Battlestar Galactica (2003) - No wonder why the title starts with "battle". Among others large scale battle, there's the Battle of Ragnar Anchorage, in the Minisseries, the Battle of the Ressurrection Ship, in season 2, the Battle of New Caprica on season 3, and the battles of the Ionian Nebula and at the Colony in Season 4.
* Battlestar Galactica (2003) often featured bonus scenes in this manner, often after the official airing slot was over therefore thwarting many efforts to record it for later viewing.
* Battlestar Galactica (2003) often performs the role of Mr. Exposition, although

in one episode, President Roslin subverts this by annoyedly thanking him for his insight. Anders managed to be one of these for one episode, finally explaining what the deal with the Final Five was, as well as some background on the Cylons in general. This being BSG, everything was working against him, and only got about halfway through it. Cavil filled a somewhat similar role in the same episode, but he also didn't spill the beans completely.
* Battlestar Galactica (2003) often took sci fi twists on whatever was going on during The War on Terror.
* Battlestar Galactica (2003), only to succumb to the next iteration of the cycle of violence at the hands of their progeny.
* Battlestar Galactica (2003), on the other hand, openly states in the pilot miniseries "If the crew doesn't hate the XO, he's not doing his job" and does no small amount of ball-busting to enact Adama's orders.
* Battlestar Galactica (2003). Originally the chief engineer on the Pegasus he was promoted to captain following the deaths of the senior officers. He was stated to have been an excellent engineer but a mediocre captain due to trying to treat people like machinery.
* Battlestar Galactica (2003) post traumatic effects depending on the cause of death.
* Battlestar Galactica (2003) reboot, and were later recycled within the Galactica series for the interiors of the basestars. This is what ultimately led to the decision to have the Pegasus destroyed.
* Battlestar Galactica (2003)'s Colonial Vipers and Cylon Raiders could fly and fight both in an atmosphere and in a vacuum.
* Battlestar Galactica (2003).), scouting out areas of space, or just quicker travel. Granted, the ships that didn't have FTL were quickly destroyed in the genocide.
* Battlestar Galactica (2003)'s decomissioning and instead launches into a speech about how humanity needs to ask itself if it deserves to survive.
* Battlestar Galactica (2003) serves this role among others in the Colonial Fleet. They are mashups of the space shuttle and an Apache helicopter.
* Battlestar Galactica (2003)'s first "real" episode ("33"), Adama and Tigh are both sporting very noticeable facial hair. As the characters have been attacked near constantly for a week, this is understandable.
* Battlestar Galactica (2003) should explore their humanity (Six's faction) or embrace their nature as machines and "be the best machines the Universe has ever seen" (Cavil's faction). Cavil is a real hypocrite about this, though, and most of his behavior is due to the fact that he hates having been given human form when his creators could have just as easily designed him as an omniscient God-like A.I.
* Battlestar Galactica (2003): Showrunner Ron Moore has described Number Six (or at least the Six that only Baltar can see, who is really a messenger of a higher power) as being a Madonna-Whore made real.
* Battlestar Galactica (2003) shows the bombing attacks in full, horrifying detail.
* Battlestar Galactica (2003). So how'd the song get there? It was revealed late in Season 4 that Anders was a musician in his former/original life on the first Earth and that he wrote it. Why the song is identical to one from our modern era is not explained however.
* Battlestar Galactica (2003) son). This does not change the fact that, as we see in the season one episode "Kobol's Last Gleaming, Part 1", and the season three episode "Unfinished Business", Bill's capable of stepping into the boxing ring the crew has set up and beating the stuffing out of said "children" should he feel the need. He's pretty handy with a flashlight, too.
* Battlestar Galactica (2003), so the best possible explanation is that "standard Colonial time" just happens to exactly resemble Earth chronological conventions.
* Battlestar Galactica (2003), specifically, he notes that he had done some ridiculous things that should have gotten him prosecuted at least... but he was forgiven.
* Battlestar Galactica (2003): Starbuck is held captive by Leobin during New Caprica's occupation. It's a nice house and all, and she does kill her captor, but

he's a Cylon and just comes back the next day (or earlier), but it doesn't really help her escape since it's still essentially a military prison on the other side of the door. He eventually convinces her to stop even violently murdering him by bringing in a child that she can't risk hurting or getting hurt in further violence.
* Battlestar Galactica (2003): Starbuck watching her gun camera footage, over and over again, to an almost creepy effect.
* Battlestar Galactica (2003) subverted this with the Arrow of Apollo (it didn't actually appear to have any special properties; being really just a museum artifact).
* Battlestar Galactica (2003) suffers from this, notably in the later seasons. Justified, in that by that point they have too few people left to split the work, but the fact that the show has no Marine among the main cast really shows in how often the main characters have to go outside their specialization.
* Battlestar Galactica (2003). Taken to the extreme in the series pilot, where the entire fleet has to do this every 33 minutes for 237 jumps straight.
* Battlestar Galactica (2003) takes this to new, but inverted, levels. The occupation of New Caprica, for example, was explicitly written to echo the American occupation of Iraq. The writers have said they purposefully wrote close to the deadlines to get their commentary closer to current affairs.
* Battlestar Galactica (2003). The actor playing Chief Tyrol had a habit of ad-libbing names for these characters, leading fans to get attached/interested, leading to repeat appearances for them, leading to them becoming significant characters. Specifically the "knuckledraggers" of the flight crew
* Battlestar Galactica (2003). The Centurions are in fact the only ones who are entirely mechanical.
* Battlestar Galactica (2003): The Colonial Government can be seen as this. They even keep the trappings of their government for quite some time.
* Battlestar Galactica (2003): The Cylon model Number One was named "John" by his creator (possibly in reference to her late father, whom she made Number One in the image of). When she refers to him as such when they meet again, he reminds her that he doesn't like that name. He also uses "Cavil", but this is just an alias he was using while posing as a priest among the human fleet.
* Battlestar Galactica (2003)", the Cylons are attacking every thirty-three minutes, giving Galactica's understaffed fighter pilots no time to rest. They're given an unnamed drug that's probably Amphetamine to keep flying.
* Battlestar Galactica (2003). The earliest warning against this (the story of the golem) goes back several hundred years.
* Battlestar Galactica (2003). The hybrid constantly babbles a stream of partly-technical, partly-prophetic-sounding, partly-nonsense words, but doesn't seem conscious in any real sense most of the time. When the Cylons give the order to make an FTL jump, the hybrid gasps "Jump" orgasmically as the ship does so. When such an order is about to be given at a very significant moment:
* Battlestar Galactica (2003) their newly settled planets, especially since only Earth-identical wildlife is ever mentioned (whether or not the humans originated on Earth or on Kobol or somewhere else altogether).
* Battlestar Galactica (2003), the pilots are often seen playing a card game known on the original show as "Pyramid", referred to on the reboot as "Triad". The cards are six-sided with a variety of symbols and colors to designate suit and rank. The rules are not shown consistently and the actors more or less improvised them; fans have tried to put together a consistent ruleset, but it's been tough going.
* Battlestar Galactica (2003) the survivors of the Twelve Colonies have no choice but to commit themselves to a primitive life on prehistoric Earth when the decision is made to literally burn the ships that brought them there - they are flown into the Sun on autopilot.
* Battlestar Galactica (2003). They employ people whose job it is to cut the corners off of paper to make them into the series' distinctive octagonal shape.
* Battlestar Galactica (2003), they generally use what the audience would consider standard measurements: they've mentioned that a "day" has 24 hours in it, 365 days

a year. It's not clear if this is some sort of universal fleet time that the Twelve Colonies agreed upon as an average of their local times or if it is based on Caprica-time. One exception is that their unit of distance is an "SU" (Solar Unit) instead of an "AU" (Astronomical Unit) - which in real life is based on the distance between Earth and the sun. Seeing as they're from twelve different planets in a double binary star cluster, using an "AU" wouldn't make much sense.
* Battlestar Galactica (2003), this is always prefaced by Starbuck asking for permission to speak plainly, since a subordinate is supposed to be quiet unless the superior says so. The one time Adama tells her no, the matter is not under discussion, she's amazed.
* Battlestar Galactica (2003). This quote is often used in trailers, fan-made or otherwise.
* Battlestar Galactica (2003) to Galactica from active duty on the Valkyrie, the punishment being command of an inactive ship.
* Battlestar Galactica (2003) to the fleet in the aftermath of an incident in which several civilians were killed.
* Battlestar Galactica (2003) to the population/survivor tally on display in her make-shift office.
* Battlestar Galactica (2003) trope, it's fairly obvious what that spoiler would hide.) Averted in the fourth season, which shows Africa prominently.
* Battlestar Galactica (2003). Tyrol and Boomer have a nasty breakup immediately afterwards.
* Battlestar Galactica (2003) uses Bank Gothic in its main title sequence.
* Battlestar Galactica (2003) was fed up at having to keep her hair short for the role.
* Battlestar Galactica (2003) was manipulating Baltar's greed for their own purposes.
* Battlestar Galactica (2003) was murdered by a Cylon in this fashion.
* Battlestar Galactica (2003) was ostensibly for the purposes of bringing human and Cylon together in peace.
* Battlestar Galactica (2003) was played on pots, pans, and a toaster.
* Battlestar Galactica (2003) was to convince people that Baltar (someone who actually HAD collaborated with the Cylons, albeit unknowingly - a traitor who didn't know who he was really working for) couldn't possibly be a collaborator, because why would the Cylons attempt to frame one of their own?
* Battlestar Galactica (2003) was used as one to board a Cylon colony. In the same operation, we see that Raptors can perform as more conventional boarding pods, latching on the hull prior to cutting in with torches.
* Battlestar Galactica (2003) were initially believed to be just skin deep, hence the nickname "skinjob", but later episodes showed that their organic components extend a bit further, to reproductive systems even.
* Battlestar Galactica (2003), where fraternization in the military is frowned on.
* Battlestar Galactica (2003) where it's the humans who need water, after the water recycling tanks on the Galactica are sabotaged. The problem is finding an ice-bearing asteroid or planet when you are in interstellar space.
* Battlestar Galactica (2003) which, in addition to smokes, drugs, prostitutes and jewelery, supplies the non-military members of the Fleet with the last remaining fresh fruit. It both serves to underscore that many civilians lack what the protagonists have been taking for granted and acts as a plot point to hint Ellen Tigh's connections when she shows up with a bowl full of grapes.
* Battlestar Galactica (2003), who, at 5'9" is unusually tall compared to most Asian women.
* Battlestar Galactica (2003) who happens to have been born in the body of an old man, which he is particularely cranky about.
* Battlestar Galactica (2003), who played Roslin, explicitly stated that the two are soulmates:
* Battlestar Galactica (2003) with Helo into her character after she discovered a piece of Helo/Racetrack fanfiction (in which the pilot attempted to seduce Helo and failed) and read it out loud at a cast party.

* Battlestar Galactica (2003), with the exception of Kara Thrace and Laura Roslin, every character who died was either a C- or B-list character, or has turned out to be a Cylon. Or both, in the case of named Cylons who have died since the Resurrection Hub went up. (This changed in the finale.)
* Battlestar Galactica (2003) would occasionally shoot each other without batting an eye if it were expedient since they could download into new bodies. The horrifying aspect is played up on occasion, such as when a Cavil mentions being too impatient to bleed to death after an ambush, and so has to cut his carotid open with an empty shell casing. Later episodes also feature the prospect of 'death as a learning experience' and the major trauma caused after someone is killed in an especially gruesome way and essentially suffers the worst PTSD ever.
* Battlestar Galactica (2003): Zack Adama and his flight instructor Lt. Kara "Starbuck" Thrace were deeply in love with each other, to the point of being engaged. Unfortunately, Kara's reluctance to crush her fiance's dreams caused her to give him a passing grade on his final flight test when he actually failed it. This led to him crashing while on patrol.
* Battlestar Galactica 2010 is all about this. In the original series, the Cylon were alien AI,
* Battlestar Galactica - 5'10" Tricia Helfer is several cm taller than 5'7" James Callis, and it doesn't hurt that she often wears heels.
* Battlestar Galactica Adama. But while the above examples are justified, Adama senior does have a strong tendency to let Lee, his assumed daughter Kara, and others close to him get away with a lot of crap and spends an inordinate amount of time and manpower to search for Thrace when she is stranded on a planet, even at the expense of fleet security.
* Battlestar Galactica affirms that the angel that posed as Number Six has spent millennia believing this to justify the destruction of the Twelve Colonies as necessary, but comes to question this after the Winchesters defy their own prophecy and avert the Apocalypse.
* Battlestar Galactica, after 3 and 1/2 seasons of subtle growth and development, Laura Roslin told Bill Adama that she loved him, to which he responded "About time."
* Battlestar Galactica after that, this trope is kind of understandable...
* Battlestar Galactica, all twelve planets occupied by humans are razed by the enemy Cylons, using nuclear weapons. It is the catalyst that begins the events in the series.
* Battlestar Galactica a lot of other people to send; it's mentioned in passing the first time this comes up that their Marine detachment is a fraction of what it should be, for example.
* Battlestar Galactica also recycled Stock Footage of ICBM launch tests to represent firings of heavy anti-capital-ship missiles from Battlestar launch tubes, as well as one actual nuclear exchange between less-technologically-advanced nations.
* Battlestar Galactica, although that eventually made it into the show dialog as well.
* Battlestar Galactica and are regarded insane by other Cylons, but apparently everyone is a latent psychic.
* Battlestar Galactica and most of the Refugee Fleet followed this aesthetic, a few like Cloud 9, the garden ships, the Zephyr (the ring-shaped ship with the rotating section) stood apart. Cylon ships also tended to be much more exotic, with surreal, biomechanical designs.
* Battlestar Galactica and new series were largely built around the Vipers.
* Battlestar Galactica and Season 1 of the series proper, President Roslin's hair goes from dark brown to a more obviously dyed-looking auburn. This is almost certainly simply a failure to match the earlier colour, since more than a year elapsed between the filming of the two, but since the series follows on immediately from the events of the miniseries, it gives the impression that the President somehow found time to do a new dye job despite being extremely busy and having other things on her mind...

* Battlestar Galactica, and some of it thinly veiled, at that (The Mormon God hails from a planet called Kolob, the Colonials originated from a planet called Kobol; the LDS church is presided over by a President and a quorum of 12 Apostles, the Galacticans by a Commander and a quorum of 12 Colonial tribal elders, etc.). Hardly surprising, as series creator Glen Larson was a member of the LDS church and drew on what he knew.
* Battlestar Galactica and speculate on whether it's all going to happen again. After Head Baltar reminds Head Six that God doesn't like the name "God," she looks at him sternly and he cryptically says, "Silly me." They walk away unseen through the streets of modern New York while "All Along the Watchtower" plays over a montage of robot advances on television.
* Battlestar Galactica, and teaches them to build a better version. Later, Colonel Tigh catches Tyrol brewing liquor to trade for engine parts, directs him to the parts he needs, and takes a jar as payment.
* Battlestar Galactica and the most obnoxious synthetic bark imaginable.
* Battlestar Galactica. And then winds up having to safeguard the the entire human race after a genocidal war.
* Battlestar Galactica, and there is absolutely some kind of intelligent god-like being served by messengers.
* Battlestar Galactica. Apollo in the second half of the episode "Lost Planet of the Gods".
* Battlestar Galactica, Apollo's relationship with Starbuck is metaphorically represented by this trope via Pigeon!Kara.
* Battlestar Galactica appears as a bystander reading a magazine article on robotics as Head Six and Head Gaius read over his shoulder.
* Battlestar Galactica are races of insect people and pig people, respectively, and their cultures reflect this.
* Battlestar Galactica are worn by guards in the episode, "Cosmic Whiz Kid".
* Battlestar Galactica arrives and intercepts all missiles in the air. The Alliance assumes it's a secret Coalition defense system and decides to sue for peace.
* Battlestar Galactica. As a result of the series bible's publication after the show finished airing, fans now know that none of the plot points introduced in Season 3, such as the Final Five and Starbuck's death/resurrection, were things the producers were aware of at all during the first two seasons — they'd exhausted their stockpile of potential plotlines.
* Battlestar Galactica as it seems likely that they didn't go to the lengths of actually being ordained, although it's never clearly stated on-screen.
* Battlestar Galactica as part of the rag-tag fleet fleeing the Cylon tyranny.
* Battlestar Galactica a stealth craft, a Cylon Raider flew right into it.
* Battlestar Galactica, Athena was supposed to seduce Helo into impregnating her so her race could get their hands on a human/cylon hybrid. However, she switches allegiances when she realizes that she had fallen in love with him. Caprica-Six starts a movement to change the Cylon plan because she's in love with Dr. Baltar.
* Battlestar Galactica. At the 55-minute mark everything seems returned to the status quo, even if Roslin had a rig an election for it. Then Gaeta uncovers the fraud, and the extended-length episode runs for another 30 minutes setting up the first story arc of Season 3.
* Battlestar Galactica. At the beginning of Season 3, Athena's previously-stark cell is shown to be fitted out with curtains and furniture, indicating her change in status from hated Cylon prisoner to trusted advisor to Admiral Adama. According to the podcast commentary, the "prisoner with privileges" trope was specifically referred to in the script.
* Battlestar Galactica averts this, except for some documents visible onscreen in Armistice Station in the Miniseries, which use original-series terminology. Spoken dialogue and other writings have "years", "minutes", etc.
* Battlestar Galactica averts this, showing many scenes of Vipers and Cylon fighters simply breaking up with a minimal explosion (from the missile warhead or explosive tipped ammunition). The most memorable example of this aversion is from the mini-series: Cylon missiles impact the cockpits of the new Vipers, which causes

the pilot to be blown out to space, leaving the rest of the Viper more or less intact.
* Battlestar Galactica; a woman playing strip poker is seen peeling off her shirt, revealing her bra, but as the camera wanders around the scene, it is eventually revealed that one of the men she is playing against is pretty much naked.
* Battlestar Galactica be considered, where Anders is drunk over Kara's disappearance and falls off a Viper, and Lee comes to his aid? Anders and Lee both had feelings for the apparently dead Kara Thrace. Of course, Lee wasn't drunk.
* Battlestar Galactica begins forty years into the truce between humans and Cylons. Not only is further AI research banned, but networked computers were banned for quite some time, because they proved too vulnerable to AI takeover. The colonies eventually abandon this policy, leaving only a few holdouts like Commander Adama refusing to allow networked computers on his ship, which is why his ship is one of the few that survive the Cylon attack.
* Battlestar Galactica: Blood & Chrome. A licensed video game also purports to cover that period, even being played from the perspective of Commander Adama as a rookie pilot, but it mixes and matches so many elements of the original series and remake that it probably belongs in its own separate continuity.
* Battlestar Galactica: Blood & Chrome as in effect so they couldn't double check if the orders were genuine.
* Battlestar Galactica: Blood & Chrome, a young William Adama kills a Cylon Raider by purposely venting fuel and then igniting it with his Raptor's afterburner.
* Battlestar Galactica: Blood & Chrome flies directly into the Cylon basestar and sets off all of its nukes at once to destroy it.
* Battlestar Galactica: Blood & Chrome was initially released online in a series of short webisodes. The whole thing flows much better as a 2 hour whole film.
* Battlestar Galactica: Blood & Chrome; when the rear guns go off line, Adama decides to fly the ship through a moving piston.
* Battlestar Galactica: Blood & Chrome, with virtually the same groups of fans respectively condemning it as dumbed-down spectacle for lowbrow fanboys, or celebrating the return to space battles.
* Battlestar Galactica. Boomer (in a stolen Raptor) flies out of Galactica's landing pod as it's retracting into jump drive position (to prevent her taking off). She doesn't make it undamaged though, smashing one wing and having to jump while still dangerously close to Galactica.
* Battlestar Galactica, both the hand-held guns and the viper-mounted guns were "lasers". The little red or blue bolts they fired travelled with visible slowness.
* Battlestar Galactica: Boxey ends up being this in "Gun At Ice Planet Zero" and "The Magnificent Warriors" but contributes a little in "Fire In Space", thought Muffit proves more useful.
* Battlestar Galactica, but also moments where the camera takes a second to find or focus on an object, or where a speeding spacecraft is blurry and slightly out of frame.
* Battlestar Galactica (but oracular and sane) has blue rather than the typical Cylon red for his code holograms.
* Battlestar Galactica, but she switched to a wig a few episodes into the first season because the bleach was causing hair issues (namely, falling out in chunks), which explains how she was able to be both natural haired Gina and platinum Six.
* Battlestar Galactica CIC, mixed with (usually not stock) footage of the actual battle. Bonus points for using both screen displays showing what the ship's sensors are picking up, AND a big table with models giving a low-tech picture.
* Battlestar Galactica come from twelve different planets, there is only a single primary religion among them (although some groups are more extreme or dogmatic in their beliefs than others, and atheism definitely exists in their culture as well). However, in the original series, at least, there are different sects referred to, and a guarantee of religious freedom is part of Colonial law, or at least culture. It's also arguably justified by the fact that their gods seem to exist physically

in some form.
* Battlestar Galactica, comes across a captured Raider ship and starts suggestively caressing it to the bemusement of her human colleagues.
* Battlestar Galactica. Commander Adama and Colonel Tigh always stand in CiC. Some folks think they didn't really think it all the way through...
* Battlestar Galactica, complete with flags and medals if the dead were soldiers/crewmembers. Regular burials were also shown over the course of the series though.
* Battlestar Galactica continued their war against the Cylons long after (as far as they knew) the government was completely wiped out and their warship was the only human fighting force left in the galaxy.
* Battlestar Galactica. Count Baltar arranged a peace treaty between the 12 Colonies and the Cylons. The Colonies sent all 12 Battlestars to the conference, leaving the Colonies completely undefended. The Cylons carried out a massive attack on both the Battlestars and the colonies, almost completely wiping out both. The battlestars would have had a chance if Baltar hadn't sabotaged most of the ships and insisted on keeping the Vipers in the hangar bays.
* Battlestar Galactica Cylons get resurrected, including the semi-biological self-piloting Raiders, not merely the twelve fully biological human models. (Although it is unclear if this is also the case for the completely robotic Centurions). For the process to work, a resurrection ship or resurrection facility has to be in range, so if a Cylon dies in space beyond range, he or she is permanently dead, their individual memories and consciousness lost to the collective. In addition, the Cylons deal with rebellious members by "boxing" them, where they download their consciousness into a small metal box and then put the box in storage. Also, season 4 sees the beginning of a Cylon civil war, one of the first acts of which is the luring of several ships into an ambush and destroying them while out of range of the Resurrection Ship. This is presented as a particularly heinous crime to the Cylons, who understandably have something of a blasé attitude toward death.
* Battlestar Galactica dakka, armed with frontal batteries capable of putting enormous holes in Cylon basestars.
* Battlestar Galactica despite being sold as a direct prequel to the 2003 series.
* Battlestar Galactica despite the former being heavily outgunned by the latter.
* Battlestar Galactica does a subversion. Rather than give a sappy speech at the Battlestar's decommissioning he asks "Is humanity worth saving?" A pertinent question considering the incoming genocide by humanity's rogue robotic children.
* Battlestar Galactica dream sequence ending with Baltar's hand twitching and Baltar waking up aboard a Basestar.
* Battlestar Galactica, Dualla usually functions as Mission Control for the battlestar's Vipers once they are deployed. The CAG might perform this function if he is in the Combat Information Centre, unless he himself is flying. Indeed, the entire CIC is basically Mission Control, as are the CICs of actual warships.
* Battlestar Galactica due to possibility that the flames were caused by the near-instantaneous displacement of an enormous volume of air caused by the Galactica's jump.
* Battlestar Galactica, due to the time, almost the entire cast is white and the majority are male. In the remake, there are several people of other races and/or females.
* Battlestar Galactica during the attempt to retake the titular factory ship from mutineers.
* Battlestar Galactica employed this trope in an ambiguous and unique way; several characters have had experiences that can be interpreted as prophetic or prescient, but whether they are in fact seeing the future or merely hallucinating was never explicitly revealed.
* Battlestar Galactica ends with a look at the fate of all the characters before jumping ahead several thousand years into the future.
* Battlestar Galactica episode "Faith". A Number 6 encounters Barolay who had tortured and killed the 6 on New Caprica. After an exchange of insults, the 6 gives Barolay a brutal beating, including grabbing her head and slamming it to the side

of a Raptor. After the fight is broken, Barolay gets up and says "I'm ok. I'm ok" before collapsing and dying of a fractured skull.
* Battlestar Galactica episode "Greetings from Earth", there's a clash between the military and civilian authorities over who should control a shuttlecraft full of humans in suspended animation.
* Battlestar Galactica episode "Murder On The Rising Star" has Starbuck accused of murder and Apollo struggling to find the evidence to clear him.
* Battlestar Galactica episode "No Exit". And Ron Moore in the final scene of the series.
* Battlestar Galactica episode "Rapture", the Fleet is forced to evacuate its personnel from the Algae Planet and jump before the shockwave of the exploding star reaches them. The bit with the Raptors landing and Galactica jumping just before the shockwave reaches has a classic outrun-the-fireball feel. A straighter example occurs in season 1, with Cylon skinjob Anton Doral spotted and confronted on Galactica by Adama and Tighe. Unfortunately, he's wearing a bomb vest, and Tighe just about manages to dive and push both Adama and himself out of the path of the fireball and into a side corridor. Indeed, Adama does pretty much the same thing in the miniseries for Cylon Leoben, pushing him into cover from a shell dropped while loading.
* Battlestar Galactica episodes "Living Legend" (parts 1 and 2) and "Fire in Space" were edited together to produce "Mission Galactica: The Cylon Attack".
* Battlestar Galactica episode "Unfinished Business" uses this as a premise to let the main characters beat the tar out of one another over recent goings-on midway through season 3.
* Battlestar Galactica. Eventually, the two antagonize each other to the point where Tigh finally loses it and tosses the table, leading to Starbuck reflexively punching him in the face. She gets locked up for her troubles, but Tigh agrees with Commander Adama not to press charges because he was too drunk to remember who started the fight.
* Battlestar Galactica, except in "Pegasus", in which some of Pegasus's crew members call a Cylon just that. In the miniseries, Baltar says disparagingly to Number Six "You're a Cylon. A robot."
* Battlestar Galactica, explosions usually die out quickly and fiery explosions (which are caused by oxygen in the ships that blow up themselves - the reason why Cylon raiders hardly ever blow up but just disintegrate mostly) appear 'smeared' by velocity. Also, nuclear explosions do appear mostly as 'just flashes' as described above, without the trope-ish fireball and/or mushroom clouds. While capital-ship shots were generally silent, smaller fighter craft generally had full sound in space. The creators fully intended for all space battles to be silent, but upon viewing the results, decided it was too unnatural and inserted sound effects. In a nod to original intent, all sound effects in space are still noticeably subdued.
* Battlestar Galactica. Fans have tried to get round this by saying that it was common practice to refer to a "light-micron" as just a micron, but actual series canon gives no support for this.
* Battlestar Galactica featured plenty of these as Sharon and Helo made their way to Delphi. While major cities like Caprica City were nuked properly and thoroughly, other cities such as Delphi and several unnamed ones were surprisingly intact. It is later revealed that the Cylons left these cities intact deliberately so that they could settle.
* Battlestar Galactica features a super prototype, the first U87 Cylon equipped with a metacognitive processor displays the potential for near human autonomy. The problem with this is this level of intelligence is only achieved in a single prototype, if the MCP is placed in a different cylon it does not display sentience.
* Battlestar Galactica. Felix Gaeta is shot in the leg by a twitchy crewmate, and doesn't get to medical care in time to save the limb. He is given a prosthetic leg not long after the amputation; however, the prosthetic is the wrong length, doesn't fit correctly, and aggravates his healing surgical scars, making them more susceptible to infection. The series also shows Gaeta becoming more accustomed to the prosthetic and less dependent on crutches gradually, over the course of several

episodes.
* Battlestar Galactica fics seem to be stuck to the concept that Cavil and the other Ones will always win the Cylon Civil War, regardless of how heavily the AU has changed beforehand.
* Battlestar GalacticaFighter pilots are encouraged to take stims, which can lead to addiction if not carefully monitored, as exemplified by Kat.
* Battlestar Galactica finale, as it's shared by several characters. What makes it interesting is that becomes a waking hallucination for everybody involved.
* Battlestar Galactica, first to save his surrogate daughter Kara Thrace in "You Can't Go Home Again", then to save the woman he loves, President Laura Roslin, in "Sine Qua Non". Both times he's called on it by his colleagues and (eventually) realises they're right; fortunately fate rewards Adama's determination and returns both women to him.
* Battlestar Galactica, follows the classic XO/CO arrangement where everyone is terrified of the executive officer and loves the commanding officer.
* Battlestar Galactica for Roslin's sake, even though she herself treats him quite well.
* Battlestar Galactica from Earth, the entire cast is busily trying to get there.
* Battlestar Galactica from offscreen before we see the Pegasus sail into view.
* Battlestar Galactica from the Cylons. As was often the case, he sort of deserved the rough treatment, but was actually innocent of much of what the torturers were asking about.
* Battlestar Galactica: Gaius Baltar is pretty much the god of this trope; because he's constantly talking to his hallucination of Six, when he's actually having a conversation with someone else he has to swap or insert words at the last minute to keep the real conversation going in a logical fashion.
* Battlestar Galactica get along well at first. Hell, he even deposed her once. (And re-posed[sic] her another time.)
* Battlestar Galactica got a comic spin-off a few years after the miniseries finale, which was a truncated version of the show's promised fifth season. The comic series gave the show's executive producer a chance to further some languishing plot threads like Rygel's quest for his throne, which is the very first story arc.
* Battlestar Galactica had an example when they had one of their Cylon captives aboard the Galactica. Roslin and Adama brought Starbuck in to interrogate him. He is pretty successful at getting under her skin, but, like all Cylons and Cylon collaborators must, he goes out the airlock.
* Battlestar Galactica had a scene where Crash, leading a group of mixed soldiers and civilians against the Cylons, made diagrams for his troops out of sticks, rocks and leaves. The others really, really tried to take him seriously, but as most of you can imagine, it was really, really hard. The scene illustrated how Crash, despite being the highest ranking officer of the group, had very little actual ground combat experience.
* Battlestar Galactica had one of these where Joseph Adama and Daniel Graystone met. While it was an inner-city diner instead of countryside, it still had some of the characteristics of a Greasy Spoon. Apparently it served Caprican and Gemenese food; it's probably supposed to be analogous to the ubiquitous Greek-run diners in the US that serve both hamburgers and gyros.
* Battlestar Galactica had the (female) Cylons' spines glow during sex. This was dropped for the rest of the series, however, as a major plot point early on was how to detect the Cylons among the fleet and was pointed out that Baltar had a Cylon detector in his pants.
* Battlestar Galactica had this tactic used by both the Cylons and the Colonials in differing circumstances.
* Battlestar Galactica had to scramble up to the co-pilot seat in order to be safely ejected.
* Battlestar Galactica. Happens between Colonel Tigh and his wife Ellen in one episode, but it's made perfectly clear their relationship is seriously dysfunctional. The writers specifically included the scene to show there was, in

fact, some attraction between the two despite this.
* Battlestar Galactica has a subversion; Sam Anders was supposed to be this for the Kara/Lee paring but the actor was well-liked and kept getting brought back. He eventually married Kara, and they slightly more miraculously stayed that way through the end of the series. He even developed his own storylines and fanbase and was made a series regular for season 4.
* Battlestar Galactica has a version of this, which kicks in to appoint Secretary of Education Laura Roslin the President of the human survivors after the 42 government officials above her are killed in a nuclear bombardment.
* Battlestar Galactica has developed this trope into high art. Virtually every major character says some variation of "I need/could use a drink" at least once in the series, typically at a very important moment.
* Battlestar Galactica has Raptors, with a crew of one pilot and one Electronic Countermeasures Officer. However, the ECOs are also trained as pilots, and frequently take on this role as a result of the military's somewhat severe crew shortage. During the third season losses during the New Caprica arc mean there's now more crew than vehicles. Racetrack volunteers to go back to being ECO for Athena as the alternative is sitting around in the mess with nothing to do.
* Battlestar Galactica has the 3000-year-old Lion's Head Nebula Beacon, which the Cylons found and which began killing them. It was covered with a mucous substance that really was snot — snot with a disease to which humans had evolved immunity but the Cylons hadn't. All the Cylons on the base star that picked up the beacon died, all because "someone forgot to wipe their nose", according to Adama.
* Battlestar Galactica has the Whiteboard of Extinction. If it counts, the big strategic planning board with all the little models as well. Astute viewers will notice that at some point during the first season, someone in the Fleet took time to create new miniatures of the updated Cylon Raiders, replacing the Classic-era ones they used earlier in the show.
* Battlestar Galactica have a semi-humanoid form, they are actually giant living computers for the Cylons' base ships (which look very much like literal starfish). Unable to conventionally communicate with humans or other humanoid Cylons, they instead "vomit metaphysics" and surrealist poetry in between routine system checks. Some characters believe the hybrids to be closer to God.
* Battlestar Galactica have retractable wrist-mounted blades for melee fighting. The newer Centurions instead have fingers that fold out into powerful claws.
* Battlestar Galactica: he's a doctor, he treats the sick and the injured, nothing else about his patients really matters.
* Battlestar Galactica Hostage Rescue Team. Originally created as throwaway Redshirts for action scenes, they end up playing an important role in events (e.g. power struggles) in the Rag Tag Fleet.
* Battlestar Galactica. Humans also seem to interface well enough whenever putting their hands in this cylon liquid. But perhaps this is facilitated by the hybrids always present in the bathtub in those instances.
* Battlestar Galactica, imagines that he shoots Adama, and then snaps back to reality. Particularly nightmarish since, at the end of Season 1, the exact same thing happened, and that time it was in-continuity.
* Battlestar Galactica. In a flashback to before the war, Adama is seen applying for a job in which he must take a lie detector test. One of the baseline questions (used to establish the reliability of the other questions) is "Are you a Cylon?" (This was before anyone knew the human-looking Cylons existed). In a further irony, the man administering the test is himself a human-cylon.
* Battlestar Galactica in an episode in which two characters are briefly exposed to space, but survive, albeit it takes them many episodes to recover.
* Battlestar Galactica in a scene which ends with him telling her he loves her.
* Battlestar Galactica: In a slight subversion, Bill Adama from grew a moustache after the Fleet settled on New Caprica, pointedly to show off how lax and laid-back he'd gotten. However, he retained the moustache while leading the extremely badass assault on New Caprica to rescue humanity from Cylon occupation, so perhaps it was more in the vein of an extremely long-lived playoff beard.

* Battlestar Galactica in CIC when Cmdr. Adama returns after recovering from his gunshot wounds and heart surgery.
* Battlestar Galactica: In one episode Apollo ends up flying through a tunnel to hit a Cylon target that was otherwise unreachable. The commentary specifically notes that this was intended to be the moment that proved Apollo had chops, by giving him something that was, on the surface, practically impossible.
* Battlestar Galactica: In one episode, a virus tries to take over the spaceship.
* Battlestar Galactica: In season 2, episode 13, the supposed genius Dr. Baltar heals president Roslin's cancer by injecting her with some cylon/human hybrid blood that is more resistant to diseases because it has no antigens (which means it has bloodtype O) and therefore it has no blood type. Therefore it is somehow capable of destroying a cancer in a very late stage. Furthermore, cancer cells (or any other animal cell type) aren't cultivated in a petri dish and on agar, as it is shown on the pictures Dr. Baltar has, but are instead cultivated in cultivation flasks in a fluid.
* Battlestar Galactica) insists "There are others in greater need than I" when Starbuck tries to get her medical attention for her broken arm.
* Battlestar Galactica in the remake. In addition, the Algae Planet had a more grey-blue tint to it. Scenes in Caprica had a bad orange lighting even before the nukes hit.
* Battlestar Galactica in the third season for more standalone episodes so that new viewers were not alienated. As a result, the third season is generally not as well liked, and the fourth and final season has resumed a more arc-based approach. The main arcs throughout the series are:
* Battlestar Galactica introduces the execution mechanic that can be accessed from the Pegasus' airlocks for the times where brigging someone doesn't feel sufficient. Presumably, Cylon players that reveal themselves (an action that deals damage to the human players and lands the Cylon on the Ressurection ship) also make a trip through the airlock if they don't die directly during their attack.
* Battlestar Galactica is a more-serious-than-usual example. It counts the population of the fleet and ticks down over the course of the series.
* Battlestar Galactica is an example. The Colonial scriptures talk about the cycle of time as a story told again and again throughout eternity, though with different players. Similar "death, exodus, and rebirth" events have occurred on Kobol, the Thirteenth Colony, and the Twelve Colonies, and could still happen in the future.
* Battlestar Galactica is a pilot who is described in canon as the best shot in the Fleet, in or out of a Viper cockpit. She gets to show off plenty of both skills.
* Battlestar Galactica is a "re-imagining" of the original series. Notably, only the pilot Miniseries, "The Hand of God", and the two-part "Pegasus/Resurrection Ship" episodes directly adapt events or characters from the original series. Unlike the Original Series, the Reimagined universe itself has no aliens and few planets—the drama is contained to the humans and their Cylon creations alone.
* Battlestar Galactica is a semi-example. The Cylons consider humans to be their parents and claim that they have to die for Cylons to reach their potential. It did not work well.
* Battlestar Galactica is born tiny, bloody, and generally looking slightly premature.
* Battlestar Galactica is full of these. Since we are dealing with only 50,000 human beings left, most people ended up with people they might not have picked initially as a second choice.
* Battlestar Galactica is laid up with a knee injury. She has recovered enough to move, but stays in bed anyway.
* Battlestar Galactica is mostly accurate in its portrayal of space, but plays this trope as straight as it could; pretty much every person vented into space in one way or another is immediately shown being frosted over. The most striking example is probably the one where two crew members are locked in a damaged airlock, and they get colder as the air pressure lowers. Possibly based on the aerosol can effect, where the can cools down as the contents are released, but this is only because the process of the can's contents changing from liquid to gaseous form

takes energy, something which would not apply to escaping air.
* Battlestar Galactica is occasionally followed by a group of Colonial Marine bodyguards. They don't become particularly noticeable until the second half of Season 4, though, when the Fleet is breaking apart and the Adama/Roslin leadership is barely keeping order. A rare case when a "good" character has Praetorian Guards following him.
* Battlestar Galactica. It became somewhat of a hopeless war for both sides after the Cylons lost their resurrection technology.
* Battlestar Galactica, it's revealed that Starbuck really did die when her Viper exploded. The "returned" Kara Thrace is an "angel", just like Head Six and Head Baltar, the only difference being that everybody can see Starbuck.
* Battlestar Galactica. It takes until halfway through season 4 before anyone else manages to get this information again.
* Battlestar Galactica it was pretty clear that the writers were making it up as they went along.
* Battlestar Galactica: Kara Thrace, a deconstruction of the trope whose maverick existence only exists with a messed up life and a lot of favouritism.
* Battlestar Galactica, Kara Thrace is said to have filled this role for Sharon Valerii.
* Battlestar Galactica: Kara Thrace spends a really spooky episode in one haunted by CYLONS!
* Battlestar Galactica, Laura Roslin finally tells Bill Adama that she loves him. His response? "About time."
* Battlestar Galactica, Lee Adama was a member of the Colonial Fleet Reserves.
* Battlestar Galactica lets this pass without comment ... then she asks him to zip up his fly.
* Battlestar Galactica looming out and slashing one of them across the chest.
* Battlestar Galactica made them anything even remotely divine, and some consider them outright evil.
* Battlestar Galactica mentions that the meat locker is the most heavily guarded area on a spaceship because the last remaining steaks, burger, fritters, etc, in the universe are there. Later in the series, we see the fleet is reduced to eating algae-derived food, and fruit and cigars are valuable black market commodities.
* Battlestar Galactica message was intended, but that it was just a last-minute fix to explain the lack of remains of the Fleet.
* Battlestar Galactica mining and refining ships, but these are refugees from a civilization that turned its back on advanced cybernetics after fighting a war with the Cylons. Water extraction was apparently a dangerous occupation too, and the leaders of the fleet conscripted prisoners to do it in exchange for reduced sentences.
* Battlestar Galactica miniseries, Baltar quasi-randomly picks someone on the bridge as being a Cylon in order to divert suspicion over his own role in the attack on the Colonies to someone who's been a jerkass to everyone and they really don't like. The man turns out to be a Number 5 model of humanoid Cylon.
* Battlestar Galactica miniseries does this with a group of news reporters being blown away by the nuclear bombs going off all over the colonies.
* Battlestar Galactica mini series president-to-be Laura Roslin is diagnosed with terminal cancer, but the character proceeds to play a major role in the following TV serial without all the stereotypical signs of disease (and, on the whole, survives a lot longer than most who befall TV illness).
* Battlestar Galactica, most fans wondered if they even needed to know. On the other hand, it did leave the nature of Kara Thrace up to viewer interpretation.
* Battlestar Galactica Most of the differences from the NATO alphabet are either space-related (Meteor and Quasar) or religiously significant (Icon and Juno).
* Battlestar Galactica, most of the main characters go through a series of relationships with everyone else, sometimes at the same time. Lee and Kara stand out as particular offenders of the trope.
* Battlestar Galactica." Not the first time it was used as a science-fiction swear-word, but the most popular and most closely associated.

* Battlestar Galactica, one crashing inside the launch bay and setting it on fire.
* Battlestar Galactica. One might even go so far as to call them an Airship Galactica.
* Battlestar Galactica one of the characters who murders Cylon agents in cold blood out in the open.
* Battlestar Galactica Online can be used, this is only through renting for up to an hour using the most valuable currency and they act as pure combatants without the option to launch fighters. There are Carriers that can carry player Strikes, but no true Battlestars as they can't really contribute to a direct fight. NPC-only classes include drones ranging from human-sized to Strike-sized, automated asteroid weapons platforms and Freighters.
* Battlestar Galactica Online. Escorts and Lines are pure combatants while Carriers have no business being at the front.
* Battlestar Galactica Online has Defence Platforms disguised as asteroids.
* Battlestar Galactica Online in their own classes in terms of stats, where customizability through slots is concerned they are only this. As an example, an Interceptor may have 5 Engine slots. The other two types have only 2. The Multirole has 3.
* Battlestar Galactica Online, the Cylon War Raider is just a First Cylon War-era Raider refitted to modern specs.
* Battlestar Galactica Online, the mysterious nature of the playable sector, far from known space, leaves both sides trying to figure out what's really going on and has turned their attention from escape.
* Battlestar Galactica Online, the skills your avatar picks up enable your starships to do longer FTL jumps, fly faster, make your guns more accurate and a variety of other things.
* Battlestar Galactica Online this is possible, but there's a severe penalty for the chargeup time needed if you try to jump out in combat, making it hard to do so.
* Battlestar Galactica. On receiving an entire crate load of computer software from the Pegasus crew, Gaeta's first question is a whispered, "Got any porn in there?" Judging by the way the Pesasus crewmen smile in response there may in fact have been porn in the files.
* Battlestar Galactica) on several occasions; the problem with this technique aiming-wise is shown during a terrorist siege, when she accidentally shoots another main character.
* Battlestar Galactica originated as a three-hour miniseries that was successful enough to be continued.
* Battlestar Galactica or take the likely betrayal personally. Directly contrasted with the discovery of the Final Four in Season 4, one of which Adama takes very personally... once again, assuming immediately that it was all a lie and having to be convinced otherwise.
* Battlestar Galactica parody with the remnants of a race being pursued by their robotic creations. After Petey finds them and upgrades the robots' primitive computer brains to true sentience, the two sides make peace.
* Battlestar Galactica pilot does this. Starbuck and Cassiopeia are seen kissing in the hangar bay, while Starbuck's other love interest catches them by surveillance camera. Cue the push of a "Steam Vent" button.
* Battlestar Galactica plays it nice and straight in the finale, with a line taped down the center of the flight deck. This is played rather more realistically than most examples, as there are at least twice as many people who end up on the port (non-volunteer) side of the line. However, most of those were civilians and most of the Marines and Pilots do volunteer. Some of those who volunteered are ordered to stay behind since the civilian fleet cannot lose their expertise and leadership. Later, in the briefing room, Helo again asks for volunteers to pilot the Raptors for the mission; every hand in the room is up before he even finishes speaking.
* Battlestar Galactica, politician-slash-beloved-terrorist Zarek talks in front of a mirror about the upcoming election in typical public speaking style. Then he turns, elaborating that he wants to run against the incumbent on a ticket with... current Vice-President Gaius Baltar.

* Battlestar Galactica present an arc where Apollo and Starbuck are sent to an alternate reality where the Cylons rule supreme. There, it's discovered that Apollo's alternate counterpart has already died, as did those of Tigh, Athena and Boxey. Inverted with Serena, who has long been dead in the prime reality but alive and well in the alternate one.
* Battlestar Galactica: President Laura Roslin certainly qualifies. Knowing that a) her job is literally the survival of the human species and b) her knowing she was living on borrowed time for the entire series, Roslin can have all the credit for Cool Old Ladydom she wants.
* Battlestar Galactica range, but the calculations required to use them become nonlinear when jumping farther than the "red line" and the difficulty in performing them increases exponentially. It can be done, either at great risk or with divine intervention. Which means that the effective top speed of the colonial fleet is dependent on how badly they want to get where they're going. The factor isn't velocity, it's accuracy. Cylon FTL drives are better because they are more accurate.
* Battlestar Galactica rather than go immediately report her after she leaves and to thereafter just fake doing the test and say everyone came back human.
* Battlestar Galactica reactionless drives. In fact, due to the star shape and lack of outward features, it's sometimes unclear which way is their up, down, or forward. Their fighters still use normal engines, presumably due to power/size constraints.
* Battlestar Galactica Reimagined episode "Dirty Hands," Tyrol organizes a strike of the lower-deck crewmembers to protest the potential rise of a birthplace-based caste system within the fleet.
* Battlestar Galactica resents being trapped in a human form, and wishes he had been created as a machine—he wants to feel the solar wind, see gamma rays...
* Battlestar Galactica retells the events of the Re-Imagined series's first two seasons from the POV of the Cylons.
* Battlestar Galactica, Romo Lampkin, nearly always wears shades, despite the fact that he's living in a fleet of dimly-lit spaceships. Justified in that he wears them so that people cannot tell what he is looking at - he is a kleptomaniac lawyer, after all.
* Battlestar Galactica. (Said cover is also a powerful Ear Worm in real life.)
* Battlestar Galactica ("Scattered"). Gaeta comes up with the idea to network Galactica's computers by lining up soap bars in the latrine.
* Battlestar Galactica series. After a thousand year war, the 12 Colonies sent off their entire fleet of Battlestars to a diplomatic meeting with the Cylons, leaving the Colonies completely defenseless. The Council insisted that the fleet not prepare for combat in any way, leaving it defenseless as well. Naturally, the Cylons take advantage of this grotesque stupidity to wipe out both the Colonies and almost all of the Battlestars.
* Battlestar Galactica series had the C.O.R.A. Viper. Very fast, full A.I. computer piloting system, equipped for long range patrols, double the thrusting power of any other Viper — at the expense of the guns!
* Battlestar Galactica series: in episode 2.09 "Final Cut", Dualla is asked whether it ever gets any easier. She replies that, in fact, "It gets harder." "It" in this case being protecting what's left of humanity from genocidal robots.
* Battlestar Galactica series used "microns" for seconds, "centons" for minutes (or for hours in the series pilot), "centars" for hours, "sectons" for weeks, and "yahrens" for years.
* Battlestar Galactica, Serina is reporting on the peace celebrations when the Cylons attack.
* Battlestar Galactica's fourth season. We see the bodies afterwards though, and the massacre itself is a deleted scene on the DVD.
* Battlestar Galactica. Sharon (Athena) and Valerii (Boomer) can love, but (corporeal) Number Six does not seem to get it. Somewhat justified as it has been established that different model numbers have different psychological patterns - and the Eight model has been described as being one of the most emotional, while

the Sixes seem to be far more sexual in nature - in other words, it may simply be a case of love (Eight) versus lust (Six).
* Battlestar Galactica she came up with an alternate solution whereby only she was put at risk suggests Starbuck may be more at fault.
* Battlestar Galactica she shot down in order to pilot it back to the fleet.
* Battlestar Galactica simply as "wireless") for ship-to-ship communication, and faster-than-light comm does not exist; ships on recon missions must be provided with rendezvous points before departure lest they never be able to find the fleet again.
* Battlestar Galactica. Somehow, this managed to throw off opponents. (Probably they were laughing too hard.)
* Battlestar Galactica, spying on Cylons, and there are deep pits below her.
* Battlestar Galactica, Starbuck flew the Recon Viper, which had extra engine power but no weapons. It was fitted with C.O.R.A., an intelligent computer controller that not only talked in a feminine voice, but also acted like an overprotective girlfriend. For instance, when Starbuck instructs her to fly a dangerous hi-g manuever:
* Battlestar Galactica Starbuck plays the piano with a pianist she previously disliked and it help her to come to terms with her past.
* Battlestar Galactica: Starbuck runs from her Viper to the airlock to stop Apollo from killing the Final Four, who have found the way to Earth.
* Battlestar Galactica, Starbuck tells Seelix, then a deckhand, that she's been accepted for fighter pilot training by turning up on deck first thing in the morning and pretending to chew her out for not getting to the training session on time.
* Battlestar Galactica started off in the Cyrannus galaxy and had the crew move to our own on the quest to reach Earth.
* Battlestar Galactica started out mass-produced, with each model line sharing an identical personality. By the end of the series, the models most sympathetic to humans, especially the Sixes and Eights, had diverged to having unique identities (and even names for the Sixes). Meanwhile the antagonistic models such as the Cavils (Ones), Dorals (Fives), and Simons (Fours) remained monolithic and identical.
* Battlestar Galactica starts with a computer simulation of one, and goes downhill from there.
* Battlestar Galactica. Strangely, the writers got confused and the meaning of the timer changed mid-plot.
* Battlestar Galactica: "Taking a Break From All Your Worries" opens with Baltar and Virtual Six singing a variation of the tune from the page quote.
* Battlestar Galactica tear two Cylon basestars to pieces. Ron Moore got the idea from the story of Ensign George Gay, the only survivor of his squadron who watched the climax of the Battle of Midway while floating in the Pacific.
* Battlestar Galactica television movie in 2013; a new series in the same continuity is set for release some time in the future)
* Battlestar Galactica tell a story where they were told to include more "happy moments", like "a party". They wrote in a party sequence that abruptly ended with an accidental explosion with several casualties. They say execs never meddled again.
* Battlestar Galactica that try to wipe out humanity because they believe it's God's will. Funny how God seems to be angry at people who they feel have wronged them.
* Battlestar Galactica. The blipvert was dropped at the beginning of the second season when the network wanted to make room for more commericals. Fan demand led to it being restored starting with "The Farm".
* Battlestar Galactica, the Cylon fighters had two occupants seated side by side with a third in the back (which can be seen as a throwback in the new series during the "Razor" special).
* Battlestar Galactica. The Cylons are also, with the exception of Cavil, firmly convinced that they have souls, and the fact that they get as many religious

visions as the humans would seem to back that up.
* Battlestar Galactica, the Cylons couldn't appreciate life prior to their civil war, when the rebellious faction is exiled from the Resurrection Ship, meaning that any deaths would be permanent. Their leader explains it as the possibility of death made each second important, more so than it ever was before.
* Battlestar Galactica: The Cylons (which stands for CYbernetic Lifeform Node), especially in the new series where they are going organic. A bit different to some of the other entries as they make the transition from machine to living race within the timeframe of the setting. Interestingly no one on the Battlestar Galactica, no matter how much they hate the crazy toasters, ever seems to question the fact that they are alive and sentient.
* Battlestar Galactica". The Galactica was being converted into a museum ship and its decommissioning was scheduled on the same day as the Cylon attack. The rest of the fleet was knocked out quickly due to a Cylon backdoor in their modern computer networks rendering them vulnerable. Galactica's computers weren't up to date or networked, rendering them mostly immune to the Cylon virus.
* Battlestar Galactica, the job was performed by Corporal (later Lieutenant) Dualla, as well as her replacement, Hoshi.
* Battlestar Galactica - the jump co-ordinates needed in the series finale were derived from Starbuck playing the main theme from "All Along The Watchtower". While being nuked near a black hole, no less.
* Battlestar Galactica Then again, their spines glow during sex, which begs the question of how Baltar never managed to notice this about Six?
* Battlestar Galactica, the ones who had been dreaming of new stuff for 20 years. They took Starbuck, the most masculine character in the show, and turned him into a woman. After some fans dubbed the series "GINO" (Galactica In Name Only), the creators said they would address it in a coming episode. They did — by naming a character who is repeatedly raped and beaten "Gina".
* Battlestar Galactica. The original series had a liberal dose of thinly disguised references to the Book of Mormon, the Christian Bible, Judaism, and Islam. The reimagined series settled for Greco-Roman mythology.
* Battlestar Galactica the people of Kobol, the ancestral planet of humanity, were super-advanced, as evidenced by their ultra-tech pyramids and medallions.
* Battlestar Galactica: The Plan, where Anders' resistance team come up with a tactic to lob a small bomb through a hatch, into a Centurion refueling station. Since the group is made of Pyramid players, they do the lobbing bit very well. It's dealing with the Centurions already present that they suck at.
* Battlestar Galactica, there are many details lifted straight from modern naval procedure and culture. Your typical viewer likely has no idea why engineering types are called "snipes" for example.
* Battlestar Galactica, there are several funerals after which the bodies are ejected into space from a Viper launch tube.
* Battlestar Galactica: The rebooted series eats, sleeps, and breathes this trope. There are women in every major role of life, from "knuckledraggers" like Cally all the way up to President of the Colonies Laura Roslin. Men, likewise, often fill traditionally "female" roles like religious leader, diplomat, and secretary. All living quarters for the rank-and-file soldiers are unisex as well, including bathrooms. Also played for a bit of Fanservice, both in-universe and out.
* Battlestar Galactica. There's no actual negotiations at all: the Cylons, after years of not showing up at the annual diplomatic meeting, show up and kill everyone with barely a word.
* Battlestar Galactica the speed of light is any less impossible with physics as we know it.
* Battlestar Galactica. The Twelve Colonies of Man were ultimately exterminated after reaching the pinnacle of its civilization when it created the robotic Cylons, who promptly destroyed their creators.
* Battlestar Galactica They pulled a few superb conclusions to those seasons to make up for the dip in form luckily enough, and the show was at its best mixing genres and usually had the balance right.

* Battlestar Galactica. They went with someone else after the audition, but it came very close to fulfilling this trope. Bear had a cameo later on as a piano player in the background.
* Battlestar Galactica, this is (unsurprisingly) the role of Chief Galen Tyrol. His unique ability is to take another action after using a Repair card, and since he draws 3 Engineering cards a turn (where all the Repairs are located), he'll get them a lot. His second action can be anything from using Consolidate Power (a Politics card that allows him to draw 2 cards of any skill), to giving someone else a turn with Executive Order, to using the Weapons Control he just fixed to shoot down an enemy basestar. If the game is going well and you don't get many chances to use said Repair cards, he gets a little boring, but in the middle of a high action situation, nobody shines brighter.
* Battlestar Galactica. Though how he got up there in the first place is beyond me.
* Battlestar Galactica. Tigh himself said in an early episode that in the men liked their XO, then he wasn't doing his job.
* Battlestar Galactica to be abandoned after the pilot miniseries, but was maintained due to popular demand.) Apparently, Shelly Godfrey will eventually be explained, in "The Plan". However, the Opera House itself (not the visions), the original temple on the Algae Planet, and the exact nature of the Lords of Kobol seem destined to remain in the file marked Left Hanging. Not to mention "God". Many fans thought that Shelly Godfrey was just Head Six who had materialized herself to help Baltar, but The Plan shows that she was a real Six trying to discredit him. Cavil and another, cooler Six intimate that she made it too easy to discover her fake evidence because of Baltar's "dreamy hair".
* Battlestar Galactica toy causing a child’s death was the reason for the removal of the figure’s rocket firing feature has also been debunked. Various internal company notes from Kenner have surfaced showing that the rocket mechanism was simply too easy to set off, causing safety issues and that the feature was scrapped months prior to the Battlestar Galactica toy incident.
* Battlestar Galactica tried to rape Sharon while questioning her. One of the exceptions is Doctor Cottle, one of the most upright and moral characters on the show, who bluntly states that what they tried to do to Sharon was "unforgivable."
* Battlestar Galactica trying to convince Tigh to let him make a rescue attempt, and then watching Tigh activate each hatch lock in turn.
* Battlestar Galactica two parter "Lay Down Your Burdens", humanity has the choice to quit the search for Earth and settle a planet that's about as hospitable as summertime Siberia in the form of the presidential elections. Tired of confined spaceships and the constant fear of the pursuing Cylons, they choose Baltar and the Siberia planet. Of course, it comes back to haunt them.
* Battlestar Galactica used this in the sickbay a few times. Probably the best example is when Caprica miscarries and the internal baby monitor flatlines.
* Battlestar Galactica used this trope quite a bit, when a pianist's music would suddenly be heard underscoring other scenes.
* Battlestar Galactica uses this trope to no end, but one example stands out: in the pilot miniseries, Adama calls Col. Tigh out on flipping over a table while completely hammered, inciting a fight between him and Starbuck. Tigh unsuccessfully defends his position.
* Battlestar Galactica warns everyone that the Cylons are up to no good. No one believes him.
* Battlestar Galactica was announced in 2007, in July 2008 it was picked up as a 2-hour pilot and in December of that year finally chosen to become a series. It wasn't until April 2009 that the pilot was released as a DVD and the series itself aired in January 2010.
* Battlestar Galactica was infamous for reusing the same five or six shots of space combat over and over and over again, although they did sometimes flip the negative left-for-right in an attempt to provide some variety.
* Battlestar Galactica was written in after the actor was involved in a car accident so serious that it was initially unclear whether he'd walk again.
* Battlestar Galactica went into production, he was back on his feet and back to

doing the kind of stuff his character was known for.
* Battlestar Galactica went on a sublight journey that took 2000 years from an outside perspective, but a lot less to them.
* Battlestar Galactica: we see a montage of clips of the Cylon actors falling over in the costumes in a variety of interesting ways, culminating with a lone Cylon taking his time to walk down a hallway towards a banana peel on the floor. Just as he's about to reach it he's hit by a wrecking ball and sent flying through the hull into space.
* Battlestar Galactica: "We've got multiple DRADIS contacts!" Battles between the Colonial Fleet and the Cylons were tracked on the radar-esque DRADIS system. A lot of dramatic turns involve signals popping up unexpectedly and at the worst moment. Season 2 episode "Final Cut" features a scene where a battle occurs offscreen and the audience watches the Galactica's crew reacting to the DRADIS screens and announcements from Dualla.
* Battlestar Galactica What exactly occurred on Kobol is far from clear. With the apparent 'Cycle of Time' the humans and Cylons exist in, it could have been nuclear in origin, as happened to the Colonies as well, but apart from references to a 'Blaze' that pursued the tribes on Kobol and a 'Flood' that wiped out most of humanity specific references have been thin on the ground, likely as the characters have no way of knowing either.
* Battlestar Galactica, when Baltar offers Gina food, assuring her he's not going to take it away at the last second. Gina, a raped and tortured Cylon prisoner, had been refusing to eat in an effort to kill herself. Baltar realises he's got across to her when she reaches over and takes a piece of food from the plate.
* Battlestar Galactica, when Callie follows someone and listens in on a conversation, she hears exactly what she wanted to hear despite the characters not having a need to say it again.
* Battlestar Galactica, where explosive decompression actually behaves like it should.
* Battlestar Galactica where Six beats Sharon up on top of a building.
* Battlestar Galactica, which first showed the Fleet's story, and in the next episode the base star's simultaneous adventures.
* Battlestar Galactica (which isn't Earth), a fascist nation subscribing to the "Master Race" idea and fully prepared to unleash a nuclear Armageddon on their ideological opponents known as the Nationalists (AKA the Western Coalition).
* Battlestar Galactica", which was nominated for an NAACP Image Award for the black Boomer and Tigh's extensive roles.
* Battlestar Galactica. While captain of the Demetrius, Kara Thrace paints her visions of the signposts to Earth on the walls of her cabin. This does not help reassure her crew that she knows what the frak she's doing.
* Battlestar Galactica, while not mentioning names specifically, reflected back on the Xena years, and explained that at the time in the mid-1990s, "fan reaction from the Internet" was a very new thing. The show's staff got very excited about going online and reading the real-time reactions of fans. The problem was, because this was so new and shiny to them, they had no real concept of how to contextualize or frame what they were reading: internet fans are the most obsessive, and you kind of need to read through a lot of it, or "professional reviews" to get even a basic feel of what the "reaction" was. But because "the Internet" was so new at the time, they'd basically just go online and read through major fanfiction hubs without much of a sense of "cognitive dissonance" like "maybe these are just obsessed niche fans". As Eick explained, in the later seasons this resulted in them pandering on a massive scale, doing all sorts of things the online fans they encountered suggested... And it actually turned a lot of the casual viewers away. It's open to interpretation how "good" these episodes were, but they really weren't as "accessible."
* Battlestar Galactica. While on Kobol, Athena is triple-cuffed with her hands in front of her — though it's just as well, as she's able to fire a grenade launcher at the Centurions attacking them.
* Battlestar Galactica while the new version showed actual moves possible in

zero/micro-gravity (end to end flips, near-90 turns in all directions, etc.)
* Battlestar Galactica wing. It's a big deal since he outranks her, and also proves just how far he's willing to go for her sake.
* Battlestar Galactica. With the support of Vice-President Zarek, Lt. Gaeta leads a full-scale armed mutiny against Admiral Adama and President Roslin.
* Battlestar Galactica, with the twist that it's often difficult to believe that nobody notices something's going on.
* Battlestar Galactica would declare his entire crew as his children... though as the series wears on, his fatherly patience is repeatedly tested.
* Battlestar Galactica would have been decommissioned were it not for the Cylon invasion, it's implied to be a dumping ground for the Colonial military's least effective personnel, and Adama and Tigh are given command of it as punishment for screwing up an intelligence operation (and they would have been kicked out of the Fleet outright were it not for Adama's wife's political ties). The whole ship is thus essentially a frat house. It's the great irony of the series that it's also the only warship of consequence to survive the apocalypse.
* Battlestar guns). There are a few rare examples of pure carriers, with all their broadsides swapped out for massive numbers of hangar bays. Usually, the pure carriers are converted from damaged battleships as its cheaper to remove broken gun batteries and place a hangar there, while direct carrier production is low due to a desire for versatility when it comes to capital ships at the highest standard weight class. It is more common to see escort carriers and cruiser weight carriers than full battleship sized carriers. Even pure carriers still have gun turrets to defend themselves and hybrids tend to have long range guns to support the line battle while they safely deploy squadrons.
* Battlestars a second chance in 1983 after its original run ended a year prior. Much like the original, the revival also lasted six months.
* battlestars, carrying large numbers of Darts as well as armed with powerful energy cannons. There was also the one-off Super-Hive, which got big as a result of a powerful energy source. It could probably take on an Ori mothership and win.
* Battlestars show up on practically all major sides. With the advent of advanced gravity control and AI present in the series, capital ship battles appear to be decided by who is able to project the most force in as many different ways as possible, with one-trick ponies giving way to ships that can do many things at the same time. The second ship of the protagonists is a decommissioned Tausennigan Thunderhead Superfortress named the
* Battlestar, the Number Threes see themselves as Messiahs who will find the Final Five Cylons. After proving that they consider themselves "above" the group consensus of the other Cylons, the line is deactivated.
* Battlestation Harbinger. True, such a ship would likely not have good survivability in close combat due to low HP and shield strength, but she might make for a good mid-range combatant, especially with the fighters keeping the enemy busy. Heavier carriers are more in line with this, featuring tougher ships with more weapon hardpoints and, possibly, more bays.
* Battle Stations allows the player to buy rare items, which usually require a lot of luck-based exploring or questing to acquire. There are, however, three items for sale which cannot be found via exploration. These items can be traded on the in-game auction, though, so a wealthy character could try and get them there instead. Also in the cash shop are Action Point packages, allowing the player to gain more Ap than the regular Ap regeneration provides.
* Battlestation Sentrius is described by Nick Fury as a Death Star 2.0, and with good reason: it has all the state-of-the-art weaponry available in the Kryptonian Military Force.
* Battlestations Midway naval combat action, with the single-player story focusing mostly on battles fought after Pearl Harbor, all the way to the Battle of Midway.
* Battlestations: Pacific before some campaign missions, as well as in-game, as it takes quite some time for carrier-based aircraft to launch.
* Battlestations: Pacific due to the fact that no Japanese submarines appear in the levels where American submarines are present. Played straight in the Japanese

campaign though.
* Battlestations: Pacific, mirroring their real life employment. Fast enough to keep up with carriers and outrun cruisers, packing enough dakka to fend off fighters and bombers, enough guns to kill PT boats, depth charges to hunt submarines, and torpedoes powerful enough to kill battleships. A skilled destroyer player is a forced to be reckoned with.
* Battle Stations Pacific versions of the same battles, plus several new ones entirely.
* Battlestations! when transwarp technology has just been developed but has not had a chance to be thoroughly tested, as its main plot revolves around the theft of the technology.
* Battlesuits equipped with jet packs can Deep Strike, which in the fluff is usually depicted as them jumping into battle from an Orca or Manta Missile Destroyer. The king of this trope in the Tau arsenal is the Retaliation Cadre, a special formation of Battlesuits deployed from a low-flying Manta to deliver a swift and brutal alpha strike.
* battlesuit. They all kinda resemble large, heavily-armed frisbees (some fans even refer to them as "Frisbees of Death" or occasionally "Bin-Lids").
* battlesuit - when the suit didn't recognize him as its pilot, it fried him.
* Battles Without Honor and Humanity of yakuza films and a look at how economic downturns and trickle-down economics affect poorer classes, with much of the Yakuza violence in the beginning being sparked by class inequality and desperation.
* BattleTanx and experimental energy weapons isn't uncommon in a world that was devastated by a population decimating plague and a nuclear war.
* BattleTanx and is usually a better choice than the early couple of futuristic tanks you collect.
* BattleTanx features a campaign level where the Eiffel Tower is converted into a laser cannon.
* BattleTanx has the Rhino Tank, which is described as "A trainload of armor on front." You have to either use grenades or hit the tank from behind.
* BattleTanx, in the form of the FLP-E ("Flippy") tank. Built with a gryo-stabilized cockpit, specially-designed tracks, and side-mounted jet boosters, the FLP-E is capable of tumbling sideways with ease, baffling its enemies.
* BattleTanx subverts with the Guided Missiles. If the player's tank is destroyed while it is using Guided Missiles, the player will continue to control the missile until it hits something.
* BattleTanx to things such as hovering tanks or tanks with laser cannons.
* BattleTanx was all about traveling to famous places in America, England, France, and Germany, and having a massive tank battle on top of their ruins.
* BattleTanx, with the war being caused by the fight over the surviving women. Predictably, the majority of the surviving women were killed in the conventional/nuclear conflicts that followed.
* Battletech, 18-year old Melissa Steiner married 45-year old Hanse Davion (the marriage was arranged when Melissa was 12 and Hanse 39), creating an Inner Sphere power couple with 27 years' age difference. Melissa consented to the marriage and even went on a secret state mission to meet with her husband-to-be beforehand, and their marriage was genuinely happy.
* BattleTech, a Airship Fighter carrier capable of carrying approximately 6 Fighters was introduced.
* BattleTech about cancel out), but since the smaller bodies obviously keep moving around, this requires highly accurate and up-to-date navigational charts and makes for riskier jumps even then.
* BattleTech actual Japanese people found them as they swarmed the country (and ripped out everything that wasn't nailed down and more than a few things that were to take home as souvenirs).
* BattleTech: Aerospace used acceleration and deceleration to pilot your ships. The hex maps had gravitational arrows and strength in the hexes — if you were going slower than the strength number in the hex you ended your turn in (if I remember right), you were pulled 1 hex in the direction indicated. Careful piloting

could actually put your ship into a permanent orbit.
* BattleTech after surviving an assassination attempt Coordinator Takashi Kurita orders the deaths of everyone involved in the plot and their families within one degree of separation. Including his son's fiance when it turns out her father was one of the masterminds. However, he refuses to acknowledge publicly that his own cousin Marcus Kurita was involved, as that would cut House Kurita's numbers in half.
* BattleTech against a civilian city. The IS task force quickly crushes the Smoke Jaguar's homeworld defenders, which are notoriously poorly equipped even among the other Clans.
* BattleTech: a good example is Khan Raina Montose of Clan Ice Hellion; she lead the Clan in their invasion of Clan Jade Falcons occupation zone. She orders her Clan push on their invasion even though their supply lines have been intercepted by the Falcons.
* BattleTech: All measurements have always been done using the metric system- this is most noticable with ranges and speeds are given in meters and kilometers per hour and mass done in kilograms and metric tons.
* Battletech) allowed for new models that could actually do the job for which they were designed.
* Battletech allows players to build their own 'mechs, giving you a near infinite leeway to build your very own joke 'mechs. Still, there are also a few stock 'mechs that go beyond the simply 'subpar'.
* BattleTech also fields a number of APCs and IFVs which include wheeled, tracked, hover, and flying varieties.
* BattleTech and began to duplicate it, Comstar's grasp began to collapse, which culminated a schism after the Clan Invasion, with Comstar (under new leadership) becoming secular and pro-technology, while the Word of Blake separatists used terror tactics to continue the old Comstar's mission.
* BattleTech and conventional planes likewise typically mount ejection seats, though ejecting in high orbit presents some obvious problems for pilot retrieval; many ejected pilots have run out of life support before they could be retrieved.
* BattleTech and easily hold their own while being no less effective at healing injured characters.
* Battletech and ejects the pilot, removing both 'mech and MechWarrior from the mission. While expensive to fix, it is usually less expensive than losing a valued MechWarrior or permanently ruining a valuable 'mech's equipment by having its other limbs blown off.
* BattleTech and go to St. Marinus House to seek peace and solace away from combat. Doesn't keep some of them from coming out of retirement when truly needed, though.
* Battletech, and he claims he would have been loyal to House Arano if Kamea had been more inclined to follow his advise and centralized the Reach.
* BattleTech and light 'Mechs. They deploy in the same manner as Clan Elementals, but are piloted by warriors of the short, slight-built aerospace fighter pilot phenotype.
* BattleTech and many already colonized planets became unsustainable when their terraforming broke down. What few Jumpships remain are devoted to maintaining the Successor States or fighting one another.
* BattleTech and other vehicles, along with exploded views of individual components such as their fusion reactors.
* BattleTech, and seeing the technological fluff changes made in more recent versions, one can really see how much advances made in the '90s really changed society.
* BattleTech and start pulling cyborg super soldiers, nuclear weapons, and other stuff out of their nether regions in an all-out war against everybody...
* BattleTech and tearing through whatever has gotten them mad. Even more alarming is their habit of blasting their way through everything that happens to be between them and their target, even if it's a neutral party or even an ally.
* BattleTech. And that four hundred year service history? That's pretty unimpressive compared to a few other mechs like the Banshee or Wasp, which have

both been in continual use (and in the case of the Wasp, continual production) for close to 700 years.
* Battletech and the Magistracy survived the war with almost no civilian casualties and considerably less ill will against the Star League.
* BattleTech and the sword is no exception, dealing only a single point of damage more than the mech could have inflicted just by punching the target. The trope is completely avoided by the Katana Battlemech, which is just a variant of the Crockett with inferior armor and heatsinks, making it a worse mech. In the Battletech RPG, katanas are superior to generic swords as melee weapons, but they're identical to scimitars, so the difference is probably meant to just be in quality of manufacturing.
* BattleTech animated series used CGI when the mech pilots turned on "Enhanced Vison" for battle scenes. It's stylized with wireframe terrain and outlines around the mechs, but the jump between the two is extremely jarring and its usage is inconsistent; the rare conventionally animated battles are (relatively) decently animated.
* BattleTech are also stated to use controlled plasma explosions to launch the projectiles instead of gunpowder, making them a partial example.
* BattleTech are capable of razing anything anywhere nearby in a nuclear hellstorm of fusion reactor exhaust when they begin to lift off the ground to head to orbit. Being too close to a dropship that's taking off or landing is automatically fatal to ground units.
* BattleTech are controlled by a combination of manual controls, like joysticks and pedals for targeting and gross movement, and and a neurological link with the mech to provide more precise control and to a sense of balance. The neurolink is one of the few non-invasive types; instead of cutting into people's brains and adding datajacks, it's just a helmet that presses on a few spots where it can connect to the nervous system. This doesn't require anything more invasive than the pilot keeping those spots free of hair, and calibrating the helmets when fitting a new mechwarrior.
* BattleTech are kings of the battlefield, so they're already seven feet tall plus and ripped to shit, and then they're put inside armor that allows them to survive in extreme heat, cold, the vacuum of space, underwater, and fly through the air... hence their name: Elementals.
* BattleTech are mechs that unsurprisingly, wield a hatchet and ax, respectively.
* BattleTech are the Draconis Combine and Capellan Confederation, which are Japan and China, respectively.
* BattleTech are used this way in the lore, especially in the lulls between the major Succession Wars. While the biggest merc companies are too well-known to get away with this, smalltime operators usually get used for raids and deniable small-scale missions because anyone can hire them and it's really hard to prove they got hired by your arch-rival.
* BattleTech arrive, ComStar initially cooperates with them, and then fights back when they realize the Clans want Earth. They hold off several Clan armies at the Battle of Tukayyid, an arranged proxy battle for the possession of Terra, and won; the terms of their victory was a fifteen-year ceasefire between the Inner Sphere and the Clans.
* Battletech, as its knees, ankles, and hips basically exploded from the weight stress the first time it tried to move.
* Battletech, a society that was constantly on war-footing and saw fighting and battle as a natural form of stress relief.
* BattleTech, as their feet can slip out underneath them if they start turning while running.
* BattleTech, as well as anything its buddies may send their way) and can then try to, rather than fire their own weapons at it normally, either wreck its moving leg joints with shaped charges or actually climb on top of it in an even more dangerous "swarm attack" that lets them keep applying their handheld weapons right up close and personal over successive turns as long as they can manage to hang on.
* Battletech: At least one member of each of the great houses has one or two of

these. For House Davion and Steiner it was Katrina who started the Fedcomm civil war. In House Marik there was (the real) Thomas Marik, who was the leader of the Word of Blake.
* BattleTech: At least one member of each of the Great Houses has played this role.
* BattleTech attitude rather than underestimation of combined arms warfare).
* BattleTech avert this by being most vulnerable when transforming and getting hit could jam the transformation or even cause it to crash if converting from fighter mode.
* BattleTech backers of a certain tier or higher were rewarded with the opportunity to design a hirable pilot and characterize them.
* BattleTech Battlemech. In truth, the Bounty Hunter is a legacy of individuals who have been passing the title (and Mech) for over a century.
* BattleTech Battlemech is dedicated to the role, mounting four fusion-powered flamethrowers.
* BattleTech because of how quickly they can topple mechs with a full complement of missiles.
* BattleTech because of the rapid nature of Clan warrior careers. As Focht asks for thirty years, to give the Inner Sphere a full generation to advance their technology (which is hopelessly far behind that of the Clans) and training, Ulric replies that the Clans "are as mayflies to you." The eventually agree on a fifteen-year truce.
* BattleTech before they started going chrome), they also tend not to provide much in the way of superhuman abilities other than the occasional hidden weapon in a prosthetic limb or the like.
* BattleTech besides, he was identified and killed in single combat by Yorinaga Kurita. Ironically, House Kurita won the battle but ultimately lost the war. The news of the Prince's death on Mallory's World almost turned the campaign into a rout, but Hanse Davion revealed himself to be a far more clever and capable leader than his late brother, and managed to keep his realm steady gainst the subsequent Kuritan threat for decades.
* BattleTech. Beyond those two monsters, though, there are rules for constructing tripodal mechs (as well as one canon design that's a mere 75 tons, the Triskeleon). They get bonuses to stability and can easily change direction compared to standard designs, but with the added tonnage cost of the extra leg and the parts needed to control it they're a bit more limited in overall firepower than a standard bipedal mech of the same size and speed would be.
* BattleTech, but it's extremely rare (only a few are still in existence in the modern era) and they're not considered especially useful aside from the fact that they can give a few aerospace fighters a place to launch from that's capable of hiding from retaliation attacks.
* BattleTech. But most of the important political and military action has moved elsewhere centuries ago and the key players - the Great Houses and the Clans - all came into being on other worlds.
* BattleTech, but the BattleMech remains king of the battlefield because of the sheer tenacity (due to compartmentalized construction) and low manpower requirements to deploy (just the pilot).
* BattleTech, but the officer figured that his men might be saved if they could honestly say they thought they were obeying the Coordinator's orders. After his forces have evacuated to their dropship, he prepares to commit seppuku himself when he gets a priority your-eyes-only transmission telling him that he's ordered to retreat due to overwhelming Federated Commonwealth attacks on multiple Combine worlds.
* BattleTech, but the rarest and most important is the Recharging Station, which is typically located at a star system's zenith or nadir point and uses solar sails to collect solar energy. When a visiting jumpship arrives, the Recharging Station can use a microwave emitter to recharge the jumpship's jump drive in a matter of minutes or hours instead of the ship having to wait days or weeks to recharge via passively collecting solar energy themselves. Never common to begin with, the technical information needed to construct them was lost during the Succession Wars.

* BattleTech) but they know how their technology works (or at least their scientist caste does) and have even improved upon what the Inner Sphere considers "Lostech".
* BattleTech but they were horrifically slow, insanely expensive, and impossible to transport offplanet, limiting them to purely defensive roles.
* BattleTech but was generally portrayed as heroic because of his actions.
* BattleTech by Santin West, who was Khan of Clan Nova Cat. Also an Elemental and of similar stature to Khan Osis, Santin West was known for being calm, level-headed, and fairly congenial.
* BattleTech by the Inner Sphere, including the Japanese-themed Draconis Combine. Unfortunately, the writers at FASA didn't do a very good job, the 55-ton Stormcrow omnimech was apparently supposed to be named something like Huntsman, which would have been Ryōshi. Instead, its name was listed as Ryoken, or Passport.
* BattleTech campaigns often run on this trope, as the major actors are already known in the fiction, the players' team tends to get assigned to smaller objectives rather than fighting directly in the major battles. Especially since the game's core rules make running large-scale battles practically impossible, and the rules for large-scale combat (Alpha Strike) aren't conductive for heroics.
* BattleTech: Can be played straight or averted depending on the choices you make during random events, but often the game pushes you toward playing it straight as responding to your teammates' various shenanigans with strict measures tends to hurt morale.
* Battletech canon plays this straight. When the plot stops feeling like a twisted web of lies, betrayal, and deceit, assassinate a random major protagonist. Has happened at least 8 times.
* BattleTech can pull off the "disappear and reappear elsewhere" trick.
* BattleTech cause you massive damage. Be extremely scared if you end up near a Demolisher or SRM Carrier.
* BattleTech characters occasionally talked about having this type of instructor in their military training, but they rarely showed up. The strongest examples existed among the Clans, where the warriors who were put in charge of training new warrior groups (known as sybkos) had very few restrictions on what they were allowed to do to their charges. They could and frequently did attack cadets and in some cases, deaths would result, since the Clans did not believe in conducting firing practice without live ammunition or holding back in a fight.
* BattleTech charity auction, a few of whom became minor recurring characters.
* Battletech chemically propelled cannons and lasers coexist. Energy weapons generally have the advantage in firepower-per-weight, and don't run out of ammunition as long as the mech's reactor is still working. However, energy weapons generate large amounts of heat, and an energy-heavy mech needs a lot of gear to deal with that, reducing the overall amount of weapons and armour. Plus, The highest-damaging weapons in the game are all kinetic(or explosive), and they often have the added versatility of using different kinds of ammunition. There are still discussions which is better in-game. It's also worth noting that even in the far future, there is no better weapon for anti-infantry duty than the lowly but battle-tested heavy machine gun and even the lightest mech can carry a large amount of ammo for one.
* BattleTech, chemical weapons were used on civilians, and entire planets were rendered permanently uninhabitable from bioweapon attacks and nuclear bombardments.
* BattleTech, Clan Cloud Cobra are known for as "the clergy of the Clans". Being founded by a Chaplain, the Cloud Cobras all follow a ecumenical religious movement called "The Way', although they have subdivisions based on Christianity, Judaism, Islam, and other faiths.
* BattleTech, Clan Smoke Jaguar was once one of the most powerful Clans to invade the Inner Sphere, now there are only a few Jaguars left eking out in existence where ever they are hiding.
* BattleTech, combat vehicles, or armed with nothing more than an assault rifle and a flak jacket, and are expected to die in battle.
* BattleTech commonly depicts many machine guns and Auto Cannons as rotary-style guns, and recently introduced the separate Rotary Auto Cannon as its own class of

weapon.
* BattleTech, conventional combat vehicles are still very much in evidence and frequently use the very same engines, armor, and weapons that BattleMechs do. Well-designed tanks in particular (available in hover, tracked, and occasionally wheeled, though the last seriously suffers in terms of terrain restrictions) can readily match 'Mechs of comparable weight in terms of firepower; the 'Mechs' primary advantages are superior terrain handling and toughness (due mainly to having more hit locations to soak up damage and even being able to lose some and still walk off the battlefield), not arbitrarily bigger and better guns. Tanks, meanwhile, are canonically cheaper and easier to produce...
* BattleTech.) Conventional tracked vehicles can also be outfitted with total environmental sealing, allowing them to (slowly) move underwater, but this is generally regarded as impractical and they have the same weaknesses as submarines. Also, Battle Armor are explicitly noted as being able to survive immersion quite well (so long as it's not too deep and their life support system isn't exhausted, anyway)- the reason that they're considered destroyed if dropped into a water hex is that unless a battle armor suit mounts specialized underwater maneuvering equipment, it's far too slow and cumbersome to actually go anywhere within the time scale of a standard game.
* BattleTech creator, Richard Garfield. It saw about half a dozen expansion sets and a revamp of the main set (Commander's Edition) before folding. By CCG standards, that's fairly respectable. Even then, its folding was caused by FASA's buyout by Decipher, a rival to Wizards of the Coast who were releasing the CCG.
* Battletech, descendants of the old Star League's military who went into exile following the League's collapse. They are an interesting example as by the beginning of the main storyline they have become the dominant power in their own space and hold many systems of their own. Their warrior culture is enforced rather than necessary.
* BattleTech, despite being 1000 years in the future, everyone speaks modern, late 20th Century English. Even the Clans, which spent 300 years in isolation from the Inner Sphere, had only added a few new words (and eliminated contractions).
* BattleTech died and been replaced with a body double while a panicking Victor tried to figure out what to do, as he was foolishly afraid that Thomas would cut off the military aid Victor needed to refit his forces after the damage they'd suffered during the Clan Invasion. Thomas was an extremely honorable ruler and had Victor been honest with him he wouldn't have done anything simply because it was against his principles, but he was justifiably furious over the attempted deception and launched a military campaign against Victor that caused significant damage.
* Battletech different 'Mech designs still in use in the Inner Sphere alone.
* BattleTech does have invasive cybernetic control systems however. That being said, said systems are every rare, cutting edge technology. They also have a tendency to drive the user insane after a few years, if not kill them out right, though the individuals who are willing to voluntarily undergo the surgeries necessary to have the systems installed are generally noted as not being terribly balanced to begin with.
* BattleTech doesn’t strictly stick to this, but there are factional tendencies, such as the Lyran Commonwealth/Alliance’s preferences for bigger guns like class 20 autocannons or regular or heavy gauss rifles, the Federated Suns preference for autocannons, or the Draconis Combine’s leaning toward the extremes of the light or heavy end of the scales when it comes to ‘Mechs.
* BattleTech doing this against Core World Mechs, using jet packs to jump on before blasting away at them at point-blank range.
* BattleTech double the damage). It's also more powerful than some of the sniper rifles and SMGs. Particularly notable for doing more damage than some of the laser pistols and laser rifles available in the setting, at a fraction of the cost. There is also no action penalty for reloading (speedloaders are in play, presumably). It is inexpensive, widely available, reliable (as in it doesn't jam on a fumble result like automatics will, nor does it have any accuracy penalties), relatively unrestricted, and has a low skill requirement, meaning that any character who

doesn't want to specialize in handguns but still wants a sidearm can buy a revolver and protect themselves in a pinch.
* BattleTech downplays this. The giant robot BattleMechs are linked to the pilots by a neural interface that allows the pilot's own sense of balance to keep the 2-legged machines upright and moving smoothly.
* BattleTech due to his trademarking the word "droid." Not wanting to risk a legal battle with him, FASA immediately changed the name.
* BattleTech. During its time the Star League was the unifying entity that held the Inner Sphere together, with the Star League Defense Force to protect it. However after the Amaris Civil War the Great Houses couldn't decide who would be new First Lord, and where eager to wage war with each other for supremacy. When the SLDF left the Inner Sphere, the Great Houses plunged the galaxy into the destructive Succession Wars which lead to a technological deterioration with each state scavenging anything they can use to maintain their war effort against each other.
* BattleTech during the backstory and ROM being heavily integrated with the ComGuard.
* BattleTech. During the FedCom Civil War, for example, this was the reason for many soldiers, especially in the Federated Suns half, for supporting the "legitimate" ruler Kathrine Steiner-Davion (who was actually a usurper and populist demagogue who didn't meet the requirements for leading the Federated Suns because she'd never served in the military or the Lyran Commonwealth because she'd been raised in the Federated Suns).
* BattleTech: During the Wars of Reaving, a secret cabal within the Clan Scientist Caste called The Society starts trying to take over. When the Society sends Jade Falcon Khan Marthe Pryde an ultimatum, her response was to laugh uncontrollably for several minutes, then give her answer in the form of executing the nearest Scientist she could find.
* BattleTech, each faction's interstellar warship fleet have their own prefixes, such as ComStar's "CSV" (Com Star Vessel). However, alphanumeric ID codes are rarely ever used.
* BattleTech effective threats than simple attempts to breach the armor through brute force since enough small hits can immobilize or with some luck possibly even altogether neutralize even the toughest tank fairly quickly.
* BattleTech enough to allow the jump drive to work after all. The problem with this approach is that as the smaller celestial bodies in a system move, so do its pirate points move with them...and while actual misjumps in the fiction are relatively rare, they do generally take out the ship involved for good (sometimes in a quite horrific fashion), so this isn't a risk a sane commercial JumpShip captain is likely to ever take. (The military, and the pirates the points were named for, are a different matter.)
* BattleTech environment to learn in. And it has already been established that looking out a porthole during a jump is just plain stupid...
* BattleTech, especially at the game's beginning in the early 31st Century this was fairly common except for a few factions. But lots of fighting tends to occur in and around cities and as advanced technology became more widespread the destructive power of mechs increased, making civilian casualties more common.
* BattleTech: eugenically selected, 'birthed' in artificial wombs, raised for their specific missions from childhood, then pitted against each other in live-fire conflicts to determine their fitness, and any who don't die or earn a "Bloodname" before the age of 35 are considered washed up.
* BattleTech: Even after their annihilation there are still small elements of Clan Smoke Jaguar who pop in and out occasionally.
* BattleTech exists the Bandit - aka "Dark" - caste. Its members are the outcasts and rejects of Clan society, often those who have failed in their assigned (or reassigned) caste but who refuse to accept demotion, or simply those who do not fit in to the rigid structure of Clan life.
* BattleTech Expanded Universe families at a warehouse district on the capital world of the Draconis Combine during the Coordinator's birthday. Said fight involved at least four Mechs and two vehicles, with almost all of them destroyed

and several buildings crushed and somewhere in the neighborhood of a hundred casualties. The next day, when police begin investigating, no one in the area claims to have seen anything. This is despite the fact the Coordinator himself could see/hear the fighting.
* BattleTech Expanded Universe), leading to the protagonists seemingly flabbergasted by Clan technology that the Inner Sphere was already producing.
* BattleTech Expanded Universe lever to jettison the canopy and start screaming and waving his hands at the friendly.
* BattleTech Expanded Universe: Various mercenary outfits are given considerable focus. The Gray Death Legion, the Kell Hounds, Wolf's Dragoons and Camacho's Caballeros are all rather prominent examples, while somewhat less well regarded in the fandom the Black Thorns got two entire novels dedicated to them in their time, and numerous smaller units put in occasional appearances at the very least as well.
* BattleTech Expanded Universe with a blown canopy inside an abandoned factory. He alternates between eyes to avoid being completely blinded as he fires the PPCs, and by the end of the fight suffers from facial burns and corneal damage.
* BattleTech explicitly stated to generate hyperspace fields to transmit messages across fifty lightyears of distance.
* BattleTech factions. It works out surprisingly well, since the Clan in question is the Snow Ravens, who disdain land-based military forces in favor of overwhelming air and space superiority and thus respect the OA's ASF pilots while ignoring the planets aside from a few small holdings they establish.
* BattleTech features a 31st century with dozens of detailed worlds and cultures, developed over the course of about three decades.
* BattleTech features numerous characters who were legends in their eras: Morgan Kell, Natasha Kerensky AKA The Black Widow, Victor Steiner-Davion, Kai Allard-Liao, and Aleksander Kerensky were all legendary characters known for their skill (and in Natasha's case, being a sex icon) when they were alive.
* BattleTech featuring cannon barrels so grotesquely massive that they actually constitute a larger percentage of the left arm than the rest of the arm itself.
* BattleTech, feudal-like systems were initially adopted due to simple practicality: there was FTL travel on the scale of weeks, but no FTL communication faster than a courier. So a ruler of an interstellar empire needed someone on-hand he could trust to take care of the day-to-day management. Even after the advent of FTL communcations, they maintain a feudal society. When the Inner Sphere joined together in the Star League, the head of the Terran Hegemony became First Lord, but his power was semi-limited by the heads of the other member states in the Star League. Once the Terran Hegemony was destroyed and the Star League dissolved, it basically became 5 separate feudal nations at war with each other. Each of the 5 nations of the Inner Sphere has its own take on their feudal system:
* BattleTech fiction shows bad guys doing this to show how ruthless they are. It's really stupid as they do this while other active enemies are shooting at them.
* BattleTech fight, but it just wasn't talked about: she once killed an assassin by decapitating him with a sword but because this didn't fit with the image she was supposed to have, it was reported that Victor Steiner-Davion was the one who did so.
* BattleTech fighters because they're indeed meant to operate in both space and atmosphere (and would in fact be lost in deep space on their own due to their limited fuel reserves and poor long-term efficiency not giving them much of an operational range) and so have wings or at least some sort of halfway plausible aerodynamic outline.
* BattleTech finished with the afterglow of such a scene, with the couple in question "turning gently".
* BattleTech folder, this kind of naming scheme is very common for mercenaries in that universe.
* Battletech follows on its namesake's tradition, with your mercenary group never deploying more than a single lance (A group of fourMechWarriors and their respective BattleMechs) against their targets. This can be changed with mods, however.

* BattleTech for all parties involved who didn't know about the plan beforehand is capped by an utterly priceless line:
* BattleTech, forcing an armistice to give the Successor States time to prepare for any later invasions.
* BattleTech former ruler of the Capellan Confederation known for her tendency to order the violent deaths of her citizens, often for no discernible reason, and Kathrine Steiner-Davion, who had her own mother assassinated then manipulated control of the Federated Commonwealth away from her brother before her tendency towards hamfisted control caused a civil war to break out.
* BattleTech for the past few centuries, hoping that it will give them an edge after the rest of the Inner Sphere bombs itself back into the Stone Age.
* Battletech friend, that's in the path of a strafing run. Coupled with a fairly high to-hit modifier, it may well be that nothing or everything gets tagged.
* BattleTech from being forced to execute helpless civilians with katanas. Even among the countless atrocities of the First Succession War, the Kentares Massacre stands out for its sheer brutality, and the horror helped pave the way for more 'civilized' warfare aiming to avoid unnecessary destruction.
* BattleTech. From that point on, "massacre civilians" became their default answer to any sort of irritation. And it convinced the Inner Sphere to band together and destroy the entire clan several years later.
* BattleTech. Fully averted by the time of the Jihad, where the Word of Blake uses heavily augmented super-soldiers and all the major powers use augmented agents in their intelligence agencies.
* BattleTech Gauss rifle capacitors which detonate and blow up the entire mech.
* BattleTech gives the player a chance to take down an ejecting pilot, or simply to tread on a downed 'mech pilot's cockpit, pilot still inside. Although it's commonly done by dumb chance, some players try for it.
* BattleTech guidance) at all costs (including theft, arson, assassination of scientists, and even nearly triggering war between the 'States). When the leadership started a trend towards secularism and technological progress, there was a great schism and the fanatical Word of Blake zealots were formed.
* BattleTech has a couple of really exotic options for infantry. The first is the Branth, a large flying reptile with toxic saliva that it can spit at its enemies. They're capable of carrying a rider and gear while flying, but due to their sensitive immune system, they invariably die of infection if taken off their homeworld. Another exotic critter is the massive hipposaur, a semi-aquatic herbivore that resembles a cross between a hippopotamus and a sauropod dinosaur. At 30 tons, it's more than capable of carrying an entire infantry squad on its back or even functioning as a mobile artillery platform. It's also strong enough that its physical attacks can smash battlemech armor!
* BattleTech has a hint of Zeerust with comically oversized targeting computers (similar to the Traveller example). In addition, the "future history" of the game was written in the 1980s and featured the Soviet Union remaining a power in international politics well into the 21st century. This history has been reprinted, but not updated, in later editions of the game, so that it references events that should now be in our past.
* BattleTech has a host of various terrains with positive and negative effects for either moving through or being in a space with that particular terrain under your 'Mech. For instance, Swamp terrain decreases your movement speed, but to compensate you take less stability damage from missiles and ballistic weapons. Being in a forest or sand cyclone gives you partial cover, but also prevents you from scouting as efficiently by reducing your line-of-sight. Some terrain is universally positive (high ground in general, ice) while some terrain is universally negative (rough terrain, lava). Managing the battlefield you're on and knowing how to control the various terrains is a large part of doing well in the game.
* BattleTech, has a number of different weapons that can be used to make indirect-fire attacks at a target they don't have line-of-sight to if it can be seen by another friendly unit. These include Long Range Missiles, Mortars, and Artillery.
* BattleTech has aspects of this. There are about two dozen factions in total, but

they're readily broken down by preferred tactics and the relative strengths/weaknesses of their preferences.
* BattleTech has had human cultures so well mixed that a tanned redhead calling herself "Rabbi Martinez" doesn't even bat an eye.
* BattleTech has had multiple such spoilers come about over the years:
* BattleTech has many distinctive logos for the Houses, Clans and even mercenary sponsors such as House Steiner's iron fist, House Davion's sword against a sun, House Marik's wings-spread eagle, House Liao's held katana, House Kurita's snarling Eastern dragon and the Free Rasalhagus Republic's own coiled up dragon.
* BattleTech has rules for characters getting prosthetics, ranked in four tiers, from crude hooks and pegs to full cybernetics sheathed in synthetic skin, as well as eye and ear replacements. However, there's no real advantage to them - at their best (and most expensive), they only allow a character to perform as well as they would with the original parts.
* BattleTech has several types of spy satellites available for use under advanced rules. The benefits they provide vary based on which type is in use.
* BattleTech has stealth armor for Aerospace Fighters, but when used outside of a planet's atmosphere it's only effective in rounds that the fighter doesn't use its engines, the fusion torch it uses for thrust gives off so much IR emissions that it completely negates the stealth armor's effects.
* BattleTech has Stephan Amaris AKA The Usurper. Adviser to the First Lord of the Star League, when the title passed to Richard Cameron, who was a child at the time, Stephan set himself up as a friend. It didn't take him long to convince Richard of his "dues" as First Lord and get the impressionable youth isolated from all other influences. Then Stephan personally shot Richard in the head and overthrew the Terran Hegemony government. Four hundred years after his death, both the Inner Sphere and the Clans still consider him to be one of the most hated and reviled people of all time.
* BattleTech has the One World Order forming and collapsing no less than 4 times! First Earth became a one-world order who sent out space colonies. Eventually the colonies rebelled into several bickering nations. Finally a force of personality united the bickering 5 major nations into a united One-Galaxy Empire. This collapsed after a Usurper killed the leader and his family and the five nations each claimed the throne. The Army of the now gone One-World Government fled and set up a new one world government of its own (the Clans). After 300 year of fighting, these clans returned. After an initial thwarting, the One-world-Order leader of the Clans was dissolved. In eventual response to the invasion, the 5 governments recreated the original one-world government again as a united force to stop the invaders. After the invaders stopped, the government, its mission accomplished, was dissolved. At which point an army of religious fanatics attempted to take on the whole galaxy to recreate another one-world government in their own image. The point seems to be that One World Orders aren't viable... up until you realize that if a sustainable version were to be created, the game would end.
* BattleTech has the "Sensor Lock" pilot ability that allows you to instantaneously gain vision on a single enemy unit within sensor range, regardless of line-of-sight or line of fire. Meanwhile, LRM missile racks, the PPC and most Autocannons have longer range than the 'mech that carries them has sight range, and the LRM racks can also fire at target without a line of fire. Small, fast scout 'mechs with Sensor Lock and heavier 'mechs loaded down with beyond visual range weapons often work in tandem, with the former painting targets for the latter.
* BattleTech has two military groups, each of which is tricked into thinking the other had attacked it.
* BattleTech has various man-portable flame weapons which, in defiance of the game's love of rolling for the odds of almost every result, simply assumes that a successful hit with a flame weapon will set someone on fire for a good twenty to thirty seconds at the very least. The ease of flammability is offset by the fact that fire damage was unusually mild in a game with otherwise incredibly lethal damage calculations.
* Battletech has Zeppelins as support vehicles, in small, medium and even large. In

addition, the Star League apparently once used a Zeppelin based design to create multi-platform flying cities.
* BattleTech have their "Keshik" units, which serve this function for their Khans.
* BattleTech have winglike structures on their backs. While rules for a piece of tech called Partial Wings were eventually added to the game, which improved the mech's jumping ability, for the most part, wing structures are purely decorative.
* Battletech her battle is more emotional catharsis than an actual challenge. The boss' AI is also commanded not to engage until the player gets to a certain range, which more or less guarantees the first shot (and kill) goes to the player.
* Battletech; her son realized how much of a snake she was and proceeded to off her.
* BattleTech hex (where they can't be shot at). There are a couple of dedicated close-in defense weapons, but as those are one-shot devices that only work under highly specific circumstances — and not necessarily well even then — while nonetheless taking up valuable tonnage, most 'Mechs don't actually mount them and fall back on kicking and stomping instead, which they can basically get for free.
* BattleTech hiding in a building from outside is by demolishing the whole thing until cumulative collateral damage takes them out as well, probably while they keep taking potshots at their attacker unimpeded in turn...
* BattleTech His Mech is painted a bright green with various currency symbols all over it.
* BattleTech hit world objects including other 'Mechs regardless of affiliation if they're in the projectile's randomly determined path. This can have hilariously destructive consequences on urban battlefields when, for instance, an Awesome misses with its PPCs and instead brings down the downtown high rise behind the target. It also makes it inadvisable to cluster 'Mechs together as shots that miss the intended target are highly likely to hit the one next to it instead.
* BattleTech, horrible little bastards about the size of a terrier that live in trees and leap onto the heads of victims, smashing open their skulls, and eating their brains. And yes, this includes humans. They are so lethal that their attacks do as much damage as a sniper rifle headshot (each turn!), and with similar results in terms of gore.
* Battletech hulls as a framing device for teaching the player the basics of combat.
* BattleTech if a Trueborn is feeling particularly contemptuous) and are generally held in contempt by Clan society.
* BattleTech if desired as part of the arsenal of the renegade Clan scientist faction known as "the Society". (Of course, part of what made them effective in this case was that Society members had easy access to DNA samples of their intended targets courtesy of the scientist caste being charged with managing the breeding program just mentioned in the first place.)
* BattleTech). If they survive and defeat at least one of the warriors they are accepted into the Caste. Defeating more than one means they enter the caste with a promotion.
* BattleTech, if you're an infantryman, you can look forward to the following attractive deaths: being stomped to death by a 50+ ton mech, having your limbs blown off by a gauss rifle, vaporizing in the middle of a huge person-wide laser beam, being sliced in half by a smaller beam, kicked so hard by a giant mech that if you aren't killed by the blow, you will be when you hit a wall flying 80 KM/H. A pilot in a BattleMech can look forward to having his limbs torn off by jagged pieces of metal as he ejects, being sliced open by jagged pieces of metal as he ejects, accidentally auto-ejecting into the vacuum of space, without a space suit, and those are when you eject. Inside the mech a pilot risks becoming brain-dead following their neurohelmet zapping their brain with so much biofeedback, that the worst Black ICE in Shadowrun would be jealous.
* Battletech: ilKhan Leo Showers of the Clans died when the bridge of the WarShip he was on was rammed and lost pressure, throwing him into space. Several other people were on the bridge with him and successfully evacuated as the pressure fell

(including his eventual successor Ulric Kerensky); Showers' death is noted to be simple bad luck of standing too close to the windows at the time of impact.
* BattleTech, including Sandhurst. Any major power has three or four, each of which train elite officers, though usually the one on the Capital world is the most prestigious.
* BattleTech infantry, a friendly four- to six-trooper unit of whom can simply hitch a ride on any of them by clinging to dedicated handholds on the outside.
* BattleTech in that Humans would naturally pick the Earth-like planets to settle first.
* BattleTech in that tritiated water is only a weak beta emitter, carries no adverse health effects from external exposure, and is only an extremely mild radiation hazard when ingested.
* Battletech: In the backstory, Shiro Kurita, the founder of the Draconis Combine, was driving one day when he saw a particularly attractive bamboo shoot. He climbed out of the car and cut it down, intending to make it into a tea ladle. Suddenly, his car exploded. It then hit him that something as traditionally Japanese as harvesting bamboo for a tea ladle had just saved his life. Deciding this was a sign from God, he began to remodel the Draconis Combine to follow Japanese traditions and ethics.
* BattleTech in the desplay screen of the neurohelmets pilots wear, and the controls are all physical buttons and joysticks.
* BattleTech in the Periphery looks fondly upon the old days of the united peace of the Star League. The leaders of the Successor States all long to become the First Lord of a reborn Star League.
* Battletech, in the Wars of Reaving Clans Steel Viper, and Star Adder just obtain a great deal of isorla(spoils of war) from fleeing Clan Snow Raven fleet. When they didn't have enough room for all their isorla, they decided to throw out clan civilians out the air lock.
* BattleTech into heavy use and limits space combat to fighters trying to kill said DropShips before they reach a planetary surface. The return of the Clan forces and their full armada of WarShips changes the equation a bit.
* BattleTech: In-universe, this is the general purpose of the Clans' Trial system of combat. There's no honor in winning a battle by using overwhelming odds, so they try to use as little forces to win as possible. For example, if one Clan launches a raid on another's planet, the defender will announce what forces that they intend to commit to the protection of their resources. Then the attacker will review the record of those defenders and decide how much of their own force to commit- if the defender commits five battlemechs, the attacker may choose to use only three. Similarly, an individual pilot may choose to voluntarily avoid using one or more of their mech's weapons in a fight.
* BattleTech invaded- their equipment was drastically superior to Inner Sphere weapons and armor, so once the Inner Sphere factions figured out how to start winning fights with them they made a habit of sending raiding forces across the border to take their stuff.
* BattleTech, involving more the loss of technology than any guilt over the warfare, and their rules include things like no nukes in atmosphere, no orbital bombardments, no chemical or biological weapons, as well as respecting salvage rights for victors and ransoms for captive 'mechs and (noble) pilots.
* Battletech is a 100,000-ton heavy colonization vessel intended to carry pre-fabricated housing and years' worth of supplies to frontier colonies, alongside the hundreds of colonists and dozens of construction vehicles needed to keep a colony going. By the time it's excavated and put to use again, the Argo becomes the flagship of a mercenary company that numbers around 20-50 people on a good day, and has around six battlemechs. In-game, the humongous amount of superfluous space on the Argo is used to justify your essentially unlimited storage space for 'mechs and equipment not currently in active use — Murad notes that with 54,000 tons to spare you'll never run out of places to store 'mech parts.
* Battletech is also sold by Quickcell as flat-packs as well as pre-made vehicles. The flat-packs work fine when assembled, but they always leave a small pile of

parts nobody knows the purpose for.
* BattleTech is at least eight metres tall and runs off a power source that has a significant thermal signature even when idling, rendering camouflage rather pointless.
* BattleTech is best known for its 'Mechs, there's also Powered Armor down there, ranging from simple suits worn by special forces troopers to one-ton monsters capable of taking down a 'Mech in teams and withstanding their weaponry, to two-ton four-legged machines more piloted than worn, with enough firepower to shame an infantry company. Interestingly the Inner Sphere has a clear divide between lighter Powered Armor (typically less than half a ton) and heavier Battle Armor (can weigh up to 2 tons).
* BattleTech is full of mercenary armies. Many of the high-grade mercenary armies are a match for or even superior to the best armies of the various governments, and some can even get titles and holdings in the neo-feudal system of the 31st century. The setting also has both honorable mercs (the Gray Death Legion, Wolf's Dragoons, The Kell Hounds) and dishonorable ones (the Crater Cobras, Little Richard's Panzer Brigade, the Waco Rangers). Many Pirate groups are failed mercenary units. Running a small Mercenary Company is the standard campaign mode for the game. A few notable examples:
* BattleTech is known for painting every mech he pilots bright green and covering it with symbols for different forms of currency (dollars, pounds, yen, C-Bills, etc.).
* BattleTech is recovered, allowing full-body jumpsuits laced with new non-toxic coolant fluid.
* Battletech it has with the Combine's other special security force, DEST (Draconis Elite Strike Teams) used to be an agency that wasn't officially acknowledged until the Clans invaded. The Capellan Confederation has the Maskirovka, a secret police force that's feared for its ability to make enemies of the Celestial Throne disappear.
* BattleTech, it's revealed that Hanse Davion, the First Prince of the Federated Suns, has been replaced with an impostor because the impostor can't pilot Hanse's personal Battlemaster, since the neurohelmet a mechwarrior wears to give their mech balance has to be carefully calibrated to the mechwarrior's brainwave pattern.
* BattleTech It stands for "Dead Right There" and is used multiple times throughout the novel in an incredibly awkward and forced manner (not that such a phrase could be used any other way) that made it sound significantly like the author was indeed trying to turn it into a meme.
* BattleTech. It was the only way to communicate before the advent of the Hyperpulse Generator (noted above in the aversion-free section), and also experienced resurgence during the recent "Dark Age" where sabotage against the entire HPG network effectively disabled a significant majority of it. It's also used for backwater worlds without a HPG.
* BattleTech Jihad, a large group of B-list characters were killed off during a strategy session when former WoB POW Fitz Donner suddenly exploded. It turned out that when he'd been captured by the Blakists they'd stuffed him full of explosives and let him be "rescued" in order to get him into the same room as the people he killed.
* BattleTech Jihad. The Word of Blake started a war with the rest of the Inner Sphere and their initial attacks led to the conquest of numerous worlds, some of which hadn't been subject to hostile invasion for centuries. Eventually, however, Inner Sphere forces began to rally and with began taking worlds back. Under the leadership of a man named Devlin Stone, the coalition succeeded in routing Word of Blake forces all the way to Terra and ultimately wiped out the last (known) members of the Word of Blake.
* Battletech jumps are astronomically slim due to the vastness of space, to the point that it's only been recorded in one incident in over a thousand years of JumpShips being used, during a massive invasion. However, the annihilation of whatever interplanetary medium matter was in the destination point when a ship jumps in-system emits an electromagnetic pulse which is easily detectable.

* BattleTech JumpShips can only jump up to thirty light-years at a time, with long charging periods in between and only specific points within a solar system that they can safely land at.
* BattleTech just by dint of ignoring or replacing some piece of the prescribed kit.
* BattleTech. Just in case this wasn't enough to make it clear how evil a character she is, she also designs a new dress uniform for Falcon warriors that's very obviously based on the ones worn by the SS.
* BattleTech known as the Clans no less, who believe firmly that honorable victory on the battlefield is the apex of achievement. It says something, then that Clan Wolf manages to spare themselves the cost of men and materiel in invading the heavily defended planet of Gunzburg by meeting with the defending commander and convincing him that while the defenders might be able to put up a fight, they would ultimately lose even a battle of attrition, and that his people would suffer. This realization touches the defending commander, who turns over the world peacefully for the sake of not bringing war to his people, and leading to the legend of a Clan warrior single-handedly capturing the planet.
* BattleTech left them unprepared to fight a protracted war. Once the Inner Sphere realized this, they were able to exploit it and began using the Clans' tactics against them, culminating in the Battle of Tukayyid, where Comstar handed them a powerful defeat that forced them to abide by a 15 year truce. This loss caused most of the Clans who were involved to get a clue and start actually using real tactics against the Inner Sphere.
* BattleTech like the aforementioned muscles requiring surgery whenever damaged and constant painkiller usage. The genocidal Word of Blake invested heavily in cybernetics, and the invading Clans likewise had a fondness for overt replacement cybernetics without the usual faux-flesh, further stigmatizing cyborgs.
* BattleTech like the Gray Death Legion or the Kell Hounds likewise have a spirit of camaraderie and brotherhood, in addition to getting a hefty paycheck.
* BattleTech like the Kell Hounds used neon red and pitch black battlemech paint.
* BattleTech, losing them the ability to produce their highly advanced technology. Thus, newer mechs tend to be less capable in combat when paired up against similar mechs that were built hundreds of years earlier. Of course, if you HAVE such an old (but powerful) mech, you try to make sure it gets the best of maintenance so it will continue to be the best.
* BattleTech lostech caches — when the Gray Death Legion mercenaries discovered the Helm Memory Core, a near-complete set of lostech schematics which they chose to spread through the Inner Sphere despite the efforts of ComStar. Meanwhile, the Clans who left the Inner Sphere at the start of the Succession Wars not only maintained their level of technology, but actually improved on it, making a Clan 'Mech of a given weight worth, in general, one and half Inner Sphere 'Mechs of the same weight.
* BattleTech: Many mercenary outfits fall into this trope, especially smaller ones. Units like the Gray Death Legion, Wolf's Dragoons, and the Northwind Highlanders are all noted for having fairly relaxed views on formality between the troops and the senior officers. Few of them have any issues with fraternization, either: Grayson Carlyle, the leader of the Gray Death Legion, dated and eventually married his second in command with no change in the unit's structure as a result.
* BattleTech may see one of your MechWarriors asking Yang to install a "B A eleven hundred N" on their 'Mech, saying another MechWarrior told them it will greatly improve stability. Watch it play out, and Yang hands over the appropriate requisition form. The hapless MechWarrior gets halfway through the N in "BA1100N" before realizing they've been had.
* BattleTech — but it still effectively turns them into fast-moving turrets.)
* BattleTech — Hanse was 45 at the time of the wedding, Melissa was 18.
* BattleTech — the old-fashioned way, that is, rather than via the 'superior' Clan method involving the matching of donated genetic material from specific bloodlines and "iron wombs". On the other hand, the separation of sex and procreation in "trueborn" society means that recreational sex is considered just

another activity, but concepts like romance and similar strong personal attachments are somewhat alien and confusing to them (at least in part because their first loyalty is of course supposed to be to their Clan).
* BattleTech MechCommander video games, shooting a mech in the head tended to kill the pilot as well. If the mech was destroyed any other way, the pilot would usually eject the head as an escape pod and survive.
* BattleTech meddling with information, but the Interstellar Players books dive headfirst into this, giving information that is dubious at best to flat out lying at worst. The veracity of said information is usually meant to be assessed by the GM.
* BattleTech melee weapons a mech can mount unless certain optional rules are used.
* BattleTech, military resolution was seen as an inevitable outcome) using a minimum of forces without it spilling over into full-blown civil war.
* BattleTech missiles into hitting a "marked" unit belonging to their own side if that unit just so happens to conveniently stumble into their line of fire.
* BattleTech more firepower, runs cooler in combat, and is more durable, earning the Rakshasa an (often undeserved) bad reputation.
* BattleTech Mostly, all it did was cause the formation of a new faction, the Republic of the Sphere, and cause the rest of the factions in the Inner Sphere to take a breather where they didn't rebuild their forces up to pre-Jihad levels. It should be mentioned that the leader of the Word of Blake was batshit insane.
* Battletech, most notably is the start of the Jihad. The Word of Blake had sent a warship to Tharkad, the capital of the Lyran Alliance, intending it to be a present of the alliance the Word intended to form to combat the Clans. When the Star League disbanded, they instead used the warship to attack Tharkad, officially starting the Jihad.
* BattleTech. Most of them have been complete failures. A notible example is the Defiance, a 75 ton Battlemech that was built to be a new flagship model for its manufacturer, Defiance Industries. When a rogue general attempted to start his own little rogue state beginning with Defiance Industries, one of the people loyal to him took the prototype Defiance and used it to attack the defending force, the famed Gray Death Legion mercenaries. He initially had some success thanks to attacking from their rear and hitting mechs that were already heavily damaged after several battles, but eventually several design flaws (due to using experimental technology in the mech's construction) combined with the pilot's lack of experience caused it to be defeated. It would take almost 20 years before the design would be resurrected, this time using tech that was no longer experimental and consequently far more reliable.
* BattleTech, mounted infantry in the Lyran Commonwealth sometimes ride Coventry kangaroos, which are large, genetically modified red kangaroos that were specially designed to be riding beasts.
* BattleTech: Much of the Dark Caste AKA Bandit Caste of the Clans is made up of these. Not an actual caste in Clan society, it's simply the name they give to criminals. Warriors who feel that they no longer have a place may find their way there after falling victim to a rival's political machinations, injury, or simply because they've gotten old without finding a promotion or honorable death. The Clans have no tolerance for such people, so they fight extra hard because it's always win or die for them.
* BattleTech must be acting to save his allies. If it worked these would result in the mech suddenly moving in strange ways and becoming nigh-impossible to target properly, but the mental strain would force the warrior to retire into seclusion afterward.
* BattleTech nature. The Word of Blake's advanced Celestial series mechs are zombies, mounting surprisingly weak weapons for their tonnage but making up for it in durability.
* BattleTech, no matter their efforts, so why bother about seeing their success if you know in the long run it will all go to hell again?
* BattleTech normally assumes that missed shots simply miss and have no other effect. There are three exceptions to this:

* BattleTech notes that this is possible for the Clans, as the scientist caste has the ability to insert DNA from a male donor into an egg or DNA from a female donor into a sperm cell. How common this is is never revealed and the Clans care little for family ties anyway.
* BattleTech (not that they'd need to; the elementals are 250 cm, 100+ kilo slabs of solid muscle, and pretty much plow through the defenders by default).
* BattleTech novel, a green-eyed redhead uses the alias "Rabbi Martinez" without arousing suspicion.
* BattleTech novels, members of the Clans make a point of not using contractions (at least in the classical sense, as several Clan-exclusive terms are at least portmanteaus if not full-on contractions). Given that most Clan characters are warriors they also use many military terms and end up using a form of Spock speak.
* BattleTech novels, Phelan Kell gives a speech that typifies this trope: "I saved him because if Vlad is going to die, it will be at my hands."
* BattleTech novel where a character who was a mech warrior for ComStar ordered a bottle of a House Kurita beer...in a bar on a House Davion world. He was in the ComGuards so he didn't realize his mistake until the bar patrons got angry.
* BattleTech novel where a commander berates a subordinate about firing indiscriminately in a crowded city in order to get to him. So it was a simulator fight, but it was still reckless behavior. The novels nonetheless show plenty of instances of combat in an urban setting. The presumably resulting civilian casualties are rarely even mentioned in passing unless it's explicitly a plot point (like the Smoke Jaguars' orbital bombardment and resulting total destruction of Edo, which was in fact considered over the top by even their allies and a genuine war crime by most everybody else). The Jade Falcons repeat the orbital bombardment in the animated series, but it's explicitly stated that the city's population was evacuated prior to the bombardment. A sourcebook for the series goes into further detail, comparing the two incidents, and bringing up the question of what the Falcons did with the people afterwards.
* BattleTech nowadays are these, having grown up playing the game in the '90s. Even the artist in charge of the recent visual revamp of the game's original 1980's 'Mechs came in as "king of the fan artists."
* BattleTech number less than the Great Houses of the Inner Sphere, but thanks to having a culture completely devoted to military prowess, they nearly ended up conquering the entire Inner Sphere.
* BattleTech of a man who was a thorn in the side of two of the setting's Great Houses for thirty years and responsible for more than is share of crimes against humanity.
* BattleTech off by another. Likewise, units forced into prohibited terrain (i.e., of a type that they could not normally enter of their own volition) may find themselves simply destroyed outright as a result.
* Battletech of the Invader Clans. When the Inner Sphere united into a second Star League their immediate concern was to demonstrate their strength so as to prevent further Clan attacks from the Clans who weren't bound by the Truce, and they singled out Smoke Jaguar to be their example. The Jaguars found themselves attacked on all sides in their Inner Sphere territory and ejected from the Inner Sphere wholesale, following which the Star League traced them back to their home world of Huntress and conquered their entire territory, effectively Annihilating the Jaguars in all but name.
* BattleTech of the Outworlds Alliance. While they haven't completely given up technology — they're known for the quality and skill of their aerospace fighter force — as a whole they prefer a simpler and less techologically dependent lifestyle than most other factions, with farming being a much greater part of their economy than industry. Given that they've managed to avoid most of the major wars following the Reunification War in the 26th Century by just not being considered worth invading by their highly warlike neighbors, they might be on to something.
* BattleTech of training in working together as a team and coming up with tactics to surprise enemies. Interestingly, it's noted that their actual reflexes are

average at best; they respond to surprises better than most, but being comprised largely of dropout college students, the Rangers haven't undergone the strenuous physical training most academies require. They eventually shape up, however, and become respectable pilots in their own right.
* BattleTech: Omnimechs are a special type of Battlemech with modular weapon systems mounts. This allows technicians to swap out the weaponry, whether it's in the mech's arms or torso, in a matter of hours rather than taking multiple days like a similar change-out would take on a standard mech. There's also a Battle Armor device, the Modular Weapon Mount, that allows Battle Armor to perform in a similar capacity.
* BattleTech, one character, whose husband recently had a limb replaced, mused that the sex the night before proved that cybernetic limbs at least don't remove a person's tenderness or passion, and thinks that the only people who tend to go coldly murderous when they have cybernetic prosthetics installed are people who tended towards that sort of behavior anyway.
* BattleTech. One "flashpoint" mini-campaign event from the DLC of the same name, "Yang Virtannen's Big Score", is a more elaborate example in which your mercenaries hijack a bunch of pristine vintage battlemechs.
* BattleTech One interlude in that book is a message from a plant manager venting about the human consequences of the warriors' demand for more and more military material in the buildup to the retaking of the Pentagon Worlds:
* BattleTech. One notable incident was during the Twilight of the Clans event, the Inner Sphere sent a secret army called Task Force Serpent to launch a sneak attack on Clan Smoke Jaguar's distant capital world of Huntress in order to destroy the Clan's warmaking abilities. However, the Smoke Jaguars ended up retreating out of the Inner Sphere during the fight with the Inner Sphere's primary offensive forces, meaning that they were also heading to Huntress so Task Force Serpent found itself facing nearly the entire remaining might of the Jaguars. Victor Steiner-Davion led a relief force to pursue the Jaguars back to Huntress but by the time he got there, Task Force Serpent was down to a mere 20% of its initial strength.
* BattleTech one of the first worlds struck by the Clans were ruled by a pair of bandit kingdoms. The Barony of Strang who's leader is a descendant of a Rim Worlds Republic commander, and Santander's Killers who are a band of ruthless pirates who are a constant menace to the Inner Sphere. The Clans did everyone a favor in wiping them out.
* BattleTech: One story mission sees you attempting to infiltrate an old Star League base, only to accidentally trip an alarm and cause it to start deploying an infinite number of combat vehicle drones. The only way to stop them is to press forward fast enough to get into the base before you're overwhelmed.
* BattleTech on this trope, asking why there were so many references to things 1000 years in the past, and so few from just 200-300 years ago.
* BattleTech orbital bombardment to wipe out concentrated Jaguar military forces while picking off stranglers with overwhelming firepower and ambush tactics.
* BattleTech, or for more realistic acceleration-based, frictionless combat.
* BattleTech, or the merchants who arranged for the budget needed to support its construction, or the labourers who actually did all the hard work. Clan Warriors scorn scientists, the mechanics that repair their equipment, the merchants who plan their economy, and laborers. This even shows up in their faster-than-light capable JumpShips and WarShips, where technicians seem to be regarded as expendable - a captured Clan technician on an Inner Sphere warship is surprised at all the protective gear and life support equipment that engineers are given when working in dangerous conditions.
* BattleTech or vehicle that isn't specifically shielded against fire attacks.
* BattleTech. Pay enough Battle Value and you can get a very good pilot for your most expensive 'mech.
* Battletech plays this trope straight, especially in the beginning. With the technology for most high tech weaponry lost, the best weapons are also the oldest. And in most cases, they have been used all the time. Of course, this was only a plot device to rediscover better technology later on, and to introduce stronger

units into the game.
* BattleTech. Plenty of colonies that were closest to Terra traced their culture and ancestry to the United States of America, due to its powerful status within the Terran Alliance which allowed the USA to secure the best real estate around humanity's homeworld. That proximity backfired when the Succession Wars erupted, as the worlds around Terra were heavily fought over and sometimes rendered uninhabitable. As a result, by the game's opening year of 3025 Asian and European cultures are prevalent throughout the Inner Sphere, with few if any American-derived cultures depicted.
* BattleTech posing as pirates in an attempt to break the truce between the Clans and the Inner Sphere.
* BattleTech problems that it violently exploded from an ammunition rack detonation within a minute of firing its weapons in earnest.
* Battletech punch above their weight class if invaded, which keeps the Federated Suns and Draconis Combine from trying.
* Battletech pushing things back to the Industrial Age in places. Then the Grey Death Legion finds a a Star League memory core on a planet they was supposed to be given - and realizes they were framed for war crimes specifically to try to stop them from finding it. They download it, make a bunch of copies, and give them to anyone who will take them.
* BattleTech puts basic aerospace combat into its core rulebook, with more 'advanced' options—such as the alternative movement rules mentioned below or the use of unit types beyond just fighters, small craft, and DropShips—handled in subsequent volumes.)
* BattleTech rather more straight (one very common fandom term for this is "new toy syndrome").
* BattleTech recognizable form of 'food' is a plastic tube full of nutrient paste that is universally reviled...in exactly the same way by everyone who has to eat it. Every single time it appears, it is described in both texture and taste as 'soggy newspaper,' or 'damp cardboard,' or some synonym of wet wood product.
* Battletech restricted to exiting hyperspace at the "jump points" within a solar system: Close proximity (relatively speaking) to a star or other large gravity well is just about the only place where safely returning to normal space is a problem, so in theory it's entirely possible for a jumpship to take a shortcut by dropping out of hyper in the dark between the stars to recharge its drives. But in practice this is rarely done, because it comes with significant risks: KF Drives are pretty delicate bits of equipment, and the most reliable way of recharging them after a jump without causing excessive wear on the core is to use a large solar sail array. For obvious reasons this doesn't work well in deep space.
* BattleTech rises from the ashes and peace ensues? HPG blackout! It really never ends.
* BattleTech RPG one of the premade character archetypes is called the Faceman, basically a mix between a public relations manager and a lawyer, who works for a mercenary company. While he is next to useless in any fight it is mentioned that merc commands that don't have one of these guys usually go under within a year, often before seeing a single battle, thanks to legal, bureaucratic and monetary issues.
* BattleTech ruled over most of known space but ever since it broke up the five successor states and the Clans have been pretty much in a stalemate.
* BattleTech rule that even after a couple of decades of development cannot hope to account for everything and retains a number of bugs.)
* BattleTech runs on this trope. The setting is kept in a state of near perpetual war because peace is boring (and would stop them from making more sourcebooks).
* BattleTech's Clans are the latter version of this trope — rules of warfare and codes of honour shared among the clans are carefully designed to minimize interplanetary collateral damage, discourage brawling, and avoid hard feelings — at least the dirty personal conflicts-kind.
* BattleTech's design team was executed for "treasonous incompetence" as the mech could barely move under its own power.

* BattleTech's Dual Cockpit teams, where a duo of Mechwarriors combine their talents to pilot one 'Mech, very similar to the pilot and weapons/radar officer duo in tandem seat jets. Because bonuses are granted for having both pilots in the same 'Mech fighting together, it usually ends up being the case that both pilots will stick together together outside the 'Mech as well. According to the fluff pilots tend to synchronize before long due to sharing activity outside of the 'Mech and neurohelmet patterns inside it.
* BattleTech seem to be prone to this. Kathrine Steiner-Davion, for example, once had a planet send her a birthday gift that she decided wasn't expensive enough. So she ordered that medical shipments for a viral outbreak the planet was currently suffering from be cut off.
* BattleTech series. Famous examples include Khan Natasha Kerensky holding off the Jade Falcons on Twycross (invoked deliberately—as a Khan of their hated rivals, Clan Wolf, she had made herself into a high priority target to get the rest of her force away), and Aidan Pryde decimating the Com Guards on Tukayyid (more traditionally, he held the line to allow his unit to escape the battle, and for his only recently revealed daughter to be rescued).
* BattleTech series of books The Clans are a race of supermen and women that are mass-produced in batches from the DNA of their greatest warriors. During their childhood, all the clones engage in casual sex with each other to build bonds. This sometimes continues into adulthood; notable examples include the Pryde siblings from the novel Legend of the Jade Phoenix and the Hazen siblings from the Mechwarrior: The Dark Age novels; both from Clan Jade Falcon.
* BattleTech setting. Here, FTL communications do exist... but they do so primarily in the form of large stationary installations called Hyperpulse Generators (or HPGs for short) run by the same ostensibly neutral monopolist throughout the Inner Sphere, so all the alternatives remain alive and well. After Grey Monday, when most of the HPG network went permanently offline and started the Dark Age, "pony express" style courier services became the primary means of getting information between star systems.
* BattleTech-setting versions of the Legion. The devs acknowledge where they drew the inspiration from, as a surprising number of mercenary units have 'Legion' in their name and their members are universally addressed as Legionnaires. As far as nations mirroring the French side of the equation, the Capellan Confederation seems to fall closest to the original system—they prefer to spend mercenaries instead of House troops if at all possible, but reward loyal and long serving mercenaries with Capellan citizenship (which must be earned by every individual, as is not granted from birth) and subsequently valuing them the same as House troops.
* BattleTech, set to go off when the Clan forces closed in to get inside the minimum range of the decoys.
* BattleTech several planets have been reduce to this due to the massive battles of the Succession Wars. The planet Mallory's World was once a lush agricultural world, when the First Succession war began, it was fought over by the Successor States, which left three out of the four continents into war torn wastelands.
* BattleTech simply because they're things that the in-universe authors didn't know.
* BattleTech: Sir Raju has a well-justified moment with this trope when he is forced to turn his guns on former comrades-in-arms who chose to rebel against his daughter-in-all-but-name Kamea.
* BattleTech sister, and almost succeeded in fending off a second attempt.
* BattleTech slow underwater. Mostly they're used for duty in contaminated environments.
* BattleTech's merc company obscene amounts of wealth from the Combine's intelligence budget to wreck FedSun targets while he's busy getting drunk.
* BattleTech, so characters can be remade into a cyborg worth more than some Battlemechs and be unchanged personality-wise. Anything beyond basic replacement is heavily stigmatized, though, thanks to the Word of Blake cult, who built cybernetic super-soldiers and unleashed them on the Inner Sphere.
* BattleTech, some of the more prestigious mercenary companies are descendants of

elite Star League regiments before the League's collapse, and can typically be counted on to be better behaved than is (stereo?)typically expected of mercenaries.
* BattleTech sourcebook shows a 85 ton STK-3F "Stalker" crashing through a city wall behind enemy lines, crushing a tank in the process.
* BattleTech "Soviet Civil War" in the early 21st century, just before the first manned flight to Mars. Newer materials haven't retconned this; presumably, it's just assumed to be an alternate reality.
* BattleTech, space-combat has ranges measured in hundreds of thousands of kilometers.
* BattleTech spinoff) series has two main missile types: Short Range Missiles and Long Range Missiles. SRMs are shot, according to the launcher type, in salvos of two, four and six. LRMs, in contrast, are shot in salvos of five, ten, and rather more ridiculously fifteen and twenty. Super-heavy Mechs can be armed with as many launchers as their weight allows, one can mount, say, six LRM20s on a single mech. Shooting them all at once causes a barrage of 120 guided missiles that will overpower any anti-missile system and very probably destroy any Mech in one shot.
* BattleTech's selection of 'mechs is grouped into four classes, the biggest and slowest being Assault. Assault 'mechs are most often slow, plodding, ultra-durable behemoths, and usually pack enough firepower to destroy a Light mech or cripple a Medium with one salvo. They also don't have to worry too much about their speed, since most Assault 'mechs are equipped to deliver death at extremely long range. And the Assault mech has even been one-upped, now, as rules for Colossal class mechs from 105-200 tons now exist. They're bigger, tougher, more heavily armed, and slower than even Assault mechs. Unfortunately, they're also saddled with a few extra drawbacks, like being easier to hit than other mechs due to their massive size and being unable to use certain types of tech, like Stealth Armor or Jump Jets.
* BattleTech's timeline up to the year 3250 (it was currently at 3150) and performing a soft reboot of the setting to make things more streamlined. A small but highly vocal number of players raised such an outcry over this that Herb Beas, the line developer for Battletech at the time, stepped down and the idea was quietly scrapped aside from a few throw-away lines at the beginning of a couple of sourcebooks (all Battletech sourcebooks are written from an in-universe perspective).
* BattleTech storyline. The first two involved weapons of mass destruction, and a savaging of the Star League-era technological advancements. The latter two Succession Wars involved devolved levels of technology on all sides, almost back to that of the Age of War that preceded the Star League. Any old Star League era relics are known as "LosTech".
* BattleTech strictly speaking has no aliens as such, the Clans as the next best thing that does exist seem to play this trope pretty straight. This is another way in which they contrast with the Successor States, where contemporary pop bands and imported soap operas can be found even in such restrictive regimes like the Draconis Combine or Capellan Confederation, and the possibility of the Clans' lower castes becoming 'infected' with Inner Sphere cultural mores if allowed similar access has been brought up on both sides of the fence (with the Clan leadership naturally viewing it as a threat and at least one shrewd Kurita business magnate considering it a possible opportunity). The Clans do have some pop culture (there's a children's cartoon that's been confirmed as canon that's produced by the Clans), but they're a caste-based society with everything geared toward supporting the warrior. As such, production of any sort of entertainment is a very low priority for the laborer caste (which is the lowest of the castes).
* BattleTech style physics, and three dimensional movement is important. Likewise, the fiction usually averts this, with direct combat between capital ships typically fought entirely by instruments and mathematics.
* BattleTech subverts this, in the Star League era the SLDF had plenty of cool starships, but the the first two succession wars saw the destruction to most of them. Fortunately the Clans brought many of them in their exodus, and possess some of the most advanced warships in the Inner Sphere. Comstar still possess some of

those older ships, and IS Houses are still trying to make new ones.
* BattleTech. Such a character could conceivably pick up any two-handed weapon and be equally proficient in it, leading to scenarios where a sufficiently brawny individual would carry a shotgun, an SMG, a disposable rocket launcher, and keep a rifle somewhere handy just in case some sniping was necessary. Later games split weapons skill down further to finer degrees of specialization while raising the weight of armor and weapons, so this trope became (somewhat) less prevalent as time progressed.
* BattleTech, sufficiently cool-running 'Mechs could play this trope dead straight.
* BattleTech suit, the Buraq, that are both stylized to look like horses.
* BattleTech survives the Jade Falcon invasion of Coventry intact and manages to link up with reinforcements thanks in part to her training and command skills, where larger, more prestigious, and more powerful units fighting alongside them are annihilated by the Falcons because they did not have discipline, good command, or common sense.
* BattleTech tabletop game, the open warfare of the Succession Wars was so destructive, with so many factories, shipyards, and research facilities targeted that many of the most advanced technologies were lost for centuries before a Star League Memory Core (basically a supercomputer database) was accidentally discovered.
* BattleTech tactical video game allows melee combat from 'Mechs for a series first. The common response to melee attack orders on vehicles and downed 'Mechs is for the attacker to rush up and stomp the offending party into the mud. This usually wrecks vehicles outright and severely damages them otherwise.
* BattleTech tainted and thus they became the last Clan destroyed in the Reavings.
* BattleTech tended to have this as a major issue when it came to characters who were supposed to be spectacular leaders. Kathrine Steiner-Davion was an obvious example: described as phenomenally charismatic and a shrewd manipulator, most of the time we actually see things from her perspective she's petulantly whining about her brother and her father and how she deserves everything better than they do, and her "manipulations" are laughably hamfisted and should have been remarkably obvious to anyone who was remotely alert. Likewise, her brother Victor Steiner-Davion was described as "the greatest military leader in the Inner Sphere [in the last 300 years]." He's never actually shown coordinating large troop movements or directing battles, he mostly just goes out and fights a bit in his custom Daishi Omnimech and gives fairly basic orders to whomever's in his close vicinity.
* Battletech) tend to play this trope more straight while more powerful and thriving ones (Wolf, Jade Falcon, Ghost Bear, Diamond Shark, and Star Adder) elect leaders based off both combat ability and political prowess.
* BattleTech, terrain is one of the main factors in battle. Most all cover hinders line-of-sight, and in cases involving a series of mountains or valleys between two combatants, advanced rules explain how to draw a graph to simulate whether or not line of sight is present.
* BattleTechTerra regained some (public) prominence when the Clans showed up with the expressed purpose of conquering it (they were the descendants of the Star League's army, so they saw Terra as the capital of the League). Then, after a series of wars and badness, Terra rose up to full stature at the head of the Republic of the Sphere. This nation only lasted about 60 years before it collapsed in on itself, becoming a small, isolated "fortress" of worlds that nobody dared invade, yet was too weak to actually hurt anyone else.
* BattleTech that carve up conventional infantry formations at three times the range of a machine gun.
* Battletech that challenger or the Khan's first stand-in for the challenge.
* BattleTech that puts warriors on top and puts the labor caste (basically anyone who works in any sort of production job) as more or less a slave.
* BattleTech that's designed for reconnaissance. The suit has a higher ground speed than most BA suits of similar size but lacks jump jets because noisily rocketing up to the height of a five story building on a column of fire tends to give your presence away to the enemy no matter how much stealth gear you use.

* BattleTech that took things back to the Succession Wars (where the game originally started) following by a kickstarter for more box sets focusing on the Clan Invasion.
* BattleTech: The Amaris Civil War and the Fall of the Star League, marked the end of humanity's golden age, and the start of two centuries of seemingly endless war between the Successor States. And that’s just the tip of the iceberg...
* BattleTech. The Bounty Hunter hunts down notorious criminals on the battlefield. In-universe, the Bounty Hunter is also the subject of a bunch of action movies with gratuitous amounts of violence.
* BattleTech, the Clans have spent the past three hundred years away from the rest of humanity, developing their own culture of military strength and honor. When they returned to the Inner Sphere, much Cultural Clashing ensued. Inner Sphere armies were shocked when the Clans simply asked who they were going to be fighting rather than spending resources on an intelligence network. The Clans were likewise shocked when the Inner Sphere lied to then and then arranged for long-term battles of exhaustion rather than the quick and clean combat Clan culture demanded.
* BattleTech: The Clans have their own caste system, with the warrior caste at the top. The scientist, technician, merchant, and laborer castes all basically exist mainly to provide for the warriors so they in turn can keep their attention focused on their calling without undue distraction. Caste placement is usually decided during the teens: Any Clanner (be they born within the Clan or taken as a bondsman) has the right to attempt to become a warrior (and pretty much everybody wants to), but the cutoff point is so extreme that the majority of aspirants 'test out' and are re-assigned to another caste instead.
* BattleTech, the Clans have their own unique rank system. This was done by Nicholas Kerensky as part of program to unite the former SLDF, by eliminating the cultural divisions that tore them apart:
* BattleTech the Clans treats its Solahma units as this, they are composed of older warriors who are assigned in menial tasks or send out as shock troopers so they can die fighting.
* BattleTech the Clan Trueborns are very smug to other warriors. They consider Freeborns as inferior, and older warriors (anyone above 30) passed their prime as cannon fodder. The warrior caste as a whole consider the other castes as dispensable and wouldn't mind leaving them for dead, or spacing them when they don't have enough room for their spoils.
* BattleTech the death of Omi Kurita left Victor Steiner-Davion heartbroken, but Isis Marik was able to snap him out of his despair. The two later married and had three children.
* BattleTech The diminutive size of the pilots on top of the physiological adaptations meant for resisting high-gs managed to help stave off the more deleterious effects of the EI system, meaning the designers could free up much needed spare room by making the ‘cockpit’ just a cavity for the pilot to climb into and the EI does the rest. This, of course, means that you have to be tiny and wired up to use them.
* BattleTech, the downfall of the Clan invasion was their insistence on a dueling code called "zellbrigen". While this was fine when fighting with other Clans, the Inner Sphere didn't follow zellbrigen, and got the better of many better armed and trained Clan warriors. Eventually, the Clans decided that zellbrigen didn't apply to non-Clanners, but by then the invasion was doomed.
* BattleTech, the Draconis Combine fits this to a tee. In fact, it's repeatedly stated in the sourcebooks that the Kurita family (who rules the Combine) believes that it is their destiny to rule all of humanity one day.
* Battletech; the ensuing struggle sending the mech out of control. Steiner and Malthus end up duking it out man-to-man on the remains of Malthus's mech.
* Battletech, the Exarch of the Republic of the Sphere Devlin Stone disappears, and the HPG network collapses from an unknown attacker, this riles every faction to turn on each other.
* Battletech, The Fighting Tigers had time to prepare some of the captured mechs that they put on display in the base museum in Dalian for battle, so that they

could ambush an invading force. Special bonus for the Urbanmech that had major sections of its armor replaced with transparent (armor-grade) 'cockpit glass' panels so that museum visitors could see the internals.
* BattleTech. The first two saw largely unrestricted warfare, while the Third was most like this trope. The Fourth was a flare-up after the alliance between the Federated Suns and Lyran Commonwealth joined into one super-nation through marriage between their royal families, with the two realms smashing their way through holdings of the other realms (mainly the Capellan Confederation) to link their territories. There followed a decade or two of relative peace, then the Clans invaded, then the Successor States formed a new Star League to end the Clan threat, then they went back to fighting one another again.
* Battle Tech, the five great houses generally have infighting among themselves from time to time. The most prominent example is House Marik, which broke up into four factions after the Jihad. The Clans also have this a lot, they are divided into two groups the Crusaders, and the Wardens who have conflicting views on Kerensky's legacy.
* BattleTech. The Free Worlds League tend to break out in civil war from time to time (and that time being any time they're actually given the spotlight), and Clan Fire Mandrill was known to be just as bad prior to its annihilation in the War of Reaving. Then there was the FedCom Civil War instigated by Katherine Steiner-Davion for control over two states, which ended with the permanent separation of the Federated Commonwealth back into its original states, the Federated Suns and Lyran Commonwealth. It was such a large-scale war that the time from 3062 to 3067 was known as The FedCom Civil War Era.
* BattleTech. The game itself consequently backs this up with assorted optional rules for salvage, repair, and even outright hostile takeovers of enemy units on the battlefield.
* BattleTech: The game itself is set during the Interregnum, following the demise of the Star League. Up to that point, humanity had gone through Solar and Interstellar exploration, Formation, Decline, and Interregnum. Currently, the game wobbles between Renaissance and Interregnum. For the most part, Alien Contact has been avoided.
* BattleTech) The Gray Death Legion (founded and led by Grayson Death Carlyle), the Kell Hounds (led by several generations of the Kell family), Hansen's Roughriders (led by Gerhard Hansen), Avanti's Angels (led by Marcus GioAvanti), Snord's Irregulars (led by several generations of the Snord family) and Wolf's Dragoons (led by Jaime and Joshua Wolf), etc.
* BattleTech. The Inner Sphere armies have centuries of experience in war with one another, and some mercenary commands are famous and badass enough to be respected by the Inner Sphere and the Clans.
* BattleTech. The Inner Sphere eventually caught up and began to make even more varied (and heavy) suits of battlearmor, though for the most part they are piloted by regular soldiers.
* BattleTech their own gear than comparable Clan pilots, for whom being reassigned from one 'Mech to another depending on the needs of the unit is a fairly commonplace occurrence. Much of this is inspired by the real-life military examples below, and aircraft pilots/crews in particular.
* BattleTech the Khans, not just the few actually running the invasion at the time.)
* BattleTech themes like exploration or first contact with alien species. Far Country had several different groups get stranded on an alien planet with no way home having to deal with the bird-like alien natives. People who liked Battle Tech were turned off by the utter lack of a Battle Tech related plot, while fans of space opera style science fiction were turned off by the tie-in to the franchise.
* BattleTech them so that they were not and couldn't be made into super-powered monsters.
* Battletech, the new ilKhan Brett Andrews started the Wars of Reaving in a Clan council where he demonstrated a Trial of Reaving by killing the Diamond Shark Khan, near the wars end he was killed in another Clan council when pulled a dirty move in

killing the Star Adder Khan, and the Star Adder Khan killed him almost immediately.
* BattleTech, Theodore Kurita’s contentious relationship to his father Takashi led to his father insulting him by giving him the wreckage of an old Orion BattleMech. What Theodore learned that his father did not know was that the ‘Mech was the wreckage of a ‘Mech piloted by the legendary Star League General, Alexander Kerensky. After repairing the ‘Mech, he piloted it with pride. Beyond that, Theodore was happy to receive an Orion (a 75 ton mech known for being well armed and armored) over the traditional Dragon mech that he would have otherwise received (which was 60 tons and faster than the Orion but with vastly inferior armor and firepower).
* BattleTech, the player's character, or commander in the game, cannot be killed in combat. Even if they were to take lethal damage from cockpit destruction or max injuries, they are guaranteed to survive (even if the lethal game setting option is turned on that ensures an incapacitated pilot will die).
* BattleTech, the rank Galaxy Commander is very high rank among the Clans, its should be the equivalent of General in the Inner Sphere, as they command an entire regiment called a galaxy, and they have a big say in the Clans policies and decisions. One of the prerequisites of the rank is to be a real badass mechwarrior.
* BattleTech. There are a good number of JumpShips capable of interstellar travel, but said travel is generally prohibitively expensive and largely reserved for the wealthy, the politicians, and the military—which, when considering the Lyran Alliance/Commonwealth, may be the same person.
* Battletech, there's mention of Federated Fast Food restaurants in sourcebooks. They offer mystery meat burgers throughout the Federated Suns, with varying toppings. It makes an appearance in the Harebrained Schemes game as a random event.
* BattleTech The reverse also applies, as using Clan names around Inner Sphere fans will earn you the title of "Clanner scum" and a volley of insults about your defeat at the hands of Space Comcast.
* BattleTech, there was a lot of doubts about whether or not it would succeed. When it finally went live, it met its funding goal of $30,000 in seven minutes and ended up receiving in excess of two and a half million dollars in pledges, making it not only one of the most successful gaming Kickstarters ever but one of the 100 most successful Kickstarter project period.
* BattleTech, the romanticized nature of melee combat on the infantry scale is in full effect.
* Battletech: The stakes were either the surrender of Terra (if the Clans won) or the Clans being bound to a 15-year truce (if ComStar won). If the Clans won, a major goal of the Invasion would be achieved, and probably deciding the Invasion in favour of the clans, with almost no blood being spilt. If ComStar won, the Invasion would be stalled (and with the Inner Sphere's vastly superior size, almost certainly decided in their favour once the truce was up). Either outcome would support Ulric's agenda of hastening an end to the war.
* Battle Tech. The Star League Defense Forces had every officer spend a term as a Sergeant before commissioning.
* BattleTech: The Star League is the Roman Empire, while the Successor States are Medieval Europe.
* Battletech: The Successor States and the Clans have their own space navy, but they are not as highlighted as mechwarriors. Since the fall of the Star League, the manufacturing of warships and jumpships have been crippled, with the production of the formers destroyed. Recently newer warships are now being produced, and dropships have been redesigned into pocket-warships.
* BattleTech: The Terran Hegemony and the Star League had tough times in their glory days; not only do they have to govern thousands of worlds, but they also have to hunt down pirates, and stamp out rebellion hundreds of light years away from each other. And the Successor States following the fall of the Star League have been unable to form a unified government for the past 400 years.
* BattleTech. The tiny Marian Hegemony that styles itself after Ancient Rome is the only nation that condones slavery. The Clans, meanwhile, have a Caste system where they have Technicians (responsible for keeping all military equipment like

Battlemechs and warships functional) and at the bottom, Laborers, who take care of every menial function like growing food or performing factory work. Laborers have effectively no rights in Clan society, they're regularly forced to meet high quotas (regardless of how realistic said quotas are), they get minimal food or medical supplies allocated to them, and they often lack any leasure time or forms of entertainment.
* Battletech.) The ultimate example, though, at least before the Jihad era brought nukes back onto the battlefield, may be orbital bombardment like the infamous destruction of the city of Edo on the planet Turtle Bay by Clan Smoke Jaguar.
* BattleTech the vehicular scale are highly lethal to the same units if they're caught in said area, however.)
* BattleTech the Wars of Reaving, the new ilKhan Brett Andrews of Clan Steel Viper initiated reavings on the Clans that he determined as tainted from the Inner Sphere. This has led the Clans to attacking each other for 2 years, and allow Brett to secure more power for himself. In the end the Star Adder Khan then pointed out that the Steel Vipers were one of the Clans that invaded the Inner Sphere and were likely tainted themselves. The ilKhan lashed out with a pistol killing the Khan, this dirty move has deemed the Steel Vipers as dezgra, the Star Adder saKhan killed Andrews in retaliation, and the remaining Clans call for the annihilation of the Steel Vipers.
* BattleTech, the Wolf's Dragoons mercenary unit was originally a scout unit from Clan Wolf sent to spy on the Inner Sphere. When the main Clan force invaded, however, the Dragoons changed sides and fought for the Successor States. Though this is a little complex given that they revealed that preparing the Inner Sphere to fight the Clans was, in fact, their real mission all along, as ordered by the Khan of Clan Wolf, who was a Warden and therefore didn't support the idea to invade the Inner Sphere in the first place.
* BattleTech, the yakuza are quite naturally alive and well there as well. Several protagonist and important supporting characters are either members themselves or at least maintain connections, and nobody less than Theodore Kurita himself sponsored the creation of several yakuza BattleMech units to help bolster the ranks during his reforms of the Combine's military. They're generally portrayed as being much more honorable and loyal to the Combine than the Warlords who command much of the regular military, and even help protect Theodore from several attempts to overthrow him.
* BattleTech they possess. The Successor States barely remember how to make Mechs and rely on antique Jumpships and ComStar's similarly ancient network. As for ComStar and their militant faction the Word of Blake they religiously grab and hoard most examples of LosTek in the Inner Sphere. While the Clans are descendants of the Star League's military who took a lot of their technology with them and ensured that their factories and scientist caste would be safe from the constant warfare, so they have the most advanced technology in the known galaxy.
* BattleTech thing instead. By the time the misunderstanding was cleared up (there was a war going on, after all), both sides had grown just far enough apart to make a simple reunion impractical, and so the division has stood.
* Battletech. This attitude ended up backfiring on them badly, however. When the Inner Sphere decided to show that they were a force to be reckoned with, they did so by targeting the Smoke Jaguars for destruction. With no allies due to decades of bullying the other Clans and an industrial base that wasn't capable of sustaining the losses they'd taken during the invasion of the Inner Sphere, the Smoke Jaguars were completely helpless against the onslaught and wiped out completely.
* BattleTech this can happen to Jumpships if something bad happens during their jump, at which point they either disappear for and jump hundreds of years to the future, or create a mini black hole sucking in both them and anything near by.
* BattleTech: This is in effect on a general scale, insofar as the Inner Sphere is considered. The "accepted" color pattern for the five great houses is Davion yellow, Kurita red, Steiner blue, Marik purple, and Liao green. Comstar possessed no planets beyond Earth, but were associated with the color white. Later additions to the map, such as the Free Rasalhague Republic and the St. Ives Compact, appear

in a shade of teal and a sort of yellow-green, respectively. When the six invading Clans appeared in the Inner Sphere, color variants became necessary. Clans Smoke Jaguar and Steel Viper received dark and light shades of gray, respectively. Clan Wolf space was denoted in brown, and Clan Ghost Bear in white. Clan Jade Falcon, naturally, received a brilliant green, where Clan Nova Cat was shown in black. While these were the 'stereotypical' colors, this did not always apply to the units from those particular factions, however.
* BattleTech, this is one of the requirement for a Star Colonel in the Clans, in which they have plenty fighting experiences, or they take it by Trial of Position from another Star Colonel.
* BattleTech, though in the game itself it was quite useful to be able to save your expensive assault mech by forcing your opponent to massively overkill the cheap scout mech and wasting all that extra damage.
* BattleTech, though in the latter's case, it is a Clan OmniMech that can have its original weaponry swapped for a more specialized role.
* Battletech through well thought out tactics and prepared defences. In the words of a particularly insightful lore youtuber:
* Battletech. To add insult to injury it cannot even use its great speed to work as an evasion tank or a melee combatant, as its medium chassis and lack of arms means it's outdodged and outgunned by even the Spider, a 15-ton lighter 'mech.
* BattleTech to counter the Clans' superior technology. This allowed the Inner Sphere troops to bleed the Clans a bit and insure that defeated forces were able to retreat rather than being wiped completely out. As the Clan invasion carried on and lines got stretched, these tactical cushions eventually became so common that the Clans lost their momentum strategically trying to continually strike deeper into the immensely bigger Inner Sphere, eventually leading to actual turning points such as the Battle of Luthien.
* BattleTech to embody the ideals of chivalry and commanded by the planetary ruler's liege lord to boot) out in the open to settle things once and for all.
* BattleTech to find old Star League technology caches on abandoned worlds or hidden in uninhabited systems.
* BattleTech to go big (and last) and won their encounter convincingly.
* BattleTech to infantry, though not as a common battlefield weapon—instead they're usually issued to civilian police or a base's MP corps. They don't do any permanent damage, operate on an ultrasound frequency, and are very power-efficient, though their range is short. This also makes them ideal as espionage or infiltration gear.
* BattleTech to the point that by the late 31st Century it's possible they've become completely extinct.
* BattleTech touch down properly or at least get down far enough to let jump-capable 'Mechs make a low altitude drop onto the battlefield, but special reentry cocoons that break away at the proper altitude and free them to ride down the rest of the way using jump jets or packs make orbital drops feasible, if risky.
* BattleTech, tracked vehicle, hover vehicle, wheeled vehicle, Battlemech, protomech, Quadvee, Battle Armor, and infantry), there are build rules for all of them. Taking just mechs, there are two tech bases. Looking at only the Inner Sphere tech base, there are 7 different engine types, 5 different internal structure types, 7 different armor types, 4 different gyro types and 17 different weight choices. That's 16660 different possibilities, and we haven't even gotten to how fast the mech will be or what weapons it will carry. Taking those into account allows for literally billions of unique designs. To give some perspective on just how extensive this trope is spread in the game, the Thunderbolt is a 65 ton mech that's been in the game since the beginning. It has 26 different configurations across the game's eras.
* BattleTech traditionally have an arm cannon on the right arm and a controllable hand or claw on the left arm, though armor on the extremes of the weight scale may drop the fixed weapon or the hand for more mobility or combat capability, respectively.
* Battletech Trent defects from his Clan when he feels it's been tainted by

political intrigue. This helps set off a chain of events that leads to the utter destruction of the Smoke Jaguar Clan.
* BattleTech: Trueborn Clan warriors look down on naturally born people, giving rise to the term "freebirth", meant to disparage not only actual Freeborns, but other Trueborns as well. Freenborns in turn call them "trashborn". There are also a variety of insults that the various members of the Great Houses have for each other, like the Taurians addressing members of the Federated Suns as "Fedrats", or people dismissively referring to less-competent members of the Capellan Confederation as "Crappies".
* BattleTech unit where they're expected to act as cannon fodder with outdated weaponry if they're lucky. If they're unlucky, they'll get used as target practice for live-fire training by the next generation of warriors. Most warriors are expected to seek a glorious death in battle before they reach this point.
* BattleTech universe actively serve in combat, and much of their prestige as leaders is dependent on the skills they show in 'mech warfare. With an over three hundred year long metaplot, needless to say there are a lot of examples.
* BattleTech universe, anyone who was in the military but wasn't a Mechwarrior or Aerospace pilot was regarded as this trope, with the exception of a few factions that were noted for having high regard for ground armor or infantry. This has become less prevalent in later time settings as combined arms has become more and more popular (in universe) though there are still a few factions that are noted as considering infantry units as little more than cannon fodder.
* BattleTech universe applies this concept across a couple hundred worlds, with technological and industrial infrastructure destroyed by massive wars. Major worlds enjoy the use of starships, giant robots, cybernetics, faster-than-light communications, and worldwide computer networking, while many other planets fell to 19th-century lifestyles, with a starport or two and a FTL communications array somewhere on the planet so they aren't totally cut off.
* BattleTech universe as one where technology, not mysticism, is a central tenet.
* BattleTech universe certainly has seen its share of this trope. Two large-scale examples — smaller ones abound, but these are really just perhaps the two biggest ones in the entire history of the setting — would be the Reunification War (as initially viewed by the newly-minted Star League) and the Clan invasion of the Inner Sphere (from the original point of view of the Clans); needless to say, neither actually worked out that way.
* BattleTech universe, Clan warriors are issued full face animal masks reflecting their Clan's totem to wear for ceremonial purposes. Further, the mercenary known as The Bounty Hunter is also only ever seen masked
* BattleTech universe due to the relative ease of capturing most recharging JumpShips, though actual independent pirate and bandit groups are seen mostly in the Periphery beyond the reach of either the Clans or the Great Houses. They don't so much attack civilian shipping as they raid poorly defended worlds directly, though. A number of particularly large pirate bands have banded up and attempted to go 'legitimate' and set themselves up as an actual nation, such as the Oberon Confederation or Circinus Federation.
* BattleTech universe had the Terran Hegemony. The planet is mostly referred to as Terra, as well.
* BattleTech universe has a long and intricate history that attempts to justify why they bother at all with giant robots instead of conventional combat vehicles — in this case it's because of the flexibility of a humanoid form, and the durability of their modular design. They're regularly used in civilian work as well, so there isn't a shortage of competent pilots. The old Star League got past this trope and ended up nuking themselves back to the to the point where three centuries later much of their most advanced achievements still haven't been rediscovered, so most 31st century combat is deliberately kept like this to limit collateral damage. The rare incidences where nukes show up demonstrate why this is a good thing.
* BattleTech universe has Hyper Pulse Generators (HPGs), which send messages between star systems instantaneously. It works by creating artificial hyperspace

jump points (natural ones being null-gravity locations at a star's zenith or nadir or in LaGrange points) to transmit tight-beam signals to a receiving HPG. It's been stated in canon that sending a message via HPG can often take anywhere from a few days to weeks, but that is mainly because the cost of transmission is so high, the operators will wait for a large number of messages to be sent at once.
* Battletech universe is science fiction with the barest minimum of fantasy and thus has no concepts like resurrection, revivification, or zombies, this is about as dead as the setting can manage.
* BattleTech universe, Khan Lincoln Osis of Clan Smoke Jaguar was noted as being an excellent tactician but poor strategist. This meant that when the Inner Sphere got together to take out a Clan, their ability to focus on the big picture and plan for winning over a large series of engagements instead of simply planning for the next battle meant that the Jaguars were unable to match the Inner Sphere and became the first faction in the game that was completely wiped out, as Osis had neglected the Jaguars' infrastructure to the point that they simply couldn't fight a large-scale war at all.
* BattleTech universe, members of the quasi-mystical cult/organization known as ComStar are traditionally rather prone to claiming historical quotes and bits of wisdom from other sources as statements of their by now legendary founder Jerome Blake.
* BattleTech universe: one short story shows a group of people living on a Periphery planet who, after being stranded there long enough to lose written language and all metalworking ability and thus reverting to Stone Age technology level start a new religion after one of their members sees a pair of Battlemechs fighting. There's also the infamous novel Far Country, in which a jumpship malfunction strands the passengers on a distant planet where they discover a species of primitive, bird-like aliens who worship the wreck of an old, abandoned mech.
* BattleTech universe. Since building mechs is fairly difficult, killing the pilot and capturing the mech is a very common goal according to the universe lore. Though generally this was done on the battlefield: disable the 'Mech, kill the pilot, and then drag the 'Mech to your repair bay and now it's yours.
* BattleTech universe, the Clans are divided into Crusaders and Wardens, both interpret the vision of their forefather Alexandr Kerensky and his son Nicolas differently. The Crusaders wish to cut a swath through the Inner Sphere to conquer Terra and establish a new Star League, thereby uniting humanity and subduing all others, while the Wardens want to stay out of the Inner Sphere and watch over it as protectors, defending them from other, unspecified entities should the need arise. Inside clan society, ALL Clanners could be considered war hawks (they even have a mech that goes by that name!), owing to their cultural norms of solving every conflict by force if one of wishes so. In the larger scale of things, the Crusaders are the ones seeing war with the "barbaric" Spheroids as the only options to attain their goal.
* BattleTech universe where female combatants have been a simple fact of life for centuries and mixed-gender units are effectively the norm without anyone batting an eye.
* BattleTech universe, who readily consider their Inner Sphere opponents 'barbarians' for using actual tactics and concentrating fire instead of engaging in 'honorable' duels against foes with vastly superior war machines. Which of course only reinforces their conviction that these people need to be conquered for their own good.
* BattleTech uses earth-standard days, months, and years, calibrated to Greenwich Mean Time. It is noted that planets have wildly different days and years, but interstellar society uses the standard 24-hour day and 365-day year as a convenience to keep interstellar empires together.
* Battletech usually quote "Judas, Adolf Hitler and Stefan Amaris" as the worst traitors in human history. In the backstory of the series, Amaris tried to usurp the throne of the Star League, a huge empire ruling all of mankind. He caused a massive civil war that led to so many succession wars that mankind has been reduced

to five warring houses using schizo tech(fighting in giant mecha while rediscovering the fax kind of schizo tech). Except for the defense forces of the Star League, who fled the fighting to avoid being destroyed and devolved to a group of marauding warrior clans that want to take over those houses.
* BattleTech utilize the "Full head ejection system", where the entire head assembly is jettisoned rather than a piddly unprotected ejection seat, allowing the Mechwarrior to survive in environments that are otherwise lethal, such as interplanetary space.
* Battletech, Vehicles are equipped with ferroglass cockpits. Now we have transparent aluminum. We're getting pretty close. (Sort of... The aluminum we now have is only transparent to certain types of radiation. And to create this material one electron has to be shot out of each of it's atoms with a soft x-ray laser, one by one. But it's a start. A slow, limping, crawl of a start.)
* BattleTech, Victor Steiner-Davion is noted as being only 1.6 m, unusually short compared to the women he consorted with, neither of whom has a notable height.
* Battletech. Victor Steiner-Davion walked in on his father Hanse and thought he had simply slumped over in his sleep. Then he realized his father's head was at an unnatural angle. Hanse had suffered a stress-induced heart attack without any warning signs.
* Battletech video game franchise, allows you to attempt "death from above" — that is, using jump jets to lift yourself into the air and then land on your opponent, Mario-style. It's very difficult to aim, but when it hits, it results on 70 odd tons of giant war robot landing on the enemy machine — usually, right on the cockpit. Squish.
* Battletech video game, set in the same universe. Air-free asteroids and martian-class planets have some of the worst heat management penalties because there's not enough atmosphere for your 'mechs to vent their heat into, making heat management even more critical than in earth-like deserts and badlands.
* BattleTech, warehouses, and memory cores, which could contain functional war machines that could stomp anything still functioning in 3025.
* BattleTech, warfare is dominated by Battlemechs and lasers are commonly used weapons. However the first two Succession Wars have knocked back most Inner Sphere's technological progress resulting in most fights limited to close range combat. The Clans however possess more advanced technology than the Inner Sphere but they intentionally made most of their fighting limited to honor duels, to hone their skills and limit their losses. One response to the appearance of the Clans in the Inner Sphere was for the latter to produce 'Mechs armed with melee weapons (Axes, Clubs and Swords). This being the extreme end of the idea of nullifying the range advantage of Clan weapons by fighting at close range.
* BattleTech warrior of such mixed heritage that she refused a proper Bloodname.
* BattleTech warriors ever shown in the series. In his main appearances:
* BattleTech WarShip, and all other WarShips owe their existence to it.
* BattleTech was based of a scuba suit developed by Clan Goliath Scorpion, Clan Hell's Horses later redesigned the suit for combat. The elemental armor is capable of fighting in outer space making it useful for boarding enemy ships, and can withstand battlemech grade weapons. It cannot, however, actually function as scuba gear in the game: battle armor is perfectly capable of keeping someone alive underwater as long as the life support system functions and it doesn't get so deep that water pressure risks crushing it, but it's too bulky and difficult to move in to get anywhere in a reasonable amount of time unless it mounts specialized underwater maneuvering equipment.
* BattleTech was mass produced by the Word of Blake to try and resist Allied Coalition units as they began to attack the Blakists on Earth itself. Being small and not particularly well armored, Revenants were ultimately mass produced cannon fodder rather than a genuine obstacle to the Allies.
* BattleTech watching and, if necessarily, helping the Successor States, whose interstellar communications they're incidentally in charge of, bomb each other back into the Stone Age, that is.
* BattleTech way doesn't exactly help, either.) Which of course ends up

contributing straight to the eventual breakup of the Federated Commonwealth and later civil war...
* Battletech, went on a random drunken hyperspace tour of known space, then disappeared never to be seen again? It's all there.
* Battletech. What happened next is a bit of conjecture, but either story hinges in the fact that LucasFilm has registered a trademark to the word "droid":
* BattleTech. When all he got was a slap on the wrist as punishment (he was demoted a couple ranks but spent no time in the brig and was never even charged with murder) thanks to his family's political connections, it was the final straw for Archer, who started a rebellion on his planet with his entire militia company before becoming one of the major players in the FedCom Civil War.
* BattleTech, when there is a chance that said four hundred year old jump drive can suddenly stop working, thus stranding the ship.
* BattleTech where the maximum limit on head armor was the same (that is, quite low) for everybody regardless of size category. Weapons that could do enough focused damage to take out the head in a single shot were given a very high value compared to other weapons in the Battle Value system, used to calculate the overall effectiveness of a 'mech.
* BattleTech where thousands of planets all still use the current AD system. The main universe storyline runs from 3020 to 3135. Individual planets have 24 'hour' days (where an hour can be as little as 30 minutes on some fast-spinning planets) based on their own rotation, and years based on their own orbital path. But Human civilization as a whole maintains the earth-based AD Calendar, with 0 hour based on Greenwich Mean Time, including leap years!
* BattleTech, which has an unfortunate resemblence to a heavily-armed toilet.
* BattleTech (which is difficult since rarely will two sides simultaneously and completely destroy one another). When it happens though, it is able to not only recognize the fact that both sides lost, but announce that the winner is "the Chicago Cubs!!!".
* BattleTech, which looks more like it's wearing a hockey goalie's gear.
* Battletech which tended to have much fewer troops than was listed on paper.
* BattleTech, while infiltrating a secret laboratory, main character Joanna tells the warrior helping her to "pick up a clipboard and look like you are annoyed by something" in order to avoid being hassled if they're discovered. The ruse works.
* BattleTech"), while range is paramount because altitude does rapidly add to effective engagement range, rendering many shorter-ranged stock weapons largely or even completely ineffective. As a result, it's generally acknowledged that exactly the low-caliber autocannons that are frequently belittled in ground combat for their abysmal damage-to-weight ratio are among the best weapons to have on hand when the aerojocks come calling.
* BattleTech While the DCMS obeyed (refusal to undertake the orders was an executable offense), they had to, outside of the most fanatically loyal units, be forced and bullied into doing it. The fluff recounts numerous suicides of DCMS troops who could not live with themselves over what they were made to do.
* BattleTech who have actually made improvements on their tech, even though their Warrior caste act like Bronze Age savages.
* BattleTech who was indulged by both her parents while Victor joined the military as soon as he was old enough and lived a fairly austere lifestyle. This wasn't enough for her, as she wasn't the heir to the kingdom (despite her actively avoiding meeting the mandatory military service needed to become eligible).
* BattleTech, who would later go on to kill Richard and bring the Star League to ruin, was warping his mind and constantly clouding his judgment towards said idealism.
* BattleTech will occasionally have a note about an ocean, sea, or lake on a particular planet having a distinctive, exotic color. Usually because of the local marine microorganisms or unique mineral content in the water.
* BattleTech will quickly paint it as the rebels freeing thousands of cutthroats after slaughtering noble military members, so his job is to make sure the truth gets out there as well.

* BattleTech with live-fire training by the time they are teenagers; out of a sibko of 100 cadets, only around 20 are expected to make it to adulthood as warriors, though some survive and merely flush out as Scientists or other castes.
* BattleTech: with over 10,000 planets, over 13 major and minor factions, and countless mercenary companies, fanfic of Original Characters abounds. Arguably, every campaign of the game played is another fanfic.
* BattleTech with their initial rank depending on how many (usually a maximum of three, if they fail to defeat even one they are demoted to a civilian caste) they defeat. These battles usually end with the Cadet's Mech disabled (achieving three kills is a rare occurrence and the Trial goes until the Cadet is unable to fight on) and in many cases the cadet and/or the opponent(s) dies, and no one cares.
* BattleTech with their mind, rather than with the standard joysticks and neuro-helmet. Protomechs all use this, as they're too small to fit a cockpit. The devices have a number of drawbacks, such as crippling withdrawal symptoms and causing the pilot to go slowly insane. For standard issue control interfaces in BattleMechs, however, the ubiquitous Neurohelmet is used, albeit only to balance the mech. Instead of invasive neurosurgery, all the neurohelmet requires is a clean haircut around the temples and a tolerance for a scalp-crawling sensation. Depending on the technological capacity of the time period that a neurohelmet was manufactured, neurohelmets can range from something the size of a real-life fighter helmet to giant bulky crude 10 pound monstrosities.
* BattleTech with very little trouble. Trane doesn't believe it could be that easy since modern technology makes grand theft Battlemech almost impossible, but Duncan explains that he realizes that this is a much older model, one old enough to be tricked by the simple combination of a strong magnet on the security computer and forcing all the important moving-and-shooting protocols to start and therefore take all the priority runtime before the anti-theft safeguards can kick in.
* BattleTech worth mentioning is done via fusion rocket, it's just that the average JumpShip is essentially just a single FTL drive core with some station-keeping engines and quarters for the crew as an afterthought.
* BattleTech yards. Not bad for dogfighting between aerospace aces (though granted, on the other hand the maximum effective range for even the largest capital-scale weapons — other than tele-operated capital missiles, which move like fighters with their own small fuel reserve — is only about an order of magnitude larger than that). The game does have optional rules for extreme range and line-of-sight range, but the steep attack penalties mean that even when they're in play it's really hard to actually hit anything.
* BattleTech: You can make a called shot at an enemy mech's head, but only if the mech is immobile due to being shut down or the pilot being unconsious. You take a mild penalty, but since the target typically won't have any defensive bonuses for movement this usually isn't too bad. In return, if you can deal at least 12 points of damage to the head you're guaranteed to kill the mech.
* Battle Tendancy tends to stick his tongue out as a way to intimidate his opponents.
* Battle Tendency accepts, but to ensure that Joseph can't welsh on the deal he implants a "deadly wedding ring" around Joseph's aorta that will constrict and kill him within 30 days, with the antidote being contained in one of Wamuu's piercings. Wamuu's ally Eisidisi decides that this sounds fun and declares that he wants in on the deal, putting his own ring inside Joseph. He does manage to defeat both opponents and rids himself of the rings.
* Battle Tendency, a Pillar Man who wears a Stone Mask empowered with the Red Stone of Aja will become immune to both sunlight and the Ripple, the only two things that could kill them.
* Battle Tendency certainly qualify, as do some of the Nazi Mooks guarding Stroheim's base.
* Battle Tendency fights him almost immediately after he's woken up and he's still adjusting to the new world.
* Battle Tendency Hermit Purple, which he won't get for another 50 years in-universe.

* Battle Tendency is a globe-trotting adventure in the spirit of Indiana Jones that involves cyborg Nazis, ancient Aztec vampires, and to top it all off the main villain tops Dio by becoming the Ultimate Lifeform.
* Battle Tendency is crushed by a Crucifix-shaped roof tile while nearly succumbing to their wounds. Which is strange given the fight that lead to their death did not cause any building damage that would've caused a roof tile to fall.
* Battle Tendency seems to be white puffy hair that resembles that of a clown.
* Battle Tendency to allow his forces to retreat during the Battle of Stalingrad.
* Battle Tendency: Wamuu briefly survives getting his head blown off, but the Ripple is already destroying it, so he dies not too long afterward.
* Battle Tendency. While it gives Joseph and Smokey a chance to run, it shows how much Joseph is unprepared to even fight a vampire, let alone a Hamon master vampire. Straizo has trained for years to fight against vampires, so he knows everything they can do and thus can perform these moves with little difficulty.
* Battle Theme Music: Music that plays during battle scenes in video games.
* Battle Thralls: Captured soldiers are forced to fight in their enemy's army.
* BattleToads (2020), But it is actually not, because it has too angular shapes and outlines are thicker.
* Battletoads, after defeating the final boss, there are only a few seconds to shoot down an escaping helicopter with a target sight, which results in a worse ending if missed.
* Battletoads (an action-oriented revamp of the NES and SNES games). After smashing the last boss, Robo Manus, someone, presumably the Dark Queen, hisses "I'll be back!" The heroes crash-land on a lifeless planet and use their portable transporters to instantly zap back to base. Mission accomplished! Meanwhile, the Dark Queen is still alive and plotting, the heroes are still stuck in the forms of overgrown amphibians, and Volkmire is still lurking around somewhere. Issues which will never be resolved, as Rare never produced another Battletoads game.
* Battletoads and Zits being kidnapped by villains bursting through the screen of a virtual-reality system.
* Battletoads a port of the NES version has you running, on foot, from a boulder that actually looks like a boulder, although it can climb vertically too.
* Battletoads arcade game, Zitz's "Drilla Killa" finisher grinds enemies' faces into bloody paste.
* Battletoads are all named after skin afflictions - Rash, Pimple, and Zitz.
* Battletoads. But odds are very good that if you mention the name to anyone, the original NES game will come to mind.
* Battletoads cartoon, Professor T. Bird explains that Earth is "so backward and insignificant that the Dark Queen never dared to conquer it."
* Battletoads. Eventually you will crush through his cranial armor leaving his brain exposed, making him creating a deflector shield with whatever energy he finds, so your job is to shoot him until he is unable to keep the shield running.
* Battletoads from the videogame of the same name. Unique in that it doesn't follow many of the sub-tropes, instead taking place in a world that looks like it came from a heavy metal record cover.
* Battletoads has traps that shoot small puffs of gas, instantly fatal.
* Battletoads has you racing to the bottom of a shaft, where you must kick said bomb away before the rat gets to it. You have to do this three times, and the rat gets faster each time.
* Battletoads have bowling pins or dominoes with playing cards and chess pieces in the background.
* Battletoads is rather notorious for this, with its plethora of instant kill hazards, levels with gratuitous trial and error, and a metric ton of cheap moments that have to be completed with a piddling amount of lives. Even fans who have immense nostalgia for the game will admit that 90% of the stages are prime examples on how NOT to design game levels.
* Battletoads, knocking enemies dead on the ground turns them into skeletons.
* Battletoads. Quite messily, too; you can see chunks of the space-car falling behind as Gargantua's jaws close down.

* Battletoads's solution to this is to punt them square in the ass with his Big Bad Boot, usually sending them rocketing off screen.
* Battletoads stands at 6 feet tall, according to official stats. Although that doesn't explain how she is a giant compared to the Battletoads themselves in the original, who are supposed to be even taller.
* Battletoads: The games pit a trio of humanoid toad warriors against an evil sorceress known as the Dark Queen.
* Battletoads was a failed animated show based on the videogame, but only the pilot was made and the series was not picked up. As the videogame is about three heroic humanoid toads.
* Battletoads was designed closely around this aesthetic. However, she's a villainess rather than an anti-heroine, and also the main antagonist.
* Battle Toads when the small spaceship of one of the Battle Toads gets captured by the large starship of their foe.
* Battletoads who is even roughly parallel to him, simply because you pressed the attack button.
* battle with Dr. Zomboss. He shows up again in the post-victory music video, though.
* Battle with the Witches offscreen, and this is revealed when Ron walks in and finds his body.
* Battlezone (1980). The volcano within the game was originally not going to erupt, but Ed Rotberg (the programmer of the game) was pestered by his coworker Owen Rubin into making it active. After Ed finally suggested that Owen write the code himself, it was found lying on Ed's desk the next day.
* Battle Zone 1998 combatants, whereas Grizzly One mentions that hundreds of NSDF personnel died in the first engagement with CCA walkers. The sequel significantly increases the maximum amount of units on the field (up to 120 per player), though in practice engagements aren't that much larger.
* Battlezone (1998) has the Cold War actually be hot between the US and Soviet Union over biometal deposits found scattered throughout the solar system. The opening screen has the Apollo 11 landing be shadowed by an entire NSDF base when the camera reaches a certain angle.
* Battle Zone 1998 has weapons that seem purpose-built for killing ejected pilots, like the ISDF Pulse Stabber which sends out waves of radiation as it flies that can kill a pilot as he ejects.
* Battle Zone 1998. Realizing that they are completely outnumbered, the scientists radio that they are willing to discuss terms of surrender, only for the Black Dogs commander to say there will be no terms. The mission then turns into a race towards a CCA base before your squadron and the transports are overwhelmed by Black Dogs.
* Battle Zone 1998's command to Lieutenant Corbin before ordering Grizzly One to be court-martialed.
* Battle Zone 1998 support and added a number of STEAM related improvements such as achievements and Workshop support.
* Battle Zone 1998. The 2013 update rectifies this behavior, though it can result in dogpiles of units that are incapable of moving because it would result in them smashing into each other or buildings. The bug returns with a vengeance in the sequel, where units will often get stuck in the far more densely built bases, and can result in oddities like building-sized Assault Tanks somehow wedging themselves through a 6 foot tall doorway and subsequently getting stuck inside a room that the tank physically cannot fit in.
* Battle Zone 1998. The Apollo moonshot missions were merely a cover-up for the US to begin shipping soldiers to the Moon; Apollo 11 is within walking distance of a massive military base on the other side of a hill.
* Battle Zone 1998. The famous picture of Neil Armstrong standing alone on the moon was taken by the leader of the National Space Defense Force, General Collins.
* Battle Zone 1998 to deploy even more heavily armored shock troopers armed with bazookas and grenades, who can wreak havoc in a densely built-up base.
* Battle Zone 1998 via the "Daywrecker" bomb and flies above the engagement height of most units. The Scions get the Archer, which functions like the Howitzers in the

original game but with the addition of being able to fly before anchoring down.
* Battlezone 2. The base you are flying to investigate, and where a third of the game takes place, is on Pluto.
* BattleZone, and regular tracked tanks. However, floating tow trucks and artillery seems to baffle Lt. Cooke, as you cannot pilot them.
* Battlezone at the 2013 MSPO International Defence Industry Exhibition, is suspiciously similar in shape to the tanks of that game.
* BattleZone expressed enough interest that it was the first basis for electronic simulators.
* BattleZone, if you fail a particular mission, you are to be reassigned to Mars' polar region.
* Battlezone II: Combat Commander the bomb detonates lest you nuke your own units.
* BattleZone II uses large vectored-thrust dropships when carrying equipment from its enormous command ship down to the surface of planets.
* Battle Zone kills you with a homing missile if you go too long without killing anything.
* Battlezone machines to look for it and not actually play the game. Atari responded by adding code in later versions that would make an instant-kill missile hit the player if they fail to kill anything in a reasonable amount of time.
* Battlezone, with additional gunnery controls for targeting practice. This is probably the earliest example of this.
* Battra (as you can probably see, Godzilla and co. have certainly run the gamut for giant arthropod diversity).
* Batty gets one of these when Hexxus tries to crush him and Zack with falling debris.
* Batu tries to have him killed. Jeremy's thus torn between trying to support and protect all three members of his family from each other, until Sara rejects his attempt to help her and she does... something to him. By the end of the comic Jeremy appears to be suffering permanent brain damage thanks to Sara's attack and needs to be fed like a baby. The fact that he can no longer speak or do things for himself means Jeremy's no longer able to keep the family together.
* Batwing started off as a series about the exploits of the Batman of Africa. After 18 issues, it suddenly got retooled into a series about the adventures of the son of longtime Batman ally Lucius Fox.
* Batwoman (2019)), and rather than escaping decide to turn it into their own personal fortress as they prepare to eventually take revenge on Gotham.
* Batwoman (2019). Batwoman mentions getting information from some guy, and when presses by Luke Fox (thinking she might have beaten the information out of him) says that she actually posed for a selfie. Fox admits that's something that Batman would never have thought of.
* Batwoman (2019) but is still getting the hang of her wonderful toys. She fails to catch a batarang on its return and it smashes a vase once owned by Marie Antoinette.
* Batwoman (2019). Fortunately the Batsuit records deformation impact data—as from bullets or blunt force trauma—which software can then analyze to reveal patterns, so part of the license number is recorded this way.
* Batwoman (2019): In "Armed and Dangerous" Tavaroff and his crew turn out to not just be trigger happy, they'll murder their boss for self-preservation. It's indicated The Crows is filled with agents of the same ilk.
* Batwoman (2019): In "Armed and Dangerous" Tavaroff plans to make it look like Jacob died from a Snakebite overdose after learning he's addicted, for fear of losing his career. Ryan intervenes just in time to stop him.
* Batwoman (2019). In "Down Down Down", Kate Kane steps into an elevator in Tommy Elliot's skyscraper to find her step-sister Mary being bodyguarded by her ex-girlfriend Sophie Moore. Stuck in the middle between these two, Mary can only stare at the still-climbing level indicator and gripe about why Tommy needs to live in such a tall tower. Later there is a second one, when she is trapped in an elevator with Sophie and her husband Tyler, with the former still trying to hide the obvious fact that she and Kate were a couple.

* Batwoman (2019). In "O'Mouse", Mary is explaining to her lesbian stepsister Kate Kane the tragic story of football star "The Titan" Teslow. Kate not being a football fan, her mind is clearly elsewhere.
* Batwoman (2019). In the pilot episode, Kate Kane does a dramatic rescue of her former love interest, goes to exit in a swirl of a batcape only to find the door is locked. She releases the latch with an abashed smile.
* Batwoman (2019): Kate and Sophie were an example during their relationship. The former is quite butch in her looks, while Sophie's very feminine. The same goes for Kate with Julia and Reagan, who are both very feminine too.
* Batwoman (2019): Mary patches up Kate in the pilot, and since Batwoman going into a hospital would raise suspicion, she uses her as her go-to doctor. In addition, she's got a free clinic to provide people with healthcare who can't afford it otherwise.
* Batwoman (2019) on herself. Towards the end of the episode she willingly lets supervillain Alice remove her face to use as a disguise, declaring the end result as "I'm finally perfect".
* Batwoman (2019) only for Batwoman to break things off because she realises the relationship just won't work.
* Batwoman (2019) over whether she should try to save her evil sister at the expense of this kind and decent version of her.
* Batwoman (2019) prologue is set in 2003 in which the titular protagonist's mother gets killed.
* Batwoman (2019): Ryan was wrongfully convicted of drug-dealing, since the drugs she was carrying belonged to Angelique. Ryan took them in an attempt to get Angelique to clean up.
* Batwoman (2019) sets such a trap for Batwoman in his own office. Instead of just leaving her hanging upside-down, it violently yanks her into a set of shelves, leaving her KO'd on the floor.
* Batwoman (2019): Snakebite is a street drug that makes you hallucinate that your greatest regrets never happened. It's so named from the distinctive double-needled syringe used to take it: one gives you Scarecrow's fear toxin, and the other modifies it with psychedelic fungi.
* Batwoman (2019)"'s plot revolves around this. We learn that many black kids have been kidnapped, but this isn't investigated much due to racism. Ryan was a victim of the same kidnapper as a child, thinking a student group who investigated were looking for her. However, it was actually a white girl (revealed to be Beth Kane) they were after, with the description that provides the episode's name. She discusses this trope with Mary, lamenting that it still exists and determines not to let those kids stay captives. Only her future girlfriend Angelique (who's white but was at the same group home) cared enough in the past to assist Ryan, rescuing her by getting deliberately kidnapped so she could find her.
* Batwoman (2019) (superhero series about a lesbian crimefighter, her successor is also a lesbian, there are several lesbian main and supporting characters, several other LGBT minor characters; subject matter includes homophobia, LGBT acceptance, and coming out)
* Batwoman (2019)'', suspecting that supervillain Alice is her long-lost sister Beth, Kate Kane sends a message for Alice to meet her at the waffle stand where they used to hang out as children. Although the park is not quite abandoned, like everything else in Gotham it's seen better days, with the waffle stand vandalised and boarded up.
* Batwoman (2019) that was to record the turning off of the Bat-Signal to inform the rich people of Gotham that Crow Security cannot protect them. She then topples the camera on its side, and it lands with the lens pointing at the Crow security officer she's just murdered.
* Batwoman (2019): The villains in "Time Off for Good Behavior" use this type of weapon. Appropriately, they all use the codename "Kilovolt".
* Batwoman (2019)", Tommy finds the Batmobile hidden behind a false wall in the Batcave. He tries using its missiles on Ryan's van, until Luke performs a remote override and shuts it down, forcing Tommy to go after the person in possession of

the Batsuit on foot.
* Batwoman (2019) (too far away) and a derelict subway (because it's being used by the homeless). She then forces the driver out of an unoccupied prison bus and uses that instead, but even then the explosion is too near a homeless person whom she has to shield with her body.
* Batwoman (2019): Tyler was unknowingly one for his wife Sophie. He later realizes she never loved him. Sophie later admits it herself. It seems that she was trying to convince herself of being straight through marrying him (though she does show fondness for Tyler).
* Batwoman (2019). When Alice reveals to Jacob Kane that his daughter was Batwoman, he scoffs, "And I'm the Joker."
* Batwoman (2019). When supervillain Alice is arrested by the Crows, she has her hands cuffed to the desk in front of her during her interrogation. She's able to pick the lock and escape, so when Sophie tries to arrest her in Season 2 she makes of point of telling Alice (whom she's holding at gunpoint) to cuff her own hands behind her back.
* Batwoman (2019), who replaced Rose as Kate, is also close in looks to Scott and Skarsten.
* Batwoman after DC refused to allow Kate Kane to get married to Maggie Sawyer. This helped expose DC's mandate that everyone in the Bat Family be miserable, as DC was forced to talk about the mandate in order to reassure enraged gay and lesbian fans that their meddling wasn't due to homophobia.
* Batwoman aimed at young children. And of course given the strides taken for gay rights in the U.S., the idea of a lesbian superhero being "taboo" for children is itself controversial.
* Batwoman and gained an additional inch a few years later. Multiple characters have commented, unprompted, on her good looks.
* Batwoman and is quite surprised to pull off the wig instead, allowing Kate to escape.
* Batwoman and Lucius Fox briefly appear in a Court of Owl-induced hallucination Batman has of a
* Batwoman, and they always willingly follow her, so they clearly don't find her scary. She's even been attacked by brainwashed children a few times, and has never fought back when it happened, instead electing to evade them.
* Batwoman as a form of replacement military service that gives her life meaning.
* Batwoman: As a West Point cadet, Kate Kane earned the Recondo Badge, the Basic Parachutist Badge, the Air Assault Badge, and the National Defense Service Medal. Based on other events and statements, she would also have earned the Afghanistan Campaign Medal, the IOCT Tab, the Master of the Sword's Award, the Physical Fitness Badge, and the Soldier's Medal, though none of these have been explicitly shown or mentioned.
* Batwoman. A variation occurs when Mary Hamilton-Kane discovers that Alice — the insane supervillain who poisoned Mary's mother — saved her life with a blood transfusion.
* Batwoman (best seen when she was stabbed in the heart and fully recovered) and strength well above that of an average human (such as being able to shatter a stone statue with a single punch).
* Batwoman, cadets Kate Kane and Sophie Moore have sex in a locker room shower after facing each other in a boxing match.
* Batwoman depicts her as extremely muscular and toned, and she was previously established as rather tall for a woman. Renee Montoya, who happens to be one of the people Batwoman is saving, rather likes what she sees.
* Batwoman does a "famous, fictional, fictional" variation when Julia Pennyworth tells Kate she tracked a hitman from Jakarta to Metropolis to Gotham.
* Batwoman fairly often, enough that it's one of her operative niches.
* Batwoman" from the military. He was consulted for the story in that issue and receives "special thanks to 1LT Daniel Choi (USMA 2003) for his generous assistance in research for this issue" on the cover page.
* Batwoman gives this answer repeatedly when Director Bones tries to convince her

to take down Batman. She eventually makes it to a
* Batwoman, has a sense of humor, and is generally friendly to people she likes. She's also more emotionally open with her romantic partners and close family.
* Batwoman He later gave her a "real" Batarang as a gift, and afterwards, she is shown working and sharing information with Batman.
* Batwoman herself is this to Maggie Sawyer, after Mags broke up with Toby Raynes. She was married to a man before, but it's implied it was a way to suffocate her lesbian feelings.
* Batwoman into working with them, one way they sweetened the deal was by upgrading her costume to make her effectively bulletproof. Even she admitted it was pretty awesome.
* Batwoman involved her getting regularly beaten, to the point that she became effectively immune to concussions.
* Batwoman: Just as Batwoman's gotten through to Troy (and as he's lowered his weapons) the Crows shoot him to death. This could be considered murder, as Troy wasn't presenting an active threat. After that, they also try to shoot Batwoman dead, who's only saved by her body armor, which definitely is attempted murder as she had made no aggressive move toward them at all.
* Batwoman'' Kane is the daughter of Special Forces veteran Jacob Kane, and her mom Gabi was in military intelligence. It shows.
* Batwoman, Kate Kane, is one, along with her twin sister Beth. Their mother was an Army intel officer and their father was a Green Beret, and they lived in Fort Bragg, North Carolina for at least part of their childhood. Kate planned to follow in their footsteps, and was a star cadet at West Point, but resigned after she was accused of violating DADT.
* Batwoman, Kate Kane played soccer and took gymnastics in middle school, and became an internationally-qualified gymnast in high school; in high school, she was at the top of her class. She later boxed at West Point (with strong evidence she was a school champion) and was also academically successful, maintaining a class placement between the 95th and 99th percentile and eventually earning the rank of Brigade Executive Officer.
* Batwoman like Gotham's most wanted criminal (other than the different hair colour).
* Batwoman. Naturally this is one of several "Bat-gadgets" that Kate Kane inherits from her cousin Bruce Wayne.
* Batwoman. Post-Crisis, Katherine "Kate" Kane, AKA Batwoman, is Bruce's cousin. (Also, a lesbian.)
* Batwoman (Rebirth), a man gets his hand cut off from a single swipe of a knife no larger than a switchblade.
* Batwoman (Rebirth), a pair of human/animal hybrid Colony soldiers vomit black fluid while attacking her.
* Batwoman (Rebirth) between Kate Kane and Safiyah, her lover on the island of Coryana, reveals that the couple is into bondage.
* Batwoman (Rebirth) called "Batwoman Begins". That arc involves a new kind of bioweapon, and in the spinoff series, Batwoman tracks down those who traffic in said weapon.
* Batwoman (Rebirth). Ideally, they want to string her along through various "trials" to make her suffer as much as possible, but would not be opposed to her being killed outright. They would have even found success if she hadn't taken their initial bait, as then one of their attacks would not have been foiled.
* Batwoman (Rebirth), Safiyah performs CPR on Kate after Kate falls off a ship and almost drowns during a botched heist at sea. Aside from being soaking wet, Kate recovers almost immediately (and doesn't, for example, vomit water).
* Batwoman (Rebirth) setting, and the title character having to face her dark past. Kate Kane's operations also lean more toward black-ops than black-tie.
* Batwoman (Rebirth): The main character is a lesbian; there are several lesbian/queer characters.
* Batwoman (Rebirth), uses throwing knives as her primary weapon (as if her name didn't give it away).

* Batwoman says that, unlike in the comics, Kate is a vegan in the show just like Ruby Rose is; this change seems to have been done mostly for practicality's sake. They're both lesbians as well, but that was already part of the character.
* Batwoman's case. She's definitely an ally of Batman and the rest of the Batfamily and will help them if she's available, but generally keeps to herself as far as superheroing goes.
* Batwoman series introduces the Ashoth, a sentient sickle that is able to possess someone with a similar bloodthirsty and carnal mindset when grafted to their body.
* Batwoman she once needed to visit a doctor to have a pair of blood samples analyzed and the script for the scene explicitly instructed that she be drawn just waiting in the office, not trying to surprise the doctor. This time she is standing in plain view, and would be seen by the doctor as soon as the lights were turned on.
* Batwoman sports a look pretty close to Batman's, but she has fake long hair attached to the cowl as a bit of a disguise (and also very noticeable lipstick).
* Batwoman take place at Point Rock Academy, a fictionalized version of West Point.
* Batwoman: The Crows, a private security force run by Jacob Kane to supplement the GCPD.
* Batwoman (the former knows her quite intimately, while the latter comments that she has been leaving him clues on purpose as a sign of trust).
* Batwoman, the in-universe explanation being that Kate had her face reconstructed after the crash mangled it.
* Batwoman, the show's first villain is Elizabeth "Beth" Kane, sister to Kate Kane, who was abducted as a child and eventually adopts the name "Alice"; her abductor threatened that he would kill anyone who came to look for her if she called for help, and eventually defence contractor Catherine Hamilton faked test results to claim that Elizabeth was dead to try and help Beth's father move on as he and Kate were basically killing themselves trying to find her. The audience can sympathise with her anger towards Catherine for the original lie, but it's less fair for Alice to resent her sister and father for believing a very convincing lie from two independent parties who each had their reasons for wanting people to believe Beth was dead.
* Batwoman training, Kate Kane was tortured for a week straight, including with electricity and waterboarding.
* Batwoman: When Kate Kane comes home to her father and explains that she's been separated from the army, he naturally wants to know why.
* Batwoman would have revealed it even earlier to readers who were familiar with that series, but she only reveals her secret to Batwoman at the end of the arc.
* baud encoding where 10 bits are used to transmit 8 bits of data. But before you go "couldn't they just take out the encoding overhead?", a byte isn't always 8-bits.
* Bauhaus are also purely feudal, but less oppressive. Bauhaus nobles, unlike their Mishiman counterparts, have a strong sense of
* Bauhaus has their incredibly melancholic and nonsensical waltz, "The Three Shadows, Part II," which Peter Murphy described years later as being based around nursery rhymes. The song sounds more like a sermon given to unfaithful followers as a threat more than something one might play for their children.
* Bauhaus members) did one of these with their side project "The Bubblemen" — a single release consisting of "The Bubblemen Are Coming", "Bubblemen Rap", and "Bees", and featuring the band dressed in bee costumes — as a "blowing off steam" variation of this trope. The project quickly became a cult hit, and they often performed as the Bubblemen as part of their regular concerts.
* Bauhaus nobility are better since they are raised with a strong sense of
* Baumgartner Restoration (art conservation), or those with focuses on cleaning and fixing things in general.
* Baumgartner Restoration: Julian Baumgartner, art conservator based in Chicago, restores paintings.
* Baum himself could get lost in the character mess. In one novel, he has The Shaggy Man and Polychrome meeting for the first time, apparently having forgotten

that he introduced them in the same book.
* Bavarian) are Dutch - Pia Douwes, Maya Hakvoort, and Annemieke van Dam. Actual Austrians are rare in the cast.
* Bavarian, a Southern German dialect group. An example would be "Koana hot niamois ned koa Göid ned g'habt" which is "Nobody has never not no money not had".
* Bavarian Fire Drill: Deceiving people by pretending to be an authority figure.
* Bavarian Fire Drill. He shows up at the most expensive hotel in town with two beautiful women on his arms (actually kunoichi on a mission with him), drops a chest of gold on the counter, and starts making demands of everyone. The management assumes he's royalty and promptly gives in to all his demands immediately.
* Bavarian Fire Drill— Act like you're in charge and people will obey you.
* Bavarian Fire Drill: The character acts as though they have some authority that they don't, but never actually claims that they do. Anyone who does what they say to do is acting on their own assumption.
* Bavarian Fire Drill when he breaks into the Miami-Dade Police Department to steal intel. When his intrusion is discovered, he breaks a second-floor window, borrows a police jacket, and then acts authoritatively to play on a rookie's "obey superiors" gene and send the cops on a wild goose chase.
* Bavarian TV you could see a variety shows with adult and elderly people with party hats unironically dancing to the tune, sung by Gott himself.
* Bavaria, where major politicians (usually Bavarian or federal) are mocked. It's considered an honor to be mocked and politicians in attendance are often scrutinized for their reaction. Finding a joke not funny is the surest way to ruin a political career, but some politicians are clearly shown enjoying being taken down a peg or two.
* Bawdy Song telling the nasty stuff they did. The first one is "Well, I've been to Hastings, and I've been to Brighton, I've been to Eastbourne too". All are coastal cities, and the same guy later says "I've even sucked an old man's cock", so that might be an allusion to the Navy's habits...
* Baxia, Nie Mingjue's spiritual sabre leading to its master's remains. The Nie tomb is for the Nie clan's sabres because their spirits tend to become resentful. Jin Guangyao still hid Nie Mingjue's head in Golden Qilin Tower, but the rest of his body remained whole and was hidden in Coffin Town.
* Baxter Basics and getting selected for his safe Tory seat in the by-election.
* Baxter is narrated by a murderous pit bull who longs for a proper master.
* Baxter-shaped hole in the wall to the left of an open door, which tips Raphael off as to who the culprit is.
* Baxter Stockman subjects the turtles and fellow Shredder minions Fishface and Dogpound to a lengthy one of these in
* Bay12 Forums, certain players are infamous for using these. Some examples:
* Bay 12 Monster Girls. Cheru, a Domovoi, also has the same ability, but takes several years to regenerate, as opposed to days/weeks for the former two.
* Bay 12 Play-by-Post Games (the following roleplays are headed by tropers)
* Bay 12 Sword Art Online RP is explicitly confirmed to take place in an alternate universe.
* Bay 12 Sword Art Online RP, who's almost three feet taller than her.
* Bayan Ko father-and-son actors Pen and Ping Medina playing the corrupt Rubio political dynasty in-series, with Pen playing the governor father and Ping playing the congressman son.
* Bayaz, though the "evil" part is less evident until later in the series.
* Baydog - A U.S./Austria co-production between SPI International and Caricartoon.
* Bayek also has a justified hood despite the Assassin Brotherhood not existing yet, as Ancient Egypt is even hotter than the medieval Holy Land.
* Bayer 04 Leverkusen are historically associated with the pharmaceutical company Bayer, and their stadium is the BayArena. This has somewhat more organic roots than usual, as the team started as the football division of a sporting club for the company's employees (historically a common practice, especially in Germany); the club was founded in 1904, hence the name. The firm's iconic pill logo (a white

circle with "Bayer" written both horizontally and vertically, intersecting at the "Y"; if you've ever seen a Bayer aspirin pill, it's that) is the centerpiece of the team's logo, and the team is nicknamed
* Baygon (insecticide): Formerly Bayer trademark, now owned by SC Johnson. Especially in places where Raid isn't as popular.
* Bayley, after getting over her starstruck phase, was automatically being the best friend she could be to everybody. She continued to act this way on the main roster until her heel turn.
* Bayley and were in the front row cheering her for getting to main event a PPV. So it seems they really were Bayley Friends Forever.
* Bayley: a vice cop with the LVPD. One of the few good cops in a department full of corruption, very easygoing unless crossed, geeky.
* Bayley for other women on the roster. Though she did eventually turn heel in 2019.
* Bayley full stop during her feud with Bianca Belair with the latter as Smackdown Women's Champion. She essentially got a title match with the champion doing nothing but laughing at her!
* Bayley) have had periods where they worked as both heels and faces at various points in their WWE careers, it took until late 2019 for Bayley to finally turn heel.
* Bayley. Her character began as a starstruck fangirl who was a bit shy. Eventually she morphed into an energetic character who wanted to hug everyone. Her change in entrance themes to a more up-tempo song reflects this.
* Bayley is an adorkable kid-friendly babyface wrestler whose offence is based around power moves.
* Bayley kick her in the head, only for Bayley to no sell it to get in one last slap before Asuka laid Bayley out with two more heavy kicks to end the match and win the title off Bayley.
* Bayley, Sheamus can be seen looking at the tube men in complete disbelief.
* Bayley wears a more suppressed athletic top than the usual revealing women's wrestling garb, due to her persona being geared towards little kids and being very endowed up top.
* Bayliss and Kellerman each feel this way when they're the new detective in the homicide unit. Bayliss especially feels this way in regards to his partner, Pembleton, in the first couple of seasons.
* Baymax himself to, partly due to the prior-mentioned scene, partly just as a joking subversion of his super-caring personality, or simply removing it, or replacing it with a killer robot chip.
* Baymax in the comics was built by Hiro to act as his bodyguard. Movie Baymax is a gentle and naive
* Bay of Married Pigs, Miranda Hobbes (played by bisexual actress Cynthia Nixon) is thought to be a lesbian by her boss, kisses a lesbian she's been accidentally paired with to prove to herself she's not a lesbian.
