* bayonet charge), they are also viscerally intimidating, and often result in a total rout as the enemy flees rather than risk getting stabbed to death by a berserking soldier. The most recent bayonet charges by modern military forces were both courtesy of the British military, with Scotts from the Argyll and Sutherland Highlanders routing a larger force of Iraqi militiamen near Al Amara in 2004, and a squad of soldiers from the Prince of Wales Royal Regiment caught in a Taliban ambush forcing the enemy to retreat by immediately launching a counter-assault.
* Bayonets, however, are NOT a major part of melee combat anymore. While they once were considered vital in warfare, as long ago as World War 1 it was recognized that bayonets are actually terrible weapons - guns are not very good spears, and there are far too many ways to get inside the weapon's reach. This is why combat knives grew in popularity - bayonets were unwieldy, but a knife is very handy for a wide variety of tasks AND can also be used to stab or cut people. Modern bayonets are more or less knives that can be (but which usually aren't) attached to rifles. The military has been de-emphasizing them in recent years due to their lack of real value - the primary purpose of bayonets nowadays is poking dead bodies and

threatening prisoners, not actual combat, and the US Army removed bayonet training from its basic training curriculum.
* Bayonetta 2 and turns into the actual endboss of the prologue. Afterwards, Bayonetta spends much of the game journeying to Infero in order to rescue Jeanne's soul.
* Bayonetta 2. But his sheer brute strength makes this a relatively moot point.
* Bayonetta 2 called her "Sunday Best" which she wears in cut scenes as she goes shopping in Manhattan, and which tends to get ruined when the angels show up. Both variation include long silk gloves.
* Bayonetta 2 has Enzo's groin very nearly run over, complete with scooting back, when Jeanne makes her entrance via motorcycle.
* Bayonetta 2 have also been removed, due to the complaints about how sudden they were in the first game and how penalizing failing one was.
* Bayonetta 2: "I like my swearing, but in the wrong place it brings down the whole gosh-darn tone. You cunt."
* Bayonetta 2, Luka gets another pair of glasses that let him see into Purgatorio from Rodin in exchange for some genuine sake. However, he unfortunately forgets that being able to see things in Purgatorio is not the same as being able to touch them.
* Bayonetta 2 spits out the bottled Coke that he drank from the wine glass, saying that it must be moldy.
* Bayonetta 2's prologue, Bayonetta and Jeanne seem awfully preoccupied about their upcoming Christmas party. That would be casual enough, if not for the fact that they were at the same time fighting hordes of Angels hell-bent on killing them.
* Bayonetta 2 take him apart, with his health dropping like a rock at the slightest of scratches. It's also very satisfying after all the hell you've been put through.
* Bayonetta 2 that'll bite them into submission. And the best part about it? Not even Rodin, who makes a living from taking down demons and turning them into weapons for Bayonetta and is very much one of the biggest badasses of the series, could tame this beast!
* Bayonetta 2, the first half of the fight against Belief takes place on top of a speeding train.
* Bayonetta 2, the game opens with Bayonetta doing Christmas shopping. In fact, the entirety of the game after the Prologue takes place on Christmas Day.
* Bayonetta 2, they're among the best weapons in the game, capable of raking in combo points something fierce while tearing through even bosses like a hot knife through butter.
* Bayonetta 2 to the short tomboy hair as well). It's so long that it will clip into some of the other models in the game, in particular, her motorcycle when she pops a wheelie.
* Bayonetta 2 was originally canned by SEGA. Then on September 13th, 2012, the game was announced to not only be on the Wii U, but to also be published by Nintendo (who were the only company willing to fund the game).
* Bayonetta 2, which lacks the Nintendo-related extras but has supports higher resolutions than the console versions with adjustable graphics settings.
* Bayonetta 3 was announced to be in development in 2017. And after that, nothing. Despite the complete absence of news since then, series producer Hideki Kamiya has insisted multiple times the game is still being worked on.
* Bayonetta, after Jeanne passes Bayonetta by on a motorcycle, the two banter for a bit, then Jeanne suddenly holds up Bayonetta's Umbran Watch - the heart of an Umbra Witch, mounted on her chest. Bayonetta is understandably shocked, and Jeanne mocks her for getting so rusty that she wouldn't notice that.
* Bayonetta, although there are less of them this time (only 30 achievements compared to the first game's 50).
* Bayonetta and is one of the most challenging demon enemies in the entire game.
* Bayonetta and its sequel, most notably Alraune, Belief, Iustitia, and Worship. But given the bizarre biology of these enemies, some tentacles double as mouths as well.
* Bayonetta, a number of the angels have human faces that aren't exactly situated

properly or in places where they should belong. Noteworthy is Fortitudo, a gigantic two headed angelic dragon whose torso is dominated by an upside down human face.
* Bayonetta, a pair of twin Rocket Launchers are named Lt. Col. Kilgore and are stated to have the Colonel's soul put inside them.
* Bayonetta) appear on gravestones, as well as the names of the development team. This sequence then ends with Enzo taking a leak on the director's grave.
* Bayonetta are revealed to be all about this once you crack through their marble skin.
* Bayonetta, as Bayonetta and Jeanne are fighting on top of the missile, the missile flies by the Platinum Games building at one point. The P+ logo is also seen at the bottom of the screen during the Angel Attack mini-game.
* Bayonetta at worst. The clearest example is her casually talking to Temperantia while walking in to a tornado. Even as trucks fly around coming close to hitting her.
* Bayonetta: Bloody Fate is very bad about this. A shot of a CGI piano is seen at the beginning of the film, and several angels, namely Temperantia and Irenic, are in 3D as well. They don't even try to make any of the CGI elements blend in with the 2D animation.
* Bayonetta blows a kiss that shatters the invisible barrier blocking her way after all mook fights.
* Bayonetta can launch salvos of missiles at Bayonetta, including the angels Kinship, Worship, Temperantia and Sapientia, and the demon Insidious.
* Bayonetta can use her magic to summon horrible and deadly torture devices like spike-filled iron maidens, giant twisting winches, guillotines, and even giant chainsaws in order to brutally finish off angelic enemies. The devices are also the same ones that were used on the other Umbran Witches after the angels tricked humanity into turning on them, so their use falls under 'revenge' (case in point, when Bayonetta uses a Torture Attack on a demon she doesn't use these devices, instead just using her summoned demons to brutalize them). Although with how she taunts and dances, it seems Bayonetta genuinely enjoys using these devices on her angelic foes as well, so their use probably also falls under 'pleasure'.
* Bayonetta die like this if a bladed weapon lands the finishing blow.
* Bayonetta does this with an angel who disguised herself as her and tried to take Cereza away. Bayonetta wins, pissing off the angel enough to attack her and reveal her true form.
* Bayonetta dresses up as a nun in the beginning of the game... and kills angels while still wearing that outfit. And after beating the game, you may buy the outfit as an alternate costume.
* Bayonetta enemies with the default guns that are nowhere near that powerful during gameplay.
* Bayonetta has a blink and you'll miss it moment where she flips off some angel that had just destroyed the road and then uses the finger as an ignition key for a motorbike.
* Bayonetta has a very long dance sequence at the end involving Bayonetta dancing with just about every character in the game.
* Bayonetta has guns in her stiletto heels, and she can mount other weapons there as well.
* Bayonetta has one name each, with the only two exceptions being Luka Redgrave and his father Antonio.
* Bayonetta, has stated that "only a woman could have made Bayonetta look like she does."
* Bayonetta has this as a torture attack. After kicking an Applaud, Affinity, or Ardor repeatedly in the rump, she then beheads it with a guillotine.
* Bayonetta. He attempted to justify this by claiming she had been heavily voted for in Europe, but many fans were outright shocked.
* Bayonetta in that her physical form is always the normal but her cast shadow will display her butterfly wings that she uses to double-jump (an aspect of her patron demon).
* Bayonetta is a rare heroic example. One of the gameplay mechanics is her

literally throwing her enemies into spectral versions of medieval torture devices.
* Bayonetta is probably the exemplar of this trope. Not only is her hair ridiculously long, she uses it as her SOURCE OF CLOTHING, and controls it in such a way that it's a deadly weapon.
* Bayonetta is quite fond of this trope. Her English accent only adds to the fanciness.
* Bayonetta moment so that, even if you fail the quicktime event, you don't lose more than a few seconds of progress.
* Bayonetta. Not that she wouldn't have done it if it hadn't taken Cereza.
* Bayonetta of sorts, Cereza, certainly is super cute with those glasses.
* Bayonetta, of which the titular heroine belongs to, are an all-female order of magical warriors sworn to serve the dark powers of Inferno.
* Bayonetta omnivorously gobbles up every action game trope, cliche, and visual flourish of the past twenty-five years and synthesises them into something uniquely mad.
* Bayonetta onwards, as part of their agreement to fund the development of those titles.
* Bayonetta/Pit and Bayonetta/Palutena are both popular pairings, especially thanks to Bayonetta's reveal trailer for
* Bayonetta received a huge ad campaign in Japan. In other countries, Europe only got a magazine ad which gave very little indication to what the game was about, while the U.S. got a great magazine ad that was rarely printed, and a mediocre television ad that was rarely aired.
* Bayonetta Rodin so he can see the angels (and Bayonetta) in Purgatorio whenever he wants.
* Bayonetta's, and comes complete with a powerful Charge Shot that's almost as strong as one of Bayonetta's own Wicked Weave attacks.
* Bayonetta screen is a shot of Bayonetta's corpse sprawled across the ground.
* Bayonetta series), which become just as commonplace once Bayonetta starts defeating Infernal Demons on a regular basis.
* Bayonetta's "Fly Me to the Moon." It's as over the top as it sounds.
* Bayonetta's guns are also good for this, doing damage but no knockback, and capable of being fired at multiple angles simultaneously. If even one bullet tags a character in flight, she'll get the credit.
* Bayonetta she can have a melee weapon equipped on her hands and a ranged weapon equipped to her heels, or vice-versa.
* Bayonetta she merely just lost her power temporarily and nothing sexual actually happened.
* Bayonetta!" So on one of the rare occasions she actually calls him Luka...
* Bayonetta summons Sheba herself in order to finish off the Creator God Jubileus by punching her all the way throught the solar system and into the sun.
* Bayonetta. Surprisingly, the doujin fandom responded by making Bayonetta the one in power in most doujins now.
* Bayonetta, the Lumen Sages also have the ability to summon giant angels for roughly the same purposes, although this has only been demonstrated by one character in both games.
* Bayonetta." Then he continues doing them on set intervals during the rest of the review.
* Bayonetta. These have the even tougher Gracious and Glorious appear at higher difficulties.
* Bayonetta: The title character is the result of a forbidden union between the Umbra Witch Rosa and the Lumen Sage Balder. Her mother eternally imprisoned and her father exiled, she was forbidden from learning the dark arts of her mother's people.
* Bayonetta, the titular character shouts "Let's dance, boys!" before blasting apart angels.
* Bayonetta this is her only animal transformation to be featured in the game.
* Bayonetta this trope. Cars, planes, missiles, trains, Bayonetta rides 'em all. The second game even begins with Bayonetta fighting angels atop a jet fighter.

* Bayonetta (two in hands, two on feet) brutalizing Angels and demons alike, killing two supreme gods and delivering some of the most stylish over-the-top battle in video game history.
* Bayonetta uses "Flock off, feather-face!" line. It's a rare occurence considering the number of times the F-bomb has been dropped by that point, and throughout the rest of the game.
* Bayonetta was released in North America and Europe months after Japan despite all three versions being identical.
* Bayonetta. When she casts her most powerful spells (usually during Boss Battles) the hair comes to life, leaving Bayonetta herself pretty much nude.
* Bayonetta, where her main enemy, the Masked Lumen, shows absolutely no skin until he finally gets unmasked.
* Bayonetta. Which means humans are screwed the moment they take their last breath.
* Bayonetta who are both noble organizations, not that this stops angels and demons using both of them for their own desires.
* Bayonetta, with vines that unfurl and serve as paths from one floating landmass to another, local fauna that makes garden weeds look like expensive bouquets, and of course bloodthirsty demons ready to rip apart any intruders.
* Bayonetta works that showed her as submissive (with the implication that he would be totally fine with NSFW works that portrayed her as dominant). Perhaps in response, later fanwork swung away from this.
* Bayonetta yanked Bayonetta, and thus her Overseer power, out of Jubileus's body right before the Dea reformed, thus leading to Jubileus being brought into being at only 50% power and basically completely insane, screeching at the top of her lungs and attempting to bring about Armageddon.
* bayonet usage the Prince of Wales Royal Regiment's LCPL. Sean Jones earned the Military Cross for leading his bayonet-wielding squad into Taliban machine-gun fire in Helmand Province, Afghanistan.
* Bayonet Ya, and while the titular Umbra Witch can equip many weapons across both her games, bayonets aren't actually one of those options.
* Bayou of Endless Regret, a tremendous stretch of mangrove swamps, stagnant pools and quicksand infested with starving alligators and seemingly endless swarms of biting insects and haunted by wandering ghosts. It's also home to plants that produce some of the most potent toxins in existence, which can kill even ghosts, and the river Cocytus empties into it and keeps it choked with silt. It used to be a much nicer place during the First Age, when it was a prime example of a fertile, flourishing wetland and filled with flowers, medicinal herbs and swampland villages, but the Great Contagion killed everything that lived there and left it into its current state.
* Baywatch (2017): After an incident where Matt Brody vomited into the pool in the middle of a swim race, Matt was nicknamed "Vomit Comet".
* Baywatch, and they put their faces on them. Both parties are satisfied: Ross has the audience and Rachel and Monica are finally free.
* Baywatch, a returning lifeguard refuses Mitch's handshake. However, subverted as he didn't notice the gesture due to having an eye disease destroying his peripheral vision.
* Baywatch, as Matt and Summer discuss the burgeoning relationship between her mother and their boss. She prattles on about how friends shouldn't date, as it "complicates things". Matt gazes at her the whole time she's talking, slowly realizing his growing feelings for her. When he leans in to kiss her and she asks what he's doing, he declares, "I'm complicating things".
* Baywatch, as Stephanie is taken hostage by an escaped criminal, she receives a call from her supervisor. She starts to respond by saying that she's "dealing with a code—", but the man cuts her off, knowing that she could be giving him a code that alerts him to her situation. Luckily her supervisor figures out she's in trouble anyway as she the tells him that she's driving a lost child around to find his parents, something that's a violation of policy.
* Baywatch cabinet prominently feature the backsides of three female lifeguards, complete with skimpy swimsuits.

* Baywatch episode "Hot Stuff", Cody is babysitting a couple of blind kids on a beach. He tries to make the time fun, and at one point he tickles the girl played by Mila Kunis with a feather on her bare feet just for fun.
* Baywatch episode where one of the male lifeguards caught one of the female lifeguards using drugs and she accused him of rape when he threatened to report her.
* Baywatch included a swimmer drowning or near-drowning in the ocean, only to be pulled out by a lifeguard and given CPR for a few harrowing seconds before coughing up some water and being as good as new. Averted in some episodes, especially in the first 2 seasons (before Pamela Anderson), when CPR is used just to stabilize the victim until a defibrillator arrives or is ready. Especially in rescues involving the Scarabs. In one S1 episode, there is even a mention when one of the characters is rescued by an amateur lifeguard only to have breathing problems later that night, that every rescue by a professional lifeguard is finished at the hospital, where the victim is checked.
* Baywatch, Jessie takes up skinny dipping when Sean tells her about the Polynesian cleansing ritual and has to perform a rescue in the nude.
* Baywatch lets the player choose from one of three — the top SPF rollover lanes, the Shark Hole, or the Ironman side ramp. There's also a Secret Skill Shot, where you shoot for the Guard Tower when it's lit for 25 million points.
* Baywatch - Lifeguard Michael "Newmie" Newman is played by Michael Newman, a real LA County lifeguard.
* Baywatch Nights ripoff and have David Hasselhoff fighting aliens and mutants.
* Baywatch, one of the cops questioning him, who happens to be a friend of his, gently tells him that he shouldn't have waived his rights to an attorney. Eddie angrily and staunchly tells him that he doesn't need one because he didn't do anything.
* Baywatch; the "CPR" mode is fairly difficult to accomplish, due to the steep Guard Tower ramp and the priority of ball locks on the ramp.
* Baywatch, the show's star, arranged to buy the rights to the show and have it continue as a syndicated TV show, where it was very successful.
* Baywatch: Twenty-something Aussie lifeguard Logan Fowler dumps Caroline Holden for 60-year-old widow Kathleen Huntington, and marries her to get his green card.
* Baywatch was full of pretty actors pretending to be lifeguards... save for one man, Michael Newman, the only one to actually look like a lifeguard and perform complicated stunts (notably, he's one of the few regularly shown swimming worth a damn). An actual lifeguard with 20 years of experience who'd saved dozens of lives, Newman played a fictionalized version of himself. He also served as a technical consultant for the show and many of the saves on the show are recreations of saves Newman himself participated in. And then Alexandra Paul (Stephanie Holden) is not a lifeguard but she is an accomplished professional triathlete.
* Baywatch was mostly set on LA County beaches, where most of if was actually filmed.
* Baywatch was much-hated and was once voted the worst TV show exported to Britain, but it was a huge success when it first aired and is fondly recalled even to this day.
* Baywatch, with the neckline, arm holes, and leg holes cut to best flatter the figure of each actress.
* Bazaar of the Bizarre: A marketplace in the Middle East. You'll find all sorts of this and that in there.
* Bazaar of the Bizarre: A marketplace selling strange and wonderful things.
* Bazaar of the Bizarre: A marketplace where you can buy weird, magical or just very exotic stuff.
* Bazaar of the Bizarre: If the contents of the Secret Government Warehouse were on sale, it would be a Bazaar.
* Bazaar of the Bizarre) results in the shopkeepers screaming "THAT'S NOT YOURS!" and forcibly ejecting you.
* Bazaar of the Bizarre to mundanes—who are the clientele the Shop seems to prefer.

* Bazelgeuse joins Deviljho and Seregios in being a constant fight-interruptor, seemingly actively seeking out monsters already fighting with players. "The best way to track Bazelgeuse is to get into a fight with another monster, he'll come running."
* Bazett Fraga McRemitz and he most likely loses. He comforts himself with wine. Nero Claudius and Weiss Schnee join him and share the wine, and Weiss impresses him with her knowledge of alcoholic beverages.
* Bazett Fraga McRemitz and Medb are both attracted to Cu Chulainn. Not only do they not like each other, when Glynda Goodwitch fixes Cu Chulainn's coffee cup and he thanks her, they both give her a
* Bazett Fraga McRemitz criticizes Yang Xiao Long for being this. Yang is incredibly strong, but relies mostly on her strength, Aura, and Semblance and does not adapt to her opponent's tactics. Yang loses a fight to Bazett, who is even stronger than Yang is and is an expert martial artist.
* Bazett tried to summon Cú Chulainn as Lancer, but Iri gave her
* Bazhell series' background the old empire that fell 1,000 years before was explicitly Magitek. Dwarfs are championed by the author due to his hatred of the anti-technology stance of much of fantasy. The old way of making steel depended on the support of wizards. The new one uses Bessemer Converters. Steam engines are being discovered and shock absorbers are now being used on wagons.
* Bazil Broketail, integrated into human society of Argonath empire and serving in its legions as heavy shock troops. In battle, they wield huge longswords and are clad in plate armour. Although technically they are not knights (there are no nobles among the dragons of Argonath), each one of them does have his (or her) own squire — a dragonboy, paired with them at young age, who cares for dragon's weaponry and equipment, as well as for dragon himself.
* Bazin either has a profound philosophy or is basically an inter-galactic stuntman.
* Baz Luhrmann is credited as the artist of the 1998 hit "Everbody's Free (To Wear Sunscreen)", but it's an (understandable) misconception that he is the performer on the track. The actual narrator on the track is voice actor Lee Perry, who reads Mary Schmich's "Wear Sunscreen" essay (aka "Advice, like youth, probably just wasted on the young"). Luhrmann was merely the producer of the song and the person who came up with the idea of setting the essay to music. The single was a massive international hit, but Luhrmann went back to directing immediately afterward.
* Baz Luhrmann reinterprets the original play's prologue as a newscast.
* Baz Luhrmann share a kiss in an elevator - which was actually too small to fit cast and crew inside. There were a lot of breathless grips running around the outside of the tiny lift set, removing and replacing panels to allow the steadicam to move freely around the couple.
* Bazooka Jules are a group of cyborgs developed by White Sleep Technologies. Each of them is a previously deceased mass murderer whose brain and spinal column are fused with a robot body.
* Bazooka Jules. It can provide her with any type of gun she needs when she's in danger and it also assists with her aim.
* Bazooka Jules provides a lot information on Julie's powers and how they work. He's even able to explain abilities she's yet to use.
* Bazooka Jules: The head of White Sleep Technologies decides to send a team of cyborgs afters Julie despite warnings from his scientist that testing for the cyborgs is incomplete, and there's a possibility that they may lose control of the cyborgs. A group of soldiers are sent with the cyborgs equipped with weapons designed to take out the cyborg if control of them is lost, but the scientist states even that may not be enough.
* Bazooka Jules. The other is to provide its host with weapons and gadgets. It was has various detection systems, a radar, and can provide its user with tactical advice, hence the voices inside Julie's head.
* Bazooka Jules transforms into a superpowered adult version of herself with large breasts thanks to a micro-robotic weapon that fused with her body. While her transformations only happen when she's in danger, her boyfriend hopes that she'll

eventually learn to transform at will.
* BB3B when the kids take their grandmother whist she is still on a hospital bed and run away from the robots. However, the order of who is chasing who doesn't change.

* BBC 1's "Rhythm and Movement" series (used 2002–2006) references this trope as used in Bollywood movies.
* BBC, a member of the public deliberately trying to get into shot. Without looking, he reaches out to push her away and makes accidental contact with her right breast. It is possible that one day he will live this down. Eventually. The clip went viral.
* BBC America used to run BBC shows in a 40-minute format. The remaining 20 minutes of the hour would be filled with short-subject films or previews for other shows. They quit doing this and began just hacking into the sitcoms to make them fit the 30-minutes-with-commercials template. "Red Dwarf" was shown in its complete format the first time BBCA aired it. By the time is was ready to repeat the show, it had edited all of the episodes dramatically.
* BBC became President of the United States. He's made several documentaries and written several books about this. He's also investigated skulduggery in the Exxon Valdez disaster and the Shoreham Nuclear Power Station project.
* BBC) ceased to be a broadcast TV channel in February 2016. It lives on as a youth-oriented video on-demand area on iPlayer called BBC II!.
* BBC "Countrysides", about a fox hunt saboteur, he is captured by two of the more sadistic hunters (contrasted with a nicer "It needs doing" one he met earlier), who deliberately torture a fox to near death in front of him and then leave him to put it out of its misery, gloating that he's the one who's actually killing the fox.
* BBC cut out the word “masturbating” and crudely edited the line to say “golf and strangling animals”. Apparently, masturbation is far worse than strangling animals.
* BBC documentary "A history of Scotland" includes two of these in quick succession when discussing the Jacobite rebellion of 1715:
* BBC ended with an unresolved argument between Evie and Beatrice over the direction of the eponymous fashion house.
* BBC, fans used to tune in hoping to be there for yet another Kennedy gaffe into unprofessionalism, political bias, racially insensitive jokes or those days where she was overwhelmed by her "medication". When the BBC finally called a halt to her show in 2009 and she was replaced by the more accomplished professional broadcaster Vanessa Feltz, people switched off in droves. It just was not the same any more.
* BBC Four also replaced BBC Knowledge, which was initially focused on education programming, but later shifted to to what ended up being a prelude to BBC Four's eventual lineup — which focuses more on the arts and other serious fare.
* BBC four days a week alongside the divisive Piers Morgan (well, until he quit in 2021).
* BBC from the 70's, followed by a scene of a control room with a plush of Digit Al (the mascot used in campaigns informing viewers of the transition) on top of a screen with said mirror globe, and the monitors behind it showing a series of classic BBC One idents from each subsequent era (beginning with the Computer Originated World) and an obituary for Ceefax (which also shut down due to the transition). BBC Two Northern Ireland had a similar sign-off done over the classic BBC 2 animated stripes of the early 80's, which animated off-screen in reverse

* BBC had another criticised set of adverts in a similar mode, advertising digital radio using people who did idiotic things like not getting dressed in the morning 'to make time for digital radio'.
* BBC had a sketch about a man who'd spent many years building a beautiful model of St Paul's Cathedral — out of matchsticks. Unfortunately he'd neglected to remove the matchheads, and under the hot studio lights...
* BBC has the Judge (played by Rob Brydon) blithely asking how many people's sent to the gallows that week (22, but it was only Tuesday) before cavalierly slapping on a black cap and giving Oliver the death sentence for pickpocketing. Later in that same adaptation, in sentencing Fagin he wordlessly puts on his black cap and slams his gavel and Fagin is taken away.
* BBC - his naughty Lillian Gish calendar. On another occasion they help the narrator find a 15 sided nut for his vacuum. Throughout the run, the narrator set up the story with a little monologue at the beginning. Later in the run, the characters would break in and either converse or argue with the narrator, or tell him to hurry up so they could get on with the show.
* BBC Historical Farm Series in a very accessible, enjoyable and informative way, within a virtually period-enclosed visual experience, and without any sort of pandering to the audience or dumbing down of the overall presentation. No mean feat for what could have been an otherwise bog-standard documentary series.
* BBC Historical Farm Series where the presenters have a surprised hen briefly waving her wings and legs at them, after they carefully pick her off from a henhouse perch, in order to examine her age and health.
* BBC. In an attempt to get the crew back the computers use its terraforming devices to melt the polar icecaps. The crew have to use their large shuttle (which is airtight so it can fly in outer space) as a floating ark to save some of the local flora and breeding pairs of the fauna.
* BBC. In other words, it comprised several acts which were broadcast at various times during the entire day's schedule, with the events of each act taking place at the time of day they were actually broadcast.
* BBC, in which contestants are quizzed on their knowledge of pop music. Questions are randomly allocated in blocks by year or artiste, and the listener can almost always tell the age of the contestant by the decades they know best (near perfect scores) and the ones where they flounder hopelessly. It is a rare Popmaster who is as clued up on modern music as (s)he is on the music of their youth, or vice-versa.
* BBC, in which Michael Howard — who was leader of the Conservative Party at the time — channeled all of his evil into his left hand, which later defected to UKIP. This forced him to cut it off, resulting in his right hand becoming evil, and subsequently defecting to the British National Party.
* BBC is notable for its voice cast, which consists entirely of autistic actors. However, it downplays this trope for the most part as although each of the title character's imaginary animal friends personifies a different sign of autism, only Pablo himself is actually supposed to be autistic. Additionally, Pablo is portrayed by twins William and Oliver Burns in the live-action scenes; whether or not either twin is autistic in real life is unknown.
* BBC" is set in an alternate 1970s, in which Nazi Germany had invaded and occupied Britain during WWII. The protagonist is the writer of a popular soap opera (also called "An Englishman's Castle") that is set during the Battle of Britain.

* BBC Radio 1's Chris Moyles will sometimes ask his listeners to text other radio shows using this sort of name, then send in the results. Popular names include Toby le Rone (Toblerone) and Cara Mack (Caramac, a brand of chocolate bar). More ingenious listeners come up with multiple names, such as Liz, Anya and Carl Hickbread (lasagne and garlic bread) and a man calling himself Mark who said he was in his car with his baby son Spencer, knowing that the DJ would say hello to
* BBC Radio 4 digest of the Edinburgh Festival had an impromptu live performance of the song interrupted by an American lawyer explaining to the producer precisely why they couldn't use that song, so that all we hear is the opening "Happy Birthday…" and closing "…to youuuuu!"
* BBC Radio 4's to a party, one recounts an event from a previous party at which Bond threw somebody out of a window for saying that his cigarette case was "gay". The victim landed on a railing spike and was paralysed.
* BBC Radio features a narrator called the Tale Bearer, who frequently argues with Bilbo Baggins over story details. For instance:
* BBC Radio One caters to the youth market, but has an older listener base who also likes to complain about the new music.
* BBC Radio One runs Jo Whiley's Tenuous Link and Dave's Tedious Link.
* BBC Radio Scotland in the late 1960s decided to really spice up Hallowe'en broadcasting, by having a simulated Black Mass in the studio to broadcast to the nation. This was despite objections from the Church. The play's producer went home that night, trying to shake off a conviction that something bad would happen. He found his house empty save for a scribbled note from his wife to say she'd had to rush their daughter to A&E. Finding them at the hospital, he discovered earlier that evening a feral rat had got into the house and badly bitten the child's face, leaving a permanent scar. Next day he recounted this to a Church of Scotland minister who was broadcasting a God-slot. The priest listened, then said: "Well, what can ye expect? You called on the Wee Man and he answered you knocking on his door. Only he didnae come to the studio. He made it a wee bit more
* BBC radio station Radio 1 came up with a game called "innuendo bingo" which is basically seeing who can avoid spit-taking faced with some rather out-of-context audio clips. They filmed it and
* BBC Scotland's startup has a clip from a show called "Up For It". Now, this wouldn't be so bad...
* BBC shippers say that while they respect George's decision with regard to the novels, it has no bearing on the television characters.
* BBC suspects a car dealer of having lied about traveling overseas. He sneaks a peak in the man's wallet and sees a Colombian banknote, the final clue he needs to solve the case.
* BBC thanks solely to the commercial channel's ability to offer more money. ITV

also made a fairly high offer, but that was contingent on the production company being able to bring along the presenters and judges... which didn't go over all that well.
* BBC they run a test where they compare different brands of the same product, however the conclusions they draw from these tests are often highly inaccurate. For example, in one episode they tested waterproof plasters by sticking three plasters on each person, with a different brand being used for each, and then having them swim for a set amount of time. The brand which had the most plasters remaining afterwards was deemed the winner, and they tried to use these results to claim that the cheapest brand was the best. However, there were a number of factors they didn't consider. The test group only consisted of five people, so it was unlikely that the results were statistically significant, and no statistical test was carried out to determine whether the results were significant. Even assuming that they were, the people in the test group were all of different ages and may have had different skin types, amounts of body hair, levels of activity when swimming, etc. These factors would have affected the ability of the plasters to stick to the skin. All the members of the group were also male so the results can't be applied to women. There's also the fact that adherence to the skin isn't the only factor which determines the quality of the plaster, you would also want plasters to be absorbent, not damage the skin when removed, promote healing of the wound, etc. Finally the plasters were tested on undamaged skin rather than a wound and may have performed differently when used as intended. So overall, the results of the test are pretty much useless and can't be used to conclude anything at all.
* BBC Three's final ident and wishes the channel good luck before it moved online.
* BBC to a "man" he met at a party. "He" then removes a prosthetic from her trousers.
* BBC took over F1 coverage from Auntie in 2016, it continued to use "The Chain" until introducing a new original theme in 2019.
* BBC TV series Fairy Tales, which presented modernized versions of some old fairy tales, had Charity Wakefield as a tennis player with the stage name Rapunzel, because her hair went down to her thighs (she had her own shampoo line from this, which is why her mother kept it long). She hung it out the window and it even reached down to a balcony below.
* BBC Two was meant to launch on April 20, 1964 at 19:20, but a fire at Battersea Power Station around 18:45 caused a major power outage at Television Centre and most of West London. The only thing BBC Two managed to broadcast that evening was a brief news bulletin from Alexandra Palace, and even then it had to be done again as much of it had been broadcast without sound. The rest of the evening consisted of alternating "BBC 2 will begin shortly" and "Major power failure" cards with occasional apology announcements. By 22:00 the launch had been officially postponed to the next evening, which opened with the continuity presenter blowing out a candle in reference to the power outage.
* BBC was about a group of cleaners who plotted to rob an outstation of the Royal Mint where they worked. The scam involved disabling security cameras whilst notes destined for destruction were stolen from the vault where they awaited incineration. See Real life, below.
* BBC was a crime drama that ran between 1938 and 1968, starring an upper-class private investigator capable of solving the crimes that baffled Scotland Yard.
* BBC was probably supposed to be an ordinary-sized house spider, but the protagonist is a very young boy and in proportion to him it looks much bigger.
* BBC", which goes through almost every children's programme the BBC made in fifty years.
* BBC World in their hotel rooms. This is easy to pull off because the only hotel open to foreigners in Pyongyang is on an island in the Taedong River, and you can't leave without a guide or talk to any North Korean civilians, so no North Koreans can learn about TV from tourists.
* BBC World News, intended for foreign consumption. The most watched news channel on the globe.
* BBC Worldwide were apparently aware of the sizable portion of its fanbase that

just watches the show for the antics of its presenters (as opposed to the reviews and more serious segments), releasing six DVD compilations of just challenges.

* BB Hood outright states that she will never give up killing until every last living creature on Earth is dead.
* B.B. is also present in some films, such as Bobby Boucher, the title character in
* B.B. King's "I Got Some Help I Don't Need" details his suspicions that his wife has been sleeping with, well, just about everyone who comes by their house.
* B.B. King. Started in this decade with his first 2 singles released in 1949.
* BB Senshi Sangokuden. Based on Guan Yu (see below), he's a Gundam with a beard. He makes it work.
* BB Senshi Sangokuden continuity - region names that aren't the same anymore are still referenced i.e. the Nanban region to the south corresponds to Albion. Even character names are sometimes inherited: Moukaku Gundam carries the title of Ashurao from an actual Gundam Ashurao from earlier in the toyline.
* BB Senshi Sangokuden for faction motifs - Shou, represented by Seiryu (the Dragon) have been particularly consistent in sticking dragons on everything. Kyou-I F91 even switches to a dragon motif after leaving Giga, represented by Suzaku (the Phoenix).
* BB Senshi Sangokuden would hand out mid-season upgrades at several different points in time, turning characters into mechas related to their archetypes. Ryuubi Gundam turned from the classic RX-78-2 into the Perfect Gundam, Shiba-I Sazabi evolved into the Nightingale, the list goes on.

* B.C. by Peter Molyneux would have been a game about running a cave man settlement. The game was cancelled in 2004.
* B.C.. Consulting the massive rule book, Peter found a rule that "covers it explicitly," and told the unlucky fellow they had to shoot him.
* B.C.. From then until his 2007 death, many strips took on a religious and philosophical bent, such as a notorious Easter strip featuring a menorah turning

into a cross, and another that was interpreted as a rant against Islam.
* B.C. had a few after Johnny Hart got "born again." One Sunday, a caveman asked God for a sign of His existence. Various events started happening around the caveman, from a rapidly sprouting flower to a volcanic eruption, but he remained oblivious.
* B.C. in a pumpkin patch with Charlie Brown saying "I don't think he's coming, dude."

* B.C.'s Peter ended up on one while trying to circumnavigate the Earth on a raft. He eventually noticed that he could walk home during low tide.
* B.C. strip has a character sitting on a rock, looking at a dot in the distance. The object come closer and closer as we see it is a bird walking. Just as the bird passes the human it looks up at him and says "Bursitis". It then walks away.
* B.C. strip, one of the ants blows up another ant's home. When the other ant asks, "What's the big idea?" the first ant answers, "E = MC Squared."
* B.C.: Strips made during the later Johnny Hart years before his death are filled with Christian references with some generating controversy
* B.C. strip, the Italian Anno Domini and the Amerind Conahonty converse in this way. When asked how they can understand each other, coming as they do from different parts of the world, they explain, "Is universal language. Is broken English."
* B.C., this happens around Thanksgiving, with turkeys trying to persuade the main characters to switch to pork, and the pigs telling them to stick to tradition.
* B.C. this where one character notices a volcano about to erupt, he decides to take and kiss the Cute Chick right as it blows. Turns out to have worked pretty well.
* B.C., Thor has set up this kind of trap. When he hears it fall he goes to open it. He finds the Fat Broad inside, holding the piece of cheese he used as bait.
* B.C., to the point that many papers refused to run some of his strips. After Hart died in 2007, his grandsons and daughter took over and reverted the strip largely to what it had been before.
* B.C. were the Fat Broad is trying to sleep but is woken up by a sudden bright light. Said light turns out to have come from the cave next door that houses a lot of thinkers.

* BDSM, as one form of BDSM, Age Play, which typically uses those titles for the dominant partner, has become increasingly popular. As one Tweet put it, "My kids are gonna have to call me Jim or something, cause you hoes have made Daddy way too sexual."
* BDSM (or just rough sex) run into difficulties with this; it's hard to explain away ("say, these look like whip marks"), and the truth can be very embarrassing. Families and friends can end up conflicted as well. Many professional tops advertise their ability to leave marks or not, as the customer prefers, for just this reason.
* BDSM practitioners refer to non-kinky sex, as well as people who prefer it, as

"vanilla" (after the plainest, most common flavor of ice cream).
* beabadoobee: "Dye It Red" is an anthem about being more confident and happy without your shitty ex.
* beabadoobee: "I Wish I Was Stephen Malkmus" contains a bunch of conflicting emotions about the breakup, alternating between despondent about it ending, happy to be rid of the ex and looking forward to the future, and ending with straight up anger at the ex for not understanding her.
* beabadoobee: Near the end of "I Wish I Was Stephen Malkmus", the singer tells her ex, "Your brain is shit. You're up your butt."
* Beabadoobee's song "Coffee", best known through its sample on Powfu's 2020 hit "Death Bed (Coffee for Your Head)", is a lo-fi indie folk song that is very different from her normal sound, which is noisy guitar-driven indie rock similar to
* beabadoobee's songs, where dying your hair is used as a symbol of becoming a new person and getting over a breakup.
* be a black knight, with some editing of the equipment list. A full set of black armour is on said list, but not marked as "sellable", meaning you won't find it unless you change the relevant flag. The black armour is the strongest and heaviest in the game, and you can wear it while riding the best horse in the game, an armoured charger, which is black.
* Beach Babes 2: Cave Girl Island centerfold. Sola (Tina Hollimon) says about Rock, "You know, for a primitive, he's got a great ass!"
* Beach Blanket Bingo skydive out of an airplane. Later in the film, Sugar mistakenly thinks that Eric von Zipper kidnapping her is another one of these publicity stunts.
* Beach Blanket Bogus", before the pizza is then handed to Tommy, who then opens up the box to see the two cousins hiding inside, before leaving the beachside restaurant. When he opens up the box again, he then discovers that Bogus and Brattus have already eaten the pizza.
* Beach Blanket Bogus" had Bogus attempt to clean out his ear, before using a cotton swab to do so, with the cotton swab going through his left ear and sticking out from his right ear.
* Beach Blanket Bogus" showed Brattus having fun with an organ grinder's pet monkey.
* Beach Boys version of melancholy ballad "The Warmth Of The Sun", so The New Surfsiders did an uptempo, twist-style version of the even more melancholy ballad "Till I Die".
* 'Beach Brawl': Said by Cell before Martha freezes him, and Kerry when Lisa makes a snide comment about Asia and Shawn.
* "Beach Bummed" has Cosmo and Wanda lose their wands on the beach. While they're digging, Cosmo comes across "
* Beach City is based on the many Delaware beach towns the Sugars visited when they were kids.
* Beachcomber columns, this is the chief characteristic of Charlie Suet. He is invariably sacked from any job he gets because he can't resist taking things apart to see how they work, with disastrous consequences.
* Beachcomber, flagship of the Lots Road Power Station, and an attempt by the Government to sell her to Afghanistan. The ship is too waterlogged to burn, is missing vital components such as masts, sails, rudders and most of the hull, and the previous purchasers (Lichtenstein) offered sevenpence but pulled out when they saw what they'd be buying. It's only at the very end that anyone wonders why the Lots Road Power Station ever needed a navy in the first place.
* Beachcombers (387 episodes from 1972-91; longest-running dramatic series in Canada)
* Beachcombers, Nick had to perform a tracheotomy on someone who had collapsed due to an allergic reaction to seafood, causing his throat to swell.
* Beach Episode: An episode taking place at a beach, which will often have the cast wearing swimwear.
* Beach Episode, a trio of boys come hit on Usagi and the girls as Rei and Makoto are checking out guys with a pair of binoculars. The most prominent of the three is

wearing a tiny pair of swim briefs and is introduced crotch-first complete with a "boing!" sound effect.
* Beach Episode dabble in a little of it themselves at the end by barging in on a party that was terrible and destroying the building with a combination of firebending and acrobatics.
* Beach Episode disgusted, just horrified by the thought that their friend has been through so much pain.
* Beach Episode ends with a ghost girl looking out the window to the protagonists. The issue is never mentioned again.
* Beach Episode, Erina Wan starts handing out flyers about how to be safe at the beach, only to discover everyone slipped off while she was talking. She protests that they could have at least read the flyer, before doing a clothing fling, revealing she was wearing a swimsuit under her uniform and runs off to join the others.
* Beach Episode games, the male characters that wear skimpy swim briefs are usually the manliest of the group, but are seen as being a little out of touch especially when the other guys are wearing board shorts:
* Beach Episode in the manga, whereas it's a winter ski trip episode in the anime. As a result, the two are quite different.
* Beach Episode (like the above, usually just an excuse for skimpy swimwear)
* Beach Episode, Mai says, "Sorry for interrupting!" to Takeda and Natsuki.
* Beach Episode risqué, but pay close enough attention and you'll notice she's just being tickled all over with feathers.
* Beach Episode starts with the girls holding an ad for a sunny, crowded beach. Cut to the same beach in the middle of a typhoon.
* Beach Episode that are used to write words like "hemorrhoid", "seal", "fugu" and "dolphin".
* Beach Episode, the admiral of the ship is left buried up to his neck and is utterly left behind after the crew dealt with an abandoned Jovian weapon. When the girl who had it found him, she attempted to keep him around to complete a demented love suicide pact she attempted with Akito earlier.
* Beach Episode, the Blitz Team leaves Jamie buried vertically, then a crab wanders by...
* Beach Episode, the girls wonder if Mai deliberately selected the last round of a competition between Ao and Moe, to see who should have the honour of being counted as Mira's best friend, since the contest ended in what is essentially a tie- Moe jumped off the boat to save Mira, while Ao jumped off to save Moe- resulting in an amicable resolution to the issue. The music swells, creating a heartwarming tone, only to rapidly go out of tune when it turns out Mai is admiring some strata formations and was unlikely to have foreseen this outcome.
* Beach Episode: The show has an episode taking place at the beach, which will often feature the characters wearing swimwear.
* Beach Episode to help Negi and Asuna make up after a fight. They throw Negi in the water and get him attacked by some fake sharks, played by Natsumi and Ku Fei, and have Asuna go save him. The plan fails miserably.
* Beach Episode, Ushio offers her lap to Sumika, who is exhausted from her competition with Tomoe. Sumika certainly enjoys the view from her position.
* Beaches and Basilisks has giant robots powered by a combination of magic and technology. Also, several character carry spellphones, which are magically-enabled cellphones.
* Beaches's satirical song about the — apocryphal — inventor "Otto Titsling", who supposedly invented the brassiere.
* Beachhead, although little more than a background character in the Marvel comic series, became this in
* Beachhead, a single Japanese commander has four times the firepower of a 10-man squad.
* Beachhead is put in charge of a squad of "Rawhides", new recruits still wet behind the ears. General Hawk even points out that he's not worried about the Rawhides surviving combat because "first they need to survive Beachhead." He bawls

them out in full Drill Sergeant Nasty mode, wanting a "stone-cold righteous attention!" Shockingly, he lets one of the recruits get away with calling him "sweetheart" with only a mild admonishing. He is also unimpressed with the Rawhides' creative ways of beating his tests (using a drainpipe to sneak past an obstacle course, using a dog to sniff out a practice bomb), calling them reckless and holding them back from battle (where such thinking could easily get them killed).
* Beach of the War Gods has a massive battle halfway through the film between the village resistance, led by Hsiao-Feng and his band of warriors, against the Japanese buccaneers led by Hashimoto.
* Beach of the War Gods tells the story of a village being ravaged by Japanese pirates on a regular basis, until a heroic warrior and drifter bands together six other warriors to help battle the pirates.
* Beach Party doesn't trust herself not to give in if she's alone with Frankie, so she invites all their friends to stay in the beach house with them. She wants him to see her as a wife, not just another girl, and she doesn't think that will happen unless she saves herself.
* Beach Party: During the surfers' brawl with the bikers, Ava calls Von Zipper "my hero." Dolores says "That does it" and pies her. The brawl quickly devolves into a pie fight.
* Beach Party, Frankie carries Dolores into the beach house, only to trip on one of the guests. Later, Sutwell carries her out of his plane after she gets motion sickness.
* Beach Party is full of attractive people of both sexes in swimsuits.
* Beach Party, Ken buries Deadhead under a sand body that's meant to look like Ava, with huge breasts and seaweed hair. When the real Ava shows up, Ken jumps up in embarrassment.
* Beach Party of him falling off his board before he realizes his mistake. Once it's corrected, he's able to surf successfully.
* Beach Spikers: If the relationship with your partner is high, they might share this gesture after scoring a point.
* Beach Stars, Iruka Nanase has a one of these with Ono Reika in chapter seven. Ono then remarks on her "airbags" on the very next page.
* Beach Stars is heavily implied to have the hots for her club adviser, Kyosuke Honda. While he's fond of her, he tends to keep his distance and treat her like a little sister, much to her chagrin.
* Beach Stars, the main heroine, is a ball of energy in constant motion.
* Beach volleyball players aren't generally shipped, but three-time Olympic gold medalists and superstars of the sport Misty May and Kerri Walsh
* Beachwalker and his underwear, since he's injured to the point of being barely able to move, and repeatedly dressing and undressing him would shift the bandages and aggravate his wounds.
* Beachwalker, it takes him several tries to convince her to actually use it.
* Beachwalker's highly dangerous costar makes his debut tied up, half dead, and with his latest victim lifeless at his feet.
* Beachwalker takes place in the middle of a war between an unnamed army and similarly unnamed rebellion. The protagonist is forced to dodge firefights in the streets of her hometown several times.
* Beachwalker, the homeless titular character and her patient spend the aftermath of an earthquake living together in a dead woman’s basement. Her reluctance to get close to anyone and his severe injuries conspire to preclude any serious sexual tension.
* Beacon Academy is ditch Ruby and rush off with her friends. However, when Ruby finds her way into the school hall where the new students are gathering, Yang has saved her a spot and her friends are nowhere in evidence. Later in the same episode, Ruby tells Yang that being pushed ahead by two years means that, unlike Yang, she didn't get to bring her friends with her to Beacon Academy. However, after this episode, any reference to the two sisters having friends in Signal Academy is never again mentioned, not even the friends of Yang that came with her

to Beacon Academy.
* Beacon can blast sunlight from his hands. He's on a team that hunt creatures of the night.
* Beacon is destroyed but no one ever found her body. This is because she survived and ran off. Ruby was one of the few that didn't believe Blake was dead.
* Beaconsfield miners Todd Russell and Brant Webb did it first, gaining international fame after surviving for a month underground. There was a play planned for the event,
* "Be a Considerate Pet Owner," a man steps in dog poop as part of his run of animal-related bad luck.
* Beacon's uniforms in general are pretty lax. While everyone is given a matching set of black dress clothes (with skirts for the ladies), they also have their own unique personalized outfits that they are expected to wear in battle. Ruby in particular wears her iconic red hooded cloak on top of her uniform.
* Bébé's Kids beat up costumed characters in Funland. The original stand-up routine was about the kids going to Disneyland and attacking Mickey and Donald, but naturally that got changed for the movie.
* Bébé's Kids features a Dozens fight between Robin and Dorthea.
* Bébé's Kids has Robin making this humorous black-themed threat to one of the kids:
* Bébé's Kids in the lead role, but he died before production began and was replaced by Faizon Love. The film still begins with Harris in archived live-action footage performing the sketch.
* Bébé's Kids, is one of the worst to be found on that system. Wretched controls, hideous graphics, dull music, unintelligent yet tough enemies, a two-minute timer... and that's just the first level. It doesn't get better from there.
* Bébé's Kids jokes. The "fight" ends when Robin fires off one that makes Dorthea's friend Vivian crack up.
* Bébé's Kids starts with Robin Harris dating the newly widowed Jameeka, but it turns out he bit off more than he could chew, as he ends up babysitting her friend's incredibly rambunctious kids.
* Bébé's Kids (the infamous SNES game based on the movie of the same name) has this in the haunted house level, as the revolving door type. The added twist is that depending on which side you open the bookcase leads the player to different locations. Though this raises the question of why can't you access both areas since there would have to be a gap in the dividing wall in order for the bookcase to open.
* Bébé's Kids to everyone yet actually being praised as a good guy despite doing nothing good whatsoever.
* Bébé's Kids was "It's animation..." Yes, it even sounds like it trails off. Apparently not even the trailer had faith on the movie.
* Bébé's Kids, who lives in the ghetto, who is at the very least an absentee parent. Leon has a shot, since he's not actually one of the kids, seems to be pretty decent, and his mother seems to give a damn about him but, seriously, everybody else is headed to juvie, if they're lucky. No parents, poor schooling, terrible diet, living in a bad neighborhood? Not exactly a recipe for success.
* Bécassine). However, it was deeply unpopular in one region of France: Brittany. You see, Bécassine was supposed to be Breton, but she didn't really act like a Breton woman; where the portrayal of her wasn't stereotypical, it was ludicrously off-the-mark. The comic ended up being so hated in Brittany that when a Breton man in Paris saw a giant statue of her, he destroyed it.
* Bécassine is an icon, one of the oldest comics around. But even though she is easily recognizable in France, most people of later generations have likely never read any of her stories and she is unknown in the rest of the world.
* Bécassine was in continuous publication from 1905-62. The character is still used in advertising.
* Béla and Márta Károlyi, who formed a legendary coaching team, first in communist Romania and later in the U.S., from the mid-1960s until

Béla retired in 1997. Márta carried on solo until retiring after the 2016 Olympics.
* Béla Bartók: Collected Eastern European, Northern African, Chinese and Balinese music and referenced these traditional sounds in his own music by keeping the raw pure primitive sound intact.
* Béla Bartók. Composed his masterpiece "Concerto For Orchestra" and then died in 1945.
* Béla Bartók: Composed "Music for Strings, Percussion and Celesta"" (1936).
* Béla Bartók: focused on folk music instead of traditional tonality.
* Béla Bartók's Concerto for Orchestra, movement IV, "Intermezzo Interotto", begins with a beautiful, flowing melody that is interrupted partway through with a mocking parody of a theme from Shostakovich's Leningrad Symphony, the rendering of which is hilariously insipid. Eventually the interruption putters out and the original theme resumes.
* Béla I of Hungary, who wasn't too fat, died when his throne collapsed under his weight.
* Bérénice Bejo was nominated for Best Supporting Actress by multiple awards shows for
* Bérénice dramatize the same historical incident: the new Roman emperor Titus must renounce his love for the Judaean princess Berenice to satisfy the Roman people's disapproval of her, and for the good of Rome.
* Bérénice is the only tragic play by Jean Racine where all the protagonists live through it. The end where the lovers have to live apart still manages to be depressing.
* Beadle Bamford snaps the neck of a bird Anthony wanted to give to Johanna, sends her to Fogg's Asylum on Judge Turpin's orders, and was responsible for the arrest and transportation of Sweeney himself back when he was Benjamin Barker. And Judge Turpin, the main target of Sweeney's vengeance, is an even bigger bastard, with his creepy lust toward both Sweeney's wife and his daughter kicking off the plot in earnest, as well as doing things like sentencing an eight-year-old boy to death by hanging while not giving a blessed damn about his actual guilt or innocence.
* Beadles About had a famous and very elaborate hoax involving dozens of actors and extensive special effects to convince a woman that an alien had landed in her back yard. On finally seeing the alien emerge from the saucer, her first words to what she genuinely believed to be an alien were, brilliantly, "Do you want a cup of tea?"
* Beagle Boys" that sums up their usual bumbling, and things get worse when the police arrive on the scene...
* "Beagle" — according to creator Charles M. Schulz, Snoopy is a beagle because it's a funny word.
* Beagles have explosive population growth, and as a result even though they're sentient never advanced beyond basic metallurgy because every few generations their entire Earth descends into warfare. They rely predominantly on scent, so their buildings are visually bare. Because there's so many of them they view life as cheap, and see an honourable death as much more important. Embassadors are given the honour of a noble death once they've done what they needed to do.
* Beaker was brought in as a lab assistant for Dr Bunsen Honeydew to test his inventions on. They invariably went wrong. Over time he began to be used in more skits outside of Muppet Labs, which usually also involved him getting hurt somehow, even if he was the only one taking part in the skit. He seems to be one of the more popular Muppets, judging by how frequently he is used (and tormented) in the
* Beakman's World, all of the Famous Dead Guys (and girls!) looked like Beakman, or Lester, or Josie/Liza/Phoebe. Except Beakmom. She looked like Edith Bunker.
* Beakman's World, Beakman can always find the really dangerous stuff in the cabinet marked REALLY DANGEROUS STUFF.
* Beakman's World delights in old-school Parental Bonus references, which most frequently pop up in the Beakmania introduction, where every dance referenced by Beakman is an actual dance.

* Beakman's World demonstrated the "bowling ball pendulum" experiment from real life with way too many rhinoplasty jokes to be a sane demonstration.
* Beakman's World full on loved this, to the point where everything (and everyone, especially rats) that fell to the ground was given a crash, complete with shake.
* Beakman's World has Art's Diner, a section of the show that takes place in the titular restaurant, managed by a cook with questionable hygiene named Art Burn. The objective of the place is showing experiments that can be done with common kitchen ingredients.
* Beakman's World has several instances of this. For instance, in one scene he's watering a plant, and from the camera angle, it looks like he's watering it, um, the natural way. In comes Beakman, who assumes what the viewer does, but when Lester turns to answer him, we see he's holding a watering can.
* Beakman's World. Imagine his delight when they finally got to discuss flatulence!
* Beakman's World, in a Meekman segment, Meekman makes a sarcastic joke at the doctor's expense. The doctor laughs for a second, then seriously tells him, "Don't make me laugh."
* Beakman's World, lime green labcoat, literal lab rat... you wonder what Beakman's done to his assistants. Especially Phoebe...
* Beakman's World: Normally when both Beakman and Lester are dealing with a problem it's Beakman who does the explanation. However, there are several times across the series when it's Lester the one who explains the solution to that particular problem. Subverted in that Beakman doesn't get annoyed himself but asks Lester how he knew about the solution.
* Beakman's World removes all mention of the mailing address that kids used to send in science questions, which could make new viewers wonder where all those letters they get are coming from.
* Beakman's World (the one with Phoebe), most segments would devolve into at least one example on the subject matter at hand. Example: Lester describes his breakup with Wanda the Cow: "That honeyMOOOOOOOOOOn is over! I milked the relationship for all it was worth! I don't know what her beef was! One day she just put me out to pasture! The whole thing was an udder disaster!" (And this is tame compared to some of the other ones...)
* Beakman's World threw one in as a gag when discussing electrical plugs:
* Beakman's World was able to use the fact that Senta Moses is trained in martial arts for a segment on the science behind breaking boards.
* Beakman's World when they ran the series in 2000. And the Netflix version also leaves them off, what with no commercials to be cutting to.
* Beakman's World, which ran up until the creator's passing in 2016, long after the show was over.
* Beale ciphers are a trio of coded documents that supposedly contain the location, contents, and beneficiaries of a hidden treasure buried somewhere in Bedford County, Virginia. Only the second one, the contents, has been deciphered, but an analysis of the text suggests they may be hoaxes. That hasn't stopped people from (illegally) digging up the county looking for it. To date, no one's found any treasure, but the cops have found plenty of fools.
* Be All My Sins: Natalie is a somewhat reluctant Chaos cultist who keeps getting blackout drunk with a Daemonette or hopped up on Warp Magic and waking up with bits of human in her mouth. Her mentor gives her no small amount of teasing over it, including arranging all manner of circumstances for her to unknowingly eat people or deliberately misunderstanding conversations as confessions of cannibalism.
* Be All My Sins Remembered: A person doesn't want to be remembered as flawless and wishes for everyone to remember the bad things they've done as well as the good things.
* Be All My Sins Remembered: You feel unworthy of praise due to past misdeeds.
* Be All My Sins setting, and joins a chaos cult within the first fifteen minutes to survive.
* Be All My Sins She immediately offers her devotion to Slaanesh in order to live, then has to undertake a human sacrifice to prove her commitment, and from there it's pretty much a head-first dive into drugs, cannibalism, dark rituals and

murder.

* Beam Spam but they can also combine into a chain of three rectangular frames that together fire a single crazy powerful shot with a maximum range in the tens of thousands of kilometres.
* Beam Spam may no longer be an option for some designs as exceeding power availability causes reduction in rate of fire. This means that kinetic weapons, which require significantly less power, are once again an attractive option, although the new damage spread system shows that lasers offer better penetration than mass drivers. Also, kinetics have their own rate limiting factor, Supply. In the end the best way is still to make a balance of both.
* Beam Spam on Piccolo, threw a mountain at Goku using his mind and imprisoned Goku in an golden sphere of energy and then toyed around with like a soccer ball and made Krillin implode from the inside out without touching him.

* Bean Café sketch, where Tom Hanks is the proprietor of a café that sells nothing but beans. The entire premise of the sketch is that it neatly avoids every single fart-joke it sets up. As the old rhyme goes "Beans, beans, good for the heart. Beans, beans, great for your heart!"

* Bean: David turns on the shower and then sits on his bed for a while to contemplate his worries. When he enters the shower, he finds that Mr. Bean decided to take one in the meantime. They both freak out, but David is forced to answer the phone while all this is happening. Unfortunately for him, Bean answers it first and when the caller wants David, he cheerfully states that "yes, he's here in the shower with me!".
* Bean ends with an after-the-credits gag of Mr. Bean sitting in a cinema, saying that he stays after the credits as well.
* Bean, he tries to restore it by drawing a crude face in its place with a marker pen.
* Beanie Babies either the poem is in first-person, or it just manages to get to four lines without using a pronoun.
* Beanie Babies even stated that said delivery people had to wear tags that said "Please Don't Ask If We Have Beanie Babies" just so they wouldn't get harassed.
* Beanie Babies lines (Pillow Pals, Attic Treasures, Beanie Buddies, etc.) are also relatively unknown.
* Beanie Babies of the Princess Diana memorial bear is an insanely valuable rarity selling for six- or seven-figure sums.
* Beanie Babies run the gamut from cartoony names like "Pinchers the Lobster" or "Squealer the Pig" to common names like "Erin" (an Irish bear), "Scottie" (a Scottish terrier), etc.
* Beanie Babies. Some Teenie Beanies were even given diminutive names of their larger counterparts; e.g., the Teenie version of Ants the Anteater was called "Antsy."
* Beanie Babies that these unusual doll names were released together the very same week the president took office.
* Beanie Babies. The collector's market was absolutely ludicrous, with many housewives paying thousands of dollars just to get some obscure, retired Beanie or a rare variant. (For instance, the dark-blue variant of Peanut the Elephant once fetched $5,000 — compare to the roughly $5 that probably even most kids could afford for the more common ones.) There was also a sub-market of collector related paraphernalia, such as special plastic boxes to protect the Beanies themselves, clamshells for their tags, entire books and magazines dedicated to the fandom, etc.
* Beanie Babies to no longer post Beanies themed around American patriotism following the murder of George Floyd and increased tension surrounding the American justice system.
* Beanie Babies were at the height of their popularity, there were a ton of counterfeits of the official toys and cheap imitations trying to capitalize on the craze.
* Beanie Baby Erin. Paired up with the Princess Diana bear. Green, as opposed to Diana's more feminine purple. Especially if you were unaware of the differences between Aaron and Erin (phonetically identical in some varieties of English) as a child.
* Beanie Baby Frankenteddy is made to look like a greenish bear with multiple pieces of fabric making up his body. Since he had several color variations, the fake stitches on his body also vary, but each version has a few scattered around his body.
* Be an Interplanetary Spy is an interesting variation where you have to solve puzzles (analogues to your current situation) instead of simply making a choice. Essentially a multiple-choice visual logic test with a plot.
* Bean movie, Bean, having accidentally defaced Whistler's Mother, locks the door and drags a plant pot in front of it to keep out the curator. A couple of seconds later, the curator enters via another door, right next to the one Bean locked.
* Bean, Mr. Bean sneaks into an art museum to swap paintings of "Whistler's Mother". To keep the security guard busy, he pours laxative onto the man's coffee and swaps the bathroom keys. The guard makes a desperate attempt to use the bathroom.
* Bean "novelisation"), "all you have to do is put the round things on someone's chest, yell 'Clear!' and then they come back to life!... But I thought I'd better

try the round things on my chest first."—which launches him through the air to land on a comatose patient and accidentally revive them. The admittedly residual electrical current in Mr. Bean might have helped there but it's still crazy.
* Beano annual. The characters have hired a boat to go to Australia and when they go to see it, they are shown a rather small battered wooden boat parked next to an ocean liner. They then use the small boat as a ladder to get the liner while the man giving them the boat shouts at them that it's the small one they're getting (he is ignored).
* Bean of the Mr. Bean show is "Ecce Homo", the same name as the painting.
* Beanotown Battle: Book 2 proud of himself). Mrs. Creecher says that it took all afternoon to dig her out.
* "beanstalks". They're used on most developed worlds as a cheap method of accessing space. It's also mentioned that the breaking of a beanstalk would cause significant damage, but this has rarely happened in the history of the setting.
* Bean, the biker gave the bird to Mr. Bean while taking a picture of him and giving him a thumbs up from the car. Unaware of the gesture, Mr. Bean gives the bird to everyone he passes by.
* Bean, the title character comes to falsely believe that the middle finger extended is a friendly greeting in the U.S.
* Bean: Whistler's Mother. Before he destroys that, he's at the family's house, and two priceless valuables are introduced right after one another. Within a couple minutes, Bean sends the glass swan flying across the room into the painting, destroying them both.
* Beany and Cecil, Captain Huffenpuff would show a map of the team's latest adventure. The focal points of the map are labeled with some outrageous puns.
* Beany and Cecil cartoon "DJ's Disappearing Act" (1988 series) a huge fight breaks out because Dishonest John had stolen a rare diamond, Uncle Captain asks Cecil "What's that??" and Cecil responds "The biggest fight cloud in the history of Saturday morning cartoons!"
* Beany and Cecil cartoon had Cecil and his antagonist stopping for an impromptu commercial for "Herrings...the only smokes gefiltered to my distaste!"
* Beany and Cecil episode "Beany and Cecil meets the Invisible Man", Edgar Allen Po Shadow punishes the titular Invisible Man for scaring away Beany, Cecil and Captain Huffenpuff before he could sell them his house by giving him a spanking.
* Beany and Cecil episode "Beany Blows His Top", Beany asks his uncle the middle-aged Captain Horatio Huffenpuff if he wants to join them in visiting their respective girlfriends, he tells him he'd rather catch up on sleep, as soon as Beany leaves Huffenpuff pulls down a nightshade on his window, replaces the picture of his middle-aged girlfriend with a young pinup model, and takes out a playboy magazine and looks at the centerfold commenting on her body. Dishonest John happened to be spying on Huffenpuff and can't help but remark about it.
* Beany and Cecil episode "Beany Meets the Monstrous Monster" has the titular Monstrous Monster see Captain Huffenpuff's boat the Leakin' Lena as an ice cream sundae, with Cecil being the spoon.
* Beany and Cecil episode "Rat Race for Space" has Little Ace cry for his mommy twice.
* Beany and Cecil exchange, referencing a few other incidental characters in the process...
* Beany and Cecil featured this trope at the end of "Framed Freep", where Dishonest John's punishment is being treated like a baby by the Freep, complete with being forced to wear a diaper and a bonnet.
* Beany and Cecil: "Grime Doesn't Pay" has Dishonest John being sent to jail. When the warden asks how long his sentence will last, Dishonest John tells him that he is to serve 199 years. The warden then quips that at least Dishonest John didn't get life.
* Beany and Cecil have a giant mechanical hand come out and squeeze the rocket out of a banana peel.
* Beany and Cecil: in "The Courtship of Cecilia" (from the 1988 reboot), Cecil blasts off into space after drinking a glass of lemonade spiked with hot sauce. A

shot of Mission Control celebrating is shown after Cecil successfully separated.
* Beany and Cecil led our heroes and Dishonest John on a quest to find a Mystic Menu, which provided whatever delicacy the wisher asked for. In the meantime, Captain Huffenpuff and Crowy have to consume vast quantities of food dishes to keep from angering the native waitresses as the Captain's face is featured on the natives' stone idol, and they take him to be their god.
* Beany and Cecil revival (1988) had the crew on a tribal island looking for the Golden Menu, with which its possessor can order any food desired. The island is populated by a tribe of waitresses waiting for the arrival of the Great Customer, who turns out to be Captain Huffenpuff who is a dead ringer for the tribe's idol. The Captain must eat everything the waitresses serve him lest he offends them.
* Beany and Cecil says it was because of unapproved material and missed deadlines.
* Beany and Cecil surely had one of the very first instances with "Elfis" in the episode "So What and the Seven Whatnots".
* Beany and Cecil: "The Wildman of Wildsville" has the title character painting a test pattern on Cecil's face. He turns one of Cecil's nostrils like a TV control knob; Cecil's eyes conjoin and form the CBS eye.
* Be A Perfect Person in Just Three Days! by Stephen Manes, the main character takes a peek at the last page of the eponymous self-help book he finds in the school library... and finds only a paragraph scolding him for trying to peek at the end.
* Be a Perfect Person in Just Three Days!. The main character, when questioned about it by his parents, claims that they're doing a school play about nutrition and he's one of the vegetables, prompting his older sister to remark that it's a good thing he isn't playing the watermelon or he'd be falling over.
* be a prostitute. This is deliberate/ In other words, the law bends over backwards to try to stop the practice and still avoid criminalizing the vulnerable individuals at the center of it. However the law has a major flaw in that it makes it illegal for two or more prostitutes to work in the same place as that makes it a brothel, forcing them to work alone increasing their vulnerability.

* Beard of Evil: The coolest villains will rock quite a wicked goatee.
* Beard of Sorrow shorter, and the Rooters aren't exactly moral paragons.
* Beardo reveals in his audition tape that he wanted to be on the show to make friends. Unfortunately, considering that he was the first contestant eliminated after annoying all of his teammates, this didn't work.
* bearer bonds from a bank; the man was killed when he came in demanding his share of the loot, but to Disher's fogged mind, it sounded like the name of the baseball player.
* Bear Feat, Henry, who is training his family to be circus bears, attempts a high-dive routine. Unfortunately, Junyer, who is eating salted crackers, drinks all the water from the tank before his father lands.
* Bear Fukuda, the resident street fighter of Next Door Project "El Dorado", which went on to become "Secret Base".
* Bearhead, Bearhead always follows orders exactly, which proves to be a big disadvantage to Madame Hexaba, who keeps giving ones he can misinterpret (e.g., to watch a lock rather than to watch the treasure house it's securing).
* Bearheart: A woman's breast cancer gets cured when Saint Plumero lays his hands on the affected area.
* bear he has spent a year training for murder, who has a penchant for heroic

animal abuse. Nobody ever said it made sense.
* Bear Holding A Shark. Really just a cardboard standee that pops out from behind Strong Bad's fence, but a valid meta-character all the same.
* Bear Hug away. On his return, Po's dad tries to glomp him, but Po's a bit too big and Mr. Ping just bounces off.
* Bear Hug would let Ted lick melted ice cream off of his feet when it was living under the Hart porch.
* Bear-hunting was a favourite pastime of medieval Russian princes. Subverted in that, with armed retainers, clever tactics, and special-issue anti-bear spears (special
* Bearing an Hourglass, Gawain uses the phrase "man does, woman is" in a conversation with Norton, who doesn't appear to disagree, implying this is at least a somewhat common belief in their culture.
* Bearing an Hourglass invented for human beings ("Multi-Appendaged Numbskull", or possibly something nastier).
* Bearing an Hourglass, Norton is forced to reverse the course of time for the entire world. While most people don't notice, anyone close to Norton becomes aware that they're doing everything backward... including one unfortunate man who'd just used the toilet. Despite his struggles to stop himself, the man backs into the bathroom and shuts the door, through which sounds of horror are heard, and the rather confused-looking dog that was behind a nearby bush as well.
* Bearing an Hourglass: Orlene, a beautiful and intelligent woman, is technically married to a ghost named Gawain, who needs to carry on his family line. So the ghost tries constantly to set her up with suitors, to produce the heir he needs so he can pass on. However, she has never seen and cannot see Gawain.
* Bear in mind also the symbolic meaning of the serpent to the (almost invariably) Western, Christian reader of the original...
* bear in mind, it's set in a world where the two major powers are 1) a corrupt government that overtaxes all its citizens to support the lavish lifestyle of a few wealthy aristocrats, and 2) a handful of bloodthirsty psychopaths who kill anyone they don't like and could overthrow the government if they didn't hate each other so much. In a manga where the main character is friends with a talking reindeer and a singing skeleton.

* Bear in the Big Blue House aired in a number of non-US markets for around three years before finally being seen in the US on Playhouse Disney in 2006.
* Bear in the Big Blue House aired in the United States long after Lynne Thigpen, the voice of Luna, had died.
* Bear in the Big Blue House, almost certainly true for all of the other main kid characters on the show. Bear seems to be raising them all and in one episode remembers taking care of Treelo when he was a baby. It is never, ever talked about, though.
* Bear in the Big Blue House, a new song for Tutter's birthday was made up called "Happy, Happy Birthday."
* Bear in the Big Blue House, at the Woodland Valley Mall, who was actually just regular character Doc Hogg dressed up.
* Bear in the Big Blue House, Bear has a bunch of strings on his paws. One is to remind him to tell the kids of the Big Blue House that they're going to the fair, another is to remember to pack snacks, another to get a basket to put them in, and one to remember to clean up the house before they leave.
* Bear in the Big Blue House ended, Bear and Luna still sang that the moon, the

Bear and the Big Blue House would be waiting for you to come and play, and Bear still invited viewers to come back. Though there was internal homage on this one, with the episode being titled "This Is Your Life, Bear" and featuring Bear winning a special vacation.
* Bear in the Big Blue House episode "Big Blue Home of the Brave" was dedicated to Dean Brent McCune Jr., a young fan who had died of SIDS (Sudden Infant Death Syndrome).
* Bear in the Big Blue House episode, "The Yard Sale", Doc Hogg reveals that he is the great imperial boar of the Woodland Valley chapter of the "Swiners". At the end of the episode, he makes Bear and his friends honorary Swiners as a reward for raising enough charity money to build new homes for the muskrats through their yard sale.
* Bear in the Big Blue House episode "When You've Gotta Go." Ojo has an accident and Bear cleans up, telling her that accidents could happen to everyone.
* Bear in the Big Blue House, following the pageant, Bear and the others smell something burning.
* Bear in the Big Blue House from Bear's performer Noel MacNeal, is raised by a single mother who lets her hang out at Bear's house when she's not home as a form of free babysitting). Bear seems to be raising them all and in one episode remembers taking care of Treelo when he was a baby. It is never, ever talked about, though.
* Bear in the Big Blue House had a live show called "Surprise Party", which adapted "Mouse Party". It was also created by VEE Entertainment.
* Bear in the Big Blue House. However, the executives at Playhouse Disney were against this as the show was the block's highest-rated series, resulting in three more seasons being produced to bring up the total to 118 episodes.
* Bear in the Big Blue House: In "Love is All You Need", Tutter and Ojo get into a feud when Tutter accidentally breaks Ojo's toy airplane after trying to ride it. The two make up near the end.
* Bear in the Big Blue House installment "Potty Time with Bear" pretty much operated on this when it wasn't offering practical information on children's potty training.
* Bear in the Big Blue House, Ojo holds the "Ojolympics" in an episode by the same name.
* Bear in the Big Blue House) particularly like the titular character - a huge, fluffy, huggable bear who's technically also a fursuit character - while otter fans like Pip & Pop.
* Bear in the Big Blue House sniffs the viewer, he will compare their smell to a different object every episode. In some episodes, he sings about it instead.
* Bear in the Big Blue House, sometimes it would make a different noise, such as meowing or quacking.
* Bear in the Big Blue House teaches kids how to solve problems and develop social skills.
* Bear in the Big Blue House, the episode in which the Woodland Valley library was damaged by a storm was loosely inspired by 9/11 and the idea of overcoming disastrous events in the wake of that. Also, the community and community helpers focus of the fourth season, in general, was inspired by this.
* Bear in the Big Blue House, the mice at Tutter's school all do the "Mumble Mambo," but Tutter is uncomfortable with it and can't seem to get into it.
* Bear in the Big Blue House there's a living shadow character. She falls under the friendly/mischievous category.
* Bear in the Big Blue House: Tutter does in the book version of "When You've Got To Go." The book even describes him as "dancing from side to side."
* Bear in the Big Blue House, Tutter the blue mouse tends to do this sometimes. For example, in "A Winter's Nap"...
* Bear in the Big Blue House, Tutter the mouse imagines being homeless and carrying his possessions in one of these.
* Bear in the Big Blue House was an absolute master of these in the form of Eye Takes in response to the craziness that sometimes occurred around him.

* Bear in the Big Blue House was at Stage 4 during its run on Playhouse Disney. Now it's at Stage 6a.
* Bear in the Big Blue House was shown at Lynne Thigpen's funeral before airing on TV.
* Bear in the Big Blue House what people are saying. Now how could this go wrong?
* Bear in the Big Blue House, when Bear states to the viewer that the best part of his kitchen his table where he can eat a mess of cooked and buttered string beans, Tutter tells him with all due respect, "With all due respect, Bear," that he's missing the best things about his kitchen.
* Bear in the Big Blue House," who helps them to make musical "combustions."
* Bear is partial to berries (to the point of loving triple-berry pie), honey and cooked-and-buttered string beans.
* Bearkats seems to be the preferred spelling for Texas high schools, probably inspired by the Sam Houston State University Bearkats, who adopted that name in 1923.
* Bearmageddon, Ethan sold cameo appearances in the comic to interested readers, for crowd shots of people getting mauled by bears. More expensive cameos involved appearing in the foreground and saying one or two lines before they went out.
* Bearmageddon is essentially "Everything's Worse With Bears: The Webcomic".
* bear meat, loves him dearly and aside from seeing his gun as a real-life person, the Heavy isn't as mentally damaged as the others.
* Bear Reaver bear made it more dangerous (mostly because it was harder to see coming).

* Bears Are Bad News (2 Kings 2) when a group of children mocked Elisha for his baldness, he cursed them, whereupon two bears came out of a forest to maul them.
* Bears Are Bad News: A bear who is dangerous and hostile vs. a bear who is amiable or amusing.
* Bears Are Bad News, but no bears are in the movie, which is about a little league team.
* Bears Are Bad News — Add terror to your narrative with powerful bears!
* Bears Are Bad News: The fishermen briefly have a bear scare, but it's just Steve using the bathroom. Later, Stantin and Knox run into a real bear. They try to just casually walk away, but it chases them for a distance.
* Bears are called "giantfurs". They're scary enough to make Alpha terrified. According to him, even wolves fear bears.
* Bears are capturable as pets in the tutorial area of prophecies, although it's difficult and having one is considered a status symbol. They're also capturable in the main game but then are considered worse than common pets, because they have a special attack that does nothing but slow their attack speed. In the "Presearing" (tutorial) area of Prophecies, the capturable bear is the black bear (and they have an on-command skill to just interrupt said capture.) Brown bears and polar bears are available as common pets in Prophecies and Eye of the North, and there is a special variant of the polar bear known as a Jingle Bear available as a reward for a holiday quest in Eye of the North.
* Bears are once again some of the most hated and feared enemies in the game, possibly even more so than
* bears a striking resemblance to a colossal sea serpent in silhouette. Cannae remember whether it's true or not, but apparently it scared off a shipful of Viking raiders, who later got shipwrecked in Swansea Bay.
* Bears can also be tamed by hunters (although like the druid form, they are more suited for tanking than damage).
* Bearskin that if he can stay dirty and unkept for a certain amount of years he will become infinitely rich.
* Bearskin, the hero must wear the bearskin for seven years. Also neither bathe nor cut his hair nor pray for that time.
* Bearskin, the hero tells the youngest daughter that he will leave and return in three years to claim her hand in marriage (if he doesn't, he's dead and she's

free), and when a strange, handsome man shows up, she ignores him until he proves he's the same as the hideous man she promised to marry.
* Bearskin, the youngest daughter agrees to marry the frightful-looking hero because only a good man would have paid off a total stranger's debts.
* Bearskin" the young soldier frees a man from debtors prison, and the man promises the hand of one of his three daughters in gratitude. The two eldest refuse him, disgusted by his appearance, but the third agrees, believing him to be a good man. He promises to return in three years to the day to marry her, or else he will be dead and she will be free to marry whomever she pleases. However, he returns a day late having taken the time to dress himself as a rich and important man, and the family does not recognize him. He again offers to marry one of the man's daughters, the two eldest volunteer, but the youngest refuses, as she has gone into mourning.

* Bears love lots of things The declaration on the not-bear's T-shirt is very comforting.
* Bears, polar bears and dire bears (identified here as cave bears or short-faced bears from
* Bear Story is about a bear who is forcibly kidnapped from his family and enslaved to a circus. The whole cartoon is an allegory for how families were separated from each other by the kidnappings and disappearances perpetrated in Chile by the dictatorial regime of Augusto Pinochet. The bear is inspired by the story of the director's grandfather, who was snatched away from his family and eventually exiled.
* Bear Story: The animals are kidnapped from their homes and made slaves at a circus, driven by whip-cracking circus performers.
* "Bear" - the Tu-95 strategic bomber (Bear-H in its current form) or the Tu-142 anti-submarine plane the subs can hear coming ("Bear-F" in that form), with other variants. Legend has it a Soviet pilot came up with the name, since the bear is the symbol of Russia. Another version has the Russians learning that reporting name from the NATO pilots, and liking it enough to adopt it. In the early years of the Cold War, Bears were armed with nuclear weapons in much the same role as the B-52 Stratofortress.
* Bear, though he does have moments when he's the voice of reason, particularly when Mama loses her temper.
* bear tranquilizer dart. He actually pulls out the dart and drinks the remaining sedative before passing out.
* Bear Trap: A character is caught in a sharp trap activated by stepping on it.
* Bear Trap a hunter lost in a blizzard takes refuge from the storm in a shed. He is able to sense someone else in the shed, whom he offers to share his kill with. The person accepts with gusto. In the morning, he sees that his companion was a man whose foot was caught in a bear trap, and, unable to free himself, starved to death. The hunter can explain the conversation as stress, but the dislodged tooth stuck in the half-eaten rabbit is a little harder to explain...
* Bear Versus Zombies when Bear scares Jack the rabbit's children, prompting the entire survival group to crash through each and every window in the house one at a time to attack Bear, much to Jack's dismay, and ending in Bear leaving by crashing through the wall in disgust. Despite the fact the front door was open.
* Bear With Me is solved by picking a lock with a rusty nail. Your companion complains that this is lazy writing.
* Bear With Me: Most of the characters aside from Amber, her family, and the Red Man seem to be this.
* "Bear with me," said the shop assistant. "Bare with me," said the prostitute. "Bear's with me," said the zookeeper.
* Bear With Me version of a Noir city, everything is black and white and it always rains, the local politicians are corrupt and the police are incompetent.
* Beary Funny than scary. The Gang themselves were skeptical that there was such a creature as "just a bear" and suggested that perhaps it was another type of creature, such as a platypus-bear, skunk-bear, armadillo-bear, or gopher-bear. But

no, he's just... a bear.
* Beary) to do difficult chores by himself to save money, such as working on the pipes when his wife would rather call a plumber.
* BearZerkers. There's a coffin on the left, and a mausoleum on the right.
* Be as abusive toward your core clientele as you can. Engage in deceptive advertising—not the sleazy kind that makes them think your product is great when it isn't, but rather irrationally
* Bea's mother gets very little characterisation beyond Mae drunkenly sobbing about how nice she was. Her death is mostly what forced Bea to grow up much faster than
* Beast (2017): Moll's life, to an extent. She's forced to act as a caretaker for her father - who has dementia - and as a babysitter to her younger cousin in a beautiful country home. Her mother is extremely strict and controlling and is irritated with her for sneaking out to go dancing, where she meets a handsome stranger who offers her a life of passion and freedom.
* Beast and Beauty: A couple involving a beautiful girl and a horrifically inhuman male.
* Beast and Beauty: A couple involving a beautiful girl and a monstrous man (literal or not).
* Beast and Beauty: A monster (or equivalent being) is romantically paired with a kind and attractive person who brings out the best in them.
* Beast and Beauty: ...and many other subtropes thereof, having a woman that must be hot and a man that must be fugly.
* Beastars after rescuing the latter from the Shishi Gumi. It was because it was very late that the last train has departed, and they have no choice but to stay in one for the night.
* Beastars a Giraffe girl is said to not be able to look at herself because her own coat triggers her severe trypophobia.
* Beastars. And before that, in order to understand what it is like to take a life, Legosi consumes a live insect and then has a conversation with the insect's spirit, who isn't bothered by the fact that Legosi ate them. It is also stated that sea creatures have no fear of getting eaten because they believe in reincarnation.
* Beastars, as well as having to decide how they want to fit in, or even how they want to transgress the rules of the society they exist in, like the fact that most main characters start realizing how their romantic preferences are taboo for the world at large, most notably, the romance between the carnivore Legosi and the herbivore Haru.
* Beastars can have this. Legoshi's mother Leano was a komodo dragon/wolf hybrid and struggled with this for most of her life, until she killed herself once she started losing her fur and became scaly as her reptile heritage began to take over. Hybrids of carnivores and herbivores have it even worse, as shown by Melon whose leopard/gazelle genetics give him a complete loss of taste, an inability to digest meat, shunning away from large predator-species by default, and the involuntarily desire to utterly slaughter any herbivore he lays his eyes upon.
* Beastars. Granted, a fanfics of the ship are known to also run with a redemption arc for Melon.
* Beastars, Haru (3'4.8) the bunny stands at the height of Legosi (6'2) the wolf's waist.
* Beastars has Legosi having finally decided he wasn't in fact in love with Haru at all, spot her clandestinely meeting with her boyfriend and immediately realizing that he is in fact love with her.
* Beastars has the Carni-Herbi War that happened about 100 years prior to the setting of the story and massively shaped the modern society, supposedly being the source of all animosity between the two sides, but the exact specifics of what happened are kept a secret to the general public.
* Beastars have a shared fandom being considered Netflix's furry anime triad.
* Beastars), indicating that she is at least willing to talk about her life in manga format.
* Beastars in meat from hospitals and funeral homes, and extremely desperate,

impoverished herbivores sometimes sell their own body parts.
* Beastars is more mature than the average third year student especially in regards to relationships and intimacy. As Juno puts it.
* Beastars, Legosi closes a sliding door on his tail while excusing himself from Haru's gardening shed after the rabbit tried to seduce him. He was completely shocked by the act, something that was second nature to Haru.
* Beastars, Legosi has to prove to himself and the world that he is more than his predator urges.
* Beastars: Legosi rushing to track down and save Haru from lion gangsters bent on feeding her to their boss. He has no idea how to pinpoint her location, is utterly outnumbered and outpowered once he does, and yet he doesn't hesitate to act even for a moment. Even Gouhin, who was wary of Legosi's intentions due to thinking he mistakes predatory urges for love, is impressed.
* Beastars lived together for decades and even had a daughter, but due to laws prohibiting interspecies marriage never were able to tie the knot. Even once those laws were lifted they still couldn't get married due to Gosha being a poisonous komodo dragon and Toki being a wolf, due to the danger he could pose to her due to his natural poison.
* Beastars situation shortly after and has to hide from the police until his fur goes back to normal so they won't recognize him.
* Beastars, the bullies suddenly freak out and run away. Haru thinks she was the one who scared them off, until she realizes her wolf classmate Legosi is standing behind her.
* Beastars: The identity of Tem's killer is considered this, because in the lead up to the reveal, the investigation has clearly eliminated almost every other possible suspect. The killer is a carnivore male in the drama club, and in the fight with him, Legosi realizes he's extremely strong. That alone excludes most characters since Legosi is noted to be a very strong fighter, and the manga actually blatantly spells this out by having the killer show that he's much stronger than the other bigger members of the club.
* Beastars use the carnivore/herbivore dichotomy as a metaphor for race relations.
* Beastars: We learn that after a war in the past between carnivores and herbivores, there were experiments to genetically alter carnivorous species into more docile creatures. Jack, the main character's best friend, as a Labrador, is the result of such experiments. He finds that he tends to be more intelligent than other natural carnivores and less aggressive. It led him to be bullied by other natural predators.
* Beastars, we learn that Louis and Haru are seeing each other covertly.
* Beastars when Haru first tries to seduce Legosi. When she began to disrobe him, he starts sweating excessively, wondering if she was engaged in a ritual typical of small animals. It was only after she began to pull down his pants that he realized she wanted to have sex with him, and he grabbed his pants back up.
* Beastars: While the final arc is at least not hundreds of chapters long, it is much longer than any other arc in the series, and gives extremely little in the way of any story resolution. The only major change that happens is the Black Market gets taken down, which was never the focus of the series and had several good characters such as Louis argue that it's more of a necessary evil. Every relationship thread (even the main one!) is left at "Maybe it'll work, maybe not," the issue of food and how carnivores will satisfy their instincts are never resolved (especially since Yafya rejects a possible solution), no side characters get any kind of conclusion to any developments they had, and most importantly, despite the title of the manga being Beastars, and it becomes a plot point that Legosi actually does want to become a Beastar together with Louis (justifying the plural in the title), absolutely nobody becomes a new Beastar, and Yafya even quits the post, leaving the position empty.
* Beastars who eat meat to keep their instincts in check and prevent themselves from killing others, while those who cave into their instincts descend into destructive behaviors, if not outright suicide.
* Beastars: Zoe is an extremely minor goat character that most people don't even

know the name of. But if he hadn't went looking for Legosi right when he did, Legosi would have eaten Haru, resulting in a very, very different story than what we got.
* Beast: A Tale of Love and Revenge" him back into his original beastly form.

* Beast Boy and Raven are another gender-flip. Even though they never have an official relationship on the show, Raven's troubled backstory mixed with
* Beast Boy And Raven Join PETA has a chapter where Beast Boy agrees to participate in a PETA demonstration that involves him being naked in public and pretending to be barbecued. Raven chews her boyfriend out by addressing that he's committing indecent exposure and that this act will do nothing to convince non-vegans to quit eating meat.
* Beast Boy And Raven Join PETA: The ALF and PETA claim that it's perfectly moral for them to kill animals.

* Beast Boy follows this pattern as well, since he's an animal shapeshifter with a primate as his main form.
* Beast Boy has been shown struggling to open pickle jars on a few occasions. The most prominent one being "No Power", where after being prohibited from using his powers (such as turning into a gorilla for added strength), he is unable to get the jar open no matter what. He ends up resorting to licking the unopened jar. Later on, he's shown using a

* Beast Boy's attempts at making her smile and laugh make them appear as such.
* Beast Boy tends to change shapes randomly when he sneezes, such as in the episode when he caught a cold.
* Beast Boy: That's What's Up! was produced as 4 11-minute shorts, but the US feed of Cartoon Network has only ever aired the 40-minute long version.
* Beast Boy usually has both green eyes and hair (along with his skin), except in the New 52 reboot where everything green on him became red. That was later reversed and he became green again.
* "Beast Breathing", a self-taught style utilized by Inosuke. By using
* Beast Busters Bosses, however, tend not to break apart; they just disappear in a mass of flames.
* Beastchild, it turns out that the naoli race long ago designed abstract mechanisms, one of which, called Death, now performs their reincarnations (and can let a naoli spirit keep a memory into the new life as a reward). Naoli have forgotten the existence of these mechanisms, which, apparently, was deliberate on their part in order to keep themselves "at least a little humble".
* Beast discovers that Mesmero has abducted the entire team of X-Men and placed them under mind-control, forcing them to act as performers and menial labor in a circus for the past several weeks. Jean Grey mentions that she has been "dating" Mesmero during this time. The implication of Jean's repeated rape has never been addressed on-panel.
* Beast dragons, native to the Outer Plane of the Beastlands, revel in hunting challenging prey. They'll go after anything that provides them with a suitable test of their skills, but especially favor hunting dinosaurs and powerful evil monsters.
* Beast Era, until a group from one dimension was nice enough to build a safety net. They keep everyone they catch imprisoned in a single large city, able to move

freely about it but not leave.
* Beast era, which were the opposites of the typical cyborg, being robots who had living tissue grafted onto them.
* Beast Fable: A story presents an aesop or allegory about a real-world issue using animal characters.
* Beast Fable: The oldest known beast fables are Sumerian, dating from the middle of the 3rd millenium BC. We also have Egyptian ones from the Middle Kingdom (early 2nd millenium BC).
* Beastfolk between humans and monsters; in particular, if they have their own nation then it will usually be a neutral one that has to be won over to humanity's side.

* Beastie Boys and their two newest albums) to celebrate their special-edition reissues throughout 2009.
* Beastie Boys are named Adam. They're usually referred to by their full names or stage names anyway—Adam Yauch is MCA while Adam Horovitz is Ad Rock.
* Beastie Boys - "Brass Monkey" ("Brass monkey, that funky monkey"). Which, as many people don't even realize (but is obvious in the context of the song) is a kind of cocktail drink.
* Beastie Boys bring up New York in their music pretty often (it is their hometown, after all). More well-known examples of NYC appearing in their music, however, would include the song "No Sleep 'Til Brooklyn" from
* Beastie Boys features a giant robot (piloted by three scientists played by the group members) battling a giant sea creature in Tokyo in a parody of kaiju films.
* Beastie Boys "Fight for Your Right (To Party)" includes the lines "Man, living at home is such a drag / Now your mom threw away your best porno mag (bust it!)"
* Beastie Boys' "Hold It Now, Hit It", Adam Yauch states "I come from Brooklyn 'cause that's where I'm from".
* Beastie Boys Hot Rap Singles and Modern Rock charts — both had only just been introduced when the single was released.
* Beastie Boys image was heavily influenced by the Heel role, according to then-manager Rick Rubin, a huge WWE fan.
* Beastie Boys is a throwback homage to '70s television show intros, including spinning scenery shots, people jumping over the hood of cars and cheesy mustaches.
* Beastie Boys. It may be a sad testament to how morally deprived contemporary pop music has become (particularly rap, the genre occupied by the Beastie Boys) that the song has been misassessed, because its lyrical content makes it overwhelmingly obvious that the song is supposed to be a joke.
* Beastie Boys' Mike D and director Tamra Davis, who, if memory serves right, directed one of their videos.
* Beastie Boys "Sabotage" song contains an epic one from the King Ad Rock.
* Beastie Boys single "Cooky Puss" includes clips of the band prank calling a local Carvel restaurant.
* Beastie Boys. The band hates the song and hasn't played it live for over 20 years.
* Beastie Boys their debut album, in general; it was a frat boy classic at the time, but the band became pretty embarrassed about the content in later years. MCA openly denounced their previous treatment of women in their 1994 single "Sure Shot."
* Beastie Boys. The "Literal Video Version" faithfully pointed this out.
* Beastie Boys, there's also an extended version which includes the Boys interviewed in-character as the actors starring in the fictional show.
* Beastie Boys, was a parody of rap and frat boy attitudes — despite the fact that the album seems to be a straight example of these attitudes as opposed to a send-up or even a subtle parody. The video album makes their intentions painfully

clear, as does the fact they originally wanted to call it "Don't Be A Faggot".
* Beastie Boys (who performed the guitar solo) getting knocked offstage by a gorilla. King's response was "If there's gonna be anyone knocking anyone offstage, it'll be me knocking the gorilla", which is what subsequently happened.
* Beastie Boys' "(You Gotta) Fight For Your Right (To Party)" has this line:
* Beast in Black's "Sweet True Lies", upon finding out that her husband is seeing another woman behind her back, the main character heads over to the dance club where he and she are at to let him have it, publicly calling him out on his shit, breaking up with him on the spot, and turning the other woman against him in the process.
* Beast. Interestingly, in his earliest appearances in the X-Men comic, he was not portrayed as particularly intelligent. However, Stan Lee decided his behavior too closely resembled the Thing from the Fantastic Four and upgraded his intelligence and vocabulary in order to set him apart.
* Beast in the Maze: A character must avoid a horrific monster within a complex labyrinth.
* Beast in the Maze: A person has to reach the end of a maze while also evading a creature that intends to harm them.
* Beast is killed. Turns out he was just hiding underground. This after the architects of the Ultimate Universe promised none of these.
* Beast Island, additionally reasoning that there's nothing left for her off the island, but Adora manages to lure her back.
* Beast Island, the island to which the Horde exiles powerful enemies and screw-ups,
* Beast IV: Primate Murder, a being said to be the best existence at killing humans.
* Beastkin and beast races exist and are looked down upon by certain elitist groups of humans.
* Beastly and his rich father's idea of parenting is to throw money at Kyle for whatever he asks for. His father seems too busy to bother with anything Kyle gets up to, but it's implied that the times Kyle did get in enough trouble that his father noticed, his dad just pulled strings and paid money to smooth it over.
* Beastly) asks if she liked him because he was attractive, she was more interested in his confidence and charisma.
* Beastly attention and adoration. When Kendra curses him, she calls him out on a number of instances in his past where he used his looks to get away with increasingly callous behavior.
* Beastly, by Alex Flinn, is a modern retelling of "Beauty and the Beast".
* Beastly? It's a pretty severe change, but the fact is, many viewers will find him more attractive when he's "cursed." (Which makes sense, in a meta way—after all, the filmmakers almost certainly made this decision based on the logic that their male lead needs to be hot.)
* Beastly where he starts talking to a girl who asks to see him again but to do so she needs to know what he looks like and you know the rest.
* Beast Machine has a self titled release whose cover art is as the name implies. A post apocalyptic fantasized up car.
* Beast Machines also had a closer relationship with the fans than most official entities, but the on-line community was so harsh towards the series he co-wrote, that he decided to break up. He didn't attend the fan conference he and his partner Marty Isenberg were invited to either (nor did Marty). Thus, they are both still among them.
* Beast Machines and has no intention of going back to being a good guy.
* Beast Machines and the occasionally reappearing old designs stand out. They actually re-textured the main cast's beast modes for the pilot episode, so while their buildup looks outdated, their textures match the new style.
* Beast Machines: a planet-wide virus on Cybertron incapacitated anyone who didn't change and those who did have a transmetal form reverted into their first forms. While it had some nasty side-effects such as memory loss and the inability to transform, that ended up being what saved them from certain capture.

* Beast Machines are the closest to a traditional army of Mecha-Mooks.
* Beast Machines as well, in case the earth-grinding blades weren't dangerous enough.
* Beast Machines at the end. At least he takes Megatron II with him and turns Cybertron into a technorganic paradise... and then he leaves Cheetor in charge.
* Beast Machines body, a big giant head, a tank Vehicon, a jet Vehicon, a random maintenance droid, and a beast-mode-less Optimus Primal's "Optimal Optimus" body.
* Beast Machines, both Optimus Primal and Megatron are destroyed when they fall down a shaft in a slightly similar fashion to the main reactor of the Death Star.
* Beast Machines, capable of directly turning other Cybertronians into more Vehicons, destroying their Sparks in the process. Not for nothing is their rampage labelled the Vehicon Apocalypse.
* Beast Machines, described by Rattrap as the two greatest generals in Cybertronian history.
* Beast Machines displays signs of this, particularly in the episode "Survivor." Within the episode, Nightscream and Optimus discover an underground, organic cave within Cybertron that houses numerous fossilized animals. Optimus is overjoyed, as it implies that Cybertron was once an organic world. Nightscream, on the other hand, becomes enraged/heartbroken, commenting that there were enough fossils for the entire Maximal population to scan, which would have saved them from Megatron's takeover (Megatron's scanners cannot detect Cybertronians with beast modes).
* Beast Machines episode "Fallout", Rhinox's spark expressed regret over his recent actions as the Vehicon Tankor.
* Beast Machines Hammerstrike toy (hammerhead shark beast mode) has elbow joints prone to cracking at the sockets, rendering both modes unworkable (each forearm has half the shark mode's lower jaw).
* Beast Machines has what look like bundles of wires for fingers. His toy meanwhile doesn't even have hands.
* Beast Machines. He had so many that the Maximals tore dozens into scrap metal every battle without making a dent in his overall forces.
* Beast Machines in the case of Obsidian and Strika, and also Rattrap and Botanica. Played disturbingly straight in the Beast Machines toyline where basic-sized figures of Silverbolt can barely reach Blackaracnia's stomach.
* Beast Machines is that there was no one left to be told anything at that point.
* Beast Machines, Jetstorm challenged Thrust to prove his loyalty to Megatron by extracting Blackarachnia's spark. Thrust almost did it, but was interrupted by Nightscream, forcing Jetstorm to do the deed himself. This becomes rather disturbing when later information is revealed.
* Beast Machines — the Vehicon generals are each about twice the size of their respective drones.
* Beast Machines, much to his annoyance. However, he was as resourceful as ever, and when the need arose was usually able to exploit the environment to defeat his enemies.
* Beast Machines, Noble/Savage chases after a group of fleeing Cycle-drones. They go around a corner behind a short wall, and we see the Drones fly up into the air and fall back down.
* Beast Machines Obsidian has a tiny machine gun dangling under his cockpit. Since the cockpit is his chest in robot mode, this means that the gun ends up hanging down from between his legs... Thankfully, the toy's more cartoon-accurate configuration, in which his legs are "fused" together, makes this far less obvious.
* Beast Machines of any cartoon ever aired. The whole thing is a series of Arcs.
* Beast Machines" one of their newest team members, a techno-organic vehicon with a bat mode named Nightscream, offers the members fruits from a towering organic fruit tree to help their organic components. However, the fruit magnifies their bestial sides that dominate over their robotic minds, turning them animalistic and feral. The maximals are restored when Cheetor (the only one who rejected the fruit out of misguided suspicion of Nightscream) cuts down the tree's trunk.
* Beast Machines, only to end up with a stronger version of the trope in its own series.

* Beast Machines Optimus, Rattrap, Cheetor and Botanica were barricaded inside Megatron's fortress while Megatron and his Vehicons were trying to get in, but were unable to as long as the shields were up. Stalemate. However, being separated from the soil meant Botanica (Rattrap's love interest) was losing her life energy. Rattrap opened a small hole in the shields in order to get Botanica out and back to the ground - which worked, but which Megatron immediately picked up on and used to destroy the base. Optimus and Cheetor flipped out at Rattrap, who used this as his justification.
* Beast Machines personality and horrible sense of humour make him one of the most enjoyable villains in the entire franchise.
* Beast Machines personality with the fact that as a Vehicon, he enjoyed murder, mayhem, and general evilness.
* Beast Machines, Rattrap exclaims, "Botanica! Am I glad to see you...'ve brought us this new power supply."
* Beast Machines", Rattrap realises that the newly-reformatted transformer is Dinobot when he initially assumes that he's in a "Maximal torture chamber", which reminds Rattrap of the last time someone made that assumption.
* Beast Machines shows like Beast Machines or Prime) too ridiculous for older kids to take seriously. Transformers fans lay the blame for this at the feet of Yoshikazu_Iwanami, who is infamous for twisting shows with adlibs and adding "humour" to the localisation process.
* Beast Machines situation for Optimus to figure it out. He later teaches the other Maximals how.
* Beast Machines strengths stand out more (animation, story, characterizations, etc.).
* Beast Machines: swords for his first body and maces as a Transmetal.
* Beast Machines. The head also has a tall, thin, tubular shape, and can easily swivel forward, making it look like the condor has a grinning erection. Even if you transform it according to the instructions, it's clearly a head coming out of a condor's butt. This could easily have been avoided, as the toy has a big torso-piece which the small head could have retracted into. In robot mode, the condor's head ends up on his belly, staring at his own crotch — not much better.
* Beast Machines: The series takes place entirely on the Transformers' home planet of Cybertron, with humans not even being mentioned at all.
* Beast Machines Thrust very clearly flips Optimus Primal the bird. (One imagines the animators only got away with it because Thrust only has 3 fingers on each hand.) Optimus is not amused.
* Beast Machines together with no information on Silverbolt and Rhinox. It's eventually revealed that Megatron has possession of their sparks and reformats the missing Maximals to serve as his Vehicon generals under new identities.
* Beast Machines was stripped of all weapons upon being reformatted, so compensated by developing all sorts of handy devices to stop the Vehicons.
* Beast Man), and the Sload (emotionless, isolationist, "slug-men" native to the Thras archipelago to the southwest of Tamriel).
* Beast Man, either turning them into half-animal chimeras permanently or allowing them to turn back and force.
* Beastman. In addition to be cast aside by human civilization, he was also mocked and treated as a joke by fellow Beastmen, until he finally had enough and killed his clan's chieftain and shaman (a terrible sin by Beastmen standards) and began to make his own group of Beastmen.
* Beast Man — human/animal mix (see that page for its own numerous subtropes).
* Beast Man: Various creatures reminiscent of anthropomorphic animals. See the trope itself for its extensive list of subtypes.
* Beastman warlord Ungrol Four-Horn leads a large army of Ungors (Beastmen with small horns and no recognizable animal features beyond that), mutants, and assorted dregs and outcasts, all creatures seen as contemptible wretches, cannon fodder, slaves and food by other Beastmen. Ungrol is himself an Ungor, and like the rest of his army is driven by spiteful jealousy and hatred of the powerful Beastmen who

abused him all his life.
* Beastmaster II: Through The Portal Of Time, on the other hand, pretty much fits right in, and at one point observes with scorn that Arklon is "as subtle as a rabid rhino."
* Beastmaster — which diverged so wildly from the source text that Norton had her name taken off it. As such, it has absolutely nothing in common with the Andre Norton novel, and the only things different from the movie are that Dar doesn't wear a crown or use a sword (for the early part of the series); it takes place in the jungle instead of the desert; and Dar's loincloth doesn't have fringe on it. Oh, and Ruh's a tiger instead of a puma (probably because the black paint killed the one from the movie).
* Beastmasters can summon familiars as a replacement pet. Unlike charmable pets, they will never turn against their master. (They may spontaneously vanish after 30 minutes or so, but what can you do?) Summoners can call forth elemental spirits(Elementals), and Avatars (Classic FF summons).
* Beast Master whenever she sees a cute animal, such as a dog or a cat, and even birds.
* Beast Men); a newcomer who only read/saw the latter parts of the series could be forgiven for thinking they're actually space aliens, especially as alien fantastical elements are still plentiful.
* Beast Men, but the Sathar and Dralasites might fit. Sathar are sentient, humanoid invertebrates who seem to be a human — sized cross between an earthworm and a squid, and due to their nonhuman psychology are an NPC-only race. Dralasites have surprisingly humanlike personalities but are physically the strangest of all, being fully sapient amoeba-like multicellular organisms, and reproducing by budding.
* Beastmen can take command of a Beastman pack called the Stonestalkers in some of the game's paths, by challenging and defeating their current leader and her closest followers.
* Beastmen tend to use the same kinds of hefty axes, cleavers and bludgeons as their Chaos Warrior fellows, though the scrawny, feeble Ungors use crude spears and shortbows instead to emphasise their sneakiness and lack of prowess.
* Beast Men with traits of almost every creature under the sun but also some of the Darklands' few peaceful and civilized natives.
* Beast Morphers: Black guy (leader), Indian guy, white girl. Then they added a Latino guy and finished it up with an android (who in the finale was transformed into a white guy).
* Beast Morphers powered by an energy source stolen from the villains.
* Beast of the Apocalypse: An animal who tries to bring out an apocalypse.
* Beast of the Apocalypse, and completing countless other side quests, you'll walk into Jorrvaskr with the intention of becoming a Companion, only to be refused by him, with him telling the Harbinger, "I've never even heard of this outsider".
* Beast Planet get you. Not today. Maybe not tomorrow. Eventually, it will.
* "Beast Quake II" against the Seahawks in the 2013 Divisional, "The Minneapolis Miracle" against the Vikings in the 2017 Divisional, and "The NOLA No-Call" against the Rams in the 2018 NFC Championship, which is the most painful loss in Saints history. Drew Brees, the Saints's longtime quarterback, ended his career on a downer note when he threw three interceptions against the eventual Super Bowl LV Champions, the Tampa Bay Buccaneers, whom the Saints had swept in the regular season.
* Beast Saga, the Godlot parts will kill anyone not strong enough to handle its power if they touch it. As proven when a Sea Tribe foot soldier touches a part of the Fire Godlot and gets fried. It takes a specially made potion just to be able to carry it.
* Beast's Fury fans, which left the reputations of Stevens and Evil Dog tarnished.
* Beast's Fury — was released after much delay, and it ended up being the closest Evil Dog ever got to bringing the game to fruition; the project was cancelled in 2016, with bridges burned and tons of livid staff members and customers (many of which out as much as thousands of dollars) targeting Evil Dog's leader, Ryhan Stevens, for his incompetence. It's understandable that the fighting

game community now associates the game —and Stevens — as perfect examples of the ''don'ts" of game development.
* Beast's hairdo. Later he lost the gorilla-like traits to become cat-like, though.
* Beasts. Indeed, Kills-in-Shadow expresses surprise and mild curiosity at a male Fatebinder acting the part of Alpha.
* Beasts of Burden a coven of witches each with a cat familiar moved into town. While most of them were killed along with the witches, Dympha survived and sought revenge on the others, then joined them. She retains some magical capabilities without the witch.
* Beasts of Burden, Emrys and Mullins come across some hostile Shibas who charge toward them... only to run right by them, their real target being the oni behind them.
* Beasts of Burden have their own way of speaking, including differences in pronunciation (e.g. "aminals" for "animals", "cass" for "catch") and grammar.
* Beasts of Burden: In "The Unfamiliar", the dogs form a chain to stop the Orphan from getting sucked into a magical vortex.
* Beasts of Burden is about dogs and cats living in a suburban town, combating evil forces.
* Beasts of Burden is always the first to dismiss any talk supernatural phenomena as superstitious nonsense, no matter how much weird stuff he sees (like witch-cats in "The Unfamiliar" or a ghost in "Stray").
* Beasts of Burden, it's a demon possessing someone's body, doesn't seem to be restricted by moon cycle when taking over the body, and it gives the person the ability to talk to animals. Silver bullets are still the way to go though.
* Beasts of Burden, one of Lundy's spells is capable of making a brain burst out of its skull.
* Beasts of Burden, shepherdess of the dead who fetches the souls of the departed.
* Beasts of Burden story "The View from the Hill", the gang encounters a herd of sheep and their sheepdog, who are soon revealed to be ghosts.
* Beasts of Burden, the elder wise dogs encounter a pack of raccoons with human faces, devouring a dead creature.
* Beasts of Burden: Undead animals show in a number of stories. "Let Sleeping Dogs Lie" features a band of zombie dogs, and "The View from the Hill" features ghostly sheep.
* Beasts of Burden: Vampires, zombies, ghosts, and other things show up.
* Beasts of Gor takes place in the far northern region of the planet, which has long times of sun and no sun respectively.
* Beasts of No Nation, a NDF machine gunner is seen stark naked, aside from his non-genital-covering ammo belts.
* Beasts of No Nation, while they fight against government forces and other rebel factions.
* Beasts of Nurgle are ginormous, acid-spewing slugs with the personality of a
* Beasts of the Southern Wild has an entirely unknown cast, many of them acting for the first time.
* Beasts of War 2014 Gaming Awards, the hosts are all introduced in waist-up shots, while Sam barely gets his shoulders in frame.
* Beasts one on them. It's commonly believed among Beasts that vampires are vulnerable to fire because their Progenitor was a Beast who suffered an Anathema giving that weakness.
* Beast spend copious amounts of time detailing the lives of the long-time married couple sailing through the Caribbean—their courtship, children, etc. All for them to be killed by the squid when their sailboat sinks. Benchley does this with the other victims too.
* Beast: The Primordial and more towards "you let the monster in your nightmares conquer you," but there was still room for the earlier interpretation).
* Beast: The Primordial: Beasts with the Hunger for Power feed the Horror by subjugating others, forcing them to acknowledge the Beast's power and do their bidding. For Beasts that are trying to restrain their Horrors, feeding in ways that cause only the bare minimum of suffering necessary to sate the Horror, this can

take the form of petty tyrannies such as forcing a former rival to polish your nameplate.
* Beast: The Primordial, becomes an Unfettered Soul wandering the Primordial Dream for eternity. This can be willing, through suicide, or forced upon them by a Hero.
* Beast: The Primordial by hurting or causing fear in mortals, they specifically target despicable people who have it coming, thus minimizing the harm they cause.
* Beast: The Primordial draws on elements of this, painting both Beasts and their opposing Heroes as champions/embodiments/victims (it's... complicated) of the greater monomyth. Beasts are descendants of the Mother of Monsters, the great thing in the darkness whose role is to define the boundaries of the world through fear; Heroes are people called by the rampage of Beasts to transgress those boundaries and show humanity the way forward. The problem is, the narrative has shifted, so that Heroes are less focused on teaching humanity ways forward and more about killing monsters for glory and riches, so those Beasts who try to find some meaning in being primordial nightmare-monsters often find themselves trying to teach humanity through fear.
* Beast: The Primordial: Even if multiple Heroes worked together to slay a Beast, only the one who actually landed the killing blow receives a new Heroic Gift. While some heroic groups work together despite this limitation, and some even exploit it by having the more experienced Heroes metaphorically hold the Beast down for the weakest member to kill, more often this causes Heroes to butt heads with each other and compete for the all-important deathblow.
* Beast: The Primordial has the Heroes, the counterbalance to the eponymous Beasts. Where Beasts incarnate human fears and are meant to teach humans about the dangers of the world, Heroes are meant to inspire humans to face their fears and overcome their limitations.
* Beast: The Primordial has the Lairs, individual to each Beast, an otherspace that is reflective of their own power (the higher their Power Stat goes, the more chambers it gains) that can be entered through any doorway.
* Beast: The Primordial Horror. Beasts are sapient nightmares made mortal, and as such, they have a physical and mental need to feed on fear and despair. The precise flavor of fear they hunger for is one of their defining aspects, whilst the kind of fear they embody is the other. If a Beast doesn't feed often enough, whether due to lack of opportunity or moral compunctions (some Hungers require things like stealing or even killing) their Soul rebels and starts giving the neighbors horrific nightmares so it feeds anyways. Unfortunately, that method has a higher than normal chance of creating Heroes obsessed with slaying Beasts.
* Beast: The Primordial inside this realm, which Beasts can travel to by opening Primordial Pathways.
* Beast: The Primordial is an example of the Composite variation. The Beast must unite her human Life and her monstrous Legend into a single Myth, rewriting the narrative of the Primordial Dream so that it now revolves around her. If she succeeds, she is able to fully merge her human self and her Horror into a single entity with the strength of a Horror and the freedom of a human.
* Beast: The Primordial). Originally they were depicted as glory-seeking sociopathic narcissists who cared little for whether or not an individual quarry was dangerous, and treated collateral damage as a secondary concern. Later supplements developed them a little more to flesh out the setting.
* Beast: The Primordial, some Heroes develop this ability either by chance or as a result of being especially successful in their careers, perpetuating their own lifespan each time they kill a Beast.
* Beast: The Primordial: the fittingly name Death of the Light Atavism allows a Beast to do this, shutting down all the lights in a given area.
* Beast: The Primordial the head writer was accused of assaulting multiple women, some underage, which he never denied.
* Beast: The Primordial then provided sample Heroes with various shades of gray and motivations, clarifying not all of them fit this description.
* Beast: The Primordial This is one of the Anathemas that a Hero can place upon one of the titular Beasts. A Beast under the Rage Anathema is consumed with a fury they

cannot control, even if they know that it is artificial. Outside of combat, they have severe penalties to any social interaction other than naked Intimidation, while in combat they face penalties if they try to pursue any strategy other than "charge directly at the nearest enemy and attack with all your strength".
* Beast: The Primordial This is one of the Anathemas that a Hero may place on one of the titular Beasts. If successfully placed, this Anathema forces the Beast to manifest a vulnerable spot which cannot be protected by any armor the Beast may possess and which amplifies the damage from any attack that hits it.
* Beast: The Primordial: While a Beast's Nightmares are technically only hallucinations and don't physically exist, they are entirely capable of inflicting real injuries, and even death, on their victims.
* Beast: The Primordial with getting along with other supernaturals - it's only the Beasts that draw their ire.
* Beast-type enemies (roosters, lizards, etc.) can generally only take a couple of hits at most before going down. However, the white monkeys dual-wielding katanas are definitely in the running for the game's toughest non-boss enemies.
* beast warrior form who despite looking less human than other female colleagues is ironically sexier.
* Beast Wars 10th Anniversary (2006): a rerelease of several figures along with two new figures of Optimus Primal and Megatron. All the toys had pieces which could be used to build Trans-Mutate.
* Beast Wars ad, a boy and an adult man stare at a McDonald's restaurant as it transforms, unaware of the kids inside, playing with Happy Meal toys. With the restaurant fully transformed into a giant robot, the man exclaims, "Cool!" while the boy quizzically asks, "But where's the door?" A panel with a McDonald's logo opens on the robot's torso, revealing a giant Ronald McDonald, who exclaims, "Did somebody say McDonald's?"
* Beast Wars, a fellow cadet of Optimus and Sentinel's who apparently died on an unauthorized mission led by the latter to an energon-filled planet full of giant spiders. Her mutation into this form came about from trying to copy the spider's abilities, and threw her lot in with the Decepticons because her "comrades" would have dissected her, and is shown to have a similar dynamic with Optimus like the original did with Silverbolt, only with more of a tragic connection between the two.
* Beast Wars after he slipped off the rock bridge they were fighting on because he felt he wouldn't have "truly" won the duel if he didn't.
* Beast Wars also features a bridge battle, this time a land bridge, with the battle being between Optimus Primal and Dinobot for leadership of the Maximals.
* Beast Wars also has Quickstrike, whose beast mode is a scorpion...with a cobra for a tail!
* Beast Wars also makes him beloved by fans, to the point his popularity saved Waspinator from being killed in Season 2.
* Beast Wars also turned into a polar bear as one of his alternate modes (the other being a snow owl).
* Beast Wars amongst the Predacons, with a nice contrast between Megatron and Tarantulas. Rather than fighting outright, the two do the best to bend the other to their own purposes. Don't think for a second that it's just between the two of them. Blackarachnia's also a major player, and other contenders come and go from the game over the course of the series, but that'd be telling.
* Beast Wars and depicted the Maximals' pursuing of the Predacons that ultimately led to both factions ending up on prehistoric Earth.
* Beast Wars and try to spot the "skin". And then there's Airazor, who seems to be a fairly modest Maximal from the get-go.
* Beast Wars, and would have killed Tigatron if Optimus hadn't turned up in time. In the end Tigatron rejoins when the Predacons make it clear that they'll only do more damage if they aren't opposed.
* Beast Wars: A portion of the antagonist Predacon faction transform into various Arthropods including wasps and spiders (the female forms, ironically despite being apparently male). One former protagonist Maximal, Blackarachnia is also a spider.

* Beast Wars are the first Transformer series' not to have human companions (there are proto humans in Wars, but they rarely show up).
* Beast Wars. As a result, he made it his personal mission to hunt Rampage down and kill him.
* Beast Wars, as each of his fingers turned into entire scorpion legs when he was in beast mode.
* Beast Wars as "my queen". A majority of the Predacons also took on insect or arthropod modes.
* Beast Wars, as the episode ends with him body's one remaining arm picking up his severed head.
* Beast Wars as this. The cast are the descendants of the original Autobots and Decepticons.
* Beast Wars. At one point Optimus Primal is presumed dead during the course of one night. During that time Rattrap takes it upon himself to take over his (much nicer) quarters and replace everything with his own stuff. When he is called out on it, his response is basically "Hey, come on. What do you expect?"
* Beast Wars boards, which threw it around pretty regularly, and assumed it was important. As it turned out, it was the motto on Optimus Prime's original bio, meaning it made perfect sense for Primal to quote it in that moment.
* Beast Wars brings this up before the first season finale. Megatron finds an alien artifact and needs time to plan for an alien invasion, so he seeks a truce with the Maximals so that he isn't wasting time and resources fighting them. Optimus Primal calls him out on it, saying that when a Predacon wants a truce, it means he needs time to reload. Megatron admits that is normally true.
* Beast Wars, but fans of the franchise generally agree it's the best written/produced of them all.
* Beast Wars by having the lights switch off and then back on, while the actual physical eyes don't close.
* Beast Wars change the past and watch the future change with it, which drives the plot from that point on.
* Beast Wars character Antagony is a black, female version of Inferno (who technically ought to be female anyway, considering he turns into a soldier ant, but that's neither here nor there). The compound eyes on her chest, made from the head of her ant mode, are usually drawn as boobs.
* Beast Wars character not in the show in his fics. The end result was fight scenes that were so step-by-step and plotted out that they resembled a pre-publishing RA Salvatore, with character names made up of bad animal puns.
* Beast Wars character Sonar. Due to a gender-neutral bio, they were eventually labeled female by fans, and then it appeared in the official BotCon comics, and everything else followed suit.
* Beast Wars characters started picking up Megatron's "yesssssss" when referring to him. Ditto for Primal's "That's just prime."
* Beast Wars "Code of Hero", an early human picks up the makeshift hammer Dinobot made with a stick and a stone. He is at first surprised when he uses the hammer to easily split open a coconut. Then the same giant snake that consumed another early human at the beginning of the episode lunges at him. He instinctively kills the snake with the hammer. He then holds the hammer aloft and yells in triumph as he realizes what tools like the hammer can do.
* Beast Wars comfortable with. At least through the first season, if they stayed in their robot forms for too long, their systems start overloading.
* Beast Wars comic book series used this trope to set their stories within the same setting as the television show without creating continuity issues. The characters in the comic were in a different "time phase" than the characters in the show, allowing them to travel to the same locations while remaining invisible and intangible.
* Beast Wars, complete with trumpet fanfares when he speaks. It really helps that both his animals — one a wolf, the other an eagle — are typical "noble" animals. (which sorta makes a Griffin, an even more noble animal)
* Beast Wars continuity, the original Starscream was a mutant, whose spark happened

to be immortal. The Maximal High Council tried to abuse this feature, but the character born from it surprisingly did die for good down the line (admittedly by having his spark ripped to shreds with a shard of raw energon, a substance shown in his first appearance to be able to damage his spark).
* Beast Wars crosses his mind: "Hmm, I suppose, given my imminent godhood, these primitives should really be beneath my intention. Ah, still, no score is too small to settle, I always say." As a result of this, he vaporizes two of his longest-serving subordinates, weakens his master weapon preventing it from being useful on his final plan, and is complicit in the stalling tactics that led to his defeat. And on top of that, he missed.
* Beast Wars: "Dark Glass" was a cut episode with quite the potential for the overall plot, explaining how Dinobot II ended up gaining Dinobot's sense of honor at the end of "Nemesis, Part 2". It was cut for, supposedly, being "too dark", and replaced instead with "Go With The Flow", a filler episode centered around protohumans Chak and Una with few relevance to the overall plot. Needless to say, fans were more intrigued about the cut episode than the final one they got as the Plot Hole "Dark Glass" left after being cut was pretty big.
* Beast Wars destroyed, Inferno vows to locate a new base of operations, Waspinator counters, "Ant-bot not find own thorax with both hands and a road map."
* Beast Wars did this to in the pilot episode. The small cast size made this bearable.
* Beast Wars' Dinobot has an angular 'sword' that rotates. It's functionally a chainsaw sword, as proven when he used it to cut Inferno from shoulder down to mid chest. Sparks could be seen flying as the sword gradually cut deeper and deeper into Inferno's body!
* Beast Wars, either, since it's neither prone to breakage nor results in any more of a choking hazard than without the lock-out. Unlike a lot of other examples, this one can be "hacked" back in using a razor blade.
* Beast Wars episode "Changing of the Guard", when Rattrap discovers that piloting the makeshift mini-sub is "kinda cool", a cheery sea-shanty-esque tune plays — then we cut to Silverbolt on the shore, listening to the music through his handheld communicator and staring at it in confusion.
* Beast Wars episode "Code of Hero," Dinobot is under attack from Blackarachnia's eight machine guns. He grabs the already semi-bisected Inferno to absorb her last bullets before using Inferno's gun to shoot her down. Then he uses the poor Predacon's gun against him, blowing his head sky high.
* Beast Wars episode "Gorilla Warfare", when he's infected with a berserker virus. Efforts by the lower-ranking Predacons to stop him are dispensed with in brutal fashion.
* Beast Wars episode "Transmutate", Rampage seeks out and befriends the malformed Transformer, believing he has found a kindred spirit in Transmutate's tortured existence. When Transmutate is destroyed while trying to stop Rampage and Silverbolt's battle having befriended them both, Rampage wails in anguish. Silverbolt makes the other Maximals leave him alone in his grief, declaring that for this moment they are brothers.
* Beast Wars. Even before the line between "tech" and "organic" became blurred in the series, the creators emphasized that the robots' pseudo-organic "beast modes" were "fully functional"... take that as you will.
* Beast Wars form carries spiderlike features even in her robot mode, most notably her concealable extra eyes.
* Beast Wars franchise, but owing to the mostly serious second season, it's often considered the best of them all by fans.
* Beast Wars, gets thrown into a pool of lava. The result? He emerges in dragon form.
* Beast Wars got one too. In "The Law of the Jungle," Tigatron accidentally caused an explosion that killed a tiger he had befriended, causing him to call it quits because he didn't want to be responsible for any more death.
* Beast Wars had a short deleted scene where they put the original Megatron's spark back into his body, resolving what seems like a pretty big oversight in the final

cut.
* Beast Wars had several episodes that ended with this trope, playing it completely straight. However, when the more serious second season came along, the trope was completely dropped.
* Beast Wars had this in the first season, where the Maximals and Predacons fought over a planet rich in raw energon. Of course, by season 2 they found plenty of other things to keep fighting over.
* Beast Wars has 5-7 Maximals fighting 5-7 Predacons at Pre-historic Earth. Both factions' spaceships were totaled after the initial crash landing and the massive amount of energon radiation ensured that they could not communicate with any possible rescue parties.
* Beast Wars has become almost like a measuring stick for newer Transformers shows to be compared to.
* Beast Wars has died down and the show has received more positive light since.
* Beast Wars has even fewer limits. His troops, Cybertron, even history itself are all fair game if it gets him closer to godhood.
* Beast Wars has little arachnoid robots that fulfill any number of menial roles such as serving as flashlights, lugging equipment around, and putting Tarantulas back together when necessary.
* Beast Wars has several, while Megatron and Scorponok have labs too, to name just a few.
* Beast Wars has Terrorsaur and Scorponok, two of the main Predacons opposing the Maximals since the beginning of the series, getting killed at the end of the first act as a side effect of the quantum surge that hits the planet.
* Beast Wars) have become the stuff of myth and legend by the time of the future-era Maximals and Predacons, and thus some of the detail as well (this was previously also seen in "Possession" with the ghostly Starscream lying about the cause of his death).
* Beast Wars have their own signature weapons, the Maximals have a separate armory, supposedly for gunless characters like Dinobot.
* Beast Wars, he destroys Megatron's golden disk, thus denying its secrets to the Maximals but also preventing the Predacons from exploiting it.
* Beast Wars, he dies from his wounds caused by Predacon Megatron mauling him, though not before he's able to take back the Autobot Matrix of Leadership from the Decepticon Megatron.
* Beast Wars he was injected with making him too dangerous for both friend and foe, especially with no enemy to fight.
* Beast Wars. His first question to the staff? "Who can I kill?" The answer? Tigerhawk, Depth Charge, and every Predacon except Megatron and Waspinator.
* Beast Wars, however, with the mindless drone vehicons. There's a scene from the last episode would have given Megatron's two space-launched generals a redemption, but it was cut.
* Beast Wars immediately start making fun of him and insinuating that his mom is calling to check on him.
* Beast Wars, in beast mode, from a flying island that's just more or less gone nuclear, in the hopes of catching a tree branch on the way down before he and Rattrap go splat or get charred to a crisp. He does.
* Beast Wars. In each season, characters like Optimus, Megatron and Cheetor change alongside the technology, while other characters like Rhinox, Inferno, Waspinator and Blackarachnia (until her upgrade) did not. This makes their jagged shapes and low-resolution textures look out of place compared to the others.
* Beast Wars. In fact, numerous characters, primarily Predacons, end up in pieces, including an intact head. Silverbolt is the only Maximal who suffered this indignity while serving as a Maximal.
* Beast Wars, Inferno was originally conceived as a new body for Megatron. The show made him a distinct character, but the scrapped idea was referenced in one of the early Season 2 episode, where Megatron in his actual new body collides with Inferno mid-air, and they briefly end up switching heads. Inferno is amused, Megatron not so much.

* Beast Wars In general, it's suggested that the main reason he holds power is that no other Predacon is remotely equipped for the job.
* Beast Wars in the beginning, but thankfully they were able to tie the random plot-points they had laid out into a mostly coherent story by the season finale.
* Beast Wars: In the episode "Power Surge", Terrorsaur gains a significant power boost from a floating mountain of energon, but this boost only lasts a few minutes before he reverts to an exhausted state of his original power level.
* Beast Wars in the first episode. Everyone else is some combination of cowardly, treacherous, power-hungry, or loyal to the point of idiocy. Though we're only seeing a handful of Predacons to begin with.
* Beast Wars into her own brain and destroys the computer containing the original copy so that Megatron can't use it.
* Beast Wars is more than enough to redeem him in the eyes of his Maximal comrades.
* Beast Wars is Optimus Primal, the cheetah is Cheetor, Blackarachnia is a (mostly) black arachnid, the pterosaur is Terrorsaur, etc.
* Beast Wars, is rampantly treacherous... often to Megatron's face, but Megatron can't afford to dispose of him or even punish him too badly because he can't do without his scientific know-how.
* Beast Wars is the quintessential Guile Hero. Uses his brains and cunning in every situation, will feign loyalty and pretend to switch sides and abandon his team to gain access to information that will really further his team's goals.
* Beast Wars is very purple, very cunning, and very powerful. Ironically, his purpleness decreased every time he became stronger.
* Beast Wars. It helps that he's part dog (well, wolf, but Rattrap calls him "bird-dog").
* Beast Wars, it isn't unlikely that this is a prelude to the "Great Upgrade" that allowed them to don more energy-efficient, human-sized bodies.
* Beast Wars: It's both averted and utilized, depending on the character. Some, like Rattrap, Cheetor, Silverbolt (wolf/eagle hybrid), Inferno, Tarantulas and Blackarachnia fit their animal's stereotypes exactly. Others, like Tigatron, Rhinox and Optimus (a gorilla) don't have the kind of personalities their animal implies. For instance, Tigatron (a tiger) is a pacifist, Rhinox (a rhino) is the smartest and calmest member of the Maximals and Optimus (a gorilla) is the most serious member.
* Beast Wars It should be noted though that he died in the Series Finale.
* Beast Wars Japanese ones) had their personalities rewritten on purpose, sometimes to hook up better with the established universe, sometimes adding implications that were never there in their original appearances, and sometimes just writing them as the exact opposite of what they used to be. One of the more notorious is Mantis, who, in his original appearances, was a territorial and irritable loner who'd attack his own allies if they tried getting close to him—in the sourcebook, he's described as friendly, even-tempered, and approachable.
* Beast Wars, killed off every Transformer except Cheetor, Rattrap, Blackarachnia, Silverbolt, Nightscream, Botanica, and Waspinator.
* Beast Wars like Razorbeast and Torca, who previously didn't have any meaningful followings or characterization.
* Beast Wars, like "slag him!" to mean "kill/shoot him!" or just dropping an s-bomb when things don't go their way.
* Beast Wars loves this trope. The big advantage to having a show with a cast composed of robots is that you do away with the issue of clothes and hair right from the get go. Of course the character models look like they're just composed of geometric shapes; they're all robots! Problems arise when you look at the animal alt-modes and the real-life animals they run across, fur and feathers might as well be sculpted on for all they move.
* Beast Wars loyalty will always be to the original Megatron and his cause.
* Beast Wars managed to get away with a fair amount. It was rated C8+, an even more restrictive category than G.
* Beast Wars, Megatron mocks Optimus Primal's attempts to stop him by quoting the Codex of Primus, which stated that "the hero would not prevail". Optimus reminds

Megatron of the rest of the quote, "...nor would he surrender!"
* Beast Wars Megatron succumbs to this, killing more of his soldiers than the Maximals ever did. Presumably he assumed that when you have a giant warship and superpowers (even by Transformer standards of being big immortal war machines) you don't need a lot of help.
* Beast Wars Megatron tries to destroy Optimus Prime. He muses that he was hesitant to make such a drastic change to the timeline but realizes that he now had no choice but to make the ultimate gamble.
* Beast Wars Megatron when he takes the spark of G1 Megatron. Tarantulas and Quickstrike rebel against him and throw him into the lava and his apparent death, though he comes back, even better than before.
* Beast Wars might possibly count as male robot examples since they are humanoid machines who can transform into metallic cat creatures, gaining their animal abilities for powers as well.
* Beast Wars NEO an almost complete mammoth. Worse, the toys were viewed as being fiddly, overcomplicated and just not fun to transform, a death sentence for a franchise where converting a toy from one mode to another is the entire point. The reaction was so bad it essentially killed the Beast Wars franchise in Japan.
* Beast Wars Neo episode "Attack! Randy" has the Predacons attempt to kidnap a mammalian alien baby and use the child as leverage to force the Maximals to surrender the Angolmois capsule found on the baby's home planet. At one point, the baby pees in the face of DNAVI, the Predacons' navigational computer.
* Beast Wars Neo of things hitting Hardhead in the head. At one point, he gets hit by droppings from a bird flying above him.
* Beast Wars... Not so much. Even then, BM has some fans who claim that, while it's not as good as BW, it's still a good series.
* Beast Wars of gaseous Energon that results is larger than all of north Africa, billows out past the stratosphere, and causes massive atmospheric ripples. Pretty impressive for one techno-organic rhinoceros of average size.
* Beast Wars of the Transmetal Driver is what creates the Transmetal 2 upgrades. However, some of the transformers adopted from the T2 line received their transmetal forms without the driver; thus they're not technically Transmetal 2's even though they're part of the same toy line.
* Beast Wars) only a handful of current characters were redesigned. To try and explain why some changed while others didn't, those who weren't altered were otherwise incapacitated in a repair chamber or something else. It wasn't perfect and there was still a few inconsistencies with a couple of characters. Then the Transmetal process was refered to again. A device from the same aliens that sent the "Planet Buster" emitted a paralyzing pulse at the transformers around it. Those who with some form of transmetal in them proved to be immune to its effects.
* Beast Wars, only in new bodies that can transform into animal forms instead of vehicles. Later, it was established that these were not the original Autobots and Decepticons.
* Beast Wars, Optimus Primal's Transmetal form is an ape on a hoverboard, so he did this more than a few times in the show.
* Beast Wars oversized spiders. Blackarachnia usually isn't particularly creepy, but Tarantulas tends to be creepy enough for three Predacons, so it balances out.
* Beast Wars: Poor Waspinator! Almost every episode, he is blown to bits, killed, or badly injured, just to come back the next one.
* Beast Wars Rampage did this on occasion, dual wielding a smaller gun with his Tri-Barreled Cannon (shrunk down slightly to match).
* Beast Wars, Rattrap and Dinobot were prone to doing this. Especially in "The Low Road":
* Beast Wars references (Bulkhead and Lugnut) and cameos (Red Alert as a medic rather than security guard, Safeguard, and Hot Shot), and it also has some G1 era characters that were exclusive to Japanese fiction (the concept of the Headmaster, Grandus, Dai Atlas).
* Beast Wars: Related thematically at least is Rattrap offering to take Silverbolt to a bar where "the serving bots are walking around minus their torso plates, ya

know what I mean?"
* Beast Wars returns to base, and Megatron, who was scrapped by him earlier, come back alive and VERY pissed.
* Beast Wars seem to come off this way. Everyone's transition to Transmetal in the season 2 premier was accompanied by screams and bodies collapsing. The changes to Transmetal 2 seemed even worse.
* Beast Wars. She wants Silverbolt back so she's going to get him back (there are numerous other issues that also cloud the whole thing, such as whether Blackarachnia was self-aware before she was reformatted as a Predacon, while Silverbolt was undoubtedly a person with a personality before being reformatted into a Vehicon).
* Beast Wars ship rising behind them as Rattrap finishes explaining the bad news!
* Beast Wars shows-albeit chronally displaced or on Cybertron, so the TV series and the comics didn't clash.
* Beast Wars, so he devises the Beast Upgrade. With that in place, both Maximals and Predacons become able to metabolise fuel the way humans metabolise food, rather than having to live off energon. The Beast Upgrade goes from a justification to why the toys are what they are to something that helps the Resistance start winning their war.
* Beast Wars: Some fans speculate that Dinobot II did, in fact, survive the exploding ship he was trapped in during the series finale and continued to live on earth alone complete with his memories of being the original Dinobot. The evidence to support this comes from the fact that he had Protoform X's spark in its whole form, which could heal injuries and was already shown to be highly difficult to kill given his transmetal body.
* Beast Wars, some of the transformers had keyboards inserted into their forearms that sort of met halfway between the two methods (it actually superficially resembled the use of the small keypad on a Nintendo Glove). In Beast Machines, Megatron had a special throne interface complete with Helmet and Hover-Chair that was connected to the planet's networks through ceiling cords.
* Beast Wars spearheaded the (temporary) takeover of the Maximal base.
* Beast Wars Spider-Boy spent a few seconds gloating about catching Rattrap in the act of espionage, who had plenty of time to pull his gun and fire because he was already in his battle form.
* Beast Wars status, he is blown up just before he finishes his speech.
* Beast Wars team's logo on equipment (even weapons) rather than the logo of the team that's going to be shot with them, so the idea was dropped.
* Beast Wars than is usual for this trope. The choice of a black widow spider as her alternate mode is surprisingly appropriate, though she's not without redeeming qualities.
* Beast Wars that it all happen at the beginning of the season. Season 3 got to do it's "Transmetal 2" upgrades gradually, with Cheetor and Dinobot 2 getting that status at roughly the halfway point.
* Beast Wars that ultimately she becomes a real Maximal. This ironically is the only thing that saves the future yet again when she's the last maximal to survive a mental takeover of Optimus Primal, and thus she's able to save the ark from self-destruction.
* Beast Wars, the Autobots and the Decepticons decided to change to more energy-efficient forms called the Maximals and the Predacons, respectively, in an event called The Great Reformatting.
* Beast Wars, the BW idea of sparks firmly secured their place in the mythos, to the point of postulating that all Transformers were creations of the AllSpark.
* Beast Wars, the depolarized Spark of Megatron goes through a rapid session of body-swapping, trying to destroy the Maximals with every new functional machine he comes across.
* Beast Wars, the first few episodes of the second season see Rhinox manage to bring Primal back to life by using a recently-created rift into transwarp space and a blank stasis pod (essentially a Transformer body without its own soul) to bring Optimus back to life. The show itself explicitly states that the rift Rhinox is

using will close soon and it was by relative chance that the Maximals found the blank pod when they did, and even then Rhinox experiences considerable strain and puts his own life at risk trying to retrieve Optimus's spark before the rift closes.
* Beast Wars. (The Generation 1 character is always spelled "Laserbeak," as are the Cybertron and Animated ones. Expect a lot of people to get it wrong anyways.)
* Beast Wars (their origins are never explained and the writers never really made up their minds on it) they might actually be hyperevolved humans.
* Beast Wars, the Maximals would sometimes refer to the Predacons as "Preds".
* Beast Wars. The next time Dinobot's on-screen, he's more than ready to meet the enemy.
* Beast Wars: the planet the show takes place on is prehistoric Earth, and in the series finale Megatron, while onboard a working spaceship, with a weapon that outright killed the near-god-like Tigerhawk, opens fire on a tribe of protohumans. It's outright shown at the end of the episode that all or most of them are alive and well, without so much as minor injuries.
* Beast Wars, the Predacon Terrosaur, is running low on energy and is far from base. He gets a charge off a surface-exposed chunk of raw energon. It powers him up, but repeated use proves addictive and nearly fatal. This ties in with raw energon is dangerous to Transformers.
* Beast Wars thereof) is an alien signaling probe and containment device.
* Beast Wars the Vok themselves. Their third season depiction as giant floating skulls shattered this, though.
* Beast Wars. They bond while stranded together and cut off from their respective factions.
* Beast Wars they were actually both in the same size class, but the animators chose to depict TM Rattrap as being roughly the same size as his original, "basic" class form.
* Beast Wars. Though it was pretty advanced for its time, the stiff, robotic character models and sparsely-detailed scenery make it a bit difficult to take the show seriously these days.
* Beast Wars; Tigatron and Air Razor, apparently about to die, vow that their sparks (souls) will always find each other, and take each other's hand. It gets taken a BIT too literally... Meet Tigerhawk, the result of those two sparks being captured by the Evil Aliens and fused together into an incredibly powerful Transformer sent back down to Earth to take out Megatron for messing up the timestream. And then die again.
* Beast Wars to convince Ravage to side with him and attack the Maximals.
* Beast Wars to mock the backlash). Early plots were also often disliked for their simplicity or "lesson of the day" type formats. It took until the end of the first season and into the second before reactions softened and fans began to embrace the series' positives, to the point of it becoming perhaps the most praised incarnation of the franchise in terms of its characterization and story.
* Beast Wars too much of G1 is forgotten/sketchy for most of its players to still be around, though Ravage still is.)
* Beast Wars to spare him when they were looking for characters to kill off at the beginning of Season 2.
* Beast Wars: Transformers (megacycles at one point going from roughly an hour to, from context, roughly a year).
* Beast Wars: Transformers video game shows a different version of the beginning of the series, placing it in an alternate continuity.
* Beast Wars Transmetal Megatron has massive shoulder-pads that double as a jetpack. Other Beast Wars characters that have them include Transmetal Rattrap, Rampage and Dinobot II. Transmetal Tarantulas has a variation, with huge round shoulders that double as missile launchers.
* Beast Wars, until, several episodes later, just when they'd almost forgotten, it was revealed. The second and third seasons, however, are more serialized. Skip an episode, and you'll miss at least one thing that's worth knowing later. You won't be left completely hanging, but you won't get what's going on as well as a more

devoted viewer, either.
* Beast Wars: Uprising: After Scylla's killed in the Battle of Yuss, Cybershark is put in charge of the forces remaining there. Later on, the fleet falls to the Vehicons, and Cybershark goes missing, presumed dead or assimilated.
* Beast Wars: Uprising A large number of the Maximal Command Security Force are said to be corrupt, for several reasons: The pay's not so great, they're treated shabbily, and many recruits only signed on because it comes with an exemption from The Games. Not helping is that some of the laws they enforce are ludicrously stupid and petty (for example, they're allowed to arrest people who look at their reflection for too long), so actually working out who's corrupt and who's not is difficult.
* Beast Wars: Uprising (a rarity in the stratified Cybertron). Then Megatron's boss shafts him to further his own political career, Scorponok makes a casual comment about finding a stash of energon of their own, and it all snowballs from there...
* Beast Wars: Uprising, attacking all Cybertronians regardless of faction, "sterilizing" entire planets of theirs for the same reason, and hemming them into a small "pemitted" sector by the time the story starts, shooting down anyone who tries leaving). The first calls them spoiled children who've never suffered any real hardship, and the second, Rampage, calls them out on judging all Cybertronians for what happened centuries ago.
* Beast Wars: Uprising, Beast War's Megatron managed to get away with shooting Optimus Prime in the head, but before she could vanish from existence, Blackarachnia managed to fatally poison G1 Megatron in return. The result was that without Megatron, the Autobot / Decepticon war proved far more destructive to Earth, and just in general.
* Beast Wars: Uprising, even facing very imminent death, are unable and unwilling to let go of this mentality, sending their last few troops still able to move to fight and die to hold the Resistance off just a little longer. When Ratbat tells Rodimus to have his troops pointlessly hold the line, Rodimus finally decides "screw you" and quits, taking his soldiers with him. This proves to be the smart idea, both for Rodimus, his troops, and the Resistance.
* Beast Wars: Uprising fame. Most modern-day Predacons don't follow it, for a variety of reasons.
* Beast Wars: Uprising features snippets from the owner's manual of an Overcharge combat drone. Underlying the gag in the story of the drone being a poorly designed mess, the manual features lines like "Purchasing the internment era Terrorbot triple conversion heavy combat support units to thank."
* Beast Wars: Uprising has a bunch of characters stumbling on some of his essence a very long way from home...
* Beast Wars: Uprising in a final act of suicidal spite, since Banzai-tron refuses to surrender or flee. The result is a massive explosion which takes out both ships.
* Beast Wars: Uprising In an early battle on Earth in the 80s, Sky Warp gets a stone lodged in his chest when fighting Autobots in a museum. He keeps the stone as a paperweight, and hundreds of years later it's kept in a museum of Decepticon history on Cybertron as The Stone of Sky Warp. Or as humans know it, the Rosetta Stone.
* Beast Wars: Uprising nature of the setting is almost entirely their fault... yeah, they got it coming.
* Beast Wars: Uprising who saved the planet. (Neither of these are true; Lio did cause or allow some morally ambiguous things, but he was generally a good guy who was entirely right to rebel.) There are also lots of smaller errors—most clearly, the "G" in "G-virus" is claimed to have stood for "Genesis", when it actually stood for "Galvatron."
* Beast Wars used a similar transition exactly once, when the Maximal symbol on Cheetor's forehead randomly spun off right into the screen. Then, the scene still went on for a couple of shots.
* Beast Wars usually has the characters use weapons that look like they came of the beast mode of the transformer and only characters that have flight capable beast modes can fly, a distinction stretched when Inferno came but flying ants aren't

unheard of. This means that Optimus Primal's twin swords and jetpack look out of place on a gorilla but would have been more appropriate for the bat form he was originally convieved with. It looks less out of place after the upgrades when more once earth bound bots got flight modes.
* Beast Wars version of her that never made it into the cartoon plays it straight.
* Beast Wars was a last minute add on and able to be easily removed... with the attachment plugs on her chest in unfortunate places.
* Beast Wars Waspinator is shown being worshiped as a God by the protohumans.
* Beast Wars was plot-significant throughout the second season. It not only spread outward all the way to Cybertron, but traveled into the future as well.
* Beast Wars was rated a reasonable PG... but the episode "Double Dinobot" has the message "hey ian go fuck yourself" written in a substitution cipher. Having a "fuck" would normally garner an M rating.
* Beast Wars wears his callous contempt for everyone and determination to put himself first like a badge of honor. Too bad it's not really true.
* Beast Wars: When Blackarachnia gains a Transmetal 2 body and kisses Silverbolt, she ends up shocking him. She tells him "Transmetal 2 power. Get used to it."
* Beast Wars, when it turns out Megatron's plan to go back in time to destroy Optimus Prime didn't go as completely off the rails as initially thought.
* Beast Wars when Optimus Primal got his upgrade to his Optimal Optimus form (thanks to temporarily fusing with Optimus Prime). The other Maximals initially didn't recognize him, leading Rattrap to quip about him switching bodies a lot.
* Beast Wars when the latter slips and nearly falls off of the bridge during their fight.
* Beast Wars when the recently-baseless Predacons evade a Maximal patrol.
* Beast Wars, where the robots need energon to survive, but if they're exposed to too much raw energon, they'll overload, hence why they need the beast alternate forms. Apparently, some aliens decided to seed the entire planet they crashed on with a crapload of energon, so the entire planet is unsafe to them for prolonged exposure. Notably the energon and the resulting weakness were junked in later seasons when it stopped being an entertaining plot point, and all the planet's energon was either detonated or stabilized into energon cubes (which has the side result of explaining why it wasn't a problem in the original series).
* Beast Wars which he squeezes at will to keep Rampage under his control.
* Beast Wars. While likely not outright precursors like the Quintessons, there is considerable evidence to be presented: At least two of their machines were present on or in the orbit of prehistoric Earth prior to the Beast Wars. While appearing more curious than malevolent in the beginning, by the halfway point of the show, they were clearly shown as openly hostile, and omnicidal. Consider the following:
* Beast Wars who, by the end of the episode, tears through the Pred base with ease.
* Beast Wars, who like Rattrap is loyal to Predacon ideals, but defects from Megatron's Predacons because he believes that they're not reflective of those ideals. Boiled down, Rattrap is "my country right or wrong" and Dinobot is "If the country is wrong, I must right it".
* Beast Wars who refuses to accept dishonorable means of victory (such as slipping) as valid and, in the end, proves his loyalty to the Maximals, albeit at the cost of his own life. His robot-mode helmet also evokes a samurai, as does his sword (which is quite reminiscent of a katana); the contemplation of harakiri after he percieves himself as having failed the Maximals also invokes the thought of a samurai comitting harakiri after failing his master.
* Beast Wars, with most of the Predacons, and even some of the Maximals, gnawing on the early-CGI landscape.
* Beast Wars. Years later, when they had the Transformers Hall Of Fame and would induct memorable Cybertronians based on fan votes, with the rest being preselected, Dinobot was one of the choices and beat out G1 veterans such as Soundwave, Grimlock, Jazz, and Shockwave, truly joining the Greatest of Cybertron.
* Beast, whenever his curse is only partially in effect — he's got fangs but not a big enough mouth to fit them in, so they get in the way.
* Beast with a Billion Backs adds "Stardate... The Year of the Tiger."

* Beast With A Billion Backs, leaving only Bender and his fellow robots in the "living" world.
* Beast with a Human Face: An otherwise clearly non-human creature has a human face.
* Be as Unhelpful as Possible: A character goes out of their way to not give someone useful information, usually due to lack of trust.
* Be as Unhelpful as Possible: typically providing little or no information, or misleading information
* Beatallica, a band whose oeuvre consists entirely of Beatles/Metallica mashups (example songs: "The Thing That Should Not Let It Be" and "And Justice For All My Loving"), was aided in a minor legal dispute with Sony (who currently holds the rights to most of Beatles songs) by Lars Ulrich.

* Beat Blades Haruka all get scenes in which they are locked in pillories and raped.
* Beat Bugs, Buzz asks this as Michelle (actually Kumi in a French disguise) supposedly leads the group to her castle, though because she's young and hasn't quite mastered the English language yet, it comes out "Is we there yet?"
* Beat Bugs for its third season, instead of all together like the first two.
* Beat Bugs: In "Christmas Time is Here Again", Buzz's wishes is to meet the Christmas Beetle. She spends most of the story sleeping and occasionally muttering "Christmas Beetle" in her sleep, while the other bugs try to wake her up.
* Beat Bugs in terms of the show's target age group. Show creator Josh Wakely has stated that the lack of parents is very much intentional and intended to set the show apart from others by making it so that the characters have to solve their problems themselves because there aren't parents there to fix things.
* Beat Bugs, Jay ties up one of these and takes off with his stuff in it when he runs away in "Get Back."
* Beat Bugs, Jay wonders, perhaps not unreasonably, why they should refrain from eating too many strawberries if, according to Crick's cricktulations the strawberry fields truly go on forever. Crick warns that if they eat too many, then maybe they won't go on forever.
* Beat Bugs, the Beat Bugs help Lady Madonna, who is one of these. Her children are the dolls inside her, but one of them, Pasha, has gone missing.
* Beat Bugs, this is the answer Walter gets several times when he first starts speaking to "Betsy" in "Got to Get You Into My Life." Betsy is a ball, which Walter later paints with a face.
* Beat Bugs, this is tried in "Blackbird" as a method to help Blackbird to fly again when she has a broken wing, but it fails because she pops the balloons with her working wing.
* Beat] But that's as may be. And now..." (segue to the Army Protection Racket sketch)

* Beat 'em Up if the aggregate damage from such surprises is high enough.
* Beat 'em Up, It's revealed that the Starseed and the Worldsprout, are in truth some type of energy cores which fell from a crashed starship, affecting the environments they landed in before later being utilized by the locals who presumed them to be mystic artifacts. The one who stole both of them, did so at the behest of the ship's AI, who needs them all to restart the ship, she reveals to the heroes the cores were poisoning the planet when they arrive in search of them.
* Beat Em Ups, characters have special attacks that knock nearby enemies down, but

have a health penalty if they connect.
* beaten already the worst thing that's going to happen to you, you are in for a rough ride.
* beaten to an inch of death anymore, he finally begs Slade to stop and it's one of the most disturbing scenes in the series.
* beaten to death by his cellmates after being falsely imprisoned for murder - though some viewers were put off by his eating a live chicken earlier in the episode and felt it cast doubt on his innocent nature. However, since the tragic death of Meep's actor Ben Woolf not long after the series ended, this trope seems to have taken firmer hold for his final character as well.
* beaten-up Yugo instead, all the while pretending it was "really" a Bentley.
* beat, even more impressive than the movie. Granted though, most movie makers would still end the movie adaptation with him winning.
* Beat, everyone stares at her) "...who can say she's never lied on her résumé either."
* Beate Zschäpe, a neo-nazi incarcerated in Germany for multiple murders, was represented at her trial by a law firm called "Sturm, Stahl and Heer" (storm, steel and army, all of which evoke associations of nazism). It should be noted that Zschäpe apparently selected her defenders by virtue of their names alone.
* Beat gains the wings upon becoming a Reaper, and thus the character sprite both in-battle and in the cut scenes display them.
* beat him for gold! Afterwards, he went up to Phelps and told him, "You're my hero."
* Beat: If the characters aren't repeating one another's lines, there's a good chance they're not saying any at all. You'd be correct if you guessed that some absurdist plays are light on the plot.
* Beating A Dead Player: You just died... so why are those dudes still attacking your corpse?
* beating another work that was perceived as more deserving by the audience, seemingly due to biases on the judges' part.
* Beating any game in the series without touching a single ring is akin to a
* "Beating" everyone at the card game Pazaak takes even longer. Most Pazaak players will only play for a certain amount of time (generally until you've beaten them a certain number times in a row), after which they won't play for money anymore. Even with
* beating him to death with everything he's got (and it's not working very well), so he doesn't have much further recourse.
* Beating one of the Seven Warlords of the Sea or the Four Emperors in general is this trope. The Warlords rely on their reputation just to help cull the pirate population, while the Emperors have been stated to be the four most powerful pirates in the world. Defeating any one of them could throw the balance of the Three Great Powers off-kilter.
* Beating out even Cersei is Ellaria Sand, a woman who, in her determination to avenge the death of her lover Oberyn Martell, directs her vengeful fury at the only Lannister within her reach — Myrcella Baratheon, who is not only a child but also an innocent who had no involvement at all in Oberyn's death. Neither this nor Oberyn's own vehement insistence in life that "we don't hurt little girls in Dorne" is enough to stop Ellaria from remorselessly poisoning her. Not content to (dis)honor Oberyn's memory by murdering an innocent child, Ellaria takes it a step further in the next season by

* beatmania IIDX, has white hair, has simpler details than other human characters, sports two light blue pupil-less eyes, and has no other facial features.
* beatmania IIDX Justified in that each installment builds off its predecessors in terms of features and song list, so there's very little reason to start with an older release.
* beatmania IIDX must be at 80% or higher at the end of the song or else you fail, making the endings much more important.
* beatmania IIDX". The DX cabinets were much more popular, to the point that Konami gave up on producing the non-DX cabinets. Combine that with the way the "II" and "DX" were close together on the logo, and everybody started calling the game "beatmania IIDX." It has since become the official name for the series.
* beatmania in turn brought instrument-based rhythm games to the western market.
* beatmania, scoring simply boils down to: 2 points for a P-Great, 1 point for a Great, and 0 points for everything else. For the most dense charts in the game, an EX score of 3,000-4,000 points means you did pretty well for yourself. EX Score is such an effective measure of the player's performance that many other rhythm games adopt some variation of it, with the key element being that score is based strictly on timing notes.

* Beaufort by Ron Leshem. The Israeli soldiers are taught to leave a trail of torn-off buttons and other items if they're kidnapped.
* Beau Geste) also wrote several short stories about the French Foreign Legion. In one a group of Legionnaires intent on killing "Sergeant-Major Suicide-Maker" gather naked to ambush him to avoid any tell-tale damage to their uniforms.
* Beau Geste, as the soldiers manning the walls of a besieged fortress are killed, the insane commander sets the corpses of fallen defenders back up on the walls with rifles in hand to act as decoys.
* Beau Geste features a particularly unpleasant grotesque Jewish pawnbroker stereotype. Made egregious by the fact that the scene is completely extraneous to the plot, and seems to have been thrown in just to have a chance to emphasize that Jews are filthy misers.
* Beau Geste: Gussie hangs out with his adopted cousins a lot, but they view each other with mutual annoyance. Gussie is actually pleased to role-play as King Arthur's betrayer Modred when Beau is role-playing as King Arthur.
* Beau Geste: Lieutenant Martin lectures Markoff for mistreating the new recruits and makes a speech about the honorable side of being a legionnaire. From his

sickbed, he also tries to order Markoff not to use any violence to punish two deserters.
* Beau Geste that included a number of gentlemen rankers hiding from some disgrace, from "Jean Boule", a cashiered British Officer to "La Cigale" (The Cricket), an aristocrat who is literally insane.
* Beau Geste: The brothers each jokingly claim to have the missing sapphire and make up stories about what they'll do with the money, while ducking around the issue who really does have it. Unfortunately, another legionnaire is eavesdropping on them and takes them seriously.
* Beau Geste was made. The title became not entirely true because BBC made a television version in 1982.
* Beau Jest once, so he's able to fake his way through the dinner. Her parents like Bob so much, they keep pressuring Sarah to bring him again. Naturally, Sarah and Bob eventually develop feelings for one another, to the point where Bob even considers converting to Judaism. And it turns out that Sarah's parents didn't care for Chris because he looked like a cousin they didn't like, not because he wasn't Jewish.
* Beau Peep: Dennis (the monumentally stupid one) is told the old riddle "Brothers and sisters have I none, but that man's father is my father's son!" After two dialogue-free panels of Dennis staring blankly:
* Beau Peep Egon what the soup of the day is. Egon replies "Have you ever heard of minestrone? A delicate blend of Italian herbs and spices. But it takes ages, this is turnip water."
* Beau Peep strip, Beau asks Sergeant Bidet why he and Dennis have been thrown into the brig, having been too drunk the previous night to remember anything. The Sergeant tells Beau that he threw a glass through a window, which Beau doesn't think is too bad...until he learns that the colonel was holding the glass at the time.
* Beau Peep. The Colonel goes easy on him in training and expects he'll become a sergeant very quickly.
* Beau Peep, the idea of the Foreign Legion guarding forts in the Sahara should put it in the first half of the 20th century. But apart from that, everything in the strip seems to be the present day.
* Beau Peep. The standard format of a Mad Pierre strip is: Peep tries to think of something he can do (or nor do) that will prevent Pierre getting mad at him, Pierre smacks him in the face, Pierre describes whatever Peep was doing as something that really annoys him.
* Beau-père. A 29-year-old sadsack failed musician, Remy, lives with his 35-year-old girlfriend, Martine, and her 14-year-old daughter, Marion. Remy has been raising Marion since she was 6, so when Martine is killed in a car crash, she wants to stay with him instead of going to live with her real father. She soon reveals that she's attracted to him and sets out to seduce him. He resists at first, but eventually gives in. Blier subsequently made a film of his novel.
* Beauregard bought an owl which she named Professor Thaddeus. By the end of the Nicodranas arc, Professor Thaddeus flew away, never to be seen again, and Nugget was left behind with Jester's mother, leaving the party with just Frumpkin and Sprinkle.
* Beaurepaires, a tyre and automotive services company in Australia and New Zealand, is named for its founder, Frank Beaurepaire. "Beau" is French for "handsome", and there's a "repair" in the name.
* Beauties Battling For Pride and Prestige in the 'Best Wishes' series, Ash's Pignite uses Flamethrower on Ash's Oshawott after Oshawott steals Pignte's food, and Oshawott ends up looking this way.
* Beautifly looks like an oversized butterfly, with all the cuteness that comes with. But if feeds on blood instead of nectar.
* Beautiful Agony it since all the videos are only from the neck up. The most you'd see of a second person would be mad snogging.
* Beautiful All Along: A supposedly plain or unattractive character is revealed to be beautiful.

* Beautiful All Along" campaigns that specifically denounce this line of thinking.
* Beautiful All Along), then gets a make-over that reveals her as stunningly beautiful.
* beautiful and derivative works. Notably, most interplanetary travel takes place by means of magical gates or travel through alternate planes of reality, actual space travel being largely absent.
* Beautiful aversion: Jack Links Jerky's "Messin' with Sasquatch" ads, wherein a bunch of douchebags play cruel and gratuitous pranks on
* Beautiful Bones: Sakurako's Investigation Sakurako-san makes mounted skeletons, including those of her pets. She's . . . focussed. On bones.
* Beautiful Boxer (based on the life of Parinya Charoenphol aka Nong Thoom) the title role was filled by real-life Muay Thai fighter Asanee Suwan.
* beautiful bruiser who can take on an army of delinquents with nothing but her natural strength and a WOODEN hockeystick.
* Beautiful But Dangerous, a biopic of Italian opera singer Lina Cavalieri, sobriquetted "the most beautiful woman in the world" (which was the original Italian title of the movie) at the height of her fame in the early 1900's.
* beautiful but icy by Pip, if you follow the revised ending or movie adaptations.
* Beautiful Chaos party amounts to basically this, and it causes everyone in the party to start screaming at each other.
* Beautiful Creatures not a single drop of water on him despite the raging storm.
* Beautiful Creatures, the Caster community keeps to itself. This makes dating nearly impossible for Lena, once she starts becoming interested in the mortal Ethan.
* beautiful daughters, but the daughters talk with their father's voice.
* beautiful daughter who is impatient at being cooped up in the Supervillain Lair.
* "Beautiful Day" by English folk-punk band The Levellers has occasionally turned up in adverts based on the chorus "What a beautiful day/I'm the king of all time/And nothing is impossible/In my all powerful mind". Whoever chose the song apparently missed the part after this, when it proceeds to talk about instigating a political revolution, the titular "beautiful day".
* Beautiful Deformity was mascotted by a chimera consisting of five animals, each representing a member of the band. Aoi, the guitarist, was represented by an owl, the chimera's eye. In live viewings of the album's final song each animal was ripped apart by vines, making the owl and other animals gory and even more creepy.
* Beautiful Desolation features the Fley, parasitic worms that burrow into human hosts and take control. In at least one case the host is able to exert enough will to resist, but the worm is able to suppress even that much with alcohol. They have limits, though: they can only take children as hosts and the physiological changes that they cause prevent proper reproduction.
* "Beautiful Doom" which, among other things, increases the gibs to, well, ludicrous levels.
* Beautiful Dreamer: A person thinks their partner looks beautiful when they're asleep.
* Beautiful Dreamer movie). He knows that if he returns Lum's affections, he'd have to give up his dreams of a harem (the delusional nature of that dream notwithstanding).
* Beautiful Dreamer: Often the best way to showcase the romantic lead's soft side.
* Beautiful Faraway is set on a future Earth where humanity mastered everything there was to master, but heavily damaged its own genetic code in the process. Because of this, one of the protagonists cannot have children with the woman he loves, as their genes would produce dangerous mutations if combined.
* "Beautiful Freak" by Eels, in which somebody is comforted for being not like the others, yet that makes him/her great.
* Beautiful Girls, Marty tells Willie to wait 5 years until she's 18. He turns her down but very sweetly...
* Beautiful Gorgeous. To go along with it, she also makes faces that go very against her namesake whenever she does.
* Beautiful Light, Cyrus' method of training is this way. For example, he stabs a

7-year old Mitsumi in the arm and then has her do pull-ups to teach her pain tolerance.
* Beautiful Light was raised Mitsumi from age seven by Team Galactic to be "Ultimate Weapon" for Cyrus' cause.
* Beautiful Losers: Edith was gang-raped as a 13-year-old, as described in a flashback. How this affected her is never really explored, but it may have had something to do with her hypersexuality and eventual suicide.
* Beautiful Losers, F. says that the British did to the French what the French did to the Indians back in the 1600s, creating a cycle of oppression and cultural dissociation.
* Beautiful Losers, Katherine Tekakwitha's aunts are determined to set her up with someone, to the point of attempting to trick her into marrying a young man.
* Beautiful Losers: The A. tribe is a group of Indians with only thirteen remaining members.
* Beautiful Losers: There are many parallels between Katherine Tekakwitha and Edith (both native, both die at the same age, both fascinate the narrator in a sexual way). However, Katherine Tekakwitha's virginity and purity is her most defining feature, while Edith is defined solely by her sexual experiences and sexualized descriptions of her body. The narrator can't seem to decide whether he wants a Madonna or a whore; he talks about wanting to fuck a saint and seems in love with Katherine Tekakwitha, but also thinks of Edith as innocent even though she clearly isn't.
* Beautifully" by Jay Brannan is about a girl very much in love with a boy who can't return her feelings. Three guesses as to what's holding him back, and the first two don't count.
* Beautifully of body cologne was used to repel aliens because it was just that gross.
* Beautifully subverted later in the same movie when John and the villainous banker, who wants to foreclose on the property, are arguing and lawyering up. The boy tries to interrupt, John starts to tell him "not now—" then remembers what happened the last time. He stops and lets the boy speak his piece: turns out that there is a massive loophole in the deed to the property
* "Beautiful Mashup", the Sean Kingston mashup, uses lyrics from "Beautiful Girls" to make the lyrics about it being a mashup itself.
* Beautiful People (2014) has Testemento, a bearded thug who enjoys torture and murder.
* Beautiful People (2014): Nibbio is a bald man who heads a group of thugs in breaking into peoples' homes, terrorizing them, and then killing them.
* Beautiful People do this at least once an episode. Simon and his boyfriend had a short scene like that as well.
* Beautiful People sake. Then one day she closed her beautiful blue eyes forever. The vampire doesn't grieve because he knows how to see her again. He opens the windows to the sunny blue sky...
* Beautiful People: Shots of zombies overrunning Britain are seen among the end credits.
* Beautifulpurpleflame starts with a five months pregnant Starfire raiding the fridge... for ordinary food instead of her regular mustard and candy mixes.
* Beautiful Singing Voice: A character is acknowledged in-universe as having a great singing voice.
* Beautiful Slave Girl: A girl born/raised as a slave grows up to be beautiful.
* Beauty and the Beast (1987) ensued, and viewers lost interest in the much darker storyline that followed.
* Beauty and the Beast (1987) is a fantasy-font "Once Upon A Time...in the City of New York" and Catherine works as an attorney in Manhattan while the gateway to Vincent's world is in Central Park. Catherine's boss refers to her as "Radcliffe" to razz her about her upper-crust background, but it also serves to emphasize that, despite being a native New Yorker, having gotten her education out of state makes her something of a foreigner in the eyes of her more-pure-New York-than-thou colleagues.

* Beauty and the Beast (1987). Lawyer Catherine Chandler begins keeping their secret after one of their members, the leonine Vincent, rescues her after she's abducted, beaten, slashed and left to die in Central Park.
* Beauty and the Beast (1987) (nothing to do with the Fairy Tale or Disney movie) has Catherine and Vincent helping a young Chinese woman escape an arranged marriage. Unfortunately, the man she was to marry was the son of a high-ranking member of a Triad which knew all about the World Below.
* Beauty and the Beast (2012) got terrible ratings in its second season, was the CW's lowest-rated series in 2014, and was yanked off the schedule to air the rest of its episodes in the summer. Somehow it still got renewed for a third season.
* Beauty and the Beast (2012)'s. Nicole Gale Anderson, who plays her sister Heather, also has an Asian mother, albeit South East Asian.
* Beauty and the Beast (2017): A good part of the reason Gaston is fixated on Belle is that she's the only girl in the village who hasn't thrown herself at him. LeFou points out Gaston could easily marry one of the other girls and stop wasting his time with Belle, but Gaston prefers the challenge of winning over Belle.
* Beauty and the Beast (2017). An unusual example in that Belle's "real world" is already quite magical.
* Beauty and the Beast (2017): As in the original film, Gaston is a narcissistic, sexist prick and makes no effort to hide it, but everyone in Villenevue loves and worships him regardless. It's somewhat more justified here, since this version of Gaston is a war hero, and his overtly villainous qualities are toned down quite a bit until he goes ax-crazy.
* Beauty and the Beast (2017): at the backdrop of the villagers' anti-intellectualism, Belle and the Beast bond over their shared love of reading.
* Beauty and the Beast (2017), at the end of the "Gaston" musical number, LeFou starts spelling Gaston's name out before realising "It just occurred to me that I'm illiterate and I've never actually spelt it out loud before".
* Beauty and the Beast (2017) at this point), leaping down, and pile driving Clothilde and any other villager stupid enough to go near her husband.
* Beauty and the Beast (2017), Belle rips off her iconic yellow ballgown and discards it on the ground when she rides to protect the Beast from Gaston, wearing only a chemise and petticoat throughout the final battle.
* Beauty and the Beast (2017) explains how the villagers are clueless about the giant castle only a day's ride from the village: the curse on the Beast includes erasing the castle and everyone in it from their memories.
* Beauty and the Beast (2017) features three of these written by original composer Alan Menken — as opposed to expanding the score with songs from Broadway: "How Does a Moment Last Forever" (two versions with completely different lyrics are used; one sung by Maurice and one by Belle), "Days in the Sun" (the Enchanted Objects) and "Evermore" (The Beast).
* Beauty and the Beast (2017) has a number of black people at the Prince's party. While the black singer is possible, though unlikely, in 18th Century France, black courtiers (the dancers) are pretty unlikely - though not impossible, as was demonstrated by Thomas-Alexandre Dumas (father of Alexandre Dumas), a mixed-race general during the French Revolutionary Wars towards the end of the 18th century.
* Beauty and the Beast (2017) has a racially diverse French village, with the priest himself being black. While that may be theoretically possible (though unlikely) in 18th Century France, the large number of black courtiers dancing in the prince's palace is not really possible. Then there's the interracial marriages among the French elite, Belle's two-centuries-out-of-place feminism, and commoners at the castle.
* Beauty and the Beast (2017): "Hello, Beast. I'm Gaston. Belle sent me."
* Beauty and the Beast (2017) imprisoned Maurice as soon as he found the old inventor at the fireplace, while this version of the Beast leaves the man alone until he tries to steal a rose. On the other hand, in this version it's the servants who give Belle a room, rather than the master.
* Beauty and the Beast (2017) know her mother is dead, just not why her father refuses to talk about it and why they had to leave so abruptly. She comes to

realize that Maurice was forced to take Belle and leave his wife to die alone (with her blessing) so they wouldn't become infected or be trapped in the city, which has haunted him ever since (though in the end it does boil down to the rather obvious 'the bloke feels bad his wife died and wanted to spare his daughter grim details').
* Beauty and the Beast (2017), Madame de Gaderobe dresses Tom, Dick, and Stanley up in ballgowns and makeup during the fight at the castle. Tom and Dick shriek and run away. Stanley, however, doesn't seem to mind, and even gives a large grin.
* Beauty and the Beast (2017)? No; it's used early on and never again. Et cetera.
* Beauty and the Beast (2017) pitch meeting, the Producer can sort of understand why the Prince's servants get cursed for not doing anything about his bad behavior, but he's incredulous that their curse is worse than the Prince's(since they'll die if the Prince fails to break the curse), as well as the dog getting punished.
* Beauty and the Beast (2017)'s directors talked up an "exclusively gay moment" in the film before release, which turned out to be a two-second shot of two men dancing.
* Beauty and the Beast (2017) See also Theatre below for how the prior stage adaptation used this trope (and was likely an inspiration for its use here).
* Beauty and the Beast (2017) shows the interior of the Beast's castle to be a dark and haunting with years of disuse.
* Beauty and the Beast (2017) states this reason for why the castle servants were changed into furniture and kitchen utensils by the Sorceress. Yes, they did not refuse the old woman charity, but they also didn't stop the Prince's abusive father from raising him to become a selfish jerk.
* Beauty and the Beast (2017) that he uses inhumane hunting methods in doing so.
* Beauty and the Beast (2017): Unlike the animated original, the much more intelligent Beast fits this trope immediately, and it's his intelligence and education that woo Belle over.
* Beauty and the Beast (2017), when Gaston sends everyone off to kill the Beast, LeFou starts up "Gaston, with all due respect..." Gaston cuts him off, asking if he wants to be next to be locked in an asylum cart.
* Beauty and the Beast (2017), where he liked having them buff his ego, he is openly disdainful of them because there's no challenge in courting them.
* Beauty and the Beast 60th Anniversary Edition Blu-ray Discs advertise new bonus features during the end credits.
* Beauty and the Beast: A Board Game Adventure: In the "Lumiere's Leaks" mini-game, the pipes in the cellar are leaking and dripping water. Lumiere must use his flames to keep the water drops from falling onto the floor and flooding the cellar, but if too many water drops hit his flames at one time, they will put them out. If too many water drops fall onto the floor and the cellar is flooded, the mini-game is over. By completing the first two rounds, the water level will slowly drain.
* Beauty and the Beast: A Board Game Adventure: In the "Mrs. Pott's Peril" mini-game, Chef Bouche creates these kind of flames, which can burn down the items on the shelf of his kitchen if not put out. Mrs. Potts must pour water on them to put them out, with bigger ones needing several water drops. Mrs. Potts also has to mind her water supply, but can refill it by standing under a pump. If a flame destroys a gunpowder barrel, it will explode and end the mini-game.
* Beauty and the Beast, a comet was blazing in the sky the night billionaire Elliot Burch is murdered by operatives of his rival, Gabriel. Father marks the occasion by quoting Shakespeare: "When beggars die there are no comets seen; The heavens themselves blaze forth the death of princes."
* Beauty and the Beast... a deliberate choice to make him seem even creepier.
* Beauty and the Beast adores her eccentric father Maurice, and vice versa.
* Beauty and the Beast, after Belle rejects Gaston's marriage proposal, Gaston falls over and lands in the pigs' mud hole.
* Beauty and the Beast after he lets Belle go to save her father, certain that she'll never come back.
* Beauty and the Beast After the Beast releases Belle from the Castle and informs Cogsworth.
* Beauty and the Beast. After the line "ten points for Gaston," the cards are held

up, but amusingly, one of them actually reads 9.8.
* Beauty and the Beast all sigh at Gaston at the intro to the "Gaston" song.
* Beauty and the Beast, although that one still gets lots of d'awwww....
* Beauty and the Beast and described in song as "such a tall, dark, strong and handsome brute".
* Beauty and the Beast, and his behaviour after Belle leaves is very reminiscent of a suicidal major depressive episode.
* Beauty and the Beast and simply drew Belle and the Prince over Aurora and Phillip.
* Beauty and the Beast and the Beast gave her ALL the books, which meant Belle had permanent ownership of something she truly cherished.
* Beauty and the Beast, and the enchanted objects' reaction when Cogsworth tells them.
* Beauty and the Beast, and the writer's own confirmation indicates that each day he remains a Beast results in his mind slipping into the savage monster he appears as. Sure he's angry, short tempered, and violently destructive, but years of isolation, loneliness, and being driven mad from a curse he's had since he was a child has made him just as equally troubled.
* Beauty and the Beast and throw her father in the asylum if she won't submit to him.
* Beauty and the Beast. And yet another after stabbing the Beast in the side.
* Beauty and the Beast another one year later ("Friend Like Me", losing to one of the Rice compositions, "A Whole New World").
* Beauty and the Beast, a prince is turned into a beastly creature by a fairy/enchantress he angered.
* Beauty and the Beast are the contrasting type: Lumiere is the tall romantic, and Cogsworth the short grumpy one. Both are servants in the Beast's household providing commentary on Belle and the Beast's developing relationship.
* Beauty and the Beast, are two of the most obvious examples, with the ballroom in the song "Beauty and the Beast" in the former and the escape from the Cave of Wonders in the latter being particularly obvious (and jarring) examples.
* Beauty and the Beast, as Belle and Mauriece are trapped in the cellar, Chip starts Maurice's wood chopping machine, and after it smashes through the cellar door and explodes, he says "whoa! You guys gotta' try this thing."
* Beauty and the Beast as part of the curse, and explains that the villagers (including Mrs Potts's husband) had their memories of the castle erased.
* Beauty and the Beast at the end of the movie. Yet he was also happy to kiss Cogsworth after they successfully chase off the villagers.
* Beauty and the Beast at the Studios? It opened the same day the movie opened in wide release in 1991, and given the previous tendency of new release tie-in shows to last until the next big release came along, it should have lasted about a year. And has been credited for inspiring the company to adapt the show into a full-fledged Broadway musical in 1994!
* Beauty and the Beast, Beauty and the Beast turn out to be first cousins: his mother and her biological father are siblings.
* Beauty and the Beast", Beauty has repeated dreams of a handsome young man begging her to save him. Only after she agrees to marry the Beast does she realize that he and the man in her dreams are one and the same.
* Beauty and the Beast because his animalistic legs aren't built for it.
* Beauty and the Beast: Belle describes Gaston as being "Boorish, Brainless...", and she's quite on the money, with Gaston being illiterate and airheaded while also being arrogant, sexist, and rude.
* Beauty and the Beast, Belle does a quick gasp and turns away in horror when she first sees Beast.
* Beauty and the Beast: Belle is rescued by the Beast from a pack of wolves after leaving his castle, which is what convinces her to return to said castle in order to patch up his injuries.
* Beauty and the Beast, Belle is the first person after the Enchantress to actually tell off the Beast for his behavior and stand up to him.

* Beauty and the Beast, Belle says this after she's comforting the dying Beast.
* Beauty and the Beast. Belle's dance with the Beast is a clear homage to the Dance Of Romance in the Disney adaptation listed above, but given that Belle asks the Beast to dance only because she wants to make a deal with him to see her family again and that the dance ends with the Beast refusing to honor his end of the deal and Belle shouting at him that he disgusts her in response, it ultimately doesn't turn out very romantic.
* Beauty and the Beast: Belle's Magical World, he struggles to find any redeeming qualities in the video. Eventually, he admits that two of Lumiere's lines during his and Fifi's runaway sleigh ride sounded witty.
* Beauty and the Beast, Belle wears a pink dress and Beast wears a blue shirt and cape.
* Beauty and the Beast be out of work if such movies continued to thrive.
* Beauty and the Beast: Besides the Bimbettes trio and Bebette, in the song "Belle", while Belle is riding on the back of a carriage cart, one of the merchants selling bread to one of his female customers and is very clearly eyeing her very noticeably exposed cleavage.
* Beauty and the Beast, but even then quickly mellow out once they lose their wealth.
* Beauty and the Beast. But in the end, it is clear that the opposite was true.
* Beauty and the Beast but still can't look past his appearance (and in some versions is all too infatuated with a prince from her dreams – actually the Beast's true form), but nearly losing him makes her finally realize that she loves him.
* Beauty and the Beast, but the film will be released there anyways with a 16+ rating.
* Beauty and the Beast, but these shows never made it past the pilot episode. The episodes in question were eventually released on DVD and billed as direct-to-video sequels.
* Beauty and the Beast by Gabrielle Suzanne Barbot deVilleneuve, the prince's mother leaves a fairy advisor to watch after her son while she goes to fight in a war. When the prince is older the fairy tries to seduce him; he refuses her, resulting in his transformation.
* Beauty and the Beast by making the villain ruggedly handsome to contrast with the monstrous but good-hearted Beast.
* Beauty and the Beast character to being the main villain of the film.
* Beauty and the Beast, Cogsworth and the wardrobe are portrayed as a couple, but are much more reserved about it than Lumiere and the duster.
* Beauty and the Beast, Cogsworth is the only character who thinks that everyone else singing "Be Our Guest" and treating Belle with food behind the Beast's back is a bad idea and tries to stop them. He eventually joins in on the singing and dancing near the song's end.
* Beauty and the Beast concerns the denizens of a society living in the various tunnels beneath New York City, occasionally interacting with normal humans such as the heroine.
* Beauty and the Beast confirmed (well, mostly confirmed, at least, since his voice actor begs to differ) that he did, in fact, perish.
* Beauty and the Beast (Dingo Pictures) again when he and the other lackeys had already ruined it once.
* Beauty and the Beast (Dingo Pictures): Nearly everyone is more of a jerk than they are in traditional versions of the fairytale:
* Beauty and the Beast: During the battle of the castle the Wardrobe catches one villager in her drawers and spits him back out in rather hideous drag, with makeup. Prompting a rather girlish scream from him.
* Beauty and the Beast explicitly takes place during this timeframe after he had saved her life, which may make Belle's actions a little more rational.
* Beauty and the Beast features dancing plates and candles. Justified as they where part of the castle staff who was turned into household objects as part of the Beast's curse.

* Beauty and the Beast fight back, he still manages to put up a decent fight for a little while.
* Beauty and the Beast frightening than he ever was before the Enchanted Objects fight back.
* Beauty and the Beast from an underground world of magic and mystery). Despite its brief run and disappointing third season, it spawned a vast and enthusiastic fan following.
* Beauty and the Beast' Gaston chases the Beast onto the rooftops of the Castle.
* Beauty and the Beast, Gaston does an evil laugh before he taunts Beast.
* Beauty and the Beast," Gaston has his followers pick Maurice up and throw him outside.
* Beauty and the Beast, Gaston is chasing after the Beast, following him across the roof, running past a row of gargoyles in the darkness. Then one of the gargoyles moves...
* Beauty and the Beast: Gaston is inspired by the townsfolk's mockery of "crazy old Maurice" in order to blackmail Belle into marrying him.
* Beauty and the Beast, Gaston makes it quite clear that his dream marriage with Belle includes her having "six or seven" sons with him, massaging his feet, and no reading. This is taken one step further in his song in the musical ("Me"), in which he sings that women "occasionally" serve a purpose in marriage, specifically "extending the family tree". He's clearly portrayed as a villain because of this.
* Beauty and the Beast. Gaston, meanwhile, is the tritagonist (and antagonist), having an important part of the story and existing to serve as a contrast to the two characters.
* Beauty and the Beast, Gaston mentions eating several dozen eggs for breakfast every day. Possibly with shells on.
* Beauty and the Beast: Gaston slowly slips into this when Belle constantly rejects him, since he thinks he "deserves it".
* Beauty and the Beast", Gaston succeeds in killing the Beast in front of Belle but the Enchantress revives him later on in his human form to give him a second chance at breaking the curse. The now-human Beast rescues Belle from Gaston and resolves to help her and Maurice travel to safety without telling them who he really is because he believes that he doesn't deserve to keep Belle to himself. Meanwhile, Belle is grieving over her beloved Beast's death and yet can't help but be drawn to the mysterious cloaked stranger helping her who reminds her oddly of the Beast...
* Beauty and the Beast: Gaston tries to blackmail Belle into marrying him by threatening to throw her father Maurice into an asylum (the older man rambles about Belle having been taken prisoner by the Beast). When Belle returns home to save her father, Gaston leads a mob to commit Maurice until she reveals the Beast's existence to the villagers.
* Beauty and the Beast (Golden 1992). Here, he's somewhere in between. He's not quite as malicious as in Phelous' other videos, but he still takes a rose from the Beast's garden immediately after being told not to.
* Beauty and the Beast had the enchantress give the stipulation that if the Beast could learn to love someone selflessly, and have his love returned by the time the petals fall off a magical rose, the spell would be broken. Possibly to Teach Him A Lesson but her motives aren't revealed.
* Beauty and the Beast has a climactic scene towards the end where Belle calls out "Beast!" The audio commentary notes that they'd forgotten to give the prince a name.
* Beauty and the Beast has Beauty telling her suitor that when she does marry it will be out of love, not need.
* Beauty and the Beast has Belle's father Maurice. He invents strange contraptions, gets lost in the woods on his way to a fair, ignores his horse Philippe's instincts to turn back, and ultimately ends up as the Beast's temporary prisoner.
* Beauty and the Beast has Belle's father's horse, Phillipe, run back to get help when Maurice is imprisoned in the castle.
* Beauty and the Beast has Gaston who does lots of things when he's not plotting evil such as decorating his place with antlers, taking part in spitting contests,

drinking beer with his buddies, and trying to play chess. And no one does any of those things like he does!
* Beauty and the Beast has one that is described in the script as "the kiss they have each been waiting a lifetime for."
* Beauty and the Beast has the ballroom dance during the song of the same name, with the 'camera' sweeping upwards to the chandelier.
* Beauty and the Beast has the mane of a lion, the beard, horns, and general head structure of a bison, the brows and arms of a gorilla, the eyes of a human, the tusks of a Eurasian wild pig, the torso of a bear, and the hind legs and tail of a wolf.
* Beauty and the Beast has the villain Gaston, who starts out as just a vain, preening buffoon, certainly malicious, but more ridiculous than anything else. Then he incites a riot and leads a lynch mob against The Beast, and very nearly kills him.
* Beauty and the Beast have a child, and while both parents were human at the time, there was enough of Beast's powers transferred to make the child able to transform into a multi-limbed monster.
* Beauty and the Beast, he pursues Belle solely because he believes he deserves the best wife, despite not having any respect for her passion of reading, and there being other girls in the village that adore him. After having his pride hurt by rejection, he schemes to blackmail Belle into marrying him, and uses his popularity within the village to achieve this.
* Beauty and the Beast her voice and a beast his soul, we will be forever grateful. Howard Ashman 1950-1991" This dedication also appears in the packaging of the soundtrack album.
* Beauty and the Beast. He's handsome, muscular, an excellent hunter, beloved by everyone in town, and probably the best thing to happen to Belle's village. The problem? He's vain, self-absorbed, only interested in Belle because of her beauty, rude, scheming, and crazy enough to try killing the Beast in the end. Yet, everyone is loyal to him and doesn't question his character whatsoever.
* Beauty and the Beast). However, that's only one of the six trailers included on the DVD and Blu-Ray, and the actual theatrical trailer made no bones about the movie being about a woman and a romance.
* Beauty and the Beast, however, the trope is played completely straight as she spends much of these being more of a cheery therapist for the Beast rather than the independent thinker she was in the first film. It's a reason why these two are some of the most maligned out of the direct-to-video sequels.
* Beauty and the Beast "Human Again" originally slated for this part of the film was much more specific about the passing of winter, but was dropped in part because the filmmakers were worried the audience would start wondering what Maurice and Gaston were doing all this time. They never quite solved this problem, even when the song was reinstated in the stage musical and a reedit of the film.
* Beauty and the Beast: "If she doesn't eat with me, then she doesn't eat at all!" However, Beast doesn't really bother to enforce it and Belle gets her dinner from the servants right when she feels a bit hungry.
* Beauty and the Beast In both cases, the hair being down happens at a moment when she's more vulnerable.
* Beauty and the Beast insist he wasn't deliberately aiming for any allegories.
* Beauty and the Beast. Interestingly, in Cocteau's version, the same actor played both the Beast and the Gaston-equivalent, and when the latter is killed, he takes on the Beast's appearance and the Beast's human form is that of the handsome villain. This situation leads the Belle character to muse whether she preferred this old form; this line was actually suggested to end Disney's movie as well.
* Beauty and the Beast. In the end, when he finally becomes human again, the first thing he does after the initial shock is break down in tears of relief in Beauty's arms.
* Beauty and the Beast: In the novelization, holding the map upside down is how Maurice got lost and arrived at the Beast's castle.
* Beauty and the Beast involves a stoic, beautiful woman falling in passionate love

with a giant, super-strong beast of a man. Their lovemaking is so intense it sunk the ship they chartered to a home in Ireland and they regularly demolish their cottage.
* Beauty and the Beast is also considerably bigger than Belle. In the stage musical, Belle is usually cast as short as possible to play up this aspect.
* Beauty and the Beast is a particularly hairy, extremely badass Warrior Prince whose actually less awesome when he's a normal human.
* Beauty and the Beast is a solid baritone role, as is the equally badass (though much more arrogant about it) villain Gaston.
* Beauty and the Beast is comparatively subtle about this—as Gaston gets more and more obsessed with killing the Beast, he begins to stand and move in a more bestial manner, and he stops trying to keep his hair and clothing tidy. The Beast, by contrast, seems more and more human as he spends time around Belle.
* Beauty and the Beast is cursed to look horrible by an enchantress. He doesn't earn Belle's respect or compassion until he starts acting kinder to her and the others, and ultimately their love is what breaks the curse on him.
* Beauty and the Beast is definitely one of these, but I'm not sure which.
* Beauty and the Beast is just an ordinary human with no magical or supernatural abilities. What makes him a dangerous individual is how he uses his popularity to manipulate the villagers to commit heinous acts among Belle and her father. This makes him no different than a corrupt politician who would manipulate their loyal followers into committing acts that would normally be seen as morally questionable.
* Beauty and the Beast is much less hectic, though the characters stress this is because they're highly wary due to the events of last semester.
* Beauty and the Beast is one of the most famous examples as they dance to "Beauty and The Beast".
* Beauty and the Beast, is revived and turns into a Prince when Belle tells him she loves him.
* Beauty and the Beast is so manly, it's become a meme. Say "No one is MANLY like Gaston".
* Beauty and the Beast is treated like an outcast in her village because she loves to read books. And yep, she's a brunette.
* Beauty and the Beast, Jesse Corti voiced LeFou in English and Latin Spanish, as he was born in Venezuela.
* Beauty and the Beast, kindhearted Belle is, as per usual, seen to be the most beautiful girl in town, putting very little effort in her natural lovely appearance, while the cruel Bimbettes are all tarty-looking girls, with cakes of makeup on their face.
* Beauty and the Beast kind of rain that cleansed the castle and its inhabitants of their cursed forms. The kiss Belle and the Prince shared on the dance floor moments later is no less epic.
* Beauty and the Beast launched in 2010 dropped two of the stage-version-only songs, "No Matter What" and "Maison Des Lune", plus the choreographed battle between the Enchanted Objects and the mob. The consensus is that these were dropped for pacing purposes.
* Beauty and the Beast, LeFou hides in a snowman near Belle's house when she and her father return home, then runs off to alert Gaston so he can execute his plan.
* Beauty and the Beast lets Belle go, ergo giving up his chances of becoming human again, Cogsworth comes in cheerfully proclaiming how great everything is going and how he always knew the curse could be broken.
* Beauty and the Beast lets Belle go to tend to her sick father even though he knows that doing so will condemn him and his household staff to remain cursed forever (as he doesn't know if Belle loves him in return). This shows just how far he's come as a character, as Mrs. Potts points out.
* Beauty and the Beast: Lumiere burned one of Gaston’s four stooges, Tom, this way in order to save Fifi from having her feathers (“skirt”) ripped off.
* Beauty and the Beast, Lumiere does this to Cogsworth at the end of the movie.
* Beauty and the Beast Maurice accidentally takes the wrong turn in a forest, heading down an ominous-looking path rather than the brighter looking path. It's

not long before his horse gets spooked and runs away, leaving him to be pursued by hungry wolves. Later, after leaving the Beast's castle when frightened and rushing into the woods, Belle encounters the same wolves who would've killed her had the Beast not shown up to save her.
* Beauty and the Beast, Maurice's wood-chopping machine is made from various household items, including an old-fashioned wood stove, a teapot, a chair, and of course an axe.
* Beauty and the Beast (No-one's got a swell cleft in his chin like Gaston!).
* Beauty and the Beast Of course, it also isn't clear whether Belle spends three days or three months at the castle.
* Beauty and the Beast. On Belle's first night in the castle, the servants convince the Beast to try charming her, and he "invites" her to dinner. When she indignantly refuses, he becomes angry and declares "If she doesn't eat with me, she doesn't eat at all!" Even after they start warming up to each other, she's still technically a prisoner until he realizes he loves her enough to let her go.
* Beauty and the Beast on Broadway from September 1998 to February 1999.
* Beauty and the Beast once she finds him in the Beast's castle. He begs her to leave him and get away before the Beast discovers her presence, but she refuses to leave him.
* Beauty and the Beast one guy ends up getting a makeover by a hairbrush and comb (dressed in a skirt, high heels, lipstick, etc.) while fighting the Wardrobe, causing him to scream and retreat.
* Beauty and the Beast, one of the kid-skewing television ads for it actually focused on this sequence, even using the phrase "home alone" in the announcer's voiceover.
* Beauty and the Beast. Probably justified, however, as while Gaston knows that Belle loves the Beast and tries to kill him for it, seeing them actually embrace is more than Gaston can stand.
* Beauty and the Beast promise when they find out her father could die if he doesn't get help.
* Beauty and the Beast reflects how AIDS was viewed at the time the song was written and the conditions in Howard Ashman's life as a sufferer of the disease.
* Beauty and the Beast resurrects a just deceased Beast as a human prince. Additionally, the magic emitted from their kiss transforms the castle's servants back into humans.
* Beauty And The Beast reveals that Belle's mother died from this when Belle was too young to remember her. Although given that the movie seems take place around the 18th century, it's likely one of the later outbreaks rather than the Black Death itself.
* Beauty and the Beast, Ron Perlman acquired one. On account of Perlman rarely giving interviews and being a virtual nobody at the time, most viewers didn't even know what he looked like out of makeup and the Brigade was therefore based on sheer romanticism.
* Beauty and the Beast rose (though this is not as particularly tragic), when Beauty's father picks a rose from the Beast's garden and this trespassing is what provokes the Beast to be angry with him.
* Beauty and the Beast scene, whereas Lumiére and Babette are prone to playful bickering and making each other jealous.
* "Beauty and the Beasts", complete with bulging, discolored veins all over him.
* Beauty and the Beast shows how long the Beast has before the curse becomes unbreakable, blooming until his 21st year.
* Beauty and the Beast since he's not the villain, or at least tried to project that appearance to anyone who's not familiar with the classic story.
* Beauty and the Beast since now the Beast is more conscious of being nice to her and Belle is finally able to let go of her conceptions of him.
* Beauty and the Beast sounds strikingly similar to "One Step Closer".
* Beauty and the Beast specificially states that it takes place in France ("Marie! The Bagettes!"), but some people claim that it has elements of a Bavaria-like principality.

* Beauty and the Beast story itself was at one point published in such a magazine.
* Beauty and the Beast: Sure, not being able to go outside of your castle without a mob of angry villagers trying to kill you sucks. And spending so many years locked up inside would surely start to grate the nerves. Plus you'll have to live with the knowledge that dozens, perhaps hundreds of your servants have been turned into household objects because of your jerkassery. But still there are a million cool things a massive gorilla-buffalo-boar-bear-wolf hybrid with amazing strength and agility can do.
* Beauty and the Beast tells Beauty to look past appearances and find him "no matter how I may be disguised"! This may be the reason why later adaptations of the story drop that particular detail.
* Beauty and the Beast: The Beast assumes that Maurice came "to stare at the Beast" when the latter takes shelter in the castle.
* Beauty and the Beast, the Beast continues to not have an official name with Disney continuing to make a point of calling him just "the Beast" or "the Prince".
* Beauty and the Beast,'' the Beast is actually a transformed prince, and will only turn back if "Beauty" agrees to marry him, which is why he proposes every day.
* Beauty and the Beast: The Beast is only ever called well, "the Beast" ("the" optional), except for his servants, who call him "the Master". His human form is Prince Adam, but this really only appears in supplemental material.
* Beauty and the Beast, the Beast saves Belle from a wolf pack when she tried to flee the castle. Belle takes him back to the castle to treat his wounds. He still acts like a hothead and refuses to cooperate, until Belle actually thanks him for saving her life.
* Beauty and the Beast, the Beast slashes a portrait of his human self with his claws. Forty-two minutes of the movie’s runtime later, Belle comes across the damaged painting. The prologue feels so different from the rest of the film that seeing such a direct reference to it is quite unexpected.
* Beauty and the Beast, the coatrack tugs on his ear to bring his head closer.
* Beauty and the Beast: The Enchanted Christmas, Beast forbade Christmas in the palace because that was the day he was transformed by the Enchantress.
* Beauty and the Beast: The Enchanted Christmas: Forte's keyboard turns out to be his life source, as pointed out by Fife during the final battle. Once Beast rips it away and destroys it, Forte can no longer play music and comes crashing to his death.
* Beauty and the Beast: The Enchanted Christmas: It's arguable as to how much sentience they have, but all the Cupid Babies fade away once Beast destroys Forte's organ, the source of their life.
* Beauty and the Beast: The Enchanted Christmas. It takes place in the Enchanted Castle, has Belle, the Beast, and the Enchanted Objects... and has pretty much nothing else related to the original film.
* Beauty and the Beast: The Enchanted Christmas, these would manifest as bow-wielding cherubs that torment the Beast, trying to make love seem like a mischievous, if not downright malicious thing that can't be trusted.
* Beauty and the Beast, the eponymous Beast was a human prince with a cold heart who was turned into a monster by a sorceress posing as an old woman seeking shelter. The only way for him to break the curse placed upon him was to learn to love another.
* Beauty and the Beast, the feather duster and the wardrobe are given bigger roles, more developed personalities, and names, Babette and Madame de la Grande Bouche, respectively.
* Beauty and the Beast, the first time she gave such a gesture of respect to him.
* Beauty and the Beast, the line where Gaston says "Belle is mine!" originally said "Time to die!" but was changed to the former because Disney decided the latter was too dark. However, Gaston still can be seen mouthing the original line.
* Beauty and the Beast-themed Be Our Guest Restaurant include dollops of the "grey stuff" that Lumiere offered to Belle during dinner.
* Beauty and the Beast: The members of the castle's staff sing "Be Our Guest" to Belle, while Cogsworth tries to stop them because it's against the Beast's orders.

Towards the end of the song, Cogsworth starts dancing and joining in the fun.
* Beauty and the Beast. The moral would likely be interpreted as a physically undesirable husband (as he was likely to be older than the bride) could still be kind and gentle.
* Beauty and the Beast, the now human Beast embraces Lumiere, Cogsworth and Mrs. Potts after they change back into humans.
* Beauty and the Beast. The only subversion to his seemingly universal appeal is of course Belle.
* Beauty and the Beast there is no blood on his knife, although blood does appear on the Beast's shirt shortly afterward. This could be due to the rain.
* Beauty and the Beast. There was even a song called "The Mob Song"—"We don't like what we don't understand/In fact it scares us."
* Beauty and the Beast: The song "Something There" shows the titular pair playing in the snow and realizing their feelings for each other.
* Beauty and the Beast: The villagers use a log to force open the Beast's castle door.
* Beauty and the Beast. Though he does that at night and amidst some heavy rain, so the vision of his opponent is actually somewhat limited by the surroundings.
* Beauty and the Beast (though her dress twirls during the song "Beauty and the Beast").
* Beauty and the Beast to do this after Belle rejects his marriage proposal, but decides it isn't working and throws his beer in the fire.
* Beauty and the Beast to EVERYTHING- most importantly, throwing Maurice into a dungeon just because the poor guy sheltered from a blizzard in the Beast's castle. Although he is something of antagonist at the start of the movie, from Belle's perspective if nothing else so it's a zigzag.
* Beauty and the Beast to get his sprits back up, and does his best to menace the Enchanted Objects when Gaston decides to attack the Beast's castle.
* Beauty and the Beast to help him rule. When the Prince comes of age, she tries to seduce him and turns him into a Beast when he refuses her advances.
* Beauty and the Beast: To rescue Lumiere from being melted by LeFou, Cogsworth slides down the stair banister and jabs LeFou in the butt with a pair of scissors and rescued Lumiere.
* Beauty and the Beast to talk to farm animals, but they don't seem to understand what she's saying, so it's just another reason for the townspeople to think she's insane.
* Beauty and the Beast to tell him in a positive way, but eventually just gives up and admits, "She's not coming" - which sends the Beast into a rage.
* Beauty and the Beast to when Belle first sees him. The scene of him taking Maurice away to the dungeon is done with his shadow over the servants.
* Beauty and the Beast, try to help Belle and the Beast fall in love so that the curse is broken and they can become human again. The fact that Belle is a very pretty girl who treats them kindly quite helps as well.
* Beauty and the Beast underneath his monstrous exterior and finally agree to marry him.
* Beauty and the Beast use antlers in all of his decorating. And "every last inch of him is covered in hair." Check the eyebrow action when he says that. Ew.
* Beauty and the Beast, Vincent and Catherine could usually tell when the other was in trouble. When the mind-link broke, it almost drove Vincent crazy.
* Beauty and the Beast, Vincent and Catherine first met when he brought her home after she was attacked and left to die in Central Park; given the constraints that Vincent's nonhuman appearance puts on him, it's fair to say they would never otherwise have met.
* Beauty And The Beast was a more savvy move than being the wife of a "prince" who would never actually take the throne.
* Beauty and the Beast was first taken hostage in the castle, she was kept in the dungeon. Lumiere tells Beast that, if Belle is supposed to fall in love with him, it would probably help to give her an actual room. Despite wording the suggestion in the most tactful way possible, Beast growls at Lumiere so fiercely his flames

are almost lit out before storming off. Lumiere takes that as a no.
* Beauty and the Beast was initially written as a firey Irish-American cop, but Nina Lisandrello's performance impressed the producers enough that she was changed to a Latina instead.
* Beauty and the Beast was this initially, eventually after he warms up to Belle he learns to control his temper.
* Beauty and the Beast was voiced by the then 8-year-old Bradley Pierce.
* Beauty and the Beast were also shown to be a trio of Brainless Beauties who fawn over Gaston, despite the fact that not only is it extremely clear that he's not a good person, but he doesn't seem to have the hots for them. Incidentally, their official names are "The Bimbettes."
* Beauty and the Beast. When Cogsworth and Lumiere are returned to their human forms, they squabble over who told whom so, and Lumiere slaps Cogsworth across the face with a glove.
* Beauty and the Beast, when Lefou had Lumiere cornered and was about to murder him with a torch (due to his head being made of wax). Luckily, Cogsworth successfully comes to Lumiere’s rescue by sliding down the stair banister and jabs Lefou in the butt with a pair of scissors he was using like a sword, causing this to happen by making Lefou scream while painfully jumping in the air. Less than 20 seconds later, after being rescued by Cogsworth from Lefou, Lumiere rescues Fifi from having her feathers (“skirt”) plucked apart by one of Gaston’s four stooges by spewing a blast of fire from the top of his head at Tom’s butt, causing this to happen again (Tom also gets this abuse by being launched into the air while screaming in extreme pain, just like Lefou), allowing Lumiere to gracefully catch and scoop his cute Fifi, much to their delight.
* Beauty and the Beast where saw mills don't exist, any machine capable of speeding the process up considerably is a technological improvement.
* Beauty and the Beast, which already plays on the duality of beauty and tragedy, uses the wilting rose literally as a time limiting plot device.
* Beauty and the Beast which either portray the Beast's ugliness as something he was born with instead of magically cursed with or have him remain a Beast in the ending.
* Beauty and the Beast, which ends up having the opposite effect of what he wanted.
* Beauty and the Beast, which has the smart Belle on the side of good and the dumb, muscle-bound Gaston as the main villain. Still, Gaston is defeated in a physical battle with the Beast, who is not particularly intelligent.
* Beauty and the Beast. While certainly pretty, she's described as an unparalleled beauty in the movie, which also depicts many of the background women as busty and very attractive, particularly the Three Bimbettes. Her design is taller and more slender, thus giving her a different kind of beauty than the other women. Also, she shines because of her "pure" natural beauty because she doesn't play it up (until she starts dressing more elegantly while in the castle), in contrast to all of the young women appearing in the movie. Even the only other innocent girl in the town (the one with almost no speaking lines, asked in the song "Belle" how her family is) is more fashionably dressed than our heroine, while the rest - the Bimbettes, Babette, the woman teasing the baker - use a heavy dose of sex-appeal.
* Beauty and the Beast: While lost in the woods, Maurice wakes up a flock of bats, which spooks his horse and leads to him being left behind.
* Beauty and the Beast, while the enchanted furniture are fighting off the villagers, a music box can be seen among said furniture. That music box was originally going to be Belle's sidekick.
* Beauty and the Beast, while the prince was turned into the Beast, his servants were transformed into objects by the vengeful enchantress. They also pretend to be regular objects around strangers.
* Beauty and the Beast while waiting for Maurice to come back. When he and Belle arrive, he even has coal eyes, carrot nose and branches for arms.
* Beauty and the Beast, who can't be bothered to be charmed by his superficial charms.
* Beauty and the Beast who's depicted as the epitome of outer and inner beauty and

the Beast who starts out ugly but turns into a handsome prince when Beauty realizes she loves him.
* Beauty and the Beast, who voiced, respectively, Lumiere, Cogsworth, and Mrs. Potts, also recorded their dialogue together as well. Orbach and Lansbury even recorded "Be Our Guest" together.
* Beauty and the Beast", with a princess turned into an old hag and a young boy with two jealous older brothers.
* Beauty and the Beast, written in 1740 by Villeneuve, uses a gender-reversal of this as one of its many subplots. The Beast, once restored, recounts how he was tended in boyhood by his nurse, an evil fairy in disguise, but as he grew older she began to treat him less like her charge and more as a lover, hoping to seduce him into marriage. His growing refusal of this lead to his enchantment by the spurned fairy.
* "Beauty and the Bleats" had Sheep find a Genie's bottle but wastes the first wish on a fancy hat and the second wish on a larger version of the same hat. He finally spends his third wish wishing to become human (or humanish) to get past security at the hotel his beloved Swanky (a poodle) and her owner Lady Richington is staying at, which bans sheep. However, the wish backfires because Swanky doesn't recognize him, and Lady Richington falls in love with him, leading to the rest of the episode being about Sheep trying to reverse the wish. He finally gets the Genie into giving him another three wishes and first wishes to become a sheep again, wastes his second wish on another fancy hat, and uses his third wish to turn Lady Richington into a sheep so she could stop beating him.
* Beauty and the Bogbeast, at the last minute, due to extenuating circumstances. They never seem to consider that there's nothing stopping them from coming back (it's not clear how long the series takes place over, but it can't be that much less) next year and making sure no one gets turned into a bogbeast this time.
* Beauty and the Feast: When Rui stumbles into Yamato's apartment while he's sleeping, she finds herself attracted to the sight of his abs and ends up rubbing oil all over them to admire them more. At least until he wakes up and wonders what the hell she's doing.
* Beauty and the Feast: When Yamato gets locked out of his apartment one night, he ends up spending the evening at Yakumo's apartment. Aside from some initial embarrassment, nothing remotely flirtatious happens.
* Beauty and the Feast. Yakumo is an excellent cook and pretty much everything she makes will be delicious. But she explicitly has to look elsewhere for inspiration and often copies recipes off the internet.
* Beauty and the Feast, Yamato is a 15-year-old high schooler and Yakumo is a 28-year-old widow at the start of the story, and there's clear indication that Yamato is interested in her beyond being friends.
* Beauty and the Feast, Yamato is a quiet kid most of the time who tends to go through life with a straight face. His refusal to blow up at his upperclassmen when they're bullying him for being a first-year regular and his seeming lack of motivation causes others to draw the wrong conclusions about him.
* Beauty and the Feast, Yamato is fairly quiet and straight-laced most of the time with a perpetual "I'm beat" look on his face, but even he can be taken by surprise or reduced to a sputtering mess of embarrassment, particularly when something happens between him and Yakumo or Rui. He freaks out in particular when he bumps into Yakumo in the dark and believes he groped her by accident.
* Beauty and the Geek inevitably involve a full body wax, and yet, this is a surprise to the contestants every season.
* Beauty and the Geek. In fact his was the pairing that won that season.
* Beauty and the Geek: In the Australian edition of the show, one challenge involves the titular geeks having to answer trivia questions while their underwear are attached to a hook and crank that gives them increasingly severe wedgies for every one they get wrong.
* Beauty and the Geek make lots of money), primarily because of the chorus "I've got the brains, you've got the looks / Let's make lots of money".
* Beauty and the Geek: One of the challenges had the girls playing poker and

betting on the guys' clothes.
* Beauty and Warrior, so its technically not an "anime" as it is claimed.
* Beauty: A Retelling of Beauty and the Beast and her two sisters are all Daddy's Girls, although Beauty is his favorite.
* Beauty: A Retelling of Beauty and the Beast in the family was bound to step out of line enough for the curse to stick.
* Beauty: A Retelling of Beauty and the Beast the castle so much as it is the work of the unseen servants, but the effect is basically the same.
* Beauty: A Retelling of Beauty and the Beast when Beauty mentions that a count who once courted her sister Hope turned out to have a wife in the attic.
* Beauty: A Retelling of Beauty and the Beast, which contains a number of similarities with Disney's animated version that came several years later.
* Beauty by Nancy Ohlin aka Nancy Butcher (a loose retelling of Snow White), Princess Ana is resolved to make herself as unappealing as possible. She does so in order to please her mother Queen Veda, who despises any woman that could threaten Veda's title as "Fairest of Them All." Ana won't wash or brush her hair, she dresses in servant's clothes, and she only eats pastries and moldy cheese to give herself a sickly, blemished complexion.
* Beauty Contest: A contest in which people are judged by their appearance and social grace.
* Beauty Contest features one contestant called Jeannie Tyler who rattles off this gem during the questions and answers round.
* Beauty Contest: I'm far more beautiful than anyone in this contest! I'll win for sure!
* Beauty contests, often of an impromptu sort, were a staple of stand-alone
* Beauty Contests, one round is worth a disproportionate percentage of a contestant's final score — in reputable pageants it's generally the interview round or sometimes the talent round, in less reputable pageants it could be the swimsuit round. It's not as bad as it could be, as multiple contestants can do really well in the really important round and the competition would thus hinge on the other rounds, but if there's a single contestant who does much better or worse than the others in the important round, that basically decides the pageant for her.
* Beauty Contest (their names being the only ones in the hat). At first, the two are ecstatic, until they realize Wilma and Betty would object and try to drop out, only to be informed by the Grand Poohbah that either they do it or turn in their hats.
* Beauty Equals Goodness and favor the more conventionally attractive child simply for their looks, sometimes the parent will favor the child that physically resembles them and look down on the one that looks like their spouse.
* Beauty Equals Goodness at least wasn't overnight for no reason other than being one of the good guys, story-wise). There are other examples, but she's probably the most obvious.
* Beauty Equals Goodness. Despite all of the heroic actions he did to protect King's Landing during the Battle of Blackwater Bay, nobody stands in his defense in his trial for the crime of regicide. Not one kind word, with everyone automatically believing Cersei's rather obvious scapegoating and lying witnesses:
* Beauty Equals Goodness: I am both attractive and kind because the narrative implies these traits to be inseparable.
* Beauty Equals Goodness. Lampshaded by Roxane at Act V scene II, after Le Bret comments Cyrano still is making new enemies:
* Beauty Equals Goodness: Most heroes tend to be very physically attractive.
* Beauty Equals Goodness: Not always opposites in a technical sense, and in fact is usually played at the same time. Often, the attractiveness of a good person is usually in a modest, almost innocent and "classy" way, while an attractive Evil person is in a more primal, overt, and lustful way.
* Beauty Equals Goodness), or at least conventionally-attractive, for the time and place in which she resides.
* Beauty Equals Goodness or you might end up like Celebrimbor. But evil does tend to turn formerly handsome beings into freakish monsters.

* Beauty Equals Goodness. The Drahvins are blond, beautiful women but most are just cloned slaves and their officers are violent imperialists. The Rills are hideous creatures who communicate telepathically and breathe ammonia but turn out to be peaceful explorers. The Drahvins hate the Rills because of their appearance, to the extent they refuse an alliance that could allow both of them to escape a doomed planet, instead of trying to steal the Rill ship.
* "Beauty" has the wish-granter say "A typical wish..." and disappear without improving your character's Charisma stat.
* Beauty: In the section of the book set in the future, the wilderness and all its animal species are wiped out (even the oceans) to make way for crop-growing facilities and housing for the rapidly growing population. People live packed on top of each other in tiny apartment 'boxes' and eat artificially processed food.
* Beauty Is Bad: I'm far more pretty than any of those ugly-ass ogres!
* Beauty Is Bad: Might be a villain but they are just so darn attractive and appealing.
* Beauty Is Bad This can sometimes cross over into the men's divisions with the guys getting called "gay" and "pretty boys".
* Beauty Is Never Tarnished before they turn into a puddle of slime...
* Beauty Is Never Tarnished episode "The Sweet Smell of Disaster". Adam and Georgina lay a trap for the villain and his female sidekick in a room full of soapsuds, and in the resulting fight everyone gets covered with foam. When the survivors emerge, all have suds on their clothes — except for Georgina, who's merely damp.
* Beauty Is Never Tarnished: No matter how much someone should be covered with dirt and bruises, it doesn't happen.
* Beauty, normally a pure-hearted heroine, claims she would sell her father's soul for more books, and kills/beats up some of the Beast's servants for saying anything she doesn't want to hear. She also only wants to marry the Beast for his money.
* beauty pageant where she is shocked and disappointed that she doesn't win. Hit even harder in the P4 Golden edition of the game: after receiving an (obviously misdirected) love inquiry from Yosuke, she interprets it as a genuine expression of interest to Yosuke's horror before squashing his bike.
* Beauty Pop Kiri spills coffee on her sweater on a chilly day and Narumi gives her his heavy uniform jacket on the way home.
* Beauty Pop: Ochiai for Kiri, although he doesn't give up; possibly Billy for Kiri as well, but it's hard to say.
* Beauty Pop of former pair are laid-back, considerate and shy, while the latter are selfish and boisterous. Naturally, the first pair is calm and lovey-dovey while the second is constantly bickering.
* Beauty Queens is about a plane of girls going to compete in the Miss Teen Dream pageant.
* Beauty Queens is a satire of the media, consumerism and gender roles.
* Beauty Queens: Jennifer rescues Sosie from a giant snake. Later they become a couple.
* Beauty series features more of a sexual indentured servitude. Before they're permitted to take rulership, young nobility and royalty are sent into training as sexual slaves. It's also a means a social mobility, as commoners and lesser nobles may also submit themselves for the same treatment. Slaves may also beg to remain so for life.
* Beauty Shop, after Gina gives Elizabeth the bank teller a makeover in an attempt to get a loan:
* Beauty's sister Hope is in love with a man who wants to leave the city and become a
* Beauty, the Earth has had all its wilderness wiped out, followed by any and all crop growing facilities.
* Beauxbatons order out for him. She apologizes afterwards, admitting that she thought it was something minor rather than them harboring an escaped (but innocent) felon.
* Beaver and Steve wants Steve to eat it, and is willing to go to great lengths to

force him to do so. There's also a wedge of cheese who's overjoyed when it comes time to be eaten, because it's the equivalent of a warrior's death for him. Too bad Steve has a haunted filling, so the ghosts eat the ghost cheese before it can ascend to Heaven.
* Beaver Falls is about three British teenagers who get to work at the title summer camp in California. There are at least three real places in the US called Beaver Falls, exactly none of which are in California - and in the case of the camp, California was played by South Africa (and few if any of the "Americans", this being a British-Canadian-South African co-production, were played by actual Americans).
* Beaver. However, she subsequently seems to get over this fairly easily, with little on-screen explanation.
* Beaver is revealed to have a working knowledge of explosives, which he learned from a stuntman who worked for his father and which he's previously used to help Hart Hanson create special effects for his amateur movies; this is one of the pieces of evidence that points to him being behind the bus crash. Not a full example, as Hart and his films are introduced back in season 1, it's established early in season 2 that Beaver knew the stuntman, but his having learned enough to single-handedly rig a remotely-detonated explosive that sent a bus over a cliff is all new information.
* Beavers are drawn with white incisors, although the one in "D'oh Canada" is more accurately drawn with yellowish incisors.
* Beavers are usually drawn with white teeth even though real beavers have yellow or orange teeth.
* beaver secretions, a technique also used for French perfumes for at least 200 years.
* Beavis and Butt-Head, after apparently dying Beavis is sent to St. Peter who reads through a book of his life. He mentions that Beavis once passed out chocolate laxatives to his kindergarten class.
* Beavis And Butthead: A health inspector visits the boys while they're working at Burger World.
* Beavis and Butt-Head alcohol. They attend as well, and get bored from listening to the other attendees. Over the objections of the group leader, they convince the people present that a tall cold one would be pretty good. The episode ends with the entire group drunk off their asses in a bar, with Beavis and Butt-head trying to get the bartender to serve them drinks.
* Beavis And Butthead, also rather attractive, who mistakes his aimless rambling for deep thoughts. Unfortunately, by the time they get back home they've forgotten the whole thing and end up blowing each others' chances.
* Beavis and Butt-Head, although she means well she is very overprotective of him and treats him as if he were a five-year-old even though he's around 12.
* Beavis And Butthead, and having just as unappealing faces as their sons.
* Beavis and Butt-Head and poops on the floor, causing a whole swarm of flies comes in through the broken window.
* Beavis and Butt-Head and tells Butthead he knows this guy who wants to know what it's like to have babies.
* Beavis And Butthead and you get the cruelest five-year old-minded fourteen-year-old low-lives that one could ever meet.
* Beavis and Butt-Head an evacuation for the apocalypse in one episode. Naturally, rather than being horrified, they delight in how everything is now free and all the toilets in town are available to them.
* Beavis and Butt-Head a rather large woman comes into Burger World and orders "a large chocolate shake, 3 orders of onion rings, an apple pie, and a diet cola".
* Beavis and Butt-Head are both deliberately rude, childish, and insensitive to everyone they meet.
* Beavis and Butt-head are not real. They are stupid cartoon people completely made up by this Texas guy
* Beavis and Butt-head are not role models. They're not even human; they're cartoons. Some of the things they do could cause a person to get hurt, expelled,

arrested... possibly deported. To put it another way, Don't Try This at Home
* Beavis and Butt-Head are on a "Scared Straight" field trip to prison. Butt-Head is straining nervously on the crapper surrounded by maliciously laughing convicts (and Beavis) - when they see one guy's Iron Maiden tattoo and they all bond over heavy metal, Butt-Head relaxes - audibly.
* Beavis and Butt-Head are the other spanner. Dallas Grimes uses the boys' libido to get them to go to Washington, DC, hiding a deadly virus in Beavis' pants. Instead, their crazy road trip separates the two from Dallas, leading to her and Muddy getting arrested and the virus back in the hands of the US Government.
* Beavis and Butt-Head at one point, encounters a VERY obscure, head-scratching example of this that left many viewers completely baffled and unaware of the meaning behind a single line for years. During one of their Music Video commentary segments, Beavis and Butt-Head watch a scene with elderly people. Beavis quips the line "I've got the V-C-Arrrrrr!!!" (VCR) in an extremely sarcastic voice. Butt-Head responds more or less with "Uhh What the hell are you talking about?". Beavis insists that it came from those old people "from that commercial.". Butt-Head insists that Beavis is making things up and he has no idea what he's talking about, he's never heard it before, and to shut up. Most viewers for the longest time had no idea what he meant by "I've Got The VCR". Especially anybody outside of a specific county in Texas where a certain mercilessly overplayed amateurish local electronics store commercial from the early 90's, originated from.
* Beavis and Butt-Head, Beavis and Butt-Head are about to hook up with Lolita and Tanqueray when Captain Dick Jackman cockblocks them and the two girls end up making out with two members of the production crew instead.
* Beavis and Butt-Head, "Beavis and Butt-Head Are Dead", when a rumor goes around the school that the titular duo died (actually started by them), at the end they show up at their own memorial causing Principal McVicar to have a panic attack and we see a montage of the duo causing various acts of destruction and chaos throughout the series, many of which McVicar wasn't present for.
* Beavis and Butt-Head, Beavis and Butt-head take the roles of Scully and Mulder, and get a tip from Deep Throat. Angered, Beavis yells "Dammit, you're always pulling this crap! If you know everything, why the hell don't you just tell us so we can go home! Now it's gonna take us another 45 minutes to figure this out!" Deep Throat initially refuses, but "Scully" persuades him with a kick to the crotch.
* Beavis and Butt-Head. Beavis frequently refers to his own mother as a slut, but he says it like he's proud of her!
* Beavis and Butt-Head, Beavis starts feeling stomach cramps and due to watching a movie about a pregnant woman, begins thinking he must be pregnant too. He then goes through the whole episode hearing about various symptoms of pregnancy and thinking they all apply to him. Eventually, he starts feeling strong contractions, and so he rushes to the bathroom to give birth...and it turns out he was just constipated.
* Beavis and Butt-Head. Beavis states that he used to have a friend named Daria who had died. Butthead immediately calls him an idiot and says that Daria moved away.
* Beavis And Butthead), Beavis (the Scrooge variant) argues to Coach Buzzcut (the Ghost of Christmas Future) that the future will be much different than what he's shown. In Beavis' vision of the future, he is the cyborg owner of Burger World, gunning down all customers in the store over one complaint over an order (Butt-Head's shot too, for good measure.) Buzzcut responds by grabbing Beavis and yelling "THAT IS NOT THE FUTURE!"
* Beavis and Butt-Head book, there's a page talking about "The Story of Creation".
* Beavis And Butthead both do this in "Take A Number" while waiting for a Port-a-Potty.
* Beavis and Butt-Head, Butt-head goes "Boi-oi-oi-oi-oing" in a matter similar to Beavis.
* Beavis and Butt-Head by their sheer stupidity. They have no common sense, they can only just barely read, they can't pick up on the obvious even as it happens in front of them, and they can't recognize the inherent danger in things like jumping out of a moving vehicle or touching a buzzsaw. Butt-Head is marginally the more intelligent of the two, with the keyword being marginally.

* Beavis and Butt-Head causes Todd to spill a drop of his beer on his good jeans, he proceeds to kick the crap out of Beavis off-screen. Butt-Head, true friend that he is, revels in it.
* Beavis and Butt-Head Christmas special had a segment where the two reply to viewer mail - Butt-head is dressed as Santa in a sleigh, and Beavis is up front in a reindeer costume and harness, with a bit in his mouth. Butt-head doesn't spare the whip. Pretty disturbing stuff.
* Beavis And Butthead couldn't replicate the trademark music video segments of the show in a printed medium, so instead, it had the duo read and either praise or make fun of various Marvel comics being printed at the time.
* Beavis and Butt-Head Do America, Beavis has one when the plane he and Butthead are on takes off, causing him to scream "WE'RE GONNA DIE!" over and over. Later on, when the duo fails to find Dallas, he has another one with his "We're Never Gonna Score" speech.
* Beavis And Butthead Do America. Bruce's character starts the plot by hiring assassins to kill Demi's character.
* Beavis and Butt-Head Do America carry a G rating, despite the source material not being for kids.
* Beavis And Butthead Do America : For almost the entire film, both the FBI and the bad guys think Beavis and Butthead are absolute geniuses, thanks to an absurd series of coincidences. Of course, the titular characters are completely oblivious to the whole bio-weapon smuggling situation.
* Beavis and Butt-Head Do America + gunplay somehow translate in Scandinavia to "kid-friendly entertainment".
* Beavis and Butt-Head Do America mockingly puts it feet down further at The U.S. Federal Governments incompetence, inadequacy and inefficiency, especially when dealing with dangerous criminals and terrorists, predating the 9/11 tragedy of 2001. It also shows us about life on the lam, through the eyes of two idiotic teenage boys.
* Beavis and Butt-Head Do America, Mr. Van Dreissen is arrested by the ATF. When he asks about his Miranda Rights, one of the agents wordlessly knocks him down with the butt of his rifle.
* Beavis and Butt-Head Do America; people keep recognizing them and calling the cops, but the kids are so stupidly unpredictable that they keep walking right out of the dragnet.
* Beavis And Butthead Do America. The whole thing is played as a rousing speech complete with a motivational music in the background:
* Beavis And Butthead Do America to get a sequel in 2022, some 26 years later.
* Beavis and Butt-Head Do America would put the duo on the seniors' touring bus and, as they would pass by different cities, they would all be Inherently Funny Words.
* Beavis and Butt-Head do this to each other constantly. On more than one occasion, it's actually shown as a sign of endearment.
* Beavis And Butthead do this to their neighbours (and eventually to each other) in an episode aptly titled "Ding Dong Ditch".
* Beavis And Butthead during the whole episode and after a fight, ends up lying exactly inside the outline as Beavis stands over him with the murder weapon.
* Beavis And Butthead episode "1-900-BEAVIS", the pair call a phone sex hotline. Beavis tells Butt-Head not to use their real names.
* Beavis and Butt-Head episode "Buttniks," they wander into a coffee shop and witness a poetry slam. Butt-Head goes on stage and deliberately stinks up the joint to the annoyance of the crowd. Beavis drinks lots of cappuccino (or, as he called it, "Crappuccino") and turns into the Great Cornholio and goes off on an insane incoherent rant. The audience loves it and call it "groundbreaking stuff," instead of recognizing it as the babblings of an overcaffeinated psycho.
* Beavis And Butthead episode "Buy Beer". The boys watch a television commercial for a non-alcoholic beer, which states you don't have to be 21 to buy it (because you can't get drunk on it, which the commercial also repeatedly says). After procuring it they are completely convinced they are getting drunk on it (and are

acting drunk) until a passing police officer tries (unsuccessfully) to get them to do some sobriety tests. Then he notices the beer is non-alcoholic, at which point he concludes “You’re not drunk. You’re just stupid!”
* Beavis And Butthead episode "Citizens Arrest", the titular duo get beaten up by a police officer after refusing to serve him at Burger World.
* Beavis and Butt-Head episode "Crying" shows the titular characters as old people living in a rest home, with Butt-Head still making fun of Beavis crying. Butt-Head dies, but Beavis was not upset about it.
* Beavis and Butt-Head episode "Die Fly Die" has Beavis trying to kill a fly with what appears to be a hedge trimmer rather than a chainsaw.
* Beavis and Butt-Head episode features the pair trying to buy a bag of pork rinds from a vending machine, only for it to get stuck. The rest of the episode revolves around them trying to get it out. Butt-Head eventually wanders off to get change for a dollar he managed to panhandle up, but ends up spending the whole thing on a ton of expired nachos at the Maxi-Mart, and promptly forgets about Beavis, who is left still standing around the machine.
* Beavis and Butt-Head episode "For Better or Verse" Beavis lights his lighter while Butt-Head sprays a can of aerosol into the flames to experiment; as a result, Beavis catches on fire.
* Beavis and Butt-Head episode had the duo steal balloons from a vendor in order to get high from the helium after they inhale it and comment how funny they sound they exclaim "Oh no, we're neutered!"
* Beavis And Butthead episode had the pair attempting to mail themselves.
* Beavis and Butt-Head episode "Tornado", this is what Beavis thinks tornadoes can do to people.
* Beavis and Butt-Head, especially in the earlier episodes, often experienced things that should've killed them like the tornado episode for instance.
* Beavis And Butthead, even when their pranks once caused the health inspectors to close the store.
* Beavis and Butt-Head frequently refer to their penises as "The Captain."
* Beavis And Butthead got in on the act, appearing in a series of commercials for mints, of all things, in Japan.
* Beavis and Butt-Head got in on the Barney-bashing with its ambulatory stuffed dinosaur whose gloves get set on fire while taking a cake out of the oven.
* Beavis and Butt-Head had Buzzcut trying to make the titular morons laugh. He starts calling attendance, with names like Butkus and Gaylord. Naturally, they're all actual students.
* Beavis and Butt-Head had multiple teachers and classrooms, but sets are cheaper when everything's animated anyway.
* Beavis and Butt-Head had not one but two different Content Warnings during its run; apparently the first one wasn't quite serious enough, so they changed it up a bit without sacrificing the funny:
* Beavis And Butthead had the boys break a motivational speaker who had been brought in to teach the students good manners. They break him again when he shows up to get the kids to sell candy.
* Beavis and Butt-Head had the boys try some frozen yogurt. They decide it tastes like paint, so they use it as paint to vandalize the mall. Granted, Beavis and Butt-Head may have tasted paint. One ep did show them getting high off the fumes.
* Beavis and Butt-Head had "The Final Judgment of Beavis", in which St. Peter reads Beavis a list of his sins.
* Beavis And Butthead - happens to Beavis when they buy a bunch of balloons at a marine park (hearing earlier how dolphins are in danger of choking on balloons). Butt-head gets him down with a slingshot - hitting Beavis in the crotch and making him let go.
* Beavis and Butt-Head has an instant where the duo are watching a music video as usual, until Butthead complains that he's tired of seeing "smartass college students and water" in music videos, and offers that they should just turn the TV off. Beavis agrees, and there is about one and a half minutes worth of the two chit chatting about their day until they forget what they turned the TV off for and turn

it back on.
* Beavis And Butthead has a Rush Limbaugh-type in Gus Baker, who invites the boys as guests on his talk show due to a misunderstanding (they called in thinking his disapproval of music videos was because the videos sucked, not a moral objection like Baker actually said). This bites him in the ass in a major way, as Beavis and Butthead end up alienating Baker's audience, gets his show cancelled after Beavis moons the camera and ruins his grass-roots presidential campaign.
* Beavis And Butthead has Beavis accidentally fall into a pool of sharks. He pees in the pool, setting off an alarm, ensuring he'll be rescued before the sharks eat him. Later, Butt-Head asks Beavis if he peed because he was smart or because he was scared. Beavis says he did it because it feels good. Butt-Head agrees; "That's why I pee in the pool!"
* Beavis And Butthead has Beavis as a commander in the military. He tells his troops that they're going to strike at dawn "'Cuz um, they'll still be in bed with morning wood".
* Beavis And Butthead has Butt-head come across the logo and whack it.
* Beavis And Butthead has eyecatches that either use "we'll be back after this" messages or fake "Coming up, this will happen to the protagonists" announcements.
* Beavis and Butt-Head has the boys forget how to urinate after thinking too hard about how to do it.
* Beavis and Butt-Head has the two roped into running a teen crisis line. Stewart calls it to talk about his bed wetting problem. Beavis recognizes his voice and starts singing "Stewart wets his bed, dah dah! Stewart wets his bed, dah dah!"
* Beavis and Butt-Head has the two walking into the local Maxi-Mart and asking the clerk how much party stuff they can buy with whatevers in their pockets (a few coins and some lint). The clerk says none, but he gives them some plastic forks and some day old doughnuts (that he picks out of the trash). The duo are satisfied with that, and we actually do see the clerk taking the coins as they leave.
* Beavis and Butt-Head have always been the same since they were kidsAnd
* Beavis And Butthead have been told to shut up numerous times by their teachers. Mr. Buzzcut has threatened to kill students who didn't shut-up.
* Beavis and Butt-Head ("Heroes", "Incognito"). Many of these episodes have aired on Viacom-owned networks overseas unedited. And this isn't even getting into the episodes that are banned due to music licensing issues or Mike Judge just hating them so much that he doesn't want anyone else to see them ever again.
* Beavis and Butt-Head (Hulk Hogan's WWE theme song), but once the video transitions from Hulk playing bass in front of the U.S. flag to clips of him in WWF matches, he and Beavis get excited.
* Beavis and Butt-Head: In "Bedpans and Broomsticks", an overweight man named Billy Bob, who is wearing a cowboy hat and smoking a cigar, who is on a treadmill while being hooked up to an EKG and is being told by a doctor how he has to eat healthy, suddenly hallucinates the doctor's face turning into a plate with two eggs as "eyes", two slices of bacon as "lips", and hash browns under the bacon, that says, "Eat me! Please eat me, Billy Bob! Have a big moist and delicious slab of Canadian Bacon! With butter and maple syrup on top! And powdered sugar, too!" He also imagines a burger prop at a fast food restaurant coming to life and talking to him.
* Beavis and Butt-Head infamously defined this trope for the '90s with the eponymous slacker metalhead duo who cared for little except for music videos and chicks. Beavis was the somewhat nicer, but also less smart, or assertive, of the duo.
* Beavis And Butthead: In one episode, a student creates a computer program to try and raiee his intelligence by 20%. It backfires when Beavis trips and accidentally unplugs the computer's extension cords midway through the experiment, causing the boy's intelligence to drop down to a level where he thinks the capital of France is Jupiter and 1 + 1 = 37.
* Beavis and Butt-Head: In one video sequence, Beavis mistakes well-known drag artist RuPaul for a "hot chick", much to Butt-head's amusement.
* Beavis and Butt-Head: In "The Future of Beavis and Butt-Head", this happens a lot when the titular boys imagine what kind of careers they may have after graduating.

* Beavis and Butt-Head involved them talking to an army recruiter for the entire episode. He showed them a recruitment video that played more like a music video, with the tagline: "We're looking for a few good headbangers."
* Beavis and Butt-Head involves the two titular characters doing this. Butt-Head is marginally more intelligent than Beavis, but it's not saying much.
* Beavis and Butt-Head is about a pair of extremely stupid and socially inept teenage metalheads.
* Beavis And Butthead is loved by many metalheads, despite the titular characters being complete idiots.
* Beavis And Butthead join a zoo tour, hoping the guide will talk about the animals "doing it", which she only does after they leave in boredom. While they're in the reptile house there's a momentary power outage that gets them in a panic, and when the lights come back on they're in a compromising position, inadvertently holding each others...snakes.
* Beavis and Butt-Head-like series and Butt-Head gets the idea to imitate that. Beavis runs into their house head first... and proceeds to knock himself out, upsetting Butt-Head that he screwed it up.
* Beavis and Butt-Head mistake a chemical train crash for the end of the world, and begin looting the town when everybody's gone.
* Beavis and Butt-Head: Monsieurs Butt-head and Beavis do this when they hear that there's a reward being offered for their missing friend. Butt-head imagines laying next to a pool while a girl brings him a drink. Beavis does the same thing — except his girl brings him a detonation plunger.
* Beavis and Butt-Head of "It's a Wonderful Life." he shows Butt-Head how much better the world would be without him, which bores Butt-Head so much he ignores the bridge and goes home.
* Beavis and Butt-Head: On a camping trip, a bear mauls Mr. Van Driesen, and cuts his song about men's feelings to an abrupt halt — and it's the high point of the trip for Beavis, Butthead, and Stuart.
* Beavis and Butt-Head once appeared "live" at the MTV Music Awards via this technique.
* Beavis and Butt-Head once thought he was pregnant due to a severe stomach cramp. Hilarity ensues.
* Beavis and Butt-Head. One episode features a substitute teacher who makes an effort to connect with the class. He assumes the titular duo are misguided youths who have never been given any encouragement. He tries to show that he trusts them by standing on his desk and falling backwards, but unfortunately, Beavis and Butt-head realize when it's already too late what they're supposed to do, and he ends up needing a substitute himself.
* Beavis and Butt-Head: One episode has the two miss the bus back home; rather than walk home, Butthead suggests they take a shortcut. The duo end up in a different neighborhood and end up spending an entire day just to get back to their school.
* Beavis and Butt-Head, on the other hand, does not fit as both Judge and MTV wanted it.
* Beavis And Butthead recalled a 2002 DVD release which featured the entire first season. While seasons 2-7 still have primitive animation compared to many animated series, they are much better animated in contrast to season one.
* Beavis and Butt-Head Revival, the technology is more or less up to date with the 2010s. Computers look modern, they mention the Internet and modern video games, one episode features a drone, and their TV has a converter box near to the rabbit ears.
* Beavis and Butt-Head scaring, with the exception of Beavis and Butthead, he just picked students out of the yearbook and chose the ones he thought looked like punks.
* Beavis and Butt-Head segment "Die Fly, Die!", after attempts to get rid of a fly using a shovel, a hammer, and a hedge trimmer fail, they use a can of insecticide but because they stay in the room and don't open any windows, they pass out. When they wake up, they see the mess their room is in and think they must have had a party in their house.
* Beavis And Butthead sit on a couch watching tv, imagining some scheme will get

them lots of money and chicks. They picture themselves surrounded by piles of money and bikini-clad women—while sitting on the couch watching tv.
* Beavis And Butthead sometimes, usually from Butthead bunging up a joke. There's some joke that goes "What's the definition of a perfect woman? Three feet tall, with a flat head to hold the beer". Of course when Butthead attempts to tell this, his punchline is "Uh... I dunno, but she'd be pretty hot!". Another time he did successfully tell the "Why do dogs lick their balls? Because they can!" joke, to which Beavis replies "Um... what's so special about that? Anyone can lick a dog's balls!"
* Beavis and Butt-Head, so they made sure to make sure it was properly nourished so this would happen, with Beavis even feeding it like a mother bird would. Naturally, this winds up having the opposite effect and helps give the baby bird to a fighting chance to live.
* Beavis And Butthead, specializes in this (with Beavis and Butthead's help). In the episode "Sexual Harrassment," he decides to sue Beavis and Butthead's classmate Kimberly (as well as their high school and teacher) for giving the boys erections. In the episode "Whiplash," he decides to sue the city and the state for an obviously false case of whiplash (which he helps to create the illusion of) and is arrested for dozens of counts of fraud.
* Beavis and Butt-Head started coming down on the show's content, this was one of the first things to go.
* Beavis and Butt-Head, Stewart's father is shown to have a hidden porn collection much to their amusement.
* Beavis and Butt-Head, the boys are watching the Salt N Peppa video "What a Man". Butt-Head responds to the line "He is the cutest brother in here!" with "He's the only brother in here!"
* Beavis and Butt-Head, the duo get drunk on non-alcoholic beer. They knew it was non-alcoholic, they just didn't know alcohol is the part that makes you drunk.
* Beavis And Butthead the duo have suffered many injuries throughout the series including knocked out teeth, severed fingers, eye trauma, broken limbs, gaping wounds, etc, but they heal quickly, completely, and sometimes within the same episode.
* Beavis And Butthead, the duo practice for mud wrestling by making a mudpit in their front yard, wearing biking tops, and smacking each other with a baseball bat that has a boxing glove on the end. It is just as amazing as it sounds.
* Beavis And Butthead the duo steal Mr. Anderson's credit card and use it to buy hundreds of dollars worth of animals, meanwhile Anderson and his wife try to check into a motel only to realize that his credit card is missing.
* Beavis and Butt-Head, the duo tear off the letters of a Figure Drawing Class sign to read "U DRAW ASS." When they heard a beautiful woman say that she was going to pose nude for the drawing class, they believe that they have "the Power Supreme" and enroll just to look at her naked.
* Beavis and Butt-Head, the duo try to get money by suing people for injuries they supposedly obtained from people. Near the end, Beavis is hit by Tom Anderson's car. He isn't seriously injured but he pretends to be and shouts "Ow, my spleen!", but he grabs at his crotch when he says this and probably doesn't know what one is.
* Beavis and Butt-Head, the first thing that usually comes out of Beavis' mouth whenever he goes into Cornholio mode is to declare "I AM CORNHOLIO! I NEED TP FOR MY BUNGHOLE!" or "ARE YOU THREATENING ME?".
* Beavis and Butt-Head". The only reaction to Butt-Head doing so (twice) is his face turning red while he goes "YYYESSS!"
* Beavis And Butthead: The title characters were well known for sitting on a couch and critiquing music videos.
* Beavis And Butthead the titular characters read a page of ads, all of them for prostitutes, strippers and sex-lines. The only ad not involving sex says "assistant wanted". Their reaction? "Hehehe... it says ass!"
* Beavis and Butt-Head, the two decide that it would be a fun stunt to try. Butt-Head plays the criminal standing beside their door, while Beavis plays Robocop. When Beavis tries to ram the wall, he smacks it hard enough to knock some plaster

off it. Butt-Head goes outside and complains to Beavis' unconscious (and possibly dead) body that he hardly made a dent.
* Beavis And Butthead, the two manage to turn their bodies into the "third dimension" (becoming claymation like the rest of the characters) by inflating themselves with a fire extinguisher.
* Beavis and Butt-Head, the two occupy Stewart's house after the neighborhood is evacuated after a train carrying toxic waste gets derailed (the duo assumed everyone is gone because of Armageddon). Beavis finds a jar full of ashes, and upon Butthead telling him it's the ashes of Stewart's grandmother, Beavis thinks he meant it's the jar she put out her cigarettes in and throws it on the floor. Surprisingly, Butthead actually gets mad at him, though only because Beavis was making a mess.
* Beavis And Butthead, this exchange between the titular duo and Mr. Manners who has come to class to teach etiquette is technically true, hilariously so, when he chastizes them for making farting noises while he's trying to speak:
* Beavis and Butt-Head. This repeated for the rest of the segment whenever someone said that something sucked.
* Beavis and Butt-Head to a female character is a terrible pick up line. "Hey, Baby! Wanna wrestle?" is probably their worst.
* Beavis and Butt-Head: Towards the end of one episode, some girls tell the eponymous duo to see them again in, like, ten years. They think they've finally found some girls to score with, and Butt-Head tells Beavis back at home to hurry up while they shave their "beards" (actually hairs glued to their faces) off, saying that they got some chicks to meet in ten years.
* Beavis and Butt-Head try to arrange getting themselves (read: Beavis) hit in a parking lot by inattentive drivers quick to pony up a little cash to avoid legal action. This naturally leads to Beavis in a cart which gets locked onto the bumper of Mr. Anderson's RV, which he takes onto the highway.
* Beavis and Butt-Head try to buy pork rinds from a machine that doesn't drop the goods - they figure if they try it again they'll get two for the price of one (?!?). While Beavis guards the machine, Butt-Head cadges a dollar from an old woman and goes to get change at the convenience store. When he spots a bunch of old nachos that are going to get thrown out, he buys them all and heads home, forgetting all about Beavis.
* Beavis And Butthead try to use a rat trap on a rat that ate their nachos, but it keeps closing on their body parts (including their ears).
* Beavis and Butt-Head: Van Driesen is holding a mock graduation to boost the student's self esteem. When Butt-head comes up to gets his, he tells him "Butt-head, you have many... qualities." With Beavis he just says "Here's your diploma."
* Beavis And Butthead was initially set to air for 65 episodes according to documentaries included with the "Mike Judge Collection" DVD sets, although it is unclear if this meant 65 segments or 130 segments. The show ultimately had 200 segments during its original 1993-1997 run with varying lengths due to various changes in format throughout the seasons.
* Beavis and Butt-Head were blamed for, this episode was swiftly pulled out of rotation and later heavily censored.
* Beavis and Butt-Head were forced to take a lie detector test after being suspected of taking money from the Burger World cash register. Before they took the test, Butt-Head told Beavis that they can trick the lie detector by holding their breath. When Butt-Head steps up, the lie detector buzzes when he claims that he understands how the lie detector works but dings when he gets the number of fingers the man holds up wrong; when asked if he ever stole anything in his life, he passed out before he could answer. When it was Beavis's turn, he successfully convinced them that he was a serial killer from the 1960s, and he didn't even hold his breath yet.
* Beavis And Butthead, whenever they're aroused, or most commonly to end statements with. Would they really be Beavis and Butthead without it?
* Beavis and Butt-Head when he feels a pain in his stomach. It turns out that he's just constipated.

* Beavis And Butthead. When they tried to spend this "money", they got tossed out of the store, then went back to the copy shop and tried to spend the fake money to make even more fake money.
* Beavis and Butt-Head, when trying to build a case against someone, Beavis fakes an injury.
* Beavis And Butthead where he lives with three women in the episode "Dream On."
* Beavis And Butthead, who has ads on TV about lawsuits concerning whiplash damage and taking on frivolous sexual harassment cases. In one episode, when asked if he had ever been jailed for contempt of court, he answers that he "believe[s] that was among the charges, yes."
* Beavis and Butt-Head worked at "Burger World," whose sign is obviously a McDonald's sign with the arches inverted.
* Beavis and Butt-Head, working at a telemarketing office, read their script sheets verbatim: "Hello. My name is 'Your Name'."
* Beavis and Butt-Head would go into hysterics over any use of the word "wood", "hard", or the like. You can imagine the conversations they had in the movie when they visited the petrified forest.
* Beavis and Butt-Head would often reuse the same footage from different episodes, such as shots of them snickering, head banging, dancing, throwing stuff at the TV, fighting,etc.
* Beavis And Butthead: "You can't polish a turd, Beavis." Except Beavis already has; he keeps it in his dresser.

* Because of the popularity of the Idol Singer trope in anime, lots of voice actors have an overlap in the idol genre, especially actresses who started their career as an idol trainee before entering the voice acting industry. Voice actor idols ("seiyu aidoru") did not become popular until the late 1990s and early 2000s, when late-night anime became popular. However, the Tokyo School of Anime credits the following people for being examples that helped launch the phenomenon:

* Because of the self-enforced isolation of the country, it has been noted that North Korea retains a form of Korean which is "fossilised" from the language as spoken all over the peninsula in 1945. North Korea, because of its insularity, has also missed out on the massive linguistic changes brought about in Korean because of South Korea's enthusiastic acceptance of the cultural influence of the rest of the world. South Korea has adapted and changed and evolved since 1945; North Korea hasn't. Therefore the two forms of Korean have noticeably diverged whilst remaining the same language. When it was finished, the tunnels totaled about 85 square kilometers (33 square miles) underneath its streets and would have had space for restaurants, grocery stores, and even movie theaters. When Deng Xiaoping came to power in the 1980's, he ordered the tunnels be opened up for renting out commercial space since by that point relations between China and the USSR had stopped worsening. Though many parts of the tunnels are now officially closed for renovation, it is estimated that today up to 1 million people, mainly poor migrants from other Chinese provinces, currently live in the tunnels illegally due to it being a cheap place to live (around 500 yuan or US$57 per month).

Welch allude to this, infuriating Cohn. Since the hearings were broadcast on live TV, the public was exposed to McCarthy's tactics directly, contributing to his fall from grace, along with Cohn. Roy Cohn eventually died of AIDS-related illness in 1986, while still

denying that he was a homosexual. Also ironically, the actual Soviet Union persecuted homosexuals as well, but the Soviets did it with the idea that homosexuality was "bourgeois decadence". It's worth noting that Communism has no position on gay people as an ideology: Russian society was at fault, as homophobia dated prior to the U.S.S.R. Bourgeois decadence was just an excuse. Initially the Bolsheviks had a more tolerant attitude, too, decriminalizing homosexual sex. This was later banned again by Stalin.

* Becker is sued for malpractice by a patient who suffered a heart attack while exercising under his advice, the plaintiff's lawyer asks him to identify Becker. When Vinny points at Becker, the jury gasps dramatically, much to his confusion. "Oh, come on! Who didn't know that already?"
* Becker, Margaret and Linda accidentally come across porn on the Internet. After a few clicks, they tilt their heads to try and figure out what's going on. In another episode, Bob writes a check for Reggie, and Reggie is surprised to see a "woman" on it. Bob explains it's actually three women and a donkey, and if you flick it they move.
* Becker, Margaret finds out that Linda has been writing insulting but accurate descriptions in the patients' files to help her remember who is who, and naturally reads her the riot act. Later on, a man with a big nose named Bignozi comes in looking for an appointment...
* Becker spent several series having fierce arguments and marital troubles. Eventually, it turned out he'd lost his job but didn't have the nerve to tell her.
* Becker: The penultimate episode has John help a old lady get to Manhattan and when they arrive she can't go. Actually she begins telling a story about her son, with Becker quickly catching on even before the references to September and the view from his office spell it out.
* Becker (while drunk) come up with various inventions which, of course, have already been thought of, such as an iron and a VCR. Interestingly, all of their ideas involve getting "a flat piece of metal".
* Becker who owes her dad a lot of money. Ironically, when she took a vacation at work, she turned into a very competent employee.
* Becker with a patient who, with his red suit and goatee, looks alarmingly like the Devil:
* Becker. "You have no idea how much I hate that damn movie!" It's also implied in her expression in the following episode when Becker belatedly notices that her last name is Reinhold.
* Becket, Becket not only refuses to plead to the charges but manages to turn the tables on his accusers by reminding them that he's their spiritual father and threatening their souls if they arrest him on false accusations. Henry II, watching this turn of events from afar, breaks down laughing and says in amazement, "He's made mincemeat of them. I'm surrounded by fools! Becket is the only intelligent man in my kingdom and he's against me."
* Becket, however, returns from the second game, and he does get to speak this time.
* Beckett also has an ex-boyfriend in the FBI and has to work with him on a case.
* Beckett can also slip into a Russian accent which she attributed to a semester she spent abroad.
* Beckett can understand Russian, having spent several months as an exchange student in Ukraine. She never speaks it on the show, though, and instead goes with
* Beckett/Castle and Esposito/Ryan are investigating different murders, which they determine are related in a
* Beckett found the killer, a professional assassin, but was forced to shoot him to save Castle...before he could tell her who had hired him. Castle tries to quit after this incident, but Beckett tells him that she wants him around when they find the employer. Of course, if he tells anyone she said that there will be another shooting...
* Beckett gets her turn in the fifth season episode "Still" when she accidentally steps on a pressure-plate that triggers a bomb. When there doesn't seem to be a way to defuse the bomb,
* Beckett indicates early on she's personally familiar. Later she goes in to

interrogate one of the male subs from the club.
* Beckett is shot during her eulogy at Montgomery's funeral. Castle pleads with her not to leave him, then finally says "I love you," just before she falls unconscious. Her Plot Armor but only time will tell how the rest of the trope plays out.
* Beckett out, only for his ex-wife to show up. The two then head for the islands.
* Beckett pretty much described this as the entire point of his work — reducing language to its absolute bare necessities. (He lived most of his life in France, and wrote much of his work in French first because it forced him to be careful with his words.)
* Beckett's fans actually donated a large amount of money to a Save the Turtles foundation in his memory after the character had mentioned liking turtles
* Beckett's home murder board, where she obsessively tries to solve her mother's case, isn't precisely a Room Full of Crazy, but the authors used the similar imagery to suggest that Beckett's obsession isn't entirely sane, either — something Beckett herself readily admits.
* Beckett spent a few months in Ukraine as an exchange student, so, yes, she knows how to handle vodka.
* Beckey (creator): Unfortunately, in the world this comic’s set in (the 1950s of the future!), people aren’t very accepting or understanding of different sexual orientations. Actually, folks aren’t very accepting in general. It's a distrust of foreign cultures and ideas, mostly, mixed with good old fashioned repressed victorian standards and ideals.
* Beck from almost the entire music world. Not only that, but rumors of an unreleased song of theirs drive a huge portion of the plot.
* Beck had prominent band vocalists such as Jett Pangan (of The Dawn and the Jett Pangan Group), Raimund Marasigan (of Eraserheads), Yael Yuzon (of Spongecola), Ney Dimaculangan (of 6cyclemind), and Teddy Corpuz (of Rocksteddy) voice many of the characters.
* Beck has a hard to decipher word in between "My" and "Girl" during the chorus. Is it Summer? Sun-eyed? Cyanide? In the lyric book it says "My ... girl".
* Beck has at least a couple. Koyuki's friend Tanabe appears to be fourteen going on forty at the start of the series, and the gentleman who sells him his Fender also has some physical oddities.
* Beck has done rap, jazz, pop, rock, hip-hop, blues, country, tropicalia, techno, experimental, indie, alternative, folk, anti-folk, dance, funk... Beck has really done a lot.
* Beck, in some sequences where Ryusuke, Koyuki and Taira play their instruments, there is a CG close up of their hands on the fretboards and strumming. These were done by filming people playing, and then rotoscoping the footage to blend it with the show.
* Beck involves an autistic boy drawing penises over and over again. It turns out one of his caretakers is abusing him... In a rather humorous turn, when the titular detective tries to get the kid to draw (in a hope that it'll give him clues), Beck draws a rather simplistic pig (another detective later remarks that it looks like a potato). When we later see the kid, his father is rather puzzled by the fact that the kid keeps drawing really detailed pigs.
* Beck is absent in four episodes: "The Birthweek Song" (season 1), "Tori Gets Stuck" (season 2), "Prom Wrecker" (season 2) and "Who Did It to Trina" (season 2).
* Beck is an aversion overall. His signature "Loser" was his only Top 10 hit, and his only visit to the overall Top 40. However, he's had three #1 hits on alternative radio: The aforementioned "Loser" from 1994, "Up All Night" from 2017 and... "E-Pro" from 2005. "E-Pro" isn't as well known to the public as songs like "Where It's At" and "Devil's Haircut".
* Beck" is a very good example, in which the word "gently" can easily be misheard as "gentry".
* BECK: Mongolian Chop Squad initially play in the same band, Serial Mama, until personal differences and a missed opportunity with a record producer drive them apart. Both find success with their respective bands: Eiji's Belle Ame is

commercially-successful, backed by influential producer Ran; while Ryuusuke with BECK have a much longer arc of struggles before gaining world-wide recognition.
* Beck novels. Maj Sjöwall was an advisor for the series, though.
* beckoned them to the island. Kapura, at the time when the cans were originally launched, had been lying comatose in a storage sphere, along with the rest of the islanders.
* Beck or a figure of speech for a human down on his luck is up for interpretation.
* Beck, Ryuusuke's fingernails are removed partially as punishment for stealing a priceless guitar. Luckily, only on his strumming hand.
* Beck 's album Colors was announced in 2015 with the single "Dreams", delayed to 2016 (in which "Wow" was suppose to promote it), then finally released in 2017. Interviews over the period had him confused that his record company was taking so long with it, and after its delay until 2017, he felt the material had got so old he remixed it, after which it finally got released.
* Beck's "A Western Harvest By Moonlight" has an infinite runout groove entitled "Styrofoam Chicken (Quality Time)" that is only about a second long, but is looped forever. The only way to stop is to literally lift the needle off the record.
* Beck's commercial featured a stop-motion character, a string puppet, a hand-drawn character and a real human being all performing the same simplistic dance with the slogan "only ever four steps".
* Beck. They then quickly clothed themselves while all sweaty along with forced expressions (Koyuki is reading a book upside down and Maho is wearing her shirt inside out.) Hilarity ensues.
* Beck used to end interviews angrily if the subject of him being involved with the Church of Scientology was brought up. Back in the '90s, this wasn't widely known, nor was it publicized. But due to his reactions, his connection with the church and attempts to suppress it became one of the most identifiable things about him. He has since become a bit more comfortable about this due to the fact that he knows that his fans are mostly accepting of it, but he still leaves huge gaps when talking about his childhood.
* Becky and Darlene were hit with this too when they gave Roseanne a particularly generous Mother's Day gift as a way to suck up to attend a concert out of town. They got their trip out of town, all right...to visit their grandparents. They got to meet Bev's garden club, watch an endless vacation slide show, and sing showtunes.
* Becky Bucket: A slice-of-life object show that unfortunately never got anywhere past the pilot.
* Becky" by Be Your Own Pet. The protagonist of the song murders a girl as revenge for high school bullying. Apparently slightly based off Jemina Pearl's high school experiences. Without the murder.
* Becky by Lenore Hart, Becky Thatcher (Tom Sawyer's childhood sweetheart) passes herself off as a man and fights in the Civil War.
* Becky Chambers. By the 2050s, a group of frustrated friends kickstarted the idea for OCA, citizen-funded spaceflight. Eventually, OCA becomes a flourishing international, apolitical, non-profit force for science.
* Becky Chambers follows a group of astronauts ecologically surveying four planets in the twenty second century. Life is known to be common in this universe, but its origins are murky. On Earth, all cells have a chiral preference (left-handed amino acids and right-handed sugars.) However because both types of amino acids and sugars occur evenly when whipped up in the lab, there are two possibilities: 1. Chiral preferences are a necessity for life or 2. Life originated from a meteorite slamming into Earth, which happened to have mostly left-handed amino acids. On their last planet, they discover single cellular life that has no chiral preference. Which means life uses whatever is on hand, and so life on Earth very probably originated from off-world ingredients.
* Becky, Dominick is interrogating Becky about his missing property over the walkie-talkie:
* Becky Fischer answering trivia questions about the Bible and losing any possessions that were improved by a particular scientific discovery. At 2:52, she

loses all her possessions with polyurethane in them... which includes her spandex pants.
* Becky is this for her boyfriend in Season 6. Everyone else thinks it's weird or creepy, but he doesn't care about her disability.
* Becky kills Jos. Thackeray cheerfully admitted that he hadn't a clue.
* Becky Lynch: a foot soldier for the Vegas Irish mafia. Tends to shoot first and ask questions later, likes being in charge but doesn't have the patience or long-term planning stratagem to be the boss.
* Becky Lynch) and distracts Becky to cause her to lose against Alexa Bliss, which basically means Becky was betrayed technically by herself.
* Becky Lynch by late 2018, and winner of the Women’s Royal Rumble and first-ever women's match to headline WrestleMania in 2019.
* Becky Lynch character they wanted for her. Although she dropped the character pretty quickly, she kept the red hair - and even lightened it to bright orange as part of a steampunk look.
* Becky Lynch. Debuted in 2002. Retired in 2006 until returning to wrestling as a manager in 2011.
* Becky Lynch finally became part of her character and it was well-received.
* Becky Lynch frequently posts pictures from the gym to her Instagram, and calls herself 'The Delty Diva'. She too is a former bodybuilder and personal trainer.
* Becky Lynch has an outfit and entrance that is very inspired by steam punk. She wears a pair of goggles as accessories, and a blast of steam comes up from the entrance aisle when her music plays.
* Becky Lynch is a natural dark blond, but dyes her hair various shades of red.
* Becky Lynch look with her hair dyed orange. After becoming the Man, is became more of a dark strawberry blonde.
* Becky Lynch made her debut as Rebecca Knox in her homeland of Ireland at 15, and first appeared on the North American indy circuit at 18.
* Becky Lynch over this-turning Becky into an anti-hero and Charlotte a Heel.
* Becky Lynch's crime family) keeps his money. Wade goes to Lombardi to apologize and give back some of the money (while keeping Becky and Mason's names out of it) and winds up being killed. Becky would later kill Lombardi in revenge, then vowed not to get attached to anyone else ever again.
* Becky Lynch teamed up for a mixed tag team match. After Becky got the win for their team, Cena congratulated her and offered her a handshake. She instead did his "You Can't See Me" taunt and walked away.
* Becky Lynch throwing a stiff punch. The image of her with blood pouring down her face just made her look even more badass and attractive.
* Becky Lynch type of personality and often wears attires which sparkle and shine. Even before her heel turn, Becky was always the "lass kicker" who just enjoyed to fight and wasn't bothered about looking glamorous in front of the camera.
* Becky Lynch. Various skits between the two of them involve Sami trying to corrupt Becky and Becky likewise trying to turn Sami good again.
* Becky Lynch was a heel who was widely popular with fans and almost always cheered, forcing WWE to turn her face, unlike Reigns who as a babyface was very unpopular and heavily booed.
* Becky Lynch wears goggles as part of her "steam-punk" persona, but they serve no real purpose in the ring.
* Becky Lynch whether heel or face is an aggressive headbanger who just seems to have unending sources of energy. A glance at interviews shows she's like this in real life too.
* Becky Lynch, whose specialty is finding people who are hard-to-find.
* Becky, , who tried to convince herself that Joyce's boy-crazy personality was all an act. She was wrong.
* Bec Noir, two of the three most evil characters in the comic. At first, this is deconstructed by showing how naïve and easily tricked he is (we're shown an alternate timeline where Terezi somehow convinced him it was a good idea to attack a boss five times more powerful than him which predictably led to his death) but it's later reconstructed as these very traits allow him to help, support, and lead

his allies and friends.
* Become a Real Boy: A non-human character whose goal is to become one.
* become a "real" word, meaning splashing a liquid up against a surface, creating foam and turbulence. For instance, the tradition of tossing a bucket of water against someone's face, or waves hitting a cliff face.
* become champions themselves; sure, they're changed (Kai'sa is bonded to a void creature, Yone has a demon mask that he can't remove, and Senna has dark powers), but all of them are still sane and all on the good side.
* become even messier faced by Sailor Moon was an incarnation of Chaos too, so Sailor Moon's battles were part of the Sailor Wars all along.
* become extremely wealthy with his inventions, particularly Reed Richards.
* Becomes a big plot point in Banner III, when Jinto's foster parents (leaders of
* Becomes absolutely devastating when the Seanchan empire, which enslaves channelers with Restraining Bolts
* becomes a disciple of Aldur between him and Polgara is finally settled in the positive.
* becomes a food critic, he writes a review without using the letter E. That's because the E key on his typewriter is broken.
* Becomes a great deal more extreme when a country has recently experienced a currency crisis. In the early years of this century, people used to joke that the quickest way to become a millionaire was to change one British pound into Turkish lira.
* Becomes a joke in the unfinished version of the Bad Batch arc, when Anakin notices the ship used by the titular squad has a pinup of his
* Becomes a literal run for Shasta near the end of the book as Aravis is injured and the Horses have used all their strength but they still haven't reached the good guys to warn them. Shasta isn't pleased, but runs the entire rest of the way and manages to
* Becomes a lot harder to listen to when you learn what Glitter got arrested for...
* Becomes a minor plot point when Martian B'arzz O'oomm, the Green Beetle, comes to Earth. It's already been established that J'onn regularly sends television broadcasts back to Mars, so B'arzz saying that he saw the Reach on recent news programs and came to help is a very convincing cover.
* Becomes a misnomer by Season 2, when thanks to the Quantum Entanglement Dish, their broadcast is reaching a
* becomes a neglectful father to his twin babies, Ben and Claire, as opposed to the loving, caring and devoted parent seen in Spider-Girl.
* Becomes an important point in "Cor-ai" when Teal'c is put on trial for killing a crippled old man while he was in the service of Apophis. Daniel finds out that the villagers escape through hidden tunnels when the Goa'uld come, but they won't leave anyone behind. Part of the way they exonerate Teal'c is by showing that he did what he did to save the multitude of the villagers so they could escape without being slowed down.
* Becomes a plot point when the rivalry between the Sangheili and the Jiralhanae within the Covenant breaks out to an open civil war. A war that
* Becomes a running gag once Poipole is introduced, Pikachu is tickled over-and-over when the Ultra Beast attempts to see Pikachu's electricity in action (and simply out of affection and playfulness.) It eventually stops tickling Pikachu before evolving into Naganadel.
* Becomes a running gag when Detective Gumshoe walks in, accompanied by a loud "Thump" and exclaims "Hope I'm not interrupting anything!" Cue the icy stares and Gumshoe sulking off. After which Phoenix will promptly call him over. It was a running gag in the bonus fifth case where Gumshoe would then retort "You're doing this on purpose, aren't you? Making a gumshoe run around while on duty! And on top of that, you drag me here! I've seen happier people at funerals!"
* becomes a telepathic creature but never does figure out how to use telepathy.
* becomes a traitor himself, which makes his murder of the actress a little strange.
* becomes a vampire and spends an arc kicking ass and taking names, we get dialogue

like the following:
* becomes a vampire, she can't have sex with Harry because she can't separate her desire for him from her desire for ripping out his throat and drinking his blood. Understandably, this puts a slight damper on their relationship. However, they end up getting around it by tying her up with enchanted rope (It wasn't planned that way: he tied her up because she was losing control of her bloodlust, but then their feelings for each other took over).
* Becomes a very sensitive issue if the name change has a significant reason, like gender reassignment or faith-related... and the other person
* becomes a Warden Harry realizes that the Council has a great deal of respect for his abilities: They take his apparent threat of a fight entirely seriously and show up in force, and the Wardens present are worried about having to fight him. Harry knows he tends to end up just barely surviving and is usually beaten to a pulp for his trouble, but the listed accomplishments still speak for themselves, especially for those who weren't there personally. Many younger members of the council seem idolize Harry a great deal both for his accomplishments and his presence as a strong anti-establishment voice in the organization, and even hardliners like the Merlin and Morgan have a good deal of respect for Dresden's abilities despite their idealogical differences.
* Becomes borderline canon in a completely bizarre way as of "Rickdependence Spray
* Becomes brought up again in "Pranksta Rap", where Bart's fake kidnapping helps Wiggum become Commissioner and Milhouse's dad become popular with all the hottest women of Springfield.
* becomes captured by the Terminal Column TRAITORuses an enemy ship he stole to kill Dantyren, and then for the rest of the cycle(s) deeply infiltrates the enemy all the while wearing a complex (and painful) bio-prosthetic, pretending to be Dantyren.
* becomes contacts her through Lara's brother, there are family holos in the background, and the Lara in them looks like Gara.
* becomes convinced that he, Tashigi, and Cross are right about the corruption in the people they follow and asks what he has in mind to fix it.
* becomes demonic. Case in point: when she finds out her stuffed toys have been destroyed by monster lice and breaks down crying:
* Becomes doubly chilling when you realize that the tune is changing with each passing day—"Six more days to Halloween, Halloween, Halloween..."
* become sentient and start protesting their individuality to their originals and seeing if Amy (who knows the Doctor better than anyone else) could notice the change. Turns out she couldn't, proving the ganger and the Doctor were one and the same person.
* Becomes even funnier if you consider that in the last episode of the Anime she literally just punches out the series's Cthulhu
* becomes exceedingly territorial with her new master/employer once she realizes that serving a single, reasonably nice master is a better fate than going back to the brothel she worked at previously, though the story does make clear that a large part of it is her rather damaged psyche from "spending years as a receptacle for others' lusts".
* Becomes extra humorous with his Edolas counterpart, who is an inversion of this trope in that he wears so much clothes that people keep telling him to take some of it off. When both Grays meet, they tell eachother what everybody tells them.
* Becomes extremely noticeable with some of the characters (especially King Dedede), where sometimes they're hand-drawn, while other times they're CGI.
* becomes funny if you describe it with Sesquipedalian Loquaciousness, as Dr. Henry Gibbons has shown us: "A kiss is the anatomical juxtaposition of two orbicular muscles in a state of contraction."
* become slasher smiles when they go hunting and we see them behind the children.
* becomes more and more excited, and finally a fountain goes off in the background over his head. It's clearly visible when he moves aside in time with the opening theme's last note.
* becomes one after being kidnapped by a trafficker and separated from Tikki in

the process.
* becomes one of Charlemagne's paladins, Olgier the Dane, was an inspiration for the D&D character class.
* becomes the Chosen of Asmodeus as well as what magical powers and god or gods have touched them in a significant way.
* becomes the Geth, who then pledge their considerable navy to the war effort (along with the Quarians, if a peaceful solution is achieved).
* becomes them, at least partially. (When it appears to Faith as Mayor Wilkins, it says something to the effect of "I am The First Evil, but I am also the man himself.")
* becomes the new, in which his right-hand man Sauron takes over as main villain.
* becomes There are three other Girls With Glasses of note in the series, but while they may be cute none of them (including Integra Hellsing herself) have even a nodding acquaintance with "sweet".
* becomes the Winter Lady, she discovers that the mantle will actively enforce this by lethally attacking anyone she tries to have sex with or they try to do the same to her, since having a child would destroy the power of the mantle. And take note that the Winter Mantle actively fills her with lustful feelings... that she can't act on. Maeve, Lily, and Sarrisa are likely in the same boat.
* becomes very annoying with activism, and almost all episodes revolving around the character are about a protest.
* becomes, when the Monolith's presence causes Jupiter to transform into a small second sun.
* become their costumes. Of course, for people like Marge (a skeleton), Disco Stu (Steve Martin Arrow), or Hans Moleman (a mole, and also not a costume) it's a true punishment, but people like Bart (Wolfman), Sideshow Mel (Spider-Man), or Milhouse (Muscular construction worker) ended up enjoying their "fate" and not wanting to be changed back.
* become the Riddler in search of revenge). Mockridge faces no legal repercussions for this — but it's apparent from the closing scene that he will spend the rest of his life looking over his shoulder.
* Become upset due to the picture's poor quality. (Either because it makes him look eviler than he is,
* become US president affectionately pokes fun at, and lampshades, her Vague Age.
* Becoming a better writer is a group of books written by an amateur New Zealand author and serialized on his website. So far involves Demon Hunting and Werewolf Law.
* becoming a religion and 'discovery' effectively becoming archaeology - the only way an innovation will ever be approved by the high priests of the tech-cult is if it can be shown to have been an original part, or intended optional extra, of the base design. Trying to make something totally new is considered an appalling heresy.
* Becoming a sociopathic killer? Blame being raised by your smothering
* becoming a sorceress results in her getting a second Limit Break that raises her magic stats to the highest they can go, and makes her able to cast infinite spells.
* becoming a stuck-up socialite from his newfound wealth eventually finds that he's expended all of it. At the end of the episode, when SpongeBob apologizes to Patrick for letting it go to his head, Patrick reveals that he found an equally massive diamond in a mine.
* Becoming a Troper just so you can edit this website and add your examples.
* Becoming A True Invader, and a skilled enough fighter to match Gaz, who is the best fighter on the heroes' side of things.
* Becoming A True Invader basically amounts to "go in, doom everything, I win". Dib is extremely disappointed to hear this, as is Zim when the obvious flaws occur to him, but he quickly bounces back and starts ironing out the details.
* Becoming A True Invader, but Gaz kicks him free and he's trapped alone.
* Becoming A True Invader can grow to massive size by devouring each other. One on Vort grows to the size of a skyscraper, and on Irk one grows more than three times that size.

* Becoming A True Invader canon, the word "doom" shows up a lot, such as:
* Becoming A True Invader: Dib is surprised to find Egyptian hieroglyphics on Heboad, suggesting a visitation to Earth in the past. Zim states that advanced species visiting primitive planets isn't unheard of.
* Becoming A True Invader, Dib loans her his jacket for cover until she can get a proper replacement.
* Becoming A True Invader ends with Zim back to trying to conquer Earth, and Dib trying to expose him, with the only difference being the addition of the new alien friends they made over the course of the story now living on Earth with them.
* Becoming A True Invader fight off the Employer's remaining soldiers.
* Becoming A True Invader forces make mincemeat of the Irken Empire, quickly devastating every major planet they come across.
* Becoming A True Invader has Heboadian characters Pel and Tel, the former being a psychopathic cult leader who turns on her brother for not supporting her authoritarian plans for their planet.
* Becoming A True Invader: In Chapter 6, when Gaz is trying to get Zim to make a sandwich for her, he refuses, and starts to threaten her... and then there's a cut to "5 minutes later", and Zim is bringing a sandwich to Gaz, who apparently stole one of his lasers and threatened him.
* Becoming A True Invader moment and pictures how much damage he could do to Irk if he becomes Tallest.
* Becoming A True Invader of the story, there's a couple of lesser yet important villains who are unconnected to him.
* Becoming A True Invader on Oberox, Dib insists on having an extendable laser-blade installed in it.
* Becoming A True Invader, or risk hitting him by targeting the others.
* Becoming A True Invader prove strong enough to overwhelm him and leave him unstable, giving the heroes an advantage.
* Becoming A True Invader: Supporting character Kry is armed with a pair of Gatlings.
* Becoming A True Invader, using the latter as the source of a beam that makes everyone so happy they explode.
* Becoming Female, Snape makes Harry drink a potion which turns him into the perfect female form.
* Becoming Female without wanting to poke your eyes out while visualizing it. An example from the first chapter:
* Becoming Free Elsa falls for a pants-wearing stable-worker she hires named Freya.
* Becoming Free fic that has various spinoffs and more than one sequel. It's a series where Elsa falls for her new female horse farrier.
* Becoming Hero comic book/mixed media novel is a full fictional thesis delving into this scenario, in which a generic comic book superhero must come to grips with every trope his author ever threw at him to decide whether or not to murder his creator.
* Becoming "HUMAN-Plus" means this... they also fuse your consciousness with your AC.
* Becoming implausibly common on present-day detective procedurals, including
* Becoming Jane, Jane breaks off her elopement plans with Tom so he can take care of his family, but she ends up with some priceless writing material.
* becoming known as one of the greatest Archons in the history of the Lyran state. Other characters from the Cartoon have appeared, but none as prominently.
* Becoming Lífþrasir: In the farewell letters to Stoick and Astrid, Hiccup mentions that he nominates Astrid to replace him as heir of the Hooligan Tribe, feeling that she would make a far better replacement that Snotlout ever would.
* Becoming Lífþrasir making the claim, naturally not that many people believe him over Astrid.
* Becoming Lífþrasir) or Gustav forced to carry three heavy buckets of fish for picking on younger students.
* Becoming Lífþrasir: When she suspects there is something going on

between Astrid and Hiccup/Cattongue, Astrid's mother is quick to comment on his ass (much to Astrid's disgust).
* Becoming Lífþrasir while Cattongue/Hiccup and his dragon riders fend it off.
* Becoming Lífþrasir: With the exception of Heather (who even still is technically royalty via marriage to Thuggory), every member of Hiccup's dragon riding team (including Hiccup himself) are heirs to their own respective tribes.
* Becoming one of those horrific life-hating ghouls by evil fog doesn't necessarily end an Adventuring career, and by acquiring the secrets of Necromancy, the player can become
* Becoming Part 1. Buffy tells her running was the right thing to do anyway.
* Becoming Part 1" - Drusilla feigns being stunned by a kick in order to draw Kendra close enough to grab her, allowing Dru to mesmerise her and slit her throat.
* Becoming Part 2": Angel breaks Giles' fingers while trying to get information out of him about how to wake Acathla.
* Becoming Part 2", a smirking Angelus cleans Giles' glasses for him while he's tied to a chair and tortured by having his fingers broken.
* Becoming, Part 2". A Sunnydale cop, so nonexistent in previous weeks and so very prevalent in this one, jumps out and tells Buffy to hold it right there. Suddenly, the gun gets kicked out of his hands. Spike pops out of nowhere, slaps around the cop and kicks him into the hood of his car, knocking him out.
* Becoming, Part 2" Buffy runs into Xander at the hospital. As she's wanted by the police Xander quickly pulls her into a hug when two cops pass them in the corridor. On letting go Buffy jokes that Xander did that partially to cop a feel — Xander's lack of response to the jibe tells Buffy that something bad has happened to Willow.
* Becoming Part 2", Buffy threatens Whistler with something similar. Specifically, she threatens to pull out his ribcage and wear it as a hat.
* "Becoming, Part 2": The zombie says "Ohhh, I need a hug." (This was the episode where
* Becoming Part 2 willingly tell him what he wants to know because he doesn't want to be deprived of an opportunity to torture him.
* Becoming Ponies. Fluttershy doesn't consider herself to be this since she's terrible with silverware.
* Becoming Ponies introduces us to the trio of Jacqueline, Linda, and Ginny, as well as Harold. They follow Pinkie's counterpart around.
* becoming progressively unhinged with time than an actual scientific tidbit.
* Becoming quite common in children's books. Mick Inkpen is another example.
* Becoming" song, since Elphaba's entire character for the second act stems from that song...both the good and the bad.
* Becoming suddenly incoherent after suffering from an accident, an injury, etc. can be a symptom of brain trauma or a stroke.
* Becoming the Boast: Someone lies that they possess a skill, then is forced to actually gain that skill.
* becoming the centre of multiple timelines, due to Homura's powers, converging and tangling around her body, superimposed over the image of a clock.
* Becoming the Costume, a curse that transforms the individual into whatever their costume resembles.
* Becoming the Costume: People are turned into whatever they're dressed to be.
* Becoming the Genie: Someone ends up turning into a wish-granting entity themselves.
* Becoming the Genie: Someone gets turned into a wish-granting entity.
* Becoming the Genie: When wishing for too much causes someone to become a genie themselves.
* becoming the leader of Odd Squad as an organization. She is a mix of all four types, being a mastermind, charismatic, headstrong and levelheaded leader whom everyone looks up to and obeys with nary a complaint.
* Becoming the Mask: A character becomes like the person they pretend to be.
* Becoming the Mask: A character's cover ends up becoming their true nature.

* Becoming the Mask, after Claire kisses him on the cheek twice, Jim decides to let her down easy and tell her that he is not into her.
* Becoming the Mask: "Although it doesn't necessarily last forever, my unsteady moral compass often gets in the way of what I'm trying to do, especially when I'm trying to stick it to the good guys."
* Becoming the Mask, and clearly missed them. That's not the full story, of course…but it's enough for this trope.
* Becoming the Mask conquering human territory on the surface. He doesn't take it well when he finds out Gumnar really means it.
* Becoming the Mask genuinely comes to fall in love with the person they were stringing along.
* Becoming the Mask, Jim actually likes her food because, as a Changeling, his appetite falls in the middle of that of a troll's and human's.
* Becoming the Mask, Jim calls his familiar - the actual James Lake Jr. - "Jay-Jay" because it was one of the nicknames his parents were trying out before settling on "Jim" (by which time he was replaced by a changeling).
* Becoming the Mask territory, a Korean folktale tells of a lazy guy who wished to live a life like the cattle in the fields, without any human work or duties. A strange old man showed him a bull mask and a bull hide, and told him to put them on for his wish to come true. He did and was immediately turned into a bull, and the man sold him to a farmer. He warned that this bull should never eat a radish, because it would kill him. After some time working day and night as a bull, the youth have had enough and ate a radish to die, only for the mask and hide to finally come off and become human again.
* Becoming the Mask. The members of dysfunctional family go their separate ways and one by one are replaced with fugitives disguised as them, who eventually come to love each other more than the real family ever did.
* Becoming the Mask: The personality that is supposed to be the person's cover becomes how they really are.
* Becoming the Mask: What was intended to be the agent's cover ends up becoming the kind of person they actually are.
* Becoming the Mask: What was intended to be the cover of the mole ends up becoming how they really are.
* Becoming the Mask: What was originally the undercover agent's cover becomes their real personality.
* Becoming the Mask: What was supposed to be the infiltrator's cover ends up becoming their real personality.
* becoming the new Captain Marvel, and a young boy named Steve, who has become the new Bucky.
* Becoming this trope was arguably also the goal of Nightmare Moon, though since her attempt failed in only the second episode we'll never know just
* Be Cool for her radio show. However, the music legend's scene had to be cut for time.
* Be Cool invokes and lampshades this phenomenon. While telling his friend about how stupid the MPAA system is, Chili says to him "Do you know that unless you're willing to use the R rating, you can only say the F-word once? You know what I say? Fuck that." That's the only time the word is uttered throughout the film - which received a solid PG-13.
* Be Cool, Linda Moon's pop single that Chili Palmer helped her produce wins her a Grammy.
* Be Cool, Raji has been deleting Elliot's answering machine when he finds out that Chili has been getting him acting auditions. Chili proves his treachery when he gets Elliot to check the messages on his cell phone, where he finds duplicates of the deleted messages.
* Be Cool, Scooby-Doo! also features a somewhat more articulate Scooby than in most series.
* Be Cool, Scooby-Doo!, and yet everyone stands around refusing to budge unless Velma carries them to safety.
* Be Cool, Scooby-Doo!" billboard. Finally he settles on his van and declares that

they're "The Mystery Machine."
* Be Cool, Scooby-Doo! enough not to get tricked into touching a mysterious alien artifact. Then, he manages to avoid being captured by the monster for several weeks or months (unlike his crew-mates).
* Be Cool, Scooby-Doo! episode "Eating Crow", two rival farmers antagonized each other while disguised as living scarecrows.
* Be Cool, Scooby-Doo! episode "Kitchen Frightmare" has Shaggy and Scooby working as servers at a restaurant besieged by a cheese monster. Shaggy, starving and tempted by the food he's serving, drops a piece on the floor. The piece of food becomes sentient and taunts Shaggy with "Five second rule!"
* Be Cool, Scooby-Doo! episode "Party Like It's 1899", Daphne is frightened by the Headless Count trying to kill her and Fred with a sword and comments that she thinks she's "decreed" her pants.
* Be Cool, Scooby-Doo! example. Scooby & Shaggy visit a restaurant in Tokyo which has traditional Japanese music playing on a gramophone behind the counter for ambience. The chef stops the music abruptly when Shaggy says something that shocks and offends him.
* Be Cool, Scooby-Doo!" ghost gathering the players one-by-one, in addition to the scheduled shenanigans. When Shaggy's ready to announce the "killer," he runs through every guest at the party, finding out each time that they've been taken by the "real" ghost.
* Be Cool, Scooby-Doo! had Fred identifying the Mystery Machine as "she." Shaggy questions "The Mystery Machine is a girl??" After which Scooby looks under the chassis and asks "How can you tell?"
* Be Cool, Scooby-Doo! He believes it's more rational than Velma's more traditional fear of water because:
* Be Cool, Scooby-Doo!: How the Lutz mansion is destroyed in "When There's a Will, There's a Wraith".
* Be Cool, Scooby-Doo!: In the episode "American Goth", a sign posted at an abandoned building tells potential buyers to call 555-0198.
* Be Cool, Scooby-Doo! is a borderline example. Her competency tends to vary whenever it would fit the gag.
* Be Cool, Scooby-Doo! is told he has the right to remain silent should he choose to be tried as a mime.
* Be Cool, Scooby-Doo!, rendering him into a dimwitted, control freak and an unmasking hog.
* Be Cool, Scooby-Doo!, the other just starts a sentence and then sits in silence since her sister isn't there to finish it.
* Be Cool, Scooby-Doo!. Velma's analogue doesn't need glasses, but Daphne's does, so Fred takes "Daphne's" glasses and gives them to "Velma," rendering both of them vision impaired.
* Be Cool, Scooby-Doo!; when she paid the debt, the dolphins stopped harassing her. Other sea life, however, has proven not so forgiving.
* Be Cool, Scooby-Doo! where Velma spends the episode decrying how the modern celebrations distract from the holiday's historical roots. But after the catch the episode's villain, who had similar complaints, she demands to know why Velma doesn't support her. Velma's response is to say that while she talks a good game, she still loves candy as much as the next person.

* "Bed and Breakfast" reveals that Teddy has an irrational fear of costumed mascots that stems from catching one
* Bedazzled (1967) as Stanley, who had sold his soul for seven wishes, is trying to seduce the girl he loves. He's playing a stirring record...which starts skipping. He's puzzled as it was brand new.
* Bedazzled (1967) does this too. The main character wishes to be a famous rock star, but he almost immediately loses his fans to a new, more popular singer who

is, of course, the Devil. His last wish is to be living in peace with the object of his affection far away from the busy city. So the Devil turns them into lesbian nuns.
* Bedazzled (1967), Dudley Moore's character is despondent over his miserable life. 28 years old, no girlfriend, lives in a dreary little basement apartment. And yes, fry cook at Wimpy's.
* Bedazzled (1967), filled with lines like "you fill me with inertia".
* Bedazzled (1967) is built around - very early on we see Stanley screwing up the courage to ask Margaret out, and then folding. When the Devil offers him seven wishes, he uses them all trying (and failing) to create a relationship with her.
* Bedazzled (1967), Stanley is using the seven wishes he's traded his soul to the Devil for to win the girl of his dreams. After a few wishes haven't panned out, he wonders how she's doing, absently sighs "I wish I was a fly on the wall" and before he can take it back... George doesn't quite play fair with him. At one point he asks Stanley if he'd like a raspberry parfait. It's only at the end that Stanley learns that was one of the wishes.
* Bedazzled (1967), The Devil tricks Stanley into using his final wish to be transformed into a nun.
* Bedazzled (1967), the wish is for a Big Mac and a Coke, and is delivered the same way.)
* Bedazzled (1967) what he wanted) it inexplicably doesn't work. He's led around a convent repeatedly making rude noises and trying to look innocent.
* Bedazzled (2000) (2000): "Ah... well, you know, you go out there and you give a 110%, and you wanna play good, and, you know, you hope you play good... I think we played pretty good tonight!"
* Bedazzled (2000): After his second wish, Elliot gets sent invisibly into Alison's bedroom as she's showering, and the Devil urges him to "sneak a peek", which he tries to do. After she comes out he briefly gets one.
* Bedazzled (2000) gay. His last-ditch attempt, to passionately kiss Allison, proves to both that he's gay. He shakes her hand, and they part.
* Bedazzled (2000), the Devil briefly appears as a giant red horned demon. Brendan Fraser hastily admits he prefers the form of Elizabeth Hurley (in a bikini).
* Bedazzled (2000), who twists all of Elliot's wishes. He wishes to be rich and married to his crush and the Devil makes him a Colombian druglord despised by his wife. He wishes to be emotionally sensitive, because chicks dig sensitive guys, so now he can't help but burst into tears if he even glances at a sunset. He wishes to be a great basketball player with a humongous body, and the Devil also makes him stupid and gives him a small penis for no reason at all except to make him waste another wish. He then explicitly asks to be erudite and witty, AND for a big penis, so the Devil makes him gay. He wishes to be President of the United States, so the Devil turns him into Abraham Lincoln on the night he's assassinated. She also counts a demo wish for a Big Mac and fries he made before he'd even signed the contract. At least, in that case, he got what he wanted (even if he had to pay for it).
* Bedazzled, and uses the first six to try to get a particular woman. His last wish, which resets the universe and keeps him from forfeiting his soul, is that she be happy even if it's not with him. The loophole is that an unselfish wish breaks the contract.
* Bedazzled as she's playing billiard, and she makes a point to emasculate him by hitting the cue ball right where he's standing on the pool table, just below his crotch, causing him to jump back in discomfort.
* Bedazzled, Brendan Frasier's character wants supernatural proof that the Devil is who she claims to be. He wishes for a Big Mac and a large Coke. Cut to...them riding on a bus, then standing in front of a counter at McDonalds, where the Devil orders a Big Mac and large coke, and stiffs Brendan Frasier for the bill. There's a similar scene in the original, except that Stanley wishes for an ice cream, and ends up having to pay for it.
* Bedazzled, but the man initially mistakes this as a proposition for sex.
* Bedazzled, Elliot's blatant desire for friends is made painfully obvious, to the

point where everyone actively avoids his ham-fisted efforts.
* Bedazzled Elliot signs the contract. It can be assumed that the contract also counts wishes granted before it's signed.
* Bedazzled has its hapless hero express bewilderment at the Devil's chosen name:
* Bedazzled makes him a Colombian drug lord. When Elliot first encounters his butler, the butler talks to him in Spanish. Elliot's first reaction is to tell the butler that he doesn't speak Spanish... in Spanish. After realizing what he's just done, Elliot starts rapidly talking in Spanish, explaining how he never paid attention in the class. A little while later he realizes in the same manner that he knows Russian too.
* Bedazzled, Stanley is initially skeptical that George is the Devil as he claims to be.
* Bedazzled starts out afraid to ask the girl he likes out and keeps trying to be friends with his coworkers who don't really like him. By the end, thanks to the Devil's hijinks, he grows up, asks the girl out, gets rejected, takes it in stride, and decides he doesn't really want to hang out people who don't treat him well. It's heavily implied this was the Devil's plan all along.
* Bedazzled, the Devil brings Elliot into Alison's bedroom with both of them are invisible, intangible, and Alison can't hear them. The Devil tells Elliot that Alison is in the bathroom. Naked.
* Bedazzled: The Devil offers Stanley seven wishes for his soul. Stanley has misgivings and asks "But if you took it out, wouldn't it hurt?" The Devil replies "It's a perfectly painless operation, and afterwards you won't feel a thing!"
* Bed Bath & Beyond that she shares a different long and elaborate secret handshake with each employee.
* bedbathandbeyond.com is, of course, about the store, not about a strange adventure that involves bed, bat, hand, beyond...
* "Bed, Bob and Beyond": After watching part of a movie, the kids take turns telling what they imagine happens next, hoping to improve Bob and Linda's moods, and thus get out of trouble.
* bed buddy as it is revealed in the line "'Cause you've got the touch that turns me into a toy".
* "Bedelia", Nasim Pedrad's clingy, awkward teenage girl who was originally cooked up so they could use
* Be describes a situation in which God becomes disappointed (to say the least) with his human creation and decides to "leave them to their own devices".
* Bedeviled: Mr. Bedevil, a demon who's tormented man since the beginning of time and made an app to attack people with because he believes technology has made them grow complacent.
* Bedeviled, Mr. Bedevil's motivation is that he despises how complacent humanity has gotten with the advent of technology, and believes man has forgotten how to fear.
* Bedeviled: The evil app is deleted from the sole survivor's app, but the last scene shows that her mother downloaded it.
* Bedeviled: These are humanoid creatures from Another Dimension that can interact with ours via digital signals. They can also create constructs from thin air.
* Bedfellows is built on this trope. A woman hears the phone ring in the middle of the night. She has to lean across the lump on her husband's side of the bed to answer, only to discover it's her husband calling because he went for a jog and got locked out of the house. Cue her slowly looking back toward the lump under the covers next to her...
* Bed Full of Women: A lot of women are seen in a man's bed and he's implied, but never stated or shown, to have sex with them all.
* Bedhead-itis: A character has messy hair when they are sick as a visual indicator of how messy they feel on the inside.
* Bedine and Uthgardt barbarians consider arcane magic sort of ignominious trickery. The former used to exile magic-users, the latter may or may not attack a wizard upon identification. At least Bedine has a good reason: spellcasting may attract

* Bed Intruder song, which plays a real-life attempted rape for laughs.
* Bedknob and Broomstick, is subjected to the dunking stool, then has to be rescued from the post by Miss Price.
* Bedknob and Broomstick, one of the children tries to scare a cannibal native into letting them go by showing him matches. Unfortunately, they've already got those.
* Bedknobs and Broomsticks, a bear shows them a sign reading "No Peopling Allowed".
* Bedknobs and Broomsticks, an animated suit of armor responds to being shot by a German soldier by spitting the bullets back at him out of its helmet.
* Bedknobs and Broomsticks, a Nazi attempt to disrupt communication lines on British soil is thwarted by a witch and some suits of armor that she magically brings to life.
* Bedknobs and Broomsticks, and by the end, she becomes their permanent adoptive mother. Julie Andrews nearly played this one too.
* Bedknobs and Broomsticks British Home Guard appears several times in the movie, including firing at the retreating German commando. They even have their own song, which supplies the page quote.
* Bedknobs and Broomsticks character, Miss Eglantine Price, could because she actually believed in magic. It took a great deal of concentration (and telling his reflection to believe in something for once in his life) before he could finally get one to work after being shown numerous times that magic existed.
* Bedknobs and Broomsticks, complete with the film's Nazi invasion depicted in Medieval tapestry style.
* Bedknobs and Broomsticks, despite a DVD release as of 2009/2013 carrying a U rating. The Blu-ray release of the same year also carried a PG rating, on account of the bonus features.
* Bedknobs and Broomsticks ends with Paul pulling out the eponymous enchanted bedknob, and suggesting to Charlie and Carrie that they continue using it to visit different places.
* Bedknobs and Broomsticks features a hapless bear who catches the magical bed while fishing, and tries to throw Miss Price and company back into the sea because "Can't you read reading? No Peopling Allowed!"
* Bedknobs and Broomsticks has a variant of this. In order to fight off a German force that secretly landed in England (the story being set in 1940), witch-in-training Eglantine Price uses a magic formula to animate objects in a museum that's somehow filled with war outfits from 11th century Norman mail armors to 18th century red coats, with medieval plate armors in-between. Said animated outfits seem to be inhabited by the spirits of those who once wore them.
* Bedknobs and Broomsticks. He's painting out the signposts in order to confuse any possible invading Nazis.
* Bedknobs and Broomsticks: In this Disney live action animated movie. Miss Price, Professor Emilius Browne, and the 3 children accidentally go visit, underwater in the ocean by the isle of Naboombu. There they see half-dressed fish underwater, when their bed gets pulled up by a fishing hook, they arrive on the Isle of Naboombu and they meet a sailor bear who wears a shirt but no pants or shoes on. They go visit the Lion King Leonidas who has a soccer match. Most of the animals at the game wears both a shirt and shorts but only one doesn't wear shorts such as the alligator. Also the Cheetahs shorts fall down before he pulls them right back up. Some of the Animals sitting in the Bleachers only wears a shirt but no pants.
* Bedknobs and Broomsticks pulls this off when he uses Miss Price's spell to turn himself into a rabbit in order to gain access to the castle the Nazis have imprisoned Miss Price and the children.
* Bedknobs and Broomsticks's character volunteers, and quickly regrets.
* Bedknobs and Broomsticks, so their various parts are no less enchanted to move than the whole.
* Bedknobs and Broomsticks's witch heroine enchants suits of armor to fight the Nazis.
* Bedknobs and Broomsticksthe youngest of the little kids transporting the main characters into a cartoon fantasy world where they were still live-action. The effects in this film won the Oscar that year for Special Visual Effects.

* Bedknobs and Broomsticks was shortened from its original 139-minute running length by cutting several of the Sherman Brothers' songs - "A Step in the Right Direction", "Nobody's Problems", "With a Flair" and part of "Portobello Road". All but "A Step in the Right Direction" were restored for the film's DVD release.
* Bedlah Babe: A traditional Egyptian folklore belly dancing costume worn by women with an emphasis on showing skin.
* Bedlah Babe. The name is Middle-Eastern in origin but has been used for black, Latina and Jewish girls as well.
* Bedlam grisly murders using his unique understanding of the criminally insane mind. To this end, he confesses to a string of serial killings because a) he feels the police won't listen to him unless they absolutely have to, and b) he thinks the real killer is just getting warmed up and has to be stopped as soon as possible. He helps along the investigation quite a bit, but the detectives working the case think he really is the killer and refuse to let him go when he recants his confession.
* Bedlam House: A loony bin that's old-fashioned, has abusive staff, and is usually unsanitary.
* Bedlam House for the patients, doing nothing to make them any less crazy.
* Bedlam House for the patients, doing nothing to make them any less crazy. May sometimes be used to detain people who are "criminally insane" (they committed some sort of crime, but were found to be legally "not guilty" due to their mental illness).
* Bedlam House: Typical setting. Usually has some kind of dark secret.
* Bedlam House will notice the "statue's" moving eyes, assume that it is an actual gargoyle and swiftly kill an innocent.
* Bedlam how the criminally insane mind operates, and offers his services to the local police when they're stumped by a string of serial murders. The police, especially detective Ramira Acevedo, have no idea what to make of him — since Madder Red is believed dead and Press has no actual criminal record, he comes across as a weird guy with bizarrely in-depth knowledge of how crazy killers think. Eventually he's hired on as a paid consultant.
* Bedlam says he wanted a woman in the game because so few FPS protagonists are women, and says in retrospect that he should have made the main character of the book a woman, too.
* Bedlams Bard — to help her get around. It pretends to be a normal wheelchair when mundanes are around, and can pretty much do whatever she needs at any other time; no need for a handicap-accessible remodel of her home with it on the job.
* Bedlam's the killer, with one of them even comparing the call to Son of Sam's letters.
* Bedlam with his companions; if she lives with him she'll have to put out. He isn't gross about it, though, and they shake hands and part as friends.
* Bedman doesn't talk at all during battles, but his quotes upon losing/winning a match or getting hit with certain instant kill moves are extremely long and spoken at a high speed. His reaction to the cutesy facial he receives courtesy of Faust's instant kill move, in particular, is so long that he's still talking while the announcer declares the winner and barely manages to finish before the next round starts.
* Bedmate Reveal: A character wakes up and finds a stranger sharing their bed.
* Bedmate Reveal: A person wakes up surprised to see that someone else is in their bed.
* Bedmate Reveal moment (Irma cuddled up to share warmth), she can't look away for a minute, and only does so with significant mental effort, and while she doesn't exactly mind the situation, she wants to sleep more, so when the water Guardian proves a stubborn sleeper, Jade decides to wake her up by nipping at her cheek.
* Bedmate Reveal when Gray spends the night of what he knew would be one of many in Gildarts summer home only to find that Juvia had snuck under the covers in the middle of the night. Juvia actually quotes this trope verbatim.
* Bed of Roses, Lewis sends Lisa bouquet after bouquet of all the thornless "sterling roses" he can get from every florist and supplier he can call after she

mentions a fondness for him. Lisa is touched, but also kind of disturbed by the excessive scale of the gesture.
* Bedouin-inspired black dress and veil. It certainly made Rick's eyes widen.
* Bedouin Rescue Service: Someone is stranded somewhere and on the brink of death, luckily the locals found them and gave them food and shelter.
* Bedovian is still active and proving he's the best sniper out of any Corps. How, you ask? Well,
* Bedrock Person's Gascot is the universe's Satan, while not the Biblical portrayal, more like a self-fabricated rather akratic sociopath.
* Bedroom Adultery Scene: An adulterous couple gets caught in the middle of sex by one of their spouses/partners.
* Bedroom Adultery Scene: Someone walks in on their spouse in the act of cheating on them in the bedroom.
* Bedrooms and Hallways, a movie about a gay man who falls for a straight man who is the boyfriend of an ex-girlfriend of his, said girlfriend is still able seduce him.
* Bedshaped ends up with something like this in a toilet cubicle with the lyrics to the song on the walls
* Bedsheet Ghost act. Fred buys it despite the fact that we can still clearly tell it's Barney, but soon, Fred sees through the disguise lifting off the bedsheet revealing...a skeleton! This causes Fred to run off to Uncanny Valley as we discover it really was Barney all along.
* Bedsheet Ghost: A hopelessly outdated cliché of a ghostly appearance that is very difficult to play straight now, at least if you're trying to be scary; a Bedsheet Ghost can still work as a mournful, sympathetic figure though, and its close cousin, the robed ghost, can still work as a frightening character.
* Bedsheet Ghost costume. At the end of the episode when Willow finally works up the courage to wear the outfit, the dressed-up look has the desired knock-out effect - not on Xander, but on imminent love interest, Oz who spots her from his truck (in fact Oz catching sight of Willow in unusual outfits and being intrigued by her is something of a running joke in the run-up to their actual meeting)
* Bedsheet Ghost: Covered in a white shroud. This white sheet may be the only part of them that's visible.
* Bedsheet Ladder: An imprisoned character escapes by climbing out of a window using a ladder made of bed sheets tied together.
* Bedsheet Ladder: Someone gets out of a building they're imprisoned in by climbing out of the window with a ladder made of bed sheets (and/or other material that can be tied together, such as clothes).
* Bedsheet Ladder while saying "This always works in the movies." Unfortunately, the knots get undone and she falls with her noting, "So much for the movies!" Luckily, she has a soft landing in a horse trough.
* bedsheet. The jury's out on whether it's being held up by her rack or by the sheer force of her hotness.
* beds of all things explode if not used in the Overworld. It's because you can only sleep at night and there's no night in, say, The End.
* Bedtime Brainwashing: Communicating with a person in sleep-like state to influence their dreams or actions.
* Bedtime Brainwashing: Someone tries to manipulate someone else's dreams or thoughts when that person is asleep.
* Bedtime for Bonzo publicity photo of him and Bonzo with the inscription "I'm the one with the wristwatch."
* Bedtime For Frances gotten out of bed multiple times at that point and was now waking him up, so he was probably just frustrated at that point.
* Bedtime Stories channel which discusses numerous paranormal/supernatural urban legends which have been recounted by real-life people.
* Bedtime Stories control what happens to the main character, or it's just a series of bizarre coincidences and self-fulfilling prophecies.
* Bedtime Stories (probably because his name, Skeeto, was similar to his own name) and becomes paranoid that he's going to catch fire. When listening to the car

radio, all the songs have fire-related lyrics (Burn Baby Burn, I'm on Fire, etc).
* Bedtime Stories, Skeeter is fixing a lamp as his nephew talks about the bedtime story they told last night. When he notices that it was only the story elements contributed by the children that come to pass in the real world, the lightbulb comes on.
* Bedtime Stories: The final story Skeeter and the kids make up together is set in a futuristic space arena very much adhering to this trope
* Bedtime Stories: The setting of one story, supposedly in "Ancient Greece" yet having clear Coliseum and Roman Emperor knockoffs, while his character's name is close to that of Spartacus, the famous gladiator turned slave revolt leader against the Romans.
* Bedtime Stories, which revolves around Sandler's character telling seemingly-prophetic stories, has a couple of examples. One story he tells involves Abraham Lincoln suddenly appearing out of nowhere, which is later fulfilled by a Lincoln penny dropping off of a bridge he's standing under. Another, which involves him being set on fire, comes true when he is "fired" from his job.
* Bedtime Stories with Adam Sandler. The added twist is that the bits the kids make up (such as raining gumballs or the main character getting kicked by an angry dwarf) happen in some way to the protagonist.
* Bedtime Stories (YouTube Channel) covers this part of the world in the episode "The Mysterious Disappearance of Flight 19".
* Bedtime Stories (YouTube Channel) features the Shadow People, who are sentient, malevolent entities said to be harbingers of death.
* Bedtime Stories (YouTube Channel) has a lot of this, given its focus on supernatural and paranormal stuff.
* Bedtime Stories (YouTube Channel) has an episode that covers the legend surrounding the Wendigo, as well as recent eyewitness accounts and alleged video evidence of its existence.
* Bedtime Stories (YouTube Channel) has an episode that covers the so-called Black-Eyed Children, mysterious kids with black eyes that are said to inflict psychological and physical pain to anyone that stares into their eyes for a given amount of time.
* Bedtime Stories (YouTube Channel) has "The Alien of Varginha", where a UFO sighting and a subsequent sighting of mysterious red-eyed creatures took place in a then-unremarkable rural town in Brazil.
* Bedtime Stories (YouTube Channel) is depicting the American Southwest as just as dangerous as the Appalachian Trails on the East Coast. Among the more notable cases covered here include Skinwalker and Stardust Ranches, the disappearances of dozens of prospectors and hikers in the desert, encounters with different kinds of cryptids, and mysterious hauntings on the US-Mexico border.
* Bedtime Stories (YouTube Channel) known simply as the "Kandahar Giant".
* Bedtime Stories (YouTube Channel) living deep in the forest are mentioned, complete with the deaths of several hunters, loggers, factory workers, and outdoorsmen.
* Bedtime Stories (YouTube Channel). One of the most common recurring themes in this series is whether or not the various phenomena, incidents, or examples shown are supernatural or have a scientific/rational explanation. Among many examples listed here include:
* Bedtime Stories (YouTube Channel), rapist and domestic abuser Frederick West and his wife and victim-turned-accomplice Rosemary. As the creators themselves put it:
* Bedtime Stories (YouTube Channel) reported in American and Canadian national parks, as well as how the Dyatlov Pass hikers all died.
* Bedtime Stories (YouTube Channel) that wiped out an entire platoon of US soldiers in the early 2000s, and was later killed by a US special forces team sent to find the missing soldiers.
* Bedtime Stories (YouTube Channel): The entire premise of the episode "The Uniondale Hitchhiker", where the ghost of a woman named Maria Roux is often picked up by random drivers and motorcyclists, only for her to disappear as suddenly as she got onto their cars and bikes. Several other examples of this phenomenon are

also discussed, with the hitchhikers ranging from old women to young boys.
* Bedtime Stories (YouTube Channel): The infamous "Little Bastard" owned by James Dean is covered, where, even after being totalled, was said to be responsible for dozens more deaths through other people acquiring parts salvaged from the original wreck.
* Bedtime Stories (YouTube Channel), there's the ghost of a monk haunting the Stocksbridge Bypass. Many who have encountered him up close were shocked to find out that underneath his robe's hood was nothing at all, despite having felt that they were being watched by him the entire time.
* Bedtime Stories (YouTube Channel): This happens often when it comes to mysterious disappearances or missing persons cases. These are just two of the more prominent examples.
* Bedtime Stories (YouTube Channel), two episodes deal with horrible, awful people who are worse than any evil spirit or violent monster.
* Bedtime Stories (YouTube Channel) was pretty unsettling to say the least. Thus, when the British took over the area, they immediately sealed the access points to the basement with concrete, which was a good move.
* Bed Time Stories Youtube Channel where it's heavily implied that members of the SS, under Himmler's orders, conducted occult experiments in the building's basement.
* Bedtime Stories (YouTube Channel)'', where they're said to be the "guardians" of the children in question.
* Bedtime Story a father telling his son the story in question can't think of a name for the villain's boss, so he looks around the room for a bit and comes up with the "Great Wizard Kur-Tayn".
* Bed Trick: A form of rape by deception where one tricks another into sleeping with them by impersonating that person's significant other.
* Bed Trick after his father, Jesse, stopped sleeping with his wife; as a result, Jesse assumed David was the product of an affair throughout his childhood.
* Bed Trick: Because if someone is deceived into having sex, the sex is nonconsensual.
* Bed Trick: Getting someone to sleep with you by pretending to be their lover, which is rape by deception.
* Bed Trick-like sequence makes it seem like Monza and Shivers are having sex with each other but ultimately reveals that they're screwing two different people. The accents of their partners give this twist away prematurely.
* Bed Trick: Someone has sex with someone by pretending to be their partner.
* Bed Trick: The conception of Hatshepsut and other Egyptian kings, according to royal propaganda.
* Bee Afraid: Bees are depicted as scary, especially if the bees are shown close-up and have realistic features.
* Bee Afraid: Both pre- and post-Trope Transplant image captions employ the alliteration:

* Bee Bee Gun firing mechanical wasps, which sting his face leaving it covered in painful-looking welts. A giant, monstrous, clawed insect then impales him through the chest for the killing blow. Monokuma then incinerates both him and the giant insect with a flamethrower.
* Beechcraft Starship, a private turboprop plane developed in the early 1980s. It looked extremely futuristic at the time, and still does today, but it was a financial flop. It was supposed to showcase new technology that was seen as futuristic for a civilian plane, such as composite materials, canards, and pusher propellers. Unfortunately for the Starship, within a few years more conventional planes had advanced beyond its level, leaving it as little more than a novelty.

* "Beef. It's what's for dinner." and "Got Milk?" You have to wonder why a marketing executive thinks that an ad like this would be necessary or valuable. I mean, sure, it might make somebody consider buying cattle flesh and bovine secretions to use in their next meal, but the major consumers of cow byproducts aren't individuals, but large corporations that use those byproducts in their own branded items (pet food, frozen meals, cheese, pastries, the list goes on and on).

* Beelzebub and establishing flychology by analyzing the emotions of Casey's flies.
* Beelzebub: Anytime regular delinquents challenge Oga, at least one or two are guaranteed to enjoy new careers as ceiling adornments.
* Beelzebub are given criticism as if they were true works of art, when he's actually a toddler who can do little more than scribble.

* Beelzebub consisted of Nene, Yuka, Ryouko, and Chikai. Then, a random, never before mentioned purple haired member was inserted into the group, and treated as if she's been there from the very start.
* Beelzebub has two, one under the outside corner of each eye. Considering his rather traumatic middle school experiences, it's apt.
* Beelzebub: Himekawa's final shot in the End of War 4 arc is him standing in the ruins of his abandoned apartment complex.
* Beelzebub in demonology is called Lord of the Flies and gets depicted as a fly sometimes.
* Beelzebub, in order to make their fellow students interested in finding the demon prince En, Furuichi told the rest of the delinquents that En is from Akumano Academy (demon academy) instead of, you know, Hell. Then after Furuichi managed to make En mad, En took over Ishiyama High and make it into an actual Akumano Academy, filled with 394 demons.
* Beelzebub: in which delinquents punch the snot out of each other and demons from hell.

* Beelzebub is literally the Lord of the Flies, and is attributed the power to both summon and dismiss pestilence and disease.
* Beelzebub is the doctor and that he was mistaken about the other one (especially as she confirms that she is the doctor)... until the original catches her by the ear and scolds her for trying to assume the identity of her boss. She's actually the assistant.
* Beelzebub is the leader of the Red Tails, the strongest female gang in Kanto, a member of the four strongest delinquents in her school, is an expert with the sword, and is literally feared by all delinquents, male and female alike. But that all changed ever since she developed a teenage crush on our Hero Oga.
* Beelzebub often start doing this in funny situations. At first it was just a one-off the two main characters did (described as telepathy), but after that everyone started joining in.
* Beelzebub: Oga is the strongest delinquent in his school. The running gag is that other people spend whole episodes trying to find him and challenge him only to get beaten in a few seconds without him paying much attention.
* Beelzebub. One possible explanation for his constant shuffling of part-time jobs is because he keeps getting into trouble when rival gang members show up to fight him.
* Beelzebub online and assuming avatar identities through several chapters of game play.
* Beelzebub readers found unsatisfying (especially as the Takamiya Arc was a similar but longer version of it) and many plot threads about the Solomon Company left dangling. Thankfully the creator did manage to get an epilogue in, but that still left a lot unanswered.
* Beelzebub) thinks Beel is their biological child and that Oga and Hilda are engaged, but in reality they hate each other, with Hilda only putting up with it for Beel's sake and Oga constantly trying to get rid of them both. Their relationship improves over time but they're still not a couple.
* Beelzebub was kidnapped twice during the manga, both times used as bait to lure Oga into a trap. As the best friend of the main character and being the only one with zero fighting skills, this was bound to happen.
* Beelzebub, when Oga, Baby Beel, Furuichi and Hilda are in America, Oga, who doesn't know how to speak English at all, introduces himself as "Fuck". He is called like that for the rest of the arc.
* Beelzebub, when Oga, Furuichi and Hilda travel to the USA, Oga and Furuichi initially have trouble communicatikg with the Americans and make themselves look even weirder than they already are. Not only does Oga introduce himself as "Fuck" (the Americans keep calling him "(Mr.) Fuck" during the rest of the arc), he even brings ridiculous, stereotypical Japanese costumes for himself and his two

companions just to intimidate some random American thugs.

If the opponent tries to overpower him by attacking with a stronger monster(good luck with that, his ATK and DEF are both 3000), he gains ATK power equal to the life point damage taken, meaning that he will quickly be able to destroy the enemy monster. There are a few ways of taking him down(getting control of him and using him for a Tribute Summon or using a card that removes him from the field without technically sending him to the Graveyard), but it requires some good draws and clever maneuvering to pull it off.
* Bee Movie about the movie, prompting many people to watch and purchase DVDs who otherwise wouldn't have.
* Bee Movie barely bothers to hide the fact that Barry and Vanessa are in love.
* Bee Movie, Barry B. Benson's entire hive, including himself, apparently falls under this, judging by his first conversation with Vanessa. The bees' comedic underreactions when they hear about one of their co-workers dying on the job definitely shows signs of desensitization to psychological trauma as well.
* Bee Movie Barry's daydream about Vanessa and himself having a romantic picnic together ends abruptly as Vanessa pilots a yellow and black ultralight to fly with him, then crashes and burns when she tries to duplicate an aviation feat only bees can accomplish.
* Bee Movie cases when you have to wonder how is it possible that everyone can hear a tiny bee crystal clear, no matter the distance. It gets especially stupid during Barry's speeches in the court during a trial, where he doesn't use a microphone or anything like that, and yet everyone can perfectly hear him.
* Bee Movie has BNN (Bee News Network) airing Bee Larry King (do you see a pattern?).
* Bee Movie makes a point of showing hexagons as not just a construction artifact, but ostensibly as a high-technology business organization (Honex, the primary employer of the protagonists' hive, is a member of "The Hexagon Group"), owing to the lengths the bees go through to refine their honey.
* Bee Movie, the director of the Honex Industries can be seen playing a hexagon-shaped Solitaire at his computer during Barry's motivational speech at the end. Justified in that at the time, the honey production was shut off and the bees had nothing to do.
* Bee Movie these are the Pollen Jocks (i.e., the bees who leave the hive to collect pollen). When Barry and Adam are pretending to be Pollen Jocks to impress some girls, a pair of real Pollen Jocks come over and, while not revealing the truth, decide to mess with them by challenging them to come along on their next mission. When Barry actually shows up, they talk their superior into letting him come along.

* Bee People: A race of aliens that have workers, drones and queens like bees.
* Bee People: Hivers, with a complex and intricate society of independently conscious but very family-oriented eusocial insectoids.
* Bee People, the Hivers do not possess a hive-mind. Each Hiver is a complete individual. The Warriors are best suited for high-risk tasks, such as warfare and security, and have varied physical shapes. The Workers cover the vast majority of jobs in the Hiver Imperium and are physically smaller and lighter than humans. Their jobs range from menial work to artistry and craftsmanship. The Royals consist of Princesses, Princes, and Queens. The Princesses and the Queens are the only females of the species. The Queens are fully matured and are able to bear not only Warriors and Workers but also Princes and Princesses. The Princes are the fertile males who are also generals. Unlike the Tarka, it's possible for a Hiver to move to a different caste, although this involves dying. When a Hiver dies, most of his memories are stored in chemicals in his head. If it's eaten by the Queen, she can then lay another egg, imprinting the new Hiver with the memories. In effect, the Hiver is reborn. For example, one of the main characters in the novel is a Hiver Prince named Chezokin, who used to be a Worker named Chekin (the "zok" infix is added to a reborn Hiver's name). This is only done to those who have honored the Queen with their service. The Hivers also have three main written languages, although these are not restricted to castes. K'en-k'en is a phonetic language (like Japanese katakana and hiragana), known by all Hivers. Ri'kap-ken represents words with complex symbols based on an ancient writing system (like Japanese kanji) and is mostly used by Warriors and bureaucrats. Tcho'to-ken is mainly used by the Royals to write poetry and personal diaries and is a form of calligraphy.
* Bee People tropes, but they are squat to the point of being almost spherical and have four limbs and two eyes, along with a hunched bipedal stance.
* Bee People, who destroyed each other in a vicious war. After meeting and almost killing the last of the insectoids, he finds out that it was their "benevolent" saviors who orchestrated the conflict between the two violent races (although it's implied that said "orchestration" merely involved getting the two races to meet), resulting in the mutual destruction (the humans caused the insectoids' star to go nova, while the aliens nuked Earth).
* Bee People with three castes: vassals (average citizens and basic infantry), soldiers (elite warriors), and queens.
* Beeping ComputersComputers beep so that you can tell they're doing something.
* Beeping Computers cover the standard sounds of modern technology and interactive entertainment.
* Beeping Computers: In real life, having a setup where every tap of the key produces a noise from the computer would be impractical at best, infuriating at worst.
* Beep Prepared is shot into space by his rocket sled. After he zooms past Sputnik and the Moon, the rocket explodes...and the Coyote has become the constellation Sagittarius. We even hear "Twinkle, Twinkle, Little Star".

* Beerfest, a movie that (unsurprisingly) involves inhuman amounts of beer ingestion, the viewer is warned that "if you attempt to drink this much... You will die."
* Beerfest at first makes it look like Jay Chandrashekar's character is being taken advantage of, he fades in and out of beer goggle vision of the woman he picked up at the bar. When he wakes up and turns over, he stares up at the ceiling camera and says "Naaah, I knew all along!"
* Beerfest awful, Barry elaborates that it wasn't the handle. He's been "shitting pancakes ever since". The protagonists' great-grandmother then replies that she's had plenty of things shoved up her butt. Then again, she used to be a German prostitute.
* Beer Fest begins in a dark room with a man playing a beer/coin game with a mob boss and his goons who nearly beat up the other guy...just kidding, it was the priest and his assistants. As the funeral begins a tv is wheeled out to reveal the deceased giving a heartfelt and jolly eulogy from his hospital bed looking down on his open casket. He toasts and chugs several pints of beer during his speech. Once complete, he pulls his own plug and immediately flatlines while still on the tv screen.
* Beer Fest come to Germany to participate in an underground beer-drinking competition. They proceed to literally beat the Germans at their own game.
* Beerfest, during the fight between Landfill I and Cherry, the heavyset Mo'Nique playing Cherry is quite obviously replaced by a much slimmer stunt double every time she is hit.
* Beerfest. Fanservice extras are everywhere when the heroes are in Europe. Most notable in the Oktoberfest scene are the six women who get their tops pulled down, and the two girls who begin to make out with each other only to end up with wet T-shirts. At the Beerfest competition, the Swedish women's drinking team, and Misses Barley, Hops, and Yeast also qualify. Also, the hookers in the windows in Amsterdam at the very end. All of them save one, "Ulsa", are uncredited, but a few have done modeling and B-movie work elsewhere.
* Beerfest, includes a scene in which Cloris Leachman's character and her son are tarred and feathered in turn of the century Germany.

* Beerfest, the ragtag beer-drinking team recruits from their old college buddies: one's now a carny, and another's a street hustler.
* Beer Goggles: Being drunk causes a person to see someone as more attractive than they actually are and/or flirt with them.

* Beer" has a gag where Blackadder is entertaining his fiercely Puritanical aunt and uncle while simultaneously holding a drinking competition. Things seem to be going well, until one of the drunks (dressed as a monk) bursts into the room, vomits in the fireplace, and leaves, saying "Great booze-up, Edmund!" When asked if he can explain, Blackadder spends the next minute staring into space and working his jaw as he tries to come up with an explanation, then finally says "...Yes I can." And he does. Incidentally, the man really was a monk, although one of extremely ill repute. Considering that puritans couldn't stand monastical system, that probably didn't do Edmund any favours, either.

* Beethoven's 2nd, when the puppies are still being hidden from the father, there are several close calls where he almost finds one.
* Beethoven's Christmas Adventure includes a scene of Beethoven farting for almost a solid minute.
* Beethoven's last six piano sonatas are considered integral parts of his later compositional career, but the first of them, the two-movement Op.90 in E minor, very much lives in the shadow of the others, especially the mammoth "Hammerklavier". Even among the last three, Op.111 in C minor tends to overshadow Op.109 in E major (which closes with a masterful theme and variations) and Op.110 in A-flat major (another experiment in form which closes with a striking three-voice fugue).
* Beethoven suffered from deafness later in his life. The cause of this disability has been argued, with such possibilities as lead poisoning, syphilis, or even his habit of dunking his head in cold water to stay awake being cited. Didn't stop him from creating masterpieces, however. Notably, he wrote his Ninth Symphony - considered one of the greatest pieces of music ever written - while almost completely deaf.
* Beethoven: The Animated Series: Mr. Huggs floats off when a bully ties balloons to him.
* Beethoven: The Animated Series, the title character does this to the neighborhood bully dog and gang leader, Killer.
* Beethoven: The eponymous dog saves Emily from drowning, Ryce from being raped, the family from being swindled, as well as other feats of heroism.
* Beethoven: The titular dog has a scene where he jumps over a girl sunbathing in a bikini.
* Beethoven Was an Alien Spy: A historical figure is revealed to have an unusual aspect of their lives that isn't brought up in the history books.
* Beethoven Was an Alien Spy: It's established that a historical figure had an unusual aspect of their life that was stricken from the history books.
* Beethoven Was an Alien Spy novel trilogy "Millennium". Near the end of the second book, Vash and alternate future versions of Nog and Picard go back in time to ancient Bajor to become the seers "Eilin", "Shabren", and "Naradim", who are famous in the future because of their predictions of recent events.
* Beethoven was mistaken for a crossdressing girl while walking with Ren by two guys who came to Vienna to pick up girls. Salieri says he has feminine features and his long hair and short stature don't help. Since the two guys wouldn't give up about taking Ren and Beethoven on a double date, even after Salieri confirmed their

alleged gender, Beethoven outright stripped to prove he was, in fact, a man.

* Beetle Bailey: Are those new Japanese cars any good? The standard test is to slam the door closed, and if it says "PLUNK", the car's all right. Naturally, the Japanese car's door goes "PRUNK".
* Beetle Bailey before leaving forever. In this case, it was (arguably) a change for the better since the military focus made it far more popular and commercially successful.
* Beetle Bailey called "Sgt. Snorkle's Longest Day", when Chef Cookie catches Sgt. Snorkle raiding the refrigerator one night, he warns the Sarge what might happen if the last button pops off of his shirt. In the extended dream sequence that follows, Sarge's belly grows so big that his last shirt button pops off, enabling him to swell up even further into a human balloon.
* Beetle Bailey can't even get it right when he uses the kitchen sink expression about what's in his food, as Beetle finds a tap in his stew right after that.
* Beetle Bailey cartoon from the 1960s were written by Allan Melvin and Howie Morris, who voiced several characters in the show (Morris voiced Beetle, among others).
* Beetle Bailey characters have worn the same solid olive green (sometimes Sarge's is tan) uniforms since the strip began in 1950, no matter what the situation. Just during war games they put on helmets instead of caps.
* Beetle Bailey comic where the enlisted men's lounge had two TVs on, one showing a romance and the other a football game. By chance, the football announcers appeared to be commenting on the action in the romance.
* Beetle Bailey: Cookie hears a toast from the men, "Here's to the best cook in the US Army!" "Hear! Hear!" Cookie approaches teary-eyed. "May he someday be sent here!" "Amen!" "Yuck!"
* Beetle Bailey, Cookie is watching a cooking-show on television, sizing up the cake-recipe for camp consumption along the way - that is, multiplying every ingredient by 100. At the end, however, the baking-instructions arrive, and in the final panel, Cookie is seen sitting in front of an oven (with black smoke pouring out of it), declaring "It'll be ready next week."
* Beetle Bailey, Cosmo notices the paint splatters Beetle has left on the floor look kind of interesting, and the sawed-off piece of floor ends up winning a prize as a painting. (Thankfully, this isn't the punchline, which instead involves Sarge falling down the hole.)
* Beetle Bailey day!" demonstration, but just ended up throwing the still-pinned grenade along with his dentures.
* Beetle Bailey doesn't usually have much continuity, but over the decades, there have been a handful of arcs connecting the strips (actual longer stories for albums notwithstanding), including at least "Beetle arrives at college," "Beetle joins the army," "Beetle goes home on holiday alone," "Beetle goes home on holiday with Sarge," "Beetle goes on holiday at home with Sarge and Otto," "Zero goes on holiday home with Beetle and Sarge," and "Sarge briefly tries to leave the army but comes back."

* Beetle Bailey don't want to be soldiers, and are rarely seen in the field (which for the strip means war games and exercises) where this becomes apparent. Fuzz tries to copy Snorkel's treatment of subordinates and adds in his complete incompetence and desperation for recognition.
* Beetle Bailey for a tack prick, implying that the list is even longer and far more profane with more serious injuries/more angering situations.
* Beetle Bailey gag has Sergeant Snorkel pound the daylights out of Beetle as a punishment for laziness or insubordination, whereupon Beetle ends up as a shapeless mass of limbs, hands and feet twisted in anatomically impossible ways. And with missing teeth. Sometimes such or other injuries in the comic are "unamusing" enough to end in a hospital trip, but only if a joke requires it.
* Beetle Bailey had Plato doing this now and then. He wrote philosophical screeds as bathroom graffiti.
* Beetle Bailey: Happens sometimes between Sarge and Beetle, or Sarge and the privates in his company in general, typically involving a situation where someone is about to leave the company but starts remembering all the good times they've had together. Sometimes subverted instead: One party's happy memories about their times together are ones that make the other angry.
* Beetle Bailey has actually been shown to be able to go around Sarge so fast that he's on one side of him in one panel and on the other side in the next, before anything else has time to happen. There's no particular justification given, but it's clearly implied to be this fast.
* Beetle Bailey has all kinds of weird gags involving the characters interacting with comic strips elements that are supposed to be only symbolic — such as Sarge eating a "Z" produced by a sleeping Beetle in an effort to get to sleep himself, or characters managing to produce empty speech bubbles.
* Beetle Bailey has an odd example: Sarge's stomach. When it's growling, Sarge often treats this as a verbal demand for food, sometimes talking to it as if it were his best buddy and sometimes arguing with it.
* Beetle Bailey, he started taking sensitivity classes and eventually stopped.
* Beetle Bailey: In one strip, Beetle is asked to get hot coffee for Sarge, who had fallen into freezing water. It turns out it's not for drinking but for melting the giant block of ice he's encased in.
* Beetle Bailey is a peacetime variant to comic extremes, centering on a military camp located on the US which has somehow managed to remain uninvolved in armed conflict despite numerous wars over the strip's lifetime (Possibly because the Army has figured out that the best way the soldiers in that camp can aid the war effort is to stay as far away from it as possible).
* Beetle Bailey is just as incompetent as anyone under him, and at times, more so. He once asked his secretary Ms. Blipps to get him his pencil — which was behind his ear. Actually trying to lead the soldiers on drills and training exercises often causes a disaster.
* Beetle Bailey is the intellectual one, who is well educated about anything in the humanities and sciences.
* Beetle Bailey loves animals and they love him. He once wouldn't throw away the camouflage he had applied to his fatigues because birds had built a nest in it. Other strips see him feeding birds or squirrels who dance for him in return.
* Beetle Bailey — Bettle's eyes have never, ever been seen. Even before he was in the army, he had a hat pulled down low to hide them.
* Beetle Bailey, naturally does this a lot of times, usually done by Sarge and aimed at Beetle.
* Beetle Bailey nude and released the drawing as a limited edition series of art prints. Walker and his staff also make several dirty gag strips that never make it past the sketch level. Mostly, they do this for their own amusement, but some of the strips have been published in Scandinavian magazines, and were later collected into a complete album. With Walker's blessings, of course.
* Beetle Bailey. Of course if you read it from the beginning, it's a series about a college kid whose experiences in basic training when he briefly joined the Army on a lark turned into a 60-year digression from the main plot.

* Beetle Bailey of the camp, but he's got no damn interest at all in being a good soldier, and all he ever (rarely) uses his brains for besides idle philosophising is avoiding work.
* Beetle Bailey: One of General Halftrack's officers is mildly disturbed to find a notepad with "General Amos Buxley" on it.
* Beetle Bailey on his back. So Beetle kicks him. All that happens is that he hurts his foot while Sarge keeps on walking without a reaction.
* Beetle Bailey on my lunch hour.". General Halftrack then says to Major Greenbrass, "What gets me is that she pays him.".
* Beetle Bailey. On one occasion, he used it to gain access to a telephone meant only for official business by expressing his intentions so fancily the secretary didn't realise he was saying he was inviting his buddy over to the bar with the rest of them.
* Beetle Bailey. Or go bankrupt or receive advance warning and close early.
* Beetle Bailey reimagining their character concepts than anything else.
* Beetle Bailey said sergeant, and finishes writing "SGT. SNORKEL IS A BIG STUPENDOUS PERSON". Beetle walks away relieved, with Sgt. Snorkel looking happy.
* Beetle Bailey: Sarge and the Captain once conspire to see Beetle's eyes by scaring him so that his hat will jump off. When they do, it turns out he's wearing shades underneath.
* Beetle Bailey Sarge falls over a cliff (again) and is hanging by a tiny branch. He tells his dog Otto to get help. Otto runs to base and makes every effort a (non-talking) dog can to get people to go with him, including jumping on them and pulling on their legs. The strip ends with Otto in the lockup and Sarge still hanging from the branch.
* Beetle Bailey: Sarge orders a group of men marching in a line to stop hurriedly, and they all "plong" into each other.
* Beetle Bailey, saying things along the lines of "Hang on, that's not how you use *storm cloud* in a sentence." He's also pointed at things in the previous panel.
* Beetle Bailey's garrison cap always twitch whenever he's before a beautiful girl.
* Beetle Bailey: Sgt. Louise Lugg's cat Bella has a tough, nasty attitude, and is extremely pampered.
* Beetle Bailey, Sgt. Snorkel caught Beetle drawing insulting pictures of him on building exteriors throughout Camp Swampy. So Sarge hired an art teacher for Beetle.
* Beetle Bailey, Sgt. Snorkel files a complaint that Beetle called him a baboon, when he actually called Sarge a bassoon. Snorkel asks what a bassoon is, and the captain replies that it's a wind instrument.
* Beetle Bailey size fail due to a massive simultaneous artillery practice barrage being initiated at the critical moment.
* Beetle Bailey sneers that if you can't even tell, he's not interested either way.
* Beetle Bailey sometimes when Sarge beats him up, on those occasions when Sarge doesn't just leave Bailey lying in a heap on the ground after stomping on him.
* Beetle Bailey started out as a strip about a ne'er-do-well college student. Then, very early in the series' run, the main character joined the army, where he has been ever since.
* Beetle Bailey strip, Beetle, Killer, and Plato are in a nightclub where a dancer is performing onstage wearing a skimpy outfit made of flowers:
* Beetle Bailey strip for 8/6/2013, Cookie says his recipe has real kick to it. Then the food blows up.
* Beetle Bailey strip has the base chaplain suggest to Sarge that he use the word "grawlix" in place of profanity. As in the actual word "grawlix".
* Beetle Bailey strip has the company run out of requisition forms, and discover that you can't requisition new ones without filling out a requisition form.
* Beetle Bailey strip in November 2013, Sarge tells Cookie he should wear a helmet because they're in a combat zone, saying so while not wearing one himself.
* Beetle Bailey strip starts with unexplained laughter in the middle of the night, which turns out to be Zero reacting to a joke told during the day.
* Beetle Bailey strip, the cook makes a pie during a forest exercise and is

optmistic about its sucess as he prepares to serve it, pre-cut. However, when he accidentally drops one slice straight into the path of a group of ants, the ants walk in a circle around it.
* Beetle Bailey strip. The general gives his lieutenant a document to deal with; the LT passes it to Sarge, who then delegates it to Beetle, who finally just puts the paper back on the general's desk.
* Beetle Bailey strip, where Beetle is dragged before a group of generals and high-ranking officers to be lambasted for not wearing his uniform tie properly. The officers all wear all sorts of unusual decorations, strange hats and other deviations from a proper uniform (because they rank high enough that nobody can tell them what to wear), but none of them even consider this hypocrisy when they express their disapproval over Beetle's "unacceptable" clothing.
* Beetle Bailey), the answer is always the same: Nobody dares to tell the general that he made a mistake. They prefer to follow out the order, exactly the way it's written, and look like idiots, rather than telling the general to make a correction.
* Beetle Bailey..." The basic variant also gets used a couple of times. They even manage to invert it, with cinema chairs, once:
* Beetle Bailey, there have been a few occasions when someone is advised on how to find a particular person's tent (or similar) with the phrase, and indeed they couldn't miss it even among a row of tents because it turned out to look very idiosyncratic in the given person's style.
* Beetle Bailey: This gag has been repeated about once a year since the sixties, at least:
* Beetle Bailey: This turns out to be the reason Sgt. Louise Lugg mauled a guy so badly while playing American football. The trope is played straight (it's not a very recent strip) and she's shown "emotionally" crying over it; the comic in general repeatedly plays with her combination of masculine aggressiveness and feminine sensitivity.
* Beetle Bailey used the "Your mother wears army boots!" variant (explained below) when Beetle gets fed up with Sarge and throws the line at him. Sarge's response implies that she really was in the Army:
* Beetle Bailey uses this trope for laughs as a running gag, with the heavy Sgt. Snorkel hanging from a branch while other characters rescue him.
* Beetle Bailey was still a college student, he removed his hat exactly once in the classroom. The professor told him to put it back on.
* Beetle Bailey was surprised there was no complaint from his poor, overworked liver.)
* Beetle Bailey: What do you do with your arms when you're walking? Mort Walker was nice enough to show a character walking before thinking about this and swinging them in the opposite order from how he moved his legs so that the reader didn't have to face the puzzle.
* Beetle Bailey, when Beetle finds himself walking on some quicksand he immediately sinks below the surface.
* Beetle Bailey, which by now has a run of about half as many strips as there are atoms in the known universe, must have recycled hundreds of its jokes, almost certainly sometimes more than once. Since there are so many strips in existence, it's just conceivable Mort Walker just can't remember which ideas he has already used. But don't bet on it.
* Beetle Bailey while on KP, and gives him a choice of peeling the carrots or onions.
* Beetleborgs adds these effects during the fight scenes. This trope does make sense here, as both the villains and superhero identities of the borgs themselves are comic book characters made real through a magical spell.
* Beetleborgs) and Elvis Presley. Flabber's a rather genie-like ghost who lived in a pipe organ until he was accidentally freed by those kids. Plus he's the one that gave them their powers.
* Beetleborgs, a young vampire hunter attempts to slay Count Fangula, who is actually quite harmless and poses no danger to anyone in the nearby town, due to

his incompetence. After the vampire hunter is scared by Flabber, disguised as a dragon, he proclaims Fangula to be an insignificant vampire, being more trouble than he is worth, thus allowing Fangula to live.
* Beetleborgs by shouting "Bug Out!" to turn into bugs and "Bug back!" to turn back into themselves.
* Beetleborgs has Flabber the phasm, who according to the producers was based on Elvis, but to some resembles big-chinned talk-show host Jay Leno. As a reward for freeing him from the pipe organ he was imprisoned in, he gave the kids who did so a wish. They wished to become Beetleborgs, using a comic book to show Flabber who they are. Flabber, seeing rats on the cover, assumes the rats are the Beetleborgs and turns the kids into rats. After pointing out who the real Beetleborgs are, Flabber successfully turns them into Beetleborgs...without removing them from the comic book. Fortunately, Flabber is a benevolent example of this trope, as he corrects his mistakes, rather than letting the kids stick with a badly executed wish.
* Beetleborgs has Mums, who has a close relationship with, yes, his mommy.
* Beetleborgs Metallix episode "Headless Over Heels", the Headless Horseman had an encounter with Wolfgang in the old country and allergies to him is what made him lose his head. When he arrives in Charterville looking for his head, he thought Wolfgang had it and tried to claim it back (or take the head of the other Hillhurst monsters). It turns out that Little Ghoul had his head which she used for bowling and ended up giving it back. Bolts were attached to the head to keep it from falling off again.
* Beetleborgs, the basement in Hillhurst Mansion is so creepy, even Flabber and the monsters who live there are too afraid to go down there! In the second season, when they have to go there to look for the mysterious intruder in the Mansion, they find who's lurking down there - Little Ghoul. Later, she makes her room down there.
* Beetleborgs: The main trio of child characters wish for their comic hero characters to become real-life. Unfortunately, this also realizes the villain characters as well.
* Beetleborgs, the series got started when the protagonists earned a wish to be granted and chose to become their favorite comic book superheroes — unfortunately, the magic that brought the superpowers to the real world also brought the comic's villains as well.
* Beetleborgs. Unfortunately, the villains are still at large. This is due to Beetleborgs being an adaptation of the Japanese shows B-Fighter and B-Fighter Kabuto, of which there was no more footage left of to use on other episodes, resulting in the series being cancelled.
* Beetle fighting is also widely practiced and bet on in Asian countries, including Japan. Unlike cockfighting it's usually legal and generally considered more wholesome in that beetles don't have the same kind of central nervous system as chickens and presumably don't feel pain the way they do and besides which, most fights take place on top of a log and are decided by
* Beetle has a hunch Sarge is watching him from hiding... mainly because Sarge is far too obese to fit behind the object he's standing behind, and the attempt just looks silly.
* beetle in a non-English speaking country nobody will think of insects, but will immediately think you're referring to the rock group.
* "Beetle" is the correct spelling for the insect, or the long-running model of Volkswagen.
* Beetlejuice: According the titular character in "The Neitherworld Beauty (You've Gotta Be Kidding) Pageant," the Deetzes' home was one of these when they moved in - specifically, haunted by him. It's the only time in the cartoon continuity that any explanation is offered for how Lydia and Beetlejuice met.
* Beetlejuice, Adam and Barbara are driving over a covered bridge and swerve to avoid a dog. They crash through the wall of the bridge and end up poised on the edge, teetering above a river. They look back and see the dog standing on a broken plank, panting happily at them. The dog hops off the plank, and over they go.
* Beetlejuice, Adam and Barbara are heading home after a trip to town and swerve to

avoid a little dog inside a covered bridge. They crash through the wall and take a moment to collect themselves and look around. The dog is perched on the end of a loose plank under their car as if on a teeter-totter, which is the only thing keeping their car from plunging into the river. Then the dog steps off the plank.
* Beetlejuice; Adam ends up with eyes on his fingertips, Barbara with eyes in her mouth.
* Beetlejuice, although by the end of the film both her father and stepmother do seem to have improved at least a little.
* Beetlejuice and gets so into it he starts thinking he really is Ahab. When informed of this, the whale playing Moby just rolls his eyes and makes a disparaging comment about method actors.
* Beetlejuice and ghosts in general, being "strange and unusual" as they are.
* Beetlejuice and Lydia find a skeleton leg at the scene. Later, when Jaques shows up without his leg, Beetlejuice immediately begins to blame him before Jaques cuts him off to explain how he lost his leg. A literal red herring flops across the screen while the three stare at it in confusion.
* Beetlejuice) and repeatedly declaring that it's a waste of time. However, his heart keeps popping out of his chest and making very contradictory claims, suggesting this isn't really how he feels at all.
* Beetlejuice, and there's never any indication that they have any clue she's missing. It's even worse when Beetlejuice invents a human persona, Mr. Beetleman, who is clearly several years older than Lydia; the fact that this somewhat skeevy thirtysomething character spends a lot of time with their daughter doesn't seem to faze them in the least.
* Beetlejuice and throws in "total babe" in her lines, in contrast to Lydia who delivers her lines straight and sincerely.
* Beetlejuice, and was horrified when the studio actually considered using it.
* Beetlejuice, and yet she's never shown to miss any school or have her absence noticed by anyone.
* Beetlejuice animated series, BJ and Lydia discover a land of talking anthropomorphized food, which was in danger of being conquered by a head of lettuce in Roman garb (Caesar salad). At the end, Beetlejuice asks whether there's any fast food around, because he is hungry. After a horrified moment, he and Lydia are chased out by the natives, who declare them to be cannibals.
* Beetlejuice animated series drew some Beetlejuice/Lydia porn in which BJ fingers Lydia while she's on her period and ends up with a red fingertip. The crew found it so funny they made BJ's fingernails red in the cartoon as an inside joke. According to that same interview, Rule 34 was rampant in that studio, and included everything from softcore fluff to things that were, to quote, "Bad. Sand-worm bad."
* Beetlejuice, apparently this happens to the titular ghost at random.
* Beetlejuice: A sentient roast chicken in Beetlejuice's refrigerator taunts him in the episode "Poultrygeist."
* Beetlejuice as "Lyds" or "Babes" than her real name. On a very few occasions, he calls her "my dear," although this usually for playful drama. She returns it by sometimes calling him "BJ" or "Beej," and the instances of her doing so become more frequent as the series goes on. Their car, the Dragster of Doom, is affectionately dubbed "Doomie" by both.
* Beetlejuice as well, and Beetlejuice was pretty darned terrified of them.
* Beetlejuice, Barbara ends up in the sand desert outside the house. A sand worm threatens her. She slaps it on the nose and it goes away. Later she rides that sand worm to the rescue.
* Beetlejuice: Barbara's first attempt to frighten off the new tenants of their house. When they open the closet door, she's swinging from a noose - then yanks her face off, leaving a freaky skull with bugged-out eyeballs. Too bad they couldn't see her...
* Beetlejuice, Barbra hangs herself in her closet by her dress via a clothes hanger, pulls her own face off, her eyes fall out of her face and screams in an attempt to frighten off the Deetzs from their home. Unfortunately, she soon realized they can't see her when they moved her like a shirt.

* Beetlejuice. Basically, any ghost who tries to go beyond his/her haunting grounds ends up there until they turn back.
* Beetlejuice Beej and Lydia (and others) are playing baseball in the Neitherworld. At some point it is announced that the game has changed to "Sudden Death", meaning that the losers will have to stand in the "Losers' Circle", an area enclosed by a rope. Beej is unimpressed (as he's been dorking around the entire game anyway) until the "circle" opens up into a fang-lined maw that belches a fireball into his face.
* Beetlejuice: Beetlejuice gets a G, Q, and Z when he's forced to go back to school.
* Beetlejuice Beetlejuice gives Lydia a wedding ring that has someone else's finger already in it. "Honest, honey, she was nothing to me."
* Beetlejuice: Beetlejuice, in the animated adaptation is shown to be this. His parents are hardworking, well-mannered neat freaks, and he has a brother (who appeared in only one episode) who is essentially perfect.
* Beetlejuice. Beetlejuice — it's why everyone in the Neitherworld hates him.
* Beetlejuice: Beetlejuice once found a huge gold rock. A tax collector took a small piece of it and did like the taxman from the Barney Bear example above.
* Beetlejuice, Betelgeuse does a form of this to Lydia so she can visit the Neitherworld while still alive. The "mark" isn't visible, but it does involve her ingesting a bit of his "essence" in order to make the trip. A later strip implies that this could potentially have repercussions of an uncertain nature.
* Beetlejuice: Betelgeuse does the insane proprietor shtick on a TV ad sent exclusively to the Maitlands, where he promises "I'll eat anything you want me to eat, I'll swaller anything you want me to swaller!"
* Beetlejuice, Betelgeuse has to marry someone in order to be free from the Neitherworld and do whatever he wants. So, he plans to marry a very reluctant Lydia Deetz.
* Beetlejuice, but it's unclear whether this is intended to be canon to the show.) The other question fic writers like to try to answer is, in the absence of a proper series finale, what became of the duo's relationship in the future?
* Beetlejuice can control people from a distance, control more than one person at once, and even do it to each-other. (This happens three times; Betelgeuse himself does it to Barbara Maitland as a demonstration, both Maitlands do it to everyone at an entire dinner party, and at the end of the movie, as a reward, Adam Maitland allows/forces Lydia to float in the air and sing. (The Maitlands are obviously Harry Belafonte fans.)
* Beetlejuice can only make a bad situation worse, and it's through a series of somewhat bizarre circumstances that they reconcile.
* Beetlejuice cartoon has Lydia's friends look into the hollow of a tree they believe to be haunted. Beetlejuice calmly says, "Hey, how ya doin?" Lydia's friends flee in terror.
* Beetlejuice cartoon, Lydia urges BJ to tell his brother, Donny, that he loves him. BJ is a little unsettled by the idea of using "the L-word," and struggles for a good minute before finally offering a compromise: "I don't... hate you like I used to." It's close enough for Donny.
* Beetlejuice cartoon, of all things. In one episode, Beetlejuice presents Lydia with a spider brooch, celebrating the anniversary of the day they first met. She's thrilled with the present and declares, "I could kiss you!" and almost does... until the sight of bugs in his teeth puts her off, and she hugs him instead.
* Beetlejuice cartoon once had BJ bragging that his mohair jacket was made "from a thousand mos!"
* Beetlejuice cartoon with Lydia Deetz's mother Delia. Delia's weird sculpture art is laughed at by the living people in the Outerworld, but it's a smash hit with the dead ghosts of the Neitherworld.
* Beetlejuice - Charles Deetz is sitting in Adam's den, delightedly playing with his birdwatching stuff. He picks up binoculars and looks out the window, and recoils when he sees a crow with scraggly head feathers pecking at entrails on a fence post.

* Beetlejuice. Charles Deetz uses an in-universe diagram to show what his "Museum of the Paranormal" will look like.
* Beetlejuice". Claire gets the Juliet role, which Beetlejuice uses to take over her body and make a ruckus of the play. Miss Shannon, the school's teacher, is aghast but the school's headmaster loved it.
* Beetlejuice comics, Lydia accidentally summons the title character by saying his name in her sleep, which allows him to try to fix the current mishap.
* Beetlejuice comics, Lydia and Beetlejuice overhear her father saying something which makes it sound like her family will have to move away from her house (and consequently, the ghost who haunts it). So she enters the Neitherworld lottery in order to win enough money to buy the house from the bank, and Beetlejuice uses his shady Neitherworld connections to ensure that she has the winning ticket.
* Beetlejuice commit) and is sent to prison. He has to survive a lot of weird, overly strict rules and share a cell with a literal stool pigeon while his friend Lydia works to prove his innocence.
* Beetlejuice, either, as near the end of the episode Beetlejuice dissolves into barely-mobile goo when he gets dangerously close to the deadline.
* Beetlejuice episode "Brides of Funkenstein" was written by young fans.
* Beetlejuice episode "Laugh of the Party" after Beetlejuice says he flushed the rest of his Party People In A Can (which, when water is added, caused a ruckus earlier in the episode) down the toilet.
* Beetlejuice episode "Mom's Best Friend" had the Ghost With The Most turning into a dog but he can't revert back because of a restrictive collar around his neck. Sweet, innocent Lydia brandishes a pair of scissors and says "I know how to fix it. I'll cut it off!" B.J. shrieks in fright.
* Beetlejuice episode "Prince Of The Neitherworld" has lugubrious royalty Prince Vince do this when he first sets eyes on Lydia. He's absolutely smitten by her—Lydia is rather disinterested but still cordial to him.
* Beetlejuice episode "Quit While You're A Head," Tim Burton (creator and director of the movie) appears in caricature in a scene taking place in a Netherworld bar.
* Beetlejuice episode "The Son Dad Never Had" presented the Ghost With The Most taking on the persona of cousin B.J. (taking on the size and demeanor of a 12-year old) bonding with Lydia's dad Charles while she's busy with a project. Lydia, upon seeing this, starts thinking she's unwanted—until she sees Beetlejuice fleecing Charles for money. Lydia sends BJ. home, much to her dad's relief. And as it turns out, he loves to do things with Lydia, which he describes as "us" things.
* Beetlejuice episode "The Unnatural" when an umpire is about to make a play-at-the-plate ruling (which would send the loser to a virtual Hell) wasn't so much a rousing speech as it was an impassioned treatise about sportsmanship. It brings the whole stadium to tears, resulting in the game being rained out.
* Beetlejuice even though the only thing indicating he told a joke at all was Lydia doing a rimshot.
* Beetlejuice exhibits every quality required, being a disgusting pervert of a dead guy, with truly appalling hygiene, who is several hundred years old. Among other things, he grabs a woman's boobs, peeks up Mrs. Maitlaind's dress (as well as Mrs. Deetz's), and nearly succeeds in marrying teenage girl Lydia Deetz- against her will.
* Beetlejuice faces a Catch-22 in "Super Zeroes." As his own superhero Super Beetleman, he can't join a union of superheroes unless he has a membership card. And a superhero can only get a membership card by being part of the union.
* Beetlejuice far; instead, he manages to say, "I... don't hate you like I used to." But it's close enough for Donny, who immediately perks up.
* Beetlejuice features a whorehouse full of "horny devils" when the titular ghost remarks he's feeling a bit "anxious". They appear only briefly.
* Beetlejuice) first comes across Lydia, he explicitly identifies her this way.
* Beetlejuice from driving their car into a river to falling through the creaky old floor in their house.
* Beetlejuice gets a credit card in "Keeping Up with the Bonses" and goes on a buying binge in order to one-up said couple. But then he gets his first bill. With

no money to pay it, the creditors take Lydia as collateral until he either pays his tab or returns his swag.
* Beetlejuice gets a credit card in the episode "Keeping Up With the Boneses" (the Boneses are an upscale Neitherworld couple) and goes on a spending spree. He gets his first bill and realizes he has no money. Beetlejuice is consigned to having Lydia being kept by the credit card company as collateral or return everything he's bought. He follows his broken heart and returns all the merchandise to bail out Lydia, only now he's consigned to being a department store Santa so he can pay for the interest on his purchases. As poetic justice, the Boneses are in the same boat after spending all their liquid assets trying to outdo Beetlejuice.
* Beetlejuice got tired of the obviously bad Ventriloquism, and decided to possess the doll to make it more interesting.
* Beetlejuice had an episode where Lydia's rival Claire Brewster is running for school president, so Beetlejuice—as his drag alter ego, Betty Juice—enters the race as well. After alienating the students with constant mudslinging (both literal and figurative), they both lose to a virtual unknown.
* Beetlejuice had Lydia get a skeleton key from the real estate agent who was a friend of the deceased couple.
* Beetlejuice had "The Unnatural", in which Beetlejuice and his friends (the "New Yuck Prankies") faced Scuzzo and his gang of clowns (the "Jokeland Laugh-letics") in a baseball game. Beetlejuice refuses to take the game seriously until he finds out it's a literal "sudden death" match.
* Beetlejuice - Handbook for the Recently Deceased. Though it can be difficult to parse the meaning of the knowledge inside, as it "reads like stereo instructions."
* Beetlejuice has a younger brother, Donny, who is completely unlike him in almost every respect. Clean, honest, friendly, and well-liked by everybody (at least at first), Donny drives BJ crazy. He adores his big brother, however, and the most annoying thing about him is that he tries very hard to push for them to have a closer relationship.
* Beetlejuice has Delia, Lydia's mom, enter a Neitherworld art contest where it turns out if they win they must agree to become a part of the art museum by being turned to stone. Eventually, Lydia and Beetlejuice are able to rescue her and turn her back to normal.
* Beetlejuice has no other name, as far as anyone knows. The characters Juno and Otho are also identified only by those names; Otho presumably has a full name, but it's never used, nor is it mentioned whether Otho is his first or his last name (or neither).
* Beetlejuice. He compares it to the features menu on a DVD, saying that if you go far enough in one direction you eventually come back out the other side.
* Beetlejuice, however, he's not a bodybuilder; he's the ghost of a circus performer.
* Beetlejuice idea why it's there. He looks up at it and wonders if it means he's gotten an idea.
* Beetlejuice if she's in danger (or, sometimes, even just mildly inconvenienced). This includes surrendering to the debt collectors who are hounding him, breaking his own hypnosis, and returning to the place he hates most in the Neitherworld.
* Beetlejuice in 1991, (alongside the third ABC season). 94 episodes were produced in total.
* Beetlejuice. In a movie filled with fun creepy special effects, the best one is the one we have to imagine.
* Beetlejuice in fact, that the game is called off on account of rain.
* Beetlejuice: In "Keeping Up With the Boneses," the Ghost With the Most tries to one-up the Boneses couple by getting a credit card and going on a shopping spree. Once he gets his first bill and finds he doesn't have a cent to his name, the creditors keep Lydia as collateral until he either pays the bill or gives back everything. He gives back everything but is now left to pay the interest on the charges.
* Beetlejuice: In one episode, a vampire targets Lydia's mother and misses her, leaving a pair of holes in the waterbed.

* Beetlejuice: In one episode, Beetlejuice's tongue gets stolen by a black cat he foolishly mocked, and he teams up with Jacques LaLean and a band of skeletal legionaries, the "Lost Souls' Brigade", to get it back.
* Beetlejuice: In "Out of My Mind," Lydia is sent to her room without dinner when Beetlejuice secretly replaces Delia's spaghetti dish with live worms (violating a promise he made to not prank Lydia's parents) and Delia thinks they're Lydia's.
* Beetlejuice In "Poe Pourri", Lydia goes into excited fangirl mode when B.J. introduces her to Edgar Allen Poe.
* Beetlejuice) instead of a gas giant. In the early script, it was specifically the moon Titan. Though in the film, the giant planet seen in the sky could be Saturn.
* Beetlejuice interested in both of the Maitlands in the musical, and the actor has stated that he plays the character as pansexual.
* Beetlejuice in the cartoon, has to finish kindergarten in order to earn his license back. His license to drive people crazy, that is.
* Beetlejuice introduces her to Edgar Allen Poe in the Neitherworld (episode "Poe Pourri").
* Beetlejuice is a haunted house comedy from the perspective of the ghosts.
* Beetlejuice is considered one of Michael Keaton's greatest performances, and the character is still so iconic that he gets referenced often in popular culture nearly 30 years later. Also, he's on-screen less than eighteen minutes, and he doesn't meet the protagonists until the literal halfway point of the movie.
* Beetlejuice is Jacques, a skeleton with a French accent who wears a beret and is mildly obsessed with building his muscles... of which he of course has none.
* Beetlejuice is prone to doing the first kind, subtly, to Lydia at times when she's not looking. He also does the second kind, complete with steam coming out of his ears, when another character asks her to marry him.
* Beetlejuice is this in its most obnoxious way. She talks in Valley speak and takes no more delight than when she tries to humiliate Lydia. She'd succeed if not for the Ghost with the Most.
* Beetlejuice, just like in the movie, BJ's ultimate plan for Lydia is this. If he marries someone alive, he can stay in the world of the living; he flat-out calls it "a green-card type of deal" in an effort to reassure Lydia when she's grossed out by the idea.
* Beetlejuice loves to eat beetles. Along with a brand of candy bar that has them called Good N Buggy.
* Beetlejuice: Lydia Deetz is asked why she likes Beetlejuice in the debut episode "Critter Sitters." Her answer: "He makes me laugh."
* Beetlejuice: Lydia enters Beetlejuice's mental world in one episode. It's very wacky!
* Beetlejuice, Lydia is learning to cook and offers one of her salads to BJ to taste. He takes a bite, hesitates, sees Lydia's warning glare, and, straining for a compliment about the salad, finally concludes that "It tastes... uh... green!" This from a guy who snacks on beetles.
* Beetlejuice — as the Maitlands try to scare Mrs. Deetz in her bedroom, their ghostly moaning is heard by Delia in the next room, as she grumbles in disgust thinking it's her parents.
* Beetlejuice — the Maitlands are summoned by Otho, but he accidentally casts an exorcism that causes them to quickly age to a dried-out mummy state.
* Beetlejuice musical features a verse devoted to a deceased athlete describing how he was forced to give up his dream of being a dancer to satisfy his father's wishes.
* Beetlejuice musical had a few numbers from the Washington D.C. tryout that were taken out before the show hit Broadway. An entire demo album with commentary by composer Eddie Perfect was released in October 2020.
* Beetlejuice never got its planned October 2020 opening either, making all of this for naught.
* Beetlejuice. One episode was called "Beauty and the Beetle," only the beast in this case was Neitherworld ape Thing Thong. Lydia helps Thing Thong gain some self-esteem.

* Beetlejuice one: watch Otho's shoes changing from moccasins to sneakers and back, as he inspects the house for the first time.
* Beetlejuice opens with the death of the two main characters, and revolves around their attempts to haunt their own house and navigate the afterlife's bureaucracy.
* Beetlejuice plays a round of golf in the Neitherworld in the episode "Caddy Shock" to save Claire Brewster's hide.
* Beetlejuice powers) saddled with a character physically attached to his back, "Pat on the back." At first he's pleased to have someone who seems to appreciate his comedic genius, but soon the guy's constant praise and encouragement cause him to end up in some severe trouble with the law, and he actually resorts to trying to smother him to keep him from talking.
* Beetlejuice powers to cover her lips with a zipper. However, she just opens it up and manages another "Beetlejuice". Now truly annoyed, Beetlejuice conjures a metal plate to completely shut her mouth.
* Beetlejuice says of Delia's artwork, "No, ma'am, I don't like it. I love it!"
* Beetlejuice scare her father out of the house to punish him for his apparent neglect in the wake of her mother's death.
* Beetlejuice series. Somewhat justified since, as in the show, the characters are aware that Mr. Monitor often puts their antics on Neitherworld television, and he has every reason to believe that there actually is a screenwriter controlling the script.
* Beetlejuice series when Lydia and the newly humanoid tree Spooky run to each other.
* Beetlejuice several times in the animated series, perhaps most unfortunately when he fell in with a group of headhunters. (In one episode, this actually caused his head and body to argue with each other, his body doing so by forming a mouth with its hand.)
* Beetlejuice's Graveyard Revue, the characters Hip and Hop have bright yellow hair and pink hair, respectively.
* Beetlejuice's Graveyard Revue, the title character first appears as one, and needs the audience to say his name three times in order to free him from the wraps.
* Beetlejuice she's too good for him, and that's why he'll never stop pursuing her.
* Beetlejuice: "Stage Fright" has Claire Brewster getting Lydia kicked off the cast of a school play of "Romeo & Juliet," so Beetlejuice gets even by taking over Claire's body and disrupting the play.
* Beetlejuice - standard decor for a haunted house, but Barbara, still getting used to being a ghost, is frustrated that she can't clean the place with the vacuum being inaccessible. When Adam suggests their being alone in the house may be Heaven, she mutters "Heaven wouldn't have all this dust!"
* Beetlejuice stories, BJ finds himself in four-point restraints under a descending razor pendulum, which cuts through his tie and lapels just before a commercial break.
* Beetlejuice story had Scuzzo getting Beetlejuice framed for ticket scalping. Lydia gets him cleared and reveals Scuzzo as the culprit. B.J. wants to give him a proper juicing for what he put him through, but Lydia says to let it pass—Scuzzo will learn from his crime while in jail and she pats him on the back. The following:
* Beetlejuice story told from the ghosts' point of view, in which they're trying to get the obnoxious humans out of their house and hire the titular "bio-exorcist" to help them do it.
* Beetlejuice story, "Tricks and No Treats," had Beetlejuice framed for ticket scalping by Scuzzo the Clown. Lydia and Ginger (the tap-dancing spider) sneak over to Scuzzo's hideout where they tape-record Scuzzo telling his partner Fuzzo how he framed B.J. In returning to Doomie (Lydia and B.J.'s car), Lydia gives herself away after stepping on a whoopee cushion lying on the ground.
* Beetlejuice subverts this as she loves spooky things and the Ghost With the Most is her friend.
* Beetlejuice takes Lydia to a Neitherworld hospital to treat her injured foot ("Generally Hysterical Hospital") where she's misdiagnosed and assigned to have her

body removed from her soul. Guess who her surgeon is.
* Beetlejuice that is common in the film. Apparently, she'd been a magician's assistant in a 'sawed in half' trick gone wrong.) A hilarious scene involving her is shown at the end of the movie when the title character strokes her leg, and her upper half — who is "sitting" on the other side of him — angrily hits him with a magazine.
* Beetlejuice, the episode "Keeping Up With the Boneses" sees Beetlejuice forced to work off his credit card debt by becoming a badly-costumed Mall Santa (a pillow he's using as stuffing is visible), with Lydia playing his elf. Beetlejuice, of course, is less than happy about all of this.
* Beetlejuice the Monster Across the Street (or rather, The Monster Who Lives Down The Block) has become this type of lawyer. He literally drops a conversation with BJ to chase down an ambulance.
* Beetlejuice the one cloud in Adam and Barbara's blissful marriage is their inability to have a child. When Jane comments on how their house should be for a family Barbara looks crushed, implying that she may be having trouble conceiving. By movie's end, they've become sort-of surrogate parents to Lydia.
* Beetlejuice, there was a rather gross one: evidently, Beetlejuice's fingers are red because of a sexual drawing one of the animators did.
* Beetlejuice, the show opens with the funeral of Emily Deetz, and the story largely revolves around Lydia coping with her mother being gone.
* Beetlejuice. The title character is trying to get Lydia to say his name three times so he can be released from his imprisonment. He's not allowed to say his own name, so he uses a sort of visual image Charades to teach her his name. Trouble starts when he tries to get to say the "juice" part.
* Beetlejuice, the title character lives for this. He even has a License to Drive People Crazy. (Only good for use in the Netherworld, but he tends to do it to humans in the mortal world too.)
* Beetlejuice, the title character's eyes do this when the sandworm suddenly appears in the scene. He does something similar in a number of episodes as well, in response to various stimuli.
* Beetlejuice. The titular ghostly con artist is trapped in the afterlife. He can be temporarily brought back to the real world (and returned) by saying his name three times, but can only be truly free if he marries a human female.
* Beetlejuice, they are totally ignored while the obnoxious new people complain about the size of the closets. They get the hang of it once Beetlejuice teaches them how to do it, though.
* Beetlejuice they figure it out. Several "recently deceased" football players take a while to figure out they didn't survive the crash they were in.
* Beetlejuice think it would be fun to conduct a séance with the dead... and the fun suddenly stops when the ghosts they resurrect begin to crumble into dust before their eyes.
* Beetlejuice thinks she is universally loved, being rich and all that. Outside of her school clique, she's actually quite hated.
* Beetlejuice, this tended to happen to Jacque, a beret-wearing skeleton with a French accent, rather often, especially when he was a victim of the title character's pranks.
* Beetlejuice) to reveal a tacky, powder-blue leisure suit. Otho screams and runs away in horror.
* Beetlejuice until it was resolved. Example: in this situation, "coming apart at the seams" isn't a good thing to say.
* Beetlejuice villain Scuzzo the Clown has a black face with a long nose in reference to the mask worn by the Pulcinella comedy character, but combined with his red lips it is easy to misinterpret as a blackface caricature.
* Beetlejuice was dubbed in Czech twice. The first dub was made by Studio Bär for Warner Home Video in 1992. The second dub was made for airing on TV Prima in 2006.
* Beetlejuice was originally supposed to be a horror movie, but was changed to a supernatural comedy.

* Beetlejuice, we first see Lydia riding her bike home wearing a blue-green cape. Not so much badass as it was rather adorable.
* Beetlejuice were not shown in the cartoon). Still turned out surprisingly good.
* Beetlejuice, werewolves, zombies, vampires, witches, spirits, tap-dancing spiders and skeleton bodybuilders.
* Beetlejuice: When the Maitlands try to leave, they wind up in a strange limbo-like location called Saturn, a type of limbo inhabited by sandworms.
* Beetlejuice where B.J. and Lydia are involved in a road race with their car Doomie. Scuzzo and Fuzzo set a booby trap along a short cut, but Doomie refuses to take it in spite of B.J.'s wishes. "Where did I go right?" B.J. asks.
* Beetlejuice", where they endure a disembodied existence described as "death for the dead".
* Beetlejuice, which was contractually tied to a run at the Winter Garden Theatre. The COVID-19 pandemic meant the show acutally closed in March. However, it was announced in September 2021 that the production would reopen in the Marquis Theatre in April 2022.
* Beetlejuice: While the Maitlands are ghosts, they don't show up in mirrors.
* Beetlejuice, who is the only person he will actually heed, but she's sometimes guilty of this too.
* Beetlejuice, who voiced Lydia, would record their lines together, just the two of them, and the rest of the cast would be recorded and added afterward.
* Beetlejuice (who was probably in his late 30s at his time of death).
* Beetlejuice writes his life story which is full of lies about his Roadhouse neighbors. He leaves Lydia out of the book because he can't bring himself to say anything nice about anyone. From the episode "Ghost Writer In the Sky."
* Beetle was an air force vehicle designed in the 60s to maintain nuclear bombers. While it used boring treads to get around, it had two mechanical arms capable of lifting thousands of pounds yet precise and delicate enough to move eggs. The Beetle was declared a huge success, the nuclear powered bombers it was built to service however were not.
* Beetleworx were made by converting pirate toons into robotic slaves, though the process is reversible by filling the four conversion machines with paint. Or irreversible by filling the machines with thinner. Or just ignore them to begin with.
* Bee Train as a subsidiary of Production I.G. before splitting off, inactive, if not defunct, since 2012.
* Beet the Vandel Buster can use five of the powerful magical weapons called Saiga, when most individuals can use only one. However, early parts of the series are spent with Beet learning how to fully utilize his five Saiga and Beet has zero ability in the more basic magical skills which are supposed to be the lead up to obtaining a Saiga in the first place. One character even comments that he learns everything backwards.
* Beet the Vandel Buster do this on multiple occasions. Slade usually wins, but Beet takes out the stronger monsters.
* Beet the Vandel Buster is the epitome of this, having been blocked a grand total of twice, and survived once when used wrong. And one of those blocks involved having a giant metal rhinoceros take the hit, get split in half, and still only absorb a fraction of the damage.
* Beet the Vandel Buster: Notably put on permanent hiatus due to one of its creators being ill and the other moving onto a different production
* Beet the Vandel Buster tradition, keeping track of experience requires regularly visiting someone (an old crone in this case) who keeps track of your kills. Beet got tired of this, and so appeared horribly under-leveled when he first reappeared after the prologue.

* Before he married Hera, Zeus had a succession of relationships, some of which sometimes were described as marriages, with various goddesses: Metis, Themis, Eurynome, Demeter (another sister of his), Mnemosyne, and Leto. But often the marriage to Hera was seen as the only 'proper' one (Hera being the goddess of marriage, among other things), and it certainly was the most enduring and was treated by the Greeks as the archetype humans should aspire to. According to myth, when Zeus and Hera married all other gods assembled to reverence them and give them presents. By all accounts, it was an impressive affair. As George O'Connor recounts it in the

* Before most battles, the commander of the army will give a speech. If the army is commanded by a captain (no general is present in the army) the speech will be very short, along the lines of "let's kill them, men", while an actual general will treat the player to a longer speech. The content of the speech will depend on a large variety of things, including: the faction you're playing, the faction you're facing, which side has the numerical advantage, if the general has fought, won or lost against the faction before and how large a portion of the total military strength of both factions is present. Even some traits the generals may have will affect the speech, in addition to the effects they have on the general's stats, so a Boring Speaker will stutter a lot and be uninspiring in general, while a Great Speaker's speech makes even the player excited. The most experienced generals will even analyze the composition of the forces present, such as which side has more missiles, cavalry, etc., and

* Before that was the Mewtwo Mulligan deck. Mewtwo had a move where you discard 1 Psychic Energy attached to it, and Mewtwo could not be affected by any of the opponent's attacks. As a result, a viable competitive deck popped up containing 1 Mewtwo and the rest Psychic Energy, to attach onto Mewtwo and be discarded each turn until the opponent's deck runs out. In addition, a Mulligan, hence the deck's name, is a rule in which if you don't have any usable Pokémon in your initial hand, your opponent draws a card. This rule made it very likely your opponent will have fewer cards in his or her deck than you, guaranteeing you a win later on. This strategy got so out of hand, as there were no real counters to it at the time, that the Mulligan rule was changed to make drawing the card optional to defang this deck.

* Before the age of photography almost every visual representation was made years later, since it was impossible to capture something on the moment it happened. This allowed artists to fantasize their own ideas of how a certain person or historical event looked. Even paintings made by eyewitnesses or while the subject was present to pose are dubious, since artists were forced to idealize or romanticize everything according to their patrons' wishes (when they didn't outright depict historical figures with the faces of the patron). only viable endgame caster builds involved merciless exploitation of percentage based damage (Static Field, Corpse Explosion, Iron Maiden) or bugs (Blessed Hammer) while flat damage spells were only used to finish off enemies reduced to a sliver by Static Field or to kill a handful of enemies at the start of a run so you could get some revived minions up.

* Before the industrial revolution, farming the land was a hard way to get by, and there were fewer capitalist enterprises to invest in. It was riskier to loan money, since borrowers often defaulted, and as a result the interest rates were so high that most people couldn't afford to borrow capital. Unreliable modes of transportation, primitive means of navigation, high tolls and customs duties, banditry, piracy, and unpredictable wars and natural disasters meant that being a merchant was not for the faint of heart. Wealth was measured in things like land, livestock, slaves, and precious metals that could be siezed by force. In a world like this, raiding and conquest actually could enrich a country at the expense of its neighbors, at least in theory. Even during the 19th and early 20th centuries, colonialism and wars between great powers continued because of nationalist attitudes about politics and the economy, and the fact that national industries were based on the availability of scarce natural resources like oil and rubber, while imports of finished goods still made up a relatively small portion of domestic consumption in any given country. It's been speculated that part of the

reason that war has become so much rarer since World War II—even more so since the collapse of the Soviet Union—is that agriculture has become vastly more efficient, and the majority of wealth now comes from international trade in manufactured goods, bulk commodities, and knowledge-based services, all of which would be disrupted by a war between developed countries. The most valuable forms of property are increasingly intangible or intellectual in nature, an example being that aside from all the other reasons not to do it, the government of China wouldn't be able to reap the value of American technology companies even if it were to stage a military invasion and occupation of Silicon Valley. This, combined with the industrialization and technological advancement of warfare, means that war is both more expensive and less profitable than ever before. The only countries that might think a war could be profitable in material terms tend to be international pariahs who do not participate in the global economy, and who have such underdeveloped economies that the theft of another country's natural resources could actually made a difference to their bottom line.

* Before the invention of jump-3 (3 parsec jump), one Terran Confederation ship during the Interstellar wars carried extra jump fuel in drop tanks. That option is still available during the Third Imperium, as is jumping as much as 6 parsecs. Normal merchant traffic seldom has motive for either of these because of the extra space the jump engines take up; more then one parsec is usually given to warships and sometimes to merchantmen running specialized contracts. Normal traffic abides by the one parsec rule, and thus policymakers have to still assume that when building infrastructure.

* Before their defeat in the war against the Centauri, the equally expansionist Orieni maintained a similarly well-equipped army, only they don't employ energy weapons, favoring fletchette guns for their small arms. As their doctrine assumes the actual conquest and defense of a world will be done by their space force the army is intended more as a counter-guerilla force, with a low proportion of tanks and other forces intended to fight a peer opponent... And suffering accordingly during the Centauri-Orieni War, as the Centauri garrisons of occupied worlds would go underground and then launch counterattacks with heavier equipment the moment their fleet came to try and retake the world.

* Before the magical cooling computers are perfected, there's a scene that almost perfectly delineates the extent to which stealth in space is possible. The protagonist is in a small, maneuverable ship. Its thrust is a reasonably-tightly-collimated photon beam, which therefore can't be observed unless you're almost directly aft of the ship. He's being pursued into a solar system rather than out,

making it more difficult to notice the heat from his life-support systems. The system has a number of other ships, and his pursuers don't have governmental control over the system so they can't necessarily track them all. All of this means that he can stay hidden for roughly a day, after which his only recourse is to blow up the ship, fake his own death, and trust that someone will come pick him up; even that isn't really good enough as his pursuers can eventually analyze the wreckage for traces of human particles, but it buys him enough time to get to a major enough population center that he can disappear for real.

It can sometimes be seen today between Imperial and Metric system users, e. g. in common parlance many users of the metric system still use their language's word for "pound" for 500 grams. * Before there was computer-aided dispatching, radios, or printers, there was the Fire Alarm Box System, the most well-known being the Gamewell system made in Massachusetts, where a majority of fire departments still use this system. This utilizes red fire alarm boxes on each corner as well as a telegraph system. When a box is pulled, it goes to a fire alarm office, who will then retransmit the box number to the stations needed for the call. Paid fire departments who use this system, such as Boston, where this system was first installed in 1852, will have bells in their stations to ring out the box number closest to the emergency. For volunteer departments, they may have a Gamewell Diaphone, a horn that will blow the box number. As with sirens, many communities have removed diaphones as well as a variety of other horns due to noise complaints.

She is still capable of speech, and recently began talking to her stepmother, but limits herself to short sentences.
* Behind The Veil fits pretty well, despite being born a wolf. Mike Hoffman also has shades of this.
* Behind The Veil has some of the more common names repeated, but the one that takes the cake is the tale of the two Jons: Both are Bone Gnawers, Theurges, at the same sept.
* Behind The Veil is an interesting case of this, with the "actors" being limited to celebrity representations of what the character's appearance would be. However several characters ages are either older or younger than the celebrities portraying them, for example the 32-year-old Jack Raven being represented by the 45-year-old Jeffrey Dean Morgan.

* Beh'leeb Inmee, who accidentally killed Rheel Neh'mu (whom she regarded as a son) in self-defense because he tried to kill her and her husband, the abbot, as well as her yet unborn child, for being rebels. Because the only one who was really vying for her incarceration or execution was the Big Bad.
* Beholder has you taking on the role of secret policeman yourself. Although player-character Carl Stein is just a landlord and not a member of any such organisation, he is tasked by the state to spy and report on his tenants by such means as searching apartments and installing cameras in their smoke-detectors without the tenants knowing.
* Beholder hives have Hive Mothers (magically modified beholders) which rule over normal beholders and specialized abominations they spawned.
* Beholders also reproduce asexually. After spontaneously self-impregnating, they gorge themselves until their womb becomes too large and pinches their esophagus shut. When the children come to term, the parent vomits up its entire uterus (which does not regenerate), examines the swarm of tiny beholders for those that most resemble their parent, and chase those off while consuming the rest for looking wrong. 5th Edition's
* Beholders, catoblepae, and many other monsters produce their own death rays naturally. And the traditional pistol-shaped kind show up in the 1e AD&D module
* Beholders enjoy taking trophies from slain foes, and their lairs are decorated with the petrified remnants of defeated adventures, pieces of other beholders, and magical items taken from powerful foes.
* Beholders have access to magic lenses that supercharge their eye rays. While technically single lenses, they'd count as goggles for a species with
* Beholders project a cone of anti-magic from their central eye which negates all spells cast at them from the front. This also prevents them from using their own spells directly from the front without first turning off the anti-magic cone, leaving them briefly vulnerable.

* Beijing Doll is just an autobiographical novel about life as a rock music-loving teen, but the Swedish back cover makes sure to mention that it takes place after The Cultural Revolution, just so that the publishers could include a mention of it. It's very rare to find a back cover blurb that assumes that the readers just want a good novel and don't care one way or the other about the country where it takes place.
* Beijing in 2022 and Milan / Cortina d'Ampezzo in 2026. This decade will mark the

first time a city has hosted both the Summer and Winter Olympics (Beijing having previously hosted the 2008 Summer Olympics). Cortina is also a repeat host, having hosted the 1956 Winter Games by itself.

* Being 17 about two boys, initially unable to get along at school, spending time together in one of the boys' house due to various circumstances.
* Being a 3 foot tall slim girl Jade was a prime candidate and picked up from the floor frequently. Not only did Jackie frequently hold her like this, but mooks who were usually taller than Jackie frequently did this to her, one huge mook was able to
* being abandoned by his mother after she shows him some compassion during a hostage situation and becomes hurt when Marge doesn't want to visit him in prison.
* Being a big dude is half the battle. On his podcasts, Steve Austin said that someone once advised him: "This business is all about big upper bodies. So long as you're still in proportion, no one will care", and Hogan was once quoted as saying, "big arms equals big paychecks." Look at all the stars from the late 80s and early 90s, and they've all got wide shoulders, big chests, huge arms and—with the exception of a few—not-great legs. Since the business used to be about Greek-style godlike humans (albeit with not-so-godlike acting) going to war, most of the guys where big, over the top, and blond-haired. That all changed due to the Attitude Era and the influence of ECW, though you can still see it today with guys like John Cena and Rob Terry. It's well known to be Vince McMahon's
* Being a bit behind on the rest of the world is often mocked as being something that's only unique to Third World countries or isolated dictatorships. In reality many innovations and trends take some time to leave their country of origin and become famous, popular or actively used in the rest of the world. Some examples:
* Being a blend of Samurai and Prussian Junkers, the Vor of Barrayar are expected to act this way whether or not they are technically officers, being a class (excuse me,
* Being Able to Edit Skills in Another World, I Gained OP Waifus, all the waifus are perfectly happy to be Nagi's slaves because (a) he treats them like people, (b) he takes care of them, (c) he makes sure they live in comfort and relative luxury and (d) when they were on their own their lives sucked.
* Being Able to Edit Skills in Another World, I Gained OP Waifus clearly in play. In the latter novel, they are not only pampered like crazy, but live in the lap of luxury.
* Being Able to Edit Skills in Another World, I Gained OP Waifus has Nagi try to free a slave, Cecil Pharot, that he purchased solely for her knowledge of the New World he was dragged into, after carefully questioning her. On modern Earth, such an act would be considered a mercy. In this New World, she was insulted, and dismayed, thinking he was treating her like trash, trying to throw her away. It took a lot of apologizing and head patting for him to convince her she was wrong.
* Being Able to Edit Skills in Another World, I Gained OP Waifus Nagi, continuously twisting the laws of causality to have Nagi wind up in compromising positions with any woman who gets too close, even ripping of Rita's dress at one point.
* Being Able to Edit Skills in Another World, I Gained OP Waifus, or upon having their memories artificially altered, and they still have to keep their end... or face increasing levels of insomnia until they either comply or die. The god doesn't care which comes first.
* being able to see all the woman at a party wearing AP's 2013 Winter Catalogue, our hero is woken up by his foreman on a construction site and told to get back to work.
* Being able to self-diagnose a heart attack is another big one, as they are almost never
*) being able to transform into a swarm of spiders that retain his consciousness.

* Being able to win through against larger numbers of enemy fighters is half the point of special forces. The other is specialising in operations too difficult for normal troops to handle.
* Being a blind Earthbender, Toph uses the vibrations in the ground to sense around her. Toph does not like wearing shoes or having her feet touched, because doing so affects her vision. When she does have to wear shoes as a disguise, she kicks their soles off so her feet still make direct contact with the ground.
* being absolutely horrifying to watch prime example of how safe modern F1 cars are.
* Being a catgirl is one of the potential Special Qualities a maid or female butler can have. —They can also be were-tigers or were-lions.

* being a drill. Its Japanese name is Onidrill and it learns a couple of drilling moves.
* Being a dwarf also seems to be more a matter of culture than a biological thing, as Captain Carrot is considered a dwarf (by adoption) despite also being a nearly seven-foot-tall human.
* Being a failed science experiment with more mental issues than even the most skilled therapist could count,
* Being affected by a Haste spell or drinking a potion of Speed ages the recipient by one year.
* Being affected with the Lust status effect turns everything into the same floating kimono-wearing figure; items, enemies, traps and the main character all look the same.
* Being a film about a man who only has one day to live, clocks and time are frequently shown and discussed in
* "Being a girl is not an excuse!". Thankfully, when Nicole finally sees them again in "The Parents", they've mellowed out a bit, allowing them to work on rebuilding their relationship with their daughter.

* Being a heroine doesn't mean you get a blessed, carefree life - if anything, you'll get crapped on even more, especially if it can lead to more interesting storylines. And if you have sidekicks or loved ones without your brand of hero immunity? It won't be pretty.
* Being a horror-themed challenge, chapter 22 features guest appearances from spooky-themed characters
* Being a kid's series, it's never explicitly discussed; however, a few characters in
* Being a King in Ancient Greece meant you were the first man on the battlefield, and the last man off: and Byzantine Emperors continued the tradition on the rare occasions that they were present on a battlefield. The last Byzantine Emperor Constantine XI died at the siege of Constantinople in 1453, refusing to the leave the besieged city. Plenty of people did get out of the siege, largely thanks to the

excellent Byzantine navy.
* Being a largely space-set real robot show, this is a staple of the
* being all pagan and everything. However, the statue itself may have earlier been carried off to Constantinople (present-day Istanbul) because Constantine the Great decided he wanted it. According to this theory, the statue was destroyed in 475, when much of the city was wrecked by a great fire.

* Being a movie all about stereotypes and how even the most open-minded people can have bigoted tendencies,
* Being a mutant is just grounds for immediate execution. The only exception being if you are a "registered mutant", in which case you just have to wear a bright yellow ribbon at all times, and might as well have "scapegoat" tattooed on your head.
* being an absolute lady-killer. This is to compensate for the fact that people in the town of Inaba don't care for him and his family, his father being the manager of the local Junes store which is blamed for killing off local businesses.
* Being an atheist in a biblical epic is unwise, as Lot's wife Ildith discovers to her cost in
* being an example, symbolizing her feelings during a divorce from her husband Diego Rivera).
* "Being a Nice Guy Isn't Good Enough". A person needs a strong personality in addition to being nice to be attractive.
* Being an unmarried politician over the age of thirty usually leads to automatic gay rumors. US Senator Lindsey Graham (R-SC) is a commonly cited example, one of the few bachelors to pursue the presidency, and has frequently denied being gay. A friend and fellow Air Force officer was interviewed about this and stated Graham is "Nothing but heterosexual. There are stories that I cannot share to prove it but he is."
* Being a paragon of clean Earth, Captain Planet is weak against your usual forms of pollution (smog, toxic waste, etc.), as well as Hitler-level hatred, apparently. You might consider these not particularly weaksauce, but it suggests Gaia went seriously wrong in the design stage: the things he was created to fight against are the things that do him the most damage. It's like J'onn J'onnz deciding to be a firefighter or Alan Scott deciding to only fight evil loggers.
* Being a recurring side character, Freddie's mom is a classic example of the trope.
* being arrested. This line is fixed in the 3DS re-release — Phoenix instead says he never imagined the possibility of "becoming the defendant for this case". Specially in the original, his line was him stating he never thought he'd "end up in the defendant's chair" himself. So it's likely he WAS referring to that specific case only, but it was just worded badly.
* Being a same-gender couple in the early 80s, Annie and Eliza try to keep their relationship secret. They both eventually feel stressed over having to pretend to be "just friends". They're outed when

* Being a Statuesque Stunner seems to be something of a requirement for membership in Darksied's Female Furies. Lashina and minor member Artemis are 198 cm and 191 cm respectively and even Granny Goodness is 179 cm and while she definitely doesn't fit the trope now at least one story set in her youth showed her as a very hot looking
* Being as the show focuses heavily on dating, a number of straight examples show up, as do a number of women who never quite become girlfriends.
* Being a story Ted Mosby is telling his kids about how he met his one true love, has plenty of these and every girl he meets is (however briefly) teased at potentially being the "mother." This was done as soon as the first episode, being about Ted falling HARD for a girl and the episode ends with the narrator saying "And that is how I met your Aunt Robin." Ted and Robin are
* Being a swordmaster, this is somewhat surprising, as one would expect him to be familiar with
* Being a Time player, Dave has the power to go back and forth in time. When the Draconian Dignitary steals his copies of Rose's Journals from his room, he considers the idea to go back in time and stop the thief, only to discard the idea after noticing the corpse of his doomed timeline self lying on the floor of his very room, proof that he has actually already tried that.

Fortunately for Belldandy, the professor's reaction is never shown.
* Being Bindy complains about her mum all the time, but when Janey calls her a bitch, Bindy is offended.
* Being Bindy. Shocked that Mum would go so long without telling her something so important, Bindy asks why they can't really talk to each other, instead of flitting along the surface without touching on major aspects of Mum's life. Mum slams on the brakes, swerves into the shoulder, and angrily tells her that because Bindy isn't a young child anymore she expects to have some privacy, she won't put up with Bindy's disrespect anymore, and if Bindy acts up anymore she'll cancel the trip and take her back to her father's. Bindy shouts, "Then take me back, because I don't want to go with you anyway!" Mum drives her back to her father's house at way over the speed limit.
* Being Bindy: When Bindy tells her dad that Janey's going out with Mitchell, Janey punches her in the thigh. Bindy is confused, as she and Janey have always kept her dad updated on their love lives.

* Being called or asked if she's "sick" makes Kieri go into a state of blacked-out rage, and she ends up beating a fellow angel to a bloody pulp because
* Being capable of surpassing the more common normal floods Jökulhlaup (literally, glacier run) are a terror. They happen either when a gradual buildup of a subglacial lake (normally connected to geothermal areas underneath a glacier), or more massively and dramatically a subglacial volcanic eruption, leads to a massive flood rushing from underneath the glacier. These are often accompanied by dangerous gasses, so not only would you have to get to a safe distance from the potentially biblical scale flood, but also get to high enough ground not to suffocate or succumb to poisonous gas. Then after the waters have receded, everything is covered in a thick layer of glacial mud, with enormous icebergs left in the flood's wake, which will then proceed to turn their surroundings into quicksand. Oh, and the volcanic eruption that caused the massive flood in the first place? Probably still going strong, showering you with fine ash, where each and every grain is essentially a terribly sharp shard of black glass, sanding your eyes, skin and mucosal membranes with a fierceness putting a sandstorm to shame.
* being changed, after Hasbro noticed just how many bronies there were.
* Being cheap also goes well with the fact that it was relatively easy to manufacture them by the numbers. Crew compartments were crude, sure, but all that time saved furnishing for comfort could result in more tanks being made and sent straight away to push back the Germans at Leningrad and towards Berlin. The Russians learnt that a tank that could not be pushed out and sent to the front lines was as good as no tank at all, especially when the front lines were less than a dozen miles from the factory where the vehicles were being built.
* Being close friends with future Prime Minister of Israel Golda Meir;
* Being close to a Primordial War survivor in the First Age can be dangerous, humiliating, and bad for your physical, mental, and social health.

* being cursed with immortality. She can even regenerate from being reduced to ashes, and the longest she's ever been out of commission is a few hours.
* being dazed off and on thru the episode and having an epiphany at the end. One has to wonder if he had flashbacks to the Clay Dobson scenario.
* Being Dead Ain't Easy, after spending two and a half hours moving Kaiba's chair across the room and spinning it to where he can sit down, Joey realizes that not only could he have sat on the bed and not wasted so much energy, he'll have to move the chair back before Kaiba wakes up in three hours.
* Being Dead Ain't Easy, and since he recently witnessed Joey's sudden and violent death protecting Kaiba, he chalks up Joey's hauntings as hallucinations. It's only when Kaiba plays a game of Duel Monsters and Joey accurately tells Kaiba his opponent's hand does he acknowledge that something supernatural is going on.
* Being Dead Ain't Easy anime/manga got to the part about how the Millennium Items were made, Yami Bakura's statement that he knows roughly how it was done still fits, as do the parts about how much power the shadows once held. The ritual to

save Joey is also accurate to the dubbed anime, as the villagers were sacrificed via their souls/life energy.
* Being Dead Ain't Easy has the Big Five. They're technically behind a lot of major events in the story, as they're responsible for sabotaging KaibaCorp and siccing Morrison on Kaiba—inadvertently starting the entire plot—but aren't personally involved or seen at all. At most, they get a couple mentions.
* Being Dead Ain't Easy, it's heavily implied that Kaiba feels guilty for living when Joey died. He almost works himself to death trying to find a way to save him.
* Being Dead Ain't Easy, Joey Wheeler dies in the very first chapter. The story centers around his un-life as he tries to figure out what happened and how to fix it, if he can.
* Being Dead Ain't Easy, Kaiba kept the trench coat he was wearing when Joey died, which is still soaked with his blood. Joey is very freaked out by it.
* Being Dead Ain't Easy limited flight, and the ability to affect the living world if he really, really concentrates.
* Being Dead Ain't Easy, this is parodied. Joey haunts Kaiba because he has nothing better to do, and thinks he's too smug for his own good.
* Being Dead Ain't Easy, to put it simply, Seto Kaiba is not a morning person.
* being dead (from an unrelated incident following the pilgrimage) universe to back-talk Hades and nearly kill Hercules with one hand.

* being given lessons in weapons development by the Klingons, allowing Kirk the legal pretext to arm the Hill People, while tortuously aware that he is starting an arms race that will plague the planet.
* Being God Is Hard: Being the Almighty One requires an unfathomable amount of responsibility.
* Being Good Sucks: Since being a good person requires responsibility, it can be difficult to bear it.
* Being Good Sucks: The protagonist usually is trying to live like a good man, but past mistakes mean they have some heavy atoning to do that they can not dodge.
* Being Good Sucks worth it, in the end: the evil are punished, the faithful are saved, and we go on to our reward, forever and ever.
* Being granted permission to be above rules most other people must follow.
* being held prisoner by Grimmel, Ruffnut references her crush on Eret in the second movie (saying that that ship has sailed and she's over him now), and also mentions Fishlegs and Snotlout fighting over her while expressing her misgivings about both of them.
* being hijacked by the Capitol. The list of things he shows no signs of angsting over include having killer wasps dropped on him while sleeping, taking a sword to the leg, nearly dying of sepsis, being forced to listen to someone being slowly chewed to death over several hours, having his leg amputated and finding out the girl he loves only pretended to love him back. And that's just from the first book. Even his nightmares are mostly about losing Katniss and not about the horrors he's lived through.
* being his sole surviving heir makes it impossible to verify it one way or the other.
* being his "wife" in his and acts suitably insufferable a fair share of the time, but isn't one to sit about with her mouth open when things get hairy.
* being hit repeatedly by a. Minor attacks from other small animals often fall under this. Subverted if the animal has rabies or if it doesn't just swipe or bite you a few times or if an allergy is present.
* Being Human actually goes to the Betrayal stage in the season 2 finale.
* Being Human, and had asked to be killed off in a way which meant he wouldn't be expected to return.
* Being Human.") and his desire to take advantage of it is just his view that it's a powerful tool for anyone.
* Being Human (and implied elsewhere), the Vampire community has a relationship with the local Chief Inspector and the Coroner, to help cover up botched feeding attempts.
* Being Human and woke up, completely disoriented, covered in blood, and surrounded by broken furniture and dead bodies.
* Being Human: A nerdy werewolf, a charismatic vampire and a sexy ghost are

roommates. They try to have a normal life.
* Being Human: Annie is trying to play matchmaker between Hugh and his ex, Kirsty, so she gets George to date Kirsty and be the world's worst boyfriend. Unfortunately, Kirsty likes everything they think will drive her away, from German Expressionist films to kebabs, and she even likes George's terrible poetry.
* Being Human: Annie's main goal in the aftermath of her death is to drive away anyone who tries to move into her house. But then George and Mitchell move in and, being more than human themselves, can see her and treat her as a third flatmate. She spends the rest of the season trying to find out why she's still in the world. And making cups of tea.
* Being Human bad about driving the social worker to tears. (Annie even teleports into her car to leave her some tissues.)
* Being Human) constantly whips between wacky sitcom hijinks and extremely gory supernatural horror, which can be more than a little jarring.
* Being Human: Cutler tries to do this to show the elder vampires how the world is scared about werewolves. Sadly for him, it's been covered up, leading to flipping through a variety of unrelated TV shows to his annoyance and frustration.
* Being Human episode "Being Human 1955", Hal and Pearl argue over who should kill "Hal's friend" who has been causing trouble for Hal. Hal can't do it, and Pearl refuses to have the blood on her hands. Leo settles the argument by suggesting that they take the spider outside under a cup.
* Being Human episode "Puppy Love", Emrys, believing that he has completed his unfinished business, tries to cross over and walks into a cupboard.
* Being Human finds George, the werewolf, waking up the morning after a full moon. He's naked, so he grabs the first clothes he can find — from a clothesline. The style isn't exactly flattering.
* Being Human, George and Mitchell are able to rent a city centre house on the cheap because it's haunted by a girl called Annie. George, being a werewolf, and Mitchell, being a vampire, don't have a problem with this.
* Being Human Hal reveals that he has little to no money, Tom asks why he didn't just get a bank account, because being immortal and everything even if there had been periods of massive inflation or something then he'd still have a small fortune.
* Being Human has a few, usually from Mitchell, who, despite living through both World Wars, and being attacked by a mob believing he's a pedophile, still has complete belief in human goodness.
* Being Human has a vampire, a werewolf and a female ghost as flatmates.
* Being Human has no qualms about killing most of Bristol's vampire population, kills werewolves under the guise of helping them, and forcibly exorcises ghosts. He does this in spite of a good number of them actually being decent people just trying to live a normal life, to the point that he is incapable of considering the idea that the vampire Mitchell could form a genuinely platonic relationship with werewolf George.
* Being Human) has this concept as its basic premise with a vampire, a ghost and a werewolf trying to find some level of normality.
* Being Human have a scar of some kind from the initial werewolf attack. George's scars are large (several long scratches), but they're conveniently on his shoulder so they're easily hidden by a shirt. Nina's scars are on her forearm (also several long scratches), so they can be covered by clothes, though not as conveniently. However, her case is still a subversion because she is a burn victim, having burns all across her stomach.
* Being Human, he has a breakdown and starts berating Annie (who he's recently begun dating). When she asks him if he loves her, he tells her "I was in love with the idea of being in love!" The way he acts after (holding her and crying) shows that he didn't believe that, though.
* Being Human Herrick is a local policeman, and the vampires' lair is an undertaker. This is justified as vampire society has centuries of experience in hiding in plain sight, and it is implied there are vampires in high places. Also, Annie (a ghost) got a job as a barmaid. This isn't completely impossible, as Annie

can (usually) pass for a normal human, and if she gets paid cash in hand, there wouldn't be the fact she's legally as well as biologically dead to worry about.
* Being Human hit a similar musical snag. The final episode of series 1 (which aired in March 2009) had a flashback that took place "two years earlier" (making it early 2007), but then had the song "Mercy" by Duffy playing on the radio in the diner (released in February 2008). When fans told director Colin Teague about his, he tried to explain it away by saying that it was a local late night radio show which was playing up-and-coming artists.
* Being Human, hoping to cause chaos in the human world by revealing the existence of werewolves. It utterly fails, as everyone who sees the video just assumes it's done via special effects (with one commenter even criticizing the production quality).
* Being Human in 2008, with the intention that the best-received one would be turned into a full series. Therefore, all the others were One-Episode Wonders:
* Being Human introduced zombies as human beings who simply died and had their souls forced back into their decaying bodies (due to a temporary supernatural block preventing them from finding their door to the other side). They don't feel any pain (for the most part), and continue to behave as they did before death. However, they soon feel the heat of decomposition, and eventually "die" again — this time permanently — once their body becomes too decomposed to continue moving (at which point they cross over for good).
* Being Human introduces "Seven", a human who voluntarily acts a self-replenishing blood source for a vampire couple. Seven (and his six predecessors) are apparently all too happy to be fed on repeatedly and, when his "owners" intend to have another vampire drain him completely (ie, kill him), Seven is ECSTATIC.
* Being Human is an addiction, not a biological necessity, and comes complete with painful withdrawal symptoms and a 12-step program (well, for a while anyway.)
* Being Human is less than humane. Mitchell transformed her into a vampire to "save her" from dying when he fed on her and has regretted it ever since, not least because the once sweet and kind Lauren has taken to her vampiric biological mandate with gusto and sociopathy. It remains to be seen whether she changes her mind or doesn't get killed first.
* Being Human, Kemp and one of his men watch the elevator descend expecting Mitchell to be there for them to kill. The door opens to reveal a dead body while Mitchell reveals himself elsewhere in the compound.
* Being Human left his job and family to become a live-in blood donor for vampires, complete with leather bondage suit. He even does this knowing full well he will eventually die from it.
* Being Human mistakenly thinks the two men she's selling the house to are gay. After mistakenly making a homophobic insult, she tries to furiously backpedal, culminating in her saying that she sees no problem with it, but would be unable to do it herself because "like [the two men], I just like dick too much".
* Being Human, Mitchell and George are thought to be pedophiles and an angry mob throws them rotten fruit and breaks their windows. During this, they are shown to be watching an old movie with a classic torches and pitchforks scene.
* Being Human Mitchell, a vampire, is accused of being a pedophile after befriending a young neighborhood boy and lending him a tape which he believes to be an innocent movie but is in actuality a sex tape. He and his roommate are persecuted as a result.
* Being Human: Neurotic werewolf George falls in love with his coworker Nina, but struggles with how much to tell her about his condition, and when. He tries to dump her several times, with nebulous claims of "darkness" and "a bad side of me", but she sticks with him.
* Being Human: Notable in that two of the three main characters, as well as the big bad of the first season, were recast between the pilot and the start of the series.
* Being Human revolves around destroying the facade the vampires have created to hide the supernatural from mortals, then using propaganda to paint the werewolves as the greater evil and convince ordinary humans to side with the vampires.
* Being Human sees George get killed in the fourth season premiere, while Nina

turns out to have died in between the third and fourth seasons.
* Being Human, several women mention how attractive they find Mitchell, usually while talking to George.
* Being Human since Mitchell turned her into a vampire and then dumped her to deal with her new undead status herself.
* being humans infected with a parasite that transforms them into flesh-eating humanoid monsters.
* Being Human Sucks: A major motivation for this trope is removing the suck.
* Being Human Sucks: Being a human being sucks so much that being a non-human is preferable.
* Being Human Sucks: Not everyone likes being a boring, ordinary human being. This motivates them to try and become something else.
* Being Human. They're also repelled by any object that a human puts faith in, which allows George, a Jew, to keep them at bay with his Star of David. Meanwhile, Death (or an agent thereof) can talk to ghosts through televisions.
* Being Human: This seems to apply to vampires, ghosts and werewolves.
* BeingHumanUK Alex suggests she might consider a future with Hal, but she needs to go see her family first, and might decide to stay with them indefinitely.
* Being Human (UK), an abandoned part of the hospital where Mitchell and George worked was used to allow George to transform without harming anyone.
* Being Human (UK), and seemed to have feeling towards normal human Hugh. Also vampire Mitchell is falling for regular human Lucy.
* Being Human (UK) at the end of season two. Strangely, the viewer can see the character's ankles and there's visibly nothing physically pulling the victim through the door.
* Being Human (UK) episodes "Lia" and "The Pack" have cage matches with captured werewolves, run by vampires.
* Being Human (UK) episode "The War Child", Mr. Snow, the leader of the Old Ones, is old enough that every vampire currently undead descends from him. His actual age is never given, but he claims to have visited Egypt while it was ruled by the pharaohs and once "met the son of a carpenter" (implied to be Jesus Christ).
* Being Human (UK). George figures out what he's doing and tells him as much.
* Being Human (UK). Ghosts usually die with some particular piece of unfinished business, and are unable to cross over until they can figure out what it is and fulfill it. Zombies are created when something unnatural blocks a soul's transition into the afterlife at the moment of death; body and soul don't separate properly, and the soul is forced to remain within the corpse for several weeks after death, until the body has decayed to the point that it simply can't sustain the soul anymore.
* Being Human (UK) has vampires planning a vast global empire from their headquarters in Bristol, England.
* Being Human (UK). "How noble of you to take on the curse of immortality so that your friends could wither and decay in hospitals and old people's homes..."
* Being Human (UK) is described as having a brain like a "planet" and is said by several characters to be able to carry a much more prestigious job than hospital janitor if he wanted.
* Being Human (UK), Nina and her American counterpart Nora experience accelerated pregnancies of about twice the human rate of fetal development due to the fetus being a werewolf/half werewolf respectively.
* Being Human (UK), Nina wakes up in one episode to find George watching her. He confesses that he loves watching her sleep. Nina replies that that was sweet, though creepy.
* Being Human (UK) pedo hunt, complete with (misspelled) graffiti, eggings, angry mobs and being spat in the face.
* Being Human (UK), save for Nina, are pretty bad liars, particularly George. Worse yet, when the group is in desperate need of a good lie he never steps down and lets one of the other characters take care of it; he always comes up with the lie. It is often answered with skepticism.
* Being Human (UK): Some vampires create homemade pornography ending with the

murder of their victims, then pass it round.
* Being Human (UK), the audience knows that Lucy is Dr. Jaggat as soon as the latter appears on-screen. Mitchell remains in the dark until she's killed his vampire charges and the priest he's interrogating about her whereabouts refers to her by her surname.
* Being Human (UK), there's a weird but tense scene where the three main characters are fooled into watching a vampire who has filmed themselves having sex and then feeding and killing a human... but only the human shows on the DVD (then the vampire's bloody footprints when she walks through the blood pooling afterwards).
* Being Human (UK) the three main characters are a vampire, a werewolf, and a ghost who still care about humans and are trying to live as normally as they can.
* Being Human (UK): This limitation appears. In one episode, George and Annie save a friend from a vampire attacker by simply closing the front door, leaving him screaming "Invite me in! Invite me in!"
* Being Human (UK) Tully tells George that, in order to prevent him from wandering too far and possibly getting into trouble, he should try to find a place surrounded on a couple of sides by water, saying he can't cross running water while in wolf form.
* Being Human (UK) voluntarily kneels while begging Cutler not to destroy humanity. It doesn't really have the desired effect.
* Being Human (US): Aidan receives a DVD from Rebecca which features her having sex with a man and then killing him.
* Being Human (US), Annie is always able to leave the house, but usually chooses not to.
* Being Human (US), a vampire can enter a house uninvited, but he starts burning and very quickly dies. On one occasion Bishop breaks into the trio's house and attacks them, and flees before suffering permanent harm.
* Being Human (US) a vampire priest suggests that Jesus, having risen from the dead, might have been a vampire.
* Being Human (US) episode "I've Got You Under Your Skin", Suren flays Henry alive, or rather undead, as punishment for cheating on her.
* Being Human uses a non-violent version of the same style of a threat to get a room full of Vampires to shut up and listen to him.
* Being Human (US): Sally's rotten fiancé Danny kills her over her losing her engagement ring down the sink.
* Being Human: when Mitchell wonders how Herrick knew about a criminal allegation against him, Herrick looks down at the police uniform he's wearing and sarcastically asks "all this time, have you been thinking I'm a stripogram?"
* Being Human, When Werewolves transform, it is horrifically painful, and for good reason, his roommate Mitchell describes it in detail and it sounds like the most agonizing thing ever:
* Being Human, where the former seems quite keen to romanticise the latter's rescuing of her, and a relationship that had previously been purely platonic is transformed into romance post-rescue.
* Being Human which focused on Adam, a character that had featured in an episode of the parent show, and otherwise entirely new characters.
* Being Human would be screwed... including loved ones not in the "fantasy" world. That, and the absence of their other two friends from their lives meant their happy universe was fundamentally incomplete.
* Being Ian, Mr Kelley is stuck in traffic with his sons while trying to deliver a piano to a client. He yells out the window of his car:
* Being Ian who works at Kelley's Keyboards and frequently provides comic relief with his kooky personality and odd superstitions and traditions.
* being in a particular location in his timeline doesn't necessarily mean it's in the same place.
* being in eighth grade for about ten years, Mallory's geekiness, and Jessi's anxiety about her race and dancing skills) suffered this to some degree, as well.
* being injected twice with a poison that will kill him when his adrenaline runs down, being shot, and. The creators mention in the commentary that everything that

happens after Chev drinks the "plant shit" drug may not have actually happened, at least not the way the viewer sees it. Given the ridiculous premise of the second movie, this could be them dropping hints, or just giving a secondary interpretation of the more impossible parts of the film and its upcoming sequel.
* Being in love with the emotionally withdrawn Bruce Banner is tough enough already, but his onetime wife
* Being inspired in part by 1950s sci-fi and taking place after a nuclear war, the
* Being itinerant workers who often are often dismissed as thieves and troublemakers, the quarians also resemble Romani people, or indeed, pretty much any migrant group. The codex for the first game notes that "The quarians are coming to take our jobs" is a common refrain whenever the Flotilla shows up to an inhabited planet.
* Being John Malkovich; all the major characters including Malkovich himself are more-or-less tricked into doing the work for him.
* Being John Malkovich at how he locked up his wife Lotte in a monkey cage to keep her away from Maxine, the woman they both want, and he frees Lotte and allows her to call Maxine. Then the very next scene shows that he locked her up again and has gone off to meet Maxine in her place. It's left ambiguous if Craig's moment of remorse was a sincere one that he chose to ignore, or if he was faking the ignored epiphany to get Lotte to set up a meeting with Maxine that he could take advantage of.
* Being John Malkovich (bisexual female main characters, queer female romance, subject matter includes gender identity reassessment)
* Being John Malkovich, but you get the picture.) Well, technically John Malkovitch gets Catherine Keener pregnant while Cameron Diaz is metaphysically inside his body, but they seem to count it as Cameron Diaz's kid.
* Being John Malkovich by mouthing the first few sounds in many female names, using the woman's reaction to home in on the right name. He "guesses" tons of names (via eliminating anything that doesn't have the right sounds) before managing to stammer out "Mar....Mah....x....Maxine?!" She reacts by being surprised and dubious, but agrees to meet him in a bar.
* Being John Malkovich, Craig takes a job as a filing clerk on floor 7 1/2 of the Mertin-Flemmer Building. It's between the floors numbered 7 and 8 and half the height of a regular one.
* Being John Malkovich features a climactic chase scene through the titular character's unconscious mind.
* Being John Malkovich features a puppeteer who discovers a portal in an old building that leads into the mind of actor John Malkovich. At first it just allows him to see through Malkovich's eyes for a short period of time, but later in the film, he develops the ability to control the actor's behavior, and then extend the time he is inside of his mind. Eventually, he pretty much permanently moves in and completely takes over Malkovich, at least until some other stuff in the plot happens.
* Being John Malkovich features this trope in a puppet show about Peter Abelard and Heloise.
* Being John Malkovich find themselves teleported to the New Jersey Turnpike after ten minutes.
* Being John Malkovich is a movie about a portal into a mind of an actor who plays himself. We even get to see a monkey having a flashback.
* Being John Malkovich laden with surrealism which functions as a borderline philosophy course.
* Being John Malkovich: The relationship between the female leads is one of the film's main plots.
* Being John Malkovich was allegedly a sea captain married to a dwarf woman and built the 7 1/2 floor for her and her "accursed kind" (Maxine doesn't believe it).
* Being John Malkovich, which can be found on the DVD, has a fairly glaring example of changing a seemingly innocuous word into something that makes the context weird. In the trailer, Maxine says to Craig -

* being kicked out of the course period. A particularly egregious case was when a creche (kindergarten) in Connemara divided bilingual children from non-bilingual children, despite already being an Irish-speaking creche.
* Being kidnapped and held locked up by the kidnappers for many years.
* being kidnapped by the previous owner of the son's Actimates Barney doll who had been talking to the boy through a radio in the doll and of whom lured him out to his van. The man drives away and the narrator doesn't even bother going after him.
* being killed via molten gold to the head. From there on, she's shown as being extremely focused on her goals, occasionally to the point of foolishness (for example, badgering merchants for ships, without considering that she has no way to pay for them). While she certainly shows more empathy for those in her care than Viserys did, including putting her own goals in jeopardy for the sake of freeing slaves on several occasions, she also is shown to be capable of violently dealing with anyone who tries to hinder her without showing any signs of being bothered. A major source of dramatic tension with her character is what side of the coin for the Targaryens she'll end up being.

* Being Meiling's background, the tengu at one point achieved a moderate level of civilization and proceeded to casually sit back and exult in their glories as the world passed them by, content to ignore other races and smother any trace of their own bloodstained legacy. Aya Shameimaru, once their greatest warrior and intelligence operative, was exiled and ostracized to the point of becoming a buffoonish pervert from the sheer loneliness for the crime of keeping records of massacres instigated by the tengu. Even the oni, their ancient enemies and overlords, managed to develop the Underground into a functional, cosmopolite city, and fully acknowledge and start making amends for their terrible past, contrasting with the stagnant tengu attempts to keep to themselves and sanitize both their history and their society into perfect stasis.

* Being one of the most famous examples ever, Achilles' heel had a body part named for it, namely, the Achilles Tendon. Sever it, and you won't be walking again for a long, long time. Tendons in general are strong but have very little blood supply and heal very slowly. They also get stronger in response to exercise very slowly compared to the muscles they connect to. As such, a common and serious source injury of people who have taken up a new sport and don't know their limits is to have their muscle strength in the required muscles become sufficient to injure the weaker tendons they connect to.

* Being packed full of mad scientist tropes, the Skaven Chief Warlock Ikit Claw tends to say this a lot (his appearances in novels, such as Thanquol's Doom, make it quite apparent). Though in all honesty he probably is stark raving mad...
* Being paralyzed and forced to wait for a horrific monster to eat you. Living every waking moment in fear that someone else is going to die. Honestly, as the series goes on, it's difficult to remember that it was written for kids... particularly if you have a vivid imagination.
* Being paralyzed by the Spawn of Shub-Niggurath in hex 0712 will invoke the Tentacled One monster, which can cause the victim to age 3-15 years.

* being possessed by Ozpin, one of the strongest known characters in the series.
* being publicly outed as Green Arrow Star City to unite with the remaining heroes and save the city from destruction.
* Being punished for a minor crime relative to all the major crimes going unpunished around them.
* Being put under anesthesia can have the same effect. The time between being knocked out and waking up after it's all over feels like a split second, but anywhere from 30 minutes to several hours could have passed, depending on the specific surgery.
* being raped by Ramsey on a regular basis, simply reading a threat about it has no impact on her.
* being red headed is a male example, being very compassionate despite occasional arrogance. One of his nicknames is "Goldilocks".

* being reminded by others and feeling embarrassed about her feelings, that arc has been sidelined so that Ochaco is known primarily for her developing feelings for Izuku. Not to mention how Izuku, by virtue of being the male lead, has so many conflicts and character arcs that give him a more fleshed out identity while most fans can only recognize Ochaco as "Izuku's love interest".
* being repeatedly probed (a total of eight times according to the dialogue). This ordeal apparently paled in comparison to being forced to slow-dance with one of the aliens to "Lady in Red."

* being responsible for the death of his entire family save his twin brother. He fails, unfortunatley, which sets the motivation for the next guy.
* being resurrected with the rest of the Wolkenritter. Her second order of business was to hug Hayate and let out every last bit of emotion she'd kept pent up since the whole Book of Darkness incident started.
* being rigged by the show's host, Charming Gold. He was bullied by his peers because he looked ugly as a monster before. That scenario caused him to discover his powers in sucking the life of his fellow kind. Not only he will look young, but he will stay immortal for a thousand years. Not only that, his plan is actually to 'restart the world' and make his own kind considering he killed his own kind.
* being ripped to shreds by hellhounds and then his soul being tortured in Hell. Fans had been speculating all summer how he would escape, with most people assuming it would take a long time to resolve. Nope. Instead, the mystery becomes how it happened rather than any rescue plot.

* Being There by those around him, including a billionaire investor and the President of the United States. In scene after scene, it seems that the reality of Chance's true identity and nature is about to (finally) become apparent to those who respect and admire him. However, thanks to Chance's good luck and the other characters' self-deception, the big reveal never happens.
* Being There, Chance the Gardener is described by a senator's wife as "very, very sexy" to Eve, who agrees with that assessment. In the book, he's described as a cross between a young Ted Kennedy and Cary Grant. Interestingly, Sellers deliberately gained weight for the role, believing that Chance would live a sedentary lifestyle.

* Being There, Chance the gardener's comments about plants are mistaken for profound metaphorical statements about the economy.
* Being There, his response to the television producer's declaration of how many people will be watching him and the producer's reaction are also ad libs.
* Being There intelligent, he is chronically misinterpreted by many of the other characters, who often think he is speaking in metaphors.
* Being There, is a satire of the human tendency to favor style over substance and take things at face value, particularly where media and politics are concerned. Basically Horatian.
* Being There. It is strongly suggested that the wealthy "Old Man" who raised him and told him this is the father, a possibility also raised in the film adaptation though the mother's backstory is not brought up. In any case, Chance is not allowed to leave the house (in the book, he was told that he would wind up institutionalized if he did) and only does so when forced out by the Old Man's death. When the FBI and CIA investigate "Chauncey Gardiner", as the world accidentally comes to know him, no trace of him can be found (birth certificate, driver's license, etc. — all of which Chance likely never had anyway), leaving his past completely mysterious to all but a few.
* Being There meaningful event, the one that sums up the whole story, happens unobserved by anyone save the audience...and the speech heard from a distance just happens to support it with the film's final line: "Life is a state of mind."
* Being There played the character in the film and is not generally considered to have a dashing appearance. In addition, Sellers intentionally gained weight for the role because he decided that Chance's "sedentary and solitary" life would have left him overweight.
* Being There, the hero coughs as he tells Eve his name. Eve mishears "Chance the Gardener" as "Chauncey Gardiner" which becomes the hero's new name.
* Being There, the President suffers from this, as a literal reflection of his corresponding "impotence" as a political leader.
* Being There, the third time around the attendant just breaks out laughing during the ride, explaining that he expected Chance to make another joke about the elevator. Beyond the gag, later in the film, Chance and Eve are going to their respective rooms after a party and Eve tries to explain how she feels about him, while both face the door; as he responds, they turn to each other.
* Being There, to the point of spending much of his final years getting a film adaptation made so he could play Chance. Indeed, his family and friends have argued that of all of Peter's characters, Chance is by far the closest to who he actually was as a person.
* Being There when he encounters people who have no idea what he really is.
* Being There; when he tells her "I like to watch" - he's referring to television - she proceeds to pleasure herself on the floor.
* Being There, which begins with serious scenes of a developmentally delayed man being evicted from his home when his employer dies, but it quickly turns to comedy once the main character is on his own.
* , being the second son of the Dwarven King. He is a manipulator and schemer that constantly uses his wit to turn even the most dangerous plots against him, his family, or his friends in his favor. This becomes apparent early on, when the events of the Dwarven Noble Origin are fundamentally changed, although things still somehow manage to get more and more difficult for everyone involved as the story progresses.
* Being the token genius of the group, Velma does this pretty regularly. Another gem would be
* Being the two oldest characters in the show, it was a fanon idea that Marceline and the Ice King had known each other in the past. Cue "I Remember You" where it's revealed they knew each other more than anyone guessed. The story
* Being the White House correspondent, Danny Concannon is supposed to be intrepid or people will accuse him of letting a second Watergate go by, which puts him in a bit of a tricky spot since he's good friends with the President, literally wrote the book on the First Lady and has a crush on the Press Secretary.

* Being the wrestler type, Rock is topless (or near-topless) in every game he is in. His clone, Astaroth, is likewise also topless in every game.
* Being too much of a jerkass to Bouchard during your first conversation with him will end with him pulling out a gun and shooting Lara dead on the spot.
* Being Tortured Makes You Evil: Cold-blooded torture will warp even the purest hero into hellspawn.
* Being Tortured Makes You Evil: Mental issues as a long-term effect of torture.
* Being Tortured Makes You EvilWhen brainwashing is accomplished by means of torturing them.
* being totally isolated and hunted, the formula is "(Protagonist) has to enter (Labs/Castle Center/Slaughterhouse Machine) to deal with (2 or 3 people) whilst constantly hiding from some pursuing (Monsters/Abominations/Pig Monsters)."
* Being To Timelessness are what are normally meant to be the officers’ quarters. They are furnished much like normal dorm rooms, with a bed, a table, a wardrobe, a dresser, and a private lavatory. He even has some reading material stocked in each cell. The Doctor finds himself being forced to trade his normal coat for boring dark grey suits with plain black ties, while Rose is supplied with the wardrobe of a chav. At all times, there is a camera monitoring them 24/7, and they must ring a button if they need to get something from one of the Master's guards.
* Being touched by a ghost will instantly age a character by 10-40 years.
* Being "turned on" is now usually taken to mean "aroused by." Traditionally, it was simply a generic way of describing an interest or preference for something, as in "I'm feeling turned on by a lot of the food in this menu." In the 1960's, when Timothy Leary started out promoting LSD as beneficial for therapeutic psychiatry, things changed when he started promoting it for non-psychiatric reasons, with his "turn on, tune in, drop out" philosophy, with many of the

* being unable to control the powers under a yellow sun. His ship was eventually found and salvaged by Superman, who repaired and upgraded it for his own use.
* being unable to fall asleep, as late as 1:30 in the morning. He tosses and turns, and is really tired, but just can't get to sleep, until he hears his mom's voice, and wakes up from his insomnia dream. At breakfast, Calvin mutters to himself "This is going to be a bad day."
* being unable to stand up properly for a while after an unchecked body shot.
* being unintentionally killed by her best friend/love interest and then cut up into pieces by a mad doctor keeps her from taking an active role in the plot and helping Ryouta when he needs it the most.
* Being unscripted for the most part, Billy Connolly's world tour of Scotland naturally included the bloopers: one notable one was when Billy's car stalled while he was giving a speech on Robert Bruce.
* Being up mainly against the CR.42 and various other maneuverable but slow and undergunned Italian fighters, the British Royal Air Force and Fleet Air Arm could continue to use the Gloster Gladiator biplane fighter in North Africa and the defense of Malta until 1941.
* being used as a guinea pig for her mentally-unstable mother's curses.
* being used extensively and making sure it stuck. The sword was so infused with lethal energy that its only wielder was driven insane and died shortly after his victory, and even standing in the same room as the thing can have adverse consequences (to add insult to injury, it only managed to cripple Nagash for a few centuries, and the Skaven were not interested in trying their luck on Round 2).
* Being very fond of exceedingly non-standard monsters, the game has the "Taxidermic Creature" template in its 5th bestiary, which is a sort of necromantic animated object applied to stuffed or otherwise preserved animals so they can come to life and attack the party.
* "Being volun-told" is common in the US military, Royal Canadian Mounted Police,

* Being voluntold is often used to punish "Chit Bags", soldiers who try and get out of work by
* Being Watched creepypastas have the narrator mention that they experienced an intense feeling of scrutiny, and something matching their footfalls.
* Being Watched may actually be caused by this: people tend to remember the times they thought someone was watching them, turned around, and saw someone there, but forget the times when they turned around and there was no one there.
* being what it was, its historians very rarely had anything nice to say about wives and concubines of emperors:

Some real-life theists actually believe this is necessarily the case for atheists, even though these three ways of living just mentioned are not a vital pillar for lack of religious belief by itself, nor a necessary consequence of it. Others have argued this does not refer to atheism, which at the time was less well known, but rather impiety or the disbelief in the Abrahamic God alone.

Beka suffers for the duration, but it clears up.
* Beka Cooper. Mostly she wants to know exactly what the mage intends to do and why.
* Beka Cooper reminds her veteran cop partners of the idealistic reasons they joined the force and recruits fellow trainees (and friendly criminals) to help her solve a case that nobody's supposed to really care about.
* Beka Cooper, she speaks to the pigeon ghosts as a matter of course. The reason for this change is never directly stated; most fans decide that she developed her ability between books to explain it.
* Beka Cooper to a tough cop who manages to get justice despite the corruption, logistical, and bureaucratic difficulties of Tortall's nascent police force.
* Beka Cooper to do the things they do (Beka almost quit during training when she thought that she might be forced to become one, which is untrue). Most street dogs consider them little better than thugs and a nuisance that they have to resort to because of how truth spells are legally restricted.
* Beka Valentine refers to this incidence, when in "Shards of Rimni" Dylan Hunt is found with the murder weapon in his hand standing next to the killer and arrested for murder. It turns out, Dylan has been set up.

His response is semi-subversive: "You picked a great time to tell me." Moments later they're beamed to safety. in the next episode Tom offers her the chance to take back the confession, but she doesn't and they become an
* B'Elanna Torres is made Starfleet lieutenant (j.g.) on Captain Janeway's authority (despite being a member of a rebel group known as the Maquis) as her skills in engineering mean she needs to be made chief engineer. She is chosen over Lt. Carey even though she did not graduate Starfleet Academy.
* Belar — according to Belgarath, a common fantasy of Alorn women was to be visited in the night by their God and Belar liked to make as many dreams come true as possible...

* Belarus and Russia also qualify. He constantly cries, hides, and tells her to "go home!", but that doesn't stop her from literally breaking down his door wanting to "get married, married, married!"
* Belarus for that matter definitely qualifies as this. She's aggressive, sadistic and foul-mouthed, and very nasty to anyone who isn't her beloved brother, with who she has an incestuous obsession, so naturally, most of the other characters are scared of her. Lithuania has a huge crush on her, but it's because he's a
* Belarusian Central Rada was a collaborator's government made up of Belarusians previously involved in anti-Red/pro-White fighting in the region during the Russian Civil War.
* Belarus monuments, even most Belorussians (roughly 70%) list Russian as their primary language and it remains an official language still used heavily in education and politics.
* Belarus seems to be fascinated with scary stories and apparently talks to ghosts.
* Belarussian gymnast Svetlana Boginskaya developed a rivalry with American Kim Zmeskal after the latter defeated her at the 1991 World Championships, outright stating that the only reason Zmeskal won is that the competition was held in America and that
* Belarus still maintains its own branch of the KGB even to this day. Most of the other former Soviet republics also do, actually, but the Belarusians were the only ones not to bother with renaming theirs after the fall of USSR and the ascension of the ostensibly pro-Soviet president, Alexander Lukashenko.
* Belarus, the KGB remains, under the same name. Given that Belarus sadly is still a Soviet-esque dictatorship, this likely is not surprising.
* Bela's sophistication, high-end taste, and amorality contrasts sharply with the hardscrabble brothers in Season 3.
* Belated Backstory: A character had very little or no given backstory, but they eventually get a full one that changes how they are shown thereafter.
* Belated Backstory him), and they all introduce themselves properly once the circumstances allow for it.
* Belated Battleships has most of the battleships being this way, with its interpretation of New Jersey in particular consistently being described as muscular, tall and still attractive.
* Belated Battleships, San Francisco came back as Japanese but has no love lost for that people.
* Belated Battleships, VADM Williams, she thinks aloud that one of the few possible reasons why a three-star is occupying the four-star billet in question is because everyone more senior is dead. Not that she finds the other most likely reason - so much of the fleet having been lost that a three-star is all it needs - much more comforting.
* belated but very dramatic growth spurt that puts him at 186 cm (6'1")—a full head and shoulders over his 154 cm (5'0") apprentice, Gray.
* Belated Injury Realization: Not noticing or reacting to a major injury until much later.
* Belated Love Epiphany: A character only realizes they love another after their loved one is no longer available (they've met someone else, moved far away, died etc).
* Belated Love Epiphany: Realizing that you love someone when they're no longer there with you.
* Belated Love Epiphany: Realizing you like someone after it's too late.
* Bel Biv Devoe - "Poison", which warns to never trust a big butt and a smile.
* Bel Canto, a group of young paramilitaries take a bunch of hostages, and over the weeks, relationships form between the two groups. Interpreter Gen is attracted to one of the paramilitaries, a pretty young boy. The boy turns out to be a girl. Gen is relieved.
* Bel Canto even as it is made clear that it will inevitably end in the deaths of most to all of the highly sympathetic hostage takers and perhaps some of the hostages as well.
* Belching Girls: Multi-media (Vore & WG) is an interactive story on

Writing.com about females from different media somehow burping frequently through various means.
* Belch that the user has to eat a held berry before use. The Pokémon that learn this move via level are Pokémon like Garbodor, a walking trash heap, Swalot, basically a living stomach, and Weezing, a balloon of poisonous gases.
* Bel Dame Apocrypha trilogy the planet it takes place on uses mostly this for everything. A lot of it centers around mutated insects controlled by "magicians" who have a psychic link with them.
* Bel Dame Apocrypha trilogy, though much more brutal than the modern form, and almost exclusively praticed by women. There seem to be no weight classes. There are no set number of rounds, meaning fights continue round by round until one fighter is knocked out or submits, which can potentially take hours. Gloves are far less padded than our own. In any given match, both boxers can expect to leave the ring with their faces completely bashed up, and even more severe injures like torn ears and ripped-out eyes are not uncommon sights.
* Beldam treats her younger sister, Vivian, like complete shit for all her time on screen. However, because of this, Vivian later joins up with Mario. Later in the game, you have another fight with Beldam. Many players let Vivian get her revenge on her sister and it is beyond satisfying.
* Beldin is quite happy alone. Belgarath also spend lots of time wandering the earth or doing research in his tower with little to no interaction with the outside world and liked it this way. But they are happier when Destiny-shipped.
* Beldrobbaen: Guerrilla, with a small force of infantry and sorcerers that is

* Beleaguered Assistant: One who'd rather not be there, but has to help out anyway.
* Beleaguered Assistant. Tommy really wanted Greg to play Mark despite the latter's refusal and the fact they already casted an actor named "Dan" to play the role. Ultimatley, Greg was persuaded to take on the role and Dan was let go.
* Beleaguered BenefactorWhen being the person who pays for everything backfires terribly.
* Beleaguered Bureaucrat: Bureaucracy isn't actively corrupt or malicious, simply overworked.
* Beleaguered Bureaucrats who are forced to spend a lot of time cleaning up the messes their coworkers make would be just as happy to see the incompetents shown the door, rather than have to keep putting up with them.
* Beleaguered Childhood Friend: A character's childhood friend is accused of a crime, and the character has to find a way to prove their innocence.
* Belegarth — A very closely-related group which spun off from Dagorhir, focusing mainly on the boffer combat aspect but still maintaining subtle RP element.
* "Belfast" was initially written for Marcia Barrett in the early 1970s, then Gilla recorded a German cover. Nowadays only a version by Boney M. (with vocals by the same Marcia Barrett who had become a member of the band) is known, released a few months after Gilla's.
* Belgarath also has a vast hoard of gold, which he mined himself, and which he almost never needs. Although he could create all the gold he wants, he doesn't do so, partly perhaps because it's less fun, but probably because doing so would gradually devalue the metal.
* Belgarath and Polgara, millennia-old sorcerers) that makes no sense to either him or the first-time reader, but makes perfect sense to Wolf, Pol and the repeat reader.
* Belgarath is so emotionally charged that neither side can summon up the focus to wield any magic, so their epic confrontation, millenia in the making, degenerates into a combination shouting match and fistfight.
* Belgarath the Sorcerer be fulfilled. For example, Belgarath and Polgara practically dictated a major treaty to a sovereign power at swordpoint to make sure that, 500 years later, Ce'Nedra would be sent to Riva.
* Belgarath the Sorcerer, Belgarath finally bites the bullet and tries to give the Talk to his daughter Polgara, something he was extremely reluctant to do, and he

proceeds awkwardly...until halfway through, when he finally figures out that she already knew. She just wanted to watch him stew over it.
* Belgarath the Sorcerer have him running around brokering arranged marriages in accordance with divine plan. But things generally work out for the couples because Destiny grants happiness to people who accept their fate.
* Belgarath The Sorcerer large even by Alorn standards. According to Belgarath, horses at this time (post-cracking of the world, but still very early in the planet's history) were also much smaller than "modern" horses. (Within 16 years, Algar's people have managed to breed horses large enough for Algar to ride. There's no word on whether Belar cheated or David Eddings flunked biology.)
* Belgarath the Sorcerer. Poledra essentially told Polgara, "They're going to get married, and they're going to like it. Get started on that."
* Belgarath the Sorcerer) seems to have stepped in and stopped him by making him physically ill to the point where he couldn't touch the stuff. (Belgarath then spent some years with the ladies of Maragor; when Beldin finally retrieved him, he said that Belgarath's drunkenness was still legendary in Camaar.)
* Belgarath the Sorcerer... while he was drinking, leading to an extended coughing fit.
* Belgarath the Sorceror, Riva orders the ships that carried the settlers to the Isle of the Winds burned. He knows it will take a lot of hard work to build the fortress-city, and he doesn't want anyone deciding it's too much work and leaving.
* Belgariad, and that the same might happen to Garion should he use it to solve all his problems.
* Belgariad, argued that an aspiring quest author needed to draw a map or they'd get lost.
* Belgariad, being a deliberate hotbed of fantasy tropes, has this more than once:
* Belgariad big board, actually an acre of real estate, which is covered in lead figurines of soldiers, representing his daughter's military campaign as she marched her army through Algaria to attack Mishrak ak Thull. The more elderly members of the general staff really hated climbing up the ladder to the platform which allowed them an overhead view of the enormous scale map.
* Belgariad books is written by Torak, who plays up his role in creating the world, and tries to paint Aldur and the Orb as evil and his theft of the Orb as a noble sacrifice to try to save his brother.
* Belgariad. But as one of the prequel novels shows, there's at least one worse; Algar, founder of Hettar's homeland, who could let days go by without talking. When asked by Polgara, "Don't you ever talk about the weather?", he just points to a window and responds, "What for? It's right out there. Go look for yourself."
* Belgariad, but it doesn't take his aunt and grandfather long to realize that Garion's uncanny eavesdropping skills mean he usually has something worth saying.
* Belgariad Ce'Nedra is also forced to grow up, maturing from spoiled princess to responsible queen.
* Belgariad... granted, for those who love happy-ever-after cliches, Eddings is made to order.
* Belgariad has no real bearing on the plot; only the two guys who "rise from the situation" do.
* Belgariad. He shanghais the heroes to escape from some rivals' plots (Of course, his part in the prophecies didn't help matters either), manages to trick the leader of the Dagashi (ninja-like assassins) to the point that even said leader is impressed with his cleverness, and then near the end, represents his government (despite at that time having no legal standing whatsoever) in a set of very lucrative accords, and uses his standing in the accords to buy himself back into his queen's good graces.
* Belgariad. It's implied they do almost nothing else until they are finally married, after which they presumably get over it eventually as they have a child at some point. Polgara notes that she's seen this numerous times and it's usually a sign that their marriage was arranged by Fate.
* Belgariad, it's possible for sorcerers to strain their powers to the point where they can suffer permanent damage, or even die from depleting their bodies' will to

stay alive. This comes very close to happening to both Belgarath and Polgara at different points.
* Belgariad love him, but he couldn't recognize it because he was so essentially narcissistic and self-centered that to him love meant obedience and abasement.
* Belgariad mentions to Garion, while describing his (Lelldorin's) flight from Vo Mimbrae, that he punched out a friend of his "because I didn't want to hurt him". (If the friend had had the chance, honor would have demanded he fight Lelldorin to the death.)
* Belgariad Murgos have access to a virtually bottomless gold-mine, which has iron contamination in it, giving the gold a red tinge. And they are quite free with it... as such, anyone caught with red gold in their pockets has probably been bribed by the Murgos.
* Belgariad openly admits at one point that he makes jokes because the alternative is to break down crying.
* Belgariad series, Polgara casts a spell to let the Emporer's bird speak, in order to convince him exactly who she is. The animals in general have their own languages that sorcerers can learn. Wolves in particular, seem to have human level intelligence, and one of them can understand human speech, and implies that she could speak it if she wanted to, but is worried about biting her tongue.
* Belgariad series there is mentioned (very briefly) to be a member of the good guy army who is a young, brain-damaged lad with a transcendent musical talent, playing songs of exquisite beauty. He sits and plays one of the most lovely songs the world had ever heard during a battle and is killed by an enemy ignoring it. This is presented as an indication of how cruel war is.
* Belgariad's first act as a god will be turning the Grolims towards a less vicious path.
* Belgariad. She's a wolf, who takes the form of a human because she loves Belgarath, a human who can take the form of a wolf. We get very little explanation for why she is the only wolf known able to do this and live for thousands of years. Her expressions on the subject, irritating as they are ("what is time to a wolf?") are less than informative.
* Belgariad, sorcerers and others with similar magical abilities or heritage can live hundreds or even thousands of years. This is obviously an issue when they fall in love with normal humans. It’s lamp-shaded in the prequels that sorcerers either have to avoid becoming closely involved with normal humans or deliberately distance themselves when the normal humans become old in order to keep their sanity as even their minds are not capable of dealing with repeated bouts of grief as friends, lovers and loved ones pass away.
* Belgariad the boulder. Newtonian physics still worked, apparently, and Garion found himself in a rather deep hole.
* Belgariad. There isn't a chapter he's in where he doesn't make some witty comment, scam the crap out of someone, pull off some incredible stunt, or show a depth of character, knowledge, or experience that's downright amazing.
* Belgariad. To emphasise, Belgarath once placed a diamond under a step of his tower to find out how long it would take to grind it down to a powder. Then he forgot about it. He had been stepping over the step for so long all the others were worn out in the middle, except that slab. It is made of stone. He also keeps misplacing things. When he got around to cleaning an area around his fireplace, just enough to allow him and Eriond to start a fire, they found a couple of couches, several chairs, and a table. Not to mention the green something he left in the pot which was ready to come alive. And it was not pea soup. He loses track of centuries at a time. Just to name a few. That is how engrossed he gets in his studies.
* Belgariad, to the point where several characters make cracks about the Murgo lack of originality.
* Belgariad without any success, eventually giving up to move on to Arendia, where it was destroyed at Vo Mimbre. The main reason why this happened was because the Stronghold wasn't so much a city as it was a man-made rock in the middle of nowhere that the Algarians built so that invading armies would have something to try to

besiege instead of wandering aimlessly around the plains.
* Belgariad, Zandramas, show a fondness for cutting out people's hearts and bathing in their blood.
* Belgian comic, the eponymous angel is seen bringing a recently-departed soul to Purgatorium, where he has to take a number. He gets 800,144, while 309 is called. As Arkel points out, that's only 799,835 numbers to wait, it shouldn't take long.
* Belgian comic, who has since become quite the sex symbol, thanks to the cartoonist Dany not being shy about drawing her rather au natural.
* Belgian houses. To the point that they are the first thing that come up if you type in the word "ugly" in a search engine.
* Belgian indie rock band Creature With The Atom Brain has quite some fans, most of them unaware that the band was named after a song by Roky Erickson who, in his turn, was inspired by a 1955 B-movie called
* Belgian King Leopold III tries to avoid giving Germany a reason to invade by refusing to allow British and French forces to take positions inside neutral Belgium during the "Phoney War".
* Belgian paedophile Marc Doutroux had a hidden cellar room where he imprisoned a succession of pre-teen girls for sexual abuse. This was completely missed several times by police searching the house. Girls died there not so much of active torture - rape and psychological abuse excepted - but of neglect and malnutrition.
* Belgian television is notorious for being very low-budget, which is why

* belief is hugely important to the setting. Youkai (most of the cast) are created from humans ascribing the mysterious to unknown forces, and will fade away if people stop believing in them. Since this has mostly happened, the setting is behind a barrier that causes it to be sort of the opposite of the rest of the world, pulling in things that people don't believe in.
* "Belief" is stated as a very powerful force on the Discworld — if enough people believe something to be true, it will become true, however there are limits. The rules have never been fully stated, but it appears there needs to be a "space" that makes it somewhat reasonable such a thing could be true (hence the non-existence of the Give-The-Dean-A-Big-Bag-Of-Money goblin). In
* , belief is what makes vampires weak against holy objects rather than any innate power, making more popular religions such as Christianity, Islam, and Hinduism more effective. Furthermore, during the holiday season, a wreath on a door will prevent vampires from entering even public buildings or buildings they've been invited into because of the belief in Santa Claus by children all over the world.
* Belief Makes You Stupid: A story portrays people with religious beliefs as being dumb and gullible.
* Belief Makes You Stupid: Believing in something that cannot be proven can make us

* Believe it or not, there is a way to do this in chess. When in a losing position, some unscrupulous players have been known to silently offer their opponent a handshake, a universally recognized symbol of resignation. The problem is that a handshake offer can also mean an offer of a draw. After the opponent accepts, the losing player would then claim they were not resigning, but offering a draw, and by shaking their hand their opponent had accepted. This trick is considered to be very poor sportsmanship, but it's not technically against the rules. Of course, an astute way to avoid it is to ask your opponent "are you resigning?" if they offer a handshake, before taking their hand.

infringing upon the parents' religious beliefs, followed by the parents petitioning the other alien ambassadors to intervene, highlighting the cultural differences among the various races—the Minbari overspiritualize the issue and never give a firm answer; the Narns hide behind bureaucracy; the Centauri are willing to intervene (but at a steep up-front price); and the Vorlons refuse to get involved for reasons known (at the time) only to them. These themes are revisited repeatedly in the series.

While this happened, Dewey defaulted to a "run out the clock" strategy, avoiding controversial issues and speaking vaguely of his plans for his presidency, including the now infamous quote "You know that your future is still ahead of you." The major polls were so sure of Dewey's victory they stopped polling voters weeks before the election, missing the Hail Mary surge of Truman's support from his aggressive campaigning in the final days.

Thus, Western Union ended up being the one to fizzle out (save for use as a money-wiring system) and Bell's telephone company is still around to this day. You might have heard of them: a little company named AT&T.
* Belinda Carlisle had a youthful-sounding voice and used it to make references about being a "kid" in "school" finding love for the first time with her band The Go-Gos. In the late 1980s, she became a solo artist at the (relatively) mature age of 29, replete with air-brushed album covers to make her look like someone born after 1958.

* Belisarius doesn't particularly like being a soldier, but he's the best that the Romans have got, and he knows that the empire needs him as a general. Even if some days, he'd really rather have been a blacksmith...
* Belisarius, how it is the most famous battle in all of Indian history and how no one remembers even one of the names of the mere mortals who did all the dying.
* Belisarius in that his learning is being assisted by an AI from the future.
* Belisarius Series — the problem is that Malwa’s rulers don’t trust them, and so keep them at the fringes and/or assigned to the worst missions.
* Belisarius Series, Anastasius once tells Valentinian that their real problem is not the possibility of being captured and tortured to death by the enemy, for that will sort itself out. The real problem is what to do when the war is over.
* Belisarius Series. And of course because she is a princess and he is a minor noble.
* Belisarius Series, and some of the hardest battles in the war between India and Rome occur against each other.
* Belisarius Series; Antonina customarily spends the morning after Belisarius leaves for a campaign without her in their estate's stables, staring at a horse

(but not actually getting on it to ride out after her husband... at least not after the first time).
* Belisarius Series: Aristocrats are neither worse nor better than others. There is criticism of it as a system however and the main bad guy, the Malwa is devoted to an ideology of inherited power and usually has not the balancing virtues of aristocrats from other empires.
* Belisarius Series: As dawazz to Prince Eon, it was part of Ousanas' job to deliver one of these whenever Eon needed correcting in his behavior.
* Belisarius Series. As does his wife, Antonina and Rao but the Four-Star Badass amongst 6 novels worth of Four-Star Badasses is Rana Sanga: a general so good he worries Belisarius on the battlefield (and comes the closest to killing him, even with Aide boosting Belisarius's reflexes and senses to superhuman levels), a swordsman so good that Valentinian swears he'll surrender immediately before ever facing him again in sword fight following a three hour battle, and the man that went a full day in a fight with Rao (regarded as the greatest assassin in India), ending only when the two men were too exhausted to move. And then continued by debating philosophy until everyone else declared a draw.
* Belisarius Series: Belisarius' popularity made Justinian so nervous that Irene hinted that Belisarius would actually be safer on a long and dangerous fact-finding trip to India. He didn't notice the Malwa conspiracy.
* Belisarius Series, both the Romans and the Malwa have advisers from the future, but while the Malwa adviser Link tends to think in terms of flashy, futuristic weaponry, the Roman adviser Aide tends towards this trope. While Aide does help the Romans make gunpowder weapons, he also gives them boring but practical advances with things like stirrups: easy to make, simple to use, and instantly makes your cavalry far more effective.
* Belisarius Series but as he can't do that, makes war in as practical a way as possible.
* Belisarius Series, but her achievements are only possible because she has "respectableized" herself by marrying a great general who is willing to treat her as an equal partner.
* Belisarius Series can be like this. Just the sheer effort of cramming so much evil and vice into the same character is amazing.
* Belisarius Series can possess the body of specific (from the same family, autistic) and specially trained woman, wiping out her personality in process. Creepy part starts when it starts speaking in A.I. voice...
* Belisarius Series evil Malwa empire and the "that's just how humans arrange their affairs" empires spearheaded by the meritocratic, egalitarian Romans.
* Belisarius Series for failures is purely a pragmatic thing to do. Later, after having been in command of the highly honourable Rajput army, even he has trouble convincing himself that his actions are those of a purely pragmatic nature.
* Belisarius Series, getting your first battle scar is an initiation rite for Axumite warriors.
* Belisarius Series had tons of these. There's Rana Sanga, Eon, Rao and Shakuntula, several of the Persians, and so on.
* Belisarius Series has Rana Sanga and his wife. Rana Sanga is tall, handsome, broad-shouldered, widely considered the epitome of Rajput manhood, and one of the half dozen best generals and personal combatants in the world. Lady Sanga is a short, pudgy, plain-looking woman whose hair was completely grey before her thirtieth birthday. Needless to say, Rana Sanga loves his wife more than anything in the world and turns into a tongue-tied teenager in her presence.
* Belisarius Series has so many badass and so much badassery that one can feel the heat from all the manliness warming the covers of the books.
* Belisarius Series has sword-bearing warriors, robots, scizo-tech, time-travel, visions of the future, and all, all mixed up.
* Belisarius Series: Has the grand scale, larger than life characters, and numerous moments of an epic. Often interestingly enough has deconstructions, including the Lampshading of many familiar elements of epics.
* Belisarius Series, however, they start moving up the tech tree very rapidly. It

starts with primitive gunpowder weapons such as handheld rockets and siege cannons. By the end of the series, they're using breech-loaded rifles, ironclads, and radio.
* Belisarius Series husband is one of the two greatest warriors in India. And on and on.
* Belisarius Series, including the suppression of the revolts in Constantinople and Alexandria, Belisarius' stand in Charax, and Damadora's final conquest of Kausumbi. In the last case there was little resistance, though the stand of Damadora's and Rana Sanga's families against the Malwa is a miniature version.
* Belisarius Series: In order to capture a major enemy stronghold, Belisarius and most of his army are "taken prisoner" after being "defeated in a battle". They are escorted into the stronghold by a group of a couple thousand soldiers who used to be on the enemy's side, before defecting en masse in a prior novel.
* Belisarius Series. In several instances the enemy cannot keep a formation(because they are ill-trained, and in both Constantinople and Alexandria they are rioting thugs under enemy pay). However the Romans, being Romans definitely keep formation.
* Belisarius Series in the original timeline that destroyed half of the Constantinople and just barely avoided leading to the destruction of Byzantine government at the time, were treated much like modern football hooligans or the rival firms.
* Belisarius Series is composed of enslaved peasants herded around by steppe savages. But the Malwa vassels, the Kushans and Rajputs are honorable as well as effective warriors.
* Belisarius Series is given a number of visions of what will happen if he fails to defeat the Malwa. They range from the horrific to the apocalyptic.
* Belisarius Series is this and often has to be urged by his subordinates to risk himself less often. The Persian emperor even makes his bodyguards at promise to arrest him if he risks himself because the Persians need a Roman general they can trust to carry out a politically delicate strategy that might threaten the alliance between the two empires, who had only recently put to rest centuries of intermittent warfare between them.
* Belisarius Series: It's something of a tradition of Antonina's, when Belisarius goes away on a potentially hopeless mission against the Malwa, to get thoroughly trashed, accompanied by Irene.
* Belisarius Series. Khusrau the Persian Emperor organizes a Pan-Persian crusade to conquer the Malwa Empire and retake the lands of Persian epics. As they were already at war with Malwa anyway, it wasn't hard to do. Khusrau admits that if he had to, he would attack Rome (his ally at the time) rather than allow a civil war. But this was more convenient.
* Belisarius Series, lord Venandakatra presents the Axumites with his largest, unruliest war elephants. The Axumites, being used to African elephants, soundly dissect the allegation that these runts are real elephants.
* Belisarius Series; many camp followers in history were simply seeking protection from the other army or from the opportunistic banditry that always comes when war breaks down law and order.
* Belisarius Series of them all. Downplayed with Theodora and Justinian, whose ambition does not make them evil but does make them proud, curmudgeonly, and sometimes paranoid.
* Belisarius Series on guards he runs into to get them to search someplace else. Eventually he finds the uniform, and makes it out of the city.
* Belisarius Series on massively altering the cultural and technological evolution of the world; they just each want history to evolve in a different direction. This is because, after the changes already made by the "bad" AI, the timeline has already been irrevocably changed, so the "good" AI needs to insure that the right culture comes out on top.
* Belisarius Series Rana Sanga and Belisarius too. Valentinian and Anasstasius also.
* Belisarius Series: Range from thugs-for-hire to martial arts experts comparable to Ninja.
* Belisarius Series: Rao was private tutor to Shakuntala: there is something

awesome about having one of the greatest warriors in India as your Battle Butler.
* Belisarius Series reason for their success prior to running into the Roman Empire.
* Belisarius Series: Standard procedure by the Malwa not only doing this but selling whatever is left of the captured girls to pimps. Which makes it rather poetic justice that they were destroyed by the husband of a former prostitute.
* Belisarius Series still exists to this day, listing all manner of alleged scandals in the empire of the time.)
* Belisarius Series tend to suffer this fate. As do Malwa ritual torturers.
* Belisarius Series that she was a much more honorable not to mention much prettier employer. It was assumed that anyone who was badass enough to keep Shakuntala captive should also be able to keep her alive.
* Belisarius Series, the Axumites do this to mock Venandakatra during the celebration of Shakuntala's wedding. They rotate through the platform facing Venandakatra three times, because the crowd loves the sight of four hundred bare black asses hanging over the battlements to taunt Malwa.
* Belisarius Series, their friends eventually start pushing them together.
* Belisarius Series the ones most likely to lead a coup against him, lead the charge into battle even though their method of warfare is now obsolete. As he openly gloats, if they win, his own reputation as the leader of a victorious army gets enhanced while they will no doubt suffer many casualties. If they lose, a whole bunch of potential problems have just eliminated themselves in something that won't really affect the larger war.
* Belisarius Series, the Roman officer Maurice commits that it is the craziest thing he had seen in his life.
* Belisarius Series, the title character is rebuked for putting tactics before strategy in fighting a successful but seemingly needless battle with the Persians. In reality the reason was that he needed to gain an armistice as quickly as possible because a new enemy was looming on the horizon.
* Belisarius Series to be a courtesan before marrying him. Coincidentally, they also serve below Justinian and Theodora (see real-life version below).
* Belisarius Series trope, even the debating was admitted to be quite impressive as well.
* Belisarius Series: Used first seriously and then humorously. Belisarius starts a rumor about sexual prowess and general horniness of the Kushans in order to get Kungas and his men pulled away from their guard duty of a captured princess. Their incompetent replacements are easily dispatched and allow her to be rescued. Later, once the confused Kushans find out about the origin of the rumor, they then take delight in spreading it themselves.
* Belisarius Series; when they need actual military prowess it is usually the Rajputs and the Kushans that provide it.
* Belisarius Series where the Malwa attack Constantinople using the bodies of Belisarius's wife Antonina, his stepson Photius, and his best friend Sittas as their banners. Belisarius isn't really disturbed by this: he believes that Sittas, Photius, and Antonina are in Heaven and doesn't care all that much what happens to their bodies — except that he does note that in this world, Antonina died of the plague, and the Malwa priests who dug up her body and are carrying it around probably aren't doing themselves any favors...
* Belisarius Series, with the two hyper-evolved offshoots of humanity at war with each other. One has become artificial and inorganic, the other claims to be "pure humans" but aren't. Rare case of the inorganics being the good guys.
* Belisarius' strategy was was a complex one of encouraging insurgency in his enemies' home empire and using the navy of his Axumite allies to strike on his enemies' flanks. His favorite tactics were to get to a key position before his enemy and bait him into attacking while he had a counterattack waiting on the flank. This worked many times either because the enemy commander absolutely had to attack, or because the enemy commander was

* Belkar and Miko too. Given that they're already bloodied from their fight, it's impossible to tell whether any of the wounds are from the broken glass. And of course, being moderately-high level D&D-based characters, they're explicitly far more durable than real-life humans.
* Belkar Bitterleaf also has a couple of barbarian levels, but it's not always obvious when he goes into a rage because he's commonly in some kind of foul temper.
* Belkar Bitterleaf of the titular D&D adventuring party, is in this almost all the time. Party leader Roy notes that he uses Belkar in this fashion because a) Belkar has proven able to escape from jail before and b) without a minder he would probably be inflicting his skill at murder on innocents and Good-aligned people; at least while he's in a benign adventuring party, he'll be pitted against people who actually need to/deserve to get killed.

* Belkar has a bad habit (one among many) of using the heads of slain kobolds as hats, salsa bowls, or litter boxes for Mr. Scruffy. He later lists the uses of a still conscious head of an Eye of Fear and Flame: portable
* Belkar has a tendency to comment on this trope; in one strip he says "Run like hell" has always struck him as plan A, and later he spends a series of strips announcing the letter of every new plan his teammates come up with.
* Belkar hears someone in robes and assumes it's V. He predicts the order's reaction, and Roy's having to admit that he's a valuable team member — while the audience sees one of their foes coming down the way. And this is hardly even the first, last, or best example. Much of the suspense Rich Burlew generates comes from the audience being shown something important that the characters would want to know, but which they nonetheless remain blithely ignorant of up until the moment where their lack of awareness costs them dearly.
* Belkar, he volunteers to investigate brothels for information on an elusive character, and isn't at all put out when Roy reminds him to check with prostitutes of both genders.

You got me, fair enough, now bring the ship back. (...) No, seriously, wherever you're hiding: You really had me thinking for a moment that we got left behind. Great illusion. Now, can we just get out of this stupid city already? (...)
* Belkar, who Vaarsuvius uses Owl's Wisdom on to grant him the ability to use healing scrolls. That wisdom gives Belkar the chance to reflect upon the good he could do by devoting his life to healing instead of killing, then Vaarsuvius dismisses the spell, with Belkar reverting to his old self.

* Bella arguably does the same thing with Jacob in their first encounter. Her attempts at flirting to find out more about the Cullens are a little too effective.
* Bella can be pretty emotionally manipulative to Edward too, though not anywhere near as bad as he is to her. * Bella finds no qualms at all to be spending all eternity with her teenage husband, super-quick aging daughter, and her beautiful and wealthy extended family.
* Bella hates being a plain human among vampires, crossing over with
* Bella is in a steady relationship with Edward. His adopted sister, Alice, is her best friend. Many of Bella and Alice's interactions mirror her interactions with

Edward, particularly when Bella gets very huggy and clingy towards Alice. This includes a scene in
* Bella is very conscious of this trope and has spent most of the first three books trying to convince her immortal vampire boyfriend, Edward (who is more than a century old stuck in the body of a teenager), to bite her to avoid this.
* Bella, it doesn't change that she wrote their relationship as creepy and obsessive.
* Bellamy constantly thinks he's more powerful than Luffy due to the belief that Luffy is weak because he still believes in his dreams and had let Bellamy beat him up as he found fighting him pointless. Plus he regarded bounties as power levels and that his 55,000,000 Beri trumped Luffy's (at the time) 30,000,000 Beri. However, Bellamy made the mistake of beating up his friends and disregarding the new 100,000,000 Beri bounty as an attempt to scare him. So when the two confronted each other again, it was virtually a no contest;
* Bellamy from the start of the Skypiea saga, seemingly a throwaway villain with too much pride and not enough power. He gets on Luffy's bad side and gets taken out with one punch. At the end of that saga, we see him getting a
* Bellamy's crew get this when Luffy, whom they thought was a weak nobody because he didn't fight back the first time, takes out their captain in one strike (
* Bella of "Beauty and the Werewolf" has the stepmother and two stepsisters, but they have a decent relationship. Bella's stubborn, control-freak nature keeps the house running like clockwork, and she's firmly set herself up as
* Bella's daughter, not theirs. Nessie also can't bring back Alice's human memories, she has almost no relationship with any of the other male Cullens, etc. Meyer seems to think that Nessie fixes everything just by existing, but realistically she creates many, many more problems than she fixes for them.
* Bella's father Charlie seems pretty nonchalant for a guy whose daughter changed overnight from a clumsy, fairly pretty everygirl to a ravishing, completely-in-control model.
* Bella, she just hands it to her. And then she keeps hounding Buffy with more jars until the vampire slayer shows Bella how to use a jar opener.
* Bella's physical stats are awful and she is much better suited to casting spells. Too bad you can't control her.
* Bella Swan has virtually no identity beyond Edward Cullen. The few details we are given about her are there to emphasize her relationship with him (they both like
* Bella Swan. She just spoonerized the name. Stephenie stated that Melanie was named after her cousin and a high school classmate named Stryder.
* Bella Swan's (when Bella strongarms him into accepting her getting married at 18 and squashes his argument that maybe she and Edward are a little too young to be raising a child).
* Bella Thorne and later confessed that Disney had told her to speak in a higher pitched falsetto voice - to better sound like a good girl instead of her natural huskier tones. After leaving Disney, she became infamous for her sexual posts on social media - and in 2019 she even directed an X-rated erotic film!
* Bellatrix does it to Barty when he gets bored of looking for Voldemort's spirit and starts narrating what the search party is doing.
* Bellatrix is a more mundane example. She was once beautiful, but her years of incarceration in Azkaban, which were punishment for her evil deeds, left her a withered twisted shell of her former self. This is made even more apparent when Harry meets her sister Andromeda, the
* Bellatrix Lestrange also makes things personal for Harry as well when she murders his godfather, Sirius Black. She also makes things personal with Neville due to the fact that she tortured his parents into permanent insanity. However, neither of them are the ones that kill her in the end — what ultimately does her in is that she
* Bellatrix Lestrange, and a couple other Death Eaters, as well as young Lord Voldemort are villainous examples.
* Bellatrix Lestrange is motivated primarily by her desire to inflict as much pain

on as many people as possible in the name of Voldemort's cause, and has an aptitude for
* Bellatrix Lestrange later became a Dragon form of this with several significant deaths (
* Bellatrix Lestrange sings a rather disturbing little ditty while in Azkaban.
* Bellatrix may be a better example because she actually has enjoyable qualities as a character - she's badass, sexy, hopelessly insane, and
* Bellatrix uses a cutting curse on the skirt of her wedding dress when Death Eaters crash her and Harry's marriage ceremony.
* Bella Twins: After taking a one-year hiatus in 2012, both twins returned with a vengeance. Brie peaked in 2013 and Nikki peaked from 2014-2015.
* Bella Twins After their breakup "Boy Diva" Rick Cataldo and Eddy McQueen were quick to appropriate the gimmick in NWCY and WSU.
* Bella Twins And it was presented as completely okay and their opponents were supposed to have deserved it somehow. This was reversed with their heel turn in 2011 where they continued to use it but commentators and other wrestlers would outline it as wrong.
* Bella Twins, and Nikki as a passionate lover of high fashion and expensive gifts. Ring-wise, Nikki came to wrestle a more power-based offence and Brie opted for more aerial moves.
* Bella Twins (bonus points for "bella" meaning beautiful in both Spanish and Italian.)
* Bella Twins - Brie Bella (Brianna Garcia), Nikki Bella (Nicole Garcia)
* Bella Twins, but they broke things off about a month before they were to get married.
* Bella Twins. Debuted in 2008. Brie was the first to debut followed by Nikki several weeks later.
* Bella Twins, especially Nikki (mainly due to having John Cena as her partner rather than Daniel Bryan), have a very vocal internet Hatedom. However, critics began praising them for their improvement by the end of 2015 and they get decent reactions from most casual audiences. Their reality show helped.
* Bella Twins in Team PCB. Notably Sasha had no kayfabe connection to Naomi or Tamina, but she was black and so was Naomi (Tamina also being Samoan and related to Naomi by marriage), while PCB were all white.
* Bella Twins may be identical twins, but Nikki claims that she has a naturally more voluptuous body than her sister. So in order to match Brie's waifier frame, she had to do daily ab and cardio workouts. In 2013 this was abandoned as she got into bodybuilding and developed a more muscular physique.
* Bella Twins those thirty days, it seemed everyone forgot about it completely, and they were inexplicably friends again. (Even the twins themselves - as in the real ones, out of character - had no idea why the storyline was dropped, and the fans certainly didn't either.)
* Bella Twins went through a Heel Face Revolving Door after Brie inexplicably made up with Nikki in their ill-fated twin-vs-twin feud. But despite the Divas Revolution storyline going down poorly with fans, at least it has established the Bellas as heels after months where no one could figure out their exact alignment.
* Bella Twins were involved and were noticeably covered up a lot more than they would be in their usual ring gear.
* Bella Twins (which he would not have got a spot on if he hadn't been dating Brie). They also did talk up Natalya's help towards them when they were first training, but fans often ignore that in favour of mentioning the men (as that was when the twins went from novelty act to prominent players in the company).
* Bell Book And Candle, after Shep and Gillian have been close for two weeks, he asks her when they are going to get married, and she recoils at the suggestion. They point out that they're reversing the usual male and female roles in this kind of argument. Her problem is that she would have to give up being a witch, but that's a secret she doesn't want to divulge to him yet.
* Bell, Book and Candle establishes early on that a witch loses her powers if she falls in love. Guess what happens to witch Kim Novak at the end.

* Bell, Book and Candle, Gillian explains that the effects of spells have to look like coincidences: "I can't bring Niagara Falls down to Grand Central Station, or turn this house into the Taj Mahal. It doesn't work that way."
* Bell, Book and Candle, Gillian gets evasive when Shep asks her if she's in love with him: "I like you more than I can say" and "I'm more in love with you than I've ever been with anyone" are her answers to that question. The crucial point is that witches lose their powers if they fall in love.
* Bellboy Donald (1942), owing to one of Mickey's mischievous nephews snagging Donald's bellboy outfit in an elevator door.
* Bell Canada advertises their high-speed Internet as "perfect for laptops". Well, it really doesn't matter what form of computer you're using, but sometimes an included Wi-Fi router does come in handy.
* Belldandy is this way towards Keiichi Morisato. Numerous times things happen that make it seem as if he's losing interest in or cheating on her, and she more or less ends up asking if she's good enough. And every single time, he promises her that she is, considering the wish he made to her in the first episode/chapter ("for a girl like her to stay with him forever" after being rejected by another woman), he doesn't intend to betray her trust.
* Belldandy, Urd, Peorth, or any of the and a very, very, VERY bad idea.
* Belldandy, who initially seems to play this trope, flat out states that her wish to make Keiichi happy overrules her wish to make everyone in the world happy.
* Belle, a knife that forces to tell the truth. She uses the knife and under its power, Rumple reasserts his innocence and suggests the Witch managed to retain a bit of her magic and used it to destroy herself to activate a curse. His bluff? The knife was a fake Rumple planted so he could gain his wife's trust without having to change his nefarious ways.
* Belle. Although Beast chooses for Belle to be safe, she elbows Xaldin, saving herself and the rose.
* Belle and Sebastian know that they were named after Cécile Aubry's novel "Belle et Sébastien".
* Belle and Sebastian song "Piazza, New York Catcher", chronicling a couple who meet in hotel rooms and at baseball matches.
* Belle and Sebastian's "You Don't Send Me" is upbeat and peppy, but is all about how happy the singer is that his girlfriend broke up with him:
* Belle and Sebastian: the male narrator is bitter about being in a relationship with another boy who's either closeted or simply experimenting:
* Belle and Sebastian", with the dog called "Jolly". It retains the source's title and names in the Western world. Belle is a very friendly dog unless someone she cares about is threatened, but she was falsely accused of attacking people without reason, so they're fugitives from the law together.
* Belle and Shawn's daughter Claire was born onscreen in 2005 and left the show as a baby; she returned as a teenager in 2015, five or six extra years older.
* Belle and the Beast: Innamorati (main romantic leads of the movie, although much more fleshed out than the usual innamorati)
* Belle asks the Beast to take her as prisoner in Maurice's place, even when he specifies that she'll never see her home again.
* Belle-Belle", Belle-Belle disguises herself as a male knight since her father is too old to fight for the king. Belle-Belle is even wooed by the lady-in-waiting Florida, who does not know that she is a woman.
* Belle comments on the enchanted castle, and Cogsworth tries to deny it.
* Belled buzzards—more specifically, a vulture that inexplicably has a bell attached to it spells doom for those who see/hear it.
* Belle de Jour (1967): A film by Luis Buñuel, based on the erotic novel by Joseph Kessel.
* Belle de Jour eventually turn out to be the titular protagonist's masochist fantasies.
* Belle, Dido and Elizabeth are cousins adopted by their aunt and uncle, whom they call "Mama" and "Papa." Notably, while Dido is truly an orphan, Elizabeth's father and stepmother are still alive. She vastly prefers her adoptive family to her

father, who disinherits her to favor his child by her stepmother.
* Belle, Dido and Mr. Lavinier get very close to kissing in Vauxhall Gardens, but break away at the last second.
* Belle, fear of this trope is what leads Dido's adoptive parents to seek to dissuade her from marrying at all.
* Belle Gunness, a serial killer who started out by burning down houses and killing people with life insurance policies - such as her husband and children. She was not very subtle, for example killing her first husband on the one day his two life insurance policies overlapped, but escaped legal attention despite the accusations of the man's relatives. Later she simply attracted
* Belle, her. So the whole situation ends up being awful for both parties involved, even if they do love each other.
* "Belle" introduces Belle's enjoyment in reading and dreaming about exciting adventure, the other villagers' regarding these as strange interests for a young woman of their era, Gaston's desire to marry Belle, and the other villagers' admiration of his handsomeness and masculinity.
* Belle is lonely yet well-read, and wishes to break away from her life and live adventures. She gets to do so by entering in the enchanted castle, making friends with the magical furniture, and finding a connection with the person she least expected to.
* Belle is Rumplestiltskin's second love after his wife Milah leaves him.
* Belle, Mr. Davinier is pushed to confessing his love for Dido very embarrassingly and very loudly in front of her adoptive father.
* Belle of the Boulevard, implying that the heroine's beauty and seemingly perfect life is masking how unhappy she is, and that she is seen as "easy" by men.
* Belle pushing back that lock of hair that always falls out of place.
* Bellerophon, Earth's earliest starship, travelled half the speed of light across the galaxy for 3000 years, but far less passed on the ship.
* Bellerophon tamed the pathologically wild Pegasus by forcing a magic bridle on him. The bridle made Pegasus obedient, but Bellerophon felt guilty for stealing Pegasus's freedom and took it off.
* Bellerophon was staying with Proetus of Tiryns when Proetus's wife attempted to seduce him, and then
* Bellerophon, who after taming Pegasus, became so full of himself, tried to fly up to and enter Mount Olympus itself. Pegasus, however, threw him after Zeus sent a gadfly to sting him, and he plummeted into a thorn bush and lived the rest of his life as a cripple.
* Belle's brother Brady Black was born on the show in 1992 but was in high school by the end of the decade. He even became older than Shawn, who had been present as a toddler at his birth!
* Belle's cart horse Philippe and Aladdin's monkey friend Abu were left out of the Broadway adaptations of
* Belles on Their Toes and the salesman asks them what they "want in a shoe", one of the boys tells the others that they had better not say "a foot" to avoid bothering the salesman any more than they are.
* Belle Starr. He is sent to a small town where Belle Starr and her gang have complete control to replace the corrupt judge and bring order. He actually refers to himself as a Hanging Judge and proves he's right by sentencing multiple criminals to death at once near the end of the story. Unlike Roy Bean, he is on good terms with Lucky Luke.
* Bell Hoppy, Sylvester has to put a bell on Hippety Hopper, and after various failed attempts, he tricks Hopper into putting the bell on himself with a mirror routine.
* Belligerent Sexual Tension, as the trios on both are obviously extremely close, but there is still a distinct difference between the relationships of Harry/Hermione and Carly/Freddie, compared to Ron/Hermione and Sam/Freddie.
* Belligerent Sexual Tension before he and Inara ever met. By the time of the show, Inara is actually the most respectable member of the crew by their society’s standards.

* Belligerent Sexual Tension consummate their relationship in the Ebou Dar palace garden. In the morning, he's quite embarrassed to realize that a full squad of her guards were keeping watch from a discreet distance.
* Belligerent Sexual Tension finale, with the two explaining that they've discovered that they are actually very happy together when the competition for a million dollars isn't getting between them.
* Belligerent Sexual Tension get into an intimate position when the male shows the female how to catch a fish from a stream. And suddenly neither of them can carry on a conversation. In fact they seem to have entirely forgotten why they got in that position....
* Belligerent Sexual Tension in which the duo is more friendly with each other, with Ben even giving a speech telling Gwen how great he thinks she is in one episode, has no such excuse to fall back on.
* Belligerent Sexual Tension. It's also obvious the "secret" part is all from Lars fearing he could be seen as uncool for it, and Sadie makes it clear in "Joking Victim" and "The New Lars" that she hates Lars being such a fairweather friend/lover.
* Belligerent Sexual Tension, Jason and Gwen share one on the stage of the convention. One of the fans is so excited about it that she faints.
* Belligerent Sexual Tension. Justified in that both of them have boatloads of mental issues to work through.
* Belligerent Sexual Tension that couldn't be more different, they frequently get into arguments over the tiniest things and get on each others' nerves constantly, but in serious or intense situations they prove that they truly, deeply care for the other and can be amazingly supportive and caring when they put aside their differences, most directly shown in "On the Run".
* Belligerent Sexual Tension: The courtship of Ereshkigal, queen of the Mesopotamian underworld, and Nergal, god of plagues and fire.
* Belligerent Sexual Tension. This is especially noticeable in the 2007 film.
* Belligerent Sexual Tension to a lot of fans. When Miley first meets Mikayla she basically squees, and acts like a girl with her celebrity crush. Meanwhile despite not getting along with Hannah, Mikayla seems to adore Miley, and acts more affectionate towards her than towards her actual crush, Jake. Mikayla also hates Lilly and acts like a girl jealous of someone else being close to her crush.
* Belligerent Sexual Tension: Two characters hate each other despite secretly liking each other.
* Belligerent Sexual Tension: Two people are in love, but they mask their feelings behind arguments.
* Belligerent Sexual Tension: Two people who are secretly attracted to each other are constantly bickering and snarking.
* Belligerent Sexual Tension: Two people who are secretly attracted to each other constantly clash.
* Belligerent Sexual Tension: Two people who are secretly attracted to each other cover it up by bickering.
* Belligerent Sexual Tension with Milhouse, yet both of them have been through plenty of other relationships, one well-known one being Samantha Stanky in the episode "Bart's Friend Falls in Love."
* Belligerent Sexual Tension, yet refuses to admit this)... though, inevitably, they would pull together (if only after having been beaten once) and manage to pull off a victory, though their opponent would frequently come close to victory by taking advantage of their bickering.
* BellinghamTerror quickly shakes off her disbelief to become an occult detective.
* Bellingham Terror. Set in 1935 Bellingham, Washington and features many historical events and shout outs to the period.
* Bellingham Terror variety but without mentioning Voodoo and referring to them as "ghouls" rather than using the Z word.
* Bellisario's Maxim: "Don't examine this too closely." Paying too much attention to the inconsistencies can be to a work's detriment.
* Bellisario's Maxim: If a detail isn't important to the story, it doesn't matter

and therefore shouldn't be concerned about.
* Bellisario's Maxim: Not every detail is crucial to the story, so don't look too deep into it.
* Bellmaker of medals, though at least one of them (which he uses to assist in breaking out when the characters are thrown in prison by the villain) was given to him by someone else.
* Bellman & True) has a two-key lock to enable or disable the elevator. During a five minute phase for the bank break in, they spend most of the time trying to figure out which of the keys open the elevator, in addition to discovering the order in which the keys are turned.
* Bell Nuntita, an actress who's a kathoey (the third gender in Thai).
* Bellosto really fast, giving the implication that she's speeding through it to avoid getting hit.
* Bell P-39 Airacobra, whose prototype had powerful armament and turbosupercharger. USAAF wanted the production aircraft without the turbo and heavily armoured, reducing the performance dramatically.
* Bells are featured in the fifth movement of Mahler's Symphony no. 3. A boys' choir imitates the sound of bells, and tubular bells are also used. As an inversion of this trope, this is the most cheerful movement of the symphony.
* Bells Are Ringing, Ella adopts a "dumb chorus girl" voice during "Just In Time" when an audience gathers to watches her dance with Jeff, but goes back to singing in a normal voice before the song ends. (This was another role originated by Judy Holliday.)
* Bells Are Ringing, Ella, as Jeff's telephone answering service girl, falls in love with his voice before meeting him in person.
* Bells Are Ringing, Ella, being menaced by two Corvello henchmen after she accidentally ruined their "Titanic Records" bookie operation by knowing more about classical music than their code books, desperately makes up that the police were recording their conversations all along and that Inspector Barnes should appear any moment now. He does so immediately. Ella is overjoyed, and the henchmen are arrested.
* Bells Are Ringing, Inspector Barnes enters the Susanswerphone offices confident that he can close it down for being a prostitution front. Ella unwisely starts telling him about the personal degree of service she provides her customers with, and how Sue chides her for spending too much time on each one. Ella then picks up a call on the switchboard, but hasn't finished answering her caller before being interrupted by Barnes, who apparently has been listening only to her side of the conversation (the audience gets to hear both sides). He triumphantly declares Susanswerphone busted, and produces the taped evidence he thinks incriminating enough to send all the answering girls to the Women's Detention Home:
* Bells Are Ringing" is about how a telephone operator has a crush on one of her clients. They can only hear each other's voices, too bad she put on an old woman voice to talk to him at first and is now stuck.
* Bells Are Ringing musicals, had a few lines revised during the original Broadway run).
* Bells Are Ringing. Only a few lines and steps of "Mu-Cha-Cha" were featured in the film.
* Bells Are Ringing, Santa Claus is one of the voices that Ella does over the phone. She uses it to tell a little boy named Jimmy Mallett to eat his spinach.
* Bells Are Ringing to the Susanswerphone offices, which are considerably less glamorous than the ad.
* Bells Are Ringing, when Jeff realizes that "Melisande Scott" is the same person who answers his calls at Susanswerphone, he shouts the only other name he knows her by: "MOOOOOOOOOM!!!"
* Bellson and Doyle, the two police detectives who were following after Nikki Finn in

* Bellwether be one, but is only confirmed in game as an advanced information managing program.
* Bellwether tells Nick and Judie that she feels well-appreciated by her boss Mayor Lionheart. Then the intercom beeps and we hear Lionheart shouting "Smell-wether!" in a commanding voice. Bellwether plays it down by saying it was a "
* Belly Dancer: A glitzed-up dancer who shakes her, or less often his, belly.
* Belly Dancer: A usually female dancer who wears a midriff-revealing outfit and a lot of jewelry.
* Belly Dancer; she has no dialogue of any sort, and her sole function in the plot aside from titillating the audience for four minutes is that her performance, entirely by coincidence, provides distraction for the Russian agents sneaking up on the Romani camp.
* Belly Dancer: Someone dances in a flashy, revealing outfit. If it's a woman, it's played for titillation, and if it's a man, it's played for comedy.
* Belly Drum costs half of your HP to maximize attack. It can be Baton Passed, thus making it a deadly strategy, especially if a Pokémon like Smeargle uses it.
* Belly Flop Crushing: A large character flattens a smaller character with their stomach.
* Belly has song "Suffer the Fools", in which Tanya Donelly sings about dividing property with a partner ("You keep my key and my lazy letters/I'll keep the angel that you bought to watch over me") and moving apart, but still hanging out together ("I'll bring that terrible wine you love").
* Belly lining seem to be associated with all whales in cartoons, but in reality it's restricted to baleen whales.
* Belly meaning The Breeders were both the result and the start of this trope.
* "Belly of the Beast" and "Power Animal" each briefly used Flash for one scene.
* Belly song "Feed the Tree" is about, namely, paying respects to a grave where a tree is growing.
* Belly: "Super-Connected" has lyrics like "On your third broken window/With your hair full of glass", and "Better climb in the window/'Cause I'm closin' the door".
* Bellywashers, juice bottles with figurine toppers of popular cartoon, movie and video game characters, were not all that popular in their initial run. When the two brands were combined into Good2Grow, their popularity soared among children, likely due to retailer Target gaining distribution rights at the time.
* Belmont family has produced powerful monster hunters for almost a millennia.
* Belomancy, also known as Bolomancy: is an ancient form of divination using arrows. For example, three arrows would be marked with the phrases, God orders it me, God forbids it me, and the third would be blank. Choosing an advantageous direction was gleaned by tossing an arrow into the air, and letting its angle show the way to proceed. In the Book of Ezekiel 21:21 "For the king of Babylon stands at the parting of the way, at the head of the two ways, to use divination; he shakes the arrows."
* belonged to the Nazi Party, the Communist Party, the Jihad Party. He then almost immediately goes on to list historical examples of when "the people" have handed over power to people they thought could settle scores: the Germans in 1939, the Russians in 1917 and 2013, the Iraqis in 2025, the French in 2112....
* belongs the "someone better", winning almost every tournament he entered (including Wimbledon) and becoming the first person to win back-to-back Olympic singles titles, before finally reaching World No.1 after seven-and-a-half years of playing second-fiddle to the other Big Four members. Though the following year saw him develop chronic hip problems that nearly ended his career.
* belongs to the devil within his grimoire named Liebe, who has it naturally. This isn't as nearly as awesome as it sounds, since he's a physical weakling with no fighting ability by devil standards and was abused by them until one literally threw him out of the underworld

* Beloved begins when Wei Wei hooks up with a younger woman she met at a bar. The "woman" turns out to be a 16-year-old girl.
* Beloved Chicago Cubs announcer Harry Caray, after having to call a worse than usual (even for the Cubs) half inning in '89, was heard over nationwide TV uttering the poignant phrase "God damn it" as WGN cut to commercial.
* Beloved Danish film and theater actor Dirch Passer suffered a heart attack at age 54 in 1980, during a performance at the Tivoli's Revue, and passed away a couple of hours later at the local hospital. According to stories, he asked for someone to turn up the dim lights shortly before he collapsed on the scene. Rather tragically, after decades of being known as the hardest working man in Danish showbiz, often working 2 or 3 theater or movie productions at the same time, he had finally given in and agreed with his then-girlfriend that
* Beloved is an escaped slave who killed her toddler daughter (and attempted, but failed, to kill her other three children) when the slave catchers came to take them back to slavery. She had suffered so horribly in slavery that she truly believed that it would be better for them to be dead than to live like that.
* Beloved is fully-organic, with parts grown instead of built. This still requires acquiring the proper genetic codes from other ships of her species. It is shown, however, that their navigational organs are horribly imprecise at jump calculations. When Ubu Roy offers simple mining computers for this purpose, they are significantly better at this.
* Beloved is the most critically-acclaimed book the horror genre has never claimed.
* beloved king in public but explains it away by implicating the victim as a terrorist against the country.
* Beloved: Lin was this way when he was a child. Ding Yi sees a picture of him and mistakes him for a girl. Wei also thought he was a girl at first glance. He was slim and pretty until high school.
* beloved movie adaptation team (Star-Lord, Rocket Racoon, Groot, Drax, Gamora, etc.) is iconic and extremely well-known, while many forget or don't know that the original Silver Age team even existed. The only members of that team that are really remembered are the ones with links to the newer team, like Yondu.
* Beloved. Paul D was sentenced to one sometime after leaving Sweet Home and before arriving in Delaware and later Ohio.
* Beloved: Sethe is haunted by the ghost of Beloved (the child she killed) and her tragic past, which is full of slavery, cruelty, murder, and rape.
* Beloved, Sethe is put in a state jail immediately, frustrating the slave catchers.
* Beloved Smother and she doesn't want this potential suitor to be disappointed. The daughter obeys only to find that the boy thinks he might not measure up either and has sent his rolov in to sleep with hers. Once they get that out of the way, their date goes fine.
* Beloved starts with the protagonist finding out she slept with a sixteen year old girl she met at a bar.
* Beloved was older. Despite trying to avoid her, they end up meeting again and again.
* Below, and director David Twohy had to create the official website himself.
* Below are referred to as the Elder Kingdom even though it was probably many kingdoms, but nobody actually knows who built it all, or how. "Manthings" like goblins maintain civilizations in some parts of the ruins, but the builders were likely ordinary humans. The sheer mystery of the place is a major force driving people to explore.
* Below Board, and is in fact more than willing to break the rules to serve his view of justice.
* Below Board in its second episode, when Detective Holloway effectively does this to the Panama Limited night train.
* Below Board is about two detectives with somewhat mismatched personalities in 1930s New Orleans.

* Below Board, team up with Detective Martin, a Cajun veteran of the New Orleans Police Department.
* Below Board tends to zigzag this trope, as while the main characters are technically investigating burglaries, there's always someone who ends up dead by the end of each episode.
* Below comes off like a wild psychopath, but he plays it up to hide the fact that he's a pretty good self-taught amateur in a field normally controlled by a guild. He ends up helping the party in multiple ways even his boss didn't expect. Yet he's still a complete Jerkass to the core, and can't be trusted around women.
* Below contain a few self-replenishing lamps that have remained active for many centuries.
* Below, everyone assumes Finch himself is the only one in the dark and no one wants to be the person to tell him.
* Below has a Thieves' Guild that encompasses a wide area, including surrounding villages. The four highwaymen who are roped into the quest are all members. So is the locked-up forger whose fake treasure map kindles the quest.
* Below Her Mouth: Dallas could be easily mistaken for male from a distance and in dim light.
* Below Her Mouth Dallas, though she always thought of herself as straight before. They begin a passionate affair.
* Below Her Mouth: Erika Linder is Swedish, not Canadian. A couple of minor characters are American and Slovak.
* Below Her Mouth: Jasmine uses the bathtub's sprayer to stimulate herself.
* Below Her Mouth (lesbian main character, queer female main character; subject matter includes queer female romance, LGBT awakening)
* Below Her Mouth: The affair between Jasmine, who'd never been attracted to women before, and lesbian Dallas forms the basis of the film's plot.
* Below is represented by green. Also is not related to the brothers, and is
* Below looks like a pretty, lost young woman, but her disguise falters as she's discomfited by Brenish's increasingly shrewd suspicions—he's a better liar and has enough book knowledge to figure out what she is. Her voice goes feral for a moment; once she accidentally shows her nictitating third eyelids; and after suffering a burn to her hidden stinging tail, its perfect camouflage partially breaks down. When unconscious she slowly fades back to her natural appearance.
* below—albeit frozen groundwater mixed with nasty chemicals — below the surface layer of desert rocks and dust). It also snows dry ice (frozen carbon dioxide) in the winter in the polar regions.
* Below of them. Unfortunately Gareth doesn't know the map is a fake, and there's no safe way to tell him.
* Below that his approach to fighting is highly strategic. His antagonist (and boss) Gareth distrusts him to the point of grabbing a hostage to keep him in line, and even makes sure the two men stand watch together because he doesn't trust Brenish not to compromise the loyalty of one of his henchmen in two hours.
* Below, the ghost story is set on a submarine and an incredible amount of artistic license is taken with how roomy the submarine is. Few movies can accurately portray how cramped, crowded, and claustrophobic a submarine is, but this particular submarine is shown to have fairly large rooms, multiple decks, and corridors wide enough for two people to walk comfortably side by side. This was mainly done to allow characters enough room to wander off by themselves so that spooky events could ensue, also its much easier to film in a wider space. Both modern and World War II era submarines are so cramped that all off duty personnel are usually expected to be in their racks so as to stay out of the way of the people on duty. Only the largest "boomers" could even try to approach having this much space.
* Below. The goblins and gremlins have been at war, so it's not even clear which group the goblins were trying to find in the first place. The gremlins would have been better off engaging only the goblins, but despite their intelligence, they take typical "greenskin" concepts of friend and foe to the simplistic extreme.
* Below the gods are the Firstborn, children of two gods (rather than a god and a mortal) but born within the mortal world. They're not transcendent like the gods

and exist as physical beings, but within their spheres can rival the gods for power. Notable Firstborn include
* Below them are natural-born demons, like succubi, imps, and hellhounds.
* Below the Root among platform gamers. The books it was based on (and is the canonical sequel to, making it possibly the first of its kind) are terribly obscure and were out of print for years.
* Below the Root: Pomma starts out with the highest spirit score, and is considered a holy child (meaning she gets favorable treatment from both Erdlings and Kindar) but is a physically frail nine-year-old girl who needs to look for strength boosting elixir and/or take frequent meals and naps to prevent keeling over. A more robust character like Neric won't need as frequent naps or meals, but had to seek out more training to boost his spirit score, and may not get a warm welcome at certain houses.
* Below The Root, there are some random NPCs that show up on certain screens. Running into them will lead to your character being captured and put in a prison house by one of two renegade factions opposed to Green-Sky's unification, or roughed up and sent back to your home with an ominous "you were found unconscious," and a day of game-time lost.
* Belphegor and Leviathan in high regards after their respective battles, a notion that is probably reciprocated.
* Belphegor by Belphegor himself, despite the presence of death traps. Whenever he places someone in an elaborate death trap, it's never to use it as a means to outright kill, but rather to intimidate, interrogate or just screw with the sanity and fear of the person trapped and those around them. Usually, he does so to provoke an action by the other characters that will help him achieve his true goal.
* Belphegor, fits this trope very well. Unlike most diabolical masterminds, however, he gets in on the action just as much as his mooks and underlings, if not more so.
* Belphegor, from the series of the same name, wears a gold-coloured plain and featureless variety, combined with a hood and a black cloak, making his appearance somewhat similar to the Grim Reaper. His mooks all wear the cloth mask variety, with two eye holes but without a mouth hole. Except his two most trusted underlings who surprisingly are unmasked and unnamed.
* Belphegor is seen having cameras installed all over Paris. Belphegor uses them for spying purposes, which helps him a lot in his plans and is often the reason he's one step ahead of the protagonists.
* Belphegor, kleptomania, and cowardice would be enough to qualify him even if he didn't have Deidrick's (which he does).
* Belphegor, though this is only actually mentioned once by Bel himself as an offhand comment to someone whom he was trying to scare.
* "Belphegor" with a secret identity. One episode implies Belphegor may have been a high rank military official and still remain one as a cover and to have access to secret weapons and technology. But who he is, how he became Belphegor and what happened in his past is never revealed.
* Bel-Shamaroth. While he's mentioned from the beginning, only his tentacles are shown, and about the rest of his body, we only see a glimpse of his gigantic eye.
* Bel-Shamharoth does this to Rincewind just before it intends to eat him.
* Belters tend to pepper their speech with phrases from multiple languages.
* belt on it", but eventually wised up and started bringing her sheets of notebook paper (don't laugh, he still has paper cut scars back there). Then she moved on to Hot Wheels tracks.
* Beltorey was rescued, Clan Gully spent a month in Grazton recovering from what happened. The month was skipped.
* Beltrame: similar to Brighella, was either or both a shrewd villager and a blunderer who was always trying to appear of a higher rank than he really is.
* Beltstrike aren't extremely careful flying through it, they have a base 86% chance of colliding with an asteroid. This will cause the ship to be either damaged or (if it takes a critical hit) destroyed.
* Beltway Sniper attacks, pretty much the only evidence the police had to go on was

that a white van was seen at the crime scenes. People immediately started to report every time they saw a white van, one of the most common types of vehicle on the road. Meanwhile, the shooters actually were working out of a vehicle specially modified into a sniper's blind— but it was a blue sedan. It's probable that the resulting flood of false leads delayed the snipers' arrest.
* Beluga whale found in Norway was originally trained by the Russian Navy to spy on Western ports, but this one, after apparently losing it's camera, decided to simply loiter in Norway instead.

* Belvedere strip Belvedere and his owner are both in karate gis, with Belvedere in an attack pose and his owner neatly cut in two at the waist.
* Belvedere strip Belvedere uses one as a hula hoop while standing in a butcher shop.
* Belzebubs... but otherwise the Belzebubs are just your average modern family.
* Belzebubs, it is otherwise portrayed as a nice tourist destination with romantic restaurants and segue tours.
* Belzebubs, Sløth and Lucyfer's sex life is still very much active, their foreplay involving dirty talk (usually involves threats of disembowlment) and roleplaying (Sløth dressing up as a priest and trying to exorcize a demon from his wife).
* Belzebubs: The reason why the band's former drummer left was because he found Jesus... a hot Mexican guy.
* Belzebuth: These are fallen angels who seek nothing short of the destruction of the Messiah. They can only interact with the human world by possessing people or objects, but possess complete control over such barring an exorcism. If they're sufficiently powerful, they can destroy the soul of their host, but any human who manages to overcome them is forever immune to demonic influence.

* Be More Chill already admits to having "a touch of ADD" in her introductory song

"I Love Play Rehearsal", but her reasoning for liking play rehearsal in the first place — that following a director and scripts means that you know what comes next in interactions — speaks to something more. Other characters in the show also have ambiguous traits: Jeremy admits from the start that "freaking out is [his] okay" and exhibits fidgeting, tics, and stammering, as explained by the SQUIP, while Michael has an obsession with all things classic/retro (video games, soda, music, etc.) and eats the same thing (sushi and a slushy) every day.
* Be More Chill and Jake breaking into the room while yelling that he's going to kill Jeremy for (presumably) having sex with his ex-girlfriend on his parents' bed.
* Be More Chill and other references to him liking girls in the musical was intentional.
* Be More Chill!") and when he gets his hands on a Squip, one of the first things it does is tell him to stop masturbating.
* Be More Chill (bisexual, actually) bully Rich, who first writes on their backpacks the word "boyfriends" split up, and later calls Jeremy gay for signing up for the school play (even though he does the same thing).
* Be More Chill dictates otherwise (like zapping the lock off a locker). It also seems physical to users, possibly creating the illusion of touch by manipulating the user's nervous system.
* Be More Chill does force him to not walk away and he accidentally calls her "the hottest girl in school," he still very loudly protests her advances. Luckily, he is able to get away before anything serious happens when Chloe's ex-boyfriend Jake storms in angrily, the SQUIP turns off, and Brooke witnesses what she thinks is her boyfriend cheating on her.
* Be More Chill due to her breaking up with him at the party, and expresses guilt for laughing at Rich not realizing he was having a legitimate breakdown.
* Be More Chill: Everyone thinks Jeremy and Michael are dating (and in some productions, Michael has a crush on him). Jeremy has a crush on Christine. Christine is dating Jake, who Chloe is in love with. Jeremy ends up dating Chloe's friend Brooke and then almost has sex with Chloe. Eventually, the school bully Rich develops a crush on Michael, Jeremy and Christine get together, Chloe and Jake get back together, and Brooke ends up dating the school gossip Jenna.
* Be More Chill fame often recruits the same cast and crew for his shows, and frequently involves these people in concerts and independent albums featuring his music under the name "Iconis & Family." Frequent members include Lauren Marcus (also his wife), George Salazar, Eric William Morris, and Jason SweetTooth Williams.
* Be More Chill features two main characters named Michael Mell and Christine Canigula.
* Be More Chill for Jeremy. In addition, Rich is now bisexual and Brooke and Jenna end up together at the end. None of this happens in the book.
* Be More Chill for seeemingly not caring about him. This makes his father realize that he needs to change and take his role as a father more seriously.
* Be More Chill has Jeremy asking the Squip to use its energy to write down everything that just happened in hopes that the story will eventually make its way to Christine.
* Be More Chill. He's young, in love, a bit naive, and easily manipulated (though the latter could be explained by the villain prying on his low self-esteem and self-loathing). Subverted heavily, however, in that in his very first appearance he's trying to watch porn.
* Be More Chill is going to confess to Jeremy that she likes him, but then it turns out she's actually talking about Jake.
* Be More Chill", it tells Jeremy that all his fellow students, even the popular ones, are every bit as insecure and scared as he is, deep down. While it's saying his just to manipulate Jeremy into doing its bidding, anyone who is or has ever been a teenager can confirm it's not off the mark.
* Be More Chill: Michael's relationship with Jeremy can be seen as this. They obviously care a lot for each other, are each other's only friends before the events of the musical, and Michael's song after Jeremy abandons him shows how

dependent he is on him. And let's not forget how Jeremy called Michael his favorite person.
* Be More Chill subtext), until Jeremy gets a supercomputer implanted in his brain to teach him how to be cool, which eventually leads to him calling Michael a loser, causing Michael to have an anxiety attack. The next time we see him, Michael is smoking marijuana and burning mementos of their friendship.
* Be More Chill take it well, developing strange habits like never wearing pants in the house.
* Be More Chill: The activation for the SQUIP is Mountain Dew, and the deactivation is Mountain Dew Red.
* Be More Chill the main character Jeremy gets this a couple times. First when his crush Christine puts his hand over her heart(and in the process something else)and then again when he gets sandwiched between hot girls Chloe and Brooke.
* Be More Chill: The SQUIP is a supercomputer implanted in Jeremy's brain, who appears visible to Jeremy and physically interacts with him onstage. However, it seems unable to interact directly with anybody but Jeremy, and most people just see their interactions as Jeremy tweaking out.
* Be More Chill, up to and including getting a SQUIP in the first place, are intended to help him get with Christine. After the incident at the school play, they end the story on a negative note, and it's left ambiguous if Jeremy's explanation will help them reconcile.
* Be More Chill were made a bit less douchey in the stage version. Jeremy goes from a weird and chauvinistic incel to an awkward and scared kid who turns down an opportunity to get what he wants because he knows that Christine wouldn't be able to consent. Michael goes from fetishizing Asian girls and buying a defuzzer for his TV so he can see censored nudity into someone who tells his friend to compliment his crush on her smarts to flirt. While Christine is slightly less extreme, she goes from sort of rude and self-centered to dedicated to making others happy and just wanting to share her interests.
* Be More Chill when Jeremy is annoyed at his dad coming in the room with no pants on, his dad assumes that he must be frantic because a girl is in there. But it's just his friend Michael.
* Be My Princess also include Valentine's side stories focusing mostly or entirely on the protagonist's desire to give her guy homemade chocolate, and in most cases his eager expectation of receiving it.
* Be My Princess in which an ordinary young woman falls in love with any one of six princes and inevitably faces opposition from her love interest's royal family and others around them who don't approve of the relationship.
* Be My Princess, one of the boys at the orphanage where Keith and the protagonist are doing volunteer work develops a crush on the protagonist, who is in her early 20s. To the protagonist's bemusement, Keith insists on taking it seriously, arguing that to do otherwise would be an insult to the boy's feelings.
* "Ben 10,00 Returns" is stated to no longer be in continuity. However, while that version of Ben 10,000 is no longer treated as Ben's true future, everything else about the episode is adhered to (
* Ben 10 (2016) Ben and Gwen get into an argument because Ben refuses to believe camels are real. He then tells her, "Next you'll be telling me that reindeer exist."
* Ben 10 (2016): In "Xingo", Ben accidentally brings the title character into his reality when he goes Upgrade to fix the TV and lightning strikes the satellite dish.
* Ben 10 (2016), the villain uses a machine to attract and form a colossus entirely out of maggots to attack Las Vegas.
* Ben 10 (2016), who voiced teenage Ben in the original series' three sequel series, auditioned for the role. While Tara got the role, he would later be cast as the show's version of Vilgax and (starting in his 2nd appearance) Michael Morningstar.
* Ben 10, able to mate and bear offspring with any other intelligent species in the universe.

* Ben 10 Alexander Sovereign, while studying Gwen's magic, realizes that the words she speaks to use her magic mean nothing. He points out they are only a way to focus the power to what she wants it to do and after training long enough can use the magic to do what she wants without words.
* Ben 10: Alien Force: A both-genders instance happens for Gwen and Kevin at the end of one episode.
* Ben 10: Alien Force about how they're nothing but sad, pathetic losers who bully others to make themselves feel big and that they need to grow up.
* Ben 10: Alien Force affected, he claims he can feel the eons on him, but existing outside of normal space and time, it doesn't do anything to him.
* Ben 10: Alien Force: After Rath forces his way into his mouth to rescue the Tiffin, Jarett of Pantophage declares with his broken teeth "Certainly you realize that this means war!" However, Rath threatening to knit his intestines into a sweater put those plans to an end.
* Ben 10: Alien Force, after the resolution of the events of the episode, Gwen forgot that Kevin was in the old factory yet previously beaten by a possessed Cash, despite that she promised to come back for him.
* Ben 10: Alien Force" alien technology, at which point the Plumber points out Earth's only cleared for "level 2" technology.
* Ben 10: Alien Force, and because the guy was apparently an alien like Greymatter before it would have sounded even more ridiculous than usual.
* Ben 10: Alien Force and beyond talk and dress like stereotypical truckers; even their spaceship looks like a truck.
* Ben 10: Alien Force and blasts the Highbreed into oblivion. She even nearly loses her humanity doing so.
* Ben 10: Alien Force, and flashback segments and episodes taking place in the original series era were included. Other than reversing the position of the fandom (many of the sequels fans hate it and many of the original series fans adore it), it didn't exactly change the situation.
* Ben 10: Alien Force and gets her powers from her alien grandmother (the logical extension is, of course, that anyone without an Omnitrix strapped to their wrist who has powers is an alien or part-alien. The fans have had fun with this).
* Ben 10: Alien Force... and its two halves are still in a meeting deciding whether or not they should save the dinosaurs.
* Ben 10: Alien Force. And that's just those who are in the battle from the beginning.
* Ben 10: Alien Force and their mentor Max was watching the whole time to which he congratulates their bravery and puts the satellite back into orbit.
* Ben 10: Alien Force and when Ben is surprised she pulled it off, she says, "You're not the only one who's seen 'Brain Stealers from Outer Space'."
* Ben 10: Alien Force) and when they hatch the metal serves as an adequate food source for them.
* Ben 10: Alien Force an "engineer" for the Forever Knights designed a "space ship" that's just a cockpit and frame with every alien weapon they owned stuck onto it.
* Ben 10: Alien Force, Argit (and later Kevin) exploit an ideological war on an alien planet to sell weapons to both sides.
* Ben 10: Alien Force arrogant, so he sees the body as ugly and primitive (from his point of view, it's like being trapped in the body of a primate), and can't stand all the side effects caused by being in a teenage body.
* Ben 10: Alien Force begins with Max in one in the "Max Out" episode.
* Ben 10: Alien Force, Ben gains an alien named Rath. Rath is an Appoplexian, and according to Kevin, not only are they not that bright, they think that any problem can be solved by hitting it.
* Ben 10: Alien Force. Ben managed to settle the war by accidentally destroying one of their most valued statues, pitting them against him, and ending the war for good. The episode ends with the girl comically telling Ben that she and the rest of the planet hates him, and that her life is even worse now as her work hours are longer. However, she finds a pile of treasure that Kevin and Argit left behind as part of their war profits and the episode closes with her celebrating. While the

war has stopped, it doesn't solve anything. Ben's discussions with the military leaders showed them to be incessantly corrupt Generals who refused to see reason, and even admitted to using the war as a convenient excuse to blame their social and economic problems on. The girl and other civilians had to work long hours producing weapons and had a hard time finding homes. While she gets to keep the money from Kevin and Argit's war-mongering, there are still countless other civilians who're still suffering from poverty because of the pointless draining war.
* Ben 10: Alien Force but the way he sees it, he's stuck as a giant alien with no way to be himself again.
* Ben 10: Alien Force by accidentally destroying the giant statue of their former united leader (while trying to paint it purple to stop the Blue vs. Red war), turning both sides against him. The episode ends with the same little alien girl who wrote to Ben asking for help at the beginning, writing him a letter about how much she hates him now (but she does reveal that her world has finally found internal peace as they unify against their new common enemy).
* Ben 10: Alien Force did this when he saw that the Sumo Slammers were making a live-action movie, making for a spectacular moment.
* Ben 10: Alien Force episode "Con of Rath" had a part where Ben, Gwen, and Kevin, while carrying a peace offering in their current mission, are attacked by the Inkursians. Ben, at this point stuck in the form of Rath, just gets on the enemy ship and beats up all the Inkursian soldiers on it before asking their leader Commander Sangfroid to either fight him or leave. Aware he doesn't stand a chance against Rath, Sangfroid agrees to leave... and then start shooting at them again once Rath is back on his own ship.
* Ben 10: Alien Force episode "The Gauntlet" one of the bullies at Ben's school finds a robot hand which lets you shoot lasers. Guess who is the baddie of the episode.
* Ben 10: Alien Force episode "Voided", it's revealed the Null Void was originally created by the Galvans as one of these, and while there are still prisons there for the more dangerous criminals, several land masses are actually inhabited by the now peaceful descendants of the original prisoners.
* Ben 10: Alien Force, every time Ben turned from his human form to an alien he called out their names but not when he was changing between the alien forms.
* Ben 10: Alien Force exist on Earth due to former Plumbers mating with humans. This makes for an excellent justification for fans to create their own half-alien OC.
* Ben 10: Alien Force features an alien with a copied Omnitrix stuck in Ben's form. When he first attempts to pass himself off as the real Ben, he says stuff like "Yes, it is I, Ben Tennyson. Escort me, Ben 10, to my domicile."
* Ben 10: Alien Force features a planet that is sun-blasted on one side and ludicrously cold on the other, leaving a small barely-habitable band in the center. Ben asks who would want to live there; the answer is the Necrofridgians, or the mothlike Big Chill species.
* Ben 10: Alien Force follows this in that even which aliens he has change around and some have the same abilities, they are never on the same set.
* Ben 10: Alien Force gets more dog piles than its predecessor, though the victim isn't Ben:
* Ben 10: Alien Force get stuck on an alien planet together and have to team up to survive, though the Highbreed makes his disdain of Ben repeatedly clear. When camping out, Ben wakes up suddenly to see the Highbreed shooting at...the creature right behind him.
* Ben 10: Alien Force got the idea for the Highbreed from, of all things, bananas. Ben even references this by calling the Highbreed Supreme "the Highbreed top banana."
* Ben 10: Alien Force, Grandpa Max reveals to Ben and co. that many beasts and cryptids are real and in fact aliens... but he dismisses Bigfoot as just some guy in a costume.
* Ben 10: Alien Force group with fanatical behaviour during the Alien Force/Ultimate Alien era (though they were more stoic and rational scientists in

the original series).
* Ben 10: Alien Force Gwen can take advantage of this, Ben apparently cannot.
* Ben 10: Alien Force. Gwen's magical powers are explained as alien powers inherited from her alien grandmother. The episode with this revelation goes on to say that there is no such thing as magic, despite previous episodes and the prior series having things such as spells read from incantations, a fountain of youth, and soul-swapping. Oh, and what powers Gwen's abilities according to the same episode? Mana.
* Ben 10: Alien Force has a non-dirty but insulting example; a villain gets the upper hand on Ben and gloats that this is the last mistake he'll ever make. Cue Kevin, who retorts that Ben will make many more mistakes as he charges to the rescue. He immediately lampshades that that wasn't the way he meant the words.
* Ben 10: Alien Force has Dr. Animo who is using a literal drill to break down dimensional walls of his prison.
* Ben 10: Alien Force has even more, such as Big Chill (moth man), Jetray (manta ray that can 'swim' in the air) and Humungasaur (dinosaur). Though the one with truly animal-like behavior is Spidermonkey, who acts hyper and chimp-like.
* Ben 10: Alien Force has the lighthearted "Pier Pressure" come between "Maxed Out" (which covers the death of a major character) and "What Are Little Girls Made Of?" (which deals with the fallout of "Maxed Out" and includes some major reveals about the Tennyson family).
* Ben 10: Alien Force has this problem; more specifically, it's the fact he seems to mix up events that haven't happened yet with events that have.
* Ben 10: Alien Force, he turns out to be only 2 feet high, and half of that is his head.
* Ben 10: Alien Force. In "Grounded" they intentionally scuttle a ship full of refined nuclear bat guano right next to the pier.
* Ben 10: Alien Force: In "In Charm's Way", Charmcaster manages to drain Gwen's powers into herself. In a rematch, Gwen challenges Charmcaster to face her in a fistfight. Charmcaster refuses and tries to blast her, but Gwen reveals she knew she would do that and uses a spell to absorb the blast and regain her powers.
* Ben 10: Alien Force, in the episode "If All Else Fails": a Highbreed commander had been chosen when the war still raged to stay in a hibernation-like state on Earth, to awake only should his kind lose the war. An earthquake awoke him however, and thinking he was woken up due to the Highbreed losing the fight (which was actually resolved peacefully), the commander unleashed a fail-safe doomsday weapon on all of humankind. It wasn't until the new Highbreed Supreme briefed him on the situation and ordered him to stop the weapon that he ceased acting as an antagonist to the main cast.
* Ben 10: Alien Force: In the first episode, Ben runs into a hostile alien for the first time in years, and automatically slaps his wrist. Then he remembers that he hasn't worn the Omnitrix since then, and is forced to fight the alien as a human.
* Ben 10: Alien Force invasion, end up using their portails to reach the Hightbreed Supreme himself. Played with in that they don't end up killing him, but rather finding a peaceful solution to end the conflict.
* Ben 10: Alien Force; ironically, even those who didn't like the relationship saw this break-up as poorly done.
* Ben 10: Alien Force, is an unlicensed Russian Sega Mega Drive port of a beat-em-up Ben Ten game. You can only play as regular boy Ben, and the enemies are the same three aliens over and over again.
* Ben 10: Alien Force is really inconsistent with regards to whether the existence of aliens, robots, and mutants is commonly accepted knowledge, or whether such things are supposed to be regarded as myth by the general public.
* Ben 10: Alien Force is so old, he can't remember his own name, hence he adopts the moniker.
* Ben 10: Alien Force. It was activated by a Highbreed officer who didn't get the memo.
* Ben 10: Alien Force, it would seem those two shows still had quite a fandom of their own.

* Ben 10: Alien Force, just from doing anything that draws attention.) He calms down a bit after helping to save the planet/galaxy/universe.
* Ben 10: Alien Force Luckily, Ben blows that one out, too, and Gwen berates Kevin for his stupidity.
* Ben 10: Alien Force: Max and Verdona did this on a tree by his favorite fishing hole.
* Ben 10: Alien Force — and only one gotcha involved turning into a flyer with the Omnitrix.
* Ben 10: Alien Force. Mostly when Ben wants to transform into a particular alien, the device tends to be non-responsive.
* Ben 10: Alien Force of Ben, except with white hair, a red jacket, and red eyes.
* Ben 10: Alien Force, on his forum. Though to his credit, he never made any personal attacks on these fans and frowned upon any of his supporters who did.
* Ben 10: Alien Force outfit (and for some reason can now only speak Spanish).
* Ben 10: Alien Force relies on the Dnaliens as faceless goons. Turns out quite quickly that Dnaliens are actually created by infecting human beings with face-hugger-like creatures called Xenocytes... which mean all the Dnaliens the heroes fought and killed were innocent, brainwashed human beings. The Forever Knights also count.
* Ben 10: Alien Force repeatedly gets destroyed in various ways. This carries on through the two following shows in increasingly inventive fashions.
* Ben 10: Alien Force Season 3, it's an interplanetary law that one can legally conquer a planet by defeating that world's greatest hero in a duel. In the Season Premiere, Vilgax tries to conquer Earth by challenging Ben to a duel. In preparation for this duel, he invokes the same law on 10 other planets and steals their greatest heroes' powers.
* Ben 10: Alien Force shows the Plumbers' Helpers actually met Ben's group when they, along with Kevin, were taken to the Null Void as kids by the Rooters, who gave them alien DNA and made them an army of mutant children that ambushed that Ben, Gwen, and Max at one point. The reason why they didn't remember their first encounter is because their memories were erased by the Rooters.
* Ben 10: Alien Force's Swampfire. In addition to being himself a plant, he can generate a gas that allows him to control plants. If there are no plants in the area, he can also spawn seeds that produce incredibly fast-growing plants.
* Ben 10: Alien Force studies the Omnitrix's genetic repair function and makes instant-healing guns.
* Ben 10: Alien Force: Sugilite, guardian of Petropia, is the only one of his kind, until a sample of his DNA was placed into the Omnitrix, creating Ben's Chromastone form.
* Ben 10: Alien Force taken into account, Paradox has most likely existed forever, despite originally being an ordinary human.
* Ben 10: Alien Force that halfway through the series gains the ability to turn into a heavily armored spaceship.
* Ben 10: Alien Force; the Codon Stream on planet Primus is the actual source of the Omnitrix's DNA samples; the Omnitrix itself is a sort of wireless reciever.
* Ben 10: Alien Force, the Highbreed were this. Obsessed with genetic purity, they inbred themselves to the point of sterility, dooming themselves to extinction within a generation. They were the first sentient species to develop in the Universe (or so they claimed), and they were disgusted with the prospect of younger (and thus "inferior") species living on without them, so they planned to exterminate all lifeforms in the Universe.
* Ben 10: Alien Force: The Incurseans are a militaristic species of humanoid amphibians who have clashed against Ben and his buddies on multiple ocasions.
* Ben 10: Alien Force. There's a very unstable prototype of the Omnitrix that tends to go wild and has fewer time limitations (Transformations can last much, much longer), but is not sentient or evil itself, it is Albedo who is the one that uses it for evil purposes.
* Ben 10: Alien Force, the villain blows up Pluto to show what he'll do to Earth if his daughter isn't returned to him in time.

* Ben 10: Alien Force. They latch onto a host and slowly overwrite their DNA, turning them into monstrous slaves of the Highbreed called DNAliens.
* Ben 10: Alien Force, this is an interplanetary law, allowing anybody who's powerful enough to beat the strongest person on a planet control over that planet. Vilgax conquers planets this way.
* Ben 10: Alien Force. This is definitely one of those cases where anything but an outright lie would have given it away.
* Ben 10: Alien Force). This might not be due to the Mister Seahorse so much as when/how the implied impregnation occurs. The alien in question is said to be asexual.
* Ben 10: Alien Force until he can convince the other two entities to agree on it, effectively trapping him in the nonresponsive Alien X form.
* Ben 10: Alien Force usually appearing before Ben with an insult, or a statement regretting how the Omnitrix wound up on him.
* Ben 10: Alien Force were coming. Ben and the others are naturally put off.
* Ben 10: Alien Force "What Are Little Girls Made Of": Verdona does this just because Kevin annoys her.
* Ben 10: Alien Force when Magister Labrid tried to stop the Forever Knights from obtaining alien laser lances which were above Earth's technology level. His reasons are shown when one knight attempted to use a damaged lance on Labrid and Kevin, only to be blown to bits.
* Ben 10: Alien Force. When the town's mayor gets greedy and kidnaps one, he gives the alien a steak, causing the alien to grow into massive size and defecate unstable uranium. The alien's friend tells Ben that Mars "used to be called The Popcorn Planet" before his kind came there.
* Ben 10: Alien Force, where Gwen goes back to time and prevents Kevin's mutation, it creates an alternate timeline where Gwen is killed by Charmcaster.
* Ben 10: Alien Force, which also served to celebrate that he'd been cured of his patchwork monstrosity condition.
* Ben 10: Alien Force, which doesn't help because although united, the aliens are going to keep dedicating their resources to military over important things like education or welfare of their citizens.
* Ben 10: Alien Force, which Kevin constantly repairs and upgrades with various alien tech and weapons.
* Ben 10: Alien Force, which only served to break the fanbase even more.
* Ben 10: Alien Force who lived on a higher plane of existence and could see in multiple dimensions (apparently, only 26 dimensions are important).
* Ben 10 aliens have integrated into society and most of the impact has been had already.
* Ben 10: Alien Swarm showing what happened to the original characters from the movie.
* Ben 10: Alien Swarm: The Hive Queen tries to put Ben under her control since he is in the form of an alien of her species. Ben shakes it off very easily.
* Ben 10). Also looks like a literal anthropomorphic rat, due to him being an alien.
* Ben 10 also sees him needing to work through others while regaining his strength.
* Ben 10, among the Galactic Enforcers, a trio of minor superhero characters, is Synaptak, whose main power is this.
* Ben 10, and even tries other methods to avoid this plan but keeps coming to the same conclusion that it is the only way for a permanent fix.
* Ben 10 and he looks truly corpse-like with black holes implied to be rotted holes in his face's flesh, and exposed ribs inside a hole in his costume.
* Ben 10 and involves a large number of flashbacks to the original series. Yet, in both the flashbacks and present episodes, aliens and characters are all redesigned to the point some of them bear few similarities to their model.
* Ben 10 and is blatantly more powerful than Kenneth, as seen in ArcadiusD's Time of the Serpent continuation fic.
* Ben 10 and other aliens designed after mummies, werewolves and Frankenstein's monster all come from a solar system of planets called the Anur System. Some of the

last episodes also mentioned zombie aliens stated to be from the same system. Omniverse finally explored the place, while also introducing a species of vampire aliens, and it was perpetual night with rural Victorian bizzarchitecture.
* Ben 10, and we're not even talking about the alien species established by other characters and villains.
* Ben 10: Animo's telescopic Transmodulator, the Loboan's makeshift receiver designed to spread Corrodium over the Earth, etc..
* Ben 10 approach than all evil coming from one guy, he's got plenty of competition:
* Ben 10 are the "If you can't join them, kill them" type toward both aliens and magic, though they also have occasionally tried to acquire power through alien tech and magic artifacts.
* Ben 10 are usually invented about at the same time as combustion engines, and radio transmissions rarely predate nuclear fusion. Some technologies on earth are far in advance of what we should be able to produce.
* Ben 10) as a power source, which would be painful and eventually kill her.
* Ben 10. At one point, someone manages to turn the intangibility off, leaving Ghostfreak stuck in solid form temporarily.
* Ben 10 averts this trope in that while Ben's transformations appear quite lengthy to the viewer, when it is shown from other characters' perspectives, there's simply a flash of green light that lasts less than a second.
* Ben 10, a young camper is found frightened and babbling on the road after fleeing an alien mushroom-monster in "Camp Fear".
* Ben 10 back when they were kids. It is revealed that due to her disgust to these feelings she hurt him in response when he was just trying to cheer her up after a bad day at school, which is the reason why they have not gotten along for nearly a decade after. Lord nearly cripples Gwen mentally revealing this fact to her.
* Ben 10 began airing, which was at least produced by Man of Action this time around.
* Ben 10, Ben accidentally kicks his bed, breaking his toe and hopping in pain.
* Ben 10, Ben realizes he has feelings for Ren after she nearly kills herself saving the school.
* Ben 10: Ben's Blitzwolfer form has a snout that opens in four different directions.
* Ben 10, Ben's Kineceleran form XLR8 has small black wheels on both feet. His Petarola form as Cannonbolt can curl into an armored sphere and roll at high speed.
* Ben 10, Ben's protectorates are his family and the earth itself. Hurt either, and you'll get reminded how a human boy has become the single most known enforcer of law and order in the galaxy.
* Ben 10 Ben (the one we have seen throughout the franchise until the reboot) is from Dimension 10.
* Ben 10. Ben uses the Omnitrix for personal gain or personal amusement every chance he gets. His idiocy, however, usually brings about the worst possible result.
* Ben 10. Ben, who remembers going through this before, warns her about the danger of using fiery powers in the middle of a forest. She immediately responds that only an idiot would set the forest on fire. Naturally, that's exactly what Ben did in the first episode.
* Ben 10, but in subsequent appearances, it's pretty clear that he's nowhere near as dangerous as other threats Ben has faced.
* Ben 10, but it's also got alien tech devices and in episodes set in the future it can even fly and has a TARDIS-esque "basement".
* Ben 10 can survive up to twice the heat of reentry, and is able to cushion Gwen and Max when he lands.
* Ben 10, Charmcaster's spellbook is kept by Gwen after a body-switching incident. She keeps it and her skills at magic continue to increase throughout the series. The evil sorceror Hex (who is Charmcaster's boss and uncle, though Charmcaster has been a solo act of late) has a library full of them.
* Ben 10. "Daddy" in this case being willing to destroy Earth if his little girl

doesn't get whatever she wants.
* Ben 10 dad turns out to be a badass in the episode "Goodbye And Good Riddance".
* Ben 10 defeated Tetramand princess Looma when he was 13, though he was only interested in the engine her family would give him as a wedding gift. When the time to marry her came, he tricked Ben into defeating Looma in a duel, leading him to become her fiancée instead.
* Ben 10, despite being an object whose sentience isn't even confirmed in canon. This is due to the device's tendency to give Ben the wrong alien at the worst times, which at first was justified by Ben's unfamiliarity with it, but has now been flanderized to such a degree (even though by this point Ben has been wearing the thing for several years and should be familiar with it) that blaming the Omnitrix for being a dick just seems like the most credible option.
* Ben 10: Destroy All Aliens moving the fight away from the city to avoid collateral damage, only to get completely ignored.
* Ben 10: Destroy All Aliens, the pyramids were made by Tetramands, and Stonehenge was a Galvan practical joke.
* Ben 10 during the first season finale. Cooper had a fast growth and became a big teenager who was pretty much a palette swap of Kevin (only blonde). He worked hard to make sure Gwen's plan of stopping Kevin was a success and even defended her when Kevin almost killed her, yet all he got in the end was a thank you and a kiss on the cheek from Gwen, followed by seeing her giving Kevin a big kiss on the lips.
* Ben 10, Earth is an "open system" in which the Plumbers are operating publicly on Earth since many aliens are living and working on Earth without hiding.
* Ben 10 episode "A Change of Face". When Charmcaster switches with Gwen they keep their normal voices, but when Gwen and Ben wind up in each other's bodies, the voices go with the minds. Even Ben's alien forms get deeper female voices. It is never explained why Charmcaster and Gwen retain their normal voices, though it is speculated to be either that they are both female or that they both have magic abilities, which Ben does not.
* Ben 10 episode "Goodbye and Good Riddance" end with cousins Ben and Gwen becoming classmates. This is reference to them being best friends and classmates when the show was early in development, with their relationship changing to cousins later on, due to Gwen needing an actual reason to be traveling with them during the summer.
* Ben 10 episode "Grudge Match" pits Ben against a more-than-willing-to-beat-the-snot-out-of-him Kevin, as well as other alien gladiators after being teleported from Earth.
* Ben 10 episode, it's discovered that Gwen would have been far more adept at using the device, having unlocked its full abilities in a single night, while it would take Ben years to consciously figure out the master control. The sequel series also drive the point home that while Ben isn't the worst choice as the wielder and is perfectly capable of saving the universe several times over, he is far from the best being for the job.
* Ben 10 episode "Ken 10" had Ben's future self Ben 10,000 show examples of this. He informs his son Ken that saving the world isn't kid's stuff when he himself has been doing so since he was 10 years old. He also asks where his son gets his attitude after he lashes out like he did when he was 10 years old. Both occasions are lampshaded by Ben's grandfather Max giving a scornful look when Ben is hypocritical.
* Ben 10 episode, Kevin (as Upgrade) cuts the brakes of a cable car with people and sends it to fall into the ocean. Ben saves them.
* Ben 10 episode "Last Laugh", Ben faced the villain Zombozo's three henchmen, the Circus Freak Trio, one of which was named Acid Breath, a deformed man who was able to spit caustic acid and exhale acidic vapor. There was this dialogue between him and Ben:
* Ben 10 episode "Permanent Retirement", Ben is beating the tar out of one of the evil aliens (already posing as Grandpa Max) as Wildmutt when it shapeshifts to close up its revealing wounds and says in Max's voice, "Now, you wouldn't want to hurt old Grandpa Max, would ya?" Ben-as-Wildmutt hesitates, allowing the alien to

start walloping him and forcing Gwen to have to remind him of reality.
* Ben 10 episode "Side Effects", Clancy tries to make a nuclear plant explode to wipe out the city. Grandpa Tennyson says that the reaction has gone too far to shut anything down normally. Heatblast, suffering from a cold, provides the "instant cooldown" to the reactor itself, and the rest of the plant dutifully follows.
* Ben 10 episode titled TGIS where it was shown that Ben and Zak happen to be the same age. Previous hints had been dropped due to references made (mostly on Secret Saturdays) such as some of Ben's villains appearing in a criminal database in Secret Saturdays or Dr. Beaman frequently using the expression "Great Galvan Prime"
* Ben 10 falls under this, with no two fans really agreeing on the quality of each successor series.
* Ben 10 features a slime-like alien species called the Limax that survive in hot temperatures and can be easily be killed by water. However, despite their weakness to water, the Limax are still able to eat beings who have water in them. For example, one of them ate a fly. They also planned on devouring an entire neighborhood of senior citizens and there were no plans to dehydrate them in any way.
* Ben 10. For most of the episode, he'd just been gradually getting furry and wolflike, then... ouch. Of course, a lot of Ben's alien transformations in the original series look pretty painful and gruesome as he gains features such as additional limbs when becoming Four-Arms or Stinkfly, or even literally inflating when he becomes Cannonbolt.
* Ben 10 franchise. Practically every time he's formed an alliance with someone, he betrays them.
* Ben 10 franchise wants to obtain the Omnitrix, mass produce it, and use its power to conquer the universe.
* Ben 10 from him for his own purpose, and couldn't care less about what happened to Ben once he would have it. However, after accumulating several failures against him, he ends up hating Ben and wanting to kill him as much as to get the Omnitrix.
* Ben 10 generally has its first fight before the opening theme, as a way to kick off an episode.
* Ben 10/Generator Rex: Heroes United for an EVO and Ben mistaking Rex for an alien. The fight is relatively short however, and most of the special deals with them cooperating.
* Ben 10 "Ghostfreaked Out", Ghostfreak has just gotten loose from the Omnitrix. Ben's grandfather, not knowing this, goes up to Ben and says the phrase.
* Ben 10 goes missing, all his allies have to do is keep an eye and ear out.
* Ben 10, Grandpa Max takes Ben and Gwen to see a roadside attraction that is built up as something amazing. They are also told to mind the signs. When they finally go to see it, they pass several warning signs about things not to do to it. It turns out to just be a gigantic ball of rubber bands. Ben ignores the warning signs, and Gwen doesn't stop him because she also found it disappointing. It turns out there actually was a good reason for the signs. The giant ball of rubber bands is also a prison for an electrical monster which is unleashed by Ben playing with it.
* Ben 10: "Grudge Match" opens with Ben and Kevin being abducted mid-fight by an alien robot that runs the Mega Cruiser, a ship with its own colosseum where prisoners are forced to fight for the entertainment of the galaxy.
* Ben 10, Gwen gets Ben an alarm clock for his birthday specifically because it can't be crunched as it is locked in a clear case which requires one to be awake enough to unlock it before it can be shut off.
* Ben 10, Gwen performs a G-rated version of this by using a squirt gun against aliens who are weak to water.
* Ben 10 had this and that episode is named "The Unnaturals." It is set in Philadelphia in which the Cannons (Ben's hometown team) had a baseball game and their rival team is the Squires. As XLR8, he sabotages Cash and J.T. before acting in favor of the team. Later in the episode, Ben sneaks into the Cannons to play the next baseball game (with Cash in his red underwear suit, showing that his baseball suit has a number 23 that the main character uses). There, he tries to bat the ball but it failed two times. After a third try, he runs from his starting point up to

the referee or umpire where the safe is and on that location, he transformed into Four Arms. The baseball association in this show or episode is called the Little League Baseball.
* Ben 10: Happens to Professor Paradox. It drove him insane at first, but eventually, his purpose allowed him to enjoy eternity.
* Ben 10 has a Petrosapien ("Diamondhead") bounty hunter named Tetrax who usually uses these (In fact, he was originally credited as Hoverboard in his debut episode). Ben received one from him as a gift, and has used it several times during the series.
* Ben 10 has a ten-year old protagonist named Ben Tennyson, who gains the power to turn into ten (or more) different aliens. However, he rarely acts more mature than usual for that age.
* Ben 10 has five. It may be worth noting that this means there are at least five entire planets full of these:
* Ben 10 has stumbled across a stash owned by Ben's father. And through Ben's thoughts, it is heavily suggested he is well aware of them.
* Ben 10 has the eponymous hero meet a couple of these. Ben erroneously believes that he has broken Gwen's computer and subsequently enters a wrestling match to win the prize and replace said computer. There he meets two bipedal mutants who speak admirably about their mother. Later in the episode, it's revealed that she's a normal human. The pair even lampshade the trope by saying something along the lines of "Folks say we take more after our pa."
* Ben 10 has the transformation sequences for individual aliens that show up in most episodes, though not for every alien transformation used in said episode.
* Ben 10 have cousins Ben and Gwen, and their grandfather Max, traveling across the continental US during summer vacation, with them visiting various tourist towns or old family friends along the way.
* Ben 10 have descriptive names, for example, Galvanic Mechamorphs for Upgrade's species, Vulpimancers for Wildmutt, and Florauna for Wildvine.
* Ben 10. He can eat anything, universe-destroying explosives included.
* Ben 10, he claims to have two passes to the premiere of a movie Ben and and Gwen want to go to. They each spend their time trying to impress him so he will give them the extra pass. It turns out he doesn't actually have any passes; he just made it up so they would talk to him.
* Ben 10. He has a green cage covering his face, which is so nightmarish it makes Psyphon turn white with fear and beg for mercy.
* Ben 10 helps you escape this trope. Rather bizarrely, though, he often does find himself falling victim to this response all over again after a battle, when he changes back into his human form and the supporting character of the week realizes that he's a "just" a shape-shifting, superpowered kid rather than an alien.
* Ben 10 he never runs out of juice and changes from form to form at will.
* Ben 10; he only gets Master Control on rare occasion, and he never gets to keep it longer than the climax of the episode in which it happens.
* Ben 10; he's 17 years old, has spent most of his life on the streets, and hasn't gone to school since the age of 11. He's an utter genius at practical things like energy weaponry and mechanics (from cars to starships), as well as math due to managing his own finances and history from keeping track of who hates who and why, but is understandably lacking in most academic areas.
* Ben 10, he's outgrown it). He does make an exception for Kai Green, a Navajo girl seen in one episode... but Kai takes his attention and runs with it...to creepy, creepy places.
* Ben 10. He was originally a selfish, sociopathic character, willing to hurt/kill anyone for his own personal gain and/or pleasure. However, he turned good later.
* Ben 10. Hex is a self-proclaimed "Master Magician" who desired to rule the world with his vast magic powers and lives in a large tower-like building.
* Ben 10, his Brainstorm form doesn't appear to gain any building knowledge but does gain an extremely large vocabulary and the desire to show off all of it.
* Ben 10 his face. Either because of this, or at least Ben not being used to it, Ben is very prone to being taken by surprise despite being able to see in every

direction.
* Ben 10, his identity became public and is now a full-blown celebrity.
* Ben 10 history of the original draft of the show in which Ben and Gwen were not relatives but rather in the same school class.
* Ben 10, however due to her not being familiar with earthling sexuality, she doesn't even notice.
* Ben 10, if Ben is forced to go into a fight as the six-inch-tall Grey Matter, this is generally a big part of his strategy.
* Ben 10 information on its background, including official bios for each alien form used by Ben, providing info about these aliens' species, planets and for some of them cultures, with only a few of them having been actually explored in the various entries. This leaves plenty of material for fans to create their own alien OCs or develop further the various planets. In addition, Ben is stated to have access to more than one million aliens on the Omnitrix, leaving a huge gap for fans to fill with their own fan-made aliens.
* Ben 10. In Omniverse she replicates the costume with her Andodite powers.
* Ben 10 in the beginning. Later events generally portrayed her as smarter, more competent, and all-around better than Ben, despite Ben being the main hero. It culminates in the TV Movie, in which Gwen is portrayed as selfless and Ben as pettily selfish, respectively.
* Ben 10 in "The Big Tick" eventually does this to every planet it feeds off.
* Ben 10: In the episode "Divided We Stand", Ben as Ditto did a capture Dr. Animo while floating on water. Now how did they not sink from the accumulating weight of the pileup?
* Ben 10 in the episode "Secrets" by destroying a city to lure the hero there.
* Ben 10: In the episode "Washington B.C.", Ben uses Grey Matter for the first time to go digging through boxes of Sumo Smacks cereal to try and get a rare gold Sumo Slammers trading card.
* Ben 10. In the reboot, the duo are on much friendlier terms, with the two outright referring to the other as their best friend on numerous occasions. While Gwen still acts as the voice of reason to Ben's bullheaded antics, she's generally supportive of him no matter how bad things get. In return, he's supportive of her right back.
* Ben 10 is a one-man example of this, with each of his alien forms having a different power (Fourarms is strong, XLR8 is fast and so on).
* Ben 10 is in defiance of this trope, basically saying that no matter how similar they may seem, children are not carbon copies of their parents and will take different paths.
* Ben 10 is much larger than his standard robot drones, and more often than not his organic allies such as Sixsix.
* Ben 10 is the base of a secret alien fighting society, it also ended up being the site of the climactic battle of a season.
* Ben 10 is to eat their entire planet. And Ben (as his Gourmand form Upchuck) even decides to join in...
* Ben 10. It's downplayed in that Wildvine wasn't particularly useful that episode, though the form was able to handle the immediate threat.
* Ben 10. It's for this reason that Azmuth created the Omnitrix in the first place, as he intended it to be a tool for diplomacy and Ben's Grandpa Max was the only person in the universe he trusted to wield it before he met Ben.
* Ben 10). It's framed by a benevolent narrator explaining how stories can be told different ways.
* Ben 10 later addressed this by saying that the organization was restarted not long after the original series and more aliens were recruited into the line-up.
* Ben 10 Limaxes who attempted to abduct an entire retirement community along with Max's sister as they considered older humans "nice and tender" but younger ones "too chewy".
* Ben 10 line was a huge hit that outsold the Power Rangers line one year. Which is a big accomplishment. The entire series became much more toyetic as a result.
* Ben 10 — In the Omniverse episode "A Fistful of Brains", Ditto uses the

same line after getting lost while burrowing underground. Ditto shares the same voice actor as Animaniacs' Yacko Warner.
* Ben 10, Michael Morningstar (as "Darkstar") can manipulate a black energy that absorbs energy (life force, mana, electricity, etc.), making him stronger and better looking. This comes with the downside of making him hungrier.
* Ben 10 movie, the scene in which their mobile home is blown up by Eon.
* Ben 10. Notably in the incident with The Big Tick, where after saving the planet from a giant ravenous blob... Ben has to clean its slime off the van while his companions relax and point out spots he missed.
* Ben 10 of Wildmutt's species, they don't look like dogs either—they actually look more like tigers.
* Ben 10: Omniverse: After escaping from Plumbers HQ, Zombozo disguises Jerry from Inhuman Resources as himself and leaves him in his cell tied up. Ben and Max find out about this after Ben as Wildmutt tears off the disguise.
* Ben 10: Omniverse after Malware disintegrates Feedback. Then Ben proceeds to destroy him using the Omnitrix's energy.
* Ben 10: Omniverse, after the Incurseans conquer Earth, Emperor Milleous has the Waybads replace Lincoln's head with his own, as well as the Statue of Liberty's with his daughter Attea's.
* Ben 10: Omniverse), and bringing Ben uncomfortably close to his first series incarnation while ignoring the maturing of the previous sequels. The character designs are also much closer to the first series.
* Ben 10: Omniverse and is reduced to a whimpering mess; turning completely white in the process.
* Ben 10: Omniverse: Atrocians like Ben's transformation The Worst have bodies that are practically indestructible, able to tank anything from physical and energy attacks, lava, and acid, though they still feel pain. They lack physical strength and have no attacks.
* Ben 10: Omniverse because Swampfire is going through puberty. Rook, under the impression that Charmcaster has cursed Ben, throws salt on him, leading Ben to criticize Rook's belief in superstitions. He then looks in the nearest mirror, which shatters, and asks for more salt.
* Ben 10: Omniverse. Because the universe was recreated to before the Anihilargh went off, everyone minus Ben is confused when the weapon apparently doesn't work, and write the device off as a fake.
* Ben 10: Omniverse, Ben becomes the center of almost all dog piles in this series.
* Ben 10: Omniverse claims that "Sludgepuppy" is actually a slur, despite no other Lenopan showing offense to being called that.
* Ben 10: Omniverse devotes a plot arc to revisiting the premise, with the return of the Anurian villains and Ben's alien versions (including a new fifth monster alien, a vampire), unrelated horror villains and shoutouts to additional works.
* Ben 10: Omniverse episode "Mud is Thicker Than Water" has Kevin and Rook leave for an intergalactic auto show at the beginning, leaving Ben and Gwen on Earth to deal with a Plumber situation. During the episode, Rook calls Ben at two separate points, with Ben becoming increasingly worried during each call, noting that their problem sounds far worse than what he and Gwen have to deal with. The next episode, "OTTO Motives", follows Kevin and Rook at the show, and we discover just what is happening on their end.
* Ben 10: Omniverse episode "Oh Mother, Where Art Thou", the Dittos experience this against the mature Pretty Boy clones.
* Ben 10: Omniverse episode "Universe vs. Tennyson", Ben is put on trial by the Celestialsapiens for having recreated the universe using Alien X in an earlier episode. He spends the entire episode trying to prove his innocence, then later tries to justify his actions as saving the day, believing that the punishment would be the universe being undone. At the end of the episode, he (technically) loses the case, and it turns out that the punishment for unauthorized recreation of the universe is roughly equivalent to five USD. Ben isn't amused that no one told him this.
* Ben 10: Omniverse even have him defeating one of the major antagonists in a hand-

to-hand fight.
* Ben 10: Omniverse eventually developed Undertown, an entire city hiding underneath Bellwood's sewers where a great many species of aliens and traders make their living here outside of the watch of humans.
* Ben 10: Omniverse features tungsten-based lifeforms called the Kraaho who need life to be extremely hot to live. Since they decide to make a settlement on Earth, which is far too cold for them, they attempt to cause a lava flow on the surface to make it more habitable.
* Ben 10: Omniverse flooding Bellwood, toppling buildings and engulfing cars (including some in traffic — we see some drivers get out but most cars have their doors still closed when the lava reaches them). Absolutely no mention is made of even the physical damage.
* Ben 10: Omniverse for Gwen and Max. When compared to the original, the reboot has 11-minute episodes and borders on comedy and slapstick.
* Ben 10: Omniverse from the fifth dimension called the Contumelia, and all life in it arose from a race of unicellular aliens working with them called Slimebiotes.
* Ben 10: Omniverse had Ben face an alien who wants to promote peace. Unfortunately, the villain does this while wreaking havoc on the city. Ben eventually called him out with this, word-for-word.
* Ben 10: Omniverse has an in-universe example in the form of Toepick, an alien form who's constantly wearing a caged helmet. Once the gates of the cage slide open, Toepick's true face is revealed. We never actually see it, but it's apparently so horrifyingly ugly, every villain who has looked at it so far turned into screaming, shivering wrecks.
* Ben 10: Omniverse has Rook mention a case where an alien criminal did this. We have yet to actually see said criminal, however.
* Ben 10: Omniverse has this same ability as part of his super intelligence, being able to defeat the Vengers with minimal effort using everything around them when fighting in an alley, even a bitten apple.
* Ben 10: Omniverse have his plot take place during the following summer.
* Ben 10: Omniverse, Hex revealed that his face markings were a tattoo, mentioning that it made it hard for him to get an honest job after reforming. In fact, he only got his job as a professor at a university after donating his entire collection to them.
* Ben 10: Omniverse. However, this made it just as divisive as those iterations.
* Ben 10: Omniverse: In "An American Benwolf in London", a robot grabs Rook's gun off him and points it at him. Rook says that he knows something about the weapon that the robot does not. As the robot fires and blows a hole in its own chest, Rook says "You're holding it backwards".
* Ben 10: Omniverse in an effort to catch fish more quickly. Even then, he ends up with a boot for his efforts.
* Ben 10: Omniverse: In "For a Few Brains More," an intelligence-drained Azmuth grabs onto and steals Gwen's glasses in the middle of a fight and goofs off with them for a few minutes.
* Ben 10: Omniverse: In the flashback episode "From Hedorium to Eternity," Zs'Skayr possessed the body of Thaddeus J. Collins and attempted to take over Earth by having his fellow Ectonurites possess people and having Kevin produce hedorium so he can block out the sun.
* Ben 10: Omniverse: In "The Frogs of War: Part 2", Ben gains a new transformation named Bulfrag which he uses to pose as an Incursean guard and "captures" Gwen, Kevin, Max and Blukic so they can infiltrate Plumbers HQ after it was taken over by the Incurseans.
* Ben 10: Omniverse introduces a predator of Big Chill's species called a Psycholeopterran. It can turn intangible so Big Chill can't avoid it by turning intangible.
* Ben 10: Omniverse is confirmed to be cat-like when a villain who can mind-control cats tries to control him.
* Ben 10: Omniverse it's revealed that Galvan B was terraformed by the Galvans (Leaded by Azmuth) but their terraforming attempt created a new sentient species

that they called Galvanic Mechamorph.
* Ben 10: Omniverse. Kevin and Looma's wedding is called off and Ben unwittingly ends up engaged to her in Kevin's place.
* Ben 10: Omniverse: Khyber's torso armor is made of the bones of his previous hunting targets.
* Ben 10: Omniverse: Malware is a mutant Galvanic Mechamorph (a being of living technology), who can permanently absorb other devices in order to upgrade himself, as opposed to the rest of his kind, who can upgrade existing technology (though it is implied Malware can do this as well, but chooses not to). Before an upgrade, however, he caused anything he absorbed to corrode, even OTHER MECHAMORPHS!
* Ben 10: Omniverse, Malware's final villainous plan was to reach the core of the Galvan homeworld, which would allow him to absorb and become the entire planet.
* Ben 10: Omniverse, Max was the one who encountered the aliens, who were actually Blukic and Driba, and aided in their escape when they got captured.
* Ben 10: Omniverse. Needless to say, the heroes aren't really impressed seeing robot mice attacking them.
* Ben 10: Omniverse on his planet. The episode even has a scene where he coldly rejects another girl's invitation to a festival.
* Ben 10: Omniverse plays this as well, as seen in "Mystery Incorpreal" where she sniffed and growled at Gwen's classmate, Dante, who turns out to be Darkstar wearing an ID Mask.
* Ben 10: Omniverse previously gave each race a different planet of origin (all named Anur Something, so presumably in the same system.) but the show has them all coexisting on one world.
* Ben 10: Omniverse, she immediately switches her affections to Ben. Her father does consider Ben's ability to change into a Tetramand with the Omnitrix a bonus.
* Ben 10: Omniverse situation with Ben, so she will most likely avoid attacking Earth again, but that's little consolation to the rest of the galaxy.
* Ben 10: Omniverse: Skurd eventually fixes the glitch that prevented the Omnitrix from giving Rath clothes, resulting in Rath wearing a masked luchador outfit... and also speaking Spanish, for some reason.
* Ben 10: Omniverse, so that he can use his intelligence for himself. However, due to the fact Azmuth is a Galvan, he possesses two brains with only his "main brain" being taken while his "pre-brain" is still in his body to handle bodily functions. His main brain is also able to survive separately from the body and audibly speak, while the pre-brain leads Azmuth to be simplistic and childish.
* Ben 10: Omniverse's pet has one of his predator forms, Buglizard, who possess the ability to produce smokes in order to confuse its enemies and escape or attack, much the same way than Squids and Octopuses would. It's played more or less realistically, in that the smoke usually cover enough area so Buglizard's disappearance would be credible, and he is actually shown escaping to the viewer in some scene. Also subverted in a flashback, where Khyber, when confronted to the actual Buglizard he got the sample from, merely used a gaz mask with infavision to counter the smoke.
* Ben 10: Omniverse story arc had a group of evil Bens attempt to eradicate all other Omnitrix users in the multiverse. The series finale (and, in turn, original continuity of the franchise) even ends with Ben creating a new universe.
* Ben 10: Omniverse, the Kraaho attempted to detonate a nuclear device on Earth to heat it up and make it more comfortable for them, not caring that this would kill off the humans.
* Ben 10: Omniverse: The ruler of the Incursian Empire and his daughter both have long, overly complimentary greetings that state their name, rank, place in the royal line, etc.
* Ben 10: Omniverse. The voices go with the minds, and other characters even hear the difference.
* Ben 10: Omniverse treat contractions the same way humans would treat swear words. If a Revonnahgander uses one then it's either a slip of the tongue or they're angry enough to drop their equivalent of an F-bomb.
* Ben 10: Omniverse using his own DNA sample of this omnipotent species.

* Ben 10: Omniverse: Vilgax does this to Eon and his army of evil Bens by activating a Chronosapien Time Bomb that destroys them along with every other Ben Tennyson in the multiverse and their respective timelines (minus No Watch Ben).
* Ben 10: Omniverse, Vilgax's manacles were damaged, allowing him to knock Ben out and escape.
* Ben 10: Omniverse villain Tummyhead. Interestingly, the face in his stomach is the only one of the two that speaks.
* Ben 10: Omniverse, we see young Ben defeating an alien named Malware, after which he proceeds to do a celebratory jump with the alien's enhanced jumping abilities, but the Omnitrix's timer runs out and Ben returns to normal form, landing on his butt. He still takes a moment to taunt the fleeing enemy before he starts rubbing his backside.
* Ben 10: Omniverse: When Rook is showing his vehicle to Ben we first see a badass-looking green and black monster truck, only to learn it's a different car and Rook's actual ride actually is the old, silly-looking truck behind it. Then subverted when Rook reveals it's only in camouflage mode and can turn into a powerful, heavily armed, spaceship-like vehicle.
* Ben 10: Omniverse, which puts its focus on comedy rather than action/adventure and is also far more episodic than every other installment, receives the same criticism.
* Ben 10: Omniverse, who forcibly ripped Feedback's DNA out of the Omnitrix and turned it to dust. As a failsafe, the Omnitrix could no longer accept DNA from Feedback's race, but in "Showdown, Part 2" Ben regained Feedback after a negotiation with his past self.
* Ben 10: Omniverse), who is levitating a kidnapped Gwen, across through door to door in the halls of Gwen's university. At one point Ben actually reaches his hand through one door to see it come out of a door on the other side of the hallway, indicating the doors are actually portals.
* Ben 10: Omniverse will become Looma's fiance. Of course, Ben wins. Looma and her father are very pleased with this result. Ben, not so much.
* Ben 10: Omniverse with an alien princess who could kick a Sherman tank into the next county.
* Ben 10 on Ben. We also find out then, that without the protective shell that the Omnitrix generated, sunlight destroys Ghostfreak.
* Ben 10: One episode has the characters visiting a prototype underwater hotel being built in the triangle and uncovering the secret — a colony of aliens bent on collecting everything that comes within reach.
* Ben 10, one of Ben's alien forms, Clockwork, can do this on a massive scale.
* Ben 10 original series. Additionally, there are four movies, two crossover special, and 40 shorts. It is also the longest-running CN original series in terms of continuous franchises.
* Ben 10, Osmosians, such as Kevin 11, can absorb anything into themselves, but they need to have something to absorb, so Gwen gets the idea for Kevin to carry rocks along with him to provide him with armor. He appreciates the gesture but explains that he needs a lot more material to make his armor.
* Ben 10 points out that K.C's rival is actually left-handed, as all his sketches are drawn with the left hand.
* Ben 10: Race Against Time Ben, corrupted by himself in his own past. On top of that, when Eon succeeds in implanting himself in the Omnitrix, he declares that "two cannot exist at once", disappearing into a different point in the time stream.
* Ben 10: Race Against Time: Ben turns into Grey Matter and rigs a contraption to launch food at the bullies who were making fun of him.
* Ben 10: Race Against Time is trying to save his dying race by taking over Earth.
* Ben 10: Race Against Time means that no one knows that any of the various aliens that have been stopping villains all over the country during the summer was him.
* Ben 10: Race Against Time, the Tennyson trio stumble across the seemingly mummified corpse of Constantine...right before he sits up and declares "I'm not dead!", scaring both Ben and Gwen. Grandpa Max is not surprised, as usual.
* Ben 10: Race Against Time, the villain Eon was arrested by the Plumbers and was

kept frozen in suspended animation in a cryogenics facility for 200 years. However, he was able to thaw out and aged the Plumber guarding him into a dissected elderly zombie-like state "in the blink of an eye".
* Ben 10: Race Against Time to near-death, leaving him in a dissect green-greyish zombie-like state "in the blink of an eye".
* Ben 10 ran afoul of several of these while trapped on an alien planet.
* Ben 10 Ren has a solid gold picture frame. She laments the fact that she was surprised how valuable the material was on earth, as it was quite common on her planet.
* Ben 10, reveals that they got back into work sometime after the first series ended, with far more alien recruits being added to the lineup.
* Ben 10: Season 3 Gwen starts training herself in magic, after refusing the call the previous season.
* Ben 10: Secret of the Omnitrix episode "Store 23" also appears in one.
* Ben 10: Secret of the Omnitrix. Of course, Azmuth doesn't tell him anything, anyway.
* Ben 10: Secret of the Omnitrix. Which raises a number of questions that have never really been resolved.
* Ben 10 series, Ben's alien forms start speaking in various foreign accents. Brainstorm gets a stuffy British one, Gutrot has a harsh Brooklyn one, NRG has a Russian one, ChamAlien and Clockwork are German... this is doubly bizarre since all of them are just a single shapeshifted American teenager, and his accent doesn't change for most forms, or any of them early on.
* Ben 10 series following the original series does every few episodes.
* Ben 10 series has the Forever Knights, who, similar to the Huntsclan above, sought to destroy all unearthly creatures, which includes magical beings.
* Ben 10 series, the dimension known as the "Null Void" is used by many alien civilizations to dump their criminals. Kevin was once sent there before he reformed and became one of the good guys.
* Ben 10 series. When Ben, Gwen, and Max arrive at a Navajo festival they're attacked by an alien that is first believed to be a Yenaldooshi. When Wes, an old friend of Max's, prepares to go out and track it down, he refuses to allow his granddaughter to join them and says "only Braves (men) are allowed to track." This also extends to Gwen, who obviously objects and has been helping since the beginning, but Max simply replies "Their land, their rules."
* Ben 10's lackeys and instructed to cause tension between the couple to slow them down, is the one encouraging the idea.
* Ben 10 so enjoyable, because in a rare protagonist example, Ben does what pretty much any ten year old boy with super powers would do, switching between beating up super villains in the streets, to using his alien super-intellect to try and find his sought after prize in a box of cereal without buying it first.
* Ben 10 started as this, but the nature of their god Diagon and their relationship with him makes them more like a Cult of Cthulhu.
* Ben 10, such as Brainstorm and Goop. There's also Jetray and Spidermonkey, who aren't Starfish Aliens, but they aren't humanoid either.
* Ben 10: "Super Alien Hero Buddy Adventures" where Ben complains to Tim Dean about his show. But he orders Fiery Buddy to take him away.
* Ben 10's worshippers in "The Big Tick" do this using a holographic display of the tick's feeding cycle, and a brief vision of the hell that the tick will turn the Earth into is provided to the audience.
* Ben 10, Tetrax tells Ben that he can't leave Earth without his hoverboard. At the end of the episode, he lets Ben keep the hoverboard.
* Ben 10 the heads of Mt. Rushmore get destroyed twice and have to be replaced by holograms.
* Ben10-themed and talking about a whole Structure Deck about the "Omnitrix Alien" monster type.
* Ben 10: The non-canon "Goodbye and Good Riddance" ends with Ben and Gwen running off to fight Dr. Animo and his army of mutants before they reach the school. Given that the two of them had just defeated Vilgax the previous night, they're more

worried about having to miss class than the imminent villain attack.
* Ben 10, there's a part where Ben enters a hall of mirrors and in one of the mirrors he sees his reflection has Zombozo's face.
* Ben 10: There's Corrodium (it's even in the name!), a high-energy mineral of alien origin which is harmless to aliens from the Anur system, but causes any humans or Earth-native animal life that are exposed it it to mutate into surreal-looking monstrosities.
* Ben 10, the Rustbucket, Grandpas' RV, was laden with gadgets, presumably composed of alien technology.
* Ben 10 the show revolves around latches onto his grandson's wrist, Max's experience is invaluable (especially since the sender intended it to go to Max in the first place).
* Ben 10, the titular character expressed "Who needs a plan when you've got the watch!" thought process, often selecting the alien forms that possessed the most brute strength or coolest powers. In "Hunted", a fake bounty hunter calls Ben out on this primitive strategy, and since then, he has been more creative with the Omnitrix. Well, more or less.
* Ben 10 "The Ultimate Weapon": Grandpa Max is in an obsessive state over an important artifact. When Ben offers up helpful clues from an artifact already in their possession, Max brushes Ben off with "Not now, Ben."
* Ben 10. They are shackled together by an energy shackle so that if one dies, the other does too.
* Ben 10, this is the origin of the Galvanic Mechamorph's (Upgrade's species).
* Ben 10 to extract the Omnitrix from him. Ben realizes this when he fights a dream version of Vilgax who tried to send him to the Null Void instead of taking the Omnitrix.
* Ben 10 to make Earth his domain involves covering the planet's skies in a Corrodium shell from space which will block out the sunlight (which is deadly to Zs'Skayr), and enable him to rule at full power in the darkness. The fact the Corrodium shell will also mutate all human and animal life on the planet into monsters is believed to be a mere side-effect.
* Ben 10 transformation used in the first 3 shows. Most notable is Ghostfreak, where Ben's skull rotates 180 degrees.
* Ben 10 trap. In fact the "ultimate weapon" is just a brittle old sword that crumbles into dust the moment someone lifts it.
* Ben 10: Ultimate Alien after he tells Gwen that you need to treat a car like you treat a woman. Gwen asks him to go on, but he wisely drops the idea.
* Ben 10: Ultimate Alien alien Andreas holding Kevin by his collar. He uses his vibration-generating powers to shake him even harder.
* Ben 10: Ultimate Alien, and his attempts to turn everyone against him are always unsuccessful.
* Ben 10: Ultimate Alien and is now the cameraman to a grown-up Jimmy Jones.
* Ben 10: Ultimate Alien, Ben and Gwen's cousin Sunny only decides it's fun being around them once she gets to fight. Ben is also eager to get into fights for him to go alien and beat up bad guys...a desire that's amplified even further if the alien he turns into happens to be Rath.
* Ben 10: Ultimate Alien: Ben has to call Gwen and Kevin to rescue him from one at the start of "Deep".
* Ben 10: Ultimate Alien Both of these naturally were some of the main complaints that fans had about the updated show.
* Ben 10: Ultimate Alien Charmcaster and the other rebel factions of Ledgerdomian immediately started fighting each other after overthrowing Adwaita because they all wanted to rule. Charmcaster won.
* Ben 10: Ultimate Alien does this after being bound, gagged and locked in a closet by Elena in "Revenge of the Swarm". It worked.
* Ben 10: Ultimate Alien episode "Couples Retreat", Charmacaster tells Darkstar that her real name is Hope. However, Darkstar doesn't remember it and starts calling her false names like Heather, Hermione, Heidi, etc.
* Ben 10: Ultimate Alien episode "Fame" after Ben fears the entire school will hate

him after finding out his secret that he can change into different aliens, Julie gives him a kiss to assure him that not everyone hates him.
* Ben 10: Ultimate Alien episode "Vicktor, The Spoils" invokes this. The nation of Zarkovia is beset by rebels. The prince, disgusted by his father's lack of force against the rebels, uses the braindead body of Dr. Vicktor to attack Ben's team and imprison his father. The king escapes, and uses Ampfibian's powers to transfer his mind into Dr. Vicktor's body. He then reveals that he was biding his time, waiting for the perfect moment to crush the rebels. Ben and co. defeat and immobilize King Vicktor, and the prince demands they hand him over. Gwen points out the prince's mind-controlled soldiers, asking "If the prince is a bad guy, who are we here to help?" Kevin suggests the rebels, but Gwen replies "Who's to say they're better then anybody else?" In the end, Ben destroys the prince's mind-control device, allowing the soldiers to choose their own sides, and the group decide not to interfere, and simply let the conflict run its course.
* Ben 10: Ultimate Alien explained that the Ultimate forms are computer simulations of what the species would be like after millions of years of having to survive a programmed worst-case scenario. The actual DNA the Ultimatrix uses is temporarily changed to match the simulated DNA.
* Ben 10: Ultimate Alien: Geochelone Aeros like Terraspin are naturally immune to mana (the source of magic in this continuity).
* Ben 10: Ultimate Alien gives us Zarkovia, a small monarchy somewhere in Europe.
* Ben 10: Ultimate Alien, Gwen is encased in ice in "Perplexahedron" by simply being in a extremely cold room. She is thawed out by Swampfire with no problems.
* Ben 10: Ultimate Alien has a temporal sense that sees into the past. He can project this effect into a whole area by winding the key on his head.
* Ben 10: Ultimate Alien his "master" by consuming him, thus remaining the final villain.
* Ben 10: Ultimate Alien in exchange for the return of the souls, which is granted.
* Ben 10: Ultimate Alien introduces “Customized Techadons” which unlike the ones previously encountered, perform a hit ordered by a customer, and won’t stop pursuing until the hit is complete and if one gets destroyed, another will take its place to continue the hit. When Gwen finds out Vulkanus ordered the hit on Ben, he also reveals once a hit is ordered with Techadons, he can’t call it off even if he wanted to.
* Ben 10: Ultimate Alien is Kevin's girlfriend than anything else, she would try and stop them.
* Ben 10: Ultimate Alien is ranting at a ship that's flying away with him clinging to the underside:
* Ben 10: Ultimate Alien: It's unclear exactly what Ben Tennyson did to piss off Will Harangue, but the pundit seems single-mindedly determined to make his life a living hell.
* Ben 10: Ultimate Alien, Julie tells Ben that only 24% of the surveyed people think he is a threat to society. When Ben shows relief, she clarifies that the other 76% wants him dead.
* Ben 10: Ultimate Alien: Ma Vreedle used a giant machine in one episode to combine cloning mix and salt water in a bid to create 4 billion Vreedles that would have used the entire ocean.
* Ben 10: Ultimate Alien modified to be a spacecraft and is used by Ben's team to react to crises all over the globe and beyond. In an amusing scene Gwen notes that she has to wait until graduation to get her own car, yet she can pilot the Rustbucket hundreds of light-years just to meet an alien contact.
* Ben 10: Ultimate Alien, Mykdl'dy is a tidally locked planet with one side burning, and the other side frozen.
* Ben 10: Ultimate Alien on contact with... peanuts. No explanation is given beyond "it's allergic".
* Ben 10: Ultimate Alien" reveals that the homeworld of the Arachnachimp species is this; they build their homes high in the trees in order to evade the many predatory species below.
* Ben 10: Ultimate Alien save Julie without hesitation... but it turns out he was

smart enough to have his friends come with him and save the other girl.
* Ben 10: Ultimate Alien, Ship is amazingly skilled at detecting enemies:
* Ben 10: Ultimate Alien: Terraspin comes from a race that resembles giant turtles, and they possess the ability to spin their flippers around like helicopter blades, producing powerful gusts of wind.
* Ben 10: Ultimate Alien that took the form of a dragon. It was created by Azmuth as an ultra advanced device capable of manipulating the laws of physics and misuse in the wrong hands once blew up a planet.
* Ben 10: Ultimate Alien. The military calls them in to investigate the theft of components to an Orion Drive. Kevin immediately deduces that it's a nuclear bomb.
* Ben 10: Ultimate Alien. The two admit in tears making all this up, causing Psyphon to say the trope with disgust.
* Ben 10: Ultimate Alien, the whole pier becomes this trope when Ben and the gang go up against Zombozo, Charmcaster, and Vulkanus.
* Ben 10: Ultimate Alien to catch up to the others when they take the space plane to another planet.
* Ben 10: Ultimate Alien: under the orders of Old George, the Forever Knights are out to hunt down every alien on Earth, regardless of whether they're good or bad. Understandably, it's a lot harder to find the bad ones, so the good ones get targeted. Argit was the only real bad guy they ever harassed. This lasted for one episode; Ben made it very clear that there would be lethal consequences for persisting, and they took his threat seriously. What's really strange is that Old George's command isn't even internally consistent. He has a very specific beef with an all-powerful alien, one to whom the target aliens were in no way related. Indeed, he is shown to not care that his subordinates have failed, which brings to mind the question of why he directed the resources of his organization to a meaningless task when his stated aim is to prevent the rise of one far worse.
* Ben 10: Ultimate Alien When he auditions actors for the aliens, most of them have absolutely zero talent.
* Ben 10: Ultimate Alien, while rather light on the Starfish Aliens, gives us a fine example in ChamAlien.
* Ben 10: Ultimate Alien with Sir George, with him living as an old man in a nursing home since the '70s.
* Ben 10: "Under Wraps" begins with Max taking Ben and Gwen to work on a farm to teach them the value of hard work, which he claims he learned on his uncle's farm as a boy. At the end of the episode, when Ben and Gwen insist that they've totally learned their lesson, Max is relieved, because he now remembers how much he hated working on the farm.
* Ben 10 universe in one episode of the latter show, so they at least exist in the same multiverse.
* Ben 10 (Upchuck's species) is called Peptos XI. There's a very good reason for this, though. It's because when their planet is threatened with invasion, they eat it and use it as fuel to burp-propel themselves to a new one.
* Ben 10 utilizes this trope in "Be Afraid Of The Dark", using the armadillo-esque "Cannonbolt" Ben is able to shield himself, Gwen and Grandpa so that they can re-enter Earth's atmosphere safely.
* Ben 10: Vilgax spent most of the first season in a tank regenerating.
* Ben 10, Vilgax tested out a superweapon on Tetrax's homeworld, right after Tetrax gave him the crystal for his weapon to work.
* Ben 10: Vulpin is a galactic dumping ground totally devoid of all life that's not freakishly mutated by toxic wastes. For perspective, Wildmutt (think a vaguely canine gorilla with no eyes and a massive set of jaws) was sampled from the DNA of a creature native to the place.
* Ben 10, we have the Lepidopterrans, Stinkfly's species, who look like a giant fly.
* Ben 10 went out with the most popular guy in her school before the start of the series, where it turned out that "dating her for three days" was the cost of a bet he and his friends did. Naturally, Gwen is skeptical pretty much every step when a handsome and extremely rich guy shows interest in her.

* Ben 10 where Granda Max got turned into a giant alien larva. After being turned back to normal, he has no memory of his transformation, but then he licks his lips and asks, "Why do I have this strange craving for rotten eggs in sugar water?"
* Ben 10: While Ben Tennyson has been portrayed with different attitudes in his various series, this remains his most definite trait: Ben has a strong desire to help everyone in need, to the point it was the very first thing he thought about before, when, and after getting the Omnitrix.
* Ben 10 (while leaving his present/past intact, as for him, it already happened).
* Ben 10 who protects the universe by quietly making alterations to the timeline.
* Ben 10, with control over fire and radiation. Unfortunately he has to stay encased in a special suit of armor, or the people around him can develop radiation poisoning.
* Ben 10, with crystal spikes landing all around his body as he keeps backing up to avoid it hitting his groin.
* Ben 10 with him, especially since he canonically is a stalker toward Gwen.
* Ben 10, with some aliens being redesigned to be more toy-friendly and executives even once ordering extra episodes for the express of showcasing Kevin's alien forms and little else.
* Ben 10, yet is in no way as evil as he is, and most of their species aren't portrayed as evil either.).
* Ben 10, yet still experiences "images" of what's around him. This perception is probably scent-based, as the images grow sharper when he takes a breath.
* Ben 10 zombies from another planet in the same system (Anur Ormeron) are mentioned.
* Ben 10, Zombozo and his freaks have one — which they use to stash any stolen loot.
* Ben Aaronovitch has lamented that the London Metropolitan Police reinvents itself so often that the meticulously researched
* BEN, a creepy, supernatural doppelganger of Link that originated from the
* Ben, acting on behalf of the Others, in "the Purge," using poisonous gas to wipe them out. It's a pretty chilling image.
* Ben actually has multiple scenes in all series where he displays this trope: in one episode of the original series, he attacked two mooks in his Ripjaw mode in a typical
* Benadryl, also known as diphenhydramine. Remember how your mom used to give it to you to sleep? People get high off of quantities around 700mg+. It's sold over the counter as a sleep aid. It is deliriant that it can cause confusion between hallucinations and reality, seeing people that aren't there etc. Abusers often take it mixed with DXM, because both drugs cancel each other's undesirable side effects: DPH cancels the dizziness and itch caused by DXM, and DXM cancels the feelings of anxiety caused by DPH.
* Ben Affleck, but also had ancestors who owned slaves in Georgia. Embarrassed, he succeeded in getting that information removed from his particular episode, until it was learned that he had that information removed. He ended up issuing a press release apologizing for the act.
* Ben Affleck, Geraldo Rivera, Al Gore, Conan O'Brien, and Hitler were also radically re-designed after their first appearance.
* Ben Affleck has complained about people coming up to him and saying "AFFLECK!" in the same tone as the AFLAC duck says "AFLAC".
* Ben Affleck have butt faces. And Cartman nicknames him "Ben Assfleck".
* Ben Affleck, which meant there were some actors playing multiple characters. Additionally, most of his movies featured crew members Scott Mosier (producer) and Dave Klein (director of photography).
* Ben also has a tendency to counter claims that he's a geek in spectacularly geeky ways:
* Ben & Arthur aspect of film production, including editing, makeup, and composing the score.
* Ben & Arthur by dousing the church — while the priest is still inside — with a gallon of gasoline and setting it on fire. This is all implied,

however, as the gasoline looks more like water and the fire is never actually seen.
* Ben & Arthur (gay main characters, homophobia, queer male romance)
* Ben & Arthur, Mildread, in this scene portrayed as an overly demanding customer at the cafe where Arthur works, asks Arthur for more sugar. Arthur's response? "Ahahahaha... no", and he prances out of the cafe, quitting his job at this affront. And he's supposed to be the hero.
* Ben & Arthur of gay romance movies. Despite a budget of $40,000 (4 times that of Birdemic), it somehow manages to accomplish even less in scope.
* Ben & Arthur. Somewhat subverted in that the marriage between the two eponymous men is not recognized by the State of California.
* Ben & Jerry's Ice Cream Lock prevents anyone from opening the lid of a cardboard ice cream carton. So when the lawyer put it on his wife's favorite ice cream to get her into the lockpicking hobby, she simply cut open the bottom of the carton and ate the pint upside-down.
* Ben & Jerry's Ice Cream's headquarters has a "Flavor Graveyard" that applies this trope to the company's discontinued
* Ben and Ed can have his head cut off, or he can even detach it himself, and will still be able to continue the level albeit with less maneuverability. Alternatively, he can just reattach it to his body. Justified in that Ed is a zombie.
* Ben and Ed: You play as Ed the zombie, who has befriended a young boy, Ben, in an apocalyptic world. Ben is captured and used as bait for Ed to follow in a difficult and deadly obstacle-course game show. Once the show is stopped and Ed escapes to find Ben, they embrace. Then it turns out that Ed was never really Ben's friend, and he wasn't chasing after Ben to rescue him. He only saw Ben as a potential meal and Ed devours him alive.
* Ben and Gwen Tennyson are supposed to be cousins, but the writing style used in the original series is more like persistent
* Ben and Holly's Little Kingdom, all the fairies are named after plants (Holly, Daisy, Poppy, King Thistle, Nanny Plum...) and the elves are not.
* Ben and Holly's Little Kingdom, characters who get upset cry tears that gush out of their eyes like a sprinkler, with the exeption of Princess Holly in "Holly's Magic Wand", where she cries normal tears instead.
* Ben and Holly's Little Kingdom from which they store, among other things, a talking recipe book.
* Ben and Me: A variant; when Ben's demonstration of electricity starts to go awry and electrify some of the spectators, Ben starts forward to do something. However, Amos, realizing it's a bad idea to touch anything that might make them part of the circuit, nips him on the ear and tells him to stop the apprentice who's been turning the wheel instead. This solves the problem without putting anyone else in the electricity's way.
* Ben and Me cause a number of ships to run aground and nearly result in a riot, Ben points out that the almanac clearly isn't an authentic one. He claims it's a hoax and urges his customers to insist on the genuine article in the future.
* Ben and Me has Amos, Ben Franklin's mouse companion, doing a few of these:
* Ben and Me: In one of the stories Amos recounts, Ben goes swimming, claiming it's good for the health. Amos, who disdains swimming, stays on the bank. A dog runs away with Ben's hat and Ben, thinking Amos is still inside, runs after it to rescue him. Then a lot of people come by, see Ben's clothes and not the wearer, and assume he drowned, so they run off carrying the "evidence" with them. Eventually Ben comes back, and ultimately has to face everyone wearing only his swimsuit and coonskin hat.
* Ben and Me made in the front of the hat came in useful for Amos warning him about obstacles right ahead of him that he didn't notice.
* Ben And Me was about a mouse who was responsible for most of Benjamin Franklin's greatest achievements, and had an indirect role in the writing of the Declaration of Independence.
* Ben and Rook go to the infamous Anur System, where all of Ben's monster-inspired aliens (Blitzwolfer, Frankenstrike, Snare-Oh) come from as well as the former

domain of the evil Ghostfreak. Upon arriving, we learn that Ben is considered hideous and a monster. Despite Rook's attempts, Ben finds it hard to understand why he would be viewed as monstrous.
* Ben and the Galvans' preferred colors are black, white, and green, so a lot of villains are colored black and red to oppose this as red is the inverse of green on the color wheel, with Vilgax and Hex being prime examples. Other antagonists such as Charmcaster, Zs'Skayr, and Eon instead opt for
* Ben and Trilo seem to have something similar to Batman's Ventriloquist, in that Ben's doll Trilo acts as if it has a mind of its own and routinely beats up its owner. Trilo also seems to forget he's a doll at times - at one point, he tries to get Ben to sing with him in a round.
* Benares' Juuma Si Shi (Stone Thread) is a small tadpole-like critter which can spit a black thread of web which turns anything to stone. Most notably, during the climax of the Amara arc,
* Benares-Possessed!Yakumo uses it to petrify Amara's heart, dooming the entire planet and forcing Ushas to appear and save the day.
* Ben as an adult is described as skinny and incredibly handsome which is a great change from the obesity of his youth. In the Miniseries he’s played by John Ritter who's ironically just as stocky as Brandon Crane who plays Ben as a kid. Averted in
* Benbally World (the oldest records say Baleyworld). It believes it had been settled from Earth, which has developed a lethally radioactive crust.
* Ben being Glory was played with, in that it was revealed that a spell stopped people from remembering the fact that they inhabited the same body. So even when they did find out, they didn't know.
* Ben Birdland was a cop who ran afoul of his crooked unit, ending up in an iron lung as a result. He accepted the Anti-Skullgirl Lab's offer to rebuild him as Big Band, and they made good by integrating a breathing apparatus and an array of pneumatic musical weapons into his body.
* Ben Bocquelet and a few more of the show's writers, namely Jon Foster and James Lamont, are beloved by fans of
* Ben Bova, it's discovered that such a lifeform inhabits the titular planet. It has a massive underground body, and tentacles a few kilometers long which it uses to search the planet's surface, for food or whatnot.
* Ben Bova's story "Stars, Won't You Hide Me?" humans have developed an immortality treatment that requires killing a member of a peaceful alien race for each human made immortal.
* Ben Bova the astronaut characters consider founding the Zero Gee Club; like the Mile High Club, but higher.
* Ben Browder grew it during the hiatus between seasons and shaved it during production of the episode when Crichton shaves his off.
* Ben Browder is known for two famous sci-fi roles: John Crichton on
* Ben brutally slaughters Billy, and before then he was seen killing a cat
* Ben 'Bugs' Hardaway, who created the proto-type version of Bugs (as well as being the namesake) was also left out in the movie, but Jones said that was due to oversight.
* Ben Burtt, the sound designer for all the films, says on a DVD extra that he decided to make the punches over-the-top on purpose as he felt they were making a comic book brought to life.
* Ben Carmine dies, as it seemed that he was developing a certain amount of respect and attachment to the rookie.
* Ben Cauley was the only survivor of the plane crash that killed soul legend Otis Redding and most of Cauley's bandmates, the original Bar-Kays.
* Bence Bakonyi finds colourful places and then gets models to dress up in matching clothing, it's surprisingly effective.
* Ben Chang. Although he came in for a fair amount of fandom backlash after the creators responded to his popularity by exaggerating his character to the point of
* Bench Breaker: Desperate to escape, a character destroys whatever they're tied to.

* Benched Hero: A hero is temporarily removed to keep things interesting.
* Benched Hero: The hero steps out mid-story, leaving the others to carry on (or not) without him.
* Benched Hero, those two have to leave the field very often (especially Kuroko), thus these three benchwarmers are often given the chance to play on the field until the next change. The first year benchwarmers (Furihata, Kawahara and Fukuda) however are simply not good enough and are inexperienced and they are given little to no opportunity to play on the field and they are usually delegated as cheerleaders.
* benched in the postseason and being blamed for the failure of the Yankees, despite the fact that other players like Robinson Cano and Curtis Granderson weren't hitting well either and that Derek Jeter, the Yankees' most famous postseason hero, had gotten hurt early in the ALCS series.
* Benchmade SOCP knife or the Hardcore Hardware Australia Special Operations Tool.
* Benchwarmers receives a hanging wedgie from the main cast, as well as both of the little league teams.
* Benchwarmers! Reggie tosses the potato to Gus, who quickly passes it to Richie. Richie quickly throws the potato to Clark—who still holds on, while letting out pained whimpers and groans. Eventually, Clark flings the smoldering spud out the window, where it hits a robot mowing the lawn, causing it to accidentally shave the fur off the side of a sleeping dog.
* Ben Corbett's father is appointed judge in the trial of the three surviving Raiders (yes, they were arrested by the sheriff who's a Klansman and who believes in what they're doing). This makes no sense, as Judge Corbett seems pretty low on the judicial hierarchy. Corbett tries traffic cases and small claims cases between neighbors. This is a case of attempted murder. Newsflash, Patterson: Corbett is a judge of a small-town
* Ben Counter. After Varr's death, Kullek takes command of the 901st Regiment. He tells the Howling Griffons that the chain of command was none too clear.
* Ben Counter as part of this and unite them for the crusade. Alaric's operation works.
* Ben Counter attacks him — but the Children arrive in time to stop him. AND then engage in the counter-attack that Tarvitz had planned.
* Ben Counter, Death's Tomb is bigger on the inside than the outside — as well as other repulsive features.
* Ben Counter died in order to say a prayer commending her soul to the Emperor.
* Ben Counter, Eumenes justifies his rebellion on grounds of fighting for what he believes in, but is clearly after power, especially when he gloats over what he will do with Sarpedon after Sarpedon submits to him to save the Chapter.
* Ben Counter, not all the Soul Drinkers are bewildered by Chaos — particularly not the young ones. Sarpedon and the others hunt them down. (Which gives Sarpedon particularly painful memories when he realizes they were right.)
* Ben Counter, the novel revolves about the Gladiator Games that the captured Alaric is forced to fight in.
* Ben Croshaw dedicated to explaining why Super Soldier Projects, at least those that are generally presented in Video Games, are not such a great idea.
* Ben Croshaw, triple-cunted hooker, the Glorious PC Gaming Master Race.
* BenDeLaCreme, a fan favorite and the first queen in Season 6 to win two challenges, being eliminated by Darienne Lake who had already lipsynced three times.
* BenDeLaCreme, yet again, in All Stars 3. A slight subversion in that her elimination was only shocking to
* Bender almost at once calls the sentient nebula he encounters God. He comes close to this trope when he says that God wouldn't use binary code, but he realizes that a space probe which "collided with God" would. It is not exactly confirmed, but it is heavily implied that the nebula is indeed Him. This is probably a mixture of
* Bender already made a step toward becoming this in "Roswell That Ends Well". The Planet Express crew travels back to 1947, and as they return to the 31st century,

Bender's head falls out the ship, being buried for a thousand years.
* Bender also makes huffing noises when the crew are running for their lives (which is quite often). When it's revealed that his model has functional immortality via
* Benderama", a heavily inebriated Hermes asks an equally inebriated Zoidberg if he wants to see a picture of his "Boy", which turns out to be his penis.
* Benderama": Bender combines with his nanoreplicants to form one giant Bender to fight an alien giant.
* "Benderama" has a teenage giant picking up the Planet Express ship and holding it up to his pimply face.
* Benderama": The crew make a delivery to a giant alien and are warned not to remark on his hideous appearance. Naturally, Bender (and the two clones of himself he created) lets fly with the ugly jokes, and the giant attacks them. Later, the giant flies to Earth to apologize, but everyone is drunk because all water has been turned to alcohol (Bender's fault, of course) and ends up being insulted and going on a rampage all over again.
* Benderama turn Prof. Farnsworth's bath water into alcohol. Bender drinks it and says it tastes like "fine cognac with just a hint of aged scrotum."
* Bender and the Planet Express Ship who fall in love to Bender's rendition of "Daisy Bell" in
* Bender are escaping from a robot insane asylum. They run into a barn, and begin to fly out in an old airplane. The plane rises into the air, turns, and crashes into the barn. Bender and Roberto are promptly seen emerging from the wreckage, continuing their escape on foot.
* Bender attempts to invoke this with the Robot Santa. "Come on, everybody! He can't hurt us if we don't believe in him!" It doesn't work.
* Bender became this in "Bender's Big Score." The scammer aliens, after brainwashing him, got him to go back in time to steal them every valuable item in history. Keep in mind that the time travel he's using is one-way, Bender is searching for them one at a time, and is perfectly happy waiting it out with previous versions of himself. It's unclear how much time it took for him, but given the hundreds of Benders we see at the end, his minimum age would be
* Bender "Bending" Rodriguez was designed and built specifically for bending metals. In theory he's supposed to be a bending-unit that is only capable of bending girders—it was once claimed he was even
* Bender calls his antenna "Little Bender." It's implied throughout the show that a male robot's antenna is his penis equivalent.
* Bender did eventually visit Robot Heaven in a sixth-season episode and met Robot God (and told him to shut up). He only visits briefly as a Robot Ghost, so it's not clear if It's a physical or metaphysical place. Robot Hell, on the other hand, is
* Bender does this about 20-30 times (becoming the chronologically oldest character in the series in the process by a pretty substantial margin) with no noticeable change in personality, although that might be explained by the fact that he spent most of that time doing nothing in a limestone cavern. Then again, after
* Bender dreams of killing all humans. And occasionally the number 2.
* Bender drugs a bunch of racehorses (and a jockey who caught him) so the only one he hasn't drugged will win and net him a big payoff.
* Bender gets hammered into Fembot shape in one episode, including reworking implied genitals that he has never demonstrated before or since— his
* Bender gloats with "[verb] my [adjective] metal ass!". "Bite" and "shiny" are the most common ones.
* Bender has his moments. In "Xmas Story" all the others are surprised when Bender says he wants to volunteer at a liquor kitchen for homeless robots. It turns out he just wants to pose as a homeless robot to get free booze.
* Bender himself was astonished to find out he could be used as a cannon.
* Bender himself was designed to bend girders to precise tolerances (
* Bender is certainly impolite and a criminal, but whether he's actually evil is ambigous. "Kill all humans" is one of his
* Bender is on the receiving end of this in "Crimes of the Hot", after the crew is

incapacitated by a cloud of toxic chlorine gas:
* Bender is using to grind up a wooly mammoth. She doesn't take it well.
* Bender is watching a cooking show on TV and Leela enters the room, so he quickly turns it off. When Leela asks if that was a cooking show he claims it was porn. Subverted because Bender is not the kind who would be embarrassed to be caught watching porn.
* Bender often refers to humans as "meatbags" as well as various other insults.
* Bender out-does Amy, having hit on, if not slept with, just about every female robot he encounters. Naturally,
* Bender says he assumed Fry was only pretending to love his old dog to mess with Bender's emotions (not a romantic love triangle, but love nonetheless). So, he throws the dog into lava.
* "Bender's Big Score", and the 2308 Nobel Prize, among other things).
* Bender's Big Score as "doomed". The meter uses a unit of measurement known as "millidooms." Apparently, emitting ten times the background level of milidooms is quite alarming.
* "Bender's Big Score", Bender keeps fifty terabytes of robot porn on his hard drive. It's all deleted when the Time Code is erased.
* "Bender's Big Score:" In 2308, a Nobel Peace Prize is given for ending the beef between East Coast & West Coast rappers, but Bender steals it.
* Bender's Big Score. Items seen include the Mona Lisa (incomplete), Tutankhamen's death mask, and what has to be the True Cross.
* Bender's Big Score, it's revealed that the entire universe and time itself runs on zeroes and ones. Even money says it's a series of tubes, too.
* Bender's Big Score Lars and then travels to the future to court Leela.
* Bender's Big Score lives, inaccessible by robots or electrical devices, and what shklee uses to invade the regular universe with via tentacles.
* Bender's Big Score says, "You've got no code, no porn, and you're ugly. Let's dance!" just before evicting our heroes as they've taken all their stuff.
* Bender's Big Score, the Planet Express crew is being attacked by yeti... until Leela runs at them shouting, "Don't mess with me! I just got dumped!" and the yeti run away in terror.
* Bender's Big Score. This happens several times over the course of the film; some clones are mourned more than others.
* Bender's Big Score, which cuts back and forth from the main narrative in the future to a B-story in the twentieth century.
* Bender's Big Score Zapp Brannigan is all too keen on sending Leela's boyfriend Lars on a suicide mission to get him out of the way. Then again, Zapp is ALWAYS sending every single one of his crew members on suicide missions, so this is business as usual even if you discount his interest in banging a freshly grieving Leela.
* Bender seems fond of this. In one memorable example, after Earth is invaded by aliens, this exchange takes place:
* Bender's Game and agrees to their contest for leadership... Tedious Debate! Later Leegola shows up leading the army:
* Bender's Game, and the reader is told to "cut this panel out, then cut the shape out, tape it together, and you have a die! Number it, roll it and go to that page! Unless you've gone stupid, then just read on."
* Bender's Game, Professor Farnsworth proposes an alternative fuel: Nibbler power! Which turns out to be a fair number of Nibblonians motivated to pull a ship by a single chicken hanging from a stick.
* Bender's Game., the most beautiful of centaurs. He merely looked like a centaur version of Hermes with a boob job and blonde hair.
* Bender's Game Zoidberg's head crawls on tentacles once it's been severed from his body. Since that instance took place in Bender's fantasy world it's not certain if the real Zoidberg can do it as well.
* Bender's Gaydar which can receive interference from a gay weather balloon... although, given the various robots and sentient appliances we've seen in the show, this particular instance

* Bender's head spent a thousand years in a New Mexico desert without looking any worse for wear.
* Bender Should Not Be Allowed on Television, does this to her auditioning child actor.
* Benders in general are a bit of an interesting balance. Bending is basically a form of martial arts and generally results in most master benders being in excellent shape. However, being in good shape doesn't automatically translate into actual combat skills, and most Benders are so used to relying on their powers that without them they're basically helpless against someone with actual combat training, or simply someone stronger than them. Certain individuals like Zuko and Azula seem to have significant combat training outside of their bending, but this is by no means the norm. This ends up being a
* Bender's plea to Robot 1-X that he "Save my friends! And Zoidberg!" Over the course of the show, the writers have been trying to develop Zoidberg to have occasional bouts of heroic moments, in which he
* Bender telling Fry "Of all the friends I've had, you're the first."
* Bender tries this a lot. When he gets caught by mall security trying to sneak stuff out under his sweater (also stolen):
* Ben "Dex" Poindexter is also this for Fisk. Since Fisk is on house arrest (for most of the season, at least) and can't directly go after his enemies himself, Dex essentially becomes his personal assassin and enforcer.
* Bend Her, and faking "her" death was seen as necessary to break it off.
* Bend Her in order keep his winnings (after he and the gang hear, "All medalists are required to report for gender testing").
* Bending her entire torso backwards when she's voicing said frustration.
* Bending is so integral that it's even incorporated into major technologies; in
* Bending Styles has to master them all, but they have the most trouble learning the element that is most opposite their personality (which is generally aligned to the element of the nation they were born into, the first element they learn to control).
* Ben Diskin, even changing his Twitter handle to "Haida's Humansona."
* Ben Diskin. He would end up playing the role of Legoshi's best friend, Jack.
* Bend It Like Beckham - all kind, fun-loving girls who play as a team.
* Bend It Like Beckham and allow her to pursue her dream of playing football in America. Jess refuses on the grounds that she won't let her friend live a lie.
* Bend It Like Beckham comes down to a 1-1 tie, broken by Jess's penalty kick with mere seconds left on the clock. And just to add even more drama, she had missed a goal in the same situation earlier in the film.
* Bend It Like Beckham confused many American viewers, who at that point had never heard of David Beckham. And many of those who had at least a vague idea of who he was had no idea what "it" was, or how Beckham bent "it."
* Bend It Like Beckham, covering not only the leads, but their teammates and rivals.
* Bend It Like Beckham is the only Western movie ever shown on North Korean TV, albeit in heavily abridged form.
* Bend It Like Beckham, Jess's friend Tony tries to do this. He doesn't want to tell his parents he's gay, and she wants to go to university in California to take advantage of a football scholarship, so he surprises her by lying to their families that they want to get engaged, on the condition that before they get married Jess should go to university anywhere she wants. Jess chooses instead to tell her parents she wants to go play football.
* Bend It Like Beckham, main character Jess has a huge scar on her right thigh that's visible whenever she's wearing her football shorts. Parminder Nagra accidentally set the right leg of her pants (which were made of polyester) on fire as a child while helping her mother prepare dinner. Her uncle put out the flames and placed her in the bathtub to begin dousing the injury with cold water (which was good), but then made the mistake of taking her pants off (which was bad). Most of the skin of her thigh came with them, resulting in a substantial scar. The film's director Gurinder Chadha decided not to even try and mask it, instead making

it part of Jess's backstory as well, pretty much unchanged except changing the uncle to Jess big sister and main character Pink.
* Bend It Like Beckham, Parminder K Nagra won FIFA's International Football Personality of the Year Presidential Award. She beat out established football players like Luis Figo and Ronaldo, even though she only played a character who becomes a star player. She was even the first woman to receive the award!
* Bend It Like Beckham. She comes to the conclusion that it means the mustard has to be between the sea salt and the balsamic vinegar.
* Bend It Like Beckham shows him playing cricket again with his new son-in-law and Jess' white football coach.
* Bend It Like Beckham stereotype. They ended up tacking on a heterosexual subplot to the film at the last moment.
* Bend It Like Beckham - The team is not a bunch of ragtags. They were one of the best teams in the league and if not the favorite to win that game, they certainly weren't a huge underdog.
* Bend It Like Beckham). They eventually relent once the misunderstanding is explained.
* Bend It Like Beckham, though Jess could already play football well enough to get her a spot on the team.
* Bend It Like Beckham when Jess tells her teammates that her sister has a "love match" as opposed to an arranged marriage.
* Bend It Like Beckham, when Jules is explaining to her mother that she's not a lesbian, she ends it by saying there's nothing wrong with being a lesbian anyways. Her mother, who is in tears and had just thrown a fit over her "discovery", quickly composes herself and adamantly agrees.
* Bend It Like Beckham, when the girls are in Germany and Jessminder has nothing to wear for the party.
* Bend It Like Beckham, when trying to get her daughter Jules to behave more femininely:
* Bend It Like Beckham, which was caused by his father pushing him too hard.
* Bend It Like Beckham, who dreams of becoming a football player against her parents' wishes.
* Bend It Like Beckham with incredible serendipity. Probably the most notable moment is when she starts coming up the stairs towards her daughter's room, where she's speaking with Jess about her relationship with the football team's coach -
* Bendix: In Finland, automobile starter motor. In the US, while it hasn't become generic for starters, the term "Bendix gear" is a generic term for a kind of gear used in them.
* Bendless Love and kiss with sparkles. Set to instrumental version of "Unchained Melody". Then they start dating and have a montage over "Bend Me Shape Me": Bender tries to win her a prize in a carnival booth (he steals the toy and the seller's wallet moments later), they have a row-boat date and they ride a tandem bicycle.
* bend over backwards for me!" Sophia opens her mouth...and Dorothy immediately puts her into a chokehold. "Sometimes I just have to hug my mommy!"
* Ben Drowned: Also known as Haunted Majora's Mask Cartridge story, has 423 popping up in everything related to the story.
* Ben Drowned cartridge, and what happened to the people who interacted with it.
* Ben Drowned curiosity wouldn't have led them to open "The Truth.rtf", thus releasing Ben to the whole of the internet, and things might have gone a bit better for everyone involved.
* Ben Drowned. Greatly fewer have heard of the Moon Children, and hardly anyone outside of Within Hubris has heard of Ryukaki.
* Ben Drowned had this done to him by his insane mother after his ascension.
* Ben Drowned, he finds that his house is for sale. Really, this trope seems to be common in creepypasta about video games.
* Ben Drowned is within a Majora's Mask Nintendo 64 cartridge, though how he originally got inside is relatively unknown.
* Bend Sinister and gives his main character the gift of insanity to make him forget all his pain. The novel ends with Adam Krug, as a result of his insanity,

rushing the dictator and being shot to death. Nabokov, however, refuses to write this conclusion (after implying its inevitability) and instead describes his room and decides to go mothing. It's a strange case of being incapable of giving Krug a happy ending (even the insanity so benevolently bestowed upon him results directly in his being killed), and so at least giving him the consolation prize of not writing it at all, and therefore not allowing it to happen. It's about as esoteric as a 'happy ending' can get.
* Bend Sinister was not meant to satirize the Soviet Union (or any other totalitarian regime), even though it features a country called Padukgrad and a dictator called Paduk.
* bends poison into Korra so that she could enter the Avatar State and they could kill her. It fails, yet Korra is not only physically drained, but thanks to the hallucinations she gets earlier on, she's also wrecked emotionally.
* bends reality. Every military battle he's ever been in has led to the wholesale slaughter of his troops, and yet he himself is never harmed, despite always fighting from the front lines (if nothing else, he is quite brave). As frequently noted, belief is a genuine force in this setting, and Rust is so utterly convinced that he can come to no harm that it becomes true.
* Ben Dunn has a tendency to start up new comics and then abandon them fairly quickly, possibly due to low sales and fans fairly quickly recognizing whatever anime and manga he snagged elements from to make them. (One of the non-starters was an almost ridiculously transparent amalgamation of
* Bendy and the Ink Machine a former coworker of Henry's who has been turned into an inky humanoid with four fingers and the ability to teleport by the time Henry meets him again in Chapter 2.
* Bendy and the Ink Machine, all of which are family-friendly and can be enjoyed without knowing the game's context.
* Bendy and the Ink Machine are former employees of the animation studio. Ink Bendy is the only one who wasn't originally human. Due to having no soul he wandered aimlessly around the building then turned psychotic after being locked away for years.
* Bendy and the Ink Machine Boris manages to appear from nowhere and steal Bendy's gingerbread cookie the exact second he's finished baking it in the oven, without having opened the door first, while Bendy was staring at it.
* Bendy and the Ink Machine by Susie Campbell. Henry's mission in Chapter 4 is to rescue him.
* Bendy and the Ink Machine characters who don't run or hide from "Bendy."
* Bendy and the Ink Machine: Happened for Wally Franks at some point, because a letter on Joey's bulletin board reveals that he has grandchildren.
* Bendy and the Ink Machine has a few: when killed, Henry re-spawns at the nearest Bendy statue; and progress-critical items shine to make them more discernible in the sepia-tone environment.
* Bendy and the Ink Machine himself, it seems there were a lot of idiots working on the theme park. Lacie complains that half of her coworkers don't know the difference between a wrench and a steamroller.
* Bendy and the Ink Machine. In Chapter 3, he's given an axe to demolish Bendy cut-outs, but he can also use it as a weapon against ink creatures. At this time, he may also use it to remove wooden boards to access a door. In Chapter 4, the axe is a weapon again.
* Bendy and the Ink Machine is a hurricane of animation puns and references.
* Bendy and the Ink Machine is revealed to be a gigantic, bloated, deformed head who leaks ink from his eyes and mouth, and has veins all over.
* Bendy and the Ink Machine — and has a lopsided halo visibly growing out the left side of her skull.
* Bendy and the Ink Machine Now, the deranged character will indiscriminately kill anything in the studio.
* Bendy and the Ink Machine. Part of the character's basic design is a mole under her right eye.
* Bendy and the Ink Machine: Sammy is killed by Bendy behind closed doors, but not

out of Henry's earshot.
* Bendy and the Ink Machine's Joey Drew Studios is sepia tone and looks somewhat cartoony. The short parts of the Chapter 5 that take place outside it has a full range of colors and looks more realistic.
* Bendy and the Ink Machine: Some of the cartoons produced for Chapter 3 show characters trolling Bendy.
* Bendy and the Ink Machine. Someone even thought it was appropriate to cross out the "Land" part of the Bendy Land sign and replace it with "Hell."
* Bendy and the Ink Machine that it's unknown whether Henry ever encounters as such:
* Bendy and the Ink Machine, this qualifies as a monster mask. Sammy is also Bendy's so-called prophet.
* Bendy and the Ink Machine, Tom's left forearm has been replaced with the one from Chapter 4's animatronic Bendy.
* Bendy and the Ink Machine Wally Franks is always threatening to quit his janitorial job at Joey Drew Studios, but he stays on as work conditions get progressively worse. The only thing that keeps him motivated to keep the job is the money. Considering that the studio was in business primarily through the Great Depression, it's likely that he's the variety that just needs to make a living.
* Bendy and the Ink Machine, whose real name is Seán... but game creator theMeatly has since revealed that he named the character before taking auditions for the role, and Jack's voice was simply the closest fit for the voice he had in mind.
* Bendy and the Ink Machine you have to play instruments in a certain order.
* Bendy in Nightmare Run has Chester, a living chest; Gaskette, a living taxi; Canoodle, a living soup can; and Dewey, a living ink bottle.
* Bendy in Nightmare Run reveals that he's the one who messed with the bosses in the first place, so....
* Bendy in Nightmare Run: The animation for almost all thrown weapons.
* Bendy, where he is the only enemy that Henry can't kill with the tommy gun in Chapter 3.
* Beneath a Gated Sky this in the first place, allowing them to set up false identities relatively painlessly. When a group of Few enters a new realm intent on settling, they are given a crash course in history and customs by one of those scouts, and relevant paperwork is filed and manipulated.
* Beneath a Steel Sky has this with the brightly coloured LINC-space, and VHS tapes still being used in the future.
* Beneath a Steel Sky initially set in the future Union City run by an evil sentient computer. The world is a film noir dystopian science fiction setting with heavy class divides.
* Beneath a Steel Sky in that he enjoys the company of humans, but frequently mocks their frailties and thoughtlessness. He is also rather versatile, able to be transferred to a different robotic body when his circuit board is placed into it.
* Beneath a Steel Sky is completely dependent on the underground LINC computer, and shutting it down would spell disaster.
* Beneath a Steel Sky, LINC is reachable through an old subway tunnel. There is also a monster lurking about there.
* Beneath a Steel Sky, or waiting until LINC itself grabs him. Rob struggles for a while, then has his mind wiped and replaced with that of LINC.
* Beneath a Steel Sky, Robert Foster has to enter LINC Space via a surgically implanted Schreibmann port in the back of his head, in order to operate the LINC interface, which is essentially a chair with a huge cylindrical visor that drops down to link up with the user.
* Beneath a Steel Sky, seen as evidence of the "evil under the city" once the protagonist descends below ground level. It is even involved in a couple of puzzles.
* Beneath a Steel Sky sees you revisit a Cyberspace environment as a number of different users to gain clues for the "real world" adventure.
* Beneath a Steel Sky: Union City is a sprawling vertical metropolis composed of a

network of spires, whose highest quarters, which house the heavy industry, rise well above the cloud tops. Residential areas are beneath these factories, and the city's ultra-rich are below that as well, on the ground level, which somehow manages to be the most aesthetically pleasing region with plentiful sunlight and greenery.
* Beneath a Steel Sky, with a humorous red sweater underneath. Some of the characters even compliment or poke fun at him about it.
* Beneath his confident and arrogant exterior, Dorian has a lot of issues. He constantly reminds the Inquisitor that their relationship will not be seen well, as he is a mage from
* Beneath Nightmare Castle allows you to find the two halves (spearpoint and shaft) of the Trident of Skarlos, a blue dwarven trident (hence small enough to be held in one hand) which was made to slay undead and sorcerous creatures.
* Beneath Nightmare Castle and if your character's Willpower is to low and you see Xakhaz for the first time, you'll be to terrified to fight back as he advances on you.
* Beneath Nightmare Castle book. Unfortunately, it's broken in two pieces and it's fairly late when you can connect both pieces, so there's not many enemies left to skewer with your new weapon.
* Beneath Nightmare Castle, this time with a dash of Horror thrown in it.
* Beneath Notice: Disguising as someone who would not attract attention usually.
* Beneath Suspicion: An unassuming criminal who is unlikely to be treated as the culprit.
* Beneath Suspicion as a trope, and the filmmakers probably figured this would be a lot harder to hide in a movie than in a book.
* Beneath Suspicion: When the culprit was never suspected because no one thought it could have been them.
* beneath the cabin to find the well, Samara's Psychic Powers. For a split-second, the TV (which isn't even plugged in) has an image of a silhouette peering down into the well.
* Beneath the Clouds: Masako starts out as a rather naive teenager unsure of her place in the world but discovers several surprising things about herself over the course of her journey.
* Beneath the Clouds work together happily and they've travelled together since she could walk.
* Beneath the Earth, and if hostile will attack your dwarves on sight with poisoned spears and blowdarts. They are also one of the types of animal people capable of moving underwater, giving them the ability to swim up your water cisterns and plumbing system and wreak havoc in your fort.
* Beneath the Earth: Large, far-reaching cavern systems extending beneath other settings.
* Beneath the Earth: People living under the crust. Their technology is primitive and they fear the outsiders.
* Beneath the Earth. They settled a number of floating jade citadels to defend themselves from the many horrific denizens of their new home snd eventually evolved into a distinct species. They largely resemble albino humans, and are telepathic.
* Beneath the Earth: Vast and complex underworlds abound in fictional settings.
* Beneath the Mask: A character has a hidden side of their personality.
* Beneath the Mask: A character's true self is very different from how they act in public.
* Beneath the Mask: A person hides their true personality from others.
* Beneath the Mask. (Chaos was overall pretty dangerous while Order was uncaring, making the DCU a Crapsack World.)
* Beneath the Mask. He is rich and charming, and everybody expects her to accept him.
* Beneath the Mask position, all for the sake of protecting his only son's life.
* Beneath the Mask: The way a person acts in public is not the person's real personality.
* Beneath The Massacre had their set cut short by the venue in what wound up being

their last appearance in New York until 2020 due to many incidents of people crowd-killing, hate-moshing, and generally being inordinately violent in the pit towards non-participants. The band tried to get the venue to let them continue, but the venue declined, declared that the night was over, and told everyone who wasn't a member of the band to leave. Patrons who were there that night said that the crowd-killing was so out of control and people were getting so pissed off that the room felt like a powder keg, and it was likely a matter of minutes before the room erupted into an all-out brawl if the venue hadn't stepped in.
* Beneath the Planet of the Apes, although technically they're *mutant* humans.
* Beneath the Planet of the Apes are subterranean humans, but they get unusual psychic abilities and are explicitly the product of nuclear fallout.
* Beneath the Planet of the Apes Charlton Heston was only in it as a favor to the director. He wanted to die in the first reel, but they compromised; he disappeared in the first reel and died in the last reel.
* Beneath the Planet of the Apes, the mutants sing hymns praising their god - a nuclear missile with a cobalt bomb warhead.
* Beneath the Planet of the Apes. They worship an intact, unexploded bomb which they keep enshrined in St. Patrick's Cathedral.
* Beneath the Planet of the Apes which produced multiple scripted endings which some people feel would have been better than the filmed version, if only because of how they're all less dark than the nihilistically hollow filmed ending.
* Beneath the Planet of the Apes worse since the end of the first film. Brent is also the last human to be a protagonist in a film of the original series.
* Beneath the Planet of the Apes worship a hydrogen bomb left over from before the war that killed most of the humans.

* Benedict Cumberbatch deep voice. It only gets distorted further when he plays Smaug, as mentioned further above.
* Benedict Cumberbatch (Doctor Strange) revealed that none of the cast members were allowed to read the entire script so as to avoid them accidentally releasing spoilers like Holland often does. Holland himself was kept in the dark about who his opponent was during a fight scene.
* Benedict Cumberbatch generally has dark brown hair, or sometimes blonde hair, but he's really ginger.
* Benedict Cumberbatch) happily refer to themselves as "Cumberbitches".
* Benedict Cumberbatch is an interesting example. When he's in a specific state of being, many fans tend to use the suffix 'batch' following an adjective. For instance, if he has his natural reddish hair colour, they may refer to him as Gingerbatch. If he is acting in a nerdy/awkward sort of way? He's Dorkybatch. If a fan is referring to a specific body part of Benedict or something else that he owns, fans use the prefix 'cumber'. Examples of this include cumberfeet, cumberjeans, and cumberbum.

* Benedict Cumberbatch) lurk on Tumblr, and he shares what he finds with the rest of the cast.
* Benedict Cumberbatch say that they have to check the dictionary practically every other word while they read/listen to his interviews.

In addition, simply by taking over their bodies, she's allowing them to regenerate their health, which they can't do otherwise. Many of the challenges in the game revolve around keeping people alive, which will require a lot of body surfing during the tough segments.
* Benefit shows in general would fit under this trope. Specifically, not as much the planned "global relief" concerts such as Live Aid or Farm Aid, but the usually smaller shows bands perform to get fast money for something (jailed/sued/evicted/etc friends needing bail/lawyers, the relatives of a late bandmate need money or a show done in memory of a late bandmate, someone sick needing money for medical bills, someone's gear got stolen or trashed, etc...).
* Benefits: Medical? Check. Dental? Check. And the best part is, those benefits apply to not only the soldier, but his family as well. This also applies to college (in the US Military that is), as the military will pay for college both for the soldier, and their family.

* Ben Elton. A drug-addled rock star who became famous through a reality TV show lifts the lid on one of his fellow contestants, who tried to win over the public with a sweet and squeaky-clean image but was secretly a coke-snorting porn queen.
* Ben Elton are found murdered in ways similar to accounts of ways they used to bully their childhood victims. It's zig-zagged, however, in that while some of the bullies kept up being assholes in adulthood, others of them had clearly matured and, even if they didn't exactly regret what they had done, were at least not assholes worthy of death.
* Ben Elton, in which humanity has designed self-contained hermetic domes so that they can survive an ecological disaster that everyone believes is coming any day now. At the end of the book, a false warning is issued, causing everybody to retreat into their domes. The sudden absence of humanity allows the Earth's ecosystem to recover from the damage caused by pollution.

* benevolent Abis Mal. When the villain wishes Genie imprisoned in the bottom of

the ocean, she gives him an escape hatch because Mal didn't say forever. When Mal wished to become the biggest and strongest being in the world, she included a method of relieving him of his power; and when the little girl who finds her wishes for everything to be all right, she turns Abis Mal into a bug as a "freebie". She also went out of her way to encourage the little homeless girl to come up with better wishes; when the girl wished for a sandwich, she convinced her to wish for a lifetime supply of food instead.

* Benevolent Architecture: Architecture and geography seem to be designed for that genre and your character's abilities, because if you wanted 100% realistic driving in a racing game you could play a simulator instead.
* Benevolent Boss: A boss who is nice and reasonable to their employees.
* Benevolent Boss: A boss who is very well-mannered and treats their employees with respect.
* Benevolent Boss, and he is genuinely liked and respected by his employees. By most accounts, the chicken is excellent, too.
* Benevolent Boss at the moment, they have no regard for any kind of life including their own.
* Benevolent Boss. Torva, Pernix, and Virtus, her three best human soldiers in history, were noted to have died as mortals of old age, not in battle, and Nex honored their memory.
* Benevolent Conspiracy attacks, potentially destroying civilisation. Instead they prefer to keep things as low key as possible, using their most trusted agents to quietly deal with anything that might violate the masquerade and using the academies as a means of projecting an image of safety, recruiting new members and as a front for the consipracy.

* Benevolent Conspiracy to protect Maya Fey from the murderous spirit of her cousin, Dahlia Hawthorne, who was in turn following the plans of her mother and Maya's evil aunt Morgan Fey (who was arrested in the previous game).
* Benevolent Genie: A genie who does their best to ensure that their master is safe and gets what they want.
* Benevolent Genie: A genie whose main priority is that their master is safe and is satisfied with the wishes granted.
* Benevolent Genie: A genie who's friendly and will faithfully grant their master's wish.
* Benevolent Genie: Hello, friend. I'm here to grant you wishes, and I will give you what you actually want.
* Benevolent Genie, that wish is for another round of wild sex right after he's exhausted himself.
* Benevolent Genie to get around this). Ultimately, Aladdin tricks Jafar into wishing that Genie make him into a genie himself, with all the limitations that entails — making him much less dangerous than when he was a sorcerer who could use his magic however he wanted.
* benevolent god have implications they come from decidedly less than holy origins.
* Benevolent Monsters who would much rather befriend humans instead of harming them.
* benevolent nobles, save for Doflamingo himself who was always a bad seed due to

the toxic environment he was influenced by. Doflamingo tried to get his title back after killing his father but the other nobles considered his family traitors and refused him. He had to make due as a pirate, practically bribe his way into becoming a Warlord and taking over Dressrosa which his family originally ruled before moving to the "holy land" of Mariejois with the other World Nobles. While he puts on an act of being a benevolent king to the public (which started with him framing the former king to make him look like a bad guy), behind the scenes, Doflamingo uses his kingdom as a front for faux Devil Fruit operation for one of the Four Emperors.
* Benevolent Precursors and many members of it did everything they could to minimize the damage of the apocalypse and preserve their advances for the civilizations to come.
* Benevolent Precursors, as they actively defended Ponyland from any threats that may come up, including defeating Grogar every five hundred years if they couldn't keep him locked up.

* Benevolent Precursors - The shadowy civilization that came before us was actually pretty nice.
* Benezia, Saren's lieutenant and Liara's mother, gets a brief cameo at the beginning, her boss fight... and that's it. However, she does get a little more development if you take Liara into the battle.
* , Ben finds a box of assorted trading cards, playing cards, tarot cards, game pieces, and other assorted game implements in DexLab's halls. Not wanting to further delay a visit with Dexter by bringing it to the lost and found, he brings it with him, and an impromptu game of ad hoc Duel Monsters breaks out between the two boys.
* Ben Fold's Five's "Kate" plays on this trope, to an admittedly exaggerated effect:
* Ben Folds Five. The couple has broken up because they have different ideas about how life works. Includes the line "An arranged marriage is not so good."
* Ben Folds Five with "Brick": Their signature style usually revolves around uptempo, jazz-influenced songs with witty, irreverent lyrics and fuzz bass. "Brick", meanwhile, was a somber ballad about abortion and the destruction of the relationship between the couple involved.
* Ben Folds. Gracie. "There will always be a part of me/no-one else is ever ever gonna see/but Gracie girl/my little girl."
* Ben Folds, however, the lyrics instead mocked suburban banality in language suitable for a family film.
* Ben Folds named the Five's self-titled 1995 debut as his favorite of his albums.
* Ben Folds's "Bitches Ain't Shit" because he didn't appreciate people yelling the title at him while he was out with his kids. He later had the studio version removed from streaming services following the George Floyd protests in 2020.
* Ben Folds - "Smoke", a particularly melancholy example even for the genre comparing unloading your emotional baggage to burning a book, before taking a particular bitter turn towards the end.
* Ben Folds - "Song for the Dumped", which has become an anthem for mishandled breakups.
* Ben Folds, starting low, quiet, and garbled, but each subsequent line is higher, louder, and more clear. The music video version doesn't start bleeping the word "fuck" until the last couple of repeats, so some slightly-garbled-but-unmistakeable uses of "fuck" are left uncensored.
* Ben Franklin has set up his electrical equipment for a demonstration. To Amos it doesn't look like the diagrams, so he "fixes" it, dumping the extra stuff into a chair. A very prominent citizen later gets zapped.
* Bengal involved, Roberts Space Industries had to reduce the number of guns firing by over half, or else the battle in the promo video would have been over in seconds.
* Bengals are a cat breed produced by breeding a domestic cat with an Asian leopard cat, a type of wild cat. These hybrids are bred with other, pure domestic

cats to produce a more manageable (and widely legal) pet. Similarly, the Savannah is a cat breed produced by crossbreeding a serval with a domestic cat. As with the Bengal, the offspring are typically bred with full domestic cats.
* Bengals are roughly equivalent to three to five Siamese in raucousness. The fact that they're literally part wildcat probably helps on this front.

* Ben has some shades of this as well. Although he's capable and authoritative in a professional setting, it's revealed he's easily walked over in his personal life. He struggles to confront April and Andy about issues when rooming with them and a big milestone for him and Leslie is her realizing she can't just steamroll him and his feelings. He even lampshades this.
* Ben, having survived the night, walks out of the house to meet with police... and is immediately shot, of the sort that were legion in the South at the time, so well that it's hard to write an analysis of the film that doesn't at least point out the idea that they killed him on purpose.
* Ben himself could be considered a male, more sci-fi-themed version of this trope, complete with his own transformation sequences.
* Ben himself ends up acting like this in the series premiere — his idea of acting like a DNAlien is to try and make small talk with the others, who don't usually speak English. It's probably a minor miracle that he wasn't discovered.
* Ben himself fits this trope in several of his alien forms that are either
* Ben-Hur (1959): After Quintus Arrius is knocked overboard and dragged to a makeshift raft by Judah, his first act on regaining consciousness is to try to kill himself, believing he'd lost the battle and the Roman fleet. Judah wrestles him into submission and knocks him out, and when they're rescued by a Roman ship, the consul learns that the Romans won. His gratitude is such that he not only keeps Judah close to him as his charioteer, but eventually adopts him as his son.
* Ben-Hur (1959) is a borderline example, using the events of the Gospel as the background for the story of a Judean nobleman-turned-slave.
* Ben-Hur (1959). Messala takes command of the Jerusalem Garrison and has this exchange with the former commander Sextus. "Yes Messala but how do you control what's up here? (points to his head) How do you fight an idea? Especially a new idea." Later, Messala has a response to this trope. "Sextus, you asked how to "fight an idea". Well I'll tell you how... With another idea."
* Ben-Hur (1959). That was the reason for Ben-Hur to participate in the race.
* Ben-Hur (1959). This works with the characters pretty well: Messala comes across as someone trying to rekindle the relationship, while Judah is uncomfortable because he'd prefer to forget it happened and doesn't want to be reminded of it.
* Ben-Hur (1959) when considering what backstory to provide that might justify Messala's sudden and inexplicable betrayal of Ben-Hur settled on the idea that the two were male lovers in their youth but drifted apart and Messala persecuted Ben-Hur because he believes he has been rebuffed. Wyler instructed Vidal to tell actor Stephen Boyd but not Charlton Heston, which is why much later Heston innocently denied this claim and tried to downplay Vidal's contribution to the film.
* Ben-Hur for yelling "Ramming speed!" In this case it's an order to the galley slaves to row very fast for a short burst.
* Ben-Hur, in fact. Whenever his broad shoulders crowd out everything else onscreen, the testosterone factor in the room increases hundredfold!

* Ben-Hur is a galley slave escaping with a bloodied stump where his hand used to be. The director noticed the man had only one hand, had it splashed with fake blood, and reshot the scene with him.
* Ben-Hur's chariot look like the Batmobile modified to serve as Darth Vader's personal tank.
* Ben-Hur, the galley captain tells titular captive Judah Ben-Hur that he won't escape as long as the Roman legion who controls the ship is able to but in case they lose control to outside forces, Ben-Hur, not his Roman captors, will sink with the rest of the slaves, chained to their assigned oars.
* Ben-Hur: The title character is a contemporary of Jesus, and their stories periodically intersect.
* Ben Hur The title character spent a few years on a Roman slave galley.
* Ben Hur, the titular character taunts the man who sold him into slavery with this.
* Ben-Hur. Vidal told Stephen Boyd privately to act as if his character was in love with Ben Hur.)
* Ben-Hur when Ben Hur is treated to dinner by the local sheik. After the sheik lets out a huge burp, he looks to Ben, who gives a blank look back until prompted by nonverbal cues by Balthasar to let out his own (smaller, but still audible) burp.

* Benito Mussolini's brand of it) has been described as an ideology that was whatever the public wanted it to be, as long as it was set to marching music.
* Benito Mussolini was originally a leader in the Italian Socialist movement, but soured on the group as they took an anti-war stance during
* Benito Mussolini, while a capable politician, proved just as militarily incompetent as Hitler and Stalin. If anything, he was more of a hindrance than a help to the Axis, as Germany had to come to Italy's rescue whenever Mussolini fouled things up (which was often).
* Ben. It's true all the time but his family are more or less used to it, so it only really becomes noticeable during his class camping trip. His campfire scary stories and general pranks induce panic attacks, asthma attacks and warning symptoms of mental breakdown (such as whimpering and rocking) in the other children, while his teacher starts smoking again after having to deal with all of this.
* Benjamin and Jake Sisko play holographic baseball with all the greats, like Tris Speaker, Ted Williams, and Buck Bokai, in "If Wishes Were Horses". Bokai's name pops up a few times during the series and it's clear he's one of the most accomplished players in the (now several-hundred-year) history of the sport.
* Benjamin Blümchen & Bibi Blocksberg to a child's political and socialisational development. Truth be told, German censors are slightly on the idiotic side of the scale.
* Benjamin Blümchen worldview where all authorities are automatically evil or incompetent, industry is eponymous with dishonesty and corruption, journalism is always right and PR is all-powerful no matter how exploitative, defaming, or outright libelous it can get, and environmental protection ranks higher than progress, science, prosperity, safety, personal freedom, free speech, the democratic process, or plain common sense, and are practically the only issues that really deserve airtime.
* Benjamin Bratt. Mostly notable for the fact that Roberts' character attempted to seduce Rey Curtis (Bratt), who is married, leading to a venomous and hateful series of betrayals.
* Benjamin Britten's "Serenade" for tenor, horn and strings has an unused movement, a setting of
* Benjamin Britten's "War Requiem" includes a distant boys' choir. The Latin texts the boys sing are entirely innocent, though the context is rarely innocent and at one point directly contradictory. The boys' slow singing of the "Hostias" over a dissonant organ/harmonium chord (up to the final line, "Quam olim Abrahae promisisti et semini ejus"
* Benjamin Clawhauser is a rare adult example. He's used mainly for comic relief and has a personality that is extremely sweet and innocent, cheerful, optimistic, and somewhat immature.
* Benjamin Clementine's song "Cornerstone" is a piano ballad about both death and loneliness. Its chorus even begins with the lyrics "I am lonely".
* Benjamin "Dex" Poindexter makes his introduction in the second episode of season 3 singlehandedly wiping out an Albanian hit squad that ambushes the FBI convoy transporting Fisk to an FBI safehouse. The unit manages to kill five FBI agents and wound several more before Dex kills them all.
* Benjamin "Dex" Poindexter to commit crimes that tarnish Matt Murdock's reputation as well as kill people who pose a threat to Fisk, including Jasper Evans and Nadeem himself.
* Benjamin Disraeli for the sole and explicit purpose of funding his political career (politics didn't pay nearly as well back then as it does now).
* Benjamin Donovan, functioning in the former as a consigliere to Wilson Fisk, and in the latter show is doing the same for Mariah Dillard.
* Benjamin Franklin, and perhaps the most famous one who was never President.

Famously appears on the $100 bill.
* Benjamin Franklin, and spent pretty much the entire time arguing over whether to keep the window open, with Franklin in favor and Adams opposed. Franklin won on a technicality as Adams got bored by Franklin's explanations about how fresh air was good for the body and fell asleep.
* Benjamin Franklin. For one example, some of his (completely false) "Poor Richard's Almanac" stories presented greedy British officers profiting off of Hessian mercenary deaths; predictably, desertions abounded.
* Benjamin Franklin. He's credited with such pithy sayings as "A penny saved is a penny earned.", "Certainty? In this world nothing is certain but death and taxes. ", and "Beer is proof that God loves us and wants us to be happy." He was also the publisher of several newspapers over the years.
* Benjamin Franklin. He wrote lively and entertaining letters for his brother's newspaper -until said brother found out who was contributing them. After moving to Philadelphia, he eventually began helping Thomas Denham as a clerk, bookkeeper, and shopkeeper.
* Benjamin Franklin in the American independence movement, orchestrated it singlehandedly. He was the author of the American Compact, which the independent American colonies (those not loyal to the Crown or the Lord Protector) used to officially unite and form the United States.

* Benjamin Franklin (published in 1737) lists dozens of euphemisms for being drunk.
* Benjamin Franklin's famous "Join or Die" political cartoon instead of Washington's face, and there are also $3 dollar bills.
* Benjamin Franklin's first foray into newspaper writing was done under the pseudonym, and indeed the persona, of the fictional widow "Silence Dogood". In penning his letters as Silence, he wasn't so much hiding his gender as concealing the fact that he was a sixteen-year-old kid.
* Benjamin Franklin, the adopted hometown where he made his name). Each fund was to be invested by giving loans to young craftsmen for a period of 200 years; each city could take 75% of the fund out after 100 years for a public-works project, and the trust would reach maturity and be given over entirely to the city after 200 years. The Boston fund, when opened, was enough to establish a large trade school after the first 100 years; the Philadelphia fund was used to fund scholarships to local high school students at maturity in the 1990s. Please note:
* Benjamin Franklin was known for this. For example, when the British Parliament was discussing the possibility of sending convicts to the Thirteen Colonies in 1751, Franklin published an open letter under the pen name "Americanus" where he suggested sending rattlesnakes to the British isles in exchange, saying the British would get the better end of the deal because unlike convicts, rattlesnakes only hurt people in self-defense and always give warnings before striking.
* Benjamin Franklin was the most famous founding father to never become President, and he's probably more recognizable than the actual early President
* Benjamin Franklin we shall all hang separately." A rather literal use of gallows humor indeed.

* Benjamin January tells the story of a free man of color (also the title of the first book) who investigates crime in the city of New Orleans of the 1830s, between

working as a pianist and a surgeon.
* Benjamin Justice series. Fred, one of Justice's elderly landlords, has virtually no dialogue, beyond the occasional grunt.
* Benjamin Lewis Salomon. When his medical tent was getting swarmed with Japanese soldiers, he drove back the attackers and covered his unit's escape with a machine gun. As he gave his life for his brothers in arms, he managed to take 98 of the enemy with him.
* Benjamin Linus is distrusted by every character on the show for his pathological penchant for this trope. "
* Benjamin Sisko (indirectly) (human father, kind-of wormhole alien mother... it's complicated)
* Benjamin Weaver to get him to explain his odd behavior. Mind you, this is done in a period where almost every crime is punishable by death and he really only escapes prosecution because the judge was involved in a political conspiracy (he was blackmailed into acting unfairly toward the protagonist) and forced to flee the country.
* Benjamin "Yahtzee" Croshaw he explained that he mostly stopped using his given name when he first moved to Australia, and local associates asked what he wanted to be called (Australian nicknaming conventions being what they are); he said that he associated being called 'Ben' with unhappy childhood memories and difficult family relationships, so to him the handle of 'Yahtzee' is associated with creative freedom and greater self-expression.
* Benjen sorta disappears in the first season and throughout the following seasons, his status was kept a mystery. Then come Season 5, his return is used as a ploy for by traitorous members of the Night's Watch in order to murder Jon Snow. However, come the next season, Benjen comes back with a fiery vengeance, albeit as someone who is/might be deceased.
* Benjen Stark has been theorized to be about half of the world's population at this point, due to him mysteriously going missing in the first book.
* Benjen Stark knows this is the best way to kill wights and comes prepared.
* Benjen Stark's horse returned riderless and two of his comrades' corpses are found — reanimated by White Walkers. While he is officially only missing in action, his comrades-in-arms are not optimistic and he is 'presumed dead'. He returns in Season 6, alive and kicking, so to speak.
* Benji: As Benji and the mountain lion cubs settle down for the night in a fallen tree, they hear a scratching sound above them. Suddenly, a raccoon drops down from above them, and an unimpressed Benji merely barks at it until it goes away.
* Benji. Benji is looking after four mountain lion cubs when his master comes into the forest by helicopter, looking for him. Benji is very tempted to run back to his master, but he decides that getting the mountain lion cubs a new mother has to come first for now. So he declines being rescued and only welcomes going back home at the end of the movie, once the cubs are adopted by another mother mountain lion.
* Benji by Sun Kil Moon is full of these, but the one instance that sticks out the most is in "Carissa" when Carissa burned to death after throwing out her trash and there just so happened to be a can full of pressurized gas inside the trash. Unfortunately, that isn't the only time it happens, since it happens again in "Truck Driver."
* Benji — Family series about an adorable floppy eared mixed-eared breed dog. 7 films since 1974. One TV series in 1983.
* Benji movies. In the first film, Benji leads the police to a pair of kidnapped children. He communicates that he knows where the children are by stealing an extra copy of the kidnappers' ransom note from them.
* Benji Off the Leash. Lizard Tongue (a stray dog Benji has befriended) is about to be shot,and freezes in terror, so Benji races over/straight into him and knocks him out the way.
* Benji series of movies is about the titular fictional dog. The eponymous canine character is a small, lovable mixed-breed dog with an uncanny knack for being in the right place at the right time, usually to help someone overcome a problem. In the first movie, the dog helps free kidnapped children. Latter movies have similar

acts of heroism.
* Benji the Hunted when Benji rushes back to shield the cubs from an eagle attack.
* Ben Johnson was a real cowboy and expert horseman prior to getting into acting. After a stint working as a stunt man and horse wrangler on set, he went on to appear in many westerns where his riding skills were often highlighted.
* Ben Jordan: Paranormal Investigator. The first four cases alone take place over the span of late July and early August.
* Benjy's mother, owning to her work as a psychiatrist, has clued in on her child's struggle with his identity, but keeps it to herself. When he's with the other characters, he insists that his mother can be trusted with a secret.
* Benjy was transformed by his superpower into a giant bug monster- 9'8" in its humanoid form, and even bigger when he
* Benkei who stood at Gojō Bridge in Kyoto, disarming passing swordsmen, and reputedly fought 999 samurai, taking their swords, only to be defeated by the 1000th he faced, Minamoto no Yoshitsune. He followed Yoshitsune for two years, eventually dying at another bridge while defending against an army, giving Yoshitsune time to commit seppuku.
* Ben Kennedy/Kirk was born onscreen in December 2001, but appeared to be eight upon returning in 2007, and as of June 2014, he was a Year 10 student (15-16). May have been slightly rectified since, as he was still in high school in 2017. Either way, like the above examples it's still skirting the timeframe of Libby and Drew's relationship.
* Ben kills Jacob, the closest thing to a father Ilana had, so she makes him dig his own grave at gunpoint
* Ben Kingsley generally considered a good one, but Sir Ben clearly enjoying himself is one of the film's few redeeming qualities.
* Ben Kingsley In fact, many people have assumed he's Jewish due to the number he played, though Kingsley corrected them that no, so far as he knows that isn't the case (his mother was born out of wedlock and did not talk about her background, so it's possible but unconfirmed).
* Ben Kingsley: "You're the problem! You're the fuckin' problem you fuckin' Doctor White honkin' jam-rag fucking spunk-bubble! I'm tellin' you, Aitch, you keep lookin' at me I'll put you in the fuckin' ground, promise you!"
* Ben Lee has the song "Apple Candy", where the (male) POV desires a three-person relationship:
* Ben lured Vilgax to the sewers where his dad (Who had recently learned Ben's secret) lit a flammable substance and, after Ben turned into XLR8 and got him and his dad out, Vilgax was left to be caught in the fiery explosion.
* Ben, mid-trial, gets an idea: he and one of his friends will break into the photography offices of Scooter Williams, who takes pictures of every single lynching, and steal the photos and the negatives. Then he will bring the stolen pictures into court as evidence. This ignores several facts:
* Ben Minnotte warns male viewers with girlfriends on the episode "American EXXXtacy (and Other C-Band Nastiness)" not to watch it, before noting that his viewers don't
* Bennet is killed this way. She has a conversation with Dr. Saunders who, as Topher walks into the room, just pulls out a gun and shoots her in the head. Also serves as
* Bennett Cerf, one of the publishers at Random House Books, challenged an author to write a children's book using a vocabulary of 50 words or less. The final count: 49 different words. The author: Theodore Geisel, aka "Dr. Seuss". The book:
* Bennet the Sage appears out of nowhere after his apparent death at the hands of Ask That Guy, much to his surprise.
* Bennett the Sage, although the latter reduced him to screaming at the very end).
* Bennett the Sage are under 18, threatens to call the lawyer's grandmother and the California Bar over the respective matters to force the lawyer to help him.
* Bennett the Sage, Bennett was only twenty years old when the segment was filmed—and there's every indication that he wrote all his own dialogue. Think about that for a moment.

* Bennett the Sage Discussed this in his Anime Abandon Videos. He feels that Anime was at its best in the nineties, but also at its worst, which is where a good backbone of the show comes from.
* Bennett the Sage, has essentially just done the equivalent of the following:
* Bennett the Sage. He starts wondering why the hell it's not working before it kicks in and needs a stomach pump commercial break.
* Bennett the Sage (in which he honestly says it's well-executed, but there's nothing in it that he merits the "second coming of Shonen" that many people label it as) by saying that he expects he'll get flak for what he's going to say.
* Bennett the Sage is his referring to the characters in the anime he reviews almost exclusively by nicknames, usually to sarcastic or scatological effect.
* Bennett the Sage is largely done by Marc the Engineer, who seems to barely tolerate Sage and does his job extremely grudgingly. Outside the show's 'verse, they are genuine friends.
* Bennett the Sage. Later on, however, he moved the show in the direction of analysis and dissection rather than pure criticism, and even talked a bit in some videos about how one eventually hits a creative wall when it comes to just crapping on bad stuff.
* Bennett the Sage lead Sage's co-worker's smile at the end of the video to break down into sobs of humiliated rage.
* Bennett the Sage: Online comedic reviewer of video games, anime and new films.
* Bennett the Sage OVA, it was Bennett's longest review to date, clocking in at over 70 minutes.
* Bennett the Sage's Twitter account, several are referred to in relation to his upcoming review:
* Bennett the Sage takes this to the extreme in the two-year anniversary special
* Bennett the Sage, then to Bennett saying while writing on a paper "obligatory joke quota... done!".
* Bennett White and makes crude jokes about her every now and then just to rile people up.
* Benni has been raised to believe that all adults are pedophiles and Flora and Colin have difficulty convincing him that this isn't true. Flora finds out just how badly Benni has been abused when he mistakenly thinks that Flora and Colin were having sex with Tanya. And later when Colin gives the boys permission to be naked at his house, Benni mistakenly thinks Colin is going to have sex with them and tries to protect Kaleb and Hunter by offering himself to Colin in their place.
* Bennings, Clark, Fuchs, Windows and one of the Norwegians also have beards.
* Benno Ohnesorg in West Germany. Benno's surname, Ohnesorg, roughly translates as "no worries".
* Benny & Joon. All the characters do what they do because they love Joon, and want to help her through her schizophrenia. It’s just sometimes, they do jerky things because they think it’s the best option, like Benny throwing Sam out because he’s worried that Joon will be taken advantage of in an adult relationship, or Sam taking Joon on the bus, not realizing that the stress would send her into a crisis.
* Benny & Joon, among a few more of Chaplin's routines and mannerisms.
* Benny & Joon: A subversion where both people in the romance are loony, and the straight man whose life is turned upside down is Benny, Joon’s brother.
* Benny & Joon characters. Joon is a mentally-ill woman who falls for him as it comes to light that they understand each other in a way other people don't. Her brother Benny, who's taken care of her all these years, is the uptight character wary of her getting involved with someone else, and has to accept that he's not only being overprotective but also neglecting his personal happiness by worrying so much.
* Benny & Joon, Joon and Sam discuss the perverseness of food being forced to advertise its own consumption.
* Benny & Joon offers a recipe including Cap'n Crunch, milk, peanut butter...
* Benny & Joon Sam for the first time, Benny mutters "I need a beer."
* Benny and Stella Dickson, were active at about the same time (the late 1930s).

* Benny Benassi's videos. "Satisfaction", for example, was a mocked-up commercial video of women in bikinis using power tools.
* Benny Benassi, though as it's a house or dance song it's limited to a chorus. There is a "male" and a "female" voice though.
* benny blanco's "Eastside" (a duet with vocals by Khalid and Halsey) has two lovers reflecting on when they were 17 and falling in love and talking about eloping. Unusually for this type of song, they *are* still together, but their lives have gotten more complicated since those carefree days.
* Benny Goodman, the King of Swing. Some claim he was responsible for touching off the Swing era, and he was almost certainly one of the biggest players in bringing Jazz into the mainstream with his '38 Carnegie Hall concert. It probably doesn't hurt that his ensembles have included- and in many, if not most, cases given a start to- Lionel Hampton, Gene Krupa, Harry James, Teddy Wilson, and even Billie Holiday.
* Benny Haha uses cameras to spy on the cards in Shobu's hand and predict his moves. Shobu figures it out and manages to confuse him and get an advantage, then Mimi destroys the cameras. When Shobu is about to win, Benny claims that his sister is sick and that he needs to remain undefeated so that he can pay for her treatments, but Mimi tells Shobu he is lying and he finishes him off.
* Benny Hill has him thanking a host via telephone for a lovely stay at their house, and compliments them on the loveliness of a bathroom decorated in pink, with a gold toilet. "You don't have a pink bathroom?...You do have a pink spare room where you keep your euphonium." A euphonium is a brass instrument that looks like a tuba, but smaller.
* Benny Hill, Hill was got on well with everyone, but didn't socialise.
* Benny Hill in a skit where a brother and sister team claim to have climbed the highest mountain ridge in the world.
* Benny Hill once did a Country & Western song parody that included the immortal lyric "The wedding wasn't legal, the shotgun wasn't loaded."
* Benny Hill's character is carrying his new bride into their new home when he has to stop so the bride can carry on a long conversation with a neighbor.
* Benny Hill Show is someone taking out a bottle of liquid medicine, pouring themselves a spoonfull, then drinking what's left in the bottle and pouring the spoonful back in when they're done.
* Benny Hill Show sketch of this trope where the girls are being chased by some monster, only for that monster and the girls to be fleeing from another bigger monster, and so on for about five different monsters.
* Benny Hill sketch, he was a WWI army guy who got captured by the Germans. He starts to do the regular (for him) British salute, then realizes who he's dealing with and gives a German salute — which seems to have been hand on top of the head. The German officer salutes back and stabs himself on his spiked helmet.
* Benny Hill this way, though reportedly he saw it more as childish playfulness than randy cheekery.
* Benny Hill used the joke version (see Jokes above) in his song "Anna Marie".
* Benny is revealed to have a toupee during the car chase towards the end.
* Benny Lewis can speak English, Spanish, French, Portuguese, Italian, German, Esperanto, Mandarin Chinese, Irish, Dutch, and American Sign Language. He runs a website called

* Benny's character marries a girl who gains a lot of weight as soon as they get past the ceremony, and he can barely carry her over the threshold afterward.
* Ben often baffles other aliens with his strange, compassionate human ways in the
* Benoit Brisefer album "Eglantine's secret": Benoit meets a girl with powers similar to him and has issues with his friends on a holliday camp. This counts as a Breather Episode and Oddball in the Series.
* Benoit Brisefer is a young, incredibly well-behaved and polite kid with super strength.

* Benoit Brisefer, it's revealed that "Lady d'Olphine" is Madame Adolphine II, a robot created by Vladlavodka based on the real Madame Adolphine.
* Benoit Brisefer punches his way through a boulder to escape a collapsed mine.
* Benoit Brisefer: Since the titular character is superhumanly strong, it inevitably happens to a lot of bad guys.
* Ben Orum told an interviewer about how his opinion of Malevolent Creation (which he was a big fan of) was ruined by his first encounter with Phil Fasciana, who responded to Orum's starstruck greeting by asking him if he had any cocaine, then proceeding to verbally abuse Orum and call All Shall Perish a "nigger band" when Orum told him that he didn't have any.
* Be Not Afraid by Cecilia Galante is set in Connecticut. It's revealed the protagonist, Marin, moved there from Maine after her Mother's suicide.
* BenQ P31 running off UIQ, a departure from the Series 60 UI Nokia used on their smartphones from the decade. Similarly, a number of Pantech-manufactured CDMA phones were sold by Verizon as Nokia models despite sharing next to no underpinnings as the Eurasian GSM offerings.
* Ben Raines of the Ashes series characters simply because he is as risk-averse as a cuddly soccer mom. A cuddly soccer mom with nuclear arms, miles of artillery shells, and a fetish for napalm and fuel bombs. Small wonder anybody with any semblance of religious leaning considers him the Antichrist. (A lot of it scarily justified through 'sins of the father/brother/sister/mother' arguments.)
* Ben reconciles with his mother, reconnects with his father (who is out of jail and turning over a new leaf) and meets cute
* Benrey flat out admits to not being human in the first episode, and he can come back from the dead and in fact does so repeatedly, on his passport his name reappears and extends into the air, and the Skeleton that follows the party is heavily implied to be the same as him.
* Ben Safford Mysteries, Dr. Costello is quick to go crawling to the government for an immunity deal once it becomes clear that he's in real danger of losing his medical insurance if he loses an impending malpractice suit. He spends several days smugly spilling his guts about the countless acts of corruption he's involved with. By the time he wraps up, Ben and his colleagues loathe Costello with a passion.
* Ben Safford Mysteries features several corrupt, arrogant, greedy doctors who have been getting away with scamming Medicaid. They spend most of the book on the verge of panic due to documents about their crimes being leaked to people who sue them, putting their medical insurance (and their ability to operate professionally) in jeopardy.
* Ben's alien form Rath takes the cake. Basically, he's a tiger standing on two legs who looks like he took trash talk lessons from Randy Savage or Hulk Hogan, and
* Ben's fight with the Knights of Ren has some pretty bad fight choreography. At one point his blaster simply disappears between edits (similar to the disappearing Praetorian knife in
* Ben's first encounter with Vilgax had the alien warlord effortlessly shrugging off Ben's attacks. When Diamondhead breaks his fists (Literally) punching Vilgax...
* Ben Shapiro, an American conservative political commentator, is infamous for this.
* Ben Shapiro (and his family) use these to obliterate their debate opponents.
* Ben Shapiro: "And the idea, and the idea..." This tic idea is expanded in "Thanksgiving With Ben Shapiro", where almost everyone in Ben's family ends their sentences with "folks". Even Ben's infant son does this.
* Ben Shapiro is semi-notorious for his bizarrely literal interpretations of song lyrics, such as an infamous video where he criticizes "Imagine" by
* Ben's imposing figure and more imposing reputation has gained him the nickname Big Ben.
* Ben Sisko emerges from the wormhole, having been released by the Prophets from his obligations as the Emissary. Sounds like he gets that happy ending with

* Ben Sisko solves all problems by punching them, even when said problems can't really be solved that way.

* Ben Sliney's first day as the FAA's National Operation Manager (basically the Air Traffic Controller-in-chief) was September 11, 2001. It was his call to ground every civilian aircraft in America for four days (over 4,200). He
* Ben's nemesis Kevin 11 started out with a similar ability, which he used to copy Ben's powers. After getting Ben's powers, his original ability was never seen again (except in an "alternate future" episode where he had used his ability absorption to steal traits of thousands of aliens, basically becoming a cross between
* Ben Snow: In "Frontier Street", the murderer gives himself away when he says how many times the victim had been struck over the head: something he would not have been able to tell just from looking at the body.
* Ben Snow: In "Ghost Town", Ben is captured by a gang of train robbers who are using the eponymous ghost town as hideout. Then, while Ben is tied up, someone starts picking off members of the gang one by one...
* Ben Snow mysteries set around the turn of the 20th century. These tales are carefully researched historical pieces, sometimes including real historical characters such as Butch Cassidy.
* Ben Snow story "The Headless Horseman of Buffalo Creek", Ben investigates a local legend of a headless horseman and uncovers a brutal murder.
* Ben Solo/Kylo Ren hates his father Han, and while his relationship with Leia is sort of better, its not by much. This mostly stems from
* Ben Solo's social media hashtag turning into a full-blown fan campaign.
* Benson, a logging truck from the family lumber mill once got stuck under a railroad trestle. Nobody could figure out how to get the truck unstuck until one lumber mill employee suggested letting the air out of the tires. It worked.
* Benson & Hedges pulled its funding for the Symphony of Fire and the Toronto International Film Festival in 2000 when new advertising regulations came into effect. The subtext was that they were only funding them to get their logo displayed, not to support culture.
* Benson, a person with a habit of sucking on the earpiece of his reading glasses was killed by poison placed on the earpiece.
* Benson: At least once a season, Robert Guillaume would have the opportunity to show off his singing chops.
* Benson cuts off just before the results of the climactic governor's election are announced. The makers had actually shot three different endings: one where Benson wins, one where Gatling wins, and one where the third candidate wins. However, test audiences didn't like any of them, so the show ends before the result is announced.
* Benson episode has one of these. (Bomb squad technician: "Is it 'White you're right, red you're dead', or...?")
* Benson episode where Benson and Krauss are the only two humans left on Earth.* The "Leap of Faith" episode of
* Benson episode where Governor Gatling runs for reelection, it first appears that he loses. One of his opponents who also lost asks for a recount. While the the staff is pondering what they're going to do next, Kraus runs in to tell Gatling something. Before she can get it out, Katie runs in and excitedly tells them that the recount actually showed that Gatling won much to Kraus's dismay.
* Benson has an episode where a "duel" is fought where Benson decides he and Clayton would "play the dozens" to settle it. Meaning a topic is given and they have to make insults at their opponent while hoping the opponent runs out of time to reply. The last round has Clayton "punch-drunk" while Benson shows his mastery.
* Benson is often frustrated with the laziness and incompetence of Mordecai and Rigby.
* Benson just fired Rigby when he overhears him slacking off, he justified that Rigby never finishes his work, Rigby defends himself by saying he always finishes his work. Then cuts a few scenes showing Rigby slacking off in his job.
* Benson, listening devices are found in several rooms of the Governor's mansion. Benson goes the extra mile with this trope and has the staff recite a scripted scene for the eavesdropper.
* Benson once had the title character in a helicopter crash along with Clayton (the pilot), the Governor, and a friend. This trope was used and lampshaded.

* Benson Pete sees a bowl of food on the kitchen table and eats it, not knowing that it is cat food for Katie's new kitten.
* Benson serves as an in-universe example of this in the episode "Format Wars II", when he is revealed to be the fifth Disc-Master alongside Mordecai, Rigby, Hi Five Ghost, and Muscle Man.
* Benson shows his new surveillance system to Pops, who exclaims, "What a marvelous device!" He was referring to the
* Benson the Governor, Benson and the rest of the staff were in an underground bunker participating in a war game involving a nuclear attack. As they got 'news' that a city had been bombed, they put a little mushroom cloud on that city.
* Benson the main weapon in a duel between him and Clayton. Clayton wins two rounds, Benson the other thirteen.
* Benson. The titular character is covering for the president of a fictional country(who happens to be in the hospital recovering from a poisoning attempt that morning.) A government official who thinks he's addressing the actual President tells Benson what he thinks is the saying for "Thank you very much." Benson, not knowing a lick of the real thing, makes it up on the spot that the way the guy just phrased it, "It was an insult to my mother."
* Benson Troy's father then pops up with a large bouquet of roses, indicating that Troy was about to P.R.A.H.M-pose himself.
* Benson uses this trope again in "The Face," in which a woman dreams all her life of a frightening man who promises he will one day come for her. At an exhibit of Van Dyck paintings, she finds the man's portrait...
* Benson was the only black character in the show for the first three seasons and he was the butler. He was never used to put across any racial message, and if anything he was the
* Ben's parents can't be bothered to spend time with him. When her mother is introduced, she's keen to leave him to go to various frivolous "workshops."
* Ben's solo single "Rockin' The Suburbs" is a slickly produced pop-rock song that pokes fun at slickly produced pop-rock songs.
* Ben Stein's schtick, as a spokesman for Clear Eyes eyedrops, was always him giving a flat, disinterested "Wow." after demonstrating the power of Clear Eyes.
* Ben Stiller. A few actors were getting cast in war movies and compare it to boot camp, prompting Stiller to wonder what would really happen if actors were in a warzone.
* Ben Stiller himself during a commercial for Chill Energy Drink, yelling in overdubbed Japanese about how fresh it is.
* Ben Stiller; look at every role he's played dating back to his own show, both as host and in every one of his skits.
* Ben Stiller's character feels this way about Owen Wilson's character, his fiance's ex-boyfriend, in
* Ben Stiller thought it was funny (maybe the funniest scene in the movie) it did nothing to advance the plot so it had to go.
* Ben Stiller was originally considered for Brian Fantana. He makes a cameo as Arturo Mendes.
* Ben Stiller, whose distant 19th-century ancestor was an Irish stage actor also named Tyrone Power.
* Ben's transformations He even manages to take over Vilgax's homeworld... for one episode, anyway, but damn if that wasn't impressive.
* Ben takes a temporary job in D.C., leaving Leslie behind in Pawnee. In addition, he takes April with him as his intern, so she spends several months apart from her husband Andy. Leslie and Andy send the pair a care package: Leslie sends Ben twenty boxes, and Andy sends April his laundry.
* Bent, a movie about gay Jews in a concentration camp falling in love.
* Bent do, however, is have incredibly emotional and vivid verbal sex.
* Ben Tennyson; his only interest is in preventing casualties or loss of innocent lives, including the other Masters. As such, he will team up with anybody just to protect other Masters, but will just as easily turn against them if they cross that line. Rin even refers to Ben as such.

* Ben Tennyson would be the second boy Ami Mizuno, Sailor Mercury, would show any interest in.
* Bent (gay main characters, homophobia, gay supporting characters, queer male romance)
* Bent gets killed by the guards. But he manages to scratch their face, horrifying them.
* Bentham, better known as Mr. 2 Bon Kurei, has fallen under this trope twice, both times as a
* Benthelooney. From the original dubs to the first half of the "Revival Era", he was fairly consistent for the most part with his opinions and stuck with them. But in the middle of 2012 to this day, he started retconning his original opinions on subjects that were mostly well-established later on (Pixar, and even Adventure Time and Regular Show).
* Benthelooney pretty much disowns every video that he has made during the first season of his Rant series. Before he started using a script, and also disowns a fair amount of his pre-cancellation rants.
* Benthelooney's rant series, Ben had an army of commentators and haters against him but despite that managed to have a cult fanbase and wasn't as well known on YouTube. When the rants returned, and Ben became more popular to the point of having more subscribers and fans (a lot of them are ironically former haters), his older fans for the most part have abandoned his videos and have long unsubscribed to him for the sake of this very trope.
* Benthelooney. To begin with before the uncanceled seasons, Ben was a straightforward ranter that exaggerated how angry he was and added an occasional joke, but still focused on the subject of his rants. In the Uncanceled seasons, Ben took a Denser and Wackier approach which was a trait flanderized in the second run of Ben Rants to the point of where by 2013, his whole rants started to follow this formula and Ben creating two spin-off videos of his other characters.
* Benthelooney, which had a massive hate bandwagon before, worsened once Ben became popular.
* Ben There, Dan That!, when Ben remarks that he doesn't need to worry about disposing of anyone's corpse, since he's in a parallel dimension, and thus none of his actions have any meaning beyond their contribution to the accomplishment of his goals.
* Bentina Beakley and Emily Quackfaster have also become this in the

* Bentley in many parts of the series explains what the mission is and what to do on the mission to the team (and the player) .
* Bentley is remarkably angst-free about being stuck in a wheelchair for the rest of his life, and though he does show one instance of insecurity about it, it seems he is sufficiently confident in his abilities as
* Bentley Little. Eventually the whole place goes cockeyed, the villains seemingly defeated but...a small farmer's market several hundred miles away terrifies a traveling couple.
* Bentley Little." The Store sets up shop in small towns, buys the local government and puts small business owners out of business, like a relatively normal company might. But then it also does things like buy up the town's utilities so it can spy on people's phone calls and e-mails, murder small business owners, , force employees to go out and beat the homeless, stock child pornography and other bizarre, illegal products, whore out female employees, sic zombies on people, trick a man into having sex with his own daughter and send his wife the videotape of it, etc. This is, however, partly done as jet-black satire.
* Bent, Max is willing to do whatever the guards ask of him if it means he'll have a chance of getting out of the Nazi concentration camp sooner.
* Ben-To awe-inpsiring but actually have dumb origins (Ice Witch, Beauty by the Lake), and some are just dumb (Pervert).
* Ben-To, but her features soften considerably when she offers up a sincere,

heartfelt smile.
* Ben-To despite the fact that she never participates in any of the battles.
* Benton and Elizabeth attempt to hide their relationship initially, not wanting their personal lives gossiped about but it fails when Benton blurts it out to Romano, suspecting (likely correctly) that he's penalizing Elizabeth for rebuffing his advances.
* Benton and Jeanie have a secret relationship, as revealed at the end of the second-season premiere. It's a well-done

* Ben Urich doesn't work for the Daily Bugle, as Sony had not yet made the deal to bring Spider-Man into the MCU when the show was in production. This also necessitated the creation of a new editor-in-chief named Mitchell Ellison, who functionally served as a replacement for J. Jonah Jameson.
* Ben Urich ends up the victim of this in the penultimate episode of season 1 as he comes home after being fired from the
* Ben Urich is typically portrayed as white in the comics. The show has him portrayed by African-American Vondie Curtis-Hall, but his race doesn't do much to affect his role aside from the casting of his wife.
* Benvolio is the more sombre Pedrolino (but he's a cousin of Romeo's, so unlike most of the other classical Pedrolinos, he's a not a servant, but a fellow aristocrat and a friend of Romeo's).
* Ben wants Lee to let him go because of all the trouble he caused. If Lee chooses to let him go, Ben will drop down the tower and break his legs while nearby walkers will devour him alive.
* Ben was this to Emily. She was never attracted to him, but continues to go out with him (and lets him tell everyone they're having sex, though they aren't), to give her straight bravado credibility.
* Ben (well over 1000 years old, appears to be about seventy) and Jenny (probably about nine-ish) in
* Ben Whishaw and Jim Broadbent play Robert Frobisher and Vyvyan Ayrs, with the former flirting with the latter and the latter rejecting it. Although they don't meet in the next lifetime, they do in the one after, as
* Ben Whishaw since he has an 18-month-old niece, and his initial apprehension was due to previous bad experiences doing voice-over work. Once he started working he quite enjoyed himself.
* Ben X is romance in an MMORPG. The main couple meet in RL only in the last scene.

* Ben 'Yahtzee' Croshaw - but a large portion of his fandom seems to have missed that bit.
* Ben "Yahtzee" Croshaw creators being Dutch. Yahtzee attempted to dismiss people calling him on this by claiming that Americans were the game's target audience.
* Ben 'Yahtzee' Croshaw Made him laugh so hard he started to leaked tears.
* Ben "Yahtzee" Croshaw's, features a parser system like the text games of yore, with the interface representing Trilby's descriptions of the events of the game, as the game itself is a flashback occurring as he produces a record for the paranormal investigations agency he now works for. At some of the freakier points of the game (and sometimes just at random), an attempt to perform an action will just result in his notebook reading "it hurts it hurts it hurts it hurts." This is all happening while he's phasing back and forth between a Welsh hotel and a rotting alternate-universe counterpart, which has a certain number, vague warnings, symbols, and odd notes (such as two doorways being labeled "man" and "not man") written in blood everywhere. The implication is that Trilby's notes are peppered with mad ravings in

between the facts...
* Benzaie and Suede are also reduced to off-site cameos, probably because they live outside the US and couldn't make the shoot that year.
* Benzaie has made cross-dressing a running joke on his show for sketches about his more girly interests.
* Benzaie was similarly dropped in December 2014, though he found out when none of his videos were moved from the old TGWTG site to the new Channel Awesome site.
* Benzite names are two syllables and harsh-sounding (e.g. Meldok, Veldon, Linzner, Salmak, Cardok, Melnis).

* Be obsessed with sports, especially football, soccer, hockey, or any other high-impact contact sport. May also be similarly obsessed with cars and/or trucks, but only as far as how fast they can go, how much they can pull, or how deep/loud the engine growls.
* Beochan: Paisean Agus Aiféala absolutely love fashion, with Barb loving the jewelry and Tricia usually wearing the frilly stuff.
* Be oversensitive and emotional, sometimes to the point of being needy.
* Beowulf (1999) starring Christopher Lambert, Grendel's Mother transforms into a spider hybrid to fight Beowulf.
* Beowulf (2007) and viciously insults tales of heroism like Beowulf as lies.
* Beowulf (2007) a woman screams while Grendel slaughters everyone in the hall. Unlike most instances of this trope, however, the screams actually hurt Grendel.
* Beowulf (2007). Grendel, his mother, and the dragon are still real and supernatural, however.
* Beowulf (2007), Grendel is a hideous deformed troll of a man who haunts the land of Herot, committing brutal violence against merry-makers and revellers. When Beowulf comes to Herot to fight Grendel, the former almost immediately turns the tide on Grendel and gains the advantage while completely naked and unarmed. Scared shitless, Grendel can only shrink in size and try to escape, only for Beowulf to trap him in a large doorway and slam the door on his arm. Repeatedly. Until his arm pops off.
* Beowulf (2007) kills the dragon by stabbing the small part of its chest to where its heart should be, and he crushes it.
* Beowulf (2007) takes on a much taller, hideous Grendel with: No sword, No shield, No armor, no clothes of any kind. And wins. And proceeds to dismember his arm using a massive door from a Viking mead hall.
* Beowulf (2007): The dragon seen is similar to a wyvern, with two hind legs and two bat-like wings for forearms. He also has fins on his tail to help with swimming, and he may be fully amphibious.
* Beowulf (2007). We see Wealthow's reaction as Grendel's shadow appears to be tearing a man in half. Then we see the real thing, and yes, he's definitely tearing a man in half.
* Beowulf about a feud between Jutes and Frisians, Beowulf himself predicts that peace between Danes and Heathobards will not be lasting because of this, and a subplot revolves around the traditional enmity of Geats and Swedes.
* Beowulf also includes a scene in which the character donning his armor is described as an almost religious ritual.
* Beowulf, and tears them apart with his bare hands. It's not really to get to anyone in particular, though; he's mostly just complaining about the noise coming from his neighbors.
* Beowulf as an old king rides out against a dragon, even knowing he can't survive, simply from a desire to die fighting. There's a bit of logic here: according to Norse beliefs, if you died of old age, you'd be denied entrance to Valhalla, in which only heroes who die in battle are welcome.
* Beowulf Beowulf as a king in a different country. In the film, once Beowulf claims to have killed her, Hrothgar gives him his throne and commits suicide out of the shame for being a fraud who fathered Grendel in the first place.

* Beowulf: Beowulf boasts that he'll defeat Grendel because Grendel is a monster and knows nothing about fighting, only having his savage strength to draw on. Beowulf, who is similarly strong, proceeds to defeat Grendel with his wrestling skills.
* Beowulf does it with "He ruled well / for fifty winters" and manages to have more years pass than letters are used to describe the passage of time.
* Beowulf film, after listening to the Queen perform a song, Beowulf begins casually stripping naked in front of her. When questioned about it, he tells her that because Grendel is naked he will fight him naked. Her reaction is priceless. He then goes on to battle Grendel naked as the day he was born.
* Beowulf, Grendel has no problem killing humans because the sound of their parties causes him intense pain.
* Beowulf has a secret underground passage into the dragon's lair; a thief uses it to steal a goblet from the dragon's hoard while the dragon is sleeping, causing the dragon to go on a rampage when it figures out that it's missing.
* Beowulf, he is depicted as a misshapen humanoid that is tall and lean and parts of him are inside out.
* Beowulf. He sneaks into the feasthall at night and eats people in their sleep. Because he lives in the swamp and hates music and dancing, he's associated with darkness, the primal, and the subhuman, making him a classic boogeyman.
* Beowulf "I'm here to kill your monster." Grendel does some of the same, only he says things like "Auaghghh! Auughaghhhh"
* Beowulf in Sigma Draconis is a Science World, noted for being the galaxy wide leader in (ethical) biomedical and genetic research. Given recent developments in the series, it may also become Strategic as well since it also hosts the one end of the Manticore Wormhole.
* Beowulf) in which he is the antihero of the story. Grendel's mother and the dragon, neither even having a name, are not nearly as well remembered.
* Beowulf is a Monster Progenitor by implication, as both Grendel and his mother are said to be his descendants, alongside all giants, trolls and elves.
* Beowulf is driven to his rampage not only by his hunger, but also by an apparent case of extreme misophonia triggered by the noise of revelry at Hrothgar's mead hall. His numerous deformities also appear to leave him in almost constant pain.
* Beowulf legend mentions an even earlier use of this strategy. The battle on the ice of lake Vänern happened in winter between Swedish and Danish Vikings.
* Beowulf—but by the time the dragon comes around, he's an old man and prudently equips himself with chain mail and a shield.
* Beowulf referring to bears that literally means "bee-wolf" (y'know, because they like honey).
* Beowulf's military, on the other hand, has no such rules, in keeping with their
* Beowulf, the Dragon reveals to Beowulf that he is actually the hero's long-lost son from his deal-with-the-devil dalliance with Grendel's Mother.
* Beowulf. The eponymous hero takes on the demon Grendel, Grendel's mother, and eventually a dragon; not in self-defense but because he wants to.
* Beowulf: The monster Grendel is described as having glowing red eyes: "on fagne flor feond treddode,/eode yrremod; him of eagum stod/ligge gelicost leoht unfæger" ("Across the decorated floor the fiend trod, went enraged in mind; there stood in his eyes a foul light most like to flame").
* Beowulf, the mortally wounded Grendel returns to his mother to die. Grendel's mother then takes up the vendetta against Beowulf.
* Beowulf. There's a lot of build-up to his use of Hrunting (any sword with a name is important). And then when he uses it against Grendel's mother it fails. He has to use a sword found in the home of Grendel's mother to defeat her. Being forged by giants makes it a cool sword in its own right, but again, Grendel's mother's blood melts the sword.
* Beowulf, there's a passing-of-the-torch moment between the title character and the young warrior Wiglaf after they kill a dragon together, and Beowulf lies dying of his wounds. It's implied that Wiglaf would go on his own grand adventures, but if anyone ever chronicled them, that poem has been lost.

* Beowulf, the titular character receives the Naegling after the destruction of his Hrunting in his battle against Grendel's mother.
* Beowulf: the titular hero's first enemy is Grendel, a monster that attacks each night before slinking away come morning.
* Beowulf, translated as "bee-hunter", is an Old English kenning for bear.
* Beowulf, Unferth does this because he's drunk and unimpressed by Beowulf's boasting and doesn't know any better. Beowulf finds it difficult to argue with a drunk.
* Beowulf who has similar ... ummm ... exactly the same hoarding-and-killing tendencies.
* Beowulf wielded a giant sword when he fought Grendel's mom. Justified in that it was in fact made by giants.
* Beowulf would be a tough sell, simply because of its one-dimensional character development and basic plot (though understandable, given its epic poem status). Even with the major alterations, the core story didn't change entirely. The plot liberties were only created to suit the new theme (i.e., making the title protagonist a more ambiguous hero), while respecting existing ones (like warriors seeking to create legacies through their heroic actions). The liberties are taken mostly in the parts where the storytellers would have nothing to go on except Beowulf's word. Further consider that the written piece is mostly Christian propaganda meant to convert "barbarians" and you're in a situation where you really can't take anything as the honest truth anyway. Ripping the Christian values out would likely be rendering the story more accurate to the original versions. Note that Beowulf being humbled at all for his "slaughter everything in my way and achieve glory!" is a Christian theme, in most ancient myths he'd be treated as a hero so long as he showed proper deference to the gods.

* Be Prepared: After two miserable weeks at OPPA, Vera is very much looking forward to going home. However, her mother informs her that she got the job she'd been studying for, and it will require her to be out of town for a few days. Since she can't afford a babysitter, Vera and Phillip will be staying at camp for another two weeks.

* Be Prepared: When Vera gets to summer camp, she has difficulty making friends at first. She manages to gain some when she shows off her artistic skills. However, one of the counselors, Natasha, tells her that real friends aren't the ones you buy with things like that. True to Natasha's word, when Vera accidentally exposes her candy stash in her tent, which gets it confiscated, all her "friends" turn their backs on her and start bullying her mercilessly.
* be prosecuted as perjury. The prescribed remedy, instead, is more adroit and specific followup questions by the examining lawyer. In their defense, the Court was somewhat dubious of sustaining a perjury prosecution on the basis of a possible misunderstanding. To provide further context, Bronston's testimony was only technically incomplete, but on its face only answered a specific part of the question, and the lawyer in question failed to ask an obvious followup question.

* Bequeathed from Pale Estates has Renly Baratheon give a silver stag to his niece Shireen every time he swears near her.
* Bequeathed from Pale Estates: Ned Stark blames the near downfall of the Starks two decades ago on his father's southron ambitions, which still have an effect on them even long after his death. It's for this reason that he's reluctant to play along with his goodfather's penchant for matchmaking and scheming. Seeing as said ambitions led to the deaths of his older brother Brandon, his sister Lyanna, and Rickard himself, and saw Benjen go to the Wall when it was all over, he may have a point.
* Bequeathed from Pale Estates, though he shows this before he ever meets Jon or anyone so supporting. When a plague sweeps through Westeros and Essos and the inoculation method was derided by the Faith to a point Randyll wouldn't hear of it (to a point of beating the boy when he insisted on it), Samwell ran off with his two younger sisters to Dorne to get them innoculated. Even Randyll has to respect this, as it saved the three of them while his wife, eldest daughter, and preferred son Dickon died of he plague, even if he still despises everything else about his bookish, plump son.

Then you put on the blanket and get it used to that. Then the saddle. Then the bridle. Then you get on. After he realizes this is going on, Perrin resorts to shouting at her whenever she comes into view, which causes more problems.
* Berem, the "Everman", has a green stone embedded in his chest granting immortality. He tried to steal it from the Foundation Stone.
* Beren and Luthien are a subversion: Beren is a lord among mortal man, Luthien is the half-elven, half-maia (angelic being), princess of Doriath, daughter of Thingol and Melian. Upon first meeting Thingol, Beren swore that "Neither rock, nor steel, nor the fires of Morgoth, nor all the powers of the Elf-kingdoms" can keep him away from Luthien, which Thingol immediately turned into an
* Berenstain Bears. At one point their map tells them to take a long and winding mountain path around a deadly culvert, while their leader insists on taking the shortcut right over said culvert (ignoring the blank spot on the map). He takes the shortcut and promptly falls into the culvert because the bridge was out.

* Berenstain Bears averts this in the 80s series, but the 2000s revival plays it straight.
* Berenstain Bears book "The Bad Dream", Sister goes to see a movie called "The Magic Toeshoes". It's about a girl who has trouble with ballet dancing, and is given "magic" ballet slippers by her ballet teacher, which improve her dancing. On the night of the big ballet, she accidentally leaves her slippers on the bus. Her teacher tells her that the slippers were just ordinary shoes, and that the skill was in her all along, so she performs the ballet successfully without the "magic" slippers.
* Berenstain Bears' Camping Adventure: Downplayed, as the Bears can jump out of it easily. Still, it is an obstacle, and they have to use a conveniently placed Beach Ball or log to cross it.
* Berenstain Bears series of books, have both passed away since the book series' creation, Stan in 2005 and Jan in 2012. They'd handed the series over to their son, Mike in 2002, and after his father's death, he'd written multiple books with his mother until her passing. Nowadays, Mike continues to write The Berenstain Bears, which has taken a major religious turn since he assumed full ownership in 2012.

* Beretta eventually fixed the problem with the M9 (hence the model now called "M9A1", the "A1" bit meaning it went through an alteration) and the only reason the SEALs encountered the problem was because they train in a month more on side-arms than most regular servicemen do in their entire careers.
* Berge in Flammen in the Alps. Austrian soldier Florian Dimai, played by Luis Trenker (who also co-directed the movie and wrote the semi-autobiographical novel on which the screenplay was based) returns from a dangerous reconnaissance behind enemy lines with the news that the Italians are about to blow up a giant mine beneath the Austrian positions and is shot in error by one his own comrades who mistakes him for an approaching Italian soldier. He still delivers his message and the men leave the position in the nick of time before it is blown to smithereens, but in the epilogue set in 1931 Dimai has only one arm.
* Bergen tendencies, and when an entire crime show covering five episodes was set in Bergen... hoo boy.
* Bergerac, Jersey detective Jim Bergerac's 'maverick' personality was expressed by driving a Burgundy 1947 Triumph Roadster. The producers thought it looked cool but, as many a critic and viewer noted, it was a car supremely unsuited to Jersey's narrow, winding roads and 40mph speed limits. It still set a trend in 80s/90s British crime shows for any "quirky" cop, PI, or amateur detective to drive some kind of collectible car.
* Berghuis v. Thompkins, Thompkins was interrogated by the police; he never stated at any time that he wanted to rely on his right to remain silent, nor did he want to talk to the police, nor did he say he wanted an attorney. According to the court records, Thompkins remained virtually silent throughout the interrogation, and the police decided to make an appeal to his conscience and religious beliefs, asking him if he believed in God, prayed to God, and asked him if he asked God to forgive him for shooting the victim. Thompkins answered yes to each of the questions, and when he realized what happened, he made a motion to suppress his statements, claiming that he had invoked his right to remain silent, had not waived it, and that his self-incriminating statements were involuntary. The court dismissed the motion and sentenced him to life imprisonment without parole. Later, when his attempted appeals were rejected by the Michigan Court of Appeals and the Federal District Court, the U.S. Court of Appeals for the 6th circuit reversed the decision. The Supreme Court ultimately ruled that Thompkins' silence during the interrogation didn't constitute invoking silence, and he waived that right when he knowingly and voluntarily made a statement to the police.

* Berlin U And S Bahn has one of the longest and most complicated histories of unfulfilled plans of any city transport system, due to two world wars, the particularly nasty economic problems of the early 1920s and early 1930s, Nazism, partition, Communism, and the disappointing economic climate in the city after it became united Germany's capital. The one extension being constructed at the moment is a variation on schemes dating back to the 1930s at least.
* Berlin Wall couples came up with to get one or the other to West Berlin.
* Berlin was this for Nazi Germany in 1945, though the country could hardly be considered an unstoppable Force at that point. By the time of the Siege of Berlin, Germany still had a sizeable force fighting bitterly across Europe. However, the Red Army had managed to encircle Berlin and cut the city off from the rest of the German army. Attempts from the Germans to break through the Soviet encirclement failed, and they could do nothing but watch as Berlin fell. With the fall of their capital and the loss of much of their leadership, the Nazi forces still fighting in Europe surrendered. The Germans might have fought on much longer had their capital not fallen to the Soviets.

* Bernard And The Genie as the Genie) is about this trope. And very funny.
* Bernard And The Genie has a variant where Bernard is arrested and rather than calling a lawyer, he tries to call his genie friend Josephus, since he can

hopefully fix things with his magic. Unfortunately Josephus has been trapped in a bottle for two millennia and doesn't know how phones work; first he doesn't notice the phone, then he watches it in fear, and when he finally realizes it stops making noise if you lift and drop the receiver, he starts doing that instead. The police are allowing him to do this because they're secretly listening in—they assume that all this rigmarole is an elaborate code.
* Bernard And The Genie, of course) not only fires him on the spot but humiliates him and soils his reputation by implying he's a petty thief and a molester. The boss then asks a veteran female employee (who had been with the company for ages) if he might have been too hard; when she politely suggests he might have gone overboard, he fires her too.
* Bernard and the Genie, the Genie tries to kill Bernard as soon as he's summoned. Bernard stops him by wishing he'd stop trying to kill him, but still doesn't believe he's a genie. Although they as expected mess things up at first (Bernard gets arrested for having the Mona Lisa on his wall, and stabbing a policeman with a sword), Josephus later reveals that he can just turn back the clock, and they set everything straight. They then decide that since it's Christmas, they should make a few Christmas miracles and spread good cheer. (This includes getting back at Bernard's cheating ex-girlfriend and ex-best friend, as well as his ex-boss, who is played by Rowan Atkinson.) Josephus only became one after the wish "I wish you would stop trying to kill me", however. * Bernie Mac's punchlines in his act was threatening to beat his kids "till the white meat shows".
* Bernie Mac telling people to specifically ask for a Pepsi if they want a Pepsi. It showed people asking for a "Coke" and then wondering where their Pepsi was. Less amusingly, companies have sued over restaurants substituting the requested beverage without asking permission — the most notable case involving the Howard Johnson's chain and their one-time policy of serving their in-house cola drink in lieu of Coke or Pepsi. Which is why waitstaff will be quite diligent in asking if substitutions are okay.
* Bernie Madoff (pronounced "made-off"). Robin Williams lampshaded how fitting it was for an embezzler to have such a name: "What's next? A law firm called Dewey, Fuckyou and Howe?"

* Berry Punch is usually the one to do this in all fan works, especially so after her scene where she took a taste of the punch straight from the bowl. (Lauren Faust's name for her during the development process was Pinot Noir, for the drink that helped her get through the stress of coordinating a very spread-out team.)
* Berryshine/Berry Punch (with grapes and a strawberry as her mark) is believed by fanon to be a heavy drinker due to a scene in "Call of the Cutie" where she slurps from a punch bowl. In "The Super Speedy Cider Squeezy 6000", she is visibly distraught when told that there's "not a drop of cider to be found".

* Bersaglieri run. Also, their marching band plays brass instruments only-while still running.
* Berserk (1997) is fond of doing this for dramatic moments, usually when Guts is doing something particularly badass.
* Berserk (1997) whispering something, then immediately bursting out laughing at her own delivery.
* Berserk (2016), and the overall story felt even more rushed and messy, due to covering multiple complex arcs.
* Berserk (2016) had its heavily complained about CGI completely redone/improved for the home video release, in addition to it being uncensored.
* Berserk (2016) is a hybrid between 3D CGI and 2D hand-drawn anime. The 3D characters and objects are filtered through a cel shader that turns the shadows into solid blocks of color instead of smooth gradients to make them look more like 2D cartoons. A particular feature is that the shadows are filled with a linear hatching effect which simulates shading with a pen or pencil, and the same hatching effect is applied to the shadows that appear on any 2D models to create a more uniform look.
* Berserk (2016) moments caused by poor models and sound effects as well as camera movements that were completely bizarre. From about episode four onwards, however, the show stuck painfully close to what was presented in the manga, and the exact sequence of shots was copied panel-by-panel from the pages of the manga. Many panel sequences that worked well as manga pages did not work well when translated directly into 3D anime, and despite the shots corresponding with the manga images, there was a large amount of unecessary camera movement. On the whole, many fans felt like they were watching an inferior imitation of the manga instead of something new and interesting, and since the hurried conclusion of the second season introduced some new plot holes by skipping the rescue of Princess Charlotte and failing to introduce the Moonlight Boy, it did not even succeed as a literal adaptation of the story.
* Berserk (2016) skips pretty much the entirety of the Black Swordsman and Lost Children arcs, which generates a lot of problems.
* Berserk (2016), while mixing in some 2D animation, is predominantly cel-shaded 3D.
* Berserk (2016), while the audio sounds less like a battle to the death and more like a stack of pots falling over.
* Berserk: A boy is born under unusual/supernatural circumstances to a gruff, unloving mercenary father and an ill-fated yet loving mother. The child wants the approval of their father-figure, but the father only has resentment for the son, seeing their "cursed" existence as the cause/reminder for their lover's unfortunate fate; at some point, this resentment turns into an attempt on the son's life, but fails. This describes the origin story of main protagonist Guts and later, his cursed, unnamed son.
* Berserk Abridged), and Guts vows to get back to work repressing it in the

morning.
* Berserk Abridged: Guts at one point during a battle says, "Ow, my organs! I think I need those to live!"
* Berserk Abridged there's Private Frank who loves his music records even if the other Hawks don't.
* Berserk Abridged where it looked like they switched to doing Hellsing, Alucard makes a zing about this to the vampire holding Seras hostage. The two then debate if it was too much before Zod showed up and began asking what happened to his usual show.
* Berserk, Adon Coborlwitz has this reaction right before Casca lands a fatal blow on him.
* Berserk. After all these misunderstandings he's gotten sick of trying to explain himself because everybody always assumes that he's evil anyway, and he figures that at least if he scares them, they might keep the hell out of his way. Fortunately, his reputation as a hero has improved somewhat since the Millenium Falcon Arc gave him the chance for some high-profile heroics, and some of his best sidekicks now are former enemies who realized that he was right all along.
* Berserk after getting the hell smacked out of him by Rosine. He still manages to kill several of them before getting knocked out.
* Berserk after Griffith causes the real world and astral planes to merge.
* Berserk after he heals, which has saved his life pretty much every single time he's clashed with dangerous foes. The ironic thing is that it was his left arm that was always the most protected throughout the series up until the Eclipse.
* Berserk after she's been promoted to leader of the Band of the Hawk in Griffith's absence, making theirs a boss-employee romance after a fashion. There was no coercion or ulterior motive on either part and they're in a serious relationship, but it does cause some tension later during the rescue operation when they argue with each other about having to put their feelings aside for the mission.
* Berserk all sorts of horrible things to happen, but the behelits themselves don't do much, besides act as creepy little blinking doorbells.
* Berserk All the horror and the suffering humanity goes through in the series is, ultimately, self-inflicted.
* Berserk also speedy Apostle can does against Guts. Other humans like Casca and Serpico can pull this off.
* Berserk among BFS'es, which has taken on a supernatural essence of its own due to all the demons that Guts has killed with it.
* Berserk and all versions include at least one trip to the underworld—or rather that universe's equivalent.
* Berserk and because of her willingness to take care of everyone's basic needs.
* Berserk and damn all of their friends and loved ones to a horrific death (or worse), followed by eternal torture in Hell, for personal gain?
* Berserk and Fighting Fate Is Hard, depending on how much importance you want to place on the fate of the fish versus that of the stream.
* Berserk, and finally allowing him to slide from the sword to his death down into the pit.
* Berserk and get turned into an Apostle. And then there is the Crimson Behelit, which is a Behelit that only appears every 216 years in the hands of the person destined to become a new member of the God Hand.
* Berserk and middle-finger-salute, shouting "I hope a shark bites your ass!"
* Berserk, and not to mention his dramatic entrances. It helps that Mike Pollock, the guy who voices Doctor Eggman, voices him, too.
* Berserk and the Band of the Hawk game to have ever gotten an English dub.
* Berserk, and took over leadership of the Band of the Hawk following Griffith's imprisonment by the King (which came about because Griffith had sex with Princess Charlotte following the departure of his greatest warrior, Guts).
* Berserk and usually results in the demon killing itself from exhaustion or self harm if there is nothing around for them to kill. The protagonist Buwaro was born with a condition where he goes berserk immediately if he is awake and not wearing a magic pendant that suppresses it, as a result of his egg being damaged. Before he

was given the pendant as a baby, he had to be kept asleep at all times with magic so he wouldn't go berserk. Rhea learned this the hard way when she stole Buwaro's pendant and he (temporarily) killed her in his berserk form, and would have (permanently) killed himself if Sakido hadn't gotten the pendant back on him. He still felt terrible about killing Rhea even though it wasn't his fault.
* Berserk and wants to fight him again, and to ensure the events of the Eclipse go off without a hitch.
* Berserk anime. The fact that he does it while slowly torturing a dying Apostle makes the whole thing truly disturbing.
* Berserk arc begins and turns out to be a flashback, giving the reader context for Guts' reason — and a large portion of the flashback ends up developing the Band of Hawks, making it clear that they are doomed to die in some gruesome fashion. Not that this made their eventual deaths not one of the worst moments in the series, as their deaths are part of the biggest catalyst in the world.
* Berserk, a real piece of work of an Apostle who enjoys doing horrible things to people for his own enjoyment.
* Berserk are dedicated to spreading misery and suffering among humanity, which is exactly how the Godhand likes it. It does help that the humans chosen to become demons by the Godhand were picked specifically because they were the type most likely to accept the Godhand's offer.
* Berserk are notably rough around the edges, most other talented sword users cut limbs cleanly to pieces.
* Berserk, a repeating crossbow, throwing knives, and a dagger. He later acquires some miniature bombs.
* Berserk around his neck - "I'm not letting you go to Hell two-tongued!"
* Berserk, as a result of being raped by one of his adoptive father's men during his childhood. The only exceptions are his Love Interest Casca and his more-or-less brother Griffith, and even Casca almost got strangled to death during their first time together due to Guts flashing back to what Donovan did to him. During his stay with the Band of the Hawk, Guts did appear to be getting over this, as he became more chummy with his comrades and became more trusting of others close to him. Then the Eclipse happened. You can guess what state Guts reverted back into. Guts' issue with people has a lot to do with his trust in others, not just a single traumatic physical experience. After his time with Casca, Guts really doesn't talk about his childhood after that, but after the Eclipse, he goes back to hating being touched. It goes to show how much he felt betrayed by a man that he trusted, the second time in his life. After the Eclipse he makes new comrades that he places trust in and he learns that there's hope Casca can regain her sanity. Because of this he seems genuinely happy again, aside from the hatred he has toward Griffith and the Godhand.
* Berserk as he moves to imprison Griffith under torture and destroy the Band of the Hawk, and after Griffith's followers manage to break him out of prison, he wastes his kingdom's resources trying to find the disappeared Griffith while his subjects are dying in droves from famine and plague. This state of affairs creates the perfect opportunity for the Kushan Empire to conquer Midland virtually unopposed.
* Berserk a skilled strategist and surrogate leader for the band of Hawk.
* Berserk beginning and frequent use of flashbacks, There are several scenes referencing events that were already shown to the audience but that haven't happened yet chronologically:
* Berserk being the closest thing to a personal firearm anyone has ever seen).
* Berserk between Guts and Griffith. Griffith wants Guts to join his Band Of The Hawks when he sees his ferocity when fighting, and his passion towards following an independent lone wolf lifestyle. He is admiring of Guts' stubborn will and unwillingness to be tied down by anything. This quickly turns horrifyingly possessive on his part and leads up to the atrocity that is the Eclipse.
* Berserk, bloodthirsty spirits assail Guts and Casca during the night, thanks to their Brands of Sacrifice. Once the sun rises, however, the spirits disperse. As a result, Guts begins to sleep during the day so he can be ready to protect himself

at night.
* Berserk Board Barricade: Haphazardly nail random boards across the doorway.
* Berserk built into it like Guts' did, the fingers were very articulated, and an advanced series of springs and levers made the hand perfectly capable of holding a weapon in battle, among other things. Yet despite this shared trait between both people and their similar-sounding names, Miura has confirmed that he never even heard about Götz until well after he started publishing the manga.
* Berserk, but the breakdown comes from Guts beating him as effortlessly as Griffith beat Guts in their first meeting. From there, he sleeps with Charlotte, gets caught, imprisoned and tortured, and the realization he'll never be the man he was (what with most of his tendons missing, he can't even stand or hold a sword) is part of what drives him to call on the Godhand during the Eclipse and willingly sacrifice the Hawks.
* Berserk but the few who know of his true nature opposed to the roguish Guts.
* Berserk... but then Casca also admitted that she felt very bad because Charlotte is one of the sweetest people that she's ever met and treated her with kindness despite being a woman of lower social standing.
* Berserk Button" and excessive hand-holding is just insulting to their intelligence.
* Berserk Button: An insignificant slight causes a person to become extremely pissed off.
* Berserk Button: Doing something that makes a character angry vs. doing something that makes a character pleasant.
* Berserk Button episode "Bun Dummy" is "Save the bun hairstyle for when you're an old lady, and if you're bold enough to wear it as a young lady, don't act like it's the greatest thing that ever happened to you".
* Berserk Button episode when he almost killed Spike for sleeping with Anya.
* Berserk Button. Even the drill sergeants, who are supposed to literally drill the corp's internal culture into the new recruits, refer to them as "soldiers".
* Berserk Button for him. Hughes' general administration was incredibly inefficient and wasteful, and he became loathed by the common soldiers;
* Berserk Button for Katara, as characters like Zuko and Hama learned the hard way.
* Berserk Button for Richard (not entirely surprisingly, seeing as he's a novelist).
* Berserk Button gets pressed (In more ways than one), transforms into a monstrous teenager.
* Berserk Button in an effort to get him to compromise. David finally admits to being unable to do so, but he also calls Patrick his boyfriend.
* Berserk Button is any insult to their mother Leto. The mortal Queen Niobe, excessively proud of her children, bans the worship of Leto on the grounds that the goddess has a mere two children when Niobe herself has fourteen. The furious twin deities promptly slay all of them. The devastated Niobe can only sit and weep for days and days, and Leto eventually takes pity on her and turns her into a stone that flows with water.
* Berserk Button literally Tenchi's grandmother (and Yosho's wife). Even Tenchi himself, as much as Airi adores him, can't call her by this.
* Berserk Button man and his original name was "Marie". "DON'T CALL ME THAT! I HATE THAT NAME!"
* Berserk Button me." Then he laughs and goes to kick all kinds of rear since that's how Barabels are.
* Berserk Button over Christine’s mysterious suitor. At one point Raoul's inner mantra is literally “I am jealous! I am jealous! I am jealous! I am jealous!“. Raoul even shoots Erik at one point but only grazes him, though Raoul is actually thankful for this understanding that Christine is capable of never forgiving him. Raoul does calm down eventually... unlike Erik.
* Berserk Button people standing behind him while he was peeing. He then grew up to be one of the most feared-slash-revered shinobi in history, and is currently an unstoppable undead killing machine.
* berserk buttons, as pitying her can enrage Erma to no end, a trait also shared

with the author of the comic as well.
* Berserk Button. She since changed it to a pinwheel, which has a much more positive connotation for her.
* Berserk Buttons is being called one. Michael even mocks him for living like a hipster, going so far as to call him a "proto-hipster" and exactly the kind of person that all hipsters aspire to be. Also, one of Trevor's Rampage missions sees him slaughtering a horde of hipsters.
* Berserk Button: Something very particular that makes a character go off like a firecracker.
* Berserk Buttons, since people continually talk down to him because he's young and legally disabled due to his missing arm and eye as well as his damaged spine, no matter how many amazing inventions he creates.
* Berserk Buttons, which Whirl once did too many of and trashed Swerve's Bar when someone asked him what time it was.
* Berserk Buttons you have to pushed to be punched or kicked into some of the destinations.
* Berserk Button them from destroying it the moment he noticed they were starting to act crazy). The routine ends with Abbott's character (a fellow salesman) pointing out that Costello's character only has one hat remaining ("and what excuse are we gonna give the Susquehanna Hat Company?") and Costello's character wrecking the hat as he goes in a similar screaming fury.
* Berserk Button: This character will get extremely angry at one particular provocation.
* Berserk Button to push, their opinions on everyone else is even labeled as enigmatic in the contacts screen, and the requests they make are often random. And unlike the other variants who can Awaken via a number of ways such as the upstart awakening or the War In Heaven rivalry, the caretakers can only be awakened via the "Contingency" Endgame Crisis.
* Berserk Button to Rohan's Stand ability, which at that point trapped it's victim through their vision.
* Berserk Button version of an animation studio's mascot. Unfortunately, fans still make this error from time to time.
* Berserk Button. What comes next is Bubbles delivering a vicious, prolonged beat-down on Fuzzy Lumpkins, while one of her pigtails is a chicken drumstick.
* Berserk Button when you (and others) send them one game invite after the other.
* Berserk Button: You called me a jerkass? I'M GOING TO BEAT THE SHIT OUT OF YOU FOR THAT, YOU FUCKING MORON!
* Berserk by having her children kill humans for her amusement but getting outraged when Guts shows up and starts killing her fake elves in return. Guts, of course, tells exactly where she can shove her sense of superiority.
* Berserk by the two people who meant the most to him did probably the most to poison him against them and instill a hatred within him that would manifest in the most horrible way possible.
* Berserk called the Beast of Darkness that wants to possess him and turn him into a monster himself.
* Berserk, calling this expensive AND AWESOME for collectors is an understatement.
* Berserk can heal wounds. This is sometimes an unfortunate fact for Puck, the elf that travels with Guts — when he needs healing (and after a typical Apostle fight, he's usually in bad need of it), Guts has no problem with grabbing Puck and shaking him over whatever wounds need to be healed.
* Berserk can heal wounds. This is sometimes an unfortunate fact for Puck, the elf that travels with Guts — when he needs healing, Guts has no problem with grabbing Puck and shaking him over whatever wounds need to be healed.
* Berserk can reattach his own severed limbs on the rare occasions someone is able to deal that much damage to him. The Ogre that attacks Enoch village demonstrates the same ability when Guts chops off his arm.
* Berserk Casca has few moments of this towards her lover Guts in the Golden Age, like having his back multiple times during battle. In the fight with Wyald, she even tries to protect Guts while he’s unconscious before getting overpowered.

* Berserk: Casca's first meeting with Griffith starts with her escaping from a rapist. Instead of helping her, he throws a sword between the two, intending for Casca to choose to take it up and kill the guy ("If you have something you wish to protect, take up that sword."). After a struggle, Casca wins, and Griffith allows her to join him.
* Berserk), Chuder/Tudor is most likely based on the medieval Holy Roman Empire, Serpico and Farnese's homeland is Italy (with the Holy See as a stand-in for the Papal States), Farnese's fiance's homeland Ys seems based on England.
* Berserk comes into play. They don't dive right into a romantic relationship, but the time they spent together does allow for Casca, who didn't take well to Guts, to warm up to him and they both learn that they weren't very different people.
* Berserk (contrasting with the other deformed mooks). However, it turns out he wears it because of an allergy to sunlight, causing him to burst into flames if uncovered.
* Berserk, Corkus' sanity collapses as everything literally goes to Hell around him. He deliriously starts thinking that everything that had happened up to this point with the Band of the Hawk was all just a dream because it was too good to be true. When he sees a beautiful naked woman amidst the carnage, he takes this as proof that this really is just a dream and accepts her embrace. Unfortunately, it's not a dream and the woman is also a demonic Apostle.
* Berserk: Cornered and outnumbered, his force presents a tempting target that succeeds in drawing the enemy forces out of their castle, which is promptly captured in a sneak attack by a small flanking force.
* Berserk: Count Julius tells his son Adonis that when he grows up, he may be expected to marry his cousin Princess Charlotte and become the next King of Midland.
* Berserk: Despite living what seems like a life cursed by fate, every misfortune in Guts' life is accompanied by some stroke of luck or fateful encounter that enables him to endure it, if only just barely, and prevents his hope from dying.
* Berserk does this with one of the Queen's mooks in order to blackmail him into helping Griffith kill the Queen, only the hostage is the mook's young daughter.
* Berserk. Donovan, Guts' rapist from his days as a child mercenary, qualifies as an evil example.
* Berserk Dragon has 3500 ATK and 0 DEF, which would already qualify it for this trope. However, it goes the extra mile, with an insanely strong offensive effect (can attack all cards your opponent controls) and a tendency to fold quickly if it doesn't knock out the opponent in one shot, due to growing weaker every turn it's on the field.
* Berserk during the Eclipse, he doesn't wear an eyepatch; he just... keeps his eyelid closed.
* Berserk. During the Eclipse, Pippin goes out this way, holding back a huge horde of demons while buying Casca and Judeau time to get away.
* Berserk: During the Griffith rescue operation, Casca grabs Guts's cape and trails behind him when suspense is rising.
* Berserk, each one forged by Rickert, the only member of the Hawks who wasn't there when the Eclipse went down. It is on this field that Guts comes face-to-face with the reincarnated Griffith for the first time.
* Berserk episode anime is pretty static early on, with only occasional animation bumps to add emphasis to Guts' feats of arms. Episode 17 has a small bump in line art quality, but is held back by flat coloring until Episode 18 comes around and brings with it a massive leap in quality, suitable for the incredible importance of that episode's developments. The remainder of the episodes don't quite approach 18 and can be pretty uneven, but all are still significantly better done than the early episodes.
* Berserker Asura, using four Mantra arms to charge and fire enough beams to chew through an entire armada.
* Berserker Fury (USS Hornet), and so on. They even broke the Berserker code, like the USA broke the Japanese Purple Code.
* Berserker had 12 lives and easily took any damage dished out to him. In the end

it took some Phlebotinum to kill him. By easily took the damage we don't mean "he tanked that sword in the gut like a boss" we mean "unless that sword was at least an A-rank magical artifact
* Berserker had the killing machines attempt to use organic brains to introduce more fuzzy logic into their tactical computers.
* Berserker he wrought upon the Ayleids was as extreme as one would expect from a being in such a situation.
* Berserker. Insane strength, surprisingly fast, and has natural armor that can't be penetrated by anything but the most powerful attacks. Not to mention that he also has twelve lives that all need to be claimed before he's offed. On top of that, he also gains immunity from whatever
* Berserker in which robotic self-replicating machines intend to destroy all organic life. The machines are known as Berserkers. Most are giant spaceships the size of Manhattan Island. There are a very few people who actually worship them.
* Berserker of ass-kickers, their big guy is most likely be ready to punch you in the face for smiling at him.
* Berserker/Raikou is one to many Servants because she has the skill Mystery Slayer, which gives her an inherent advantage over beings the older they are chronologically. This includes Ruler/Martha, who is from the time of the Bible. This also explains how she was able to effortlessly overpower Saber/Arturia, who is from Camelot, and Rider/Medusa, who is from Greek myth.
* Berserker's axe-sword, which is a giant hunk of stone that looks somewhere between, well, an axe and a sword. It looks

* Berserkers. However, taking a cue from the Warrior type, Peacekeepers are trained from birth to their militarized discipline and respect for the chain of command.
* Berserkers. It's understood that not every krogan can be the best warrior, but every krogan has to have friends who'll fight by his side.
* Berserker's Noble Phantasm "God Hand" negates any attacks of B rank or lower, meaning that only an insanely powerful attack can harm him. And as if that wasn't enough, it also gives him twelve lives and makes him immune to any attack which killed him before.
* Berserkers obliterated both sides of the war they were created to end and continued to scour the galaxy of life.
* Berserker Soul scene. Memetic variants of this scene involve Yugi failing to draw a monster card at all, or getting complete nonsense in the middle of the beatdown.
* Berserker, special space ships are designed to ram the huge (as in the size of Manhattan Island) Berserkers. These ships have a nuclear weapon on the end of a very long prow which strikes the hull of the Berserker, creating a hole that the rest of the ship drives into. Once inside the Berserker, human troops deploy inside and seek out vulnerable places and rescue POWs held there.
* Berserker) species manage to survive, including Earth-Descended, or E.D., life.
* Berserker's Planet features a gladiatorial tournament. One of the contestants claims that he 'has never met a man who could stand against him'. Subverted in that, as one of the more intelligent contestants points out, this being the culmination of a series of to-the-death duels that's true for all the survivors; even those that got killed in the previous rounds must have been undefeated up to that point.
* Berserker's stories) had boarding parties of both robots and humans.
* berserkers that favors grace and style over brute force, fighting for personal pleasure rather than for it's own sake. This means a force of Chaos Undivided will have access to an array of warriors that complement each other nicely, with the caveat that those warriors will absolutely despise each other.
* Berserker stories. The Human player has ram ships which can pierce the hull of a Berserker ship and release boarding parties inside it.
* Berserkers, Viking UU, fast-moving infantry armed with dane axes and round

shields, they regenerate health when not engaged in combat. Definitively a nod to
* Berserkers were scary enough, but God help you if you were attacked by a berserker. The name even MEANS "bear-shirt wearer".
* Berserkers which turns them into savage killing machines that can't distinguish friend from foe. The rest of the party will simply stay out of their way or do their best to support them from afar until they kill or at least soften-up the target.
* , Berserker talking like a Pokemon and freeing Kariya and Sakura from Zouken, and Kiritsugu getting Irisviel and Maiya into a threesome in the name of "world peace".
* Berserker, the allies of humans, the telepathic Carmpan, a subtle and mysterious species incapable of direct aggression, state that it seems as if humanity has carried the burden of such a nature specifically in order to be able to fight off the robotic Berserkers who threaten all life in the galaxy.
* Berserker, the cast is menaced by a regular bear in addition to the bear-masked Viking remnant. The two even fight each other at one point.

* Berserker, were unable to confront the Berserker threat directly. Instead they found they had a weapon: Humans.
* Berserker zombies are almost as intelligent as the living, are insanely strong, and insanely sadistic. They are known for torturing their victims.
* Berserk, even with a humble campfire. When Serpico leaves the party along with Farnese, Guts and the others are motivated to bring them back partly because they would miss his cooking dearly.
* Berserk: Every castle Guts comes across is either filled with some monstrosity or just filled with assholes.
* Berserk fame partly based the characters in the Band of the Hawk on his friends in college, and feels like he has a bit of both Guts and Griffith inside himself.
* Berserk fanfics centering on Casca getting cured of her insanity involve Guts never leaving her side until she awakens (since in most of these fics, Casca goes into a coma-like state as part of the healing process).
* Berserk. Farnese and Casca wear shirts made out of silver mail for this reason, and the former has a silver knife to fight them off.
* Berserk features relatively little in the way of siege engines (Griffith and the Band of the Hawk specialize in high-speed cavalry strikes), but early on we see massive cannons.
* Berserk, featuring the Band of the Hawk at their best and most badass.
* Berserk film where he's shown having to hack through every last strand of resisting sinew before he can free himself.
* Berserk following his rebirth reforms the Band of the Hawk into an unstoppable mercenary army composed of humans and demons, and is the only group capable of pushing back the invading Kushan army. His victories lead to more good publicity and net him the hand of Princess Charlotte and the blessing of the Pontiff after some prophetic dreams. Eventually, he uses magic to build Falconia, the only city capable of protecting humans from all the unfriendly demons in the world. Of course, Griffith gained the power to control his demon army be sacrificing his friends to demons, and his is the one responsible for the Pontiff's visions.
* Berserk follows the same progression by showing the Black Swordsman Arc in episode 1, and spending the rest of its 25 episodes on the Golden Age Arc.
* Berserk For all purposes. Dramatic effect, blanket, protecting Casca from the cold, deflecting arrows (yes)...
* Berserk, forcing his men to throw away their lives in suicidal attacks because they know he will kill them for showing the slightest instinct for self-preservation or hesitating to do whatever he orders, no matter how stupid and unreasonable. The fact that he allowed himself to be imprisoned in the first place and continues to serve the king of Midland despite his monstrous power suggests that he plays along for the fun of it, and he doesn't mind the arrangement as long

as he's allowed to rape and slaughter as much as he wants.
* Berserk form is a little too creepy to be any level of beautiful though.
* Berserk: For most of the manga, Nosferatu Zodd is the only character with two names (and even then Nosferatu might be more of a description than a surname), until we start running into characters from rich families (Farnese and Magnifico Vandimion).
* Berserk. Fortunately, Puck is there to heal him (though Guts isn't too appreciative of the little elf).
* Berserk from the Eclipse, however, Casca loses a considerable amount of muscle.
* Berserk from the pain, either — his personal prayer ritual involves repeatedly slamming his face into a stone floor. It's just that, in his view, suffering is the best way to bring about faith.
* Berserk from the previous arc that Farnese, despite having no experience in battle at all (and with a little help from her subordinate Serpico), is able to subdue and capture him.
* Berserk fulfills this trope together with his followers. They take great pleasure in killing and torturing "heretics" at will. There's also the Holy Iron Chain Knights, a church-serving order of warriors who are mostly ornamental but nonetheless quite capable of kicking ass.
* Berserk Gorilla, for instance, must attack if at all possible, and Battle Mania, a trap that
* Berserk, Griffith, allows people from all walks of life to join his army, including demons, commoners, soldiers from nearly every neighboring country, and even people from the nation of Kushan that he is currently fighting against (though in the latter case, it's because they were from a country invaded by the Kushans, and thus not particularly motivated or loyal).
* Berserk, Griffith describes a dream as something that a man spends his whole life working on, whether it be world domination or the perfect tempering of one sword. The last one perfectly describes Godo, the old master weapon smith who ultimately arms Guts with his armor and the BFS called the Dragon Slayer. The creation of the Dragon Slayer certainly qualifies; as Godo told Rickert, back then he was a young man working for kings and nobles and had grown tired of making refined and elegant weapons. When the king announced a contest to create a sword that could slay a dragon, Godo created a monstrous tool too big to be called a sword, because he wanted to make a point that to kill an impossible creature you would need an equally impossible weapon. That insolence forced him to leave court and set up shop in the middle of nowhere, but he kept that slab of iron as a reminder of when he bit off more than he could chew. Years later, Guts comes to him and needs a weapon. Godo gives him a finely made sword sharp enough to cut another sword in half, but when a demon appears Guts finds that a sword made to kill humans is too fragile for the job. Instead he takes up the Dragon Slayer and butchers the creature, and it has been his trademark weapon ever since. Godo ultimately acknowledged that the Dragon Slayer was his greatest creation, and the last act of forging he ever did was to repair it so that Guts could go and rescue Casca from the Tower of Conviction.
* Berserk Griffith gradually becomes obsessed with his best warrior Guts, such that when Guts decides to leave the Hawks after deciding that he's not going to be a part of Griffith's dream, Griffith's thoughts during the resultant duel, about how he would not let him go, are very unhinged; when Guts beats him in the duel and wins his freedom Griffith cannot take it and immediately goes to sleep with Princess Charlotte while thinking about Guts and his leaving the whole time. In fact, the events that set into place his downfall and lead up to the horror that is the Eclipse is caused partly by Guts leaving.
* Berserk: Griffith is one of the few people that Guts allows to touch him and Griffith is all sorts of jealous towards Guts. Oh and Naked Water Fight. It goes straight into horrifying territory with the Eclipse and the events that lead up to it.
* Berserk Griffith presents himself to the Pope of the Holy Church as God's prophesied messiah, inspiring the old man to essentially serve as his biggest hype

machine, further easing his manipulative influence throughout Midland... and all the while remaining blissfully unaware of his true, vile nature.
* Berserk Griffith's "contribution" ends up corrupting what might otherwise have been a normal baby into a misshapen fetus monster with considerable demonic powers.
* Berserk, Griffith's trusted female lieutenant Casca is addressed as Commander. As the Band of the Hawk was a mercenary unit, not a lot of attention was paid to ranks in the band.
* Berserk: Griffith toward Guts. He states that Guts' fighting is "magnificent" and for that reason wants him to join his Band of the Hawk. Their relationship becomes much more possessive as time goes by.
* Berserk: Griffith uses his attractiveness to his advantage all in the name of having his own kingdom, such as sleeping with a rich old man to get his army supplied with goods, trying to win over the Princess for his goals despite others being against it because he is a man of common birth, and getting people to trust him so he can gain support in the name of his goal, all while hiding a nasty side behind a charming facade.
* berserk guilty for losing control and then failing to keep him from committing suicide. This hat trick of perceived failure leads her to swear off using her shapeshifting powers until her sister and grandfather convince her to stop blaming herself.
* Berserk, Guts and Caska are attacked by over 100 enemy soldiers. Guts manages to create an opening for Caska to escape, and she runs to get the rest of the Band of the Hawk. Eventually, the Cavalry arrives to bail out Guts, only to find the battlefield quiet, with corpses littered all over it. They find Guts still and unmoving against a tree, and immediately assume the worst. And then Guts wakes up from the nap he took after single-handedly winning a battle where he was outnumbered by over a hundred to one.
* Berserk: Guts is the big mentor for Ricket and Isidro. Especially for the latter, Guts even gives him lessons though he overlaps with father figure.
* Berserk, Guts's motivation for hunting down the order of Demons was because his mother was torn apart by them.
* Berserk, Guts wakes up to an unfamiliar cave ceiling, which turns out to be Godo's mine (which was previously inhabited by elves, so evil spirits attracted to his brand can't follow him).
* Berserk had a 2012-13 movie trilogy adaptation which tried to blend lots of 3D character models and objects for the big army and action scenes with traditional 2D animation, using shaders to make the colors, shadows, and textures look more two-dimensional.
* Berserk had two edits in Japan due to graphic content. The theatrical version was given the Japanese-equivalent of an R rating while the blu-ray release has the unedited NC-17 content.
* Berserk: Happens with Jill and Guts. Normally this would be an issue since Jill is a small teenaged girl and Guts is the size of a Renaissance statue, but he was fighting a giant moth-woman at the time, hence his "Hey. Get off, you're heavy.".
* Berserk has a similar one, except it's a family of three devouring their newborn. Alive.
* Berserk has a small scar across the bridge of his nose, given to him by adoptive father Gambino when he tried to kill him.
* Berserk has commanders and nobles wear these, though most seem practical with just a few elaborate designs. Boscogn of the Purple Rhino Knights is a prime example, with his armor having plenty of pointed ends and his helmet shaped like a rhino's head.
* Berserk has gotten more attention from Western viewers thanks to specific series with a more mainstream audience:
* Berserk has Guts as Fire and Griffith as Ice. Casca is a staunch follower of Griffith and wanted to be with him, but grows to accept that she could never be his woman, and his emotionally distant and ambition-driven personality didn't really help with that. Over time, she naturally falls in love with Guts, who has his own emotionally distant behavior but is much more receptive and passionate than

Griffith and develops the same feelings for Casca.
* Berserk has parts of his skin peeled off by the royal torturer, who nonetheless makes sure to keep him alive. In the Conviction arc, heretics leave the flayed skin of a priest they killed swaying on a tree in the middle of the refugee camp, which only increases the wrath of Bishop Mozgus.
* Berserk has such a long and complex backstory that it takes up twelve volumes of the manga and nearly the whole animated series. The backstory focuses mainly on Guts, but Griffith and Casca have their own pasts and motivations revealed, as well. Serpico and Farnese also receive their own backstory episodes in the manga.
* Berserk has the King of Midland, after his regular men and the Bakiraka fail to kill Griffith and the Band of the Hawk following Griffith's rescue, calls upon the Black Dog Knights, made up of the worst murderers, rapists and all around scum that Midland has to offer and led by Wyald, a nasty piece of work of an Apostle, as his last bid for revenge against Griffith.
* Berserk has these quite often, both from his childhood trauma and from the monsters that constantly torment him post-Eclipse.
* Berserk have moving fingers, but powerful magnets make sure that the artificial fingers are tightly grasping his massive sword, The Dragonslayer.
* Berserk have nicknames of varying coolness. The Band of the Hawk is the one Guts joins.
* Berserk. He deviates from the general profile of both wielder types by being heavily armored (since he's a mercenary who mainly favors melee).
* Berserk, he never makes it through a fight unscathed. Over the course of the series, he loses his left hand and right eye, while his body becomes riddled with scars. After receiving burns from Emperor Ganishka's lightning his skin becomes so scarred that he can't even sweat properly. To make matters worse, the Berserker Armour that enables him to fight like a demon and ignore pain also robs him of life the more he uses it, steadily bleaching his hair and numbing his perception of taste and color. The Skull Knight warns that it could eventually turn Guts into a literal walking corpse like him.
* Berserk, he's squaring off against other swordsmen. This is especially true in the Hawks arc, which has a number of duels among the main characters.
* Berserk, he uses it to chop off the heads of both Boscone and his horse in one mighty swing!
* Berserk. He was raped by a pederast soldier named Donovan after his adoptive father Gambino sold him to the mercenary for three silver coins. Guts took violent revenge during the very next battle, shooting Donovan in the back with a crossbow and then laying into him with his sword, demanding to know who had sold him to him. Guts did not believe Donovan's final confession that it was Gambino who sold him until the fateful night when Gambino, who lost his leg to a cannonball during the battle in question, got drunk, confessed to the deed and then tried to murder him.
* Berserk. His actions during the Eclipse where he rapes Casca to insanity while forcing Guts to watch are implied to be done to spite the two for getting together and making it so they can’t stay together anymore with the psychological trauma Casca is left with.
* Berserk. However, among the Band of the Hawk, this trope is nowhere to be seen: Casca is the second-in-command of the entire mercenary group, and the men of the Band have nothing but respect for her both as a fighter and as a leader.
* Berserk. However, even in his nobler periods, he relishes in crushing the skulls of his enemies and striking fear into their hearts.
* Berserk, if they were to continue releasing content at the same pace as the Golden Age trilogy, they could easily find themselves Overtaking the Manga yet again.
* Berserk in 2000. It would be another two years before the 1997 anime got an official release. Dark Horse published the first volume of the manga a year after that.
* Berserk In fact, clean decapitations are almost nonexistent; most of the time, when Guts hits above the shoulders, the victim's head shatters.
* Berserk Inquisitor Mozgus, who is convinced that there are heretics hiding

amongst them. The majority of the refugees are killed in the events that lead to Griffith being reborn into the world.
* Berserk in the aftermath of the conviction arc because Casca is the love of his life and she's only wearing a nightie.
* Berserk: In the bit where Griffith meets Guts again, he calmly declares that he feels no remorse for anything he did during the Eclipse, and says it all so damn reasonably that it's almost as if he thinks Guts is the one being irrational, is truly horrifying. Even if you didn't know what he was capable of with his demonic powers, the sociopathic lack of remorse would be frightening enough on its own. This aspect of him rattles even Guts and considering how much he's been through without batting an eye, that says a lot. To recap:
* Berserk is about the Eclipse and contains 3 warnings on the DVD that it is rated for adults only. A typical TV-MA rating, stating that Parental Advisory is needed and a last one in small writing stating 18+. It's extremely necessary due to the portrayal of rape in the work. The UK DVD only has the typical BBFC 18 rating, though at the back of the box all the writing showing what happens in the work is bolded.
* Berserk is a fairly unsympathetic one of these. He still has his old equipment and seems to have fought in at least one battle, but it's made clear that as he is now, he's an abusive wretch who does nothing but get drunk with his war buddies and demand respect he doesn't really deserve.
* Berserk is a human swordsman known for casually taking Gods and demons leagues above human ability on a daily basis.
* Berserk is an aristocratic and educated naval captain who excels in warfare. He never fails to be fair, courteous, and polite, especially towards ladies.
* Berserk is commanded by a totally clueless ring of pompous noblemen. They spend more time arguing over who should get the "honor" of heading campaigns than they do discussing actual viable strategies. This allows Griffith to step in and gain considerable social status through, well, actual military merit.
* Berserk, is constitutionally unable to enter a scene without trumpeting the size of his ego.
* Berserk Isidro gets his fair share of super-deformed moments as well.
* Berserk is if there is an array of pornographic art in it. But what do you expect? He's a mercenary.
* Berserk is known as "The Black Swordsman" and "The Branded Swordsman" after the Eclipse, but back in the days when he was with the Band of the Hawk, in addition to his official title of Commander of the Hawk's Raiders, he also earned the title of "The Hundred Man Slayer" because of what he did to the Blue Whale Knights around the middle of the Golden Age arc.
* Berserk) is over thanks to the Band of the Hawk, Griffith is knighted and it seems his plans to rule the country by marrying princess Charlotte are coming to fruition, so Guts decides this is the best time to leave to prove himself Griffith's equal. Griffith is easily bested by Guts when they duel again, leading him to sleep with Charlotte, getting caught and imprisoned, and the entire Band of the Hawk become fugitives. When Guts and the Band get back together, Griffith is rescued but has been irreversibly crippled by his jailors, leading him to sacrifice his friends to ascend to demonhood.
* Berserk is set in a circus where there are a series of gruesome and unexplained murders.
* Berserk is the first major bad guy Guts faces in the manga. His first encounter with demons period is with none other than Nosferatu Zodd, who has gone on to be a recurring rival and occasional ally of the Black Swordsman. Chronologically, however, the first major bad guy Guts faces is the warrior Bazuso, whose defeat is what alerts the Band of the Hawk to Guts's talent.
* Berserk is the progenitor of all demons—including the five members of the Godhand whose job it is to create new Apostles.
* Berserk, is very tall and muscular, but is still smaller and faster than many of the other characters. Although said other characters are (usually) actual DEMONS...
* Berserk, it’s more likely Jill is seeing him as father substitute and thus

more comfortable around Guts.
* Berserk. It can also be argued Farnese's half brother Serpico is this as well as despite the cynical world that he resides in, Serpico is one of very few individuals to stand out as genuinely polite, gentlemanlike and sincere.
* Berserk, it has been the province of villains, such as Adon Corbowitz's use of poison in his duel with Casca, or the conspiracy to kill Griffith.
* Berserk It, however is only God in the sense that it influences and controls people. It is not the creator of the universe itself and only seems to have a limited (if any) control over physical reality itself and it can only influence the physical through humanity (it can't summon storms or cause earthquakes).
* Berserk, its heart beat is enough to deafen and severely injure him.
* Berserk later on for a completely healthy woman is just asking for trouble especially as Guts nearly gets killed because of it, though this action does make Casca fall in love with him so it equals out.
* Berserk led by the biggest murdering scumbag of them all: Wyald. Both are employed by the King of Midland to track down the outlawed Band of the Hawk.
* Berserk, loves to invoke this trope. Being a depraved hedonist, he especially enjoys the first part.
* Berserk, main character Guts wears the Berserker armor, which snaps his bones and tears his flesh in order to keep him fighting through otherwise crippling injuries even as it slowly eats away at his soul.
* Berserk manga has one at the level of his shoulders when he takes on his Apostle form.
* Berserk manga, who tends to attack his opponents on specifically chosen ground that works in his favor. For example, he chooses to ambush Guts (who could cut Serpico in half in a second on an open battlefield) on a cliffside where Guts doesn't have room to swing or even draw his BFS, has very precarious footing and the morning sun in his eyes.
* Berserk, many of the apostles retain their human faces in their more demonic forms. For some though, their human faces are placed on bodies that already have regular animal-like heads and some are even situated in places where human faces shouldn't normally belong on. Two prime examples that best illustrate this would be demon forms of the Baron of Koka Castle and the Count. The Baron looks like a gigantic humanoid snake but he has a human face in his mouth. The Count on the other hand, looks like a gigantic slug but he has a human face situated on the forehead of his slug head.
* Berserk, merely obeying Gennon because he represents Chuder's authority.
* Berserk. Moments after the King of Midland dies, Emperor Ganishka and his troops come storming in and take over the joint.
* Berserk moment when he finds Griffith in the dungeon and sees the horrible suffering that had been inflicted on his friend.
* berserk murderous rage and his transformation into the evil Darth Vader.
* Berserk. No, it does not end well for either of them when the Eclipse goes down.
* Berserk, none of them ever learn the true depths of his problems and trauma. And even Farnese and Silke only know vague ideas because they saw a representation of The Eclipse in Casca's dream world.
* Berserk of horrifyingly ugly creatures, and they're frequently shown in large gatherings.
* Berserk once the Apostles and various other evil spirits make the scene...
* Berserk, one of the victims is having salt walter poured down her throat with a funnel, a real life torture method.
* Berserk on him), panics, and Guts ends up with a bowlful of very hot soup to the face.
* Berserk other survivors of the Band of the Hawk: Rickert, who was the only survivor of the group that got separated from the main group when the Hawks were declared outlaw following Griffith's arrest for boinking Princess Charlotte, and who thus wasn't there with the others when the Eclipse went down; and Casca, Guts's greatest love and the only other survivor of the Eclipse, who received the Brand of Sacrifice much like he did when Griffith sacrificed everyone, but who lost her mind

following a truly horrific ordeal at the hands of the demons and Griffith himself. The survival of these two sets up the Conviction arc in which Guts has to step away from his path of vengeance and blood in order to save Casca from a bunch of cultists and a fanatical high inquisitor.
* Berserk plot, has turned into one of these, as Guts and his companions seek the land of Elfheim in search of a cure for Casca's post-Eclipse insanity.
* Berserk. Quite a few Apostles are fond of this too, such as the female Apostle that Guts kills in the very beginning of the manga.
* Berserk release bloopers, but these are actually the voice acting outtakes on top of the correct animation... and then at the end they have the animated characters in a "scene" apologizing.
* Berserk, relishing their fights but willing to let him go on occasions when Guts is too weakened from a previous battle to defend himself.
* Berserk responsible for the world being such a cesspool of crap and suffering. It basically looks like a colossal misshapen heart with its valves spewing out webs of causality to manipulate humanity's fate and lined on all sides with countless eyes upon closer inspection.
* berserkr (from which we get the word "berserker") would charge into battle either covered in bear or other animal skins, or completely naked. Some research indicates they may have used stimulant drugs.
* Berserk rip their way rather gorily out of the mother's belly before eating her alive.
* Berserk, said spells generally take a lot of time to cast and while she's casting them she's completely helpless. And without her magic she's just a twelve-year-old girl with a staff, not at all suited for physical combat.
* Berserk scene, smashes some poor guy's head in with his big metal-bound tome of scriptures and screams "HERETIC!"
* Berserk, Schierke is able to set up a massive defensive spell over a church... because the church had been built over a sanctuary to one of the elemental spirits.
* Berserk shears their heads off. The Count from the Guardians of Desire arc proves to be quite more resilient than that, which drives Guts to torture him further because he "doesn't know how to fucking die."
* Berserk showing he is indeed incorruptible. Prior to the slap, Guts states correctly Rickert simply cannot hate Griffith like Guts does, as it's just not in Rickert's nature. While he did defy Griffith's wishes it was out of love and respect for the old Band of Hawk rather than revenge.
* Berserk since she's the only reason why Guts refuses to give in to his dark side.
* Berserk, so when they want to affect things they need to take preexisting materials to make bodies from: Slan once made a body from troll guts and Conrad made one from a mass of rats.
* Berserk speech from Godot about this two years after this that Guts finally starts getting his act together again.
* Berserk's Skull Knight invokes this trope through his distinctively skeletal armor. Unusually for the trope, he's one of the few unambiguous good guys of the saga, if a serious hardass.
* Berserk, staying true to its dark nature, plays the trope straight and is (mostly) unsympathetic in its depiction of it.
* Berserk subtype, as he opposes the God Hand and has rescued the good guys from certain death several times.
* Berserk subverts this when Guts leaves Casca in the elf mine, where Rickert and Godo are supposed to look after her while he is off slaying demons and avenging the Hawks. Turns out that was maybe not such a good idea, as Casca, insane as she is, has left off on her own, starting the Rite of Birth arc. When they do reunite, the mine, one of the last safe havens they had, is destroyed and their relationship has become quite sour.
* Berserk talks up Guts' old legacy, unaware he's standing in his idol's presence.
* Berserk than in the manga, while making her hair dark brown or reddish-brown instead of black.
* Berserk that ends with him starting the Eclipse and sacrificing his soldiers to

become one of the Godhand.
* Berserk. The abridged series put it quite nicely when it said, "but it's like the only time in the history of anime that the demons win. Every other show ends with the Ancient Hero of Bullshit showing up at the last minute, wielding the legendary Sword of Deus ex Machina and slicing the hell out of us. Well not this time! This time, WE WIN! Griffith turns evil. Everyone gets raped or eaten or killed. Fuck you. THE END!"
* Berserk: The Band of the Hawk was a mercenary company of unrelated individuals as tightly knit as a family, united by their admiration of their charismatic leader Griffith. Everyone gets their turn to have a moment of awesome, and they are loyal to each other. Eventually, Guts' new party grows to the same level of membership, capability, and closeness, except for a few hangers-on like Magnifico.
* Berserk. The cavalry battle has stirred up huge clouds of dust that make it nearly impossible for the sentries on the castle battlements to see what's going on, allowing the other half of Griffith's forces (led by Casca) to sneak around the battle and pour into the castle through its open gate. Meanwhile, the Hawks outside turn and re-engage the Rhino Knights. The battle is decided when, almost simultaneously, Guts beheads General Boscogn and Casca's force raises the Band of the Hawk flag over Doldrey. Tudor morale collapses, and Griffith is able to drive them from the field.
* Berserk, the dying Judeau can only tell Casca that she cries a lot, and dies regretting that he couldn't confess how he really felt about her.
* Berserk The entire time it's happening, Griffith is staring right at Guts.
* Berserk: The first time we meet Zodd, he's standing butt-naked and knee-deep in the corpses of Hawk members.
* Berserk: The Godhand member Conrad is capable of using plague-carrying rats.
* Berserk: The Golden Age Arc (a consequence of adapting fourteen volumes of manga into about five hours of material) left the plot feeling rather rushed and missing a lot of the slower, more introspective moments, so newcomers ended up missing out on a lot of the story's thematic content and character interplay and a lot of the original's appeal. Consequently, while the films do have their fans, those fans tend to see them as more supplementary to the manga version rather than a good replacement or introduction to it.
* Berserk, the houndlike "Beast" that sometimes appears in Guts's dreams and that represents his darker side post-Eclipse has two really evil-looking red glowing eyes, and when Guts is under its sway, his good eye will often glow red like the hound, best illustrated in the PS2 game which focuses on the Millennium Falcon arc.
* Berserk: the last thing Guts saw with his right eye before it was gouged out during the Eclipse was his lover Casca being raped at the hands of his former best friend Griffith, now a demon named Femto. The image is burned into his memory.
* Berserk, the later by immersing pregnant women in a vessel connected to Hell so that their children are corrupted in the womb. What both have in common is that once developed, they exit the host in an extremely painful and fatal way. Young trolls grow quickly in the woman, until they claw and rip their way out of her stomach, then eat her still warm body. Baby Daka burst out of the abdomen, leaving the woman to bleed out, and get collected in cages by attendants.
* Berserk), the prospective demon will often be asked to do this, the victims invariably being people the bearer holds most dear. Once the choice to sacrifice is made, the Godhand marks the person to be sacrificed with a mark called the Brand of Sacrifice, which draws the monsters from hell to them like a lightning rod, and unless they're a supreme badass (like say, Guts), chances are they're going to die. Horribly.
* Berserk, there is a point early on when Guts can't hold his sword, because all of his fingers have been dislocated.
* Berserk, the strongest weapon Godo has forged, at the last minute, and promptly uses it to tear the monster apart.
* Berserk, they're decidedly less so to the few well-meaning noncombatants who follow him for too long, as showcased in the second story, "The Brand", which has a priest and his daughter get killed by demon-possessed skeletons after taking him on

as a passenger in their wagon.
* Berserk this was briefly used on Casca during her and Guts' love scene. Soft, romantic music included.
* Berserk. This world is quite big and since it is filled with countless unsavoury characters it is no surprise that wherever the branded ones go, they will attract evil spirits as quickly as an abandoned corpse will attract flies. It's little wonder that Guts is as messed up as he is post-Eclipse, and that he turned to hatred in order to survive this nightmare.
* Berserk to help out Gut's friend Rickert and proves to be a highly valuable ally.
* Berserk to, he's now an unpredictable factor in Fate. Screwing destiny over becomes his purpose in life after that, much to the surprise and amusement of the Godhand.
* Berserk, to which Guts says, "You're sayin' you believe in God, but not in evil spirits?"
* Berserk. To work it, he has to flip the hand up and pull out a lever buried in the side of the cannon. The arm also has a repeating crossbow built into it, which he uses for killing human foes and torturing fallen demons.
* Berserk undergoes one after the horrific events of The Eclipse, reverting to an infantile mental state without any true recollection of her old self, and post-Golden Age, it becomes Guts' first priority to restore her sanity.
* Berserk units that were themed after huge animals, Black Rams, Whale Corps, Holy Purple Rhino Knights. While Midland preferred lightning fast units, most successfully the Band of the Hawk, and had white everything. White Dragons, White Tigers ect.
* Berserk uses large numbers of war elephants in their invasion of Midland, equipped with armor and carrying platforms for warriors and archers. The exotic animals seem like unstoppable monsters to their enemies, and we are treated to graphic depictions of hapless infantry being trampled beneath their feet, though Rakshas also demonstrates that they can be easily terrified and made to stampede over their own forces. As if the regular elephants weren't enough, Daiba and his sorcerers have also provided the Empire with bipedal elephant-headed monsters armed with equally enormous weapons. Emperor Ganishka certainly prizes elephants as a sign of royal power, since we see him riding to and from Charlotte's prison on an elephant, and he commands the siege of Vritannis from a palace on wheels drawn by no fewer than sixteen elephants and surrounded by an escort of elephant cavalry.
* Berserk wears a dark cloak with a hood. He's also seen wearing his all-black hooded cape post-Eclipse after he becomes the Black Swordsman.
* Berserk. We just don't know what the Hellhound is and might never know.
* Berserk when a little girl traveling with her father falls out of their wagon during an attack by evil spirit-possessed skeletons drawn to Guts's Brand of Sacrifice and is killed by one of them. Her body is possessed by one of the spirits and kills her father, then goes after Guts, who has to put her down.
* Berserk when he has some refugees put through this. Let's not even get into what Emperor Ganishka gets up to.
* Berserk when it was offered). However, there are points where one can also see the goodness of humanity at work.
* Berserk: "When you meet your god, tell him to LEAVE ME THE FUCK ALONE!!!"
* Berserk where she could molest him. And even Rosine, who seemed to be strictly into her friend Jill, flirted with him and called him hunky before attempting to kill him. Also, Farnese was attracted to the sight of his scarred muscular torso after giving him lashes and had repressed sexual desire for him which was released and exacerbated upon after a demon from the group following Guts possessed her and made her undress and act overtly sexual towards him in an ominous manner. Before she changed for the better she was also a pyromaniac, who got off from torturing people with fire.
* Berserk, where there are a lot of broken families, a major theme is adoption and the fact that Storge doesn't need biological relation in order to take root.
* Berserk, while Guts was fighting some snow demons to protect Casca and she left his protective grasp. After it was over, he wondered why she went away so

suddenly... Turned out she picked a great time to go number one.
* Berserk, while Laban and Owen actually give a crap about protecting commoners.
* Berserk who doesn't care how many people are killed in the crossfire as long as he gets his revenge.
* Berserk, who is delirious after watching everyone in his crew get killed and eaten, knowing that she is most likely another demon but not being able to help himself.
* Berserk, who was about to fight Ganishka. It's debatable whether Femto actually planned this.
* Berserk, with all of the madness that happens in this universe, expect it to happen a lot.
* Berserk with her amour still wears a pink tunic in the anime, skin tight legging making her buttocks pronounced and even thigh-high boots in contrast to male of the Band of Hawk.
* Berserk without bothering to take off her clothes first. As a result her drawers end up caught on her tailfin and get plopped on the table for everyone to see.
* Berserk with such regularity that you could probably set your watch to it. Kentaro Miura's artwork being far too detailed for fluid animation to mimic easily was likely a factor.
* Berserk with which he has set out on a quest to restore Casca's sanity, which takes them far and wide.
* Bert and Ernie sketch has the duo engaging in one of these when Ernie hogs the TV set, and Bert turns the record player on to drown him out, which leads to Ernie turning the radio on to drown out the record player, then Bert responds by turning a blender on to drown out the radio...all of which leads to a fuse blowing and the power going out in their apartment.
* Bert and Ernie's official line has for years been "They are not gay, they are not straight, they are puppets. They don't exist below the waist."
* Bert And I: Harry Whitfield, a recurring character who goes through several horrible stories, typically while traveling to (or returning from) visiting his niece Winona, who lives in Oyster Bay on Long Island.
* Bert And I sketch, a notoriously smelly and unclean man becomes enough of a nuisance that he's brought before a judge to explain himself. The man asks the judge how he can be considered unclean — after all, he washes maybe once a year, while some people are apparently dirty enough that they have to wash every day.
* Bert Cooper gives every indication that he would have qualified (he keeps a print of
* Bert Diaries), or possible but extremely implausible (such as Bert drifting out to sea on an inflatable raft only to be saved by the beautiful daughter of a Greek millionaire in her private yacht).
* Bertelsen og De Uaktuelle Nyheder provides parodies this trope. A Christian film director shows the "Christian" porno movie he has made, where in a woman calls a plumber to clean her pipes. The plumber then shows up and proceeds to... actually fix her faulty plumbing. Afterwards, they both sit down on a couch, where they suddenly feel sweaty and take off their jackets, at which point they both proceed to... decide they should marry each other.
* Bertha Benz After an all-day journey in which she had to refill the car with petroleum solvent bought from pharmacies, unblocked a fuel line with a hat pin, and used a garter to insulate a wire, she telegraphed her husband from Pforzheim. Rather than getting angry, Karl asked Bertha for her suggestions on improvements, including a lower gear for climbing hills and use of treated leather brake pads to increase stopping power. Her exploits led to greatly increased sales and recognition of Benz's machines.

* Bertie's daughter is named "Nina Rose Barron" in the original novel, but the film gives her the name of "Victoria Cecile Essex".
* Bertie Wooster, avoids confrontation and often seeks sympathy and support from others. If he's ever in a romantic relationship, he will invariably be bossed around by the girl.
* Bertie Wooster, despite being described as "mentally negligible", can be quite witty especially in the narration.
* Bertie Wooster fan and occasionally threw in a reference to the characters.
* Bert Jones' ball lands right in front of a tree. L.C. Greenwood pulls the tree out of the ground so Bert can continue.
* Bertolt Brecht are now forgotten by singers who sing it as an opportunity to mention everyone else who's ever sung it.
* Bertolt Brecht, by showing how the children are all killed because of their own best traits (courage, honour and compassion respectively).
* Bertolt Brecht. Catharsis is withheld in order to demand revolutionary action from the audience.
* Bertolt Brecht; double points for being translated from the original German.
* Bertolt Brecht ends abruptly, without solving any of the conflicts. An actor steps out, and asks the audience to find a resolution.
* Bertolt Brecht. Here people try to put this trope on this Macheath, but this one is really just a murderer, rapist, pimp, etc that is only ever really out for himself and nobody should want anything to do with him. However various translations of the original German have sometimes heavily altered this. In some Macheath plays this trope straight and in others, he's just as Brecht intended.
* Bertolt Brecht later, the new Galy Gay/Jeraiah Jip is enthusiastically leading a savage attack on rebel forces in Tibet. (In the meantime, the old Jeraiah has assumed the place of an oracle at the temple where he woke up hung over.)
* Bertolt Brecht's trips to the theatre were apparently this, due to his love of his car.
* Bertolt Brecht, was translated to English nearly 30 years after its composition as "Mack the Knife", whereupon Louis Armstrong (and later Bobby Darin) made it into a hit.
* Bertolt confronts Ymir over having eaten his childhood friend, Marcel. She apologizes for it, admitting that she has no memories of her time trapped in Titan form. When she asks if he hates her because of it, he admits that he isn't sure... but he accepts her apology, as she clearly didn't want

* Bert Trautmann, football (soccer) goalkeeper active in the 1950s. During the 1956 FA Cup Final, he was injured in a collision with an opponent. With 17 minutes to go, and no substitutes allowed, he shook off the injury and continued. He saved several goals, preserving his team's lead and helping to win the match. The injury? Merely a broken neck.
* Bert Williams biggest Black entertainer in the late nineteenth and early twentieth centuries. Famed for his comic timing, witty songs, hilarious body language, and overall skill, Williams rose to fame in an era of total racial segregation; he was the first Black person to headline a Broadway show and a bestselling recording artist. But for all that, he suffered deeply from the intense racism of his day, and while he tried to deal with it in style, some surviving anecdotes and records reveal his deep pain. Other white cast members often protested his appearances or refused to work with him, and he often had to don blackface and act in a stereotypical manner to make white audiences laugh. W.C. Fields (himself a famously Sad Clown) described Williams as "the funniest man I ever saw—and the saddest man I ever knew."

* Beryl, Ann, and Black Lady try to kill Usagi to get Mamoru, while Al and Diamond try to kill Mamoru to get Usagi. Emerald also tries to do in Usagi to win Diamond.
* Berzerk and Evil Otto, who shows up if you are slow in clearing the room of robots. Not only was he invulnerable, but could pass through the electrified walls that would kill anything else that touched them, including the robots that were also trying to kill the player. Otto would also destroy any robots that were in his way, and in some rooms the only way to get the bonus points for killing all the robots was to lead Otto through a walled off chamber in which the last robot was hiding. Otto would gradually speed up over time, and instantly go to maximum speed (twice as fast as the player) once all robots in a room were destroyed, making death at his hands unavoidable unless the player was very close to an exit.
* Berzerk, Evil Otto was supposed to be redrawn as something looking more intimidating, but the smiley face used as a placeholder proved to be effective enough.
* Berzerk in 1981 — a man had a heart attack immediately after playing it.
* Berzerk, one of the earliest games to feature synthesized speech, was set in a world of killer robots who spoke such phrases as "the humanoid must not escape" in monotone.

* Besides just eating brains and nothing else, illithids are extremely discriminating about their food. Firstly, they prefer complex minds, packed with knowledge and experiences and as intelligent and emotionally rich as can be achieved — typical peasants may just make do, experienced leaders and adventurers are relished, a sage or wizard is a rare treat. Secondly, they also have strong opinions about which species they most enjoy eating. Troglodytes are repulsive, and only eaten to avoid starvation. Goblinoids, orcs and ogres are acceptable, with surface-dwelling ones being preferred to their subterranean cousins, but are never a first choice. Humans, elves, drow, duergar and dwarves, being generally more intelligent and emotionally developed, are favored staples of the illithid diet. The long-lived, elusive and highly emotive fey are rare delicacies. In an emergency, illithid

developed for use in hand-to-hand combat. It's called MCMAP (Marine Corps Martial Arts Program). You won't find schools in shopping centers that teach MCMAP, though, as only members of the US Navy or Marine Corps are permitted to study MCMAP. MCMAP is unique in that it is the only style in which people train in full combat gear, including training in the use of pocket knives and bayonets as offensive weapons (as opposed to something you might disarm an enemy of and use it against him). Basically, it's Ninjutsu adapted to modern combat.

* Best Fiends has a tendency to use eyelashes, with the occasional lip tint, to signify the female Fiends. However, some girl Fiends avert this, with only their bios giving their proof of being female, such as Karma (a chameleon that goes by feminine pronouns despite having an unknown gender) and Dina (a hickory horned devil caterpillar who has been mistaken in-universe for Gene, a blatantly male Fiend).
* Best Fiends has a Webby Award-winning commercial advising the players against their game, tilted "Don't Download Best Fiends".
* Best Fiends short "The Immortal Cockroach". The Slugs have a crack team of assassins sent out against Lapoleon, who they have mistaken for the Fiends’ leader. Unfortunately for the Slugs, he’s unkillable, being a cockroach, and only leads to the Slugs being taken down, while Lapoleon remains oblivious. However, the final attack reveals that this has been attempted on him multiple times, and he's just gone passive against them, to the point of having a bomb explosion be considered "cliche".

* Best Her to Bed Her will only marry or have sex with someone who has defeated her in combat.
* Bestia is, in fact, a man. A man who has completely lost his humanity, but a man nonetheless. And that other beast, which appears during the story? It was in fact Pauline, who ends up slaughtered by the very man she loved.
* bestial goblin, and once someone's soul has been digested by a barghest, nothing short of a miracle will bring them back to life. Fortunately, engulfing them in flames has a good chance of sending a barghest back to Gehenna.
* bestiality if Sam was in animal form, it'd just be nature. Andy is disgusted by even thinking of this. It's unknown if Sam does this or not.
* Bestiality Is Depraved: Gags involving humans having sex with animals.
* Bestiality Is Depraved: In the same game, you get Cook-Cook, flamethrower wielding psychopathic rapist, who goes berserk when you kill his pet brahmin (mutated cow), and who really stinks.
* Bestiality Is Depraved much interest in things four-legged and otherwise.
* Bestiality Is Depraved: Sex with humanoid creatures is ok, but sex with animals is too far.
* Bestiality Is Depraved), you can't get their consent, and therefore, bestiality/zoophilia can be considered rape.
* Bestiaries have added a profusion of river giants, wood giants, tomb giants, desert giants, cave giants, jungle giants, sun, moon and eclipse giants, mountain giants, cliff giants, ocean giants, plague giants...
* Bestiary 2. They're basically just magically animated versions of standard scarecrows, but their touch fills victims with uncontrollable terror while their gaze hypnotizes others into standing in place while the scarecrow tears them apart.
* Bestiary 5 brought in Lovecraft's Deep Ones, along with the enormous and godlike Elder Deep Ones and, as a playable race, Deep One Hybrids.
* bestiary As absurd as it sounds, it was mostly perpetuated so people had an excuse to eat geese during fast days.
* Bestiary to include a new handful of drake species themed around a new specific environment — sea drakes, river drakes, jungle drakes, mist drakes, spire drakes, rift drakes, desert drakes... — who otherwise share all but a few abilities and weaknesses.
* "Be still, Mouse. You can change your pants in a moment." Comes after two
* "Best in Show" begins with Jimmy entering Goddard in the Retroville pet show, and competing against Cindy, who enters Humphrey. Goddard appears to win the pet show at first, but Cindy points out that Goddard is a machine and technically not a live animal. This results in Goddard being disqualified and Humphrey winning by default.
* Best in Show has Gerry Fleck, who has a birth defect of two left feet, endorsing a shoe line made entirely of left shoes. They end with an expert in the field who says "Take it from a professional: these shoes are really different."
* Best in Show: While preparing their terrier Winky for the dog show, Gerry and Cookie Fleck keep running into guys that Cookie has slept with.
* Best in Show. While the book does have a psychic, it does not involve any predictions that need skeptical treatment.
* Best in the World to pay tribute to Aguayo Jr by picking a fight with Jay White

during their match with The Motor City Machine Guns, causing enough of a distraction to allow the Addiction to cheat and retain their tag team title belts.
* Best Jeanist is the No. 4 (later promoted to No. 3 after All-Might's retirement) Pro-Hero who's quirk "Fiber Master" gives him control over fibers, denim being the most effective.
* Best Jeanist tangles up both Dabi and Gigantomachia, revealing he had survived his supposed death at Hawks' hands.
* best just corrupted Men. Heck, even a proud and skilled Dwarf warrior like Gimli would rather not fight Men if he can help it, commenting that Dunlending hillmen "seemed over large for me" when justifying why he didn't intervene against some of them. All three races live longer than Men and seem to have better endurance, but that hardly cancels out their other disadvantages.
* Best Kept Secret, Roy goes on dates with women to make it seem as if he's a womanizer. This is all to distract from his lieutenant Riza, who's secretly his wife.
* Best Known for the Fanservice: A work of fiction is primarily remembered or talked about because of a scene featuring fanservice.
* Best Known for the Fanservice: The main reason a work is remembered or talked about is because of a scene featuring fanservice.
* Best Known for the Fanservice: The main reason people are familiar with this work of fiction is because of fanservice that was featured in it.
* Best Known for the Fanservice: Your work's merits are ignored because people only watch it for the pool party scene.
* best known for the line "How dry I am," is heard often during drunken antics.
* best known for voicing, whose series director Mark Risley did storyboarding for).
* Best Love, Ae Jeong drinks an entire bottle of wine in one gulp to make a point, Jae Suk gives a drunken confession of love to his boss, and Aw Hwan mumbles a request to Jenny not to drink red wine with anyone but him. And so on...
* Best Love: Do Ko Jin takes Gu Ae Jeong to a park overlooking the river, and attempts to tell her how he feels, all while standing under the flowering trees.
* Best Love: Gu Ae-jung gets so jostled by reporters trying to interview her that she loses a shoe.
* best man's toast at John Watson's wedding. He decides to tell John about it, and than Sherlock, John and Mary solve the case together, and John's old Army commander doesn't get killed.
* Best Motoring, from December 1987 to June 2011 (22 and a half years)
* best must check on the device to ensure it is not being broken into.
* Best of All Possible Worlds: Attempts to improve your reality creates more problems.
* Best of all, the turns do not alternate; the players write down their movement orders for the turn, fire ordnance based on anticipating the enemy's movement, move their ships, resolve ordnance fire and then take turns firing the main ship-to-ship weaponry - all in the same turn! Makes the game a lot more realistic, and more about actual tactics than quirks in the rules.
* Best of Both Worlds Part II indicates that the Borg intend to assimilate entire races.
* Best of Both Worlds" two-parter features the first Borg invasion, which consists of a beeline to Earth in order to assimilate humanity.
* Best of Buster Day"), various garbage falls on Buster when he opens his locker in an attempt to clean it out for the Student of the Day contest. Plucky, who is wearing a gas mask, tells Buster he'll never win the contest with a messy locker.
* best of temperatures than most species can, which has probably contributed to the early spread of humanity across the whole planet.
* Best Of The Best 2 movie indulged in this and had one member of the martial arts team killed in such a match, pulling his friends into it too.
* Best of the Best has a training montage showing all the hard work of the U.S. National Karate Team, set to a song with the same title as the movie.
* Best Of The Left podcast, after having to do multiple episodes on the issue, he entitled the final 2013 episode on rape culture 'Humans are just terrible'.

* Best of the lot: Vic Sage's red Volkswagen Beetle in Denny O'Neill's run on
* Best of the West, a villain comes to town backed up by a group of henchmen referred to as "The Shenanigans". Eventually a standoff leads to a parley in which the marshal, holed up in the tavern, calls out to the villain that he can come into the tavern to discuss a truce—and then he adds, "but no Shenanigans!"
* Best of the West saloon owner walks over and casually opens the window. Glass is expensive, you know.
* Best Of The West was an earlier (1981-1982) comedic take on the western.
* Best of the Worst', an educational cartoon promoting abstinence. In the video, a boy is driving his girlfriend somewhere and complaining that she's leaving town soon. Tim quips that he's bringing her to "Fuck Butt Point" to get one last chance with her. Surely enough, the couple immediately drive past a sign reading "Windy Point," and the boy starts pressuring the girl to have sex with him.
* Best of the Worst) by covering the VHS tape in birdseed and letting a bunch of seagulls attack it. They quickly discovered seagulls don't eat birdseed, and in fact flew away when Mike scattered seed near them.
* Best of the Worst features a rotating panel of four contributors at a time, but amidst about a dozen male regular and recurring contributors there has only been one woman to appear more than once: Jessi. However she stopped appearing, for reasons unexplained, reducing the panel to an all-male roster.
* Best of the Worst has Len Kabasinski suspiciously eyeing the wooden crate Jay is standing on, with Jay reacting with feigned ignorance. The scenario is then repeated with Mike, who is already tall enough, and subverted with Josh, much to Len's surprise.
* Best of the Worst subcategory of episodes have the crew spinning a wheel in order to pick 3 weird old VHS tapes to watch and review.
* Best of the Worst, the panelists say that the film plays out like a parody of incomprehensible, avant garde art films. It consists of four performers making repetitive movements and meaningless vocalizations against a white backdrop, intercut with a turtle wandering around various dioramas. They note that the synopsis on the back cover is such a surface-level description of what appears in the film that the author must have been just as baffled by it as they are.
* Best of the Worst well beyond the fanbase of the show, to the point that few people are aware that it's Rich Evans in the photo.
* best ones. In some versions, her entire firm is occupied with superhero law, while in others, she's employed at a more prosaic firm where the senior partners expect her to attract superhero business (and she's been fired for failing to do so).
* Best (or worst) thing about it is that there are FAR too many people in the comments going "Anyone who likes this song isn't a true Slipknot fan!" "This is terrible, Bieber sucks!" etc. It's pretty funny to watch.
* bestowed a number of Kryptonian powers as the plot demanded during his time as Jor-El's emissary.
* bestowed with the talents and characteristics of the original owners to be available to dress up instead. She comes alive too and happily reunites with her love. As both the scarecrow and the mannequin steadily become human-like due to the costumes, they decide to join the circus.
* Best Player, a bully gives Sheldon a painful wedgie just as he was about to ask Chris out to prom.
* Best Player, when Quincy tried to tell one of his adversaries he really loves her mother, it was taken for a provocation.
* Best Practices for Religious Representation, Part I: Check for Traps" (in the section called "Did You Know This Was Religious?" between halfway and three-fourths down the page), James Mendez Hodes also points out various terms used in Dungeons and Dragons which have origins in religions whose populations have suffered historic discrimination and oppression, and again suggests alternatives to make the game playable without abusive appropriation of marginalized peoples' cultures and concepts.
* Best real-life subversion was when a fellow recently transferred from the Army

to the Air Force was sent out to get "100 yards of flight line". Turns out that A) he used to be a Combat Engineer, B) his former unit was based in the same town, and C) Combat Engineers love playing pranks. A quick phone call resulted in a big pile of busted up tarmac being delivered to his new unit's office.
* Best seen in Midbus' last battle. Fawful is uneasy and considers joining the battle out of concern for Midbus. However, he decides to let Midbus go at it alone out of respect for the pig's pride, but not before using a ray gun to give Midbus some extra power and even ice abilities.
* Best seen with the Imperial faction, which uses units inspired by its real-life
* Best Seller approaches a detective turned crime novelist, wanting to sell his story.
* Best Seller asks the name of a guard before he kills him, then uses the name to get another guard to open the door.
* Best Seller Cleve. He tells her to look out the window; she doesn't and watches horrified as he shoots her guard with a silenced pistol.
* Best Seller. Cleve talks to his former employer via the school speaker system, just when he's about to call the police. Cleve uses an extension, which also cuts off the call.
* Best Seller. James Wood's character notes that the cuffs hurt more than expected while rubbing his wrists, after being (temporarily) arrested by the detective protagonist.
* Best Served Cold by Joe Abercrombie, poison-master Morveer keeps himself resistant to many of his own poisons by regularly consuming them.
* Best Served Cold: Discussed. When a notary claims that "mercenaries aren't like they used to be," the mercenary Nicomo Cosca counters that it's only natural for people to mistake the past as better than the present because they were younger and more idealistic. Some people get better and others get worse, but the world stays the same.
* Best Served Cold: Duke Salier shows off two sculptures intended to be displayed as a pair: one of the artist's mother and the other his favorite whore. Monza snaps that she has no time for artists' mothers and whores.
* Best Served Cold - He will get his revenge no matter how long he has to wait.
* Best Served Cold: I'm gonna take my time in paying you back for what you've done to me.
* Best Served Cold spoils two twists by the fact that the narrator reads dialogue of mysterious characters using their distinctive speaking style, making their identity obvious before the text reveals it.
* Best Served Cold: The effete General Ganmark seems to be a "lead from the rear" type, but it turns out that he's one of the best swordsmen in the world, holding off both Monza and Cosca at the same time.
* Best shown by a parallel universe where she had succeeded in marrying her Scrooge... And immediately stopped working and started enjoying the good life, becoming one of the reasons the Scrooge of that universe was on the verge of bankrupt. Then her husband managed to switch places with the Scrooge of the main universe, and when Scrooge decided to restore his counterpart's financial empire to its former glory and put her back to work she
* Best shown in Grunt's loyalty mission, where after defeating a Tresher Maw,
* "Best Song Ever" by Katie Armiger is about how the singer has heard a song that she considers the "best song ever" because it parallels the crumbling relationship she's been in, and tells her that everything will be patched up ("You're gonna love me forever / According to this song, according to the best song ever").
* Best Student Council can use and an underground tube (with high-speed roller coaster-style chair) connecting the dorm and main school building.
* Best Student Council had an episode with the same title as the trope name, wherein Cyndi Manabe has been writng letters to her mother, telling lies so that she won't be worried about Cyndi's welfare. This would be fine, except the lies are ridiculously extravagant.
* Best Student Council has a large chunk of the student body in... admiration of the student council president, Kanade Jinguuji.

* Best Student Council is a possessed puppet with supernatural powers.
* Best Student Council is scouted to become one. Shame that didn't work out for her.
* Best Student Council. Most of the smarts seem to have been given to her snarky hand puppet Pucchan.
* Best Student Council of protagonist Rino. But when the other characters lock the puppet away (thinking Rino was trying to use Pucchan as an excuse for pranking) the puppet vanishes on its own, causes more havoc, and speaks independently of and controls the hand of whoever else he winds up on.
* Best Student Council, Rino dizzily says, "Uh... I couldn't eat another bite." Pucchan replies, "You just got attacked! This isn't the time to be sleeping!"
* Best Student Council, who serves as a member of the assault squad but fights by throwing playing cards. She once took out a basement full of paparazzi with them.
* Best summarised during Massey's first appearance, when the Partnership Collective attempted to link him to their
* Best summed up when the team is captured by a native tribe. An actor companion (who pushes how "civilization" is ruining the pristine world") thinks they'll be okay as this is a group of
* best the races of the galaxy can do against the Reapers. They can score a victory here and there, but ultimately it's a delaying action until they finish building the Crucible.
* "Best Trends Forever!" has Rarity doing a fashion report for the school news channel, and having to choose between Twilight Sparkle, Rainbow Dash, or Pinkie Pie as inspiration for a new fashion trend.
* Best way to use the rapier; granted, it's capable of shallow cuts, but the sword's design makes it such that it's more effective at stabbing opponents.
* Best Week Ever, we don't need another one-host pop culture mocking clip show.
* Best Wishes and become respected agents, even managing to save Giovanni's life at one point.
* Best Wishes, Bianca also does this. This element isn't in her game character.
* Best Wishes by having Ash catch more than six Pokémon at a time and putting them into rotation.
* Best Wishes! episode; with people saying his scathing thoughts statements that began the comparisons went too far and the forums for his website being filled with angry comments.
* Best Wishes especially after her first appearance. So far, they have spent the entire time at Don's tournament taunting each other and being each other's throat.
* Best Wishes "Kaminacroc"). Its sunglasses give it self-confidence, which it loses if it loses its sunglasses. Ash ends up catching it during its fourth appearance and later evolves it into Krookodile. The sunglasses seem to grow in size whenever the Pokémon evolves.
* Best Wishes saga closes with a picture of Ash and all of the Pokémon he has under his care bunched together in one frame.
* Best Wishes! Season 2: Episode N onwards, the motto is 100% stock footage.
* Best Wishes series, Cilan fills this role as his gym's general theme is that of a restaurant and is dressed as a waiter.
* Best Wishes. Though he's far less skilled than Gary or Paul, he's every bit as arrogant, with his early wins against Ash fueling his ego so much that he assumes the entire cast is beneath him. Once again, a crushing loss late in the series is what gets him to change his attitude, in this case to his idol, Alder.
* Best Wishes we have Cilan going into one of his long-winded explanations/speeches each ep, usually accompanied by Iris looking bored and making a "there he goes again" type remark.
* Best Wishes when he was losing in the double battle match. However, he states that he is annoyed with losing, but decides that he'll get better to prevent losing again. Then again, this is toward Cilan. He seems disturbed having a draw with Ash though.
* Best Wishes who plays a somewhat major role in the first few episodes of the next series joining the group for the small remainder of the series. Granted, we have to

sit through another 6 filler episodes before Ash finally reaches Kanto.
* Best Woman: A bride and groom have friends of the opposite sex fill the role of best man and maid of honor.
* Best Woman: The bride and groom have friends of the opposite sex fill the role of best man and maid of honor.

* be - surrender immediately in the face of military oppressors, because then the oppression won't be too bad, and they can slyly end up running things their way in the aftermath.
* Beta64 started out documentary-like but received a more comedic overtool with the
* "#BetaAsFuck | with Peter Coffin | Song A Day #2160" had several commenters confused on whether the song was a parody or thinking that it is. It seems like a parody based on the several negative comments shown at the beginning and the duo singing about how they're proud to be beta males, a label typically considered negative, but the song is ultimately geniuine.
* Beta Bitch According to creator Lauren Faust, Silver Spoon was given glasses as a somewhat counterbalance to the character of Twist, another maganekko.
* Beta Bitch: I'm the second-in-command! I may not be alpha, but at least I'm nowhere near a loser like you and your friends!
* Beta Bitch, serving as their Class Rep... and as this world's Ladybug heroine, Red Queen.
* Beta, clones are created by extracting the soul of the original person (the "First") out of his/her body, then implanting a computer chip with information into said body.
* Beta, clones have computer chips implanted into their brains that instruct them on things from vocabulary to emotions to ways of pleasing their human masters.
* Beta Colony is a marginally habitable world, and has strict population control. All babies must be licensed, though getting a baby license seems to be about as difficult as getting a driver's license (at least for the first two.) Since contraceptives are legally required for all females (and hermaphrodites), all sex between consenting individuals is considered to be normal recreational behaviour, though they do have statutory rape laws.
* Beta Colony is described has having very relaxed mores. The age of consent is approximately puberty, and for girls there is a small rite of passage with the first contraceptive implant, and the Orb of Unearthly Delights is a bordello famous throughout the galaxy. There are no prostitutes as such, but there are plenty of licensed
* Beta Colony, where the technology of the replicators was invented, has 3/4ths of the population come out of a replicator, with the rest being born naturally, and it's fairly consistently shown replicator births to be a standard practice throughout advanced culture.
* Beta Couple: A secondary couple who acts as the more stable foil to the main couple.
* Beta Couple but Linda first pursues Ta when she thinks Sammy won't marry her, only to eventually come back to him.
* Beta Couple Clara and Mateo have elements of this - she's from a small rural village and he's from the same class as Alberto.
* Beta couple Greg and Jenny are frequently tripped up by his snobby mother.
* Beta Couple in the first episode of Season Three in just one sentence, and from that moment on she was the natural antidote to his tendency to gloom, just as he was her natural antidote for her tendency to emotionally distance herself from everything.
* Beta Couple is a middle-class man who loves a poor woman but chooses not to pursue her for his family's sake.
* Beta Couple personality. Had there been no meddling, those two would have gotten engaged after the Netherfield ball in the first third of the book.

* Beta Couple: The less dramatic pairing that highlights how screwed up the main pairing actually is.
* Beta Couple, to the point where the couples are reversed in the modern consciousness.
* "Beta Delta Gamma" has a group of frat brothers heavily sedate one of their passed-out-drunk brothers and make the other passed-out-drunk brother think he killed him in an alcoholic blackout. Too bad he decided to bury the "dead guy" on the beach and the high tide washed away footprints and other traces...
* Beta. He's about to kill Negan when Daryl sneaks up behind him, slashes him across the arm, and drives his two knives into Beta's eyes the second he turns around. After that Beta simply accepts his demise and makes no last attempt to fight back before the walkers swarm him.
* Beta House, Edgar of Geek House has a sheep fetish, resulting from being forced to rape one during a fraternity initiation rite. He was the only one to actually do it; the other initiates jerked off into the condom or simply gave up.
* Beta-level simulations are generally not considered sentient, although a
* Betans can be kind of like this, everyone making a fuss about how morally superior they are. Mind you this is a planet whose GNP is based on weapons development and sex tourism.
* Beta Ray Bill has his battleship the Skuttlebutt, built from the same technology that empowers him and programmed to assist him in any task. In his 2021 solo series, she gains the ability to reconfigure her parts at will and uses this to incarnate as a fembot to talk to him face to face.
* Beta Ray Bill's hammer, Mjolnir, which was of course intended to be a shock to both Thor and readers.
* Beta Ray Bill's starship. She was created by the Korbinites, which also created him.
* Beta Ray Bill. Without it, he's tough, but not impossibly so. Gladiator is quick to note that any of them could have beaten him at that point, to which She-Hulk responds by... saying something outrageously sexist.
* Betas and gammas are low-powered mutants whose abilities are still useful. You'll rarely find these on a team, but the school has several.
* Betastuck: Despite not acting the way his programmers expected him to, Doc Scratch was merely fulfilling his purpose to make the necessary preparations for Lord English's arrival.
* Betastuck: One of the main reasons for the creation of Homestuck was to show off how far they've come in AI technology.
* Betas, Zuckerberg-esque entrepreneur Zack Casper is one. Protagonist Trey wants to be like Zack, whose chatroom was a haven for young Trey after the divorce of his parents, but he later discovers that Zack frequently guts Silicon Valley startups out of greed, and has no interesting in changing the world for the better.
* Beta Test: A development version of the game, built to test how the various components of the program interact with one another and the computer. Some developers have an "Open Beta" process, giving access to a pre-release version of the game to the general public (or play testers selected from a public pool) for more extensive testing.
* Beta Test Baddie: They feel incomplete, so they take out their rage through evil.
* Beta testers who took part in the GOG Galaxy early tests (simply signing up for the service) received a copy of the 1999
* Beta Triangle, with Nikolai/Maria going on to become the full-fledged Beta Couple.
* Beta Unit the beta unit placed on the dashboard just beforehand, however...
* beta version. It's mostly one-sided. Hideaki strives to be better than Shizune as he is the heir to their family business (because their father finds Shizune unsuitable due to being deaf) but feels his father is choosing him simply because Shizune's disability, rather than his own merits.
* Beta versions of Windows 7 had a wallpaper with a fish (a betta to be exact) blowing 7 bubbles. This is a pun on Windows
* Betazoid males have names of one or sometimes two syllables (Tam, Cort, Gart,

Hent, Ven), the females of two, three or four (Anissina, Mollarana, Damira), while their family names often end in "n" (Enaren, Kaldarren, Povron, Tevren) or "x" (Grax, Xerix, Mryax, Xerx).
* Betazoid males have names of one or two syllables (Tam, Cort, Gart, Ven), the females of two, three or four (Anissina, Mollarana, Damira), while their family names often end in n (Enaran, Kaldarren, Povron) or x (Xerix, Mryax, Xerx).
* Betelgeusian names seem to almost always have an "uu" sound, an "i" sound, a "t" sound and an apostrophe (e.g. Chuu'iik Hru'uith, Kuu'iut, Hrrii'ush Uuvu'it, Chi'iot).
* Betelgeusians like the "uu" sound, and apostrophes, e.g. Kuu'iut or Uuvu'it. Rhaandarites like the "aa" sound (Gaanth, Zaand).
* BET frequently and with very little provocation, and seemed obliged to do so every Valentine's Day. However, after Monica Wright and Kevin Durant split, the novelty cooled off, and demand for the movie's broadcast followed suit.
* Beth Ann and Robs' daughter Emily talks about how she knows her mother
* Bethany can be convinced to do this in the Templar Ending by a Warrior or Rogue Hawke, although she's
* Bethany/Carver also become this if they end up becoming Grey Wardens, or Circle-Mage/Templar. What they did in the last 6 years before Act 3 is left vague.
* Bethany Hawke The group needs to know for sure whether or not the people they're seeing are real, but they all have such an emotional response to the situation that they can't trust their own judgment; so she employs the dog, whose breed is renowned in the setting for its extremely high intelligence and good judge of character, to make the call.
* Bethany herself gets a turn at being a Cool Big Sis if she survives the prologue and is later
* Bethany is this for Varric, and they both raise a glass "to letting go and holding on, in that order."
* Bethany's Sin. They don't just spurn Hercules, they deliberately turn their men into his hapless, weakling opposites.
* Bethany tends to have more favor for Domeric. Granted, she's tried being a loving mother to her daughter, but Drucilla's growing hatred for her mother and her psychotic tendencies put a lid on all her attempts.
* Bethany, the lighting momentarily amplifies then blacks out when one deals a blow to the other.
* Bethany, who enters the game long after the others, ends up with the only remaining avatar: Cyclone, a
* Beth, being raised on a barn, also gets along well with many of the animals. Her favorite one is her pet pig whom she calls Big Bertha. She even claims to have signed up for Total Drama Island so she can find a boy who likes barn animals as much as her.
* Beth Chapel, a protegeé of the original Dr. Mid-Nite, took on his role (with a slightly different spelling) as Dr. Midnight.
* Beth Ditto from The Gossip's regular stage outift is just underpanties and sometimes a bra.
* Beth Ditto. Openly lesbian but has also been in relationships with transmen.
* be. The character mentioned above even refers to her as "Miss World" for the duration of the arc.
* be the first man to sleep with any woman) Cu Chulainn. Thus, Conchobor chose to interpret his obligation as literally as possible.
* Beth Elderkin was also a fan of Doug's, and pitched a clipless review of
* be the product. So, people buying perfume want to be Gwyneth Paltrow.
* Bethesda. Bethesda is very strict with this policy, as they forbid any discussion about this subject on their forums, while also allegedly removing YouTube videos showcasing mods that allow players to kill children.
* Bethesda - but noted that due to the money lost from this sale they would have to double the price of horse armor.
* Bethesda character, the child could get free games for life. At least one couple did it, with their son Dovahkiin.

* Bethesda forums for declaring the game some sort of propaganda - exactly which kind of propaganda they don't seem to agree on.
* Bethesda games in general have a tendency to hire prolific actors to voice generally small parts:
* Bethesda is well-known for being on good terms with the modding communities for their games, they're particularly strict about any assets from their games being used and recirculated in mods, even mods for their own properties. This has lead to unique roadblocks and challenges for fan communities looking to remake older games in more updated engines.
* Bethesda-like, in stark contrast to its isometric, turn-based origins.
* Bethesda of movies based on video games, it is not surprising that Bethesda is so hesitant.
* Bethesda) only to be rewarded with a paltry sum of caps that doesn't even cover the stimpaks and ammunition you used in the process, as well as the weapon/gear repairs you need after. Luckily, whoever/whatever it was you were killing usually has enough loot on their bodies and in their lair to sell and still come out ahead.
* Bethesda sister series, this is known to spark witty remarks from NPCs as well.
* Bethesda trying desperately to jump on the live-service bandwagon but it does so with sloppy execution.
* Bethesda Twitter account simply stating "We're not involved with the movie".
* Be The Seadweller Lowblood, and stopped using polls, declaring this:
* Be the Sea Dweller Lowblood. This means that, while red- and orangebloods live in luxury, and gold-and- greensbloods still enjoy good living conditions, the blue-and-violetbloods live in the poorer neighborhoods, are considered dangerous and uncivilized unless they take anger-reducing medication, and serve as a general worker force, while sea dwellers live in abject poverty in the slums.
* Be the Sea Dweller Lowblood. This means that, while the goldbloods and jadeblods have very good living conditions, the blue- and violetbloods get the slums, while seadwellers live in abject poverty in the slums' slums.
* be; the very biggest can hold direct control over dozens of worlds and be influential in hundreds more. And yet despite all of this, it's just a drop in the ocean compared to the Imperium's million worlds and the Adeptus Mechanicus.
* Beth from the old Phyllis Reynolds Naylor books "Boys vs. Girls" was constantly reading horror books, but it made her a nervous wreck, while her drama queen little sister Caroline loved everything bloody and disgusting as long as it was dramatic.
* Beth Hart, with several of her albums charting well in Germany, Switzerland, and the Netherlands.
* Beth has a lot of issues from Rick abandoning her during her childhood, resulting in her attempts to get him to stick around even though his presence damages the family. Yet when Mr. Hapsburg’s son shuts down the company specifically because his father did the same thing to him, she tries to get him to reconsider, telling him that St. Equis Hospital is a family and while they do put in a lot of hours and there are sacrifices, they save lives. This line says it best:
* Beth invents a word to see if it will catch on ("If my boyfriend acted like that, I would go absolutely bitchcakes"). By the end of the episode, the radio station's owner, Jimmy James, is using it. Perversely, the word
* Beth Lestrade, fifteen in her first appearance and then a physical age of seventeen throughout the events of the "season finale". Justified in her being the daughter of a New Scotland Yard detective inspector.
* Beth Lestrade is shot to death but returns to life when the timeline in which her death occurred is retconned to never having happened.
* Beth Orton), whose set included a track called "Weird Beard" which required somebody to play a pair of scissors.
* Beth Phoenix and it can be a little hard to see them as outright heels.
* Beth Phoenix as a result, even though "The Glamazon" was the obvious heel in all their other matches.
* Beth Phoenix had been de-emphasized as the dominant monster heel due to her angle with "Santina" Marella as well as losing cleanly to other divas on the roster. In

order to elevate her to the top of the women's division, WWE had two Worf Effect moments for her:
* Beth Phoenix, had to take a year off from wrestling after becoming pregnant.
* Beth Phoenix is muscular like Chyna, and also has a very soft, sweet sounding voice. She doesn't have a lisp, though.
* Beth Phoenix, neither competitor was required to say the words "I Quit" into a microphone, but rather just tell the referee whether or not they gave up.
* Beth Phoenix suffered a swollen eye after a botched leg drop from Alicia Fox and was taken off television for five weeks — despite being the reigning Divas' Champion at the time.
* Beth Phoenix. The last two were able to recover and join the fight against DEAR.
* Beth Phoenix (they have a child together) who, like the others, is very fit but doesn't have the biceps she does.
* Beth Phoenix, who she noticed was dancing along to it. Katie quickly cut it out.
* Beth Phoenix, with her being put into squash matches with tiny, nondescript girls - who got little to no offence in as she bitchslaps them from pillar to post. How this was supposed to get her over as anything other than a vicious bully is beyond comprehension...

* Beti-Pahuin Mythology. Brides could be very expensive in Fang-Beti culture, so many men chose to just grab a girl, run away, and hope her family didn't kill him. Women performed the bulk of food production, so more wives meant more workers and more food and by extension more influence. A insignificant portion of wars real and mythical were fought for the purpose of kidnapping and/or rescuing women. The family drama of Ekang Nna all began with his abduction of Aloume Ndong Minko.
* Beti-Pahuin Mythology features Okeng Be Nyaboro or “Sword of the Knowing”. Also nicknamed Ebabatsila-Tsilébaba or “Jamais Vu” (the opposite of Deja Vu). Only those who crossed the darkness between life and death could wield it.
* Beti-Pahuin Mythology for most of his life. Some say he was cursed from the very beginning due to being born from such sin. On the other hand, Akoma Mba was bullied and tormented by the Esangom tribe for most of his childhood due to being inbred, it isn't too shocking he snapped under the abuse. He went from childhood bully to bloodthirsty tyrant in no time. However, over the years he calmed down and regretted much of his actions.
* Beti-Pahuin Mythology produced the Ebigane. It was a monster with the body of a mouse, horns of a buffalo, tusks & size of an elephant, and wings of a bat. Sometimes they could be half human as well.
* Beti-Pahuin Mythology: The fearsome immortal warrior king Akoma Mba was transformed into a beautiful woman with the aid of his aunt Eyaga’s ghost. Every man was infatuated with rule 63 Akoma Mba, having no clue who this mystery woman was. They hounded for “her” hand in marriage but “she” would only claim to have eyes for the warlord Abo Mama who had singlehandedly vanquished Akoma Mba’s nigh invulnerable army of giant immortal warrior sorcerers. Akoma Mba was able to make Abo Mama fall in love at first sight and

learn the secret of the scepter which made Abo Mama so powerful, using his low guard to defeat him. Mind you Akoma Mba in his normal state is a tall, bald, muscular, large eared, tattooed, sharp toothed, and scarred gentlemen who has killed thousands in his time.

* Bet Me by Jennifer Crusie (pants version) Subverted, in that Cal didn't actually make that particular bet. As he says repeatedly. Played straight in that he did make multiple other bets (and passed the profits straight on to Min; is that another subversion?).
* Bet On Soldier. B.O.S. is the name of the show, in which contestants and viewers bet on the outcome of one-on-one mercenary battles. Which also decide the tide of wars. In game, these function as boss battles.
* be too stupid to understand that there are consequences for their actions.
* BeTrapped! has the Bloodstone, a large, flawless ruby. Legend has it that after five men stole it from the African tribe they died in specific ways:
* Betrayal at House on the Hill always has a random layout, and can have things such as walls that devour you and spit you out elsewhere. It is possible to have a non-euclidean house where the rooms loop around the front door the players 'entered' through and connect to the foyer (the starting room) on the opposite side. And also to have a second story of the house that is twice as large as the ground floor.
* Betrayal at House on the Hill, and get furnished with a Dragon. The game has "betrayal" in its name for a reason.
* Betrayal at House on the Hill begins with the doors of the house locking themselves behind the adventurers. Some scenarios require the heroes to figure out how to unlock them and escape.
* Betrayal at House on the Hill, but features many staples of the genre, such as a graveyard, underground lake, locked vaults, and mysterious eldritch rooms.
* Betrayal at House on the Hill). Character stats start dropping rapidly once a certain age is reached, but the youngest characters actually get a stat boost for a while as they become grownups.
* Betrayal at House on the Hill dumbwaiters can allow characters to move between different floors of the mansion.
* Betrayal at House on the Hill, explorers of the eponymous house have a chance of coming across a medieval torture chamber complete with iron maiden and floor drain in the basement.
* Betrayal at House on the Hill has an event called "Creepy Puppet". The description: "You see one of those dolls that gives you the willies. It jumps at you with a tiny spear."
* Betrayal at House on the Hill in just about every scenario, unless the Heroes completely stomp out the Traitor or achieve their goals quickly. Likewise, it's almost bound to happen in a game where the Traitor wins.
* Betrayal at House on the Hill involves your party being sucked into a box which is basically a copy of the game you're currently playing without explicitly saying it is, making the players completely rebuild a new house map and play through it within 30 real-world minutes. And if you're really unlucky, you might end up triggering a new Haunt within the one you're currently trapped in...
* Betrayal at House on the Hill, Jenny LeClerc's base stats have a near-perfect distribution of might, speed, sanity, and knowledge, with each stat starting in the median of their respective ranges.
* Betrayal at House on the Hill moves around the house somewhat randomly (you roll to determine which floor it ends up on, but get to choose where), but on a roll of 0 will crash into the basement (which is dangerous in its own way) and harm all occupants in the process. Also, when the Haunting begins, the Traitor has complete control of the elevator and can make it go where they want, because they are "on the same side". Since the Traitor is unquestionably evil...
* Betrayal at House on the Hill. The entire premise sounds like a middle installment in a long-running slasher movie franchise, doesn't it?

* Betrayal at House on the Hill, the only way to actually get anything done for the first half of the game is by splitting up. For the second half of the game... most of the time you want to get back together as quickly as possible.
* Betrayal at Krondor being actual Squishy Wizards; They are less tough than the warriors and casting spells by itself makes them more vulnerable to going down if an enemy lands a hit on them, but in-game logic dictates that they're actually pretty physically tough to be able to cast powerful spells for a prolonged period of time. That being said, Owyn begins the game with strictly inferior weaponry, strength, health, and defense, eventually climbing his way to badass only by participating in the majority of the game's battles, stat-boosting sidequests, and training sessions. Another playable spellcaster, an old man named Patrus, has such horrid physical stats that he'll probably spend most fights on the ground, bleeding to death.
* Betrayal at Krondor damage to enemies (healing them) if you grind your Strength high enough.
* Betrayal at Krondor had a mix of ordinary and humorous quips on the gravestones, and you were also able to dig up the graves. Most graves had nothing special, some had hidden items hinted at by the eulogy (for example, a gravestone reading "Drank his milk every day" hid a few vials of milk), and some had "The fiend beneath this stone is trapped by dirt, not by death": Zombies!
* Betrayal at Krondor has a subversion of this in Gorath, a moredhel whose distinguishing feature is his weariness of the self-destructive battle-crazed ways of his people.
* Betrayal at Krondor has Gorath, whose entire life has been tough decisions upon tough decisions (with the occasional sprinkling of disaster and tragedy), but - as befits a badass 260-year-old dark elf chieftain - keeps a tight lid on it, because he's wise and tough enough to draw whatever conclusions need drawing, take it like a man, and move on the next objective already.
* Betrayal at Krondor has no romance, Disregarding Owyn's crush on Gamina or references to James's one-night-stands. This is facilitated by all six of the main characters being male.
* Betrayal at Krondor has Squire James finding himself suddenly in charge of the entire Kingdom defense force guarding Northwarden against the moredhel invasion after assassins poison the Baron.
* Betrayal at Krondor. Heavens help you if you run into an NPC who knows anything about magic.
* Betrayal at Krondor in battle, the game will not allow you to flee and leave them to the bad guys.
* Betrayal at Krondor is a hardy old geezer. It doesn't matter if you're a tough dark elf fighter, mess with him and you'll be disposed off in an unceremonious huff.
* Betrayal at Krondor is possible because he's half-human — which, in turn, is also supposed to be impossible in Midkemia canon. In short, the designers probably just gave him the beard to emphasize his "badass dark elf leader" image.
* Betrayal at Krondor is that their leader Delekhan claimed that their previous leader Murmandamus was captured and being held prisoner after their defeat in the last war, something he is able to convince people of because nobody on their side of the battlefield saw Murmandamus' death. At the end of the game, the heroes arrange for the Magician Pug to conjure up a highly convincing illusion so that the Moredhel can see both Delekhan and Murmandamus "die" in battle so that nobody can use that excuse to unite the Moredhel clans again.
* Betrayal at Krondor is treated this way. The novelisation cuts away some of the less plot-relevant or dramatically-appropriate side quests, such as the Quest for Ale. In the Author's Note in the novel, he even talks about his regret that he had to cut out his favorite side-quests.
* Betrayal at Krondor, personally, or both. Justified, since his long ears are his most striking feature to the casual eye, and a hood does hide them well.
* Betrayal at Krondor Starts with Owyn patching up an apparently badly injured Locklear and warning that he isn't sure how good the healing was, yet every

character starts with full health, better then is possible without visiting an Inn.
* Betrayal at Krondor that it is based in, features the Valheru, dragon-riding tyrants who trolled the multiverse since the dawn of time, only to be brought low by the newly-forming gods. Directly responsible for the introduction of every race in the world, as well as most races on other worlds.
* Betrayal at Krondor: The furthest north part of the map is an icy wasteland populated by dark elves, and indeed their capital city is the northernmost point in the game. The southernmost point in the game is the good-guys' capital city, Krondor, which is a bit north of some deserts that are unreachable in gameplay, but visible on the world map.
* Betrayal at Krondor: There are spells and magic artifacts to generate light at nighttime or in dungeons. This is very useful in the Naptha Mines in chapter 4, where lighting a torch will cause the whole place to explode.
* Betrayal at Krondor: There's a guild of thieves called "The Mockers" who operate in the sewers under Krondor. It's even explained in-universe that the authorities can't get rid of them due to their numbers and ability to gather intel; they'd know in advance if an attack was incoming and would rob the houses of the soldiers sent to sort them out.
* Betrayal at Krondor, though he's less a defector and more someone whom the self-destructive ways of his people compel to use methods to protect them that are seen as traitorous by most of his kind - except for those who share his views, but don't nearly have the guts to act on them.
* Betrayal at Krondor, though one special chest for a sidequest contains a lore-relevant riddle that requires you to learn the answer before you can open it.
* Betrayal at Krondor: When Pug and Owyn end up in parallel dimension Timiranya, they first assume that this is the case. However, it turns out that magic works just fine, but in this dimension, mana is a physical object rather than an elusive natural force. As soon as they find some mana and figure out how to use it in solid form, magic works just fine.
* Betrayal at Krondor with a discussion on birds, but since the author simply cannot keep on topic, it becomes the only book to provide bonuses to every skill in the game.
* Betrayal at Krondor, you can't heal everyone above the amount of health you had at the beginning of the battle. Particularly problematic is the spell "Mad Gods' Rage": it calls down a series of lightning bolts at a cost of 3 stamina/health per bolt, until either the caster dies or all enemies are dead.
* Betrayal by Inaction: Leaving someone to suffer or die instead of helping them.
* Betrayal by Offspring: A parent is betrayed by one of their children.
* Betrayal: Either after making love to Buffy and losing his soul, or....well, stay tuned...
* Betrayal Fic: A fan fiction where the main character is betrayed by their loved ones, usually resulting in a swift change of alliances and demeanor.
* Betrayal Fic: A fan-fiction where the main character is betrayed by their loved ones, usually resulting in a swift change of alliances and demeanor.
* Betrayal Fic has Weiss and Pyrrha team up with CRDL to kill Ruby simply because they find her to be deadweight.
* Betrayal in Antara about a farmer's daughter. And the third is about a man honoring the gods by buying each of them a drink - but since the gods never show up to drink them, he has to do it himself.
* Betrayal in Antara, you meet a mole-man NPC who likes raw lizard guts. When the PC expresses disgust, the NPC counters that he finds unfertilized bird embryos (eggs) equally disgusting.
* Betrayal Insurance: A character makes plans against someone in case that person decides to turn on them.
* Betrayal Insurance: Just in case someone tries to betray them, a character has a surefire punishment in store.
* Betrayal Knows My Name and female incarnation. He gets very noticeably pissed off and annoyed whenever he sees anyone touching or acting friendly with Yuki. He's also very protective of him.

* Betrayal Knows My Name example; Yuki does this to Zess in episode 3/chapter 3.
* Betrayal Knows My Name: Hotsuma blames himself for causing Shuusei's burn scars.
* Betrayal Knows My Name: In chapter 10, Luka puts his jacket on Yuki.
* Betrayal Knows My Name: In episode 5, Yuki wakes up to find Luka sleeping on his shoulder.
* Betrayal Knows My Name is this way towards Yuki. The fact that the pretty girl he fell in love with is now reincarnated into a male body does nothing to discourage him in his unfailing loyalty and devotion.
* Betrayal Knows My Name looks like a winged black hamster/guinea pig... who can also transform into a powerful dragon when needed.
* Betrayal Knows My Name: Luka Crosszeria, aka Zess, possesses a Divine Level beauty. As Shuusei explains in episode 6, "High-level Duras, known as Opasts, take on unbelievably beautiful human forms. They draw humans to them, to deceive them." After which Yuki immediately concludes Luka is an Opast. When he arrives to pick Yuki up from school, all the students stare entranced at him. He's so beautiful even other Opasts want him.
* Betrayal Knows My Name of Shusei which makes Shusei bleed and scream in agony.
* Betrayal Knows My Name often qualifies. Most of the time, the other characters are protecting or saving him.
* Betrayal Knows My Name reborn without any memories of his past life, including Luka.
* Betrayal Knows My Name: Reiga does this deliberately with a wine glass in episode 7.
* Betrayal Knows My Name Zess's response to getting stabbed in the chest with a BFS and bleeding all over the ground is to smile softly at Yuki and say "I'm fine."
* Betrayal Legacy can be defeated only by "a weapon not of this world". Fortunately for the heroes, they find a meteorite in the penultimate chapter that can be forged into a spear.
* Betrayal". "Mother Mae-Eye" is a breather right before "The End (Parts 1-3)".
* Betrayal Thatcher Karsten suspects that his late wife's brother is stealing from the company. Before the accusation can be proven or disproven, the brother-in-law is murdered.
* Betrayal. (Vicky and the US editor Erica were "fighting most sweetly" about it, according to Kate.)
* betrayal Vulkan to prove his theories; Fulgrim cut the head of his best friend and brother Ferrus; and all the Primarchs jumped at each other's throats the moment Horus switched sides.
* betrayed his country. As such, he operated in a simplistic red-and-blue outfit and had to use an energy shield rather than his traditional red-white-and-blues.
* Betrayed: In this movie, an African American man is hunted by a group of racists.
* Betraying the Hero again by deciding to collect the bounty Lucien has put on him.
* betraying the Starks in the Red Wedding, a sickening breach of Sacred Hospitality, rather than just being seen as greedy, jumped-up latecomers.
* Betray Me Not, Biscoe, William, and especially Mika when Brandon is injured and eventually dying of hemorrhagic shock after the surgery to get the anti-necrolyze bullets out of him. Mika, however, spends the night preventing Norton from waking him up abruptly and ends up sleeping on top of him.
* betrays Harry and his friends because his daughter Luna was kidnapped by the Death Eaters.
* betrays his father and government to report on Chris being imprisoned and nearly executed to Henry Morgenthau, the American ambassador to the Ottomans. This gets Emre shot for treason, but his actions allow Chris to inform the French navy that a large number of Armenians are trapped and need aid.
* betrays them for her allies. Upon leaving she has the following to say.
* betrays the Organization to the Time Police, it was time to retire, and the Time Police paid well.
* BET reason the Major Crimes Unit reformed and launched an investigation on the dock workers, being entirely chopped out) and rendering the season's themes castrated. Interestingly, the entire plot of the second season changed as a result

of these cuts (roughly 20 minutes chopped from each episode), as the entire dock subplot took a backseat to the drug storyline (which was minor at that point).
* Betrothals and arranged marriage are perfectly common and expected amongst the nobles of the Empire. Kytheus is expected to eventually be married to a Lady of another province to secure supplies and an alliance for Rhavenfell.
* BET Shady 2.0 Cypher that peace is about to be destroyed for good, lists what's required to stop it, and enforces their nature as Noodle Implements:
* Betsy (1926), but the show's producer, Florenz Ziegfeld, could get away with pretending that it was. It was far more popular than either the show (which was a flop) or the songs Rodgers and Hart wrote for it.
* Betsy, an elite sharpshooter of the 1st Reconnaissance Battalion in
* Betsy Braddock is noted to be acting as a big sister figure and psychic therapist to Ginny Weasley in the first and second books because Ginny's psychic trauma from the Diary Incident is much more obvious and extensive.
* Betsy Byars features young Dewey Martin and his grandmother, who flee their cabin after encountering a hostile Native American scout. Knowing that he will come back with the rest of his war party, Dewey and his grandmother construct a raft and flee down the river. They spend several chapters fleeing downriver toward the refuge of their friends, the Dargans. Upon arriving, they discover that the Dargan homestead was burned to the ground in a surprise attack before they left their own home. This forces Jeremy and his grandmother to raft a great deal further, through dangerous rapids, to reach a town that the war party avoided.
* Betsy Dirksen Londrigan was declared the winner of Illinois' 13th congressional district by CNN early on in election night. By the end of the night, they had to retract their projection after results showed it was still too close to call. Indeed, in the end, incumbent Rodney Davis narrowly held onto his seat.
* Betsy-Tacy. Betsy claims that Tib's stolid German cooking would be a disillusioning experience for any boy, no matter how good the food is. Further subverted by the fact that Betsy herself only learns how to cook after marriage, with her husband doing most of the cooking before.
* Betsy-Tacy. Despite the large Crowd and multiple love affairs, very few characters end up marrying their high school sweetheart, and instead marry someone they met after graduation.
* Betsy-Tacy. Multiple couples and pairings are suggested or named throughout the high school books, but only four of those couples ultimately marry. All other characters marry someone they met after high school.
* Betsy-Tacy series (1940-1955), which begins in 1897 and ends with the protagonists' husbands getting ready to go fight WWI.
* BetsyTacy (then 7) attempt to make Everything Pudding by mixing every single ingredient they can find in a saucepan.
* Betsy, the playing character, who dates the titular character, can be from both genders.
* Betsy the Vampire Queen in the works of Mary Janice Davidson is a definite Motor Mouth. At least once, another character noted that not needing to breathe helped Betsy immensely on that score.
* Betsy the Vampire Queen). Others are rather more comedic - one just wanted her son not to name his unborn daughter after her.
* Betsy the Vampire Queen- she declines getting werewolfed as a cure. Her health status is still in question.
* Betsy the Vampire Queen), the producer took him to the barber for a haircut and shave. The producer was the vampire Nostro, and he had the barber slit Garrett's throat so he could drink.
* Betta fish. In some places, particularly Southeast Asia, betta fish fights are popular, especially due to the idea that bettas will fight to the death. (Only in captivity, or when they get stuck in tiny puddles during the dry season in the wild; normal betta fights end in a kind of
* "Bette Davis Eyes" was written and first recorded by Jackie DeShannon. Kim Carnes's version is the most famous.
* Bette Davis is beloved among feminists for being a self-confident actress who had

the audacity to complain against the Hollywood studios if she felt their scripts were bad.
* Bette Davis. She plays the new bride of George Brent, who leaves her for his first, and true, love (Davis) not knowing his new bride is pregnant. The rest of the movie concerns Davis and Astor conspiring to pass off the baby as Davis's so that it won't be considered illegitimate.
* Bette Davis - which many of Hollywood's leading ladies had turned down. The studio tried to persuade her not to do it, terrified it would ruin her image. The film was a critical darling, and Bette got her first Oscar nomination from it.
* Bette Kane, the prototype "Bat-Girl", wore a masquerade-style mask instead of a cowl in addition to a dress with a short skirt.
* Bette Midler and the Pips, Lee Greenwood, and Gary Morris (whose version won Song of the Year at the Academy of Country Music awards in 1983, six years before Midler covered it - now he can't perform it in concert without someone complimenting his good job on "that Bette Midler song").
* Bette Midler, not the first name that comes to mind when thinking of comedy directors—then again, neither is Siegel—finished the film uncredited. Siegel recovered but this was his final film credit. All of this led to primary screenwriter Frank Gilroy billing himself as "Bert Blessing".
* Bette Midler. She's playing identical twins who don't know about this and meet for the first time — walking along a mirrored surface. Neither wants to foil the other, they just happen to do the same movements at the same time — except, you know, mirrored.
* Bette Midler's version of "From a Distance" is much better known than the first recording by Nanci Griffith.
* better aimed at hardware manufacturers who couldn't write a decent driver to save their lives, idiot OEMs who shoved Vista Ultimate onto systems with 512MB of RAM and Intel integrated video, Not that it didn't have its flaws, but SP1 (which was released several months before the Mojave ads showed up) arguably cleared up the worst of them.
* Better Angels forced to hatch evil plans for their demonic masters. (They also play the demons controlling other PC's) Fortunately, demonic masters don't understand this trope, leaving the characters free to deliberately build weaknesses and vulnerabilities into their plans in order to exploit them. Rebellion, after all, carries with it worse punishment than failure.
* Better Angel (written in the early 1930s) shows its bookish protagonist taking a Wiki Walk through a paper encyclopedia:
* better armed than the Italians the ailing Ethiopian forces were preparing a comeback.
* Better as a Let's Play: People prefer to watch other people play and react to a game rather than play it themselves.
* Better as a Let's Play: Watching someone else's reactions and decisions as they play the game is almost as or more entertaining than actually playing it yourself.
* Better as Friends beforehand, completely contradicting how he returned Tina's feelings in his first two appearances.
* Better as Friends one of these ships, or used as the starting state of the romantic pairing before they develop romantic feelings.
* Better as Friends: Romantic relationship becoming platonic vs. platonic relationship becoming romantic
* Better as Friends talk Wendy tells him that she has more fun with him than anyone else she knows.
* Better as Friends: Two friends become romantically involved, but ultimately decide they're better suited as friends.
* Better as Friends: Two friends try having a romantic relationship, but decide they'd rather just be friends.
* Better as Friends: Two people who have dated for a while realize that they are better as friends.
* Better as Friends: Two people who have tried to be a couple decide that it's best they just be friends.

* better at teaching their buddy how to do it. This is likely because hyenas hunt together and so need a "language" for cooperating and coordinating an attack, while most primate food is fairly lazy fruit, and the most you need to be able to say to share with a friend is "Here is food".
* Better by a Different Name: Saying that a work is either a shoddy ripoff of a pre-existing work or a suckier version of a more recent work.
* "Better by You, Better Than Me" was originally by Spooky Tooth; most people have only heard the
* Better Call Saul, and made it look as though Matty was killed by a criminal they were pursuing. Mike eventually lured the two into a trap and killed them both. Because of the complications at work there's also a schism in the response of other police: younger cops who don't know how notoriously corrupt those two cops were want to bust Mike and are willing to follow him all the way to New Mexico to do so, older cops who know everything that was going on want to just let sleeping dogs lie and figure the two cops got what they deserved.
* Better Call Saul, and made it look as though Matty was killed by a criminal they were pursuing. Mike eventually lured the two into a trap and killed them both. Because of the complications at work, there's also a schism in the response of other police: younger cops who don't know how notoriously corrupt those two cops were want to bust Mike and are willing to follow him all the way to New Mexico to do so, older cops who know everything that was going on want to just let sleeping dogs lie and figure the two cops got what they deserved.
* Better Call Saul, and that Kim actually has far more in common with Jimmy than she does with her more straight-laced colleagues, but none of this is apparent to them:
* Better Call Saul and what they were doing before they met Walter White.
* Better Call Saul appears to be focused on showing this as a secondary plot line.
* Better Call Saul, a toilet outfitted with a little recorder that is supposed to spout phrases of encouragement to kids as they poop into it. This is what happens:
* Better Call Saul: A variant in season 5. With Lalo Salamanca threatening to cause major problems for Gus Fring, Gus decides that Lalo needs to be locked up, so he has Mike lean on a witness to a murder that Lalo committed to indirectly get the police to link Lalo's car to the crime scene and thus arrest him. However, when Lalo continues to pose problems from jail due to getting access to a contraband phone, Gus decides he needs Lalo bailed out of jail, so he has Mike inform Jimmy about the witness tampering bit so that Jimmy can bring it up in court and convince the judge to grant Lalo bail.
* Better Call Saul, Chuck sets up a romantic candlelit dinner with his ex-wife, claiming that the electricity went out so he decided to make an event of it. In reality, he hadn't been using electricity for some time due to a psychosomatic illness, but didn't want her to find out.
* Better Call Saul, Chuck snags his neighbor's newspaper off her driveway and leaves $5 in compensation. She calls the cops on him anyway. They break in, taser him, and arrest him, ultimately leaving him hospitalized.
* Better Call Saul delves into Jimmy McGill's earlier life as a conman and his struggles as an unsuccessful lawyer before he adopts the "Saul Goodman" persona. As he gets involved with increasingly unsavoury clients he is frequently threatened with violence but still refuses to carry a gun. The one time he does handle a gun is when he is ambushed by cartel gunmen and picks up a dead man's gun to use in self defence, but he clearly has no idea what to do with it and becomes visibly freaked out before tossing it away in horror.
* Better Call Saul episode "Five O", Mike hires Saul to spill coffee on a detective so Mike can swipe his notes.
* Better Call Saul episode "Hero", after Jimmy McGill uses his billboard stunt to gain publicity. The stunt involves setting up a billboard that ripped off Hamlin, Hamlin & McGill's logo, then Jimmy getting a cease-and-desist order, then arranging for a freelance media team to record him when the guy taking down the billboard "accidentally" falls, prompting Jimmy to go up and save him. The HHM team see through the ruse when watching Jimmy on the afternoon news, but decide not to

pursue further action against Jimmy since doing so would be this.
* Better Call Saul features a fascinating, almost complete inversion of this trope: Season 3 involves the construction of a meth superlab using foreign contractors. The contractors are carefully vetted and hired by Mike, who supervises them in a secure location while they do the work (living in a warehouse almost like a government safe house). The contractors all have cover stories and don't know where they are geographically. When one naively exposes the operation to possible discovery by both the DEA and a rival cartel, Mike is forced to execute him and is shown to be greatly upset by it.
* Better Call Saul filmed the first four episodes of the show before learning that Chuck was going to be a bad guy all along, so in his first few episodes he acted as though Chuck genuinely believed in Jimmy's efforts to become a lawyer. If anything, this made the eventual twist more effective.
* Better Call Saul flashbacks show that Jimmy's father was an extremely easy mark. He would always take people at their word and would give money to anyone who came in with a sad story. The one person he did not believe was Jimmy who tried to tell his father that he was taken advantage of. In one instance a conman blatantly confessed to Jimmy just out of the father's earshot and the father still took the conman's word over Jimmy's. This caused Jimmy to develop contempt for his father and he became a conman and thief himself. In the end Jimmy's father had to close down his store and died broke.
* Better Call Saul Gus Fring works desperately to keep him alive. This, we already know, is because he doesn't want Salamanca to die before he can exact revenge on him.
* Better Call Saul has a variation, in which it's less of this and more "Not Worth Killing Quick and Painless". Gus Fring would rather make his formidable enemy Hector Salamanca suffer a slow, painful death instead of wasting ammo on a man that's too despicable for such compassion.
* Better Call Saul has Chuck McGill, who claims to suffer from "electromagnetic hypersensitivity" – essentially, any kind of significant electromagnetic radiation, whether it be a lightbulb or a battery or whatever, causes him to suffer an apparent sensory overload or even a seizure. While he's right that he suffers from the condition, he's wrong about how it works. He insists it's a real physical condition with no cure, but it's actually a psychosomatic condition that happens to be able to manifest physically because he believes in it so strongly. In a number of episodes, it's shown that if Chuck isn't aware of a source of electricity, he doesn't suffer his symptoms because he doesn't realize he's supposed to be doing so. Much of the reason he sticks so fervently to this is that he doesn't want to be seen as "crazy"; he would rather be though of as laid low by an incurable illness than a mental disorder, so he lies to himself and refuses to see treatment or diagnosis for his condition, even though it's clearly not what he claims it to be.
* Better Call Saul. He is every bit as bright and capable as his much more successful brother, but is initially content to use his wits and charm to run small-time scams and keep himself in beer and beer money. While he eventually starts to apply himself and pursues a career as lawyer, he is still prone to taking shortcuts, always choosing the easy Get Rich Quick scheme over doing what is right.
* Better Call Saul. He was killed in the line of duty by "an unkown drugdealer" while backed up by the two cops who feared that he would turn them in for taking bribes.
* Better Call Saul history with the war, since he corrects Jimmy about whether the B-29 was used against the Nazis.
* Better Call Saul: Howard Hamlin's role at Hamlin, Hamlin and McGill. He isn't a skilled litigator but he's the one the partners turn to when they need someone to don a smart suit and charm a potential client over an expensive lunch:
* Better Call Saul: In "Expenses," Daniel Wormald enters his darkened house, in which he has installed a very elaborate security system to prevent break-ins in light of his previous dealings with Nacho Varga...only to find Nacho calmly sitting on his living room couch. Nacho demands that Daniel supply him with some empty pill capsules (which he plans to swap with Hector's meds so as to induce a heart attack

in Hector). All the while, Daniel expresses disbelief that someone could bypass his deadbolt locks and security system. But after they conclude their business, the camera focuses on Daniel for a moment, and then pans over to Nacho as he leaves the house...by way of the kitchen's unlocked and unprotected sliding glass door. Later, when Daniel wonders how Nacho could have defeated his security system, Mike mentions that all Nacho would have had to do was to disconnect the phone line.
* Better Call Saul: In "Rebecca", Jimmy McGill is invited to dinner by Chuck and his wife Rebecca. To Chuck's chagrin he proceeds to reel off a string of lawyer jokes he learned from his new job in the mailroom at Hamlin, Hamlin & McGill. Chuck is even more enraged when he sees that his wife isn't offended, but actually charmed and delighted:
* Better Call Saul: In "Sabrosito", Jimmy and Kim need to get pictures of Chuck's house to document his state of living for their case at the bar hearing. To do so, Kim secretly cancels an appointment Chuck has made to get his door repaired, and Jimmy sends Mike Ehrmantraut to the house at the time of the originally scheduled appointment. Mike then breaks out a drill, which is enough to cause the electromagnetically sensitive Chuck to panic and hide upstairs, but not to the point of shooing Mike away. Chuck had just exploited his own illness to get at Jimmy, and Jimmy is now acting in kind.
* Better Call Saul into paying for an expensive bottle of tequila. And Kim later ropes Jimmy into conning a man who was trying to hit on her at a bar (this while under stress from work at HHM).
* Better Call Saul, is essentially about Jimmy McGill's descent into Saul Goodman. That said, this trope does take place:
* Better Call Saul is implied to be one. In the former show, a conversation between him and a gun dealer about the M40 changing from a wooden stock to a plastic stock and his familiarity with the weapon implies that he served.
* Better Call Saul is pretty much an extended takedown of what's wrong with this philosophy, but the theme is arguably the most explicit in Kim Wexler. She's a great, highly principled lawyer with no criminal past who's been trying advance her career through hard work for years, and has been rewarded with almost nothing for her efforts.
* Better Call Saul is rarely seen in anything but an immaculately tailored suit with knit tie and gold tie pin. He even has a signature shade, which he calls "Hamlindigo Blue".
* Better Call Saul is this, although she favours trouser-suits and skirts that don't come up much past the knee.
* Better Call Saul: Jimmy notices some minor overbilling on the part of his elderly client's nursing home. Digging further, he finds that the home's entire parent corporation has been engaging in outright fraud on its clients to the tune of millions of dollars.
* Better Call Saul, Jimmy spots a valuable collectible in an office building and has an associate steal it so they can split the money. The robbery goes awry because the business's owner is staying the night in the office after a marital spat, leaving the burglar hiding and unable to escape. Jimmy come to bail him out by creating a distraction; afterward, the figurine sells for even more money than expected, and the burglar cuts Jimmy in on his full share out of gratitude, instead of just pocketing the difference.
* Better Call Saul: Jimmy's relationship with Kim. Jimmy helps bring out the self-destructive streak hidden within Kim, and Kim's tolerance of Jimmy's schemes has also made it easier for Jimmy to rationalize and act on his worst impulses.
* Better Call Saul Jimmy to fail at the law, as he resents his brother's easy charm and likability and cherishes the one thing he has that Jimmy doesn't.
* Better Call Saul, Kim relishes the opportunity to ask him about that on record.
* Better Call Saul looks like it's carrying this idea over too. For the first half of the first season, it seemed like the Kettlemans would invert this trope, but thinking about it, they were never gonna get away with it to begin with. They just wanted the dignity of not caving in and confessing their involvement. Plus, they thought that no matter what happened, as long as they kept the money, they'd win.

Ultimately, thanks to Mike, that plan soon became moot.
* Better Call Saul. Mike, his bodyguard, sees this stupidly flashy car and immediately stops providing his services (especially since Daniel refuses to ride in Mike's more subtle 1980s Chrysler). Later, when Daniel calls in a burglary at his house, the cops see the Hummer and quickly become suspicious. Finally, when Daniel has to trade the Hummer to Nacho to get his baseball cards back, Nacho promptly announces his intention to strip it and sell it for parts, since he's smart enough to not be caught driving a vehicle that "looks like a school bus for six-year-old pimps".
* Better Call Saul, Mike is convinced that Henry, a member of a support group, is lying about having a late wife just so he can hang with the group. When friend Anita is dubious, Mike talks of how Henry's tales of meeting wife Judy differ slightly. One story had them sharing their first kiss under the lights of a night game in Wrigley Field in the early '80s. But, as Mike points out, Wrigley Field didn't get lights until 1988. He bets Anita "ten bucks says his next story is different." Sure enough, at the next meeting, Henry tells a story which differs from the one Anita heard before.
* Better Call Saul, Mike manages to evade a tail using just a stick of gum, which he feeds into a ticket machine in the parking lot so that it breaks and causes a traffic jam after he drives away.
* Better Call Saul, Mike sneaks into the Madrigal warehouse. He goes past the breakroom and an employee yells out to him—to come sign another employee's birthday card.
* Better Call Saul: Much like its parent show, the same "write as you go along" approach was utilized.
* Better Call Saul Needless to say, simply presenting the film overwhelms any argument Jimmy could possibly make.
* Better Call Saul: One episode has Jimmy's plan to rob an office complicated by the fact that the business owner is sleeping on the couch because his wife kicked him out after he gave her a vacuum cleaner as a gift. He protests over the phone that it's "top of the line" and "never loses suction!"
* Better Call Saul opens with Jimmy doing public defender work, defending three teens who broke into a mortuary and had sex with a severed head. And videoed the deed.
* Better Call Saul prequel establishes that Jimmy McGill had a serious talent for lying long before he adopted the Saul Goodman persona. Even before he became a lawyer he enjoyed a misspent youth as an incredibly effective conman. As a lawyer, he is really just applying his skills in more lucrative endeavours.
* Better Call Saul repeats this when Mike sends Jimmy into the restaurant to spy on a bag man who planted a tracker on Mike's car, and determine where the man's knapsack is going. He eventually gets caught by Gus searching the trash can, which he escapes by claiming to be looking for a lost watch.
* Better Call Saul: Subverted in the episode "Alpine Shepherd Boy." Jimmy meets with eccentric landowner Ricky Sipes, who wants Jimmy's legal help to secede his land from the United States. He offers a flat $1,000,000 fee and does indeed deliver... and we see Jimmy's glum reaction when Ricky proudly presents him a million dollars of his self-printed currency (with Ricky's own face in place of the President's). Needless to say, Jimmy doesn't accept the job.
* Better Call Saul that would make him such a key player in the Heisenberg saga. Similarly, Mike Ehrmantraut has just arrived in Albuquerque and has yet to embark on his career as a criminal fixer.
* Better Call Saul. The camera then pans to him getting into his actual car: a beat-up Suzuki Esteem.
* Better Call Saul: The first episode of season 4, "Smoke," sees Mike decide to conduct a surprise security audit of a Madrigal warehouse. After spending the day going around the office and warehouse, he gives the facility manager a dressing down in front of his subordinates.
* Better Call Saul, the Kettlemans continue to profess their innocence of embezzlement charges, despite the fact that they made no effort to cover their

tracks, they made out checks to themselves, and Jimmy actually caught them in possession of a giant bag of stolen money. Eventually Jimmy starts begging them to admit the obvious for the sake of his own sanity.
* Better Call Saul: The nerdy chemist who hires Mike as a bodyguard is obsessed with his vintage baseball card collection.
* Better Call Saul, the second season premiere is titled "Switch." This refers to a switch Jimmy sees in his office with a taped sign that reads "Do NOT turn OFF!" At the end of the episode, he peels back the tape and switches it. Nothing happens. He switches it back and puts the tape back on.
* Better Call Saul to take the money, so Matt did, but his partners killed him anyway because he took too long to say 'yes'. Mike himself would go on to become the chief enforcer in Gus Fring's drug operation.
* Better Call Saul was working at his father's general store and watching his father get duped by an obvious conman. The conman tells Jimmy that there are two people in the world: wolves and sheep. An angry and disenchanted Jimmy apparently resolves to be a wolf and helps himself to cash from his father's register. Many years later, Jimmy's brother recalls their father going out of business, with thousands of dollars having gone missing over the years. (It's later acknowledged, though, that Jimmy didn't steal as much as Chuck thought; his father was a major victim of con-artists over the years.)
* Better Call Saul were exposed and he is wanted for money laundering and conspiracy with a kingpin, is forced to go into legal hiding assuming the identity Gene. No longer the criminal lawyer comfortably living on high 6 to 7 figures per year when he was Saul Goodman, Gene is a Cinnabon manager who mops floors and empties the trash.
* Better Call Saul what Tuco does for a living. Either that, or Tuco "spills salsa" on the carpet so often, she really does think you clean it with club soda.
* Better Call Saul: when car trouble forces him to trek across the New Mexico desert, he ends up with sunburn so horrific that Kim Wexler wants to take him to the emergency room.
* Better Call Saul, when his cartel bosses take his employees hostage to intimidate him into a meeting, Fring first dismisses them for the day, promising to compensate them for the missed shift. The next day, he apologizes to them personally, arranges for an extra two days worth of pay for the trouble, and offers to pay for counseling for the employees if needed.
* Better Call Saul: When Werner escapes the warehouse he and his workers are required to stay in, Mike finds a laser pointer on the ground outside, and deduces Werner used it to fry several security cameras to cover his tracks.
* Better Call Saul which ruins his attempts at legitimate business practices.
* Better Call Saul whose story began in 2008, the story of this one begins in 2002.
* Better Call Saul, with Mike procuring his services, first procuring potential rifles to use for a hit on Tuco Salamanca (before deciding otherwise), and later buying one for an attempted hit on Hector Salamanca.
* Better Days, and the next day they both have sore backs when they have to visit museums.
* Better Days), made only worse when it turns up in the supplementary porn comics.
* Better Days Omega Ruby Nuzlocke form of AJ's Treecko, walking around to examine him while firing off one question after another.
* Better Days: Portia is kidnapped by a sex trafficking ring, and the ringleader chews the kidnapper out for targeting a "white shortbread" porn star that will make the news and get them arrested, as opposed to a random hooker on the street that nobody cares about. Except they don't make the news - Portia's cousin cares enough to murder them all and cover it up with bombs and no witnesses.
* Better Days when Elizabeth comes home early one day and finds her husband sleeping with the head of their homeowner's association. To make it worse, they were trying to have a baby, which, as she drunkenly rants to a friend later, explains why she hasn't been able to get pregnant yet since he's clearly been using it all up on the other woman.
* Better Days." Which reveals that the stories told to Fisk of his father's life

were a lie. Instead of the honorable war hero he had believed his father to be, Jim was actually a hitman working for a secret underground operation who fought terrorists on a "more direct front" to defend the U.S., using Vietnam as his cover. One of the characters who explain this met Fisk in his adolescence earlier in the comic and was Jim's friend. Aside from one question accompanied by a frown, Fisk doesn't seem at all angered, dismayed, or even shocked by this groundbreaking discovery. He of course hastily agrees to begin training for this new venture even though Beth was expecting him to come live with her and lead a more domestic life once his army contract expired.
* better, despite his angelic teachers telling him he was always a better fighter than Kieri, just makes him angrier.
* better didn't think the whole towers would actually come down like that.
* better: "Gypsies have a knack for creative vengeance, but where they fail is in the execution of justice."
* better has had a few instances to indicate this is still going on today. For example, at Christmas, Cory puts his Cory & Shawn ornament in front of the Cory and Topanga ornament.
* Better hope your diving suit, spacesuit, or hazmat suit is comfortable before you start using it in earnest. Sure, you technically
* better hoverboards, and he narrowly escapes them. The third time, they're all on horseback, and he's on foot, and they catch him easily.
* "Better if Not Born" Plot: A Guardian Angel or similar entity tries to show a person what life would be like if they were never born. To the person's despair and the entity's shock/embarrassment, the lives of others are improved or even beneficial without them in it.
* "Better if Not Born" Plot only for everyone to be doing just fine or better without their presence.
* better in those areas since the stereotype he's poking fun at is better-known.
* "Better" is about a man breaking up with his girlfriend because he can't cope with her extensive robotic enhancements.
* better. It has its own set of weaknesses, but at the beginning of the story the Vong know the Galactic's weaknesses (due to advance scouting), while the galactics don't know the Vong's.
* Better known as a producer and songwriter, the New Orleans legend has had three of his songs as a performer
* better known as. She is choosing between several different aqua T-shirts.
* Better known for his jazz compositions like "Canteloupe Island" and "Watermelon Man,"
* Better known for the name of the man he stole the identity of, Martin Guerre.
* better-known real-world examples trope, had so much trouble finding his way around the offices at MIT that he would use the 'right hand rule' for closed mazes to navigate the hallways: he would put his right hand out, with a book in the other hand, and walk along the rooms with his index finger running along the walls, and would keep walking until he found himself in his office. He was known for walking into, around, and out of offices and classrooms this way, never saying a word or taking his eyes off of the book.
* Better Left Unsaid: During the Chunin Exam Finals, Sasuke traps Dosu Kinuta in a situation where his only options are to die by fire (straight from Sasuke), die by fire (from the fiery pit he formed around Dosu)... or surrender. Dosu proceeds to choose the first option.
* Better Living Through Chemistry, Elizabeth considers herself this. We later learn that her husband, while older, genuinely loves her, and tries to give her everything she wants.
* Better Living Through Evil indicates that human populations that don't surrender of their own accord are given a much frostier reception, being subjected to extensive re-education or even forced to migrate in order to make way for Tau and Kroot colonists. Ten years after the Dark Crusade, humans make up less than 5% of the population on Kronus, a possible sterilization program has caused their birth rate to plummet, and the few we see have been reduced to living in ruined slums.

* Better Living Through Evil: The villain makes sure that his job offers are tempting.
* Better Living Through Science and Ponies portal guns/long fall boots.
* "Better Luck Next Time", Catwoman is barely holding onto the edge of an underground crevasse. Batman tries to save her but she
* "Better Luck Next Time" featured two nearly immortal aliens who could inhabit any living host and can survive for however long they can bind to the central nervous system. After the host dies, they have only moments to transfer into another body until they die, since they can't live too long in the Earth's atmosphere. If they transfer, they will still live for however long they can repeat the sequence. If they fail, they disintegrate. This was a sequel to another episode: one of the duo was in fact
* Better Luck Next Time in Gerard and Kimble's bodies are able to share their memories with Detectives Terry Russo and Frank Daniels telepathically.
* Better Luck Next Time"", it follows to aliens who over the centuries have been in a friendly rivalry possessing and murdering humans for sport.
* Better Luck Tomorrow, Ben makes the basketball team, but never gets to play because he isn't very good. This becomes a plot point when Daric convinces the whole school that Ben's been benched due to racism. The publicity from this causes Ben to quit the basketball team, but draws him closer to Daric's influences.
* Better Luck Tomorrow, but the film changes their motivations and lifestyle, as well as everyone's names.
* Better Luck Tomorrow puts a twist on this trope by making the hustlers Asian honor-roll students. Their schemes run the gamut of selling stolen test answers to murder.
* Better Luck Tomorrow, Stephanie decides she wants to be with Ben, who liked her for the whole movie, after her boyfriend Steve dies. Played with in several ways- Stephanie doesn't know Steve is dead when she makes this decision, but she's mad at him for mysteriously disappearing. Also, Ben is uncomfortable and isn't sure if he wants to be with her at this point, because he was involved in Steve's murder (which happened for reasons other than their romantic rivalry).
* Better Luck Tomorrow The rest of the film is just one long flashback, and the opening scene is replayed near the end.
* Better Manhandle the Murder Weapon: An innocent person is incriminated because they started holding the murder weapon right after the victim's death.
* Better Manhandle the Murder Weapon: Arriving at the scene of a crime while the murder weapon is still there... and stupidly picking up the weapon just in time to make it look like you're the killer.
* Better Manhandle the Murder Weapon: Someone gets accused of murder because they got caught touching the murder weapon after the murder happened.
* Betterman's during this time. Importantly, a 'donated' Super-AI also seems to inherit its donor's loyalties, so it's probably not practical to use an unwilling participant.
* Betterman was on this block too—after making some tough decisions that will cause some people to die, Rossiu returns to his room, sits on his bed, and starts to cry for them, but Tech TV edited out everything after he goes to his room, making him appear much less sympathetic.
* Better Off Dead at times that she might as well be. Lane's mother Jenny is shown on-screen cooking a meal where tentacles and claws wave from the pot; in another scene she serves the family a gelatinous green goo that flees Lane's plate when he pokes it with a fork.
* Better Off Dead climaxes with a chaotic downhill ski-race between the hero and villain.
* Better Off Dead ends with him falling unharmed into a garbage truck. This result is witnessed in passing by a couple of black tree-trimmers:
* Better Off Dead gets an edit that results in making no sense at all. In the scene where French-speaker Monique says "testicles" when she means "tentacles," the offending "testicles" is overdubbed with "tentacles." So it's very strange that she says, "tentacles," and Lane corrects her, "No, you mean 'tentacles.'"

* Better Off Dead has gag sequences in both clay and regular animation, representing the teenaged protagonist's bizarre daydreams about dancing hamburgers and so forth.
* Better Off Dead, John Cusack's character's girlfriend has just broken up with him. As he drives despondently, every radio station is playing a breakup song - he rips the radio out and hurls it out the window.
* Better Off Dead, Lane had to wear a uniform that included a chef's hat with pig's ears with a matching nose.
* Better Off Dead, Lane's father tries to communicate with Monique the exchange student from France:
* Better Off Dead, Lane uses one of these to get away from a tenacious paperboy. "See, the problem here is, is that my little brother, this morning, got his arm caught in the microwave, and, and uh, my grandmother dropped acid, and she freaked out and hijacked a school bus full of penguins, so it's kind of a family crisis, so, come back later? Great."
* Better Off Dead, Monique plays this role for Lane, helping pull him out of his depression after his girlfriend dumps him.
* Better Off Dead put John Cusack's character in a humiliating job at a pork-burger restaurant that required him to wear a chef's hat with attached ears and snout, even though he works in the kitchen.
* Better Off Dead, the protagonist Lane Myer is challenged to a street race by two Asian brothers several times. Each time, the brothers pull up alongside him, and one provides pre-race commentary in an impression of a certain famous American sportscaster. During one of these incidents, Lane tells his passengers:
* Better Off Dead, where the love interest pretends to only speak French so she will not have to talk to the family she's rooming with, but reveals that she speaks English later to the John Cusack character.
* Better Off Dead, who fixed Lane's Camaro that would otherwise keep catching rust.
* Better Off Dead. Yes, the whole movie is cartoonish, but otherwise as realistic as 80ies teenage comedies go.
* "Better Off Ed": Where Eduardo is looking for Scrappy and gets interrupted by Jackie Khones.
* better off had you not been born, hence the common trope subversion.
* Better Off Ted. A flashback to Phil's first day shows Phil with long hair and a tie-dye shirt and Lem with an afro and purple glasses. Then Lem says, "It's too bad your first day had to be during Sixties Week."
* Better Off Ted, a running gag was commercials for the company. They would always end with a slogan. Some were only funny in context, but others fit this trope, including:
* Better Off Ted. Despite the feel-good images and soothing music and narration, the ads don't do that good a job at helping the company's image.
* Better Off Ted does this regularly, often hiding her good intentions behind the company agenda.
* Better Off Ted, Dr. Bhamba wakes up and shouts "Crocodiles!" Though we do get an explanation...
* Better Off Ted: Each episode included a fake commercial for the fictitious Veridian Dynamics company, the workplace setting for the show.
* Better Off Ted episode "Father Can You Hair Me?", Ted tests an experimental hair tonic (packaged as an aerosol) on his arm, causing massive amounts of hair to grow not only on Ted's arm, but also on his desk.
* Better Off Ted episode "Lust In Translation", Linda and Veronica played a game called Lindabagel.
* Better Off Ted episode "The Impertence of Communicationizing", Phil laments his lack of ability to insult people:
* Better Off Ted episode "The Long and Winding High Road", Linda and Veronica come up with one way of cheating to make sure their project beats out its competitor from the other division, while Ted comes up with a completely different way; the combination of the two of them ends up being worse for the project than if they'd just done nothing.

* Better Off Ted had a professional food tester try out some lab-grown meat. He decides it tastes like "Despair".
* Better Off Ted has a fake ad for Veridian Dynamics (the show's fictional company) before the first commercial break. May be something of an inversion, as it looks so much like an authentic commercial for a generic faceless corporation that it's very easy to tune out (or skip over if you're watching via DVR.)
* Better Off Ted is an interesting example of a show that from an objective perspective is probably sci-fi, but that is almost never considered as such, and so escapes this problem entirely.
* Better Off Ted, Lem and Phil, are asking which one of them is the salt and which one the pepper. Phil is white and Lem is black, so Ted gets a nervous look on his face before Phil says that he must be the pepper because he's "spicy."
* Better Off Ted, Linda takes petty revenge on the company by taking absurd amounts of creamer packets from the office kitchen. She stops when Ted becomes worried that she will get into trouble, but is later seen repeatedly triggering an automatic paper towel dispenser, rolling out yards of paper towel out of spite for its only dispensing a couple inches at a time.
* Better Off Ted. Linda tried to induce this by introducing Ted to her ex-boyfriend... but he and Ted hit it off and become friends. Then Ted pretends to hate him when he realizes Linda was only trying to make him jealous.
* Better Off Ted of the company, except for men over 50. Naturally, he becomes determined to gather up every guy in that group and convince them to like him. In the process of hanging out with them, he realizes that he doesn't really like any of them, and gets over trying to win their approval.
* Better Off Ted: One episode features a biocomputer that leaks an "acid-like goo", or "ass-goo" for short, that burns through several floors and desks.
* Better Off Ted, Phil the scientist is put in a cryonic tube for three days. Ted says that "We froze him. Like a human leftover."
* Better Off Ted Phil was cryonically frozen, initially planned for a year but while moving his tube to the basement he thawed out. He survived but started randomly shrieking in the same pose he was frozen in. As he was freezing his co-workers started betting on whether his eyeballs would explode.
* Better Off Ted played this for laughs in the episode "The Lawyer, the Lemur & the Little Listener". Linda is writing a children's book about a lemur who wants to go off and seek his fortune. However, the lemur decides to stay at his tree with all his friends. Ironically, Linda wants to use the profit from her story to leave Veridian Dynamics and abandon her friends.
* Better Off Ted so there's still some progress needed. By the end of the episode, they've succeeded, and everyone is pleased with the results. Unfortunately, it costs $10,000 a pound, so no one's going to be using it until they can bring the cost way down.
* Better Off Ted") Subverted about a second later when a glowing squirrel ("...fire squirrel.") runs past and is mentioned in the epilogue as having gone mad due to its constant glow.
* Better Off Ted, Ted and Linda make out through a pair of hazmat suits.
* Better Off Ted: Ted blurts out "I love you" to a woman he's just started dating. He tries to cover by claiming he actually said "I love Utah", which builds into an elaborate lie that he's of Native American descent and grew up on a reservation.
* Better Off Ted: The case for most of the main cast, especially Ted, who's especially adept at his job and serves the morally questionable conglomerate Veridian Dynamics despite his otherwise squeaky clean morality.
* Better Off Ted: The plot is set in motion by a brownish liquid toxin leaking from a biocomputer that can also dissolve a desk as well as instantly ignite a tissue that touches it. This leads to the office being evacuated while the "contamination guys" deal with the problem in full hazmat suits.
* Better Off Ted, was dating a magician named Mordor. One scene has the two of them fencing. Overcome by lust, they pull off their helmets and begin snogging. He pulls back and, with a magician's flourish, demonstrates that he's managed to remove her bra, though she's still in her fencing gear. He does it again with her panties.

* Better Off Ted was said to "Taste like despair." The second attempt turned out better but turned out to be too expensive to be practical.
* Better Off Ted when Ted tells a lie about the jabberwocky project and everyone is sucked into it by the corporate machinery. Ted wants to tell the truth. He is then reminded that if it turns out there is no jabberwocky project, they are all going to lose their jobs.
* Better Off Ted. When Veronica is told that she is too intimidating, she starts wearing her hair down as part of an attempt to be more approachable, and hates it. When told that Phil is falling in love with her new, more positive self, she even sighs and says something like, "This is why I keep my hair up. It maintains distance."
* Better Off Ted, where Veronica and Linda use this routine to coerce employees into giving to their charity donation drive.
* Better Off Ted: While Veridian Dynamics are indeed involved in projects of dubious moral character (killer pumpkins, the bunny that will "snuggle" everyone within a 5 mile radius, etc.), nearly every bad company policy or consumer product is "usually" done without any intentional malice. The episode Racial Sensitivity is probably the best invocation of the trope.
* Better Off Ted without getting a reaction out of it. They eventually fix it so it works on her too, though.
* Better Off Ted, you know that she has ulterior motives. Turns out that the "autograph" she wanted was on a waiver promising not to sue the company.
* Better Off with the Bad Guys: A character is with the villains because it's a clear step up from where they were.
* Better Off Witout 'Em, while portraying the rest of America as a mixed bag treats the South as an unadulterated example of The Boorish.
* Better on DVD: A series is considered to be more enjoyable when viewed in one sitting rather than waiting for every episode to be released weekly.
* Better on DVD: A television series is believed to be more enjoyable when viewed in one sitting, which is possible if the entire show is available on home media.
* Better on DVD - DVD stands for Digital Versatile Disc (formerly Digital Video Disc)
* Better On Laserdisc : The Laserdisc "Tom & Jerry" box sets have all of the original cartoons intact and uncut.
* "Better Or Worse": A jewelry store owner's wife and daughter are kidnapped to use as collateral in a robbery. Subverted when it turns out
* "Better People" by India Arie. She basically sings that if people would connect with other people older and/or younger than them, the world would be better off.
* better perceived) was that Adam Lambert, Kris Allen, and Allison Iraheta seemed to be personally determined to push the show as much as possible out of the pop-confection-machine mold.
* Better still, 21st-level casters can use Intensify Spell instead of Maximize Spell.
* Better tactics and training can make up for a lot of deficiencies in tanks—and the Sherman was not too far behind the tanks of 1940s or even 50s, with appropriate upgrades. During conflicts in Middle East and in South Asia, Israeli and Indian Shermans made mincemeat of Jordanian and Pakistani M48s on several occasions.
* Better Than a Bare Bulb novel, where he mentions the Imperial Navy's commissars would have a better grasp of the space battle, having trained in 3D tactics.
* Better Than Chocolate keeps starting to come out of the closet to her mother, only to have her mother interrupt, assuming she was trying to disclose something else.
* Better Than Chocolate (lesbian main characters, lesbian supporting characters, including transgeder lesbian character, queer female romance)
* Better Than Chocolate: Maggie has just found Kim, who's the love of her life. However, things become difficult when Maggie's mother and brother come to stay at her place, as Maggie isn't out to her mom.
* Better Than Ezra from a dream then drummer Travis MacNabb had. In the dream,

Before The Robots was the name of a British buzz band Travis saw in concert. The following day, he asked Kevin Griffin and Tom Drummond if there was such a band. There wasn't, but in June there was a Better Than Ezra album by that name.
* Better Than Ezra - "Good" ("Uh-huh, it was good living with you...")
* Better Than Ezra song "Rewind" is about the singer putting a mixtape together for his love. If the chorus is any indication, it didn't work:
* Better Than It Sounds. Admit it: You write unappealing summaries for your favorite shows only to advertise them to other tropers, or at the very least, amuse tropers who are familiar with the series.
* Better Than Life. He can't even complete the thought when he realizes it, he's too disgusted and horrified.
* Better than Life in order to accelerate over the speed of light and tow Earth back to the solar system.
* Better Than Life", in which the crew are shown to use triangular cassette tapes for recording material.
* Better Than Life, Kryten tries to get the Skutters to assist him by threatening their status in Silicon Heaven. However, as cheap robots, they never got belief chips and mock his faith. To them, the universe is meaningless... save for the butterfly wingnut. They're Nietzcheans with a love for certain hardware supplies.
* Better Than Life; Rimmer's so screwed up that his "perfect woman" is someone who hates him and has a relationship with the pool boy.
* Better Than Sex: Anything (including drugs) that makes the horizontal bop seem like a lesser thrill.
* better than what he'd accomplished when he won his gold medals... but he didn't even make the cut because all the other swimmers left him in their wake.
* better), the 2021 team was sadly unable to follow the trend; they were the favorites for gold after the return of Simone Biles and their commanding victories in the 2018 and 2019 World Championships, but Biles struggled and, on the day of the team final, found herself dealing with a loss of spatial orientation that forced her to withdraw from the team competition after one event (an uncharacteristically weak vault) due to the risk of injury; the team would finish in a stunning second place behind Russia in the team final.
* Better the Devil You Know: It's a better idea to stick with a bad situation you know about than a new situation that could be worse.
* better. The series arguably has much better pacing when viewed in its original order, and this is especially apparent at the end, where the intended last episode (chronologically occurring in the middle) is dramatic and world-changing, while the chronological last episode (originally shown in the middle) basically consists of everyone sitting around the club room on a typical day, which is quite disappointing as a season finale.
* Better Things among other celebrities all appear briefly as themselves, since Sam is an actress.
* Better Things: Duke, being the littlest of Sam's kids, is naturally this. She's the sweetest, an adorable little girl (although she grows over the course of the series, naturally) and is the most lighthearted, innocent character.
* Better Things: Duke's friend Pepper gets a fingertip cut off when Duke accidentally slams her finger in the car door.
* Better Things: Frankie, unlike her mother, sisters and grandmother, rejects feminine norms entirely, always dressing in masculine clothing and initially having really short hair. This leads to speculation by her relatives that she's a trans boy, but this is unconfirmed. By Season 4 she's relaxed this slightly, with her hair a bit longer, but only just.
* Better Things, like Sam, is a single mother with three daughters. Both are actors too, with an English mother and American father. They're also both half gentile and Jewish.
* Better Things: Much humor comes from Sam's kids saying things that you don't expect of them, like Duke swearing and Frankie asking a guy Sam dates bluntly about their sex life.
* Better Things: Phyllis, even if she gets on her daughter Sam's nerves frequently,

is really laidback, free-spirited and uninhibited. All her granddaughters adore her, even if she embarrasses them sometimes too.
* Better Things: Sam barges into Frankie's room to give her some presents while she's in bed with a boy. Frankie naturally chases her out in a rage.
* Better To Beg Forgiveness from a PMC called Ripple Creek who're contracted to protect a president, and their attempts to keep him safe after a coup is launched.
* Better to Die than Be Killed: A person commits suicide so the enemy can't hurt them on their own terms.
* Better to Die than Be Killed. Attempting to off yourself by, for an example, jumping into a bottomless pit while being attacked now still gives your attacker the kill credit, even if only one or two hits landed on you. This encourages actually playing and fighting your opponent instead of running off like a coward and forcing them to chase you and wasting time.
* better TV series and the associated comic book took place on that one. The comic was not in-continuity with the rest of Marvel's comics however.
* Better Watch Out has a boy and a babysitter he has a crush on dealing with a home intruder on christmas.
* Better we both perish than my enemy should live!, expressing the self-destructive nature of spite.
* better while underwater without their glasses; plus, in most cases, also see better than "normal"-visioned people. This has to do with the different refractive index of water vs air. This is part of the issue with why prescription goggles are far less popular than prescription sunglasses. It's also why many competitive swimming clubs have a timing clock installed underwater, in addition to one sitting on deck—many swimmers have a far better chance of reading a time clock 10 yards away on the bottom of the pool than a clock sitting on deck at the same distance.
* better with penguins. At least not banded penguins (Magellanic, African, Humboldt, and Galapagos), also collectively known as Jackass Penguins, thanks to a call that sounds like a bad-tempered donkey.
* Better with You, the characters realize that the horrible failures they suffered while wearing it actually led to something better. In one story, if his jacket hadn't fallen, interfering with the game and causing the Yankees to lose, giving him the stigma of "that guy who screwed the Yankees," he would have fallen to his death instead.

* Bettie Page Fifties pinup queen, as well as a highly memetic mascot for the neo-rockabilly culture currently popular in Southern California.
* Bettie Page, the famed pin-up model. After 1958 or so, she converted to Christianity and wanted to bury her modeling past as much as possible. Despite her resurgence in popularity in the 1980s, she barely granted interviews and did not allow current photos of herself to be published. Part of this attitude may have due to her schizophrenia diagnosis in the late 1970s. She wasn't even aware of her newfound popularity until an interviewer in the early 1990s pointed it out.
* Bettie Page was actually an exception to the buxom ideal at the time.
* Bettina Ramblé, joining forces with Diabolik to get the evidence-and letting him steal the rubies necessary.

* betting scandal along similar lines instigated by former referee Tim Donaghy, where he would call the games in such a way so that he looks fair with the calls but the scores are higher than they otherwise would be (i.e., 110-100 rather than 96-86). He would bet on the "over" of the over/under (you bet "over" if you think the sum of the two teams' scores will be greater than the given line, say 200.5,

and under if you think the sum will be less) for the game prior to tip-off.
* Betting shops in Britain's high streets display posters in their windows that promote responsible gambling with the slogan "When the fun stops, stop". The word "fun" is heavily emphasised.
* betting that his gang will replace him with someone known to be more talkative on wiretaps. When the commissioner asks why he thinks this will work, Daniels reminds him that the police have been known to promote incompetent people too.
* Bettman stripes (named for the unpopular commissioner). A few examples:
* Bettman Stripes", the vertical piping featured on some of the Reebok Edge uniforms introduced in 2007, along with the Edge redesigns of certain uniforms in particular. Ultimately, this comes down to the individual teams allowing the manufacturer to make these changes, particularly since several teams did, in fact, stand pat and keep their existing designs, while a couple more teams actually adopted more traditional-looking designs than they had been wearing before Edge.
* Bett, this means that he's basically running programs without having any idea how the code behind them works.
* Betty: All of the protagonists are real skate boarders, playing fictional versions of themselves and doing their own stunts.
* Betty and Barney do uphold the trope, much like Wilma and Fred. He's short and homely while she's a raven-haired stunner.
* Betty and Barney Hill for alien abduction stories. Betty passed a lie detector test, and both she and her husband stuck by their claims till death.
* Betty and Me. Betty is pregnant by Doctor Martin, so she doesn't wind up with offspring like her childish, naïve, and lovingly gullible partner.
* "Betty and Me" refers to a procedure being "legal in the states where it wasn't banned."
* Betty and Veronica: A character has two conflicting love interests with contrasting personalities.
* Betty and Veronica: A love triangle with a sweet, reliable love interest, and a mysterious, exotic one
* Betty and Veronica both become more than a little crazy whenever another girl takes an interest in Archie.
* Betty and Veronica, both girls are dressed as mummies for a Halloween party. But while Betty is a typical mummy, Veronica only wears enough wrappings for a makeshift bikini. Upon being called out on it by Betty, Veronica claims that she ran out of bandages.
* Betty and Veronica comic where Veronica was studying for a test while lying on the floor of her room. When the day of the test came around, she couldn't remember any of the information — until she lay down on the floor of the classroom in the same position she'd studied in.
* Betty and Veronica love triangle, they will be the Defence Lawyer for Betty and the Prosecutor for Veronica.
* Betty and Veronica moment) and Kitty demands it as this trope when she and Jake start dating (though he doesn't like labels).
* Betty and Veronica Switch: The Betty and Veronica trade roles over time
* Betty and Veronica Switch: When two love interests with contrasting personalities switch places.
* Betty and Veronica. The Veronica shows how innocent and good the Betty is, and the Betty shows the rebellious and attractive nature of the Veronica.
* Betty and Veronica: Two girls are rivals in being the main character's love interest.
* Betty and Wilma expected this trope to hold true of their new neighbors, the Gruesomes, after meeting Mr. Gruesome. It didn't.

* Betty. Betty's son, who also knows about the game, sees her playing and comments that the funny thing about such games is to make your characters stupid and ugly, to tear down hospitals and build casinos instead, and to build highways to nowhere. Betty dryly comments that she would rather make her Mods world different than the

real world.
* Betty Blue (1986): A passionate affair between a would-be author and his fiery, unstable young lover.
* Betty Blue. To quote the IMDb summary: "[The lead character] lives a quiet and peaceful life, working diligently and writing in his spare time. One day, Betty walks into his life, a young woman who is as beautiful as she is wild and unpredictable...". The trope is, however, deconstructed, as Betty is not quite right in the head.
* Betty Boop & Felix, basically replacing Pudgy the dog from Betty's own cartoons.
* Betty Boop, aside from early Mickey Mouse and Felix the Cat. But unless someone is an animation buff, very few people have watched an actual Betty Boop short, especially if it’s not one of the public domain ones. She may still be more recognizable than Popeye, but in any case, she would be a 6a, having slipped to Stage 2.
* Betty Boop, Betty is chasing a troublemaking cat when she hits a wall and a picture of an ocean view falls on her. Her head then bobs up and down from the "water" like she's really drowning.
* Betty Boop, Betty is given a piano as a birthday gift. The large box the guest had to push contained the stool, while the smaller box contained the piano itself.
* Betty Boop Betty transforms a rather plain looking cleaning woman into the stunning Sally Swing.
* Betty Boop", Bimbo gets trapped beneath a heavy, spiked weight, hanging from a single rope, with a lit candle threatening to burn it. Bimbo tries to blow out the candle, but the flame sprouts legs, jumps onto the rope, and does a little dance there before burning through it.
* Betty Boop cartoon "Ha! Ha! Ha!" includes anthropomorphic false teeth when she and Koko dabble in dentistry.
* Betty Boop cartoon has the title character working out while singing a song about how keeping her girlish figure while her friend Little Jimmy sings the verse: "If you're thin, don't worry over that. Just begin to laugh and you'll grow fat!" Betty proceeds to get into belt exercise machine that ends getting stuck at full power. By the time Jimmy can get it turned off Betty has grown so thin that she looks ridiculous. Both Betty and Jimmy laugh so much at her appearance that they both grow huge.
* Betty Boop character Whiffle Piffle appears in the street brawl from "Brotherly Love".
* Betty Boop dance moves. Causing his scenes to have much smoother animation than what the shorts in general would have.
* Betty Boop has an Army regiment battle giant mosquitos. The soldiers have middling success with giant swatters and peculiar artillery until Betty Boop arrives at the front with a huge flit gun. It takes four men to pump it, but its gas cloud eradicates the mosquitos, for which Betty is given a hero's parade through town.
* Betty Boop having sex as a gift to artists who agreed to relocate to Fleischer Studios in Florida. It was fully-inked, and had both a music score and a vocal score. However, it was only seen once and is considered lost.
* Betty Boop in a segregated crowd was quite admirable for the 1930's, and the ending when all the babies drink from the same bottle could be interpreted as a diversity message.
* Betty Boop in her cartoons, "living things" encompasses everything from bedroom furniture to trees and flowers.
* Betty Boop, in that particular scene, she was just taking off her shirt and putting it back on to demonstrate buttoning up a coat.
* Betty Boop: In "The Bum Bandit", Bimbo is cast as a robber. He finds a wanted poster of himself that reads, "REWARD BIMBO - DEAD OR ALIVE". Annoyed, he shoots a hole through it.
* Betty Boop. In this cartoon, Betty is a circus performer who is lusted after by the Ringmaster. At night, the Ringmaster accosts her in her tent and threatens to

rape her until Koko the Clown comes in to rescue her. A daring plot for a cartoon made in 1932, a supposedly "purer" time. Only "the Old Man of the mountain" may be more explicit than this.
* Betty Boop is more known today for appearing on merchandise than for appearing in short films. Ask anyone what Betty ever did in her cartoons, besides saying "boop-boop-be-doop" and getting stalked by horny old geezers, and you'll get a blank stare.
* Betty Boop is often shown working at different jobs in her cartoons.
* Betty Boop — 110 animated shorts, all between 1930 and 1939. Though in her earliest appearances she was still unnamed and just a side character, gradually becoming the star.
* Betty Boop: Most cartoons have a very thin plot line, simply intended to showcase wild surreal gags and catchy sing and dance numbers.
* Betty Boop of the mid-30's however, Betty was aged up to her mid-twenties, wore long, conservative dresses and became more passive and less wild. However, as she experienced a re-birth in popularity after the 50's, she reverted back to her sexy, Jazz Baby persona in most portrayals and is remembered by these images and behaviours mostly today.
* Betty Boop politely tries to convince Betty to eat her parent's cooking. When she doesn't, the flower takes a bite of it himself and immediately loses his petals and collapses.
* Betty Boop"'s first stand alone short, "Stopping the Show". While Betty is performing, an infant watching the show had his view blocked by a man with a tall hat. The infant asks the man to remove his hat. The man removes his hat revealing his tall head, leaving the infant sulking in his seat.
* Betty Boop's Halloween Party" a singalong takes place and the camera zooms into the mouth of one of the singers, who has an intersection where his tongue should be and a sign on his uvula which says "Downtown."
* Betty Boop" she is running away from home because her parents grounded her when she didn't eat her peas. She is implied to be a teenager, and she can be between 16 and 19 in most shorts.
* Betty Boop short "Christmas Comes But Once a Year", wherein Grampy MacGuyvers together several Christmas toys for a group of downtrodden orphans, using nothing more than common household items.
* Betty Boop: The cartoons were appreciated by children, but adults liked it just as much for the sexual innuendo and catchy jazz music.
* Betty Boop, the wicked queen/witch thwarts Bimbo and Koko by turning them into statues (they get better) — just another turn in a massively surreal cartoon.
* Betty Boop was a redhead. Modern depictions of her consistently depict her with black hair.
* Betty Boop with light bulb mounted on top. The bulb lights up when he has the solution.
* Betty Bowers church, a satire of religious extremists, were so well known that some actual religious extremists took them serious. Cue the sites being applauded by New Atheists for supposedly "criticizing" religion, even if the sites' target is clearly not Christians but rather religious extremists who modify their interpretations of the Bible as an excuse to support a right-wing cause.
* Betty Brant cleared the name of his dead husband, Ned Leeds, when she revealed that Roderick Kingsley was the real Hobgoblin (Ned was brainwashed in believe to be Hobglobin by Kingsley).
* Betty Brant Leeds had an affair with Peter Parker shortly after Mary Jane rejected his first wedding proposal, but on MJ's return to New York (ASM #242), Betty set up a date between MJ and Peter in order to bring the two back together. (Another matchmaker for Peter and MJ at the time was Liz Osborn).
* Betty Brant originally started dating Ned Leeds to make Peter jealous, but he was too busy to notice and eventually she fell in love with Ned for real.
* Betty Brant the early '60s). After marrying Ned Leeds Betty got over Peter and was shown to be very happy at his marriage with MJ.
* Betty Broderick and drove Betty to kill him, which their own children claimed

wasn't true.
* Betty Buckley didn't realise she was going to be killed off in the prom massacre, as her character survives in the book.
* Betty Bunny Didn't Do It: After the title character breaks a lamp, she blames it on the Tooth Fairy. Her brother Henry calls her a big fat liar and she runs into the kitchen and whines to her mom "Mommy, Henry called me fat!"
* Betty Cooper can be seen with this hairstyle sometimes, especially in the 1960s, though she usually prefers a
* Betty Crocker wasn't human, and is the Troll Empress, working for Lord English.
* Betty discovers she's pregnant while estranged from Don and considers aborting. They reconcile, but not much later they split up for good, and she's holding the baby on the plane as she and her second-husband-to-be fly to Reno to obtain the divorce.
* Betty Draper, being the daughter of a well-off Philadelphia-area businessman, was born at her family's shore house in Cape May. Even after she moved to New York, got married, and had kids, she still spent summer vacations there, despite Don's grumbling about the long drive from Westchester County.
* Betty Draper leans against a running washing machine and orgasms while fantasizing about a door-to-door salesman who had visited the day before. (She's sexually frustrated because her husband is rarely home, and when he is he often claims to be too tired. The real reason? Like any self-respecting early-'60s executive, he has multiple girls on the side.)
* Betty en NY, Betty can speak five languages (including English and Spanish), however, she has a hard time finding a job due to her nerdy appearance.
* Betty Ford topics such as drugs, abortion and gun control also set a precedent. Notably, she had a higher approval rating than her husband.
* Betty Grable. When he is sent back to October 1948, however, he finds that her body is less polished than he remembers it being. He admits to the Prince of Darkness that he can't go through with his plan to have sex with her as it would make him feel like a child molester.
* Betty has no inherit special powers, especially when you look at her
* Betty is a cyborg from the waist down, as a result of one of Melinda's Mooks crushing her legs with a pillar.
* Betty is one of David's partners in his synthetic drug scheme, and is also a lawyer who does money laundering for the cartel.
* Betty: It turns out that Janey had been raped by a friend of hers, but she's initially reluctant to admit this, angrily confronting another young woman who accused him but then realizes he'd done the same thing with her.
* "Betty, I won't make assumptions about why you switched your homeroom / But I think it's 'cause of me."
* Betty-Jo Bobbie-Sue Mary-Jane Anna-Lee Becky-Lou Wanda-June Ed. According to Jon, "she was named after her six aunts and one uncle".

* Betty makes paintings, and one is finally bought by a man raving about how it was just what he needed. He then tosses the painting away as he leaves, continuing to rave about the frame.
* Betty, meanwhile, has two boyfriends going at once, Gene and Wally. She is planning a weekend away with Wally, but tells Gene she is going to Lake Tahoe to see her sister. Gene says her sister lives in Michigan, and she tries to claim this is her other sister — her "half-stepsister" Bunny. She also flips from saying the arrangement was made a week earlier to a year earlier, and avoids answering questions about what Bunny does for a living or whether she is married. Gene then asks Betty's son Chad about seeing his Aunt Bunny, and Chad clearly has no idea what he is talking about; Betty tries to claim that Chad is too young to remember Bunny.
* Betty mentions that everyone has to move on to a new "phase" of their lives

early on; this movie
* Betty Ong desperately tried to inform ground operations. Between difficulty breathing (the hijackers had sprayed mace) and repeated requests for her name and seat number, and then operations specialist Nydia Gonzales getting the same requests when she tried to relay the information, precious seconds were wasted, but it was Ms. Ong's call that led to the grounding of every plane flying through American airspace.
* Betty, Phil and Lil's mother, explains that she had picked on Howard when they were kids until much later when he realized she was this.
* Betty Robinson, at age 16, won the first Olympic 100 metres dash for women. Her remarkable speed was discovered by a schoolteacher when she ran to catch a train. The way the story is told in her biography would make for a great scene in a movie:
* Betty Ross from the Hulk comics. Her relationship to Bruce Banner becomes very complicated due to the fact that her father General Ross is constantly hunting him.
* Betty Ross' original gamma mutate form, the Harpy, was basically Betty Ross-as-She-Hulk with the wings and legs of a giant bird. Her Red She-Hulk form is a crimson-skinned
* Betty Ross's first canonical love interest, and the one that the writers will always come back to.
* Betty Ross tears through several of Fortean's hired goons, while a terrified Jackie McGee watches.
* Bettys Diagnose has main character Bettina "Betty" Dewald played by Bettina Lamprecht.
* Bettys Diagnose patient of all things, complete with shocking the flatline. At least they're shown squirting gel on the pads before rubbing them.
* Betty's Diary procrastinator than she was. He wound up spending almost an entire week trying to do the things that he's been putting off.
* Betty's mother wears both eyeshadow and lipstick, but while she might be a bit of a neglectful and self-absorbed mother, she's not evil.
* Betty: The series is loosely based on the main cast's lives, who all play fictional versions of themselves.
* Betty, the title character goes to a burger bar and is told that she can choose between three burgers: "Ralph, Li'l Ralph and Big Ralph". Animated versions of the Ralph burgers are rapping and dancing on the menu screen. Not impressed by the overly hip gimmickry, Betty asks for a burger without a personality.
* Betty was during the journey, and that it has made her decide that she just has to try harder to save Simon.
* Betty White and Allen Ludden—probably mostly because although he was sort of tall, White looks to be only a couple of inches over 5 feet when she isn't wearing heels.
* Betty White had an old lady approach a guy and ask him to dial one of these so that she could talk to her grandson in another country. She recited at least thirty digits before stopping and asking to start over. The second time, she took the phone back, but then said it was a wrong number.

* Between Dark and Dawn" reveals that Princess Celestia is deathly afraid of chickens and needs her little sister, Princess Luna, to scare them away for her.
* Between Failures. Ed is so short that he needs slightly platformed shoes to stand shoulder height to some of his other male co-workers, while Nina is so tall that most women's shirts fall above her navel.
* Between Failures has Nina giving one to Ed before they're properly introduced.
* Between Failures offers a rather touching scene in which Reggie, not generally the most likable character in the cast, tells the story of “his first

time” for a club initiation. The occasion proves to be a family wedding, the girl a cousin; his story is discreet to the point of allusion, and he dismisses accusations of “lack of detail” with an aloof put-down.
* Between Failures. When she makes off with his DS, he chases her out of the apartment and refuses to let her back in until she "relinquishes her hostage". She relents when the awkward neighbor guy gets a photo of her in nothing but her panties.
* between French and English. The strip has two separate scripts, running side by side, one in each language. The English is innocent and fairy tale like, while the French veers into darker territory.

* Between her biological daughters, she seems to favor Anastasia more than Drizella, but at the end of the day, they're both just tools to her.
* Between her departure in the Season Six episode "Calculated Risks" and her return in three episodes of Season Fourteen, Diana is seldom mentioned, even when Karen is talking about her experiences raising Eric and Michael. She is absent from numerous major events in her family's lives such as Eric being hospitalised after contracting arsenic poisoning in Season Seven, Karen being kidnapped in Season Eight (she does speak to Eric over the phone after Karen is rescued in "Slow Burn" but he seems desperate to get her off the phone before Karen arrives home) and Karen and Mack adopting Meg in Season Nine. Her return in Season Fourteen only served to highlight the odd situation as "The Way Things Were" was implied to be the first time that she had ever met Meg.

* Between My Brother and Me: Mors Omnibus has Yvonne Maxa (an alternate version of Pokémon's Serena) who was once a little girl who had four adorable puppets and used them to put on shows. In the present, she's quite adorable and is known to murder people with a knife in hand and her puppets — which somehow look like Yuya and his counterparts, albeit if they were all 6 — come to life and join in on the murder time. Notably one reviewer of the story is terrified of her as they cannot comprehend how someone so cute as Yvonne can be so goddamn crazy.
* Between My Brother and Me: Mors Omnibus is a knife. She uses a variety of them,

each of them depending on her attire: She uses two barbed daggers when dressed as Caiha, a stiletto as Jason the Toymaker, and her main knife is a switchblade that just so happens to be the one used by the mob boss that wanted to murder her.
* Between My Brother and Me: Mors Omnibus. She even asks Mallow (who runs a Burmese restaurant in this story) if she has noodles for said sorrows.
* Between My Brother and Me: Mors Omnibus, various students of the You Show Duel School of Carroll City wear them for 1) keeping their identities secret when they venture to the other dimensions and 2) because they're also dressed up for their school festival. Some of the adults also join in on the fun.
* Between My Brother and Me: Mors Omnibus versions of people (Shuzo, Yoko and Yusho), pets (En and Core) and duel monsters (Odd-Eyes Pendulum Dragon) with a dark circus aesthetic.

* Between Planets attached to a Dead Man Switch, to which Don Harvey is assigned as his battle station.
* Between Planets has the protagonist assisted by a woman who convinces her father to loan him money, despite the fact he has nothing to guarantee it. When he asks her to hold on to a ring for him (he thinks it has important secret information in it) she is startled about being given a ring and he doesn't understand why a woman would consider being given a ring something unusual. When her father finds out that the protagonist gave his daughter a ring, he questions it also, but the protagonist is still clueless about why it might be considered strange.
* Between Planets, his protagonist refers to "the great field, still slightly radioactive, where Old Chicago used to be." It is not known if this is a result of the Wet Firecracker War or some other incident.
* Between Planets takes place in New Chicago since Old Chicago was destroyed during a limited nuclear war.
* Between Planets, the Earth's repressive police state government has a space station called Circum-Terra that's loaded with nuclear weapons.
* Between Planets. The Federation has a large space station in orbit around Earth called Circum-Terra. It's their main guided-missile control station, and can fire missiles at any city on Earth. It has between 200 and 1,000 fission bomb rockets and components for the manufacture of fusion bombs.
* Between Planets, the protagonist Don Harvey is subject to questioning by Venus Republic soldiers while hooked up to a lie detector after first waiving his rights about self-incrimination.
* Between Planets, the rebelling Venus Nationalists are called "fog-eaters" by Federation troops due to the heavy mists common on Venus and the Federation troops are called "greenies" due to their mottle green fatigues. Among themselves, the Venus guerrillas called themselves "duckfoots".

* Between the late 1820s, when Hans Christian Ørsted first extracted it in pure form, and the invention of the Bayer and Hall–Héroult processes in the late 1880s, pure refined aluminium was more expensive than gold. Merely heating the ore will only give you an impure mixture of several minerals (mostly aluminum oxides and silicates) unlike most other metals, and early methods of extraction

required reacting difficult-to-produce anhydrous aluminium salts (typically aluminium chloride) with alkali metals (typically sodium or potassium) until the modern Hall-Héroult process was discovered.

* Between the late 19th century until the 1960s, bowling was as popular as the other big leagues. For instance, Don Carter became the first athlete to sign an endorsement contract worth one million dollars in 1964 (by comparison, NFL's Joe Namath earned $10,000 with Schick four years later) and there were two bowling shows on prime-time. By the 1970s however, the lethargic and complicated nature of the sport coupled with its down-class appeal led to a continued decline, except for a period in the mid/late 1980s when automatic scoring was introduced. During the late 2000s and the 2010s, many bowling-alleys became part of "entertainment centers" in order to make them more respectable. As a result, interest in bowling has increased, although time will tell if this will be another fad like in the 80s or a more permanent trend.
* Between the Lines, and tells them she's going to seduce a security guard working at the animal testing center they plan to attack. The security guard is actually Naylor, also working undercover. When someone asks why she didn't pick someone younger and better looking, Mo replies that men are like dog shit. "The older they are, the easier to handle." Naylor, however, is embarrassed as Mo is both his colleague and a lesbian. Eventually, Mo has to tell him to start pawing her as the others are watching and "I'm supposed to be seducing you, not taking you by force."
* Between the Lines bleaches her hair. As an adult her hair is its natural black with pink bangs.
* Between the Lines centered around the London Metropolitan Police's variant of Internal Affairs — the Complaints Investigation Bureau (since renamed the Directorate of Professional Standards). The officers are seen as decent individuals performing a totally necessary role (in a world where policemen generally are corrupt enough to beat suspects, forge confessions and run their own private businesses on paid time). While the show is sometimes cynical about the outcomes of investigations, it makes it quite clear that corruption exists and shouldn't be condoned.

* Between these two cases of team orders, NASCAR CEO Brian France made the decision right before the opening Chase race at Chicagoland to add Gordon to the Chase field, expanding the field to 13 drivers, "based on the totality of events that were outside" Gordon's control, and the team orders of MWR and Penske being meant to give Gordon an "unfair disadvantage", coupled with the fact that if Bowyer hadn't spun and the caution hadn't come out at any point between lap 393 and the white flag, Gordon would have qualified for the Chase on points based on his running position. The next year, an entirely new Chase (later simply renamed the playoffs after Sprint was replaced by Monster Energy as title sponsor for the Cup Series in 2017) format was introduced in which 16 drivers would compete for the championship, and every three races, the four drivers lowest in the Chase standings would be eliminated from contention; drivers would automatically be eligible for the new format simply by winning. The new system, in addition to trying to create

more "drama", was designed in response to Spingate, as now the outcome couldn't be manipulated as easily.

* Beverly Cleary book "Ramona the Pest." On her first day of Kindergarden, Ramona is hoping to finally learn the answer to one of her most pressing questions — how, in the famous kids' book "Mike Mulligan and His Steam Shovel," Mike Mulligan is able to go to the bathroom while digging the giant hole he can't get out of. After Ramona asks the teacher, the children argue amongst themselves, offering different theories, before concluding that Ramona's right — it would have been impossible. The teacher, clearly out of her league, announces with feigned authority that the question wasn't addressed because "it wasn't important," leaving Ramona deeply disillusioned with the public school system.

* Beverly Hills, 90210: Brandon doesn't like it when Brenda falls for Dylan, knowing of Dylan's reputation (he's an alcoholic, among other things). Indeed, when Dylan stands her up, Brandon tells him off and warns him not to hurt her. However, it's the only warning Dylan ever gets, as Brandon never intervenes nor ends their friendship over the numerous other times Dylan breaks Brenda's heart.
* Beverly Hills, 90210. Brandon's ex-girlfriend Emily stalks and harasses him after he breaks up with her—calling him repeatedly, following him, etc. When he finally gets fed up and blows up at her, she whines, "I can't help it, I love you."
* Beverly Hills, 90210: Brenda finds an earring in Dylan's house and confronts him. She's pacified when he claims it belongs to his mother, but in truth, it belongs to her best friend, Kelly, with whom he had a fling while Brenda was away for the summer.
* Beverly Hills, 90210. Dan starts out as a sweet boyfriend to Andrea, then abruptly turns into a controlling jerk. To top it off, he turns into a racist too, making snide comments about her next boyfriend, who's Hispanic.
* Beverly Hills, 90210: Done frequently. David's mother and grandmother are absent from his wedding at the end of the original series. Dylan's mother also doesn't appear at his wedding in season 6, either. The group's college graduation has this en masse; Brandon's parents, Valerie's mom, Steve's mom, and David's mother are absent.
* Beverly Hills, 90210. Dylan's father was killed this way, kicking off his downward spiral. Years later, it was revealed that he had actually been spirited away into witness protection.
* Beverly Hills, 90210 ends with the gang dancing the night away at Donna and David's wedding reception.
* Beverly Hills, 90210 feels sorry for her, citing how lonely she must have been.
* Beverly Hills, 90210 got married by the end of the series. This was eventually subverted in the spin-off, where we find out they have seperated.
* Beverly Hills, 90210 had Brandon dating a teen mother with a baby named Joey. They constantly played Concrete Blonde's hit single "Joey" during the episode. The song is about a woman in a co-dependent relationship deciding to stay with her alcoholic lover.
* Beverly Hills, 90210: Halfway through Season 4, a stranger shows up on Dylan's doorstep, claiming to be his late father's ex-girlfriend, and the mother of Dylan's half-sister, who he never knew existed. Dylan agonises over whether this woman is legit, or she is performing some sort of scam to get his money, and after half a season with her, and Dylan finally deciding that she is legit, we find out that she was scamming him all along and everything she said to him was just a ruse to get access to his money.
* Beverly Hills, 90210, hidden in her room. Then she imagines everything the diary narrates with her friends, family and acquaintances as the characters of the history. At the end Brenda locates and meet the owner of the diary, who shows her the pictures of the people mentioned in those texts, who are obviously very differently from how Brenda had imagined them.
* Beverly Hills, 90210: In the episode "Wild Horses", Dylan enters into a brief affair with a woman at least 20 years his senior. It's not stated how old she is, but it's roughly late 40s/early 50s.
* Beverly Hills, 90210: In the Season 2 episode "The Next 50 Years", Scott Scanlon's fixation with guns ends up accidentally killing him when he spins one

* Beverly Hills, 90210) is often touted as "the pretty one" of the group.
* Beverly Hills, 90210, it's highly likely the toilet would have clogged, given the amount they were flushing, as well as the plastic bags).
* Beverly Hills, 90210 makes a sad example of this when her backstory is finally revealed.
* Beverly Hills, 90210 needled him about how "hip" he was being. The second was a girl he met during a road trip with buddy Steve, resulting in some very negative reactions from her ex and his friends, as well as some stereotypical rednecks.
* Beverly Hills, 90210, resident nerd Andrea ends up pregnant and married within weeks of losing her virginity, to the second guy she slept with. The plot was done to incorporate the real-life pregnancy of the actress, and the writers explained that they thought it would be too much to have her pregnant by the guy who deflowered her. Still, getting pregnant by Guy #2 isn't that much better and when compared with the rest of the gang, who had been sexually active for years, Andrea got shafted.
* Beverly Hills, 90210 sequel, the focus of the show shifted from the Wilson family to Naomi somewhere between seasons 2 and 3.
* Beverly Hills, 90210 subverted it most of the time: Dylan picked Kelly over Brenda (several times), Brandon never actually got together with Andrea, neither Steve nor David ended up with Kelly (both, especially the latter, became a brother figure to her in later seasons).
* Beverly Hills, 90210 the characters actually attended junior year twice, in a move to extend the life of the popular show.
* Beverly Hills, 90210. They are best friends and she has a big crush on him in early seasons, but nothing ever happened between them.
* Beverly Hills, 90210, this is how Kelly resolves the Dylan/Brandon love triangle. "I choose me!"
* Beverly Hills, 90210 to get the part, then suggests to her boyfriend that he physically harm her so that she'll have to give it up.
* Beverly Hills, 90210 were/are known for having the main characters go though partners faster than they change clothes. Kelly is probably the worst offender in the first series and Annie in the sequel.
* Beverly Hills, 90210, when the Peach Pit is robbed. Like Doogie, Brenda (the victim) admits how terrified she was, but insists that she's feeling better as time goes on even though she is actually getting worse. She finally flips out in the middle of an exam when a sound reminds her of the robber's gun cocking.
* Beverly Hills, 90210. While in Paris, Brenda and Donna order "veal". Unfortunately, the English word "veal" sounds like the French word "cerveau". After being served their meal, the girls are horrified to learn they're eating. . .calf brains (a well known delicacy in France, but obviously not in the US).

* Beverly Hills Cop II: A series of crimes base on the alphabet leads to a major gun-running operation.
* Beverly Hills Cop II, Bogomil conducts his own investigation without telling anyone.
* Beverly Hills Cop II ends with Taggart shooting Karla in the back before she can shoot Axl.
* Beverly Hills Cop II has Billy firing a LAW rocket while holding it loosely in front of himself sideways as he reads the directions. "Extend here. Press here." click-Whoosh! It is correctly shown with very little recoil.
* Beverly Hills Cop III, Axel Foley discovers a counterfeiting ring being run in an amusement park. When the authorities come to investigate, all they see being printed is novelty money for use within the park. There's also a subversion in which a seized van turns out to be empty, except for, as it later turns out, a crucial piece of evidence.
* Beverly Hills Cop III, Axel hurriedly obtains a gigantic "urban survival weapon" before heading into the film's showdown. His attempts to use the overdesigned contraption result in everything from popcorn to rockets randomly firing out of it at the bad guys.
* Beverly Hills Cop III by framing him for the attempted murder of the theme park's founder.
* Beverly Hills Cop III: It's not a Ferris wheel exactly, but close enough. Our hero, Axel Foley, gets onto the ride to escape the bad guys, and is hoisted in the air. The bad guys try to get him down by overriding the controls of the ride, and end up breaking it. The ride is damaged, and one of the gondolas is about to fall. Foley then spends the next few minutes jumping from gondola to gondola, and climbing along the supporting beams, to reach the broken gondola before it falls. He, of course, succeeds. And, he's not even a super hero.
* Beverly Hills Cop III Kimbrough, Rondy and Cooper and kills all of them. When more of them run in, Axel props one of the dead guys, Kimbrough, up, lifts his arm so Kimbrough is "pointing," and yells "He ran up those stairs!" They all fall for it.
* Beverly Hills Cop III lifeguards, to surround and secure a single suspicious van, which proves to be empty; he gets chewed out for it.
* Beverly Hills Cop III, who shoots Dave (he gets better). He then hands the gun to Axel, who is initially reluctant to touch the weapon. The guy just shrugs and points out that the weapon belongs to Axel, so his prints are on it anyway. Axel manages to run away before he's shot.
* Beverly Hills Cop II the hitman's fingerprints, even though he was the last one to handle it and didn't have gloves.
* Beverly Hills Cop II, the so-called Alphabet Bandit leaves behind cryptic clues that leave the cops scrambling to decode them. In fact, the code was there to confuse the cops while the culprits were busy doing something else.
* Beverly Hills Cop II to hear a TV news report of Bogomil's shooting.
* Beverly Hills Cop in a bonded warehouse Axel Foley threatens a clerk who's asking awkward questions.
* Beverly Hills Cop. In one scene, he parks it on an incline and it starts to roll away. His ex-girlfriend Jeanette is apparently quite familiar with the car, as she asks him if he's still driving it.
* Beverly Hills Cop in order to get a hotel room that he obviously did not reserve in advance.

* Beverly Hills Cop — Action comedy movie series. Four films since 1984.
* Beverly Hills Cop: Michael Tandino steals millions of dollars in bearer bonds from a man named Victor Maitland. Unfortunately for him, Maitland is a major drug dealer, who sends hit men to find Tandino, recover the bonds, and execute him.
* Beverly Hills Cop: Murder of a man in Detroit → international drug smuggling operation in Los Angeles.
* Beverly Hills Cop right next to the window that they could have thrown Axel through, they just wanted to be asses about it.
* Beverly Hills Cop's goons. Of course, the scene doesn't actually end this way, making it a parody as well.
* Beverly Hills Cop's mansion when the supporting cast detectives are pinned down by machinegun fire from some goons.
* Beverly Hills Cop, Taggart and Rosewood try this to scale a wall during the infiltration of Victor Maitland's mansion while Axel goes around. They struggle with it several times before they finally get over the wall, much to Axel's amusement.
* Beverly Hills Cop Taggart tells Billy, if they make it out alive, he's going to make him pay.
* Beverly Hills Cop was an action film, Billy Rosewood was originally killed off halfway through.
* Beverly Hills Cop when he searches the warehouse with Jenny and finds the bags of white powder underneath coffee grounds in a crate. It ain't sugar.
* "Beverly Hills" is a better example. It's their biggest hit, and it sounds nothing like the rest of the album (Mostly soft ballads)
* Beverly Hills Ninja and winds up with the corpse landing next to him. Once in Hong Kong, where the corpse lands in his little raft at the wharf, and once in Beverley Hills with a pair of freshly shot Yakuza landing in front of him on a pile of garbage.
* Beverly Hills Ninja dump a concoction of herbs, called "The Laughing Mushroom", down the throat of an agent (Will Sasso) to make him reveal information. He is unconscious as the herbs are being poured in his mouth.
* Beverly Hills Ninja. Martin and his gang are last seen being taken away by the police.
* Beverly Hills Ninja ninja films. It features a tribe of ninjas adopting an orphan Caucasian boy whom they think will be their clan's long-prophesied "Great White Hope." Unfortunately for them, the boy grows up to be a clumsy, uncoordinated adult (played by Chris Farley) and the only way he can save the day is with the secret assistance of the ninja tribe's best Japanese member.
* Beverly Hills Ninja, with a three-section staff. Matter of fact, the hero for most of the film falls under this trope ("he's an embarrassment to ninjas everywhere"). Then someone hurts his clan brother. He suddenly becomes a real ninja.
* Beverly Hills Teens: A circus is released when Chester accidentally gets some cotton candy on the cage controls.
* Beverly Hills Teens attempts to sabotage Larke during a competition are actually seen by the judges as an original touch deserving a first place.
* Beverly Hills Teens, but she's the main reason most fans watch the show.
* Beverly Hills Teens), Chester makes Blaze's hair (she is locked in a tower like Rapunzel) grow with some magic formula. It seems like the formula was flawed, though, since unlike normal hair, which can support twenty tons, the new hair couldn't even support the weight of the prince (Troy, that is).
* Beverly Hills Teens could count as this, as they are all so rich and pampered that they have no idea how to perform basic tasks. In practice, though this best applies to Bianca and Pierce, the most commonly antagonistic characters, as in addition to their wealth and privilege, they tend to be snobby, thoughtless, and rude.
* Beverly Hills Teens has Larke who is the nicest character of the group.
* Beverly Hills Teens if you wanted to get everybody together you told Switchboard, and pretended it was a secret.

* Beverly Hills Teens once brings half a dozen suitcases with "absolute necessities of life" along. Doesn't sound like much? Well, perhaps it should be mentioned she brought them for a day in a beauty salon...
* Beverly Hills Teens responds to a remark about "embracing" boys with "how totally yucky." She changes her mind after a few minutes, when she is thrown into the air and Troy catches her.
* Beverly Hills Teens's attention by arranging a fake kidnapping. Unfortunately, an actual criminal overhears the conversation and kidnaps her for real. Soon, it becomes apparent that the episode isn't titled "Take My Hostage, Please!" for nothing.
* Beverly Hills Teens situations with Larke, Bianca still loses and then throws everyone out of her mansion. Her being a Sore Loser is either the ending or the entire premise of half the episodes.
* Beverly Hills Teens. The funny thing is that most of the other cast is also filthy rich, so she just fills the bitch part, although she seems to be slightly richer than them.
* Beverly Hills Teens: The opening sequence includes some shots of the girls doing flashy poses while modeling clothes.
* Beverly Hills Teens, where Bianca and Larke wore the same outfit to a costume party (save for some color differences), and then both got changed into new outfits, that are still the same.
* Beverly suspects that Hannibal is a murderer. After breaking into Hannibal's house and uncovering evidence of his cannibalism, a VERY unhappy Hannibal discovers her and kills her offscreen.
* "Beverly" was originally a male name that became a mostly female name. A good example would be male drummer Bev Bevan of Electric Light Orchestra, whose given name is Beverley. There was also British author and playwright
* Be very careful what you ask a pregnant woman or new mother about the health of her or her child. The number of embarrassing questions they have to answer, combined with more medical appointments than she'd likely had in her whole adult life up to that point, means that pregnant women often forget that people generally don't want to hear about, for example, blood and discharge, stitches or
* Bevin Bru, known mainly for her role as Angelique "Angie" Martin on
* Bevin Bru, who plays Angelique (Ryan's ex-girlfriend) is bisexual as well. Given the above, it's probably a deliberate choice.
* Bevvox, the founder of The Think Tank, a huge organism which previously wandered the stars by itself for thousands of years. Unlike some of the others listed here, instead of bragging about how ancient it is, it's apparently sensitive about its age.
* Beware My Cheating Bart player wearing nothing but a helmet and a diaper.
* Beware My Stinger Tail: A creature has a stinger at the end of their tail that they use to strike their enemies.
* Beware Of Chicken a number of animals are accidentally uplifted through eating magic herbs.
* Beware Of Chicken is a novel set in and written like Wuxia, but is more from the perspective of the Muggles that have to live in a world full of cultivators.
* Beware of Hitchhiking Ghosts: A fairly common ghost story in which a motorist picks up a hitchhiker off the road and takes them along for the ride, only for the driver to later find that their mysterious passenger has suddenly vanished...
* Beware of Hitchhiking Ghosts: Ghosts masquerade as hitchhikers and get inside cars.
* Beware of Hitchhiking Ghosts: Hitchhiking ghosts cause trouble for those that pick them up.
* Beware of the Car the cop does not think of stopping his motorcycle and just walking toward the criminal.
* Beware of the Purple Peanut Butter has the titular purple butter that makes you shrink, and a piece of cake that makes you grow in size.
* Beware of this scorpion! Few have been strung by its tail and lived to tell the tale!

* Beware of Vicious Dog does serious harm to someone, the dog may be euthanized.
* Beware of Vicious Dog: Woof! GRRRRRRR! Woof! GRRRRRRRRR!! (I hate everyone and I'm going to bite them!)
* Beware the Batman: Batman has a couple of near misses with fixtures attached to the ceiling while on top of a subway car in "Control".
* Beware the Batman Bruce and Alfred are playing chess and Alfred moves his piece into checkmate, prompting Bruce to simply knock the King over with one of his pieces. Possibly justified: Bruce says they play chess because Alfred keeps him on his toes; he might purposefully be practicing against someone who cheats.
* Beware the Batman episode "Twist", once Bruce Wayne learns the truth about Slade Wilson's past, he pieces together the villain's elaborate scheme throughout the past few episodes to Alfred and Katana. The one part he misses, Dane Lisslow's supposed death, is answered by Slade himself in the next episode.
* Beware the Batman had the last two episodes of season one available on the Season 1 DVD which came out months before the two aired in the U.S.
* Beware the Batman had the last two episodes of season one premiere on DVD in the U.S. long before they aired on CN.
* Beware the Batman, Humpty Dumpty handles defeat remarkably well. He releases his hostages after being beaten without a fuss, even though he didn't have to and he had a personal vendetta against them.
* Beware the Batman: In "Games", Humpty Dumpty traps Batman, Katana, Commissioner Gordon, Mayor Grange and Tobias Whale in a house full of death traps that they have to navigate their way through.
* Beware the Batman is fairly episodic at first, and Tatsu is just introduced as a civilian who has not yet become the vigilante Katana. The first few episodes develop her character through minor scenes and B-plots. It's not until the seventh episode, "Family", where she finds out the truth about Bruce Wayne and Batman, she fights alongside Batman against the common threat of the League of Assassins, and the first actual story arc of the season officially kicks into place. The series becomes increasingly serialized after that.
* Beware the Batman. (It's still Meaningful ["One for sorrow..."] just a touch more subtle).
* Beware the Batman, Magpie does this Katana in the episode "Attraction".
* Beware the Batman. Noticeable in that she was explicitly touted as "the new Robin" in press releases. Seeing how the show was canned after a mere 26 episodes, forbidden from being aired after September 28, 2014, and written off by the company, we will never know.
* Beware the Batman. Pounder is best known in the DCAU for voicing Amanda Waller, a role she played in virtually every speaking appearance of the character (including movies, video games, and TV series).
* Beware the Batman, rounding up corrupt businessmen who've damaged nature in some way and hunting them.
* Beware the Batman: The episode "Choices" follows Barbara Gordon as she juggles with her double life as Oracle, switching between saving Batman and Katana from Killer Croc, while attending a date with a popular boy from her school.
* Beware the Batman. This also goes for the League of Assassins, who brandish sharp swords, but never seem to actually kill anyone with them.
* Beware the Batman, to go along with his stronger, street-tough characterization.
* Beware the Batman trying to claim the dead-or-alive reward offered by Ra's al Ghul. Batman surrenders to one of them, who is then attacked by another villain, and so on until Batman is able to simply walk away from the free-for-all.
* Beware the Batman was not picked up for another season, so it left behind some loose plot threads, such as Batman's allies coming together as the Outsiders, Harvey Dent becoming Two-Face, and Anarky still playing his twisted games.
* Beware the Batman was pulled from the air indefinitely by Cartoon Network, the comic book tie-in premiered and came out as scheduled. As a result, later issues spoiled several characters and plot developments that were not in the series up to that point.
* Beware the Batman, who decided to show all 26 episodes at 3:00am weekdays, only

to have it pulled from their hands when Cartoon Network decided to write the series off their taxes. Fortunately, Toonami made a last-minute decision and did a marathon of the final seven episodes right before it disappeared forever.
* Beware the Batman, with a hostage dangling from a cable, trapped with a bomb, under the gondola for added fun.
* "Beware the Creeper" has a woman seeing the Creeper (who is perched on a building ledge and looking in the window) in the mirror. This case is
* Beware The Gonzo got kicked off the school paper for being his, he starts his own gonzo style paper as a result.
* Beware the Honest Ones: How can you predict someone who acts against their own self-interests in the name of principles?
* Beware the Living: When there are zombies running amok, humans are more a danger to themselves than the zombies are.
* Beware the Nice Ones, as unlike her other self, Outer Moka avoids getting into fights if she can help it.
* Beware the Nice Ones: Heroes who can be quite dangerous and formidable when pushed too far.
* Beware the Nice Ones: Nice people can be quite scary when they're enraged.
* Beware the Nice Ones: Watch it—I may be nice, but that's no reason to underestimate me.
* Beware the Nice Ones: When a character that's usually nice and patient ends up flying into a rage after getting sick of putting up with a less nice person's crap.
* Beware the Quiet Ones: Characters who don’t speak much turn out to be more threatening than they led on.
* Beware the Quiet Ones: Probably not a good idea to treat this person as an easy target, they may be more dangerous than you think.
* Beware the Silly Ones: Characters prone to silly and bizarre antics proves that their silliness doesn't mean they're harmless.
* Beware the Silly Ones: Just because someone is a goofball doesn't mean they can't be a threat.
* Beware the Silly Ones: Just because this guy is a buffoon doesn't mean he's harmless.
* Beware the Silly Ones: Sometimes even characters who aren't that smart can be dangerous when provoked.
* Beware the Skull Base: Giant skulls acting as dungeons or fortresses.
* Beware the Skull Base: Villainous lairs and locales shaped like skulls.
* Beware the Superman: A super-powered being abuses their abilities to rule over normal people.
* Beware the Superman: A super powered being will chose to become a supervillain by using their abilities for personal gain, rather than help those around them.
* Beware the Superman: A super-powered individual abuses their abilities to rule over normal people.
* Beware the Superman: Superpowers bring about disaster rather than justice and order.
* Beware the Superman was based on had the character become evil. However, most versions of Superman are truly heroic.
* Beware the Superman: Where transhumanism (and the idea of super-beings in general) has an overall negative net effect on the world.
* Beware the Wild had a sister; any physical evidence of her brother, including photos, has also been changed. It soon becomes clear that this has happened several times before - the only person who believes her immediately is a classmate whose troubled reputation stems from a breakdown after his best friend vanished when their car crashed into the same swamp - and towards the climax, the force responsible begins to extend through town, unpersoning people fast and often.
* Be wary of any cheap sword or fantasy weapon made with "historically accurate practices." Usually it will only be some historical practices, like the use of lower quality metal (and minus the tempering to fix that) or the lack of modern techniques like quality control.
* Bewildering Punishment: What did I do to you that made you so vengeful?

* Bewitched, a character uses a string of sausages to attract the attention of an uncooperative canine actor. Since the sausages are competing with magic it doesn't work.
* Bewitched. A chimp Samantha turns human lands a spot in an ad campaign for cologne and makes an immediate impression on Larry Tate and his client. Samantha, however, intends to take him back to his owner and suggests that, in order to get fired, he show his true colors, which he does by biting one of the crew behind the project among other things.
* Bewitched: Ad exec Darrin Stevens tries to live with his witch wife Samantha and her crazy family of magicians, witches, and warlocks.
* Bewitched also plays Iris Smythson, one of the world's greatest actresses of all time, who is also co-starring in the new series as the new Endora.
* Bewitched; although one of the show's underlying messages was tackling prejudice, this episode was the gutsiest one (though tame by today's standards) in tackling racism head-on with Tabitha wishing she and her friend could be "real" sisters, despite the different colors of their skin.
* Bewitched Amphibians: Currently, this has become a partially discredited and when faced with the stereotype, magic-users are more likely to irritably explain that turning people into frogs is impractical with so many other spells at hand. However, they're still quite likely to do it if it becomes convenient.
* Bewitched Amphibians: For whatever reason, frogs and toads are very popular animals for wizards and witches to turn people into.
* Bewitched Amphibians: They could be a prince, they could be a lying frog...
* Bewitched averted this. The front door was stage right with a foyer, the stairs descended into the middle of the main room, dividing the living room from the dining room, and the kitchen was a separate room (with shutters dividing the kitchen from the dining room). A hallway leading out of the left hand side of the foyer led to Darren's study/home office, a side door to the house and a second door into the kitchen. The living room was off the right hand side of foyer and had large glass doors along the back wall that opened onto a patio. There was also a half-bath downstairs.
* Bewitched a witch, suggesting that being a witch or warlock is genetic. Endora once berates Darren for being mostly water, suggesting that they're biologically very different from humans, but Tabitha has the same needs as a normal baby (naps, diaper changes, and feedings) suggesting that they're biologically similar.
* Bewitched be a witch (again, with powers identical to her character's), and begins a romance with Isabel's father. The film even ends with Isabel and Jack (the actor playing Darrin) getting married and moving into a house with an actual Gladys and Abner living across the street.
* Bewitched, "Bewitched, Bothered, and Baldoni", features a statue of Venus being turned into a real woman and ending up as the Stephens' maid. Samantha hands her an apron and asks her to put it on. When Venus comes out of the bathroom, Darrin gawks and Sam is shocked.
* Bewitched, Bothered and Bewildered and giggling at him, while the guys are watching him enviously.
* "Bewitched, Bothered and Bewildered" features Xander trying to do a love spell on Cordelia, only for the spell to go wrong and every woman in Sunnydale (including Buffy, Buffy's mother, Drusilla and witch Amy) to fall head over heels for him. The only person who seems unaffected is Cordelia (due to the miscasting of the spell), but it transpires that she was already in love with him, she was just pretending not to be.
* Bewitched: Bumbling Aunt Clara causes the Northeast Blackout of 1965 when she tries to use magic on some candles.
* Bewitched, complete with the screen becoming pillarboxed (this episode is in HD).
* Bewitched continually satirizes American conformity, consumerism, and racism. More or less Horatian, per the standards of the day.
* Bewitched: Darrin and his boss Larry Tate, who is at least a decade or two older than Darrin. Darrin usually goes to Larry for marriage advice, since he has far more experience in that field.

* Bewitched, Darrin and Samantha go on holiday to a "beautiful cabin" Larry has in the hills... which turns out to be a decaying, crumbling mess. When a storm sets in, Sam magics it into the cabin that was described. Trouble starts when Larry then shows up...
* Bewitched: Darrin's favorite breakfast combination is scrambled eggs and chicken livers.
* Bewitched, Darrin Stephens acts as a Secret Keeper for not only his wife, Samantha, but also for his mother-in-law, Endora, her father, Maurice, as well as Samantha's many aunts, her Uncle Arthur, and Samantha's witch-doctor, Doctor Bombay, all of whom interact with various mortals during the course of the series.
* Bewitched did. When asked why she didn't speak up sooner, she replies "Nobody asked me." The curse is quickly undone, and order restored.
* Bewitched episode, Gladys the Neighbor was frequently spying on Darrin and Samantha's home. Gladys rubs her eyes and often gets more than she bargains for.
* Bewitched focused specifically on the issue, with Samantha (apparently) admitting she will still appear to be in her twenties when Darrin is in his seventies. The dilemma is solved when Samantha uses her magic to age along with Darrin. It is unclear whether this would include her actually dying with Darrin instead of living centuries after his death, but for her to shorten her lifespan so radically to age as Darrin ages would provide yet one more reason for Endora's continual efforts to turn Samantha against Darrin. (Given the fact the series ran for eight seasons, it was actually possible to see Samantha make good on her promise as the actress aged into her late 30s as the series progressed.)
* Bewitched for Serena, although Samantha and Darrin were still stuck with the two talking sculptures at the end.)
* Bewitched for the Stephens and their unborn baby. Before she goes, though, she produces a list of the things she's broken and, without missing a beat, rapidly determines the exact percentage of her salary that should be withheld to pay the damages. Impressed by Naomi's calculator-like mind, Samantha suggests that Darrin find her a job in his advertising firm's accounting department, where she can get more money and play to her strengths. She rushes to tell Naomi the good news, saying "Mr. Stephens had the most wonderful idea!"
* Bewitched. (Fortunately, one frog of each colour is non-magnetic so won't get attached to any of the deadly/also magnetic snakes so no player is caught out due to rotten luck.)
* Bewitched give him three wishes and he just hadn't used them, he uses his first wish to summon Endora, proving that he still had them. The second?
* Bewitched had the episode "Sisters at Heart" written by several inner city school kids that touched on racial issues. The writing staff only added content to ensure the episode met standards and practices and was of appropriate length. All changes were approved by the students.
* Bewitched in the waiting room pacing and handing out cigars when she gets the news that she's now a mother.
* Bewitched involved aliens visiting Earth and threatening the neighbors with their terrifying N-guns — which turns out to stand for "niceness".
* Bewitched involves Samantha & Darrin and Larry & Louise. Although both couples remain devoted, the four of them are subject to supernaturally-induced mishaps in some episodes, such as "Mixed Doubles" from Season 7.
* Bewitched, Isabel's attempts to prove she's a real witch fail because Jack thinks they're extremely clever tricks, until she propels him high in the air and pulls him back down.
* Bewitched, Louise suspects she is pregnant. She has told Samantha but no-one else. Larry catches his wife and Samantha visiting the doctor together, draws the conclusion that Samantha is pregnant, and tells Darrin what he saw. Later as the four of them are having dinner together when Louise broaches the subject, Larry kicks her under the table, then admonishes her that this is sensitive and personal information that Samantha should be the one to tell Darrin.
* Bewitched: Maurice and Endora are not known to fully admit they're in the wrong.
* Bewitched movie: An actor attributes his last film's failure to the costume

department. This is presented as a spoiled actor making excuses and then forgotten about until an hour later, when he's watching TV and the film comes on, showing him in a snowstorm wearing an enormous fur hat and yelling, "TURN BAAACK!". It was worth seeing the rest of the movie for that.
* Bewitched, of course the way Endora treats him probably contributes to this.
* Bewitched of many shows about magic, was surprisingly consistent in its rule system for casting spells. The basic rules were as follows:
* Bewitched of this trope. One first-season episode revealed that Samantha could rewind time and completely rewrite reality with her powers — and she's not even the most powerful witch in the series. As such, the writers had to keep coming up with caveats to not only her gifts, but magic in general:
* Bewitched once said this after noting that while his mother-in-law hates him, his wife and daughter love him very much.
* Bewitched: One episode has Samantha befriend a beleaguered magician who is being exploited by his scheming, vain assistant. On learning how she plans to use his tricks to become a star herself, Samantha magics her gown to rip off in front of the live audience and TV cameras, revealing that the assistant wears a girdle.
* Bewitched, originally dyed her red hair dark brown to more closely resemble Irene Vernon, the actress she replaced. In later episodes, she reverted to her natural hair color.
* Bewitched played both Samantha and her mischievous twin cousin Serena; however, because the characters were so different, many fans were unaware that Elizabeth played both parts. To keep the charade going, she adopted a pseudonym when credited for Serena as Pandora Spocks.
* Bewitched' reactions with "he's a mortal, you're a witch, it's your fault for getting married in the first place").
* Bewitched, Samantha has weird cravings during her pregnancy; being a witch, her magic causes whatever food she wants to appear in her hand. She gets that fixed, but then when she has a craving it instead causes her to go to where the food is.
* Bewitched. Samantha or another witch or warlock would freeze time when things were getting out of hand in order to give themselves a chance to figure out what to do.
* Bewitched Samantha's Father turns Darren into a statue and smashes him. Reluctantly he later puts him back together.
* Bewitched: Samantha transforms an escaped racehorse into a woman named Dolly. This proves to be a troublesome spell when the humanized Dolly begins giving "inside" race tips to Darrin's friend, Gus Walters, who desperately needs money to finance a new invention.
* Bewitched, Sam uses her power to invert the trick to put a tablecloth back under the plates and centerpiece.
* Bewitched's character tries out for the Samantha role and reads the scene descriptions and character names.
* Bewitched season 5 episode 22 "Going Ape" Happens when Miss Tucker come into Mr. Tate's office to advertise her new "Brawn Cologne" with muscle men to use in the commercial.
* Bewitched seems to have this. Witches and warlocks are only born to other witches and warlocks, and Tabitha has strong powers, while Adam has powers, although weak.
* Bewitched: Sheila Summers is one of Darrin's rich, snobby former girlfriends. She invites Darrin and Samantha to her house for a posh dinner party, then tries to steal him away from her. Samantha uses her powers to put Sheila in her place.
* Bewitched spent several episodes in Salem, either 4 or 8. It was a sizable chunk of that season.
* Bewitched: The ages of the witch and warlock characters are never outright confirmed. The show heavily implies that they live for at least several centuries. Samantha is at least four centuries old when she meets Darrin, and Endora admits to being "over 1,000" according to Serena.
* Bewitched). These episodes would often result in the two having a fight or, in extreme cases, Samantha leaving Darrin to go home to her mother's. But love always prevailed, and the two would reunite by the time the credits rolled.

* Bewitched. The show inverts this trope when Darren and Samantha have their baby Tabitha.
* Bewitched the whole situation and points out its issues, but Samantha resignedly tells her that it's the way things have to be. Yeah...
* Bewitched to renew the series for additional three seasons, after many of the cast and crew felt the show didn't need to continue after wrapping up its fifth season.
* Bewitched, tracing the romance of Samantha and Darrin from their first meeting to their honeymoon.
* Bewitched was fired and re-hired on a regular basis, normally one being the result of magical meddling.
* Bewitched wears far too much makeup, especially for a woman her age.
* Bewitched when Uncle Arthur helps Darrin stand up to Endora - he teaches Darrin an incantation to defeat her and gives him a talisman that is simply a lamp finial. It turns out the incantation is useless gibberish - Arthur is just messing with Darrin for laughs. (However, it works both in the sense that Darrin does successfully banish Endora with the ritual - and because working to counter-prank Arthur gets Darrin a tiny bit closer to the acceptance from Endora he actually needs.)
* Bewitched, where actual magic is necessary to get a table lighter to work.
* Bewitched, where the baby witch Tabitha sometimes brings her toys to life. She can't make them able to talk though.
* Bewitched, which already didn't make much sense, employed a reset button about 2/3rds of the way through the movie that practically took the story back to the beginning again.
* Bewitched without his knowledge. When circumstances resulted in his return flight being delayed by a freak snowstorm, Samantha reluctantly believed that he wished for the storm and was planning on leaving Darrin when he came back. After learning about Endora's scheme, he used the three wishes to force Endora to fess up and to stop meddling in his and Sam's life for a week, thus proving his fidelity and restoring Sam's trust.
* Bewitched years) re-used the plot of an episode from the Dick York era.
* Bewitching it by saying that since she was clearly fumbling with the stove, they'll just say it was an accident. The implication is that the angels feel sorry for what the mermaid already went through and feels she deserves heaven anyway.
* Bexbury died still believing that Marcello was only in it for the money.
* Be X-Tra Safe with the X-Men warns the reader not to trust costumed freaks.
* Beyblade begins using Conspicuous CGI for the beyblades starting with the second season.
* Beyblade Burst, but Valt becomes the first person to Burst Spryzen in episode 15, even though he didn't win the match.
* Beyblade Burst, died in a motorcycle accident just as Season 4 began airing. Some episodes featuring him had to be excised from the English dub of that season as a result.
* Beyblade Burst: Nika has pink hair, while her twin brother, Toko, has blue hair.
* Beyblade Burst: Valt Aoi is a total cutie pie from the bottom to the tippy top.
* Beyblade G-Revolution, there were a few flashback scenes that showed Tyson Granger as a 5/6-year-old boy. In the English version of those scenes, Younger Tyson was voiced by the same voice actor as his current self (Marlowe Gardiner-Heslin), but he attempted a younger-sounding voice.
* Beyblade if heated. The plastic parts are a fair bit closer in quality to the real thing, but still fall short.
* Beyblade, Kai takes a 10-Minute Retirement at the beginning of season two.
* Beyblade Metal Fusion), several Beyblades were made lighter during localization compared to the Japanese and Korean versions. In particular, the various forms of L-Drago were changed to reduce weight. As a result, it became much less viable competitively. Later one, the Hyperblades subprint completely removed the mechanical functions of several Beyblades' parts and only released the functional ones much later in much less appealing color schemes.

* Beyblade moment for the poor kid. He is convinced that he must take all four of the Bladebreakers' Bit-Beasts so that he can use their combined power to become a real boy. He loses to Tyson in the end, and Tyson convinces him that as a robot, he would have abilities that a human would never have anyway!
* Beyblade power seems strange coming from someone as openly confrontational, arrogant and self-reliant as Kai.
* Beyblades specifically used as weapons is as old as the second arc of the first season of the original series, when it's revealed
* Beyblade: The Blade Breakers are taking on the All-Starz in America. Tyson and Ray easily take down two gimmicky bladers. Then Max's mom reveals that those two bladers were some of their weakest, and the purpose of the battle was to gather data.
* Beyblade where competitors play with little spinning top toys and try to tip each others' toys over.
* Beybolat wears a face-concealing hood whenever he poses as Albasti.
* Beyoncé 50) reportedly caused an increase in visits to Red Lobster restaurants, which are mentioned in the song. Some people seemed oblivious to the fact that in the song, the singer takes her boyfriend there as a reward for good sex.
* Beyoncé", a #1 hit with a shocking critique of how Black Americans are treated.
* Beyoncé adamant that it was not an affair, and that she was a stalker. Even with the extremely clear evidence that the woman is mentally unstable, she kicks him out of the house to spend the night alone somewhere.
* Beyoncé. Anything she does is subject to tributes, covers, parodies, etc.
* Beyoncé, by having videos of her unmistakably very pregnant. There was no such urban legend with her twins who were born in 2017 as she had to have a C-section and has the scar to prove it.
* Beyoncé claims that she's actually really shy in real life, and when she's on stage, it's almost like she's taken over by another person entirely, who she eventually named Sasha Fierce.
* Beyoncé filmed two of her videos, "If I Were a Boy" and "Single Ladies", back to back, and wound up spending a lion's share of the budget on the former and forcing her to take a minimalist approach with the latter.
* Beyoncé. His apparent determination to make his daughter a star had fractured the family until they managed to get a record deal, and while he was an effective manager, his abrasive personality made him unpopular with industry folks and fans. Beyoncé has gone on record that when she turned 18 and started having more of a say in her career, her relationship with her father became more tenuous. His personal and financial problems are rumored to be the real reason why Destiny's Child broke up, and she cryptically mentioned in an interview with Oprah about "needing to let him go" after severing their professional relationship.
* Beyoncé is a fictional spotlight stealer based on Diana Ross.
* Beyoncé is the version usually used on non-Spanish language radio stations.
* Beyoncé - "Me, Myself and I". Also features elements of "warning about others" and "over you", mentioning that the guy's family and friends tried to warn her about him and that it's just "me myself and I" now.
* Beyoncé released "Formation", in which she mentions Red Lobster, the chain reported a 33% increase in sales.
* Beyoncé's "Halo", where she declares her lover an angel sent to save her:
* Beyoncé's "Irreplaceable", the singer chases out a live-in boyfriend for cheating on her and using her wealth to impress side chicks... then casually mentions in the chorus that she's already called his replacement to come over, implying that she was also cheating.
* Beyoncé's "Pretty Hurts", the question "what is your aspiration in life?" makes the pageant contestant pause and it clearly rattles her.
* Beyoncé's "Single Ladies (Put a Ring On It)" starts right off repeating "All the single ladies" over and over that the listener wonders if they'll ever get

to the verses. It's the refrain, so it must be endured again.
* Beyoncé. The album was recorded in secret and released on iTunes without any prior announcement or marketing of any kind other than a mention on Beyonce's Twitter account, though the unconventional release generated much more exposure from media coverage and heavy social media discourse than any type of paid advertising probably would have accomplished.
* Beyoncé took heavy inspiration from the film, it was re-released in theaters and received a new poster.
* Beyoncé was also known for reuniting with his brothers to reform the Jackson 5 at times.
* Beyoncé was released on Tidal on April 23, 2016, and made available for digital purchase the following day. Physical copies became available on May 6. However, the album first appeared on Spotify and Apple Music three years after its initial release.
* Beyoncé, with an accompanying film/visual album. Although she does put out singles fairly often and said in the aforementioned interview she’s working on a new album.
* Beyoncé (with the proceeds going to hurricane relief charities). The song went to #1 on the Billboard Top 100 within a week.
* beyond annoying, among other things, when you are trying to make toffee.
* Beyond a Reasonable Doubt. A crusading newspaper editor (John McIntire) wants to prove that the death penalty can cause an innocent man to be executed. He hatches a bizarre plot with his star reporter (Dana Andrews): the editor will plant false evidence indicating that the reporter is guilty of a recent unsolved sex murder. After the reporter is arrested, convicted, and sentenced to death, the editor will come forward with proof that the evidence was falsified, forcing the authorities to release the reporter. Amazingly enough, the reporter agrees to this. The first twist comes when the editor is killed in an accident, and the evidence destroyed before he can clear the reporter. The second twist comes when it develops that the reporter is the actual murderer.
* Beyond a Reasonable Doubt as the only person who knew the truth is killed before he can provide the evidence of what's happened and thus Tom faces the electric chair.
* Beyond a Reasonable Doubt. The governor writes up a pardon that will set Tom free. Nobody suggests prosecuting Tom for the crimes he committed as part of his scheme, like falsifying evidence, obstructing justice, and interfering with a police investigation.
* Beyond a Reasonable Doubt, Tom and Susan are giddy with relief after Tom has been cleared of the murder of Patty Gray, hours before he was scheduled to be executed. Tom offhandedly wonders who killed "Emma". The fact that Patty Gray's real name was Emma Blucher is still a secret. Susan, who knows that secret, realizes that Tom is guilty after all.
* Beyond: Arthur believes journeying into the Realm (in the belief it's the afterlife, which living people can visit) is a very bad idea. He appears to be right, as it's not only unclear if the Realm really is the afterlife, but there are dangerous things there which do not want people of our world visiting.
* Beyond Atlantis from them. The protocol involves getting a specific order of stamps on a claim form but the correct stamps and order is not disclosed. Wandering souls in the area were previous applicants who died while trying to get the order right.
* Beyond Atlantis series, has a mark in the palm of his left hand. It proves he's the one who carries the light part of an alien power.
* Beyond Belief: Fact or Fiction also acted as the announcer for the first three seasons, but was replaced by Campbell Lane for Season 4.
* Beyond Belief: Fact or Fiction featured a man finding himself in the Wild West. He is accused of walking around in his underpants, even though he is wearing sensible sneakers, hiking shorts, and a t-shirt.
* Beyond Belief: Fact or Fiction followed a similar format. The only catch was that some of the supposedly true stories were so unbelievable that one couldn't help but

wonder just how thoroughly they had researched them.
* Beyond Belief: Fact or Fiction had already made it up, while “fiction” meant that the show’s producers made it up from scratch.
* Beyond Belief: Fact or Fiction has a story of a very very shallow woman going into an independent salon, and is talking to the stylist about appearances. And the stylist speaks about a connection between appearances and personality. The woman ignores her, but then gets infuriated when the stylist makes one tiny mistake. She screams about how she's going to use her wealth and power to shut the place down. In which the stylist curses her to "Have a mirror to one's soul" which to put it simply, her appearance will reflect her personality. The woman laughs it off and leaves, but the next day she wakes up very ugly. So she goes back to the shop only for it to be all closed up and abandoned.
* Beyond Belief: Fact or Fiction: Inverted in the episode "Ghost Town". A photographer gets sent to the Wild West but hasn't noticed yet. He goes to a bar and tries to buy a beer with $20 bills. The bartender doesn't recognize the money and refuses to accept it, demanding gold or silver instead. When the photographer cannot provide any, he gets thrown out.
* Beyond Belief: Fact or Fiction love who is exactly the same. It's implied that this cycle keeps on going, and that it's the exact same woman's spirit.
* Beyond Belief: Fact or Fiction "Morning Sickness," a girl suffers symptoms of what her parents are convinced is pregnancy, despite a negative pregnancy test and the daughter's claims that she's still a virgin. At the hospital, doctors tell the parents that there's a tumor or cyst in the daughter's intestines, but during surgery to remove it, said tumor turns out to be a live baby octopus, resulting from when the daughter swallowed an octopus egg while swimming in the ocean. Thankfully, at the end of the episode, it's revealed that the story never happened, it's just a really popular urban legend.
* Beyond Belief: Fact or Fiction segment had a little boy be saved from an old well with the help of a psychic horse named Count Mystery.
* Beyond Belief: Fact Or Fiction, where during a pro wrestling match, the guy who was booked to lose died during the match. Of course, the history between the two meant that the dead guy, who was always showing up his current opponent looked like he was just deciding to sell like a ragdoll, and since the guy who won thought he was legitimately winning that way, nobody knew he was dead until after the match. Upon finding out that he was only winning because he was fighting a corpse, the narrator then says "even in victory, he was a loser."
* Beyond Belief: Fact or Fiction. While the reporter was adopted by a loving couple, his brother through different foster homes, being abused all the while, until he aged out of the system.
* Beyond Belief, Frank is visited by the living mannequins Terry, Gerald, Pat, and Bess, with whom he was friends for a short time during a time that he was transformed into a mannequin. During the visit, Prower, a mannequin hunter, attacks the quartet. He weakens them with oregano — "mannequin's bane" — and tries to kill them by drawing X's over their eyes, but Terry's heroism makes him decide to spare the group. Frank and Sadie are happy until the mannequins invite them along on the annual Dummies Night, which is celebrated by finding humans and ripping their limbs off. With some quick thinking, the couple lure the mannequins into a closet with fancy clothes and lock it.
* Beyond Bloom by the author that this was never intentional, but the gag was incorporated into the story because of so many readers and non-readers mistaking Tatsuma for a male.
* Beyond Bloom Characters who did not have a traditional birth do not have surnames.
* Beyond Bloom happens. A dragon interrupts the scene, leaving protagonists to wonder what the creature even was, and completely changing the course of the story.
* Beyond Bloom. Lets others do the talking. Especially around unfamiliar parties.
* Beyond Bloom, Sikue and Tatsuma are polar opposites in many ways, one being loud and aggressive, while the other is quiet and gentle. This is especially emphasized when their magic abilities are used, one being offensive while the other is

defensive. The flowers that they are made from are even revealed to always grow together while having opposite effects (one poisonous and one curing poison). The Yin-Yang similarities get pretty strong, one must wonder if it was intentional.
* Beyond Bloom Sikue and Tatsuma show signs of this trait, too, as the story progresses.
* Beyond Blunderdome down during the final battle before killing him. And it's supposed to be taken seriously.

* Beyond Dark Castle, Prince Duncan uses a fireplace passage to access the castle.
* Beyond Death falls in love with the human woman who took him in after he crash-landed on Earth.
* Beyond Eden in personality to his father, a formerly avid hunter who enjoyed violence and competition.
* Beyond Eden who doesn't shy away from using rape and blackmail in revenge against those he sees as responsible for his sister's death. The entire VN revolves around uncovering what turned a moral and good child into such a man, and whether the targets of his (misguided) revenge could still get through to him and convince him of the possibility of atonement.
* Beyond errors, like inconsistent time/gravity, indoor weather, and even doors to nowhere. Unable to comprehend it, the kids she speaks with inside shrug it off as a haunted house, which they enjoy playing in until the Agents tear it down and rebuild it.
* Beyond Good & Evil a banister onto the couch next to the stairs.
* Beyond Good & Evil also seemed to mostly avert this, getting very good reviews despite its length. It was a commercial disaster, however, which may have been partly a result of this.
* Beyond Good & Evil, and smaller, personal shields used by both good and evil soldiers to prevent you from damaging them.
* Beyond Good & Evil, an old food factory and an old slaughterhouse, have some legendary bad security. Highlights includes:
* Beyond Good & Evil, but if the player strays too close to the edge of the map, a series of pillars will rise up out of the water and warn the player that they're leaving territorial waters. Trying to get past them will just lead to them shooting non-lethal lasers at the player's vehicle to turn it around.
* Beyond Good & Evil, during the space jaunt from Hillys to its moon for the final showdown, the player can use the ship's laser to blow up a floating chunk of ice that contains a still-living space whale. It's one of the life forms you need pictures of for the animal side quest, and it appears in the catalog as Megaptera Anaerobia, or "whale that doesn't breathe".
* Beyond Good & Evil Even in ordinary combat, not necessitated by the plot, they seem incapable of getting themselves up if pinned by a certain type of enemy.
* Beyond Good & Evil exactly what I'd call as fast as a speedin' bullet" for a radio broadcast.
* Beyond Good & Evil, figuring out how to knock him over isn't so tough.
* Beyond Good & Evil from every other NPC in the game that many people speculate on her true nature, and everyone seems to have their own guess.
* Beyond Good & Evil good and decent, but are being done away with by the Alpha Section.
* Beyond Good & Evil gravity lift's function as a voluntary tractor beam, allowing you to move up or down.
* Beyond Good & Evil has a checkpoint halfway that's the same way.
* Beyond Good & Evil is a blue-furred cat woman, and almost completely catlike in appearance. Except for, you know—the lack of tail, the blue lips, and huge, uh, assets.
* Beyond Good & Evil is a reporter working for an underground resistance

movement, and her job is to sneak into government facilities and expose its complicity with the alien invaders.
* Beyond Good & Evil. Jade is apparently a very polite and temperate girl, so the worst she has to say over the situation is You Have Got To Be Kidding Me.
* Beyond Good & Evil Jade taking photographic evidence to show that the supposed good guys are in league with the bad guys. This game is set on a futuristic, alien planet with flying cars and genetically engineered animal people, yet apparently photographs can't be faked.
* Beyond Good & Evil: Jade uses this frequently, but its most apparent in two instances when escaping from Alpha bases.
* Beyond Good & Evil reveals that they were genetically engineered slave labor designed to withstand hostile alien environments.
* Beyond Good & Evil shows the aftermath of him bowling Jade over while chasing a ladybug.
* Beyond Good & Evil), then jumps off the last one trying to reach Double H's (who is sitting atop a hovering drone) outstretched hand, misses... and gets caught by him a moment later, as he drops down a meter or two, still holding onto the drone.
* Beyond Good & Evil, the protagonist and her group are rebel journalists, and have been spreading the truth about the Orwellian military Alpha Section for some time. Alpha Section broadcasts looping propaganda messages on screens all over the game world. In the climax, the protagonist seizes control of the propaganda broadcast tower on the planet's moon to send a final call for aid to the citizenry. Cleverly, the broadcast includes a montage of photos the player took as earlier mission goals, illustrating the Alpha Section's various crimes against humanity.
* Beyond Good & Evil. The weird statue is the only thing that's keeping it alive.
* Beyond Good & Evil was deliberately given an ambiguously brown design so that she could appeal to players of all ethnicities.
* Beyond Good & Evil was praised for was its narrative filigree, as the creators worked to make a solid "world" instead of simply a setting. Thus, there are animal species, posters and billboards for events and services, fake commercials, and NPCs with their own little history that don't directly contribute to the main plot, but give some depth to the planet of Hillys.
* Beyond Good & Evil whenever he attacks, and he enjoys yelling in general.
* Beyond Good & Evil who used to get into numerous scrapes with the authorities, so we can make some assumptions.

* Beyond Harris, the entire band was portrayed as being a bunch of drunken reprobates, particularly guitarist Frank Remly.
* Beyond Heroes a meal on the house. In his case, it's because he rescued her from the unwanted attentions of a ruffian prior to the start of the story.
* Beyond Heroes and he's badly wounded, but hearing her call his name like that makes him realize that he has to get up.
* Beyond Heroes and wonders if she's refusing to get involved with anyone because of this. He's partially correct.
* Beyond Heroes appears because of this trope. The author had a small contest on Tumblr and the winner got to create a small side character for inclusion in the fic.
* Beyond Heroes (at the time); rather, Varric is ultimately forced to decide which of the two is more deserving of his loyalty.
* Beyond Heroes Bethany Hawke climbs a tree in the Frostback Basin. Dorian chastises her, saying that he doesn't want to have to inform her war council that she fell to her death from a tree.
* Beyond Heroes, Hawke takes the time to dryly criticize the fist-shaped battering ram being swung at the fortress doors.
* Beyond Heroes, he estimates that Bull is “at least two Varrics tall,

probably closer to three.”
* Beyond Heroes. He informs her, and anyone else who asks, that he's not leaving the newly formed Inquisition as long as she has to be there, since her brothers aren't available to protect her.
* Beyond Heroes Hilariously, the implication goes completely over the recipient's head.
* Beyond Heroes is putting together a card game for the Inquisitor and her closest friends. He wants to invite Blackwall, but hesitates because there's animosity between him and some of the others (as in canon, given the revelations about his true identity as shown by his personal quest really change his respective relationships with his fellow companions for better or for worse). The two men discuss it, and Blackwall says he appreciates the thought but he "won't force the lady to choose between her friends." Varric, in turn, thanks him for not putting her in that position.
* Beyond Heroes it's revealed that a sacrifice was made in order to allow this to happen. Varric helpfully points out that this trope is in play.
* Beyond Heroes. It takes him a minute or two to realize he needs to close his mouth.
* Beyond Heroes - pops a unique question. The recipient delightedly observes that it's very appropriate.
* Beyond Heroes reacts to a fact which Varric casually drops during their conversation.
* Beyond Heroes sealing a rift, he has the absolute most in-character reaction to his sudden comprehension.
* Beyond Heroes (the narrator) has excellent reason to think that the Inquisitor has died for one reason or another, and while he acknowledges that a good story often involves a heroic death, this isn't the story he wants to tell.
* Beyond Heroes when the prospective groom asks his beloved to "help me figure out this happily ever after thing".

* Beyond Oasis), Ali can guide Efreet to attack a small iceberg, which explodes when destroyed.
* Beyond Oasis), since your character's level is determined by the number of hearts he collects (which also, predictably, increase maximum HP), rather than EXP gained by kills. Furthermore, hearts are rigged to only drop from enemies if you're getting your ass kicked, when you would logically need them. Thus, the game's difficulty rather ingeniously scales itself depending on your skill... or, you can simply go macho and ignore hearts altogether.
* Beyond Paradise seems to be popular among Hawaiians who have seen it.

* Beyond Re-Animator: After Philip's girlfriend is murdered, Dr. Herbert West brings her back to life by infusing her with the lifeforce of the corrupt warden who killed her along with his previously developed reagent so she can retain her memories, skills, and motor functions as a zombie. Unfortunately she comes back as a kinky crazed and dangerous zombie and Philip is forced to incapacitate by cutting off her head. When the guards find Philip weeping over her headless corpse, they

drag him away as he tries to convince them that she is still alive by urging her and her headless body to speak to them. When she doesn't respond, he goes into a fit of insane laughter and then when he and the guards are out of sight, her head starts laughing and thus the movie ends.
* Beyond Re-Animator Generally, women are not allowed into a prison if they are wearing an outfit that is even slightly provocative, because it is feared that it might give the inmates increased motivation to assault them.
* Beyond Re-Animator takes place in a prison, where Herbert West is incarcerated.
* Beyond Redemption: A character believes another character isn't worth redeeming.
* Beyond Redemption crosses a line of evil that makes someone else give up trying to redeem them.
* Beyond Redemption: This jerk is never going to see the light, so you might as well stop trying.
* Beyond Rejection asks to be called "Patricia", aiming at this trope. The therapist points this out and starts calling her "Trish".
* Beyond Rejection to this point. Unlike other examples this is treated as a potentially deadly situation requiring intensive medical intervention to prevent dysphoria and death.
* Beyond Sanctuary sorcerer's gear as battle-spoils, and tosses it to the young mage. It's unclear whether it would've simply smashed, or unleashed some terrible magical backlash, had Randal not dived to catch it.
* Beyond Sherwood Forest, Alina's transformation into a dragon is shown to cause her considerable pain.
* Beyond Sherwood Forest, Bart Bartholomew's weapon of choice is a whip. It eventually causes his death when he wraps it around the dragon's snout. As the handle is looped round his wrist, he is unable to drop it when the dragon drags him into its mouth.
* Beyond Sherwood Forest. Robin even wonders how the trees can grow in a place without sunlight.
* Beyond Sherwood Forest, Robin has to climb an almost sheer cliff in order to obtain the fruit that will allow Alina to regain her mortality.

* Beyond the Barrier, the protagonist (Professor Gordon Naismith) has to build a machine, which when switched on renders itself (and him, inside it) intangible to its surroundings, so he falls through the Earth and out of the other side (there may have been non-gravitic acceleration involved). Luckily he's picked up by someone before he can start falling back.
* Beyond the Beyond, every character that can join your party is a human, save for the summoner Tont, who is basically an amorphous blob of goo.
* Beyond the Beyond placed on him by the Vicious Ones' sorceress, Ramue. With Finn's party barred from entering Zalagoon Castle for a long time, Glade uses their absence to exert his will on the king and sells him out to Bandore, hoping for a peaceful surrender. He almost succeeds until the heroes return to Zalagoon after having the curse broken, proving to the king that their Samson isn't an imposter.
* Beyond the Black Rainbow, eyes figure prominently throughout the movie. The title sequence features a close-up of a dilating pupil and is set to the song "Forever Dilating Eye" by Sinoia Caves. Underneath his contacts, Barry has black eyes. Barry kills Rosemary by crushing her eyes. Barry claims to have seen the "eye of God" during his 1966 psychedelic experience. In the 1966 flashback scene, Barry has drawn a third eye on his forehead in preparation for his psychedelic experience in the black liquid. The scene later gives viewers an overhead view of the pool of black liquid, which looks like a dilated pupil when viewed from above.
* Beyond the Black Rainbow makes good use of droning notes, especially during the 1966 flashback scene with the song "1966: Let the New Age of Enlightenment Begin".
* Beyond the Black River", Conan and Balthus must get back the news of the impending Pict attack.
* Beyond the Blue Event Horizon has a huge Heechee spaceship that mines resources from space (such as comets) and processes them into food. The book notes that carbon, hydrogen, oxygen, and nitrogen (these give the food the in-universe moniker CHON) are some of the most common elements in the universe, and also the main elements in the organic molecules that we can consume for food. For the record, those four elements alone make up for 97 percent of your own body.

* Beyond the Canopy, come to take an artifact from Glenn, and to enslave Glenn and everyone else in the vicinity.
* Beyond the Canopy, Greliz and Jojo plan to do this as part of a confidence scheme. They organize a prize fight and serve as bookkeepers for the gambling. Their plan is to fake a fire before the fight ends, escape to the caves underground with all the gambled money, and then blow up the building after them—convincing all onlookers that they and the money went up in smoke.
* Beyond the Canopy. Greliz asks Glenn how he got to be such an agile, scrappy fighter. Glenn explains that his grandpa throws things at him a lot.
* Beyond the Canopy. He's excited about visiting a swamp full of poisonous wildlife, and after Glenn defeats a group of dangerous spider crabs, Elmsly wishes he could have studied one of them up close.
* Beyond the Canopy, it's strongly implied that the Remnant kills its anchor (a.k.a. the person who takes and uses it) after a few days. This is a problem because the protagonist, Glenn, is the current anchor.
* Beyond the Canopy, Jojo is a semi-solid being who can alter his shape and proportions at will.

* Beyond the games themselves, sports drafts by North American leagues also bring the trope into play both by the leagues themselves (what's the order, who's on the clock, who's been selected already, etc.) and by the media outlets covering them. ESPN Draft Analyst Mel Kiper calls his list of the best draft prospects "The Big Board"; he probably doesn't have a physical board in his office, funny as that would be, but we see the various lists on screen quite often.
* Beyond The Glass by Antonia White, the main character has this with the man she falls in love with after the failure of her first marriage. And then the intensity of their relationship is a contributing factor to her going insane...
* "Beyond the grave" exchange when he discovers that his younger brother (who's just learned how to write) used one of the pages to spell out "THE SUN GOES OUT". Nothing gets resolved, all life on Earth is just going to expire in an endless ice age. The end.
* Beyond the Horizon, Robert and Ruth decide to get married the night before Robert is supposed to go off to sea. Robert then elects to stay home instead of becoming a sailor. Faced with Ruth's rejection, Andrew decides on the spot to go off to sea instead of his brother. The result is tragedy and despair for all concerned, and three ruined lives, as all three of them made the wrong choices.
* Beyond the Horizon Ruth, who was betrothed to Andrew, picks his brother Robert instead. All three live to regret it, as Ruth realizes pretty soon that she actually did love Andrew, and her marriage to Robert descends into hatred and bitterness.
* Beyond the Impossible always goes barefoot. It's even the first thing we learn about her when she’s introduced:
* Beyond the Impossible, as a result of having all the information in the world downloaded into her brain. Greek gods have this as a natural ability, to the point that not only they can understand and talk any language, but people who stick around them for long will understand as well. The only exception is Demon speech, which they can't understand at all.
* Beyond the Impossible: Breaking (what seemed to have been) the rules set by the story's internal logic.
* Beyond the Impossible. Except Hermes, who can teleport wherever he wants and is even called “the god who makes travel distances meaningless”.
* Beyond the Impossible: Noriko’s silver eyes shine when she’s using her super-intelligence, especially in the early issues. They become especially bright whenever she’s angry. If they turn completely black, run.
* Beyond the Impossible, one of the first things the Greek goddess Eris does after taking over NORAD is sending a message reading “I’m in your base, killing your dudes”.
* Beyond the Impossible: people from other planets do speak in English, but with the Greek alphabet to distinguish them (it’s treated like a different language though). Demon talk is spelled with Arabic font but it's unintelligible.
* Beyond the Impossible: The Drylon disappeared five billion years ago, but they left behind technology so powerful that the gods will do anything to put their hands on it.
* Beyond the Impossible. The gods are also incredibly long-lived: Vesta is a million years old, Hekate is a hundred times older, and Gaea was around at the formation of Earth.
* Beyond the Impossible: The Greek gods. It's possible to physically hurt them, but they can't be killed by conventional means (unless you count turning a neutron star into a black hole "conventional").
* Beyond the Impossible. Their technology is advanced enough to bend the rules of reality, but repeated use turns you insane. The effect is once described as “watering down your soul”.
* Beyond the Impossible, to the point people are surprised to find out he knows more than just comic books:
* Beyond the Iron Spider, Spidey has also created a number of armors for himself. Notable ones include the original Spider-Armor, the Sonic Armor (which became
* beyond the last play because American Aly Raisman, the final competitor,

petitioned for a re-evaluation of her difficulty score after initially placing fourth. The judges accepted the petition and raised her score by a tenth, pushing her into third place.
* Beyond the Lights begins as this as he was assigned as her bodyguard on the night they met. However, he was only filling in for another cop and his main job is as an officer of the LAPD.
* Beyond the Lights forced upon her by her record label, Kaz's father THINKS she is and warns his son not to get involved with her because "this one ain't First Lady material". Needless to say, Kaz does NOT take his advice!
* Beyond the Lights is about the romance between pop star Noni and good cop Kaz after he stops her from jumping off her balcony and committing suicide.
* Beyond the Lights is the very definition. He values truth, honesty, and justice above all else. Even when he's mad at and doesn't want to talk to Noni, he refuses to start driving his truck until she buckles up her seat belt.
* Beyond the Lights Noni- which his fellow policemen are quick to affectionately tease him with (at one point even filling the trunk of his squad car with copies of a recent issue of Vibe magazine that Noni happens to be gracing the cover of).
* Beyond the Lights, on the other hand, is so disgusted that she forces her daughter to chuck her trophy.
* Beyond the Line of Duty has bomber pilot Capt. Wheless in a desperate struggle to pilot his bomber home and escape the Japanese fighters who are trying to shoot him down. As the Zeroes pepper his plane with bullets, Wheless remembers his trainers at flight school, who appear as Floating Advice Reminders telling him how to pilot the plane and get out of his jam.
* Beyond the Mat, aspiring wrestlers have flocked to him ever since the film came out.
* Beyond the Mind's Eye is an in-universe example, showing a man being attacked by his TV under the control of a character on the screen.
* Beyond the Mind's Eye: The "Windows" segment has several of these in a row with the camera flying into nested TVs.
* Beyond the Outer Gate Lies...: Harry does this twice. The first time in the very beginning, to escape Great Red. Since he is already outside his universe, he doesn't see it as much of a risk. The second time involves escaping a pocket dimension.
* Beyond the Outer Gates Lies... A high school library?, Harry seems ready to scold Sona for using her water dragon to intimidate Riser (after Ise gave him a severe case of dracophobia). Instead he tells her she could make the dragon much more scary, and proceeds to illustrate.
* Beyond The Poseidon Adventure to get to the surface and warn everyone despite killing herself with decompression sickness, and it does erupt in the end, destroying the ship and some of the illegal salvagers.
* Beyond the Pyramids: Legend of the White Lion utilizes ten dollars to link beginning, middle, and end. In this world, Tswana tells Maria money can't buy her access to the hidden gate within the pyramid when she offers him the ten dollars she has on her. In the other world, Tswana agrees to be the group's third for half the money in Moja's pouch. Though the audience isn't told how much that is, an earlier scene has Moja earn twenty dollars by selling a spear to tourists, making Tswana's price ten dollars and Moja's effective earnings ten dollars. Back in this world at the film's end, Maria buys a spear from Moja for ten dollars (the ones Tswana wouldn't accept) to remember him by.
* Beyond Therapy" and his blind date (through the personals) Prudence says he should be a vet, Bruce rebukes her for missing the metaphor and says he could never respect anyone who missed a metaphor.
* Beyond the Sea, Rainbow Dash gets horrified after killing a trio of Splicers.
* Beyond the Sea, Summer Rain cuts off her own cutie mark to symbolize her breaking free from her preordained destiny.
* "Beyond the Sea": The FBI and police have five days to find a pair of kidnapped teenagers who are tortured and will be found dead if the offender is not caught.
* Beyond The Sea - the subject, singer Bobby Darin died at a relatively early age.

* Beyond the Subs, the Legion has always operated on this pretense by introducing numerous reject applicants with ridiculously weak abilities. The Mess was a walking dirt cloud, Eyeful Ethel could just grow extra eyes, and Plaid Lad could just change fabric against his will. Basically, if you're in the 31st Century and you have got what you consider a superpower, you will have tried out for the Legion at least once.
* Beyond the superficial "ghosts aren't real", it's been suggested that
* Beyond the Supernatural are real, but unreliable except in the presence of the supernatural, which makes scientifically verifying their existence very difficult.
* Beyond the Supernatural features a reversal of sorts with the nega-psychic class. Most character classes in this game have psychic and/or magical abilities. The nega-psychic has psychic powers, but is so convinced that supernatural phenomena are bunk that his power is used unconsciously to suppress all psychic and magical phenomena in his area. For example, a character who can normally lift things with telekinesis will find it difficult or impossible to do so around the nega-psychic, thus bolstering the nega-psychic's belief that there is no such thing as telekinesis.
* Beyond The Supernatural game pretty much has to be this trope. Most of the time, they can barely communicate, but in the presence of supernatural evil they prove to be smarter and more powerful than anyone else.
* Beyond The Supernatural, however, where it's kind of hard to disbelieve a dragon staring you in the face, it became more of a matter of defiance.
* Beyond the Supernatural psychics whose extreme skepticism weakens supernatural powers around them (including their teammates', unfortunately).
* Beyond the Sword, with the option of adding some of this technology into the later end of a normal game.
* Beyond The Veil about the elevator muzak on a centuries-old starship.
* Beyond The Veil (having never found a worthy one as a man) before going back to trying to conquer the universe.
* Beyond The Veil male second-in-command as a lover, with a lot of privileges.
* Beyond the Walls and makes the people inside deal with them in a rather direct way.
* Beyond the Wall you have the wildlings, lead by former Night's Watch ranger Mance Rayder, who are trying to invade Westeros in order to flee from The Others, a
* Beyond the Western Sea has Nathaniel (17) and Mr. O'Connell (50), also Maura O'Connell (15) and Mr. Drabble (30).
* Beyond the Western Sea, Horatio Drabble performs Shakespeare on the Liverpool streets and gets produce thrown at him.
* Beyond the Winding Road fic, has the Great Tousterre War. Paralleling World Wars I and II, the great political mess left by the events in the manga led to a massive, bloody war between Sable and its invading neighbors. The war has political ramifications even a century later.
* Beyond the Winding Road gives us a deconstruction for a backstory. Elaine Lyman ran away from her controlling parents at the age of eighteen and returned pregnant a year later with nowhere to go. Elaine was already a wild child, but this convinced those around her (particularly her rich and conservative parents) that she was unworthy of any real help for her situation besides giving her an apartment far away from them and hoping she'd eventually better herself. Instead of helping her, it led to Elaine being stripped of any confidence she had and considering herself an unworthy mother to her child. Her depression then led to alcohol abuse (and even to her possibly taking drugs), which increased her financial problems, which decreased her self-worth—making it a vicious cycle. By the present, Elaine is a psychological wreck whose daughter Edith has been forced to take care of both her mother and herself for years because Elaine is so depressed and sick she can barely get up in the morning, and Elaine's parents only make contact with their granddaughter once a month for a day trip, completely excluding their daughter altogether. Edith herself is ostracized from her peers and authority figures because of her mother's reputation.
* Beyond Thirty has the Abyssinian Empire, a black super-state now ruling all of

Africa, most of Europe, and the Arabian Peninsula. While the Abyssinians' technology is roughly equivalent to that of the nineteenth century, it is more than a match for the white savages populating Europe. The Abyssinians consider whites a lower order and take them as slaves.
* Beyond Thirty is set in the 22nd century, and the protagonist starts out traveling on an airship lofted by anti-gravity.
* Beyond Thirty is successfully repaired and flies off, leaving the fishermen to their fate. It is implied that Turck's second officer Alvarez, who has clashed with his superior, is behind both the original sabotage and subsequent abandonment.
* Beyond Thirty's anti-gravitation screens fail, dooming it to wallow upon the surface of the ocean, and the engines fail, leaving it adrift. As its wireless radio has failed as well, Turck cannot even summon help.
* Beyond Thirty: While hiding from lions in the bushes, Turck and Victory's lips brush each other, exciting Turck.
* Beyond This Horizon: the hero uses an "old fashioned" .45 pistol when every other man in his society uses some form of laser or similar pistol because he likes it and the noise is extremely disorienting to his enemies, who expect a silent gun.
* Beyond This Horizon. The world government genetically engineers everybody for maximum genetic perfection (or, at least, elimination of imperfection), except for a carefully guarded population of "control naturals", and strongly encourages particularly hopeful genetic matches, as between the hero and heroine. The subversion is that this is presented as entirely a good thing. (This society is sometimes described as a "socialist" state but bears more in common with Technocracy. Everybody gets a small annual dividend from the output of the whole global economy as if it were a corporation in which all are stockholders; control naturals get a larger dividend, enough for a livable income, in compensation for their genetic inferiority and inability to compete with the average person.)
* Beyond This Horizon want to risk the genetics for a healthy womb deteriorating — if civilization ever collapsed and humans had to breed naturally again, a lack of healthy reproductive systems and knowledge of reproductive care would doom the entire species.
* Beyond this there are Apocrypha not found in any widely available version of the Bible. One of the oldest and most referenced is the Book of Enoch, which is possibly the
* Beyond this you have various proto-dwarves. There are the Earthen, which are
* Beyond Thunderdome deals prominently with finding a new source of fuel and establishing trade.
* Beyond: Two Souls, a group of teens lock Jodie in a closet because she got a girl a book for her birthday. If you pick revenge, it doesn't end well for them.
* Beyond: Two Souls among your final options if you choose to return to the living world is to select one of your surviving love interests. There is however the option to choose no love interest and live in solitude.
* Beyond: Two Souls for producing the material of him for the game, and stated in leaked emails from the 2015 Sony hack that he had never participated in a full-body scan for the game.
* Beyond: Two Souls, if the player messes up during the chase scenes. The first time, she ends up with her hands cuffed behind her back and locked up in a small room whose door is being watched over by a policemen, thus making her escape complicate and downright impossible without resorting to help from Aiden, the supernatural entity that is linked to Jodie. However, if she gets recaptured later, the police will simply handcuff her hands in front of her, allowing the girl to easily strangle an officer. One has to wonder why they decided to get sloppy with precautions only after she managed to escape her restraints the first time.
* Beyond: Two Souls. In the "Homeless" chapter, Jodie helps a woman give birth, and part of the mission involves cutting the newborn's umbilical cord. The baby, however, is otherwise completely clean.
* Beyond: Two Souls is essentially a story of Jodie evolving from shy child, through angsty teenager, to badass adult, all the while learning to cope with her otherness and loneliness resulting from it.

* Beyond: Two Souls is set in and around a pseudo-Chinese deep sea base where the Chinese military is conducting experiments on a nearby Infraworld portal. Since precious little in poor Jodi's life ever goes right, things spiral out of control quickly until the portal starts unleashing swarms of hostile Entities that proceed to lay waste to the facility and everyone in it, thus truly turning the place into an eldritch horror scenario.
* Beyond: Two Souls, Jodie stays in a ranch owned by a Navajo family, which happens to be haunted by a restless spirit summoned by their ancestors.
* Beyond: Two Souls of the main character, this time by two bar flies, before her ghost guardian intervenes violently.
* Beyond: Two Souls: One of Aiden's powers is to protect Jodie by projecting a force field around her, though he really has to focus hard to do it. This allows her to do things like jump off a moving train at high speed, deflect bullets, and ram straight through a police barricade on a motorcycle.
* Beyond: Two Souls. Purple is Jodie's color and the color of the spiritual "umbilical cord" that connects the two. Additionally, memories connected to certain objects show up as glowing green wisps.
* Beyond: Two Souls several times in the hospital after she was put in a coma.
* Beyond: Two Souls: Well, it's a garage, but it fits. It's unclear on the player's first venture in there to get oil whether the creepiness is due to the evil spirits, Aiden, or just Jodie's young imagination playing with her.
* Beyond Westeros you have yet another Chessmaster named Magister Illyrio, who is working with Varys.
* Beyond Zork eldritch vapors are monsters that appear as clouds of fog and will steal the player's items (as well as tickling the player and touching the player in inappropriate places).
* Be Yourself: Accept yourself for who you are. (Can also be a cynicism trope if who the character is isn't good.)
* Be Yourself: Can be cynical if it suggests one should not change oneself at all, even for the better.
* Be Yourself: Keeps popping up in kids' shows even though older viewers might find it trite. Never mind the dubious assumption that every child (or even every adult!) has a strong and fully-developed, static sense of self which is independent of their family and their peers. "Being yourself" would be a lot easier if it weren't a difficult-to-discover moving target — but this aspect is rarely addressed. The fact that it is about identity still allows writers to put interesting takes on the concept.
* Be Yourself: Someone tries to change who they are to accomplish their goal or so that people will like them better. They learn in the end that they're fine just the way they are.
* Be Yourself with the lyric "When push comes to shove, you gotta do what you love, even if it's not a good idea".
* Bezare, from 1981 - pressing Ctrl-B would bring up a fake spreadsheet.
* Bezazel and others involved with constructing the tabernacle in the book of Exodus.
* Bf 109 as a guest of honor — and also kept a gun discreetly pointed at him just in case Bader took it into his head to start the engine and effect a daring escape. The two men remained friends for the rest of Bader's life and Galland was a guest at his funeral.
* Bf 109. Soviet pilots quickly learn to recognize the design. Hartmann would swap airplanes with his wingmen so that he could engage unsuspecting enemies in an unmarked aircraft while the wingman could safely gain experience in an airplane the enemy avoided. However, he eventually got rid of the tulip altogether because Soviet pilots refused to engage any aircraft in formation with the black tulip.
* BF 4, besides the fact that the game literally takes place in 2020). In game, China has been shown to occupy countries as far away as Singapore and North Korea, with the US being forced to invade those countries to take them back, with the opposite scenario happening as the US invades China itself during the war. If war really does break out in real life, China might even seek support from Russia,

leading to an almost exact replica of the events of Battlefield 4. Let that sink in.
* BFF Raejean, shared a bed, and even almost had a three-way together (which Jenna fantasizes about). Jenna's utterly devastated by losing Raejean, and spends much of the first half of the story either trying to win her back, or get revenge. She becomes so depressed she briefly contemplates suicide, though she quickly tells herself she's overreacting. Things get better when she starts hanging out with her brother's friends, but it's clear that losing the friendship she and Raejean once had is a life-changing experience for Jenna.
* BFG9000 in the original games is implied to be a plasma cannon, given that it uses the same ammo as the standard plasma rifle.
* BFG, and is offered a new model which is much more powerful and doesn't need to warm up. On the downside, it is smaller, and doesn't make an ominous hum, so Schlock manages to find another of the old model. To be fair, Schlock uses both the size and the ominous hum as much for intimidation as he uses the gun for blasting things. Although he does like blasting things.
* BFG, Jack's had the time to upgrade and fine-tune it so it no longer dies after one shot.
* BFG - more family- (and advertiser-)friendly than having a trope named "Big Fucking Gun" all over the website
* BFG, she insisted they add their symbols as a stamp on it. As part of his pragmatic personality, he suggested they overlay their symbols on top of each other so that the stamp would be smaller and cheaper. She blushes and says in Remnant, only married couples do that, annoying him.
* BFGs; then again, Schlock can also reorient his eyes, so this isn't so unrealistic, particularly while he had an extra pair of eyes.
* BFG. The same movie has Luke use one on the belly of an AT-AT, getting him high enough to toss in a bomb.
* B-flat is the key of most vuvuzelas. Sorta ruins the majesty of the astronomical phenomenon, don't it?
* B. force-fed "oh, go ahead and blame it on your husband anyway" by the detectives as a
* BFS answer to this, having duller edges than a normal longsword, but a sharper tip. Makes sense, considering it was intended for going under armor.
* BFS. Bigger. Longer. Better. Used for intimidation, decapitation, and decimation. Especially good for lopping enemy pike tips off, not to mention enemy heads.
* BFS but Kenshin's original sword cut through it. He's also used the sharp side of his reverse-blade sword to slice through cannonballs and a huge lamp-post.
* BFS figurines. A popular way for heroes to show off their superhuman status.
* BFS: Gilgamesh and Enkidu each wield a sword that weighs 120 pounds.
* BFS is able to absorb new special abilities from some of the enemies he uses it to slay.
* BFS is capable of slicing through steel and concrete without losing their edge.
* BFS of the arc finds horrifying. There's also the time he cut halfway through his shins to escape a trap and could still walk afterward. Most remember the time he took all Luffy's pain and claimed while bloodied that's "It's nothing", averted though as two of Zoro's crewmates heard him screaming in agony before then.
* BFS since it can be used one-handed, although you would lose dexterity in your swordplay if you did. Greatswords ARE the BFS of the real world, sometimes as tall as a man of their period and with pretty big handles and handguards. Some of the specific types of greatswords are mentioned below. Both the German and Italian schools of swordsmanship deal with the longsword.
* BFS strong enough to use it in a fight, it is a terrifyingly effective weapon, able to shred plate armor and slice through giant monsters.
* BFS-swinger giggling at it, calling it cutesy pet names like 'shorty' and 'peewee' and tickling it.
* BFS used her Valkyria powers to hurl a Valkyria lance through it, which creates a convenient ramp of scrap metal for infantry units to climb up and disable a pair of hidden radiators powering a shield surrounding the mounted superweapon, allowing it

to be attacked directly.
* BFS were the only things that permanently destroyed the zombies and skeletons mobbing the four on the Plains of Death. Otherwise, the bits and pieces of broken undead simply reformed and started attacking again.
* BFS, which mutates into “Lumberjackass” and “the loathsome Lumberjack.”
* BG 1) hooded thief, Quayle the fuchsia shortie, Aerie is yellow and orange, Keldorn the paladin in orange armor (unless you change it), Nalia is sky blue and brown, Shar-Teel is bright red, Minsc has white hair (despite his portrait shows a bald head).
* BG2 (which greatly increases the difficulty and variation of enemy encounters).
* BGA (background art)'s 2018 song MARENOL, this is one of many ways in which the protagonist does in her dreams.
* B Gata H Kei, although she's so afraid of intimacy and poor at communicating that she spends most of the series struggling to lose her virginity despite being the most beautiful girl at her school. She restricts her advances to a single target rather than flirting indiscriminately, however (planning to cast a wider net after she's deflowered).
* B Gata H Kei, and more often the girl. She states that there are two types of masturbation: the "good" kind, doing it to relieve frustration and the "bad" kind, doing it out of boredom. She is then shown making a tally of the dozens of times she's done the "bad" kind in the last few weeks.
* B Gata H Kei, and no resolution has been given for ether of her romantic rivals.
* B Gata H Kei has everyone's sexual desires taking the form of small gods (or at least godlike) people that appear around their head.
* B Gata H Kei, including having getting his head caught in the door of a departing train while trying to confess his feelings to protagonist Yamada.
* B Gata H Kei, Kosuda argues quite regularly with his sister about her tendency to casual nudity at home. She's not so shameless that she'd walk outside in the nude or even around the house if there are guests over, but if it's just her high-school-age baby brother, who cares? (Aside from said brother, and anyone walking outside while he yells at her.)
* B Gata H Kei, Kosuda's blue-colored soul is gently hanging out of his mouth as he reflects upon how he ended up seeing underneath Yamada's skirt while she wasn't wearing any panties at school earlier that day.
* B Gata H Kei levels of frequency and, much like JD, are frequently followed by in-character outbursts that sometimes get her in trouble.

* B Gata H Kei this room no one could even know about crying and wondering how she got so lost.
* B Gata H Kei who has little on her mind but sex. Her younger sister Chika is much more level-headed. Takashi Kosuda is shy but thoughtful, expressing himself through his camera. His older sister Kazuki is outgoing, boyish and shameless within her own house.
* B Gata H Kei, Yamada is a beautiful, intelligent, refined young girl... who cannot stop thinking about sex for even a second. Her life goal is to have one hundred sex friends.
* B.G. "Buddy" DeSylva was one of Broadway's top lyricists in the 1920s, following a steady partnership with George Gershwin with an even more profitable team-up with Lew Brown and Ray Henderson. However, he gave up songwriting after the early 1930s and worked from then on mainly as a movie producer at

* BG II: Shadows of Amn, a side plot involves stopping the invasion plans of the drow elves against their surface elf enemies.
* BG II: Throne of Bhaal, the war is already going on, but prophecy indicates that

the player character's success will prevent it getting worse by a whole magnitude.
* BG: Personal Bodyguard (Last few episodes are centered on this in the two seasons)
* BG: Personal Bodyguard (Partially present because of the presence of the TMPD's SP)
* BGQG is a romantic comedy about a loner and a shy girl and the relationship between them.
* Bhaagam Bhaag episode "Kabootarr", Sunny rides a big group of birds through the sky. The birds poop all over some citizens, including a kid who is not happy and starts crying. At the end of that same episode, Sunny summons the birds to poop on his shoes when some of his fellow students make fun of his half pooped-on shoes; the waste materials hit those students as well.
* Bhaagam Bhaag shows Sunny's mother pouring a bucket of water on her son to wake him up.
* Bhaal, Charname's real father, died twenty years before the game starts during a catastrophic event known as the Time of Trouble. It's the plans for his resurrection that drive most of the plot, and he too likes haunting Charname's dreams. In Baldur's Gate: Siege of Dragonspear

* Bhangarh. Reputedly India's most haunted place, this abandoned fort was said to have been cursed by a magician who was rejected by the local princess in the 1600s, while another legend speaks of an irate monk who cursed the denizens because its shadow touched his home. Over the years, there have been reported ghost sightings and strange paranormal activities coming out of the castle, especially during nighttime. In fact, the Indian government posted a warning sign notifying trespassers of hefty fines and imprisonment if caught loitering around the fort after dark out of concern for public safety.

* Bible Black sacrifice killed the summoner and made the pact herself.
* Bible Buffet: the food is trying to kill you. Walking vegetables, eggs that blow themselves up, snowmen, ice creams, french fries, and your other average food stuff. Plus test tubes and kitchenware.
* Bible Games 3 episode, when he decides to "give his heart to Jesus". You can guess what happens.
* Bible gates, and each of them are made of a single pearl. Traditional thought holds that the justification for Peter the Apostle being the gatekeeper of Heaven is found in the gospels, where Jesus lays a duty on Peter:
* Bible. He uses it to take Sheriff O'Brien's gun and shoot him with it in an attempt to frame Ezra Burnham for murder.
* Bible John. A serial killer with only three confirmed victims, active from 1968 to 1969. All women, aged 25 to 32, whom he met at the Barrowland Ballroom, a dance hall in
* Bible John, unidentified serial killer active in Glasgow in the late 1960s. Many people believe Bible John and the convicted serial killer Peter Tobin are one and the same, but it has yet to be proven at trial.
* Bibleman and told by a hand puppet Sunday school teacher and her magic flannelgraph board.
* Bibleman as a popular hangout with the kids the heroes lectured. One such episode had the villain's plan to corrupt children with an evil online game he and his sidekick handed out physical pass cards for from a mall kiosk. Doing this he succeeded in reaching practically every kid in town!
* Bibleman: Its solution to the question of how Bibleman can defeat the villains without resorting to imitable violence: launching the villains into the sky and out of sight.
* Bibleman: One episode has Luxor being able to infect most of the town with his new evil MMO, which he interests people in by handing out physical passcards from a booth in the mall.
* Bibleman sequence telling a story from the Bible done in a style resembling that of flannel.
* Bibleman versions never materialized. At last check, the developers' site had disappeared off the face of the internet.
* Bible parable of Jesus presents the prodigal son this way until his return to his father.
* Bible stories (those also in the Torah) the big, powerful empire around is Egypt. Several times the Israelites prove the superiority of their God over this greatest early empire, either by saving it from future famine (Joseph) or freeing an entire subjugated ethnicity despite all of Egypt's might (Moses).
* Bible. When he lays his hands on a man who lost his left ear in a thresher accident as a child, the ear grows back.
* biblical (and, by extension, related passages in other books) is an example.
* Biblical' bit, which doubtless left him around a number of dead bodies afterwards.
* Biblical canon. In modern times, some of them have been translated back into Hebrew from earlier translations, such as Greek.
* Biblical daughters, and he never specified which one Jacob would marry, leaving Jacob with Rachel's sister Leah as his wife.
* biblical epistles, Saint Paul would never refer to dead Christians as having died. He would say that they have "gone to sleep". Since Paul did not want to imply damnation by any means, he used a euphemism.
* biblical humans from before the flood have a given age of several centuries. After the flood, human lifespan gradually decreases to closer to what it is now. There are several figures after this point who are said to have lived just over one hundred, which is technically possible but still unlikely for an ancient Hebrew. In the books after the Pentateuch, which took place much closer to the time of the lives of their writers, people live somewhat more reasonable lifespans.
* biblical in Deuteronomy 34. (Usually waved off by claiming that either this part

was written by Joshua, or Moses in a God made trance.)
* Biblical, Job has great worldly wealth, respect and honor, and ten wonderful children. Then, Satan kills off all seven of his sons and three of his daughters. At the end of the Book of Job, Job marries again and sires a replacement seven sons and three daughters, and said daughters are specifically stated to be the most beautiful in the land.
* Biblical, Joseph's fellow prisoners — Pharoah's butler and his baker — ask him to interpret what their dreams are telling them. The good news is, the butler's going to be set free! The bad news is, the baker's going to be executed. He's right on both counts.
* biblical Leviathan fits here since God, having originally created two of them, killed the mate so that their offspring, which are implied to be all manner of other sea monsters and such, would become not so numerous that the world could not stand before them. This makes it very much a mirror of Tiamat and Ceto.
* Biblical of Jesus, Joseph initially assumed that Mary's virgin pregnancy was the result of infidelity, until an angel explained the truth to him.
* biblical or are actually shape-shifting creatures. Usually this is because such theories typically originate on the internet and very often don't have a single author.
* Biblical prophet Daniel (aka Belteshazzar) was a brilliant scholar and a top-notch administrator.
* Biblical prophet Jonah was regurgitated by the whale: based on verifiable instances of people being swallowed by whales who survived afterwards, a largely vegetarian species whose digestive system is geared up to nothing bigger than plankton or seaweed might have been internally irritated by a larger-than-usual and probably indigestible morsel, and simply vomited it out again.
* biblical, tricks them into partaking of the forbidden fruit. The result, of course, is the fall of man and the ruin of God's perfect creation. Some believe that this is the reason why we have natural disasters, diseases, wars, famine, and death in the world today.
* Biblical was taking on hundreds of armed and armoured Philistines while he was butt-naked armed with nothing but a Donkey's jawbone.
* Bibliography has the "protectors against supernatural forces" variety.
* bibliomaniac Stephen C. Blumberg stole over 23,600 books worth at least 5.3 million dollars from various libraries throughout the United States before being caught in 1990. Ironically, this very literary person (he never tried to sell any of the rare books he stole) was a poor student who struggled to complete high school and only attended six weeks of college before dropping out.
* Bibliophile Mysteries. Because of this, she immediately becomes the chief suspect in the eyes of Derek Stone, the security officer on duty at the event they were both attending.
* BiC Canada parodied and lampshaded this in their commercial for the
* Bic (disposable lighters, ball-point pens or safety razors, depending on context)
* Bicentennial Man also changes; Little Miss doesn't pronounce "aNDRoid" properly and says "Andrew" instead. Some of the Martins also change names; Sir changes from Gerald to Richard and Little Sir (Little Miss's son) changes from George Martin to Lloyd Chaney.
* Bicentennial Man, although specifics aren't given. When Andrew is pleading his case, it is before an organization called the World Congress, but the "head judge" is World President. They have the power to pass bills. So it's all three branches in one, without any need for regional/state legislature?
* Bicentennial Man, Andrew is envious of Portia when she cries after Little Miss dies. He comments that it isn't fair to be capable of feeling so much sadness and incapable of expressing it.
* Bicentennial Man: Andrew points out that he can observe Portia's pulse and breathing rate have increased, and even that she's putting out pheromones, using this to conclude that she is in love with him. She says it is completely unfair of him to scan her like that, but he counters with "love isn't fair".

* Bicentennial Man: Andrew starts as an ordinary housekeeping android who develops artificial intelligence. After finding the son of the roboticist who designed him, he starts to add organic components to his body. First it's just his skin, but then he replaces much of his inner circuitry with artificial organs. Eventually, he becomes so human that he even starts to age and decay, as a deliberate choice so he can die with his human wife, who becomes a cyborg herself thanks to Andrew's inventions.
* Bicentennial Man, and the second time is showing the father-daughter dance after Little Miss is married. Both times there's slight wobbling and lines in the video, and the second video is sepia-toned as well as translucent.
* Bicentennial Man: At the end of the film, Galatea quotes from Andrew.
* Bicentennial Man behaviour is the result of Rupert's choices. Andrew gives her an "upgrade", which makes her surly and uncooperative, but he lets Rupert change her back. Andrew's personality chip, however, was never activated, and his quirks are unique to him.
* Bicentennial Man. Her personality at the climax of the film is much more subdued, suggesting that the chip has been removed entirely.
* Bicentennial Man is that he refuses to shake Andrew's hand when offered. This contrasts with Andrew's meeting with Bill Feingold later on, who offers his hand to Andrew before Andrew can even offer his own.
* Bicentennial Man: Little Miss tries asking if Andrew has feelings for him, by telling him about this friend she has who makes her much happier than her fiance does. Andrew, oblivious because she has disguised the question so well, bluntly tells her that she should marry her friend instead of her fiance. The fact that she framed her question like this leaves out that the reason she's hesitant is because he's a robot.
* Bicentennial Man that her grandmother, Little Miss, had feelings for Andrew, but at the time couldn't even dare to think about such a thing.
* Bicentennial Man: The film dedicates itself to the memory of Robin Eickman and Jeffrey Burks.
* Bicentennial Man turns the primary conflict into making Portia happy. Because the World Congress determines if Andrew is human enough to marry Portia, whenever they appear on-screen the comedic elements disappear entirely.
* Bicep Kiss: An arrogant character, usually a man, kisses his bicep to show off his muscles.
* Bicep-Polishing Gesture, indicating confidence in one's own strength and readiness to perform an action, is easily mistaken for the obscene "bras d'honneur" gesture used in much of Southern Europe and Latin America to mean "Up yours".
* Bicep-Polishing Gesture: Rubbing one's bicep to try to appear muscular.
* bicker enough for those who like that. On Kaminari's side when thinking about the people he wants to protect as a hero, Jirou is the first who comes to his mind, hinting that his feelings for her might be deeper than he realizes.
* Bickering Couple, Peaceful Couple: A couple that constantly argues are contrasted with a couple who get along very well.
* Bickering Couple, Peaceful Couple: A couple who argues a lot make the relationship of the couple that gets along look even better.
* Bickering Couple, Peaceful Couple: A couple who frequently argue are contrasted with a couple who get along well.
* Bickering Couple, Peaceful Couple: One couple argues with each other in contrast to the other couple who gets along perfectly.
* Bickering Couple, Peaceful Couple while another is very argumentative.
* bickering head over heels for each other and really if they'd been given the choice they would have chosen to marry each other anyway.
* Bickford Schmeckler's Cool Ideas, the eponymous character gives what may be one of the best diss lines ever:
* Bicycle Boy, the story follows a mysterious cyborg named Poet. About 70% of his body is mechanical, excluding his head and part of his torso.
* Bicycle Boy was intended to be the working title, for obvious reasons. But the author could not think of anything better.

* Bicycle Thieves was made in 1978, well after the height of Italian neorealism, but was shot in the same manner, with a cast made up of rural villagers playing in a story that basically was about their own ancestors at the end of the 19th century.
* BIDA:Batang Iwas Droga - animated series aimed at educating children about the perils of drug abuse.
* Bideford witch trial (among others), to appear as an avatar of Satan at witches' masses.
* bid for power moment by secretly injecting him with a general anaesthetic instead of a painkiller. When Jayne attempts to take control of the ship, he keels over unconscious instead. The rest of the crew (including Mal and Zoe when they learn what happened) are immensely relieved by Simon's foresight.
* Bidiots, leaving him nearly broke and unable to top Jeremy's bid, invalidating the Screw. As a result, Jeremy's Screw is thrown out and, with no one lifting a finger to bail him out, Jeremy is forced to buy his own artwork for an exorbitant amount while also forfeiting his artist's commission for the drawing.
* Biebel. Sexual arousal is usually represented by having the characters get very hot, having facial features pop off of their heads, or having them fall over in astonishment. However, on one occasion, when a leading female character transforms into a blonde bombshell, the trope is utterly ignored and the main character is actually shown with rather obviously stretched pants. This somehow made it past the censors.
* Bieber, the contentious 2016 US election led many Americans to seriously ponder a move north of the border (although none of the celebs pledging such a decision in the event of Donald Trump's election did so) with Prime Minister Trudeau being looked up to by Americans as the antithesis to Trump (being even more popular than in his home country), while Brits began looking up to their Canuck cousins as they began to sour on Brexit.
* Biedermann und die Brandstifter that was inspired by the play (and the subsequent episodes where "The Arsonist" became a recurring character).
* biedronka, there's a strong religious connotation, and there is even a nursery rhyme which goes: "Biedroneczko, leć do Nieba, przynieś mi kawałek chleba" ("Ladybug, fly to Heaven and bring me some bread") - it's usually spoken by little kids who set free a ladybug they've caught.
* Biel went on to lose a lot of that muscle mass, then gained a ton back for
* Bienvenue chez les Ch'tis (aka. le Nord, which is literally French for "the North", official name of a northern region of France and whose inhabitants are locally called "the Ch'tis") while his wife and kid live in the south of France. Le Nord is considered as a rather unloving place, but when he gets up there he finds that all of the stories are false and rather enjoys the place. When he visits home at the weekend, he enjoys the sympathy he gets from his wife and doesn't tell her that it's rather nice and exaggerates all the stories for more sympathy. Of course, she eventually decides that she needs to visit his work and he needs to drag his insulted friends into pretending to live up to the stories he told.
* Biers, the bar for Ankh-Morpork's most monstrous citizens — except that Pratchett's undead and lycanthropes don't so much prey on helpless humans as hold night jobs and discuss flea shampoos.
* Biers where Ankh-Morpork's monsters and Undead go to unwind over a drink.
* Bifauxnen and Lad-ette: Two women whose masculine traits act as a contrast to one another.
* Bifauxnen artist from the Kaleido Stage who wants to be a comedian, but hides how deeply hurt she's been after her father Jack (a.k.a. "Baron Jack") left her and her mother Julia.
* Bifauxnen, inspired a lot of this from straight women in the audience. As Anna Kendrick tweeted:
* Bifauxnen Kashima herself, of course, happily wears her "bookish male student" fashion when she's not in her prince costume or waiter uniform (or the two times she got away with wearing the school pants).
* Bifauxnen this way in the same chapter—and ends up completely surrounded by

a 360 degree shell of umbrellas.
* Biff and Chip walk in on their parents having sex and scream in horror. Then,
* Biff does this twice in the same scene. Marty plans to get aggressive with Lorraine, so that
* Biff the Construction Worker talks like this, much to the ire of his best friend and co-worker, Sully, who can't get a word out because of it.
* Biff to the Future, the alternate timeline Doc makes his time machine out of a refrigerator. This is a reference to an early script of the first film that was nixed for fear kids would try to re-enact it and get trapped in fridges.
* Biff try to rape Lorraine and then shove her to the ground. Enraged, George punches him out.
* Biffy Clyro, however, were bound by no such agreement, and happily filled in the blanks.
* Biffy Clyro. This example is notable because the bonus track is every bit as scary as the silence, if not scarier.
* "BiFi - The Snack Zone" (promoting a popular sausage-like beef snack food called, well,
* BiFi, which is known in the UK as Peperami, where it is made out of pork)
* Bifouga Zeeh “Rufflebeard” had a glorious one dragging the ground.
* Big 12 Conference (whose charter dates back only to 1994, with play starting in 1996, but unofficially traces its history to the formation of the Missouri Valley Intercollegiate Athletic Association in 1907 [the conference split in 1928, creating the Big Six and Missouri Valley Conferences])
* Big, a bit of an untraditional example, follows a young boy named Josh Baskin, who is shown in the opening of the film as a kid before wishing on a Zoltar machine and waking up the next morning as a fully-grown adult.
* Big & Rich. Features the battle fought on 11/08/1965 called "Operation Hump", referred to in the Real Life folder.
* Big & Rich is a curious example. Before this version, it was recorded on solo albums by Big & Rich's members, Big Kenny and John Rich (Rich's version was even a single). However, neither version was commercially available until after Big & Rich's version.
* Big & Rich. Many of them collaborated with each other, often singing and writing on each other's albums. A few other non-musical members existed over the years, but the group seems to have largely dissipated.
* Big & Rich only got to #11 on the country charts and #56 on the pop charts, but it is their most-downloaded song and the one song by which most would recognize them.
* Big & Rich released a song called "Party Like Cowboyz" in early 2013.
* Big & Rich's only Top 40 pop hit and only #1 country airplay hit is "Lost in This Moment", a sensitive and serious wedding ballad which is far removed from their in-your-face hard rock and rap influences (as codified by "Save a Horse (Ride a Cowboy)").
* Big & Rich's "Wild West Show" has percussion from a peanut can at the very end.
* Big & Small and The Diminutive Experience, so these games are prime fetish material.
* big and blue as anything. were disappointed by the lack of police boxes in England.
* Big Anime Eyes: Large, sparkly eyes emphasize the cuteness of a character.
* Big Applesauce: "America" defaults to "New York City" at least in the eyes of the (largely NYC based) arts community
* Big Applesauce: Because New York is the only city aliens and monsters like to destroy.
* Big Applesauce. Everything more than ten feet above the ground is shiny. Everything less than ten feet above the ground is gritty.
* Big Ass Spider!, a giant alien spider escapes from a military lab and rampages the city of Los Angeles.
* Big Ass Spider! depicts Los Angeles being attacked by a really big alien-hybrid

spider.
* Big Ass Spider! reveals that a giant cockroach is attacking the Statue of Liberty.
* Big Ass Spider!, where Alex and Jose use the ride to psych themselves up for the coming fight.
* Big, at one point the protagonist's picture as a child appears on a milk carton.
* Big Baby Scam", where Ren and Stimpy pretend to be babies so they wouldn't have to do any work and be fed and pampered. Oh, the victims of their plan are the exact same people.
* Big Bad (a direction later changed), is underneath the Tamers rather than above in his early promotional material.
* Big Badadmits to enjoying himself while he casts disaster on Ponyville, and seems to be the most energetic actor. This isn't saying a whole lot, as everyone else is stiff or unintelligible sometimes.
* Big Bad adventure path is Queen Elvanna of Irrisien, who is attempting to spread that land's eternal winter across the entirety of the world.
* Big Bad a few tens of billions of years, and it immediately begins to spread out over the galaxy-wide computer network, infecting both computers and sentient creatures.
* Big Bad, a film focused on product mascots in a grocery store. Part of the film's message appears to be that robbing food of an iconic mascot removes its soul.
* Big Bad after Gruumm decided he wasn't paying for expensive weapons and robots that couldn't match against the Rangers.
* Big Bad after (s)he says this. Nope, you've got another fight on your hands instead.
* Big Bad, a grenade is placed in his mouth and he is kicked over the edge of the platform. The player is then treated to a lovely gore explosion.
* Big Bad Aku has a crystal ball that allows him to see whatever Jack is doing. Why he doesn't try more often to send his flunkies right to Jack is anyone's guess.
* Big Bad all over again!" When Angel mentions this as one of his reasons for opposing her, she quickly retorts "Like you never have?"
* Big Bad also had a few of these, such as his realization that the reason why the word "Silence" is capitalized in a coded message is because it's a name (Ben Franklin's pen name) or when they arrive to the Liberty Bell exhibit only to realize that he's supposed to look where the bell was originally located not where it was moved 100 years later.
* Big Bad, although in his case it's more a matter of slipping through hyperspace (the "underverse") than super-speed.
* Big Bad and can't do that if he fights Spider-Man in public, and actually saves Spider-Man from Dr. Octopus. It's only a partial case since when both Spider-Man and Tombstone fall into a sewer and out of view of everyone, he and Spider-Man start fighting.
* Big Bad, and each of the core brotherhood members gets his or her chance to star as headlining villain at least once during the arc — except for poor General Immortus, who was introduced with much fanfare but ended up as little more than window dressing.
* Big Bad, and filled with every evil gadget that Makarov can come up with.
* Big Bad and has several Chiefs of different divisions. We have Asher Rose, Asmos' other daughter and Amy's older sister, as Chief of Medicine and finally, her oldest son, Andrew Rose as Chief of Engineering. The latter is more telling as Milo Prower, who has just as much talent in technology as his little brother, points out:
* Big Bad, and he "kindly" offers mercies when his enemies are plainly outmatched by him, like:
* Big Bad, and her evil plans in the first game involve enhancing or restoring her beauty at others' (mainly Tootie’s) expense. In the sequels, she seeks revenge on the title duo for defeating her and rescuing Tootie.
* Big Bad and heroes and villains can become key figures in the Council overthrow of the 5th Column.

* Big Bad and his evidence that they are being used is far more interesting to the Jager Generals than keeping up appearances.
* Big Bad and his own medical knowledge to resuscitate her. But her mind couldn't handle the trauma of what happened to her, and she became a cold, ruthless, and paranoid woman who cares for nothing but her own preservation.
* Big Bad and his utter lack of compassion, makes him terrifying. Except for when he gets agitated. It comes across more like him trying to achieve this trope but failing every now and again.
* Big Bad, and hurls an asteroid at Q's future wife when she tries to convince him to abandon 0.
* Big Bad and injuring Leia, its "sampling oriface" roars at them, and it more-or-less defeats itself by getting partially caught in an ore crusher.
* Big Bad and installs the Drive he stole, while Setsuna's allies send him the Gundam Exia, though in this case both machines received a few minor upgrades in the meantime.
* Big Bad, and in this unique case the Greater Scope Villain is NOT in fact 'other than' the Big Bad.
* Big Bad, and midst the desolation of the landscape their love would blossom. If that's not a Category Romance fantasy, we don't know what is.
* Big Bad and supreme leader of the demons following their exile. He expects all other demons to share his ideals, controls their lives to the point of choosing names for them when they reach adulthood, and inflict humiliating punishments on anyone who he thinks is a dissenter.
* Big Bad And then he's going to destroy it. However, he found it much too fun, so he destroyed Euro Disney instead.
* Big Bad, and the villains usually are not. Female player characters are most prone to it, though the guys certainly aren't immune.
* Big Bad, and they'd continued to work together even after he'd died.
* Big Bad and was, as a result, unable to return home to his people though he desperately longed to do so. At the end of the show, he realises that the best chance for long-term peace the Alpha and Gamma Quadrants have is for him to return to his people and teach them that the Solids don't have to be their enemy. To do this, he has to sacrifice the love of his life, making his return home less "sweet" and more "bittersweet".
* Big Bad and was milking its natural resources dry, practically starving its population, before your team intervened.
* Big Bad and went on a mission to bring her back by any means necessary, enacting a plot to steal a book of powerful magic in order to awaken the Dragon Titan, who has the power to resurrect the dead. In the process, he's left multiple worlds across the Spiral in violent chaos, which you'll now have to traverse and repair to eventually get to him and stop his plan, because the Dragon Titan is extremely dangerous and will quickly lay waste to the land again if awoken.
* Big Bad angry. In close-ups of his face, it is actually possible to see a very little white pupil in the middle of his empty black eyes.
* Big Bad, another example of a manly Disney villain. He's one of the few villains to almost beat our favorite street rat in a fight.
* Big Bad. Anyone familiar with the history of China and the Huns will know this is because Mongolian women had a much higher social standing than anywhere else in Asia (Genghis Khan's daughters were even army combat Generals). The significance of Mulan being a woman is completely lost on him and she really is just a soldier like anyone else as far as he's concerned.
* Big Bad. Any one of 'em. They're this trope. It's a Final Fantasy / Disney crossover, so this was basically inevitable.
* Big Bad, a powerful evil wizard, and the main character if the latter is of good alingment and has a low score in intelligence and wisdom.
* Big Bad apparently absorbs them both, leaving you to wonder just how fake it is.
* Big Bad appear he hogs the spotlight a lot more than the shadowy Slade usually did.
* Big Bad arc, is at first confined to a full-body life support mechanism. During

his duel with Judai, with each Phantom/Sacred Beast he summons, the more duel spirit energy he absorbs, restoring his youth, to the point that he's able to emerge from the mechanism and duel Judai without it.
* Big Bad are able to enter the house of a professor with information needed for their quest purely due to the professor in question having a "Welcome" door mat. Owen immediately states he's never buying one of those again.
* Big Bad are also just as ancient—they were his party members back then — but significantly less evil.
* Big Bad are capable of vaporizing a person, and it can fire them exremely quickly. When someone throws a grenade at it, the robot catches it, rapidly spins around, and tosses it back. They appear in an embrionic state and grow in waves, with each wave double the previous one. The titular truckers are hired to transport the container filled with these things to Earth. They end up sending the rig into an uncontrolled re-entry, destroying all robots.
* Big Bad are suffering the attrition and winning the battle, but the players are doing the thing that makes their victory possible. Video games use the same trick.
* Big Bad are this, each artificially created to be used as its minions.
* Big Bad Arktivus Brevon is incredibly fast himself, able to decapitate enemies in the blink of an eye. He’s even able to keep up Lilac and cut her out of the air when she tries to blitz him.
* Big Bad armies consisting of, among other things, giant lion-like beasts made of scrap metal and burnt tires becoming living pests.
* Big Bad arranges for Ben to die in what appears to be a road accident (when, in fact, his goons sabotage Ben's bike), so that he can lead Ben's gang into a trap. Needless to say, Ben survives and gets back at him.
* Big Bad as early as the third game and had different counterparts replace his role.
* Big Bad Ashka manages to make it to our world and tricks an engineer into re-creating one of those combat suits using late 20th-century tech. The resulting suit looks less like ornate Medieval armor and more like a sleek black body-hugging jumpsuit with gadgets. Not only that, but it's better than the original Spellbinder suits, able to fly. It's also waterproof, since that would be one of the things an engineer would do to a piece of tech, unlike the original suits that could be stopped by a puddle.
* Big Bad, as it's ultimately revealed to be a corruption of his real name, Meredeth Stryker.
* Big Bad as Judge Hershey, Dredd's partner, shoots the scientist from behind, saving his life. Using this trope three times in one movie may well qualify for some sort of record.
* Big Badass Battle Sequence: A battle which is just large and awesome at same time. Because it's the war.
* Big Badass Battle Sequence are spaced through hull breaches. One is friends with Commander Burnham, and she's visibly distressed to watch him die right in front of her.
* Big Bad as "the most disappointing movie villain since General Grievous."
* Big Bad, as the name implies, is a giant brain in a jar, with a face.
* Big Bad, as the sheer scale of his scheme has yet to be topped by any other villain.
* Big Bad, attempts one last chance to kill Kirito in the real world, after being defeated which causes him to suffer a complete breakdown and had lost everything he planned to achieve, he came close to winning, but Kirito gradually beat the crap out of him and left him nothing but a broken wreck.
* Big Bad at the end of them. If you disturb one of them, the hand will grab you and the whole arm will retract, dragging you through the tunnels and eventually into one of Setebos's many mouths.
* Big Bad. At the same time, he was a very competent, pragmatic, and sometimes tragic leader. He was one of the reasons the show could often seamlessly switch from one end of the Silliness Scale to the other, and back again, to great effect.
* Big Bad. Averted with Coin himself, however; he's a remarkably sweet kid for

someone with such a terrible role model.
* Big Bad, Bartholomew Roberts has a more nihilistic take on this trope. He starts out as a honest sailor, but being repeatedly chased by multiple targets ultimately leads him to becoming a pirate. Upon taking a pirate, he spouts a creed of "A merry life but a short one, the world owes us nothing more". He embraces the violence and daring pirate life knowing fully well that he'll die, but damn it if he isn't going to have fun while he's still kicking.
* Big Bad based on a German microcar in which passengers always face the back. In fact, two of the baddies are even called Grem and Acer.
* Big Bad, became the partner of Hikari Yagami/Kari Kamiya (whom she found she simply couldn't kill when they first met), and became decidedly...not mean.
* Big Bad because he doesn't want to waste the years on abilities to become useful when more straightforward and easy to use Quirks are more practical.
* Big Bad because he felt he should at least once demonstrate his singing ability on screen.
* Big Bad because he's jealous that God created it and not him. Tolkien says that if Morgoth could, he would smash all of creation into dust and then hate the dust.
* Big Bad because he wants a wife who'll be completely subservient and then has her destroyed when she finally stands up to him. Relationships between humans and robots treated more sympathetically turn up a few times elsewhere in the manga.
* Big Bad, because this was all revealed in the final chapter of a novel and on the last pages of a comic, while everyone was celebrating.
* Big Bad Beetleborgs appeared too, as "Wingar". (The Blue SWAT team themselves were cut completely, likely because of their exposed Japanese faces.)
* Big Bad Beetleborgs commercial had generic mutants represent their enemies.
* Big Bad Beetleborgs featured Flabber, a friendly ghost who grants Drew, Jo, and Roland their powers.
* Big Bad Beetleborgs had a commercial which claimed that the bad guys and the borgs were aliens from another planet, when they were actually kids who wished to become the comic book heroes, the Beetleborgs.
* Big Bad Beetleborgs had an episode centered around this trope, in the episode "Booger Man" there was a monster called Booger Man (also known as Booger) who was a boogeyman that came to Hillhurst and gave the house monsters nightmares. Flabber has a nightmare involving the ghost of Edgar Allen Poe. At the end they send him over to the Crustaceons lair to give Les Fortunes nightmares.
* Big Bad Beetleborgs, most notably some of transformation sequences from the first season and Metalix. Also done whenever Flabber brings one of Art Fortune's drawings to life.
* Big Bad Beetleborgs plot to rob a train. No, not the things on the train, the train itself.
* Big Bad Beetleborgs when Shannon Chandler left the series: Halfway through Season 1, Wolfgang, while playing with a magic book, accidentally caused Jo to change in appearance. To counteract this, Flabber used his magic to make her look and sound just like herself, except to the people who saw him do the spell. So the viewers, Flabber, Drew, and Roland could still see Jo in her new appearance, played by Brittany Konarzewski, but the Hillhurst monsters as well as their family and friends could see her as she looked before. The psychological impact this would have on her brother and best friend was never addressed.
* Big Bad Beetleborg with a lightbulb on top. When he gets an idea it lights up.
* Big Bad before sending him off screaming into the depths of the abyss within Yggdrasil.
* Big Bad being someone whose father was killed during his crusade. By the season finale, Oliver learns only by forgiving himself can help him move on from his darkness, hence from that point onwards, the show deemphasizes his past in favor of the present and the future.
* Big Bad, Blade gets several free shots Deacon, who then grins and "My turn!" before smashing him across the room.
* Big Bad blowing various towns up, as well as various labs filled with the bloody and fatal results of human experimentation. It's all part of the R&D his

company is doing on the Eclipse virus as it'll bring huge profits to his company once they refine the technological advances related to it.
* Big Bad Bob Page lobbing threats at you while he's encased in a shielded anti-chamber, as he tries to merge with Helios. He never gets close to achieving his goal — no matter which ending you take (merge with Helios, destroy the communications hub, disable the shield unit), Page goes out like a whimpering punk. The worst is Morgan Everett's ending (kill Page) — to do so, you simply run around Area 51 to deactivate some power units. Page dies miserably seconds after you deactivate the final device.
* Big Bad book is a group of religious fanatics that were exiled from Earth for trying to take it over. They wound up on an existing colony. At first they pretty much kept to themselves, then they went back to their old tricks, at which point the colonists hired the DMC to protect them.
* Big Bad book, is known for this, so much so that Beka assumes "Skinner" is a boastful title. (It's actually Pearl's real family name; her father was a butcher.)
* Big Bad books has these as part of being a Dream Walker. If that wasn't creepy enough, everyone knows when he's looking at them, even though his eyes are effectively black spheres. It's never explained.
* Big Bad Brother Blood has this, big time. Put bluntly, Blood has mind-control powers, and doesn't like it when his targets break free or resist. This is what leads to his obsession with Cyborg, as noted by the creators on the DVD commentary; Brother Blood has finally met someone who can't be controlled, and it gets under his skin so much that Blood goes to extremes to find out what's causing that.
* Big Bad, but accepts that he needs the help of Lucifer (and other similarly untrustworthy allies) in order to do it.
* Big Bad, but all of them are annihilated by this move alone by Alduin.
* Big Bad, but being trapped and immobile in a coffin for over a year drove him around the bend and his plans changed from "usurp the throne" to "DESTROY EVERYTHING."
* Big Bad, but causes him to act like a surly drunk and even hallucinate at one point. One of his lackeys, Mr. Pickles, even warns him "You know what cheese can do to you..."
* Big Bad but he doesn't care, just so long as he can pay the gods back for humiliating the demons 70,000 years ago.
* Big Bad. But he doesn't need to be so smug and boastful about it all the time.
* Big Bad, but in one bad ending, the death of Geladura, the Fairy Queen, means that Madison, the temporary Fairy Queen, must play that role in her stead. As a result, Madison and Abigail disappear after the final battle and are never seen again, although Tara believes that the two of them are still alive in a sense.
* Big Bad but is revealed to be in league with the mysterious "Joker." Oddly enough, the character in this arc with the worst reputation actually chooses to ally with the Straw Hats.
* Big Bad, but it was only apparent in hindsight), it somehow managed to wrap itself up nicely.
* Big Bad but only once and not in the aforementioned context. It's pretty clear that they go far beyond that in the Japanese version, if one knows the local profanity.
* Big Bad, but Saruman (and to an extent the Witch-King and the other Ringwraiths) are much more visible and involved villains, especially in the movies. Broadly speaking, each of the six "books" that the story is internally divided into has its own Heavy, with the exception of Book II and Book VI:
* Big Bad, but the closest thing is the titular Ask That Guy. However, even Ask That Guy is horrified by the depravity of Bennett the Sage.
* Big Bad. But they are rehashes and, with your leveled-up party, are nowhere near the threat they were in the original chapters.
* Big Bad by a boulder... being thrown by tornado winds that were drilling into the ground and altering the course of an underground river).
* Big Bad by Christopher Brookmyre, and the protagonist uses his knowledge of this trope to his benefit later in the story.

* Big Bad by forcing her to ingest a test tube filled with the ingredient that made her cookies so addictive in the first place.
* Big Bad by S.H.I.E.L.D agents and it only makes him flinch. Loki also gets back up after getting shot through a wall with Coulson's Destroyer Armor Prototype Gun.
* Big Bad by the art style: photographs of Bush and Lilly exist on-screen while the image of Eiri is obviously drawn in the same style as all the other fictional characters.
* Big Bad by tormenting him all the time. Naturally, neither of them are believed when they tell others Steele is a liar.
* Big Bad can do this thanks to their mitama. They're retractable, but still apparently part of the body.
* Big Bad can possess any host that can't control the darkness in their heart.
* Big Bad capable of easily decimating a city and posing a huge threat to the world, and even without using her powers, is able to fend off the whole squad on her own.
* Big Bad, causing untold amounts of death and destruction. When the hero asks him why he's doing it, he replies with a speech that can be summed up as: "Just as some people find music or art entertaining, I can only find amusement in watching other people suffer".
* Big Bad Chairface Chippendale using a pill to turn Neil back into a dinosaur on his wedding night.
* Big Bad, changing into a billowing mass of magic that keeps only his human form's eyes.
* Big Bad, changing shape, and creating bizarre monsters called Choju to menace the Ultras.
* Big Bad character, the Shadowed One, rather than deal with backlash again.
* Big Bad Charon when he makes his own "inverse sigil" — the ligis — out of the negative space from the original sigil, and empowers a bunch of test subjects with it.
* Big Bad claims he's chucking it out the nearest window as soon as he and Agent G are out of the blast radius (which he indeed does once they're in a helicopter).
* Big Bad, comes across as a hammy hack who is trying to be a menacing threat, but his less than invested wife combined with his lackluster attempts at seeming like an evil mastermind make him look more like a dork. That being said, he is versed in the Dark Arts enough to perform a Gloating on two virgins, is perfectly willing to have said virgin (both of which were teenage girls) raped to death by demons and he kills his wife in cold-blood when he loses his patience with her.
* Big Bad. Comes in full effect in the assault on Orr, where you and every other sylvari around are essentially one big hunting party on a rampage through Zhaytan's territory.
* Big Bad comes to seriously regret his immortality when he is gutted, covered in molten gold, and dropped to the bottom of the sea.
* Big Bad, coming to his home in order to spend some time with him, and a follow-up scene which shows Sensui with black angel wings wrapped around Amanuma, who is nuzzling his head into his arms. Considering that Amanuma is 11 years old along with a heavily implication that Sensui had spent the night with him...
* Big Bad, considers it a sign of him truly being clever for naming his attacks.
* Big Bad Count Bleck creates by forcing the marriage of Bowser and Peach and uses to set in motion the end of the universe.
* Big Bad Count Dooku doesn't realize how expendable he is until Sidious orders his replacement, the future Darth Vader, to execute him. Then, once the Separatist leaders have done their job, Sidious informs them that he is sending Vader to "take care of them." Naturally, this means Vader locks the door and slaughters them. Vader's sweetheart Padmé probably would've also been discarded by Sidious, if Vader hadn't accidentally done that himself.
* Big Bad creates a zero-gravity area inside the building so his opponents can fight him in the air.
* Big Bad Croatoa, the Pirate Ghosts in Fort Hades...it has a lot of ghosts, really.

* Big Bad crosses into our dimension by possessing the body of Dr. Emilio Lizardo. Since no hints are given that he's still in there somewhere and the possibility of saving him never comes up, we're left to assume the good doctor's consciousness was unfortunately wiped out in the process.
* Big Bad Cyclonia disguises herself as an ally of the team. At first, only Radarr is able to sense that something's wrong.
* Big Bad Dagoth Ur wears a full-faced golden mask with a third eye slot.
* Big Bad Dahlia Hawthorne has been defeated for good, there still isn't an actual suspect for the murder. After some further testimony and debate, Phoenix accuses Prosecutor Godot. What makes this a surprise is that so far there's been absolutely nothing to even suggest that person was anywhere NEAR the murder as it happened. But it's not out of nowhere; because the player has to prove they've actually been paying attention by answering "Who do you think the witness saw?" just before the Reveal.
* Big Bad Darken Rahl practices divination by reading the entrails of living humans. If his prisoners won't talk, he can use this as a last resort to get information from them, but can only get one or two words, like a name or the answer to a yes/no question.
* Big Bad, Dartz somehow managed to summon a monster with infinite attack points. Yugi responds by having two of his monsters attack, bouncing the attack between them until it reached infinity and then having a third monster attack to exceed infinity and destroy Dartz' monster.
* Big Bad Deathborn challenges Falcon to a race in the underworld for the fate of the universe.
* Big Bad defeat. He couldn't be killed permanently, but the hero managed to cover him in molten gold and drop the resulting statue to the bottom of the ocean.
* Big Bad Depending on how you've been building your character through the game, you may or may not be able to go through with it.
* Big Bad describes him as a good man who got carried away- but he's still the ultimate mastermind behind the threats facing the protagonists, and the kingdoms of Hallandren and Idris more generally.
* Big Bad destroys the future by burrowing from the ground and then pelting the globe with its spines. While fighting it, it also does something similar with a move called "Destruction rains from the heavens!"
* Big Bad didn't show up in season 1. By the end Buffy faces the personified root of all evil. The entire series is a coming of age story and the threats get bigger as they increase in metaphoric resonance with being grown-up.
* Big Bad Dio being a good dad to Giorno, sometimes with the help of Vanilla Ice and Pucci, his closest minions.
* Big Bad Disney fans, to the point that there was an outcry when the official Disney Villains merchandise gave her a slimmer physique.
* Big Bad doesn't even kill the victim — he just gets rid of the body to protect the idiot that killed her almost by accident. However, as the investigation goes on, he kills another man to keep the secret and when that also fails, he attempts to kill the detective in charge of the investigation.
* Big Bad does this as his modus operandi. He believes mechanical life to be superior to organic life, and that organic beings using mechanical prosthetics to repair themselves is hypocritical. To wit, Fyzen has a legion of droids with organic limbs grafted onto them, and once they start to rot they hunt and slaughter other organic life to harvest new limbs from.
* Big Bad does this, stopping a car inches from him by blowing it up with his mind as he crosses the street.
* Big Bad drives him to do terrible things. Up to and including genocide.
* Big Bad Drosselmeyer delights in tragic stories and gets excited whenever things begin to take a dark turn.
* Big Bad due to the fact he was playing the stereotypical role of the too-nice character that's deeply concerned about a potential conspiracy, who confronts the apparent villain and gets killed off shortly afterwards. Aizen's reveal was therefore fully expected rather than surprising.

* Big Bad due to them likely assuming that since the right decision is so obvious that the only reasons someone would do the wrong is is curiosity after beating the route.
* Big Bad, Duke Igthorn, whose castle is otherwise inhabited by ogres.
* Big Bad Durand Durand is called Gronf II in the comics, while Barbarella's ally Professor Ping is called Durand (just one).
* Big Bad during the final challenge. Shawn though, like the majority of his predecessors, still looks average.
* Big Bad during their second encounter or Link could have defeated him.
* Big Bad Duumvirate are a corrupt Soviet general and a criminal, this time a KGB chieftain and a crooked arms dealer respectively, who plan to have Bond murder the former KGB superior to cover up their ring of embezzlement, drug running, and diamond smuggling.
* Big Bad Duumvirate is a teenage boy named Stacey de Lacey. He was bullied for what he assumed was having a traditionally girl's name, though it may have had more to do with the fact that he wasn't that pleasant a person to be around.
* Big Bad Duumvirate is to get ludicrously rich using the profits from a large shipment of opium paid for using diamonds and to repay the loan from the Russkies they took and are a bit late in returning, as well as pitting the British against the KGB chief who is on to them by framing him for murdering British agents.
* Big Bad Duumvirate, makes good use of a plane-mounted one during the film's climax.
* Big Bad Duumvirate, or at least as major antagonists. They ultimately turn out to be Decoy Antagonists, and are defeated by the end of the initial story arc.
* Big Bad Duumvirate. Peterson points out that he has a talent for getting out of hopeless situations, and is all for killing him on the spot, but Lakington refuses to give him a quick and simple death, and insists on keeping him alive until they have time to subject him to something painful and drawn-out. Which of course gives Drummond time to escape.
* Big Bad Duumvirate Rod fights him during the second book, Rod is able to hold his own thanks to his training with Tar Gibbons, but as he points out in the narration, Smorkus Flinders' sheer size and strength still allow him to pose a threat.
* Big Bad Duumvirate Russian general, and an Afghan smuggler and prince living in India, respectively.
* Big Bad Duumvirate season 3, claims that he invented daylight savings time.
* Big Bad Duumvirate, specifically because they're bad for public relations.
* Big Bad Duumvirate: There's two Big Bads working together! They might not get along, though.
* Big Bad Duumvirate, with one of them, Shendu, acting as the primary antagonist for a good chunk of the show.
* Big Bad Duumvirate, Zartan is the most prominent antagonist and does more to set Cobra's evil plan in motion.
* Big Bad Duumvirate Zenon and Vanica are just members, while Dante is the overall leader.
* Big Bad early in season 2, freeing up the story for Gus to come along as well as creating the storyline of Hank recovering from killing someone (the storyline that he would then carry for the rest of the show).
* Big Bad enjoys being a woman especially after seducing Cade), and a software mogul. Another episode featured a Gua who figured out how to do this to any human. The only thing that gave away his identity was the constant whistling of "London Bridge Is Falling Down".
* Big Bad Ensemble, and part of the Red Room's resurgence in the sequel.
* Big Bad Ensemble in order to ensure Knuckles becomes the new Enerjak.
* Big Bad Ensemble: Multiple Big Bads in the same story, but not necessarily on the same side. They still might not get along.
* Big Bad Ensemble. Needless to say, the lack of a backstory of clear cut motives did not do well with portions of the fandom.
* Big Bad Ensemble: one of the voice actresses had been fired from the show due to her involvement with a cult that had been getting bad press recently; to avoid any

scandal, the series producers removed references to cult-like activity, rewriting Yliaster with a more Sci-Fi origin and a more antagonistic role.
* Big Bad Ensemble. While a lot of the time it softens people up by talking about nice things like the 80s, 90s, and movies of their childhood, it will often let slip its (and the time's) homophobic and racist views. It's never clear whether they are homophobic and racist, but it is definitely nostalgic for a time when it was ok to be.
* Big Bad Ernst Stavro Blofeld have the same birthdate: May 28, 1908. Moreover, Bond and Fleming were both kicked out of Eton after a few terms and served in the Royal Navy in the war.
* Big Bad, even as he became more feral and dangerous throughout the series, which made him all the more terrifying.
* Big Bad. Everything it does is due to boredom and interaction with it gives the sense of talking to a naughty child with no sense of empathy. It does not deliberately hurt people, but it doesn't care if it does.
* Big Bad evil, and the fact that he voluntarily allowed most of his body to be destroyed so he could be fitted with the same kind of implants Cyborg has just showed how far he was willing to go to grab power.
* Big Bad expansion, is a more mundane example, having been built into the supercomputer comprising 99% of Mercury post-Vex conversion.
* Big Bad explodes and Piper winds up pregnant. (In fact, she eventually has two more kids, and the second, at least, is known to be an "accident.")
* Big Bad factions. Some though preferred it this way. Nevertheless, the debates wage on.
* Big Bad falls dead and turns into a skeleton when given back her original face.
* Big Bad feet tall, and casually lifts the Inquisitor one-handed in his first appearance — even if the Inquisitor is Vashoth / "Qunari".
* Big Bad for a reason beyond being a MMA champion. He can kill a lion with his barehand, cut down a tree with a single swing from his spear, and catch an arrow from midair.
* Big Bad for a replacement coin, but he never manages it. The next time Harry sees him, Cassius is an incredibly old and desperate man.
* Big Bad for attempting to create when he should have destroyed. All of which means that yes, there are people out there in the galaxy who are nastier than the Sith.
* Big Bad forces the cooperation of the scientists he kidnapped by holding their wives and children in prison cells.
* Big Bad for him even when he's beating up strangers he has no emotional interest in.
* Big Bad for most of season one, until Grand Moff Tarkin and Darth Vader arrive to outrank him. He perished in battle against Kanan in the season finale so the Ghost Crew could go on to face greater threats.
* Big Bad for the first season. A lot of their scheming, both in "Blood and Sand" and the prequel "Gods of the Arena" is done for love of the other, and they seem to bring out the worst in each other.
* Big Bad fox Dufayel, wears a neat burgundy suit even under the scorching sun of the Mojave Desert.
* Big Bad franchise is largely considered the greatest Lantern, and best warrior, of all time. The only one close to his level of power and skill is his protege, Hal Jordan.
* Big Bad Friend comes into good use during the climax of "My Fair Hatey", when it manages to infuriate Hater enough into breaking down their cell door on Dominator's ship and escaping.
* Big Bad Friend from the academy unhindered while Tsukune and the others were occupied with taking Kuyou down.
* Big Bad Friend: The Big Bad was once such good friends with one of the main characters.
* Big Bad Friend: When the hero's worst enemy turns out to have once been their good friend.

* Big Bad. From some of his rants, it seems that he was locked up because he refused to bow down to humans, who were created in God's image, rather than because he tried to overthrow God (though that does seem to be his goal by the time the events of the game roll around).
* Big Bad. Generally speaking, though, the eye colors of the Bionicle characters were all over the place, especially in the earlier years.
* Big Bad gets rebuilt and seems prepared for a season 2 comeback, when Phil Coulson promptly shoots him with a BFG.
* Big Bad, gleefully mowing down his henchmen all without a shred of remorse.
* Big Bad goes up against just happen to have the ability to shut down his Gift and/or block him from seeing anything useful with it.
* Big Bad, got his name because this (and not, as Manny guessed, because of his stomach). It's the way he dispatches his victims.
* Big Bad grabbed most of it and turned it evil, minimizing magic as a result.
* Big Bad grasp the true form of one of his attacks, as the Badge, which repels electricity-based attacks like PSI Thunder, will reflect the attack back, revealing it to be electrical in nature.
* Big Bad. Guilt for any of this? Zero; he views it as justified because it's for "the good of Sougawa".
* Big Bad Gundams of the first three games (Musha Gundam, Musha Gundam Mk. II and Knight Gundam) are toned down from their boss counterparts when acquired as playable units (though they are still plenty powerful).
* Big Bad half is entirely red, while his human half wears a red outfit with black highlights.
* Big Bad hard to heal and often die from their wounds while being treated. When the time comes to actually fight and kill it, you learn Kujata places the Infirmity debuff on you with every attack — which drastically reduces how effective healing magics are, making it a race against time because your partner's efficiency at healing the grevious blows you take is nearly nullified.
* Big Bad has absorbed one and plans to release its energy and detonate the others in a chain reaction. It's clear what the inspiration was.
* Big Bad, has a collection of unique glass eyes, most of which have special functions, like explosives.
* Big Bad, has an iconic tentacle beard and is considered the galaxy's "worst of the worst".
* Big Bad has Arnage, who wears a bikini top and short shorts and Curren, who wears some revealing outfits from time to time.
* Big Bad has been selling weapons for terrorists for two decades. Now he has a cult that produces suicide bombers who believe that they are in a holy war to help the world to become a paradise, and he plans to sell them for bigger profit.
* Big Bad has doubts an American will kill other Americans, so orders him at gunpoint to kill an American hostage he's had brought from Lebanon. The American refuses — being forced to kill will prove nothing, and he only kills for money. So Gaddafi offers him $25000. The mercenary refuses the pistol he's offered, takes out a knife and castrates, then eviscerates, the hostage. Gaddafi is entirely satisfied.
* Big Bad has, in addition to a rocket launcher, a huge wrist-mounted Gatling gun.
* Big Bad, has one at the end when Copper prevents him from shooting Tod, who saved both their lives only two minutes earlier.
* Big Bad has one of these as a chief minion. Fighting the Wriggling Man isn't advised: colony creatures, he and all the high-level monsters he'll summon are immune to targeted attacks.
* Big Bad, has power over gold with his Devil Fruit powers; one of its applications is to encase his victims in the stuff to petrify them, much like Mr. 3.
* Big Bad, has red eyes. The effect is highlighted by the rest of the strip being mostly in black and white.
* Big Bad, has sadism rounding out of his many, many unpleasant qualities. While torturing captives can get him useful information, he often just does it for fun even when it has no practical purpose, and takes great joy in his victims' agony.

Something that can be traced to his real motivation behind everything, that he wants to completely nullify any life-form that he encounters as it is a reminder that it didn't originate from him and is and will always be beyond his control.
* Big Bad has several options at his disposal to salvage the plot. The players aren't the only ones with access to resurrection spells, after all, and having the villain return as an undead monstrosity is also on the table...
* Big Bad has the ability to absorb the powers and abilities of others, either through simply copying what they do or flat out absorbing them and killing them in the process.
* Big Bad has this kind of effect on others having been able to convert the Seagullls, Cassandra Lang, and the Chimera amongst others.
* Big Bad have an important connection, they're definitely separate people. When Alphonse reunites with Hohenheim, he explains the situation to his father. Hohenheim then asks him if he's sure he wants to tell him, given that the leader of the Homunculi looks just like him. Alphonse is silent for a moment, refusing to back down, and Hohenheim says he's relieved that his son trusts him.
* Big Bad having been shattered into too many pieces to rebuild. Talking is only possible with one of those Stephen Hawking speech programs.
* Big Bad. Hazel in particular has the deepest voice of all the characters.
* Big Bad. He also doesn't try to micromanage his subordinates, giving them more latitude to act and even officially authorizing their actions if those actions benefit the Horde.
* Big Bad, he could just be hypnotising people, but in any case his appearance is kept vague, and he really could be of any race.
* Big Bad. He ends up meeting his end in one special issue that serves as conclusion for that book, which ended on a cliffhanger note.
* Big Bad. He first appears as a flaming skull with a body composed of stars, though later episodes show that he has bony arms as well.
* Big Bad. He got Superman out of the way as the writers often have to do in League stories, but gave him cool stuff to do.
* Big Bad: He has about thirty sons and rules over a region famous for martial arts and full of powerful warriors. His plan? Each of his sons will hire a Ryuu (martial art school), and those Ryuu will fight in the great Unabara Tournament: the heir with the strongest Ryuu will become the new Daimyo, with the members as his vassals.
* Big Bad he has subverted the Trope, and stepped up as the major threat, requiring all the Transformers to unite against him.
* Big Bad he has working under him are mooks. As with Captain Clown, the creators soon discovered they loved having a villain who wasn't flesh-and-blood, solely so they could give him increasing gruesome, over-the-top deaths.
* Big Bad. He just laughs it off in response before the final battle starts.
* Big Bad, he'll walk into melee range least three times and strongly hint on the third one that he's about to wrap it up and execute Sam if you don't take that last chance.
* Big Bad, hence the reason your assailants wait for you in one place instead of chasing you down.
* Big Bad, he now has additional (and numerous) scars all over his body. His father, Heihachi, also sports a large cross-shaped scar on his chest.
* Big Bad. He only survives because of the preternatural healing abilities of lycanthropes.
* Big Bad; her army, and her own power, increase every time someone dies in any universe. The heroes manage to kill her.
* Big Bad. Her smile looks more genuine than it did in her other appearances.
* Big Bad, her strength is too much for any of the protagonists to overcome, so Katakuri is frequently the more direct threat to the protagonists, particularly Luffy, and receives significant development while Big Mom is sidetracked by a food rampage.
* Big Bad. He set himself up behind an elaborate death course to weed out anyone who had no chance of ever defeating him, and waited for someone to bring him death.

As in the Colbey example, he had to fight all-out to get the afterlife he desired... but Jack did manage to beat him.
* Big Bad), he's got a pretty good rep in a lot of areas for not being one of the really violent, icky demons.
* Big Bad He's mostly just wowed by things like e-mails and cellphones.
* Big Bad. He's not just capital E Evil, but also the undercase evil in that he's an unrepentant dick, something that the Author took great pains to explain and note. In fact, Xykon lords it over Redcloak in a master display of mentally subjugating the goblin. About the only change in behavior was that he's become even more sadistic as undead (and even then, that's because there were only two things he enjoyed in life as a hobby. Drinking coffee and hurting things. When the former was gone because he became undead, well, that just left hurting things, especially since being undead means besides losing the ability to taste, no sleep. As he puts it, he devotes 8 hours a day of making magical items and the other 16 doing whatever to occupy his time.) Xykon's evil comes from the fact that he was always an asshole. He just went from being the sort of kid who fries ants with a magnifying glass and tears wings off of flies for kicks and giggles, to an epic-level century-plus old undead Sorcerer, meaning he just has much more power (and a wider selection of targets) for his dickery.
* Big Bad. He's swarmed and bitten so much his movements are slowed, and he screams that they're eating him alive.
* Big Bad He used to be a God of Life, but then fell from grace and dedicated his existence to killing everything.
* Big Bad he wants to rule everything is never gone into in the game itself.
* Big Bad, he was initially seen as a heroic figure when he first arrived on Pandora as well, but his subsequent actions made his nature quite clear to the people of Pandora.
* Big Bad him. He only comes to work for him because with Kristoph's arrest, he's out of a job.
* Big Bad (his chronologically first appearance) to be the result of him being raised by two Gerudo witches.
* Big Bad. His design borrows elements of Lugosi, Christopher Lee and Frank Langella.
* Big Bad; his elder brother was the favorite for being better at everything. Then, in the old King's last moments, he named the younger his successor, due to the old king's insanity. Ecstatic, even knowing the true reason he was chosen, he went to rub it in his older brother's face. Unfortunately, the elder was honestly happy for his younger brother's success. This drove Joseph mad, and he ended up killing his older brother. So begins the tale of the mad king.
* Big Bad, his good side is in control — and it turns out that the main difference between his personalities is that the good one is loyal to Athena and somewhat more restricted about annihilating things.
* Big Bad, Hive, who seeks to turn all humans into Inhumans that he can control.
* Big Bad, however, he's got hair — either for the above-mentioned 'deformity' reason or because his bald head had not yet become famous.
* Big Bad human. Even when we confirm what he looks like under his mask, the fact he can turn his eyes black rather than make them glow and actually deepens his voice rather than make it vibrate makes him unsettling.
* Big Bad; Iba and Yumichika watch over him and are rather comically peeved.
* Big Bad if not for Aizen, because he's the reason why Isshin and Masaki even met in the first place.
* Big Bad. If there's a way to expose eight years old responsibly to these topics, Avatar probably comes closer to it than anything else.
* Big Bad. If there was a way to kill him, none of the other characters found it.
* Big Bad, implements a double gun wielding fighting still with two special guns that fire large bursts of his Flame of Rage. Oh, yes, he can really kill.
* Big Bad impractical? You bet they are, but they're wonderful to look at.
* Big Bad in a club. Probably because an arms dealer isn't likely to invite scrutiny by filing charges against cops, especially with a camera following them.

* Big Bad, in an attempt to convince humanity that they should work together. Since the aliens have spent the entire game trying to brutally subjugate and murder the human race, and the aliens have been observed studying humanity as if they had no idea about our species, the point is pretty easily disproven. And then your soldier blows him up.
* Big Bad in any of this was because Farquaad's deporting all the fairy tale creatures to his swamp ticked him off. Really Nice Job Fixing It, Villain!
* Big Bad in a satisfying way, causing Thorton to snark, "Looks like Marburg's had enough of you, too."
* Big Bad, including a gigantic ice dragon that freezes DK Island in the opening cutscene.
* Big Bad injects two of Tintin's friends with a drug that renders them permanently insane, then forges a letter to the local sanatorium, warning the doctors that the protagonist himself suffers from a delusional disorder. As a result, when the hero brings his allies to the hospital, he is institutionalized in their place.
* Big Bad. Instead of waiting for his advance payment, Vizla goes straight to Belarus and kills the man, finding a target dossier of himself in the man's hotel room. He then calls and gets his down payment, then reveals that he's killed the target just moments ago.
* Big Bad interest in it, including a number of characters that appear on the island.
* Big Bad in the anime.) Whether he planned to do this using magic, technology, or a combination of both was hazy. The plan was ruined completely when the Wicked Avatar, the most powerful of the three Wicked Gods, was defeated.
* Big Bad in the best tradition of Vlad Tepes' victims, atop the Tower of London for all to see.
* Big Bad; in the fifth season, the mechanical eyes on the skull-"face" on the Brain's life-support pod also glow red when the Brain is interfacing with his computers or is just angry.
* Big Bad in the first place. Despite her megalomania all her arguments are fairly justified.
* Big Bad in the forum, in the face with literally infinite power. Everything after that was the forumgoers going completely berserk on the out of character side of the board.
* Big Bad in the kingdom the story focuses on so that the Beasts can reclaim the land the Normans supposedly took from them to use as their own. Keyword is "majority", however.
* Big Bad. In the manga, however, Zoroark chases him off the top of the stadium wall (a much greater height) with illusionary vines, sending him falling to his death.
* Big Bad in the semi-finals, he confronts Pegasus and is disposed of (whether or not he lives varies between adaptation).
* Big Bad in the series. After being defeated she and her followers were all turned into snake people.
* Big Bad in the series, treats InuYasha as little more than an annoyance early in the series. However, as InuYasha gains power and becomes a real threat, Naraku — who is an amalgamation of hundreds of demons — splits off his heart in the form of an infant, which he hides away under the protection of another of his incarnations, making him effectively immortal. The Soul Jar actually decides to take advantage of this and tries to kill him with a super-powerful demon he made. This backfires, as Naraku reabsorbs him and his henchmen so he is no longer immortal, he'll just have to be satisfied with having a body made of diamond and harder-then-diamond plates.
* Big Bad Ira Gaines in only the thirteenth episode of the first season. However, CTU soon learns about a heretofore-unmentioned second assassin who has flown in to kill Senator Palmer.
* Big Bad is a 16th-century despot whose spirit inhabits his portrait.
* Big Bad, is a big-built 'bot. On more than one occasion, Queen Machina's dialogue suggests he has the robot equivalent of high blood pressure.

* Big Bad is about to flee outright, the Reaper shows up. There's some brief banter, where the Kishin calls the Reaper out on his goofiness, to which the Reaper offers some terse explanation and cuts loose. His voice drops to a low growl, his goofy mask takes on a thoroughly pissed off expression (which is actually more effective than his previous "scary face"), he actually starts swearing at the Kishin and shows everyone exactly why he's the boss.
* Big Bad, is a brutal lord who is sexually impotent with willing women. He can only get aroused through sexual brutality, either beating up prostitutes first or else by rape. He discovers this when he rapes heroine Aliena as revenge for her turning him down as a husband. After this, he gets a taste for rape. His wife betrays him in disgust after being on the receiving end of his rather basic attention.
* Big Bad, is absolutely head-over-heels for Kyousuke. This is, in fact, her only motivation, with her becoming involved in each story arc purely for the chance to see him again.
* Big Bad is a deletion program called D-Reaper. Its agents say that it finds human life and attributes such as emotion to be pointless. D-Reaper thinks that both humans and Digimon are menaces and need to be destroyed. Over several conversations, the tamers and their Digimon point out that that humans and digimon have worth and augment each other by working together.
* Big Bad is a lawyer who does not only dabble in criminal undertakings, but who also gets his jollies by donning an all-leather outfit and beating up prostitutes within inches from their life.
* Big Bad is a lich, Xykon. At one point, decoys of him are created by making three other Dem Bones forms of undead and sticking them in his clothes. None of them are mooks though, being intelligent and quite powerful.
* Big Bad is, along with the king, captured by Ganon. Zelda goes on her own adventure to save them both.
* Big Bad is also incorporeal, so it takes over the wheelchair-bound old man heading the corporation which had accidentally released it.
* Big Bad is a non-powered government agent who leads SWAT teams with dart guns. Then again, Sylar's helping them...
* Big Bad" is Archetype Earth: She is a fragment of Arcueid subconscious, and if she wakes up and takes over her host, she can show how utterly powerful Arcueid could have been compared to her usual self, such as casually trying to destroy the world on a whim.
* Big Bad is a serial rapist who also kills his victims, whose activities are investigated by the main character. Unfortunately, he turns out to be her neighbor, and he starts targeting her blind sister.
* Big Bad, is a straight example. His normal outfit is mostly red and black with some gold.
* Big Bad, is a subversion: he's got the girth, the suit, the drawl, and the attitude for this trope down to a 'T', except he's actually a midwesterner from South Dakota. It's very obvious that Dexter and his cowboy hat-wearing cronies were originally meant to be Texan, but for whatever reason this was changed sometime before release.
* Big Bad is a traditional sexual sadist who enjoys beating prostitutes.
* Big Bad is at Vegeta levels on this trope. He's the strongest creature on Earth and he views most other fighters, including his own son Baki, as pathetic amateurs, despite their best efforts and feats, and worthy only of being wrecked by him when he's bored.
* Big Bad is a villainous example. He was a dedicated student of Air Nomad culture who followed a more violent interpretation of its teachings. Then the Harmonic Convergence makes him an airbender. He sees his new power as a gift from the heavens and a sign that his goals are righteous. There's also Otaku, who was an Air Acolyte that devoted himself to Air Nomad philosophy before gaining airbending abilities through Harmonic Convergence.
* Big Bad, is a washed-up priest forced to open a ramen shop to make ends meet. He's still a total prick, though. He charges absurd prices and always serves

extremely spicy mapo tofu regardless of what his customers actually order.
* Big Bad, is a wolf who espouses such views. He is obsessed with the purity and strength of himself and his Rogues and is quick to mock any perceived weakness.
* Big Bad is busy constructing a whole army of robots to conquer the Earth.
* Big Bad is Creon. Creon is also the name of the antagonist in Antigone.
* Big Bad, is definitely more than a little bit loony, particularly as he counts down to launch his plan for global conquest.
* Big Bad is described as being the most beautiful of the gods, with a vanity to match.
* Big Bad, is determined to reinstate the engagement between Syaoran and Meiling by killing Sakura, and is willing to go to any length to do so, having endangered the lives of innocent bystanders, including Sakura's loved ones and friends, on several occasions.
* Big Bad is Earth, coming to harvest all the colonies for replacement parts. Strangely enough, Earth isn't real efficient in their harvesting. Spines come from one world, skin from a different world, there's even planets to be harvested strictly for genitals.
* Big Bad is even named after the composer himself. Also, she arranges meetings with rebellious subordinates during teatime and coolly responds to having a reckless (and unexpected) guest draw a sword on her by asking him how many sugars he wants in his tea.
* Big Bad, is fascinated with Ankh-Morpork, as he sees its culture as more dynamic and adaptable than his own country's. He plans to take it over, and to this end, has an authentic Ankh-Morpork nobleman's costume made, which he likes to try on and admire in the mirror when no one's around. He thinks it would help show the locals who their natural leader is. It doesn't occur to him that the Morporkian masses would look at someone dressed like that and see an insufferable toff they'd like to heave half a brick at, just like it doesn't occur to him to understand the mindset of Agatean peasants.
* Big Bad is holding a Dead Man Switch that will detonate a bomb attached to his hostages if his finger releases the trigger. Hancock takes his hand with him.
* Big Bad is implied to have committed the heinous crime of rape on Talia. Naturally, everyone wants him stone dead.
* Big Bad is, is about finding a way NOT to use it. They succeed, but Lina always accepted that she may have to use the Giga Slave if their plan didn't work.
* Big Bad, is King Gurumes, who's fat because the cursed rubies he's torn up his kingdom to excavate have given him an insatiable appetite... as well as turning him into a giant monster.
* Big Bad, is mentioned to have worked on the Manhattan Project, which was responsible for the very first atomic bombs.
* Big Bad is Minako, the case with the latter is justified since she's the only one of the senshi when they confront Beryl in the manga that regained her memories from their previous life. Everyone else, in both versions, there's no excuse.
* Big Bad is naturally giant, described as being "the size of a planet" by one of his underlings. He is the mastermind behind the villains from all the previous seasons.
* Big Bad isn't". Later editions decided to just sacrifice a little balance and realism to focus on making the adventure fun to play.
* Big Bad is one of these, a pile of limbs, organs, and tentacles fused into a massive being.
* Big Bad is proudly dubbed "The Indefenistrable III". It lives up to its name by not being thrown through a window at any point in the game. Whether its two predecessors lived up to their names is a question left answered.
* Big Bad is reduced to a floating robot skull after the penultimate boss fight, which soon attaches itself to a giant killing machine for the real final battle. To win, you have to reveal his organic heart, kept behind a reinforced steel wall, and smash it.
* Big Bad is responsible — he thinks any other war is pointless).
* Big Bad" is Shrignold the butterfly, but he is just a servant of Malcolm, king of

the Love Cultists.
* Big Bad is the Ancient Lights, a force surviving from the previous universe which is responsible for the belief in astrology in the current universe.
* Big Bad, is the Gestahlian Empire's first Magitek soldier, a human artificially imbued with magic. The process worked, but also drove him completely insane.
* Big Bad, is the most infamous commander of the Garlean Empire's army and a man possessed of a booming bass voice.
* Big Bad, is the only character who's drawn without any light reflections in her eyes.
* Big Bad) is the right thing to do or not. He fights them anyway because they can't prove that ending the Masquerade is important enough to justify screwing over Negi, his students, and the other mages.
* Big Bad, is the younger brother of the gods who founded the Empire of Rokugan. After Fu Lang was corrupted by Jigoku, he sought to kill his surviving siblings and either destroy or corrupt everything they had built.
* Big Bad is this. Coming to the conclusion that the Varelsi threat was inevitable, he saw that the only practical solution for survival would have to be to ally with these cosmic horrors instead. Although this meant betraying everyone else in the universe aiding the Varelsi in their destruction of the remaining universe, he saw this as the most pragmatic option as the objective was worth it. After all, per the Jennerit motto "Any Deed. Any Price."
* Big Bad is this, in order to lull the mice into a false sense of security and thus easier to catch and eat. As he explains to his mooks;
* Big Bad is traditionally decked out in blue armor to Diana's bright reds.
* Big Bad, is very clearly into Daniel and tries to seduce him multiple times. Much of the latter half of the season revolves around Daniel being kidnapped and turned into a Prior so that he can complete a device to wipe the Orii out completely, only he never told any of his friends of this plan, which almost causes things to go south.
* Big Bad is weaker and smaller than the hero but dual-wields his blades with incredible skill.
* Big Bad. It lived only because it was an immortal creature and therefore that simply wasn't enough to kill it.
* Big Bad. It seems when he removed all the sins from himself, he also removed any sense of humor as well.
* Big Bad. It's noted that he still has that eye closed after the axe comes down.
* Big Bad. It's part of the reason why he admires her so much at least, which is saying a lot as the guy is very easy to disappoint and can be quick to disown people.
* Big Bad) It's probably because, unlike the herbivores, the two Carnotaurs are unable to talk.
* Big Bad Jail Scaglietti and four of the Numbers are imprisoned in Orbital Prisons, but they live very comfortably there. Scaglietti even tells that Quattro got a little bit fat, though, the latter claims that she becomes back to normal.
* Big Bad, James Heller, the new protagonist, shares many of the same attributes as Mercer did in the first game, but unlike him retains much of his pre-infection personality.
* "Big Bad John", a 1961 country-pop smash by Jimmy Dean, about an emotionless, quiet loner — all 6-foot-6 and 245 pounds of him — who works in the coal mines. Averted when he comes to the rescue of his fellow miners during a cave in, and sacrifices his life in doing so.
* "Big Bad John" by Jimmy Dean, from 1961. The original A-side was a cover of one of Stuart Hamblein's last drinking songs, "I Won't Go Huntin' With You Jake (But I'll Go On Chasing Women)." In the years since, Dean's cover version has gotten some classic country radio airplay. However, it was — both then and now — the B-side where jockeys and the public found a memorable tale of a miner who sacrifices his own life to save the lives of several hundred of his fellow miners.
* "Big Bad John" by Jimmy Dean: The title character, with at least one murder or

manslaughter in his past, ends up giving his life in saving a group of trapped miners. "At the bottom of this mine lies a helluva man", indeed.
* Big Bad. Justified because he initially uses a lot of external sources of power (the Casket, the Destroyer, the Bifrost, the Tesseract, the Scepter, alien army) which he later stops relying on, and Thor wisens up to his tricks.
* Big Bad Khrima accidentally destroyed a magic crystal, wrecking a sizable part of his fortress, Drecker mentions that Khrima hasn't been heard from in months. Ardam speculates that he might have died in the accident, and wonders if they've seen the last of him. There is a pause, then both heroes burst out laughing.
* Big Bad kills another contestant in the ring, Yin tries to get him killed by his champion so he doesn't loose money, and when that fails, he sets him up to be killed in a different fight, even betting a million dollars that he looses. Of course, when he looses the bet, he just orders his men to kill Billy, his friends, and the man he lost the bet to just do he doesn't loose his money. In the sequel, despite Billy having crushed his ribs, Yin is more interested in manipulating him into becoming his new champion than he is in getting revenge, even doubling the price of viewing when he learns that Billy will die soon.
* Big Bad King Ghidorah. In the rebooted "Heisei" films, Mothra and Battra are initially set up as rivals but they end up working together to beat Godzilla.
* Big Bad, Kingpin, will sometimes use a Psycho For Hire to make a mob hit look like a random killing. Once, it worked — but another time, the Psycho For Hire got carried away, and the whole thing was blown.
* Big Bad, Kizaki, believes in this trope when it comes to robberies. He rules out giving his burglary team guns and equips them with katanas to hold the marks at swordpoint with.
* Big Bad Knives is disgusted by humanity, and feels that the best thing for the universe is for him to exterminate the whole lot before they can spread.
* Big Bad know can't say anything, because it would risk the life of the recruit.
* Big Bad Largo himself provides a classic example. He catches Bond in his pool fighting with one of his men. The mook with him is just about to shoot Bond, but Largo stops him and instead traps Bond in there to be eaten by his sharks. Naturally, Bond uses this to escape.
* Big Bad Later in the manga, once people begin to turn into snails, they quickly end up as a food supply for the other survivors.
* Big Bad (Lawrence Limburger), a recurring villain (Napoleon Brie), one of the invaders responsible for bringing Mars to ruin, their vile leader Lord Camembert, and the occasional Plutarkian agent sent to Earth to aid Limburger or compete against him. Even if a Plutarkian isn't a villain, they are still not a pleasant person at all.
* Big Bad leader, hence one of the reasons why the Revolution and Night Raid want him dead.
* Big Bad leads the eponymous character to end up in this situation, and it's up to the player to figure out a way to escape before the inevitable occurs.
* Big Bad, Legion, is known to be so ancient that it practically made all the prophecies about its own return after it was sealed off. It also manages to gather some of history's finest serial killers under his thrall.
* Big Bad like Gerald with a passion and will fire indiscriminately at them with a gatling gun if they bother him. He lives in a giant cat-carrier — his floor is a sea of cat litter — he frequently grooms in public, and loves batting around stuffed-mice-on-strings.
* Big Bad Link has bodyguards from Khmer(Cambodia), both eunuch-soldiers and professional assassins.
* Big Bad Logan has a goatee, as does his eldest son whenever he's not clean-shaven.
* Big Bad Loki can shield himself from), the extent of Loki's sorcery skills is not fully understood.
* Big Bad, Lord Hikiji, is the only human in the setting. He's only been shown unmasked once, right at the start of the series, and creator Stan Sakai has since said he regrets making him human. (Since that time, barring a couple of brief

flashbacks where he turns up so heavily armored that his species cannot be discerned, the character has only been alluded to.)
* Big Bad made him even hammier and had other characters mock his Void obsession.
* Big Bad. Malekith has nearly destroyed the universe in the past and tries doing it again, using the dark power of the Aether.
* Big Bad, Manfroy is little more than a speedbump—then again, reaching him tends to be the real challenge, as it requires you to rush your way through or past a dozen powerful enemies while Julius is shooting meteors at you.
* Big Bad, many were overjoyed when the game revealed its own sword-wielding, magic-using incarnation of the King of Evil, and decided to buy the game just to play as him.
* Big Bad, Mayor Richard Wilkins III is an immortal dark sorcerer with an ultimate goal of becoming a powerful ancient demon. And he approaches all of this with the demeanor of a 1950s sitcom dad, lists dark rituals on his todo list followed by PTA meetings, thinks minigolf is a cure all for assassins who failed to hit their target, is a germaphobe and will wipe his hands after killing someone, and engages his minions in conversations about their favorite newspaper comics (he prefers Family Circus, his vampire henchman loves Marmaduke, and both look at the assistant mayor with mild disgust when they learn his goto funny is Cathy... keep in mind the scene starts with the mayor casually pulling a Kleenex out of a cabinet that is filled with dark magic paraphernalia and wiping his hands and none of the three bat an eye. One of the few times he actually gets upset, it's when a new minion inadvertently kills a demon that the mayor has to sacrifice a human baby to on a recurring buisness. The minion thinks he'll be happy to be out of the deal only to discover the Mayor is livid: while he doesn't like to make the payment, he ran a campaign on being an honest politician and he hates even the appearance that he's breaking a promise.
* Big Bad — although she didn't use it nearly as often as she could have.
* Big Bad, meaning that by this time, formerly invincible/immortal demons of Meg's rank or sometimes higher would routinely get one-shotted before they can say a full sentence.
* Big Bad, meanwhile, does a pretty good Russian accent as Alexis Drazen.
* Big Bad Mikhail Novakovich is portrayed by Glasgow-born actor Graham McTavish. Likewise, Sergei Behzaev in the same season was acted by Berliner Jürgen Prochnow.
* Big Bad missed, and getting taunted about it by an obnoxious kid that pushes him over into full evil.
* Big Bad mockingly uses this exact term for the relationship between the leads. He's trying to rattle BJ's cage, but at the same time, he's right.
* Big Bad moment and a legitimate claim to having been a good guy at one point—and quickly shows the predilections that make him such an outstanding villain for the rest of the series.
* Big Bad moments even get special camera effects and sounds. He was actually more of a calm and dignified villain at the beginning but it's clear that that's just a mask and one he's not able to keep on for long periods.
* Big Bad Mor'du and how he was given a similar clause. She made a small cauldron for him, which he could use to gain the strength of ten men as he wanted, or he could instead use it to heal the rift he caused within his family. As you can probably guess, he chose the former, slaughtered his brothers, and then his own men either turned on him or fled in fear because they only saw a beast, not their leader. So unlike Merida, he ended up destroying his kingdom due to his wish to change his fate.
* Big Bad movie uses a flying saucer capable of creating tornadoes from underneath to terrorize parts of Japan.
* Big Bad Mr. Benevolent's schemes is to have British explorers melt the Antarctic, by exposing them to London call girls — their embarrassed awkwardness is what's going to melt the ice.
* Big Bad must have people working for him in the US government, but Hal Brognola assures Able Team that all their operations are top secret. Gadgets Schwarz

silently displays a stack of files on previous agents, each labelled TOP SECRET and DISAPPEARED, PRESUMED DEAD.
* Big Bad Naraku, is able to consume other demons to steal their body parts and abilities.
* Big Bad Naraku was to get the human blood she needed to save the life of her mother, Queen Tekkei, who was not only old but also was poisoned after defeating and eating an ogre. Granted, she's not portrayed as sympathetic and the mother is a giant bird youkai, but Abi's devotion to her mother is still noticeable.
* Big Bad narrated in the Gosaku Ota manga episodes). Of course, he represented the stalkerish verison of the trope. Yumiko either didn't notice or pretended she didn't.
* Big Bad near the end of "Vacation Getaway" but returns to wreak more havoc.
* Big Bad negative portrayal of the Qun). It's worth noting that the negative implications had been there since Origins, but this is the first time that they are really in the player's face.
* Big Bad New World Order across the entire planet. To accomplish this, Cross imprisoned the remaining Arks beneath the Earth's crust - where their inhabitants would eventually perish inside their stasis pods when on-board life support systems failed. Then he built the largest, most disciplined military the Wasteland had ever seen. A rather easy task, as the Authority is the only entity that possesses the sufficient resources necessary to field and equip a professional army of armored soldiers with advanced weaponry.
* Big Bad. No matter what anyone says or asks him, he's convinced in his own mind that the peaceful alien is a secret spy looking to destroy the planet.
* Big Bad of Galactus. But even then, Microwave can pretty much hold him down single handedly.
* Big Bad of male prostitutes (as well as a Detroit gangster). He kidnaps boys off the street, tortures and molests them, and then kills them, all as part of a hideous ritual that he can't seem to stop doing. Most of it stems from the utterly horrifying abuse he suffered at the hands of his own father.
* Big Bad of Part 6, Enrico Pucci, decides that heaven is a world where everybody knows their own destiny...and sets out to make it that way.
* Big Bad of Season 3, is revealed to be alive and well by the Season 8 premiere, meaning he wasn't really destroyed when Bloom extinguished his fire.
* Big Bad of Season 3 only as the Sphere-Builders, due to the huge spherical structures that they constructed to create the Delphic Expanse.
* Big Bad of Season 7, demonstrated the ability to absorb the powers of those he kills, but only really used this ability once.
* Big Bad of several characters superpowered evil sides, leading to characters fighting their dark halfs; probably the biggest example being Nanaya Shiki, the evil murderous side of Tohno Shiki from the original VN.
* Big Bad of Shadowns of Amn. Evil by reason of having no soul and a resultant fascination with playing around with innards. Although at one point he was just your regular "driven by overpassionate love and misplaced pride" sort of evil. You could have some understanding for his situation, if he wasn't so smug about his superiority. You WILL hate him.
* Big Bad of SotC) Dr. Methusala may be considered to fall under this trope with his mastery of the 10 equations and ability to radically alter reality, and blur the line between science and magic (then again, SotC treats magic as being answerable to science, just not till it's properly studied).
* Big Bad of that arc is not the Golden Claw but rather Professor Zombie, who learned the Claw's tricks during their time as cellmates.
* Big Bad of that portion of the story, but in this arc acted as a subordinate of Lyon.
* Big Bad of the 14th movie and the universe's designated God of Destruction. Not even Goku can defeat him, even after he briefly becomes a Super Saiyan God. To top it off, not only is his attendant Whis actually his trainer, but he reveals that the other universes have warriors stronger than him or Goku.
* Big Bad of the Chorus Trilogy, dips into this due to events on Chorus in Season

13;
* Big Bad of the decade, Big Boy Caprice. He later explodes in an oil tank trying to kill another person. For a young kid that's pretty twisted.
* Big Bad of the entire series, is pressed for a name. And then cracks. After an agonizing series of pauses and false starts and more pauses and significant looks, the suspect says, "His... name... is...", and suddenly a mysterious lawyer shows up, declares that he's been retained to represent the suspect and that he's advising his client to exercise his right to remain silent.
* Big Bad of the episode tells Pierre over the radio that the Quest team team must not be shot, but must be killed in a way that makes their deaths look like an accident.
* Big Bad of the eponymous second part of the trilogy, definitely counts as an artificial one, since he inhabits and controls most of Castledown.
* Big Bad of the film was defeated; while a ghost and having apparently succeeded in stealing the treasure she spent the entire movie going after, she is forced to "pass on" after being tricked into admitting that she no longer has any unfinished goals.
* Big Bad of the final two seasons, falls into this too by the last episode, being more concerned with destroying the Turtles as payback for them ruining numerous plans of his than his plans for world domination.
* Big Bad of the first film, Lord Farquaad, hopes to marry and swoon Princess Fiona but is ultimately a power-hungry egomaniac who simply seeks to become king. Princess Fiona, for her part, is already in love with Shrek.
* Big Bad of the first mini-arc was the Lizard (who as noted under comics often gets this treatment).
* Big Bad of the first part definitely counts, as he would rather leave his prestigious position as Fleet Admiral, than see the cover up of history's worst criminals just to save face.
* Big Bad of the first season, Gauron, has a deep gash of a scar down one side of his face.
* Big Bad of the first two seasons, and his daughter Ziva was a part of Gibbs' team for the next seven seasons. They were raised from birth to infiltrate Hamas and to be a Mossad assassin, respectively.
* Big Bad of the Grand Line, belonging to the same group as Mihawk (who had curb-stomped Zoro a while earlier). Luffy challenges him... and almost gets killed for it. Crocodile proceeds with his plan, but Luffy turns up again, now knowing Crocodile's weakness... and he almost gets killed again. The third time, Luffy finally manages to defeat the sand-man — who had fought with a poisoned hook. If it weren't for Robin, Luffy would've died anyway.
* Big Bad of the hero as leverage against him in order to make him do the job for him.
* Big Bad of the "Pandemic" two-parter is this to Craig. He believes him to be the only person who can stop him, but Craig doesn't even know him and couldn't care less about foiling him.
* Big Bad of the season, Abaddon, feeds directly off life energy. So how do they kill it? The immortal Captain Jack allows Abaddon to feed off him, but Jack's life energy doesn't run out and Abbadon can't handle it. As it's put in a different episode, a man drinks water, but can drown.
* Big Bad of the season. But she's quickly dispatches mid-season in favor of other threats.
* Big Bad of the season used special chips that contain negative emotions to make Roidmudes evil. In fact, 002/Heart Roidmude was the only one with actual reason to hate humanity.
* Big Bad of the second season, was this, firstly being human remnants, supported by advanced tech, and later transloaded into Insect's brain, again, fused with advanced tech.
* Big Bad of the series and eternally recurring character, is a blue-skinned midget with pointy ears and no nose. It's never stated what he actually is, nobody ever comments upon his appearance and no other beings like him are ever seen.

* Big Bad of the series, is a giant brain in a highly impact-resistant glass casing. After breaking through the shield you still have to fire multiple missiles (regular beams do nothing) directly at her bare grey matter in order to finish her off proving that the transparent casing is clearly for protective reasons only.
* Big Bad of the series, was in love with Elli, Aesop's mother. However, she chose a humpty dumpty, named Frontis, and together, they ran away to Athens.
* Big Bad of the seventh season can take the form of anyone that has died and its true form is only seen a couple of times. Quite lucky that Buffy herself has died twice in the show's continuity, which means that Sarah Michelle Gellar could easily double up and appear as the First when they didn't want to stretch the budget by bringing back old cast members for every episode. Likewise since Spike is technically dead as a vampire, James Marsters could play the First more than once too.
* Big Bad of the Tournament of Heroes and definitely looks the part. He's not above backstabbing enemies in his bid for Princess Brittany's hand and King Alteon's throne, and ultimately has to be defeated by the Hero.
* Big Bad of the Underworld. In the reboot he's more like a Kingpin-figure in his normal form being a petty asshole demonic politician instead of a tyrannical god-like monster.
* Big Bad of the Virtual Nightmare Arc. After being beaten by Seto at the finale of the arc, he refuses to accept defeat and tries to renege on their agreement.
* Big Bad of things he did, with his established character, and if he had stayed in character instead of channeling a Bond villain it might not have seemed so unbelievable.
* Big Bad of this series, has a lot of weird undertones in his behavior.
* Big Bad on Caitlin Snow because of her similarities to his deceased mother (as it's implied the beginning of their relationship was just him seducing her). When Caitlin calls him a monster, he flashes back to his mother doing the same with his father, right before said father killed her. This is why it's so easy for him to give up on her when she rejects him one too many times — it was a shallow attempt at forming a connection by a man who has only ever known hate all his life.
* Big Bad, one of the oldest vampires in existence, and a guy who figures prominently in the past of several other characters, and yet we never learn that much about him.
* Big Bad only because he believes that they are a threat to the planet, so he can build his own shaman-only kingdom. He believes that the Great Spirits possess the power that will help him cleanse the world of all humanity.
* Big Bad, only for his alternate dimension counterpart Robo-Robotnik {Who would later go by the classic alias Dr. Eggman} to finally become the overall main antagonist for the book.
* Big Bad only to be stopped by the Elements Of Harmony, thus utterly dispelling any misgivings the Eternal Herd has about mortal ponies, allowing them to join forces with Equestria against a larger threat instead of trying to destroy both sides on the assumption they're one and the same. And if the Mane 6 fail, then after they are "slowly and painfully" destroyed, she'll play the tyrant to create a scenario that will force the Elements to realize their true potential and ultimately defeat her, allowing Equestria to be ready at last.
* Big Bad on the island to get killed too. Oh, and had their vocal chords cut out.
* Big Bad, on the other hand, remembers every iteration of the cycle and always pushes Chaos into waging war on Cosmos.
* Big Bad, Oogie Boogie is defeated when Jack causes his skin to be pulled off him. What keeps this from being too terrifying is that Oogie is a living sack full of bugs.
* Big Bad orders every third child to be killed upon birth (and by draftees, no less).
* Big Bad orders the construction of in the final arc is actually known as the God Engine, a galaxy-sized device that will destroy all of reality and make its creator a God.
* Big Bad, or what have you, he'll always hijack the spot as the Big Bad later on

in the story somehow.
* Big Bad Owen Shaw had the drug cartel within his pockets, along with the CIA, DEA and numerous terrorist organisations.
* Big Bad, par excellence. He is a brutally pragmatic man, who thinks people should be basically machines and tools to achieve his ends; he tells them what to do and they go do it, and he gets incredibly angry if they disobey or question him, or merely do things he did not expect them to do. He was once a bit more stable, but a disastrous tenure as Elder of a Brotherhood of Steel chapter cracked the shell off the nut. Now he aims to plunder the treasures of the lost Sierra Madre Casino: Noxious lingering gas cloud to wipe the Mojave clean, immaterial death ray-shooting hologram soldiers to kill anyone that tries to intervene, and bomb collars to ensure compliance of whoever survives.
* Big Bad, perhaps fittingly seeing as the film is an homage to the 50's style sci-fi b-movie.
* Big Bad per se. Instead the characters are assumed to be adventurers going on adventure after adventure with no real connection between them, and it makes sense they choose adventures that match their abilities. Being a Tabletop RPG each group is free to play this trope straight, subvert it, avert it, or whatever they choose.
* Big Bad piloting a helicopter with a saw-blade attachment; Bond and Zukovsky manage to fight them off, but the factory is almost completely destroyed in the fight. As the scene ends, Zukovsky can be heard angrily bellowing that "The insurance company is never going to believe this!"
* Big Bad plans to use his evil spiders to dictate terms to earth's government.
* Big Bad plays this trope straight, except for the accent. He even comes from the aptly named Mortvania, Titan's fantasy equivalent of Transylvania.
* Big Bad, plus Angband (whose excavation produced enough refuse and slag to pile into an enormous mountain). Both were filled with vast mines, dungeons, torture chambers, and other... pleasant things.
* Big Bad possess Ocelot he might have access to Ocelots' memories, or that Ocelot might have simply told Liquid when the latter was still alive.
* Big Bad power setting; according to Dresden, legends say when it's used at full power, it can destroy armies and devastate cities. When she wields it during the ensuing Battle of Chicago, it collapses skyscrapers in a single blast.
* Big Bad pulling one of these on Mata Nui, the Bionicle god, by poisoning him and casting him into a deep sleep, allowing him to rule over the Matoran people.
* Big Bad, Raxis rages that his plan is even worse and now boils down to, "Make Game, Trap Players, ???, Players Trapped!!!"
* Big Bad Redcloak that makes it clear that he is far more evil than Redcloak is, and Xykon will have none of Redcloak's attempt at defying him.
* Big Bad refers to this trope by name when you first meet him; "I will not suffer even an unknowing rival." Until that point he'd been hiding his existence and acting through agents, some of which the Inquisition had thwarted.
* Big Bad, Reinhard, is a man said to have been born in the wrong universe and is so unreasonably powerful and has such an overwhelming presence that anyone who faces him can't help but shake in their boots, even those that are honest to goodness monsters themselves. He is just in a different league. Mercurius meanwhile tend to cause a different kind of fear in those same individuals. Instead of a fear based on awe, it is one based on hatred and disgust born from just how odd his entire existance is, like he is detached from the very fabric of reality in both body and spirit.
* Big Bad resided under a Cathedral in the ruins of Los Angeles. The basement levels are especially creepy.
* Big Bad, resulting in a large percentage of people getting a game over on their first run-through, due to being tricked by Phoenix (Part of the plan was to refuse to do something that 99% of players would naturally assume they had to do, thus resulting in them picking the wrong opinion). It turns out he CAN plan things out after all.
* Big Bad revives Ririka's crush and mentor Kanou with an evil soul. This results in Ririka needing to kill him.

* Big Bad. Rocket (sincerely!) laughs at this idea and Gamora agrees, saying that it's "barely a concept".
* Big Bad runs a 'literal' Circus of Fear. Everything in it is geared towards horror. Except for the clown, ironically enough.
* Big Bad said to Devlin in the Zeppelin "You should have died under my knife. Not like this.". Despite Dierker's Devil Luck to survive every ambush and attacks Devlin throws at him throughout the game, ultimately Devlin gets to kill him for good in the ending, showing Dierker can't fight his fate of dying.
* Big Bads arc are often unnaturally large, despite mostly being human.
* Big Bad, Sarevok, shows his villain credentials in the opening when he uses his monstrous strength to crush an adult man's neck one-handed.
* Big Bad Savitar is ultimately revealed to be an evil, future version of Barry Allen. Something present day Barry does not take well.
* Big Bads). Both are far easier to defeat than they should be, but by then the player character can be very tough anyway and it seem they simply haven't kept up.
* Big Bads charm. (Of course, in a show where the heroes consist of two chipmunks and two mice, it's natural that some villainous cats are going to show up.)
* Big Bads, despite the fact that he could have made a very tempting target with his "pants down", so to speak.
* Big Bad season 5. After he is defeated and stripped of his powers, the monarchs of Andros condemn him before asking if Tritannus had anything to say in his defense or had any remorse for what he's done. He replies he's only sorry he didn't kill them all when he had the chance. This results in him banished.
* Big Bad (Sebastian Shaw) is a mutant, as are his followers, so humans don't hold a monopoly on being bastards here.
* Big Bad (seeing a pattern here?). After stowing away on the protagonists' ship, and later hitchhiking with them, the protagonists get tired of her and get her on a plane home
* Big Bad seems to always carry a machine gun with her. And yes, she can shoot it better than any SWAT member. Subverted by the heroine who tries and first fails to shoot the same type of gun. She even asks for a manual after she picked it up.
* Big Bad, Sentinel Prime, has a hatred of all Transformer races that deviate from what he feels is the pure form. The hatred is extended to many like the beast modes, colonists, Camiens, and even to dissident factions like the Decepticons. The pure form is the race of transformers descended from Prima, which is odd as Sentinel Prime himself is a Headmaster, descended from Nexus, and Sentinel's own race of people were hunted into extinction long ago for not fitting that ideal form of Transformer.
* Big Bad series, Ganondorf, resorts to this a few times when in a tight spot.
* Big Bad sexual and passionate relationship with Kail, which is considered normal. In fact, her friends and servants considered it very strange that she waited as long as she did to sleep with him.
* Big Bad's father, and the shared genes made him the only politician capable of giving the speech at all.
* big bads fills this position the most, as unlike Orochimaru and Kira, he specializes almost entirely in physical combat.
* Big Bad's final two seasons is the immortal sadist Prince of Fire, who claims to have existed since the beginning of time, rules a planet where evil souls are reincarnated, tortured and reincarnated again in a never ending cycle and has limited control over whose souls appear where. While the planet Fire does have a heavenly counterpart called Water, Water has no counterpart to Prince. By season 4, Fire and Water are gone, but Prince has reincarnated on Earth, where once again there are no real forces of good to stand in his way.
* Big Bads form that is much smaller, to allow for better fight scenes. Examples include:
* Big Bads for them to actually lay off and entertain the idea of an alliance. While they do become allies, in the end, it still proves that Qunari philosophy isn't actually that compassionate to anyone who isn't Qunari, even if that person is "Basalit-an" (a respected outsider) or even their "kadan" (a close friend or

loved one).
* Big Bads get an episode (or details spread out over several episodes) explaining how they became the villains we know them as:
* Big Bad Shan Yu also qualifies, being a hulking, deep voiced warrior so strong he can hack into stone pillars with his sword.
* Big Bads hard by Saito's in the forehead, and that's not even including Kenshin's attacks...
* Big Bads have lairs, as do some of the less big baddies. Of note is Brother Blood, who keeps a tally on how many secret lairs Cyborg owes him. And Slade, whose lairs are always underground, always dark, and always have some theme.
* Big Bads have this reaction when the final blow is delivered to them.
* Big Bad, she switches from treating them like scum to coddling them in the blink of an eye.
* Big Bad, she was pretty much suckered into the job, as only Inchlings can control the Miracle Mallet that kickstarts the plot.
* Big Bad, she would often greet Mike while making fun of his name, such as: "Oh hi Nike Smelson."
* Big Bad Shishio – masterminds with a vision of the "good old days" who gather together a bunch of unemployed swordsmen to embark on national conquest).
* Big Bad(s) in both Buffy and Angel are taken out in one attack such as The Master, The Judge, The Beast and Jasmine.
* Big Bads is Mannimarco ("the King of Worms") who is an Altmer-turned-Lich.
* Big Bads led to his name being dubbed back to "von Doom" in the final film.
* Big Bad Slippage: The main villain isn't a villain at the start of the story and becomes one over time; they often have tragic and/or sympathetic motives for turning evil.
* Big Bad's main campaign, is leading the remnants of his Promethean Warrior-Servants in tandem with the Covenant remnant against the UNSC, despite there being no plausible means of restoring the Forerunner Ecumene to its ancient glory.
* Big Bad's main cast, despite being somewhere in his fifties, while they were all in their teens. He manages to pull it off pretty well with regards to Clark and Chloe. Hawkman has this with Stargirl, Clark, and Oliver; Perry White has it with Lois.
* Big Bads make people disappear (by disintegrating them), and messing with your memory is their main gimmick — you forget they exist as soon as you look away from them.
* Big Bad smashes her a half-second later before she could process the despair of not dying like she'd hoped.
* Big Bads Namor and Doctor Doom. Naturally, due to the nature of comic books, they proceeded to encounter Mole Man many times afterwards.
* Big Bad snowman. In a movie adaptation "Tabaluga and Leo", it was revealed that Arktos motivations for the conquest of Greenland were because his mother wanted to do it and he wants to do it all for her. He even sheds icy tears.
* Big Bad, so either that plotline was simply dropped or it was a lie.
* Big Bad), so even if you decide to go through with it you don't really lose anything but a bit of dignity.
* Big Bads of 5Ds and Zexal exclaim disbelief at their losses. Bonus points for Don Thousand, whose expression is shown in detail at the moment of astonished realisation.
* Big Bads of the previous eight seasons, the Goa'uld, are a more figurative example. Once a significant number of people stop believing that a particular Goa'uld is a god, it's usually a sign that said Goa'uld is about to lose out.
* Big Bad: Some channels tend to have a concrete overarching threat behind everything:
* Big Bad sorcerer who works his spells through the use of blood magic.
* Big Bad, sought to cover the entire universe in darkness, displaying the ability to fire beams of powerful shadow energy, as well as cover light sources like the Sun with solid darkness.
* Big Bad spends most of the movie quoting Shakespeare, much to McCoy's annoyance.

* Big Bad Spider drives most of the plot in his (eventually personal) pursuit of the main characters.
* Big Bad. Squall, the leader of the team, tells Laguna up-front that the plan is ridiculous, but goes along with it anyway because it's still their best shot.
* Big Bads rarely ever return. The exception is Myotismon, whose soul persisted each time he died and regenerated into a more powerful form. The Digidestined finally manage to permanently kill him by vaporizing his body and then combining the energy of every Digidestined on Earth to blow up his soul.
* Big Bads series, Dr. Kevin Clamely (The Patriarch) and Dr. Hans Volter, engineered the hordes of monstrous specimens the player faces. Clamely in particular ran Horzine, the largest pharmaceutical company in the game's world, and Volter in particular puts medical (mal)practice into his combat style.
* Big Bads series yell out the name of their most hated enemy when defeated in court.
* Big Bad's short story, she is an evil sea witch with purple skin, white hair, and is extremely ugly.
* Big Bad stands out among his men due to being the only Quincy that wears dark clothing; in particular, a dark maroon cloak which he wears over his white uniform. It makes him look like he's permanently enclosed in shadow. It is also very fitting with his dark, ruthless nature as a being who thrives on violence and death to prolong his own life. He commits a brutal slaughter on Seireitei with many Soul Reapers, including Captain-Commander Yamamoto, losing their lives. He cares for his men not as people, but rather as fuel sources to extend his life when their use innevitably expires. It's strongly implied that the reason the Quincies' war with the Shinigami is solely his doing, rather than it being a natural thing for the two sides to do. After absorbing Mimihagi and the Soul King, his body becomes shrouded in darkness that oozes around him, and he forgoes all of the Quincy's "holy" attacks in favor of mauling his opponents with globs of dark energy. In the final battle of the series, he is bisected by Ichigo, but uses The Almighty to revive himself as a living mass of darkness that attempts to swallow all of Seireitei in dark Reiatsu.
* Big Bad started the Crimson Jihad terrorist organisation after he felt that the other terrorist networks he worked for weren't extreme enough for him. His plan involves holding the United States to ransom with nuclear weapons.
* Big Bad starts killing off the majority of the planet's population, since they can just be wished back to life! There are exceptions to this:
* Big Bad status, and Arthas supposedly not so much). However, that caused much more confusion considering previous interviews and scenes stating that Arthas and Ner'zhul were one being (flat out stating that neither persona existed anymore, only one Lich King), and the game itself seemed to contradict it (one quest has the Lich King stating that he used to be a shaman, which would be true for Ner'zhul but not for Arthas).
* Big Bads, teamed up at the end of season 2 in an attempt to take the Omnitrix from Ben. Kevin's betrayal eventually caused the alliance to fail and led to both of them being trapped in the Null Void.
* Big Bads that hunt and kill humanity by a collective of shamans who evolved (devolved?) into the Watchers.
* Big Bads, though there were still silly moments, particularly Zoisite in the Rainbow Crystals mini-arc.
* Big Bad. Still, some of his lines are pure fourth-wall-breaking awesome.
* Big Bad story "Bright Lights", uses shadows stolen from other creatures to power up his own power. When he uses his power he grows weaker until he gets more shadows. When he loses his shadows, he's reduced to an easily capturable puff of smoke.
* Big Bad suffers from degeneration from his indirect prenatal exposure to Jenova cells as one of the subjects of Project G. His desperate attempts to fix this problem bring tragedy to the setting.
* Big Bad suspecting a thing. The rub is that they need the player to appear to be a fearsome pirate so that the whole thing looks like a gang war. For a Republic

player, they decide to embellish the pirate persona's reputation with cannibalism — to the point that the "Red Hulls" supposedly paint their ships with the blood of their literally butchered victims. Thus leading to a surreal moment when the player arrives and the locals' first reaction is to beg not to be eaten for no readily apparent reason.
* Big Bads, while Nerissa augments her innate Guardian powers with learned (or stolen) magic. In a series full of powerfully magical characters, they sit near the top.
* Big Bad take notice. In fact, the fight is broken up because the police are coming.
* Big Bad talking about Travis wanting to "play house" with her makes their relationship seem... off-kilter.
* Big Bad tells his lackey to listen carefully or be fed to his battle dogs.
* Big Bad, Tharn imprisons the Emperor in Oblivion and secretly takes his place.
* Big Bad that Buffy is not safe anywhere, while being self-immolated to ashes by the sun.
* Big Bad that Dante finally understands the severity of what he is dealing with and he can only cry out for Nero to run.
* Big Bad that'll keep his legacy alive for the future generations. He also becomes horribly angry whenever the citizens or Twilight show sympathy towards Celestia and Cadance, refusing to admit there's anything wrong in his thinking.
* Big Bad, the Black Butterfly, for example on the covers of "Aus der Tiefe" and "Weltunter".
* Big Bad. The Damsel in Distress has been that way for centuries and the person who bewitched her died the moment he cast the spell. Link is given his quest by Impa simply because the Birth Mark Of Destiny appeared on his hand. While there are enemies in the game who want to kill Link to resurrect Ganon, they have nothing to do with the actual plot, and the dungeons link must conquer are actually guardians created by the forces of Good to protect the Triforce of Courage. Even at the end of the game, the final confrontation with Shadow Link is a test set up by the old man that guards the Triforce and wants Link to prove that he's overcome his evil side.
* Big Bad: the fear of a rooster call (heralding the sunrise) and the fact that salt burns his flesh like acid.
* Big Bad. The head of one of the biggest corporations in Japan if not the world, he has numerous shadowy dealings ranging from bribery to weapons dealing, which he operates alongside his legitimate operations. And that's not even scratching the surface of what his actual plans are.
* Big Bad (the latter of which is a creepy-circus-themed remix of the classical tune "Flight of the Bumblebee".)
* Big Bad the love of his life. Then, he walks with gentlemanly dignity to his death.
* Big Bad: The main antagonist of the work, who is often in charge of all the lesser evils the heroes confront.
* Big Bad The next scene is Ayuru lying on a bed, naked, on the verge of tears.
* Big Bad: The number one villain, responsible for everything bad that happens in the story.
* Big Bad, the only Borg encountered are small splinter groups and individuals separated from the Collective. The writers eventually settled on the Romulans and Cardassians as the preferred bad guys.
* Big Bad, the Ori, and apparently brainwashed. However he is also planning to get captured by SG-1 so he can takeover one of Earth's star ships and kill the Ori. He even criticizes SG1 for taking too long to capture him and leaving him too little time to execute his plan.
* Big Bad. The role of the plot driver is therefore often taken by another character, who may or may not be working for him:
* Big Bad, the Scarecrow got a new face (after being mangled by Killer Croc in the first game) to go with his new voice and look, which includes pale white eyes and missing lips and most of his nose. In fact, it's actually believed that Scarecrow's

new look is part of the reason that Arkham Knight was giving an M Rating.
* Big Bad The Seraphim really jerks back and forth on this. He is capable of quoting and is an active reference to obscure and unusual aspects of Christian history and mythology, but as Batman points out, he wasn’t even smart enough to use the singular aspect of his title, making it grammatically incorrect. (His title should be “The Seraph”, “The Seraphim” is plural)
* Big Bad, the Witch of Sighs. She's very old, has wrinkled skin, cackles, and eats people.
* Big Bad, they still would not have had any other choice than to awaken Mata Nui to keep the mask from killing the universe.
* Big Bad they tried to make a law that banned all lawyers in their country. Even the sleaziest lawyer isn't going to respect that level of petty hypocrisy.
* Big Bad This is evident when he uses the weapon instead of facing Master Thundering Rhino in a kung fu fight which he knows he cannot win. It's specifically mentioned that Master Thundering Rhino's "Horn Defense" is impervious to any attack, and we see it when he casually blocks all of Shen's thrown knives with his horn. Naturally, Shen's not going to fight fair.
* Big Bad. This led to many of the island's locations being retconned into the names of fallen friends of the village leaders.
* Big Bad, though he more often fails than succeeds at his attempts to be badass.
* Big Bad, though the "hostage" was a bad guy trying to kill the protagonist seconds before.
* Big Bad, though the route is more upfront about someone else working in the background.
* Big Bad threatens Ed while standing too close to his face. Ed calmly tells him afterwards that he needs a Tic-Tac.
* Big Bad threatens to kill his reporting lieutenant with nothing more than a whisper in his voice and a smile on his face.
* Big Bad threw players for a loop by making Wily a completely benign boathouse owner who even helps Mega Man on his quest.
* Big Bad. Through Corprus, the manifestation of Dagoth's will, he is turning Anu's Dream into his own.
* Big Bad times (leading to various forms of monsters eating all his staff members). By the time he gets the process right (by turning himself into a giant cyborg blob, natch) he's gotten it into his head to wipe out humanity and replace it with his own artificially developed species, the Time Splitters.
* Big Bad to a dragon, depending how you look at it) calls guards to arrest Captain Vimes, the guards are reluctant to try to arrest him as he is clearly unarmed and outnumbered.
* Big Bad) to a fine art. The man is seemingly unable to make speeches without making clutching/grasping motions of some sort.
* Big Bad to allow Paul enough time to save the day, having only known to do this because of her visions.
* Big Bad to any of your units that don't get out of the way before it fires.
* Big Bad to attach himself to it. He often had one of his Mooks polishing his legs while using his chair.
* Big Bad to be specific). When someone's blood mixes with hers, they're freed from her spell by glimpsing her true form - which looks like a rotting corpse.
* Big Bad to control people themselves, and is basically the main perspective Conan has to contend with.
* Big Bad to Felicity. While Diaz wasn't really met with open arms, due to the contrived plot twist, he did win back his fans and restored investment in the season as of "The Dragon" when his backstory was revealed and he shows off just how dangerous he could be.
* Big Bad to get to her. Needless to say, he's delusional, and by the end, they are trying to kill each other.
* Big Bad to murder a troublesome S.H.I.E.L.D. official in a company restroom, and (to add insult to injury) scoops up what little remains there are in a paper towel and flushes it down the toilet.

* Big Bad to paint them as Chaos Marines and get the local Imperial forces against them.
* Big Bad towards the end of the story as both character's schemes come to a climactic, and sometimes catastrophic, resolution.
* Big Bad tries to fight Superman off with the armaments of an attack helicopter. The cannon and missile fire is enough to knock Supes around a bit, but ultimately doesn't stop him. Could be legitimately justified as desperation, since the bad guy knows his role in killing/trying to kill several people has just been exposed. Letting Superman haul him in means the death penalty, so that may explain why he keeps the firing button mashed despite nothing working.
* Big Bad tries to make the New York Israeli and Palestinian communities fight each other so he can buy off the neighbourhood and build a mall on top of it. When creating a conflict doesn't work out, they hire a group of neo-nazis to vandalize the neighbourhood.
* Big Bad tries to take Michael with him by bringing the whole building down on their heads and Michael escapes this way.
* Big Bad trope because people want to play as him in many spin-off titles.
* Big Bad, Ulysses, who wants to launch nukes at both the New California Republic and Caesar's Legion, as well as kill the Courier for an incident from their past. With the highest speech check of 100 (90 if strongly allied with a faction) he can be convinced not only to allow you control of the nukes, but he'll also help save you from the ambush he planned for you.
* Big Bad Unlike Takuto, however, he has to use Star Swords connected to two different marks to achieve this, and, again unlike Takuto, is is also very competent with just one sword.
* Big Bad Unluckily for everyone else in series, Djibril's plans always failed, but they usually took thousands of people with them.
* Big Bad used modern-day weaponry instead of bow and arrow, was a girl and evil, and you'd get her.
* Big Bad uses forbidden Human Transmutation and could be seen as a necromancer.
* Big Bad uses one to summon an army of Keres, wraith-like death spirits, which he uses to attack camp.
* Big Bad uses robots, including ones that qualify as Humongous Mecha.
* Big Bad uses several identities in the course of the novel (including "Carl Peterson", the alias by which he is usually known), each so distinct in appearance and body language that a person could meet two of them close together and never realise they were the same person. The hero himself only spots the connection after noticing that they share an unconscious habit when impatient that Peterson himself is not aware of.
* Big Bad: Usually though not always, the hero's closest enemy is usually the main villain of the story.
* Big Bad vampire dad, Herrick, and accidental vampire daughter, Lauren. There's a lot of this trope going around.
* Big Bad variety, as he's the mastermind of a complex scheme to usurp the throne of England via killing and replacing the Mouse Queen and ultimately force everyone in Mousedom to submit to his rule.
* Big Bad via Palantír, saying much the same (except for the aid or thwart me bit).
* Big Bad, Vilgefortz. They're little more than bloodthirsty thugs entrusted with tasks that a respected sorcerer can't be seen sullying his hands with, but they both take savage delight in their cruelties. Rience admits in his first scene, as he's about to torture Dandelion, that he just loves hurting people, and Schirrú goes out of his way to burn a physically deformed man alive just because he wanted to be amused by his screams.
* Big Bad villains. Adventures featuring Lolth or her drow minions typically revel in this trope.
* Big Bad Wannabe bound to his command — and it is in this form in which Garius is finally fought and killed.
* Big Bad Wannabe has him forcing a man to put his leg in a bear-trap because the

man dared to grow weed without his permission. He later captures protagonist Raylan Givens, strings him up from a tree, and tries to beat him to death, gloating the entire time.
* Big Bad Wannabe like Tarrlok, Varrick, or the Earth Queen, meaning that there's never any doubt just who the main antagonist is.
* Big Bad Wannabe's progress despite previously assisting him in monitoring Alice and her clones to gain control of the situation.
* Big Bad Wannabe: The villain isn't as big of a threat as they seem or try to be.
* Big Bad Wannabe with delusions of grandeur. Many episodes have Heloise outsmarting and humiliating Lucius with one of his own misery-making schemes. However, she's happy enough with being Lucius' employee that she will never take Miseryville and Misery Inc. from him.
* Big Bad wants her to dump her boyfriend and hook up with him instead.
* Big Bad wants nothing but this, thinking that life is a mistake and that death is the only way to "free" trapped souls from mortal flesh.
* Big Bad wants revenge but that's a sidenote to their real agenda, turning everyone in the school into babies and repurposing the school as a villain training center.
* Big Bad, WAS a Dyson Sphere. He was the core of the Shadow Star, a world so large it contained its own internal sun.
* Big Bad was a high ranking demon, who doesn't die until the end of season 2.
* Big Bad was Alpha, the human founder of MIB, who merged with an alien artifact that allowed him to absorb the body-parts of aliens into his own, allowing him to cheat death and also resulting in him turning into a rather grotesque patchwork lifeform (with the abilities and attributes of all his alien body parts).
* Big Bad was "Because I'm bigger than you!" Kid-Valmont spends the episode demanding the heroes change him back. They do...and promptly hand him over to Captain Black, at which point Valmont realises the missed opportunity. Then again, as Valmont retained his memories and it was previously revealed in a time travel episode he was already that evil back when he was as young as Wong made him, he wouldn't have changed a lot.
* Big Bad was caused either by one of these or some form of corrupting influence.
* Big Bad was Eobard Thawne/Reverse-Flash, who was able to successfully defeat Barry in their first clashes. However, Thawne's speed is fluctuating and requires constant use of tachyonic technology to keep it stable. He also suffers the drawback of being unable to kill Barry at all, since he needs him to become fast enough to create a breach of the space-time continuum that Thawne can get back home through.
* Big Bad, was obsessed with the mechanics of the body. He lords over the evil machine plane of Phyrexia, where he and his followers used its mechanical wonders to improve ("compleat") their bodies, at the cost of their own humanity. In older sets of the game, artifact creatures (usually machines) are generally unaffected by black spells that destroy creatures.
* Big Bad was pitting all of Metropolis against him, the public demands that Superman present various documents allowing him to fly (e.g. a pilot's license), his Social Security number (proving he pays taxes; which he does, just not as Superman), etc. When he catches a crook, the cops immediately let him go explaining that Supes didn't Mirandize him. Superman points out that the cops are usually the ones to do it.
* Big Bad was really behind the horrific act that gave Don Sebastiano his power base. BUT we also know there's someone behind her. Someone we've never seen except in a concealing cloak...
* big bad was replaced with something much more amiable and respectful, the tone was much less depressing, Xander and Anya were back together, Dawn grew the hell up and Angel made an appearance (the issues with two shows on different networks having been cleared up).
* Big Bad was sealed within Attu island for more than 70,000 years, until an archaeologist accidentally broke the seal enough for him to wake up and began manipulating events remotely, eventually culminating in seizing control of

Dimension Tide and using it to transport himself (and the kaiju) to Equestria.
* Big Bad was the Cluster, robots who look like beetles, roaches, and bees.
* Big Bad was the victim of a witch hunt, which is what made him into the monster he became. You visit his home village later on in the game, and the place still bears the mark of his retaliation.
* Big Bad was this until a bully-induced trauma that cost him an eye, his hair, and a good chunk of his humanity before he'd even hit puberty.
* Big Bad, wears a metal mask that covers his entire face save his eyes and mouth.
* Big Bad, we have Bewear, very fittingly. They both seem cute and innocent, but are actually incredibly dangerous and give people unwanted love that hurts them.
* Big Bad well. This is yet another manifestation of his raging paranoia, the result of him growing up as the hated bastard child of the Imperial royal family whose brothers constantly tried to get rid of.
* Big Bad, were actually secret double agents for the Order (good guys), and would be called into war. The war did happen, but they were never mentioned again.
* Big Bad were AIs that lived on the internet. Their shown origin had them start as "insect-like learning programs" that were put together to "fight for survival of the fittest". They quickly evolved from there.
* Big Bad when his attempts at turning humans docile and apathetic (and thus easier to farm and eat) had a 0.03% chance of other humans becoming rage-filled cannibals, while in another episode he eats an unlucky leviathan who failed to retrieve a package replaced with a borax bomb (the only thing that hurts Leviathans, at least temporarily).
* Big Bad when the hero ends his rant midword. Complete with laconic sarcasm. Though the player can beat said sociopath to the punch if he likes.
* Big Bad when the portal bringing him into Azeroth closed shut. But he isn't gone, and has created Avatars and possessed Medivh since then.
* Big Bad, where it appears as Maaga-Tanozoa, the King Demon Beast of Shadow.
* Big Bad. Which is kind of stupid when you consider that their plan is to resurrect their leader, who hadn't been able to (and can't even be proven to have seriously even tried to) create a peaceful world in his first lifetime, so why did they think he'd do better the second time around?
* Big Bad Which is still perfectly in character, considering that he's insane. And damn creepy while doing so.
* Big Bad. While he doesn't practice blood magic, he does practice Necromancy, which is decidedly less controversial in the setting.
* Big Bad. While he had conquered the majority of the Earth Kingdom, the war was far from over and Zuko said that the Earth people will keep fighting as long as they have hope. The solution? Burn the entire continent, and construct a new Fire Nation upon its ashes. Granted, it was Azula's idea, but still.
* Big Bad who dare to raise serious questions about Evil's plan are blown to smithereens.
* Big Bad who embodies the worst aspects of gym culture like extreme competitiveness.
* Big Bad who has a blanket pardon letter for all crimes past and future from the Governor of Louisiana. They catch him by tricking him into leaving Louisiana.
* Big Bad who has been using him to kill innocent high-schoolers (the “Wooffles”). The girlfriend betrays the player in the "Puppet" and "Innocent Love" endings, by framing him for the massacre and killing him for refusing to carry out the massacre, respectively.
* Big Bad, who has expressed fascination with the moment when someone is about to die.
* Big Bad, who has managed to achieve immortality through a combination of cybernetics and hatred of the Cooper clan.
* Big Bad who is possessing innocent souls forcing them to commit random acts of murder and violence. At one point manages to possess and entire theatre crowd all at once.
* Big Bad, whom he came to regard as a father figure. He is seeking to restore international communism after the fall of the Soviet Union.

* Big Bad who performs torturous experiments on people to turn them into super-powered slaves. He's also played by Ed Skrein, who, in the closing credit sequence, is regarded by the cartoon Deadpool as the "hottest" of the actors.
* Big Bad... whose power he can only use in cutscenes. Gameplay-wise he's just an ordinary mook with a ton of health.
* Big Bad who sets up elaborate and long-running schemes to keep himself from getting bored. And although entertainment isn't the sole purpose — he does genuinely want the payoffs that the schemes will provide — he's appreciative on the very rare occasions when someone manages to best him, because it makes a change from the usual. (It's been explicitly stated that he could kill Jason out of hand any time he felt like, but happens not to feel like it because he wants to see what entertaining thing Jason will do next.)
* Big Bad who specializes in trading with terrorists, established a cult to produce suicide bombers for profit.
* Big Bad, who uses a lot of hunting metaphors when instructing his thugs to kill Kyra.
* Big Bad, who uses his magic to terrorize the land and capture and enslave its citizens.
* Big Bad who wants to return Transformers to their original reproduction method of budding off of each other.
* Big Bad who was responsible for the destruction of their tribe. At least until Kouga is given a wake-up call by his people that he needs to return home to the last survivors and be a proper leader to them.
* Big Bad will make her death look like an "unfortunate kayaking accident'' or an attack from the snake horse.
* Big Bad Wise Guy and whoever he's playing off serves as the Straight Man.
* Big Bad with a head shot. Fortunately, there is a magazine of rifle ammunition conveniently placed on the railing of the balcony from where you need to take that sniper shot, and his may be the only body the player doesn't have to worry about hiding.
* Big Bad with a simple overloaded pulse of energy bigger than its feedback pulse.
* Big Bad with his science experiments into becoming the bigoted sheep that plague the heroes.
* Big Bad with it later. He struggles for a few seconds, then collapses.
* Big Bad with no ambitions of this kind was Glory who just wanted to go home at the cost of the apocalypse (and even then, she only wanted to go back to her home world so that she could rule it).
* Big Bad with regards to Sivana. When Superman confronted him about it, Billy decided to show him his true nature.
* Big Bad. With the help of a brilliant plastic surgeon he gradually has all the deputies of the State Duma kidnapped, murdered and then replaced with identical twins made from his minions.
* Big Bad Wolf has a werewolf that can still retain its human mind, and talks even in werewolf form. Of course, this means nothing when this particular werewolf has the mindset of a serial killer and serial rapist.
* Big Bad Wolf). The Chinese name was later changed to a closer transliteration that averted the Cantonese wordplay.
* Big Bad Wolf werewolf Mitch Toblat, who in his werewolf lines just loves joking about his sadism. In one scene, he rapes a girl in front of her boyfriend, when the boyfriend mentions she's a virgin, Mitch replays "Well she ain't anymore." Then he says "Let's see if you got the balls" before castrating him.
* Big Bad Wolves: Moral Event Horizon in the belief that he was way worse then them.
* Big Bad working for the Decepticons, happy to stay at a lower level in the hierarchy as long as he gets to slaughter as many living beings as he can. Then Megatron tried to rein him in and reserve his power for the final stage of invasions. Overlord refused, and is possibly the only Decepticon deserter who actually scares Megatron.
* Big Bad World where he is offered a highly paid job where he gets a free car,

unlimited funds and is asked by his boss to impregnate his daughter. Cut back to reality, where he is forced to move back in with his parents and finds work on an unpaid graduate programme at his local pub.
* Big Bad. Xiao deliberately kills his mentor and former benefactor in an excruciatingly painful manner, and then goes on a massacre across the martial world to satisfy his sadistic lust.
* Big Bad Ygethmor. Since the Space Marines are Games Workshop's major cash cow, allowing a Xeno race the victory simply would not stand; so they were declared to have achieved enough of their goals in both the planetary and space campaign to be granted the "moral victory"; thus keeping the Imperium in the first two slots, and pushing the Eldar to third.
* Big Bad, Yokai, wears an ankle-length black coat with a prominent collar to help throw off attempts to identify him.
* Big Bad Zorc Necrophades, one of Atem's priests (who resembled Yugi's grandfather) summoned Exodia, a monster who was apparently so powerful (in the anime, his total ATK was infinite), he needed to be split up into five pieces. Even so, Zorc exploited the fact that Exodia needed the priest's life energy to remain manifest, draining that energy in the fight while he remained more than infinite thanks to his power being sustained by the darkness. Zorc's Power truly would have surpassed infinite if he tried to send the universe into shadows.
* Big Bag, primarily consists of puppetry but also has animated segments.
* Big Ball of Violence - A fight scene is obscured by a large cloud of dust or smoke.
* Big Ball of Violence: Characters who get into a quarrel become a ball of smoke with fists and feet repeatedly poking out.
* Big Ball of Violence. No cat was seen before the dust kicked up, and none was seen after.
* Big Ball of Violence: Some fights are funnier when left to the imagination.
* Big Ball of Violence, they wind up just doing insulting "impressions" of each other, until Calvin's mom calls, "Time to come in!" They trudge off, muttering:
* Big Ball of Violence: Two or more people get into a fight and end up appearing as a ball of smoke with fists and feet constantly poking out.
* Big Ball of Violence uses a big cloud of smoke / dust to imply an intense fight going on.
* Big Ball of Violence: When two or more characters get into a fight, they become a ball of smoke with fists and feet repeatedly poking out.
* Big Ball of Violence: When two or more people get into a squabble, they become a huge ball of smoke with fists and feet repeatedly poking out.
* Big Band' lack of faith in the tune's commercial potential, went on to become the first major hit for Shaw and one of the defining records of its era.
* Big Band shows up later as DLC and, while his overall appearance doesn't suggest it, he is in fact built like this: beneath that
* Big Band swing of the 30s and 40s back to the mainstream by infusing them with modern pop elements. The Brian Setzer Orchestra, Big Bad Voodoo Daddy, and the Cherry Poppin' Daddies were the big names in that scene, with the latter's "Zoot Suit Riot" being the biggest commercial hit. The movement fizzled out sometime in the new millennium, but several of the bands are still making music.
* Big Bang Age about Yuuki, too. Both are rather minor characters, though, so the relationship isn't as fleshed out as it could be.
* Big Bang Attack is second only to the Kamehameha in popularity. Operating and looking similar to a Hadoken, the BBA blows away almost anything in Vegeta's vicinity.
* Big Bang Attack it up well after he uses Big Bang against Android 19:
* "Big Bang Backwards" begins with Alloy's helmet's eye hole closing around the frame to form a close-up of his helmet's "face".
* Big Bang Bar are modeled like this, in order to hold locked pinballs in their mouths.
* Big Bang Bar frequently depicts various amusing injuries from its alien patrons, either as they imbibe their various drinks or simply mingle with each other.

* Big Bang Bar has a basic skill shot — shoot the ball into the lit rollover lane. Alternately, soft plunge the ball so it rolls back down to the upper flipper, then shoot the left inner orbit for a Secret Skill Shot.
* Big Bang Bar however, attempts to license or remake the game have (so far) failed to borne fruit.
* Big Bang Bar the animated display for "Get Lucky" shows a four-eyed alien who's suddenly peppered with kisses by various females.
* Big Bang Bar uses the names of the Solar System planets (Mercury, Venus, etc.) to identify bar patron targets... except for Earth, which is named "Pythos" instead.
* Big Bang Bar when the company closed its pinball division, leaving only fourteen prototypes in existence. Then in 2004, Gene Cunningham of Illinois Pinball Inc. announced that he was buying the rights from Capcom to produce a "remake", eventually releasing 191 more machines in 2006.
* Big Bang Bar who dance seductively while suspended in jars filled with bubbling liquid.
* Big Bang Bar who dance while suspended in jars filled with bubbling liquid.
* Big Bang Comics #10, Galahad is hunting an assassin named Headhunter. Having learned that Headhunter will be in a certain hotel room, he crashes in through the window and surprises a couple in bed. He tells the woman to flee and gets in a fight with the man. When the man doesn't recognise the name of one of his victims, Galahad realises he has made a mistake and that Headhunter isn't the man, but rather the woman. Just as he comes to this realisation, the now-clothed Headhunter re-enters the room and fires an arrow at him. The man is actually a local crimeboss who was to be her next target.
* Big Bang Comics. Having had his face mixed with an experimental rubber while planting a bomb at a novelty factory, he can change his appearance like Clayface.
* Big Bang Comics. His assistant points out the annihilator has not been tested, Doomkopf dismisses this, saying he will test it on Frankenstein. The ray backfires and disintegrates Doomkopf, leaving everything else untouched.
* Big Bang Comics is a pastiche of Golden and Silver Age DC, with the artstyle and writing to match.
* Big Bang Comics that eliminated all dissent. The man who would become the Sphinx was a member of the scientific branch of the military and assigned to new worlds for conquest by bridging the dimensional planes. He used the transdimensional equipment to escape to Earth-A and destroyed all records of his experiments to prevent the Memphian Regime from trailing him.
* Big Bang Comics. The aged Dr. Noah Talbot designed a sophisticated robot body as a prosthesis for injured soldiers, but when Nazis came to steal his research he suffered a heart attack and was forced to transfer his own mind into his creation before he died. It wasn't a decision he would regret, even though an oversight in developing the body's artificial "blood" meant it had to be submerged in water once every hour or so.
* Big Bang Comics, the goddess Venus looks maybe 28, and has for thousands of years. For some reason her son Cupid, equally immortal, is white-haired and balding, looking twice his mother's apparent age if not older.
* Big Bang Comics. Ultiman saves both leaders and restores the Monument to its proper place.
* Big Bang Comics version of Superman, but his powers come from a meteor that struck his shuttle when he was an astronaut. Today, he keeps it in a safe in his Secret Citadel, and exposes himself to its rays every now and then to recharge.
* Big Bang Comics versions of the Green Lanterns whose powers are even more directly light-based — different colored beams of light from their prisms have different effects. The Golden Age Beacon had his prism in a mining cap, even.
* Big Bang Comics, whose main hero Optiman has been killed by Super-Doomsday of Earth-45.
* Big Bartholomew in the first season isn't one, as he says he will wrestle for "
* Big Bayou Canot train wreck of 1993 happened because a barge struck a railroad bridge hard enough to distort and displace the tracks, but not hard enough to actually break them, which would have set off warning signals and stopped the

train.
* Big Beautiful Woman, an early paleolithic sculpture of a full-figured woman.
* Big Beautiful Woman: The female subjects of Renaissance art would actually be pretty chubby by today's standards. Fat was a sign of wealth and health back then.
* Big Ben gets a few scratches, but it actually stays up throughout the entire Reaper invasion, as you find out when Shepard lands in London. It's only destroyed if you don't put enough work into the Crucible.
* Big Bill Hell's and an open scam artist with no redeeming features, but he's so blunt and up front about it, not to mention hilariously over the top, it's almost impossible not to laugh at his ad.
* Big Bill Hell's: "Bring your trade! Bring your title! Bring your wife! We'll fuck her!"
* Big Bill Hell's that the cars they sell are total pieces of crap that are prone to breaking down and that the viewer is a massive schmuck for wanting one anyway.
* Big Billy is the least mean of the Gangreen Gang, but also the most destructive because his strength is as huge as his idiocy.
* Big Bird Gets Lost, when they are celebrating Mr. Snuffleupagus's birthday at the end, Maria leads the others in singing "For He's a Jolly Good Fellow."
* Big Bird in Japan, Big Bird picks out what to eat from a restaurant's outside display case. But due to the language barrier, he doesn't understand when the maitre d' tries to tell him the display food is fake and insists on eating it. Or trying to, at least, considering it's inedible.
* Big Bird is sometimes mistaken for a girl, thanks to his high-pitched voice, his lack of
* Big Bird is this in more ways than one. Caroll Spinney initially gave him a deep, hick-like voice due to him being rather dumb. Once the character was retooled to be more innocent and naive, he gave him a much higher voice. During the later years of his life, when he was in his

* big black CD like a friend of his called records) and played it like it was a guitar.
* Big Black is about one contemplating living the rest of their life in a small town in total boredom. Self-immolation is seen as the cure to that boredom.
* Big Blackout, Ducky lets the Navy Yard employees store their lunches in one of the autopsy freezers, since they are connected to the backup generators while the power is out. They are seemingly unbothered by the thought of keeping their food where corpses are normally stored.
* Big Blackout, the largest in North American history, left millions in the Northeastern and Midwestern United States and the Ontario province of Canada without electricity for days (which happened during the US war with Iraq), and caused many to believe that America was under attack.
* Big Black's Roland TR-606 drum machine as a member of the band (as "Roland").
* Big Blonde with bottle of veronal. She buys it but also buys some make-up to make it seem less suspicious, however she notes that the cashier doesn't seem to care either way.
* Big Bloop 1,000 km in length. The Foundation had a spy in the National Oceanic and Atmospheric Administration who tried to prevent the public from learning of the Bloop, but failed.
* Big Blue Ball after the release of their album, and none of its other singles made any other music charts.
* Big Blue Nation (University of Kentucky sports, especially men's basketball).
* Big Boards appear occasionally, often on warships. One episode has an EarthForce general planning an operation on the table form.
* Big Boi and shoegazey glitch-pop was too odd to fit on either the urban or alternative formats. The ones that did listen to it, generally liked it, however.
* Big Boi ends up with his disembodied head being held by a girl while his headless body is seen dancing to his own music in the background in the music video for "

* Big Boi's got involved. Unlike Lil Jon, though, Big Boi was able to take his previously recorded material to another company and get the album a 2010 release: fans agree it was worth the wait.
* Big Boogey Adventure movie also did this when the characters have to paddle through a vortex, briefly turning them into puppets (Billy even lifts up his shirt to reveal a arm underneath causing the others to scream) Grim comments it as "disturbing" once they exit out of it.
* Big Boogey Adventure, The Grim Reaper notes that love makes people do stupid things. Billy then declares that he loves everything...which Grim retorts explains a lot.
* Big Book of War: A fictional book about war, battle tactics, martial code that's often referenced in an offhand manner.
* Big Boo's Haunt upbeat and is meant to be depressing and unsettling in sharp contrast in tone to the rest of the game, hence its name.
* Big Boss, 26 years his senior, is a key plot point for the franchise as a whole.
* Big Boss also has a few names as well. His real name is John, his nickname is Jack, and his former codename is Naked Snake, he is called by some kids of
* Big Boss, and another character comments on the garment's dramatic value.
* Big Boss and Miller lose an arm and a literal arm and leg, respectively, in the aftermath of
* Big Boss combines all types. He is an excellent strategist, very determined, rarely loses his cool and wildly respected. The same can be said for his mentor, The Boss.
* Big Boss developing an obsession with animals at some point is popular to explain the advent of the
* Big Boss dies again in MGS4, along with his comrades Eva and Ocelot. However, given these characters massive popularity, fan theories have cropped up by the hundreds claiming that all three are still alive and well and their supposed 'deaths' were just a way of hiding themselves from the various militaries and governments who want to abuse them.
* Big Boss gets a similar moment when he's managed to return from the dead by
* Big Boss himself is arguably an example of this trope. He decides that he only feels truly alive when he has a gun in his hand and he has someone to shoot at, and so he creates his own Private Military Company where he can make a profit out of war and participate in any conflict he chooses without restrictions from military officials. The arguable part is that despite being a warrior Big Boss still has morals and doesn't fight simply because he can, he won't take missions that he views as corrupt.
* Big Boss, his father, is not any different, being explicitly shown to know Russian and English (the former due to his tutelage under The Boss), and is implied to be fluent in French as well, and at the very
* Big Boss is specifically noted to be so charismatic and attractive he is able to demand undying loyalty even from his enemies with it. His men are repeatedly shown to beg for more when he beats them up.
* Big Bossman before becoming a pro wrestler. During later runs with the company, Bossman was dressed more like police S.W.A.T. personnel but still the same character.
* Big Bossman in a Hell In A Cell match was this. This one wasn't so successful, mostly because they had no real chemistry or feud, so the crowd had nobody to root for, though also because the match was painfully tame compared to other Cell encounters.
* Big Boss Man played it straight as a heel, handcuffing his opponents and beating them with his nightstick.
* Big Bossman regularly used a night stick, including at least once having a "Night Stick On A Pole Match".
* Big Boss Man, so that they entered one after the other. The problem was this same rumble saw two other teams also randomly enter one after the other with nothing of the sort mentioned.
* Big Boss' sons/clones, Solid and Liquid Snake, also fits all types. It wasn't

* "Big Boss", who runs an illegal logging operation in the Amazon and doesn't hesitate to abandon a few environmentalists in the jungle just to cover up his acts.
* big boxing match was directly behind a pillar, so she couldn't see anything.
* Big Boy, a unique Fat Man. Like the Overseer's Guardian, it has the special ability Two Shot: it's slightly less accurate than a normal Fat Man, but every time it fires it launches two mini nukes while only using a single shot. It's also considered both an explosive and a heavy weapon for the purposes of damage bonuses. With even a few ranks of either perk, its damage gets pumped to the point where there will be very few enemies who can withstand a single strike from it.
* Big boy pants "big boy pants" is still around, but now it's just a vague metaphor about growing up.
* Big Bra to Fill has a female character played by an actress who isn't as busty as the character was in the source material.
* Big Bra to Fill: The actress chosen to play a character in the adaptation has smaller breasts.
* Big Brother 7 was a huge shock considering all the housemates had to face the public vote as punishment for Jayne Kitt's rule breaking (Jayne herself was exempt from eviction that week or else it might have been her who was eliminated). Aisleyne and Susie were the favorites to be evicted that week. Even more surprising was that when previously evicted housemates were given a shot to re-enter the house and have one last shot at the final, Nikki received the majority of the public vote. Then she finished in fifth place.
* Big Brother, a common punishment from some veto challenges is to have to wear a costume, often representative of an animal.
* Big Brother and the gauge actually increased whenever one of them got bored and left the room. The contestants figured it out fairly quickly due to several of them taking frequent smoke breaks.
* Big Brother are infamous when it comes to this trope. It begins with a flashback of the performance of the contestants who may or may not leave, then a long philosophical dissertation regarding what the contestants should have learned during that time, then the commercial break, then flashes of the families of those who may leave the competition/win the prize, to THEN declare who leaves or wins. After that, massive hysteria for the rest of the show time.
* Big Brother Attraction: A younger sister is strongly attracted to her older brother.
* Big Brother Attraction: Character feels attracted to their older brother.
* Big Brother Australia Angie has been rather prone to this, falling asleep holding hands with Estelle, and openly exchanging "I love you"s with Layla after they had to take a challenge together in the middle of the night.
* Big Brother because rather than use the time the Internet is down to go out and have some family time away from technology, the family is left panicking at home and with nothing to do, even going as far as to spy on the neighbors using their working Internet.
* Big Brother being introduced where if these twists happen, the game has to balance it out by giving the victimized contestant a lifeline with the Battle-Back Competition.
* Big Brother boyfriend to the bedroom and indulged in foreplay and fondling and then swapped back and scolded them. So hot yet so wrong.
* Big Brother Bullies. There's also the time in "The House That Gave Sucky Treats" where giving Strong Sad a pack of Necco Wafers remind him of his childhood... namely, the time where he was "sick for a year and nearly died" after eating colored chalk.
* Big Brother Bully: An older brother who picks on his younger siblings.
* Big Brother Bully: I love tormenting my little twerp of a brother/sister!
* Big Brother Bully jealous of his younger brother's talent for dancing and the eventual approval of their hard-nosed widowed father and ultimately breaks his foot with the crutch he had been using all episode long due to a debilitating football

injury then beating him to death with it.
* Big Brother Bully: The younger sibling who is getting abused by their older sibling is most likely to be a child.
* Big Brother Bully when the Critic is alive/sober/lucid, he'll always show how much he cares when nobody else is around.
* Big Brother Canada. Topaz has been one of Gary's closest allies, but when her key is removed from the box, it comes out as a vote for Jillian to win instead. Cue Topaz interrupting the votes to insist that there must be a mistake or that someone must have tampered with her vote. After a commercial break to review the footage, production decides that Topaz indeed accidentally voted for Jillian to win and that her vote would stand. The kicker? That single vote determined the winner.
* Big Brother, certainly in the UK (until 2007 or 2008 at least). They've stopped counting how many years its run. To those that dislike it it is difficult to remember a time it was not on and so ever present. It returned in 2011 and it got the same amount of attention it got in its original run.
* Big Brother competitions, specifically so they can either keep the nominees the same or "backdoor" someone.
* Big Brother final competition required players to survive hanging on "candy apples" in one of these.
* Big Brother had a set of twins pretend to be one person. One twin would spend some time in the house while the other would be in his own room with books and TV and such. At any time Big Brother felt like, they would swap over, with only a couple of minutes to update each other on what was happening in the house. They managed to keep it up for two or three weeks until one of the twins cut himself in an accident.
* Big Brother had the cameras tilted towards Jessie a lot. Partly because he showed off a lot; but once Jeff and Jordan became the houseguests everyone was rooting for, the cameras (As well as the game) slanted towards Jeff and Jordan.
* Big Brother Instinct: A character acts defensive towards an innocent character as though they are their sibling (or are).
* Big Brother Instinct: An older sibling who will do anything to protect their younger sibling(s).
* Big Brother Instinct: You harm one hair on my sibling's head and I'll gut you like a fish!
* Big Brother: in the middle of the night, housemate Ben said, "Where's the chicken?" When his fellow housemates responded with "Huh?" he elaborated, "The last chicken?" Upon their further confusion, he insisted, "Chicken! You know..." and started making chicken noises. That's when they realised he was sleep-talking.
* Big Brother in the US version in Season 16. Victoria Rafaeli took a cosmetic knife to the pink cap Zach Rance had not returned to her after borrowing it in the house and wearing it so often it was like he stole it. After spending most of the season bickering with him, Victoria finally decided to punish him, sacrificing her own hat in the process. He assumed the hat just went missing and gave up on finding it after a period of frustration. When he was evicted from the house, Victoria taunted Zach with the shredded hat in her goodbye message. However, the Jury presented him with a brand new pink hat of his very own during his birthday at the Jury House as a gift.
* Big Brother inundated affiliate WWL with calls when the station broke away to alert viewers to take cover.
* Big Brother is a reality TV series condemned by almost all TV critics worldwide in all countries, yet had some of the highest viewerships of all time.
* Big Brother Is Employing You: A character, up to and including the protagonist, works for the dystopian government.
* Big Brother is involved in making yourself appear much less of a threat than you actually are. Naturally this leads to a lot of sitting around and letting someone else strategize, so that they make themselves appear to be the threat, not you. Maggie Ausburn won her season for this reason.
* Big Brother Is Watching: If we gain enough institutional power to invoke this, we will. Anything from a camera or a minder on you to constant monitoring of all

behavior.
* Big Brother Is Watching: Mass surveillance of the general population by state security forces.
* Big Brother Is Watching This Index (government (civilian/military) intelligence agencies)
* Big Brother Jake features fitness personality Jake Steinfeld as Jake Rosner.
* Big Brother level of control the government has, and in the invasion of privacy advocated by suggesting a thorough background search on anyone who is a foreigner or has spent too much time on the net. Thus, it's rather shocking how close this came to actual suggestions put out shortly after 9/11 for 'how to spot a terrorist'. What are you supposed to think when your own government is now repeating word-for-word the dystopian messages we're told to watch out for?
* Big Brother Mentor: An older brother who teaches his younger siblings what he feels they need to know to prepare them for life.
* Big Brother Mentor has overtones of this going the other way around, but the words aren't actually said.
* Big Brother Mentor — most male harems include a big brother type; expect the heroine to worry that he only sees her as a younger sister.
* Big Brother Mentor plushies, pandas, baby!Japan or anything else he thinks is cute, can easily cause him to dissolve into bubbly giddiness.
* Big Brother Mentor Roberto Hongo and Tsubasa's mother Natsuko also have a relationship like this.
* Big Brother Mentor were throwing her out of the house for being a delinquent and bringing them bad rep. Katsuya then took Kyoko into his home, they married and their daughter Tohru was born.
* Big Brother newbies instead of only Adam and Dominic. Porsche, Kalia, Lawon, Shelly, Cassi, Keith. Don't know who they are? Well you're not alone - the editors have completely forgotten about Porsche, Kalia, Lawon, and Shelly while Keith and Cassi only got screentime when they were evicted. To sum up the editors' preference:
* Big Brother. Not particularly cool as a chair, but very definitely shorthand for "Draaaaaaaa-mah! is about to occur!"
* Big Brother of the network holding Big Brother's broadcasting rights in Brazil.
* Big Brother: On the first morning of the first season, one of the participants walked into the living room and found two of the others (opposite sex) sleeping on the couch, tightly embraced. They later denied the whole thing.
* Big Brother: Reality TV example: In the Australian Big Brother house, a pair of twins posed as one housemate and would swap in and out at Big Bro's command. This happened in two seasons of the American version as well.
* Big Brother, the contestants had to write a song about their time in the house. The song ended up revolving around this trope.
* Big Brother, the housemates were given a task of pointlessly standing in a line; the last to leave their post would win a prize. The final two housemates finally decided to resolve the deadlock by drawing straws. There were many other occasions when housemates were made to do this, perhaps to decide who would be "head of the house" for a week.
* Big Brother, there'd be one or two people punished a season for discussing nominations, which is against the rules.
* Big Brother: The show premiered in the Netherlands in 1999. While the original version has ended, several international versions continue to air and would belong here.
* Big Brother. This is actually rather sad seeing that the novel warns against a society where government surveillance on people is total, while this TV show exploited this concept.
* Big Brother UK had the text R.I.P. on a black background. Rather than an 'I', the show's logo was used in its place.
* Big Brother was thought to be the last ever at the time, and was promoted as a grand finale to the franchise. What it ended up being about was nothing but the showmance between Josie and John James. It took up most of the screentime, with

hours of them just sat under a duvet, and their fans multivoted to evict everyone who wasn't sucking up to them or even who just looked at them the wrong way, leaving a very hollow series. And, surprise surprise, they weren't together much longer after the series had ended.
* Big Brother - which required the houseguest in question to eat every piece of food on a plate that was "delivered", which of course was ham. However, Faysal (a muslim) chose that punishment, so in place of ham, he was given a vegetarian substitute.
* Big Brother Wiki, including both the North American and international versions of the show.
* Big Brother Worship (A younger sibling who really, really admires their older brother or sister)
* big-budget live-action adaptation hit the big screen in Japan back in December 2010.
* Big-budget, theatrical superhero movies have risen and fallen several times. The 1940s and '50s saw
* Big, Bulky Bomb when the explosive device is really big (regardless of the actual explosion).
* Big Bullet have a scene where the protagonist, Police Sergeant Bill, and a team of his detectives transports a powerful criminal mastermind called The Professor on an elevator. The Professor may be handcuffed, but Bill and his colleagues are well-aware they're escorting a dangerous killing machine who had murdered dozens of people without batting an eye.
* Big Bullet: The rookie cop, Apple, sweats a lot whenever she's nervous, and in the climax of the movie with her trying to prevent a hijacked plane from taking off, she is practically drenched in her own sweat.
* Big Bunny, where her husband Peter Merryman (who voiced Big Bunny) voices the male children. On the other side of the coin, Peter Merryman voiced Mrs. Minty, and quite convincingly too.
* big burly bare-chested boisterous Australian who runs around beating people up, fire-bombs hippies, kills endangered wildlife with his bare hands, pushes around his employees, jumps out of flying airplanes (while beating up "evil-doers"), and in general is as self-centered as you can be. Also, he promotes his manly deeds by appearing as the titular character in self-published Saxton Hale comics he sells.
* Big Business (1988). Their sisters, another pair of separated/misplaced twins (played by Lily Tomlin) also dress similarly to each other.
* Big Business and Lily Tomlin as two mixed-sets of twins. The two characters played by Tomlin are both called Rose, those played by Midler Sadie.
* Big Business has the same explanation concerning twins played by Bette Midler and Lily Tomlin.
* Big Business is premised by the idea that two mothers each give birth to identical twin girls, and one twin from each set is unknowingly replaced with the other, so instead of two sets of twins, there is the same pair of sisters in two different families. One pair is raised in a small town, and the other by a rich family in New York City. The conflict comes when the rich sisters try to destroy the small town whether the other sisters live, causing the pairs to finally meet. They're frequently mistaken for and impersonate each other, aided by the fact they even have the same first names (thanks to the father of the poor twins, who has a huge family already and thus is desperate for ideas, overhearing the names the rich father gives his daughters).
* Big Business plays this for hilarious effect. Stan and Ollie are trying to sell Christmas trees door-to-door. They wind up irritating a homeowner so much that he cuts up their tree. Stan then cuts up the homeowner's doorjamb. This leads to an escalating war of destruction in which Stan and Ollie wreck the homeowner's bungalow, while he in turn annihilates their car.
* Big Business slipping an exploding cigar to the antagonist that just wrecked their car (of course, they did wreck his house).
* Bigby, but it becomes clear that both of them aren't half the man Bigby is. And could never be the hero in Snow White's eyes.

* Bigby comments once on his general apathy towards being discovered.
* Bigby Wolf and Frau Totenkinder's, Bigby is less of a controversial political mouthpiece.
* Bigby Wolf is averted,) causing Snow to give birth to six children capable of shifting between wolf and human forms and flying, plus a seventh who is a sentient gust of wind with no physical form. The flying and wind powers are a variation of Bigby's "huff-and-puff", which he got because he's the lupine version of this trope; his mother was a normal wolf and his father was the god-like, shapeshifting North Wind.
* Big cats are often drawn with vertical pupils like their smaller relatives, instead of the round pupils they have in real life.
* big cats tend to be at their most active at night, which is also when our human day-adapted vision renders us at our most blind, helpless, and disoriented. By comparison, for a leopard even the darkest nights are often no darker than a slightly overcast day for them. It was only in recent centuries that humans gained access to lights that extended past the short radius of a campfire or torch.
* Big Chuck & Li'l John: In a comedy skit on the local Cleveland comedy show, Chuck calls John on the phone and has him running in a frantic search around the house to find a pen so he can write down a phone number. When John finds a pen John delivers the phone number he can call back on: it's 555-5555.
* Big Chuck & Li'l John Show there is a skit where the wife of a man named Stanley gets a phone call for him. After looking around the house she decided to flush the toilet. Stanley can be heard screaming in the shower to which she tells the caller "He's in the shower. He'll call you back."
* Big City Adventure 2: Sydney ask this so often during the 15-hour plane trip that their parents and grandparents finally shout "NO!"
* Big City Adventure 3: New York, a poster in St. Mark's Place advertising "accurate psychic readings" gives the number 212-555-1234.
* Big City (a satire of american preteen shows) features Liam Youngs, an 8-year-old kid who has a huge crush on his older sister's friend, Mia Sanders who's 16. In one episode, Liam tricks Mia into going on a date with him.
* Big City Greens and jumps at him to interfere, but one of the bouncers holds him back by an arm and tosses him to Bill.
* Big City Greens, and to ensure his family takes it without having to pay anything, he replaces Bill's money with "Cricket Bucks", which are worthless. Of course, it goes horribly wrong.
* Big City Greens, a prominent aspect of Bill's design is that he lost half of his right index finger in a hay baler accident.
* Big City Greens", as he has a hard time reading and paying attention because he has an overstimulated brain, and he claims that being quiet is the hardest thing he can ever do and is constantly distracted.
* Big City Greens as they only end up flooding the bathroom and totally wrecking it in the process. They manage to fix everything before Gramma returns, but Bill only ends up returning the bathroom to its previous state.
* Big City Greens at a street festival...while the viewers are stuck staring at the Greens' now-empty living room.
* Big City Greens: Chris Houghton, the voice of Cricket, cried real tears during the scene in "Phoenix Rises" when Cricket thinks Phoenix is gone for good.
* Big City Greens Chris Houghton voices Cricket, while his brother Shane, the other creator, voices various minor characters. Niki is voiced by series director Monica Ray.
* Big City Greens: Cricket and his girlfriend Gabriella are only ten, but that does not stop them from being a couple.
* Big City Greens: Cricket Green and Gabriella Espinosa begin dating since the events of "Gabriella's Fella".
* Big City Greens: Cricket's girlfriend Gabriella is about half a head taller than he is, around the same height as Tilly.
* Big City Greens, despite some differences in personality, get along just fine and Bill seemed to be happy when she finally returned from prison.

* Big City Greens episode "Family Legacy"; every generation, the Greens' farmhouse faces some sort of disaster or faulty that results in it about to be sold, demolished, etc. To stop this, the kids have to convince their adult guardians to not give up. They then place a key artifact into a suitcase buried in the backyard for their future members to find and gain hope to keep the farm's legacy alive. This becomes a major plot point in "Chipocalypse Now", where all of Elkins Street is being demolished by Chip Whistler and the Greens have to fight for what's right once more before they lose their legacy forever.
* Big City Greens episode "Gabriella's Fella", Cricket catches up to Gabriella on the bus and reveals his feelings for her; she reveals her feelings for him as well, and they happily become a couple.
* Big City Greens episode "Sleepover Sisters", Tilly Green and her friend Andromeda attempt to develop this by staying up all night after believing a news article on such.
* Big City Greens episode "Swimming Fool", Cricket spends most of the episode attempting to go on the hi-dive only to find he's too scared when he up there every time. Ultimately, he learns to face his fear and does leap off the diving board in the end.
* Big City Greens episode "Uncaged". Cricket, Tilly and Nancy are under arrest for releasing the animals from the zoo even though they got them back in their cages by the time the police show up; Nancy willingly decides to take the blame for it so the kids can be let off. Not even bearing to see their mom go back to jail after being released, Cricket and Tilly admit they released the animals so they can be more like Nancy, and turn themselves in. Nancy understands what they did and they embrace, causing Officer Keys to be in tears and lets them all go.
* Big City Greens episode "Welcome Home", Cricket tries to talk to a person on the subway only to find that it's actually several rats bundled together in a hoodie, and is understandably horrified.
* Big City Greens features an episode in which Cricket tries to sneak into a movie for an older audience, namely Kiss of Death. Believing it to be an action movie about a skeleton on a quest for revenge, he is thrilled when his plan succeeds. The happiness is short-lived. Kiss of Death is essentially about a woman with severe necrophilia.
* Big City Greens gives us Alexander and Terry, two young adult men living in the same apartment and are rarely ever seen apart. While Terry does not show any signs of gay behavior, Alexander has a rather effiminite voice.
* Big City Greens, giving flowers, and smooching all the time. After she leaves for her vacation to Montreal, Cricket instantly tells Remy and Vasquez the good news. This is further exampled in "Date Night" when they just want to have a night at the movies, but Bill takes them to a romantic rich sky restaurant which they obviously don't find fun.
* Big City Greens: Gramma Alice Green has a prosthetic right leg. She sometimes unscrews it to use it as a tool/weapon or to gain some sort of advantage.
* Big City Greens has Cricket Green (a country boy of about 7-9 years old) and Gloria (a barista in her early twenties).
* Big City Greens has the Halloween blood moon, which rises in a random amount of years. According to Gramma Alice, it ignites a curse that has been in many farmer generations: once the moon rises, it turns the farm animals into man-eating zombies and causes the Greens to stay in their house, which ruins their first Halloween in the city.
* Big City Greens. He discovers she's a troublemaking prankster like he is, due to both sharing a similar incident, causing them to immediately hit it off with each other, and eventually begin dating as well.
* Big City Greens: In "Breaking News", the news crew covering Bill's watermelon say there's nothing else happening. At that moment, a car speeds by chased by police, the driver yelling "I just robbed a bank!" The crew ignore it completely.
* Big City Greens: In "Raccooned", after the Greens are kicked out of their own house by the raccoons and Cricket and Bill argue once again, Gramma has had enough of it and screams "SHUT UP!" to stop them and call them out.

* Big City Greens: In the climax of "Coffee Quest", Chip Whistler tries to persuade Gloria into working with him at Wholesome Foods, because city people should stick together. Naturally, she refuses on account of she isn't from the city like Cricket, but from the suburbs.
* Big City Greens: In the episode "Hiya Henry", Cricket is irked when Tilly finds Gramma Alice's old ventriloquist dummy, Hiya Henry, to use in her act for Big Coffee's open mic. Cricket spends the whole episode being tormented by Henry, and doesn't tell Tilly or anyone else because he thinks it would hurt her feelings. When Tilly's act begins, he cannot take it anymore and destroys Henry onstage, which in return hurts Tilly's feelings anyway because he ruined her performance without telling her.
* Big City Greens: In the episode "Hiya Henry", Tilly finds Gramma's old ventriloquist dummy Hiya Henry, and Cricket is completely and utterly freaked out by it.
* Big City Greens: In "Welcome Home" as the Greens are being chased by vicious guard dogs at a towyard, Tilly spots a playground slide and plays with it.
* Big City Greens is very supportive of her younger brother Cricket and often provides him with advice or joins him on his misadventures.
* Big City Greens movie, but Bill chooses that moment to play a sappy love song on the radio, which drowns out Cricket's talking. He tries to turn it off, but every time Bill turns it back on.
* Big City Greens paying visits to the Green house, especially after Cricket helped him stand up to his parents. He also seems to be the only member of Cricket and Tilly's friendship circle who visits their house frequently.
* Big City Greens she will ban them for good if they make even one sound, even talking and whispering; to get around this, Tilly suggests they use sign language and charades whenever they need to talk. From this point, there is mostly no spoken dialogue, with most of it played out through their thoughts usually translating their sign language.
* Big City Greens, "Space Chicken/Steak Night" came out on the Disney Channel YouTube channel on June 8, 2018, while its TV debut was on June 18.
* Big City Greens subverts the trope. Tilly is happy to invite her doting, eager father to her genteel tea party. But Bill ruins it by sitting on one of Tilly's favorite dolls, flattening it. When he realizes what he's done, he gets up, and shatters the tea set in his flustered stumbling around. The coup de grace comes when he tries to make amends: he bends to pick up the broken tea set and farts. A traumatized Tilly declares the tea party over.
* Big City Greens thanks to Tilly suggesting they use sign language whenever they need to speak, and there is very little onscreen speaking until they leave the library in the end.
* Big City Greens the animals, prompting them to turn to their mom for help.
* Big City Greens: The episode "Chipocalypse Now" has Cricket discover Chip Whistler issued a petition which the residents of Big City seemingly signed signifying they want the Greens out of the city, making Cricket think everyone hates them. When he goes to confront Remy, one of the suspects, he claims he never betrayed Cricket once and didn't sign any petition; it is that moment Cricket comes to the conclusion Chip lied and the petition is a fraud.
* Big City Greens: The episode "Friend Con" has the Greens discover Chip is still evil since his promotion to CEO of Wholesome Foods. Of course, if the audience had seen the ending of "Reckoning Ball" to begin with, they knew all along.
* Big City Greens the Greens because of it, but stops before he finishes the word "Greens" and replaces it with "a work problem", because he's trying to keep his vendetta a secret from his father who is unaware he lied to him.
* Big City Greens. Their uncanny resemblance is what mistakes one for the other and vice versa.
* Big City Greens: The number to call Don & Dawn Realtors is 555-0192.
* Big City Greens: The song is sung in full at Remy's birthday in "Present Tense", but missing the third line.
* Big City Greens: Tilly and Andromeda tried to develop this power in "Sleepover

Sisters".
* Big City Greens, Tilly's was done in the style of an old cartoon, Gramma's was done in the style of old European stories, and Bill's was in a stick figure style that eventually gets the styles of the others' stories in the end.
* Big City Greens. To make matters worse, 2019 and 2020 currently tie for the fewest episode premieres with 15 each.
* BigCloset. Many stories are novel-length, and the writing quality is generally better.
* big comfortable with at all - Peg. And worse, while she does promise to spare him if his family admits that they need him, she cruelly mocks him the whole time, telling him about terrible fates waiting for him in the afterlife, then adding "maybe" to the end, just to keep him guessing. She does keep her word after Al wins the bet, but still manages to make one last jab before she leaves, saying she'll be back the day after he wins the lottery (adding "maybe" to the end once again).
* Big creatures. Normally they don't come out until you're dead. Shards of Alara made an exception, with Naya's "five-power matters" rule. Also, Rise of the Eldrazi again.
* Big Creepy-Crawlies tends to prevent insects and arachnids from growing to an enormous size.
* Big Daddies, as well as Spider Splicers that avoided attacks by dancing on the ceiling. Later in the games, elite versions of Big Daddies can be found; they are stronger, faster, and tougher than regular Big Daddies.
* Big Daddies move much slower when you are not looking at them to not only spare you getting drilled from behind by surprise, but also to allow you to easily run away from the buggers if you need to.
* Big Daddy, a boy wets the bed and the dad covers it up with newspapers.
* Big-Daddy, an affinity with swords and expert marksmanship with handguns.
* Big Daddy from "The Simpsons Spinoff Showcase" show "Wiggum P.I." is a classic example.
* Big Daddy. He's played by the half-Jewish, half-Filipino Rob Schneider.
* Big Daddy, this is Sonny's reaction when Julian dances to a sing-along video about a kangaroo.
* Big Daddy V (aka Mabel, aka King Mabel, aka Viscera)'s standard attire consisted of a singlet. This doesn't sound too out of the ordinary, but remember that he was billed at 500 lbs. The singlet did a job of showing off his
* Big Daddy, where Sonny takes a little boy sent to HIS place, not his neighbor's.
* Big Damn Fire Exit: All dangerous situations have a designated exit, no matter how improbable it might be for the situation (i.e. a collapsing Aztec temple just happens to have a fire escape).
* Big Damn Fire Exit: An environment that's falling apart has an improbably perfect route to make a dramatic escape.
* Big Damn Fire Exit: Is the building being destroyed around you? There'll always be a fireproof/destructionproof pathway you can escape through!
* Big Damn Heroes, as they save Kup and Hot Rod from being devoured by lots of sharkticons.
* Big Damn Heroes ends in disaster when the occupational forces turn out to be a lot more numerous than expected, and all but one rescuers are killed.
* Big Damn Heroes from the gas chamber complete with snappy one-liners.
* Big Damn Heroes, has to get rescued from Niska. He was cracking jokes while getting metal pushed under his skin (not to mention all the dying and resuscitation).
* Big Damn Heroes. His sudden ground-shaking landing caused other players nearby to wonder if a special game event was in progress.
* Big Damn Heroes), is a tradition hearkening back to the days when cities were protected by walls with gates that they would lock at night to keep outsiders out. If you had a key to the city, you could come and go as you pleased.
* Big Damn Heroes moment and addresses everyone present by name. He draws a blank on Zennosuke Kurumadani, eventually going with "Imoyama". Zennosuke gets quite annoyed, saying "If you don't know, just say so! Don't try to guess people's

names!!"
* Big Damn Heroes moment and stops the Alpha Pack forcing Derek to kill Boyd.
* Big Damn Heroes moment from his friends is the only thing that saves him from a bullet to the brain.
* Big Damn Heroes moment in "Garden of Bones", wherein he stops Gendry's torture (and by the extension the continued torture of other captives) on the grounds that it is a waste of good workers.
* Big Damn Heroes moment in Volume 2 to rescue Rias from her engagement to Riser is topped by "President Rias Gremory's virginity belongs to me!"
* Big Damn Heroes move to save the protagonists in Hueco Mundo, the level that the match-ups are one-sided is just unbelievable. These also run near-simultaneously with the above "Ants vs. Dragons" fights.
* Big Damn Heroes: The heroes come just in time to save you from your doom.
* Big Damn Heroes: The heroes dramatically save the day at the last moment.
* Big Damn Heroes viewpoint character, but the scene is told from the Alliance's perspective.)
* Big Damn Movie: A film adaptation is more dramatic than the source material.
* Big Damn Movie, being 58 minutes long (1 hour and 3 with credits) and the longest non-Nintendo Switch: X Years In episode.
* Big Damn Movie (though it's somewhat jarring, as both of them have seen each other naked):
* Big Damn Reunion, though, as they were never seen interacting beforehand.
* Big Damn Reunion: Two or more characters reunite, and may or may not share a hug, after being apart for a long time.
* Big Data, features advertisers pitching an ad to the executives of an athletic shoe company. The ad starts out fairly normally, with attractive women jogging while wearing the company's shoes, but then it gets violent.
* Big Day, Becca accidentally drinks Skobo's contacts when they're in a glass of water. Skobo has vision problems for a majority of the episodes until he buys a pair of glasses with the same prescription at a yard sale.
* Big Destiny as well. Despite being a greedy bully, he's entertaining to watch and has some memorable lines.
* "Big" Dick Johnson. Or, as he was known before he was named on-screen (and his counterpart in
* BigDog amount of noise, even with a muffler; it essentially would have made it painfully easy to track a squad's location and would have interfered with communication — while installing a four-stroke engine was out of question because their mass efficiency is significantly worse, and a sufficiently powerful engine would've been just too heavy, defeating the whole purpose of having a "pack mule".
* Big Driver by the eponymous 'Big Driver', Tess turns detective to track him down and extract revenge.
* Big Driver in a drainage pipe by the 'good Samaritan' who stops to help.
* Big Driver: Just before she kills Ramona, Tess turns up the volume on Ramona's stereo to mask the sound of the gunshots.
* Big Driver: Lester raped many women with the help of his mother and brother.
* Big Driver, Lester's mother Ramona and his brother Al are both actively involved in his series of rape/murders.
* Big Driver of her during and after this, along with his many other victims.
* Big Driver: Tess decides not to report her rape and attempted murder, knowing how rape victims often suffer both in the legal system along with the public. Instead, she tracks her rapist down, to kill both him and his accomplices.
* Big Driver, Tess is hallucinating that her GPS is giving her advice about hunting her rapist. Freaking out, she unplugs it, only for the now black screen to apologize.
* Big Driver, Tess's rape and assault takes place in the shell of a abandoned gas station on a remote stretch of country road.
* Big Dumb Body - A host with little intelligence, but is desirable for its physical prowess and durability.

* Big Dumb Body: Someone takes over a big person to use as their new body.
* "Big Ears" (1931) — Wheezer's parents threaten to get a divorce.
* Big Ears cuts off Complains's hand when Complains has a pearl magically stuck to it that's about to explode.
* Big Ears has an axe which is enchanted so it will pass harmlessly through paladins rather than harming them. When the party fight
* Big-Ears is probably the most good-aligned character in the whole comic. If he were human they'd have named a city after him.
* Big Ears is stockier and more visibly muscular (if not particularly taller) than the rest of the goblins. He's a type 2.
* Big Eater a Food-Based Superpower, but by themselves, they're more often used as sight gags than superpowers.
* Big Eater after a bug that caused her to consume more resources than intended.
* Big Eater: A person with an appetite big enough that they're constantly eating large amounts of food.
* Big Eater discovers buried pirate treasure because she was able to smell the food they buried with it. What does she do? Uncover the food and leave the rest of the treasure behind.
* Big Eater eats it and loves it. Afterwards, he even sneaks around and finishes up the portions that everybody else abandoned.
* Big Eater habits but in one episode she enjoys some of Ikuko's home-made treats — and complains when Usagi takes them to share with Rei.
* Big Eater, has made some pretty disturbing concoctions over the long run of the series, enough that an exhaustive listing would be far too long for this wiki. Perhaps the best-known is his "patented space-age out-of-this-world Moon Waffle", which consists of waffle batter, an entire bag of caramels, and Liquid Smoke, served wrapped around an entire stick of butter. He also eats ketchup on his salad, eggnog on cereal (during the 30 sweet noggy days before the government takes it away again), and has made cocktails including rum and zinc, mayonnaise and vodka, and the Flaming Homer (aka the Flaming Moe), made up of the last bits of random liquor plus cough syrup, as well as a pie made of cloves, Tom Collins mix, and a frozen pie crust (although this was too disgusting even for him).
* Big Eater improvised a moment where he swiped food during a funeral. The writers decided that this would mesh well with his backstory of constantly having to live and the move and thus valuing free food wherever he could find it, turning it from a single funny moment to an outright character trait.
* Big Eater in general (due to how his Innocence powers work), though he also loves himself a helping of mitarashi dango from time to time.
* Big Eater Liz Lemon, while at a corporate retreat, announces to Jack that breakfast is complementary while carrying two plates piled with food. They're both for her.
* Big Eater, major fans of anime and manga, and a general dislike of school.
* Big Eater Sylvia go on a diet. As she sits in the kitchen with Fran, Val, and Yetta, the other women start gushing about the various sweets they're eating, like "double-chocolate brownies with cheesecake centers" and cannoli. Poor Sylvia does manage to hold out and even offers to put away a cake that none of the others are eating...only to fake-close the fridge door and rush upstairs with the dessert.
* Big Eater types are talking about their gastronomical adventures. One subverts the game by telling the group about a nice bowl of chicken stew he ate..."And then I ate the bowl!" The ad is for Timmie's stew in a bowl made of bread.
* Big Eater with his life if deprived of his family and hunting. The sex scenes (Dean in "Route 666" and "Heaven and Hell," and Sam in "Heart," "I Know What You Did Last Summer," and "Sex and Violence") show a difference between them too. Sex is fun for Dean; he doesn't mind being pushed down on the bed and letting the woman have her way with him. But for Sam, it's violent, kinky and he has to be the one in control and dominating. Sam and Dean's relationship is a parallel for Michael and Lucifer's, who are ying-yang brothers themselves.
* Big Eater with near super strength, has Gerald, a stereotypical puny bookworm, for a guy pal.

* Big Eater your enemies and potentially learn skills from them. Eat notably doesn't work on human enemies or powerful bosses.
* Big Eden, a story about a middle aged gay man who returns home to take care of his father finding that he also has to deal with his old crush.
* "Big Edie" and "Little Edie" Bouvier Beale, depicted in the documentary film
* Big Ego, Hidden Depths: Just because I'm an egomaniac doesn't mean there isn't more than meets the eye. And that makes me twice as awesome!
* Big E have all had chunks of their names lopped off after debuting, with the prevailing theory being that smaller names are easier to work with from a marketing standpoint (easier to format onto merchandise, etc.).
* Big E Langston: Debuted for FCW in 2010 and WWE in 2012. Member of The New Day.
* Big E Langston so he can play the backstage announcer roll himself, making you realize how eccentric Langston really is.
* Bigend Books, Gareth pronounces it as two separate words — "Big End".
* Bigend Books have an example in the hotel Hollis stays while in London. It's actually several paintings the staff keeps swapping.
* Big ended with this possibility being mentioned, as Tom Hanks' character was returning back to his 13-year-old body, thus ending his romance with Elizabeth Perkins.
* Big Enough is a gloriously cheesy song about two cowboys (Alex Cameron & Kirin J. Callinan) wondering whether or not
* Big enough volcanic eruptions can change the coloration of the sky over the places where the dust travels. The Krakatoa eruption is said to have given a green hue to the sun.
* Big Entrance: Entering a place in the biggest, loudest, and flashiest way imaginable.
* Big Entrance. This backfires when he bursts in on Thea Queen this way and she responds by throwing a handful of broken glass in his face.
* big, especially if the cat was able to establish its dominance while the dog was still a puppy.
* Big Ethel. He's certainly willing to tolerate her presence when food is forthcoming, but it never gets her any closer to a date (unless you count the time it takes him to eat, and considering it's Jughead that can't be very long).
* Big Ethel is on the beach when she reads her horoscope that says she'll meet a pair of stars today. Swooning with anticipation of meeting the likes of
* big expansion set (Legends) was coming out, a rumor was started among the then-nascent Internet about the card "Throat Wolf", a creature which supposedly has "firstest strike". It also was rumored to have the ability to attack on your opponent's turn. Usually guides on how to get the super rare card mention other non-existent cards, like the Clockwork Doppelganger.
* Big Eyes, after Margaret testifies that Walter was abusive but good at charming customers:
* Big Eyes, at one point, Margaret locks herself into her painting room. Walter starts tossing lit matches in through the keyhole. In his defense, he may not have known there was a bottle of highly flammable turpentine right there. Fortunately, it does not ignite.
* Big Eyes' is sued for libel and slander, and his lawyers are only concerned with the first part. Once the libel is dismissed, his entire legal staff leaves the courthouse, resulting in Walter having to act as his own lawyer. He switches positions as he plays both roles, until the judge essentially tells him to keep the theatrics to a minimum.
* Big Eyes: Made in 2014, most of the story takes place from 1963-1965.
* Big Eyes, Small Mouth. A force field could be designed to block teleportation through it by reducing its defensive strength by 15 points.
* Big Eyes, Small Mouth book has a sidebar about using the Weapon attribute to weaponize any other attribute whose description doesn't already offer an offensive application, using Teleport as an example. For example, it could disorient the target without causing direct harm — or remove selective parts of the target for massive damage.

* Big Eyes, Small Mouth has a Defect titled Chick/Dude Magnet (shortened to just "Magnet" in 4th Edition) that makes the character the center of one of these. The game specifically notes that having a bunch of love interests is not a Defect in and of itself; the guys/girls have to actively inconveniece the character with their antics, and the character cannot have the willpower to simply resolve the situation via "extreme measures".
* Big Eyes, Small Mouth has a "Robot Maid" template. It's got a number of upsides... but it also comes with the "Owned" disadvantage.
* Big Eyes, Small Mouth has rules detailing exactly how much damage, over what area, needs to be inflicted to blow up a planet.
* Big Eyes, Small Mouth has the Alternate Form power. It's not hugely powerful - without modifiers you spend nine points on something to give you +10 points - and it's required that there's some drawback (even if it's only social) to prevent you from simply morphing into Omnikill Form and spending the rest of your life there.
* Big Eyes, Small Mouth is dedicated to fighting demons, many of which come from the hell dimension of Bazaroth.
* Big Eyes, Small Mouth, resulting in a mix of Japanese bakemono and oni with Western vampires and sorcerors.
* Big Eyes, Small Mouth RPG used the "(adjective) (noun), (adjective) (noun)":
* Big Eyes, Small Mouth supplement includes the "God of Cookery" Attribute, enabling characters to do things such as preparing an entire meal in a single round, serving said meal with perfect poise while whitewater rafting, or reverse-engineering the recipe of a dish from a single taste.
* Big Eyes, Small Mouth (the first entry only had the OVA and only the first 13 episodes to it).
* Big Eyes, Small Mouth third edition; they have the power to open the portals between worlds.
* Big Eyes, Small Mouth, this is what the Reincarnation attribute does. The various levels determine how long it takes for the character with the attribute to come back after being killed, and how easy or hard this is to stop.
* Big Eyes, Small Mouth. Two abilities, Deflection and Reflection respectively, allow a character to catch or deflect any incoming missile, and subsequently fire it back at the attacker that initially launched/threw/fired it. The mechanics don't specify what sorts of attacks can and can't be deflected, leaving it up to the GM's discretion.
* Big Eyes, Small Mouth world of Cathedral and a portal-travelling wanderer looking for Bastet, as in the Egyptian goddess.
* Big Eyes uses uncharacteristically bright colors and does not feature any of Burton's usual actors. Aside from a handful of fantasy scenes, it's a relatively straightforward biographical film.
* Big Eyes. When Walter begins commercializing her work, Margaret starts to see people in the grocery store with giant eyes like in her paintings. This is never brought up again.
* Big Fan - A New York Giants fan is beaten up by his favourite player, and does nothing so he can still play.
* Big Fancy Castle: Much like Big Fancy House, but with more towers. And secret passages. And dungeons.
* Big Fancy House: A house on a hill. It's not dirty. It has more rooms than any other house around.
* Big Fan, Paul Aufiero is obsessed with the New York Giants, especially star player Quantrell Bishop. He's 36, still lives with his mother, works in a parking lot, and watches home games in the parking lot of the stadium via a television hooked to his car battery. When he and a friend by chance bump into Bishop at a strip joint, he decides to take the plunge and introduce himself to his idol. Things do not go as planned and a fight breaks out, leaving Paul with a black eye and a confused conscience as to how he should present himself as a court witness against his hero. He can't go through with it, even rationalizing the beating because he was "bothering" Bishop.
* Big, Fat Future: Global obesity rates have skyrocketed in the future, due to all

of humanity collectively gaining weight.
* Big, Fat Future in which everyone in the school grows a gigantic behind because of the unhealthy cooking.
* Big, Fat Future in which every student develops a gigantic ass from eating nothing but junk.
* Big, Fat Future: The obesity epidemic hitting developed countries truly began to take hold; plentiful, high-calorie food made everyone go up a few pant sizes and stories portraying futures full of overweight people began to emerge because of this.
* Big Fat Liar And yes, Marty's reaction indicates the "nutcracker" was a success.
* Big Fat Liar: Frank to Jason before giving him and girlfriend a ride.
* Big Fat Liar like a clown, but his oranged-up hair and blued-over skin are motivation enough for the kids ("It's the clown, let's hurt him!").
* Big Fat Liar: Marty Wolf uses this as a racist insult towards his Asian director, and at the end said Asian director gets back at him with one of his own.
* Big Fat Liar's airings in the mid-2000s helped make it a viewer favorite.
* Big Fat Liar, the protagonists purposely wire Marty Wolf's car to do this, with the brake making the car horn go off, and a lot of other stuff.
* Big Fat Quiz of Everything had the schoolchildren of Mitchell Brook Primary School act out the Great Fire of London for a question. Mass destruction never looked so adorable.
* Big Fat Quiz of Everything threw a muffin at Noel Fielding, Noel threw a doughnut back at him, Jonathan Ross threw something, and it went downhill from there.
* Big Fat Quiz of the Year regularly features classically-trained actors, such as Charles Dance, giving dramatic readings from the autobiographies of borderline illiterate celebrities (the teams being tasked with identifying the author, or the person who hired the ghostwriter as the case may be).
* Big Fat Quiz of the Year when it's pointed out that some of the stereotypical character tics associated with this trope are also symptoms that someone's having a stroke.
* Big Finish, and culturally dead. The Doctor notes that the church and movie theatre are boarded up and abandoned, and magnificent golden statues have been left to gather dust, as all resources are devoted to base survival, and nobody cares about things like art and religion anymore.
* Big Finish, a two-person story lasting half an hour, but it grew into a 60-minute full-cast special which would test the waters for a full-cast run.
* Big Finish audio dramas have allowed companions and the aforementioned Doctors to continue appearing in stories despite their original actors being deceased (often done in the Companion Chronicles). Either they're played by other actors or they're described as being present.
* Big Finish audio production "Human Resources" where the Doctor informs the local Cybermen he only saved them by accident before he realised who they were. When asked why he will extend help to all other species but not the Cybermen he answers "Because other species create. You don't."
* Big Finish audios also tend to end each episode with a cliffhanger, even in releases that only come out as a complete story on CD/download and so there's nothing but the theme music separating the episodes.
* Big Finish audio. (She is now insured against everything that can happen to a pet dinosaur.)
* Big Finish, a Zygon asks "What is this 'love'?" Another Zygon, who has been disguised as a 1980s record company boss, explains it's "a money-making scam of the humans".
* Big Finish Doctor Who 1930s comedian Max Miller is played by Roy Hudd, president of the Max Miller Appreciation Society.
* Big Finish Doctor Who, after experiencing a simulated spaceship crash (which she didn't know was a simulation), Lucie comments "A few more seconds and I'd have had to change my down-belows."
* Big Finish Doctor Who alien invasion taking place that night, with the Doctor using Welles' broadcast to try and trick the aliens into thinking someone's beaten

them to Earth.
* Big Finish Doctor Who a lot of his qualms about killing and collateral damage are shrugged off when it comes to Klein's universe, since it's not "the real one" anyway.
* Big Finish Doctor Who", an alien distress signal is what lures the Doctor and Leela into the events of the story. It turns out to be more of a desperate warning when, long story short, all of humanity is at risk of being eradicated by aliens.
* Big Finish Doctor Who) and are basically told the story is crowded enough as it is.
* Big Finish Doctor Who and designed to kill any adult who had not loved them enough.
* Big Finish Doctor Who, and is accidentally kidnapped in place of the Queen, driving much of the plot.
* Big Finish Doctor Who and the would-be villain stepping down... for now. The Doctor manages to get him to promise to meet him once a year for tea to discuss the matter. The rest of the story is a snapshot of their tea-dates and the Doctor ever so gently course-correcting his outlook and life from an embittered street-sweeper to becoming a hero of his people.
* Big Finish Doctor Who and though some are mooks for the villain they are mind-controlled.
* Big Finish Doctor Who, and throughout the entire ending the Doctor complains to both of them just how amazingly unoriginal they're both being, outraged by the plagiarized dialogue and recycled scenario. This is something of a habit for Iris, as many of her adventures bear a striking resemblance to the Doctor's (or possibly vice versa).
* Big Finish Doctor Who as "the vulgar end of time", when all the great questions have been answered, and the sentient races of the galaxy are essentially sitting around wondering what to do next.
* Big Finish Doctor Who", a swarm of creepy crawlies gathers—including flies, cockroaches, bugs, millipedes and spiders—gathers around Sanders if he stays too long in one spot. He eventually says it is because they can sense his true nature as bringer of death.
* Big Finish Doctor Who audio adventure "The Mind's Eye" is a textbook example, with the local flora putting Erimem and Peri into a dream-like state (the Doctor isn't ultimately that affected), where they will die for real if they die in their "dream".
* Big Finish Doctor Who audio "Colditz", a minor character reveals that she's from Britain in the 1960s — controlled by the Nazis due to the Doctor's appearance in Colditz Castle. The line of causality ends up being quite confusing.
* Big Finish Doctor Who audio drama inevitably titled "Relative Time". (They'd already used "Relative Dimensions" for an Eighth and Alex audio.)
* Big Finish Doctor Who audio dramas, Peri and Erimem are currently posing as two princes who are supposed to be dead, and are as far as they know, stranded due to a temporal mishap. Erimem suggests suicide (to save the timeline) is the only answer, but then pretends she was just joking when hearing Peri's shocked response.
* Big Finish Doctor Who audio dramas routinely model audio-original characters on real-life photos of their voice actors for the purposes of cover art, photoshopped into period or future costume and/or alien makeup as the story requires.
* Big Finish Doctor Who audio drama "The Crimes of Thomas Brewster", the Sixth Doctor's patchwork coat is destroyed by a giant robot mosquito. He assures his companion that he has a dozen identical coats back in the TARDIS. She's less than delighted to hear this.
* Big Finish Doctor Who audio enjoy working with a particular actor/actress too much.
* Big Finish Doctor Who audio production "Loups-Garoux", in which the Fifth Doctor meets a group of werewolves, they're usually called "Loups-Garoux", but one character calls them "Lobos", sometimes they're referred to as "wolves", and "Werewolf" is used sparingly.
* Big Finish Doctor Who audio revealed the Master as Death's Champion.

* Big Finish Doctor Who audios, the bats in the rafters of the Eighth Doctor's TARDIS are "fledershrews".
* Big Finish Doctor Who audio "The Devil's Armada". Priest holes, Catholic persecution, demons, imps and the Devil himself.
* Big Finish Doctor Who audio "The Song of Megaptera", based on the unmade episode "The Song of the Space Whale" not only has a space whale, but space whalers. Pushing the metaphor further, star whales can "dive" into the vortex, and the whaling ship has "temporal depth charges" to force it back to the surface of space-time.
* Big Finish Doctor Who being that kills anyone who breathes any part of it in and converts them to a soulless, deathless soldier impervious to damage.
* Big Finish Doctor Who, Boudica will not settle for anything less than the death of every single Roman in Britain. And any Briton who collaborated with them. Or any Briton who was made a slave by them.
* Big Finish Doctor Who broadcast being on October 31 instead of October 30.
* Big Finish Doctor Who, but even the Doctor doesn't argue much with the idea that he was the planet's most powerful warlord back in the day.
* Big Finish Doctor Who) but it's also explained that Frobisher feels rather bad about treating the Doctor like that.
* Big Finish Doctor Who, but the Doctor notes that the description could apply to many incarnations of the Master, which thus prevents the Doctor realizing that this version of the Master is from his relative future.
* Big Finish Doctor Who by Paul Magrs is set in a motorway service station.
* Big Finish Doctor Who by professional madman Robert Shearman; he said he did this to create a situation where humans would sound like Daleks.)
* Big Finish Doctor Who causing an alternate future where the Daleks are mutating into creatures even more dangerous then them.
* Big Finish Doctor Who, causing the 1903 and 2003 timelines to bleed into each other with rather disastrous results.
* Big Finish Doctor Who: cute fluffy toys that will infect anyone who doesn't love their toys enough with an alien virus.
* Big Finish Doctor Who deliberately created a reputation to stifle a violent race's development into warmongers. He decimates an army by offsetting charges in a cavern system underneath it and labels himself the Sandman. Centuries later whenever he decides to drop by and check on them, he still namechecks himself as the Sandman, and the 7-foot-tall near-cyborg lizard-like aliens cower in fear.
* Big Finish Doctor Who drama "Harvest of the Sycorax", all the inhabitants of a space station have Fitbit-like devices called Pads that monitor their emotional state. When Zanzibar, the companion-substitute, is joined by one of her co-workers, Shadrak, we get this:
* Big Finish Doctor Who during her escape from the castle, she's then mistaken for a Golem warrior.
* Big Finish Doctor Who, Erimem's intervention prevents Vlad Tepes from being killed during The Night Battle.
* Big Finish Doctor Who for so long that he's lost all memories of his criminal identity and has joined the imaginary populace of the prison as a servant, showing no signs of the insane, murderous personality he exhibited while free.
* Big Finish Doctor Who, Founder of Time Lord Society, tried to prevent any races evolving that could threaten the Time Lords. He seeded other worlds to make sure life like the Time Lords would evolve and imprisoned races in other Universes which are in the dungeons of his Foundry.
* Big Finish Doctor Who from the Time Vortex that feast on Time Lords for their Regeneration energy. It's thought that genetic memory of them inspired clowns throughout the universe.
* Big Finish Doctor Who gives this to a couple of notorious joke villains from the TV show, like other expanded universe canons.
* Big Finish Doctor Who, Grell, like most of his race, is opposed to advanced technology because he believes it is an anathema to nature, but unlike most of them, he is willing to employ violent means to achieve his ends. He even attacks

the TARDIS console when he sees it: his brain unable to cope with the whole 'bigger on the inside' issue.
* Big Finish Doctor Who had two storylines, each taking place before the other — with the same characters from each reality crossing over into the other one at the halfway point after going back in time, then going back in time to try and undo what they've done, causing the events in the other reality in the process.
* Big Finish Doctor Who has an example where the Doctor refuses to shoot his friend Charley, even though she's a temporal anomaly that poses a threat to the whole Universe by her very existence.
* Big Finish Doctor Who" has the Sixth Doctor engaging in some while intimidating the Galyari. Yes, in audio.
* Big Finish Doctor Who he is revealed to be working for Rassilon, who meets the Doctor in the next story.]]
* Big Finish Doctor Who. However, it's played very straight when the Daleks find the now-empty cocoons... just in time for the entire swarm to ambush them.
* Big Finish Doctor Who': In "Bang Bang-a Boom!", one contestant in the Intergalactic Song Contest is part of a gestalt organism that communicates in a language only his aide can understand.
* Big Finish Doctor Who: In "Cradle of the Snake", Tegan gets possessed by the Mara, which then decides to dress in skimpy black and flirt heavily with Nyssa.
* Big Finish Doctor Who in the tower, who were locked there by Richard to prevent the scandal of the people learning that his brother had lied about having a male heir. They "disappeared" by leaving the tower and working at a tavern owned by their Uncle Clarrie (the former Duke of Clarance, whose own death was faked). It gets weirder...
* Big Finish Doctor Who: In "Zagreus", the Doctor and TARDIS have been infected by anti-time and turned into Zagreus. It is revealed these events have been set up by Rassilon for his plan to send Zagreus to destroy the Divergence. Then at the end of the Divergent Universe arc it is revealed Kro'ka, who was supposedly working for the Divergents, was working for Rassilon.
* Big Finish Doctor Who is based entirely around this: Some space nanites are making a fictional book true, and through careful manipulation of the tropes the Doctor is able to reverse the effect: The only way to get the solution to the carrier (a highwayman) in time is to make it a valuable item that "Must get there before sunrise!".
* Big Finish Doctor Who is being threatened with a fondue fork. He proceeds to gush about how it was made in Sheffield, and wonders if they still make steel there.
* Big Finish Doctor Who" is done in the style of a Gilbert and Sullivan homage. The Doctor references the Major-General's song below with "I Am The Very Model of a Gallifreyan Buccaneer", using the phrases "Rassilonian legatee" and "Remember me to Gallifrey" (pronounced here as "Gal-i-free").
* Big Finish Doctor Who is ridiculously over-the-top and involves a lot of very large explosions, as a send-up of Hollywood movies.
* Big Finish Doctor Who, it obviously worked. However, the listener never gets to hear it because the wax cylinder is so deteriorated that the recording fades out before Steven can explain it.
* Big Finish Doctor Who life on other planets, some of it could time travel, and it was all as bad as the Thals. Great job, Doctor!
* Big Finish Doctor Who like what it looks like as the body has clearly been dead for months rather than someone who only just died.
* Big Finish Doctor Who named Mondas, which has been placed underground to protect its inhabitants from the extreme cold outside.
* Big Finish Doctor Who named Zagreus possesses the Doctor. The TARDIS manages to lock him up inside her. Zagreus tells her that he's dead now, so she'd better let him out. When the TARDIS pointedly remarks that dead people generally don't talk, Zagreus tries to convince her that she's mad for talking back to a dead person, so she'd better let him out.
* Big Finish Doctor Who, Norman keeps telling people that he is a 'senior customer service manager'; not a 'conductor', a 'ticket collector', or any of the other

titles people address him as.
* Big Finish Doctor Who, Nyssa and Turlough are staked to the ground as a meal for a horde of ravening marsh spiders.
* Big Finish Doctor Who of the novels never took place in the main timeline, with the Doctor seeing the different ranges as different timelines. Then they introduced their own companion called Sam, but also proceeded to include Fitz in the audios. That said, writers have apparently had no problem bringing monsters and characters from the books over to the audios or vice-versa.
* Big Finish Doctor Who, one of the remaining antagonists manages to stop the TARDIS doors from fully closing as the Doctor starts to leave, but is unable to fully enter as it dematerializes and leaves his lower half behind. (This contradicts the main show as of the episode "The Husbands of River Song", see below, which specifies the TARDIS has a safeguard to avoid precisely this.)
* Big Finish Doctor Who, Peri and Kevin are attacked by the dummies of miners on the Gold Mine Ride as they try to sneak out of the funfair.
* Big Finish Doctor Who, Peri becomes the vector for a pathogen that painfully converts the entire populace of a planet, the Doctor included, into clones of her.
* Big Finish Doctor Who. Peri comments on this, but he tells her that "your voice always sounds different on tape".
* Big Finish Doctor Who presented as a sentient fog capable of reanimating the dead and making them its immortal warriors, so horrifyingly feared armies are mobilized at the mere sighting of a single Eminence soldier.
* Big Finish Doctor Who prisoner. The other characters gossip about the other prisoner being horrible, completely mad, in a wheelchair, and that he created the Daleks - all of which would cue the listener into thinking the prisoner is Davros. He turns out to be this timeline's version of the Doctor, who has been imprisoned solitary in a tower for a hundred years and has gone mad.
* Big Finish Doctor Who pushed for a new look for his Doctor, based on World War I-era navy clothes, as well as a World War I storyline. This happened in "Dark Eyes".
* Big Finish Doctor Who, Radu performs one of the soldier the Doctor is attempting to save When the Doctor objects, Radu points out that even if the Doctor saves him from blood loss, the wound is poisoned and the man will die a few days hence, and that they have not the resources to care for him in any case.
* Big Finish Doctor Who role instead of Kotris, with the Daleks relegated to a side-antagonist instead.
* Big Finish Doctor Who: short episodes feature cuddly alien conqueror Beep the Meep and Time Lord construct Shayde, and there is a short and a full-length episode in which the Doctor's companion is shapeshifting penguin Frobisher.
* Big Finish Doctor Who should be counted as science fiction — see Literature above.)
* Big Finish Doctor Who side inexplicably thinks death by stampeding cows, the threat of which is worrying most of the other characters, is pretty funny. "They get together, they run you over..."
* Big Finish Doctor Who's "Jubilee" - Miriam insists that the purpose of women is to cover themselves in makeup and look colorful for the men. She herself is convinced she's really ugly and that looking 'like a sow rolled in cosmetics' is the best that she can hope for.
* Big Finish Doctor Who: "Spare Parts" ends with the 5th Doctor having apparently changed history by destroying the Cyber-Planner and sending Mondas back towards the Sun. However, a Cyberman has survived and says they will begin again.
* Big Finish Doctor Who Special The Last Adventure is treated very much like drug-taking: with a sensory rush, some people being unable to deal with it, and others becoming addicted to the sensation. And local law enforcement is looking to stamp the practise out, and hunts down the illegal parties where it takes place.
* Big Finish Doctor Who story "An Earthly Child", Paul McGann's real-life son Jake guest-stars as the Doctor's great-grandson Alex Campbell.
* Big Finish Doctor Who story "Return of the Rocket Men", Dodo (who the Doctor picked up in 1966) finds out it's Steven's birthday and the Doctor gives her free reign to find something in his collection to give him. She chooses a 1967 diary,

because "it's next year's", without ever considering that Steven is from somewhere between the years 2200-3000 and both of them are now living in a time machine. Steven feels cheated and that the gift was insensitive and reacts with sarcasm, but the Doctor tells him to shut up and appreciate that Dodo thought of him.
* Big Finish Doctor Who story "The Stones of Venice", the Duke of Venice gambled his wife away in a game of chance. In response, she put a hundred-year curse on the city, and the Doctor and Charley arrive the day before the curse is due to take effect.
* Big Finish Doctor Who story "Time of the Daleks" an alternate timeline is created where the Daleks are Shakespeare fans.
* Big Finish Doctor Who tells the Doctor he needs to save the gizmo, because that future Doctor needs them for his own plans to fight back an alien invasion.
* Big Finish Doctor Who. That the listener already only perceives the story through hearing punches it up to almost unbearably tense.
* Big Finish Doctor Who. The child in question is a five-year-old boy who has been imprisoned in a dungeon ever since he was born so he would grow up untainted by the world, divine and all-powerful. His first few scenes confirm that he's all-powerful alright and that he's a dyed-in-the-wool sadist.
* Big Finish Doctor Who, the cobweb filled tunnel in the cave that the Doctor and the New Alzarians do not take plays a major role in the story's resolution.
* Big Finish Doctor Who, the company has not cast him in any future Master stories.
* Big Finish Doctor Who the Doctor's visits to St Cedd's, or the Eighth Doctor just happens to have been in Cambridge in exactly the same years as the Fourth.
* Big Finish Doctor Who, the Doctor throws himself into the Pool to disperse the Key to Time. His companions are convinced he's sacrificed himself until he calls out that he'd like some help getting back up. When they ask him how he knew he'd survive, he evades the question and they realize he didn't.
* Big Finish Doctor Who, the Eighth Doctor gets mistaken for one of these for a while. This being Eighth Doctor, he enthusiastically takes to the role and starts speaking in Hammet-esque hardboiled lingo, much to the bafflement of everyone around him.
* Big Finish Doctor Who: The Fourth Doctor identifies what has been incorrectly labelled an early impressionist painting as actually being an alien artefact that shows anyone who looks at it the circumstances of their death. The death cannot be changed or avoided, and anyone who looks at will go insane if they don't die first.
* Big Finish Doctor Who, the Fourth Doctor plays I Spy with Bragnar while they are held prisoner. However, because he is trussed up and lying flat on his back, the only thing he can see is the roof...
* Big Finish Doctor Who", the librarian Brother Bernard escapes from the Doctor by shoving a stack of books on top of him and fleeing while the Doctor is temporarily buried.
* Big Finish Doctor Who: The Second Doctor encounters a gang staging robberies and then using an alien crystal to wipe the minds of any witnesses so they cannot remember any details of the robbery. The Doctor eventually uses the crystal to wipe the gang leader's memory of the crystal and how to use. Captain Matheson explains that UNIT Secret Ops now uses the crystal to remove memories of alien incursions and UNIT operations from people who are not amenable to other forms of coercion.
* Big Finish Doctor Who, the Tor Madowk. This is because neither host is completely able to pronounce "Tor Madowk" correctly.
* Big Finish Doctor Who, they wouldn't get the residual scents as well. And the Doctor wouldn't have "a stuffy Prussian accent".
* Big Finish Doctor Who, though Liv Chenka says they're more like scorpions.
* Big Finish Doctor Who. To be expected in a story dealing with Vlad the Impaler. At one stage the Doctor and Radu stumble in the 'Forest of the Dead' where Vlad impaled 20,000 of his countrymen on stakes.
* Big Finish Doctor Who to gold doesn't yet exist in the first generation.
* Big Finish Doctor Who: When Charlie is possessed by Kali Korash, his voice drops about an octave and becomes far more resonant.
* Big Finish Doctor Who," when new companion Hex blunders into the TARDIS and meets

the Doctor for the first time.
* Big Finish Doctor Who, when the Doctor and his companion, Charley, upon finding the dead body of a private eye, have the following exchange:
* Big Finish Doctor Who when the Doctor, who is attempting to escape with a seemingly helpful character, tells that character that he knows he'll betray him "because you're a stereotype". Told his role in the story is to be the person who seems helpful but betrays the heroes when pressed, the character attempts to defy this characterisation but is powerless against it, revealing that the particular universe is actually a story built as a prison for one of the characters and narrative causality is necessary to keep it on the rails.
* Big Finish Doctor Who, where humans being recruited by a company on present day Earth are actually being sent to alien world to power war machines.
* Big Finish Doctor Who", where they get into a massive argument, C'rizz calling Charley a "bunny boiler". The Doctor convinces them to work it out and Charley admits her flaws.
* Big Finish Doctor Who with both hands as he gloats at great detail about his plan, forgetting that the Doctor is capable of contacting his other incarnations telepathically and therefore can share the information with them.
* Big Finish Doctor Who witnesses the destruction and anguish that the aftermath of the event has wrought, he never finds that he was the one who inadvertently caused it all to begin with, and continues on his merry way at the end of the story, completely none the wiser at all.
* Big Finish Doctor Who: Zagreus, a figure from Gallifreyan nursery rhymes, is this sort of thing:
* Big Finish Doctor Who", Zoe is under sentence of death by disintegration, on trumped-up charges.
* Big Finish doesn't do this, though the producers have kept quiet about whether it's because of his advanced age, or because of his relationship with some of his old co-stars.
* Big Finish, featuring the Brig, who mentions a saying from his father: "In life, as on the fields of battle, there are old soldiers and there are bold soldiers, but there are very few old, bold soldiers."
* Big Finish makes her sister Charley from the Eighth Doctor series Jessica.)
* Big Finish on Gallifrey, who would later go extinct. But there is still a chance she was overlooked (being human in origin) by the Doctor and retired in London.
* Big Finish ran a Doctor Who short story competition, with the prize being that the winning story would be published in one of their anthologies. In the end they received so many good submissions that they made an entire volume out of them.
* Big Finish says "That's just wrong" when she hears that the Cybermen have begun to convert mermaids.
* Big Finish set - "The Hornet's Nest", "The Serpent's Crest" and "The Demon Quest" - was originally written with the Brigadier as the companion, but when Nicolas Courtney fell ill the part was rewritten for UNIT Captain Mark Yates.
* Big First Choice: An early decision has massive impact on the entire rest of the story.
* Big Fish. Also, the "beautiful singer" is in fact a pair of Siamese twins, who want him to bring them to America with him.
* Big Fish approach to the supernatural, and is otherwise a generally bright and cheery film.
* Big Fish: Edward Bloom, narrating a flashback to when he meets his future wife, explains "They say that when you meet the love of your life, time stops. And that's true." Past Edward makes his way across a circus big top, past all the frozen performers, to where his wife is standing. "But what they don't tell you is what once time starts again, it moves extra fast to catch up." Cue the funny carnival music as everyone zips around Past Edward as super-speed.
* Big Fish, Edward describes how he had dreams which predicted the deaths of his family members just before they happened. Eventually, a dream told him his father would die. After being told this, his father became increasingly paranoid over the next few days. Then the milkman died.

* Big Fish fight in a war, but it's likely that his stories about serving on dozens of secret missions are heavily exaggerated.
* Big Fish, he not only lives, he becomes Mayor of his hometown and ultimately buries the hatchet with Edward. The Witch is also made far younger in this version, enabling her to outlive Edward and attend his funeral at the end (as does Don).
* Big Fish, he sees that some of the funeral attendees closely resemble characters his father described in his fantastical stories, implying that they may be truer than Will had first thought.
* Big Fish, is full of tall tales and shaggy dog stories, but there's one simple gag that really stands out.
* Big Fish on him, despite him being ten years older than her. More than ten years later he met her again and she was still in love with him, but by then he was married to the love of his life and turned down her advances.
* Big Fish says of him: "For Edward, there are only two women in the world. His wife, and everybody else."
* Big Fish's character unknowingly grew up with a rival who was constantly overshadowed by him. They end up fighting over the same girl when they become adults.
* Big Fish: The father claims to have been shown his own death by a witch, and that it made him fearless, because he knew nothing but that could kill him. Of course, that was 90% lies.
* Big Fish - The more grounded parts are more serious, while some of the fantastical story/flashbacks can be wacky.
* Big Fish. The whole film is about the main character telling stories about his whole life, and his favorite story is how he met and proposed to his wife. They are both shown young and old.
* Big Fish to secure the girl of his dreams by (amongst another things he does, such as leaving a smoke trail representing a heart and with "I love Sandra" with the help of a sky-writer) planting an almost endless sea of yellow daffodils (which are her favourite flowers) outside her window and telling her they're destined to be married. She's already engaged but calls it off when her fiancé beats the crap out of Edward right there. Later, they get married.
* Big Fish. When she meets Edward Bloom, she's 8 and he's 18. She tells him that once she gets older, the age difference won't matter as much. Years later he meets her again, him now married and her divorced.
* Big Fish when Will meets Jenny, he rather abruptly blurts out the question of whether she and his father, Edward, had an affair. (Answer: no, but not for lack of her trying.)
* Big Fish: Will is sitting quietly with his unconscious father in the hospital, and the doctor tells him how annoying it is when people talk to unconscious patients since they can't hear you anyway.
* Big Five Traits, artists and entrepreneurs tend to have high Openness (a trait associated with intelligence) but often have low or moderate levels of Conscientiousness (hard work and organization).
* Bigfoot and its kin are sometimes thought of as this, though with creatures like the Yeti or the Yowie it's often a lot more debatable. With Bigfoot at least, it's very rare to hear about eyewitness reports where it gets violent — indeed, many reports end with the creature being just as afraid of the witness as the other way around!
* Bigfoot and the Muscle Machines existed to promote toys that Playskool made of the real-life vehicles that appeared in the cartoon.
* bigfoot, as they seem to angle for a while, but a feral woman. The outlet left for mystery is the woman's male companion, whose body is stolen before the agents (and the audience) can examine it.
* Bigfoot (further lampshaded by Freddie) sans the dog. There's 2 males and 2 females; they are investigating a certain creature; they have a vehicle; and also turns up that the said creature is actually a guy they know, in a costume.
* bigfoot is a natural side effect of the gland, not Arnaud's deliberate sabotage.
* Bigfoot, Sasquatch and Yeti as protohumans who have survived to modern times.

* Bigfoot, Sasquatch and Yeti is having its Sasquatch (vaguely-humanoid hulking creatures with horns) share a model with the white-furred northern Wendigo and the green-furred Jungle Stalkers in the tropics.
* Bigfoot, Sasquatch and Yeti: Various big, hairy ape-like creatures who live in seclusion. Bigfoot, Sasquatch, and the Yeti (or Abominable Snowman) are the three most common varieties.
* Bigfoot, Sasquatch and Yeti: Various big, tall, hairy ape-like cryptids; such as the Bigfoot/Sasquatch of North America, or the Yeti (Abominable Snowman) of the Himalayas.
* Bigfoot. The overhead races aren't much better, because you can easily get stuck in a tree and wreck your truck without warning.
* Big Friendly Button this trope, however, given 1) the perfect memory of Gallifreyans (when they're paying attention, anyway) allowing the Doctor to remember the exact phrase that Clara used, 2) the Doctor having the whole episode to think through what happened and how to fix it if only he could get back to the point in time where it occurred, and 3) the Doctor writing Clara's exact phrase on the button so as to specifically get their past selves' attention (which he obviously does).
* Big Friendly Dog. Osaka is left off-footed when Sakaki describes this.
* Big Fun, but he's often shown signs of being intelligent in his own unusual way. This is well demonstrated in the episode "Math of Kon", where Kon admits to have failed math in school for six years straight and isn't even sure how to count to 6 on his own fingers, but the rest of Grojband discovers that when they teach him math by presenting it through his drumming abilities, he becomes a super-genius at the subject able to rapidly solve complex equations.
* Big Fun: I'm an overweight & jolly person you want to be friends with.
* Big Fun in Furbyland, the Furby is chased in a maze by a big, purple spider that traps it in a web temporarily, making the player lost precious time to find the exit.
* Big Fun in the Big Town in the Netherlands and inspired the Dutch language hip-hop acts that would follow from the late 1980s, early 1990s on. Amazingly enough, this entire broadcast is only 40 minutes long!
* Big Fun in the Big Town was shot in New York City, despite the fact that other parts of the USA also have a blossoming hiphop scene at the time. But it makes sense that a foreign documentary crew would go to the most well known American city.
* Big Funny relates an anecdote from when the family women were trying on swimsuits.
* Big Fun Though he only appeared in the first season, his turn in the part was lauded by critics; the creators of the show even declared that Addy was the easiest of all the actors to cast.
* Big Game can't fight anyhow, seems to be on the verge of panic for a bigger part of the movie, and somehow blunders his way through the Finnish wilderness and the bad guys into safety.
* Big Game, despite being made by Finns, has Bavaria doubling for Finland, as it has plot-important mountains and woodlands real-life Finland notoriously lacks.
* Big Game, during the first hour of frantic search for the president, Herbert is shown chewing on a sandwich more often than looking at the screens.
* Big game hunter Oliver Pike Harmsworth tells his guide that he will not shoot a rhinoceros until it is actually charging, unaware that it has long since started doing so.
* Big Game Hunters (BGH) is a popular 8-player map (likely the only 8-player map you'll find being played, besides Fastest Possible maps).
* Big Game, inserted between frantic search for the latter by the bad guys and the refrigator sequence.
* Big Game: It's a story about a president whose plane gets shot down over Lapland. Which president? The US President, of course.
* Big Game — the "exploding Air Force One" scene is featured very prominently in all trailers and posters.

* Big Game, Moore calls Oskari "Ranger", as the boy jokingly suggested it earlier.
* Big Game, Morris is a Secret Service agent — a suit comes with the office. He's also a supreme badass, capable of taking down two men aiming at him with one pistol before any of them even thinks of squeezing the trigger.
* Big Game, Morris keeps on calling Oskari "Small Shoes", much to boy's displeasure, as small footprints are the first thing he notices about him while tracking him.
* Big Game, most of the second and entire third act take place on Oskari's thirteenth birthday. His family even made it into tradition - to become a man, you have to hunt down a "big game" the day you turn 13.
* Big Game, Oskari and Moore eject themselves from Air Force One cockpit to escape the explosion that's just about to blow submerged Air Force One to bits.
* Big Game, Oskari's father sports a hella mustache. He hunted a bear with bow, arrows and a knife when he was thirteen.
* Big Game, psychopatic man-hunter Hazar has a beard astoundingly similar to Gruber's.
* Big Game: Some of the Air Force One crew members. Several bodies are with the plane in the lake, but it's possible that some of them survive and just swam ashore before Moore and Oskari arrived, given the amount of time between the crash and them reaching the wreck.
* Big Game subplot is introduced (and poorly resolved just as quickly). School sports seasons typically end a few weeks before the last week.
* Big Game, the Pentagon quickly scrambles Navy SEAL teams to the location of the escape pod's homing beacon. Unfortunately, it fell off the pod during the crash and leads them to a farm in rural Norway instead.
* Big Game, the pep talk Moore gives Oskari about having to act tough when one can't be tough looks like a set-up for an epic scene later, but ultimately, it amounts to nothing.
* Big Game, the villains' meticulously though-out plan is derailed by Oskari. If he didn't find the escape pod with president in, the only thing to do would be to open the door and pull the trigger. As it is, they end up chasing the two of them throughout Finland and fail.
* Big Game, this is how one of the characters is disposed of – his neck is broken on a bathroom sink and soap is put on his shoes and the floor to make it look as if he slipped and fell.
* Big Game, when Morris dies, his finger stays on the trigger of his Uzi and he ends up taking down his own helicopter.
* Big Game, when the Navy SEALs team sent to be Moore's cavalry ends up hundreds of kilometres away. They manage to finally find the right place only after the president is already saved.
* "*big gasp* Part two?! Parttwoparttwoparttwoparttwopartt- *prodded down*
* Big Gay Al is a flamboyant gay stereotype. He has eyelashes, wears a pink shirt, and even has the word "Gay" in his name. Lampshaded in the episode "
* Bigger and Blackerer: He details a game to play with friends at a restaurant. When talking to the waitress, make the first thing you say be "Yeah, bitch," But in as low-key a manner as possible. Then, be as polite as possible when making your order. The object is to make it so that the waitress won't be sure you called her 'bitch', but would feel uncomfortable asking such a polite person if he did.
* Bigger! Badder! Brutal-er! on top of each other by seventh member B in order to reach the rope holding up their totem pole and cut it down. Their order from the bottom up is: Sam, Staci, Scott, Lightning, Dawn, and Dakota.
* Bigger Fatter Liar from 2002, right down to having a hero named "Shepherd" and a villain named "Wolf". The only difference is that it's a video game idea stolen rather than a movie.
* Bigger Is Better in Bed: Having a bigger penis makes you better at sex.
* Bigger Is Better in Bed, the trope is still alive and kicking (especially in porn, where it's practically omnipresent) and will probably be for a long time. Then there's personal preference...
* Bigger Is Better scale (e.g. the same movement once needed for moving a boulder

is now capable of moving a literal island), while normal bending now only requires small gestures.
* Bigger is when the girls' grandmother (played by none other than Patty Duke) came for a visit. Feeling something is off, Maddie soon finds it's not their grandmother but her own twin sister as the real grandma couldn't make it so sent her twin instead. Maddie actually calls out her mother on this with "you hate switches!" She agrees to keep quiet so as not to mess up Liv being honored at school. During the ceremony, guess who enters fresh off her flight from Africa...
* Bigger on the Inside: A building's interior is somehow much larger than it's exterior.
* Bigger on the Inside: A building that looks small - possibly ridiculously small - but opens up into a giant mansion or other area.
* Bigger on the Inside architecture, and Defender's Glass to act as armor.
* Bigger on the Inside") is that it's infinitely large on the inside. Expanded universe stories have established it is filled with far more than just one person could realistically make use of, including a zoo.
* Bigger on the Inside it, life-long fanboy and Twelfth Doctor actor looks at the camera and remarks, "Sorry. I've always wanted to see that done properly."
* Bigger on the Inside. Oh, and when he gets old, he can just change into a younger, often sexier body. No matter your age, that's pretty fun.
* Bigger on the Inside. Other hells are mentioned to exist. As you can probably tell from this, the novel isn't completely serious.
* Bigger on the Inside Rory figures out what's what without any help, he seems to be more than a little perturbed that he didn't get the usual response.
* Bigger on the Inside than it is on the outside. Oprah responds aptly with, "The more questions you ask, the less sense it makes."
* Bigger on the Inside. That is not a boast. It is simply a description of the real situation. Ironically, the Doctor's TARDIS, a Type 40, is considered a literal antique by their people. We never actually get a look at a truly cutting-edge TARDIS.
* Bigger on the Inside. This is due to the fact that what we experience as gravity is actually the mass of planets causing space to shrink in its presence. This means that straight lines, like those of laser light, become bent in the presence of mass. This is why planets orbit other planets, and light gets bent in a gravitational field: they are following the curved lines of space around the planet. The best analogy of this is placing a mass on a rubber sheet, and watching it deform the rubber around it. Letting a ball spin around the mass is rather similar to planets orbiting one another, as the balls just follow the curved paths of the rubber sheet.
* Bigger on the Inside - though still on the milder end of this trope.
* Bigger, Stronger, Faster saw its director Chris Bell challenge the "conventional wisdom" about the health risks of anabolic steroids, questioning doctors and lawmakers about the real health risks and grilling a father whose son committed suicide over whether steroids really were to blame. The film heavily featured Bell and his two brothers Mike and Mark, both of whom were active steroid users. Within less than a year, Mike Bell (a former WWE jobber) had committed suicide, and both were shown to be at a significantly elevated risk for heart disease due to their steroid use.
* Bigger Stronger Faster went into this in a fair amount of detail. It showed how advertisers for diet and health supplements will use many of the listed techniques at the top of the page. The host then participates in a worked photo shoot where Before and After photos are taken mere minutes apart (which, according to at least one photographer, was not unusual). The real difference was body language, better lighting, a spray tan (including having six-pack abs painted on), and good ol' Photoshop.
* bigger than anything ever made before. To quote Kog da Flymek: "Wot's faster than a warbuggy, more killy than a warbike, and flies through da air like a bird? I got no bleedin' idea, but I'm gonna find out." (Answer: the first Deffkopta.)
* Bigger Than Cheeses Lei and sex fiend Cleo (which often crushes her chosen beau

Thanatos with her comic-robot-level strength)
* Bigger Than Cheeses. Note the second pair of sunglasses in the third panel.
* Bigger Than Cheeses one character gets beaten by his wife and tries to tell his friend:
* Bigger Than Cheeses: when a character overhears a conversation that sounds like two people having sex, the eavesdropper displays awareness of this trope and avoids leaping to conclusions, only for it to be revealed that the overheard characters genuinely were having sex.
* Bigger Than Cheeses with "Goonigoogoos Super Awesome Study Plan", which consists of points like "Waste your study break doing absolutely nothing, try to absorb as much info as possible 5 minutes before the test starts, completely luck out. Repeat."
* Bigger Than Jesus caused a huge scandal. He apologized for it, but the phrase entered pop culture soon afterwards.
* Bigger Than Jesus (he found it ridiculous that the public got more enthusiastic about singing groups than about religion).
* bigger threat to the galaxy known as the X-Parasites, organisms native to SR388 who consume their prey on a cellular level and take on modified versions of their forms, being just as unstoppable as their former predators.
* biggest created by Kyoji Nakamura, the former Ultimate Geneticist. The reason she has anterograde amnesia is because her physical development was accelerated, which resulted in some brain damage.
* biggest fan, has this reaction when he hears Phineas use his catchphrase.
* Biggest one, in canon, is that she can fit into that morph ball. Experiments to replicate it didn't go so well.
* biggest outburst yet causes all his friends to abandon him (yes, even Caboose).
* biggest whom she knows, and he knows she knows, is just stringing her along until he goes home to his cold, frigid wife. Zigzagged in that she admits to herself that she knows he's a pretty awful catch, but she just can't seem to find anyone else who measures up to her standards of being high-ranking and military-admiring.
* Biggie Bear of the "Parents For Responsible Viewing" PSAs. Doesn't get any more bad than
* Biggie Smalls as well. Biggie was fairly popular but had only put out one album at the time that 2Pac was accusing him publicly of being involved in his shooting. This, coupled with the subsequent East-West Coast Rivalry ensured that Biggie, who would only put out two albums compared to 2Pac's six, would be forever compared with and alongside 2Pac.
* Biggles: Adventures in Time ends with Ferguson suddenly snatched from his wedding by Time-lightning into a new adventure with Biggles and chums which seems set to start with an escape from a lost subterranean tribe...
* Biggles: Adventures in Time to the late twentieth century) is able to work out how to fly a helicopter after a few minutes experimentation. He even says, without apparent irony, "If you can learn to fly a Sopwith Camel, you can learn to fly anything!" (The Camel was a notoriously hard to handle aircraft, with a well deserved reputation as a pilot killer. It's not a huge stretch to claim that this would be the truth.)
* Biggles and the Black Peril - Biggles and friends are fleeing Russia in an unarmed civilian aircraft and are being pursued by enemy fighters. It looks grim for them, but suddenly the Russians scatter and flee... because British carrier-launched fighters are bearing down on them. Vaguely foreshadowed, so it (just) escapes being a
* Biggles antagonist Erich von Stalhein: "Germany meant more to me than Hitler ever did. It still does." He is quite explicitly a German nationalist and seems listless whenever not serving its interests, even working for the Soviets, despite being a monarchist to the core himself.
* Biggles, Biggles ends up stealing another kill from the same pilot at the end of the story.
* Biggles comic where the space station armed with nuclear weapons to blackmail the world turns out to be an inflatable hoax.

* Biggles era British alphabet. One of the few uses that survived is "Ack-Ack" for AA (anti-air) fire.
* Biggles firing on that one little wood. (Note: This was an actual American tactical innovation, called "all guns in range," in WWII. The Germans thought it was both crazy and extremely unfair.)
* Biggles. First in 1918, when peace abruptly broke out and the combat airmen of the Royal Flying corps were surplus to requirements. He became an adventurer and pilot-for-hire until 1939 when his luck was in again. In 1945 he was again jobless and looking for things to do.
* Biggles Goes To War features two Ruritanias: small, peace-loving Maltovia and bullying larger neighbour Lovitznia. Although a thinly-disguised allegory for the German takeover of Austria, in the novel it is the Maltovians who appear more German and the Lovitznians who have more of the Slav about them. It is left to the reader to decide whether Capt. Johns was inverting the stereotype or subtly pushing a message about the Red Menace...
* Biggles going on to work for a somewhat ill-defined police aviation unit, there's not very many aircraft Biggles can't at least muddle through on. One story did establish that he wasn't Instrument Flight Rules-qualified, which was briefly a plot point, and this may or may not have remained true throughout the series.
* Biggles hardly ever had time for women, except that one time when he fell in love with German spy Marie Janis in the short story "Affaire de Coeur". This is an interesting example considering pilots are usually portrayed as babe-magnets.
* Biggles largely helped to cement the trope's popularity during and after WWII, especially to a British audience.
* Biggles. Most of the franchise is set some time after he reaches adulthood, however.
* Biggles officer corps, his superiors would dearly like to sack or demote him, but as he is an accredited Ace, they dare not.
* Biggles series, Biggles, like many other WW1 aviators is contemptuous of ill-aimed and random ground fire ("Archie" to pilots of the day) and largely ignores it. Which doesn't mean he isn't shocked on the one-in-a-thousand chance when he sees it bring down a plane. At one point, shot down and forced into the trenches for refuge, he leads an informal class in how infantrymen can shoot down German planes with the issue machine-gun - reminding them to account for deflection and to always aim ahead. He proves his point by knocking down a strafing German biplane. Later on, he is victim of a fluke when a single bullet, fired from the ground, knocks out his engine. He glides his plane to a landing wondering, bitterly, how unlucky you can get to be.
* Biggles short stories, the veteran pilot, now a policeman, is asked for his opinion on the death of a girl who had previously had an argument with her pilot boyfriend. She was hit on the head with a blunt instrument and died instantly. The boyfriend is being sought. Biggles reviews the case. The girl was found dead in her garden with no signs of intrusion or struggle. No weapon has been recovered. However, in the photographs is an unopened box of chocolates. Biggles asks about this. It has been disregarded by the police as of no significance, incidental. He asks if this was kept, and discovers one corner of the box is badly crushed out of shape. Then it becomes clear. The pilot boyfriend sought to make up the row with a romantic gesture, dropping a box of chocolates to her in her garden from several hundred feet up. He just aimed too well. Biggles notes it would be like hitting her with a brick, and points to people being killed in the wars by shrapnel, parts of damaged aircraft, or even spent bullet cases dropping from the air. The case now becomes not murder, but death by misadventure.
* Biggles state develop its air force. They don't scruple to obtain enemy aircraft by trickery and press them into service.
* Biggles vapour trail. Because he's using tracer rounds, which basically trail a stream of fire behind them for up to six hundred yards... well, you can guess the rest.
* Biggles was a beneficiary (and/or victim) of this trope in the chronologically second-earliest book in the series. Not only does he get into flight school by

lying about his age, albeit only by eight months, but a chapter or so later he's getting his pilot's wings and a hasty posting to 266 Squadron in France despite having less than half the required hours in the air. He survives through raw talent and sheer dumb luck for long enough to learn on the job; many other pilots don't.
* Big goes even further into elaborating why Josh really wanted to be "big".
* Big Gold Belt. Following the acquisition of WCW in 2001, the WCW World Championship was unified with the WWF Championship into the Undisputed WWE Championship. However, the design was reused for WWE's World Heavyweight championship, with a WWE logo eventually added for trademark purposes.
* Big Gold Belt. Seemingly retired for good in 2014 after WWE's two world championships were unified.
* Big Gold Belt: Was mainly used as NWA/WCW's World Title. It made its debut in the WWF on September 1991 when then champion Ric Flair took it with him after having a fallout with NWA, though WWF won't use it until a decade later.
* Big Good, and he knows pretty much all the ups and downs about the things needed and done around the world. However, he has a habit of being "need to know" with the information and not telling people when it's really needed (like, say, before things go pear-shaped). This has lead to many many people, both Hunters/Huntresses and innocents, to die at the hands of the Grimm and Salem's associates and has, rightfully, pissed off Team RWBY and the remains of Team JNPR. Ozpin himself is well aware of this flaw, but past betrayals by trusted allies have left him too jaded to fully trust anyone.
* Big Good candidate Admiral Hacket has a collection of facial scars that hint at his service record.
* Big Good causes Fate Reforged; and Ugin still being in a magical coma a millennium later results in the situation in Dragons of Tarkir.
* Big Good Duumvirate. They will try to subjugate you and make you a vassal if given the opportunity.
* Big Good. Falls into a coma from which six legendary Toa heroes have to awaken him.
* Big Good finally come together at the end of "The Return of Harmony".)
* Big Good. He has the respect as a hunter and as a spy of the most powerful characters in the show.
* Big Good Himself. Instead of dying on the cross, he was spared and taken up to Heaven still alive as a miracle. In the last days, he is expected to return to Earth to help marshall the forces of Good and then die a mortal death in the final battle against Evil.
* Big Good identifying his flagship and capturing his escape craft. Later still, he personally commanded the massive Federation fleet en route to A Boa Qu... which was devastated when Gihren Zabi used the Solar Ray.
* Big Good if Robert actually knew anything about him. Viserys is also convinced he's been staying just ahead of Robert's assassins for his whole life, but Robert had never actually tried to have him killed since he got to Essos.
* Big Good is actually disgusted at how low Krabs would stoop to make money:
* Big Good of the site, can hold a long grudge and can be a passive-aggressive dick when pushed.
* Big Good, ranging from garden-variety emotional manipulation to outright memory repression, all in the name of keeping as many of his students in their X-uniforms as possible.
* Big Good Ser Alliser Thorne) in a mutiny, though ultimately his death is one of the very few in the series that does not stick, as he is revived by Melisandre in early Season 6.
* Big Good the game ever had, is miraculously brought out of stasis and brought to his father... who it turns out still sees him as nothing more than a tool in his plan. Roboute emerges from that meeting determined to fight not for the Emperor but the Emperor's vision.
* Big Good: The most powerful and significant force of good who exists in the story.
* Big Good, they were reimagined as a bunch of shiftless, dusty politicians

obsessed with pompous ritual, who can be caught out with legal loopholes and forcing them to answer straight questions.
* Big Good to the other species. Because he knew that s/he could get them to believe in the cause and follow him/her, no matter what the cost or odds.
* Big Good while lamenting his daughter Jasmine's stubbornness in refusing to accept a husband.
* Biggs is also a talented manipulator whose true goals are known to no one, not even to the aforementioned Destania who is his ally and possibly his lover. He even introduces the more trusting Jyrras to the concept of lying.
* Big G the Gorilla sometimes holds signs reading "FANTASTIC" "INCREDIBLE" and "SPECTACULAR" right up to the camera.
* Big Guns activated a bagatelle mini-game in the backbox, giving players a chance to earn an extra ball.
* Big Guns has Royals and Knights in full metal armor welding futuristic weapons.
* Big Guns insisted he needed the extra height to accommodate his castle artwork.
* Big Guns not only scores points, but it also loads the right cannon if the ball isn't locked there.
* Big Guns: The Queen's military have a force field (represented by the pop-up post between the flippers) that prevent the ball from draining between the flippers.
* Big Guy and Rusty the Boy Robot actually has more firepower and toughness than his much larger father robot Big Guy. He lacks the combat ability and experience to use his arsenal to its full potential compared to Big Guy and his pilot.
* Big Guy and Rusty the Boy Robot all built into his frame. He does have the bulk to contain it all within him, but it would effectively leave him an empty shell with no servos to actually move (let alone having enough structural integrity to sustain the amount of damage he does).
* Big Guy and Rusty the Boy Robot and an android the size and mentality of a child.
* Big Guy and Rusty the Boy Robot and assumed that since the general public doesn't have access to the original Rusty's (effectively nuclear) battery, this wouldn't be a problem. One small retrofit later (which was simple enough that the Rustys themselves could do it with minimal guidance) and the Legion had a small army of flying tactical nukes.
* Big Guy and Rusty the Boy Robot and Lt. Hunter is the pilot. Luckily, his cover story is that he's Big Guy's chief mechanic and his presence inside is explained off (on one occasion by Rusty himself) as him doing maintenance or repair work.
* Big Guy and Rusty the Boy Robot, a trigger-happy hick in a mech was about to vandalize the Lincoln Memorial, until Big Guy showed him his "Mag Popper." The pilot then surrendered and ejected out of his mech's rear end.
* Big Guy and Rusty the Boy Robot: At the Quark Shareholders Ball, Lt. Hunter and Dr. Slate get about 2 seconds of lively dancing in before a slow song started.
* Big Guy and Rusty the Boy Robot: Big guy has arms that swing up and reveal a large number of weapons that stick out of his elbows/armpits.
* Big Guy and Rusty the Boy Robot, both Donovan AND his monkey try to use this trope in order to escape. The monster just shrugs it off, wanting to attack out of dislike. In a later episode, Donovan's nephew gains the same brain-sucking powers but decides against attacking Donovan. ("I crave nutrition, not empty calories!")
* Big Guy and Rusty the Boy Robot comments to Dr. Slate that her body temperature rises each time it mentions Lt. Hunter, suggesting she either has a crush on him, or the two of them are plotting against it. Both were true.
* Big Guy and Rusty the Boy Robot him so badly that he sputters out and completely resets himself.
* Big Guy and Rusty the Boy Robot: In the episode "The Champ", Big Guy fights with an alien invader, Po, who threatens to blow up the Earth if his challenge is refused. As a gesture of good faith, Big Guy offers a handshake at the start of the fight. Po uses this as an opportunity to yank Big Guy off of his feet. During their rematch later that episode, Big Guy offers a handshake again, and Po once again takes advantage... except this time the arm was meant to come off and explodes hilariously in Po's face.
* Big Guy and Rusty the Boy Robot intro shows the Big Guy being able to do this

with dozens of spiraling missiles. Sadly he prefers using the machine guns in his armpits rather than falling for the rule of cool and spamming missiles.
* Big Guy and Rusty the Boy Robot is one of these, though the public are under the impression that it's fully automated.
* Big Guy and Rusty the Boy Robot, the Big Guy was being put into a museum display, until they found that his replacement Rusty would need his help. Of course, Rusty ends up being the sidekick.
* Big Guy and Rusty the Boy Robot, the Legion Ex Machina build a replica of Big Guy in order to infiltrate his base. They just didn't realize that the real Big Guy is not a robot but a guy in a mech. Eventually, there is a fight between the real Big Guy and the fake (who also has a chest cannon, while the real one has a pilot cabin in that location). Naturally, the good guy wins.
* Big Guy and Rusty the Boy Robot, the main character Rusty is turned into a human boy by a villain in one episode. Unfortunately this means he has to deal with pain when trying to fight, when his normal catch phrase is "No pain receptors!" He's glad to be back to full robot at the end of the episode.
* Big Guy and Rusty the Boy Robot, then put them in a blender and hit puree.
* Big Guy and Rusty the Boy Robot, there is exactly one BGY-11, and exactly one person who can pilot the mech without accidentally destroying it. It is explained that the military lost the original blueprints, but since they can still perform maintenance on it, it does seem odd that they wouldn't build another one. And there really isn't any logical reason not to train a backup pilot.
* big guy, develops an interest in art and eventually gets a gallery show of his own. The humans are very impressed with his abstract work...even though his best one was basically an accident with a blowtorch.
* Big Guy Fatality Syndrome: The strongest of the group gives their life to the cause.
* Big Guy in Napoleon's army was found presenting arms with a small cannon rather than a musket.
* Big Guy kind (being a genius Chemist who achieves his power through a pill he created) for the team, since Superman was usually little more than cover-decoration. Though the magnitude of his power varies in how it is depicted, within his Hour of Power, the Man of the Hour has even fought Superman toe to toe. And, though not typically showcased, his Miraclo pill also gives him superhuman speed, making him the second fastest JSAer after The Flash himself.
* Big Guy, Little Guy: Two guys—one big, one little—who are paired together.
* Big Guy they all have each others backs and perform well. You would never guess they had this friendship based on how they are in the present day, though Carolina and Wash have patched things up thanks to their interactions with the Reds and Blues.
* Big Guy was definitely a Class 1. Atom Smasher is presumably a reserve member and still drops in on occasion, usually when the team takes on Black Adam.
* Big Guy with an appetizer) on several occasions — and created the menu for the Bridgeport Pub in the fifth season, to what appears to be popular acclaim.
* Big has this as Josh's ultimate goal; he gets briefly sidetracked when he falls in love, but eventually realizes that he's nowhere near ready to be an adult and desperately tries to get back.
* Big Head Press regularly has "Clean-branes" appear in its sci-fi comics such as
* Big-Hearted Bigfoot: Bigfoot is portrayed as a kind-hearted figure, especially when contrasted with most other cryptids
* big heel team is the noted ice hockey power of Iceland. In spite of the country's name, Iceland was not and still is not a hockey powerhouse in real life (they were granted membership into the IIHF, the sport's ruling international body, in 1992, barely a year or two before the movie was released). Steven Brill, who wrote the screenplay, freely admits to invoking the trope here with the justification that Russia wouldn't work as the heel team due to the Soviet Union collapsing and that they didn't want to offend any of the countries that were actually hockey savvy (Canada, Sweden, etc.) and hurt the film's performance there.

* Big Heel-Watha pranks the title hunter by planting a drinking fountain on a geyser.
* Big Hero 6: After Hiro and Baymax escape from the abandoned warehouse, they go straight to the police station, where the policeman (understandably) reacts with disbelief at Hiro's claims.
* Big Hero 6; after meeting him unexpectedly, Hiro nearly starts hyperventilating.
* Big Hero 6 after rescuing Hiro during the final battle. Presumably, this is one of the things Hiro programmed into him as part of his fighting package.
* Big Hero 6, after the visit to the labs, Hiro is inspired to come up with something great to present at the student expo so he can go to San Fransokyo Tech. He sharpens his pencil with a determined expression, and "Eye of the Tiger" starts playing...only to immediately deflate when he realizes he doesn't have any ideas.
* Big Hero 6 Alistair Krei, who Callaghan told them not to trust and was interested in the microbots. Nope. Yokai is actually Callaghan, who started the fire so he could steal the microbots and take revenge on Krei for a portal accident that killed Callaghan's daughter. Krei may not even be corrupt, as all the things he does that hint at it could just be honest mistakes and Callaghan is the only one who says he's bad. It also turns out that Callaghan's daughter is still alive, just trapped inside the portal.
* Big Hero 6, a lone piano piece is playing after Tadashi's funeral, when Hiro sits lonely at the top of the stairs at home.
* Big Hero 6: Although Tadashi and Hiro live with their Aunt Cass, Tadashi makes a special effort to fulfill the role of big brother and father figure. It's most obvious when he's distressed over Hiro's botfighting hobby and wonders what their dad would say in that situation. This trope also applies to Aunt Cass who took both boys in when their parents died.
* Big Hero 6, American actress Genesis Rodriguez (who is of Cuban and Venezuelan descent) voices Honey Lemon in both the original English recording and the Latin American Spanish dub.
* Big Hero 6, an upgraded scanner that can sweep the entire city, and magnetic pads for Hiro's suit to grab onto. Though it's unclear if he had any strength upgrade since Baymax is already capable of lifting a thousand pounds or so. The rest of Big Hero 6 get their own suits with various tricks.
* Big Hero 6: A piece of Hiro's fighting robot falls off and lands squarely on his foot, with the usual result of jumping in pain.
* Big Hero 6 as a robot healthcare companion. His sole goal is to care for people, whoever they are.
* Big Hero 6, a skeptical cop listening to Hiro's story: "Alright, let me get this straight. A man in a kabuki mask attacked you with an army of miniature flying robots..."
* Big Hero 6: At the beginning of the movie, Hiro goes to a back-alley robot fighting competition with a pathetic-looking robot, and shyly asking if he can fight too. After getting beaten in a couple of hits he asks if he can bet more money for a second chance. When the second fight starts he drops the shy attitude and shows his robot's true talents by utterly destroying the rival's robot.
* Big Hero 6, Aunt Cass pulls Hiro and Tadashi by their ears to the family station wagon after they're released from jail following their arrest at a bot-fight.
* Big Hero 6. Baymax is built with an inflatable body that gives him a roly-poly appearance. However, the armor that Hiro makes for him squeezes that figure into a more top-heavy heroic silhouette.
* Big Hero 6 by blaming them on the family cat, Mochi. When he looks down and finds Mochi at his feet, he grabs him and throws him upstairs, leading to this trope. Later, when Hiro finally arrives upstairs, Mochi looks over at Hiro and is clearly aggravated with his human for throwing him and quickly runs downstairs.
* Big Hero 6 Callaghan. Callaghan only narrowly survives because Hiro's friends intervene.
* Big Hero 6 called this out: "Aunt Cass apparently has never seen anyone act suspicious before."
* Big Hero 6: Cass gets lost in her scolding after picking up Hiro and Tadashi from

the police station.
* Big Hero 6: Cass Hamada is a rare adult type, but she is always excited and happy.
* Big Hero 6 cites this trope as the reason why Yokai is trying to kill them after the heroes see him and his nanobots.
* Big Hero 6 contains multiple differences from the film due to being based on unused concepts. The Japanese version even has Aunt Cass as Hiro's and Tadashi's mother, which she was in earlier drafts.
* Big Hero 6 does not feature any form of romance forming between the hero squad, despite a few nods to Hiro's crush on Honey Lemon in the comics.
* Big Hero 6: During the car chase, GoGo uses this move to put a moving train between them and Yokai. It doesn't throw him off for long though.
* Big Hero 6 fangirl due to her noble personality and natural ability to throw flat circular objects.
* Big Hero 6 fans. They have come up with possible crossovers that involve Hiro joining S.H.I.E.L.D. or Baymax greeting the Avengers.
* Big Hero 6 features actor, comedian and TV gamehost Flavio Insinna as Baymax and comedian Virginia Raffaele as Aunt Cass.
* Big Hero 6 features an example. Right after Hiro gets into college, Tadashi pulls him aside. Hiro says that he knows what Tadashi is going to say: That he should be proud of himself because he's finally using his gift for something important. Tadashi responds that he was just going to tell Hiro that his fly was down during the entire presentation.
* Big Hero 6 going out the front door and strolling into traffic that Hiro realizes his mistake.
* Big Hero 6 has Professor Robert Callaghan. Initially thought to have perished in a fire in the first act, it's later revealed that he intentionally set the fire to fake his own death and became the masked villain Yokai, plotting revenge against industrialist Alistair Krei for his daughter's disappearance.
* Big Hero 6 has the microbots being controlled by a headband neural interface, which Yokai incorporated into his kabuki mask.
* Big Hero 6, Hiro Hamada is shown to be a mild fanboy of Professor Callaghan, complete with a small gush moment when he meets him.
* Big Hero 6, Hiro's bot that he uses for bot-fighting is small and toy-like, but easily beats a much larger bot because of its maneuverability and ability to disassemble/reassemble itself.
* Big Hero 6 Hiro's presentation, his brother Tadashi informs him that his fly was down the whole time. Cue Hiro embarrassingly zipping it up.
* Big Hero 6 however, it's "something plain, like Ethel, Marge or Patty".
* Big Hero 6 is a comic book nerd who becomes an actual superhero, and admits that being chased by Yokai is both terrifying and awesome. His suit is based on his favorite kaiju, a monster named Krogar.
* Big Hero 6 is a somewhat limited artificial intelligence. When he startles Hiro and Hiro snaps "You gave me a heart attack!", Baymax prepares to fire up his built-in defibrillator.
* Big Hero 6 is initially a healthcare companion robot, but is given fighting ability after Hiro's upgrades.
* Big Hero 6 is the final creation of Hiro Hamada's deceased older brother, Tadashi.
* Big Hero 6 is this to Hiro, being a nurse-bot programmed by Hiro's brother Tadashi.
* Big Hero 6. It doesn't help that people in countries like the UK had to wait months before it came to cinemas there, by which point most people had either watched it illegally or just lost interest.
* Big Hero 6 manifests as adding carbon fiber armor paneling and some rocket fists/thrusters. The robot's soft regular body is never modified. This makes him versatile while armored but weak otherwise (which manifests in the climax). Baymax's strength is justified, since a healthcare companion would need to be strong enough to carry people in case of emergencies. The vinyl balloon design is

also intentional, since it ensures that Baymax won't accidentally hurt anyone even with his strength.
* Big Hero 6 of the film, Yokai, for his evil plans, which include forming a swarm of them to travel through town and destroy anything in his way.
* Big Hero 6 older brother Tadashi and is modified by Hiro to help fight crime.
* Big Hero 6) pairing, the resulting quartet being referred to as the "Futuristic Four."
* Big Hero 6 regularly speaks this way as part of his programming. Despite this, he does use contractions in rare cases.
* Big Hero 6 reveals that the amalgamation is in-universe; San Francisco was completely devastated by the 1906 earthquake, and its rebuild was influenced heavily by a large Japanese immigrant community, and the name was changed to honor this.
* Big Hero 6s, many of which involve him getting kidnapped or hurt in some way.
* Big Hero 6 that GoGo's name is "something plain, like Ethel, Marge or Patty". This quickly warped into "GoGo's VA said that her real name is Ethel".
* Big Hero 6 that had already graduated from high school at the start of the movie.
* Big Hero 6, the implicit offer of money in exchange for Krei's life is angrily rejected.
* Big Hero 6, the mic that he used gives a harsh feedback just after his introduction.
* Big Hero 6: The post-credits scene with Stan Lee as Fred's dad is followed by the appropriate credit.
* Big Hero 6, the scene cuts to him banging his head on a desk covered with dozens of crumpled pieces of paper.
* Big Hero 6. The second time, it's reported as "what could have been a major catastrophe", but there are no reported deaths. The second example was in the middle of its opening ceremony, so it makes sense that it would be unoccupied.
* Big Hero 6: The Series, a businessman turned tech-hating hermit who lives in the woods with only the company of a tech-scrambling metorite. He honestly believes technology will be humanity's end, and attempts to destroy Baymax for the crime of being a robot.
* Big Hero 6: The Series) against superheroes and can't keep his personal feelings out of his work.
* Big Hero 6: The Series, but he refuses. Obake thinks he'll change his mind after his plan to destroy San Fransokyo goes through. Unlikely.
* Big Hero 6: The Series, but he refuses to treat it due to seeing those pesky emotions as just another pointless limitation.
* Big Hero 6: The Series by San Fransokyo's newest police chief. Season 3 is about Noodle Burger Boy assembling a villainous team of other food mascots.
* Big Hero 6: The Series episode "Failure Mode", during Big Hero 6's first attempt to stop Globby, Fred accidentally incinerates a water fountain, melting it. The next morning, the museum patrons mistake it for a new artwork, which Fred claims credit for.
* Big Hero 6: The Series episode "Portal Enemy", an acrobat thief called Sirque steals Krei Tech's teleportation technology and modifies it to commit thefts. Unknown to her, the portals are unstable and a danger to all of San Fransokyo, so Hiro chases her through portals to stop her. When the unstable portal threatens to suck up Hiro, Sirque grabs his foot and saves him.
* Big Hero 6: The Series episode "The Revenge of Von Steamer", Baron von Steamer does this in his ultimatum to Boss Awesome:
* Big Hero 6: The Series. Granville's lack of supervision combined with his brain damage has driven him to complete his goals, no matter how dangerous or who gets hurt in the process.
* Big Hero 6: The Series" has GoGo mistaking one of Honey Lemon's miniature chemballs for a gumball. After eating it, she blows up like a balloon.
* Big Hero 6: The Series. It's perfectly benign, but they react like they just saw him naked or something.
* Big Hero 6: The Series notably averts this, preferring to hear the explanation

verbally or just check the news.
* Big Hero 6: The Series of Baymax to tell him not to snack since she's bringing home butterfish for dinner.
* Big Hero 6: The Series. One of those areas is Fred's room; Heathcliff is dusting the room, oblivious to the battle behind him leaving a big mess. But after they're gone, he turns around, and sees the mess.
* Big Hero 6: The Series schtick), but Mr. Sparkles continues to control them, even in cute form.
* Big Hero 6: The Series shows more of the differences between the 2030s and the 2010s. Fashions, slang, and the general atmosphere don't seem different from the 2010s, however, they have robots that can turn into frisbees for one. At the same time, everyone still uses touchscreen tablets.
* Big Hero 6: The Series, to the point where he almost has a breakdown because he thinks that he misplaced Honey Lemon's invention.
* Big Hero 6: The Series Unlike most examples on this list, there's nothing to do with honor in this scene, just a sort of... sad acceptance.
* Big Hero 6: The Series, which makes him more powerful at the expense of draining his battery.
* Big Hero 6: The Series, who voices the aged superhero Boss Awesome and died between the first and second seasons.
* Big Hero 6: The Series with the "mech-wrestling" face Uncle Samurai.
* Big Hero 6: The Series writes fanfics about the titular superhero team.
* Big Hero 6. To be fair though, Tadashi did basically run headfirst into danger to save Callaghan instead of trying to get a firefighter to do it.
* Big Hero 6 were adopted by their Aunt Cass after their parents died when Hiro was three. It's clear that they adore Aunt Cass and consider her to be their mom.
* Big Hero 6, when Hiro and company find the footage from Project Silent Sparrow, they rewind several parts and replay them as they try to piece together who Yokai is and what his motive could be.
* Big Hero 6, when Hiro leaves a police office after unsuccessfully trying to convince a bored policeman about a supervillain being on the loose, a game of Solitaire can be noticed on the policeman's computer screen.
* Big Hero 6, when Tadashi takes his brother Hiro to his lab at San Fransokyo Tech instead of a nearby 'bot-fight. His friends at the 'nerd lab' show Hiro their latest experiments, Tadashi demonstrates Baymax and then introduces Hiro to Professor Callaghan, a pioneer in robotics. The implied message is "You can do more with your life than just hustling robot-fights," and by the end of the visit, Hiro goes from scoffing the 'nerd lab' to wanting to apply for a scholarship.
* Big Hero 6 when we were introduced to his seemingly-benevolent true face.
* Big Hero 6. While the rest of San Fransokyo looks like early 21st century America, Baymax has an all-white body, minimalist design, and rounded surfaces.
* Big Hero 6, who dresses up in black and uses dark-colored robotic swarms, that make him look as if he controls darkness itself.
* Big Hero 6, who had already graduated from high school at age 13 at the start of the movie and was being persuaded to attend college by his older brother Tadashi, who technically also counts as a teen genius as well.
* Big Hero 6 who willingly joined the team, if a bit aloof and snarky.
* Big Heroic Run: A hero dramatically runs, possibly to make an escape or bring about someone else's.
* Big Heroic Run: In which the hero runs at full tilt to save the day or fulfill his goals, usually scored with a rousing fanfare.
* Big Honking Traffic Jam heard in traffic which is completely stationary.
* Big Honking Traffic Jam: When in doubt, blast your horn until the light turns green!
* Big Human on Campus if they're not outright evil, and everyone tends to take a very casual view towards violence.
* Big Human on Campus, Moka is Betty to Kurumu's Veronica for Tsukune.
* Big Human on Campus, Ranma's trained giant spiders see humans as gods and monsters as pretenders.

* big impact (like, say, crashing a car into it), or you need something that concentrates the force delivered onto a single point (like a window-breaking hammer, or a spring-loaded center punch), or something that combines the two ideas (like shooting a BB gun at it with sufficiently high speed).
* Big infrastructure projects are very prone to this and NIMBYs are one of the main reasons why many a project has spent decades in
* Big Iron, the villainous Texas Red has made a notch in his pistol for each kill he's made, which is up to twenty by the time of the song. He's planning on making the Texas Ranger pursuing him into number twenty-one.
* big it is. It's basically a giant can big enough to hold planets, originally filled with nothing but sky for a species of hydrogen balloons, but now covered in jungle-like ecosystems.
* big. It was supposed to be 1/4th the mass of the Moon. Most asteroids are smaller. Justified if you consider the hull to be some superdense degenerate matter for radiation shielding.
* Big Jake, set in the year 1909, alludes to the Edwardian Era. The narrator contrasts the "civilised" Eastern United States and Europe with the American West, which is still wild and violent, though slowly becoming less so.
* Big Japan Pro Wrestling had a variation of Hell In A Cell with a scaffold. The ring was covered in thumbtacks and "Japanese kenzans".
* Big Japan Pro Wrestling, longest lasting successor to FMW(turned competitor when FMW was revived), had such innovations as "heat stones"(space heaters wrapped in barbed wire), piranhas tanks, scorpions and buzz saws.
* Big Japan Pro Wrestling's early years were basically propped up by two wrestlers who departed from
* Big John Studd. If Andre slammed Studd, Andre would win $15,000, though if Andre was slammed, he would have to retire. If you're wondering who won, Andre's last WWF match was six years later.
* Big, Josh and Billy are at a diner, looking through the classifieds for a job for Josh to support himself until he can find the Zoltar machine. Billy is eating an ice cream sundae, and Josh takes the cherry, puts it in his mouth and rolls it around on his tongue, disgusting the adjacent customers. It goes to show you the things you do at 13 aren't so amusing at 30.
* Big: Josh wakes up to discover he has aged seventeen years overnight. He doesn't believe it at first and looks to his genitals to confirm it.
* Big Labyrinthine Building: A huge building consisting of nothing but a maze.
* Big lampshade is hung in the Not-Quite-Rude Chemist sketch (Customer: "I'd like some after shave, please." Chemist: "Certainly, sir. Walk this way." Customer: "If I could walk
* Big larger than any other member of the cast, it's to be expected. His "Take the A-Train" special is a variation, where he grabs them with the same arm, then slams them with a weaponized trombone slide built into said arm to launch them bodily across the screen.
* big letters: "Don't do this!"; and finally a shot of the car leaping across the gap in the bridge.
* Big like he'd wished, he tries going back to the carnival, but discovers everything's gone, including the wishing machine that made it possible. So when he heads home, his mother is initially terrified when a strange man is in her house and gives him her purse and tells him to take what he wants and go, until he mentions her son, whereupon she attacks him and sends him out of the house.
* Big-Lipped Alligator Moment: A bizarre scene not relevant to the story's plot that is never brought up again after it occurs.
* Big-Lipped Alligator Moment: A bizarre scene that comes out of nowhere, has no significance on the plot, and is never mentioned again after it ends.
* Big-Lipped Alligator Moment: A tense scene can be interrupted by a short, random scene.
* Big-Lipped Alligator MomentA totally random event is inserted into a serious story, then never referred to again.
* Big-Lipped Alligator Moment, has her telling Kim that she's her biggest fan, and

asks for her autograph.
* Big-Lipped Alligator Moment, Jade bursts through the door of Shendu's palace, smashing it, and he says "I have a door gong."
* Big-Lipped Alligator Moment may or may not be padding; it could be vital to the plot.
* Big-Lipped Alligator Moment reference later, when King Gator sings a single word from the song.
* Big List of RPG Plots adventure hooks and a larger number of twists that can be applied to them.
* Big Little Brother: The younger sibling is notably taller than their older siblings.
* Big Little Lies: In Season 2, Mary Louise's custody petition may be motivated purely by revenge, but her concerns about the effects Celeste's issues might have on her sons are on point.
* Big Little Lies, Shailene Woodley was nominated for Outstanding Supporting Actress, along with Laura Dern, although her character had more time than Dern's, had more storylines, and was considered a lead character. Dern ended up winning the Emmy. This is also strange considering that Reese Witherspoon and Nicole Kidman, who were also billed as leads, were nominated for Outstanding Lead Actress. It may have been done to limit the amount of lead characters in the category so no one could get cancelled out.
* Big Little Man: something conveys size, but the person is actually small.
* Big Lots has several, including G1 combiner bootlegs, "Robot Kings", and the "Battle Robots", one of which is an even flimsier clone of the aforementioned Rodimus Ferrari wannabe.
* Big Love, as Bill and first wife Barb get down to business, it cuts to outside, the next morning, with a sprinkler popping up. It's not clear if this represents their sex the previous night or the extra morning session they decide to have.
* Big Love, as she thinks it means she will gain a friend and an ally in her clashes with Barb and third wife Margene. When she discovers he's fooling around with Barb, she's hurt and disappointed.
* Big Love, ergo matches are made outside of the realm of informed adult consent. However, the family of the main characters mostly came together as consenting adults, though Margene revealed in season 5 that she was only 16 when she married Bill. The age of consent in Utah is 18.
* Big Love gives us the Juniper Creek couple which is an Exaggerated Trope: Rhonda Vulmer and Roman Grant. Rhonda is fifteen while Roman his in his seventies. There are plenty of other examples discussed in-Series where grandfather-aged men take teenagers as wives.
* Big Love has Margie leaving the main Mormon church and joining a polygamous offshoot. (Which, if the Mormon church learns of it, is grounds for immediate excommunication; hence a lot of the secrecy).
* Big Love, in particular at the beginning of the series, due to both the considerable mental and physical stress that he's constantly under (running two stores and preparing to open a third, running and maintaining three separate households, trying to be a good husband to all three of his wives, financial troubles, etc)
* Big Love: Margie tells one as a comeback to a possible suitor: "How many male chauvinists does it take to change a lightbulb? It's not the bulb that has to change."
* Big Love openly identifies as a woman, but her husband calls her Brother Selma and she prefers suits to dresses. Many fans headcanon Selma as trans because of this.
* Big Love recreation."—even though she's secretly been taking birth control pills for years.
* Big Love, set in the 2000s, Margie is tired of saying her sons are illegitimate (to conceal her bigamous marriage) and claims to a neighbor that her husband, the father of her children, was killed in the Gulf War, which happened in 1991. Her sons are about six and seven, and Barb, her sister-wife, exasperatedly points out

the date.
* Big Love, the family goes on a road trip. About halfway through the episode, Bill comes out of a bathroom to find all three cars (essentially, one for each wife and their respective kids) gone and himself stranded. It turns out that everyone simply assumed he was in someone else's car and therefore drove off without him. (Although given the amount of bickering that had been going on, one can't help but wonder if subconsciously, they did it on purpose).
* Big Love where Nikki's daughter Cara Lynn and her math tutor Greg fall for each other. It does not end well- the couple are forced apart by Nikki, who implies to Cara Lynn that she wasn't the first student he'd been with (though it's ambiguous as to whether Nikki's telling the truth or lying to suit her own purposes) and then attempts to send her off to boarding school to avoid any further incidents.
* Big Love, where the ashes belonging to Margene's mother are spilled on a windy boardwalk after Margene accidentally leaves the urn on the roof of one of the family cars.
* Big L wasn't intented to be his last hurrah (excluding posthumous albums put together using unreleased tracks). If anything, it was supposed to help skyrocket his career. And then, while the album was still incomplete, he passed away in a drive-by shooting in 1999. His manager Rich King finished the album and published it the following year. The intro tells you immediately this is the last time you get to hear L. Better enjoy it.
* Big Mac. At one point, when he's about to start lecturing her yet again, she unceremoniously stuffs an apple in his mouth.
* Big Macintosh also got this reputation after "Sweet Apple Massacre". Unfortunately, this was an example that was
* Big Macintosh apparently does this whenever someone brings up his deceased parents, as it is mentioned that he left the farmhouse for hours and returned with cider on his breath whenever his little sister Apple Bloom asked him how they died.
* Big Macintosh, Applejack and Granny Smith in "The Cutie Pox". It's been turned into
* Big Macintosh is about a full head taller than Cheerilee and twice her build, which is obvious when the Cutie Mark Crusaders
* Big Macintosh overloads the Apple family jalopy when they go on their road trip in "
* Big Macintosh was originally "Big Apple" and Apple Bloom was originally "Appleseed", but both were changed at the request of Hasbro's legal department for this reason.
* Big Mac's plan has him tie different notes to a bunch of apples and scatter them around town for Sugar Belle to find, telling her to meet him for a picnic where he was going to pop the question. But he gives the apples to Discord, who decides to use his magic to bring them to life and tell them where to go. Unfortunately, Discord didn't tell the apples
* Big Mac, to the point that none of his family could ever get a word in edgewise. He became famously monosyllabic in an attempt to listen to others more.
* BIGMAMA," a bittersweet animated video about a girl and her cat animated by Rapparu.
* Big Mama's resistance group consists entirely of war orphans whose only goal in life is to fight without anyone's interests.
* BIGMAMA to Japanese, following the line "We are the specials" to "Bokura wa specials" (with "bokura wa" meaning "we are").
* Big Man Japan has ads and logos tattooed all over him. At one point he's forced to let a monster free from his chokehold because the watching advertisers complaining he was covering up their ad!
* Big Man Japan knock-off. The deadly monster becomes a goofy guy in a red suit. This can be interpreted as the protagonist's fevered visions before death or something even stranger.
* Big Man Japan who regularly attack the city. Most of them have human faces, yet have varying degrees of intelligence.
* Big Man on Campus and super-talented basketball captain, but also increasingly

uncomfortable with the expectations of his parents, friends and the rest of the school. In the third film, after a song which screams self-loathing (to the point of him ripping down posters of himself), he decides to go to a different college than expected, thousands of miles away from his hometown, partly to get away from the spotlight and pressure. In fact, a huge part of his and Gabriella's initial attraction is that they accept each other as themselves and not the hyped up perfect people everyone sees.
* Big Man on Campus: Huge, abrasive, and intimidating guy on campus who means serious business.
* Big Man on Campus. She is too shy to ever actually approach him, and her friends keep pointing out that the two of them have nothing in common and he barely knows that she exists.
* Big Man on Campus, where he was an awkward teen who was completely oblivious to the fact that not even the ugliest, fattest, most revolting girl in class didn't want him.
* Big Man on Hippocampus's case treated like a current event. The fact that all of the high school scenes look like they're straight out of an '80s teen film might be intentional.
* Big McIntosh is voiced by Mario Scarabelli in the first four seasons and Lorenzo Scattorin in season 5 onwards and the
* Big M. dresses as one of his enemies, Smart S., in Season 3 episode 22 of
* Big Mike drops his fishing tackle box when he gets a text about a security breach at Buy More. In a much earlier episode, he likewise drops his danish (a huge shift in moment-to-moment priorities for the character) when the fire alarm is pulled at the Buy More.
* Big Mom catches up to them while she's one her hunger rages, when she appears to be walking on water to catch up to their ship, and when she actually boards said ship.
* Big Mom Charlotte Linin one of the four "Emperors of the sea" as her name suggests she's "a really big mom" having 84 children (which almost unbelievable as she's ugly as hell). Big Mom is a
* Big Mom has such a big sweet tooth that she orders islands under her protection to pay her candy in return. If they aren't able to pay her back,
* Big Mom. He is wrong. And Big Mom also pulls it on Vinsmoke Judge simultaneously.
* Big Mom, if one doesn't consider her three main Homies (chunks of her soul acting as powerful servants) as part of her. Reaction times aren't quite as lightning-fast as most to be found that far into the New World, and her speed, while not exactly slow, isn't gonna let her pull a
* Big Mom is a real threat and most of her problems are played for drama, but the lengths her
* Big Momma's House series: Played straight in the first two films where Big Momma becomes a member of the family and draws everyone together.
* Big Momma's House wasn't screened for critics, but surprisingly did well at the box office despite being critically panned and gaining a Rotten Tomatoes score of 6%.
* Big Momma's House, when one of the undercover cops has just moved into a neighborhood as part of the operation and is greeted by his female neighbors. When asked if he has a wife, he replies that she's "gone". They sadly ask if she's with Jesus. He corrects them by saying that the guy prefers the Spanish pronunciation.
* Big Mom of the Four Emperors definitely qualifies. While she's not a member of the giant species herself, she was an inordinately large and powerful child who was abandoned to live among the giants and even posed a threat to them. As an adult, she's nearly 30 feet tall, making her one of the largest humans in the series, though nowhere near as big as an actual giant.
* Big Mom, one of the Four Emperors, was born Charlotte Linlin, a natural force of destruction who was taking down full-grown giant warriors at the age of 6
* Big Money Hustlas has plenty of this going around. But first, you gotta HYPNOTIZE THAT MOTHERFUCKA!
* Big Money Hustlas, the counterfeiter Bootleg Greg tries to pay his tithe to the

crimelord Big Baby Sweets with counterfeit bills. Sweets's bodyguard kills him and flips his bills over - they're only printed on one side.
* bigMooney06 walking through an area killing everyone, even defenseless innocents, would be so funny.
* Big Mountain's "Baby, I Love Your Way", which was an international smash in 1994.
* Big Mouth: A common fan theory to explain why Nick got a female hormone monster to replace Maury at the end of Season 2 was that Nick would come out as transgender. Connie even calls attention to this possibility at one point, though it otherwise seems to be jossed. A canon trans character would appear in Season 4 and also joss the idea that a hormone monster matches one's gender, as her hormone monster is aggressively masculine, much to her displeasure.
* Big Mouth and relatable to most people's lives, it grew in popularity.
* Big Mouth, Andrew tries to repress his sexual urges while out on a date with his crush, but Maurice, his hormone monster, won't leave him alone, so Andrew tries to ward him off with pictures of his grandmother and a mezuzah (he thinks it works like a cross). When neither of those work, he subjects Maurice to Garrison Keillor jokes, causing Maurice to convulse in pain.
* Big Mouth: A segment in "The Planned Parenthood Show" shows how Andrew's parents met, as hearing "Groove is in the Heart" on the radio prompts a flashback to a concert where Barbara had a one-night stand in the 70's. Barbara got pregnant as a result, so she got an abortion, but on her way back from Planned Parenthood, she rear-ended Marty's car. Marty confronted her, but calmed down when he saw how upset she was, letting her cry on his shoulder. The sequence then shows them on their first date, at their wedding, and at Andrew's birth.
* Big Mouth, as the pizza boy admits that he already ate the pizza and his co-star tells him to not burp into her vagina.
* Big Mouth claims that life in Earth started when a giant alien had sex with a hole in the ground.
* Big Mouth episode "Florida", Andrew finds himself strongly attracted to his cousin Cherry, who reciprocates. Nick repeatedly points out how icky this situation is.
* Big Mouth features Andrew Glouberman, a pubescent boy, who masturbates to deal with his spontaneous erections, as well as after he discovers porn.
* Big Mouth has an episode set in Florida. The main plot revolves around Andrew's cousin trying to seduce him. Maurice goes full throttle on this trope with his song "Anything Goes In Florida", which features children getting eaten alive by alligators, the KKK taking their children to Disney World, public masturbation and Maurice snorts bath salts right before eating his dealer's face of his skull.
* Big Mouth has Connie Monstress appearing in a science fiction-ish skit where she reads her "lines" as "Chewbacca sound" (including one case where she actually makes the requested noise, but still also says "Chewbacca sound").
* Big Mouth has the episode "Girls Get Horny Too" where Jessi has a conversation with her vagina.
* Big Mouth in "The Head Pusher" to the extreme. Even his irises pop out!
* Big Mouth in the second season due to an extensive marketing campaign.
* Big Mouth is the embodiment of shame and is always there to spread guilt amongst the main cast and all the other students in their grade. However, as he rightly points out in his song, without shame, things would devolve into a chaotic mess. Andrew himself also realizes that shame helps everyone reflect on their wrongdoings and gives them the chance to learn from it.
* Big Mouth, Miss G does this to Coach Steve. He doesn't mind, as this is the closest he has gotten to being in a relationship.
* Big Mouth. Nick is also voiced by Nicolas Matthys in the European French dub.
* Big Mouth, respectively. Also, the Old Queen in the episode "Guy Town" is voiced by Harvey Fierstein. In the fourth season, transgender character Natalie is voiced by Josie Totah, who is also transgender.
* Bigmouth's Friend": His latest attempt to get series antagonist Gargamel to be his friend fails, as does his attempt to walk in on a family picnic to get the kids to play with him. He eventually befriends Clockwork Smurf (himself in a funk with

being accepted by others). A series of events that involve Gargamel working with the evil Lord Balthazar to both capture Clockwork and overthrow King Gerard will go a long way toward helping Bigmouth realize who his true friends are. Prior to this episode, Bigmouth's decisions on who he decided his friends were often were based on who could help satisfy his needs first; other episodes depicted Bigmouth's clumsy attempts to become friends with the Smurfs, who were often scared of him because of his ways.
* Big Mouth speaks in a rather stilted manner, has difficulty in reading social cues, and doesn't like anyone touching his rolling backpack. Some autistic fans of the series find him to be the most realistic portrayal of autism.
* Big Mouth, telling him to "try not to think about AIDS" so it'll be sexier. Not even a second later, Maurice looks very sad and says he's thinking about AIDS.
* Big Mouth: The climax of "Poop Madness" has Nick help Andrew deliver the poop he's been holding in all summer, complete with Andrew doing breathing exercises, Nick wrapping the poop in his shirt like a blanket, and Maury and Connie walking onto the scene with an "It's a Shit!" balloon to celebrate. And then Andrew poops again, remarking that they're having twins.
* Big Mouth, their conflicting life goals and interests ended up destroying their marriage over the years to the point that Shannon ended up having an affair.
* Big Mutha Truckers includes a side mission where you must haul a tanker filled with a sensitive, volatile chemical from one location to another within a time limit, on threat of a massive explosion. The guy riding shotgun with you while you make the delivery literally calls the chemical "Explodium".
* big-name guest star likes to disrupt the curve by offering up multiple guest stars.
* Big name LPers are able to bring spikes in popularity to otherwise unknown franchises.
* Big Nate, believes that casual acquaintance Jenny has a massive crush on him that she's simply repressing, and he's determined to draw it out. He's been trying to make her his girlfriend since kindergarten. But since (1) Jenny wants nothing to do with him and (2) Nate's romantic schemes tend to backfire horribly, he hasn't yet succeeded.
* Big Nate Despite all of this, Artur is just so sweet and nice, that Nate can't find it in himself to hate Artur. In fact, Artur has a high opinion of Nate and values his judgment a great deal which makes Nate even more unable to hate Artur. Ultimately, Nate has Artur's back and considers him his friend.
* Big Nate did an arc about the title character taking part in a middle school chess competition, and wonderfully averted the statement above about players never shaking hands. Each time he shook hands with an opponent, Nate psyched him with a different bit of trash talk, including the simple statement, "Your hands are all sweaty." (The other kid stammered that he had a glandular problem, and Nate thought, "He's mine.")
* Big Nate dreads the designated school photographer, who tells jokes and takes unflattering pictures when the kids react.
* Big Nate featured Nate playing mini-golf with Jenny and Artur. Artur sinks nearly every shot perfectly (despite never having played mini-golf before), and Nate tears himself up trying to outperform Artur.
* Big Nate, hailing from Belarus, speaks in this manner. All the girls at P.S. 38 find this adorable.
* Big Nate has a dream where he is naked in class. He has this dream, incidentally, while he's asleep in class.
* Big Nate has "School Picture Guy", who when not the photographer has shown up as a clown, a reporter, etc…
* Big Nate more than what it's being sold for. When he prepares to buy it, he stumbles over his words and gets very nervous, causing the owner to get suspicious of the comic book's actual worth, and keep the comic book instead.
* Big Nate: Nate’s handwriting is usually decent, but in one strip, he gives the School Picture Guy the name of their band so that he’ll know what to call them when they’re about to perform. Unfortunately for him…

* Big Nate: Nate's had a lot of these. Once he was supposed to write a report on Paul Revere, and instead writes it on Paul Revere from the band "Paul Revere and the Raiders". Another time, he was supposed to do a report on the Ming Dynasty and he ends up making it about the basketball player Yao Ming.
* Big Nate obscure object you care to name, as he has proven to Francis upon occasion.
* Big Nate offered a trade for this kid's sandwich. The kid declined, so Chester stuffed a hot dog up his nose.
* Big Nate saw Nate's dad try to give Nate the Talk and act completely flustered while doing so. Nate found it so hilarious that he invited his friends inside to listen in.
* Big Nate, the title character's dad tends to leap at the chance for some sports bonding, despite being hopelessly un-athletic. Baseball is the most frequent culprit, but football and golf have also made appearances.
* Big Nate: Trash talking opponents is one of the true skills of the titular character.
* Big Nate Wannabe. His combination of utter cluelessness and unwaning self-confidence when it comes to girls is a central theme in the comic.
* Big Nate, while Chester is playing for Al's Auto Glass, Teddy admits that he may have wet his pants after he, Francis, and Nate see Chester throw a baseball hard.
* "Big News" Morgans' only loyalty is to the biggest available scoop, whether or not he needs to embellish the truth a little to get things to spread faster and/or get the public's hearts moving. And if he needs to antagonize one of the Four Emperors at her very own tea party, or antagonize the very World Government (complete with needing to beat the stuffing out of an assassin that wanted to earn his silence through coin or death), so be it; the Big News takes priority.
* Big News-ruled military dictatorship from 1972 to 1986 and then Corazon Aquino's presidency from 1986 to February 1992) until August 8, 2008 before ABC-5's rebrand into TV5 on August 9, 2008.
* Big Night is about a pair of Italian brothers who own a restaurant and make a big feast for singer Louis Prima, which they believe will save them from having to close & go back to Italy.
* Big Night was set in an Italian restaurant, and all the food was undercooked to look better on screen. The actors would spit it out between takes.
* Big "NO!" after seeing Brobot in his house after tricking him onto a bus.
* Big "NO!" and bursts into tears while watching a science experiment in which a donut is burned in order to show how many calories it contains.
* Big "NO!", and gets sucked into the rift, after which the hero closes it back up with the Hanzamune Blade, sealing Kitsune in the rift.
* Big "NO!", clearly tries to kill Future Karai for it. He gets killed by her... only for Future April to avenge them both by blasting Future Karai hard enough to kill her.
* Big "NO!" have been around for quite a while, but even so, they're still being played straight. It can still be pulled off where it doesn't come across as cheesy, but it takes the right context and the right actor to do it.
* Big "NO!", plowing his way through the androids declaring that Future Shredder will pay for it, just before blasting away at Future Shredder with his exo-suit.
* Big Nose Freaks Out: Big Nose is a caveman that has a skateboard made out of a plank of wood sitting unsecured on a single stone wheel. He even invented the wheel himself!
* Big "NO!": Someone screams "NO" in response to seeing a misfortune they really didn't want to happen.
* Big Nothing Simon Pegg's character convinces David Schwimmer's character that nothing could go wrong with their plan to blackmail a local Reverend. Unfortunately, no one is quite what they seem, and soon one thing leads to another...
* Big "NO!" when Drakath gives focuses his Chaos magic into the Supreme Arcane Staff, allowing the hero to use it to convert Ledgermayne back into the mass of mana from which it was made.

* Big "NO!" when she says she'd no longer be his little girl, but gives an equally appropriate Big Yes when asked if he wants to buy band chocolates 3 seconds later.
* Big "NO!", where instead of "NOOOOO!" it comes out as out as "MEEEEEEEEEEAP!"
* Big "NO!", which is so massive it basically causes the movie to implode on itself.
* Big Ol' Eyebrows had a significant influence on this trend. Well-groomed thick eyebrows were even given a slang in the African-American community: "on fleek" became a relatively widely-used idiom.
* Big Ol' Eyebrows hypothetical designs for potential new looks Strong Mad could sport. Nobody in the work actually has large eyebrows.
* Big Ol' Eyebrows look like anyone who's on the ship's records, but generally doesn't.
* Big Ol' Eyebrows, though much more groomed than the unkempt brows of the '80s (which were often the only part of '80s makeup kept "natural.")
* Bigot Hall by Steve Aylett, the protagonist and his friend go out to a small island in the grounds of his home. The first thing they find is a tiny fence, when they tread on it, and then a model of the hall, including a little lake with another, even smaller model of the hall, which has a tiny lake with tiny model...and at this point they freak out, fearing that if look up they'll see giants above them. His father finds them later (hiding under a tarpaulin), and says he knew they were out out on the island when he saw that part of the fence had been flattened.
* Bigotry Exception: I despise all tropers... except for that guy, he's the only good one.
* Bigotry is based not on things like color or orientation, but on things like what alt mode you have or what manner you were built in. Transformers who choose not to transform and have their t-cogs removed are often seen as odd.
* Bigot vs. Bigot: I hate that bigot just as much as I hate those tropers!
* Bigot with a Badge: A bigoted cop or other representative of law and order, who does not change to a more inclusive viewpoint.
* Bigot with a Badge: A racist cop or other law enforcement officer who doesn't change.
* Bigot with a Crush: A character has romantic and/or sexual feelings for a member of a group whom they are prejudiced against.
* Bigot with a Crush: A character is romantically and/or sexually attracted to a member of a group of people whom they are prejudiced against.
* Bigot with a Crush: Even though I despise those people, I'll admit that one in particular looks so... beautiful and charming?
* Bigot with a Crush finds someone to be attractive despite being a member of a race they hate.
* Bigot with a Crush: Someone feels romantic and/or sexual attraction to a member of a group of people whom they are normally disgusted by.
* Big Picture as some of its first offerings, the trailers for which (especially the latter) simply made him feel old.
* Big Picture Show movie, Ed and Eddy manage to scare Edd in the gag factory wearing items that portray with a fork and an axe through their heads respectively.
* Big Planet. The objective of the mission from Earth to Big Planet was to ensure that the whole world didn't fall under the domination of the tyrant Lysidder. But when the mission spacecraft crash-lands, the survivors are faced with a 40,000 mile trek across the vast and unknown surface of the planet.
* big problem grasping the concept of arrows." Like going in the lane with an arrow curving to the left and using it to turn right.
* Big Red a village offers children's hearts to a monster attacking them.
* Big Red Button, intercut with a panicking family fleeing for shelter. Instead of launching nuclear armageddon, the button is just a doorbell being rung by a Jehovah's Witness.
* Big Red Button. Justified because WALL•E does not have a clue about what he's doing, and is clearly just smacking the panel at random hoping one thing or another will save him.

* Big Red Button labeled "EASY" to make needed office supplies appear. Staples later began selling "Easy Buttons" that, when pressed, play a recording of the ad's narrator saying "That was easy." A Spanish version also exists, which says "Así de fácil" when pressed. And a French-Canadian version, that goes "Y'a rien d'plus simple." (Nothing's simpler).
* Big Red Button with the label "To call police". Robin pushes it so the police will come and pick up some captured villains.
* Big Red Devil: The typical depiction of Satan as being a large, red demon
* big red lips, and then big buck teeth; he quickly agrees to help Naruto and Sakura try to see Kakashi's face.
* "Big Resolution" is a New Year's Eve episode, yet aired on January 30, 2021.
* Big Rhonda, also towards Fez, but of the "holding out for something more" variation. She's been with a lot of guys, but Fez is more special and she wants to wait. Fez...does not.
* Big Rigs It's barely remembered, mainly because there's actually collision detection and a moving opponent. It's mostly considered very mediocre.
* Big Rock Ending of a song is spent with the musicians hammering away on their instruments.
* Big Rock Ending of "Tired of Love" from his band Red Vox, he holds the last "love" for a whopping sixteen seconds.
* Big Ron Gomz insists that he is number one on the JLA Most Wanted list, that he knocked Superman through a building, put the Martian Manhunter in a coma, and that
* Big Russian chains went ahead and disregarded kopeks (1 ruble is 100 kopeks) completely in total prices for cash payments - for a total price of 199 rubles and 99 kopeks cashier would take 199 rubles
* Big Sandy And His Fly Right Boys, as in the song he feels attracted to a girl even though she is completely unappealing.
* Big Science Action is more appropriate in this case, though, because while they're all based on heroes from Japanese media, Senior Waveman is based on the super obscure Marine Boy. The others are more familiar; Ultimon is Ultraman, Boss Bosozoku and Boss Bishounen are based on Kaneda from
* Big, Screwed-Up Family: A horribly bleak, loveless, and all around dysfunctional family.
* Big, Screwed-Up Family. All of Team 8, the Third and Jiraiya know about it. Gai, Kakashi, Asuma and Iruka also seem to have an inkling. Not only can they not really talk about it publicly, but Hiashi has such powerful connections that he won't answer for his actions (something the Sandaime points out). They collectively decide to come up with plausible reasons for her not to be at her house or near her father.
* Big, Screwed-Up Family for a very good reason. Assassinations, sex scandals, accidents, medical problems, a botched lobotomy... the misfortunes and tragedies they faced are too much to bear.
* Big, Screwed-Up Family, most of the histories see some permutation of second cousins twice-removed competing for the throne or other.
* Big, Screwed-Up Family, so it sort of makes sense. It's not confirmed in the books, but stated to be a rumour...one that isn't hard to believe.
* Big, Screwed-Up Family: The family not only hates each other, but are also trying to kill each other.
* Big, Screwed-Up Family: The Mesopotamian gods and the Hittite gods. There is a pattern here, considering their creation myths are suspiciously similar.
* Big Secret: Hiding a secret causes a person to be suspected of a crime.
* Big Secret: Someone lies during an investigation to hide a secret unrelated to the matter at hand.
* big sequence with young Spock is taken nearly word-for-word from the episode.
* Big Shell Evil's "Snake Tales". Otacon wants Snake to go to the Big Shell to look after his sister, and Snake declines, yet Otacon continues asking. Snake says "Leave me alone!", and the next paragraph starts "Six hours later, I was standing on the Big Shell".
* Big Show in 1995, winning its world title shortly after and became the company's

youngest world champion at 23.
* Big Show in 2012. He planned to retire from WWE in 2018, though he hasn't made it official yet and makes occasional appearances.
* Big Show managed to secure an 'ironclad contract', which made it impossible for any authority figure to unjustly fire him. In 2014 he betrayed his allies in order to prevent an authority figure's attempt to unjustly fire him.
* Big Show not paying attention in an interview and referring to Kai En Tai as "those two gooks."
* Big Show once gave Big Show diarrhea after conning him into eating a tainted burrito.
* Big Show remarking how the arena was descending to near-riot conditions as trash was being thrown at a celebrating Heyman and Show.
* Big "SHUT UP!": A character yells something along the lines of "SHUT UP!", "QUIET!", "ZIP IT!", etc.
* Big "SHUT UP!": Someone interrupts by shouting "SHUT UP!" or some other variant.
* Big Sister Bully flippant reason— but it turns out she thought he went in her room. It still appears to be an overreaction ... until it is revealed a minute later in the episode that Morty masturbates in EVERY room in the house. Even so, they do care for each other.
* Big Sister, Konrad Curze is left perplexed when it turns out Vulkan is able to completely defy his visions of death and despair. While he's briefly left paralyzed by the hope it is possible to destroy the future his visions predict, Vulkan convinces him to take arms and fight the future.
* Big Sister Mentor for Vivio and her friends, to the point that they name themselves Team Nakajima in her honor when they enter in the Inter-Middle Championship (despite her embarrassed protests).
* 'big sister to the world' applies to her, too, as she also has a dangerous temper, especially if someone she particularly cares for is wronged, too.
* Big Sky: Cody gets killed by a shot to the head at close range by. Legarski is also downed by Cassie in the same way, though at a greater distance, later on.
* Big Sky: Helen, Roland's mother, is a subversion. At first it seems like she's this since he still lives with her in his late thirties. She constantly criticizes and nags him, but it turns out this is to make something of himself other than just working as a truck driver. It thus turns out she's not smothering him, but trying to push Ronald in a better direction (it doesn't work).
* Big Sky: Jerrie shows Ronald her body (she's transgender) after he makes her strip and wash, in hopes of that ruining his plan to sell her as a sex slave (because apparently he only wants cis women) and he reacts with shock at seeing this.
* Big Sky: Ronald gets away with kidnapping women for so long partly due to being in bed with a dirty cop who protected him.
* Big Sky: Scarlet steals a small item in her first scene, and says later that she's a kleptomaniac, getting a thrill out of doing this.
* Big Sky: Trans woman Jerrie is played by non-binary actor Jesse James Keitel.
* Big Sky Trooper: The Slug leader and a lackey descend on the Gold Guy, discuss how it has bones and appears to be an ad, then destroy it - as the Slug leader declares, the two things he hates are bones and advertising.
* Big Sky turns out to be involved with sex trafficking, and murders Cody covering it up.
* Big Smoke when CJ and the Grove Street gang visit a fast food drive-through in one of the very first missions. Except he doesn't even bother with the "diet" part, ordering a large soda instead.
* BigSpot.com has a series of commercials that start out looking like commercials for special as-seen-on-TV ads, but they get interrupted halfway through with someone saying how terrible that ad was, then they advertise the website.
* big stompy idols of Gork and Mork, they're building chaotic field artillery or welding big guns onto bigger guns. Its because being the devolved descendants of living weapons made to fight autonomously in the War in Heaven gives them visions and innate understanding of technology that they do this. One shudders to imagine

what a full Krork Mekanik was capable of.
* big stompy robots called "BattleMechs" means the big stompy robots take up over 90% of the screentime.
* Big Storm Episode, several of the rescued prehistoric carnivorous animals end up unexpectedly infected with a mysterious virus that causes them to act unnaturally aggressive and violent while also being bloodshot eyed and frothing at the mouth. This naturally causes them to prove to be a very dangerous threat over the course of the Prehistoric Park staff's efforts at resolving a power failure caused by the storm that has also allowed the park's animals the ability to escape their enclosures.
* big strong henchman (in the first three, played by the same actor) who'll end up being killed in an extraordinarily violent fashion.
* Big, Stupid Doodoo-Head: A character resorts to using childish insults.
* Big, Stupid Doodoo-Head: Character makes childish insults because anything beyond would be considered offensive.
* Big, Stupid Doodoo-Head insults, the former is much more vulgar than the latter.
* Big, Stupid Doodoo-Head: Overly short and blunt insults vs. overly long and eloquent insults.
* Big, Stupid Doodoo-Head: You and your stupid brain should know better than to mess with me, poopyface!
* Big, Susan complains about her recently engaged secretary doing this all day long:
* big sword in a duel to decide the fate of Earth as the planet's champion during "The Christmas Invasion".
* Big Ten Conference named its annual award for its top female athlete after her. Then it was discovered that she worked as a call girl, which torpedoed her career, and led the Big Ten to strip her name from the award (pun not intended).
* big, thanks to Laura tiring of Myra's constant accusations of her stealing Steve.
* Big the Budo, who for the past two rounds had been working as Neptuneman's lackey, is revealed not only to be Neptune King, the one in charge, but the one who turned Kenkaman INTO Neptuneman, making him the true villain of the Choujin Tag Arc.
* Big the Cat is also an aversion being a gentle and easy-going guy, albeit one who isn't very bright.
* Big, the fortune-teller machine works despite not being plugged in. At the end of the movie, the protagonist is trying to reverse his sudden adulthood, and at first only gets normal fortunes out of the machine - until he realizes that it's actually plugged in, and swiftly pulls out the plug to set it back in "magic mode".
* Big. The movie got a PG rating despite one usage of the word "fuck".
* Big: The Musical as it began tryouts in Detroit, there was huge shameless shilling of the FAO Schwarz stores, as they were one of the major producers of the show, and a pivotal scene (yes, the piano, too, was an important part of the production number) took place there. As time went on and the musical moved to Broadway, while advertising for the show was still all over the FAO Schwarz on Fifth Avenue, the product placement in-show was averted, and the store was no longer explicitly referred to by name. Its ersatz theme song still existed though:
* big. They're pretty much the Borg, and they don't care if you don't want to be linked into the emotionless hive-mind.
* Big Thunder Mountain Railroad at Disneyland is a sign showing the population number of the nearby towns, which reveals that the number of people has gone from 2,015 to just 38.
* Big Thunder Mountain Railroad. Depending on the place, the story is usually something along the lines of some sort of possessed/ghostly runaway trains that continued to run after a disaster of some sort hit the area.
* Big Thunder Mountain Railroad is apparently built on one, according to its back-story. It's said that this causes an earthquake on the third lift hill of all versions.
* Big Thunder Mountain Railroad mentions that the gold within the mountain caused several boomtowns to form until the vengeful spirit from within the mountain struck

the land with a natural disaster, rendering said towns abandoned.
* Big Thunder Mountain Railroad mentions that the mine trains the guests ride in are possessed by the vengeful spirits of the mountain, making them move on their own.
* big time even without Master Crane, Chiaotzu still follows Tien with question and he dies (twice) Tien tends to go apeshit.
* Big time, except the spike from cheerful to fearsome is much sharper.
* Big Time Rush also showcased this when one of the guys dressed as a girl to get into an all female school to meet a favorite author of his.
* Big Time Rush and the boys manage to convince her to let her kiss Carlos in the show.
* Big Time Rush. Apparently giving a rose to a princess is a marriage proposal in some foreign countries.
* Big Time Rush are named after their respective actors Kendall Schmidt, James Maslow, Carlos Pena, and Logan Henderson.
* Big Time Rush: At the end of "Green Time Rush", Kendall and Jett win their class contest...and have to go to Washington D.C. and do a formal presentation. The last scene is Kendall in misery on the plane, stuck with a kid kicking his seat and Jett rambling away.
* Big Time Rush but by necessity, only in the pilot episode. The boys are depicted as having no aptitude whatsoever for singing or dancing, until they finally agree to buckle down and get serious about learning from Gustavo. Of course, in real life, the four actors all needed to be skilled singers and dancers already, or else they wouldn't have been cast in the roles in the first place. From the end of the pilot episode and continuing through the rest of the series, the actors' real talents were allowed to shine.
* Big Time Rush does this on occasion, most notably when the boys are reminded of or think about past actions they've done (like in one episode, they flashback to causing an explosion in the Palmwoods pool using dynamite). Most of the time, said cutaways are mentioned later in the episode.
* Big Time Rush episode "Big Time Concert" had Jo and Kendall do this to hang up a Big Time Rush poster. (She was sitting though, not standing.)
* Big Time Rush episode "Big Time Wedding", James accidentally proposes to a visiting foreign princess from Kerplankistan by kneeling in front of her with a white rose. In the end his friends save him by tricking the princess into marrying one of her servants, both of whom are happy with this.
* Big Time Rush fit this trope. Griffin (who owns the record company) is smooth and collected, while Gustavo (who works under him) yells a lot.
* Big Time Rush Gustavo pays a girl to date Carlos and then get him to break up with her. Unfortunately, when she tries to break up with him he's okay with her spending all his money and being demanding and emotional. The kicker is when they date for real he breaks up with her because she doesn't like corn dogs.
* Big Time Rush has the nasty hotel manager putting up a sign to prevent children from swimming: "Adult Swim. No kids allowed." Kendall takes out a marker and adds some creative punctuation: "Adult Swim? No! Kids allowed!" Everyone proceeds to jump in.
* Big Time Rush involves the boys trying to help a friend of theirs get a singing gig. But disaster follows her wherever she goes, costing her a lot of jobs. This includes hospitalizing a large number of international agents by triggering a large explosion trying to perform for them (at the Palm Woods, because the boys were afraid they'd endanger the city taking her out to meet them). Ultimately, they find a band who is looking for a super destructive lead singer, which her natural 'talent' made her perfect for.
* Big Time Rush Kelly, Gustavo's assistant manager, tells Carlos that he'll have to deal with the problem on his own—until C.A.L. starts spouting sexist rhetoric ("WOMEN ARE WEAK"). She then takes a baseball bat to the machine.
* Big Time Rush: Kendall does not approve of Bobby's interest in Katie. It doesn't help that Bobby calls her "Shmoking hot" and tried to kiss her twice.
* Big Time Rush song "Any Kind Of Guy" is about the guys announcing their intent to

become any kind of guy the girl might want:
* Big Time Rush, the band and Gustavo are ordered to record three Christmas songs by their stuck-up manager by the end of the day, forcing Gustavo and Kelly to delay their vacation to Fiji. But after already writing three songs, the manager orders them to write one more song. Gustavo finally snaps and starts smashing instruments in the studio.
* Big Time Rush, the guys suck up to the daughter of Griffiths, the owner of the record label, assuming she picks which demos her dad signs on as regular acts. She goes along with it for a while before finally admitting her father uses a "unique super-secret weapon" to choose which acts end up becoming stars. The guys, Gustav, and Kelly have a priceless reaction to finding out what it is.
* Big Time Rush was played straight... apart from the quirk that he was promoting a pocket-sized portable grill, and so was constantly producing different varieties of grilled meats (stop smirking) from his pocket, and offering them to people.
* Big Time Rush, when James briefly joins Hawk Records, they change his name to Jamez. And as can be seen from the posters in their studio, all of their other artists have a 'Z' in their name too.
* Big Time Rush, when the band is mansion-sitting for Gustavo, he gives them five rules to follow — Don't go in his media room, don't open his fridge, don't sit on his couch, don't touch his cat, and don't break anything. Cue the guys breaking every single rule — in order — and causing all kinds of mess. Cue Mrs. Knight, who was upset earlier over her son's decreasing reliance on her, sweeping in to save the day.
* Big Time Rush where James pursues a side career as an actor, he realizes that people recruiting actors do take more than just looks into consideration as well as the fact that he's not the only pretty face out there.
* Big Tits Zombie also features a version of the Necronomicon, which summons and controls zombies.
* Big Tits Zombie finds a zombie head at the bottom of the chest full of cash.
* Big Tits Zombie, Ginko grabs a katana from the yakuza bathhouse and uses it as her primary weapon for fighting zombies. It can parry almost anything, and can cut zombies in half lengthways.
* Big Tits Zombie, her vagina sprouts teeth and starts shooting flames at her friends.
* Big Tits Zombie's grave, where Rena places plastic flowers on the grave as that was all she could find. Rena and Ginko then head back to the theatre to open a can of whoop-ass on the zombies.
* Big Tits Zombie, the main character finds a chainsaw and is so overjoyed, she practically starts crying. The chainsaw even glows. This movie loves this trope so much that the first zombie kill, moments into the film, is a chainsaw attack.
* Big Tits Zombie. The zombies all sit around and eat her with chopsticks.
* Big Tits Zombie: When the dead are summoned to rise, the sushi the girls are preparing comes alive and attacks them.
* big tongue, and usually the only part of the whale that's easily accessible without chewing through skin as thick and tough as a car tire.
* Big Top Bop is an epic metal song that uses some very circusy sounding instruments in some parts. Although the effect is more empowering than creepy, it's still played in a minor key.
* BIGTOP BURGER: after the Zomburger crew manages to shoot Bigtop Burger's Steve out of his food truck with a cannon, the leader of the crew, Cesare, tells everyone else to pour Gatorade on Conrad (who manned the cannon). Unfortunately, their victory is short-lived since Steve soon shows up to retaliate.
* BIGTOP BURGER reveals that the entire season of episodes takes place within a single day, as evident by a customer who returns from the first episode and asks the Bigtop employees about "this morning".
* BIGTOP BURGER's Cesare. He has the requisite pale skin, black hair and sunken eyes.
* BIGTOP BURGER, the titular food truck joint's main rival, Zomburger, prides itself on having the worst, most inedible food possible. Cesare, the business

owner, proclaims that they're "practically selling charcoal on a bun". Their main draw comes from social media posts from customers sharing and promoting the kitschy zombie theme and how awful the food is, instead of the quality of the food itself.
* BIGTOP BURGER, the Zomburger's phone number as seen in their ad is 555-BURG.
* Big Top kidnaps Dusty and replaces him with a robotic clone. Upon seeing the bot, Wink asks, "Did you get a haircut or something?" Dusty-bot replies, "Tinted corrective lenses. For my corneas."
* Big Top Pee-wee, Pee-Wee Herman is a farmer who keeps a hot dog tree under wraps.
* Big Top Pee-wee: The title character is cultivating a hot dog tree, which is technically a bush, but does somehow grow hot dogs. Halfway through the movie he makes a mistake and the hot dogs shrink, giving him one that grows cocktail wieners.
* Big Top Pee-wee, with circus owner Kris Kristofferson (5'10) and his wife, who is small enough to live in his shirt pocket.
* Big Top Scooby-Doo! climaxes in a fight between Scooby and Shaggy and the villain atop the circus train.
* Big Top Scooby-Doo! gives himself away by referring to the black diamond, despite supposedly having been kidnapped when the gang learned that carbonado referred to a black diamond.
* Big Top Scooby-Doo!, Shaggy does not believe in Sweden, stating that it is a made-up place like Fairyland. Or Australia. By extension, he does not believe in kangaroos.
* Big Top Scooby-Doo!, who's canonically eaten Scooby Snacks of his own free will since the original series.)
* Big to romance tropes, he merely points out the mustard and never tries to clean it himself, even when she pretends not to know where it is.
* Big Train; a lady describes her assailant using a barrage of adjectives that have nothing to do with visual appearance to an increasingly frustrated police officer.
* Big Train did a sketch where one new office manager had a phobia of spoons and was explaining to his new co-workers about this by passing a piece of paper with the word "spoons" written on it so as not to even mention spoons himself. Sadly, one of the employees is late to the meeting and enters the room stirring a cup of tea. Cue the office manager diving out the three-storey window to get away from the spoon.
* Big Train is about a terrible pun making DJ who repeatedly interrupts the start of a song to make stupid puns on the word "Bean", until he runs out of puns and goes down into a basement to yell at a group of chained children who were supposed to be writing his jokes for him.
* Big Train sketch has an employee in a large food company attending a presentation, where someone is explaining that they found their cakes sold better when they were heated up. The character quips: "You could say that they sold like hot cakes!" - which is met very coldly from everyone present. He's transferred under a cloud to the broth department, where his new boss explains that they recently ruined a batch of broth by having too many chefs in supervision, to which he starts to quip "You could say that... you've bollocksed it up."
* Big Train) tells her boyfriend she's leaving him for "something else" — a set of traffic lights. She eventually decides to return, but the man has taken up with a lawn sprinkler.
* Big Trouble. After he and his assistant abandon their rental car in the middle of a traffic jam, he steps into the path of an approaching airport bus. Not only does the bus stop just short of hitting him, he also manages to plant a hundred dollar bill on the windshield.
* Big Trouble, and then given an untrumpeted release when it became clear that if they waited for 9/11 to blow over, they'd all be dead before they could release it.
* Big Trouble are carrying is actually an (incredibly obvious) small nuclear warhead and also doesn't notices that they brought a gun with them (they passed it by the metal detector with the other metal objects on the regular tray when she wasn't looking) and makes them move along out of annoyance. But when a cop without a badge (it's a long story) arrives to tell the security officers to be on the

lookout for said crooks, out come the gloves and the strip-searching. This is one of several jokes in the film that, unfortunately, felt too soon in the aftermath of September 11th.
* Big Trouble book. It's often discussed by two out of town hitmen who constantly refer to the complete oddness around them and call it as Weirdsville, USA.
* Big Trouble have far more professional experience in skimming money, decides to punish the embezzling employee by hiring a couple of New Jersey hitmen.
* Big Trouble. In both situations, as she walks away, one of the boys says "Are you watching her ass?" and the other responds "Of course!".
* Big Trouble in Little China, and Jack is able to screw with and get the better of the villains much more easily.
* Big Trouble in Little China and Mentor wizards duel by conjuring up huge glowing spirit-warriors that exchange sword blows.
* Big Trouble in Little China and trying to keep the hype going, with mixed success.
* Big Trouble in Little China, as the film opens with a lawyer questioning Egg Shen about what caused the giant green fireball that appeared over San Francisco's Chinatown (and Egg Shen casually whipping out some lightning to convince the lawyer that yes, shit just got real).
* Big Trouble in Little China battle in the middle of the grand melee at Lo Pan's wedding. The duel is inconclusive, though Lo Pan seems to claim victory. At the very least, he claims that Egg Shen could never beat him.
* Big Trouble in Little China begins with old Egg Shen telling the entire story to a lawyer, but it's a pretty pointless sequence that has no consequences on the rest of the plot.
* Big Trouble in Little China, being quoted as saying, "I’m ambivalent about a remake... On the other hand, it depends on how much they pay me."
* Big Trouble in Little China, but Eddie gives Margo a look that implies Jack isn't wrong. Near the end of the movie, Margo suggestively asks Eddie to come over to her place later and help her choose the title of her planned book.
* Big Trouble in Little China by shooting upwards dramatically. A chunk of the ceiling lands on his head for his effort, and puts him out of commission until halfway through the fight.
* Big Trouble in Little China. During an interrogation, this is used as a threat.
* Big Trouble in Little China fantasy flick, but it points out the reason that few martial arts films have consistent cosmologies;
* Big Trouble in Little China in that Jack Burton and Wang Chi deliberately did not notify them.
* Big Trouble in Little China inverts this when loner, truck-driving hero Jack offers would-be love Gracie the opportunity to settle down, only to have her lament that the only way she would stay with him is if he maintains his nomadic lifestyle.
* Big Trouble in Little China, Jack and Wang Chi drink Egg Shen's magic potion and lead a group of warriors in an attack on Lo Pan's underground lair before he marries their girlfriends as part of an evil ritual.
* Big Trouble in Little China: Jack Burton and the other protagonists are in his truck ready to escape from Lo Pan's warehouse. Burton throws the truck into gear, they all lean forward...and the truck zips backward, bursting out through a wall.
* Big Trouble in Little China Lo Pan) face off against the gang members in the alley, the gang members fire their guns at them. The Three Storms are completely unaffected by the gunfire
* Big Trouble in Little China: Lo Pan floats like this when he's in his ghost form.
* Big Trouble in Little China: Lo Pan's spherical spy monster has eyes on stalks, on its back, and even one in its mouth.
* Big Trouble in Little China Margo Litzenberger to write a story about David Lo Pan's criminal activities. The reporter goes along with the group in the attempt to free Miao Yin from the White Tiger brothel.
* Big Trouble in Little China named David Lo Pan, who dresses the part (well, the spirit version of him does; the decrepit old man version wears a suit and a tie).
* Big Trouble in Little China really is paper-thin, as especially evidenced through

Jack's recollections of his past marriages. He's been abducted into a Babylonian cult, stalked by a vampire, and even spent several months as a voodoo zombie. How he and the rest of the world haven't caught on yet is unbelievable.
* Big Trouble in Little China revealing a monster hiding under his semi-trailer.
* Big Trouble in Little China's beholder-like eye-covered spy creature:
* Big Trouble in Little China. She desperately wants to be an intrepid reporter but just doesn't have what it takes.
* Big Trouble in Little China, she is captured and taken away by the monster.
* Big Trouble in Little China shows us a few of the many Hells, and basically all those that aren't horrific torture forever are this. A few examples...
* Big Trouble in Little China starts with Egg Shen being questioned by his (rather unfriendly) lawyer about what happened. Egg Shen starts explaining, which fades into the events that started off the whole situation.
* Big Trouble in Little China territory. Just a shame that there wasn't a sequel...
* Big Trouble in Little China. The Chang Sing and Wing Kong secret societies line up facing each other (a "Chinese Standoff"). When one of the Wing Kong members yells, they charge to attack each other.
* Big Trouble in Little China, the Chang Sing gang and the villainous Wing Kong gang have what Wang calls a "Chinese standoff" before their big fight near the beginning of the movie.
* Big Trouble in Little China: The kidnapping of a girl with green eyes → David Lo Pan's plan to rule the universe from beyond the grave.
* Big Trouble in Little China, this is implied to be the punishment of those who end up in the Hell of the Horny Dragon.
* Big Trouble in Little China. Though he's the main protagonist, he's essentially a bumbling sidekick to the real heroes: both he and the viewers are left to puzzle over the details of the long-running conflict the rest of the heroes had already been fighting with the villain.
* Big Trouble in Little China: Thunder inflates himself by massively inhaling. He eventually goes too far and explodes.
* Big Trouble in Little China walks a very precise tightrope, giving Jack a puppyish quality that redeems his made-in-America arrogance. The audience roots for him to succeed, and to be taken down a peg or two along the way.
* Big Trouble in Little China wannabe) are implied to get together when their only previous interaction in the movie was an insult.
* Big Trouble in Little China, where Egg Shen uses what appears to be expospeak to clarify meaning something mystically as opposed to technically:
* Big Trouble in Little China. While in his ghost form, David Lo Pan can pass through walls and other solid objects. He can selectively interact with solid objects when he needs to, such as when he holds the Needle of Love and Miao Yin during the wedding ceremony.
* Big Trouble in Little China, who is (at least according to Lo Pan's magical test) a Chinese woman with green eyes. Given her interest in Chinatown and references to it being her people, it seems very likely she was intended to be a woman of mixed European and Chinese descent (or possibly born in Hong Kong to white parents). Kim Cattrall does not have any such ancestry.
* Big Trouble in the Soviet Socialist Republic of Grzkjistan, and branched out into selling off military hardware for American dollars as the Soviet Union started to collapse. They moved to South Florida in the late 1990s and set up the Jolly Jackal bar as a front for their arms dealership, for which Miami turned out to be an excellent market.
* Big Trouble, in which one character is hired to create an advertisement for a brand of beer called Hammerhead. He designs a poster depicting the face of a hammerhead shark, under which is printed the slogan "Ugly fish. Good beer." It's simple and amusing, but the customer hates it and makes him change it to a picture of two mismatched models in a boat. Everyone likes it better.
* Big Trouble, Matt Arnold and Jenny Herk's parents meet through each other, have sex, and eventually get married. Meanwhile, their relationship is somewhat implied to be a bit more than platonic.

* Big Trouble, Snake tries to take advantage of his new ankle injury by posing as a Vietnam vet, along with his bud Eddie. Nobody gives them anything, because they're obviously too young to have served in the Vietnam War.
* Big Trouble style, Arthur Herk ducks instinctively at the sight of Matt's SquirtMaster Model 9000, thereby dodging a very real bullet fired at him by a hitman lurking outside.
* Big Trouble subverts this. Matt and Jenny have a strong crush throughout most of the book. When their respective dad and mom hook up in the epilogue, however, they only go out on a few dates before realizing the whole thing's a little weird and deciding to just be friends.
* Big Trouble, where the airport worker (a single mother working a tiring job for a dubious company possibly about to be shut down by the FBI, with a sick baby and a broken-down car) is portrayed sympathetically. When Snake (accompanied to two other creeps and a young woman clearly not in her right mind) just throws money at her to speed things up, she takes the money and then some for her garage and babysitter bills, but lets them through, even after Snake just tells her all four of them are named John Smith.
* Big Trouble who wants to advertise his beer. The client insists that the beer display be "You have a guy in a boat with a girl, she's in a bikini, she has big tits, they're on a boat, and they're getting hammered! With Hammerhead! The feeling of this ad is, somebody's gonna get laid! In the background swimming around is a shark! The girl has REALLY big tits!".
* big ugly green guy?" about adult Enzo. He later warms up to Matrix and starts idolizing him, though, even attempting to glomp him at some point, only to bounce off his chest just like the previously mentioned boy.
* Big Van Vader and The Killer Bees, never rose above mid-carder status.
* Big Van Vader had Go Nagai himself work on and them not wanting it used by their direct competition.
* Big Van Vader he was under the impression beating the piss out of your opponent was how to go about a match and the Gagnes had to teach him to dial it back.
* Big Van Vader, in his infamous match against Stan Hanson spent a good 20 minutes of it with his right eye bulging out of socket.
* Big Van Vader [Leon White] is a legend in Japan. He's a good example of catching on because at first his wins were feared for causing riots. Later, he became one of the most popular wrestlers in the country.
* Big Van Vader, "The greatest monster in the business", and Mick said he saw rookie wrestlers on several occasions actually quit WCW instead of work a match with Vader. Part of it was that Vader had a tendency to get carried away in the ring and was a notoriously "stiff" performer. In the words of Zach Arnold:
* Big Van Vader wrestled occasional matches until he was 61, dying two years later.
* big victory against the Black Star, to the point that not only had Earth somehow won at the Line they would have been forced to stop for months, even twenty years later, between that, the Shadow War, and the Minbari civil war, their supply situation was so bad the Orieni managed to overrun the Minbari Protectorate.
* "Big Walder" Frey is significantly smaller than his younger cousin "Little Walder" Frey.
* Bigweld is also put on a conveyor but is saved before getting dumped into the furnace as well.
* Big West Conference (founded in 1969; dropped football after the 2000 season)
* Big "WHAT?!": Originated in WWE (WHAT?!) by Stone Cold Steve Austin (WHAT?!), this has become a fan chant (WHAT?!) at WWE events. (WHAT?!)
* Big Whiskey and the Groogrux King is dedicated to their late saxophonist LeRoi Moore.
* Big will listen to honest criticism and complaints about his toys and when a good idea is brought forth, he will go with it. He also does chop sticks for fun.
* Big Windup! feel that he's in the pitcher position only because he's related to the school board director and that he is incompetent. He's actually a good pitcher, but the team just doesn't co-operate with him.
* Big Windup! has a habit of talking about his masturbation habits in front of

others, much to the chagrin of his friends.
* Big Windup!: In Chapter 10, the characters sing that song. At least when the chapter is translated to English.
* Big Windup! is largely thought to have killed interest in the sports genre of anime until the 2010s revived it. Despite its thriving fanbase, the English home video release sold extremely poorly, and thus the second season went unlicensed until much later.
* Big Windup!. Overall the series is too nice to have evil opponents, though.
* Big Windup!. People who watch one sports anime tend to get sucked into others, and as a result, there's a lot of fandom overlap.
* Big Windup! tends to do this concerning his deprived sex life and his habits on masturbation. One particular episode had him getting jumped by the other guys:
* Big Wish has the main character driven insane by wish-granting and how pointless it makes life to get anything you want, so in the end he gives up all but one wish, which he saves for an emergency.
* Big, with the famous piano scene in FAO Schwartz. The floor piano itself was real, but wasn't made in the scale the movie required, being a smaller 6' version compared to the near 16' needed to have the notes and width for two people. After the movie, the company did actually make the longer version, and it was indeed set up in FAO Schwarz for people to play on.
* Big Wolf on Campus, and even lets her get away with a "run-on wish" (several things lumped together under one wish). The catch is, however, that once he grants your wishes you get trapped in his bottle and he is set free, and the only way to escape is to learn magic (which will take thousands of years according to the genie) and grant wishes to trade out with another victim.
* Big Wolf on Campus and more likely a man-eating psychopath, so her surprise is understandable.)
* Big Wolf on Campus. At one point, he even recites a haiku in which he mentions that he soiled himself and feels shame for doing so.
* Big Wolf on Campus at that point. Also, in the other episode, Death has agreed to leave, but as he walks out the door he turns and starts to deliver his classic "In time all will come to..." speech only to have the door slammed in his face...because, you know, they're teenagers, they don't want to hear about that sort of stuff.
* Big Wolf on Campus at the time of the presentation, so the two gave a talk on all the stuff he'd been telling them.
* Big Wolf on Campus episode "Manchurian Werewolf" after being bit by a brainwashed Tommy. She became a member of the werewolf syndicate. Merton also got a dose of the evil life in "Everybody fang chung tonight" and "Boy who tried wolf" where he become a vampire and a werewolf.
* Big Wolf on Campus had a variation in an episode about vampires that can only eat werewolves.
* Big Wolf on Campus has hero Tommy Dawkins prevent the end of the world by winning a wrestling match against a demon.
* Big Wolf on Campus have eyes like this. Tommy being the most obvious example.
* Big Wolf on Campus instead. Only later reruns would include the pre-opening credits scene.
* Big Wolf on Campus is able to figure it out after Possessed-Merton fails to remember the secret word that lets them know if he's possessed or not.
* Big Wolf on Campus is a real vampire, Corey knocks him out and buries him. Merton phones Tommy, whose werewolf senses are sharp enough to pick up where he is.
* Big Wolf on Campus. It switched bodies by touch. Since it switched between "Human forms", that meant it could also posses and animate a giant statue.
* Big Wolf on Campus. Of course, Tommy gets it wrong and thinks you're supposed to imagine yourself naked.
* Big Wolf on Campus, Pleasantville is beset by an astonishing number of bizarre supernatural occurrences; a few of them are connected to the heroes, but mainly it's just a place where weird things happen.
* Big Wolf on Campus, the Evil Werewolf Syndicate try to increase their numbers by

doing this to Tommy; whenever he hears the code phrase he's supposed to bite the nearest person.
* Big Wolf on Campus, Tommy begins to worry that perhaps Lori is only attracted to the werewolf part of him.
* Big Wolf on Campus: Tommy Dawkins, the titular werewolf is a good-natured guy (if a little ditzy at times) and goes on to be good friends with the local weird goth guy, Merton. He also does what he can to help out the Monster of the Week, if said monster isn't actively trying to hurt someone.
* Big Wolf on Campus, Tommy is brainwashed by the Evil Werewolf Syndicate to obey any command preceded by two specific, secret words. Due to a minion's badly timed interruption, those words end up being "Pizza's here." (Yes, hilarity does ensue.)
* Big Wolf on Campus was a kid/teen show on the ABC Family Channel in the early 2000s that featured a high-schooler who was secretly a werewolf, who fought evil creatures along with his friends. They met everything you can think of: vampires, aliens, werecats, witches, robots, Medusa, (meta)fictional characters brought into the real world, mummies, ghosts, Cerberus, ersatz versions of Frankenstein's monster and the Phantom of the Opera, demons, the Grim Reaper, and even Santa Claus.
* Big World! Big Adventures!, and some episodes feature Thomas traveling the world, hence the new name. The episodes are also bookended with a sketch of Thomas presenting them as a flashback to a past event, and telling the viewer the lesson learned during that adventure.
* Big World! Big Adventures!. China only has dragons and pandas, India only has Bollywood, elephants, and monkeys, Australia only has kangaroos, Italy only has the Leaning Tower of Pisa and opera, and Brazil only has rainforests and soccer.
* Big "YES!" in "Nightmare Hospital", when Connie reveals to her mother that her glasses are fake because her vision has been restored (by Steven, in "An Indirect Kiss").
* Big "YES!" suggests that he's having the biggest orgasm of his life.
* Biily Jack Haynes and the late Brady Boone were billed as cousins, both early in their careers in Pacific Northwest Wrestling, and, briefly, later in
* Biker gangs are almost always portrayed in Western United States settings, especially in rural areas. However in real life, outlaw motorcycle clubs are active all over the USA, Canada, Europe, much of Asia, and especially Australia and New Zealand.
* Biker Joke: A biker is driving on the road. Suddenly, he feels a thump on his helmet. He stops, looks around, and sees a sparrow on the grounds which had obviously hit him by accident. He picks it up, and sees it's alive but unconscious. "Poor bird", he thinks. So he brings it to his house, puts it in a cage to recover, places in some breadcrumbs, a dish with water... A few hours later, the bird wakes up:
* Biker Mice from Mars and overall silliness. When the new series started airing in Finland, fans weren't happy with its new toned-down dialogue.
* Biker Mice from Mars: As Ronaldo Rump says, kidnapping is such a harsh word. He prefers to describe Charley as a "reluctant guest".
* Biker Mice from Mars, "Back to Mars", its revealed that the punishment for traitors of the Freedom Fighters is being trown in the Pit of Everlasting Doom.
* Biker Mice from Mars before being ridden, and various gadgets) used by the title characters and the rest of the Freedom Fighters, but there also are the technicals used by the Motor Rats (enemies of the Freedom Fighters) and the human mercenaries of the Plutarkians.
* Biker Mice from Mars both featured a race of fish aliens called the Plutarkians. Female Plutarkians were shown to have breasts, most notably main antagonist Lawrence Limburger's sister Latoyah, one-shot villain Romana Parmesana, and the unnamed female member of the Plutarkian Council.
* Biker Mice from Mars, but somehow changes his grayish-yellow fangs to a Hollywood smile.
* Biker Mice from Mars developed a strong fascination with the 1920's gangster era of Earth even before he was assigned to it. His human disguise is modeled after a

typical gangster from that time. His direct superior was rather perturbed by this.
* Biker Mice from Mars do depict her covering her face with her hands as well as her face being bandaged prior to getting her mask.
* Biker Mice from Mars episode "A Scent, A Memory, A Far Distant Cheese" featured a giant monster couple named Gorgonzola and Munsterella. Gorgonzola was male and aqua, while Munsterella was female and magenta.
* Biker Mice from Mars episode "A Scent, A Memory, A Far Distant Cheese" had a transporter accident result in Lawrence Limburger and Dr. Karbunkle be transported to a bar where they meet several villains Limburger hired to take out the Biker Mice in previous episodes, such as Evil Eye Weevil and Corroder Cody. All of them proceed to beat up Limburger for never paying them.
* Biker Mice from Mars episode "Bleu Cheese Bros", Lawrence Limburger takes over a prison so he can get more minions by recruiting the convicts and deliver the soil to Plutark. Throttle, Vinnie, and Modo try to get themselves arrested by destroying a building and running a red light, but the building was scheduled to be demolished anyway and the police were prevented from arresting them for running a red light because of a report of a jailbreak.
* Biker Mice from Mars episode "Blue Cheese Bros", Vinnie gets close to saying that he, Throttle, and Modo are trapped like rats, but a glare from Modo, who hates being called a rat, persuades him to say "mice" instead.
* Biker Mice from Mars episode "Hard Rock," Lawrence Limburger manipulates Hard Rock into doing his bidding by using his girlfriend Darla as a bargaining chip.
* Biker Mice from Mars episode "I, Greasepit", Lawrence Limburger believed he'd never be fired because nobody else would apply for the job. His boss then demoted him and hired Greasepit to take over Limburger's former job.
* Biker Mice from Mars episode "Last Stand at the Last Chance", Throttle tricks a dazed Cat Scan into attacking Greasepit by claiming that his friend stole his little buddy. When Greasepit tries to deny Throttle's accusation, Cat Scan retorts "Yeah right, and I'm the bluebird of happiness".
* Biker Mice from Mars episode "My Cheese Is Quick", Lawrence Limburger gets away with framing Charley for his murder by fabricating the story that he wandered the city with amnesia after the accident. The Biker Mice manage to ensure his comeuppance anyway by informing the IRS that Limburger is still alive and still hasn't paid his taxes.
* Biker Mice from Mars episode "Once Upon a Time on Mars", Carbine at first appears to be chewing Rimfire out for disobeying direct orders, but then approvingly tells him that his actions prove he has the makings of a real freedom fighter.
* Biker Mice from Mars episode "Test of Friendship" featured a villain named Evil Eye Weevil, who was able to fire a hostility ray from his eye, which made people become temporarily angry and aggressive. The hostility ray was used on the Biker Mice, which caused them to split up after getting into a fight so that it would be easier for the main antagonist Lawrence Limburger to defeat them. Thanks to the hostility ray's temporary nature, however, the Biker Mice manage to patch things up and foil Limburger's schemes as usual.
* Biker Mice from Mars episode "Unforgiven Cheese" featured a bird-woman bounty hunter with prominent breasts named Billie Monnie.
* Biker Mice from Mars episode "Verminator" has Modo forced to remove his robotic arm to avoid getting run over. After his robotic arm ends up too damaged for Charley to repair it, he's forced to wear his damaged prosthetic in a sling until Vinnie can trick Dr. Karbunkle into giving him a replacement.
* Biker Mice from Mars episode "Vigilante Vengeance", Dog Bone's dog Spike at one point tries to pee on Vinnie's leg.
* Biker Mice from Mars, establishes that ten years have passed since the events of the original 1993 series.
* Biker Mice from Mars featured the mice learning that Lawrence Limburger was using counterfeit money. At least until they destroyed his printing facility.
* Biker Mice from Mars featured two monsters named Gorgonzola and Monsterella. The two of them could grow to giant size by blowing themselves up like balloons.
* Biker Mice from Mars: Fred the mutant has had his brain shot out, transformed

into a vicious monster, and replaced with an alarm siren. He kept on living with no trouble at all, and being a masochist, he actually enjoyed the pain.
* Biker Mice from Mars frequently had Lawrence Limburger summon a one-shot antagonist to defeat the Biker Mice or distract them from ruining his schemes. Unusually for this trope, some of the Monsters of the Week would occasionally come back for another episode.
* Biker Mice from Mars, General Carbine wears a long red coat and, as she did in the original 1993 series, helps her fellow Martian mice fight back against their planet's invaders.
* Biker Mice from Mars had this mentioned in the episode "A Hairy A-Bomb", where the yeti A-Bomb explains to Charley that his kind learned to speak English from watching humans' broadcasts.
* Biker Mice from Mars, had Vinnie's old girlfriend Harley, who sided with the Nomad Rats because of the mistaken belief that the Biker Mice abandoned her, doing this. She trades in her beige coat, green shirt, and green pants for black tights and a purple mask to hide the scars she sustained during the Plutarkian invasion.
* Biker Mice from Mars has a cybernetic arm to replace the one he lost on Mars to the Plutarkians.
* Biker Mice from Mars has Fred the mutant, who has a duck's foot, a bear's foot, a human arm for his right arm, an octopus tentacle for his left arm and three eyes.
* Biker Mice from Mars has made reference to a "Swiss Cheese account" on two occasions.
* Biker Mice from Mars has Stoker turn into an insane rat-like beast called Stoker Rat.
* Biker Mice from Mars: In the 2006 revival series episode "Changes", a bum has this reaction upon witnessing Stoker's transformation.
* Biker Mice from Mars. In the episode "A Scent, a Memory, a Far Distant Cheese", Charley, Modo, and Throttle get a hold of Vinnie's very embarrassing baby picture. Oddly plot-relevant, as it is used to help defeat that episode's villains.
* Biker Mice from Mars: in the episode "Vicious Cycles", Greasepit ends up in a fight with a vending machine; the machine keeps firing its goods at him, and he returns fire with a machine gun. Carbuncle and Limburger watch the whole thing from a distance, to which Limburger casually remarks that his money is on the vending machine.
* Biker Mice from Mars: Lawrence Lactavius Limburger uses it, and it lends a lovely layer to Limburger's loquacious lambasting of his lackeys.
* Biker Mice from Mars, Lawrence Limburger once tried to rid himself of the mice by framing them. The final evidence against the officer bribed by Limburger was a huge pile of Plutarkian money found on the officer's possession.
* Biker Mice from Mars, Lawrence Limburger's dim-witted goon Greasepit would occasionally speak fondly of his mother.
* Biker Mice from Mars, Leeza reprised her role in the 2006 series' video game adaptation.
* Biker Mice from Mars Limburger's minions and is a deformed Quasimodo-like creature with three pink eyes with black irises, a bushy tail, and a tentacle instead of a right arm.
* Biker Mice from Mars, Limburger tries to get Modo to join them by offering him a new fancy artificial arm. Modo pretends to go along with it to find out what Limburger's latest scheme is. Naturally, he is told to prove his loyalty by shooting Throttle and Vinnie as they drive by the tower. He does and Limburger is pleased. Of course, they were actually dummies with the bikes being operated by remote control.
* Biker Mice from Mars: "Mad Scientist Wanted" features a pair of alien executives who were brother and sister named Eon and Era. They both argued with each other and tried to prove that their choice was the better one to their father and boss Mr. Century.
* Biker Mice from Mars mechanic who owns a garage where their bikes (actually war machines equipped with AI) are repaired and equipped with new gadgets. One of them has a crush on her, as she reminds him of a girl back home.

* Biker Mice from Mars named Ronaldo Rump. The Catatonians are invading Mars and try to stop Vinnie, Throttle, and Modo from rescuing Stoker so he can make a new regenerator that can be used to end the drought on Mars, while Ronaldo Rump wants Stoker to build a new regenerator because the one he has that he uses for his land development schemes is running low on power.
* Biker Mice from Mars occasionally treat Charlene like this—even though she's not burdened with an ego as massive as they are.
* Biker Mice from Mars of Limburger Plaza being destroyed at the end of every episode.
* Biker Mice from Mars, polka music is used to subdue Modo's bike Lil' Hoss.
* Biker Mice from Mars's mobile weapons platform. Throttle gives the signal to "Cut left" to his teammate, who promptly steers right. Throttle can only grumble under his breath, "Your other left," then steer left himself.
* Biker Mice from Mars, that he can't demolish a building while people are still inside it, Limburger rationalizes that as mayor he can do whatever he wants.
* Biker Mice from Mars. The 2006 revival lampshades this in the episode "Once Upon a Time on Earth", where the Catatonian scientist Dr. Catorkian asks Karbunkle if he is human and Karbunkle replies with "Of course I am...I think."
* Biker Mice from Mars: The Biker Mice destroying Limburger's tower in the end of every episode.
* Biker Mice from Mars", the Mice and Charley discover a refugee ship from Mars captained by Throttle's cousin that included Stella as one of the initial passengers, but she died of cancer a few years before (although she had a son, Sparks, who the group swiftly realise is Modo's child).
* Biker Mice from Mars: The original 1993 series lasted 65 episodes over three seasons.
* Biker Mice from Mars: The title mice never use the door. They lampshade it in "Back to Mars", when Limburger is using Charley as a bait in a trap that relies on them using the door.
* Biker Mice from Mars, the two-part episode "The Reeking Reign of the Head Cheese" has Lord Camembert kick Limburger in the butt after he fails to deliver him the city of Chicago as he promised.
* Biker Mice from Mars, the villain Ronaldo Rump covers his bald head with a huge toupee, being a parody of Donald Trump.
* Biker Mice from Mars, Throttle's girlfriend Carbine is of the Good Scars variety. Shortly after Throttle, Vinnie, and Modo originally left Mars, she got a thin scar just below her left eye, but her main concern is the survival of Mars, so she's still an ally of the Biker Mice for the most part.
* Biker Mice from Mars through a video screen, their infamous smell somehow gets through the television to Limburger.
* Biker Mice from Mars travelling into the past to demolish the city by digging giant holes where it would be built. Whenever he finished digging a hole, it would appear "at the same time" in the future in the middle of the city.
* Biker Mice from Mars two-parter "The Reeking Reign of the Head Cheese" when Lawrence Limburger frames the Biker Mice for kidnapping the mayor by having his goons disguise themselves as Throttle, Vinnie, and Modo when they capture the mayor.
* Biker Mice from Mars version of both Elvis Presley and Evel Knievel) is said to be Elvis' alien brother.
* Biker Mice from Mars was revived in 2006, complete with character redesigns and a new alien race called the Catatonians replacing Lawrence Limburger as the main villain, though there were a few callbacks to the original series and Limburger even attempts to regain his stride a couple of times.
* Biker Mice from Mars wears a pair of sunglasses at all times. This is because as a result of being experimented on he lost his eyes and got them replaced by bionic ones. Although some Biker Mice fans say he's blind.
* Biker Mice from Mars, which includes among others things, his transporter.
* Bikini Bottom Adventures — at the time when the DVD was released, none of the episodes were on television.

* Bikini Cowboy, Rod McCloud observes that Whisky Jill is affectionate towards her Native American friend Tonta and asks if they are lesbians. Whisky Jill and Tonta are disgusted by the idea that they'd love each other in that way.
* "Bikini Girl" to strip down to her bikini to the time she's eaten by a monster.
* Bikini Kill, where they umm, read a review of one of their own performances.
* Bikini Open 2: Celebrate Spring Break and he's mostly shown from behind when she makes this comment about his body:
* Bikini or speedo pics are often flagged as "Mildly NSFW", since they aren't outright porn, but it would still look like you are slacking off if the boss sees them.
* bikinis made of pure chaos. Older versions of the models have loincloths and leather harnesses that leave their breasts completely exposed.
* bikini) unexpectedly casts his shadow over "her" just by standing by).
* Bikini Warriors lampshades most of the typical elements in a fantasy setting, and some of the drawbacks and consequences of the heroines actions.
* Bikini Warriors. Not much room for interpretation. It's mostly an ad for a figurine series of the same name.
* Bikke isn't a whole lot better. He fed his loyal crew nothing but Cheetos for months on end because they were cheaper than oranges, leading to some
* Bikke the pirate was actually fairly ruthless and cunning when he first appeared (well, compared to Garland and the heroes, anyway). At this point, his intelligence is viewed as on par with
* Bik uses retro 8-bit animation for much of the game, but space cutscenes are rendered in 3D.
* Bilateral anophthalmia is an extremely rare medical condition where children are born without eyes.
* Bilbo Baggins begins to age at a somewhat accelerated pace after giving up the Ring, although he still lives for at least 20 years afterward. (In the movie, where the intervening years between Bilbo's farewell party and Frodo leaving Hobbiton are seemingly compressed to a few weeks or months, it's far more apparent.) Interestingly, Gollum, who had the Ring a lot longer than Bilbo, is still alive and mostly unchanged 75 years after losing it, probably because he was also a lot more corrupted by the Ring than Bilbo was.
* Bilbo himself was tempted by the Ring for a short time when Frodo arrived at Rivendell, but like the others, he was able to shrug it off quickly, though he did ask that Frodo never show him the ring again. This is more significant than the other examples on this page, as Bilbo was in possession of the Ring for
* Bilbo when he catches sight of Frodo wearing the Ring around his neck.
* Bile Blight, FNM version. Humans are not supposed to melt that way!!
* Bile Fascination is intentionally avoiding a product because everyone and their mother loves to talk about how great it is.
* Bile Fascination: People are interested in a work because of how reviled it is.
* Bile Fascination was caused by people deciding to hate it before they even bought it.
* Biles' US gymnastics teammate, Sunisa "Suni" Lee, was two years old when her single mother met John Lee, a recently-divorced father of two. John never legally adopted Suni, or married her mother for that matter (the couple did, however, go on to have three more children together, so the family bond is pretty well cemented), but it's clear from the way the family talks about it that in every way that matters, John is Suni's father and his two children from his previous relationship are her siblings; it was Suni's own decision to take John's last name (she was born Sunisa Phabsomphou) to represent the role that John had in her life.
* Bilgewater is a pirate town at first, but combines elements of the American Midwest and Caribbean/Vodun folklore.
* Bilibili, otherwise romanized as Biri-biri or translated as Bug-Zapper.
* Bilingual Backfire: An attempt to use another language to pass a secret message doesn't works because the eavesdropper was (unknown to the people trying to communitcate) fluent in that language.
* Bilingual Backfires language (and it's the only language she doesn't know).

* Bilingual Bonus: A work has some untranslated words in a different language.
* Bilingual Bonus: Something is said or written in a foreign language.
* Bilingual Bonus, the baker was actually repeating common high school French or phrasebook sentences, like "Where is the library?"
* Bilingual Conversation authors expanded Han's repertoire to include fluency in at least half a dozen other languages including Rodian, Selonian, and practically anything else required by the plot.
* Bill accuses Harry of manipulating her the same way the Diary had; Ginny fires back that, having actually been controlled by dark magic, she's in a position to know what she and Harry are doing is anything but. Harry forms his first bond with Ginny; the Diary was the first horcrux to be destroyed.
* Bill Adama, old warhorse ship's captain about to be put out to pasture, finds himself in command of the entire Colonial military, what's left of it. All sorts of people who previously filled fairly minor roles are suddenly thrust into positions of great authority... in many cases, they're doing the same jobs they did before, but those jobs are now of critical importance because there's nobody else doing them. For that matter, the eponymous Battlestar is itself promoted from "antique vessel about to be mothballed" to "flagship of the Colonial battle fleet." (Also
* Bill & Doug (RVDTito4Life) and Kent Jones, who claimed to be the first
* Bill & Ted a chainsaw, which accidentally cut down a balcony on the western set while swinging at the duo.
* Bill & Ted and Bill & Ted were now played by their actors from the live-action TV series. Needless to say, the show didn't last a third season.
* Bill & Ted, Bill and Ted are slid down the bar and into a wall where some dancer girls are. Unsurprisingly, they try to go back for another peek after being pulled out.
* Bill & Ted disaster and the Holocaust as they travelled through time, but this was considered "too dark".
* Bill & Ted Face the Music: Bill and Ted have precisely 78 minutes to come up with the song that will save the universe.
* Bill & Ted Face the Music haven't gotten around to writing the all-important song despite being told about it three decades previously. They also come across versions of themselves that are muscled crooks in prison.
* Bill & Ted Face the Music". If the title wasn't bad enough, the music was so alienating that everyone cringed until Ted's dad literally pulled the plug.
* Bill & Ted Face the Music specifically has this aesthetic while the others do not, especially in architecture and the wholly redone design of time machines (replacing the phone booth model).
* Bill & Ted Face the Music the Great Leader sends another robot to assassinate Bill and Ted while she and Rufus' daughter, Kelly goes back to try and save them.
* Bill & Ted Go To Hell: When he finds that Napoleon has Missy, De Nomolos immediately grabs a sword and a flaming spear.
* Bill & Ted may create a utopian future society through their excellent music and creed of kindness, but they're far from geniuses.
* Bill & Ted off-duty at the time), but still insanely imposing; it's when he appears as part of Bill and Ted's joint Personal Hell that we see this trope come into play:
* Bill & Ted originated from an improv sketch called ''Bill, Ted and Bob". The guy who played Bob lost interest, causing Ed Solomon and Chris Matheson to go ahead and write the movie without the third member.
* Bill & Ted's Bogus Journey, after Bill and Ted get killed, they find somebody they know holding a séance and try to get a message through. They're mistaken for evil spirits, and dismissed.
* Bill & Ted's Bogus Journey, and then used his takeover of the global media to perform a totally excellent concert for the whole planet.
* Bill & Ted's Bogus Journey because he thought it was "almost a parody of a movie that was already a parody".
* Bill & Ted's Bogus Journey by the "evil" Bill and Ted robot usses. The reveals lean toward terrifying, but the second time, when human Bill punches his

twin, is probably the funniest. "Oww! You're metal, dude!"
* Bill & Ted's Bogus Journey, Demons have "ACME 666" sledge hammers for Details Nomolos and the robot Bill and Ted to break rocks with for all eternity.
* Bill & Ted's Bogus Journey, De Nomolos tries to shoot Bill and Ted with a futuristic energy weapon that instead produces a flag saying "WYLD STALLYNS RULES."
* Bill & Ted's Bogus Journey. Despite being made out of random items from a hardware store, their quality can be justified as they were made by the smartest being in the universe.
* Bill & Ted's Bogus Journey ends with a minutes-long comic headline sequence where various real-world publications detail the band's rise to fame and the resulting steps towards world peace.
* Bill & Ted's Bogus Journey. Following God's directions leads them to a pair of squat, ugly Martians. The Grim Reaper smugly asks "Did you really think the greatest genius in the universe would be from Earth?" and Ted, shrugging, replies "Yeah."
* Bill & Ted's Bogus Journey has the heroes dying and, due to a mix-up during a seance, ending up in Hell. Disappointed that they were "totally lied to by our album covers" (it appears to be a series of floating rocks over a fiery abyss, with the damned sentenced to perpetual hard labor), they complain to Satan, who casts them into a personal Hell, with each one facing the embodiment of his deepest fear.
* Bill & Ted's Bogus Journey, has two Hungarian versions, one made sometime in the '90s and one made at the same time as the first installment's MGM dub. The MGM version kept the same voice cast as their dub of the first film. The first dub recast every character and is thus inconsistent with every other dub of either movie.
* Bill & Ted's Bogus Journey, he accompanies them on their further adventures and even joins their band.
* Bill & Ted's Bogus Journey However, their spirits manage to escape the Grim Reaper, and spend a good chunk of the movie literally journeying through Heaven and Hell to bring themselves back to life.
* Bill & Ted's Bogus Journey. If nothing else, it gave us the classic line (when E.R.Ted first sees Ted's girlfriend)... "I got a full-on robot chubby."
* Bill & Ted's Bogus Journey is derived from a relatively minor "crime" he committed when he was ten years old, stealing his brother's Easter basket. (Possibly due to self-induced guilt over it, but exactly why the Devil couldn't think of something more severe makes one question just where he stands on the morality scale.)
* Bill & Ted's Bogus Journey — one being a rock musician that was popular at the time, and the other being a futuristic historical figure.
* Bill & Ted's Bogus Journey moved forward to the correct date after they spent those few years learning to actually play well.
* Bill & Ted's Bogus Journey. Only instead of chess, the boys play Twister, Battleship, and a variety of other contemporary games, which Death keeps losing. (Of course, Death doesn't want to admit he's losing to these airheads so he keeps altering the conditions of the challenge, making it "best 2 out of 3", "best 3 out of 5" and so on...)
* Bill & Ted's Bogus Journey, plays it straight, however, with the Battle of the Bands that will determine whether Wyld Stallyns will become the world-famous, peace-and-utopia-bringing band they are destined to be being hijacked by the "Evil Usses", then interrupted by the "Good Usses" and the facedown with DeNomelos.
* Bill & Ted's Bogus Journey plays this for laughs, with Evil Robot Bill using Evil Robot Ted's detachable head to play basketball.
* Bill & Ted's Bogus Journey recorded a song called "Go To Hell" for the soundtrack because the movie was still going to be called that when they were asked to contribute.
* Bill & Ted's Bogus Journey, Rufus follows the robot duplicates of Bill and Ted into the past to try and stop them killing the originals.
* Bill & Ted's Bogus Journey take a year long break to learn how to rock out, Bill & Ted marry their girlfriends, go back to the Medieval era for their

honeymoon, have kids, and grow epic beards that would make ZZ-Top proud. The time machine pops back all of a tenth of a second after it took off, and despite these radical changes their speech patterns, attitudes and physical appearances haven't changed at all (save for said epic beards).
* Bill & Ted's Bogus Journey that they eventually get tired of repeatedly screaming and start playing 20 questions.
* Bill & Ted's Bogus Journey (the Easter Bunny, Bill's grandmother, and Colonel Oates) on the boys to try and stop them. This scene still occurs in the novelization and the comic book adaptation of the film.
* Bill & Ted's Bogus Journey: the "evil robot usses", while landing the time machine, intentionally aim for a cat on the ground below. The cat escapes.
* Bill & Ted's Bogus Journey the same person, but they're so close in personality they might as well be; so when they split off to propose to the princesses, they read out the same speech, changing only the basic metaphor (one of them uses ocean life, the other forest; they even both have a 'no, that's fresh water' / 'no, that's the desert' moment in unison.
* Bill & Ted's Bogus Journey, the Station aliens are always naked, despite having furless skin and minimal body hair.
* Bill & Ted's Bogus Journey, the two title characters find themselves in this situation when they are exorcised by Missy and her New-Age friends. After several minutes of screaming, Bill remarks, "Dude. This is a totally deep hole." and Ted replies "Yeah... now what?" and they start screaming again because there is nothing else they can do. The drop last so long and B&T are so bored that they end up playing "Twenty Questions" before FINALLY hitting the bottom (Hell).
* Bill & Ted's Bogus Journey to games for their souls, and went to petition Heaven for assistance against the bad guy before returning to earth alive and well.
* Bill & Ted's Bogus Journey two other advanced robot killers from the future.
* Bill & Ted's Bogus Journey, when the camera zooms out of Ted's screaming mouth and pull back to Bill and Ted falling to Hell.
* Bill & Ted's Bogus Journey: When the evil robot Bill and Ted see the good robot duplicates coming at them, they realize they can't win, so they give the original Bill and Ted a wave and a cheerful farewell before they get their heads punched off.
* Bill & Ted's Bogus Journey when the main title characters find themselves in Hell.
* Bill & Ted's Excellent Adventure a concert-like mega-production. The audience responds accordingly, clapping along on cue and raising their cigarette lighters as if it were a rock concert.
* Bill & Ted's Excellent Adventure: After Bill asks how the time machine works, Rufus replies "Modern technology, William."
* Bill & Ted's Excellent Adventure after somehow disguising themselves as the executioners.
* Bill & Ted's Excellent Adventure, appear as the annoying waiters serving ice cream to Napoleon. They also appear in the sequel as guests at Missy's seance.
* Bill & Ted's Excellent Adventure are prancing around in their lingerie. Billy the Kid yanks them away while they're still enjoying the view.
* Bill & Ted's Excellent Adventure, Bill and Ted hug in relief after Ted's apparent death, and then pull away, both exclaiming, "Fag!"
* Bill & Ted's Excellent Adventure: Bill and Ted seem to have an affinity for this number.
* Bill & Ted's Excellent Adventure, Billy the Kid hits on a couple of girls by showing them his wanted poster.
* Bill & Ted's Excellent Adventure De Nomolos in the closing credits.
* Bill & Ted's Excellent Adventure, despite being released by Universal Studios, a studio that normally doesn't skimp on extra material, and despite being called the '25th Anniversary Edition'.
* Bill & Ted's Excellent Adventure enlists Bill and Ted to help win more money in a poker game. (He gets all their winnings as well as his own.) The game goes wrong a few minutes in when Bill reveals that he has three aces, causing the other

cowboys to suspect (correctly) that Billy cheated somehow.
* Bill & Ted's Excellent Adventure," ("Excellent!") at which point the King makes his orders more explicit, "Execute them!" ("Bogus.")
* Bill & Ted's Excellent Adventure Genghis Khan goes into a sports store and uses a baseball bat to knock the head off a mannequin, sending it flying through a basketball net.
* Bill & Ted's Excellent Adventure guides Bill and Ted while they navigate history.
* Bill & Ted's Excellent Adventure had a random medieval guy tag along with all the historical characters. The end credits still mention James Bowbitch as "John The Serf".
* Bill & Ted's Excellent Adventure happening if Bill and Ted don't get to start their band.
* Bill & Ted's Excellent Adventure has Arizona (namely Phoenix and Tempe) doubling for San Dimas, California and Italy doubling for England.
* Bill & Ted's Excellent Adventure, has a strict father who doesn't approve of his rock-star dreams and plans to send him off to "Oates Military Academy" if he doesn't get an A on his history final. Avoiding such a heinous and un-triumphant fate is what causes said excellent adventure in the first place.
* Bill & Ted's Excellent Adventure, in the scene where they pick up Beethoven; they carry him off the piano mid-song, and he continues playing (that is to say, he mimes that he's still playing the piano).
* Bill & Ted's Excellent Adventure' "It is time. Their separation is imminent." By which he apparently means that their separation almost happened 600 years ago, but they might as well fix it now.
* Bill & Ted's Excellent Adventure manages to get the princesses out later.
* Bill & Ted's Excellent Adventure. (Not that any other way would have likely been feasible with those two...)
* Bill & Ted's Excellent Adventure of the future community. It was just totally enlightened by their radical "Be excellent to each other / Party on, dudes" philosophy.
* Bill & Ted's Excellent Adventure: Of the historical figures brought together by Bill and Ted, the ones who get the most focus as friends are, oddly enough, Socrates and Billy the Kid.
* Bill & Ted's Excellent Adventure: Played for laughs when Beethoven gets access to modern synthesizers and when we see cavemen chewing bubblegum.
* Bill & Ted's Excellent Adventure production. Then the show received a budget-related format reboot for its second season, with none of the aforementioned voice actors, a new animation style and a new intro theme — all due to it being from a different production company (DIC). It received a non-triumphant response and had a short run.
* Bill & Ted's Excellent Adventure: Rufus explains that the clock in San Dimas is always running, so Bill and Ted have only one day of their subjective time to travel back in time to get various historical figures for their history report, or Ted will be shipped off to military school in Alaska.
* Bill & Ted's Excellent Adventure, saying, "Your approach this year was to ensure that absolutely no one recognized your costume?"
* Bill & Ted's Excellent Adventure, she's Ted's stepmother. In both movies, she flirts with other men.
* Bill & Ted's Excellent Adventures: In one episode, the booth is used to retrieve a character from a TV show. As a result, the show never ends and nothing else can ever be shown on TV, so they have to put them back.
* Bill & Ted's Excellent Adventures She spent a lot of time flexing, with closeups, and performing various feats of strength.
* Bill & Ted's Excellent Adventure, thanks to the idiot protagonists' historical influence, becomes the standard salute of the future.
* Bill & Ted's Excellent Adventure, the big threat hanging over the plot is that if Ted fails History, his father will ship him off to a military academy in Alaska, which will ruin the utopian future his and Bill's music creates. When the

pair are sent to hell in the sequel, they get to see what it might be like:
* Bill & Ted's Excellent Adventure, the boys have only a single night to come up with their history class final.
* Bill & Ted's Excellent Adventure). The third dub kept the 2nd title but recast all the voices. This version was made in a cost-effective Romanian dubbing studio as part of a larger incentive to produce cheap Hungarian dubs with cheap Hungarian voice talent for numerous classic films for potential TV broadcasts.
* Bill & Ted's Excellent Adventure), they turn out to be...well, excellent.
* Bill & Ted's Excellent Adventure was known for the words "bodacious", and "heinous".
* Bill & Ted's Excellent Adventure: When Genghis Khan finds himself in a shopping mall, his first stop is the sporting goods store where he swaps his signature club for a baseball bat. (He also dons the armor of the modern brute, a football helmet and shoulder pads.)
* Bill & Ted's Excellent Adventure when Sigmund Freud begins chatting up two women in the mall food court. When the scene begins, Freud is suggestively holding a corndog at an upward angle as though it is "erect". But when the women begin to laugh at Freud and shoot down his attempts to woo them, the corndog begins to droop lower and lower until it's in silena "limp" state.
* Bill & Ted's Excellent Adventure. While this was somewhat justified in the first movie due to their brief screen time, they remain featureless in the second movie, even with their more prominent role in the heroes' lives.
* Bill & Ted's Excellent Adventure will apparently mature into musical geniuses, display a high degree of creativity, and have a surprisingly sophisticated vocabulary. However, they are failing history and clearly have not paid much attention in school.
* Bill & Ted's Excellent Adventure: Wyld Stallyns!! Played for laughs, of course.
* Bill & Ted's Excellent Comic Book and that stopping Bill and Ted's adventures would do more damage to the timeline.
* Bill & Ted's Excellent Comic Book has one issue where the duo are stranded on an alternate Earth called Hyper-World, populated entirely by superheroes and villains who fight each other all day.
* Bill & Ted's Excellent Comic Book movies until he was a third of the way through the comic and it was too late to redraw.
* Bill & Ted's Excellent Comic Book, Rufus has a huge-foreheaded guest professor from the 38th century come to discuss telekinetic drum solos with his class.
* Bill & Ted's Excellent Comic Book. Two denizens kidnap the duo's wives and children in order to get Bill and Ted's attention and persuade them to play a gig there.
* Bill & Ted's Excellent Halloween Adventure on the final night of the show. After that, the show avoided putting certain copyrighted characters in the spotlight for too long, instead doing things like using a celebrity as the show's main villain rather than a movie villain. This also led to them completely banning videotaping and photography of the show, so as to prevent it from getting onto the internet and attracting unwanted attention. It is believed that the rising worries concerning the potential of legal backlash over the show's content was one of the many reasons why the show was brought to an end after 2017.
* Bill & Ted's ghosts try possessing two men. They squeeze in through the ears.
* Bill & Ted, there are those who think it is as good or even better.
* Bill & Ted the time machine, showed them how to use it, and tended to turn up for advice when the boys found themselves in trouble. He was from the future of prosperity, peace, and excellence that they ushered in, and had a vested interest in helping them because without them his future would not exist.
* Bill & Ted. While neither of our heroes is especially bright, blond Bill (a male example) is the more pragmatic of the two, while brunet Ted is slightly dopier.
* Bill and Barry Heterodyne. Alone they were heroic, powerful Sparks. Together

they changed the world, and their family's legacy, for the better. And despite their disappearance remain almost universally loved and feared.
* Bill and Barry Heterodyne rode to Mechanicsburg on horse clanks faster than possible when they heard about the attack.
* Bill and Ben get into these arguments from time to time. An examples comes from "Double Teething Troubles".
* Bill Anderson (the former with Sarah Purcell), and formerly co-owned a franchise of a family restaurant chain called Po' Folks (which named itself after one of his songs).
* Bill and Hillary Clinton. Bill feels your pain; Hillary votes to attack Iraq and is asked to join the watch party when the US takes out Osama bin Laden.
* Bill and Hillary Clinton named their daughter "Chelsea" after hearing the Collins version of Joni's "Chelsea Morning". Chelsea herself tweeted she was named after "The Judy Collins Song".
* Bill and his ex-wife Lenore fits this...nowadays. In her sole appearance, Lenore was shown to be very attractive, while Bill is fat, bald, has poor hygiene, zero self-confidence, and a stalker-like crush on his best friend's wife. However, flashbacks show that in high school Bill was handsome, fit, confident, and popular, and it's all but outright stated that being crushed by the woman he loved made him stop caring and enter a downwards spiral into suicidal depression.
* Bill and Martha pulled the show because Bendix was in poor health, and the network would rather not air the show than air it only to have him die mid-production.
* Bill and Ted... or, for that matter, the trope of Superman changing into his costume in a payphone... but it's only a matter of time.
* Bill and Ted Save The Universe have been travelling the galaxy for years, using Wyld Stallyns albums from the future to bring peace to alien planets.
* Bill and Ted's Bogus Journey can body-slam into each other to form a larger, muscular alien.
* Bill And Ted's Bogus Journey. It was a tank, and Ted guessed it in two questions.
* Bill And Teds Excellent Adventure: Set after the film, Bill and Ted's girlfriends are kidnapped, and the only way to rescue them is to collect music from different time periods.
* Bill and Ted's Excellent Adventure The movie makers wisely never actually give an example of whatever composition Bill and Ted create that brings about world peace.
* Bill And Teds Excellent Adventure. The player could travel to nearly a dozen different time eras, and many puzzles would require setting something up in the past to resolve an obstacle in the future.
* Bill And Ted's Excellent Adventure, the title characters find a note left by their future selves at the police station. More often, this trope is evoked throughout the movie in a fashion similar to the Norm MacDonald example above.
* Bill and Ted's Excellent Video Game Adventure involve this, like giving Jesse James an uzi and Cleopatra a credit card.
* Bill and Ted's where Rufus has prophetic dreams and seems to hypnotize a customer into buying things from Nail World.
* Bill, a paranormal investigator who believes that cereal mascots are real, but insists that dinosaurs are a fraud.
* Bill Bailey delivered a (since removed from YouTube) classic pub gag in the style of
* Bill Bailey he becomes a broken record when high on LSD: "Isn't that interesting how it forms an N, forms an N, forms an N, forms an N, forms an N, forms a NNNNNNNNNN NNNNNNNN...". Also: "That's quite interesting, that's quite interesting, that's quite interesting, that's quite interesting, that's quite interesting, that's quite interesting, that's quite interesting, that's quite interesting..."
* Bill Bailey (Mark Bailey; he named himself after the wartime song "Won't You Come Home Bill Bailey")
* Bill Bailey Needless to say, he abuses the opportunity to hide some things in it:
* Bill Bailey once recounted a tale of people sneaking into Glastonbury by digging a tunnel under the fence that came out under a one-man tent. This is made even

funnier when he describes the witnesses who are high on weed or LSD, watching thousands of people just
* Bill Bailey references this in his stand-up shows ("The crab that e-mails the coastguard on the impending tidal wave...") and claims that England has become so pathetic that they work as the kicker on foreign news broadcasts ("...et finalement: les anglais!")
* Bill Bailey's jokes often turn out this way. For example, in "Tinselworm", he mentions his meteoric rise to fame over the past 22 years, "... if that meteor was being dragged by an elderly arthritic donkey across the Mojave Desert."
* Bill Bailey's love ballad, which "encompasses all aspects of love; betrayal, hatred and depression." It shifts from a traditional ballad to a vitrolic parody halfway through, (and the cute moment of watching a duck in the park comes back):
* Bill Bailey. So Bailey walked on, mimed asking to open a pension, and when asked with what currency he replies "Naaaaaaaazzzzziiii Gooooooooold! Just like YOU did!".
* Bill Bailey, telling a joke about the adverts for compensation lawyers:
* Bill Bailey would begin stand up shows with a selection of non-jokes, delivered in a rambling can't-be-bothered fashion:
* , Bill bangs his head on a desk after finding out that Ron gave a highly insulting interview about Veela, which gets him killed by Fleur's angry relatives.
* Bill Belichick, head coach of the NFL's New England Patriots, is well known for his seemingly unmoving frown.
* Bill Belichick was carried off at the end of Super Bowl XXV, but he was not the head coach. Rather, he was the defensive coordinator.
* Bill Bellamy's character in spades if he's featured in any Black romantic comedy.
* Bill Bergson, the main thing known about the murderer is that he had green trousers. Lampshaded by the police inspector who says that the only result of their investigation was that no one wore green trousers anymore.
* Billboard; both songs only got to #3 there. However, "Redneck Crazy" is his only Top 40 on the Hot 100.
* Billboard charts in the late 1930s/early '40s, and Ricky followed with his string in the late '50s/early '60s, Nelson became one of the few multi-generation families to each have No. 1 hits, turning the trick in 1990 with "(Can't Live Without Your) Love and Affection."
* Billboard chart), "Wipe Out" ended up being the more popular of the two sides, making the charts three times (in 1963 at #2, in 1966 at #16 and in 1970 at #110) and being well-known to this day.
* Billboard Hot 100 and #2 on the Easy Listening chart. A vocal version, with lyrics by Tony Velona, was recorded that same year by Andy Williams; his version went to #34 on the Hot 100. About 30 years later, the Williams version was repurposed for a British car advert, making it a hit again (and his biggest in the UK).
* Billboard Hot 100 in the States. The second, released in 1989, featured Ronald Isley as a guest artist and got to #10 on the Hot 100 (outdoing the original) and #1 on the US adult contemporary chart.
* Billboard Hot 100 was not "I Hate Everything About You", "Animal I Have Become" or "Never Too Late", but rather "Pain".
* Billboard's alternative charts. It wasn't "Molly's Chambers", "Four Kicks" or "On Call", but the considerably less remembered "The Bucket".
* Billboard's "I'm Not in Love", which has likewise fallen back into the shadow of the original.
* Billboard's Mainstream Rock chart, which spent 21 weeks on top. The song that holds the record? Their second single "Loser", which isn't nearly as iconic as the likes of "Kryptonite", "Gone", and "Here" because it never crossed over to pop radio. In fact, "Here Without You" never made it past #14 on mainstream rock.
* Billboard. The group were not aware that the record existed until after it was released, and their dissatisfaction with the album's cover and liner notes led them to fight for creative control on their next three albums.

* Billboard was originally a magazine dedicated to bill posting back in 1894. It evolved in the 1920s to advertise circuses, carnivals, fairs, and vaudeville shows, and continued to shift to a more entertainment-driven focus in the 1930s. By the 1940s, they began issuing music charts. The shift was completed in 1961, when the magazine moved entirely to publication of music charts and music industry-related news.
* Bill Bryson a book where the author recalls the various dull habits of his father (like reading out license plates of other cars when on holiday) — and his son's reaction;
* Bill Bryson admits that he tends to sleep like this, at least while traveling.
* Bill Bryson as being unwilling to ask for directions, and, when finally pressed into doing so, wanders off with the person he asks leaving his family sitting in the car watching flies copulate. And Bill himself manages to get hopelessly lost on more than one occasion.
* Bill Bryson, in an even more ironic/ridiculous example - a friend who complains about how tough it is to get parking at the gym when she lives only 5-10 minutes away on foot. When he points out that she should just walk, and save herself the parking headache (as well as spending a little less time on the treadmill) she looks at him as if he's crazy, saying that the treadmill has her whole "program" on it, and it can be adjusted for difficulty.
* Bill Bryson managed to invert this trope. He lived in the UK for most of his professional life without picking up a British accent, but he became so much of an Anglophile that he gained a reputation for being "more British than the British", something that real Britons find equally endearing and annoying.
* Bill Bryson's BBC radio series about the English language "Journeys In English", one of his guests, a well-spoken Japanese university lecturer living in England, while speaking about the problems for any Japanese learning English still says "plonunciation" and "my Engrish sometimes causes some probrems".
* Bill Bryson the author invites the reader to consider the molecular reality of their existence:
* Bill Bryson. The latter even manages to do it while travelling in a country he lives in, or where he spend his early years.
* Bill Bryson. The third time, when Bryson thought he was pushing his luck and opted to sit at another table, he poured a large mound of dead insects into his soup. This time he was walked to the door and asked never to return, instead.
* Bill Bryson. This is generally viewed in retrospect as crossing the line by the protestors, as they essentially tortured a man, twice, who was just doing his job.
* Bill Buckner was actually off the field for much of the sixth game of the 1986 world series, because of his severely injured knees. Manager John McNamara reportedly sent him out because he thought Buckner deserved to be on the field for the Sox series win...
* Bill Burr, and be honest about his desire to get laid if that's all he really cares about.
* Bill Burr had a stand-up bit about this, wherein he mocked the overuse of this trope in film, to the point that they were beginning to run out of sports to tell the Jackie Robertson Story with.
* Bill Burr has a bit talking about American macho attitudes. In it, Burr talks about
* Bill Burr links to a video of the entire 13-minute rant, a transcript, and Burr's own blog post on the event.
* Bill Burr near the end of it) is one of the most well-known bits from his podcast.
* Bill Burr's SNL piece about how white women took over the "woke movement" at the expense of ethnic minorities closes with a rant about how white women spent centuries living off the ill-gotten gains of white men while occasionally cheating on their husbands with black guys and if they got caught, they'd just say they were raped.
* Bill Burr, who left murder off the table, but once seriously contemplated rolling his then-girlfriend up in her yoga mat and leaving it behind a sofa "til' she

started to get thirsty" when she pulled an especially shitty move while arguing (slapping him in the head repeatedly to get him riled up and then saying "We will discuss this once you calm down!").
* Bill Butterfield. The defense, meanwhile, fielded dozens of character witnesses for Lance, including Bill's own sister and father, with the latter writing a sworn affidavit that Lance shouldn't be prosecuted. In the end, after a mistrial, Lance Butterfield pleaded guilty to manslaughter and served two years in prison.
* Bill Caswell.", above) with a $500 19-year-old rear-wheel-drive Craigslist car and no crew. Finishes third in class, and ahead of three cars in the aforementioned $400,000+ WRC class.
* Bill Chase was a jazz musician who had a cult following but never tasted mainstream success, tragically dying in a 1974 plane crash at 39. His only hit, recorded with his band
* Bill "Chilly Billy" Cardille, a Pittsburgh reporter makes a fairly long appearance as himself in
* Bill Cipher. He starts off as this - the statue he became in Gravity Falls' finale. Steven comes across it, which kicks off the plot.
* Bill Cipher that the wheel was originally just intended as a cool image; it was only included in the finale's plot once the writers realized fans had inflated its importance and were expecting some kind of payoff.
* Bill Cipher). The Journal's original entry on Bill describes him in glowing terms as the nicest, most trustworthy being in the universe. After he discovers Bill's true nature, he crosses out the whole entry and describes him as the most dangerous and evil being in the universe, to never be summoned at any cost.
* Bill Clinton and, to make it up to Peter, offers to let him sleep with any woman he wants. To her utter amazement, he picks her mother. Though the mother is willing, they don't wind up going through with it.
* Bill Clinton as the earlier mayor had a more realistic look compared to the classic mayor, who's as stylized as the girls themselves.
* Bill Clinton becomes the Governor of Alaska from 1978 to 1986 and pursued an unsuccessful run for the presidential nomination for the Democratic Party. He later moved to California for a career as a lawyer and attempted to run for Congress in 2010 but the sexual pestering scandal puts an end to his political aspirations there.
* Bill Clinton, Hu Jintao, and Barack Obama are historians and political writers.
* Bill Clinton in a 2012 commercial, and Obama "approved" the message.
* Bill Clinton marries John Heinz, who in turn becomes Governor of Pennsylvania. Clinton, meanwhile, marries Maria Shriver and eventually becomes the US's ambassador to the UN.
* Bill Clinton never got to meet his biological father, as he was killed in a car accident three months before Bill's birth.
* Bill Clinton. Of course, it ultimately didn't work in the end, considering how his eating habits led to him requiring open heart surgery in 2004. He eventually went vegan.
* Bill Clinton, performed by an unknown artist as Bill Clinton. It includes the following lyric...
* Bill Clinton's famous "definition of 'is'" quote is actually an example of this. He interpreted the question "Is there a sexual relationship between you and Monica Lewinsky?" to mean "Is there presently...." when apparently the interlocutor intended to ask "Is there now or was there ever..." and just formatted the question poorly.
* Bill Clinton should she have won the election. It's not as much of an oddity at the state level, though, where many states have had female governors and, by extension, First Gentlemen (as well as Colorado, which has an openly gay male governor who is unmarried, but whose domestic partner uses the title), to the point where Wikipedia simply uses "First Spouse".
* Bill Clinton's years, too. A young lady came out to take the president's dinner order:
* Bill Clinton The words that crossed the first word (specified below along with

their clues) were such that either "CLINTON ELECTED" or "BOBDOLE ELECTED" could have been valid solutions.
* Bill Clinton to issue an executive order overturning the results of an elementary school band competition;
* Bill Clinton. Unfortunately, Dave is not fired, as Bill's routines garner the station its best ratings ever.
* Bill Clinton was impeached for having an extramarital affair in the Oval Office. Sort of. Impeachment is just the first two stages. Bill only technically got in trouble for perjury, because he lied under oath about having an extramarital affair... had he just said "I like thick chicks," he'd have been fine from a legal standpoint. He no doubt lost a few points for trying to question the definition of "is" as well. (And if the Starr Report had focused more on that, then it would have been easier to convince the public that perjury was the true intent. It was hard to doubt that Clinton was impeached for adultery in all but name.)
* Bill Clinton was once giving a speech to a Chinese crowd. He opened by saying "hello" in Chinese, ni(2) hao(3) [你好]. Unfortunately, he pronounced it ni(4) hao(4)[你嚎], coming up with "you are barking." Nobody had the heart to correct him.
* Bill Clinton when the panel suggested that then British Prime Minister Gordon Brown should have a sex scandal so that no one would remember his actual policies.
* Bill Clinton. Whether it's better or worse now that it's popular depends on the virtual neighborhood, but at least the technology permitting access has gotten faster and smoother.
* Bill Compton in turn has a father-daughter bond with his protege Jessica Hamby.
* Bill Cosby about Chinese mustard and the time when he took a girl to a Chinese restaurant as a teenager. Being broke, he attempted to get as much as he could for his money and dunked his entire egg roll in the mustard. His description of his reaction on biting into it is priceless.
* Bill Cosby aired its finale (and Bill became notorious for his sexual assault cases) and Arnold switched to politics.
* Bill Cosby album, the young Cosby addresses an orderly: "Hey, you! Almost a doctor!"
* Bill Cosby", and at another point in the "Chocolate Cake for Breakfast" skit when he accidentally says that he was awakened at 4 AM instead of 6 AM.
* Bill Cosby and having basically the same reaction as from a campfire ghost story.
* Bill Cosby, and he promptly smeared Jell-O all over his floor and set his sofa on fire to discourage the "monster." Cosby's routine is now much better known than the original sketch. Ba-bump, ba-bump, ba-bump...
* Bill Cosby as it usually takes the audience a few moments to remember the soap chips in the mouth (which was mentioned early on in a fairly long story).
* Bill Cosby asks Noah the same question in the third skit after the latter starts complaining about the task he's been given, but he keeps right on complaining, justifiably so.
* Bill Cosby calculated his material to shy away from politics and instead focus on family life and childhood stories. He took it as a point of pride that his humor shattered perceived racial barriers because his angle was not on what it is like being a young black kid in Philly or a black parent but instead was just about the adventures of being a kid hanging out with his friends and how bemused and lost some parents can get.
* Bill Cosby describes how unprepared he was for his newborn's appearance:
* Bill Cosby, describing playing football on the streets of Philadelphia as a kid, attributes this to his quarterback:
* Bill Cosby: Despite having three different sitcoms with "Cosby" in their titles, his character name is always completely unrelated.
* Bill Cosby, drank coffee like this back in med school. Two sips guaranteed to keep you awake through your entire resident shift.
* Bill Cosby featured a rant about how fathers are the most fun family members because they're the only ones allowed to have gas. He also discussed how his father used to blame his farts on invisible animals.

* Bill Cosby) features him learning how to take his wife through breathing exercises. (Apparently this is a popular trick at parties: "Ladies and gentlemen, the Breathing Cosbys!") He tries "macho breathing" and cheerleading ("Push 'em out, shove 'em out, way out!"), but these don't go over as well.
* Bill Cosby, finally culminating in him forcing the two boys to stand up all night.
* Bill Cosby had a bit in his act about how he panics when his wife gives birth.
* Bill Cosby had a routine in his standup about a conversation with Ray Charles, in which he kept asking Ray why he had all the lights off in his hotel room.
* Bill Cosby has a routine called "My Brother Russell," revolving around a terrible night trying to sleep in the same bed as his youngest sibling. Cosby actually had several of these, including one where Russell would tell his parents Bill had set him on fire.
* Bill Cosby has a stand-up routine about how his father would never give him any money but would instead tell him a story about how he made whatever it was Bill wanted to buy when he was a boy, and all of these stories ended the same way: "...and that's how I met your mother!"
* Bill Cosby has called this "the curse", in that problematic children will have kids of their own that behave just like their parents in order for the problematic children to understand just what they put their parents through.
* Bill Cosby, having a 21-year statute of limitations at that time). As a result, several states have introduced bills to either extend or eliminate the statutes of limitations for sexual offenses.
* Bill Cosby: Himself criticizes a mother demanding an answer to a question she asks, then tells the answerer to shut up when they try to respond:
* Bill Cosby himself said that if Phylicia Rashad's belly got any bigger, they would have to park the Huxtable's car in the living room just so they could hide her stomach behind it.
* Bill Cosby: Himself so horrified his wife by going along with the titular request that she told him to go back to bed.
* Bill Cosby in which he tries to scare his other friend, Fat Albert. It ends with Bill getting trampled by Fat Albert, and going to the hospital, and being placed by a "wino who was run over by two kids". He and the wino end up agreeing that frightened people are very difficult to get along with.
* Bill Cosby" is bullshit. He tells his toddler daughter she can't have a cookie, then catches her with her hand in the cookie jar. When he asks her what she's doing, she says, "I was getting a cookie for you, Daddy!"
* Bill Cosby referred to this in many of his stand-up routines, including his mother's threat to "knock the black off of him".
* Bill Cosby routine sums up the disadvantages of being a conspicuous wartime medic pretty well.
* Bill Cosby routine that brought his rape allegations to light tells his audience to "Google "Bill Cosby Rape", it's not funny, that shit has more results than Hannibal Buress."
* Bill Cosby said it best when describing the course of events in an auto accident:
* Bill Cosby served three years of a three-to-ten year sentence for sexual assault before having the conviction vacated due to a procedural screw-up. In 2005, District Attorney Bruce Castor declared in a press conference that there wasn't enough evidence to bring criminal charges against Cosby and used this to compel him to self-incriminate on the stand during a civil trial against him. The testimony he gave in that trial was later used to convict him in his criminal trial; the Pennsylvania Supreme Court held that the press release constituted a legally binding promise that had been used to screw Cosby out of due process and his 5th and 14th Amendment rights had been violated, and released him.
* Bill Cosby's "Fernet Branca" routine centers around his use of this drink (a liqueur with an intense bitter taste) to relieve indigestion caused by eating barbecued sparrow. It sends him running for the bathroom.
* Bill Cosby) shared business and bank accounts but insists their relationship is "a pure business matter"? Florida.

* Bill Cosby." So he finds his daughters in their own bathroom trying to make their own wallie wallies come out, urinating all over the floor. His wife comes in and asks what the hell he's teaching the kids.
* Bill Cosby sound, and quite a bit of power, that he and all his friends loved.
* Bill Cosby's page starts by saying he is "an American stand-up comedian, actor, musician, author, and convicted sex offender."
* Bill Cosby talks about how, as a child, he had his tonsils removed. He described being knocked out as the doctors telling him to count backwards from one hundred and him making it to about ninety-nine before passing out. He adds that he felt rather embarrassed about that since he was sure that his alcoholic father could have lasted longer. Usually it takes less than 10 seconds though.
* Bill Cosby The end result being a karate instructor with a broken arm.
* Bill Cosby. The opposing team surrenders the second they see him. "Now, I told you that story to tell you this one". Cosby then tells the story of the time they scared Fat Albert, but Cosby forgets that he was standing behind Fat Albert. He ends up in the hospital and shares a room with a wino who was trampled by two kids, and they both agree that frightened children are very dangerous.
* Bill Cosby, the titular hero offs one of the vegetarian bad guys in such a manner — by feeding him a cold hot dog.
* Bill Cosby (though he didn't stay on the show as long as Freeman did, and unlike Freeman, Cosby doesn't regret being on the show).
* Bill Cosby when, after their father forces them to stand up all night instead of sleeping, Bill tries to claim part of the floor.
* Bill Crider's "My Heart Cries for You" has Ethel Ann, an overweight slob who exists chiefly on frozen food and beer and spends most of her time watching game shows. The narrator
* Bill Cunningham (March 13, 1929 – June 25, 2016) was a fashion photographer who made it his personal mission to be as independent a voice as possible and made a point of seeking out people on the street who showed a strong sense of personal style, no matter how quirky, rather than celebrities following the latest trends. He lived an ascetic life and spent many decades living in a tiny studio (without a kitchen or bathroom) at Carnegie Hall that was filled to the brim with fashion books and boxes of photographs and negatives while sleeping on a board balanced precariously on top of it all. For most of his life, he would only work freelance for publications that offered him editorial freedom and would often work for free because his employers would have nothing to hold over his head in the event of a disagreement. He was so firm in his belief that he would never be beholden to anyone that he wouldn't even accept food or drinks when he was out photographing events. This philosophy, combined with a sharp eye, meant that he was highly respected within the fashion community; well-known fashionistas like Anna Wintour lived in fear of him ignoring them on the street because it meant that they were falling out of style. As he got older, however, he compromised somewhat by taking a job with the
* Bill Dauterive spends an episode purposely being mistaken for gay much like one of the examples above, as the trendy salon he is hired by only employs women and gay men, thinking straight men simply don't have what it takes to be good hairstylists. He blows his cover when an extremely attractive female customer flirts heavily with him and says it's a shame he's gay. Of course, when he "comes out" to her (loud enough for the whole salon to hear), she immediately becomes disgusted with him (and herself, for letting a straight man style her hair).
* Bill Deedes, turning up to cover the Italian invasion of Abyssinia with almost 600 pounds of luggage.
* Bill - dresses like an actual MIB, but dismisses the idea of creatures like aliens and Bigfoot, choosing to believe in theories like
* Bill Dundee debuted in 1962 and still occasionally wrestles in 2019 at 75.
* Billed Above the Title: Famous actor or writer gets top billing for their work's cover.
* Bill, Emma and Derek know about Dimity's ongoing contact with Lori via the journal (Bill and Emma have actually experienced it for themselves). To date, they

have not shared this info with anyone else, not even Dimity's former attorney Willis Sr.
* Bill Engvall a lingo, $2000 usually being enough to overtake anything of a lead the competition might have had.
* Bill Engvall are based off actual events that he has recounted in his stand up act.
* Bill Engvall because Bill's eight-year-old son found them first and tried to be helpful by hollering the entire length of the aisle that'd found them.
* Bill Engvall because of a weather warning in Texas—which turns out to be for an inch of snow. He then compares this to states like Michigan, where "in an inch of snow, you can still find your golf balls."
* Bill Engvall does this in one skit when he and his son go to a drugstore to find maxi-pads for his daughter. He can't find the pads, but his son does and yells "HERE'S THE LITTLE GIRL NARROW PADS, DADDYYYYY!!!" To which Bill responds, "...Thank you, son. Listen, I don't think they heard you in SCOTLAND!!!"
* Bill Engvall duck whenever Bill said "Duck!", he would do it just to mess with her. Bill's response: "Touche."
* Bill Engvall example, Bill still sometimes channels his inner Captain Obvious for his comedy act. Usually the "Here's Your Sign" jokes are about other people's stupid questions, but sometimes he himself just can't resist.
* Bill Engvall frequently calls himself all sorts of names, such as how he's a "dork" or an "idiot." A lot of his routines are stories about getting himself in way over his head or too far outside of his comfort zone. He once described himself as "the guy who's always fifteen degrees off cool."
* Bill Engvall friend Lucy who exemplifies this trope and considers holding her down and squirting Coppertone Insta-Tan on her face. He then imagines the reactions of everybody at school the next day:
* Bill Engvall had a similar story during the Blue Collar comedy tour. His plane was coming in for a landing when it had to pull up at the last second. A moose had wandered on the runway.
* Bill Engvall has a "here's your sign" joke wherein he was driving along and came across a tractor-trailer stuck under an overpass. He pulls over and starts talking to the driver as they wait for the police. Cop pulls up and asks the driver, "You get your truck stuck?"
* Bill Engvall he stops for a moment to turn to the hospital staff and say "I better not see this on YouTube!"
* Bill Engvall "holding a note from my wife that said 'Have a good time.'"
* Bill Engvall mentions ones how he smacked his son upside the head because he was hitting another kid, following it up with "We don't hit."
* Bill Engvall mentions the Jimmy Dean ad listed above and cites it as the reason he can now no longer eat sausage.
* Bill Engvall" routine, in which he proposes that stupid people should be given signs so that the non-stupid can easily identify them.
* Bill Engvall sketch about parent-teacher conferences. The teacher asks if there's a history of ADD in the family, and Bill says "Yes, we add, subtract, multiply... why are you spelling it?" His wife then says, "M-O-R-O-N. She means attention deficit disorder." And by that point, Bill is looking out the window at birds.
* Bill Engvall's recurring "Here's Your Sign" routine is that stupid people should be issued signs advertising the fact to wear around their necks, his experiences in encountering people who qualify often take this form.
* Bill Engvall talks about getting these from his father, especially at church. His father would sit with his children on both sides of him, with his arms stretched out behind him on the pew, "like he was huggin' the whole family." And if one of the kids misbehaved, he would be in easy smacking range. "'Brain dusters,' that's what we called 'em."
* Bill Engvall talks about playing Scrabble with his wife. She creates words like "crepuscular" (which, for those interested, means "active at dawn and dusk"; unfortunately, even constructing it around an existing word "pus" takes more than seven letters); the best he can do is "et."

* Bill Engvall. The single peaked at #29 on the country charts and #43 on the Hot 100, representing his only big hit (although "Here's Your Sign Christmas", a parody of "Jingle Bells" with original comedy bits, got some seasonal airplay).
* Bill Engvall, where he is randomly screaming "Roger! Roger Roger Roger Roger!" at the pilot in the middle of chewing him out.
* Bill Engvall, who states that there's nothing like "the sound of a belt clearing belt loops".
* Bill enjoyed this technique. His famous "Chocolate Cake for Breakfast" starts with his wife waking him up at weird o'clock in the morning so he can start making their children's breakfast. After some protest about how it's not healthy to eat this early, he heads down and gets to work, leading to a long and hilarious story about how his youngest asks for chocolate cake and he realizes how HEALTHY it is. (Eggs! Milk! Wheat! Oh, goody!) By the time, his wife comes down, all the kids are eating chocolate cake; she grows furious and they blame him...
* Bill Evans The jazz ballad, "Waltz for Debby", became an international hit, and a jazz standard. Lyrics have been added to the piece in many different languages.
* Bill Fagerbakke; all of them had the "big dumb doofus" form of this trope.
* Bill Gates already owns ones and zeros and, since everything can be expressed in binary, all of existence.
* Bill Gates supposedly said in 1981 "640K[B] ought to be enough for anybody.", which when the personal computer took off would eventually proved a very short number (by 2008, a computer had up to 128 GB of memory!). However,
* Bill Gates to be a suit piloted by Brain's archrival Snowball the Hamster.
* Bill Gates, when IBM engineer David Bradley said that although he invented Ctrl-Alt-Delete, it was Bill that made it famous.
* Bill Gates, who is known as an intense workaholic, has said that he often hires lazy people to do the hardest tasks because they will find the easiest way to do it.
* Bill gets permanently banned from every library worldwide after protecting Cricket.
* Bill Goldberg and IGF (where Lesnar had more bad matches), even his mixed martial arts career after he was picked up by UFC, where he humorously decided to cut a heel style promo after winning their heavyweight belt.
* Bill Goldberg is a big, muscular, wrestling monster like Lesnar, and has a high-pitched nasal voice.
* Bill Goldberg plays the trope straight, but was rarely vilified for it. In fact, his 170-plus-match winning streak in WCW was one of the reasons the company was so popular.
* Bill got his shirt ripped off his newly adopted Rottweiler in "Dances With Dogs".
* Bill Hader did voices too, until his death in a car wreck in August 2005.
* Bill Hader is the man pretending to be a woman that Theodore finds in the phone sex forum.
* Bill Hader ("Love is a Dream," a Tom Schiller-written short film about an elderly woman who visits a bank vault to wear her old jewelry and is transported into a musical where she dances with a prince who turns out to be the bank's elderly security guard).
* Bill Hader pretty much always wears plaid shirts, tan pants, and New Balances. As noted on Conan, there was a Tumblr called "Get Bill Hader a change oof clothes" with dozens of shots of him in said outfit.
* Bill Hader) would sip beverages and await the answer. The guest would then reply "I don't really watch reality TV", at which Brady, goggle-eyed with shock, would turn and spit his mouthful of beverage directly into Anastasia's face.
* Bill Haley & His Comets in 1954 to record it (though rumors of a 1953 demo persist despite denials by Haley and his bandmates).
* Bill Haley & His Comets's son Peter's record collection) to become a hit.
* Bill Haley & His Comets, the opening credits of "Happy Days Again" used Haley's original 1954 recording of the song, even on episodes that originally aired with Pratt & McClain's "Happy Days" theme song that replaced Haley's tune.

* Bill Hannah and Joseph Barbera appeared as themselves in the pre-show for
* Bill Harley at a duck hunt. Harley was sleeping in his boat at the time, and was snoring loudly, attracting the attention of ducks. They went behind Bill's boat and fired a few rounds at the birds, much to Bill's bewilderment.
* Bill has never outright dismissed or challenged Thor's claims to godhood and made this statement after witnessing the damage of religious wars. His people were destroyed over the struggle between the traditional religions and the new belief of Bill as a god, the Skrull invasion of Earth in the name of their god, a madman causing genocide in the name of his religion, and further Skrull infighting over whether to follow the traditional Skrull gods or take Bill as their new god.
* Bill Hayes, had a #1 hit in 1955 with "The Ballad of Davy Crockett". His follow-up stalled in the '30s and he never charted again.
* Bill Hicks, and the people who appear on the show. Specifically the spouses and significant others of criminals being carted away by the police.
* Bill Hicks believed the eventual evolution of this trope would be this:
* Bill Hicks: Best known for his scathing socio-political commentary in the 1980s, very much ahead of his time during his heyday in the 1980s before his tragic early demise from cancer, making all of his routines about smoking and death even darker.
* Bill Hicks' comedy routines were pretty much nothing but this trope. He liked challenging mainstream beliefs on society, religion, politics and pop culture, often in a deliberately controversial way.
* Bill Hicks dared to criticize the American government at the height of the Gulf War (1991).
* Bill Hicks did a similar joke. "So I get to stay here, with the shitty food and shitty weather, or go to a tropical paradise? ...I'm Jack the Ripper."
* Bill Hicks had a notorious comedy routine in which he accused bands that endorsed anti-drug messages of
* Bill Hicks has a variation on this theme. While talking about the first Gulf War, he compares trying to aim a Scud missile to an Iraqi driving a Buick, poorly enough to land it in the ocean. The sinking Iraqi then tries to escape the Scud, and, trying everything, activates the wipers.
* Bill Hicks, has him break from his set to rant angrily at a hostile audience for the better part of 45 minutes.
* Bill Hicks. He has also recorded a song about it: "Chicks Dig Jerks". Both have a decidedly bitter tone.
* Bill Hicks in one of his stand-ups: "Why don't you answer a question like a man, you fucking lying, B-actor, dickweed, Mr. President-sir, with all due respect."
* Bill Hicks: "[On the subject of cars being legally required to stop and allow pedestrians to cross the road]... only in LA do you have to legislate common courtesy!"
* Bill Hicks' recipe for a perfect world? Let everyone stay home, get stoned, and order pizza.
* Bill Hicks thought being sent to Australia from Britain wasn't much of a punishment.
* Bill Hicks, who even referred to his act as "Chomsky with dick jokes."
* Bill himself is responsible for Big City being built around the Greens' house.
* Bill Holbrook — all run in approximately real time. Single storylines may use up several days to portray the events of a few minutes, but then there are periods of inactivity again, so that we get regular scheduled real life events spilling over into their world, such as Valentine's, summer camp or Christmas. Safe Havens followed school kids through their school years, Safe Havens and On the Fastrack have a common 'Mars Mission' plotline that evolves in real time, too.
* Billibub Baddings elves (especially not the women!), and in fact reveals that in their world, the rivalry originally started over a recipe for malt beer.
* Billie and Walky. They've known each other since childhood (though Billie avoided him in high school), bicker near-constantly, and Billie seems to view Walky as her
* Billie Bust-Up is a marionette who also controls two giant floating marionette hands to turn others into marionetted with. Fantoccio was magically brought to

* Billie Church and Frank Delgado, two members of the Jericho Team in
* Billie Eilish and her brother and producer Fineas tend to record interesting sounds around them to use in songs - "Bury A Friend" uses a recording of a dentist drill for unsettling texture. More prominently, the hi-hat sound in "Bad Guy" came from an Australian crosswalk signal - in its original context, the rhythmic clicking is meant to let blind pedestrians know it's safe to cross the street, but it happens to make for a catchy dance beat.
* Billie Eilish becoming the second artist to win "the big four" in one night.
* Billie Eilish has always been mature for her age, even before she became famous. She has a nihilistic point of view on life, especially being well-spoken and eloquent for her age.
* Billie Eilish has naturally green eyes and frequently uses green tints in her hair.
* Billie Eilish is a natural brunette but has dyed her hair a dark green-black mix. In her early years, she dyed it to a silver-white mix.
* Billie Eilish ran a headline about her "selling out", but were swiftly refuted as Billie outlined that she was regaining autonomy of her own body.
* Billie Eilish. She also genuinely admits that pooping is her favorite part of the day.
* Billie Eilish). She says that it's purely her expressing herself, she doesn't see it as making any wider point about gender politics, and she really doesn't want to be used as a contrast to shame female celebrities who do have a sexier image.
* Billie had quite an active sex life as a single woman, to judge by the many men she's shown having sex with in flashbacks.
* Billie has never liked the Winchesters but grudgingly accepts working with them after she becomes
* Billie Holiday, a jazz singer who is best known for "Strange Fruit." Throughout her career, Holiday was openly bisexual and many of her female relationships were with stage and film actresses.
* Billie Holiday: Also known as "Lady Day", probably the most famous jazz and blues vocalists of all time. Much emulated, her tragic life is as well known as her talent. Mostly known for her later work, when her voice had a hoarse and cracked quality that was very moving, although this is a pity, because her earlier work for Columbia (when her voice was in perfect shape) is as good if not better. She is often depicted in media, and even has a cult classic biopic starring Diana Ross. "Strange Fruit" by Abel Meeropol, her signature song, brought attention to the lynchings of blacks in the Deep South, and was voted by Time Magazine as the greatest song of the 20th century.
* Billie Holiday ever recorded. It was the underground hit that marked the turning point in her career.
* Billie Holiday: Everyone who adores troubled artists, especially singers, admires her. There is a reason why she is still the most iconic jazz singer of all time.
* Billie Holiday first sang "Strange Fruit", the result was silence... then a Slow Clap.
* Billie Holiday's song called "Strange Fruit", about African-American lynchings.
* Billie Jean King co-owners of Angel City FC, set to start play in the NWSL in 2022)
* Billie Jenkins also has this as a power. It had also become very common power in the later seasons for most witches.
* Billie Joe Armstrong dyes his hair between blonde and black regularly, he used to dye it many crazy colors in the mid-90s: red, blue, blonde with oddly placed dreadlocks, etc.
* Billie Kay and Peyton Royce. "The Iconic Duo" are always seen together, caring deeply for each other.
* Billie Kay: Signed with WWE NXT in 2015. Made her main roster debut in 2018.
* Billie Kay without any of the aspects that made the Dallas turn effective.
* Billie Lou Watt, who voiced Eustace's mother and passed away shortly after the season three episode "Scuba Scuba Doo" (the last episode of the series to feature

Eustace's mother) ended production.
* Billie masturbates by using a vibrator after giving up on having sex with Cooper as he's more interested in the football game than her.
* Billie masturbates while watching Brad and Sasha have sex over FaceTime.
* Billie may have been this for Ruth, who admits they "found out I was into girls" together.
* Billie — as a backhanded way of acknowledging he hasn't always been a good brother to Sal.
* Billie Piper. Her mother decided that either way she was going to be called Billie before she was born. She was registered on her birth certificate as Lianne but her parents changed their minds back and always called her Billie. And her middle name is Paul.
* Billie Piper. Obviously, a pregnancy couldn't be written in, so a body double was used for nude scenes and Belle began wearing baggy, unflattering dresses. It becomes quite intrusive when you know about it, as sex scenes involve tight close-ups on her face, then shots of her body from the shoulders down.
* Billie Piper openly (albeit humorously) commenting on her attractiveness, along with the statement that the men of Britain (including himself) were eagerly awaiting her 16th birthday when she'd be legal in the UK.
* Billie Piper, who needs no introduction (apparently she's a pop singer from Australia?), yet neither sang a note during their appearances on the series (and Minogue's episode even included an original song, which was performed by someone else).
* Billing Displacement: After said actor's breakout into stardom, the old work is repackaged to emphasize their presence, at the expense of other actors who otherwise had more important roles.
* Billing Displacement: The big-name actor plays a smaller part in the work than the marketing materials suggest.
* Billing Displacement: The work gives top billing to more well-known actors even though they are not in starring roles.
* Billing Displacement: Top billing is given to the most recognizable actors even though their characters are not the stars.
* Bill intentionally does this in one episode, emulating another Camp Gay character in an effort to better his and Luanne's position at their hair salon workplace.
* Billionaire Birthday Blues, your motive might be sympathetic but your methods are INHUMAN. The grandmother herself even lampshaded this.
* Billionaire Girl computer. The logo is similar to the real-life Dell logo.
* Billionaire Pete had to work very hard to win Monica over because of this problem. He had everything: money, connections, good humour, a kind personality, but Monica just didn't feel anything. Eventually, she decides she can't ever see him again because she doesn't want to break his heart, so he takes a gamble and gives her a hot kiss goodbye (the first kiss they've ever had). She's so startled by how good it is, she immediately initiates a
* billion). And it doesn't stop there: while he didn't count on Kerrigan returning from there as the superpowered leader of the Zerg, it leads to him using ever-more desperate measures to kill her:
* Billion Dollar Brain, Harry Palmer has left British Intelligence and is working as a private eye. A pile of photos on his desk show a couple caught in bed in a hotel room, and the last photo just shows a large fist flying at the camera.
* Billion Dollar Brain has left British Intelligence and is working as a private eye. Some photos on his desk show a couple caught in bed in a hotel room—the last shot is of a large fist flying at the camera.
* Billion Dollar Brain is rendered unconscious immediately with a chloroformed handkerchief and wakes up later in a car.
* billion it belonged to, never mind species. Perhaps more egregious in this particular scene is how the floating candy DNA chain somehow rotates on an axis.
* billion light-years away. Now that's what you call a Wave Motion Gun.
* billions - and he did it in a single year, while presumably keeping most of the

* billions, a smartphone OS co-maintained by Nokia, wasn't as popular as it was in the rest of the world either.
* Billions Bobby Axelrod turns down a seduction by an attractive singer, saying that his marriage is "the real thing." Given that he is a billionaire hedge-fund manager who engages in various illegal practices and admits to having poor impulse control in other areas, it is particularly remarkable, especially compared to the extremely macho, hedonistic lifestyle of many of his colleagues.
* Billions. By round three they can barely lift up their gloves. By round four they can barely stand. They both collapse before round five and the match is declared a double loss.
* Billions: Chuck's wise, well-spoken jiu-jitsu trainer is played by John Danaher, who is well-known in the martial arts world as a wise, well-spoken jiu-jitsu trainer.
* Billions: In the first season, after "Dollar" Bill just barely squeezes out of an insider-trading charge, he arrives back at Axe Capital triumphantly, only for Axe himself to curtly summon him into his office and yell at him to shut the door. Bill is expecting to be chewed up for something, but Axe tells him to pretend to argue with him while he expresses how proud and happy he is for Bill. Axe just wants everyone to think that he and Bill are on the outs.
* Billions is filmed in and set in New York. Bobby is a survivor of the attacks that occurred in the actual city of New York in the year 2001, the Rhoadeses live on 8th Ave somewhere on the Upper West Side, and the Axelrods buy a new house in the Hamptons.
* billions suggests just that: the genocide of humanity was, in fact, not really a matter of cold machine logic, but Number One throwing a "temper tantrum" because "mom" (i.e. the Final Five) didn't like him best.
* Billions. Wendy thinks that he insists on always wearing suits to social events out of vanity for his politically important position, but he's really just trying to not look so inadequate beside her.
* Bill is sleeping with her private tutor in a tone that implies she's told her many times before. Moira also gives Bill two very old £10-notes for Christmas (Bill got her a fancy scarf), and only mentions the box full of photos of Bill's dead mother in an off-hand comment.
* Bill is the one responsible for letting out the animals in "Blood Moon" because he couldn't face letting the kids go trick-or-treating without him.
* Bill is treated as this both in-universe and out of universe. The man tolerates so much hardship throughout the series and can never catch a break, but for whatever reason he continues going on.
* Bill James, baseball statistician, got his start developing his take on sabermetrics (baseball statistical analysis) while a night watchman in a pork products factory. In 2002, he was hired by the Boston Red Sox and helped them pick up two World Series trophies in 2004 and 2007.
* Bill "Jettman" Ramey, founder of the "Batman on Film" website and forum, is pretty well known to a good number of people in the online Batman and Superhero fandom.
* Bill joke after Shakespeare introduces him to the concept. And failing.
* Bill Lawrence finale. He also appears a few episodes earlier as the person who marries The Janitor to Lady, complete with a "We are gathered here in the presence of The Creator" line.
* Bill Lawrence, has been hailed for his type of comedy seen nowhere else on television.
* Bill Lawrence. The wedding video that Dr Cox watches after Jordan's first appearance is actually Bill and Christa's, which is why only she can be seen. Lawrence also wrote both of her pregnancies into the series.
* Bill Maher falls under this, hard. His highly political material, paired with his tendency to try to be edgy, make him a very divisive comic prone to clapter/criticism, depending on who's watching.

* Bill Maher the three monkeys dressed as a rabbi, a priest, and an imam.
* Bill Mantlo named Bioship. Bioship later gets destroyed, and he is rebuilt again in his original human-sized "Biotron" form.
* Bill Mauldin called them Garritroopers — "too far forward to shave, too far back to get shot."
* Bill Mauldin occasionally had fresh troops join the dogfaces up front, who're squeaky clean and freshly shaved compared to veterans who've been living in foxholes. Typical behavior included complaining about not being shot at after being in the Army for two days and still remembering how to march in parade formation.
* Bill Mauldin's Willie and Joe are this to an extent. They are shown loaded down with extra equipment, to the point where one tells the other, "You're tired 'cause you carry too much stuff. Throw the joker outta your pack of cards."
* Bill Mazeroski, the Hall of Fame second baseman for the Pittsburgh Pirates, called his walk-off home run to win the 1960 World Series to complete an upset of the Yankees "a curse in disguise." He was never a prolific hitter, and outside of Pirates fans, people saw only that home run, not realizing he is the best defensive second baseman to have ever played the game.
* Bill McLaren was on the verge of playing his first game for Scotland's national rugby team when he contracted a near-fatal case of TB and was forced to give up playing. He went on to become a renowned commentator, earning him the nickname of "the voice of rugby".
* Bill Monroe and the Bluegrass Boys created a distinctive sound that was picked up by other groups and became a genre, bluegrass.
* Bill Mumy and Jonathan Harris. They remained friends ever since they filmed together on
* Bill Mumy. Luckily, no one was physically harmed during the incident.
* Bill Mumy", plays a diner patron named Tim in the film adaptation. He sarcastically tells his friend Chris that it was "real good" that he attacked Anthony.
* Bill Mumy, the father of Leni's voice actress, Liliana Mumy, voices Timothy McCole.
* Bill Murray, as they both had different ideas as to how the film should be. Murray felt the film should be more philosophical, while Ramis felt it should be more comedic. This wasn't helped by Murray's divorce. They only reconciled before Ramis' death.
* Bill Murray (better known as a comic actor, but also a part-owner of several minor-league baseball teams)
* Bill Murray, but it actually falls into this territory, since he's in the movie for quite a bit of time (playing himself) and is actually the only other non-flashback speaking character outside of the main four.
* Bill Murray, Dave Wilson, Bernie Brillstein, and Don Pardo). But to keep things from being too depressing, the final tribute was to cast member Jon Lovitz. The cameras then cut to a very alive and confused Lovitz sitting in the audience. A similar gag occurred during Steve Martin's opening monologue. At the end of the segment, Bill Murray give the audience one last death notice that came later to included it properly on the tribute.
* Bill Murray gets to wake up every day for the rest of his life to the sound of two yammering deejays in
* Bill Murray. Having lost their sergeant temporarily to an artillery accident, the platoon of army privates stays up all night studying for their march display the next day. Despondent, they begin to give up until Murray launches into a speech about the stick-to-it attitude of Americans:
* Bill Murray in some of the '70s episodes was originally named Todd Labounta, which was the real name of a guy a couple of the SNL writers had gone to high school with. They had to change the character's name because he threatened to sue them if they didn't.
* Bill Murray in Zombie makeup decides to play a prank on Columbus and Little Rock by dressing up as a zombie and trying to scare them. This leads to a very surprised Columbus delivering a blast of buckshot through his chest. Not the smartest prank

to pull in a world infested by zombies, but the character involved was high on pot at the time.
* Bill Murray is in the film trying to play basketball? That's actually a reference to the series of promo ads Murray did for the league circa 1995 claiming he was going to play NBA ball.
* Bill Murray shortened it to "This chick is toast!" (And in case you're wondering, yes, the "chick" was a "guy" in the original screenplay.)
* Bill Murray the live-action stars of the movie, aside from Wayne Knight and a few others.)
* Bill Murray throughout the film, most notably in the dinner sequence.
* Bill Murray was "Med Røven i Vandskorpen", "With the Ass in the Edge of the Water", which is a danish idiom meaning something like "In a tricky situation".
* Bill Nighy was considered for Lucius Malfoy before being cast as Rufus Scrimgeour.
* Bill Nye has this rather amusing anecdote about how his grandfather learned to tie a bowtie:
* Bill Nye Saves the World, "man on the street" style interviews, correspondent field pieces, panel discussions, and monologues from Bill himself.
* Bill Nye the Science Guy, and cut out many segments they couldn't get the music or talent rights to. The actress in that segment couldn't be found, so it was cut.
* Bill Nye the Science Guy, as the show is structured around looking like, well, a person channel hopping. Examples include advertising planktons as a breakfast cereal, complete with a catchy jingle.
* Bill Nye the Science Guy beat him to it by 12 years with his countdown of his own Top 11 Music Videos "because it's a prime number."
* Bill Nye the Science Guy embraced this trope. "And now, for a really big chemical reaction."..... BOOM. Bill once displayed the chemical formula for nitroglycerin. He then proceeded to drop the formula, and it exploded.
* Bill Nye the Science Guy episode "Atoms" Bill enters the lab which is all full of different items which he claims are all made of matter. One of the items is—the kitchen sink!
* Bill Nye the Science Guy: In the episode on digestion, every time Bill says "all the way" a toilet flushes off-screen.
* Bill Nye the Science Guy is used in many science classes around the world.
* Bill Nye the Science Guy. Neil was little more than a cameo, but Bill Nye played a somewhat extensive part.
* Bill Nye the Science Guy: Stop the Rock! person who averts this is the news reporter.
* Bill Nye the Science Guy: Stop the Rock! this trope. Best exemplified by his screaming rant on Day 5:
* Bill Nye the Science Guy this happens when Bill flicks a red-kneed tarantula onto the cameraman, causing the cameraman to drop the camera onto the floor. The cameraman screams "THE TARANTULA'S CRAWLING IN MY PANTS!!" while the trope name is broadcast on the screen.
* Bill Nye the Science Guy wants you to "take a look at this. It's our [Really-Elaborately-Named-Device] of Science!" *Triumphant trumpets*
* Bill Nye the Science Guy was one of the earliest series to have disproved this. Bill gets stuck in a tidal flat. He takes the opportunity to explain that you won't be buried alive in the sand, or mud in this case: you're more likely to drown or get stranded, especially if no one knows where you are. The trouble is if you're in a place where a high tide comes in; some rescue workers pulled him out safely before it can get that far.
* Bill Nye the Science Guy, when the computer you had to convince humans were worth saving from a giant asteroid spoke, the screen it was using flashed large pixels expanding from the center, with color and number corresponding to volume.
* Bill Nye the Science Guy, which had similar formats and were similarly quirky.
* Bill Nye the Science Guy (who actually admires him) for ripping off his show.
* Bill O’Reilly is angry with Stephen Colbert for mocking his efforts to auction off handwritten notes from his pre-Super Bowl interview with President

Obama. This is because, after O’Reilly announced the auction of the “historic” item, Colbert responded by auctioning off a microwave once used by the magnanimous O’Reilly himself. The feud has resulted in “a huge misunderstanding between me and my Broadcast life partner,” Colbert
* bill of attainder was a type of law passed by Parliament that declared a particular person to be guilty of a crime and ordered them to be punished accordingly, with no way for the target to appeal or otherwise defend themselves. It served as a convenient way for the king to get rid of his enemies without having to bother with a trial, though its use did depend on Parliament's cooperation. It eventually fell out of favour due to the potential for abuse and as Parliament became increasingly uncooperative with the wishes of the monarchy, but was never officially abolished.
* Bill of Middlesex allowed the Court of King's Bench to hear cases that would normally be in the jurisdiction of the Court of Common Pleas.
* Bill O'Reilly over O'Reilly (and every inch in between) — used primarily to defuse tension and get some laughs.
* Bill O'Reilly played a clip where he transitioned from an ambush interview on a bus to an exasperated condemnation of Paparazzi without pausing.
* Bill O'Reilly that is still popularly used to this day. Needless to say, O'Reilly's attempt to get people from supporting rap music had the complete opposite effect.
* Bill O'Reilly. The cover actually features Jon and a chimpanzee. Colbert liked it.
* Bill, Philip forgets that he has Sir Richard Hawkins in his dungeons till Elizabeth reminds him. The credits show that he is still there at the end of the movie.
* Bill Plympton. Exactly what is sounds like, complete with Santa making deals with Hitler.
* Bill Plympton, giving his animation a choppy look that became his signature style.
* Bill Plympton is about a misanthropic man who becomes one of these when two huge, feathered angel wings spontaneously sprout from his back and compel him to start doing good deeds.
* Bill Plympton is a plotless cartoon about a man who sits in front of his camera while a romantic song called "Your Face" plays, and the man's head transforms and morphs in all sorts of bizarre ways. At the end the man finally stops doing weird faces and looks at the camera as it pulls away—until a giant mouth in the earth opens up and swallows him whole.
* Bill Plympton, which features generous amounts of onscreen sexual intercourse, defecation and gore.
* Bill Plympton who grows a pair of wings that forces him to be nice against his will.
* Bill Plympton who grows a pair of wings that forces him to be nice against his will. He tries cutting it off but the wings grow back. Eventually the character becomes nice in the end and the wings fly off.
* Bill points out the Doctor has (as usual) steered the TARDIS wrong. The Doctor says you don't steer the TARDIS, you reason with it. When Bill asks how you reason with the TARDIS, the Doctor replies, "Unsuccessfully, most of the time."
* Bill Potts is barely saved from the grave after her heart is vaporized in
* Bill Potts was wholeheartedly welcomed by the fandom after she takes over from her
* Bill Powell, after being banned from local golf courses due to racial segregation, designed and built the first integrated golf course in 1948.
* Bill Pronzini has a young boy being granted three wishes by a genie. His first two wishes are trivial: for a huge number of ice cream cones and for the ocean to be as warm as his bathwater so he can go wading whenever he wants. But the third wish is for all the children in the world to be just like him, so he will always have someone to play with. The end of the story reveals that the boy is mentally retarded.

* Bill Pronzini short story, a man shoots the lawyer who embezzled from his late father. He's caught in the lawyer's locked high rise office, and there's no trace of the gun anywhere in the office or nearby. The police are baffled. They only find out two key facts when it's too late: one, the murder weapon was a homemade zip gun, easily disassembled into small component parts. Two, the killer for a time worked for a circus: as the Man With the Iron Stomach...
* Bill Pronzini's short story "The Same Old Grind", this is how the German deli owner Giftholz is able to get away with charging two dollars for a full course sausage hero sandwich meal.
* Bill Robinson has been voluntarily homeless for over twenty years, lives off the grid in a hut that he built himself, and financially sustains himself through a mix of farming and band income. Touring serves as a way of wandering.
* Bill Russell, the main gear behind the Boston Celtics dynasty. He led them to 11 titles in 13 years, whereas before his coming the Celtics had never won a single title.
* Bill's and Fleur's. For added bonus, the reception eventually falls in the crossfire, too.
* Bill says they went back to the year 1269 to pick up a Genghis Khan, though Khan actually died in 1227.
* Bill's Best Friend delineates the difference between a stoner and a drunk.
* Bill's father apparently spanked him every day for eight years, seemingly for no actual reason. This is implied to be one of the many reasons Bill turned out as messed up as he is now.
* Bill, Shakespeare and Marlowe take a job where they have to dress as a tomato and a cucumber and hand out flyers advertising vegetables.
* Bill: Shakespeare whacks Ian over the head with a stick he has over his shoulder as he wanders through the London market.
* Bill 'Shanks' Shankly, legendary former Liverpool FC manager, famous for taking the club to the summit of the English game, a position it would occupy for the best part of the 70s and 80s, stamped his image on the club and nearly forty years after his death is still nearly worshipped by fans.
* Bill Simmons had one of these (from one of the reader emails) at the expense of a then-winless NFL team with a lame-duck coach:
* Bill Skarsgård, plenty of human characters have this role, such as Al Marsh, Beverly's incestuous father, Sonia Kasprak, Eddie's overprotective mother, Norbert Keene, the local pharmacist and implied hebephile, Patrick Hockstetter, the most memorable and dangerous of the Bowers Gang, and Greta Keene, the daughter of the aforementioned Norbert Keene. Pennywise is a monster, both literally and figuratively, but he still has some cool qualities.
* Bills New Frock has Bill wake up and find himself a girl. Bill finds no difference. None at all.
* Bill's New Frock with second place because it's the best performance he has ever made in the class.
* Bill spends the first nine episodes of her time with the Doctor traveling to the future, the present, and periods in the past when Modern English existed, and so doesn't stop to think about the fact that everyone is speaking English. It's only in the tenth episode,
* Bill's's Karen goes through with the exchange of vows, only to run away with Hank at the after-wedding party.
* Bill's stepmom, something which Ted agrees with and Bill isn't that pleased with, causing them to waste bars getting themselves squared away.
* Bills traps Wendy, Soos, Old Man McGucket, Robbie, Gideon and Pacifica inside tapestries.
* Bill the donkey fulfills the same function for "Shakespeare" in the opening of
* Bill the Galactic Hero (a capital offense, mind you). He is brought before a court where jury members are robots pre-programmed to always find the defendant guilty. To everyone's shock, the robots acquit him... but only because they have just received orders to sent Bill to a hellhole planet.
* Bill the Galactic Hero, Bill has his left arm blown off in battle and replaced

with the right arm of his bunkmate Tembo. Yes, his left arm was replaced by someone's right arm, you read it right. Besides giving him the ability to do a unique two-handed salute, it sometimes acts of its own volition when its previous owner's pride or religious convictions are on the line. Of course, then there's Bill's foot which has been replaced too often to count, including with a "mood foot" which, because of his burning sexual desires, has transformed itself into a satyr's hoof.
* Bill the Galactic Hero "Eager" Beager turns out to be a Chinger spy living in the head of a human-looking robot. The Chinger aliens were presented as giant lizards in the official military propaganda, but they are actually seven inches tall.
* Bill the Galactic Hero features a world-covering city, Helior. While visiting, Bill suffers a grievous mishap: the map of the city chained to his arm is stolen leaving him one of the desperate Unplanned, with no hope of ever discovering where he is or where he needs to be.
* Bill the Galactic Hero has Deathwish Drang who plays this trope to the letter, with pronounced tusks no less. It is later revealed that Drang is a trained psychologist and that the act is a result of decades of research (and his tusks are fake).
* Bill the Galactic Hero has his left arm replaced with the right arm of a bunkmate in the first book. Tembo's arm seems to still retain the memories of its former owner and will make a fist when in the presence of old rivals.
* Bill the Galactic Hero has served in a number of different military roles, including Security, Special Ops, and (of course) a plain old grunt.
* Bill the Galactic Hero, having two right arms, is the only man in the military able to salute with both arms at once.
* Bill the Galactic Hero". His Swiss Army foot rarely worked right, like when he wanted a laser and it shot a condom out.
* Bill the Galactic Hero loses a couple of limbs in battle and the replacements aren't particularly satisfactory as they are scavenged pretty much at random from the voluminous piles of body parts left lying around. In particular, his left arm was shot off and they replaced it with a right arm.
* Bill the Galactic Hero often uses "bowb" as his expletive of choice.
* Bill the Galactic Hero: Only in the most technical of senses does Bill "volunteer" to join the army.
* Bill the Galactic Hero on the Planet of Robot Slaves has the titular character end up on a planet locked in a civil war between two factions of mechanical lifeforms. According to one of the leaders, they have naturally evolved on the planet from primordial oil pools, although this doesn't stop them from building new ones.
* Bill the Galactic Hero on the Planet of Ten Thousand Bars. They venerate dairy products over all other food groups.
* Bill the Galactic Hero on the Planet of Ten Thousand Bars winds up changing history so that it's the Third Reich that spreads through the galaxy rather than Bill's own galactic empire.
* Bill the Galactic Hero story, the titular character has a Swiss Army Foot.
* Bill the Galactic Hero. The Chingers are lizardoids only seven inches high, but as they come from a 10G world, they're able to throw the Space Trooper protagonist easily. Government propaganda portrays them as being seven feet tall so morale won't be affected.

* Bill Walsh was this to the San Francisco 49ers, winning 3 Super Bowls under his command. Then George Seifert was chosen to replace him and he never got out of

Walsh's shadow.
* Bill Waterson did this subtly a few times during his long fight to keep his syndicate from licensing
* Bill Watterson admitted that he wrote a lot of his troubles with the syndicate into
* Bill Watterson, both of which help to prove Watterson had a strong point.
* Bill Watterson commented that he liked Calvin's ability to precisely articulate stupid ideas using smart language.
* Bill Watterson. He's all but disappeared from the public eye since ending his strip in 1995, except for some very rare news articles, such as his review of a biography of Charles Schulz.
* Bill Watterson in 1995 was pressure from Universal Press Syndicate to commercialize his work, with Watterson noting that if Universal wanted to, they could have licensed his characters without his permission or continue drawing Calvin and Hobbes with a new artist, so he decided to discontinue Calvin and Hobbes because he had achieved all he could in the comic strip business. Nevertheless, in spite of his efforts, numerous unauthorized products have made their way into the market, with window decals depicting Calvin praying before a cross, and taking a whizz on various automobiles' and sports teams' logos.
* Bill Watterson into other media. He didn't want any of the characters to have their voices and speech patterns "crystallized", as it were, as that interpretation would bleed back into the strip and would not only prevent readers from enjoying their own interpretations of the characters but would subconsciously affect his own views of them as well. He once recounted being troubled simply by the thought of whether Calvin would be voiced by an actual child actor or an adult imitating a child.
* Bill Watterson though a substantial bit of this is based around him vanishing from the public eye in 1995.
* Bill Watterson, used to have a years-long rivalry that consisted of the two men drawing increasingly obscene pictures and mailing them to each other to see how far they could push the other's boundaries.
* Bill Watterson" when time could not allow for good writing (the example provided was of Calvin popping an especially huge bubblegum bubble, winding up with bubblegum all over his face, and then saying "I think I blew my head inside out!").
* Bill Weasley after he is brutally mauled by werewolf Fenrir Greyback. His face is scarred to the point of resembling Mad-Eye Moody.
* Bill Weasley and Fleur Delacour, as the latter went to Beauxbatons instead of Hogwarts, but that was because she was born and lived in France during her teenage years.
* bill wurtz," after the ball is told to go to the castle, a title card appears saying "to be continued," followed immediately by another one saying "continuing."
* bill wurtz through several millennia worth of history in a matter of minutes and nearly every single line is a punchline. And that's not even counting the seconds-long jingles peppered throughout his entire oeuvre.
* Billy & Mandy’s Big Boogey Adventure Boogey lists off everyone, including himself, who has stolen Grim's scythe.
* Billy & Mandy Save Christmas (He originally thought the line was for the bathroom).
* Billy & Mandy's Big Boogey Adventure, Irwin kisses an unconscious Mandy. When she awakens, she clocks him.
* Billy & Mandy's Big Boogey Adventure, there's a scene where the protagonists go into the "Hole of Oddities" and turn into hand puppets.
* Billy & Mandy story "Time Waits For No Mandy" (Cartoon Network Block Party #56) has Mandy sending Father Time on a permanent vacation so time will stand still and, ageist as she claims to be, she won't have to go through another birthday.
* Billy and Benny McCrary were Tag Team Twins, as well as the world's heaviest twins.
* Billy and his wife Georgia both work for the same law firm Cage&Fish.
* Billy and Mandy’s Jacked-Up Halloween was a prankster in medieval times who

was granted eternal life by Grim, but at the cost of his head. He now wears a pumpkin head and goes out every Halloween with his bag of tricks.
* Billy and Mandy, Billy is forced to do this by (undead) pirates at one point. Then, he launches into his "Scary-O" number.
* Billy and Mandy get sucked into Grim's cosmic cuckoo clock ("Better Luck Next Time," Cartoon Network Block Party #45) and are flung hither and yon through time. Billy meets himself as a rather intelligent baby who becomes stupid after Billy influences him. Later, landing in the future, Mandy starts berating Billy with her words duplicated by herself as a senior citizen berating a senior Billy.
* Billy and Mandy Save Christmas, Billy does this three times as Mrs. Claus explains what happened to Santa.
* Billy and Mandy's Big Boogey Adventure, Billy's face gets caught in an explosion caused by his future self returning to his own time, and is totally vaporized as a result, leaving his skull exposed.
* "Billy And Mandy's Big Boogey Adventure" features no fewer than three examples of this. First, when the Boogey Man puts her to sleep and turns her dreams into a
* Billy and Mandy's Big Boogey Adventure presses charges against Grim for misusing his powers. The thing is, the facts that he brings up to the Underworld Court are perfectly accurate; Grim is indeed very irresponsible with the handling of his cosmic powers, routinely letting his scythe and other objects of arcane power get stolen. Also that he doesn't have enough will of his own, to resist being forced by the two self-serving kids to placating their selfish whims. He is even right when he says that Billy and Mandy are only Grim's friends because they can use him and about the other ugly things that he says about them being barbaric and wickedly loathsome. Of course, he says that all to get them into trouble and make Grim lose his job as psychopomp out of spite, but the points still remain.
* Billy and the Boingers Bootleg included a flexidisk record with 2 of the band's "songs", for example.
* Billy and the Bubbleship had a regular chessboard - with frozen people mirroring the actions on the larger board. As lost pieces (for one side) are used as food for the monster, Billy wanted to complete the game without losing any pieces, and figured the Queen of Mordra played against an opponent who just let her win. The solution was the four-move scholar's mate.
* Billy and White do it a lot, too. And Watch and Ward. Or really, any of the several
* Billy Baker's Dog Won't Stay Buried, one of the cops is part of a religious cult and uses his police powers to block people from leaving town, forcing them to join the church.
* Billy Bathgate) is showing off the pistol skills of his bodyguards Lulu and Irving. Dutch asks Billy which of them is the best. Billy thinks it's Irving, because he aims with a single pistol and therefore is more accurate. But Dutch points out that's mostly useful for when you can set up a hit in advance. Lulu, who blazes away with two .45's, is more useful for circumstances when you need to throw out a lot of lead quickly (e.g. when you're being attacked).
* Billy Bat Oswald is set up as JFK's assassin, thanks to three doubles.
* Billy Bat revolves around a kindly taxi driver trying to reunite a black girl and her white fiancée who've been driven apart by racial strife between their families and civil rights protesters and counter-protesters on their wedding day.
* Billy Batson about family by the end of his origin, but it's still a bit off-putting.

* Billy Bishop considered him the most skilled opponent he ever faced and the Germans called him the Hell's Handmaiden for his lethal effectiveness. He was a crack shot, having been a great marksman as a boy in rural Ontario, and was renowned for his keen eyesight. On the other hand, he was a sub-average pilot, crash-landing numerous planes. His official count is 72 victories, just behind the Red Baron for the entire war, yet there has been lingering controversy about whether he simply made up the details of a solo raid that won him the Victoria Cross, the British Commonwealth's highest military award.
* Billy Bob Scruggins blows himself up with the accidental variety in
* Billy Bob Thornton admits to having an unexplained phobia of antique furniture.
* Billy-Boy, leader of the Jackals, was often accompanied by his own Goon Squad in Season 2.
* Billy Bragg: both are distinctly English artists known for witty takes on relationships.
* Billy Bragg enjoyed Kirsty MacColl's cover of his song "A New England" and wrote two entirely new verses of the song especially for her to record. After her death in 2000, he has always included those verses in his own performances of the song as a tribute.
* Billy Bragg: He used to be known as Steve Bragg, but William was his middle name and he decided Billy was a better name for a singer.
* Billy Bragg is a disgusted attack on the far-right-wing hooligan element among England's national football supporters.
* Billy Budd, a flogging scene happens offstage. Then the victim is brought onstage. And sings a duet with his friend.
* Billy Budd, an old sailor "of few words, many wrinkles, and some honorable scars," who always addresses Billy as "Baby."
* Billy Budd, Billy, on the day after his impressment, witnesses the flogging of a young novice, and is horrified.
* Billy Budd did, but it was still handled as murder. The victim only got what he deserved... This is because the incident occurred on board a Navy ship on the high seas. If it had happened on land in a civilian situation, it probably would have been Manslaughter by Provocation.
* Billy Budd is a super-low bass. One of the most satanic characters ever.
* Billy Budd. It's all about homosexuality among sailors on ships in the age before steamships.
* Billy Budd prior to his entering the navy at a mature age as a common sailor with no experience at sea.
* Billy Budd, the HMS Bellipotent of the book becomes the Indomitable, which was its name in the novel's early drafts.
* Billy Budd the trial of the eponymous sailor is central to the plot.
* Billy Budd was a merchant seaman who got drafted into the Royal Navy, and ultimately ended up dead because a sailor on his new ship decided he didn't like him.
* Billy Budd, when the title character kills Claggart, Vere says, "Struck dead by an angel of God! Yet the angel must hang!"
* Billy Bunter embodies this trope. The entire popularity of this children's book series revolves around the fact that plump Billy is always trying to steal food and gets mocked by his fellow students or punished by the headmaster.
* Billy Bunter father. Knowing the head was powerless to expel him, Smithy proceeded to screw the rules with reckless abandon (his first act upon joining the school is to turn up drunk), amply earning his nickname 'the Bounder'.
* Billy Bunter has been adapted into a successful comic strip series too. In the

Netherlands, he is probably better known as a comic strip character than as a literary figure.
* Billy Bunter series around a female clone of Billy called Bessy Bunter.
* Billy Butcher does this when going to see Susan Raynor, his former-lover-turned-Deputy Director of the CIA, turning up in her house at night or inside her security-locked office during the day. This is either because he's running a rogue operation or because he likes getting a rise out of her (probably both).

* Billy Connolly, about the marital breakdown in a Glasgow family. One line reads
* Billy Connolly has a routine about being kept up at night during a tour of Australia by a couple having loud sex. The woman keeps screaming "YES! OH YES!" to which Connolly answers by pounding on the wall and yelling "Would you stop asking her the fucking question?"
* Billy Connolly however is infamous for his world tour where he explores the local area, meeting people, getting to know the history of the area and finding out just what people are passionate about in the area. He would then incorporate these experiences into his set creating a unique experience for the town.
* Billy Connolly inside, accidentally grabbed young Billy and his sister as well. Nobody noticed until the search party sent by Billy's mother turned up two Cumberlands! And according to his biography, this actually happened.
* Billy Connolly. Luckily, after a momentary silence, both parties burst out laughing, considering it the most absurd thing that had ever happened, and continued their friendship.
* Billy Connolly mentions that those in the audience might find themselves saying "fuck" a bit more often. He lets them off the hook, explaining it's a temporary effect.
* Billy Connolly need to use the toilet at some point... he gets back to the mystery corpse in Corstorphine (and its effect on local house prices) about twenty-five minutes later. By which time everyone's forgotten how the story started.
* Billy Connolly once mocked the idea in his stand-up act; after eliciting cheers just for mentioning a place name, he shouted for the audience to stop and to have some higher standards, saying he could get an ovation just for reading from an atlas.
* Billy Connolly once recounted a conversation in which he was told that a mutual acquaintance had been informed by a doctor that "His heart's fucked". Billy proceeds to give his vision of the scenario, ending with the doctor telling his patient to "Fear not", as they shall "Amble into Glasgow, you and I, to the Royal Infirmary, where I believe that they have just taken possession of a "Defuckulator".
* Billy Connolly original about how she could bear to tell the kids she and Poppa were splitting up. the Big Yin's version is about how to tell a stroppy-but-intelligent dog you're taking it to the vet for a little operation...
* Billy Connolly relates to travelling by now-defunct American air carrier Trans-World Airlines. A stewardess, who had evidently been taught this by rote, smiled and asked "Sir, would you like some of our T.W.A. coffee?" Without missing a beat, Connolly smiled back and said "No thanks, miss. But I'd really love to dip my tongue into your T.W.A. tea." The stewardess missed the joke entirely and Connolly got his cup of tea...
* Billy Connolly: Scottish folk musician, stand-up and actor, commonly known as "The Big Yin". Does a great deal of material about sex, religion and Scotland (obviously).
* Billy Connolly's early material featured an abundance of toilet and body function jokes. The most famous example is one where he speaks at length about being trapped in an airplane toilet with the previous visitor's "jobby" still floating in it, not flushing away and being unable to leave because he'd never be able to convince anyone that he didn't do it himself! He's no stranger to jokes about willies and bums either (a joke about the latter pretty much kickstarted his career outside

Scotland).
* Billy Connolly sent this up in a sketch about a cheesy Country and Western singer who walks on stage and begins:
* Billy Connolly's "Nine And A Half Guitars": "Hey, Jimmy! Gonnae gie us 'Ten Guitars'?"
* Billy Connolly's "Sergeant, Where's Mine?" has the line "Whit dae ye dae wi' a gun in your hand, when ye're facin' a hundred-odd weans?"
* Billy Connolly that next show, during the wrap-up, there came a wail from the audience:
* Billy Coore began most of his videos on Packard Bell computers by showing off the intro to Packard Bell Navigator, which mentioned a lesson on using the mouse. Billy would make some kind of joke about the 90's being an interesting time to live in. Eventually he ran out of jokes, and even said "Will this joke just DIE already?" once.
* Billy Corgan (4'11"). That's not even the strangest part of the pairing.
* Billy Crudup, who only made the movies that he wanted to, because he made an astronomical amount of money by being the voice of the "For everything else, there's Mastercard," commercials.
* Billy Crystal, most notably, when he loops the rope around the cattle's head, and Curly whistles, making the cow take off, dragging Billy Crystal behind.
* Billy Crystal tells about his first date. The girl's father identifies himself as a sergeant, so is either police or military, and asks Billy if he's ever seen a .357 Magnum.
* Billy Crystal. That year Kodak was filing for bankruptcy and the theater had not yet been renamed the Hollywood and Highland Center.
* Billy Crystal was scheduled to be in one sketch in the first episode and would have been a featured player throughout that season. But it was cut, and he went home, crying all the way back because he thought he'd just blown the only break he was ever going to get. He stuck with his standup career and eventually did get to be a regular ten years later.
* Billy Currington is usually known for his relaxed, laid-back drawling country songs such as "Good Directions" or "People Are Crazy" (his biggest hit overall), or for warm impassioned ballads like "Must Be Doin' Somethin' Right" or "Let Me Down Easy". However, his career from 2013 onward has been dominated by heavier and more upbeat songs driven by electric guitar, such as "Hey Girl", "Don't It", and "It Don't Hurt Like It Used To".
* Billy Dean's most famous song by a long shot is "Let Them Be Little", which only hit #8. Dean had
* Billy Dee Williams. This actually spoiled the film, since reports about it hit the internet before it was officially announced, and fans saw few other reasons for the 81-year old to start getting in shape.
* Billy Dee Williams was among those considered for Han Solo. He would later play Lando Calrissian.
* Billy Dilley's Super Duper Subterranean Summer a hyper-violent, well-animated parody of Conan the Barbarian.
* Billy Dilley's Super Duper Subterranean Summer got this, with several adult viewers complaining that it feels like a "bad modern Nickelodeon cartoon". Some people have also accused the title character of being a selfish whiny moron with an ugly design. Because of the backlash, the show would only last 13 episodes, making it the shortest-lived series from Disney's television animation division.
* Billy Drago, Mark Sheppard, Mark Pellegrino... the list could go on. At least half of the truly recognizable names on Supernatural are involved or responsible for some black and white or gray areas of evil.
* Billy Elliot: A young boy rebels against the prejudices of his working class friends and family to pursue his love of ballet. Set during the mining strikes of Thatcher's Britain.
* Billy Elliot, Billy's father, Jackie, tries to push him into sports by sending Billy to the gym to take up boxing even though he prefers ballet. However, later in the film, Jackie realizes how talented Billy is at ballet and decides to support

his dreams.
* Billy Elliot, Billy's father, who had been on strike for months, decides to resume work as a scab in order to pay for Billy's dance lessons, without telling his older son who is still on strike. But the latter recognizes his father going to work while picketing the mining facility. It's a heartbreaking moment for both of them.
* Billy Elliot due to Billy's love of ballet. Michael, Billy's less-flamboyant (in public, anyway) friend... seems to be Mistaken For Straight.
* Billy Elliot is the one who sets the conflict in motion with her privatization of the British mining industry, but none of the on-stage characters so much as lay eyes on her and her stage presence is limited to a giant, caricatured puppet the community builds to make fun of her.
* Billy eventually ignores this warning, and we find out that swallowing the gum causes "an unimaginably horrible rash from another dimension." Though Billy initially has bubbles and gum coming out of his body before it actually happens. The rash was what it said on the label.
* Billy Gunn & Chuck Palumbo teased a gay relationship with each other, going so far as to declare each other "life partners" and showering each other with affection.
* Billy Gunn and Rosey in revenge, and the long running Christopher Street Connection exoticos Mace Mendoza and Buff E (whose own marriage failed for different reasons).
* Billy Gunn. It never amounted to anything other than a friendship, though the 2001 Royal Rumble did have a very couple-y moment between them when Chyna was getting wheeled out on a stretcher.
* Billy Gunn partner, but solo he was little more than "Mr. Ass," whose gimmick was that he loved women's butts. Not much that can be done with that gimmick without offending many people, so Gunn faded into the background and only occasionally appeared on the midcard.
* Billy Gunn: Started in 1989, debuted in the then-WWF and became Billy Gunn in 1993.
* Billy Gunn to reveal they were all wearing skimpy thongs, going with their Ambiguously Gay gimmick.
* Billy has said MANY TIMES that it's about Japanese dance clubs. And yet no one really listens...
* Billy Hatcher and the Giant Egg Billy is completely speechless (if you exclude his occasional "ok!" and "good morning!").
* Billy Hatcher and the Giant Egg, leading fans to wonder whether he's actually dead or not.
* Billy Hatcher and the Giant Egg, the hatchable animals include a kangaroo/lion, a sheep/camel/ostritch, a monkey/bat, a cheetah/gazelle, and a rhino/bird...thing.
* Billy Hatcher is this, he jumps in and out of mirrors trying to attack you and will even try to suck you in.
* Billy, having become sick of Grim's rules, decides to try and fart on him. After some struggling, he says "Here it comes," but it doesn't go as planned then he remarks "Aw, now I gots to change my pants".
* Billy himself goes through this throughout the play. He struggles with being the breadwinner for his family, something that would be considered very shameful in the 19th century. His main options are going back to being a carousel barker, which would mean having to abandon Julie, or getting involved in a robbery scheme.
* Billy Idol after breaking his leg in a motorcycle accident. While in recovery, he was interviewed by Legs McNeil, who noticed the electronic muscle stimulator on Idol's leg and referred to him as a "cyberpunk", citing the cyborg qualities of his appearance. This led to an interest in cyberpunk culture.
* Billy Idol, "Eyes Without a Face"; a synthpop ballad by a normally punk-rock singer.
* Billy Idol" is said a few times. And yet, it has been played at many many weddings since its 1982 release.
* Billy Idol rides a motorcycle through a stained glass window in the video for

"White Wedding".
* Billy Idol's "Cradle Of Love", where the man who lets the girl next door play her song and goes crazy in his apartment tries to turn off the music, even by pulling the plug on the stereo.
* Billy Idol's song "White Wedding" was reportedly written to show his displeasure at his sister for having married the man who impregnated her (although he denies this, saying it was the inspiration, but he wasn't upset). Ironically, the sister and her husband are still happily married, whereas Idol and his then-girlfriend (who starred with him as the "bride" in the video), broke up in 1990.
* Billy Idol version. The studio version of "Mony Mony" didn't chart on the Hot 100. Additionally, he had three other top 10 hits, none of which were "Rebel Yell" (#46) "White Wedding" (#36) "Dancing With Myself" (didn't chart), but instead "Cradle Of Love" (#2), "Eyes Without A Face" (#4), and "To Be A Lover" (#6). The former two are still remembered positively, but aren't considered Billy's signature songs, while the latter has almost totally been forgotten. (in his native UK, it's a bit averted, as his highest charters are re-releases of "White Wedding" and "Rebel Yell" at #6... but then comes "Mony Mony" at #7, surpassing the other songs mentioned here)
* Billy Idol was an attempt to capitalize on the genre and mainstream interest in the internet. Actual cyberpunk fans and computer geeks mostly found it more funny than anything, while his fanbase was extremely puzzled at best.
* Billy Idol. " Well there's nothing to lose, and there's nothing to prove, I'll be dancing with myself"
* Billy is a fallen hero by the time Finn and Jake find him, hiding passively in his cave.
* Billy is offered a mushroom by the dwarf king Beardbottom. The following dialogue takes place:
* Billy is summoned by an old nurse, Sarah Primm, who gives him half of a broken charm on a necklace, tells him his long lost sister has the other half, and confides that she switched the little girl for a baby who died. So
* Billy Jack film series is the half-white, half-Native American title character is played by the fully white Tom Laughlin.
* Billy Jack, was able to win distribution rights back from the original company when he realized they were doing this. He then started one of the first examples of saturation advertising and made it a hit.
* Billy Jack was required to change his name to Billy Haynes, and eventually Billy Jack Haynes, after Tom Laughlin threatened legal action for using the same name as Laughlin's movie character. The in universe explanation was that Billy wanted to honor his father's name once he won the
* Billy J. Kramer and the Dakotas' "Little Children" was about a wannabe Romeo trying to convince his girlfriend's siblings to leave the two of them alone.
* Billy Joel album is a homage to the music he grew up on in the 1960s.
* Billy Joel, and quite appropriately, at the line "Rock and roll and Cola Wars, I can't take it anymore!"
* Billy Joel artistic license—the only similarities between his Kid and the real one is that they were both outlaw gunfighters. Joel has publicly acknowledged this since 1975, the year after the song came out.
* Billy Joel for Album of the Year, he's a member of the Rock and Roll Hall of Fame, and many of his hits have become standards.
* Billy Joel, informed by Joel's newfound freedom as a bachelor dating supermodels and enjoying his life in an upscale New York apartment, was deliberately recorded as a lighthearted pop album influenced by Billy's teenage influences.
* Billy Joel is about this but the Moment Killer is the narrator himself breaking up the moment between himself and the girl he fancies.
* Billy Joel" is basically a song about this. The narrator starts off by telling about an old friend of his who "Said he couldn't go on the American way. Closed his shop, sold the house, bought a ticket to the West Coast." The narrator then goes on to indicate he's done something similar, as he tells off someone who's apparently trying to convince him to return to a home he abandoned.

* Billy Joel is better known to Classical artists as Movement 2 of Beethoven's "Sonata Pathetique".
* Billy Joel is made entirely of this, referencing headline events all the way from 1949, the year of Joel's birth, to 1989, the year of the song's release.
* Billy Joel is "Piano Man", and while he likes the lyrics, he considers the music to be repetitive. He also dislikes his only number one hits, "It's Still Rock and Roll to Me" (he considers it pretentious), "Tell Her About It" (he refuses to play it in concert) and "We Didn't Start the Fire" (he thinks it's a just a novelty song and not one of his best melodies). He considers "Vienna", "She's Right on Time", "You May Be Right", "And So It Goes" and "Scenes From an Italian Restaurant" to be better songs. Arguably, the work he poured most of his heart and soul into was "The Downeaster Alexa," given that he spent years of his life in the line of work portrayed in the song.
* Billy Joel once stated that the only thing he had to do to get his teen-aged kids to behave in public was to threaten to start singing.
* Billy Joel released his final pop/rock album, after over twenty years in the industry. The last song on the album, "Famous Last Words", is all about goodbyes and closing up shop for the season.
* Billy Joel's "A Matter Of Trust", saying that this trope happens due to a lack of trust between the partners, and he assures his partner in the song that as long as they trust one another, they'll be able to avert this trope themselves.
* Billy Joel's best (specifically "We Didn’t Start the Fire") when the pyromaniac sets fire to Yusuke’s house.
* Billy Joel's "Goodnight Saigon" - the first two lines let you know that it doesn't end well.
* Billy Joel song "A Room of Our Own", following the second chorus, Billy calls out "Bridge!" just before the bridge begins.
* Billy Joel song "Leningrad" tells the story of Viktor (an actual person whom Joel met while touring the Soviet Union in 1987), a former member of the Red Army who, after seeing the horrors of war, became a clown, and found happiness bringing joy to children.
* Billy Joel song "Uptown Girl", despite being vague about specific characters, makes numerous allusions to "high class toys" and refers to Billy Joel as a poor working-class Prince Charming, despite his commercial success.
* Billy Joel's "Only The Good Die Young" insists that since those who are holy and good die earlier, it is better to sin and give up on purity to elongate time on Earth. Of course, he mainly just wants the schoolgirl he's talking to to give up on her virginity.
* Billy Joel's "Piano Man" was only a minor hit at first, reaching #25 on the charts in 1974. It practically vanished from radio play overnight. It was not until the success of "The Stranger" in 1977 that the song was rediscovered and become the classic it is today.
* Billy Joel's "Scenes From an Italian Restaurant" centers around two high school lovers named Brenda and Eddie, the "popular steadies and the king and the queen of the prom" who marry young but have to divorce due to monetary issues.
* Billy Joel's second wife (Christie Brinkley, 5'9"/175 cm) and third wife (Katie Lee, 5'7"/170 cm) are both taller than him (5'5"/165 cm). His current wife, Alexis Roderick, is around his height but wears heels, making her look significantly taller than her husband.
* Billy Joel's "She's Always A Woman", where he sings about the worst things a woman can be, yet despite all that, he still somehow finds a woman appealing to him.
* Billy Joel's song "Pressure" is about a Wide-Eyed Idealist and how unrealistic his hopes and expectations are.
* Billy Joel's song "Scenes From an Italian Restaurant" tells the story of Brenda and Eddie, a popular teenage couple who the narrator went to high school with. At first, he mentions how everyone looked up to them, saying "Surely Brenda and Eddie would always know how to survive". He goes on to tell how they graduated, got married, ran out of money, started fighting, and eventually divorced, not having

any plans in place for the rest of their lives. He ends this by saying "We always knew they would both find a way to get by", which is similar to the previous line, but seems much less believable now.
* Billy Joel's songs "Piano Man" and "The Entertainer" are basically about a musician starting off playing bars and clubs, then gradually working his way up to "the idol of my age".
* Billy Joel's "The Entertainer" has "played all kinds of palaces and laid all kinds of girls."
* Billy Joel's "The Longest Time," in which they lament how "Boris Yeltsin is the hardest rhyme." They explain that they can rhyme "Gorbachev" ("pay our office mortgage off"), "Leningrad" ("pen and pad"), and "Chernenko" ("pinko," appropriately), among others, but Yeltsin gives them trouble. Finally, they decide to give up:
* Billy Joel's video for "The Night Is Still Young" ends with one of these.
* Billy Joel's "We Didn't Start the Fire" a man is seen burning his draft card.
* Billy Joel's "We Didn't Start The Fire" music video starts with a groom carrying a bride into their new home.
* Billy Joel's "You're Only Human (Second Wind)". The music video is even more explicit.
* Billy Joel uses some of this on the last line before each chorus in "Movin' Out". Thankfully the song only has three verses.
* Billy Joel veers everywhere in his creativity. His core style is identifiable as "piano-based rock 'n' roll", but only in the same sense as space is "big". Beyond that, he has composed songs in styles ranging from modern funk, to Aaron Copland-influenced neo-Americana, to rap (though his rap song was never recorded, but instead reworked into "We Didn't Start The Fire") to folk, to an honest to god late-Romantic Classical album.
* Billy Joel want shots of Harry Truman, Doris Day, etc. to go along with the lyrics: "Harry Truman, Doris Day, Red China, Johnny Ray..." Instead, the video consists of a typical American family in their kitchen following the decades in the song, beginning with the young newlywed couple and ending with the death of the father.
* Billy Joel was born in the Bronx and raised on Long Island; as such, his more autobiographical songs (of which there are a lot) discuss New York City. "New York State of Mind" is the most blatant example; another one is "Miami 2017 (Seen the Lights Go Out on Broadway)," which is about the destruction of New York City and the survivors living in Miami in the year 2017—it was written during the 1975 bankruptcy of the city government. His songs may possess a few subversions. "Leningrad," "Allentown," and "Say Goodbye to Hollywood" come to mind.
* Billy Joel". While all of those are well known, many will be surprised that he didn't hit the top with such songs as "Piano Man" (#25), "Movin' Out" (#17), "Only the Good Die Young" (#24), "Uptown Girl" (#3), "She's Always a Woman" (#17) or "The River of Dreams" (#3).
* Billy Joel. While TNC was recorded during Billy's divorce from his first wife, AIM was a product of then-single Billy enjoying life as a bachelor and dating a number of supermodels, most notably his future second wife Christie Brinkley.
* Billy Joel wrote a song called "Stop in Nevada" about a woman leaving her husband to move to California — but she has to, well, stop in Nevada first, presumably for the divorce.
* Billy Joel wrote "The Stranger" about this trope, specifically its implications in romance. Do you really know your partner?
* Billy Joel wrote "Uptown Girl" as an ode to Christie Brinkley, his soon-to-be wife, and she later starred in the song's music video.
* Billy Joe Shaver is considered one of the pioneers of the "outlaw country" genre of the 1970s, but he has almost no chart action whatsoever to speak of despite his popularity.
* Billy Kaplan. In the present, he's a powerful but fairly inexperienced reality warper who's poor judgment tends to cause disaster. In the future, he's a dimension spawning deity worshipped under the name

* Billy Kidman; Kidman managed to have sex with Torrie, but Douglas couldn't get it up, and he was embarrassed by it.
* Billy Kidman was only permitted to use it because he's practically perfected it. "Air Bourne" has since become very closely connected to him.
* Billy Kincaid, a pedophilic child murderer, is often depicted sporting a depraved grin with way too many uniform teeth — particularly in the animated series.
* Billy Lee Promotions touted Sweet Georgia Brown as a rags-to-riches success story made possible by pro wrestling but despite being popular enough to have her own trading cards, she saw very little of the money, wasn't allowed to open her own bank account, and remained in rags.
* Billy Madison, a book his first grade teacher read to the class. Although the audience cheers and applauds, the principal grades him thusly:
* Billy Madison: Billy helps a classmate who peed in his pants by saying that is what cool people do.
* Billy Madison Billy is the only one still laughing when she then instructs them to open their books to page 69.
* Billy Madison, Billy plays this prank on Old Man Clemens with Jack and Frank in tow, Jack having done the dirty work of shoveling the poop into the bag. As they watch from behind a bush, Clemens charges out of the house in his tighty-whitey briefs and an undershirt to answer the doorbell.
* Billy Madison, Billy purposefully initiates such an experience with his teacher Veronica, blaming the accident on a bumpy bus ride. Of course, he's just being a regular pervert.
* Billy Madison did this when he's against the entire first-grade class.
* Billy Madison during pie baking part of the triathlon competition between Billy and Eric, Eric set the pie and himself on fire with laughing results.
* Billy Madison gets this from Veronica pulling him out of the classroom by his ear and scolding him for mocking a classmate who can barely read. Billy insists that he's deaf from ear abuse and having the hots for her.
* Billy Madison had to retake all 12 grades in order to take over his father's company.
* Billy Madison: In one of the most well-remembered scenes from the movie, the entire O'Doyle family is driving down the road chanting "O'Doyle rules!" over and over again. The car hits the banana peel that a guy threw out the window of a bus earlier in the movie, inexplicably causing the car to skid out of control and fly off a cliff (all while the family continues to chant "O'Doyle Rules!"). Though it isn't shown directly, the car inexplicably explodes in a loud explosion off screen.
* Billy Madison O'Doyle family's car drives onto it, swerves around and ends up driving off the cliff.
* Billy Madison), only one pairing of which was set up prior to the ending.
* Billy Madison: Practically every single character pairs up with someone right at the end, including a real person and a giant penguin that had previously only existed in Billy's mind.
* Billy Madison. The title character delivers a pretty great variation:
* Billy Madison we see a clown fall from stilts and drop to the floor, bleeding from his mouth like he's dying... a little later, in a sudden musical number, he comes back, full of energy.
* Billy Madison: "What do you think of that, Mr. Blue Duck?" "That's quacktastic!"
* Billy Majestic's Humpty Dumpty ends with Humpty Dumpty snarling and attempting to break out of his cage, complete with a caption stating the trope name verbatim.
* Billy Majestic's Humpty Dumpty is that a bunch of aliens get stranded on Earth and run into a pair of redneck brothers named Petus and Pervis Brakk. The Brakk brothers murder all of the male aliens, with the sole female being imprisoned and raped by Pervis. The female alien ends up becoming pregnant by Pervis and gives birth to an egg-shaped monster that then decides to attack the Brakk brothers to avenge his mother and the other aliens that were killed.
* Billy Majestic's Humpty Dumpty, it is established that the Brakk brothers murdered their own mother.

* Billy Majestic's Humpty Dumpty who proceeds to try and kill his father and uncle to avenge the aliens the rednecks killed.
* Billy Mays, being depicted as racist towards black people, Germans, and Mexicans in "The Billy Mays Dating Experience", constantly interrupting Anthony Sullivan's attempt to sell a product in at least two videos of his, and even going as far as to murder Vince Offer.
* Billy Mays didn't die; he faked his death because he wanted to start a new life at the North Pole.
* Billy Mays faced airplane turbulence and was struck on the head, after which he insisted he was fine and quoted this trope by name. The coincidence of the timing had led many to believe that he had died of a concussion before the autopsy came out, revealing the cause as heart disease.
* "BILLY MAYS HERE!!" Cue the frantic scramble for the Mute button before your eardrums are blown in.
* BILLY MAYS HERE WONDERING WHY I'M STILL NOT ON THIS PAGE. YOU CAN BUY THE ANSWER FOR TWO EASY PAYMENTS OF $19.99 (plus shipping and handling).
* Billy Mays; his commercials have slowly been phased out, or manipulated to feature different salespeople in his place for full-body shots.
* Billy Mays peaked at Stage 4 prior to his death with almost everybody having heard of him or at least seen one of his ads. Now he's at Stage 6a.
* Billy Mays' son enjoyed the pastiche of his late father in "Dead Celebrities", where he pitches products to Kyle's younger brother Ike from beyond the grave, and at one point even pitches a threat to physically attack another dead celebrity, which Mays' son says he felt his father would laugh the most at.
* Billy Mays which with one scoop in every load will make your "whites whiter!" and "your brights brighter!"...than they were before you washed them?
* Billy Needs an Organ: Someone needs an organ replaced so someone else does something crazy to get them their needed organ.
* Billy Nolan was a cunning, calculating sociopath in the book; the reason Chris was with him there was because she wasn't able to manipulate him. In the film, he's a bumbling idiot whom Chris can easily make do what she wants.
* Billy Ocean as "the most popular British-based R&B singer-songwriter of the early to mid-1980s."
* Billy Ocean's "Red Light Spells Warning" is about a ladykiller who always hoped to defy this trope but is starting to notice the danger signs.
* Billy on the Street: Due to the format of Billy racing down the street asking people very quick questions in a short amount of time, the comedic moments come very quickly after one another.
* Billy on the Street often makes references to his homosexuality and references gay culture.
* Billy Possum, a stuffed animal toy created based on US President William Howard Taft's...enjoyment of a possum dinner. The toy was intended to be a follow-up to the still phenomenally popular Teddy Bear, and was predictably a flop.
* Billy Powers, an old high school boyfriend of Michael's, who turns up in the
* Billy Ray) could count as this. Kentucky state Senator for 21 years, Little League coach, Armco steel rigger, Kentucky Colonel, executive secretary and treasurer of the Kentucky AFL-CIO, served in the U.S. Air Force in Japan, worked as a regional representative for Alan Greenspan of the Federal Reserve Board, sang bluegrass with the Crownsmen Quartet, and was a member of the Kentucky Mountain Saddle Horse Association.
* Billy Ray Cyrus' "Achy Breaky Heart" put western style line dancing into dance floors everywhere.
* Billy Ray Cyrus' debut single "Achy Breaky Heart" was first recorded by an obscure act called the Marcy Brothers. Their version was called "Don't Tell My Heart."
* Billy Ray Cyrus, on duet vocals. That was the version that became a hit, and the only version played by most stations ever since.
* Billy Ray Cyrus's "Some Gave All" was never officially released as a single, and charted very low due to unsolicited spins as an album cut. However, it is one of

his most popular songs, and is often played on Memorial Day and the Fourth of July.
* Billy Ray Cyrus's two most-played songs are of course, "Achy Breaky Heart" and... "Some Gave All", which only got to #52. This is because "Some Gave All" was not heavily promoted, but perennial airplay during Memorial Day and Fourth of July kept it in the public consciousness.
* Billy Robinson, whose first significant work outside of Europe was for the International Wrestling Enterprise. The IWE, who leaned hard on their unique connections to European promoters to compensate for their slim native talent and lack of NWA membership, made him the first gaijin ace in puro history.
* Billy Rose's Jumbo, a 1962 musical comedy set in a circus, Jimmy Durante plays an elephant trainer who tries to sneak his beloved elephant off the circus grounds and is caught red-handed.
* Billy Roses Jumbo. Jimmy Durante's character is attempting to "sneak" an elephant out of his failing circus as the creditors close in. He and the elephant are of course promptly confronted by the sheriff and the repo squad:
* Billy's Bucket List. Canyon's typical size is roughly three times Finn's size at minimum, and at her (unintended) largest she appears about six times his size.
* Billy's Christmas list is for a peg leg, a 3-way radio, a shetland pony, an automatic shoe buffer, an eskimo, a baby antelope,
* Billy's crazier brother Ricky dresses as Santa Claus when he goes after the Mother Superior in
* Billy's father was unfazed by Billy's behavior at school. "It's just a phase."
* Billy Sing, who had 150 confirmed kills. He was so deadly that the Turks assigned a champion sniper specifically to eliminate him. This Turkish sniper was able to track him down, and was preparing to shoot, but Billy's spotter had already seen him, and Billy shot first.
* Billy's mother as well. She's implied to be the source of Billy's psychopathic outbursts, as she goes nuts when things are out of order or untidy.
* Billy Squier has forever blamed the music video for his hit song "Rock Me Tonite" for bringing about the downfall of his music career, as the then-questionable and erotic content within did much to destroy his public image. Squier was so disgusted with the final product that he and his colleagues attempted to prevent the video's release, but it was too little, too late and Squier has since blamed the director for allegedly tampering with his original concept.
* Billy Squier" video), it doesn't hold up today the same way "The Stroke" does, despite the former outpeaking the latter by two spots. Surprisingly, "The Big Beat" (which has been sampled in countless hip-hop songs) never charted, and "Lonely is the Night" peaked at a measly #28 on Rock Radio.
* Billy Talent's "Tears Into Wine": "You never gave yourself a chance to shine/ Your destination's a chalk outline/ And when you get to the gates you'll be denied".
* Billy That actor actually caught some heat for these ads, to which he retorted, "Hell, if marijuana was legal, I'd appear in a commercial for that too."
* Billy the Cat features the cat character Mr. Hubert, (sort of a mentor to Billy) becoming famous among cats for his role in cat food ads. The episode ends with several female cats chasing him off screen and Billy's reaction being "go get him, girls!"
* Billy the Cat: The viewer never finds out what happens to Billy in the end. Does he stay a cat forever? Does he get turned back into a human?
* Billy the Exterminator that are clearly meant to explain things to the viewer but the way they are explained come in unnatural situations, such as explaining the consequences of not getting rid of a pest to his mother, who not only should already know this, but is the one giving him the assignment from the office. There are also times when Billy and his brother, who also works for the company, are explaining things to each other that they should already know.
* Billy the Heretic: Notable for being possibly the first webcomic made by neo-Nazis for neo-Nazis, pretty much the only reason anyone reads the comic is to see how bad it really is.
* Billy, their tracker, fears no man, yet is plainly terrified by this opponent.

Although he exhibits his own moment of truly bad ass awesomeness by staying behind to buy his team time to escape, and facing it by himself.
* Billy the Kid: Committed all his major crimes between his 17th birthday and his early death at the age of 21. Nevertheless became the most legendary outlaw of the Wild West.
* Billy the Kid's Old Timey Oddities by having them change into these. The Loch Ness Monster is actually an alternate form of the most powerful vampire, Dracula.
* Billy the Kid was believed to be left-handed because the only known photograph of him was reversed. This was corrected when experts more closely examined the rifle that he was holding in the photograph.
* Billy the Kid, was shot in the back of the head. Unlike the previous examples, the killer's identity is still a matter of dispute; one man confessed, but was acquitted and a few years later vanished from history completely.
* Billy thinks clowns are pure evil, and that someday, they're going to "DESTROY US ALL! DESTROY US ALL! DESTROY US ALL! DESTROY US ALL!"
* Billy Tipton (nee Dorothy Lucille Tipton), following Tipton's death. Even Tipton's adopted sons and at least one sexual partner didn't know Tipton's true sex.
* Billy Tipton was revealed after death to be female, which surprised everyone, including his family. He started his career during a time when it would have been very difficult for a woman to be successful, so this may have been the reason for presenting as male (though nobody is sure).
* Billy T. James skit from the 1980s arts-and-crafts segment, go through the steps in making a roll-your-own cigarette... only for Billy to put the finished product on top of his head and call it a hat.
* Billy Vera and the Beaters released "At This Moment" as a single in 1981, but it initially just reached #79 on the
* Billy Vera's "At This Moment" went from being a little known song released in 1981 to the #1 song for 15 weeks in 1987 after it was played on
* Billy vs. SNAKEMAN (as well as a few that do), a chance to change your basic bloodline, and (the first, second, third, and tenth times you loop) unlock some additional content.
* Billy vs. SNAKEMAN) come out to do battle. Once you've passed the Dark Hour quest, certain hours of the day (thankfully conventional ones that fit into normal space-time) are listed as "Dark Hours", and you can compete in the Arena against other Dark Hour players. The Pizzawitch questline also has "The Witching Hour", where you can race in certain extremely difficult Fields that only become available at this time.
* Billy vs. SNAKEMAN eyepatch. (Where he puts it, the game doesn't say.)
* Billy vs. SNAKEMAN has Burgerninja (not actually staffed by ninja, originally; the player sort of gets in by accident), where the food is disgusting and the customers are horrible. The biggest challenge when you run the till is to keep yourself from killing the customers in a fit of rage. Eventually you end up burning the place down with a giant robot and taking your coworkers to start a pizza shop instead, which works so much better. (The food is better and your manager allows you to stab problem customers.)
* Billy vs. SNAKEMAN has Megamissions, which becomes available once you reach a certain rank: do a mission at 10x cost, but with 11x rewards. R00t has Megaactions, which work the same (10x/11x, as well as 50x/55x). Also, Pizzawitch deliveries are done in part to find the rare ryo coins you need for upgrading your gear, but there's very low chance of getting one on higher difficulties. However, once you've done 20 deliveries of a certain difficulty, you have the option to "work in the back" on another person's delivery, giving you a one-click option to earn tips and possibly coins (with the added option of bribing them to increase the chance of getting a coin). A few quest also become easier and/or less costly if you've done it a previous season (although a few others become harder instead).
* Billy vs. SNAKEMAN has this as a minigame during Billycon. If you wear cosplay, you may attract the Squee (a small horde of fans), and must then evade them by seeking out hiding places. If you succeed you get a Trophy, but fail and you get

Glomped, which adds penalties to the rest of your con-going due to having several squealing fans stuck to you and slowing you down. (However, you also get some nice bonuses for the next day if/when you go to sleep later...)
* Billy vs. SNAKEMAN Hokage", and multiples of 11 are frequently used in bonus multipliers and some of the mini-games ("Over 11000", anyone?)
* Billy vs. SNAKEMAN. It's also established in Billycon that the MikaMika Douga can sense the Loop, but can't affect it, and it's driving them insane.
* Billy vs. SNAKEMAN, one of the 11 D's of Pizza Delivery is D-Speed. Parodied in that Cici runs out of D-words halfway through the description and tells you to just go with it.
* Billy vs. SNAKEMAN, players can do this to run away from a mission (auto-failing and forfeiting the consolation experience in exchange for a refund of the stamina cost.)
* Billy vs. SNAKEMAN, where Billy's power is proportional to how many eyepatches he's wearing. When he reaches his highest level, he puts on a third eyepatch.
* Billy West’’ is “The Devil’s Hands Are Idle Playthings”.
* Billy West: getting slammed into a wall at full speed by those transport tubes, surviving a fall from a helicopter without deploying his parachute, eating a big heaping bowl of salt, three cola induced heart attacks in high school. And those are the ones that don't involve super-advanced medicine or symbiotic worms.
* Billy West. He publicly revealed his diagnosis in 2019, along with having ADD.
* Billy West") to get aggression out. By the end of Kricfalusi's run, the wall had been reduced to a gaping hole.
* Billy, which ultimately allows his plan to succeed affected his current body.
* Billy, whose motive for killing Sidney's mother (and later Sidney) was that Mrs. Prescott had an affair with his father, which led to his mother walking out on them both. Sidney even calls him a "pansy-ass momma's boy."
* Billy Wilder features a Coca Cola executive in West Germany during 1961 who has a former S.S. member as his assistant; one scene shows his employees acting like complete robots when issued orders.
* Billy Wilder; he doesn't just go after the news, he creates them. When he hears about a man trapped in a collapsed cave, he deliberately prolongs his rescue by manipulating the local authorities, just so he can report on it.
* Billy Wilder, the Russian characters are played by Austrian and German actors.
* Billy Wilder was built (during filming!). Before August 1961, people could cross the border between West and East Berlin quite easily - which millions of East Germans used to move to the golden west. The movie was based on this premise and suffered when the wall was built.
* Billy Wilder when he saw a player run into a cameraman on the sidelines while watching a football game.
* Billy would sometimes use complicated dialogue to make his point. Trini was usually the one who translated it into plain English.
* Biloxi Blues in the role. He's also legitimately and dangerously insane, unlike most of the examples of this trope, who are just pretending to be a little nuts to intimidate their recruits. On "Inside the Actors Studio" Matthew Broderick said when he played the part earlier on the stage, Will Sadler the actor playing the sergeant as an R. Lee Ermey-style drill instructor, always yelled. When they did the movie and they cast Walken, he would say his lines in a much slower and oddly cadenced manner, which was actually scarier!
* Bilton is a satire on lifestyle journalism, involving a rude and alcoholic Marxist intellectual who works at the Daily Globe, a newspaper so swollen and fatuous that it has a supplement listing all the other supplements.
* BIMA Satria Garuda, just like for the Japanese franchises it was inspired by.
* BIMA Satria Garuda — A toku series produced by MNC Group, RCTI (both from Indonesia, the latter being the channel that airs it) and Ishinomori Productions (Japan), with merchandising provided and sold by Bandai (Japan).
* BIMA Satria Garuda: The hero Ray's father, driven by scientific curiosity, opens a portal to a parallel world. Too bad the inhabitants of the other world now want to invade our Earth for its natural resources and kill Ray's parents first.

* Bimba, comes up with an elaborate contraption to burst the boulder that's blocking the road in
* Bimbo bread (white bread and/or whole wheat bread in Mexico): Due to the bakery that has a decades-long monopoly over white/whole wheat bread in Mexico. The brand is used for all bread products so it hasn't lost its trademark protection, but "pan bimbo" is generically used to refer to that kind of bread even if it isn't Bimbo-brand bread
* "Bimbo No. 5" is a parody song of Lou Bega / Pérez Prado's "Mambo No 5" about the various sexual indiscretions of
* Bimbo packaging attempts to prevent this by instructing the consumer to "Say 'Beembo!'"
* Bimbo's Initiation, Bimbo opens a door which contains a smaller door, which contains a smaller door and so on. The smallest door eats Bimbo.
* Bimbos of the Death Sun. As a result, people assume both book and author are much more lurid than they really are, and Jay does his best to make sure as few people as possible know he wrote it.
* Bimbos of the Death Sun, McCrumb noted that she always knew which authors were "on the outs" with the fandom because people would ask her "Was (this guy) the inspiration for Dungannon?".
* Bimbos of the Death Sun — the idea was simply based off of the fact that some diseases are linked to sex.
* Bimbos of the Death Sun novels despite wanting recognition as a serious author because the first few were so popular. As a result, the author is cantankerous and rude to sci-fi fans in general, and violent towards fans of his own books. He comes to hate his barbarian hero so much that he writes several humiliating death scenes for the character. One reaction to this sets the plot rolling.
* Bimbos of the Death Sun sets a murder mystery at a con, where a popular but volatile author is murdered while writing his latest novel.
* Bimbos of the Death Sun: the author of the titular book apparently has no interest in writing another as he makes more money as a scientist.
* Bimbos of the Death Sun, the main character is an engineering professor, James Owen Mega, who writes science fiction under the name Jay Omega... and is shocked when one of his students sees through the pseudonym.
* Bimbos of the Death Sun where one player murdered another just before his wedding and used a shapeshifting amulet to take his place.
* Bimbos of the Death Sun where the Girl Scouts are one of the major power-brokers. For starters, they have nuclear capability and control the KGB.
* Bina Aspen, the wife of transgender CEO Martine Rothblatt, describes herself as "Martine-sexual" when asked about her sexuality by reporters.
* Binary Boy for PC. It's short, but has to be completed in one sitting. As such, there are checkpoints after virtually every obstacle in your path and when you die, your character simply drifts down from the screen like a falling leaf until he lands right before the current obstacle.
* Binary Boy, there is no plot. There is just the Boy who can only walk on one path, but can do so upside down, and five levels he needs to be guided through past obstacles and enemies, with a records table at the end.
* Binary Boy, the second level is essentially the same grassy area as first, but at dusk-time, and so a moon appears on the screen. It will move relative to your own movements much like a real-life moon appears to and so doesn't arouse any suspicion... until it lands and turns out to be an alien ship crewed by a hostile robot.
* Binary code is also used with Bender here and there; among other things, his apartment in "I, Brobot" reads '$', and a binary message in blood in "The Honking" is the number 666.
* Binary Domain activates a nuclear strike on his and the protagonists' current location, knowing that he's the only one who can deactivate it if things don't go his way. After his defeat, he's willing to accept his fate, but nothing happens. He then learns that the computer AI in charge of the launch has evolved to properly judge if "Human intention" can be trusted, and called off the launch after

determining that it would've been used for rather petty purposes.
* Binary Domain, after a hectic level with nonstop action, Dan treats Faye's gunshot wound.
* Binary Domain is much more common. Evil corporations, human-like robots, rebellion against authority, global economic and environmental collapse, deep separation between the haves and the have-nots...
* Binary Land, Gurin is a blue penguin and Malon is a pink penguin, in the Famicom version.
* Binary Rifle in ways that would deny the Flood any usable/salvageable biomass.
* Binary Stars, Anastasia has lost her memory of her life before being possibly shot in the head, but even in her dream flashbacks the name of her husband is specifically pixelated out.
* Binary Stars: Each episode is named after various astronomical concepts.
* Binary Stars Kass takes every opportunity to be near Joana, often with a blush on her face.
* Binary Stars: The crew of the Falconer are trying to get Anastasia to someone only known as The Broker, who apparently is opposed to Vidalia Blackford in some way.
* Binary Stars: The Falconer is explicitly mentioned to have a warp drive.
* bi-national special forces units, there is the UKUSA Agreement, AUSCANZUKUS, Five Eyes, ABCA Armies, Combined Communications Electronics Board, just to name a few. All of this adds up to make these nations a terrifying Bash Family.
* Binbō-gami ga!, even though some of them would end up poorly regardless.
* Binbō-gami ga! has a heart attack and is left in critical condition at the hospital. But Ichiko saves his life by releasing some of her good fortune at the hospital.
* Binbō-gami ga!: Ichiko's parents pretty much abandoned her for her entire life (16-17 years) because of work.
* Binbō-gami ga!, the title character Ichiko was turned into a child by Momiji (in a failed attempt to actually make her elderly and thus easier to capture). Ichiko manages to stay with the Tsuwabuki family pretending to actually be a child with home issues. The following morning she gets up, she's angry to find she wet the sheets, having forgotten she now has the bladder of a child. She cries in embarrassment, which causes Mika to give her a hug.
* Binbō-gami ga! was rated TV-MA when Funimation released the complete series on home video, Funimation has since changed the rating to TV-14 on their official page for the show.
* Binbogami Ga, Momiji sets up an eraser above a door. Ichiko spots it and dodges, but to her horror, it turns out to actually be a brick disguised as an eraser, as Momiji was trying to kill her.
* Binbougami Ga, but she chalked it up to this trope in effect. Turns out Bobby was really groping Tanpopo's breasts.
* Binbougami ga!, the luckiest person on Earth, so lucky in fact that she threatens to upend reality's karmic structure.
* Binbougami Ga when she needs to avoid her newest classmate. Her equally hammy rival Momiji sees this, so she — and eventually everyone else in the area — copies her.
* Binbou Shimai Monogatari appears to be constructed around the squee-laden interaction between the two sisters Kyou and Asu.
* Binbou Shimai Monogatari, Asu and Kyou briefly move in with their rich aunt, but choose to return to their normal lifestyle shortly afterwards.
* Binbou Shimai Monogatari is about 15-year-old Kyou, who takes care of her 9-year-old sister Asu without any help. She manages, even with the little money she is allowed to earn, but it's still a highly unlikely situation in modern-day Japan.
* Binbou Shimai Monogatari share an intimate moment—which is several times per episode—the screen gets filled with a flurry of cherry blossoms.
* Binbou Shimai Monogatari, when Asu and Kyou move in with their aunt she intends to send Kyou to a boarding school, but they convince her that it would be better for them to remain together.

* Binchou-tan is about a group of Anthropomorphic Personifications of various natural substances and phenomena, all of whom appear as cute Japanese children.
* Bindeez for children old enough to be unlikely to eat them, but that didn't help, especially since they still wound up in the hands of toddlers anyway. An inevitable multi-national recall followed. After the recall, the formula was changed to a safer one and they were re-released under other names (such as "Beados" and "Pixos"), with ads for the new kits outright stating that they use "the new bead formula".
* Binder of Shame, because it's not long after this that he stops getting invited to their sessions.
* Binder of Shame: Collateral Darren insists, among other things, that employers only insist on being sent resumes as part of a conspiracy to make more money for paper manufacturers, because at the interview you have to write down all the same information on a job application.
* Binder of Shame, "Deviant Boy" shows the group photos of a trip he and his girlfriend took to a gaming convention. They turn out to include a couple from their private collection, prompting exclamations of "GREAT HASTUR'S GHOST!" and "MY EYES!!!!!"
* Binder of Shame: For reasons he never adequately explains, Blobert Smith once plays a character who "deals with his post-traumatic stress syndrome by putting porridge up his nose on moonlit nights".
* Binder of Shame. In the RPG.Net rant, "A Night at the Inn, a Day at the Racists", he recounts the tale of Psycho Dave, one particular such Game Master:
* Binder of Shame is a group made entirely out of these people. Since they're the protagonist's only social contact, though, he actually goes into denial for a time and convinces himself that this is what friendship is (he gets better).
* Binder of Shame Psycho Dave just had a player character hit by a random magical effect in his sleep just to mess with the player, and said character woke up to find his head had been turned into a giant piece of broccoli. When challenged to explain how and why, Dave replied "It's magic, I don't have to explain it."
* Binder of Shame's Cheating Bastard once referred to the theft of milk crates as "a victimless crime, like tearing tags off mattresses, trading bootleg videotapes, and bestiality".
* Binder of Shame was constantly bullied by the other players, on one occasion being pushed into buying pizza with money he said he needed for insulin.
* Binding Ancient Treaty: A formal agreement from an era long gone is still applicable in the present day.
* Binding Blade also has the same system, but multiple characters have paired endings, depending on who the player has them end up with.
* Binding Blade, like Lucius, gets mistaken as a girl, this time in his A support with Fae, who corrects her almost immediately.
* Binding Spells are the Boring But Practical spell of the entire series. Its function is only to restrict movement, which looks very underwhelming compared to some of the bigger spells shown in the series. It also comes up just about instantly, can be casted pre-emptively, and getting hit by one can spell doom since it opens up the victim to a bigger spell to hit them. In the series itself, variations of binding spells have been used throughout the series as way to secure criminals, or as a key spells in some of the fights in the series. It was the
* Bindle Stick: A homeless person carries all their belongings tied up in a bundle at the end of a stick carried over their shoulder.
* binds that love into a person's life force which then renders them immune, and as a result, Harry's immunity to the White Court is gone, further proving that there wasn't any "true" love involved.
* Binetsu Kuukan features a classic example of the trope with new teen step siblings Amane and Naoya. They almost immediately fall for each other, and their respective friends and passersby already think that there's something romantic going on between them. The only barrier between them is their new living arrangements.
* Bing Bing while on an airplane and getting increasingly frustrated while holding

the neighbor and game in contempt, to the point where he wanted to throttle the guy. Then the neighbor offers the narrator a chance to play, and the narrator immediately starts enjoying himself.
* Bing Crosby, an imprisoned Jeff and Orville are given a ring which grants wishes, but are told it doesn't work for everyone. They're also given two poison tablets to use in case the ring doesn't work for either of them. When the ring doesn't work for Jeff, Orville begins to swallow a tablet, and then...
* Bing Crosby created and popularized the 'crooning' style of singing. It helped that he emerged right when microphone technology was coming into its own. Thus, Bing set the standard for decades of singers to follow.
* Bing Crosby in Hope's face. The "attack" and Crosby's resulting ad-lib went into the film.
* Bing Crosby is about a World War 2 soldier who writes to his family about how he'll be home by Christmas. At the end of the song he says "I'll be home for Christmas, if only in my dreams", admitting it's unlikely he really will be home by Christmas.
* Bing Crosby just shows a picture of Bing with a Christmas hat, against a white background.
* Bing Crosby's show in the late 1940s. The show was the first to be pre-recorded on tape with the help of a German Magnetophon recorder. One night, comedian Bob Burns threw in a few of his folksy farm stories, which got big laughs but couldn't be broadcast due to their extremely racy and off-color nature. The laughter was salvaged and reused a few weeks later on a show which didn't get a lot of laughs, thus inventing the laugh track.
* Bing Desktop. Similar to Bing itself, one of the features changes the user's desktop wallpaper everyday (granted that the user has internet access).
* Binge Eater Rize Kamishiro, a serial predator that targets attractive young men and enjoys "gently scrambling" their insides.
* Binge Montage: A montage sequence that shows people getting drunk and/ or high.
* Binge Montage: A montage that shows characters getting drunk during a long night of partying.
* Binghamton could show the Admiral on a surprise inspection exactly what McHale's crew was doing (holding a party on the main base.)
* Binging with Babish. After a brief moment of panic, he has the show cut back to the commercials while he figures out what went wrong.
* Binging with Babish don't go well together. Typically, he'll follow this up with his own version that tries to reconcile the flavours a bit better.
* Binging with Babish include a short, amusing clip from the cooking process at the end, complete with the raw audio.
* Binging with Babish is to accurately recreate recipes from films and TV shows, and some of the dishes that are tackled are completely fictitious to start off.
* Binging with Babish-style dishes featured in the series, only to then grudgingly admit that most of the dishes in question are actually really tasty.
* Bing Lee, the adaptation's version of Mr. Bingley, only has one sister instead of two, Caroline Lee. She also fulfills the role of Anne de Bourgh as a girl who Catherine de Bourgh sees as Darcy's girlfriend and at the end, Caroline's part corresponds to Lady Catherine as someone who unintentionally brings the main couple together when she tries to separate them.
* Bingo and Rolly were the only main characters to appear in every episode.
* Bingo Love: The two main characters are queer (a lesbian and a bisexual woman); subject matter includes queer female romance.
* bingo machines. The machine plays out a game of Bingo (usually indicated by a tiny bingo card graphic in a corner of the screen), and they simply use the slot machine face to indicate whether or not a player has won.
* Bingo: O Rei das Manhãs stand-in, removing the earpiece connecting him to the show's direction (while snarking "there's a critter buzzing in my ear...") so he won't hear complaints as he goes off-script.
* Binky as per her description as she has a Meaningful Name for doing something rabbits do when happy, which is binkying, and she is always binkying, thus she is

very happy all the time. Omitted from her description, though, she is only unhappy while sick and sad and wouldn't binky if frightened
* Binky (baby pacifiers): "Binky" originated in the 1930s as a trademarked brand name for pacifiers and other baby products from the Binky Baby Products Company, and is now a trademark owned by Playtex Products. It is frequently used as a generic term for pacifiers.
* Binky Biggs, the 1940s teenage humor character, headlined issue #70 (September, 1967). DC was at the time attempting to revive its defunct teenage humor-line in an apparent attempt to compete with
* Binky is in his 2nd year of 3rd grade. He explicitly states in "The World of Tomorrow" that he hates repeating third grade because among other things, it involves a repeat of the science museum sleepover field trip he loathed; in another, he admits that his insecurities over being held back a grade led him to become a bully.
* Binky Show: Binky set up his "Horror Circus" in the town of River-Road.
* Binky Show giggle, it means that a flaming cart is about to fall from the sky.
* Binky try to cure the Brain's fear of swimming. When Binky calls Arthur's idea (getting Brain to imagine he's in the fish tank) dumb, Arthur says it was not dumber than getting Brain to jump into the lake, then they start saying, "Was not!" and "Was too!" to each other until the Brain interrupts.
* Binky was once chosen to host the secret Fairy Convention back during the Dark Ages, and he unwittingly unleashed the Black Plague upon Europe as he believed it to be the name of a band when it was actually a deadly disease.
* binoclard, though it's noted that his features naturally look young for his age. However, he also hand-tailors his own wardrobe to fit him perfectly, and cultivates his mannerisms to project an air of elegant, aloof cool that leaves Harry struggling for words.
* Bino Faata is ubiquitous and is under local control (i.e. it can be altered in a specific room). The smaller combat modules used by the Faata as fighters and/or bombers also use gravity propulsion, as evidenced when dozens of them hover over the major Earth cities. After the starship's destruction, this is one of the many pieces of technology recovered and reverse-engineered by humans.
* Bino Faata of the ruling caste seem to use two-syllable names (e.g. Yatta, Iveh), while those of the lower castes (assuming they even have names) have one syllable (e.g. Yo, Yegg).
* Bi no Kyoujin, being at the same time his second in command and his assistant in all things domestic.
* Bi no Kyoujin implies this about Xiao Chen, him being Chinese and linked to the Chinese triads is presented as an extra reason why he is an enemy to Kabu's clan.
* Bi no Kyoujin: Kabu is obsessed with Nirasawa mainly because Nirasawa doesn't submit easily outside of bed. And that excites Kabu more than he cares to admit.
* Bi no Kyoujin leader's consort), much to Kabu's annoyance. While his stepmother never shows outward spite for Kabu, even helps him with the grooming of his lover Nirasawa, he goes as far as calling her a whore in front of his father, hinting that their relationship is less than cordial in actuality.
* Binomium ridiculus: Naming a new species? Just take a word and add a Latin or Greek ending!
* Bio Apocalypse about the conflict between science and religion which is quite nuanced and thoughtful.
* Bio-Augmentation implant that lets its owner spit deadly parasitic worms.
* Bio-Augmentation, on the other hand, have no disadvantages or limits aside from the monetary cost, though Augmentation that adds limbs or something has a hard limit of two and Genetic Reclamation has a limit of 3 (though each species has only 4 Reclamations available).
* Bio-Augmentation (which was caused by the extreme time crunch he was operating on). Keeping them around was just too dangerous to the rest of humanity.
* Bio Booster Armour Guyver. In something of a subversion, even though the charging time is relatively short for a Finishing Move, it is frequently interrupted (it is one of the only attacks with any charge time at all). In addition, a Guyver cannot

use this attack if the protective panels on his chest have any kind of injury, which happens surprisingly often.
* Bio Chromatic in the process and creating what is essentially a grey zombie-robot who can be given various instructions. They require some basic maintenance to keep the body working long term, but otherwise are perfectly reliable and obedient. They are unique from other forms of Awakening in that the breath used to create a lifeless cannot be reclaimed and reused.
* BioCon corporation worked under the government creating genetic experiments, but one escaped and now the FBI has to chase him.
* bioconservatives, who will live and die in the same body that they're born with.
* Bio-DomeBio-Dome''!" with increased volume until he descends into high-pitched trilling before water is splashed on him and he immediately calms down.
* Bio-Dome, Bud and Doyle sneak into the rooms of the two attractive female scientists and climb into bed with them. They are even shown reaching their hands down to the women's crotches.
* Bio-Dome, one character simply shouts "Lightbulb!" when he gets an idea.
* Bio-Dome Some critics did pay to see it and trash it anyway ... the 4% Rotten Tomatoes rating almost a quarter-century later makes this decision not hard to argue with.
* Bio-Dome' "The Safety Dance". In a subversion, it doesn't work; it just means they have a rhythm as they fix the place up. In a shout-out to the music video, it also causes a dancing midget to suddenly show up...
* bioengineered Joacquim Morray (whose family is sometimes enemies with the Carlyles and sometimes uneasy allies) is smitten with her almost as soon as he meets her.
* Bioethicists have near-universally rejected the prospect of brain transplantation, although for a different reason than this trope generally addresses: mathematically, a brain-dead donor body can save
* Biofab War setting use a sadistic variation of the typical spelljamming helm called a lifejammer. Instead of a spellcaster fueling the ship with his or her magical power, lifejammers are powered by the life force of whichever poor victim gets strapped into the helm. Neogi slavers are fond of using them, as are the undead, and their use is banned in pretty much every civilized region of wildspace.
* Biofilm is basically loads of bacteria that have had a population explosion, and due to the nature of bacteria, are extremely resistant to medicines, as the outer layer absorbs the chemical, dies, gets eaten, and replaced. It usually grows on medical implants and teeth. Fortunately, as of yet, they can't form
* Bio Force Ape prototype. In 2010, the real prototype was found, disproving that the screenshots were ever in the game.
* BioForge. As the weapon is small and concealed, he doesn't even realize it for the longest time.
* BioForge: At one point, the protagonist must shoot down a dropship at close quarters using a large turret gun in the complex's tower.
* BioForge becomes what he hates in the process. He loathes them for trying to turn him into a murderously deranged cyborg... and by the end, he has become just that — only directed at his creators, casually killing anyone even slightly related to his capture and transformation.
* BioForge came to be: you're a cyborg (so you don't need fluid lifelike animations) and, due to a disaster, the base you're in is almost completely abandoned (no large amounts of on-screen characters needed).
* BioForge, complete with hangar bay, cryogenics lab, prison, defense tower, medical experimentation lab.
* BioForge. It was eventually cancelled to be reworked as an add-on to the first game, but the add-on was also cancelled.
* BioForge revolves around the Mondites, a group that apparently embraces this philosophy.
* BioForge: Stopping a moonbase nuclear reactor from meltdown is one of the things you've got to do.
* BioForge: The Phyxx base, the last relic of this advanced alien civilization,

found on a distant moon.
* BioForge: When wearing the enviro suit, the station personnel will leave you alone unless you attack them.
* Bio F.R.E.A.K.S. in the United States began to outpace the US government's ability to control the country as a whole, leading to government bankruptcy and the companies (called "GI-Corps", short for "giant corporations") becoming self-governing entites that were powerful enough to declare their home states as independent territories. This led to massive ethics violations and eventually outright violence and terrorism, termed the "Techno-Industrial Civil Wars", which were only quelled with the institution of the Secret Games Commission — the sanctioning body in charge of the fights that take place in the game itself. The games replace large-scale conflicts with one-on-one duels between genetically modified clones that represent the states held by the GI-Corps.
* Bio F.R.E.A.K.S. who use violence to increase their standing. The gameplay itself is the solution cooked up by the fragmented government to mediate these gargantuan corporations in order to avoid a second Techno-Industrial Civil War.
* Bio Freaks. Your characters could take explosive rounds, rockets, and chainsaws to the face surprisingly well, but most characters had moves that could strip your enemy of one or both arms, or the head, the first two greatly limiting their fighting abilities, and the latter instantly killing them. Similarly, getting tossed into some of the hazards, such as industrial grinders, would either kill you outright or strip you of your arms.
* Biography of the Life of Manuel, a character named Horvendile has the reputation of being insane because he insists it is a world he created, and they are all characters he made up. This is borne out when they keep obeying his eccentric directions without knowing why, or even admitting it. In other volumes, there are references to him as "Orven Deal" or "Frank Vanringham".
* Biohazard 7: Resident Evil, with the "7" highlighted in the same way as the Western title.
* biohazard, and walk-in fridges in certain restaurants had to be cleaned with the same procedures as dealing with fallout.
* Bio-Hazard Battle has these, which move around you ship differently depending on your selected character. They fire out your characters' special weapons.
* Bio Inc: Redemption has "Moderate Drinking" as a positive lifestyle choice, citing the common belief that light drinking can actually have health benefits. While this does technically hold true, not even a year after the game left Early Access, some studies claimed that the benefits are outweighed by the risks and that there really isn't a "safe" amount of drinking one can do.
* Bio Lab Wars, you have to shoot at cars and motorcycles, as well as flying machines, to defeat enemies. Each one you damage enough explodes.
* Biollante qualifies. She's several hundred feet high and has a taste for general destruction as well as flesh, which of course irritates a certain radioactive dinosaur. Inverted, however, as Biollante is actually a peaceful monster and only killed to protect her scientist "father" and to try and stop Godzilla's rampages.
* Biological and chemical weapons, unlike nukes, are intentionally designed to devastate civilian populations and, more importantly, disrupt the enemy's supply chain and divert resources including vital medical supplies and personnel from the front lines.
* biological, but it takes three seasons and one movie before they are finally reunited. It doesn't help that there were other plot threads going on at the same time, with the show only coming back to her missing parents seemingly when it felt like it.
* Biological Chimeras and Mosaics are basically two developing fetuses performing a Fusion Dance in the womb. A chimera has cells from both twins, with each individual cell containing the DNA of one twin; the proportions vary from case to case, ranging from a few scattered cells here and there to patchwork-like patterns to different organs originating from different individuals.
* biological chimeras of various creatures and so on — which are then let loose in the world.

* Biological Immortality: A character is immune to the ravages of time, although usually still mortal to physical injury.
* Biologically, all three are required for reproduction: the males impregnate the ovum-producing apexes, who in turn implant the fertilized egg in the females for gestation.
* biologically speaking but Hitsugaya is the youngest person to learn it in the history of Soul Society. However, his power is not fully developed and he lacks the experience of other captains and their emotional maturity (he still sometimes acts like a child trying to do an adult's job). Nevertheless, Kyouraku (one of the oldest and most powerful captains) has said that Hitsugaya will probably surpass him in the next 100 years.
* Biologically, they resemble pale humans with a metallic sheen to their eyes, circuitry-tattoos all over their bodies and a pale, almost translucent nanite-infused liquid serving as blood. They have actual organs and tissues rather than being made up of mechanical components, although their “flesh” is technically made up of polymers and oil serving the same purpose as human tissues. They have trouble processing emotions, either others’ or their own, and get a natural penalty to their Charisma together with a resistance to fear and emotion effects; but depending on their stats, they do have the capability to be as empathetic as a normal human. Similarly, their cerebral abilities aren’t set in stone, despite getting a natural bonus to their Intelligence. They possess sex drives, but cannot biologically reproduce. They age mentally and eventually “die”, but their bodies merely look more “timeworn” rather than going all wrinkly. It has been stated that their skeletons “probably look freaky compared to a human’s”.
* Biological splicing and gene editing were heavily important in the origin of the Arashii species.
* biological weapons against China. Deathclaws were developed for close combat and search-and-destroy missions, while mole rats were developed to be an invasive species to be seeded in enemy territory. While mole rats are relatively harmless, can be domesticated, and have a genetic kill switch, deathclaws are 9-10 feet tall and live up to their name, and are capable of breeding.
* Biological Weapons Solve Everything: Using a biological weapon (weaponized disease) to wipe out the enemy.
* Biologists analyze the behaviors and actions of species in terms of "genetic fitness", which is basically the proportion of an individual's genes in the next generation. Whenever the ratio of a given sex goes down relative to the other, it becomes more advantageous (in terms of fitness) to have offspring of that sex, so that sex is temporarily more valuable. In the long run, this causes nearly all sexually reproducing species to have an equal ratio of males to females, even for species whose males spend most of their lives alone and thus (it would appear) don't contribute much to the group's welfare. The mothers in some species have developed means to determine the offspring's sex in response to apparent conditions.
* Biologists are often enccouraged to address any species of living beings by its
* Biologists LOVE finding new and creepy things. They also love finding OLD and creepy things.
* "Biology 101": Jeff described Pierce being kicked out of their study group as parting ways with their "closest, oldest, craziest, most racist, oldest, elderly, crazy friend".
* Biology 9th Edition) Keratin... is a hydrogen-bonded triple helix. In this photo, Drew Barrymore has straight hair. Figure b. (another picture of Drew Barrymore) In order to give her curly hair, water was used to disrupt the hydrogen bonds, and when the hair dried, new hydrogen bonding allowed it to take on the shape of a curler. A permanent-wave lotion induces new covalent bonds within the helix."
* Biology Eighth Edition by Campbell and Reece. One of the practice test questions is about werewolves.
* Biomass Effect cross-fic, taking place in the Mass Effect setting. The Prototype setting was accidentally assimilated by the protagonist before the story even

begins. The human race is technically extinct and Blacklight almost exclusively uses organic technology.
* Bio-Meat: Nectar, a lot of victims tend to scream for their mamas when they get eaten. Either that or apologize to their mamas.
* Bio-Meat: Nectar, B-M go dormant in direct sunlight. (Only direct sunlight, though, so if it's overcast you're in trouble.) They also tend not to react well to flames, enough that hairspray and a lighter makes an effective tool against singular B-M. There are high-tech experimental weapons that break them down at a genetic level, but they're rather rare, delicate and have a short battery life.
* Bio-Meat: Nectar, the older and uglier you are, the more likely you will be a completely nasty person who gets eaten alive.
* BioMeat: The eponymous creatures are bred to eat anything, and they do.
* Biomechanical Huragok/Engineers speak a language that is a combination of whale song humming and bird chirps. They also have their own Sign Language that can be learned by other species.
* Biomega gives us Kozlov, a Russian scientist who had his mind uploaded into a bear. He's also a sniper.
* Biomega informs him that his fighter jet is out of missiles and advises him to retreat, Zoichi responds with: "I still have one projectile left."
* Biomega on-air when a barrage of world-altering bio-weapons are launched into the atmosphere. The weapons didn't go off anyway.
* Biomega referred to as horses. Then again, the people who ride them seem to have a very loose definition of the word, as this is also what they call the main character's motorcycle.
* Biomega: The bad guys' schemes eventually result in the creation of a bizarre new world which is shaped like a giant worm, tens of millions of miles long.
* Biomega. With this thing, Zoichi takes out a handful of intercontinental ballistic missiles within a few minutes of launch.
* Bio Menace had the RoboPal, a rare example of an Attack Drone in a sidescroller.
* Bio Menace has a secret door in the last level of episode 1. It is actually a normal visible door. What makes the door so secret are the bright red letters written on it reading "SECRET DOOR".
* Bio Metal — Borderline- The titular enemies may look metallic grey, but they are more like a cross between flesh and metal.
* Bio Metal: The titular Bio Metals are said to be this in the game's intro.
* Biomotor Unitron, losing a battle usually has few repercussions: you leave the Arena or Dungeon and return to the main screen. However, losing to the first Dark Unitron causes the game to cut to a Game Over screen, which the game never normally displays.
* Biomotor Unitron, people were able to build their own artificial cores to continue powering their mecha. (This also explains why you can keep playing the game after defeating the final boss.)
* Biomutant after Toxanol Corporation's polluting caused some great apocalyptic disaster, humanity took to the stars in massive space ships to try and find a new home. The game is about the life that sprung up after we left - the cute, furry, kung-fu wielding mutant life.
* Bionic Commando (2009) game are about twice as tall as a human, well armored, decently armed, and are considered a match for an entire squad of infantry... and no match for a bionic commando.
* Bionic Commando, Area 12's baddies go into a panic when they spot SuperJoe.
* Bionic Commando featured a boss robot that would begin the battle with the statement: "PI PI PI... WE HAVE FOUND AN INTRUDER... WE ARE GOING TO ATTACK"
* Bionic Commando He is in severe denial after this reveal, probably because he sees it as ridiculous as it is. The twist was severely criticized by multiple reviewers, and thus is a perfect example of handling a Companion Cube poorly.
* Bionic Commando. If you fire your gun in one, suddenly you're under attack by an army of white-suited soldiers (who don't give you any rewards for killing them) until you leave and reenter the zone.
* Bionic Commando, literally half the size of the titular bionic commando. As an

added bonus, it allows him to pull off feats of super-human strength, though in the trailers, that strength is only applied directly to his arm, not the rest of him.
* Bionic Commando. Pretty much the only games in the series in which he wasn't kidnapped are the original arcade game and the next-gen title.
* Bionic Commando Rearmed are generals with so many medals that they actually stop bullets, rendering them immune to attacks from the front. You have to either shoot them in the back or throw grenades behind them.
* Bionic Commando Rearmed just like in the NES original, but the developers insisted on being faithful.
* Bionic Commando series has the protagonist, Nathan "Rad" Spencer with a bionic arm. It has incredible grip and can grab everything. It's used as a gameplay mechanic as it replaces jumping with swinging.
* Bionic Commando: Spencer has a ground pound named after this trope. It can only be executed by jumping from great heights.
* Bionic Commando that sends remote-controlled mini-helicopters after you.
* Bionic Commando, the outdoor parts and hallways of certain stages use only the filtered bass of the BGM tracks, as if they were broadcast on speakers in the main rooms.
* Bionic Commando, with only a slight rustling to notify you of when you're about to be eaten.
* Bionic Commando, you meet up with General Killt in one of the neutral zones. Since nobody is allowed to attack in a neutral zone, he just bad-mouths you.
* Bionic Double arc: "Won't this confuse the listeners?" "Anyone who listens to this is mad anyway!"
* Bionic Heart makes it impossible to raise livestock and difficult to grow fresh crops. People typically eat a sort of flavored foam instead of real food.
* Bionic Heart on the walls. The function of these lines are never explained and seem to be only aesthetic.
* Bionic Heart's brand new android henchwoman turns on him when the psychic human brain he placed in her head allows her to have visions showing the destruction that will result from his future plans.
* Bionic Heart, she has had half her face blown off by the police pursuing her, revealing the mechanical parts underneath her skin.
* Bionic Heart, Tanya kills Luke's girlfriend Helen because she is jealous of all the time Luke spends with her.
* Bionic Heart when she becomes jealous of all of the time that the protagonist spends with his ex.
* BIONICLE (2015), Onua finds a maze underground in his search for his Elemental Creature, Terak. Rather than try and solve the maze, being the Toa of Earth and all, he decides to just run straight through it, which works surprisingly well for him.
* BIONICLE (2015) put great focus on various heroes losing their masks to villains: the 2015 Skull villains wear them and drain their power, whereas the 2016 Beasts poison them. In the actual story, this only happens to two masks in 2015, and none in 2016. The mysterious Golden Mask of Skull Spiders and Umarak's red mask variant have also never appeared in the story, though the former was most likely canon.
* BIONICLE (2015) recover the Gold Masks that unlock their powers and transform their equipment into weapons. Afterwards, they get new armor, tools and new masks, which help them locate yet another set of new masks. Ekimu also upgrades his body to the form of a Toa through unexplained means, but this change proves temporary.
* BIONICLE (2015)). Some of the Skull Spiders have scorpion-like tails and like the Visorak, they are four-legged. The Lord has six legs.
* BIONICLE (2015) was marketed towards fans of the old line in particular to help strengthen the brand. But the old fans felt the story was watered down and too kiddie, unlike the original which had actual planning put into it. The line was cancelled even before LEGO's three year house minimum due to historically poor sales.
* BIONICLE (2015) webisodes, especially when he begins using ridiculous exaggerated voices in an effort to make each character sound distinct. Some of the

international dubs also count.
* BIONICLE (2015) weren't named until the first book's author suggested to LEGO that maybe they should be. The 2015 villains were also only given descriptive or generic designations, with only Kulta the Skull Grinder getting a personal name in a magazine description.
* Bionicle 2 kind of power (element or mask-related), because they have been mutated into forms that don't support these powers. Again, the only way they do use their elemental powers is via colored energy spinners, which are far easier to animate.
* Bionicle 2: Legends of Metru Nui, detailing the struggles of the Toa Metru/Hordika before they became the Turaga of Mata Nui and how the Matoran of Metru Nui ended up on the island of Mata Nui in the first place.
* BIONICLE 3: Web of Shadows, and Kualus only says one word, though he talks a bit in one of the bonus features on the DVD.
* BIONICLE 3: Web of Shadows, Sidorak is a sniveling coward who always needs Roodaka to do things for him, and Roodaka even outright says that he would never dirty his hands with conflict.
* BIONICLE - A Badge of Office is a staff or tool used by Turaga to symbolize their experience and knowledge. Several of these take the form of a staff.
* BIONICLE: About 100,000 years ago, the planet Spherus Magna exploded into three chunks in an event called the Shattering. One chunk used to be a major forest, and became the moon Bota Magna. Another was a significant part of the ocean, becoming the moon Aqua Magna. Between them, the remains of Spherus Magna became a planet-wide desert called Bara Magna. The climax of the story involved reforming Spherus Magna from the three pieces.
* Bionicle Adventures; by the end of each individual episode, between 85-99% of the cast are dead, with that 1% being Monkeydude every time. Of course, they return for the next episode...only to be killed by Monkeydude again.
* Bionicle Adventures, during "The Kid Torturing Bionicle At Wal-Mart":
* BIONICLE after the franchise's cancellation, but the writer actively encouraged his audience of kids to write this way.
* BIONICLE: After the Great Cataclysm, the Rahi stored in the Onu-Metru Archives escaped and roamed the island of Metru Nui, exacerbating its ruined state.
* BIONICLE, after the Piraka bathe in mutagenic water for a short while, thanks to falling into a trap, they don't notice it, but they start developing aquatic capabilities. When we next meet them a couple of books later, we find that their whole bodies have diminished, reducing them to eel-like spines with their heads at the end.
* BIONICLE agreed to keep the story going for at least another year and a half, but only the main writer, Greg Farshtey remained as the sole storyteller, as the other members of the former Story Team had moved on to other projects.
* BIONICLE: Air, here associated with the color green, is one of the six core Matoran elements, and as such is wielded by the numerous Toa of Air. Unlike most other elements, almost no non-Toa creatures have access to wind powers with the exception of the Makuta, who use the "Cyclone" power, and the corresponding Rahkshi.
* BIONICLE allows you to slow someone else down (or, presumably, speed them up, though this is never shown).
* BIONICLE: Almost got as high as Stage 4, but reverted to 6a almost immediately after the line's initial cancellation. The 2015 revival stuck around at Stage 2.
* BIONICLE, a lot of them only agree to help out others (or at least, people from other settlements) for a reward. Especially Strakk, who will partake in a battle to have an opportunity at looting the bodies.
* BIONICLE also attempted to promote their sets with a shoddy rap song, as well as forcing the characters into a "gangsta'" setting, complete with the villains lounging around in their fortress which is surrounded with chain fences, sitting on sofas, chewing bubblegum, and doing various other activities that not only had nothing to do with the official story, but clashed something fierce with the image the franchise had built up in the previous years. This was not the first example:

beginning from '05, just about all of the commercials had various rock songs attached to them, replacing the tribal music and even creeping into the movies.
* BIONICLE also details why the titular race wanted to overrun the desert region of Bara Magna along with its locals—they were driven out of their home-realm by robot assassins, and needed the space to fight back. Although it's to be assumed that being mean has always been their way.
* BIONICLE, although it's ambiguous as to whether the latter was actually transmitted virally or not.
* BIONICLE), and 2010. All other years feature one or more villains affiliated with or manipulated by Teridax except 2009 which took place in another world.
* BIONICLE, and can use this to devastating effect by forcing their foes to feel multiple intense emotions one after the other, such as inducing intense confusion, then anger, then fear, and then drowsiness all within seconds of each other. The Rahkshi they spawn containing the specific emotion-based power can also do this, though only with one emotion rather than multiple.
* BIONICLE and duking it out with another planet-sized robot that cast Mata Nui's people into slavery. A sequel was planned, but LEGO pulled the plug on Bionicle before the script could have been finalized.
* BIONICLE and specifically engineered by the Great Beings so that this would happen, this would make it simple metamorphosis.
* BIONICLE and that "brother" is more a title of endearment than anything.
* BIONICLE, and that the Matoran Universe is housed within his body. This is, of course, the real deal. Although the theory did have its share of supporters, in the form of fans who happened to stumble upon an illegally leaked teaser video earlier that year, which revealed just about the biggest surprise of the entire story.
* BIONICLE and that you can't use it anywhere with any meaning. Most likely the Maori groups' complaint was not about the trademark itself.
* BIONICLE and the filmmakers reconfigured its climax after the voices had already been recorded, leading to crucial events going unexplained, explained events not happening the way they're described, and twists and character actions being utterly nonsensical.
* BIONICLE and therefore also the world's very laws of nature. Nice Job Waking It, Heroes.
* BIONICLE, and Vastus wears snake-figurines on his shoulders. Keetongu has these in the movie, but not on his toy.
* BIONICLE and wants to be a pilot, but is afraid of heights. Heights relative to a Le-Matoran, that is; the treetops are 'ground-level' to him, so he can leap and swing through the jungle canopy without fear. But he cannot handle flying on birdback, even though he wants to fly more than anything else in the world.
* BIONICLE, and was also the last big collectible item of the toyline. Two other ultra-powerful masks, the Mask of Life and Mask of Time were golden as well. Light-themed characters likewise used gold as their standard color. Mata Nui, a godlike being in the story, was released as a gold-colored exclusive set too. Although some years subverted the rule (the promos of 2006 and 2007 notably focused more on white and blue), these two colors remained fairly important throughout the line's run, and rarely were characters wearing them pushed to the back.
* BIONICLE). A new planet that's later introduced is an archetypal example of this trope.
* BIONICLE a new set of masks with each set of toys. Definitely in the "tropical mysticism" tiki-mask style, as the franchise had a number of Polynesian influences in its earliest days, though they were never without a certain sci-fi twist, with the characters being robotic and all. Being worn by our main heroes and gifted with all sorts of strange powers, they are very cool.
* BIONICLE an example of a merchandise-driven property that outlived the merchandise.
* BIONICLE animates some pillars in its lair to become Living Walls to attack the Toa Metru.
* BIONICLE an internal Tertiary Sexual Characteristic, the color blue. The only female tribe to get toys was the water tribe, and at least ninety percent of all

blue figures were members of the water tribe. So, any figure that was blue was assumed to be female until otherwise noted. Though in the current iteration of the franchise, called Gen 2 by the fans, this rule may no longer apply. Korgot, Protector of Earth, is confirmed as female.
* BIONICLE (apart from Jala). A Nui-Jaga scorpion has a scene in the original manuscript but was deleted from the book's final release.
* BIONICLE appear. Most likely the writers either didn't know better or didn't cate.
* BIONICLE approach to the story, likely confusing many kids in the process, because the actual story was only told through the books and comics at that time.
* BIONICLE. Appropriate, considering all the Matoran Universe residents are biomechanical.
* BIONICLE are biomechanical, and the mechanical halves are clockwork (at least we know they are in the case of the Matoran Universe characters). They've also designed and built pure robots, also clockwork. As far as the toys themselves go, gear-based action features were all the rage in the line's early run (2001-2005), then they phased them out in favor of better articulation or simpler gimmicks.
* BIONICLE are generally wiser than other Matoran, even those who are older than them.
* BIONICLE are more-or-less faithful representations of the original LEGO models, in a movie where every other character has been redesigned to look more organic and less like buildable action figures. They were actually the first characters to be designed for the movie, and ended up having a mere cameo, frozen in ice. The fire drones in the second movie, due to reusing the bodies of the Bohrok, stand out in the same fashion.
* BIONICLE are of the mutated former land dwellers kind, save for Ehlek the Eel Barraki, who was aquatic to begin with.
* BIONICLE. As a general rule, the color of the eyes can be used as an indication for "good or evil", but you have to ask yourself how the eyes fit with the armor.
* BIONICLE as a protector, with the transformed Dekar having all of the originals skills, memories and loyalties of the deceased jailer, with Dekar being completely overwritten to the point that Hydraxon doesn't even realise he used to be someone else, and the only difference being that the original is dead and the new one used to be someone else. While it takes a while for the new Hydraxon to learn the truth, he ultimately doesn't care as who he is now is what is important to him. To him, he is the real, one and only Hydraxon, and fully replaces the original to the point that the other members of the Order of Mata Nui don't even realise that the Hydraxon they knew is dead.
* BIONICLE, as early media sometimes alluded to entire years taking place between story arcs.
* BIONICLE as "that LEGO story" or otherwise try and imply that it is "just a story used to sell toys".
* BIONICLE as their true head. In-story, it's explained that their faces give off an intense glow, so you couldn't see them anyway.
* BIONICLE: Bara Magna, Aqua Magna, and Bota Magna. Few people remember what really happened.
* BIONICLE because it is implied that that the petrified Matoran's consciousness gets transferred into the rock they were standing on while their bodies were petrified. The rocky ground in some areas of his realm screams if stepped on because of this.
* BIONICLE becomes evident, as some of those Matoran are huge, even if they're standing in the back.
* BIONICLE. Beginning in 2003 (and ending in 2009), Lego sold an extra basic-sized figure (usually referred to as a "Seventh Toa") packed in with a vehicle and sold at a higher price point, and usually joined the main team of heroes in-universe later in the story, though almost every year deviated from this in some way;
* BIONICLE being stolen, just having barely escaped an exploding volcano, and being attacked by a group of innocent villagers who thought that his team were villains. This almost ends badly for said villagers.

* BIONICLE: "bios", "kios", and "mios" are units for distance used in the Matoran Universe. The distance units are as follows:
* BIONICLE* Blink and you'll miss them, but a shot of the Toa appear during an exposition dump.
* BIONICLE body is roughly forty million feet (7,575 mi or 12,192 km) tall and had a camouflage system that created an island on his face. Mata Nui was able to control specific things like gravity and light within his body.
* BIONICLE, but Botar was something of a religious fanatic, crazily devoted to "the will of Mata Nui".
* BIONICLE, but Kopeke especially. Since he got appointed to be the official Chronicler, it's likely that he's more wordy in his writing. Onua, an Earth Earth character, is also known to only speak up when necessary in most of his appearances.
* BIONICLE, but later other lines were granted short films of their own.
* BIONICLE, but much later they unintentionally released him with the same powers when they attacked Roodaka holding a piece of the Toa Seal.
* BIONICLE by the Makuta, they only received their ugliness after being mutated by them through other means. Yet in the comics and books, they went through the makeover right away, to ensure that the kids reading them would get the message immediately.
* BIONICLE by the Mask of Life, they gained the power to absorb any energy tossed at them and get stronger. Even throwing them in lava did not help, they just came out bigger. They were stopped by freezing time and removing the mask, but even after that, Vezon still has a knack for not dying.
* BIONICLE can be traced back to two characters' actions: Annona, who amplified the Great Beings' pre-existing compulsion to create, which eventually led to the Great Spirit Robot; and the Energized Protodermis Entity, who let the Core War happen and caused Spherus Magna to shatter. While it's debatable exactly how much of this was "unwitting", it's doubtful either of them foresaw just how much of an impact their actions would have.
* BIONICLE canister sets are released in waves of six, this number pops up often in the story. Six heroes, six elements (at first), six maoki stones, etc.
* Bionicle can't have nice things", because set/piece designers do visit other boards where they don't have to worry about being attacked.
* Bionicle characters are built and wildlife are hand-created by mixing viruses in potions.
* BIONICLE characters that had died in the Matoran Universe were living up there.
* BIONICLE character Tobduk's time in the Order of Mata Nui began after his home island became the first victims of the Visorak horde. The attack and his survival changed his personality a great deal.
* BIONICLE comics. Also worth mentioning are the Matoran Civil War, the Toa-Dark Hunter War, and the Dark Hunter-Brotherhood of Makuta war, the former of which we're shown nothing, and the latter two which only show glimpses of the conflict.
* Bionicle comics from 2003 even lampshaded the stories becoming a little formulaic:
* BIONICLE.com, which are constantly getting squished out by the, thankfully, more intelligent majority.
* BIONICLE, contains a few scenes of this. But are pulled off much more effectively than that film.
* BIONICLE controlled by the serpentine Kraata... with said suits being made from Kraata exposed to Energized Protodermis.
* BIONICLE" couple — they hate each other at first, continuously bicker, spend some time together after getting captured, make each other laugh, and after the final fight, Kiina's so glad that Berix is okay that she almost crushes him with her hug. But the writer of the books and comics (who only worked on the movie as a consultant) said no. Kiina was just worried about Berix's wellbeing because she's one of the good guys, but other than that, can't stand him. And they also belong to different species—not that that kept Kiina from falling for Mata Nui, who was technically an artificial being, in the sequel novel.

* BIONICLE. Despite the game being completely detached from the main franchise and featuring canonically long-dead characters as enemies, it's still perplexing that the developers reinterpreted certain characters seemingly at random, instead of picking ones that would have fit the roles the developers had in mind.
* BIONICLE did not go down easily, because Teridax would later describe the event with, "I lost because I disagreed with something I ate."
* BIONICLE. Doesn't mean ice Matoran are not nice: it's very hard to anger them.
* BIONICLE essentially does this: it can see through any deception or illusion, but as far as lies go, it seems that it can only tell if the potential liar truly believes what he is saying or not.
* BIONICLE. Fans often joke about the event's pointlessness, as not only did Botar have a companion who could have been killed in his place, but another type of teleportation was introduced around the time anyway, and the ramifications of there being a whole species of such immensely powerful and exploitable beings were never brought up. More importantly, it turned out Botar was alive after all, he just didn't teleport back to where the story was taking place.
* BIONICLE fans tend to pair up Toa Hewkii and Macku. Macku is a three-foot-tall fisherwoman, Hewkii is a seven-foot-six superhero with stone and gravity powers.
* BIONICLE featuring the Mask of Time hidden in the scenery to keep older fans interested.
* BIONICLE figure thrown into the mix for good measure. Blending the vastly different building techniques has, in fact, become a standard practice for LEGO since then, and not-too-overspecialized pieces tend to creep over from one theme of sets into another.
* BIONICLE film for many. Its two prequels are mostly only remembered by fans. The fourth movie is at times neglected even by them.
* BIONICLE finds himself surrounded and held at spearpoint by a group of angry Agori:
* BIONICLE for back legs. What's more peculiar is that in the story, everyone regarded these as having honest-to-goodness legs.
* BIONICLE game has three, two of which are in Kopaka's rail-shooter level against the Bohrok.
* BIONICLE gave him a more dramatic role and reduced the physical comedy, but in exchange cranked up his verbal antics and cynical over-reactions.
* BIONICLE gets distracted by some glowing coral-like structures. He immediately puts them on his head and starts hopping around like a fluorescent bunny rabbit.
* BIONICLE GIANT BUG THINGS COMING FOR ME PLEASE SPIRITS LET THERE BE SOMETHING USEFUL IN HERE."
* BIONICLE girls. Same thing in-story, but at least the characters can use voice and body language to tell genders apart.
* BIONICLE, giving the wearer the ability to turn any object into a projectile that will always hit its target. Many characters have Improbable Aiming Skills without the help of a mask, however - in fact, the one known bearer of a Sanok finds himself rarely using it because his unparalleled Kolhii skills as a Matoran already make him a crack shot as a Toa.
* BIONICLE. Greg Farshtey, writer of the storyline, has professed a dislike of Vahki. It's extremely common for Vahki to be destroyed in downright cruel and unusual ways, particularly during the '05 arc.
* Bionicle guidebook or encyclopedia released by Scholastic had various errors like putting the wrong images next to the descriptions of characters or items. This was especially common for masks; even if they were the right color, they often were the wrong shape.
* BIONICLE had a similar fiasco with lime-green socket joints, which due to a cooling error with the batch caused them to break far easier than any other pieces, usually you couldn't even move them after assembling the models before they would just shatter in your hands. This managed to sour consumer relationship with so many sets afterwards (not to mention it seemed like the problem migrated to just about every type of joints regardless of color) that Lego had to completely drop the old ball-socket system for a new design. It didn't help that some of the most popular

sets during this time were lime-green (especially the limited edition Lesovikk).
* BIONICLE had many different online animations in its original lifespan (Bohrok Online Animations, Vahki Online Animations, Piraka Online Animations, Stars Battle Videos, etc.) and its 2015 reboot featured a series of 90-second online animations as a means of storytelling (alongside books).
* BIONICLE had the ability to temporarily overwrite a Matoran's consciousness and turn them into a mindless "shambler" incapable of rational thought.
* BIONICLE had the Mukau, a bovine combiner model whose name is pronounced the same as "moo-cow". However, the story team thought the pun was silly, and the creature has since been renamed to Mata Nui Cow.
* BIONICLE had the Rahi Nui, a critter who we only know by its description, since it was never released as a toy. Nevertheless, the animals that make it up were available at one time, so we can guess what it might look like: its head is that of a Kane-Ra bull, it has the body and back legs of a Muaka tiger (which technically only has one pair of legs), the powerful arms of a Tarakava lizard, the wings of a super-sized Nui-Rama wasp and the stinger tail of a Nui-Jaga scorpion.
* BIONICLE: Hahli Mahri has a wing for fins that she used underwater to great effect, but became useless after she turned into an air-breather again.
* BIONICLE, has 50 extra pages that were cut from the English release. On one hand, it fleshes out the world and characters better and some passages in the English text feel clunky without the missing sentences. On the other, it's arguably slower, redundant at parts and contains numerous translation and continuity errors.
* BIONICLE has a brightly sparking wound on his back which he never covers despite wearing giant, movable armored blades on his back. He even spends much of his fight with Mata Nui facing away from him, standing still while bathing in the cheering of his supporters. He's defeated under seconds.
* BIONICLE has been all but forgotten, and had only ever been used a handful of times early on in the series. This can be attributed to the set designers not coming up with combinations for the later sets, though a couple of already existing combinations still didn't get to be used, even when they would have come in really handy. There is no in-story explanation for this: the writer simply doesn't want to use them.
* BIONICLE has Breez, who is female despite looking just as manly as the others.
* BIONICLE has Kolhii — a cross between hockey and lacrosse that can be played with two or three teams. Also Ailini, played by throwing disks through hoops, while simultaneously sliding on disks on a shifting field.
* BIONICLE has made liberal use of this, though most of the myths have been distorted through the ages, and the rest have other things keeping them from being perfectly straight examples:
* BIONICLE has several movies, each a part of the larger story that's told in other media.
* BIONICLE has the ability to sprout an extra eye on his back. And it shoots laser beams.
* BIONICLE has the "Forest of Blades", where soldiers have been captured and fused together with the trees, with their weapons jutting out.
* BIONICLE has "The Sea of Liquid Sand." It's technically a sea of quicksand.
* BIONICLE has Voriki, the Toa of Energy. Originally created as part of a fan contest, Voriki was never actually accepted into canon, unlike numerous other characters. Despite this, Voriki is still remembered by the fanbase, and often finds his way into fanfics.
* BIONICLE have the ability to absorb other beings to increase their mass but have to oppress the other minds to ensure that they would still remain in control of their fused bodies.
* BIONICLE he always talks in. Vakama at first refuses to believe his sincerity, but eventually gives in and returns to the good side.
* BIONICLE. He becomes immune to every attack his foes can toss at him, and the effect wears out after he has delivered a spectacular beating in them. It can be accessed by making him very mad.
* BIONICLE, he ends up in a world where Toa "protect" Matoran by forcing them under

their rule and killing anyone who dares to object.
* BIONICLE Heroes movies, which gave random background Ga-Matoran (all female) male voices.
* BIONICLE: Heroes where your character starts playing keepie uppie with its head.
* BIONICLE he's incompetent and makes a show of always putting on a strong front and leading on the battlefield to assuage others and himself, which blinds him to Roodaka's manipulations, likely as an attempt to mold the two portrayals together.
* BIONICLE), he takes only a few moments to wonder about the fate of that universe before continuing on with his quest.
* BIONICLE, he tried to warn them, and was rewarded by slowly becoming so intangible that all of his atoms flew apart - the kicker of his death was that it was caused by his own power being forced out of control by his brethren, who thought he was lying.
* BIONICLE. However, a glitch in their AI resulted in them having the capacity for emotion, and even developing their own culture.
* BIONICLE However, right before he was about to unleash it, Matoro succeeded in his mission, resulting in Jaller and his team being teleported back to Metro Nui. Jaller then had strenuously force the power back down, lest he turn his home city into a crater.
* BIONICLE I and II, where the player had to traverse an entire island, often clicking through dozens of screens to get from one location to the other.
* BIONICLE. If she does nothing, Makuta will be free to conquer the entire universe, but if she tries to destroy the nearby machinery, every being inside the Matoran Universe will perish as a result of the Great Spirit crashing down. She eventually decides to do it... but other characters stop her, which provokes a furious battle.
* BIONICLE in its early years was generally pretty shy about showing Toa using their equipment to actually hit their enemies. Slashing their way through solid objects was okay, as was using their tools to channel their elemental powers, but not actually striking a living opponent. In its case, the worry was not about drawing blood, but about them being seen as "weapons" at all; Lego was very insistent that the characters used "Toa Tools" and that the tools not be used against other living beings. Later years saw this restriction fall by the wayside.
* BIONICLE. In order to drive the symbolism home, he ends up being reduced to his mask, but is immediately brought back to life by Turaga Vakama loudly proclaiming which virtue each of them represented, placing Jaller, Hahli and the mask onto a UDD symbol engraved into the floor. It's never explained how this brought Takanuva back, nor why he lost his body in the first place.
* BIONICLE: In pretty much all the graphics of 2006, plus a large amount of the graphics from 2007 and 2008, there are hexagons in the background, most likely to give the images a high-tech feel.
* BIONICLE), in that for the user, everything else almost stops to a halt. This way, the user can deliver blows without the target even having the chance to react.
* BIONICLE: In the first Mata Nui Online Game, you play as a Second for a Kewa (really big bird) pilot during the Le-Koro level. Your job is to shoot down enemy Nui-Rama (giant flies).
* BIONICLE. in the first year, there was the Legend of Lhii, a legendary lavasurfer, on the island of Mata Nui and nothing else from that. Come 2004, a flashback, and there's a Toa named Lhikan whom was the basis of that legend.
* BIONICLE in the illusion, it instantly fails. This is apparently true even for different species of illusion users.
* BIONICLE: In the Kingdom Alternate Dimension, Matoro fails to revive the Great Spirit Mata Nui, leaving the Matoran Universe in danger and prompt mass exodus onto the island of Mata Nui. Not all beings made it safely, but while many made it to the island, it is only a temporary refuge. The survivors settled quickly and also planned on how to leave the island for the stars.
* BIONICLE: In the Kingdom Alternate Dimension, Teridax first takes over Icarax's body and then absorbs the bodies of every Makuta that died afterwards, gaining their knowledge and mass and becoming an unrecognizable colossus.

* BIONICLE in the second, and numerous more moments about Vakama's self doubt in the third. The third movie had more such scenes planned (they're in the short novel adaptation), but the final film replaced them with action instead just to give the side characters more things to do.
* BIONICLE, in this case "An Ice Person" often doesn't mean "a nice person".
* BIONICLE is a Kopaka-fanboy, to the point that he changed his color to white to look more like his idol. When they meet, Solek's overjoyed and starts asking about his legendary adventures, which Kopaka doesn't remember due to amnesia.
* BIONICLE is a lot less taxing on already-scarce resources than equipping entire armies.
* BIONICLE is basically a walled city inside a volcano with a sea of lava protecting it.
* BIONICLE is by far the best-known, even if most people only have a vague recollection of it. A person who once collected the sets but grew out of the hobby will most likely remember the "big robot warriors and small robot priests on a tropical island", but the conversation would get one-sided if you mention the Order of Mata Nui, the Shattering, the rest of the Makuta's race, cyborg gladiators, or indeed anything after 2002 (with the sole possible exceptions of the 2003 animated movie and video game).
* BIONICLE is the Rahkshi of heat vision from the brand's last setline.
* BIONICLE, is very heavy with this. The glatorians fight in the various arenas to solve disputes instead of out and out war. But it ends up being more of an aversion, as matches are heavily regulated to avoid serious injury.
* BIONICLE, it’s no wonder why even the sole mention of his name makes everybody want to kill him.
* BIONICLE, it shook him so much that he was ready to give his own hard-earned mask to Pohatu's people, and was especially joyful when he found him alive a few seconds later.
* BIONICLE. It's implied he misses the time where he and his species were heroes. The original leader of the brotherhood, Miserix, while brutal was loyal to Mata Nui and didn't take his overthrow well, after he's rescued from prison, he really wanted to go after Teridax. It was noted that he, like all Makuta, was selfish, but he would never let his self-interest rule his destiny.
* BIONICLE. Its victims lose the ability to dream, slowly turning them violent, insane, and ultimately, dead. It almost wiped out the Iron Tribe, and the handful of survivors were shunned by all the other tribes for fear of carrying the disease.
* BIONICLE. It works, however: Takanuva is only caught when he mentions a being they know.
* BIONICLE just to qualify for this trope. Her five brother-Toa? They're pretty direct, inelegant, and can't work together well even if they're friendly. In-universe, Gali essentially invented this trope whole-cloth.
* BIONICLE: Kharzani puts Lesovikk into an illusory alternate reality in which his teammates were still alive. He wakes up after remembering what really happened to them.
* BIONICLE known as The Kingdom, where Matoro failed to save Mata Nui, and so those who escaped the ensuing collapse migrated en masse to the surface, creating a new society on the Island of Mata Nui.
* BIONICLE, Kongu's set comes with two Cordak launchers instead. His in-story reasoning is that in a war, two guns are simply more useful than fancy close-combat weapons.
* BIONICLE Kopaka so much that he's ready to hand over the Mask of Shielding he's found the cave to Pohatu's people... and Pohatu's there to take it from him, apparently having survived the cave-in thanks to the mask extending its power over him before the rubble hit.
* BIONICLE, Kopaka thinking back to a fight against a giant scorpion, and lots of exposition.
* BIONICLE. Lewa's swords are called "Air Katana", despite not resembling katana in the slightest.
* BIONICLE light up inside the eye sockets, and only then does the mask fade,

leaving us with an image of two sinister eyes glowing in the darkness, accompanied by chilly musical tunes. This doesn't count as a spoiler, though, since everyone knew Makuta would return (the movie's a prequel, duh). As for the third movie, there is a quick shot of an attacking Visorak spider that breaks the silence with a sudden buzzsaw-y screech.
* BIONICLE like the actual Muaka toy, so they explained that it was really a mutant.
* BIONICLE likewise had nothing to do with him, it was always planned. The complaints about many of the books and all of the online serials are more justified though, as most of these were written entirely by Greg.
* BIONICLE looks like it would be at home more with the first three films than the rest of the film it accompanies.
* BIONICLE, making parts of the desert Bara Magna into jungle, mountains, etc.
* BIONICLE Makuta's eyes separate from each other. The film's novelization reveals that only when "Dume" looks into the mirror for the second time, wearing the stolen mask, were we supposed to see that his reflection is Makuta's. The animation messes this scene up by showing Dume's body with Makuta's mask looking into the mirror, ruining the reveal and making the whole existence of the mirror pointless. But even if the animation followed the novel, Makuta talking to himself in the previous scene would still make no sense. Some fans theorize he was talking to another Makuta who happened to have the same voice, but that's stretching things.
* BIONICLE managed to interfere with the process and get himself teleported too, so he could create a large air bubble so that everyone could breathe.
* BIONICLE: Mask of Light shows off some of his former badass qualities.
* BIONICLE Mata Nui and the stars are powered by his internal processes.
* BIONICLE Mata Nui never paid any attention to the fact that some of the tiny beings inside him were plotting to take over his body, would often use the analogy of a normal person who goes about their daily life, focusing on the outside world rather than paying attention to what the cells in their body were doing. However, he said, if that person was to have a health scare, then they would feel more inclined to keep an eye on what was happening inside them. Greg later revealed that he himself had been diagnosed with diabetes.
* BIONICLE, Matau accidentally breaks the handlebars off the moto-sled he was riding in the Test Track, resulting in crashing.
* BIONICLE: Matoro Mahri's mask, the Kanohi Tryna, allows him to reanimate dead bodies. He generally only uses it on animals, for ethical reasons.
* BIONICLE, meaning that there are plenty of plot threads that never got wrapped up.
* BIONICLE. Minus the togas, of course, as armored cyborgs have no need for clothing. It's even lampshaded at one point, as a character walking through one of the districts notes how disturbingly clean everything is.
* BIONICLE misinterprets a comment that he could "die horribly without being missed" as a compliment.
* BIONICLE movie. After the first major arc, the legend (at least apart from its beginning lines) was revealed to be a lie crafted by the village elders to hide their people's forgotten past, until it was time to reveal it to them. Way after that, the rest turned out to have been bogus as well, when they uncovered Mata Nui's true nature.
* BIONICLE movie cut the bit when Roodaka expresses her need for the corpses of the Toa, even though it's the whole point of the rest of the scene, and the first movie's German said die.
* BIONICLE movie novelizations feature movie stills around the middle, a couple of which spoil some scenes or characters from the endings.
* BIONICLE movies feature deleted or altered scenes, and sometimes describe the characters as looking different to their movie portrayals. Takanuva's very brief death is absent from the first novel, as he simply walks out of a dust cloud to the other characters' delight, instead of having to be resurrected by them. The third novel contains awkward innuendo which was cut from the film, and the fourth novel has a much serious and dramatic tone compared to the more comedic and lighthearted

movie. The regular, non movie-based books also portrayed certain character with weapons that the prototype action figures carried but were removed from the final products, like Jaller Mahri's second sword or Nuparu Mahrii's blaster shield.
* BIONICLE movies —> Novels based on those movies —> Another non-canon video game —> Novels —> Another DTV movie —> Web serials —> Web novel.
* BIONICLE movie was scrapped along with the toy series (and the planned sixth film). The story writer shared a potential early plot synopsis online, though it's not considered canon.
* BIONICLE nearly quotes the Jaws line upon seeing the massive dragon form of the original Brotherhood of Makuta leader his team was assigned to free, before being cut off by Brutaka who replies: "A bigger boat. I know."
* BIONICLE of asking for clarification every time he hears a new name, this makes sense.
* BIONICLE of that world. Eight years of storyline passed before this was revealed.
* BIONICLE: On Bara Magna, after the colossal disaster of the Shattering, the surviving tribes were left to survive in the wasteland that was left as best as they could. Most of them managed fairly well, but members of the Sand Tribe, the Vorox and the Zesk, eventually devolved into savage primitives roaming the desert. Later, we see members of the Sand Tribe who actually faired much better - instead of being stuck in the miserable desert, they were stranded on the bountiful forest moon, and have actually become quite advanced; they're also not happy with the way the other tribes have treated their relatives.
* BIONICLE. Once all piece were retrieved, it was used to deactivate the barrier surrounding the Codrex. As a bonus, its united form was a miniature Mata Nui sculpture.
* BIONICLE only escapees, but he's still a little too quick to assume that everyone he meets is an escaped criminal. Botar, in charge of prisoner apprehension and transport, also liked his job a bit too much, trouble is he doesn't bother to look after his prisoners, or know that they might have escaped.
* BIONICLE on Mata Nui when the heroes awakened him, thereby becoming the ruler of the universe.
* BIONICLE or at best are focused on helping their own villages above anyone else's.
* BIONICLE originally ran from 2001 to 2010, then was briefly relaunched in 2015.
* BIONICLE planted evidence to support Mata Nui's ruse, and it was a member of this organization that told Karzahni everything.
* BIONICLE proved multiple times, but it's a temporary measure at best.
* BIONICLE purely mechanical, to the point where purely robotic beings like the Vahki are indistinguishable from biomechanical beings.
* BIONICLE qualify her as one. It's in stark contrast with how sour she behaved in the novel that takes place before the movie's events—however, the movie was written first. It was also the only time we saw this side of her, but it had already stained her image in the fans' minds.
* BIONICLE Rahi Nui is already about 50 feet tall in its standard form (and it also attacks). But it has the power to grow even larger. So large, in fact, that this has once caused its molecules to split, since it couldn't control its density.
* BIONICLE regularly hurls lightning around and zaps people just to prove a point. They don't seem to suffer any permanent damage, but Chiara has been shown to be more than capable of killing creatures with her powers when she wants to....
* BIONICLE) reportedly made him very upset, and though he argued against the story's direction, he was only distantly involved with the movies, so the writers' word overrode his. According to him, if he had the opportunity to get rid of one part of the storyline, Vakama's betrayal would've been it.
* BIONICLE respawn those in the Matoran Universe who have a corpse and it's in good enough condition to salvage; anyone else is Killed Off For Real. These include Matoro, "Ancient", Carapar, Icarax, Mutran, Gorast, Bitil, Chirox, Antroz, Krika, Vamprah, Nidhiki, Krekka, Sidorak, Kojol, and Teridax.
* BIONICLE revealed that the Matoran briefly harassed by the Dark Hunters was long-

time fan favorite Kongu. No one could have recognized him since he wore a different mask at the time of the film.
* BIONICLE, Roodaka orders a bunch of Visorak spiders to jump down from the top of the Coliseum to make a point. In the movie, they fall to their deaths, but in the novelization, they land on a nearby balcony.
* BIONICLE" rule at the time. In contrast to many other examples, these used the trope to great effect.
* BIONICLE's 2004 and 2005 run told the ancient tales of the abandoned city Metru Nui, with the framing story of the village elders recounting them the Toa Nuva (2004) and Turaga Vakama explaining his personal account of the events to Tahu Nuva (2005), in order for them to be ready for whatever may await them when they return there.
* BIONICLE's apparent defeat. This was actually part of the story as it had originally been envisioned — every victory was supposed to be followed by a dance, however the idea got dropped when the Story Team realized how ridiculous it was.
* BIONICLE says that even the males of her species are supposed to look exactly like her, though the only one we see is tiny and from the back.
* BIONICLE seems to be hinting at tension between the biomechanical Matoran and the mostly organic Agori. The Agori of Bota Magna, in particular, take it to the extreme and have rejected all mechanical technologies, instead using primitive weapons and plant-based armour.
* BIONICLE sets: Makuta Teridax, Icarax, and Antroz, Kalmah, warrior and elite class Skrall, Sidorak, Vultraz, and Radiak. Subverted with the benevolent Turaga Dume — his set represents the evil Teridax masquerading as him, but the real Dume has these colors too. Interestingly, the Maxilos robot that Teridax's spirit possessed for a while also had these colors...
* BIONICLE's Exo-Toa armor (in place of a hand), Hydraxon (attached to the arm) and Hewkii Mahri (attached to the arm, but he lacks a hand anyways).
* BIONICLE's first major self-made IP, which involved a lot of experimentation. However, many of the franchise's biggest twists were actually planned ahead for and thus don't count as retcons.
* BIONICLE's first saga, was a fiery, impulsive hothead, always wanting to prove himself and compete with his fellow Toa. Toa Vakama from the second saga (actually a prequel) was insecure, perpetually angsty, but more controlled and calculating, although still ruled by his emotions. Toa Jaller from the third saga deliberately invoked this trope, having learned from Tahu's and Vakama's mistakes, so he was more level-headed and confident in his approach, but willing to listen to others. Also, Tahu and Vakama both struggled to keep their team together and act as a leader, whereas Jaller was already a respected Captain and friends with his team members prior to becoming a Toa.
* BIONICLE shells, but genuine explosives. The Zamor launchers, Midak Skyblasters, Nynrah Ghost blasters and Thornax launchers are more fantasy-esque but resemble personal, hand-held firearms. Kopaka's Skyblaster is even outfitted with a bayonet, Gali's Nynrah Ghost gun has crosshairs attached, and both have laser-sights.
* BIONICLE, since the toys are like this. "You are attacked by an Air Burnak." "You are attacked by a Stone Burnak." "You are attacked by an Ice Burnak."
* BIONICLE's lairs. Sadly, neither reveal had any foreshadowing, nor have they impacted the plot in any way.
* BIONICLE, some element-based good guys also sport dark colors and a handful are almost completely black.
* BIONICLE: Some of the semi-mechanical wildlife look like giant bugs, such as the dragonfly-like Nui Rama, the beetle-like Bohrok (which are 100% mechanical aside from their Krana), and the spider-like Visorak.
* BIONICLE's original "trademarks" was mask collecting, toys knocking off each other's masks and replacing them with other collectible items. The mask collecting aspect and play features were phased out in favor of projectile gimmicks, and some buyers even complained that the masks came loose too easily (missing the fact that that was their point), but masks remained an important part of the character

designs and the lore, so their connections were redesigned to be sturdier. In fact, some masks weren't even traditional mask pieces, and could only be taken off by disassembling their figure's head. Later still, masks were temporarily replaced by helmets.
* BIONICLE sort of basis in the established canon, it has a good chance of becoming canonical itself.
* BIONICLE, so that every character could show off their mask or elemental power, because hey, when toy advertising and plot advancement go hand in hand, why not? Though subversions were nearly as common as straight examples. Video and web games abused this to no end, however they often resorted to completely changing the characters' special powers.
* BIONICLE's Toa Lesovikk, the former leader of the first-ever Toa team, wandered aimlessly through the Matoran Universe, driven by the guilt he felt for letting the rest of his team get slaughtered many millennia ago.
* BIONICLE's Toa Lhikan had two fire-swords which could unite to form a shield, and that shield, in turn, doubled as an instrument well-suited for sky surfing.
* BIONICLE storyline was marketed like this, even being referred to as such in-universe:
* BIONICLE story writer Greg Farshtey kept a good relationship with the fan community. Not only did Greg provide Word of God for any question a fan might have had, but he sometimes distributed advance information and occasionally allowed fans to influence minor details, with "Sure Why Not"? Around the time the franchise ended, Greg wanted and give the fans more of a say in where the story should go, but his newborn child kept him from this, and later LEGO adopted a rule that forbid him from talking to fans online. However, they still let him occasionally use the official LEGO message boards to answer fan questions.
* BIONICLE's various tie-in media loved doing this, as the toyline's story was planned ahead about a decade in advance.
* BIONICLE, Takua tells his pet crab Pewku to go home as he and Jaller fly off on a Gukko bird, as she wouldn't be able to fit. They reunite later on.
* BIONICLE, Takua travels through The Wastes in Ko-Wahi in search of Matoro when a blizzard occurs. Takua braves through as the blizzard increases until he falls unconscious and is rescued by Matoro.
* BIONICLE tended to contain a sequence of flashing images. Some of these were actually foreshadowing later events from the movie. The end credits also had these.
* BIONICLE, Teridax does this to Miserix by forcing him to shapeshift into a Picasso-type picture, combined with a Mind Rape that convinces Miserix that he's dead and unable to move. He gets better.
* BIONICLE, that involves merging two words together, such as "bald-land" to refer to land with no obstructions, or "tree-high", to indicate that something is as high up as the treetops.
* BIONICLE that the characters have, it would be the equivalent to a human aging less than a decade.
* BIONICLE that the heroes are basically white blood cells, their canisters are medicine capsules, Mata Nui (the giant robot) was taken down with a virus, some of the lands inside him are analogous to organs, etc. Also, co-creator Christian Faber came up with the concept during a medical treatment.
* BIONICLE. The big surprise is that his best friend Axonn, who had to stop him when he betrayed, is another, according to the Atlas.
* BIONICLE, the Bohrok swarms keep telepathically chanting "Must clean all. Everything must be cleaned."
* BIONICLE, the characters just don't do it to avoid confusing the audience about the division between power over rocks and power over dirt).
* BIONICLE: The Dark Hunter Eliminator has the role of eliminating incompetent Dark Hunters and completing their missions. Because of this, he is despised by his fellow Dark Hunters and The Shadowed One keeps away from the island of Odina, where the organization's headquarters is, to prevent attempts on Eliminator's life.
* BIONICLE, the Dreaming Plague's first symptoms included irritability, which then grew to hatred and violent behaviour, finally leading to complete insanity followed

by death. This is one way Kurahk can use its power.
* BIONICLE, the entire universe of the first 8 years of the story is contained within a 16 million feet tall sentient robot which travels between planets.
* BIONICLE. The females still retain the "pink" personality, but the majority of the female main characters are blue. And while there are no pink characters, the red ones are all male.
* BIONICLE. The final novel of the series was only available to read on-line (in English, at least... some European countries printed it into an actual book), so there's that for a novel-length serial.
* BIONICLE, the first symptom of The Dreaming Plague is that the victim loses the ability to dream, which in turn leads to irritability, which escalates into violence and ultimately madness.
* BIONICLE, the human-sized inhabitants who were built to maintain his systems are like nanobots to him. Also, in a more literal sense, the microscopic Rahi, Protodites, could be seen as nanobots. Zaktan's body is entirely composed of them after a unfortunate encounter with the Shadowed One.
* BIONICLE. The Kanohi Iden allows the user to separate their spirit from their body, which is limp and vulnerable.
* BIONICLE the leader. And then there's what he tells himself when he executes a master stroke to derail Teridax's plans once and for all.
* BIONICLE: The Legend Reborn, and can be heard chattering in some animal-like tribal language, but never say a real word.
* BIONICLE: The Legend Reborn, and Tarix punching a ridiculously overarmed and overgrown Skrall soldier. All three were cheap gags that didn't impact the story, though with their deletion, Tarix the champion fighter doesn't appear at all in the completed battle scene.
* BIONICLE. The main story's famous closing lines ironically foretold the situation:
* BIONICLE: The Makuta's "Power Scream" is effectively this, with enough power to shatter solid stone.
* BIONICLE, the Makuta were all about this, though characters belonging to other species sometimes had shadow-based powers as well. Also, if one tapped into their inner dark side or had their inner light drained, they automatically gained shadow powers.
* BIONICLE The Masks of Time, Life, and Creation (collectively known as the Legendary Masks) each regulate their titular concept within the isolated space of the Matoran Universe. If one of the Legendary Masks is destroyed, it takes its very concept with it (for example, destroying the Mask of Time will reduce the Matoran Universe to a chaotic sea of un-time).
* BIONICLE. The more unbalanced the universe is, the shorter its countdown to death.
* BIONICLE: The Nui-Rama are huge flies with claws and stings. The influence of Infected Kanohi turns them into deadly foes.
* BIONICLE the organic tentacle at the end of it. So he attached a gun to it instead.
* BIONICLE there are. The fandom, of course, speculates the hell out of every tiny detail.
* BIONICLE, thereby pushing Macku, the former "main" Ga-Matoran, into "second-tier" status.
* BIONICLE: The Red Star is a combination of metal and organic tissue. It's more like a space station than a ship, though.
* BIONICLE. There is a Kraata with the Insect Control ability. By extension, Makuta have this power as well.
* BIONICLE, there's a trader shop on the outskirts of Po-Wahi with a rock carving that says "My friend went to Po-Wahi and all I got was this lousy rock".
* BIONICLE: The Spear of Fusion, which can also be used in reverse. The results can be a bit unpredictable and can only be undone with the spear. When it was accidently used to split a skakdi in two, the result was one being with the same appearance and abilities as the original but with reduced intelligence and self

control and another being that looked completely different and was smarter than the other half but powerless and rather crazy. It has also been used to split a flying creature into two animals that each had only one wing so couldn't fly, fuse together two toa into a creature with reduced intelligence and very different powers than its components, and fuse two skakdi together to form a being that immediately turned on its teammates because it now had twice as much hatred for its team.
* BIONICLE: the Stone Rat and Kinloka Rahi are notorious for being voracious eaters and gathering in swarms.
* BIONICLE: The Toa are color-coded based on powers, as are all of the Matoran and Turaga. Red is fire, blue is water, green is air, white is (unusually) ice, brown is stone, and black is earth. Rust colors are often associated with the Makuta. Starts to dissolve in the last couple of seasons.
* BIONICLE: the Venom Flyer's Rhotuka prevents targets from flying, naturally or mechanically.
* BIONICLE the villain, making it... annoyed at the hot air? This was phased out later, and the fourth movie had tons of genuine physical combat, although the characters would take awkward, second-long pauses after every swipe, and in one shot, a villain chasing one of the heroes simply vanished when the camera panned to the side.
* BIONICLE: The Visorak horde, made up of car-sized spiders. There are also the elite Visorak, the humongous Kahgarak spiders, several stories high. Also, a variety of giant spider-like Rahi qualify as well, like the Chute Lurker, the Sea Spider, and Vezon's steed Fenrakk.
* BIONICLE; the Visorak, the Skakdi (which include the Piraka), Zyglak, and various unnamed races in the Matoran Universe. Agori, Glatorian, Skrall, Bone Hunters, Great Beings, and Elemental Lords on Spherus Magna.
* BIONICLE. The Visorak would eventually be wiped out during the Karda Nui arc when the artifact that called them together is brought onto a volatile volcanic island.
* BIONICLE. The web-serials thankfully ceased this, and then some older characters even received new toys.
* BIONICLE. They didn't have to enslave and brainwash the population of Voya Nui to help them; they didn't even have to pretend to be Toa in the first place. Basically, they just did it to screw with them and try to avoid getting their hands dirty.
* BIONICLE. They have actually used up all their powers in the books that the movie entirely glosses over, and can only use them in the final scene because that's how long it took for them to "refill".
* BIONICLE, they have the power, and so they have the responsibility to use it to help others.
* BIONICLE they put them (the animation just shows the objects retracting "into" their solid backside). The novels at least give them the benefit of carrying satchels. It's also implied in other media that this is where the Makuta kept their excess parts when shapeshifting into smaller forms.
* BIONICLE. They're imprisoned in a fish tank. Zaktan tried to offer his knowledge of the gambit in exchange for parole, leading some other heroes to Makuta — but when they get there, Makuta blows him up, and he goes missing for a while.
* BIONICLE". This has eventually led to a highly suspicious fandom that picks apart everything he says for even the slightest hint of ambiguity.
* BIONICLE. This holds true to varying degrees for most other characters as well, with a group of six in the same six colors as a bare minimum.
* BIONICLE: This is a running gag for Matau, as he flies into a pillar, the interior of a Force Sphere, and a telescreen.
* BIONICLE this trope. Played with in the larger sets as, while each large set was in of itself different from other large sets, each early large set could produce two near-identical creatures. Justified in that back then Bionicle toys were more akin to Rock'em Sock'em robots, and the kids were expected to play against eachother so the toys had to be identical to make it fair. Newer large sets averts this since they lost the Playability of the older sets in lieu of posability.

* BIONICLE, though it took her awhile to get it down right (before she could string together coherent sentences, the most she could do was take words she heard and rearrange them to get her meaning across, i.e. when she encountered Vakama while disguised as Nokama, she answered a question with "Not" rather than "No" because she hadn't yet heard anyone use the latter word in a sentence).
* BIONICLE title, it's nothing special either, but they reveal some nifty details, point out references and inform us that executive producer/story writer Bob Thompson kept making strange monster sounds with his mouth during production.
* BIONICLE to act as an idiot, and rest of time he acts stupidly because he want to be underestimated.
* BIONICLE to come up with a less destructive plan for the Hagah to follow.
* BIONICLE to end in an unintended disaster is lifting up a few rocks later on at Kini-Nui. Fortunately, later portrayals retained his original depiction and some of the traits he displayed in the film would be played straight with actual dumbasses later on, most notably Krekka and Nocturn.
* BIONICLE to their respective Toa warriors and the adventure-seeking Takua.
* BIONICLE, to the point where his friend Onepu constantly takes advantage of him.
* BIONICLE toy-line released its first sets in the Summer of 2001 and its last sets in the winter of 2010, hitting the 10 year mark on the dot.
* Bionicle toys started shifting a lot away from the rest of Lego, with tons of unique, space-filling parts that meant that they couldn't be rebuilt into many things. That took a lot of the wonder and excitement out of it.
* BIONICLE, using their pointy feet to become giant buzzsaws. There are also shore turtles, which are simple turtles, that can, for whatever reason, fly. Though it's never explained how — they don't have wings or thrusters.
* BIONICLE, Ussal crabs such as Pewku are the mount of choice for the Matoran, who even race them for fun.
* BIONICLE: Vezon's pet dragon Kardas, a transformed version of a giant mutated spider. With the ability to create concussive blasts. To quote "Who's my favorite weapon of mass destruction, then?"
* BIONICLE villagers scattered all throughout the islands that the story hasn't covered.
* BIONICLE was closing in on her, tried to be number two. She was sliced in half and died instantly.
* BIONICLE) was ever shown to canonically use wheels for their intended purpose.
* BIONICLE was first described as having empty, black eyes. Later, a book illustration gave him brightly glowing yellow eyes (and took other liberties with his colors), and his eventual figure sported red eyes. The change is somewhat justified in the figure's case, as it represented his mutated form, which didn't look anything like what his original description suggested. There's also the fact that Karzahni constantly rebuilds himself, so he may have possibly changed his eyes...
* BIONICLE was no stranger to scrapped ideas and concepts during its ten year run from 2001-2010. This even extended to video games as noted below.
* BIONICLE was only partially written before being canceled due to poor sales. Then, the writer's computer crashed, deleting it for good.
* BIONICLE was popular enough that it helped save Lego as a company, went on for ten straight years, covered almost any type of medium even outside the main toyline, including books, comics, video games and four movies, even received an (admittedly less successful) reboot in 2015...but looking at what most people seem to think about it, the mainstream only seems to remember it as "that Lego thing with the colored robots", with a lot of people not even being aware of the greater plot, or any of the sets past the first movie.
* Bionicle: Web of Shadows,. His toy, on the other hand, always had green eyes.
* BIONICLE web-serials ceased being updated long ago, for the simple reason that the writer didn't have time to continue doing them, leaving about a dozen or so different plot-lines hanging, some of them in their very early stages. And as these were the sole story-sources after the cancellation of the toys, comics, books and movies, this effectively means the entire franchise ended this way.

* Bionicle", were only introduced in 2003, the series' third year. Despite how ubiquitous they became, with almost every positive character devoutly following this trio of concepts in this specific order, nobody in the preceding two years mentioned that there were "Three Virtues" of special importance. When things like unity, duty or destiny were brought up, it was only in a general sense rather than as a core mantra. Yet they were later retroactively inserted into both the '01 and '02 stories via later books.
* BIONICLE when making the rest of the tribe) caused even more debate and controversy in the fandom, leading writer Greg Farshtey to imply that he would not address gender issues in the story again.
* BIONICLE. When Tarduk introduces himself by shouting his name at Vezon, Vezon ducks to avoid the tar.
* BIONICLE. While he was shown to be on shaky terms with his team even prior to his mutation into a half-beast, he only turned evil due to Roodaka taking advantage of his bestial impulses.
* BIONICLE. While not necessarily a "queen", she did rule over her universe with trope-fitting evilness.
* BIONICLE who is just about on the verge of winning. It's not so much "Evil Me Scares Me" so much as "Evil Me Has To Die".
* BIONICLE whose crew have almost completely lost contact with the Matoran Universe 100 000 years ago due to a malfunction. Dead inhabitants of the MU were supposed to be recreated and sent back from there, but since only the first step of that process worked, the crew (mysterious beings called Kestora) began doing horrible experiments to the reborn beings to find out why they remained stuck there.
* BIONICLE with a massive flood attack after evacuating all the traumatized Matoran.
* BIONICLE with an alternate introduction to his Rahkshi servants (it was too slow and revealed the Rahkshi's full bodies too early); a shot of the blue Rahkshi stepping on a sports ball and breaking it (the production team apparently felt it was too mean); and several other brief shots that didn't impact the plot.
* BIONICLE with a twist, as "our" dimension is explicitly called "the real universe", the rest are only pocket dimensions that shows how things would've turned out if they were done differently. Brutaka's mask was destroyed eventually, but the lunatic villain Vezon managed to get his hands on another one... and it ended up fusing to his face. Now he is a living dimensional gate, and has already visited several other universes (among them a few of those that Takanuva got lost in).
* BIONICLE, with Mata Nui's friends determined to accompany him...and the toy-line got canceled, the sequel scrapped, so the story had to be wrapped up in a comic in which Mata Nui left his friends behind due to the page-limit.
* BIONICLE, with Matau hanging on a ledge on the top of the Coliseum and Vakama, who's evil at the moment, trying to get him to fall. Thankfully by the time he does, Vakama's regained his mind and sense of duty and lunges after him with a spiderweb-bungee rope.
* BIONICLE with the most bizarre powers you can imagine. Even such mundane things as transportation were cool when the setting called for it. Nowadays, the story tends to focus less on these aspects and more on the actual plot — that is why the introduction of cybernetic dinosaurs with laser targeting-systems was so welcomed.
* Bionicle: World colored him blue and green with glowing yellow eyes, while the text described him as black and gold, with empty black voids for eyes. The author later retroactively explained that he just rebuilt himself with a different armor and made the artist's mistake canon.
* BIONICLE world, mostly let what the prophecies say or what they believe to be their destiny control their actions. However, of all the characters, only the Toa Mata heroes' destiny is public knowledge, which the villain does use to his advantage. Also, Destiny does not always cover their entire life — it only tells them that they each have to do at least one very important thing in their life, and if they survive, are more free to act as they like (unless their life

happens to be tied to someone else's Destiny).
* BIONICLE would work for whoever had the best chance of killing him at the given moment, however he was mostly out to follow his own twisted yet never quite defined plans. After he gained the power to travel between dimensions, this mostly stopped being a problem for him, although even so, he was once seen doing errands for another, highly powerful character.
* Bionic Six also have an episode were the main characters travel to a Toonverse were their normally realistic style of animation became cartoony as does the physics.
* Bionic Six, Bionic One was able to keep his identity as a cyborg superhero secret from his family until an accident required him to "use the technology," if you will, to prevent them from dying.
* Bionic Six (despite the main characters all being related), the Bennetts were given two adoptive sons who were African-American and Japanese, respectively.
* Bionic Six: Dr. Scarab's attempt to create a female companion resulted in this. Later, his female clone created opposite sex clones of his henchmen.
* Bionic Six features a birthday song to the tune of the Hallelujah chorus.
* Bionic Six Helen, and their children — biological and adopted.
* Bionic Six: The intro is a beautiful hook with damn catchy music. The animation in the show proper, however, is not quite as stellar.
* Bionic Six, the titular Six are just ordinary humans until they activate their bionics.
* Bionic Six? Well, they took to their new abilities and joined dad in kicking butt.
* Bionic Woman, but Tom decides they need to focus on the mission — leading to more distracting sexual tension than if they'd just slept together.
* Bionic Woman can see an enhanced view relayed through her bionic eye, and tell her which wire to cut based on where the power is going.
* Bionic Woman is an example of a reboot that was not well-received. It didn't help that trouble behind the scenes nor that the producers had the rights to the title Bionic Woman, the name Jaime Sommers, the term bionics, and nothing else, meaning they had no choice but to reboot the continuity and try to put a show together without Steve Austin or Oscar Goldman, further hurt any chances at success the series may have had.
* Bionic Woman, Jaime herself is horrified when she first tangles with the Fembots; she thinks they're just crazy doppelgangers until she rips one of their faces off during the fray, revealing circuitry and freaky lidless eyeballs. (Her later, delirious warning to Rudy about robots, after they've kicked her ass, is chalked up to bionic rejection. Until Oscar's face suddenly comes off.)
* Bionic Woman, Jaime's body will reject the upgrades in five years, with lethal consequences.
* Bionic Woman predecessor, Sarah Corvus, apparently became psychotic as a result of her bionic implants.
* Bionic Woman reboot in 2007 has had executive meddling or low ratings are usually blamed for the cancellation of the show. But it was the Writer's Strike that halted production. Had it not been for the strike, it's likely the show would have had a full first season at the least.
* Bionic Woman. She then wakes up with her body intact and apparently normal. She's relieved for a second... then her fiancé appears and tells her that what she saw earlier was indeed real.
* Bionic Woman, the Berkut headshrink is impressed by Jonas Bledsoe's ability to beat a lie detector while saying "I love you." Jonas puts this down to his long marriage.
* Bionix AFV that are intended to replace the SAF's ageing collection of M113s. Some of the variants developed include a bridge-layer and a mine-clearing variant.
* Bio Of A Space Tyrant to migrate wholesale to another planet is India, which has become the caretaker to what is rapidly becoming a planet-sized nature preserve.
* Bio of a Space Tyrant version of some continent or region on Earth. For instance, the United States took the northern hemisphere of Jupiter—the largest planet

in the solar system—to colonize and make into the image of the old Earthly United States.
* Biopesticides, a more target-selective alternative to insecticides, are insect-killing bacteria (e.g.
* Biophilia for the album, such as a "gameleste" (a combination of the Indonesian traditional gamelan and a celesta) and a "gravity harp" which converted the swinging of two massive pendulums in accordance with the rotation of the Earth to the sounds of a harp.
* biopic’s portrayal of him is seen wearing white underpant briefs.
* Biopic chooses to end the story at the height of the hero's success (or perhaps their comeback). They might briefly acknowledge sad events that happened afterward, up to and including death, but that's all.
* biopic gained an R rating purely for some quick shots of nudity. Other than that and some intense scenes, the film otherwise contains no real objectionable content, and sex is neither shown nor discussed.
* Biopic, Helen Kane sang "I Wanna Be Loved By You" in her own voice, though Debbie Reynolds appeared as her on screen.
* Biopic just read "THE MAN WHO SHOT OJ", no POLICE CAMERA ACTION) and it was more like a typical biography, with police footage being secondary. Fans of the shows didn't enjoy the way the presenter links were done, and biopic fans probably felt it would have been better as a standalone series.
* biopic: Karl Lagerfeld has a crush on Yves who has a pararomantic friendship with Victoire Doutreleau. Yves meets Pierre Bergé who is living with the painter Bernard Buffet. Pierre leaves Bernard for Yves but soon becomes jealous of Victoire. Pierre seduces Victoire, which infuriates Yves. Years later, Karl resurfaces in their lives with his nonsexual paramour Jacques de Bascher in tow. Jacques seduces Yves, infuriating Pierre.
* biopic, Michael's Doctor removes his glasses before telling him he doesn't have very long to live, and that even he doesn't know exactly how long he has left.
* Biopic Sellers (which takes up much of the film) makes it hard to understand why anybody liked him, much less loved him, at all.
* Bio Punk, it's never clear if there's a polite term, but the few 'good' people we run into avoid them completely. "Nonhuman" is used by several news agencies, but the moreau protagonists react with scorn to the term.
* Bio Punk: Sci-fi stories that focus on the issues and dangers of biological-based technology.
* Bio-Robots" to clean off the roof, working in shifts of 90 seconds each because any more would be too unsafe.
* B.I.OS. Fear was a first-person action-adventure game that took place on a futuristic Earth ruined by mega-corporations. When the Earth began to die, humanity began living in biodomes, but eventually history repeated and even the biodomes began to fail. The goal is to help save the biodomes.
* bioships. Ones designed for war are instead called "biowars". Some bioships are even capable of reproducing.
* Bioshock 1 actually show damage from being set on fire, their skin turning black and red. They also run around and complain about it, before throwing themselves in water. (Which you can then electrify)
* Bioshock 1, it's implied you're having a heart attack each time. Your health meter also grows shorter each time this happens.
* BioShock 1. Ryan ends up looking not unlike the "splicers" he created and sent after you.
* Bioshock 1, Ryan kills off the vegetation in Arcadia with a yellow-brown herbicide, then uses a similar-colored gas to kill Julie Langford.
* Bioshock 1. Tenenbaum wisely decides to stay out of Jack's way and never betray him, even if he decides to harvest Little Sisters, acknowledging her shady past with them and doing her best to make up to them.
* Bioshock 2: Alpha Daddies are the only enemy in the game that use headbutts. It's more than just their hard helmets - they're so insane from the loss of their pair-bonded little sisters that they can't take head trauma brain damage.

* BioShock 2 Also, no matter what alignment she does fall under, she is fiercely protective of her father, and will absolutely annihilate anyone who stands in his way.
* BioShock 2 ARG "Something In The Sea" featured a character that visited Rapture then managed to return to the United States. The man then wrote a story about his experiences and submitted it to a science fiction magazine only for the editor to completely mangle the story into unrecognizability. One of the changes was turning the Little Sisters into chipmunk-like creatures, a reference to early concept art which rendered them as such.
* BioShock 2 as other guns are more accurate but slower (the Spear Gun), better at tackling groups of splicers (the Machine Gun), or deals with Brute Splicers and Big Daddies quicker (Grenade Launcher) and rivets become harder to find later in Rapture. Overall the Rivet Gun is used primarily to help you learn your play style and pull you out of a bind if you need it.
* BioShock 2 avoids the issue as well by having the sequel take place ten years later, with a very different main character, and no definite answer to the original's ending. The multiple endings are nodded to in the second game, as you find a group of splicers arguing over what Jack did at the end of his journey; neither of them reach a conclusion that they can agree on.
* BioShock 2 Big Daddy; unlike the production models, he's nimble and has plasmid powers. It's justified in-universe by a whole host of problems with that particular series: they were too costly, their free will made them far more difficult to control, and are permanently bonded to a single Little Sister and doomed to death or violent insanity once she's gone. The newer models, while not quite as advanced, are physically stronger, more durable, and lack free will, and have no preference for any particular Little Sister, all of which better suit the one task they are built for.
* BioShock 2 brought it one step further with a box that had a keychain, a lithograph, and a figure from the licensed board game.
* BioShock 2, but the name "Delta" implies that there were three before him. Knowing what the people of Rapture were screwing around with, it couldn't have been pretty.
* BioShock 2 can wield a projectile plasmid in one hand and a drill in the other.
* BioShock 2 continues the tradition, with even less ambient light outside, and even mentions the effect that a complete lack of sunlight has on the inhabitants' mental state.
* BioShock 2, corpses filled with ADAM have wings around their shoulders (the girls do refer to those as "angels").
* BioShock 2: Eleanor Lamb much more favors her monstrous, but kind to her, adopted father over her own uncaring, emotionally detached mother and resurrects him to save her from her mother's imprisonment and becoming a tool in her mother's mad plan.
* BioShock 2 every freaking room in the entire game is covered with scribblings about Doctor Lamb and Andrew Ryan.
* Bioshock 2 features Siren Alley, the Red Light District of Rapture. Ironically, Siren Alley was originally a high-class part of Rapture, where architects and skilled laborers lived and displayed their work before the work dried up and caused the whole area to fall on hard times.
* BioShock 2. Finally, it had Brute Splicers, which are essentially the Splicer equivalent to Bouncers: they lack the drill and aren't as tough, but are faster, can jump around and throw the objects on the level at you.
* Bioshock 2. For good measure, Henry Hall's "Here Comes The Boogeyman" can be heard playing around Rapture from time to time...
* Bioshock 2). For good measure, the place is infested with Splicers by the time you show up.
* BioShock 2, gets control to a region and runs it into the ground, going through extreme measures to cover it up.
* BioShock 2 has all his guns bolted to a plate on the back of his right hand.
* BioShock 2 has a stable of Big Sisters, all of them psychotic, suped-up DAGs

* BioShock 2 has a tonic that amplifies headshot damage with all weapons.
* BioShock 2 has this realization about Subject Delta, the Big Daddy that you play as, should you choose to spare her.
* BioShock 2 have a massive hypodermic needle which they use to impale enemies.
* BioShock 2. He is actually addressed as simply "Delta" on at least one occasion. Not a common proper name, but it's female.
* BioShock 2. However the psychological bond between the Alpha Series and their Little Sisters was so intense that separating them would send the Alpha into either a coma or a state of psychosis.
* Bioshock 2, if you have a Little Sister with you and you use a hypnotize plasmid on a splicer, she will sometimes giggle and ask "Can we keep it?"
* BioShock 2 in the second game, different from the Big Daddies encountered in the first game) is too far away from his Little Sister, he either dies or lapses into a coma.
* BioShock 2 introduces Sinclair Solutions, which actually manufactured many of products that Ryan and Fontaine sold. Sinclair also had hundreds of unrelated establishments such as hotels, booze shops, and prisons.
* BioShock 2 is either a neat exploration of the world of Rapture and its lore, or an an unnecessary slapdash redo of the first game with shoehorned multiplayer.
* BioShock 2. Living in an underwater city will probably do that to one's complexion.
* BioShock 2 mockingly shrieks the the company advertising jingle when you try to break into the building, at once preventing you from using the recorded password and shamelessly showboating.
* BioShock 2 Persephone appears as a drape-filled museum-like place and the deformed splicers become extravagantly-dressed men and women wearing masks.
* BioShock 2 power set, allowing the user's consciousness to move and effect the world independently of its body. A cut audio diary from the game reveals that a man named Tommy Hanrahan was using it to spy on the ladies' dressing room at the Adonis Resort.
* BioShock 2. See that Leadhead Splicer halfway across the room? * SCREEECH SMASH* Now he's dead.
* Bioshock 2 shows that Sofia Lamb was prepared for the possibility that Andrew Ryan would have declared her enough of a political and ideological threat to have her arrested for dissent, deeming it a necessary risk in the pursuit of a compassionate, unified Rapture. Once she was jailed, the warden, a "miserable" man became a member of her group; she later tells Simon Wales that he basically asked questions about himself during her interrogation, as if he wanted her to psychoanalyze and console his apparent pain. She spent her time strengthening her movement from the inside and biding time for a jailbreak that would not only release her, but all of the other prisoners as well, several of whom were on her side, whose overwhelming numbers would then overpower the guards and ensure that the prison was effectively hers. That time came when her anxiety about the wellbeing of her daughter Eleanor reached a point where it was unbearable, since she had little way of making sure that whoever was taking care of her wasn't plying her with authoritarian propaganda.
* BioShock 2's multiplayer, curiously enough, changes this to red, white, and blue to indicate if a turret is hostile, inactive (the default state until someone hacks it), or on your side. Vending machines gain a light as well to hint as to whether they've been booby-trapped.
* BioShock 2 style of iterative sequel: the enemy types are the same, but the models, animations, stats, and A.I. coding are all entirely new. The weapons and plasmids are also similar to those in the original game, but are entirely new versions that behave somewhat differently instead of re-using the old assets.
* BioShock 2, the Alpha Series was the first line of Big Daddies who, due to their bond with an individual Little Sister, would go either comatose or violently insane if their Little Sister was killed or saved by Tenenbaum.
* BioShock 2 the ARG 'There's Something in the Sea' was released. It detailed the investigation done by a man called Mark Meltzer of the various disappearances of

notable figures around the world, and eventually his daughter. His eventual fate was revealed when the game was released.
* BioShock 2 the Vita-Chambers kick off the whole plot, as they've been re-purposed to recognise Delta, which allowed him to return from death ten years after the fact. Thus, Lamb uses a scheme to stop Delta's heart and wait for him to die naturally, because killing him violently would just resurrect him at the nearest chamber and start the whole thing over again.
* BioShock 2, this a valid strategy to kill other players. After hacking a vending machine to freely use it, it will drop a bomb if someone not from your team or anyone besides you (in case you are not playing a team-based game mode) tries to use it.
* Bioshock 2 to make this possible, in addition to slaying Poole and Alexander.
* BioShock 2, turned to drink after an ill-advised contract to make robotic Little Sisters left him with nothing but a huge R&D bill and a massive amount of unsold inventory. He is clearly wasted in the audio diary you find in his office, along with what appears to be his corpse, implying he drank himself to death.
* Bioshock 2. Turning the Thinker off would spell doom for the entire city.
* Bioshock 2, which uses the same setting and same gameplay elements as the previous game. The only noticeable changes are the hacking minigame and the use of a Big Daddy as the protagonist (which does give a different feel to the mechanics, as well as add some intriguing narrative elements as the game progresses).
* BioShock 2 you can get the Handyman Gene Tonic, which lets you spend EVE to repair friendly bots and turrets. In true mechanic fashion, it also gives names to the bots you've hacked to fight alongside you. It kind of gives you an incentive to keep those bots active given that it's you versus a city full of Splicers.
* BioShock 2", you have to press the green (or blue for bonuses) portions in real time to hack machines. Delta and Sigma can also use darts that automatically hack the machine in a pinch i.e. surrounded by Splicers as your Little Sister is harvesting.
* BioShock According to Dr. Yi Suchong's "Mind Control Antidote" audio diary, they did use some Plasmids in order for the agent to susceptible to the code phrase, as shown in the "Mind Control Test" audio diary.
* BioShock after you. Or you can hack the camera to make it target enemies instead.
* BioShock (a Holocaust survivor). However, considering the setting, most if not all of them are atheist or at least non-religious, much like Levine himself.
* BioShock allows Jack to regain health, and drinking a lot makes your vision blurry. So if you're low on health and find a lot of wine....
* BioShock allows players to invoke this trope on enemies with a variety of plasmids, such as the Enrage plasmid, which makes enemies fight each other blindly, or the Hypnotize Big Daddy plasmid, which can be used to make two Big Daddies fight one another. It's one of the safest ways to kill the bastards.
* BioShock also opens with a large bust of Andrew Ryan above the Bathysphere that takes you to Rapture.
* BioShock and brought Rapture that was once a prosperous society to collapse.
* BioShock and its sequel, the Challenge Rooms became available for the Xbox 360 version as well specifically through this compilation. The only difference the PlayStation 3 that the version's of the DLC has over the Xbox 360 is that it has extra Trophies.
* BioShock, and the scheming mobster Frank Fontaine, who's just trying to claw his way to the top in the name of money and power.
* BioShock as he started implementing more extreme measures to stay in control of Rapture, eventually turning Rapture into an elitist dictatorship, the kind of thing he despised.
* BioShock Atlantis. Not that it really worked out, other than the art-deco thing.
* BioShock, Atlas tells the player to grab a crowbar or something to defend himself; Johnny wasn't so lucky against the most common threat in Rapture.
* Bioshock. A twist: this was effectively a suicide by proxy, since he compelled the player character to do it using a brainwash-conditioned trigger phrase.
* BioShock, but you never even get to the point where you can discover the true

reasons behind your actions. Of course, if this happens, the plot stalls. There is only an interesting game in the first place because the plot proceeded the way it was meant to—you are playing it only because it happened that way.
* BioShock. By the time the player arrives, Rapture is populated almost exclusively with ADAM-crazy slicers.
* BioShock can apparently take cold damage, but mostly they are just frozen with no side effects.
* BioShock city/base named Rapture, where Applied Phlebotinum is developed, refined, and horribly goes wrong — the player's stated goal is to get out alive.
* BioShock collection for Xbox 360. Owners of the PC version can also access the original version of the first two games and those whom previously had the original releases in their library were given the remastered versions free of charge.
* BioShock combat becomes the most deadly, as even the game's strongest enemies, the diving-suited Big Daddies, can no longer hold up against the player's trusty Wrench. The sequel tried to balance things out by removing the Plasmid-imitating weapon, making the powers both more accessible and more interesting and generally nerfing the quadratic effectiveness of melee combat. It doesn't help that a fully-upgraded Grenade Launcher, one of the last weapons the player acquires, is capable of clearing an entire room in a single shot.
* BioShock (depending on which you took and if you abused them). Then a civil war breaks out and Ryan had them laced with mind control agents, tipping the balance firmly toward "Psycho". This terminally dependent society OD'd.
* BioShock director Ken Levine lends his voice to the Circus of Values and Dollar Bill vending machines. Other staff members have small voice roles too - another vending machine, El Ammo Bandito, is done by artist Mauricio Tejerina.
* BioShock, especially in its state of decay. Going one better than constant rain, it is underwater. Even better, its leaking in a lot of places.
* BioShock fame probably counts, even if it thankfully hasn't flooded yet. In the sequel, as you're a Big Daddy in a self-contained suit, you can go outside and see what it's like from without.
* Bioshock features Dr. Steinman's demented messages to himself ("Above all do no harm". "ADAM denies us any excuse for not being beautiful") jostling for space with messages from his victims ("STAY AWAY", "STEINMAN KILLS"). All of these seem to be written in blood.
* BioShock game, as using it in the right situations could have skipped major plots in the game
* BioShock games, as money plus power and influence seems to do more of the talking in his life even after he set up the societal rules of Rapture and ended up breaking them when Fontaine and Atlas proved to be formidable enemies. The trope is institutionalized by the city's Bot Shutdown stations. Caught by a camera or set off an alarm? For a couple of bucks, those hostile security robots will fall out of the sky and leave you be.
* BioShock gets criticised a lot for the Vita-Chambers. Whenever you die, you respawn nearby without penalty, so even a tough enemy like a Big Daddy can be worn down over several "lives", removing almost all challenge and a lot of scariness from the game. A patch added the option to disable the chambers, making it much harder. (Granted, you could have always chosen to simply reload the game and wipe your progress instead of letting the Vita-Chambers revive you. Same end result.)
* BioShock had a few of these. Examine a certain item placed in the corner of a room, and when you turn around — surprise! There's a splicer right behind you that wasn't there a second ago! "Hello, beautiful!"
* BioShock has a smuggler caught and tortured by the Rapture police say, "...Whatever Ryan thinks he can do to me, Fontaine can do double!". Considering you find said diary on his bound, electrified corpse, that's pretty damn impressive.
* Bioshock has no official government and originally had no laws; Rapture Security can thus be presumed to have started out as the equivalent of mall rent-a-cops. Even after Andrew Ryan starts ruling over the city with an iron fist, his order to kill a "subversive" citizen is portrayed like a hit job.

* BioShock has 'Plastered Splicers' in Fort Frolic that appear as statues until awoken by a certain event. At which point they all attack the player in complete silence.
* BioShock has quotations by its own characters during loading screens.
* BioShock has several of these signs throughout the game. At least one has fallen off the wall entirely.
* BioShock has the class of Big Daddy known as "Rosie" (after Rosie the Riveter, because he carries a rivet gun). They are still very much male.
* BioShock have a habit of singing to themselves, each model having a different song:
* BioShock He applies for a job at a daycare center, happily plays with the children, and is clearly upset to see them go when their parents come. It's rather adorable, up to a point.
* BioShock He does make sounds of pain, and pants after the plane crash.
* BioShock. He even builds an underwater utopia so that the weak do not keep the strong down. Someone still has to scrub the toilets in Rapture; even if Ryan brought down only the best and the brightest people that fit in with his ideology, people who were once captains of industry back on land were no better than average there and were disgruntled when they had to work menial jobs that someone's gotta do. On the other hand, Ryan had a fairly broad definition of "strong." For example, he met one of his best friends, Bill McDonough, when the man was installing the plumbing in Ryan's apartment. Ryan had only paid for tin pipes, but McDonough was using brass ones and paying the difference out of his own pocket, as he took a great sense of pride in making sure none of his work ever leaked. The next day, Ryan hired him as his general contractor and made sure to bring him down to Rapture when the city was built.
* BioShock. However, its side effect causes him to constantly, involuntarily switch plasmids until he finds and ingests another dose.
* Bioshock; however, the greed of both Fontaine and Ryan, coupled with the measures they were prepared to take to create a monolopy (The Little Sisters and the Big Daddies, both of which were horribly altered and mutilated for the sake of gathering ADAM) turns this into a straight example.
* BioShock impossible. One of the worst offenders is a tonic that alters the way your research camera behaves.
* Bioshock Infinite: After killing Jeremiah Fink, Daisy Fitzroy deliberately smears his blood across her face.
* BioShock Infinite, and, upon learning that Booker is alive suddenly, immediately believes that Booker is either an imposter or a ghost, and tries to have him killed anyway, turning the group who had been following him against him.
* BioShock Infinite begins at a creepy (and bloody) lighthouse on the coast of Maine. Its location also implies that the floating city of Columbia (itself one of the creepiest places one will ever visit) is high in the sky above the state, though it isn't considered part of the state.
* BioShock Infinite, Booker can gamble on slot machines early in the game, much to Elizabeth's annoyance.
* Bioshock Infinite: Booker DeWitt was in the 7th Cavalry and became a private investigator afterwards.
* BioShock Infinite (Booker's VA) to berate her in the recording booth until she cried, so that a particularly emotional piece of dialogue between Elizabeth and Booker would sound just right.
* BioShock Infinite Booker tells her that the horror does quickly fade away, you never come to terms with who you are as a person because of what you've done.
* Bioshock Infinite, built on a presumption that those that were already interested in its setting, story, and themes were most likely already going to buy the game anyway, and didn't need an artsier cover to convince them, and 3) it was also meant to appeal to the game's publisher during mid-development, as playing with the intent of broad appeal allowed them to be more forgiving regarding delays and additional budget matters.
* Bioshock Infinite but also allows mooks to fight each other until the effect

wears off.
* BioShock Infinite, but if one goes through the work of using it to decode the letter, they'll end up finding it reads "I AM A CODE: I SHOULD PROBABLY BE CHANGED OVER FOR SOMETHING MUCH MORE OFFICIAL IN THE FUTURE, BUT I'LL DO AS A STAND-IN FOR NOW I SUPPOSE." Whoops.
* BioShock Infinite, but the game's voxophones show that they acted more or less the same when mortal.
* Bioshock Infinite. By the time the storyline begins he seems to be spending more time drinking and gambling than actually investigating crimes.
* Bioshock Infinite carefully, some of their screams are pleas to kill them and warnings to get away. Near one of them you can find a recording from his wife telling him she still loves him.
* BioShock Infinite causes their heads to burst into flames before their bodies burn up.
* BioShock Infinite, Columbia is run by a theocracy with its state religion's prophet Zachary Comstock as the head of state. In an alternate timeline that Booker DeWitt travels through, Elizabeth takes over as the head of state, tortured into playing the role of the prophesied "Lamb" and eventually leading Columbia into an aerial assault of New York City circa 1984.
* Bioshock Infinite: Comstock thinks he's a greater prophet than Jesus, having plastered his floating city with images of himself for others to worship, and intends to make his daughter the empress of the world... ignoring how all his supernatural power comes from his R&D team, who he murdered to keep his secrets. He encourages racism to keep himself in power and has violently abused anyone who criticized him.
* BioShock Infinite depicted that traveling through tears could result in the traveler being merged with versions of themself from the past, future, or alternate timelines, resulting in various facial deformities.
* BioShock Infinite discuss whether or not there's any point in asking Booker to help row the boat... whilst being within earshot, so that it would be easier to just ask him to help row the boat.
* BioShock Infinite doesn't count falling off of its floating city setting as a death; you're simply instantly teleported to someplace close to where you fell with a tiny decrease in health.
* Bioshock Infinite, each weapon has its own headshot damage multiplier. Whether or not it's an instant kill depends on the power of the weapon and the health value of the enemy being shot.
* BioShock Infinite, ending with the screen going black on the final note.
* BioShock Infinite first. The Devil's Kiss aftereffect can also be applied to your melee attacks through an equippable piece of gear.
* BioShock Infinite. First time you encounter a sniper, Elizabeth finds a sniper rifle and tosses it to you (though you don't need to take it).
* BioShock Infinite fits this trope, no matter what action is taken by the characters, the outcome still remains the same.
* BioShock Infinite games whatsoever for most of the game, until at the very end it's revealed to be a prequel/sequel/taking place on an alternate timeline when the player character is teleported to Rapture, the setting of the first two games.
* BioShock Infinite group that wear blue robes and hoods and revere John Wilkes Booth as a hero and patron saint, referring to Abraham Lincoln as a traitor for freeing the Blacks.
* BioShock Infinite has a gun in one hand, and the Skyhook in the other (the same hand used for the powers, mostly projectiles - except one which is explicitly pushing Booker towards the enemy for Skyhook skewering).
* BioShock Infinite has an enormous golden statue of Jeremiah Fink that's even bigger than some of Comstock's statues.
* BioShock Infinite has, as a slight variation, an achievement for completing 1999 Mode (an insanely difficult variation of gameplay) while purchasing nothing from any vending machines - everything must be scavenged from the surrounding environment.

* BioShock Infinite has Automatons, Mosquitoes, and Motorized Patriots.
* Bioshock Infinite has it even worse with Columbia. In that case, they built a flying city so they could become All-American Nazis.
* BioShock Infinite' has one of the worst examples: he needs an heir and goes all Henry VIII to get her, and what does he do? Locks her up for nineteen years, no first meeting ever. Granted, she has extradimensional radiation, but he already has cancer and she's immune. Booker has a LOT to say to Comstock about this.
* BioShock Infinite has the "Return to Sender" Vigor, which lets Booker create a magnetic force field in front of him. By holding it, he can collect bullets and send them back at the enemy.
* BioShock Infinite have the splicers, who wear papier-mâché masks, masks made out of mannequin faces, or the masks used at the New Year's Masquerade, again to hide their growing deformities from ADAM abuse.
* BioShock Infinite. Having a floating city appear in the skies over your country in an era when horses were still the preferred method of transporation and electricity was only just appearing in the most modern cities carried a lot of implied threat with it. The city is also a flying superweapon, as it took part in the boxer rebellion, and ended it before disappearing in the skies.
* BioShock Infinite. He reaches back but misses, and both Elizabeth and the Songbird disappear through the hole in the tower.
* Bioshock Infinite he says "I don't know, but I'll think of something on the way."
* BioShock Infinite. His wife died almost twenty years earlier and there's no indication he's ever remarried. Not the mention he received a double blow with also losing his daughter.
* Bioshock Infinite. If Booker has the Health For Salts gear equipped, when he runs out of Salts he will use Health to cast Vigors instead.
* Bioshock Infinite in all-but name and color scheme (they favor blue robes rather than white). But the Vox aren't so squeeky clean either as they eagerly kill people just for having an upper class or "intellectual" background.
* BioShock Infinite, in favour of more visible external mutations of Booker's hands, but it still appears as part of the Charge Vigor's manifestation. It can be seen with Shock Jockey too, but only at certain angles.
* Bioshock Infinite in previews, but both their facial and head hair were removed in the final release. Many citizens and soldiers of Columbia still sport some pretty epic lip shrubbery, though; particularly Cornelius Slate.
* BioShock Infinite intelligent, and extremely book-smart, growing up in a tower with nothing to do but read, practice whatever skills struck her fancy, and repeatedly attempt and fail to break out. However, being isolated in that tower with no other contact also means she is very inexperienced at actually interacting with people.
* BioShock Infinite. In the basement beneath the Good Time Club there are three wanted posters on a wall: Labor Agitator ($1,000 reward, Dead or Alive), Vox Anarchist ($5,000 reward, Dead or Alive), and Daisy Fitzroy (Leader of the Vox Populi, $30,000).
* Bioshock Infinite in the DLC that made Fitzroy a sympathetic character.
* BioShock Infinite; in the final universe nobody sent them on that particular mission in the first place or has any idea what they're talking about when they claim to have a deal.
* Bioshock Infinite In the particular scene, the soldiers who were initially about to shoot Booker DeWitt are asked to stand down by Comstock. Then they start praying to him and the Founding Fathers. Daisy Fitzroy makes a similar scene later in the game, while having hijacked the First Lady Zeppelin to rally the Vox Populi deeper into Finkton.
* BioShock Infinite introduces the Hand Cannon, which has the 2nd best accuracy and damage of all bullet fed weapons (the sniper rifle being the only thing above it).
* Bioshock Infinite is a fantastic steampunk recreation of America in the Presidency of William McKinley.
* Bioshock Infinite is quite possibly the only example of this treatment being given to the Boxer Rebellion. Prophet Comstock had the floating city fly to China

and defeated the Boxers, something which is heavily promoted in propaganda throughout the city. What actually happened in the story's universe isn't too far off; it was actually Captain Slate who led the charge against the Boxers, and Comstock is covering it up due to personal feuds.
* BioShock Infinite is that one of the toilets that looks like it has crap in it are actually two potatoes that you can eat!
* BioShock Infinite itself has the Possession vigor, which turns enemies and devices to your side. A kinetoscope advertising it shows a customer amassing a harem of ladies to visit a beach with him.
* Bioshock Infinite it's the team of gentle Elizabeth and Booker as the brooder (who keeps it mostly to himself).
* Bioshock Infinite lampooned this: if you attempt to follow or hang around the Luteces after one of their scripted speeches ends, they'll explicitly say that yes, they are going to stay still until you stop looking at them and then disappear...
* Bioshock Infinite—she even apologizes, saying, "This is all they had". Of course her new look ends being the one featured in the poster and the vast majority of cosplays.
* BioShock Infinite, meanwhile, has the fights between the Vox and the Columbia police, which become this once the Vox turns on you.
* BioShock Infinite, off of surfaces in an attempt to ease their torment.
* BioShock Infinite of them saying "Missed. Missed Again. Four out of five? And a miss. We can do this all day."
* Bioshock Infinite On a meta level, the plasmids and weapons at your disposal, as well as environments that support multiple approaches, mean that the number of ways a given playable encounter can pan out are effectively infinite, just as the title suggests. But the major beats of the story, especially the ending, will always happen exactly the same way no matter what.
* BioShock Infinite, one of the paintings in a bar that Booker DeWitt goes into to escape Saltonstall's barrage of cannon fire inexplicably changes. In the final release of the game, one of the statues in Columbia changes appearance right in broad daylight.
* BioShock Infinite. One of the toilets in the Salty Oyster restaurant has flies all around it and two brown lumps in it, setting up this trope... but the lumps turn out to be potatoes. Which you can eat.
* BioShock Infinite on what sorts of undergarments Rosalind Lutece would actually wear.
* BioShock Infinite outfit, which includes a tight white shirt, a tight skirt, fishnet stockings, and heels.
* BioShock Infinite roots, tossing away the ammo scavenging, enemy research, hacking, and different ammo types for a lot more combat. Depending on who you ask, it's either the best game in the series, or worst.
* Bioshock Infinite's first concept art and videos full of racist and xenophobic art felt extremely offended about it, and even sent death threats to the creators' studio. However, the game is explicitly stated to be set in Columbia, a fictional city floating in the skies, under the command of religious, militaristic racist and xenophobic leaders, and the primary enemies, so all the racist and disturbing concept art was about them.
* BioShock Infinite shows off his skill with a guitar and Courtnee Draper gives some beautiful vocals. The director purportedly had to ask them to "tone down" their skills to match their characters' amateur status, rather than sounding like a duet between "Eric Clapton and Sheryl Crow".
* BioShock Infinite so this stops coming into play, though you still have to fight enemies from both sides.
* BioShock Infinite's secondary antagonist Daisy Fitzroy, who at one point soaks her hand in the blood of her callous white robber baron enemies and presses it on her face as a kind of warpaint.
* BioShock Infinite starts off as this, but then gets noticeably darker as the game progresses.
* BioShock Infinite, stopped believing in order and revolutions after the Massacre

at Wounded Knee. That doesn't stop the Vox Populi from declaring him a revolutionary hero... or attempting to kill him to keep his 'false' martyrdom intact.
* BioShock Infinite takes place in an alternate history 1912, in the flying city of Columbia. Much of the setting is based on American culture and attitudes at the time.
* BioShock Infinite takes place on Columbia, a floating city built in 1900. There are zeppelins. You have to take one out in a boss battle. It is awesome.
* BioShock Infinite that childhood nightmares about a cracked porcelain doll belonging to his mother served as the inspiration for the Motorized Patriot enemies.
* Bioshock Infinite the escorted character Elizabeth can assist player character Booker throughout the game by tossing him money, ammo and other pickups she seemingly manages to find in the area. It seems odd because, besides having researched lockpicking, she's a shut in who shouldn't have any actual experience doing so. Eventually it's downplayed but justified, as she's pulling supplies from parallel realities.
* Bioshock Infinite, the floating city of Columbia powered by HARD, if somewhat questionable, science, and with a delightful early 1900 style, it is truly a marvelous, magnificent flying city.
* BioShock Infinite: The game takes place in Columbia, a flying city made out of numerous platforms held aloft by a fleet of giant blimps, balloons, reactors, propellers, and "quantum levitation". It's fully mobile and capable of intercontinental travel, and after its launch was sent off across the world as a display of American power and skill. Relations between the country and the city turned sour when Columbia revealed that it was heavily armed and capable of serving as a roving weapon of mass destruction when it brutally put down the Boxer Rebellion, which led Columbia to secede from the US and vanish into the clouds.
* BioShock Infinite, the Handyman is a human grafted into a crude cyborg body, including a glass case on the front containing his still-beating heart. Three guesses as to where its weak point is...
* Bioshock Infinite. The kinetographs (hand-cranked animated newsreels) typically explain the city's history in a positive light (which it shouldn't) and the Museum glorifies Comstock's participation in two wars (which were unjustified slaughters). The Duke and Dimwit theme park indoctrinates children into military service.
* BioShock Infinite, the only legal religion in Columbia is that of the Founders with Zachary Comstock as its prophet, which means that worshipers of other religions (such as Buddhism, which was practiced by Chen Li and his wife in one timeline) must do so in secret. Booker DeWitt comments that Comstock isn't crazy about the idea of people worshiping idols that aren't him.
* BioShock Infinite throws books at Booker DeWitt when she finds he has entered her quarters inside the Statue Of Columbia on Monument Island.
* BioShock Infinite two important recurring characters, and neither Booker nor the player (usually) realised who they were till the end.
* BioShock Infinite used 'Shock Jockey'. Also, the other two enemies who use Vigors, known as Firemen and Crows have seriously upgraded/modified versions of the Vigor; Firemen can release a blast of flames around themselves which is a kamikaze attack when they're low on health, and Crows, unlike Booker, can turn into ravens but only use them to attack in a cutscene, relying on a sword all other times.
* BioShock Infinite version of American Values and is often referred to as "The Prophet" in Columbia.
* BioShock Infinite website, the mechanical horses called Automated Stallions were meant to replace horses on Columbia that were more likely fall off the floating city when startled by weather conditions and enemy attacks.
* BioShock Infinite were originally injured or terminally ill Columbian citizens who were grafted into huge, primitive cyborg bodies in an attempt to save their lives. However, their new bodies render them in constant, agonizing pain and keep them from sleeping, and most of their "taunts" in battle are either loud laments about their situation or begging Booker to simply leave them alone.

* BioShock Infinite: while he's still completely first-person and his face is never seen in cutscenes (though the game's cover shows it), he does have a few lines of dialogue here and there.
* BioShock Infinite who can appear and disappear at will and sometimes to use shadows caused by flickering lights to cover it.
* BioShock Infinite with a gun" pose, with Elizabeth being relegated to the back cover despite being just as important to the narrative. The Complete Edition fixes this and features both of them on the front cover.
* BioShock Infinite with the Peeping Tom plasmid, which allows the user to see through walls and even turn invisible. It's found at an adult bookstore/novelty shop, with the following audio diary.
* Bioshock Infinite would want to remove sexism from Columbian society since he was grooming Elizabeth to replace him as Columbia's leader.
* Bioshock Infinite, you'll find a bag of popcorn in one of the viewing rooms in the tower on Monument Island which show films of Elizabeth on what she does in the rooms she is imprisoned in.
* BioShock Infinite Zachary Hale Comstock after his baptism, he proceeds to go through with his plan to kill Comstock as he was born by having Elizabeth and her alternate versions drown him. While the ending is slightly ambiguous, it is suggested that this kills all the versions of Booker that become Comstock, while the Bookers who didn't undergo baptism remain.
* BioShock in one of his audio diaries where he admits that Rapture has gone straight down the tubes and it's pretty much his fault, only to go right back to his old ways.
* BioShock introduced actual spinning records on its phonographs. There's at least one point where the music will cut instead of fading: in Sander Cohen's apartment in Mercury Suites, there's a pair of dancers waltzing to a tune on a record player. Cohen warns you not to interrupt their music. Their player is balanced on a box of ammo - if you take the ammo, the player will fall over, cuing a needle scratch... at which point the music cuts off and the dancers go berserk.
* BioShock is automatically tuned to Atlas's radio frequency the second you pick it up, and other people (Like Sander Cohen or Andrew Ryan) can easily tune in, jam your connection and talk to you.
* BioShock, is built on this. First, the Adam (a valuable genetic commodity/drug) is made in the bodies of modified little girls grafted to an outright miraculous sea slug. These self-same little girls are set loose to gather Adam from the bodies of dead splicers. Not to mention that the monstrous Big Daddies that protect them are extremely bio-modded humans in armored diving suits. It's implied within the game that the Big Daddies are created out of out-of-work and down-on-their-luck people. There are signs about an orphanage and a halfway house right near where the Little Sisters and Big Daddies are created.
* BioShock is lauded as one of the best pieces of DLC ever made by those who actually played it, although a late PC release doomed it to relative obscurity.
* BioShock is littered with TVs that show nothing but a flickering test card reading "PLEASE STAND BY", emphasizing the theme of Rapture being essentially abandoned.
* BioShock is not a horror game. It's a narrative-driven game with fairly standard baddies, albeit much more thought-provoking than most. That did not stop the developers from randomly throwing in scripted events where enemies suddenly appear right behind you or things that shouldn't be alive suddenly become so. The general lack of this elsewhere in the game and total subversion of logic is exactly what makes it so effective.
* BioShock). It's also notable that cigarettes are one of the biggest products for smugglers.
* BioShock, Jack takes on the guise of a Big Daddy, complete with voicebox modification and pheromones, to gain the help of the Little Sisters in accessing doors only they can open. It also fools the security cameras and turrets, although they still attack the Little Sisters.
* BioShock lets players have fun with this: basically kill a splicer or big daddy,

use telekinesis to lift body and you have an instant human shield, and when you're close enough, just toss that body at the attacker to hurt or kill them.
* BioShock makes strong use of this trope. Splicers wear bloodied bunny masks. The mad artist Sander Cohen is fixated with rabbits, using rabbit masks in his tableaux and rabbits in his... poetry.
* Bioshock Managed not to jump up and yelp like a little girl? No? You're not alone.
* BioShock — as soon as you try to use it. If you pay close attention, you can actually hear the saboteur mumbling about it as you approach from around the corner.
* BioShock. Naturally, it quickly becomes a very highly sought-after resource in Rapture, and despite the obvious dependency issues and the tendency of users to become hideous mutants with hooks for hands (an acceptable cost), the struggle for control of it quickly tore the city to pieces.
* BioShock: nearly every wall covered in posters for in-game shows or products and audio diaries from people going about their normal, non-plot-related lives.
* BioShock normal damage when aiming for the head, enabling you to kill even the toughest splicers with a single bolt.
* BioShock often wear Venetian masks. Possibly justified, as it's stated in Audio-Logs that everything really went to hell in Rapture on New Year's Day. It also helps cover up their ugly deformities from excessive plasmid use and abuse.
* BioShock. Oh, and a mention of a location called Athena's Glory, named after Minerva's own Greek counterpart.
* BioShock, one of the audio diaries found in Arcadia tells of a family whose daughter is astonished and frightened by the trees present in the zone. In this case, her daughter having such a reaction prompts the mother to worry about the advisability of journeying to the underwater city.
* BioShock. One's a giant of a man in a bulky armored diving suit while the other is a girl less than ten years old in a child's dress.
* BioShock. Originally a Brooklyn hoodlum, he made his way to Rapture and cornered the market on fish, which led to his discovery (and later monopolization) of plasmids, which effectively made him the "guv'nor." Fontaine is like Teflon; he even opened a "House for the Poor" to engender loyalty from the less fortunate.
* BioShock, people taking ADAM will go insane if they do it too often... and if they stop after that, there's a good chance it'll kill them. And worse still, Rapture's various businesses used it for almost everything, from sport to cosmetic surgery- up until people started going crazy and attacking other citizens for their ADAM.
* BioShock) played with this by giving you a plasmid that turns your hand into a flamethrower.
* BioShock possible to kill her sooner on Easy if you've stocked up on anti-personnel machine gun rounds.
* BioShock, possibly because the hacking minigame in the first game involves flowing water, leading to some people to think they're powered by steam.
* BioShock: Right Place, Right Time, Wrong Guy: Mark goes through this after he's forced to take ADAM and use plasmids in order to survive, but has to fight the temptation to keep using more so as not to turn insane like the other residents of Rapture.
* BioShock. Ryan was aware of the dangers of abusing ADAM, but downplayed them to keep it completely unregulated.
* BioShock same voice. He also appears (still uncredited) in the original game as Martin Finnegan, one of Sander Cohen's pupils. Concept artist Mauricio Tejerina voices the El Ammo Bandito machine.
* BioShock. Sander Cohen ties a former student of his to a piano, which is rigged to explode unless the performer successfully plays a specific song composed by Cohen. Unfortunately, "Cohen's Masterpiece" is a song specifically designed to be nigh-impossible for a pianist to complete, and missing too many notes causes the bomb to go off. It goes off.
* BioShock's Big Daddies are perhaps literal examples of this trope, as they are

made by grafting human organs into a diving suit.
* Bioshock's Dr. Suchong shows some of these habits: he doesn't use 'be' verbs, tense differentiation, or plurality, he refers to himself in the third person, etc. One example: "You can no reuse protector suit. Take a man, graft skin and organs straight into suit, otherwise suit not work. Ryan say Big Daddy too expensive. Ryan can go suck egg."
* BioShock seem to be set to simulate evening lighting at the time the player arrives—which is, initially, at night. It doesn't help that many of the lights are just plain not working due to the state of severe disrepair the city is in.
* BioShock series seems to have a gruesome, mutated face, sometimes hidden by a New Year's party mask, their mutation either thanks to their rigorous splicing or Dr. Steinman's attempts to fix the effects of said splicing, and it certainly didn't help that Steinman had his own ideas of beauty...
* BioShock series, the city of Rapture is all designed in a 1940s Art Deco style, somewhat behind the times even by 1960 when the game takes place. Even ignoring the ban on contact with the surface (outside of personally-invited new arrivals) and the unjustifiable expense of remodeling an underwater city, the "space age" designs of the '50s would have been a poor fit anyway.
* BioShock!" She will also exclaim in glee about marshmallows when you set them on fire. All Little Sisters have been tampered with in the perception department, to the point that all of decaying Rapture looks like wonderful, golden, shiny places, and for all we know, that's what they actually LOOK like to them: Electrified people burst into merry dance, flaming people are holding marshmallows...
* BioShock shiny, but it was made gritty by a civil war, and even afterwards there's still a few vaguely-glitzy areas. Places like the blood-streaked Medical Pavilion, the run-down docklands area of Port Poseidon and Hephaestus' grimy geothermal power-plant are ultimately contrasted with places like Fort Frolic, Rapture's neon-lit entertainment district - which is actually still pretty ritzy despite the disrepair.
* Bioshock: Some of the weapons have this about them. The grenade launcher, for instance, looks like a wooden gunstock with part of a stovepipe, some wires, and a 9-volt battery attached. You can even craft these at U-Invent machines, provided you've picked up enough leftover parts along the way.
* BioShock's Rapture is designed mostly as a propaganda device to scare children into never going to the surface.
* BioShock statues, often attacking in silence unlike other splicers. Unlike the creepy plaster statues, these bleed and give a dull thunk when hit.
* BioShock That and the Big Daddies; most of them used to be criminals that were sent in for "testing."
* BioShock? That splicer may be the least of your concerns in a moment.
* BioShock that would fire the equivalent of the Insect Swarm and Enrage plasmids among other things.
* BioShock, the abuse of which resulting in the crazed Splicers fought throughout the game.
* BioShock: The Big Daddies are willing to die to protect the Little Sisters.
* BioShock. The city of Rapture, being entirely underwater, does not contain enough farmland for growing nonessential crops or raising cattle, so real beef and tobacco aren't available except through Fontaine's smuggling operation. Somehow, Rapture's scientists have managed to synthesize both from what they do have on hand, which seems to be mainly sea life, and it's implied that customers generally don't mind.
* BioShock: The city of Rapture developed "plasmids" that give people superpowers. And hideously deform them and drive them insane.
* BioShock: the city of Rapture is underwater but rife with crime, murder, crazy people... Of course, its urban art deco appearance sometimes makes you forget you're under the ocean.
* BioShock, the Enrage plasmid causes splicers to go crazy (well, crazier than usual) and attack anyone— you, their fellow splicers, or even Big Daddies.
* BioShock: The fact that Andrew Ryan has his name plastered all over products and

establishments in Rapture (Ryan Industries) could be considered an example.
* BioShock. The game itself starts by the following year, showing how the underwater city degraded to a very sorry state.
* BioShock: The Insect Swarm plasmid allows you to attack enemies with swarms of bees, causing them to panic and get distracted.
* BioShock the man who did it. You still have to kill them in self-defense, but it's hard not to feel bad about it.
* BioShock. The object isn't a visual focal-point for the player, and quite a distance away from you when it happens, so many players miss it.
* BioShock. The only reason the protagonist's name is known at all is due to an easily-missable written message addressed to Jack in the opening cutscene.
* BioShock the people doing such horrible things to her, and she responded with, "If you're going to do such things, at least you should do them properly."
* BioShock there is the Little Sister Orphanage, which is really a front for little girls to be used in science experiments.
* BioShock these trails include everything from bloody footprints to messages written in it.
* BioShock: the splicers are not an example, as their deformed bodies are the result of accidental mutation. However, anyone worked on by Dr. Steinman is. The mad plastic surgeon would deliberately reshape people's faces and bodies into grotesque forms to fit his insane standards of "beauty". This is a guy who found, for example, symmetry to be horrific.
* BioShock the surgical experiments used to turn those girls into Little Sisters in the first place.
* Bioshock, this happens. Three bad endings in each, resulting from Little Sisters being killed, with only one good ending.
* BioShock. This is in fact a remnant of when a splicer was supposedly to be running the vending machines, so you shoot him some extra EVE in exchange for discounts and more stock.
* Bioshock: This is one of the core powers you obtain. Who needs fireballs when you can instantly hit the "on_fire" button on anything in your line of sight with a snap of your fingers! It's as fast as your lightning spell and just as tactically usable!
* BioShock, this tactic can save you quite a bit of ammo. Or, in the case of camera, kill your enemies without ever lifting a finger (or being anywhere near the camera on the map) and plenty of non-hostile drones to catch and hack.
* BioShock this trope is invoked on the protagonist's veins quite frequently, depending on the plasmid at the time. It's surprisingly well researched too.
* Bioshock through a series of characters with a desire to stop Ryan, only to find all their corpses mounted to columns.
* BioShock to show damage and decay in many of the stages, especially present in Hephaestus.
* Bioshock until the 1970s. But players instantly recognize the shorthand.
* BioShock, usually right in front of you or, in your initial encounter with one, right behind you without any warning whatsoever, with hands ablaze.
* BioShock was created to become this eventually, either when the surface world destroyed itself in a nuclear war or when citizens stopped recommending colleagues from the surface to recruit, whichever came first. Official propaganda depicts the surface as a dystopia to discourage any thoughts of leaving, and anyone who tries to leave anyway is met with violence. By the time you arrive, however, only a decade and change has passed since its founding and everything has already gone to hell.
* BioShock was originally a man named Holden Langford, but Ken Levine made her female to add more female characters to the game. The art subtitles still mistakenly read "Holden Langford" for every sign in her lab.
* BioShock was originally planned to have a single, ambiguous ending, and expected the player to infer what happened based on their actions. However, higher-ups didn't like this and pushed for the developers to include a good and a bad ending. Many would argue this as a positive example of the veto.

* BioShock, when you come face to face with Julie Langford, antagonist Andrew Ryan releases a gas into her office which kills her. However, the gas also fogs up the windows and before dying, she uses that to write the combination on her safe for you, leading to information you need for the next phase of the game.
* BioShock, where a random song will play normally, get stuck a few seconds in, then stop.
* BioShock, where most of the game's principal characters have their own model.
* BioShock, which despite being set in 1960 has a very 1930s feel to it.
* BioShock), which results in Bibles and other religious items being smuggled in with other contraband.
* BioShock, which uses the flash of either white light when saving a Little Sister - and a red one when harvesting them.
* BioShock; with level two of the Security Command plasmid, you can even summon friendly security bots on command, and level 3 lets you call in "Elite" versions with more health and higher attack power.
* Bioshock with Sander Cohen. His 'art' is actually corpses cast in plaster, which is creepy enough in itself in that they bleed when you strike them. However at some point "statues" you've seen throughout disappear and the splicers inside attack you.
* BioShock. You'll be symphonizing a bloody massacre while Waltz of the Flowers blares throughout the studio for minutes, though odds are that you'll be done by 2:44.
* Bio-Tech, but afterwards their libido and other appetites go into overdrive.)
* Biotech from an extinct alien species infects a human host who goes on a killing spree, repeating the word "protect" before each kill. Our heroes learned that the goal of its creators was to protect the species by killing anyone who wasn't a "pure" member of the species. Unfortunately the standards for purity were set so high by the planet's religious leaders that no member of the species was deemed pure and all were killed.
* Bio-Tech has rules for "bio-bombs", people or animals born with bodies made of explosive compounds. In a weird variation, the same book lists cow milk that turns into an explosive when curdled as a near future technology.
* Biotech Is Better: Organic technology portrayed as more advanced or better than mechanical technology.
* "Biotechnology" is not only an adept description of many jobs available in the biological sciences, but many universities offer it as a course.
* biotic between biotic and non-biotic soldiers. However, since her biotic powers aren't strong enough to actually use in the field at the level the cabal demands, she winds up in a supporting role. Her disillusionment with the whole affair, combined with the lack of camaraderie in the cabal itself, eventually drives her to desert and light out to the Terminus Systems.
* Biotics can be used for... all manner of purposes. Mordin will even point this out if Shepard is pursuing a romance with a biotic, offering some manuals and reading material on helping you get the most bang for your biotic. Doubly hilarious if
* biotics universe. It was a biotic amp implant design that was made when humanity still didn't fully understand what it was doing when it came to biotics. Many L2 biotics are plagued by various health problems; the ones that get migraines are the lucky ones. L3 designs and later are more refined and don't have those problems, but L2 implants are also difficult to upgrade, leaving many L2s unwilling to take the risk. Furthermore, few L3s were as powerful as the L2s, with Commander Shepard being an explicit exception, so some opted not to take the upgrades, because they'd lose out. There is also the fact that the retrofit surgery would be performed by an offshoot of the now-defunct Conatix Industries, which many L2s intensely distrust due to Conatix's actions in the early days of researching human biotics. It isn't until the L4 biotics are developed that human biotics begin to overcome both of those problems (L2's medical issues and L3's weaker power compared to L2s).
* BioWare. A Jedi dating Lana or an Imperial Agent flirting with Theron would fall into this category.

* BioWare' Alistair has an Estrogen Brigade - not bad for a character who's canonically a virgin.
* BioWare also lied about the DLC. They repeatedly assured those who were satisfied by the game's original endings that there would be no retcons, only additions. Compare the cinematics
* BioWare also revealed that 82% of players used a Male Shepard, and it's probably likely a big chunk of these players simply went with the default setting (which was a Male Soldier modeled after Mark Vanderloo's face).
* bioware and biotech, nanobots that weave polymers through your bones and muscles to make them stronger, custom-grown replacement organs with bonus features (like an appendix that actually does something), and much more.
* bioware and genetic engineering for metahumans. They cause Essence loss but not as much as cyberware.
* BioWare be using Force abilities to spice up sex. The Knight can lampshade right back by asking if that just makes him even more excited, which actually flusters him.
* BioWare games, very nearly any speaking character, and especially companions, can be persuaded into launching into huge conversations about themselves, their people, and the current situation at the drop of a hat.
* BioWare has a tendency to create somewhat psychotic mad people (usually women) who can be most successfully romanced by a nicer player character.
* BioWare has ever released: the more power over the world they have, the more troperrific their games are.
* BioWare has this. The main example is Darth Malgus, one of the main villains, who's happily married to a cute Twi'lek (ex-)slavegirl. The fact that he treats her like a wife rather than a slave is a source of annoyance to the largely xenophobic empire, but since he refuses to play politics and spends most of his time on the Imperial Fleet fighting (and mostly winning) battles for the Empire, it's largely ignored. That, however, does not mean that their apparently genuine, two-sided love doesn't wind up with a tragic ending...
* BioWare have this kind of relationship. As for the optional, player-driven ones: Liara, Garrus, and Tali are the most obvious.
* BioWare, he was for the most part forgotten by all but the most dedicated of the developer's fans.
* Bioware in general likes the trope. There's also the Prothean VI, Vigil, in
* BioWare is an imaginary boyfriend she invented to inspire jealousy in Sonic, but deep down she still cares about the Blue Blur - if Sonic is nice to her throughout the game, she tells all before the Nocturne invasion. If you're paying a fair amount of attention (and selecting the right conversation options), you can see this coming from fairly early on.
* Bioware is an online-only loot shooter filled with microtransactions (and was completely their own idea, not EA's as is commonly thought).
* BioWare is oddly selective about which items have "flow." Hair and loose sleeves, for example, will deform a bit while moving, but robes will remain stock still.
* BioWare is particularly fond of this trope whenever a female has more than one love interest:
* BioWare it by saying that Qunari born without horns are considered to be destined for greatness, while those who choose to leave the Qun cut off their horns as a way of showing their rejection (all the other Qunari in the game).
* BioWare reading about the game world's history instead of actually playing.
* BioWare romancing him thus, if she initiates it: "I don't know, I'm willing to give it a shot if you are." The Warden can lampshade this unintentional bad choice of phrasing nastily with "'Give it a shot'? You weren't joking about the idiot part" - but Alistair will be very hurt and dump her if you do this.
* BioWare series, which instead measures each party member's approval or disapproval of your actions.
* BioWare. Since he no longer works for the developer, it's technically fanfic, but most fans regard it as canon since Gaider was Dorian's writer.
* BioWare tends to include one of these as a love interest in each of their games.

* BioWare that's kicked off with a speech exactly like this. Minister Sheng can't possibly send anyone to close the Great Dam while there are still Lotus Assassins searching the ruins of the drained lakebed — it would be bad for his career to let them drown! — so he very unsubtly stuffs a key to the gate into the Spirit Monk's pack.
* BioWare, the Consular can confront a sentient hologram about her feelings for one of your party members (the party member in question treats her as his cherished assistant and girlfriend, even though he has to take care of physical needs with short-term flings). The hologram mocks the question and is very insulted you asked it of her in the first place.
* BioWare The poor child has two entities battling for supremacy inside her. You end up having to forcibly evict one of them.
* BioWare, these are meant to be read with a disclaimer that "If these events contradict your game canon, then they never happened in it (or maybe something similar happened)":
* BioWare usually includes at least one in the party, who is usually also young and female.
* BioWare with Hawke and move in during Act II. Both romance arcs continue from there, based on the personal drama of the respective love interest.
* BioWare with the creators themselves, with Obsidian often taking over projects that Bioware doesn't want to reprise. Both companies have their own flavors of high-quality, story-driven RPG, and fans tend to enjoy both.
* Bioweapon Beast: An artificially-created creature made to be a living weapon.
* Biowulf, subduing the immediate wave, and ordering him to fix the generator. With the creatures further at bay, he's able to use the extra time to fix it, and run.
* bipedal mecha which house Marines too physically broken for baseline combat but too strong-spirited to die, secured inside a life-support sarcophagus which is hooked up to the Dreadnought body's motive systems.
* bipedal mutant crab people with a heavily-armored carapace. Shooting them in the head is the quickest way to bring them down, but said soft target is deeply recessed in their torso and often hidden when they're attacking, making pulling this off easier said than done.
* Biplanes, while largely obsolete, still see use in certain niches where short-takeoff-and-landing ability are favored over airborne performance, to include things like cropdusters. One military design which was introduced surprisingly late (1947) was the
* "Bipper" during the third act of "Sock Opera." It's part of his reverends' outfit.
* Birch Planet large. Though due to the close proximity to a black hole, it would also experience time dilation.
* Birch Small, who is an aspiring mangaka and the main character of the heavily
* Birch Street Gym: The gym is inside a warehouse for "Acme Wiping Materials".
* Bird Box: Birds can sense when the creatures are around and chirp wildly when they're near. Malorie figures this out when her group have to raid a supermarket and she comes across a trio of parakeets that were left behind. Not shortly after the group have their first encounter with one of the unhinged with the birds reacting to his evil intent. She hangs on to them for the remainder of the movie.
* Bird Box: Both of the children survive the film, despite all the adults surrounding them save Malorie dying.
* Bird Box: Charlie's theory in regards to the creatures' posits them as being demons or something like it, showing people their dead relatives or worst fears and causing irresistible suicidal urges as a result. While his theory on their origin is never confirmed, it is shown that the victims are drawn to visions of past regrets, such as the woman who tried to save Malorie on the street.
* Bird Box: Civilization collapses due to the arrival of entities whose appearance causes suicidal insanity in whoever views them, driving anyone who so much as catches a glimpse of them to single-mindedly try to kill themselves. The exception to this is a small amount of people (apparently the ones who were crazy before the event) who instead develop an almost religious obsession with the entities,

becoming driven to try and force everyone else to look at them. That the trigger is the creatures' appearance is emphasized by physical changes in the victims' irises and pupils.
* Bird Box got a lot of attention for the fact that the actors were actually blindfolded and unable to see for most of their scenes, rather than wearing fake blindfolds with small eyeholes or being given CGI blindfolds in post production. The viral "Bird Box Challenge" meme also led a lot of people to see what all the fuss was about.
* Bird Box: The film opens with Malorie and her two kids making their way to a rowboat, blindfolded and setting off down the river. The film then jumps back five years to set up what is happening and jumps back and forth between their journey and the events that lead up to it.
* Bird Box: The mere sight of the creatures causes this. It drives most people to suicide. With those who were already mentally unhinged, they became obsessed with it, and force others to look.
* Bird Box to save the lives of others. Olympia manages to hand her baby over to Malorie before throwing herself out a window, and Tom manages to shoot one of the psychopaths before turning the gun on himself.
* Bird Boy: The Forgotten Children lives turns into this after the nuclear crisis. Best case scenario? You can live an unhappy life in the town. Worst case scenario? You have to survive trying to find copper to pay for food while dealing with violent, territorial rats in a massive scrapyard where there is no law.
* Bird Boy, the opening strips, recounting a legend, differ substantially from the main story.
* Bird Boy: While part of Bali's problem may be his youth, he certainly gets himself into foolish trouble very quickly.
* "Bird Brained", Blackwing, Vaarsuvius's familiar, deduces that his own advice is important, since Qarr offers to stop Zz'dtri from killing Vaarsuvius if Blackwing lets the imp kill him.
* Birdemic - early in the movie, the actor who plays Rod couldn't walk naturally on camera and ends up looking like he's made of wood.
* Birdemic for global warming, pollution and other crimes against the environment.
* Birdemic has a lot of driving around in it. A lot of boring, pointless conversations, too. The bit with Nathalie's mother discussing her old job and current retirement springs to mind.
* Birdemic is a masterpiece, despite the poor editing and writing, among other flaws. Nobody can tell whether he genuinely thinks it's good or he's just trolling.
* Birdemic). Various theories involving bird flu, deforestation, and global warming are discussed, but given the writer/director's apparent (mis)understanding of the subject, one might as well say that God Is Pissed!
* Bird even precipitated a fight with Julius Erving by repeating a single phrase over and over. The phrase? 42-5, or the number of points each had scored during an easy Boston victory.
* Bird has similar difficulties, but the worlds she creates are soothing or beautiful. However, she can't engage her peers easily because of her fugues. Mimi is the only one who engages Elle, and Elle is the only one that sticks with Mimi- even though they are dysfunctional and Mimi is sometimes physically dangerous.
* Birdie averts this in his own way for a male character. He was never "beautiful" in his own right and especially not compared to the girls who all are made to be attractive, but early on he was a criminal out of his own accord when he had muscles and younger. Now he is older, fatter, and uglier and now fights the good fight working under Karin as long as she feeds him.
* Birdie has a quote explaining that he was pale "before" because he was sick; this refers to the fact that the character was Caucasian in the original
* Bird is basically a retelling of Mimi and Elle's backstory with an alternate version of Taylor as the narrator.
* Bird, is considered the greatest team in basketball, maybe even in any team sport.
* Birdman After he became a lawyer, he developed a new Weaksauce Weakness; he's

completely worthless if he loses the Birdman insignia that he keeps on his forehead.
* Birdman. Although the title hero doesn't normally do this, he does at the end of "Versus the Speed Demon" while the prison warden is telling him what will happen to the re-captured villain.
* Birdman. Avenger the eagle did this all the time, and Birdman seemed to understand what his screeching cries meant.
* Birdman Avenger to leave him and try to save some people nearby. When Avenger is reluctant to abandon him, Birdman makes it an order.
* Birdman. Because Riggins had gained fame by portraying an avian superhero, it is fitting that his bandaged face has a prominently pointed nose and looks a bit like a plague-doctor mask.
* Birdman doesn't deal with Hollywood directly but the title character struggles with his past in Hollywood and his desire to be respected critically drives the film's conflicts.
* Birdman episode "Hannibal the Hunter" pitted Birdman against the titular hunter. Amusingly, the villain crows that he has "succeeded where all others have failed" by capturing Birdman, evidently unaware that he is captured roughly every other episode.
* Birdman episode "Meets Birdgirl". While Birdman is fighting Birdgirl, her boss Doctor Mentaur orders his minion to fire hydrogen "shells" (bombs) at them, even after being warned that the bombs will hit Birdgirl too.
* Birdman episode "Monster of the Mountains". The villain Chang threatens Birdman and Birdboy with a "uranium ray" gun, but Avenger (Birdman's pet eagle) swoops in from behind him to knock it out of his hands.
* Birdman episode "Murro the Marauder". When Birdman and his shadow double fire energy blasts at each other the sound effect is the skeleton beam firing.
* Birdman episode "Professor Nightshade". A U.S. military officer addressed as "Admiral" is clearly wearing an Army uniform.
* Birdman episode "Skon of Space", Skon, the advance scout for an alien invasion, attacks Birdman. Birdman defeats him and sends him home with the warning that everyone on Earth has powers like him, so any invasion would be futile. Birdman calls Falcon 7 and warns him to prepare for an invasion just in case Skon's superiors are not as gullible as him.
* Birdman episode "The Constrictor". The titular villain's submarine has an escape hatch helpfully labelled "Escape Hatch" to make sure the audience knows what it is.
* Birdman episode "Vulturo, Prince of Darkness". Right after Birdman has his solar powers renewed by the nearby passage of a comet, the title villain says "No! It cannot be!"
* Birdman F.E.A.R. to their base in the Andes, at which point Birdman and Avenger single-handedly storm the place.
* Birdman goes viral and receives 50,000 clicks on YouTube within a day.
* Birdman had a snazzy lair of some kind. Mountains and personal islands were the most popular, but the sky was the limit, and more than one bad guy took up residence there.
* Birdman has a crazy crowd of journalists in front of Riggan's hospital room at the end. The police can barely keep them in check.
* Birdman has a hard time getting hard outside of the stage, which Lesley brings up after nearly getting raped onstage by him for the sake of method acting. Mike also shows reluctance towards Sam's attraction to him at first and states this as the reason.
* Birdman has this in-universe: Riggan Thompson is a stage actor, and suspects that his co-star Mike Shiner is overacting to try to steal the show.
* Birdman: In "Skon of Space", Birdman battles an alien scout named Skon and barely manages to defeat him. He sends Skon home claiming that everyone on Earth has powers like him. Later, Birdman tells Falcon 7 what happened and tells him to prepare for an invasion anyway, just in case Skon's superiors are not as gullible as him or decide the risk is worth the reward.
* Birdman. In the episode "Hannibal the Hunter", Hannibal trapped Birdman in a net

and arranged for him to be dropped into a pit with two lions in it so they could eat him.
* Birdman, in which his wings were used quite often. His power was derived from the sun/solar energy, and while his wings could change position (outstretched and at rest) they hardly ever flapped, mainly due to keeping the cost of animation down. Thusly he was able to float without flapping. The bird Animal Companion, Avenger, also suffered from this cost-cutting in that his wings never really moved, and he floated without flapping as well. His battlecry was an echoing "Biiiirrrrddd-MAN!!" The character 'Peanut' was known as Birdboy, his ward, and had artificial metal wings. How they were powered is unknown. Birdgirl never appeared in the original show.
* Birdman is powered by the sun, as are his sidekicks Birdboy and Birdgirl. Unlike Superman above, his batteries are much, much, shorter in storage capacity, as he runs out within minutes of leaving sunlight.
* Birdman. Keaton was initially off-put by the role because he thought it was an invoked example of this trope, thinking the casting choice was specifically mocking him. However he came around after reading the script.
* Birdman, Leslie is badmouthing Sam in the dressing room, while the latter is standing behind a clothes rack. Leslie is embarrassed when noticing.
* Birdman, Mike Shiner insults Riggan saying that most people don't care about him as an actor. Cue a fan of Riggan's approaching from behind asking to be photographed together with him.
* Birdman, Mike Shiner is an extreme proponent of this. He drinks real gin on stage during a preview performance, nearly rapes Leslie while on stage, and demands that Riggan get a more realistic looking gun, all in an effort to be "more real."
* Birdman retconned Murko the Marauder as a F.E.A.R. agent leaving to start his own criminal organization.
* Birdman, Riggan plays a character that commits suicide because his wife doesn't love him anymore.
* Birdman supervillain was allowed to spend his prison sentence working in the prison's metalshop. He built a suit of powered armor complete with a jetpack and escaped. The episode ends with the warden sensibly deciding that putting him in a metalshop isn't a good idea and switches him to laundry duty. In a later episode starring the same villain, he adds flight capability to a dryer and escapes in it. The warden finally figures out that putting the guy near any machinery is a bad idea and sends him to work in the prison's library.
* Birdman. Supposedly, he didn't even see the irony of the situation until it was explicitly pointed out to him.
* Birdman that could bring people's shadows to life to do his bidding. He is defeated when he blocks out the sun in an attempt to weaken Birdman (Birdman is solar powered). While it did weaken Birdman, it also meant there were no shadows for him to animate.
* Birdman, the evil organization F.E.A.R. mind controls the leaders of three nations to go to war with each other as part of their plans.
* Birdman. The title hero can only recharge his solar powers in sunlight. This means that in almost every episode (except "The Menace of Dr. Millenium", "The Deadly Duplicator" and "Versus the Speed Demon") he runs out of power, is captured by the villain and he has to re-expose himself to the sun's rays to regain his powers. In episode 20 "The Wings of Fear" he develops "Solar Energy Storage Bands", which provide him with solar energy to replenish his powers when he's out of the sunlight. After this episode they're never mentioned again, even though they would have been incredibly useful.
* Birdman ultimately leaves it ambiguous as to whether Riggan's telekinetic powers were real, although some parts heavily imply that he was imagining them, or at the very least exaggerating them.
* Birdman villains have this kind of beard, most notably Number One, the leader of F.E.A.R.. This is useful, since apart from this and a small skull insignia, he looks exactly like all of his henchmen.
* Birdman was never that developed - its only members seemed to be Birdman, Falcon

Seven, Avenger, and possibly Birdboy - but it seemed to be a legitimate government (or inter-governmental) agency.
* Birdman was particularly talented at this—though he did mess up occasionally, he was able to save messed up takes through improvisation.
* Birdman. While trying to escape a pursuing missile he travels too fast and ages so quickly that he becomes an old man.
* Birdman, who is notorious for engaging in this trope in real life (see below).
* Birdmen, a shounen series where the next generation/evolution of humans becomes bi/pansexual due to there no longer being any care for gender or race. Both protagonists are male and involved in a form of relationship with each other.
* BirdMen, Karasuma is having trouble flying, so Takayama, just picks him, flies to a distance and let's go. Karasuma starts flapping his wings in panic, and now he can fly!
* Bird. Mimi is a nice girl, but her power sends her into violent mood swings. Sometimes she'll be talking normally, only to switch to shouting, eyes-glowing, and fire everywhere. She can't help it, her powers alter her brain chemistry to encourage disassociation and lack of empathy.
* "Bird of Prey" (issue 62 of the US version, issues 262-264 in the UK version) has a robotic gangster named B'hgdad demand that Nightbeat give him the bird sculpture because it is his property. Nightbeat retorts that if the bird truly is B'hgdad's property, then he's
* bird of prey. When he can later transform himself back into his human form, he always notes that birds of prey have much sharper eyes and ears. It also bothers him that he cannot fly in this form.
* Birdo is often cast as the female equivalent, particularly in games like
* Bird on a Wire: Rick is recognized by his old girlfriend and immediately calls his handler, asking to be moved again. He's told his old handler has retired and introduced to his new handler… who promptly sells him out to the bad guys.
* Bird on a Wire starts with the witness's ex-girlfriend accidentally meeting him, recognizing him and blowing his cover. After 15 years of hiding and no less than 3 false identities. While on the run, they revisit his previous lives. The metaphor in the title and the theme song means that the witness that touches his previous life may die like a bird that touches two live wires.
* Bird: Part of the narrative strength of the asylum arcs is the contrast between the quiet, emotional slice-of-life segments. The eerie, psychological horror segments. And the intense action segments. This is taken to a further extreme in the fight against Hatchetface, which rapidly cycles between all three.
* Bird People and the rakshasa tiger-demons, who made up the clan's ruling class and chief sorcerers — the queen of the Sultai, Sidisi, was a naga herself. Within the Sultai, humans were strictly second-class citizens at best and chattel at worst.
* Bird People(especially the air of course). However they are very much a downplayed version.
* Bird-Poop Gag where the joke revolves around a bird pooping on something or someone.
* Bird poop is actually mostly composed of the bird's form of urine, a white goop called uric acid. This is so it can get out easier via the cloaca, a utility opening in the bird's rear that both functions as waste disposal and mating for both sexes. The little dot in the middle is the actual stool, the rest is just bird pee. It doesn't mix too well with water, which is why it's so hard to get off of your car. What makes this count is that certain small birds, such as pigeons, actually use this as a defense mechanism; they release their bombs before flying to lighten their load and as such, get away from a potential predator faster.
* Bird, possesses super strength, and his aura shuts down other parahuman powers. As Taylor and Mimi are both unarmed teenage girls, without powers they are completely helpless.
* Birds Anonymous to try to give up his habit of chasing birds. By the end of the cartoon, he appeared to have succeeded, but ironically, his sponsor relapsed.
* Birds are prone to flying into windows because they don't know that they're

actually glass, so they end up badly hurting themselves. There are a few instances of birds having left clear impressions of their bodies on windows after flying into them (apparently due to residue from their feathers).
* Birds, as living dinosaurs, are technically reptiles, but their endothermy, feathers, and bipedalism set them apart from their otherwise cold-blooded, scaly, four-legged kin.
* Birds crashing harmlessly through windows is a common occurrence in
* Birds, especially corvids, also show up in numerous pivotal scenes of the second movie, as well. Director
* Birds Eye fall apart while driving cross country, but the commercial doesn't deign to demonstrate this.
* Birds In The Spring 1933 Silly Symphonies cartoon short, the unnamed boy bird and his bird family hides from the hornets. He laughs but his bird father to get angry at him and grabs him, puts him on his lap. parts the feathers from the boys rear end exposing his butt before spanking him with his wing.
* Birds like seagulls, crows and caracaras really like to obsessively harass specific targets over long periods of time.
* Birds mass suiciding because their directional sense was off, causing them to fly top speed into buildings.
* Bird's Nest does this after running into Leo juggling for a crowd on the street in
* Birds of a Feather, and were genuinely fond of each other at one point, but settle as this in the end.
* Birds of a Feather, have been friends since primary school, enabling the opening credits to use genuine photos of them growing up together.
* Birds of a Feather in their ranks. A handful decide that loyalty to their nation is not the same as loyalty to their military, and decide to break away and try to set right their nation.
* Birds of a Feather: Partners are extremely similar vs. partners aren't similar at all.
* Birds of a Feather, the drop-in character, when faced with a locked door, smashed a window to get in while the main characters watched.
* Birds of a Feather. Their contrast is even a major plot point, since the entire reason they fell in love was they admired virtues in the other that they themselves lacked.
* Birds of a Feather: Two people are attracted to each other because they're so similar.
* Birds of Prey (2002) are obliterated in the opening of the third episode.
* Birds of Prey (2002)" comic books arcs (in which an earthquake levels half of Gotham).
* Birds of Prey (2002) had Huntress be captured and brainwashed into fighting other super-powered women.
* Birds of Prey (2002). Helena/Reese had some overtones of this, especially in the first few episodes when he thought she was a criminal. Notably, Helena is the daughter of Batman and Catwoman in this continuity.
* Birds of Prey (2002) to cover up scars they couldn't have gotten in their civilian persona, and (b) with the kind of money and technology that lies beyond a lot of DC heroes, it wouldn't be too hard to come up with makeup that good.
* Birds of Prey (2002): We are explicitly told that no two metahumans ever have the same power. (Which doesn't explain why Huntress inherited her mother Catwoman's powers...)
* Birds of Prey (2020): After being arrested, Cassandra swallows the diamond she stole off Victor Zsasz while she is in the back of the patrol car.
* Birds of Prey (2020): After Harley goes to retrieve Cassandra from the police station, Sionis posts a $500,000 bounty for bringing Cassandra to him alive and sends it to every hired gun in Gotham, who converge on Harley and her cargo.
* Birds of Prey (2020) after them in the abandoned amusement park they all ended up in.
* Birds of Prey (2020) but still alive, after Keo turns down his offer of an

alliance: both as a punishment, and as a warning to others of the danger of crossing him.
* Birds of Prey (2020) by complimenting her on her ability to perform high kicks while wearing them.
* Birds of Prey (2020) ended up alienating Birds of Prey fans. Meanwhile, the majority of Harley Quinn's fans are teenage girls, but the film's graphic and extreme black-comedy violence meant it got an R rating, precluding any of them from being able to see it. Furthermore, fans of Harley as she appears with the Joker didn't enjoy the movie as it starts with him kicking her out, while fans of Harley and Poison Ivy stories also weren't satisfied as Ivy doesn't appear at all.
* Birds of Prey (2020). Harley is talking with Cassandra Cain in a vehicle. When Cassandra says she can't give Harley a diamond because she swallowed it, Harley glances at the camera with a frustrated look on her face.
* Birds of Prey (2020) reveals pretty much the entirety of Gotham's criminal underworld hates Harley Quinn's guts, but are forced to put up with all her bullshit and abusive behavior because she was the Joker's girlfriend and everyone was terrified of crossing him. The second they're certain they've broken up, everyone in town starts coming for her head.
* Birds of Prey (2020) smashes on the ground in slow motion while the score turns mournful. Harley takes losing it as dramatically as losing a loved one.
* Birds of Prey #79 Lady Blackhawk goes to Savant's house only to be greeted by his partner Creote who opens the door to her while completely naked, rendering her speechless for a moment while she stares.
* Birds of Prey (and the Fantabulous Emancipation of One Harley Quinn).
* Birds of Prey (and the Fantabulous Emancipation of One Harley Quinn): After being chased through the streets by low-level Gotham thugs and street cops, Harley Quinn's post-hangover breakfast sandwich gets knocked into the street in a confrontation with Renee Montoya.
* Birds of Prey (and the Fantabulous Emancipation of One Harley Quinn), Harley Quinn gets three pink animated idea bulbs when she gets the idea to destroy the Ace Chemicals Factory in a fiery scene of fireworks to announce her breakup from Joker.
* Birds of Prey arc, Cheshire tied up Lady Shiva and stuffed her in the trunk of a car that had been wired to explode, hoping that the police would find the charred body of an Asian woman and assume it was Cheshire that had been killed. Fortunately, the heroes were able to rescue Shiva before the bomb could go off.
* Birds of Prey are forced to fight a duel to the death over an affair of honor involving yet another criminal, the White Canary, and the end result is just that people will die for no good reason.
* Birds of Prey) are shown as receiving invitations to join the team or having been active in past missions. After the series was relaunched in 2010, the cast stabilized at six members: Oracle, Black Canary, Huntress, Lady Blackhawk, and Hawk and Dove.
* Birds of Prey: A violent example. When Super-villain Killer Shark brainwashes Lady Blackhawk into thinking she is Queen Killer Shark, she leads him to his grandfather's treasure. This causes Killer Shark to cry and to reveal that he had originally intended to kill her after he got his treasure, but has changed his mind. As he leans in for a kiss, Zinda subconsciously punches him, breaking his teeth.
* Birds of Prey because she needs both a surrogate mother figure and the opportunity to atone for accidentally killing her family.
* Birds of Prey: Bruce the hyena was played by a German Shepherd interacting with the human actors, who then got replaced by a CGI spotted hyena model.
* Birds of Prey, but ends up having her ass kicked by her would-be victim by the end of the issue.
* Birds of Prey, due to the two being surrogate father/daughter. Given he was the one who trained her how to fight (and he never pulled punches), its not unlikely he was being completely truthful.
* Birds of Prey escorting metahuman prisoners. They do pretty well, considering they're way out of their weight class on Apokolips.

* Birds of Prey fashion by a villain. When one of her teammates later suggests that she should seek therapy, Lady Blackhawk responds that breaking the villain's face was all the therapy she needed.
* Birds of Prey foe Entity was a nanobot swarm that consumed an industrial spy and maintained his basic humanoid shape.
* Birds of Prey, following an insane protagonist while not dialing down regarding its violence and profanity. However, the box office intakes were nowhere as impressive - some analysts felt that higher content ratings actually hurt the film, given a very large segment of the fanbase for main character Harley Quinn is young girls. It opened atop the rankings, only to fall to third the following weekend behind two family-friendly productions.
* Birds of Prey has an ex-husband whom she married (and divorced) while in college.
* Birds of Prey has created a demand for the "I Shaved My Balls For This?" t-shirt worn by Renee Montoya.
* Birds of Prey (Helena Bertinelli) romantically. The storyline never had time to develop very far before DC's "New 52" reboot, but Huntress had always been portrayed as straight, and was not even aware that Question was gay, at one point asking if she and the previous Question, Vic Sage, had been lovers.
* Birds of Prey, however, she has decided to exploit her extremely well-formed figure to manipulate and dominate the men she targets, starting with the father of Black Alice.
* Birds of Prey, Montoya stamps on Harley's foot while they fight causing her to hop in pain.
* Birds of Prey reference Barbara Gordon and other characters bemoaning the ineffectiveness of the Curtains 98 operating system.
* Birds of Prey's first team-up, Oracle is speaking to Black Canary as she is fighting Lynx and, when it seems like Lynx has won, Oracle explains that Dinah does not have the luxury of dying here and she better get up and DO something about it. Afterwards, Dinah actually comments that it was a nice speech.
* Birds of Prey story arc. The Twelve, a group of brothers named after the Chinese Zodiac (with Rabbit acting as their spokesman and leader), each with near Shiva level martial arts talent, are sent to defend a shipment of drugs to Gotham. The Birds of Prey engage them until Lady Blackhawk renders the whole fight meaningless by blowing up the drug shipment with her fighter jet. Having failed their mission, the Twelve surrender:
* Birds of Prey, the Black Canary ditches the earrings that allow her to receive Oracle's transmissions. Fortunately for her, she keeps the transmitter, and the receivers end up with Huntress and Catwoman.
* Birds of Prey, there is an entire list of grievances that moves too quickly to be read
* Birds of Prey to form a henchperson's union. As the Canary asks, "Can you imagine asking the Joker for full medical and weekends off?"
* Birds of Prey to her father, who was initially stunned but ultimately proud of his daughter. Barbara then pulled out her old Batgirl costume, saying, "I'm so glad that you're handling this so well, Dad, because there's more to it, I'm afraid." Jim Gordon's response: "Okay, this part I knew."
* Birds of Prey to the Huntress, and was set up to be able to return as a recurring villain. When the series did bring her back, it was to kill her off stupidly in one issue.
* Birds of Prey, was a huge draw in large part because she was a rare example of wheelchair-using characters in comic books who actually got character focus and development.
* Birds of Prey when Cheshire jumps out of a window and Black Canary jumps out after her.
* Birds of Prey, when Dinah Lance finds that Cassandra Cain has swallowed the Bertinelli Diamond that Roman Sionis is after, Sionis's right-hand man Victor Zsasz, who has already found evidence that Dinah may be planning to betray Sionis, orders Dinah to prove herself by literally cutting Cassandra open to retrieve the diamond. Rather than kill an innocent, Dinah turns on Sionis, which results in him

being killed when the rest of the titular heroes show up.
* Birds of Prey, while not the same character as in the comics, is explicitly bisexual.
* Birds of Prey who seduced them both at different times when CCTV footage of his getaway happens to show a closeup of his butt.
* Birdsong holds a ridiculously long "say" near the end of the song (about the four-minute mark).
* Birdsong Station was a twenty minute loop of birdsong that played from 6am until midnight on British digital radio for two years as filler on a vacant frequency. There was an outcry from fans when it was eventually taken off the air.
* Birds, reptiles, amphibians & invertebrates don't lay eggs in the game, babies are just spawned. Though this may be just simplicity for the sake of gameplay. In real zoos, visitors don't see eggs in enclosures since they're taken away for incubation. This mechanic could have been included in the game, vets already can take away sick & injured animals for treatment.
* Bird (stated to be male by the writers) is shown to be heavily swollen and pregnant in "Time-Police Part 2" and lays an egg which hatches into a strange newborn bird-human hybrid. To add to the strangeness of the scene, it's implied that Bird got pregnant via the inmates, who proceed to create a society of bird-people in such a way.
* Birds tend to be evil opportunists, ravens and crows in particular. Seabirds appear as madbeasts who can't even talk. Falcons and eagles get the
* Birds. Usually, either the male is more flamboyant and colorful than the female, as with peafowl, or they look identical but the female is bigger, as with eagles. However, some bird species lack sexual dimorphism (and the genitalia tend to look identical, given that most male birds do not have an external penis), so the only way to tell some for certain is to get a DNA test. Sexing chicks is a full-time job in chicken hatcheries.
* birds, well enough for actual birds to be confused and think she is one. Those are some adaptive vocal cords.
* birds, which makes even less sense than thinking them to be rodents.
* birds who are identical to Woodstock... except for the one called Raymond, who is noticeably darker than his peers.
* bird trio in Gen II. In Gen VIII, Galarian forms of the original trio (which have different primary types) complement this even further.
* Bird who can default to thus when under the influence of her power, described by Taylor as 'robotic'.
* Birdy), obsessed with birds, and currently hospitalized. He and his friend Al Columbato escape to the hospital roof, but Birdy breaks free of his friend, runs to the roof edge, raises his arms, and jumps off. Al is in shock, expecting that Birdy has leaped to his death, and runs over — but discovers that his friend simply jumped the short distance over to the neighboring building's roof. Birdy calmly looks back at Al in puzzlement and says, "What?" as the movie ends.
* Birdy the Mighty actually used "They fight crime" on the back on one of the DVDs for the OVA series.
* Birdy the Mighty anime, Tute, Birdy's police partner, dies by the third episode of the first season.
* Birdy the Mighty. At the end of season 1, the Roppongi area of Tokyo gets completely trashed by a combination of the ryunka and the sanctum sanctorum Killsat used to attack it. However, season 2 is mostly about how these events affected people, including the survivors.
* Birdy the Mighty, Birdy's age is easier to determine as flashbacks to her are shown when she was 10, a friend of hers while she was that age says he hasn't seen her for 14 years, and Tsutomu only reprimanding her for getting drunk, but not her age, suggests at the youngest, she's 24 there.
* Birdy the Mighty Decode, where Birdy will accidentally demolish any of the cars and subsequent new cars of one of the human minor characters with her super strength.
* Birdy the Mighty. Especially the Decode series, which produced two series of

stylish, fluid animation and engaging, sympathetic characters despite poor sales.
* Birdy the Mighty got 13 episodes; its second season got 12 (but with bonus episode #13 produced shortly after.... which technically acts as original episode 1).
* Birdy the Mighty has Gomez, as he occasionally gives Birdy advice and encouragement, and in Decode he seems mostly against the idea of releasing the Ryunka on Earth.
* Birdy the Mighty Hayamiya in the way, who comes to the conclusion he's an exhibitionist.
* Birdy the Mighty. If examined carefully enough, you see that in every interaction where there is a potential language problem (i.e. a human and an alien), there can be a reasonable expectation that that alien learned Japanese. For example, Birdy was on Earth for 6 months, working in the modeling business. Aliens that wouldn't know Japanese naturally only speak to other aliens (though of course the dialogue is translated for the viewer), so they are speaking their language. Tsutomu can only understand the aliens because his mind is inside Birdy.
* Birdy the Mighty is that the title character is an intergalactic police officer.
* Birdy the Mighty is widely regarded as a vast improvement over the original four-episode OVA.
* Birdy the Mighty: Moss from Decode's second season, to the point of being the most badass of the fugitives. Undine may count as well, if "girl" is the right way to describe her.
* Birdy the Mighty: Most Altans live in a slummy area of the city, called simply "the Altan district".
* Birdy the Mighty seem to be aroused by having their chins scratched.
* Birdy the Mighty, she complained about them hurting in the first season and got knocked over for a second by a shot from a revolver in the second.
* Birdy the Mighty takes it a step farther, when at the end of the first series he gets his own body back, it is destroyed almost immediately.
* Birdy the Mighty that this is the real reason behind Shyamalan's obsession with his supposed "chosen" status.
* Birdy the Mighty with an attractive female alien...and she's in the body when Dad walks in.
* Birdy the Mighty (yes, like Anubis) in the middle of his explanation of why it is so awesome and will own her (to which he responds, "You oughta listen until I'm finished!").
* Birdz. And Morty is a rare example of "male non-mammal with nipples".
* Birdz, baby Abby rolls around on a canvas while covered in paint, and Betty is proud of the results.
* Birdz charge on his father's credit card buying gifts for his friends.
* Birdz. Eddie is embarrassed by his dopey father, but they quickly grow to bond after getting lost on a scavenger hunt.
* Birdz, Eddie Storkowitz has one of these on his teacher, Miss Finch.
* Birdz, Eddie Storkowitz has the hots for his teacher, Miss Finch. It's entirely one-sided, though.
* Birdz, Eddie Storkowitz uses his father's credit card to buy lavish gifts first for his teacher, then for his entire class.
* Birdz, Eddie tries to pull it on his away-from-home mom by recording an answering machine prompt structured like this, in an attempt to fool his calling parents into thinking that he's still home, babysitting his sister, rather than at a club. It doesn't works.
* Birdz. He masks it at first by lip-synching to stage-fright-ridden Gregory's much better voice during rehearsal, then come the day of the show, he fakes a sore throat and ropes Gregory into being his understudy.
* Birdz is held aloft by a single balloon concealed in a backpack. This becomes a plot point in one episode, where his friends try to convince him to ditch the balloon, only to realize that turkeys can't fly.
* Birdz. It starts out as one of these but in the end, Eddie admits it was fun.
* Birdz, with an entirely avian (except one) cast, was up to its beak in bird puns.

These usually manifested themselves in the names of celebrities (e.g. "Whippoorwill Smith"), but also in the setting of Birdland and the occasional "anybird".
* Birdz, with Mr. and Mrs. Storkowitz (Mr. Storkowitz is far more embarrassed).
* Birkin's mutated form undergoes one minor and one major change compared to his previous depictions. On the minor side; whereas previous games depicted Birkin's mutated flesh as an extremely dark red, almost black in color, the RE2make instead goes for a twisted pink-and-white "fleshy" hue, less similarly to the skinned muscle of the past. On the major side, instead of mutating into a hexapedal beast for his second-to-last form, Birkin in the RE2make remains bipedal in that form, but visibly breaking down, dissolving into semi-shapelessness akin to his final form.
* Birmingham Six is about the wrongful detention and conviction of six men of the right nationality who were within fifty miles of an IRA bombing outrage in Birmingham, England, who were beaten and tortured into confessing by the West Midlands Constabulary.
* Birne kann alles (Lightbulb can do anything), the titular Birne is quite literally, a walking, talking lightbulb.
* Biro (ball-point pens): in Britain among others, though named after its Hungarian inventor.
* birth, being born weak and premature). "Fury" wasn't; it's derived from the Gaelic name Ó Fiodhabhra.
* Birth by Sleep, and he absolutely cannot rein it in once it starts flaring up.
* Birth By Sleep. Disney Town. You have three minigames, in each character's story you have to do one of them. They are: Kart Racing, a Rhythm game and this volleyball...thing. And you HAVE to do the one in your storyline. And you can't just get a 'decent' score on the rhythm game, it has to be a high one.
* Birth by Sleep, Eraqus, the heroes' mentor, has scars on his eyebrow and cheek. He's about as scarred as Xigbar, but, being a hero, his scars are light. And speaking of Xigbar, we see how he got his scars in the game.
* Birth By Sleep features three storylines of the three main protagonists all taking place at the same time with paths of the three converging at times. The final chapter of the story can only be played when all three branches have been completed.
* Birth by Sleep has the Ultima Weapon again, and a Keyblade made out of ice cream called Sweetstack that is slightly weaker but has a 100 percent Critical rate. The US version of the game adds No Name, which is more magically inclined than the Ultima Weapon, and the Final Mix adds the Royal Radiance, which is truly the strongest weapon in the game, combining the best qualities of all of them, and having the unique ability to fill the command gauge faster.
* Birth By Sleep is a prequel. It features no recap, but a montage of what they will go through...at one point, Terra's eyes randomly become amber in color...
* Birth by Sleep tried to do something about the balance between light and darkness, as light was waaay too powerful for universal safety. In doing so, Master
* Birth By Sleep Ven also qualifies: whenever he's not fighting the Unversed or running after the friends he already has, he sums up his goal as "just trying to make friends".
* Birth by Sleep when he decides to leave Destiny Island after reading Mickey's letter.
* birth certificates. Their excuse is that the old Filipino names [taken from Spanish names] are a tad boring and the recent American names are quite becoming cliche, so they decided that it would be cool if they add an extra letter and change some letter.
* "Birth Control is Sinful in the Christian Marriages and also Robbing God of Priesthood Children!!" effect.
* Birthday Bear tends to be a forgotten background character, because no one is having a birthday. In "Birthday Bear's Blues", someone does have a birthday, so Birthday Bear takes the limelight.
* Birthday, Bitch! as Jason rejects Peter's attempts to be more open about their relationship

* Birthday Boy, Manuk imagines that a rock is a hand grenade, pulls the pin with his teeth, and hurls it at his imaginary enemies.
* Birthday Breakfast, apparently having worn the same undies for a week in the past.
* Birthday Breakfast, Lincoln tries shouting, "Lola!" or "Lana!" to break up their argument but it doesn't work.
* Birthday Breakfast, upon being called fat, claims that girls like her who aren't stereotypically feminine don't get fat, they get "pudgy".
* "Birthday" by The Sugarcubes, aka Sykurmolarnir, details the love affair between a five-year-old and a fifty-year-old.
* Birthday Episode: An episode where one of the characters has their birthday celebrated.
* Birthday Episode has a running gag where everyone on the Surface Land tour bus keeps trying to sing to SpongeBob, only to get interrupted. At the end of the episode, the cast sings a birthday song to the tune of the theme song.
* Birthday Episode has the Clown perform a trick for Marnie at her birthday party.
* Birthday Girl: An Englishman orders a Russian mail-order bride and falls in love with her even though she doesn't speak English, though he finds out that there's a lot more going on with her than he anticipated.
* Birthday Girl who was presumably motivated by this. Things get more complicated.
* Birthday Hater: This person hates having to celebrate their birthday.
* Birthday is about a couple in a hospital dealing with a husband about to give birth to a child. It takes the whole subject as seriously as it can get, complete with having to deal with a midwife popping in and out of the hospital room, usually never at the time when the husband wants her to come.
* Birthday Party Goes Wrong: A birthday party is getting ruined: the cake is burnt or dropped, the presents are horrible, the guests are annoying... and the birthday kid ends up unhappy on their special day. Unless his family and friends try to make it up for them and cheer them up.
* Birthday Party Goes Wrong: A birthday party is going horribly, so the birthday person ends up unhappy or disillusioned.
* Birthday Suit Surprise Party — Events conspire to leave a character nude for a surprise party.
* Birthday Suit Surprise Party: Someone stumbles upon a surprise party while naked.
* Birth/Death Juxtaposition: A new life is born or introduced shortly before or after another person dies.
* Birth/Death Juxtaposition: Showing one life being given and another one taken at the same time.
* Birth/Death Juxtaposition: Someone dies as someone else is born, how poetic.
* Birth equals cigar between the 1920s and 1960s before the trope disappeared into thin air.
* birthmark were inspired by Hirsch's childhood classmate having acne shaped like the Big Dipper.
* Birth of Japan movie has a tether like rope that he makes the gang hold on to, which makes them capable of running like a train.
* Birth of Kong comic reveals that before Kong was even born, his ancestors as well as his parents fought tooth and nail defending the Iwis from the Skullcrawlers' reign on Skull Island. Now that Kong is the only remaining ape capable of dispatching the invasive monsters, he carries out their duty to keep his territory in check.
* Birth of the Federation. After a successful espionage/sabotage op, you can either leave no trace, or plant evidence incriminating another faction. It's a lot easier for the Cardassians and Romulans to do this than the Federation though.
* Birth of the Federation, every faction can build these to settle unpopulated systems. They mainly differ in appearance, but Romulan ones can cloak, and Klingon ones are armed. Why? Because a warrior is always armed! And a Romulan just feels exposed without a cloak.
* Birthright (2017) follows a princess who has been cursed and impersonated, as she tries to find a way to break the curse and warn her family what has happened, all

while avoiding the watchful eye of her captor.
* Birthright (2017), sharing magic works as a mild version of this. Although the people involved can't hear each other's thoughts, the compulsion to mimic each other's movements allow them to know what the other is doing, even over great distances.
* Birthright: Aaron himself is a normal human, while his own father Sameal and both of his children, Mikey and Brennan, are mages.
* Birthright and I just want to go home!" and sides with the villain he was supposed to kill for the chance of returning to Earth.
* Birthright, but he's not very threatening. His main weapon is an axe, which naturally has low accuracy (especially if against an opponent with Weapon Triangle advantage). As long as the Avatar hasn't been reclassed to something that can't use a sword, they can just walk right up to Garon and use the upgraded Yato to easily take him out in a round or two.
* Birthright campaign setting. Halflings originally came from the Shadow World but fled to Cerilia when a force of evil corrupted their homeland. They and other Cerilian races can travel there if necessary.
* Birthright establishes the five mages as heroes born of Terrenos — except for Sameal, who was born on another world. This means he somehow developed mage powers, jumped worlds alone, became a top-ten mage in a magic-using world, volunteered to fight God King Lore for years, and led the five to seal Lore away from Earth.
* Birthright for Terrenos, the fantasy world visited by Mikey Rhodes when he was a child.
* Birthright has Mastema's golem army, created specifically for the heroes to be able to fight an army in a world where they only have three enemies. The golems are nonsentient and pretty easy to kill individually.
* Birthright has the Hunt of the Elves, which attacks humans. And the Wild Hunt proper — those are unseelie fairies hunting elves and ignoring everything else unless it's stupid or slow enough to stand on their way.
* Birthright he's fought in a very small map that makes it easy to just run up to him and beat him in one or two turns.
* Birthright is a magical realm described by many who escaped to Earth as "a living hell". The land itself is filled with predators that are far more deadly than anything encountered on Earth and they are nothing next to beings such as Lore's demonic legions or diviners spirits. Terrenos has also been devastated by an ongoing war between Lore and its many residents that lasted for untold years.
* Birthright isn't exclusive, they are much better at it than most other Shadow critters.
* Birthright is one of the five mages who escaped Terrenos for Earth, but is the only one of the five not born on Terrenos. Whether he was born on Earth, how he developed mage powers, and how he got the titular birthright to jump worlds is so far unrevealed.
* Birthright loves this trope, as every mage across the series names their most powerful attack as part of the casting. It's a mark of pride to invent a new spell and then name it after yourself.
* Birthright/Pre-New 52 stories reveal that that Brainiac was just one of his probes who recalls the original Brainiac's actual skull-ship.
* Birthright setting focused around the players as important figures - including royalty - who had magical powers granted to their bloodlines when the ancient gods died long ago.
* Birthright setting had the Shadow World. Halflings originally came from there and could return if necessary.
* Birthright setting, the Khinasi culture (the setting's generic Middle Eastern Turkish/Persian/Arabic mishmash) is particularly renowned for its wizards, who are held in even greater esteem than magic-users of the other human cultures, and this is reinforced by the Khinasi getting a cultural bonus to Intelligence.
* Birthright's. In the north live the Rjurik (Norse) and the Vos (Russian/Mongol) while in the south live the Khinasi (Arabs). There are two continents south of

Cerilia which are not described in detail: one is Aduria, which was the original human homeland but is now arid and sparsely inhabited, and the other is Djapar, home to the nomadic Basarji who are the ancestors of the Khinasi. Any lands further south than these are not mentioned or mapped out.
* Birthright. The basic rulebook and accompanying materials focused on the fractured nation of Anuire, which is positioned on the southwest edge of the setting's main continent of Cerilla. Accordingly, it was ocean to the west and south (though with a destroyed land-bridge to the "Old World" continent of Aduria), and land to the north and east. However, as more sourcebooks for the setting were released, the continent's map was eventually fully expanded and the all of Cerilla was detailed, ultimately subverting the trope.
* Birthright, their pre-teen son Michael returns home as fully-grown adult.Then his wife and infant daughter cross over after him.
* Birthright, the Last Girl for a male Avatar is Scarlet. For the female Avatar, Shura is the Last Guy to be encountered in the story while Yukimura is the Last Guy to join the party.
* Birthright, the main protagonist is a young boy from Earth transported to a fantastical realm known as Terrenos. He spends many years living there, training as a warrior and growing up into adulthood. When he returns to Earth, he finds that only just one year had passed.
* "Birthright": The protagonist believes he has thwarted an alien invasion...only for the taxi driver to reveal himself as one of them and capture him. The infiltration was more widespread than he thought.
* Birthright. This is necessary because most human wizards live in cities, but human settlement screws up the magical energy.
* Birthright to return home because he feels guilty his departure tore his loved ones apart.
* Birthright uses flashbacks to Mikey's time in Terrenos, often framed as him explaining something to his family.
* Birthright was named because the titular hero, Alfon Koshaka, wants to reclaim his "birthright", in this case, reclaiming his homeland who was invaded by foreign invaders.
* Birthright: When Rya and Mikey finally reunite, despite Mikey's betrayal and Rya's vow to kill him for it, they react exactly like a deeply-in-love married couple who have been apart for a year.
* Biscuit begins with a character opening an envelope sealed by blood magic.
* Biscuit cuts off his own leg with an axe after being infected by Mr. Fingers' flesh-rotting curse.
* Biscuit's real appearance, at least in her opinion (she's enormously tall and muscular, although not exactly ugly).
* Biscuits' useless oven turns out to be actually very useful, just not for time traveling. It actually turns out to function as a sort of portable, oven-sized
* Bisexuality and multiple partners is the norm for Drows, while pure heterosexuals like Zala'ess and her hubby Sabrror, and pure homosexuals like Mel'anarch are considered abnormal. In both cases, it mostly seems like the drow are puzzled as to why one would restrict their choice of partners to only one gender than any actual prejudice against the orientations.
* Bisexual Love Triangle: A character is caught between a same-gender and opposite-gender option.
* Bisexual Love Triangle: A character is divided between a same-gender and opposite-gender suitor, who represent opposite life choices
* Bisexual Love Triangle: The opposite- and same-gender characters will be used as foils that represent separate life choices.
* /b/ is for /b/tards, /b/astards, /b/rothers, /b/rethren, /b/edophiles, /b/ronies (if they happen to be fans of
* Bishōnen (a human girl turned into a tooth, but still). It's as absurd as it sounds.
* Bishōnen) and hits on him saying "You're very pretty like a doll" and promises him meat and drink.

* Bishōnen and there is also a dogtag in the game with his name on it. This is despite the fact that Gackt himself had nothing to do with the game and didn't even sing a theme song for it.
* Bishōnen anime have to endure this every time they leave the mansion.
* Bishōnen: A teenage or younger adult guy who looks androgynous and pretty.
* Bishōnen buff. Any wonder as to why this series is pretty popular among girls?
* Bishōnen Erune prince and one of the few exceptions for backless clothes with his regular attire, was specifically given a sexy butler costume with his back exposed for the game's anniversary.
* Bishōnen, has a face similar to Safu's (who's a girl), and in chapter 6, a guy hits on him and tells him that he's "very pretty".
* Bishōnen. In one scene Shiro is walking in a public bath and since he's so androgynous guys assume he's female and ogle him before looking conflicted when realizing he's a guy.
* Bishōnen Jump Syndrome: A work has a male target demographic, but appeals to a female one via Bishounen character designs.
* Bishōnen Line: A character with multiple forms may get more beastly and muscular, only to suddenly take on a form where they're less heavily built, sometimes losing quite a lot of muscle in the process. Don't take these forms for granted, since they're often still strong enough to punch you across the room.
* Bishōnen Line: Transformation from a monstrous form into a much more elegant and human-like one.
* Bishōnen (male characters who are feminine or androgynous-looking—some of those dudes do look like ladies, but what separates it from this trope is that it's normally not commented on by other characters)
* Bishōnen villains: Male villains can be forgiven if they are pretty.
* Bishōnen when the camera he's pulling out of his bag is used to take pictures of the trains going by, and quickly leave.
* Bishōnen with her and Suna. This persists until Suna engineers a confession out of Yamato with Takeo in earshot. He's much better afterward, but self-aware enough of his faults that he's hesitant to make any big moves without first consulting Suna.
* Bishamon is also the Japanese version of Vaisravana, who also having other more pacific traits is generally acknowledge as the Buddhist deity of war. As weird as it might sound from a religion known for its non-violence.
* Bishi Bashi game series involves a man who needs to climb up a lot of ladders to reach a toilet at the top.
* Bishi Bashi-like minigame called "Puck Attack" with round head icons which would go up in a fiery explosion if the puck went into the goal.
* Bishi Bashi minigame "The Not Too Great Escape," in which you have to guide escapees hiding underneath trash cans and such across the screen, stopping when the armed guard turns around.
* Bishie Sparkle: Sparkles don't just appear around attractive people, or people (usually) don't just see sparkles around people they think are attractive.
* Bishie Sparkles substitute teacher is why he's failing and needed the tutor. Lincoln can pass as long as he's not looking at her...then she ends up subbing as gym teacher, and every boy in school succumbs to the effect.
* Bishie Sparkle. This stops at the end of the episode, showing the audience that she really is falling for him.
* Bishop Barron comments on this, reading biblical forgiveness not as dismissing that evil was done, but loving someone in spite of all the horrible things they did, no matter if they deserve that love or not. The problem is that this is not done "easily," it is the most difficult thing imaginable.
* Bishop Barron in the fresco is the Devil's hands, which he has put through the Anti-Christ's robes and out of his sleeves so the Devil's hand just appear to be those of another human.
* Bishop Barron or reduces Him to a magical tool that people can manipulate.
* Bishop Barron's works often look at the philosophical and religious background of

the most popular tropes in today's culture.
* Bishop Barron to argue that women can be virtuous without relegating good fathers to the trash heap.
* Bishop Falss, AKA Kyle Clancy wants to ressurrect Mir and take over Platina as the first step to taking over the world and returning it to the prosperity of the first age.
* Bishop is terrible at this though, mostly due to his trigger happy nature. His plans to just kill/destroy the source of the problem and then head back to the future never work because he doesn't unravel the conspiracies involved. Fortunately his actions let the X-Men know, and they do manage to fix things.
* Bishop. It wasn't until later that he was established as an Australian Aborigine (one can assume he learned to disguise his Aussie accent to avoid unwanted attention).
* Bishop Ladja gets considerably more screentime and involvement in the plot in The Remake than in the original. To elaborate, he's the one who petrifies you and your wife instead of Kon (as a last-ditch effort before kicking the bucket). Also, instead of being killed in Talon Tower as in the original, he survives to personally execute King Korol for his failure to defeat the party and ends up being fought at the entrance to The Very Definitely Final Dungeon.
* Bishop Ladja's Kafrizzle spell always totally destroys the target's body in cutscenes, making any reviving method impossible. Thankfully, while his spell is still powerful in the battles with him, it can never kill your members off permanently.
* Bishop Of Battle, J. J. Cooney is trapped inside the eponymous video game, after failing to complete level 13 the game becomes real.
* Bishops — Lieutenants, they are still frighteningly powerful, capable of destroying an enemy garrison single handedly.
* Bishop's with the title villain (and hence, by extension, an unwitting Professor Xavier himself) being the traitor.
* Bishoujo Senshi Sailor Moon, "Moonlight Densetsu", is a cover of "Sayonara ha Dance no Ato ni" from the '60s. The second theme avoided this trope by being written by Naoko Takeuchi herself.

* Bismarck in its breakout attempt in the North Atlantic, both times with negligible British losses.
* Bismarck making her essentially a sitting duck. Without any support by other ships, she was attacked the next morning and had to be scuttled without causing any significant damage to the attackers.
* Bismarck was Bismarck rather than because Napoleon III was gullible. Indeed, he actually came out on top of most of his battles (Mexico and the war of 1870 were the exception, not the rule), and most of the time he was being "played" by said second-rate powers, it was largely because he grasped more or less what they were doing and sympathized enough to go through with it anyway (Italy 1859 is the most obvious example, but the Belgian revolution and the Crimean War came in close seconds). If anything, he fell victim to trying to be someone he wasn't and had the misfortune to run up against the most ruthless and skilled ruler in Europe in charge of the largest and best military on the continent.
* Bismarck would have survived to later slip into the south Atlantic, and wreak havoc on Allied shipping.

* Bismark fleeing the battle, she had still been hit several times and was leaking oil. The oil trail allowed British airplanes to track down the damaged ship and completely cripple it with one lucky torpedo hit, after which it was no effort for the superior British fleet to catch up and blow her out of the water.

* Bist Du bei mir (BWV 15), now more convincingly attributed to Johann Ludwig Bach, was not only once supposed to be J.S. Bach's first cantata, but was even used to argue for his authorship of the St. Luke Passion (BWV 246), a work that Bach demonstrably copied out and probably did perform but may not have written more than a minor part of.

* Bit: As usual, vampires don't age. Duke is in her sixties but appears no older than thirty at most. Vlad, meanwhile, is centuries old and looks like he's in his forties or so.
* Bit: A vampire's heart must be burned to kill them. In some cases, like the very powerful Vlad, even that won't work.
* Bit-by-Bit Transformation: Transforming into a creature body part by body part.
* Bitch Alert better than you and I want everyone to know just by looking at me!
* Bitch Alert, the villainess will have "bitch" and/or "whore" written all over her the minute she's being introduced.

* Bitchy Bitch has this kind of baggage in her backstory, and it keeps dragging her down.
* Bitchy Butch, one of the main sources of the protagonist's permanent foul mood is that she got her heart broken by her first serious girlfriend. First the girlfriend was unfaithful, sleeping with another woman without asking for an open relationship first. When discovered, she declares an open relationship retroactively, and Butchy accepts it on a theoretical level. On a emotional level, she obviously never got over it.
* Bitcoin "satoshis" in each Bitcoin (about 33,000 satoshis to the dollar).
* Bitcom in Australia) where the discovery of a shopping cart in the parking lot causes the two main characters to completely abandon their plans in favour of playing with it.
* Bit: Duke dreams of a world in which men are oppressed by women instead of the opposite, and suffer as they did (i.e. a Patriarchy Flip of the most vicious kind).
* Bit: Duke relates to Laurel that while working as a prostitute she caught Vlad's eye. He then turned her and made her part of his harem for years before she could escape.
* Bit: Duke rips the heart from a newly-made male vampire's chest in the film's opening scene, then lets him view it while he dies.
* Bite Club features a world where vampires are just a variant of humanity who are exceptionally long-lived, incredibly resilient, and gain strength from blood. After centuries of hiding from stigma, they reveal themselves to the world sometime in the early 20th century, and by the time the story opens, they end up assuming positions in organized crime, business, even the priesthood.
* Bite deals with a young woman being transformed into a human-insect hybrid after being infected with a mutagenic virus via a bug bite.
* Bite due to a bug bite, and she lays eggs which spawn more insects and escape. It's implied the spawned bugs will cause each human they bite to suffer the same fate as Casey.

* Bite ends with two women jogging and discussing their upcoming vacation. One of them is bitten by one of the strange bugs that bit Casey at the start of the film, starting the cycle again. It is furthermore implied that the infection could soon become widespread.
* Bite Force had a 7-0 record going into its match against Chomp in 2016. Chomp was predicted by fans and other competitors alike as more fodder for Bite Force due to its hammer being so powerful and unstable that the robot would fall over on its side every time it swung its weapon. Not long after the match began, however, Chomp swung its hammer and pecked through a ventilation hole on Bite Force, striking Bite Force's weapon drive chain and instantly rendering Bite Force's weapon useless. As of 2021, Chomp would remain the only robot to have defeated Bite Force, the latter having since expanded its record to 26-1.
* bite marks on one of his victims which were compared to Bundy's dental records.
* Bite Me! are always dressed in the primary colors, Mike, Jeff, and Greg in yellow, blue, and red respectively.
* Bite Me Fanboy have Alliterative Names: Nick Norton, Jared James, Ray Reed, Tony Taira, and Chris Cole.
* Bite Me!, Greg's marketing degree has gotten him a job spinning signs on the street.
* Bite Me!; her head was later located by the main character being asked to list head puns (in a room full of severed heads) until she groaned loudly enough to be found.
* Bite Me!), one of the Animals (the Safeway stock crew) is vertically kidnapped by Chet, the huge vampire kitty. He's pretty much eaten right away, but still.
* Bite Me - The Gamer's Zombie Apocalypse Series, a web original from machinima who went into hell after the first season, uploaded on 2010, and was saved almost 2 years later with the second season.
* Bite Me!, this is how Jeff, Mike and Greg know how to fight zombies.
* Bite Me! to Lucien. Claire has been flirting with him for the entire comic, but Lucien doesn't really reciprocate until after she's done explaining herself. He starts to indicate a hesitant attraction to her... and then she jumps on him.
* Bite of Affection: Love for somebody is shown through the form of biting them.
* Bite off your own finger and use your Healing Factor. For the curious, it is sort of worth it; the ring is a "cursed" (meaning you can't take it off without a specific spell) ring that increases your protection, which is quite helpful in a game where you can't get much in the way of armor. At the very least, it can be sold for a good sum, which helps you get other stuff.
* Biter Comics, immediately proceeding a car accident a man tries to buy car insurance over his phone.

* Biter Comics the captain orders a prisoner's execution in this manner. A crew member obliges in a bit too literal sense, attempting to actually throw the prisoner out.
* Bite, receiving a mysterious insect bite in Costa Rica first makes Casey sick, pale, and unable to keep solid food down, but eventually she becomes aggressive and territorial, redecorating her apartment with sheets of resin and a layer of gelatinous eggs, and eventually attacking and killing people, focusing on those who have caused her the most problems throughout the movie.
* bites about the presence of Agatha Heterodyne on the train. Not so surprising, though, since Krosp being a cat it's what comes most naturally, and Dimo being a Jäger, again, it's doubtful he would have felt a mere nudge.
* Bite The Bullet tells of a 1906 horse race running seven hundred miles and a prize of two thousand dollars (in 1906 money).
* Bite the Wax Tadpole: Slogans and brand names that do not translate well overseas.
* Bite the Wax Tadpole: The translation is unintentionally offensive or hilarious because the people in charge of exporting the work failed to consider that some things might not translate well.

* Biting-the-Hand Humor” - 21 years later, that sale indeed happened, though Fox was renamed less than a year after the deal was finalized.
* Biting-the-Hand Humor: A work makes a joke at the expense of the company that made or helped make production or distribution of the work possible.
* Biting the Sun is promptly picked up and has their "life-spark" transferred into a new body of their choosing upon death. Some characters actually take advantage of this to get around the normal time limit for body changes.
* Biting the Sun the heroine goes male, just so s/he can produce sperm which s/he stores, then uses (once she switches back to female) to impregnate herself. It doesn't end up that well...
* Biting the Sun, their base personality will get transferred into a new body — effectively meaning mandatory artificial reincarnation.
* Biting too hard on a glass thermometer while it's warming up under one's tongue can cause nasty cuts to its underside, possibly contaminated with mercury if it's an older model.
* bit in terms of damage and mechanics to make sure that, for a dedicated spell caster, they are pretty much always a more effective option than trying to use a mundane weapon.
* Bit: Laurel enters a relationship with Izzy. This results in her becoming a vampire when Izzy turns her.
* Bit: Laurel runs into Izzy at a party, with their attraction being obvious with Laurel's awkward and nervous behavior with her. Izzy eases past her defenses and they get involved.
* Bit: Laurel starts to suffer this and becoming a vampire, when she's unwilling to feed on humans (especially not kill them after, as Duke demands). While she tries to simply not feed, it's too much for her.
* bit less honorable than in the book, wherein Victoria thought Tristran dead and was all set to marry her other beau when Tristran returned - and she was willing to honor her promise to him regardless. She was rather distressed, to be quite honest. Not that it was idle characterization, either: the marriage had a rather startling effect on a certain prophecy.
* Bitlife, suicide earns you the Wasteful ribbon. Worst-case scenario: no one bothers to show up at your character's funeral.
* Bitmap Brothers had cool shades as their schtick. On photographs in game magazines of the day, they often wore sunglasses, and in at least some of their games, cool shades were included as a hidden item or easter egg.
* Bitmap World comic, Ada tries to cheer up her father by telling him this joke: "Why was five afraid of six? Because six seven eight!" He laughs and tells her it did cheer him up. She later tells her brother that she deliberately messed up the joke because he wouldn't have laughed at the "correct" version.
* Bitmap World, has a monkey in his closet. Later in the comic, there's a whole storyline involving monkeys.
* Bitmap World: When Harry comes home from his first day at the new office, he mentions that he had a bad day, "but at least I didn't have to wear a bunny suit." His wife assumed the phrase was some obscure computer jargon, but he was actually referring to one of his coworkers, who was dressed as a bunny.
* bit off a terrorist's arm. Even the IDF's drug-sniffing dogs are really freaking scary, and this holds true for most military dogs around the world.
* bit of profanity. She later apologized, but David Letterman still had a tremendous amount of fun at her expense.
* Bit-Part Bad Guys: Minor villains who only show up to cause brief trouble for one scene.
* Bit Polar running simultaneously, and that's not even getting into the many one shots.
* Bits Fair has a giant idiot hair sticking out, in addition to having a hairstyle that looks like a pattypan.
* Bits Fair, Irya and Ida's dad both exhibit telekinetic powers, which are called "mindlymoving" in the setting.
* Bits Fair is ostracized by the other warrior-boys from his village, while his

cousins are always either mean to him or outright bully him.
* Bits of Me Keep Passing Out may have felt like crap, but he doesn't seem to have had any random body parts going to sleep. He did, however, have them disappearing at one point. Make of that what you will.
* Bits of Me Keep Passing Out: Someone's body parts fall asleep at random times.
* Bits of Me Keep Passing Out: When limbs refuse to cooperate when you most need them.
* Bitstrips gives users the option to make their own comics and many have taken advantage of this.
* Bitstrips scene depicts the user's avatar doing their Christmas shopping at a convenience store.
* bits when you are referring to bits or bytes. Cable One, before they renamed themselves to Sparklight, used to advertise a speed of "50 Megs" or "50 Megs per second" in its radio commercials.
* Bitsy Bears pilot is relatively unattractive, with a dry bob haircut, but the instant she thinks about reforming, she suddenly becomes more attractive with long, wavy hair. (Seriously, it changes between frames.)
* bitten clean in half by something twice as large. Only in Australia, folks.
* Bitten has this as the job of the Pack. They kill anyone who threatens their existence and it was enforcing this rule which drove Elena away. It is later revealed that one of the reasons why Clay bit and turned Elena into a werewolf was because Jeremy thought that Elena saw him transform back into human form. Knowing that he could not stop Jeremy from killing Elena, Clay bit her instead hoping that against all odds Elena might survive the transformation. Elena actually saw nothing and for years thought that Clay acted for purely selfish reasons.
* Bitten Philip meets with an amateur film maker who made a video of two wolves (actually Elena and another werewolf) killing a coyote in a park in Toronto. The film maker gives off a weird vibe but Philip just wants the video for use in a commercial so he does not inquire further. Some time later Philip wants to get more information about the video and goes to see the film maker. However, when he goes to the apartment where they previously met, it is completely empty. When he asks the landlord about the previous occupant, the landlord insists that the last tenant was an old lady who died months ago and the apartment has been completely empty ever since. The landlord further insists that no one could have been squatting in the apartment since the landlord was trying to renovate the apartment for new tenants and would have seen anyone living in it. This establishes that the conspiracy against the werewolf Pack is much more sophisticated and organized than just a few mutts acting out.
* Bitten, the final attack by the werewolf "mutts" begins when one of them, in wolf form, rushes Jeremy from the woods. Jeremy grabs an axe that he earlier used to chop wood and tosses it at the wolf. The axe hits the wolf in the head and kills him instantly.
* Bitter Almonds: Cyanide poisoning leaves the telltale scent of bitter almonds.
* Bitter Almonds: Cyanide poisoning results in the victim smelling like bitter almonds.
* Bitter Almonds: Not everyone has the (genetic) ability to detect the almond smell that is associated with cyanide, and even those who can smell it may not know what it means.
* "Bitterblooms" takes place on one of the primitive Interregnum planets. In it, the heroine comes upon a self-proclaimed "witch" living in an ancient starship who seems to take her to distant worlds.
* Bitterbynde, but again, it's used well and it creates a beautiful and distinct world in the reader's head. By the time the second book rolls around, the easygoing pace is maddeningly slow, the prose has gotten to a point where the reader needs a dictionary handy at all times, and a knowledge of how to diagram a sentence, and the constant interruption with myths and folktales becomes a huge distraction and hindrance. The third book is nearly unreadable, for these and other reasons.
* Bitter Dance seem to use the same generic rap lyrics, despite the fact that they're made by different composers and don't even share the same genre: apparently

the lyrics originate from a DDR song.
* Bitter Feast is a vengeful former television chef, so the score uses the sound of a knife hitting a chopping block in lieu of a conventional scare chord. It's only diegetic the first time.
* Bitter Gold Hearts, Garrett must retrieve a murder victim's corpse from a city mortuary before it's cremated. He pays off the crematorium's attendant to let him take it away, knowing that cadaver-selling to this trope's adherents is a regular sideline for the facility's corrupt staff.
* Bitter Lake performed the entire movie in fursuits with largely immobile faces, they resorted to overacting the body language in a desperate attempt to sell the flat vocal acting.
* Bitter Leaves and Blossoms Bright, she holds on to him, shaking, as it sinks in.
* Bitter Moon plays this utterly straight and eventually wishes she hadn't.
* Bitter Moon. What starts out as a beautiful love story between a man and a woman ends up as two people who have destroyed each other and themselves.
* bitterness and jealousy because the boy she likes has chosen another girl over her.
* bitter Notable for the balance of the portrayal—while drunkenness itself is portrayed very harshly, the eponymous drunk is treated quite sympathetically and gets to do his own lashing out against the banal nature of the life he's escaping.
* Bitter Repercussions. He's mainly worried about the health of his mates and children.
* Bitter Seeds and so are attracted to the spilling of blood. It takes more and more blood to summon them each time, until British Intelligence are forced to commit major acts of sabotage against their own citizens (such as blowing up passenger trains and air raid shelters) to keep the supernatural war effort going. Worse, the more blood is spilled, the more information the Eidolons have on the nature of humanity, a necessary precursor to exterminating us.
* Bitter Seeds had no power of their own but could summon Eidolons to do their bidding. Eidolons however cannot be commanded, only bargained with.
* Bittersweet 17: An ending of childhood, but a developing of selfhood at age seventeen.
* Bittersweet/Barbershop Quartet song plays (with the singers even being featured in some shots).
* Bittersweet Candy Bowl, and Lucy as Lieselotte, an expy of Lucy from a RP on the forums.
* Bittersweet Candy Bowl, BCB! They've jumped from point 1 to 3 recently, and that's only the central pairing.
* Bittersweet Candy Bowl, Blur shows some tendencies towards this with Mike and Lucy.
* Bittersweet Candy Bowl, but cancelled it lest it become too disturbing.
* Bittersweet Candy Bowl, but special mention goes to Chapter 59, with Paulo daydreaming about what would have happened if he had slept with Lucy.
* Bittersweet Candy Bowl, Confrontation just gets worse and worse, with every choice the characters make just making things more dangerous for them.
* Bittersweet Candy Bowl Daisy (Mikie, Davie, Tessie) and Chirpy (girl-kitty, boy-kitty, curly-kitty, messy-kitty, meanie kitty, boy-doggie), etc...
* Bittersweet Candy Bowl David is surprised that boys can have periods too.
* Bittersweet Candy Bowl did this to her poor characters long before anyone else did, and is aware of the various works her fans do.
* Bittersweet Candy Bowl doesn't know when to shut up, and will blab various secrets and give out too much information.
* Bittersweet Candy Bowl has a chronic case of this. Almost every character in the cast suffers from this trope at some point.
* Bittersweet Candy Bowl has Alejandro, Paulo's original "coolness teacher," which was really just Paulo being messed with by the older kid.
* Bittersweet Candy Bowl has an incentive arc named after this, wherein every bad turn the characters could have made is taken.
* Bittersweet Candy Bowl has had several official ones made by the author.

* Bittersweet Candy Bowl has Lucy, who uses this trope, particularly earlier in the comic. She seems to lose the ability over time, as the comic becomes more serious.
* Bittersweet Candy Bowl has Lucy, who was ostracized by everyone in preschool; Mike was her first real friend, and when he later abandoned her in pursuit of his crush, then took her back, she became rather clingy. Augustus, likewise, has no friends at school (and a tough life in general) and fell in with a bad group as a result. Tess also had no friends before the main cast showed up, having lost them all after being a bully's girlfriend, then being dumped by (or dumping) said bully before she is introduced.
* Bittersweet Candy Bowl has Sandy, whose mother wants her to be a model, but Sandy would like to actually have the chance to spend some time with her long-distance boyfriend Mike, rather than constantly being ripped away from normal life to go to shows.
* Bittersweet Candy Bowl has since declared his name to be Augustus, the author still frequently refers to him as Final Fantasy Cat.
* Bittersweet Candy Bowl has this happen with both Tess and Daisy in the same arc, though Daisy is a more pronounced example as boys - who ordinarily ignore her - start making eyes at her. Unfortunately, the boy she actually dressed up for doesn't care.
* Bittersweet Candy Bowl has this, in both serious and Narm varieties.
* Bittersweet Candy Bowl is an example of this, although she tries very hard indeed not to show it.
* Bittersweet Candy Bowl is Mike and Lucy when they are younger, though they later develop romantic interest in one another. Paulo claims to feel this way about Daisy, and Daisy seems to feel this way about Paulo, but there are some hints that Paulo, at least, is somewhat interested in his friend. Mike also sees Daisy this way, much to her frustration.
* Bittersweet Candy Bowl is most violent with the guys she likes at all, David notwithstanding. Species differences among other things.
* Bittersweet Candy Bowl, Lucy kisses Mike after a particularly unpleasant encounter with some youth gang members. She immediately denies that it meant anything, but it obviously did for both parties.
* Bittersweet Candy Bowl, Lucy's pet Yashy is a prime example of this trope.
* Bittersweet Candy Bowl. Mike and Lucy spend most of their time agonizing over this fact.
* Bittersweet Candy Bowl: One way to see Mike and Lucy ever getting together.
* Bittersweet Candy Bowl, Paulo just can't bring himself to be his usual brash, obnoxious and perverted self whenever Daisy's around; instead he instantly shapes up and acts noble.
* Bittersweet Candy Bowl seems like he has trouble being serious and is a Casanova, but he has deep feelings of loyalty towards his friends and, despite his skirtchasing, when he is actually given the opportunity to have sex he is reluctant to do so.
* Bittersweet Candy Bowl, she also manages to convince him that she doesn't actually like him.
* Bittersweet Candy Bowl. The author originally intended him to be far less weird and wacky than his later appearances suggest.
* Bittersweet Candy Bowl. The final version has it as a daydream of Paulo's.
* Bittersweet Candy Bowl, the main character Mike is dating a girl named Sandy, who moved away when they were younger.
* Bittersweet Candy Bowl; this is a double joke as Amaya, the character selling the popcorn (at a slumber party!), ordinarily works at a movie theater concession stand.
* Bittersweet Candy Bowl. This is in stark contrast to the angst, anger, heartbreak, confusion and jealousy experienced by the (many) other characters on an almost daily basis, though Abbey certainly has some personal issues.
* Bittersweet Candy Bowl, When the well-being of Daisy or Lucy is in danger, Paulo tends to forget his perversion in favor of helping them or, at least, trying to. He also reacted this way when Sue got hurt in Confrontation.

* Bittersweet Candybowl, where Lucy, the heroine, wears a pink ribbon, while Mike, the male hero, wears a blue scarf.
* Bittersweet Candy Bowl. With not a single arc or subplot to point to, it's been all angst and drama with no end in sight for years.
* Bittersweet Ending all happening at once in the song "I Do, I Do In The Sky."
* Bittersweet Ending. Ben leaves the Mayflower building after having defeated the demon, but none of the emergency workers seem to notice him despite his injuries. It turns out that he is trapped in the mirror world.
* Bittersweet Ending his body becomes the centerpiece of a benevolent religious movement among the aliens who find it.
* Bittersweet Ending - however, it's then revealed that the villain may still be alive after all…
* Bittersweet Ending, however, shows that there may be something much more sinister going on.
* Bittersweet Ending. Is there any concrete statement confirming this? Watching the fans working themselves into a frenzy as everyone tries to suss it out, the answer remains "Hell, no."
* Bittersweet Ending: It would be a completely happy ending were it not for one tragic detail of how the story has ended.
* Bittersweet Ending. Nevertheless his adoptive grandfather is still dead, and he and Huepow must be separated for good as the world is returned to normal.
* Bittersweet Ending of the "South ParQ Vaccination Special", where all the adults in South Park (along with several other minor characters that only appeared once) celebrate their vaccinations for the COVID-19 pandemic with this, as it puts the pandemic under control... for the adults, at least.
* Bittersweet Ending similarities to Doumori Elementary's 5-3 homeroom students.)
* Bittersweet Ending: The good guys win, but due to terrible tragedies, they will not be able to fully enjoy the victory. Alternatively, the heroes die, but everyone else good is happy.
* Bittersweet Ending: The story has the heroes victorious but at a great cost.
* Bittersweet Ending: Where an ending is mixed with happiness and sadness.
* Bittersweet Ending, where Stark assured him that God could give a soul to a machine if he wanted, as the now-corrupted data that made up Callister's AI faded away from software failure.
* Bittersweet Ending with her. However, they realise that they make each other willing to commit too extreme actions and the Doctor is forced to erase his own memories of Clara. But they both have long lives ahead of them and are both able to continue travelling through time and space in their own time machines, which neither of them thought they would ever be able to do again.
* Bittersweet plays it for laughs, with Rarity gloating that she totally called Pinkie committing suicide.
* "Bittersweet Symphony", their sole American hit, which was certainly more mainstream in its sound than their normal output.
* Bitter Tears: An Anon-A-Miss Fic, Dog!Spike snaps at the Humane Five and the CMC because he, like Twilight, is angry at them for their actions against Sunset Shimmer. Played with in that Spike is not a pet and is just taking the form of one.
* Bitter Tears: An Anon-A-Miss Fic: When Adagio is confronting the heroes at the hospital, she reveals that she witnessed Flash's ill-fated attempt to get Sunset to open up and snapped a picture of Sunset injuring herself. While Flash was really trying to catch Sunset when she lost her balance, the photo's staging makes it look like he's deliberately shoving her down into the park bench. Adagio gloats about how she only needs to circulate the photo to ruin his reputation. It ends up being averted, though; after the Sirens leave the hospital, Adagio deletes the photo, satisfied with the Evil Gloating she's gotten in.
* Bitter Tears: An Anon-A-Miss Fic, when Apple Bloom, Sweetie Belle, and Scootaloo confess being Anon-A-Miss to the Humane Five and explain their reasons for doing so, Rainbow responds with this to make them realize how stupid they were:
* Bitter Virgin, after Hinako finds out she was pregnant via the pain of a miscarriage, her mother immediately asks who the father was. When she says it was

her stepfather, her mother slaps her and accuses her of telling horrible lies (Hinako earlier mentions that her stepfather was the first man she saw her mother happy with). After Hinako ends up pregnant a second time and again names her stepfather, this time with a doctor using bruises on her to suggest that she was raped, the mother believes her and chases the stepfather out with a knife.
* Bitter Virgin before the age of 16. We see it only twice in the course of the series.
* Bitter Virgin exactly will happen, even in the near future for them. That said, both have implied their desire to stay until the other finds someone who is better able to bring happiness to the other, and it could be argued that the devotion they show makes it difficult to imagine that ever happening.
* Bitter Virgin expects Daisuke and Hinako to break up at some point. To be fair, the couple expects it too (both expect the other to find a better person someday).
* Bitter Virgin, female lead Aikawa Hinako cannot believe that anyone could love her. Following years of sexual abuse, permanently marked with a large C-section scar, and dealing with multiple issues including severe androphobia, she can't believe that anyone would like her if they really knew her. In fact, initially her belief that Suwa Daisuke especially could never be attracted to her is what made him safe enough to befriend. This is part of the reason it comes as such a huge shock when he confesses. It's also a two-way street since Daisuke couldn't ever imagine Hinako actually loving him (since she only accepted him because he was completely off-limits).
* Bitter Virgin: In this series, main heroine Hinako is initially convinced that love is not even possible due to her androphobia and past trauma. This results in the sudden realization in chapter 15 being all the more incredible for her.
* Bitter Virgin to Daisuke as he defends Hinako from a man who attacked her. Later he berates himself for being "so uncool!"
* Bitter Virgin, unaware he has known since the start. Later, when Daisuke's sister comes home pregnant and unwed, most of the town (including the mother) think the sister was shameful and slutty. In both cases, the manga treats the women as sympathetic — Hinako's experience is traumatic and Daisuke never thinks badly of her for it, and his sister is shown as being intelligent and friendly. Meanwhile, the mother comes around to accepting her grandchild and the people engaging in the Slut-Shaming are portrayed as being ignorant.
* Bitter Virgin. Unfortunately, the one she's telling it to (the girl she's trying to scare away) is an actual rape victim, with good reason to know how victims behave afterwards.
* Bitter Virgin, was sexually abused by her stepfather and got pregnant twice. She had a miscarriage and lost her first baby, then when she gave birth to the second one, she preferred to give the baby boy up for adoption, so the kid would have a chance for a normal life.
* Bitter Virgin when Hinako is discovered to have miscarried, her mother demands to know the name of the man she has been sleeping with. Hinako immediately replies it is her stepfather (as he has been repeatedly raping her), to which the mother slaps her across the face as she believes Hinako is lying to protect the real man. It isn't until Hinako is pregnant again and the doctor suggests from the bruises all over Hinako that she isn't a willing participant, does her mother believe her.
* Bitter Wedding Speech: A speech that embarrasses, insults, and/or attacks one or both of the newlyweds.
* Bitter Work", Aang has a hard time learning Earthbending in the main plot. Meanwhile, in the B-plot, his rival Zuko is learning a difficult Firebending technique, to control lightning. The parallel shows how the two characters deal with frustration, showing their contrasting personalities all while advancing the plot.
* bit their problems, but it certainly reaffirmed her commitment to Rory, in everyone's minds.
* bit their quality control in the ass. Some of these slaves, having been selected for their technical skills, came up with some fairly brilliant and hard-to-notice methods of sabotaging whatever the Nazis forced them to manufacture. Among the most

prominent examples was the Me-262 jet fighter, whose engines were found to be extremely delicate and would often violently disengage themselves from the airframe if the pilot adjusted the throttle the wrong way.
* bit too deep into the role) leader of the ring and only revealing that he's a cop after the honeymoon.
* bit too far is the "stylin', profilin', limousine ridin', Rolex wearin', kiss stealin', wheelin', dealin', son of a gun" as a wrestler but it's not a far cry from the real life he led outside of the ring in his prime, which really put him in some unfortunate situations later in life with mounting debt forcing him to continue as a performer well into his 50s and even early 60s.
* bit too invested in trying to see her teacher Kakashi's face unmasked as she literally peeps into male's spa where Kakashi, Naruto, and Sasuke are. It's too steamy for her to see anything, however.
* Bittorrent is the killer app for consumer internet download speed, download caps, and hard drive capacity.
* Bit (transgender female/lesbian main character, lesbian supporting characters; subject matter includes queer female romance, transphobia)
* BIT.TRIP Presents... Runner2: Future Legend of Rhythm Alien. Dunitz's design still managed to make it into the game as the unlockable character CaptainVideo.
* Bit: Vlad it turns out is only his heart locked in a box that Duke slowly eats (it refused to burn, which will usually kill vampires). He's later able to regenerate from this back into his full body after someone frees him.
* Bit: Vlad's heart is still alive and beating even when separated from his body (which has been destroyed, in fact).
* Bit: Vlad's heart it appears is his. He can still mind control people from it, and later regenerates after he's freed into his full body.
* Bitz Box: A box of all the excess arms, guns and other add-ons that come with Games Workshop models, and are saved for later customizations. Games Workshop, recognizing this trend, started
* "Biwwy" called "Wazer Wifle" in your inventory, and you can repair it using other Laser Rifles. But, as it turns out, it's not just a Laser Rifle with a gimmicky name, it also has a higher damage than the standard Laser Rifle. Combined with the Laser's faster rate of fire, it becomes a highly viable alternative to the Plasma Rifle.
* Bix Beiderbecke: A celebrated cornetist whose playing foreshadowed cool jazz and bebop. He played with a number of groups, recorded prolifically and was said to be Louis Armstrong's only true equal as a horn player before dying at a young age.
* Bizaardvark. Amelia's little sister Willow acts as this too in that season, but most of the time is only seen with her sister.
* Bizaardvark, but how many people outside the audience know anything about it other than the fact that highly controversial web video star Jake Paul was on it?
* Bizaardvark despite not being related blood-wise. It does help the latter two are fans of the former two's work.
* Bizaardvark of Frankie screaming hysterically at Paige before ripping out her heart.
* Bizaardvark parodies this in one episode as "The Worst Lullaby Ever".
* Bizaardvark, who is the host of a web series where he takes absurd dares. An entire episode's subplot of him being stuck in a storage room after being buried under junk from a shelf could've been easily solved had he used his phone to call for help instead of using it to record himself.
* Bizarrchitecture. You might be woken up at three a.m. by an explosion, or be heading to class when you spot a large spaceship in the middle of the Infinite Corridor, or see a group of students randomly attacking each other with padded weapons. After the first few months, students apparently become quite blasé about the whole thing.
* Bizarre Adventures when Black Goliath's size changing is depicted as sucking innocent aliens into a singularity when he grows and spitting them back out as a melded blob when returning to normal.
* Bizarre Alien Biology: Aliens and other non-humans have stranger anatomy than

humans.
* Bizarre Alien Biology allows him to survive in a vacuum for short periods) and almost takes Archer with him.
* Bizarre Alien Biology, and turians and humans can have allergic reactions to each other's tissues.
* Bizarre Alien Biology is explained here. All the playable races are descended from creatures made by the Titans: so of course they are compatible physiologically. However it doesn't seem like they are all capable of interbreeding. Of course, that is hardly going to stop people from getting it on, it could even be seen as a bonus.
* Bizarre Alien Biology: Jeffs from the Worm Jeff Saga have a gland that produces a powerful acid located near the stomach, and Drone Leaders have this replaced with an organ filled with what is essentially lighter fluid, which they ignite using a "flint" in their mouths to spit huge fireballs.
* Bizarre Alien Biology. The majority of fighters are male, and most of their males are stupid enough to go full "barbarian horde" if uncontrolled because most of them never get the necessary diet supplements to reach maturity. The upper officer cadre of each ship is thus occupied by the more rational females, with mature males in ultimate command (since the younger males will only follow an alpha).
* Bizarre Alien Biology the one who severed them in the first place. And if the limb in question ends up on the wrong side.
* Bizarre Alien Biology to justify the trope). It can be ejected from the main body of the ship if necessary.
* Bizarre Alien Biology, which explains why Squiggoths only show up in large Ork warbands).
* Bizarre Alien Biology work on Chuuls, since they already have a parasite in their brain. Attempting ceremorphosis on a chuul kills the tadpole, but turns the chuul into a hideously mutated creature known as an uchuulon.
* Bizarre Alien Psychology: Aliens think a lot differently than humans.
* Bizarre Alien Reproduction: Aliens have a bizarre way of reproducing.
* Bizarre Alien Reproduction: Aliens reproduce differently from Earth organisms.
* Bizarre Alien Reproduction. It should also be noted that the Fishmen probably have different views of beauty than humans.
* Bizarre Alien Reproduction. Shifters reproduce by mitosis, the shifter parent is replaced by two children. The offspring shifters have no problem with mating with their other parent.
* Bizarre Alien Senses: Aliens have senses that Earth lifeforms do not have.
* Bizarre Alien Senses — echolocation, electroreception, vibratory sense, etc — can reveal how different even an ordinary room must seem to them.
* Bizarre Alien Sexes: Aliens have different genders or more genders than humans do.
* Bizarre Alien Sexes: Aliens having different genders or more genders than humans.
* Bizarre and Improbable Golf Game it gets ridiculous. There are courses on the moon and in Hell. All of this is apparently legal.
* Bizarre Baby Boom: A bizarre (possibly supernatural) event happens and all the babies born after/conceived at the right time have super powers.
* bizarre backstory seems to indicate that he was somehow involved in every negative chapter of US history.
* "Bizarre Bazaar", which focuses heavily on the music box, is placed in-between "Family Fishing Trip" and "Cursed!".
* Bizarre Beverage Use: Using a beverage for something besides drinking.
* Bizarre, but perhaps inevitable in a secular age: Many entertainments with explicitly religious themes that were previously attacked by Christians as being blasphemous are now widely popular with those critics' older selves, or with younger generations within that demographic, because they are now viewed as
* bizarre episode "Hard to Say Anything" has Sweetie Belle pairing up Feather Bangs, who had just lost to Big Mac in a contest to win somepony's love, with the three fangirls who had been following him throughout the episode. It's not even a matter of "Pick one," she just encourages him to go with all three of them, and

nopony acknowledges this as being out of the ordinary. Perhaps it's just another example of real-life horse behaviour leaking into pony society.
* Bizarre ER on Discovery Fit & Health seems to love profiling these. Mutilated fingers have popped up too many times to count, from fish-hooks, a butcher's accident, a farmer gored by his bull, and quite a few more.
* Bizarre Human Biology: Not all human beings are quite the same on the inside.
* Bizarre Human Biology: Someone has weird anatomy in spite of being human.
* Bizarre Inc.'s 1992 house hit "I'm Gonna Get You" predominantly repeats either "Why waste your time? You know you're gonna be mine. You know you're gonna be mine. You know you're gonna be mine." or "I'm gonna get you, baby. I'm gonna get you, yes I am!".
* Bizarrely, a lot of American ninjutsu enthusiasts actually went to the trouble of learning Ninjutsu from actual Japanese practitioners. These practitioners learned it in clear lines of delineation from Masaaki Hatsumi himself. Effectively, this means that there actually are a bunch of guys in Kentucky and other VERY American places who knows ninjutsu as much as any of the "legitimate" practitioners in Japan today.
* Bizarrely, "Coming Home" by Diddy-Dirty Money is mostly associated with Skylar Grey, despite her being virtually unknown and Diddy a superstar.
* Bizarrely, "cowabunga" also becomes connected to Bart Simpson, as one of his typical catchphrases, even though the writers were intentionally invoking the use in
* Bizarrely, Daniel Tosh from Tosh.0 has appeared in sports commercials wearing an atrocious wig and calling himself a professor. It's like they wanted him to help get them attention, but they also didn't want people to know that it's him.

* Bizarrely enough, on the (now-cancelled) Russian production, despite only having one local production with dubs of American bits (taken from Open Sesame), dubs of later segments (like Play with Me Sesame and Global Grover) re-cast the majority of the American Muppets with completely different voices (save for Bert and Elmo), even with the Open Sesame bits still being included in episodes.
* Bizarrely enough, Ron Funches; throughout his sets, he's always mellow, warm, and friendly, and it's not even much of an exaggeration of his natural self. Of course, he's the first to mention that
* Bizarrely enough, this actually has yielded some positive results in the war against terror. Amateur sleuths on 4chan got together, analysed propaganda videos taken by Islamist terrorists and determined the location of troops of the Islamic State terror organisation by comparing the video footage with pictures on Google Maps, then sent the information to the Russian military via a savvy junior officer, who convinced his superiors of its validity. They promptly decided to bomb the sites to oblivion. This kind of thing has been confirmed to have happened at least twice.
* Bizarrely, fish such as kraken, carp, rays, jellyfish, and crustaceans still live on the Jade Sea's surface though have (with the obvious exception of crustaceans who
* Bizarrely (given many of the examples on this page), the Nazis promoted a moral substitute for the Christian faith and churches:
* Bizarrely given the last point, marijuana seems to be still illegal, as Hermes makes frequent references to "flushing things", and "that's not a cigar...and it's not mine"; in the election episode, there's also a lobby for the legalization of hemp.
* Bizarrely he also apparently featured a play Weekend at Barney's in which he pretended to be dead with Ted and Marshall pretending to carry him around when in fact he was alive the whole time. Apparently, women wanted to sleep with him for

some reason while he was doing this. Robin questions the logic.
* Bizarrely, in some parts of the American South up to the mid-20th century, "cock" was the common vulgar term for the vagina, which naturally led to some hilarious mix-ups when Southern males mingled with people from other parts of the country.
* Bizarrely, it was one of the Nazi battles that featured the most dehumanizing racial caricatures in any of these shorts, the target here of course being...blacks. In "Jungle Drums", a couple of Nazis have tricked the superstitious natives of
* bizarrely powerful relative to the characters you're controlling. In the DS games, this can result in the strange circumstance where you can tell a character is recruitable because their stats are much worse than those of their comrades, even if the character in question is supposed to be an elite warrior.
* Bizarrely subverted by the scene in which Pete Campbell goes about expressing what he (in his upper-crust WASPy ignorance) thinks are more or less enlightened views on race to the elevator operator (who is of course black in this
* Bizarrely, that jingle is know widely outside of Canada; in the U.S. Pacific Northwest, that is (just replace the "Can-a-da!" part of the jingle with "U.S.A.!"). For some reason, Sleep Country decided to expand its brand.... but only into Washington and Oregon, where the jingle is very much a local in-joke, with one of Sleep Country's commercials
* bizarrely. The first time, he throws them at Chris as distraction (and then wipes the floor with him before catching his glasses to put them back on) before the boss sequence begins. The second time is during the final battle.
* Bizarrely, the flat, minimalist look that Microsoft created Windows Phone to distance it as far as possible from iOS and Android very quickly inspired Apple to drop their own iconic 3D, glossy look in favor of flat colors and clean lines as well, with even app icons now composed solely of solid colors and gradients. Android has since followed suit. Even KDE, one of the desktop environments for Linux, has a considerably flatter look now.

* Bizarrely, when Will and Emma got back together, he felt the need to show her his porn collection that helped him get through being single. She is completely weirded out.
* Bizarre New World the protagonist discovers one day he has the power of flight; partway through the series everyone else on Earth spontaneously acquires the power of flight too.
* bizarre or nonsensical shippings that float around about Harry Potter, one book had a scene where Harry and Hermione discuss if the Hogwarts caretaker and the librarian were secretly a couple.
* Bizarre parodied this, with a skit featuring a man and woman waiting anxiously for correspondence from their son's kidnapper. After revealing that they'd been sent a few pieces of him already (fingers and toes) they received a new box. When the wife asked what part of him was in it this time, the answer was, "His shit." In an alternate ending, it was instead his foot, to which the parents happily exclaimed, "Now we have enough to put him back together again!"
* bizarre rotations of portions of his body cause his heart to end up in his stomach and his lungs to end up in his arms.
* Bizarre Seasons: The seasons change randomly or don't work the way ours do.
* Bizarre Sexual Dimorphism: Alien women are created almost the exact way as beautiful women but Alien men are created as monsters.
* Bizarre Sexual Dimorphism, or largely indistinguishable unless you take a look at their genitals.

* Bizarre Taste in Food: A character does weird things with their own food.
* Bizarre Taste in Food: Character does something peculiar to their food on the regular.
* bizarre thought processes, gaining control over her subconscious and having no emotions or thoughts beyond the surface, which obviously defies human classification.
* Bizarre Uprising. Vampires claim to trace their blood line back to Jesus, and their dependency on blood is caused by Jesus's perfect being DNA not working so well with Mary Magdalene's human DNA.
* bizarre weapons He's armed to the teeth with a frying pan, some hammers, a fish bowl, a diving helmet, a bucket, a torch, and many more.
* Bizarro. Batman wears glasses in an attempt to hide his secret identity, but fails because he forgets to take off his Batman costume.
* Bizarro Comics, and Mxyzptlk is forced to find a champion to help him play A's games. After failing to convince Superman to help, Mxy tries to find an alternate version of Supes who will, only to get stuck with Bizarro Superman. An attempt at teaching the dim-witted and eccentric Bizzaro about being a superhero just leads to Bizarro making his own comics, which leads into the anthology of various strange, non-canonical tales involving DC Comics heroes that takes up much of the rest of the book.
* Bizarro Comics anthology. When a Bizarro starts walking on his hands and generally acting too strange even by Bizarro standards, all the children tell the adults not to watch or listen. (It is Bizarro World, after all.)

* Bizarro from a supervillain, she calmly picks them up and flies them home:
* Bizarrogirl about her desire to move on and forget the past. Later both women find themselves in a cafe, talking about Linda's future plans right before a car crashes into the place.
* Bizarrogirl. After coming to understand human concepts of "good" and "evil" and remembering she killed a man only because he was loud, Bizarrogirl feels so horrified and guilty she chains herself to a rock. As she cries bloody tears she

wonders if "self-punishment ever ends".
* Bizarrogirl and General Lane and carried out by her arch-enemy Reactron.
* Bizarrogirl: Bizarro Lex Luthor is explaining to Supergirl and her twin where the current threat came from when a giant critter turns up all of sudden and chomps on him.
* Bizarrogirl: Bizarro Lois and Bizarro Jimmy find Bizarro right when he's about to leave the planet together with his cousin. What does Bizarro comes up when he has been caught red-handed?
* Bizarrogirl, Bizarro sent his cousin to Earth because their homeworld was being devoured by the "godship".
* Bizarrogirl, Bizarro World is coming under attack from an alien monster called "Ash'ka'phageous" and its spawn.
* Bizarrogirl. Dr. Light blasts Bizarrogirl from the upper atmosphere with a massive blast of light, but it’s intended to depower instead of obliterating.
* Bizarrogirl: Gangbuster fires at Bizarrogirl. It does nothing, he knows it will do nothing — he lives in Metropolis! — but he keeps shooting.
* Bizarrogirl: In Bizarro World, newspapers include children crayon doodles instead of pictures, fitting with the backwards nature of the Bizarros.
* Bizarrogirl. In order to defeat it, they need Bizarrogirl's unique power, but she gets real frightened and runs away until Supergirl's words manage to encourage her back to the battleground.
* Bizarrogirl is naturally bulletproof. During the story, Gangbuster shoots Bizarrogirl, but the bullets do nothing.
* Bizarrogirl, Jimmy Olsen is captured by Bizarrogirl and knocked out. When he comes around he is chained to a wall in Bizarrogirl's lair.
* Bizarrogirl, Jimmy Olsen saves a child from being run over. Shortly after, a fake cop abducts him. Four issues later, Supergirl and Cat Grant have to work together to find him and several more children kidnapped by Dollmaker.
* Bizarrogirl, Kara braids her hair into cute twin pigtails which make her look younger than she is.
* Bizarrogirl, Kara bursts into her lair, swoops in on her twin and slugs her from behind. Shortly after she repeats the maneuver when Bizarrogirl is about to fry Gangbuster.
* Bizarrogirl, Kara declares that Supergirl is retired for good. Before the end of the next issue she is wearing her blue-and-red outfit again.
* Bizarrogirl, Kara's reaction when Lana tells her about the Supergirl-looking Bizarro destroying the city.
* Bizarrogirl on the telephone. She hears their entire conversation, but she misses the part about Supergirl's secret identity being Lana's "niece".
* Bizarrogirl opens up with a battle between Supergirl and Superwoman. It looks like a flashback narrating the final fight between both super-beings until the legions of undead make clear Kara is having a nightmare.
* Bizarrogirl out of her despondency and get her to fight her counterpart.
* Bizarrogirl's Bizarro counterpart. She looks like Kara Zor-El... except for her cracked, chalk-white skin and her downright loony, backwards behavior.
* Bizarrogirl's destruction. Every night she has nightmares in where legions of the dead accuse her of letting her family die and bringing destruction and pain everywhere.
* Bizarrogirl suffers several nightmares where her enemy Superwoman, her parents and all deceased Kryptonians turn into walking, rag-wearing skeletons and try to drag her down into Hell.
* Bizarrogirl, Supergirl befriends her Bizarro counterpart after defeating her.
* Bizarrogirl, Supergirl dreams she's slugging Superwoman while shouting: "You destroyed our planet!"
* Bizarrogirl, Supergirl encases Bizarrogirl in a chunk of ice which her doppelganger breaks free from easily.
* Bizarrogirl, Supergirl hits Bizarrogirl from behind when the latter is distracted.
* Bizarrogirl, Supergirl is barely fast enough to slip her molecules between the

molecules of solid objects.
* Bizarrogirl, Supergirl reveals The Flash taught her how to vibrate at Superspeed to slip her molecules between those of solid objects in order to deal with enemies that try to freeze you by coating you in ice. Kara uses his lessons to escape when Bizarrogirl tries to encase her in stone. However it’s a last resort because she is usually not fast enough.
* Bizarrogirl, the titular character's eyes give off a red glow when Jimmy calls her "Bizarro Supergirl" loudly. Later, Supergirl's eyes give off an ominous glow when she faces up to a godship's spawn.
* Bizarrogirl visits Bizarro World's Metropolis', an odd, unsettling place where buildings bend and twist in ways that completely ignore gravity and other laws of physics.
* Bizarrogirl walks into her office and finds Cat Grant sitting on her couch in the dark and wanting to talk about Lana's connection with Supergirl.
* Bizarrogirl will engage and keep her Bizarro counterpart busy as Dr. Light gets ready to shoot a depowering energy blast.
* Bizarro had a Sunday strip several years ago, entitled something like "Three More Signs of a Paperless Economy." The kicker? The third panel shows a bathroom stall with a monitor showing an image of a roll of toilet paper!

* Bizarro Universe — A lot of things in that world are reversed from the usual context, good is evil or vice versa, etc.
* Bizarro Universe: A universe where everything is the opposite version of its regular counterpart.
* Bizarro Universe: The Happypasta parody universe, home to characters such as Splendorman. Jeff the Hugger, the Happypasta version of Jeff the Killer, has occasionally been depicted as the "real" Jeff's adversary.
* Bizarro Universe uses to dole out punishment to anyone he's not happy with.
* Bizarro Universe version of the site's personification. She's rather aggressive for this trope, though.
* Bizarro Universe, which gets hijacked by the Autobots and used to hold the world hostage to their demands.
* Bizenghast, Edrear and Edaniel go to by a present for Dinah. Since Edrear has only ever left the Mausoleum for work, he knows nothing about human society. Because of this, Edaniel managed to get him in a skirt as part of his human

disguise. Edrear also asked for directions to a store that was directly behind him(although this may be more to do with the fact that he is illiterate) and apparently put a quarter in a mailbox to see if a gum ball came out.
* Bizenghast is depicted as having notably darker skin than his siblings in the manga, but it's not stated what their heritage is. They're all give the same light skintone in official art.
* Bizenghast. Later, we get Maphohetka, who definitely had some kind of supernatural ability, as evidenced by her surviving being stabbed in the chest, and is an antagonist to Dinah. In her defense, Maphohetka may be innocent of whatever she was accused of (since the exact nature of Bizenghast's misfortune is never revealed) and the townspeople do actually verge on the "evil and bigoted" side (keeping up their witch lynching traditions well into the late 19th-early 20th century).
* Bizenghast, Vincent is accused of witchcraft and nearly hung by an angry mob wielding these.
* Bizhub". Yes, the emphasis does make it as awkward sounding as forced.
* Biz Markie's "A Thing Named Kim": "She didn't look none like she looked across the room/She had big broad shoulders and her titties was big/They were filled with silicone, and her hair was a wig... So I hurried out and left, she said, "Please stay"/I said, "Sorry money grip, I don't go that way"/So I stepped out in a hurry, to gather my wits/And thought

* Bjakamál, last stand of Rolf Krake's hird is a stirring poem based on an unknown 5th-6th century struggle in Denmark, it was recited by Olav Haraldssons (Digre/Fat) Skjald before the Battle of Stiklestad (1030) where he fell and became Olav the Holy to strengthen the resolve of the Royalist army. The Song of the Battle at Maeldon could be added here as well, though that is definitely a RL event.
* B.J. and the Bear: The title character of the latter series, who in the former show tried to put truck driver B.J. McCay out of business by pinning various crimes on him. In his own series, Lobo always tried to manipulate various schemes to his advantage, although in the end he would always come up with a way to stop crime.
* BJ And The Bear: Wunza hunky truck driver, wunza chimpanzee. Together they solve other people's problems.
* B.J. and Winchester set Sgt. Zale up for one of these in a later episode of
* B. J. gets one too. In the end he lets her go because he didn't want the war to dictate his life anymore than it already did. Leaving your wife and kid for a woman he met on the frontline? He could never leave
* BJ, her student/adopted son Hugo only hears her side of the conversation and has no idea what's going on. The explanation doesn't really clarify much.

* Bjork which only peaked at #88. Several singles were hits on the dance charts, though.
* Bjørn Ironside, a Viking ruler and one of the sons of Ragnar Lodbrok.
* Björk and artist Matthew Barney. They eventually broke up after 13 years, and the separation was incredibly tumultuous, especially considering they had a child together. These experiences led Björk to work on the album Vulnicura.
* Björk appears in bizarre outfits, most famously her swan dress.
* Björk band that was one of the first Icelandic artists to ever find any mainstream recognition outside of Iceland. Whereas the Sugarcubes are fondly remembered by fans of 80's alternative music, Bjork's popularity completely eclipsed theirs by the time she released her solo debut album.
* Björk "Birthday", didn't even make the Top 50. By far their highest-charting

single was the appropriately-named "Hit", which made #17.
* Björk fluids flow in and out of Björk's nose, mouth and ears, but she doesn't seem to be bothered by it.
* Björk (in which Matmos played a role in the programming), there are various sampled sounds, like shuffling cards on "Cocoon" and "Hidden Place", snow being walked upon on "Aurora", and ice being cracked and smashed on "Frosti."
* Björk" is actually pronounced "Byerk", which the Icelandic singer has pointed out rhymes with "jerk".
* Björk is a more distant shot, with Bjork's face sticking out of a bizarre costume.
* Björk is a renamed cover of the less well-known Betty Hutton song "Blow A Fuse".
* Björk. It was actually "I...am...grate...ful...grape...fruit!" Which is perfectly sensible.
* Björk — "Big Time Sensuality" in 1993 (peaking at #88) and "Earth Intruders" in 2007 (peaking at #84).
* Björk once had a stalker by the name of Ricardo Lopez. He had planned to kill her with a letter bomb which would launch a discharge of corrosive acid upon opening, and he kept a video diary detailing the process of his plans. During the course of the diary we can clearly see Lopez' mental health erode, culminating in the final entry in September 1996 with him shaving his head, painting his face, and blowing his brains out with a revolver, on camera.
* Björk period, she dyed her hair auburn and briefly bleached it blonde.
* Björk, probably the inspiration for SVEDKA_GRL (See below under Real Life).
* Björk" revolves around a book about Björk that writes itself as the story unfolds.
* Björk's "Bachelorette" video is a multiply recursive story of a girl who finds a book in the woods... about a girl who finds a book, in the woods.
* Björk; she starts singing in a whispery voice, even making "Shh" sounds, and then belts out "You fall in love!"
* Björk taped his own suicide on video while a song of hers played in the background, after sending her a booby-trapped parcel intended to squirt acid in her face.
* Björk, two robots (allegedly both of them were modeled on Bjork) kiss and embrace each other.
* Björk was leaked 2 months before its original release date. This caused the album to get released earlier than what was initially planned.
* Björk went from being one of the lead singers of The Sugarcubes (which helped put Iceland on the music map) to having a more successful and arguably better solo career. You probably haven't heard from the other lead singer, Einar Örn, lately if you're not from Iceland.
* Björk, where she imagines living on top of a mountain and sliding down from the cliff, was inspired by a dream.
* B.J. "Terror-Billy" Blazkowicz = Adolf Hitler, though more like Staatmeister
* B.J. Thomas' "Billy and Sue" (1966) ends with Billy getting one of these from Sue while fighting in a war, and deliberately letting himself get shot and killed in response.

* Black 2 and White 2, the player character still keeps their traditional silence throughout the main course of the game. As an actor at Pokéstar Studios however, the character is able to recite full lines of dialogue during the movie.
* Black 2 and White 2, you actually do encounter Cresselia. Other human ghosts have appeared in Pokemon, with a butler ghost and a little girl ghost in the Old Chateau in Gen 4. It's not said what killed them, but a notebook in "Platinum" has odd writing in it, most likely referring to Rotom.
* Black 2, one can assume whenever you're up against villainous teams they're trying to attack you specifically and you're only using your Pokémon in self defense.
* Black 2 / White 2, who appear in various TV shows and are famous singers, too.
* Black 47 - yet its three highest billed actors are Australians Hugo Weaving and James Aitken Frecheville, and British Jim Broadbent (although this character is at least an Anglo-Irish landlord). Irish actors Moe Dunford, Barry Keoghan and Sarah Greene do at least play prominent supporting roles.
* Black★Rock Shooter are basically this, complex designs and scenarios, with lots of color motifs and use of CGI. All employed to illustrate the conflicts of the main characters.
* Black★Rock Shooter being created to keep the figures, plushies, shirts, posters, and who-knows-what-else selling. The merch still charges ahead of everything else; a figurine bundle with the anime DVD was announced before the anime was even halfway through airing.
* Black★Rock Shooter have even gone on to say that the reason why they were unable to get the rights to the TV series was because of the expensive toy dealings that were practically tacked on to the rights.
* Black★Rock Shooter. If you count the OVA (which was released two years earlier and is in a separate continuity), then it had nine episodes in total.
* Black★Rock Shooter in a fight against Black Gold Saw), the anime series in particular gives it the luxury of dishing out most of the killing blows in the other world (it's still just a regular sword though).
* Black★Rock Shooter is a Gothic take on the genre, with the heroines dressing all in black and toting huge guns/swords/scythes.
* Black★Rock Shooter, long black coat with a cracked white star emblazoned at the back.
* Black★Rock Shooter of girl-girl couples being immature "practice" for "real" boy-girl relationships.
* Black★Rock Shooter of Miku's. A lot of pics emphasis the dark/light duality.
* Black★Rock Shooter speaking very much unless it's the close to the end of the story.
* Black★Rock Shooter, who dies the same chapter she's introduced.
* Black★Rock Shooter winter 2011-2012 anime is an excuse to show off how much dakka a girl can pack.
* Black☆Star does it again against Atlas, starting from the arm all the way up to its ear to give it the final blow.
* Black☆Star himself tells this to Kid after challenging him to a fight because he was mad at losing several previous fights. Kid obliges by literally stomping Black☆Star's head into a crater.
* Black☆Star, Tsuji, and Rowena had to the fight the midsection of the titanic Anria, Gladiolus.
* Black Adam did this to Father Time in the "World War III" miniseries, at the same time as he cracked a joke about Americans always trying to "save face".
* Black Adam is one long, tragic, and incredibly cruel example of chain yanking.
* Black Adam outright included the entire Shazam Family, not even bothering to try

and hide that plot point.
* Blackaddder the Third, a French torturer tells the soldier guarding Blackadder and Baldrick that he should leave, since what she is going to do will be so horrifying. He states his belief that he can stomach it, to the hag's increasingly frantic protests, until he asks for a description. She whispers to him, and he runs off about to vomit.
* Blackadder, after Blackadder comments that being Lord Executioner is itself a death sentence, Melchett says he has a list of candidates. He announces "Candidates for the position of Lord High Executioner", unrolls a scroll, says "Lord Blackadder", and then rolls the scroll up again.
* Blackadder, always prefaced by the words "I have a cunning plan". Subverted as these plans usually fail, or are so stupid that is no way to actually enact the plan. "Pathetic! Absolutely pathetic! Contemptible! Worth a try!"
* Blackadder and denies his own name and position within the British army. Cut to Blackadder bashing his head against the table.
* Blackadder and explains the symptoms induced by it, oblivious to the fact that he's exhibiting each of them as he describes them.
* Blackadder) and posing for a less than wholesome portrait for his friend; while all the while Blackadder steals his money, insults him and takes advantage of his generosity all the way through the series and Percy does nothing to complain.
* Blackadder: "...and so the bishop said, 'I'm sorry Officer, I didn't realize you meant organist!'"
* Blackadder, and they are sentenced to be burned alive. However, the Queen provides them a doll that resembles the Witchsmeller, who catches fire himself while they're unharmed. The episode implies that the Queen is the real witch.
* Blackadder - and when Edmund grabs the statue of Mary, it opens a secret passage. Subverted immediately afterwards when the knights burst in, find the room empty, and immediately figure out that they must have used the statue of Mary to open a secret passage and follow them.
* Blackadder as "climbing out of our trenches and walking very slowly towards the enemy" with the drawback being that "everyone always gets slaughtered in the first ten seconds." The depressing thing is that this is very close to the tactics the Allies used in Real Life, at least early in the war.
* Blackadder as Edmund is dying, his father (who never gets his name right) finally calls him by the right name, only for it to be resubverted moments later:
* Blackadder: Back And Forth, Baldrick causes the extinction of the dinosaurs when he drops his underpants on the ground after killing a T-Rex with the smell alone.
* Blackadder Back And Forth never wrote any plays and is mildly famous for inventing the ballpoint pen.
* Blackadder, Baldrick is running for office and tells his boss he thinks his first name is "Sodoff", because all the other kids used to say "Sod off, Baldrick!" Blackadder notes him down as "S. Baldrick". Later Edmund is interviewed by real life political pundit Vincent Hanna (playing "his own ancestor"):
* Blackadder because of his father King Richard's political machinations.
* Blackadder, before worrying that he may be pricing himself out of the market.
* Blackadder: Blackadder accidentally lets slip how he really sees the relationship between himself and the prince:
* Blackadder, Blackadder and Baldrick are in on Percy's secret money stash.
* Blackadder, Blackadder and Prince George are trying to re-write Dr Johnson's dictionary.
* Blackadder", Blackadder comes up with some snappy one-liners when he's facing the firing squad ("This side of the wall or the other side?"). However, when it starts to look like his planned last-minute reprieve isn't going to happen, his nerve breaks and his actual last words (had the reprieve not happened anyway) would have been "Okay, something's gone badly wrong here. Baldrick, you're mincemeat!"
* Blackadder. Blackadder has apparently sold out Queen Elizabeth to a master of disguise for a single key bit of information — in this case, Nursie's habit of dressing up as a cow at dress-up parties.
* Blackadder, Blackadder kicks the cat, the cat pounces on a mouse, the mouse bites

Baldrick's rear, and if Baldrick wants to do any kicking down Blackadder says he'll have to find an earwig.
* Blackadder: Blackadder reveals he discovered Nurse Fletcher Brown was a German spy when he asked her if her well-educated boyfriend had been to "one of the great universities: Oxford, Cambridge, or Hull. You failed to spot that only two of those are great Universities." To which General Melchett, a Cambridge man, replies, "That's right! Oxford's a complete dump!"
* Blackadder, Blackadder says he wishes his tombstone to be inscribed:
* Blackadder calls Baldrick "Balders." This is a particularly sweet example, since Blackadder normally treats Baldrick poorly; it shows that underneath, he really does care about the guy.
* Blackadder. Discussing the soldiers' propaganda magazine, Blackadder describes it as a work of fiction since it does nothing to show how the soldiers actually are, and is better used as toilet paper.
* Blackadder disgusting dish he serves is "café au lait" made by adding mud and dandruff to boiling water and spitting in it.
* Blackadder: Edmund at least from second season onward. Everyone except the title character is either insane, stupid, or both.
* Blackadder". Edmund Blackadder is introduced to Duke McAngus as the man in charge of the entertainment.
* Blackadder: Edmund invites Prince George to star in his new play, "Thick Jack Clot Sits in the Stocks and Gets Pelted with Rancid Tomatoes''. George naturally agrees enthusiastically.
* Blackadder. Edmund tells Mr. Hardcastle that the Prince wants his daughter for his wife. Hardcastle, misunderstanding, responds:
* Blackadder, Edmund torments Dr. Samuel Johnson by making up words such as "contrafibularities", "anaspeptic", "phrasmotic", and "interphrastically".
* Blackadder Edmund uses a textbook to hide raunchy paperback novels, each of which just happens to have that week's episode title.
* Blackadder engaged to. This episode also spoofed the young ages at which said marriages took place when, in the end of the episode, Edmund is married to a 9 year old princess. The final episode of the third season involved King George III announcing that he wished his son to marry a rosebush. Not just any rosebush; a specific rosebush.
* Blackadder episode "Beer", Blackadder's puritanical relatives are mistaken for strippers, as is Queen Elizabeth herself.
* Blackadder episode "Born to Be King", Edmund challenges McAngus to a duel; he flails his sword around, trying to look like he knows what he's doing, then McAngus takes one swipe, cutting his blade in half.
* Blackadder episode "Chains" contains a variant in which Blackadder appears to be savagely upbraiding the shocked Queen and Melchett, until the reveal:
* Blackadder episode "Corporal Punishment", Blackadder's jailer is impressed at how calm and relaxed he is about his firing squad (because he thinks he's going to be reprieved).
* Blackadder episode, despite being unaware of the future medium of television, Edmund nonetheless hopes that "Hundreds of years from now I want episodes from my life to be played out weekly at half past nine by some great heroic actor of the age." (To which Baldrick replies: "And I could be played by a tiny tit in a beard.")
* Blackadder episode "Dish and Dishonesty", following the death of Sir Talbot Buxomly:
* Blackadder episode "Dish and Dishonesty", he fixes the result of an election by taking the place of the only eligible voter (who "accidentally brutally cut his head off while combing his hair"), and also replacing the returning officer, who "accidentally brutally stabbed himself in the stomach while shaving."
* Blackadder episode "General Hospital", during a discussion of spying, Melchett becomes so concerned with what's "a dirty word" and what isn't that he loses touch with the actual subject entirely.
* Blackadder episode "Major Star", Kate pretends to be "Bob". She says, "Oh no,

sir, I'm not a girl! I understand cricket! I fart in bed! Everything!" in a breathy, high voice. Blackadder is the only person not fooled by the ruse.
* Blackadder episode "Potato" is full of gay sailor jokes since it revolves around explorers and sea voyages. The next episode has Baldrick suggest making money down at the docks by exploiting this trope.
* Blackadder episode "Private Plane," the full extent keeps getting worse as Melchett tries to justify it.
* Blackadder episode "Sense and Senility", Blackadder has a Four Minutes, Twenty-Two Seconds Retirement after the Prince Regent insults him one too many times. (He told Baldrick that he didn't think Balders and the Prince could cope five minutes without him, so when he returns to chaos, he points out exactly how much less than five minutes they lasted.)
* Blackadder eventually allowed a second season on the proviso that it would have a drastically reduced budget. The seasons from the second onwards are generally considered far superior to the first.
* Blackadder Goes Forth as Lt. George - this time, subservient to Cpt. Blackadder - he's more of an assistant Arlecchino to Pvt. Baldrick.
* Blackadder Goes Forth: A variant shows up in which General Melchett looks at the blank side of a map and notes "It's a barren, featureless desert out there, isn't it?"
* Blackadder Goes Forth. Baldrick mentions the football match, to which Captain Blackadder fumes over being unfairly penalized.
* Blackadder Goes Forth (Blackadder accidentally shot and ate Melchett's pet pigeon), then calls for the black cap because he'll be needing it, unlike any pretenses of justice.
* Blackadder Goes Forth", Blackadder does this when hunting a German spy in WWI. He unmasks the spy by asking the suspect if her boyfriend had been to one of the great universities: Oxford, Cambridge, or Hull. Any real Briton would have known that only two of those are great Universities — as General Melchett remarks, "That's right! Oxford's a complete dump!" Anyway, it goes fine until it's revealed that the suspect wasn't the spy after all.
* Blackadder Goes Forth. Blackadder ended up having to fake "her" death to get out of that.
* Blackadder Goes Forth, Captain Darling is happy to be General Melchett's aide-de-camp because that way he doesn't have to be in the trenches. In the last episode he gets sent there anyway. He's also tried to get transferred to an even safer assignment.
* Blackadder Goes Forth, Captain Darling is outraged when Blackadder correctly predicts that the plan for the next big battle is to have everyone leave their trench and walk slowly towards the enemy. "That's classified information!"
* Blackadder Goes Forth episode "Private Plane", Blackadder tries to join the Royal Flying Corps after being told their nickname 'The Twenty Minuters' refers to the average amount of time they spend in combat. It actually refers to the average life expectancy of a new pilot.
* Blackadder Goes Forth has a variant when Edmund is tasked to hunt a suspected mole in headquarters. Baldrick suggests asking suspects, "Are you a German spy?" Edmund naturally points out the prospect of the suspect lying.
* Blackadder Goes Forth, "I hope their cafés are well stocked; everyone seems determined to eat out the moment they arrive."
* Blackadder Goes Forth. In the episode "Private Plane", Blackadder was originally supposed to respond to Flashheart's constant "WOOF!"-ing by saying "It's like Battersea Dogs Home in here". However, Rowan Atkinson has a stutter and has particular trouble with words beginning with B, which gave him a lot of trouble with the line, so they eventually changed it to having him say "It's like Crufts in here" instead.
* Blackadder Goes Forth, in which Baldrick carves his own name on a bullet, the reasoning being that since "there's a bullet out there with your name on it", he is assured that it won't hit him if he owns said bullet.
* Blackadder Goes Forth is the least morally-bankrupt out of all of them,

especially compared to Mister Blackadder, though that's not saying much. Rather than trying to climb the social ladder like the others did, he simply wants to get out of the trenches of WWI and not die. His acts of coldness come more from weariness and genuine fear rather than being an outright bastard.
* Blackadder Goes Forth". Similarly, Blackadder manages to discover an undercover German agent firstly when George tells him that she had been helping him with the German grammar in a letter to his uncle in Munich, and then later confirms it when she fails to spot that out of Oxford, Cambridge and Hull; one of them is NOT a great university. (As an in-joke, Rowan Atkinson, who plays Blackadder, attended Oxford, whereas Stephen Fry, who plays Melchett, attended Cambridge).
* Blackadder Goes Forth spy who has spent so much time undercover in Germany that he developed a thick accent.
* Blackadder Goes Forth the episode "Corporal Punishment" is actually about Blackadder being court-martialed for killing Melchett's carrier pigeon, found guilty, and then reprieved seconds from disaster.
* Blackadder Goes Forth. This example may be the latest possible reprieve, given that the firing squad corporal gets as far as "Ready, aim, f—".
* Blackadder Goes Forth were educated in 19th century tactics, and still believed that bayonet charges would win battles, often sending soldiers charging to their deaths from machine gun fire by the thousands.
* Blackadder Goes Forth", when Capt. Blackadder is being court-martialed for shooting and eating the general's pet carrier pigeon, George (acting as Blackadder's defense counsel) calls Pvt. Baldrick as a witness. Blackadder instructs Baldrick to "deny everything," and he follows the order.
* Blackadder Goes Fourth, as Colonel Melchett falls for "Georgina", George's drag-show alter-ego, while never making the connection.
* Blackadder Goes Fourth had Blackadder toss the Lieutenant's helmet over the trench wall. The German solders riddled it with bullet holes, before Blackadder caught it on its way back.
* Blackadder goes to fancy dress parties as a cow. But he forgot one little thing (or in this case didn't know about it): Nursie is insane and her cow costume looks nothing like a cow. His disguise was too good.
* Blackadder gradually abandons the gallows comedy that the series displayed with the looming shadow of death over the main characters and tragically shows the inevitability of it.
* Blackadder has Edmund giving a boomerang to the Queen as a present from his expedition around the world. She's unimpressed by it, and tells Percy to throw it away. He does, and a few seconds later it comes back and smacks him in the head, which amuses the Queen immensely. It's also exaggerated for comedy, since Percy lightly lobs the boomerang out the door and yet it returns with enough force to knock him down.
* BlackAdder. He denies this. Later on, to keep her from checking the bed he makes bleating noises. Her response: "Oh, Edmund. It's the lying I find so hurtful."
* Blackadder. He ends up having to speak for the Prince as well when the Prince starts screwing it up.
* Blackadder. He's married to the army. The book of King's regulations is his Mistress. Possibly with the Harrods lingerie catalogue discreetly tucked between the pages.
* Blackadder himself spends the entire series trying to get out of the trenches and into a position where he's less likely to be killed.
* Blackadder II", after Farrow's execution, Percy describes him as a tall man with a loud, clear voice, which we later learn is a more-or-less accurate description of Lord Farrow. However, it's later revealed that the man who was executed wasn't Farrow, but Ponsonby, who is a small man with one leg and a speech impediment. Percy couldn't possibly have seen the man he described at the execution.
* Blackadder II, a very drunken Edmund responds to his aunt's outraged queries with "shove off you old trout." She leaves, affronted that he had spoken to her husband in this manner.
* Blackadder II episode "Beer", one of Edmund's drinking buddies constantly cracks

himself up by repeating things that "sound a bit rude." Sample:
* Blackadder II episode "Bells" (where young girl Kate dresses as a boy and becomes Blackadder's servant "Bob").
* Blackadder II his insanely Puritanical aunt and uncle are having dinner, and tries to keep the two separate. However, at one point one of his party guests lurches into the dining room, vomits into the fireplace, and declares "Great booze-up, Edmund!" before leaving again. His aunt demands an explanation, and after a minute of muttering to himself he actually comes up with one: the man was a missionary (recovering from a stomach bug) who recently brought a tribal leader named Great Boo to England. However, he'd contracted sleeping sickness and had been laid up until just now, at which point the missionary came to tell him "Great Boo's up, Edmund." Amazingly enough, they actually buy it.
* Blackadder III. Baldrick overhears two actors discussing how they intend to murder the Prince in a hilariously gory fashion, and immediately suspects a plot. In fact, the actors were merely rehearsing a play.
* Blackadder II in a dress— despite him retaining his usual beard and level of cleanliness.
* Blackadder II, Queenie has a habit of shrieking like a little girl either when delighted or angry to fit in with her spoiled-brat character type.
* Blackadder II there's a gag about the callous crowd desiring souvenirs; Blackadder thinks the execution of Sir Walter Raleigh will attract "sailing enthusiasts", so he should try and sell them souvenir anchors.
* Blackadder II. We don't see the actual beheadings, although we do see one of the heads.
* Blackadder: In "Amy and Amiability", the Prince, reading a newspaper article about his fiancée Amy being an infamous bandit, remarks that "They say she had an accomplice." Blackadder, who had plotted with Amy to rob the Prince blind, drops the serving tray he's carrying. Then the Prince adds "But they don't know who it is," and the tray zips back up into Blackadder's hands.
* Blackadder: In "Back and Forth", a Roman soldier (one of Blackadder's ancestors) guarding Hadrian's Wall describes the wall as this trope.
* Blackadder in relation to each other are this, the only similarities being the basic premise of "Blackadder surrounded by idiots" (and not even that considering the first season). However, the episodes within a season can be from Levels 1-2.
* Blackadder. In successive series, Blackadder gets more intelligent and Baldrick gets more stupid. As Blackadder gets smarter, he also gets further from power, and those who sit above him are pretty universally stupid and horrible.
* Blackadder: In the episode "The Archbishop", Lord Graveney signs a will on his deathbed, leaving his lands to the church to avoid going to hell, and falls asleep, expecting to die. Then Edmund (as the Archbishop) bursts in and desperately wakes him.
* Blackadder: In the first episode Baldrick and Percy help Edmund by hinting how many and who he should claim to have killed, as he reports his killings to Prince Harry.
* Blackadder inverts this trope. The episode opens with a beautiful but poor young woman named Kate deciding to disguise herself as a boy to find work and support her ailing father. She finds a job as Edmund's manservant, and the two fall in love over the course of the episode while he tries desperately to cognitively reframe the feelings he's having for another man. The relief he feels when she reveals her true gender is immense.
* Blackadder (in which Blackadder tries a different method to escape the trenches) is given a letter in the opening credits.
* Blackadder is basically an extended series of mutations of this central trope, particularly emphasizing the social classes and power dynamics of the stock characters.
* Blackadder is set during the regency, but manages to work in a Dick Turpin type highwayman.
* Blackadder is the only real woman writing at the moment, and that's just because she wants to get inside [Samuel] Johnson's britches."

* Blackadder I: The queen insists she can keep the secret of Prince Edmund oversleeping and missing the battle altogether:
* Blackadder lands beyond her wildest dreams...her response is to ask if he's sure because she's had some pretty wild dreams, like the one where she was a sausage roll, or the one where there was this enormous tree and she was sitting right on top of it.
* Blackadder leaves his pen behind when getting Shakespeare's autograph in
* Blackadder", Lord Flashheart, a popular British aviator enters Blackadder's dugout. Lt. George and Private Baldrick are aghast:
* Blackadder) managed to discover Australia 200 years early while trying to sail from England to France. His usual method of sailing is to spin in circles until everyone gets sick, then go home. Except that by "everyone", he apparently means himself — he doesn't believe a crew is a necessary part of a sailing expedition.
* Blackadder mentions Jane "Bury me in a Y shaped coffin" Harrington, who goes like the privy door when the plague's in town.
* Blackadder, mirroring the clash of classes that occurred in World War I as men from all walks of life found a binding equality in the trenches.
* Blackadder, most prominently in the credits when he's leading a company on parade. In the final episode, Blackadder reminds Lt George, see page quote, not to forget his stick just before going over the top.
* Blackadder, not bothering to actually show up on the day and even casually moving up the execution of Lord Farrow simply to give him the rest of the week off, which backfires when the Queen later pardons him.
* Blackadder of the dictionary. The writer of the dictionary bursts in on Blackadder and says something to the effect of "I'm tired of the damn thing, it's rubbish, burn it". Blackadder is overjoyed, but then "Baldrick, who gave you permission to become an Alsatian?". Which is enough of a clue for Blackadder to realise and wake up.
* Blackadder of the period. The plan backfires when his betrothed believes he has dressed up as a Spanish nobleman to impress her.
* Blackadder onto the record after the prince is shot, continuing the previously-interrupted death scene, though with a different character.
* Blackadder: Played with when Blackadder is accused of witchcraft; he accuses the Witchsmeller Pursuivant of being a quack. Said witch hunter immediately accuses Blackadder of being involved in a prior case involving a cursed duck, due to the quacking sound he just made.
* Blackadder play this for laughs. The over-patriotic George suddenly realizes "I don't want to die", Baldrick asks why they can't just go home, and Blackadder's desk-jockey rival is horrified to learn General Melchett's sending him to the front so he won't miss the fun.
* Blackadder. Primarily in the third season, with Blackadder as the slapper and Baldrick the slappee, usually to stop the latter from talking or whenever the former was annoyed and needed something to hit.
* Blackadder sailor, who has no idea how to navigate, regards an actual crew for his ship as an unnecessary luxury, and whose typical sailing trip is to take the ship around in circles until everyone gets dizzy and then head home.
* Blackadder's annoyance. George declares "I hear with my little ear, something beginning with B." He says the answer is "Bomb", and when Blackadder says he doesn't hear it, George advises him to listen carefully; a very faint Bomb Whistle can be heard, and Blackadder responds "Ah, yes..." just before it hits, injuring George.
* Blackadder's Christmas Carol Prince Albert does this repeatedly, when not telling Queen Victoria about his surprise presents.
* Blackadder's Christmas Carol, when Pigmot asks the future Blackadder if he vanquished the Nibble-Pibblies, and the General replies "No, because you just made them up."
* Blackadder Series 4 episode 2: Blackadder shoots a carrier pigeon to avoid receiving orders to attack from his Commander. Unfortunately, it turns out the

message the pigeon was carrying was that it is now a capital offence to kill a carrier pigeon, so Blackadder decides to eat the evidence for lunch.
* Blackadder series three, with a French revolutionary and aristocrat using various animal insults, from "Dog" and "Snake" up to "Happypotamus".
* Blackadder series, we learn that Edmund really, really hates Chaplin films, and of course, everyone else likes them. He sends Chaplin some hate mail, and the actor responds with a letter to General Melchett suggesting they have a big comedy film festival, with Edmund specifically requested for projectionist.
* Blackadder series, where a girl named Kate pretends to be a young man named Bob Parkhurst.
* Blackadder: Sir Talbot, a loyalist Lord cheerfully tells Prince George that he doesn't care that the Prince is an utter buffoon, or that his royal father is a senile, inbred madman, as far as Talbot is concerned, they were anointed by God, and have his unquestioning loyalty in opposing the anti-royal sentiments in Parliament. Unfortunately, he dies of old age a few seconds after making that speech, forcing Blackadder to come up with a new plan.
* Blackadder special "Back and Forth", Blackadder visits a future world that matches this trope.
* Blackadder, such as highwaymen and the Scarlet Pumpernickel, that is until he grows desperate and/or greedy enough to have a part in them, showing that not even he is totally above being influenced by society and its rewards. His skin is also surprisingly easy to get under, seeing that anyone's insults (even Baldrick's) manage to touch a nerve.
* Blackadder tells Percy in "Potato" to leave or "I'll cut your head off, scoop out the insides and give it to your mother as a vase."
* Blackadder tells the Prince he's "dined hugely off a servant". He's not a cannibal, he just doesn't believe in spending money on tables when there are men standing idle.
* Blackadder that he suddenly has sympathy for the suffragette movement.
* Blackadder theory that Captain Blackadder and Captain Darling were good friends before the war started, but they fell out after Darling got out of being in the trenches to be General Melchett's PA.
* Blackadder; the palace is having a fancy dress party to take her mind off her troubles and Blackadder (who was Ludwig's prisoner) told Ludwig that Nursie always dresses as a cow. Then Blackadder escapes, returns to London, and stabs Nursie while she's dressed as a cow - but it isn't Nursie, it's Prince Ludwig.
* Blackadder the Third and many of the people around him wind up dead at his own hands. Much of this can be attributed to outrage over the declining fortunes of his family, who have gone from royalty to nobility to domestic servitude.
* Blackadder the third had King George, the Prince Regent's father. He sums it up nicely:
* Blackadder the Third has gotten his partner killed and lied for monetary gain:
* Blackadder the Third: Prince George is reading the news that a criminal (who unknown to the prince, Blackadder teamed up with then was almost immediately betrayed by) was hanged:
* Blackadder: The third series has a politics episode about rotten boroughs during the Regency period, and the commentary is amusingly dry
* Blackadder the Third. Several minutes later, (though this is actually a subversion) Wellington shoots the Prince Regent and, while Baldrick mourns him, the Prince gets up and reveals that he, too, had a cigarillo case, searches for it in his coat, realizes he left it on the dresser at home, and dies for real.
* Blackadder the Third. When he attempts to show it off, however, he can't find it, remarks "Damn, must have left it on the dresser this morning", and promptly dies.
* Blackadder the Third, when Prince George describes what the Naughty Hellfire Club does to people who don't pay their dues:
* Blackadder, the three main characters are trying to come up with a plan to get the Prince Regent out of a duel he's sure to lose, when the plan comes up of Blackadder and the Prince switching places so that Blackadder can fight instead. When the Prince notes that it will never work, because "my portrait hangs on every

wall", Baldrick - who thought to solve the problem of his mother's low roof by cutting off her head - offers up this gem:
* Blackadder, the title character (as Lord High Executioner) kills a man ahead of schedule, only to have the man's wife come for a visit. In order to get the information Blackadder needs to pose as the dead man, Percy demands she prove that she's really his wife and not just a "Gloater", claiming that the jail is "up to our ears" in people coming by to gloat over those on Death Row. It works, but Blackadder still calls Percy a prat for coming up with such a ludicrous idea.
* Blackadder: The various incarnations of Edmund Blackadder did this a few times despite being usually quite quick with a comeback:
* Blackadder, tired of being insulted by the Prince, Blackadder leaves. He's only gone for about an hour before returning to find Baldrick and Prince George hiding under the table, convinced that an assassination is imminent, a situation that never would have happened without Blackadder there.
* Blackadder to a fault; Kate (or Bob), for the other part, is pretty fly for an Elizabethan girl.
* Blackadder to freak Johnson out in retaliation ("Oh, I'm sorry, sir. I'm anaspeptic, frasmotic, even compunctuous to have caused you such pericombobulation.").
* Blackadder to have sailed around the Cape. Unfortunately, the ship captain he picked for his expedition isn't capable of making it even as far as France.
* Blackadder, trying to confuse the writer of a well-known dictionary:
* Blackadder turns into a commercial for an album of Elizabethan love songs.
* Blackadder) until after nearly every other cast member has drunken it and died.
* Blackadder variant is used, with Amy on the balcony and the Prince Regent below, with Blackadder to feed him lines.
* Blackadder very much. She'll frequently joke about cutting her courtiers' heads off (and her courtiers are expected to laugh as though they find it funny.)
* Blackadder", when Baldrick is holding up an archery target for Blackadder and Percy, and Percy accidentally shoots way too low. Baldrick then reveals that "the arrow didn't in fact enter my body. ... No, by a thousand-to-one chance, my willy got in the way."
* Blackadder", when Edmund is court-martialed, and Baldrick and George fail to do anything to save him, he volunteers them to a mission named "Operation Certain Death" (though they apparently manage to survive). However, since we only hear Capt. Blackadder's side of a telephone conversation in which the operation is mentioned, it's possible that he was just making it up, knowing the two dimwits would fall for it.
* Blackadder when George and Baldrick discuss why they enlisted. George enlisted with a bunch of his school chums, thinking it would be a great adventure; he notes grimly that he is the last of his chums left alive. Baldrick, meanwhile, joined because the recruiters made him feel wanted for the first time in his life.
* Blackadder, when King Richard III and his nephew talk about Edmund at the banquet on the eve of the Battle of Bosworth:
* Blackadder when the reason they were able to re-write history was because of the character's actions.
* Blackadder. When they get back to England two years later, Edmund takes great pleasure in giving the bottles of "fine wine" to his rivals Lord Melchett and Sir Walter Raleigh.
* Blackadder where a Roman ancestor of Blackadder's comments that the only thing Hadrian could think up to keep the Scottish hordes at bay was a three-foot-high wall.
* Blackadder where Blackadder has a nightmare which starts off with Baldrick "waking" him up and ends up with Baldrick turned into an Alsatian. Then Baldrick wakes him up.
* Blackadder, which, as he doesn't like long books, reads simply, "Once upon a time, there was a lovely little sausage called Baldrick, and he lived happily ever after.") And Samuel Johnson agrees that Blackadder's book is a masterpiece, pronouncing it the only book superior to his dictionary. A pity he's the only

person besides Blackadder who ever gets to read it before a misunderstanding leads Baldrick to throw it on the fire...
* Blackadder, which is subverted when everyone (even Edmund himself) realises what a useless gift this is in the 16th century. Cue double subversion when he then wins her favour with a Polo Mint.
* Blackadder, while we don't know the details of the case, presents us with a nice example:
* Blackadder, whilst generally fairly accurate on many uniform and insignia aspects (excepting the fact they are dressed perfectly accurately for 1914, not 1917!), has an easily missed error in the form of Brigadier-General Sir Bernard Proudfoot-Smith. The rank title is in fact correct for the era (it's currently just Brigadier, without the hyphened General, in the British Army). His insignia is, however, incorrect: Brigadier-General during WWI wore a crossed baton and sword (similar to other generals, but without any crowns or stars above).
* Blackadder who heaps abuse on his dimwitted, good-natured servant sidekick Baldrick.
* Blackadder, worn by Macbeth in the fight scenes. To this, Blackadder asks "So he was a stunt codpiece, then?"
* Black Adventures. bitch-slaps Mary, injuring her eye. Her next appearance reveals that she has obtained some of MissingNo.'s powers, which she uses to help her and Joseph get the upper hand against Black.
* Black Adventures, both Garby the Garbodor and Landorus become this when attacking Striaton and Driftveil, respectively. They both revert to their original sizes after being defeated by Black and N.
* Black Adventures. Mom is oblivious to Black's romantic intent and never got around to telling him that they're related until right before he was going to confess.
* Black Adventures plays N this way. He's never heard of Christmas and isn't doesn't understand how to deal with jealousy.
* Black Adventures, which is itself known for this trope (recursive art shifting?).
* Black Alice claims to Dinah that she's already started packing, while holding a bag that is obviously empty.
* Black Alice is this to anybody with magical powers, even those as powerful as
* Black almost has more invisible walls and insurmountable fences than plot. Every mission is filled with situations like the one described above. In one mission you descend a staircase, only to notice that the last step is missing when you get down to the floor below. This missing step, only about 10 centimeters high, makes it impossible to go back the way you entered. The fact that you can't jump in the game only makes these situations more ridiculous.
* Black also try to pretend that N being the "official" leader of Team Plasma is a surprise until Nimbasa City. Even for players who skipped past the animation depicting his coronation that plays before the title screen every time the game is booted up, it wasn't hard to piece together that the weird kid who sympathized with Pokémon was linked to that weird organization that claims to fight against Pokémon abuse.
* Black & Blue. Gracie flees her abusive husband and is advised to cut her hair - because it's too conspicuous.
* Black & White by gradually having one character's voice morph to the other's, and back.
* Black & White, completing the game allows the player to start over while retaining access to all the building designs, miracle options, and other abilities that they accumulated during their first playthrough.
* Black & White cost. It's one of the most basic miracles your god can perform, and is a fairly useful way for a good god to keep their own villagers healthy and convert villages to their religion.
* Black & White creatures, despite being over one hundred feet tall when fully grown, cannot step over houses less than a quarter of their height.
* Black & White features gesture recognition, including the ever useful ability to shake your mouse left and right to get rid of whatever special mode or spell you

have attached to the cursor/hand of god. A decent number of people have tried to do the same thing to get out of zoom mode while using Microsoft Word.
* Black & White features. In the sequel, flies also start showing up in your territory if you go Evil, in contrast to fireflies and butterflies if you become Good.
* Black & White, flirting with both Nurse Joy and Officer Jenny as well as the Sinnoh Champion Cynthia. They all ignore that and focus on the fact that the Champion is right in front of them. Only Iris and Trip are disturbed by his behavior.
* Black & White, if you choose to do mostly evil actions, your hand-cursor will go from a healthy pallor and trimmed nails to having noticeably tanner skin and claw-like nails.
* Black & White. In the first game, the most useful sacrificial victims are the youngest ones...
* Black & White is called Mega-blast, in his basic form consist in one powerful beam of turning a building into scraps and in his most powerful form consist in many powerful beams capable of turning an entire village into scraps.
* Black & White is solidly Evil, the "Miracle Flock" ability summons up a smokey swarm of black bats, rather than the usual flock of white birds.
* Black & White mutter a quick prayer for aid over even the tiniest of things.
* Black & White over time at a rate proportionate to its size and the amount of damage it absorbs. However, people and Creatures can walk straight through.
* Black & White regularly catch fire when the fireball you're idly tossing about gets away from you. When this happens, their status (normally "working", "sleeping" or whatever) becomes "being on fire".
* Black & White series. Eventually, the Japanese version added it back as well after spending Hoenn and Sinnoh with generic eyecatches.
* Black & White, since humans don't notice the difference and eagerly poison themselves.
* Black & White, there's a little guy who can throw around for kicks. He shouts out random (and sometimes unlikely) body parts as he bounces around. "Argh, my back. Oh, my arm! Ow, my philtrum!"
* Black & White The simple, pacifistic villagers of the first game only farm grain, despite having sheep and cows on hand, and the player gains evil points for putting animals into the village store to be eaten.
* Black & White, the various deities gain "faith points" when humans witness them doing things; one can convert villages by building up enough faith points. Also, godly powers are driven by belief, which is gained from getting villagers to worship at your temple.
* Black & White, though apparently not to the extent suggested above. He mostly seems to turn people into girls. So it's more or less like his usual behavior, but more.
* Black & White treatment of this trope is too weird not to mention. The Creature starts out needing to poop like any animal, but if you slap it enough times when it does it, it somehow learns not to poop. The biological need just magically goes away permanently without any side effects. Now if only that worked on humans...
* Black & White, with the weakness, intelligence loss, and alignment change infecting all modes of gameplay, including network games. Even if you complete the game, the file remains broken.
* Black and Blake storming a heavily defended train car to steal the entire shipment. It's only later in the series that context is provided for why it happened.
* Black and Blue Magic for the A.A. Comus Company, selling magick tools and supplies.
* Black And Blue Magic to fuel himself, and losing most of his clumsiness in favor of a "real athlete's build". There's also some mention of him feeling like he either has "new muscles, or muscles moving in some new way" across his back and chest when he first spreads his wings out.

* black and blue/white and gold dress debacle. People are literally only able to see it one way. It was revealed to be black and blue, though the company that produced it made a one-off white and gold one for a charity event.
* Black-and-Gray Morality: A moral setting where there are bad guys and no obvious good guys vs. a moral setting where there are good guys and no clear-cut bad guys.
* Black-and-Gray Morality. Expect any form of remote goodness to come from a decidedly heroic and above-society entity.
* Black-and-Gray Morality of the heroes, they spend most of their respite on having sex or getting drunk and violent and have a less than amicable working relationship with their comrades.
* Black-and-Gray Morality: There are no pure good guys, just bad guys and shady guys.
* Black-and-Gray Morality: The villains are pure evil but our heroes aren't exactly saints themselves.
* Black and red are dominant colors of Klingon culture. They use it in buildings, flags, decorations, weapons, ships... basically everywhere. Even their interior lighting usually has a red tinge.
* Black and White Ash back into a novice ten-year-old trainer with only Pikachu, Iris and Cilan taking the roles of tomboy Misty and group chef Brock respectively. Ash continued to make references to past adventures and characters, however.
* Black and White, as Yveltal doesn't have the same killing power against Honchkrow and Gyarados.
* Black and White, a tumbleweed blows past as Yang and Ruby put two and two together.
* Black and White be Hilda/Hilbert speaking aloud to themselves, in which they express curiosity as to the source of the sounds coming from the top of Dragonspiral Tower. The messages are expressed in an unusually personal-sounding tone, and appear in unique text boxes at the top of the screen rather than the bottom. Their true nature, though, is ambiguous, as no other characters are around to "hear" them.
* Black and White. Black is violent and territorial and White is childish and innocent. The fact that they need each other to balance out the pair is repeated often throughout the film and becomes a plot point.
* Black and White, hijacks a subway train, disables the remote brake system and disables everyone by means of releasing the drug into the vent system. It's up to Wu Ying Xiong and Pi Zi to stop the train before it crashes and kills everyone on board.
* Black-and-White Insanity: A psychosis where one is thoroughly convinced that everything they support is good and that everything they oppose is bad.
* Black-and-White Insanity: Sees the world in black and white to the point of being not mentally well.
* Black-and-White Insanity: Someone has such an extremely binary moral worldview, that anyone who is even slightly opposed to their ideals must be one-dimensionally evil.
* Black-and-White Insanity: The above, taken to a completely irrational extreme.
* Black-and-White Insanity: There are no shades of gray, no exculpatory or mitigating circumstances, no differences. The person who stole a $1 candy bar is just as evil if not more so than the one who stole $100,000,000 from old people's pensions.
* Black-and-White Insanity to the extreme; they believe something is either good or bad, with nothing inbetween.
* Black-and-White Insanity who uses sex as a weapon and his rational best friend, while more often than not ignoring the latter. Yup, Stannis is Robert's brother alright. In addition, Stannis shares with Robert the hardships of controlling the North, even with a Stark by his side, as he points out to Jon Snow, whom he tries to legitimize to help win the North over, but Jon refuses out of a sense of duty.
* Black And White involving two detectives, the female Forensic Doctor, and the only daughter of the local crime boss.
* Black and White is that Pokémon would simply leave their trainers if they

disliked them. But having a Pokémon with low friendship contradicts this as it doesn't result in the Pokémon leaving you.
* Black and White MagicHmm, do I get to roast the bad guys or heal the good guys?
* Black-and-White Morality: All the coolness and emotional satisfaction of seeing good inevitably triumph over evil, none of the doubt, exhaustion and emotional ambiguity inherent in real life.
* Black-and-White Morality and his attempts to impose order on an unordered world. However, the Rorschach Test's entire purpose is that there isn't a wrong answer for how to look at it, and everyone sees something different.
* Black-and-White Morality, but the hero has to be held to a higher standard because he's a role model.
* Black-and-White Morality: Generally the protagonist is a blameless victim, while her antagonists have no moral ground to stand on.
* Black-and-White Morality has become the norm in most storytelling nowadays. It still often shows up in works aimed at young children, since they likely wouldn't understand the "gray-ness" until they got older.
* Black-and-White Morality in his show with his insistence that there are no such thing as good people who are good all the time, and no such thing as bad people who are bad all the time.
* Black-and-White Morality: Portraying one side as completely good and one side as completely evil.
* Black-and-White Morality: Sees the world in clear and unambiguous shades of pure good vs. pure evil.
* Black-and-White Morality: Since a lot of adventure and fantasy literature tends toward romanticism, they will usually have a clear set of well-defined heroes and villains by default. This is especially true in books targeted towards children, which usually have a romanticist slant.
* Black-and-White Morality: The heroes are good and pure while the villains are evil and corrupt.
* Black-and-White Morality: The white side. The clear distinction of good and evil. (could be cynical if the bad guy wins.)
* Black-and-White Morality: Unambiguously good heroes & unambiguously evil villains versus morally ambiguous heroes and villains.
* Black and White: Rival Destinies aired in Italy before every other western country.
* "Black and White" was originally performed by Pete Seeger in 1956, followed by
* Black Angel Vol. 1: After capturing Ikko, Nogi holds her prisoner and tortures her in a hospital that is undergoing refurbishment.
* Black Angel Vol. 1, he is a detective. It is eventually revealed that he has ambitions to become head of the yakuza.
* Black Angel Vol. 1, one of the two female assassins who knocks on Don Amaoka door is wearing a very short skirt. The bodyguard who answers the door is so distracted by her legs that he opens the door to them despite their dodgy story about blowing a fuse in their apartment.
* Black Angel Vol. 1: To prevent the hit team from catching him after he has handed Ikko to Mayo, Yatsuda drives his car into two parked cars at a moderate speed and all three explode.
* Black Angel Vol. 1. When Nogi's men are herding Ikko towards him, their bullets even strike sparks off the wooden stairs.
* Black Angel was originally a Genesis game, before being moved to the 32-X and subsequently cancelled due to the studio closing.
* Black Angus most common variety of beef cattle in the United States, and #2 in Western Europe. Similarly, restaurants touting Hass avocados or Madagascar vanilla are really just saying they use the most common variety on the market.
* BlackArachnia. After being murdered by Tarantulas while her new Maximal comrades were trying to remove her malfunctioning Predacon Programming, she was brought back to life thanks to the Transmetal II Driver, which also turned her into a Transmetal II.
* Blackarachnia and Wasp(inator) are techno-organic, the first from using her

power-copying ability on giant organic spiders, the second from Blackarachnia using Transwarp energy to fuse Wasp with a hornet. One thing to note is that in
* Blackarachnia ended up joining the Maximals while keeping the attitude she had as a Predacon.
* Blackarachnia. Getting abandoned on a hostile planet and suffering nasty
* Blackarachnia insulting the Maximals for giving sappy speeches? Not particularly funny. Airrazor immediately punching her out for doing so? Hilarious! Even Rattrap
* Black as Blood: Istas and Ryan fly across the country to meet Ryan's family.
* Black As Night features this as the first step to helping Hiccup adapt to his blindness after a training accident as Astrid helps him with his offer to re-forge her axe. He accomplishes this through his natural knowledge of where everything is in the forge, some visual input from Astrid to determine the condition of the metal based on its colour, and his own use of a glove made from the hide of a Monstrous Nightmare so that he can feel the condition of the weapon.
* Black As Night makes this clear for Toothless, who not only seems to understand the implications of Hiccup’s blindfold, but later learns to make specific sounds when in flight so that Hiccup can adjust the fin and avoid crashing into anything, to the point that he even seems to repeat Astrid's name at least once.
* Blackballed: The Bobby Dukes Story is a Mockumentary about a paintball star who was ousted for cheating and is trying to make a comeback.
* "Black" Bartholomew Roberts, sometimes described as the most successful pirate captain with over 400 successful captures, and his flamboyant, fancy, and heavily made-up look inspired the likes of
* Black Bastards as Zev Love X, was ready for release in 1993, but was shelved until 2001 due to the label's fear of the album's racial content. By the time it was finally released, DOOM's brother Subroc was dead and DOOM had begun his more well-known solo career.
* Black Bat: The Black Bat is an attorney who was blinded by a perp. After having his vision restored and gaining superpowers, he began fighting crime more personally as a masked crime-fighter. However, all the Black Bat normally does is beat up or knock out criminals, stamp them with his bat emblem, and let the police arrest them.
* Black Battler and Eva-Beatrice about their respective characters being the culprits.
* Black Bead Eyes after she ate the Devil Fruit she lost a lot of weight and became a thin beautiful busty woman with a prettier face and big green eyes.
* Black Bead Eyes reminiscent of the early generations of minifigs, while the other major characters have reflections in their eyes.
* Blackbeard and his men are said to have done this—a rowboat full of naked pirates went up to a ship and boarded.
* Blackbeard, conversely, is widely assumed to have been a blood-crazed butcher who slaughtered people by the shipload, due to a combination of this trope and his own deliberate self-promotion. In actual
* Blackbeard has incredible strength and endurance. However, he is also very slow, and his Devil Fruit has the
* Blackbeard has one of the most powerful abilities in universe. With his Darkness manipulation, he can wipe out entire towns in seconds, shoot the debris out like cannon, and negate Devil Fruit powers. But he has a major weakness that isn't shared by any other fruit of the same class as his. While most Logia-fruit users can have attacks pass right through them, Blackbeard is quite the opposite; Because his Devil fruit ability makes him a "Gravity Man", his body is always in physical form. Not only that, but the same qualities that let him negate other Devil Fruit powers (by forcibly holding their bodies together) also draws attacks INTO him. This means that his biggest strength also makes any attack made in his direction both harder to dodge and
* Blackbeard: If you have a big enough ship, you might be able to sack ports. If you have enough weaponry and information from hostages, you might even be able to sack Boston or New York.
* Blackbeard introduces himself getting into an eating contest with Luffy, before

becoming one of the Four Emperors.
* Blackbeard perspective, performing feats like deposing King Wapol, breaking in to Impel Down, and joining the Battle of Marineford.
* Blackbeard's Dark-Dark Devil Fruit power counters other Devil Fruit users in general, as they can't use their ability as long as Blackbeard maintains physical contact with them.
* Blackbeard's escape, as well as prevent getting the ship stuck in the shallow waters.
* Blackbeard's Ghost, Blackbeard helps Steve gamble at a roulette table by moving the ball to the number he picks.
* Blackbeard's Ghost. He carries a Cutlass and multiple pistols, including some modern pistols.
* Blackbeard, Sir Crocodile, Arlong, Eneru, and Spandam as well. All of them
* Blackbeard, terrorized the West Indies for only two years before being killed during a fight with colonial authorities in what is now North Carolina. To this day he is still the poster boy for the age.
* Blackbeard. This guy enjoyed telling Luffy in detail about how he defeated his brother and how he's on death row because he tried to protect him. He also mocks Whitebeard for his inability to save
* Black Beauty discusses this; after the teenage Joe Green's ignorant handling of a delicate situation nearly kills the eponymous horse, one character tries to defend him on the basis that he didn't mean any harm, but another responds harshly that ignorance has caused more far more evil in the world than actual malice.
* Black Beauty film where he's brought into his owner's house so she can paint a picture of him. He poops in the house.
* Black Beauty, originally a novel, had a movie made out of it. And then the movie was novelized into a children's book with pictures from the movie in the middle.
* Black Beauty, the main character has two: one a round trip to fetch a doctor, and one a chase after a runaway horse.
* Black Beauty, the titular horse is saddled in the middle of the night to bring the news to the doctor (who lives several miles away) that his mistress, the wealthy woman to whom he belongs, is very ill and likely dying. Understanding the severity of the mission, the horse refuses to give anything but his best in the run, not even slowing down when his groom offers to let him. Unfortunately, the doctor has no horse and must ride Beauty back to the estate, thus subverting the trope (and almost killing the poor horse).
* Black Beauty was formerly banned in South Africa. Having the words "black" and "beauty" in the title was evidently a no-no during apartheid, despite the fact that "Black Beauty" refers to a horse.
* Black Beetle from the second season has an even deeper voice (and that's
* Black Belt, but the changes made during the localization were lazier by comparison to the first game. All the sprites were recolored and the names were changed, but the character designs remained almost identical and the seemingly nonsensical script (which consisted mainly of out-of-context dialogue transcribed verbatim from the manga) was a word-to-word translation of the original, aside for a few minor changes. Gore was also removed for the overseas release.
* Black Belt has a flipper in the upper-right that similarly, flips toward the player and can be used to send a ball up a ramp.. that goes to the other upper flipper on the left which, like most other flippers, flips away from the player. This is guaranteed to confound players the first few times they play.
* Black Belt in Origami: Throwing around foreign-sounding words while acting as if it is a martial art.
* Black Belt Jones fighting against a crew of Mafiosi who killed the owner of a karate school.
* Black Belt Jones — Blaxploitation martial arts series. 2 films since 1974.
* Black Belt Jones when the title character is called for help during a dinner date and love interest Sydney asks to go with him. He refuses, suggesting that she should stay and "do the dishes" instead. Sydney responds by picking up a revolver, and "doing the dishes" with hot lead, convincing Jones to let her help.

* BlackBerries, Playbook tablets included, with cameras make a loud audible "shutter" noise when a picture is taken that can't be muted (barring a bit of creative hacking), even if the phone volume is set to silent. The reason given is to make it harder to take images surreptitiously—aside from the above issue, a legitimate concern involving a device carried by military, government and business officials. Something similar happens with some Lenovo tablets, in which no matter what app you use the "shutter" sound is there and cannot be muted even setting the volume to silent.
* Blackberry messenger was a killer app for Blackberry phones, unfortunately for them that changed once cross platform messaging apps appeared in Android and iOS.
* "Black Betty" has been covered up to the point where it's barely visible. Many Australians think Spiderbait wrote it. Others think Ram Jam wrote it in 1990, but that version was a remix of that band's hit version of the song from 1977. Most people will associate it with the original Ram Jam version. It was associated with Lead Belly in the early 20th century, but, like much of his repertoire, it predates even him. It may have existed in some form as far back as the 18th century.
* Blackbird (2018), the members of the secret society of magical cabals known as paragons start off as ordinary humans who undergo a magical ritual that requires them to first die and then be resurrected as idealized versions of themselves in order to acquire their magical powers. When Nina Rodriguez, the story's heroine, gets killed in an earthquake at the tender age of 13, her paragon mother uses a partial version of the ritual as a handy means of resurrecting her without actually completing the full paragon transformation. This leads to a lot of complications later on...
* Blackbird, a disturbed Claire is found in the store, having put pictures of Chrissie on all the milk cartons, when Randy arrives on the scene.
* Blackbird, and the first one leaves him momentarily dizzy and unresponsive.
* Blackbird (Arrow) because he was too deep in his cups with his grief over Sara's (supposed) loss. Knowing what happened to Laurel, it's hard to feel a lot of sympathy for him.
* Blackbird (Arrow): By Chapter Three, most of the readers have guessed that the "terrible choice" Dinah made was trading Laurel to the League of Assassins in exchange for Sara's freedom.
* Blackbird (Arrow) (Quentin) or arranged the kidnapping to save her other daughter in order to assuage her own guilt (Dinah). In the end, despite the parents' desperate attempts to blame the family's issues on Oliver and his relationship with Laurel, all the relationship actually did was just expose and magnify the problems that were already there.
* Blackbird Close ("Burakkubado Kurosu" in the Japanese card), based on the artwork, is clearly supposed to be Blackbird
* Black Bird for Misao, will pay any and all costs, including the destruction of his clan to save Misao, because he really doesn't care about much other than her.
* Black Bird has a relationship between the main character, Misao, and her teacher, Kyo.
* Black Bird has Kyo, whom Misao mistakes for a pretty girl upon seeing him as an adult.
* Black Bird have wings, but they do not appear when they are disguised as humans.
* Black Bird is one of the bestselling shoujo manga in years, yet most mainstream anime/manga reviewers have given it lukewarm to negative reviews (with some even being openly disgusted by it).
* Black Bird: Kyo is a tengu—a Japanese bird demon—and he is the only one who can protect Misao from other demons, and she finds love with him despite the fact that he wants to marry her forcibly.
* Blackbird, Randy is in love with a boy who is straight and has a girlfriend.
* Blackbird, Randy's best friends Efrem and Crystal can see perfectly well that he is gay, but he is in denial as he believes it to be a sin.
* Blackbird that made the universe, set the dimensions in a triangle pattern with various planets located within. Using sorcerous means, it's possible to travel to these other dimensions and worlds and sorcery is a new emerging ability among the

people of the 3 worlds.
* Black Bird things that she can provide aren't nearly as non-invasive to harvest...
* Blackbird was a dream until she finds a matchbook from there in her pocket.
* Black Blade had been initially promised to them. They lost, however, and B.Ö.C. got the songs. Hawkwind just got the bill, another thing disgruntled band members hold against Dave.
* Black Blade series killed the protagonist's father indirectly and her mother in person. The only reason Lila hasn't sought revenge (yet) is because she knows she can't take him alone.
* Black Blade series, there are numerous places in Cloudburst Falls that are the home of various monsters that will attack people if not given some token toll, like a candy bar or some loose change. Lila defeats the villain of the first book by tricking him into crossing a lochness bridge on foot without paying the toll, at which point said lochness eats him.
* Black Blade series, there have been multiple relationships across the Sinclair/Draconi feud. In the back story, there was Lila's parents, Serena Sterling and Luke Silver, and in the story's present day, Felix Morales and Deah Draconi.
* Black Blade. She does so when she realizes that what she was told is true, and the gesture is not appreciated by the eventual champion.
* Black bloc protestors usually hide their faces to obscure their identities. Unfortunately for them, Canada has passed a law making that sort of thing illegal.
* Black Blood Brothers. Jiro doesn't have any resentment towards Alice for making him a vampire without his consent. According to Alice herself, it is customary to get a person's informed consent before turning them.
* Black Blood Brothers, Jiro turns off Mimiko's alarm clock by cutting it in half (since, according to Kotaro, he isn't good with new technology).
* Black Blood Brothers plays this straight and then subverts it. During the Kowloon Shock everyone became aware that there were vampires, but then the government convinced them that they were all exterminated.
* Black Blood Brothers, this happened to Jiro Mochizuki, when he was turned into a vampire by Alice Eve, prior to the start of the series.
* Black Blood Brothers, this is a weakness some vampires suffer. Jiro can cross water without a problem, but Kotaro is severely weakened and can die if he is submerged.
* Black Blood: Covering up extreme gore and blood through digital editing or redrawing the carnage so it's less shocking.
* (Blackboard Monitor) are shiny and feathered and have tights; there is basically nothing in that description that he does not object to. He put his foot down about the tights and the feathers in the end, thankfully, but still has to put up with shiny armour with knobbly bits that would probably be worth Sweet Fanny Adams in actual combat.
* Black Bolt is skilled enough of a telepath to overwhelm his brothers mental manipulation. He also communes with his wife Medusa via his telepathy.
* Black Bolt to a guy who gets overpowered by human police officers) and he cannot fly or fire electron blasts.
* Black Book in German-occupied Holland, is smuggled away in a coffin by some of his comrades. Unfortunately for him, they've been told about his evil deeds, and deliberately seal the coffin and leave him to suffocate.
* Black Book: Made in 2006, the last part of the film takes place in 1956 and concludes during the beginning of the Suez crisis.
* Black Books and an espresso machine for his birthday, he goes a little mad and ends up accidentally blagging his way into a real police case. In order to keep up the delusion, he agrees to do a good cop / bad cop routine, resulting in this:
* Black Books, and Jean-Paul Gautier is that "they're all fabulous!" Oh, and he stares at his male waiter's arse during the date. Writer Graham Linehan seems to enjoy this trope.
* Black Books, and when he holds it out for inspection it is covered in grime.
* Black Books, a pair of Jehovah's Witnesses knock on Bernard's door, and Bernard

is so desperate for a distraction from the paperwork that he invites them in. He then winds up having to give them hints about what to do next, because it's been so long since anybody let them actually do the witnessing that they've forgotten how it goes. He also more or less converts them to Catholicism.
* Black Books at one point has all the characters turn into puppets. One DVD extra has a "mini-series" made completely of these puppets.
* Black Books, Bernard and Manny accidentally drink a bottle of priceless, 100 year-old wine that was going to be presented to the pope. Going by a book that describes the taste "a hint of vanilla," "an oaky finish" etc - they try to make their own replacement with cheap wine, vanilla ice-cream and twigs, while a thunderstorm rages outside and they devolve into Hammer horror-style Dr. Frankenstein and Igor.
* Black Books, Bernard and Manny house-sit for a friend and the first thing they do is knock over a vase. It's owner says that he has another, but to be careful with it because "it's the only one left in the world... now". The outtakes on the DVD show a take where Bill Bailey knocked over the vase but then caught it before it hit the ground.
* Black Books Bernard attempts to ask a woman out with the words below. It actually works, in that she, after confirming that he was trying to ask her out, accepts.
* Black Books: Bernard denies that he's lost all sense of taste through his booze and cigarette habits, and believes that he's eating "some sort of delicious biscuit". It's a coaster. Made of cork.
* Black Books, Bernard is locked out for the night without any money and takes a job in a burger bar to keep warm and dry. He gives people the wrong burgers and throws fries at them with his hands, before resigning an hour later when it stops raining.
* Black Books, Bernard's landlady died and left the building to her cat. Which led Bernard to try and hire someone to off the cat.
* Black Books, despite the fact the couple making the noise are not actually upstairs, and causes a huge chunk of plaster to fall on a slumbering Fran in the process.
* Black Books DVD. When Bernard receives a rejection letter for his novel, he sends back a rejection letter for the rejection letter:
* Black Books, enough so for "turn left at the dead badger" to be useful directions.
* Black Books episode "Fever", Bernard attempts to woo his 'summer girl' Alice with a serenade. On accordion. Alice isn't interested to begin with...
* Black Books episode "Manny Come Home": "Hahahahahahaha - I'M REALLY ANGRY NOW!!"
* Black Books episode "The Grapes of Wrath", Bernard and Manny drink a valuable bottle of wine that's due to be presented to the Pope, and hastily improvise a substitute with which to refill the bottle in the hope that nobody will notice. At the end of the episode, Bernard picks up a newspaper with a prominent front-page article about the Pope being poisoned by their improvised wine substitute and the arrest of their friend who owned the bottle, and Manny reacts with horror. Bernard, however, was simply pointing out the date as his birthday.
* Black Books, Evan, the slightly unhinged owner of rival bookstore Goliath Books does this in a pep talk.
* Black Books features Bernard doing this to avoid doing his taxes. He lets in a pair of door-to-door evangelists, phones his mother, and then tries to get himself seriously injured to get an exemption.
* Black Books for blanking him. Their son's face is locked in a mask of horror, which Bernard brushes off as "He's a kid. Everything's new to them."
* Black Books, Fran and Bernard have a fight. Fran storms out of the bookshop, coldly informing Bernard that she doesn't think they should see each other for a while. She then immediately reenters, announces "I forgot my bag!" in an embarrassed sing-song tone and flounces out again once she's picked it up.
* Black Books, Fran says to Bernard that she never wants to see him again and storms out. Seconds later she comes back, her hand covering her eyes, saying "Forgot my purse".

* Black Books, Fran's subplot in the episode "The Big Lockout" basically involves her having a wank while listening to the shipping forecast because she finds the voice of the guy who's delivering it irresistibly arousing.
* Black Books had a blackboard in the book shop that always had different rules for the shop. Most of which were basically different ways of saying "Don't Do Anything" (or even just the word "NO" scrawled over half erased words in one particular instance).
* Black Books had Manny install a needlessly obtuse security door after the shop was robbed. Later in the episode, the thieves had come back overnight and stolen the security door.
* Black Books has an episode with a Russian piano teacher played by Scottish actor.
* Black Books has Fran trying to figure out exactly what her new knick knack is. But if you can read Japanese katakana, you would see the boxes say "ライター", revealing their identity as lighters long before Manny demonstrates.
* Black Books has Manny, suddenly missing his job at the bookshop, trying to find a nice thing to say about the place. He eventually concludes that there was no love, freedom, or largeness of heart, but "I was not contractually obligated to have sex with foreign businessmen, and that's not nothing!"
* Black Books has more than one example. When they call a cleaner (after a scene of Bernard: "I was gonna warm it [a frozen pizza] and eat it later. Everybody does that, that's normal! You are looking for things to complain about!" Manny: "What do you call these?" Bernard: "Wasps!"), he does the trick of putting on a white glove, streaking it across something, and the fingertip comes away black. The thing he chooses to sweep across? The air.
* Black Books: he takes a spoonful of coffee from a full jar, then pours boiling water into the jar and drinks from that.
* Black Books him that this was the case. The resulting truth-telling slanging match between Bernard and Fran gradually gets turned to smaller and pettier truths, with Bernard eventually winning by pointing out that Fran went to a party that night with a rather daft haircut.
* Black Books: In the third episode, "Grapes of Wrath", Fran doesn't take long to work out that the guy she's on a date with is gay and not consciously aware of it, so she wastes no time in helping him to come out.
* Black Books is about to go on holiday, naturally he doesn't remember where he put his passport other than "It's in the house!". He put it somewhere safe so he spends 5 hours putting everything off the walls before walking over to his desk and saying I remember i put it over here but no, I can't find it. Cue "Did you check your desk Bernard?, Yes of cour-oh here it is."
* Black Books is almost as endlessly quotable as the series themselves, due to the cast's ability to be off-the-cuff hilarious and the relaxed attitude to actually talking about the show.
* Black Books. It takes Bernard bellowing "Offer her something, you fool!" at him to get Manny to make any headway with her.
* Black Books like "You've got lovely eyes" and "Why don't I go out and get us all some crispy duck?" This unsettles the perp, so the genuine policeman decides to leave Manny to continue the interrogation alone. As soon as he leaves, Manny falls to his knees and admits to the perp that he isn't a real copper, he's "just had too much coffee", and begs the perp to help him get out of the situation. This further unsettles the criminal, who cracks and says that he'll talk to "the other guy", as long as Manny goes away. As a result of this confession, the genuine policeman tells Manny that he's one of the best officers that he's ever served with.
* Black Books, Manny accidentally swallows the Little Book of Calm and spends the rest of the day as a Jesus-figure spouting extracts from the book at anyone who'll listen. When he gets punched in the face by a skinhead he jumbles them up;
* Black Books, Manny calls a cleaning business to clean the bookshop. He "shows" them how dirty the place is by waving the phone about. There's no indication it works or makes sense, though.
* Black Books, Manny claims to his parents that he runs the titular bookshop,

although this lie quite swiftly collapses.
* Black Books. Manny says that something bad happens to him at 88 degrees, and Bernard wants to know what, but Manny keeps repeating, "You don't want to know." Bernard at first tells Manny to stop saying that, because he wants to know even more if he's told he doesn't. Then he switches tactics, saying that Manny doesn't know WHY Bernard wants to know. To which Manny replies, "Oh, why's that?" And Bernard has made his point.
* Black Books many, many efforts to avoid customers in the store involved him picking up the book closest to the door and handing it to the potential customer, saying "You'll laugh, you'll cry, it'll change your life".
* Black Books often bestows various nicknames on his employee/flatmate Manny, e.g. "Thor", "Gandalf", "Bigfoot", "Hawkwind", and "Ming the Merciless".
* Black Books once tried to serenade a woman by playing the accordion. Given his usual social awkwardness plus an exceptional heatwave giving him delirium, the end result naturally blows up in his face.
* Black Books reveal that not only did Dylan Moran improvise it, he improvised a whole bunch of them.
* Black Books's view of bookshops as doomed enterprises. Moran said "Running a second-hand bookshop is a guaranteed commercial failure. It's a whole philosophy. There were bookshops that I frequented and I was always struck by the loneliness and doggedness of these men who piloted this death ship", while Graham Linehan said his belligerent personality reflected a sign he once saw in a bookshop stating "Please put the books anywhere you like because we've got nothing better to do than put them back". Moran said of the series, "We just wanted to cram as much elaborate stupidity into a half-hour that could make it be coherent and that you would believe".
* Black Books that he's permanently stuck in hyped-up cop mode, trying to sit on a chair backward like a suave cop. It doesn't work because he keeps "sitting on meself". The very last time he does it, to close out the episode, he says in a helium-induced pitch:
* Black Books, they are building very noisily next door to Bernard's shop and will continue doing so for two weeks, leading to this exchange:
* Black Books try to create a replacement for a priceless bottle of wine they have inadvertently drunk.
* Black Books was this for Fran. It's made clear that he's a self-important arsehole who Fran can't stand, but it doesn't stop her spending half the episode literally masturbating to the sound of his voice.
* Black Books, when Bernard manages to sell the same book to a couple with very different reading tastes.
* Black Books when Fran yells at Bernard about how his grumpy, misanthropic behaviour drove Manny off, says she doesn't want to see him for a while, and storms out of the shop. She immediately returns, having forgotten her purse, and storms off again.
* Black Books where Fran is turned on by an ex-boyfriend's dramatic voice. She discovers he reads the Shipping Forecast and ends up... listening to it in bed...
* Black Books where Manny gets mistaken for a police officer after drinking too much coffee. To get out of being "transferred" he says he's been in the business for 19 years, had a perfect track record and this was his last case!
* Black Books, which probably exacerbates things. When Manny leaves, he is so unable to take care of himself that it nearly kills him.
* Black Books while reminiscing/complaining about their terrible holiday, they stumble on one part they weren't supposed to bring up.
* Black Books, who is hidden not just by the normal techniques, including lots of long scarves, but also because it looks like she's constantly smoking and drinking through the entire series.
* Black Books, who, of course, is a very talented multi-instrumentalist. Bailey recorded all musical renditions in this episode, including those heard on the radio.
* Black Books, who stay together because nobody else can stand either of them.

Apparently, there is some way-back romantic history, but Bernard says he's not allowed to remember that.
* Black Books with wine: having drunk an incredibly rare bottle of wine while house sitting, Bernard and Manny try to replace it by filling the bottle with cheap wine and adding the tastes the real wine is described as having, resulting in them adding vanilla ice cream for the vanilla and a twig for the oaky finish. The task is not aided by the fact that Bernard's taste buds have degraded to the point that he can happily eat a coaster. Their friend inadvertently kills the Pope by giving him the wine to drink.
* Black Box. It takes another 50 years, according at the end of the movie, for Earth as a whole to be able to start mass producing True GN Drives, and not the GN Tau Drives they've been using.
* Black Box: Powers with a mysterious and potentially dangerous origin or mode of action.
* Black box recordings of pilots going down almost always show the captain maintaining a surprisingly calm and neutral voice, even moments before a fatal crash.
* Black box recordings recovered from aircraft crash sites often capture the moment of impact and sounds from within the cockpit as this occurs, making them very disturbing to listen to.
* Black Box time after gaining access to Kevin's original plans via a time paradox.
* Black Boy, one of his memories from his childhood involves him mistaking a chain gang for a row of elephants.
* Black Boy, Richard offends his visiting uncle without understanding why. He had offended his uncle when, after being woken up in the middle of the night because his uncle wanted to know what time it was, his perfectly civil response is somehow perceived as insolent. The uncle declares that he'll give Richard (who is around 11) the beating of a lifetime. The uncle makes a big show of ripping a branch off a hickory tree in the yard to whip him. Only to discover that Richard, in the meantime, has snatched up two razor blades between his fingers, one on each fist, and told his uncle that he'd fight him off. After a standoff, the uncle looks very weary, and gives up while sighing. Then the uncle tells everybody in Richard's life that the boy is a menace and is not to be given any help whatsoever in anything...including school.
* Black British comedian Doc Brown's parody rap "Everybody's Racist" makes liberal use of this trope, in which he accuses, among others: eskimos (because igloos are white), the post office (for pushing second class stamps), and the sky (it rained on his birthday); of racism.
* Black Bug Room, a place within the mind where the character's negative/dark feelings fester, and the character may visit if they break under some sort of strain.
* Black Bug Room. When Zimmy flips out and attacks her, Annie uses her Judo-ish skills to very quickly incapacitate her attacker.
* Black Bullet, after Tina Sprout defeats Yuzuki Katagiri in a sparring match, Yuzuki starts clinging to her and says, "I love you! You're so cool and strong! Marry me!" They are both about 10 years old.
* Black Bullet, but they still hold faith on humanity believing that there is a good side of being human and hoping society will accept cursed children as humans, which is why they continue fighting against the Gastrea.
* Black Bullet cursed child you can think of to the point that you just begging that you want to be killed by her cuteness.
* Black Bullet is set in 2021 during the Great Gastrea War, with present day events taking place ten years after, following humanity's defeat in the war.
* Black Bullet. Rentaro's response is to implore her to Please Put Some Clothes On.
* Black Bullet, the light novels mentioned many countries that treat cursed children much worse than Tokyo. United States happens to be one of them, as cursed children are hunted down and captured like wild animals, forced into slavery (usually either sold into sex slavery or to civil security companies), and used as experiments to unlock their superhuman abilities and implanting Varanium parts in

their bodies.
* Black Bullet, the monstrous Gastrea are explicitly described as inverting this principle: they are based on small animals, mostly insects, with their size drastically increased, but instead of being too weak to support their own weight, they are that many times 'stronger' proportional to their size than the original animals.
* Black Bullet, this happens to Rentaro a lot, because he works and lives with several of the Cursed Children and treats them like little sisters, but they often fall in love with him.
* Black Bullet, this happens whenever some poor sap transforms into a Gastrea. His body bulges unnaturally as he transforms.
* Black Bullet. Though when you see the overall treatment towards little girls who risk their lives to save their butts every waking moment of their life, which includes lynch mobs, school bombings, and treating them as something less than human, you begin to wonder why the protagonists don't start thinking like him.
* Black Bump of the Brotherhood of the Forgotten has rather thick one under his
* Blackburn Buccaneer a.k.a The Banana Jet. It was designed in 1954 and outlasted its all intended successors in both FAA and RAF use. It was finally withdrawn in 1994 because the airframes were too stressed to keep flying safely.
* Black Butler: After dealing with a giant demon hound, with the ability to morph into a human male form (which is butt naked) it takes Bardroy to finally yell at him to put some clothes on, and stop "Letting it all hang out."
* Black Butler. After giving attention to a number of odd characters early in the episode, once the train they're on is headed towards a broken bridge with a bomb strapped to it set to detonate if they stop and an assassin having kidnapped Ciel, they all get up an announce the skills they have that can save the day. Everyone rallies together, excited that they can pull it off, only for Sebastian to inform them he doesn't need their help before going and taking care of everything himself.
* Black Butler Alois attempts to throw himself off a clock tower. It's implied his decision to do this is because he thinks Claude prefers Ciel over him.
* Black Butler. Although it has a physical manifestation, Sebastian tells Ciel to close his eyes, and the camera only gives us glimpses. There are black feathers. A lot of black feathers.
* Black Butler, a mysterious stranger with an oddly familiar voice shows up at Trancie's front door...
* Black Butler. And although he doesn't go so far in the manga, he does regularly express disbelief when confronted with the supernatural, dismissing ghosts and curses even after encountering the real thing.
* Black Butler and is jealous of Ciel as a result. Baron Kelvin also was yandere for Ciel as well as Undertaker to a more ambiguous extent. When Baron Kelvin first met a 7-year-old Ciel at a party held by Vincent Phantomhive, he immediately fell in love with him and came to worship him, viewing him as special and beautiful. However, he decided that only special people can touch other special people, and decided to undergo numerous plastic surgeries on his face with parts taken from actual children in order to become more beautiful to suit Ciel.
* Black Butler and is not technically a cop, though he does investigate on the Queen's orders.
* Black Butler. An evil variation. It gets so bad that eventually he doesn't care whether it's Claude, and sells his soul to Hannah instead because she was pretty much the first person since Luca to earnestly say "I love you".
* Black Butler Anime: Ciel Phantomhive has a demon for a butler, has seen a crazy transgender grim reaper with a chainsaw, met the actual grim reaper, met an angel, has a demon dog living at his house...but believes the old story of the white stag is simply a fairy tale.
* Black Butler anime has Grelle Sutcliffe, who thinks like this about Sebastian. This has gone to the extent of Grelle yelling that she wants to have Sebastian's babies, complete with roses and sparkles (and a disgusted Sebastian). It's even used to get assistance from Grelle by promising her things such as an entire day to do whatever she likes with Sebastian, or an opportunity to take pictures of

Sebastian in sexy poses.
* Black Butler: "A Phantomhive butler that can't do [insert ridiculous task here] isn't worth his salt!"
* Black Butler arc. He has Lau and his horde of Ran-Mao girls sit close to the cricket field. The girls are all showing their legs (back then, the equivalent of naked breasts) to distract the opposite team. It works wonders... until Lau and his girls are forced to leave the field.
* Black Butler (as well as the anime) Ciel is determined to explain all of his actions away with this, especially if Sebastian thinks he is being kind or generous. No matter what it is, Ciel has a reasonably evil or at least unkind explanation—he lets Prince Soma stay at his London house? He needed someone to watch it and managed to stick Soma with the job. He seemed to have a nice time when visiting with his fiancée? Well, he was only acting that way because it was expected.
* Black Butler at first, but has slowly mellowed out in latter chapters...
* Black Butler: At first it seems like corporate scumbag Shinpen Kubo is the mastermind behind the murders, until he's shown answering to a hooded figure who guns him down to take the Necrosis formula. Said figure is later revealed to be Lady Hanae Wakatsuki.
* Black Butler before she gropes her breasts and thighs. Despite her being attractive to the point of attracting girls there are no guys in the series that have expressed interest in her as of yet.
* Black Butler bonus episode has a parody commercial for Funtom Company dog food and a parody preview for "The Black Sushi Chef" (based off of a parody image in volume 5).
* Black Butler: Ciel and Sebastian get shippy moments often but the two that have been confirmed as being this by the end of the anime are Claude and Alois.
* Black Butler, Ciel announces to his companions that to get information on the killer they must go see... and Lau reacts in shock/horror. When they reach the location of their informant (the Undertaker), Lau finally asks, "So where are we?"
* Black Butler Ciel degrades humans for being weak and fundamentally evil and curses himself for being one, but Sebastian notes that it is this constant struggle and their lofty goals that makes them interesting.
* Black Butler: Ciel is absolutely adorable & looks like a weak androgynous dandy, but he's from a long line of folks who straight-up refer to themselves as Evil Aristocrats. The boy sold his soul to a devil in exchange for a shot at a years-long spree of murder. His crimes include fraud, first degree murder, second degree murder, arson, kidnapping, threatening a child with a gun, child endangerment, & child murder. If you want to be Ciel's friend, you have to be subservient to him & be willing to die for him, or he will either abandon or kill you.
* Black Butler: Ciel Phantomhive is a more dark take on the trope. The reason he acts serious and mature is the trauma he endured through losing his parents, and being kidnapped and tortured by cultists. He's now a driven, if jaded, Earl and owner of his own toy and candy company while he searches for the culprits in said torture.
* Black Butler: Ciel's reasoning when Sebastian asked why he never told him that he had asthma.
* Black Butler creator Yana Toboso has confirmed that Grell Sutcliff is a transgender woman, rather than the effeminate gay man that fans originally perceived her as.
* Black Butler Elizabeth is shown fangirling over Maylene getting groped by Ran Mao and taking pictures.
* Black Butler. Especially evident when she nosebleeds upon witnessing a naked guy (who has the default mindset and body of a dog) being held in Sebastian's arms and licking his face. She also tends to get quite excited whenever she suspects Sebastian is flirting with Ciel, despite the fact that she has a crush on Sebastian herself.
* Black Butler, even though it resembles a mix of seinen and shōjo much more

than actual shōnen.
* Black Butler features a crudely-made doll of Sebastian with obvious stitches.
* Black Butler features a disturbing scene where Sebastian force feeds Ciel some medicine to help neutralize the effects of poisonous gas as well as Ciel's flashback to his time as a slave where he and the other children were force-fed all their meals.
* Black Butler, Finny's backstory includes him being locked in a stone room and experimented on for an undetermined amount of time. The amount of times he complains about this? ZERO. Every character with a Dark and Troubled Past is subject for this except for Ciel. Ciel's other servants are a mild example, as well as Madam Red and the circus kids.
* Black Butler, Finny was one of these, until he escaped and went to work for Ciel Phantomhive.
* Black Butler glory, rescues his young master, Ciel, from imminent danger.
* Black Butler, Grell personifies MANY of the fan's emotions towards a certain demonic butler...
* Black Butler: Grell Sutcliff, for Sebastian and Will. It seems she likes them both for the cold shoulders they give her. And the bruises.
* Black Butler: Happens in the second season, considering Alois' whole life is a bit of Fridge Horror. After his little brother and entire village are killed, this already slightly off boy (who laughed cheerfully as he robbed the dead) begins living as a true city street rat. Knowing how things like that work out, and especially after seeing his reactions to things later on, it's quite obvious that this young boy solicited himself for food or shelter before he even hit a double digit age. Think about this: Jim is only around 11 when he goes to Earl Trancy's manor. There, he living with a bunch of boys in the same condition, being bathed and treated like cattle, all while being a sex slave to an old man. At the age of 11. It's quite obvious even then he is not a virgin, as he dolls up and puts on a beautiful red robe, seducing the old man expertly until the guy's kissing his feet. He even becomes the favorite boy, taking place for the man's son who vanished as a baby - the real Alois Trancy which allows him to take the name Alois after Claude kills the Earl. Episode 8 shows that Alois was raped by the former Lord Trancy. It's implied that this helped make him so Ax-Crazy — he's shown to have been a little off-kilter even before the event, having joked about his entire village dying and happily looted their corpses when they did, his violent tendencies seem to date from it, not to mention his compulsive promiscuity.
* Black Butler has a whole arc in the manga where Ciel and Sebastian join Noah's Circus to investigate the whereabouts of children that have gone missing. Needless to say, what starts off as your average circus with jugglers, tightrope walkers, and acrobats turns much darker as we learn about the secrets behind it.
* Black Butler has noticeably higher quality animation than the first. This is most likely because the second season was made two years later (at which point the technology was better) and because it's only half the length of the first season, meaning they could put more money into the individual episodes.
* Black Butler has several panels that suggest this probably happened to him.
* Black Butler hire some actors to put on a play for a bunch of orphans (for publicity rather than money, they already have plenty of that). When the actors get delayed, guess who has to fill in the cast...
* Black Butler hits this trope when he has a panic attack in the manga.
* Black Butler: In episode 14, when Ciel is discussing entering in the curry contest, it shows a hyper-realistic shrimp curry in the background behind Sebastian.
* Black Butler is a 12 year old rich kid in control of a demon who just happens to be working as a butler in his mansion. Sebastian, the demon, pretty much does whatever Ciel tells him to do. He won't do anything without Ciel ordering him to. Of course, it's also quite clear he will eat Ciel's soul as soon as he fulfills the admittedly vague terms of their contract.
* Black Butler is a fallen angel and a mention of God, which implies there is good angels, but they never show up and a devil saves the day.

* Black Butler is a master of making anything he touches inedible. But it should be expected from a guy who cooks using flamethrowers and dynamite.
* Black Butler is an extremely pretty boy... after a very extensive makeup routine.
* Black Butler is having a live-action movie, tragically, the only character from the series that will be present is Sebastian; the main character being a descendant of Ciel.
* Black Butler is Lau's bodyguard and most loyal sidekick, she speaks very little or at all in some cases. Although her speech is restrained she has a habit of showing off her impressive figure towards men, her stoic expression makes it hard to tell if she likes pleasuring others (and herself) or not?
* Black Butler is this trope after he turns thirteen; prior to that, he was a Child Prodigy. His ability to track down the most evil people in London at the behest of the queen while building an extremely successful corporation puts him firmly in the genius category.
* Black Butler. It seems as though Elizabeth's entire point of existing is to make him smile again... and she is one of the few people who can get a genuine smile.
* Black Butler: It's implied that Sebastian's influence in Ciel's life is making the already cynical Ciel even more ruthless.
* Black Butler later in the series) is among them, as well as the bad-guy for that chapter. There's also a metaphor involving getting rid of evil, being evil, and some other things involving the pool table.
* Black Butler, maid Maylene misread the instruction label of a detergent due to her poor eyesight, and used 30 cups instead of the required 3, causing a huge, bubbly mess. In her defense, it was in Roman numerals, and if you try to ask a farsighted person to distinguish between XXX and III from point-blank, you'll probably get the same result.
* Black Butler manga, Ciel has Sebastian slip laxatives into a meat pie and feed it to the opposing team before a cricket match.
* Black Butler massacre his captors. This gets mildly deconstructed, as the violent revenge became part of his trauma, and he suffers flashbacks when witnessing similar violence.
* Black Butler. Not in the direction you might think, though—she's a bisexual trans woman with feelings for both Sebastian and Madame Red.
* Black Butler. Not to mention viewing humans as prey because he literally eats them.
* Black Butler ranging from short to decently long without getting annoying. The problems began later on.
* Black Butler, Ronald Knox has a lawnmower, Eric Slingby has a normal saw, and Alan Humphries who has a Japanese Style Garden Slasher.
* Black Butler's Ciel is considered the least physically capable in the entire series, despite being one of the most dangerous in intentions and actions.
* Black Butler: Sebastian is a seductive demon who is the devil to anyone really in both canon and fanfics.
* Black Butler Sebastian Michaelis is the perfect butler: he can cook the finest cuisine from any country, perform beautifully on the violin, and recite quotes from virtually any body of literature. Oh, by the way, he's a demon.
* Black Butler, Shinigami Grell falls asleep on the side of the road and forgets to breathe. He's mistaken for dead and taken to the local undertaker, where he wakes up after being called a fourth rate body by the undertaker.
* Black Butler. Subverted in that everyone seems to like watching him sleep, so it can be taken in a non-romantic way as well.
* Black Butler tended to attempt suicide over the littlest mistakes she made in the earlier episodes. At first, the cast is willing to stop her but it annoys them so much they decided to no longer do so.
* Black Butler that it's easy to forget they're only using one another for their personal goals (Ciel using Sebastian for revenge and Sebastian only helping him so he can eat his soul later). There are no real hints that indicate they care about each other as friends, or even fellow individuals, but their constant physical intimacy and dialogue has lead to fans shipping them together more than Ciel and

his actual fiancee.
* Black Butler. The audience never gets to hear the joke but the cast's reactions range from blank stares to confusion.
* Black Butler, the main antagonist of the Noah's Ark Circus uses the name Tom the Piper's Son as his alias.
* Black Butler: There's a hellhound named Pluto. He doesn't necessarily fit in any of the above categories, but it is stated that he is a demon hound, which is basically the same thing as a hellhound. He can breathe fire, is white, can turn into human form, and his intelligence level is ambiguous, as it is never made clear if he has more than the mind of a normal dog.
* Black Butler: These appear human, but are completely immune to harm by Earthly objects, can throw a butter knife with the strength to make it cut through bone, and can move faster than the naked eye. They can be bound to contracts to serve humans, but are simply waiting until it's met to eat their souls.
* Black Butler "The Tales of Will the Grim Reaper", aspiring writer Thomas Wallis is inspired by William T. Spears to write a novel with this very premise.
* Black Butler. This is only made funnier by Sebastian's comment at the end.
* Black Butler to a sniper easily capable of blowing your brains out. And with her extreme farsightedness, she needs only the iron sights to snipe.
* Black Butler to his cousin, Elizabeth. They get along quite well; in fact, Elizabeth is one of the few things that Ciel seems to care about.
* Black Butler. Usually keeps it bound in a braid, but it easily reaches her ankles.
* Black Butler: While undercover in a circus, Ciel shares a tent with a skinny teen that he calls "Freckles". Turns out that he is really a girl named Doll. She offers to show him her privates so he can be sure.
* Black Butler: William does this in the manga to Sebastian when forced to share a room during the Circus arc. Enforces it with gusto when Ciel encroaches on his space by 3 cm.
* Black Butler with ball-jointed orthopedic limbs, so they look somewhat like steampunk dollish cyborgs.
* Black Butler, with Marquise Midford and Elizabeth recognizing him instantly. Yet Edward, who has not only seen Sebastian being Ciel's butler, but is also a student at the school, never recognized him until it's spelled out to him.
* Black Butler zombies in the Campania arc, which have a very traditional appearance (stitches, falling-apart bodies, gaping mouths, shambling gait) but are referred to as Bizarre Dolls. This is most likely because the series is set in Victorian England, long before the word "zombie" entered common usage.
* Black Butterfly, a Robin Hood-esque master thief, who steals from wealthy, corrupt officials, will leave behind hairpins shaped like black butterflies at the site of each theft. Hence how she gets her nickname.
* Black Butterfly, non-fatally, while fleeing. She does start taking names in the film's climax, since at that point she's fighting hostile bandit mooks.
* Black Caesar that he's able to get patched up via Hollywood Healing and seek revenge.
* Black Canary #6, Bonfire - the guitarist in Bo M - attempts to barbecue Dinah with a flamethrower hidden in her guitar during a battle of the bands.
* Black Canary) adult daughter when she fell in love with the alternate universe version of her deceased husband. Post-Crisis, the grossness and general oddness of the situation was fixed by simply making two Black Canaries: the modern day one is the daughter of the (now retired) original Black Canary from the '40s.
* Black Canary). As Black Canary is an independantly popular character in her own right, possibly moreso than Green Arrow himself, understandably fans of her character don't tend to appreciate this tenure.
* Black Canary; "Black Canary" was seen as something of a superhero sex symbol by the general public because of the blonde hair, fishnets, and leather leotard, but "Dinah Lance" had short black hair and dressed in a more homely and tomboyish fashion. Dinah laments being dateless because she's straight-up invisible to guys who are openly lusting after Black Canary from seeing her on the news. Eventually

she realises that "Black Canary" is who she really is inside, and she should embrace it, casting her later abandoning of her secret identity as something of a coming of age sort of thing.
* Black Canary gained her iconic supersonic scream due to radiation. This was later deconstructed when it was revealed several (both in-series and meta) years later that she was terminally ill due to the lingering effects of the radiation.
* Black Canary have implications. In one comic prior to Black Canary permanently dyeing her hair, Green Arrow mentions that she only wears her blonde wig to bed.
* Black Canary. Huntress was booted off the League by Batman and hasn't served on a League roster since. Black Canary was made the League's chairwoman even after her actions were found out.
* Black Canary is probably the first occasion, though her costume has often turned into just streetwear. In the 2010s, this became pretty much official as her default look became just a shirt and short-shorts over her usual fishnets.
* Black Canary it had been retconned into being naturally blonde, but that was subsequently retconned as it was later shown that she bleached her hair blonde.
* Black Canary, it is revealed Dinah harbors a huge amount of guilt for her actions and regrets abandoning them when they needed her the most.
* Black Canary. Lady Shiva also sees Canary as one of the best contenders for surpassing her, and tried to groom her into following in her footsteps.
* Black Canary, not to mention Sin. Thanks to the significant age gap between her and Oliver, she was actually closer in age to his ward and son, so while technically she's their adopted stepmom, they generally saw her as more like a sister. She was also this to Stephanie Brown briefly, though her relationship with the Batkids hasn't been as explored.
* Black Canary: Not typically part of her costume attire, but generally her civilian attire, at least from the 2000s-onward, tend to be almost exclusively shirts that don't cover her navel. Which somewhat makes sense since that was fashion of the time and she was a woman in her mid-20s.
* Black Canary or porn star Amber-Amber is often distracting for men; he can certainly attract a certain amount of passing straight male interest when he's in drag, and male readers are often prepared to agree that this is plausible.
* Black Canary or spend time with her daughter. Dinah gave her a "#1 Mom" cup ironically but loved her mom nevertheless.
* Black Canary she and Oracle go to a mall. Upon seeing a display of dolls featuring her '80s costume and having the clerk explain that they can't even sell the things, she buys up all of them so that no one else can see how bad it looked.
* Black Canary, she even bested Superboy in a sparring match despite him having super strength.
* Black Canary's original co-star and love interest was Johnny Thunder. Black Canary was a bit villain in his books, but became a
* Black Canary that can alter reality so long as she says it backwards). Naturally, their weakness is anything that can disable their ability to speak (such as a gag, something that covers their mouth, or injuries to their throat).
* Black Canary to hide who she was, and pretty much the entire hero/villain community knew 'Dinah Lance' was her name.
* Black Canary was her saving her love interest (and eventual husband) Larry.
* Black Canary was making them think that getting married would be a good idea, and after the wedding, things didn't get any better. It took Oliver becoming a killer for Dinah to give back her wedding ring, and even that she regretted.
* Black Canary wears this with the addition of fishnets and a leather jacket.
* Black Canary when he's surrounded by a SWAT Team, only for the Canary to smash through an overhead skylight, then break every other sheet of glass in the room using her sonic device so she and Oliver can jump out the window while everyone else is clutching their ears in pain.
* Black Canary with her daughter (Dinah Lance). At least one writer has tried to rename her "Diana Drake".
* Black Canary, with many considering it to be a well-executed series.
* Black can not be stopped. Defeating the boss is not an option; you must fix the

elevator and get out of there.
* Black Cap of Death: A judge puts on a black cap to let all those present know that the death penalty has already been decided and will soon be passed.
* Black Cap of Death: The death penalty has been outlawed in the UK and much of Europe, meaning judges rarely ever wear these today, and the cap's original connotations can only survive in period pieces. Oddly they are regardless still issued them, as they have never been formally removed from the judicial uniform and are technically still supposed to be worn or at least carried at ceremonial occasions like the State Opening of Parliament.
* Black Cap of Death: The judge wears a black hat to show they intend to give a death sentence.
* Black Castle Olshansky, a mystery novel by Vladimir Korotkevich, has an in-universe example. Everyone, and the protagonist himself, feels nothing but frustration when he finds the scientific explanation of the haunting in the titular black castle.
* Black Cat (2005-2006) has modern technology pop up, but the setting overall has a very Diesel Punk aesthetic and feel to it.
* Black Cat (2019) offers to make her upgrade permanent if she releases it into the world, and the two of them can rewrite reality in their own image. Death to her enemies, infinite wealth and respect, and her real father coming back to life almost pushes her into agreeing...but the Wild Magic overplays its hand by promising to brainwash all her ex-lovers into coming back to her. Realising what accepting the offer would turn her into, Felicia relinquishes the power for good.
* Black Cat 2019 series, it's established that her "bad luck" aura tampers with magic, making her largely immune to magical attacks and something of a Man of Kryptonite for spellcasters (low-level ones like Xander the Merciless, at least).
* Black Cat actually sees a ghostly image of Saya juxtaposed on top of Train. Although their relationship might have possibly evolved into a romantic one, it didn't.
* Black Cat also has this being able to keep up to occassionally keep up with Spider-Man in strength, speed and agility even when she doesn't have superpowers.
* Black Cat also wears catsuits, unsurprisingly, though often with a glorious white fur trim.
* Black Cat, and a prominent position in one of the most powerful organizations in the world).
* Black Cat), and later tries to kill Train's other friends because of this.
* Black Cat and pretty much any character dubbed by Brina Palencia. She appears to be a specialist at playing monotonous and emotionless girl characters and gets typecast as such.
* Black Cat, and wants him badly. Badly enough that he gets downright murderous toward anyone he sees as "in the way", including Train's not-girlfriend Saya.
* Black Cat anime, both Train and Sven are shown crossdressing. For Sven, he wears a very frilly, fancy dress to try to lure a killer for a bounty. It doesn't work. For Train, after transforming into a child, while Eve and Kyoko go out to buy clothes the right size for him, he's forced to wear Eve's dress.
* Black Cat anime has this happen to Sven as he's going out for a walk and Rinslet slams the door open just as he reaches it.
* Black Cat anime, we see Train shooting and beating up what appears to be a priest at prayer and a bunch of nuns. Then they whip off the habits to reveal that they're actually terrorists with machine guns.
* Black Cat are "sweepers," which are essentially the same thing as bounty hunters.
* Black Cat at once. Mind that these Elite "Mooks" are actually very hard to kill, much less subdue.
* Black Cat barely tolerated Peter Parker's presence, but was hot to trot for Spider-Man any time. The catch is that Black Cat knows that they are one and the same person.
* Black Cat because he believes that the “witch” Saya has corrupted him too much.
* Black Cat certainly qualify, given their ability to turn their hair into fists,

blades, or virtually any other item the situation calls for.
* Black Cat!"). Creed tends to take all of Train's comments literally, and the jokes tend to go over his head.
* Black Cat Detective: Black Cat has Badass Whiskers. When Hei Mao twists his whisker like a pimp, you know shit is about to go down. It is an allegorical moustache.
* Black Cat Detective, the recurring villain, the One-Eared rat, got his name after having one of his ears shot off by Black Cat in the end of the pilot episode.
* Black Cat) drank the Tao juice, allowing him to access a superpower. For him, he could increase his muscle mass drastically, eventually being able to block bullets with his biceps. When he comes across the heroes, he loses, and returns, putting his whole being into increasing his muscles. He dies from using too much energy, and degenerates into a shriveled husk.
* Black Cat for medical treatment (Red Suit path) or bond a symbiote to her (Black Suit path).
* Black Cat from the same series might also be considered an example, though, being something of a
* Black Cat goes with this trope... and damn does he make it look hot.
* Black Cat happened, having her be arrested by the new Spider-Man and subsequently become a crime boss after getting out of prison, outright ignoring the fact that she was not wronged by Peter himself.
* Black Cat has Chronos, a world-wide peacekeeping organization that amongst other things has a division of elite assassins (which the main character Train was once a part of), units of special forces troops, a world-wide intelligence network and multiple R&D divisions working on various research projects (like nanotech).
* Black Cat, has grappling hook launchers built into her gloves and is a straighter example of this trope.
* Black Cat has the Astral Whip skill, where she lashes enemies with a psionically manifested whip. Combined with her ability to make an enemy her slave and her signature skill which mind controls enemies around her to get on their knees, she invokes a heavy dominatrix theme.
* Black Cat. Here, though, Train's long black coat isn't so much a symbol of his badassitude but of his place in Chronos as an assassin; during most of the series, he wears a cropped black jacket over a long shirt, even though he's still pretty badass. Significantly, he dons his old coat again for a major showdown.
* Black Cat he wears. And when he's not a Walking Shirtless Scene, it's because he's butt naked.
* Black Cat in a bathroom inside Torneo's mansion. He cuts the call short when someone urgently needs to use said bathroom.
* Black Cat into her backstory removing her freewheeling adventuress origin in favor of a rape victim who turned burglar as a displaced reaction to her attack.
* Black Cat is a eleven-year old girl, but also a genetically-engineered bioweapon made using nanotechnology.
* Black Cat is rife with this — the setting includes an entire martial art dedicated to punching bullets — but what's notable is that the beneficiaries of this trope are for the most part more powerful than characters with genuine supernatural abilities: when Belze fights Kyoko, he notes that she's using her Taoist abilities to enhance her speed... then promptly declares that, at said speed, it's ridiculous for her to even be trying to hit him. The extreme example, though, is Sephiria's ability to disintegrate people (literally nothing left) with her sword just by hitting them a lot, really hard. Even some of the more normal characters like Saya and Kevin still have some ridiculous skills.
* Black Cat kills more or less every major world leader in one day. No one is talking about anything else, obviously.
* Black Cat, Kyoko has a scene like this where she imagines herself confessing her love to Train.
* Black Cat leaves you in disbelief when it pulls this off in episode (if you are watching it on DVD and so realise that it has to end somehow at Episode 24). So, at Episode 20, Creed Diskenth is finally defeated, and carried off by Echidna Parass

after Eve disables the nano-machines in his body, making him mortal, and then Mason suddenly turns up, accompanied by Doctor, Shiki and several Chrono numbers, announcing that they plan to shape a new world order, resulting in an arc that is even more extravagant than the Apostles of the Stars arc, but that lasts just 4 episodes.
* Black Cat manga started out with its deviations from "realism" being mostly limited to creative liberties taken with gun use — then the plots got more and more convoluted, and by the end science with downright supernatural effects was commonplace.
* Black Cat manga, Train grabs an unconscious Creed's arm to keep him from falling off a tower's roof. Train's hand was going to slip, but Leon intervenes and uses his wind powers to keep them afloat.
* Black Cat: New Bounty, Eve is trapped in an abandoned castle, locked away with the evil Doctor and it's up to Ichigo to save her.
* Black Cat one-shot featured her breaking into a museum... in order to leave a card advertising her new security consulting business to help them avert this trope.
* Black Cat ongoing was one of Marvel's many "unofficial" miniseries, intending to only last 12 issues before being "cancelled". Its popularity led it to continue past that for a few more issues and then be relaunched with the same writer at the helm.
* Black Cat opens with Train and Sven trying to collect a bounty on a serial dine-and-dasher. When he bolts, Train runs after him, leaving Sven to follow suit... and get labeled as a dine-and-dasher himself!
* Black Cat practically lives this trope. According to him, his entire plot to rule the world will always be incomplete if Train isn't by his side. It could be said that he is the most persistent character in the entire series, offering Train this countless times.
* Black Cat, protagonist Catherine was bestowed enhanced sharpshooting skills, superior senses and greater reflexes by having a microchip, Codenamed "Black Cat", implanted into her brain while she was unconscious.
* Black Cat replaces his arm with a Tao Blade and sprouts an extra arm.
* "Black Cats Don't Walk Under Ladders (Do They?)" that was used to kill Marty Corrigan. He has to do it because until the killer confessed, he wasn't sure which of the suspects had done it.
* Black Cat "Senorita" he must protect, and is shown continuing to play the Black Cat role and defend her even at the risk of dying.
* Black Cat. She can turn her hair into nano-blades and cut you at a particle level.
* Black Cat she made for him and while a little freaked out, he still pursues a relationship with her.
* Black Cat. She's a thief who has a growing interest in the wall-crawler and the two become a couple. Unfortunately, her main interest being in his heroic identity of his real one and constantly going back and forth on heroism or thievery makes their romance difficult.
* Black Cat sneaks into Tornero's lab to steal information and discovers human experiments that look like chimeras.
* Black Cat survives being stabbed through the chest by Eve's mutated knife-arm, because it "Eve intentionally avoided his vital organs", although it is unclear how a knife a little over half the size of his entire chest could avoid anything.
* Black Cat Sven, as well as saying that he'd rather have him by his side as a dead body rather than let Saya have him.
* Black Cat, tells Train that he would at least want to have him by his side even as a dead body rather than let Saya have him.
* Black Cat than in the manga, making this an even less justified trope.
* Black Cat: The Taoist Shiki uses multiple insect-related attacks, such as with moths, bees, and he can even ride on a giant dragonfly.
* Black Cat, Train eventually acquires an impostor, who the gang meets. Sven and Eve want to smack him upside the head, but Train listens to his wild stories with a

look of wonder on his face, and eventually agrees to become the impostor's apprentice. When people challenge the impostor, Train steps up to the plate, claiming that the other guys aren't "worthy for [Train's] master to spit on." THEN the imposter notices the XIII tattoo, and the unique gun...
* Black Cat, Train Heartnet is an assassin after being forcibly raised by the Professional Killer that killed his family.
* Black Cat used to wield a katana he called "Kotetsu." Later, although still in the form of a katana, it becomes a blade formed from Creed's Chi. Still, the sword gets broken by a gunshot.
* Black Cat when it comes to Train and is the one responsible for what happened to Saya.
* Black Cat, when the mob accountant they have captured asks the duo if they would do him a favor and let him see his family once more, Train immediately says OK, because catching and taking him right to the cops would be too boring.
* Black Cat, who takes a liking towards Danny despite being two years older than him.
* Black Cat (with a rose in it), speaks in a much more formal manner, plays the organ well, is skilled with large scale oil painting, carving gold statues, etc.
* Black Cat works at four or five different restaurants over the course of the series.
* Black Chamber novels by S. M. Stirling, which is set in 1916. A comment is made that the last time anyone thought that the Great War would be over and everyone home by Christmas was December 24th, 1914.
* Black Christmas (1974) a killer preys of a sorority near Christmas time.
* Black Christmas (1974) proved difficult for the scene where he jumps on Clare's corpse in the rocking chair and licks her face. After trying to coax the cat multiple times, director Bob Clark physically threw him onto Lynne Griffin. They also sprayed her face with catnip so the cat would lick her.
* Black Christmas (1974), the heroine is pregnant, though the movie ends with her alone in the house with the killer. The first victim is also described as a "professional virgin."
* Black Christmas (1974) was the first horror film to use this line. The cast has been receiving disturbing phone calls throughout the movie, and when the police with the help of the phone company investigate the matter, this is the conclusion.
* Black Christmas (2006) and raped him. She wound up giving birth to a daughter named Agnes nine months later.
* Black Christmas (2006) in most of the parts specifically to make it less clear who the actual Final Girl would be. A blonde minor character called Eve is killed off though.
* Black Christmas (2006): Made in 2006, last part of the prologue set in 1991.
* Black Christmas (2006): Made in 2006, part of the prologue set in 1982.
* Black Christmas (2006) opened in the US on December 25, 2006. The UK got it ten days earlier, on December 15th.
* Black Christmas (2006): Parts of the prologue takes place in 1970 and 1975.
* Black Christmas (2006) remake, after murdering his father, Billy's mother and her lover keep Billy locked in the attic and use him for sex. He goes steadily more insane before finally snapping one Christmas and murdering them (as well as mutilating his sister/daughter Agnes).
* Black Christmas (2006), was reluctant to do a horror film, and only agreed on the condition that she be killed off.
* Black Christmas (2019) - Kris responds to a taunt from Riley's rapist by throwing a drink in his face. Marty gives an extremely overblown 'o-face' reaction, as if Kris did something scandalously hilarious.
* Black Christmas (2019) of the characters likable. The male characters are all misogynistic jerks and/or murderers (and even the sympathetic male characters end up being mostly useless), while the main characters are superficial and insufferable. Although Riley generally gets a warmer reception, even she's not enough to get most viewers invested.
* Black Christmas (2019). This sets fire to him, and the fire soon spreads to the

rest of the frat house.
* Black Christmas (2019) this way during the ritual in the frat house.
* Black Christmas (2019), who is normally blonde, but is brunette for this film.
* Black Christmas, not to mention more insane. Eventually Billy snaps and murders (and eats) the parents but spares Agnes (mutilating her in the process). Years later he and Agnes reunite for a killing spree.
* Black Christmas, would be produced with the lucrative American film market in mind, and as such would often be set in innocuous, Middle American locales while being shot in and near Toronto. Often times, this would be indicated through the presence of American paraphernalia while avoiding any direct on-screen reference to a specific location, in an effort to keep the film's setting ambiguous enough to avoid alienating any particular geographic demographic.
* Black City is hired to investigate the assassination of Archduke Franz Ferdinand before the conflict escalates. Unfortunately, he never makes it to Austria in time.
* black-clad and domino-masked thieves steal everything they own, kitchen sink included.
* Black Cloak: A black coat, robe, or cape, can make a character look sinister and mysterious.
* Black Cloak: Characters who murder or commit other violent acts onscreen will invariably wear black and have their face covered, to keep viewers guessing and make it ambiguous whether it's a man or a woman—in theory. But as one blogger put it, as soon as you see the ominous figure in black, you can safely assume it's a woman (and usually the villainess), since these movies don't ever shy away from showing men being overtly evil.
* Black Cloak, has the Noob guild kill members of the group so the can steal their cloaks and sneak into one of their meet-ups.
* Black Cloak: What better way to obscure yourself than wear a conspicious black cloak?
* Black Closet, another Catholic school full of girls sighing over each other.
* Black Closet if you romance her sister Althea. She resigns the Student Council in protest (though you can convince her to come back part-time with the right dialogue options) and puts another girl up to harassing you to try and ruin your relationship.
* Black Closet's parents shipped her off to an all-girls boarding school was that they caught her fooling around with her boyfriend.
* Black Closet, two of your Student Council minions, Althea and Vonne, will wind up together if you aren't romancing either of them. They're together at graduation, but there's no word on how long the relationship lasts.
* Black Clover (after losing his clothes and emerging from the bath respectively). This tends to prompt shocked and/or annoyed reactions from everyone involved, and his student Mariella eventually accuses him of doing it on purpose, even claiming that it's his favorite thing (both of which he adamantly denies).
* Black Clover. After seeing Asta fight, Leopold declares him his rival. Asta accepts but also asks Leopold what his name is. He also considers himself to be Yuno's rival as well because they're both Asta's. Yuno, on the other hand, doesn't care and only sees Asta as his rival.
* Black Clover allows him to use much more anti-magic and fly through the air. It also wracks his body in great pain afterwards, limiting the amount of times he can use it daily unless he's healed afterwards.
* Black Clover: A magic-less boy in a world where everyone else is a mage gains the power of anti-magic swords, and joins a Magic Knight squad who protect the kingdom from threats on his journey to become the greatest Magic Knight of them all.
* Black Clover, and most do not have impressive physical traits, making them weak against straightforward physical strikes like punches and kicks. Likewise, most mages do not know how to handle themselves in battle if their magic is neutralized in some way. Yami, one of the captains of the Magic Knight squads, possesses the highest physical stats out of all of the captains. This gives him an edge in most combat situations, since not only is he able to dish out physical damage really well, but he can take it too.

* Black Clover anime went on a hiatus on Episode 170 after adapting Asta and Liebe's fight and mutual contract afterwards, as the anime was so close to the manga at the time this would have been inevitable if it continued.
* Black Clover are spread out throughout the continent right after the six month time skip. Asta and Finral leave the others in the Heart Kingdom to join up with the Black Bulls who're near the border of the Spade Kingdom, where they encounter Dante. Noelle, Luck, Charmy, and Nero are in the Heart Kingdom and fight Vanica and her Dark Disciples. Gordon is studying Curse Magic under his father, and Magna and Zora are off traveling.
* Black Clover around attractive women when trying not to cheat on her anymore.
* Black Clover. Asta is caught in dire straits the demon within his anti-magic sword attempts to tempt him into letting it take over with its power. Asta promptly tells it to suck it and punches the demon out to claim the power as his own, entering a demonic form called Black Asta. That said, when overcome by malice in his Black Asta form he's covered in more Anti-Magic and his powers are strengthened, playing this straight.
* Black Clover. Because his power source is a Devil, he's blamed by Damnatio and the Magic Parliament for the elves' attack on the Clover Kingdom, with his status as a peasant making him even more disliked by the aristocrats. He gets out of it by investigating the devils together with the Black Bulls.
* Black Clover can create a long whip made of light that he can move fast enough to destroy most of a cave in seconds. He even mentions the symbolism of the weapon, stating that whips were used to punish criminals.
* Black Clover can use his Body Magic to turn into a giant, musclebound being with enough physical strength to obliterate the ground with a punch and send the resulting countless debris flying with an arm swing.
* Black Clover causes him to provoke some people. He does improve over time, becoming closer to his fellow Golden Dawn members like Klaus and Mimosa.
* Black Clover, Charmy gives Yuno a dessert cake to help restore his magic and keep his strength up. When he mentions that it's delicious, Charmy falls over and lets her soul drift from her mouth with a look of pure bliss on both her and its face.
* Black Clover considers all devils scumbags. Not without good reason, since all the devils abused him during his childhood, tried to kill him by throwing him against the gate to the human world and the strongest devil, Lucifero, murdering his adoptive mother, Licita, when he would've been content living in peace with her.
* Black Clover does not believe in taking it easy when she's training people, putting them through intense practice. She makes her squad go to the Yultim Volcano to train, practicing using their Mana Skin to climb an incredibly hot, active volcano and drags Asta, Yuno, Noelle, Yami, and Charlotte to come with them against their will.
* Black Clover doesn't mince his swords. When he first meets Asta, Nacht tells him that he has no chance defeating any of the Dark Triad and that going would be stupid and reckless, later calling him a fool. He also lists of all of Yami's negative qualities to Asta to show his familiarity with him. Later, he states the Black Bulls' members' flaws to their face, all of which are true, and the fact that they were good-for-nothings caused more damage than exploits when mentioning that he can't stand them.
* Black Clover, dungeons are underground vaults with magic traps that hold valuable items. Because of their danger and relics, they're explored by Magic Knights. An entire story arc is dedicated to exploring a dungeon.
* Black Clover each have this on their foreheads to the Forbidden Magic used to resurrect them. It opens whenever they tap into the power of Forbidden Magic.
* Black Clover earns the respect of many people he meets, even nobles like Klaus and Nozel who look down on peasants like him. His bravery and work ethic inspire the rest of the Black Bulls to become stronger as well.
* Black Clover: Fanzell, due to frequently losing his clothes, prompts this reaction from pretty much everyone.
* Black Clover, for comedic effect Magna's sunglasses shatter whenever he's greatly

surprised, including when the Black Bulls take second place at the Stars Festival and he isn't chosen as a Royal Knight.
* Black Clover. For starters, he calls Jack "String Bean Scythe", Charlotte "Prickly Queen", and Mereoleona "Sisgoleon", much to their chagrin. He also nicknames the elf possessing Charlotte "Prickly Queen 2.0", on account of their similar personalities.
* Black Clover gives one of these. It's one of the few times royalty is shown in a positive light, and it's very unusual to hear her talk like this given her usual haughty nature, but the objects of her speeches come to realize she has a point and are enlightened or encouraged afterward.
* Black Clover has a huge amount of magical power but no control whatsoever over it. Despite being noble-born, she has lived a life ostracized and disregarded because of it. Upon entering the Black Bulls, she finds a great deal of support to help her with this problem and makes improvements quickly.
* Black Clover has a short omake section between the ending credits and the next episode preview, dubbed "Petit Clover" (or "Clover Clips" in the Funimation dub).
* Black Clover has a strand sticking up from his spiky gray hair, which perfectly fits with simple-minded, energetic personality.
* Black Clover has learned how to draw out the anti-magic properties of his sword and enhance/enshroud his body with that energy. Unfortunately, he has very little control over it and he can't sustain it for long periods of time otherwise it would make him. Over time he trains to gain better control over it and last longer in this form.
* Black Clover has Severing Magic that conjures mana blades on his forearms that he can even launch at enemies. He can change the blades' nature and sharpness to whatever he's trying to cut up, letting him eventually counter any magical defense and cut through anything.
* Black Clover has Yuno and his spirit companion Sylph who fuse together to enter the ‘Spirit Dive’ state. While Yuno sees his relationship with Sylph as purely platonic. Sylph is clearly infatuated with him, asking him to take her out on dates and becoming jealously protective whenever another woman is nearby.
* Black Clover hates losing and describes himself as a really bad loser, so much that he gains some control of Sylph's power out of frustration for being on the losing side. Yuno says that he's completely fine as he sweats excessively when Leopold heats the hot springs to melt his cool off, then cheating by cooling himself off with wind.
* Black Clover. He has cute, boyish appearance, with messy blond hair and large blue eyes. This hides a nigh sociopathic fighter who enjoys bloodshed, with him being known as "the Cheery Berserker".
* Black Clover. He later gains the favor of the spirit of wind Sylph, increasing the power of his Wind Magic.
* Black Clover. Her epithet is "master of transformation magic", using it to transform into others because she's terribly shy about her true appearance. She can also make other things disguise as other stuff, which Gauche notes is a rare occurrence.
* Black Clover. He uses Dice Magic, with its power dependent on the number of pips rolled.
* Black Clover. His offensive Spatial Magic teleports and erases matter altogether. Its destructive capabilities made his parents favor him over older half-brother Finral, who is unable to use this because of his kind, cowardly personality.
* Black Clover. His Wraith Magic lets him reanimate dead individuals by putting his mana in their corpses, putting them under his complete control. If they were mages, the zombies can use their own magic.
* Black Clover hosts a devil from the underworld which is the source of his anti-magic. His grimoire was formed when Licht was overcome by despair after the elf genocide, turning his four-leaf grimoire into a five-leaf.
* Black Clover in exchange for abandoning the protection of natural mana. In essence, science led to the creation of new magics at the cost of losing natural magic techniques.

* Black Clover. Initially depicted as somewhat short and scrawny looking, it turns out that he actually has massive biceps for a kid his age. He's also able to rather casually knock a grown man ten or twenty feet into the air and leave a crater in a solid stone wall with a single swing of his sword. Ironically, despite the fact that the Magic Knights are all taller and higher ranked than Asta, almost none of them seem as though they could take him down physically.
* Black Clover is a group of rogue mages led by elves whose goal is to kill all the humans of the Clover Kingdom in revenge and reincarnate the murdered elf tribe by collecting the needed magic stones to do so.
* Black Clover is a haughty tsundere who wears her long silver hair in two tight twin tails, even when playing at the beach.
* Black Clover is a huge magic geek, becoming excited when learning about unique magics, complete with sparkling eyes. So much so that he often shirks his duties as the Wizard King to search for new magics in disguise.
* Black Clover is almost always calm and apathetic, rarely emoting and contrasting her with the more expressive Asta. It's understandable due to her past trauma, but she does show emotions occasionally around the Black Bulls after formally joining them as well as during more serious moments.
* Black Clover is a muscled Magic Knight captain in a tank top who smokes and uses his katana with dark magic. He's always urging his squad members to get stronger and surpass their limits. Yami's manliness is one of the reasons Magna respects him so much.
* Black Clover is deceptive/concealing. His left eye is normally covered. It isn't real and instead contains a magic mirror that accumulates magic so he can augment his mirror spells.
* Black Clover is disparagingly referred to as "foreigner" by Nozel, being originally from the Land of the Sun and stranded in the Clover Kingdom. He is also a source of comedy in the story thanks to his sarcasm and tendency to mess with people.
* Black Clover is one of the Biblical Jews. The elves are a race "blessed by mana" similar to the belief that the Jews are the chosen people of God. The elves were massacred by the Clover Kingdom, a country with Roman names including "Julius", "Augustus", and "Nero", drawing a parallel to the destruction of Jerusalem by the Roman Empire. The Kabbalah is heavily associated with the elves, with their strongest members comprising the Apostles of Sephira and the elves reincarnated by placing the magic stones in the Tree of Life Monument. Elves like Kivn have Hebrew-inspired names, and they are resurrected using a spell named "Noad Nephesh", Hebrew for "destined soul". Patry's first outfit has him wear a kippah, a traditional Jewish cap.
* Black Clover is perhaps the most jarring example of any anime currently airing. The show is frequently criticized for its mediocre to non-existent animation in most episodes. But then every dozen episodes or so, an episode featuring a major climatic fight will occur and animation quality will skyrocket to a level many anime films struggle to reach.
* Black Clover is quite ladylike, being a polite and sweet young woman who's also a good cook. Unlike most other royals, who belittle those they see as beneath them, she's kind to almost everyone regardless of their background.
* Black Clover is so deeply infatuated with Sister Lily, so much that he refuses to peep on other girls at the hot springs and is completely oblivious to the fact that Noelle, Mimosa, and Rebecca all have a crush on him.
* Black Clover is the Eye of the Midnight Sun's physical powerhouse who loves fighting and killing. The Guidebook gives him a 5/5 in Brute Force. He's also not too bright having spent so much time buffed up with his Beast Magic, he had forgotten just how much of his supposed strength was due to it. His "strategy" of letting Asta stab him with the Demon-Dweller sword backfires immensely as a result.
* Black Clover is this for the main characters: Asta, Yuno and Noelle. Asta leave his home to become a Wizard King, Yuno must use his powers to be one of the best Magic Knights for Golden Dawn, and Noelle has to prove herself as a successful Magic Knight.

* Black Clover is to try to steal her meal or waste food, manifesting her giant ram to attack enemies who do so. The Eye of the Midnight Sun ruining her vegetable garden causes her to angrily rally the Black Bulls to make them pay.
* Black Clover is very short, standing at 155 cm (5'1"), and fights against the tall and beastly Vetto, whose brute strength has to be sapped by Asta's anti-magic sword before he defeats him with Finral and Vanessa's help. This trope happens again when faces off against the tall, imposing Dante. Even moreso when Dante uses his Body Magic to turn gigantic and muscular when Asta fights him alongside Yami.
* Black Clover. It is only logical that his total lack of initiative is paired up with an innate skill in magic that allows him to use spells without having to learn or practice them.
* Black Clover: Licht's spell that uses the combined power of the reincarnated elves destroys Zagred's body except his heart, which allows him to regenerate his entire body. It requires Yami catching him off guard by bisecting his body, Yuno destroying his spears in time, and Nero healing Asta for him to finally destroy his heart.
* Black Clover Magic Knight captains. Gauche provides the exposition — a mage can invest mana into a specific location they have a strong connection to, and the longer they stay there the more mana they can invest. Since Henry has lived in the mansion long before it became the Black Bulls' hideout, he has a tremendous amount of power stored there.
* Black Clover makes the swords too dangerous for anyone but Asta (who has no mana at all) to wield.
* Black Clover manifests a spell called the Red Thread of Fate, forming a red cat familiar named Rouge made of her magical threads. Instead of it being romantic love as is usual for the trope, the magic is based on familial love. Her spell only protects the Black Bulls, whom she deeply loves and acknowledges as her true family over her abusive mother the Witch Queen. Rouge's presence near the Black Bull changes fate in their favor, making them avoid attacks so long as it's nearby.
* Black Clover, Mimosa's Plant Magic manifests as bright and colorful flowers, and she can even form a dress for herself made of flowers that boosts her healing ability. Her flower dress even has "Princess" in its name.
* Black Clover, Mimosa Vermillion's Plant Magic involves the manipulation of plant life. She can even make large plants grow inside a long-abandoned ruin. She uses them to heal herself and others in addition to making maps of a dungeon, making her a vital source of navigation through the otherwise hazardous area. After training to become stronger, she can even form a flower cannon that shoots mana beams.
* Black Clover: Noelle gains a spell called Valkyrie Armor, compressing her mana into an armor and lance made of water. Using it, she can control the mana around her, letting her fly through the air.
* Black Clover, Noelle tells her no and wonders why she herself sounds so desperate, denying her own romantic feelings for Asta.
* Black Clover often tells his squad to surpass their limits during dangerous situations that have them fighting against formidable foes. They certainly live up to their captain's words, becoming stronger and managing to defeat powerful enemies — even sometimes learning new spells in the process.
* Black Clover of the Magic Knights, he started going around attacking the ones that committed crimes. The man he is introduced attacking was actually about to attack an old lady who bothered him by asking help to find her granddaughter and Zora defended her.
* Black Clover on the elves. Despite this, it takes him very little time to learn how to sense ki and he quickly grasps the mechanics of his Black Asta form. The Guidebook gives him a 4/5 in "Cleverness", showing that while he may be traditionally dumb he really can be clever.
* Black Clover. She refuses to give up in tough situations, convincing Nozel that the elf-possessed humans do not have to be killed and will be saved by them. She passionately asks Patry to help her and the other Magic Knights grow stronger to defeat the Spade Kingdom. When asked what makes her think they can become strong enough in little time, she states that giving up is even harder than getting

stronger.
* Black Clover, speaking only when he needs to express his thoughts and usually silent unless the situation is dire. Flashbacks show that even when he was young Yuno was shy and quiet, in contrast to the more loud, talkative Asta.
* Black Clover start off as the least respected and lowest-ranked of the Magic Knights squads with -30 stars. After Asta joins, they are inspired to become stronger and many of their members show their true potential as powerful mages. They face many foes from the Eye of the Midnight Sun and come out victorious afterwards, with all their accumulated accolades allowing them to jump to second-place in the annual squad rankings.
* Black Clover stretches 3 chapters into 5 episodes and takes the entire first episode before Asta gets his Grimoire. These episodes are slow and are filled with flashbacks. The series doesn't pick up until Asta joins the Black Bulls and then picks up faster once the Bulls enter the first Dungeon.
* Black Clover suffer from radically different personalities to the one they had while they were alive, with Vetto becoming a mad brute obsessed with sinking his enemies into the most absolute despair and Fana being consumed by a deep hatred against those who oppose Licht. Rhya as well to a lesser extent because of the side-effects of the Forbidden Magic. They get better once Rhya restores them in their artificial bodies, though they still harbor some of the hate against humans they had while being reincarnated.
* Black Clover that give his male companions nosebleeds, and flat-out refuses to peep on the girls in the bath. This is because he has such a powerful crush on Sister Lily from his home village that he refuses to consider other romantic prospects. He's also oblivious to Noelle and Mimosa.
* Black Clover, the Black Bulls who don't have large amounts of magic power like aristocrats make up for it:
* Black Clover, the Clover Kingdom hosts the Royal Knights Selection Exam to choose the members of the Royal Knights, an elite squad of Magic Knights, specifically to defeat the Eye of the Midnight Sun.
* Black Clover the Clover Kingdom is ruled by the king from the royal Kira family. The kingdom's legal authority is the Magic Parliament, who are a group of royals and nobles. The kingdom's military are the Magic Knights, comprised of chosen mages divided into squads with captains who all follow the Wizard King, the strongest Magic Knight who has more influence than the unpopular king. The society of the kingdom itself is dominated by nobility, who are all born with great magical power and look down on commoners and peasants as a result.
* Black Clover. The fact that Noelle was born and grew up unable to properly control her own magic, no doubt intensified this lingering resentment and belief already held by her family.
* Black Clover. Their goal is to use the eleventh magic stone in the Shadow Palace to fully complete the reincarnation.
* Black Clover, the Spade Kingdom intends to open a gate to the underworld using the Tree of Qliphoth, with Yami and Vangeance as sacrificial offerings. Over seven days, seven gates to seven levels will gradually open. If the final devil Lucifer emerges, the world is finished.
* Black Clover, the village Hage where Asta and Yuno are from has a massive skeleton of the demon god that the first Wizard King defeated.
* Black Clover they are referred to by the archaic word "grimoire" and are received by young magic users in a yearly ceremony so that they can unlock their true magical potential.
* Black Clover. This revelation of their corruption not only disillusioned Zora with the Magic Knights but also caused his outlook towards the world to become more dreary and realistic. In present day he himself is now a Magic Knight and with the Black Bulls no less but his hatred for the organization as a whole has not wavered and he's quite hesitant to bond with his teammates and the people he helps.
* Black Clover to empower their spells. The Clover Kingdom abandoned the protection of natural mana long ago as the country became more technologically advanced. The country lost the techniques of natural mana rune arrays and, in turn, developed

more eccentric magic attributes like chain, spatial, and steel that their Old Magic counterparts did not have.
* Black Clover turns out to be one of these, as he would be drained to the point of immobility if it weren't for his inability to wield mana in the first place.
* Black Clover was an escaped convict imprisoned for mugging a noble after his parents were killed for their wealth and him and Marie were cast out. Yami defeated him and convinced him to join the Black Bulls to support his sister.
* Black Clover: When he first joins the Magic Knights, Asta has no idea about what a Magic Knight is supposed to do, despite it being his dream to join the organization and become the Wizard King. As a result, he relies on the other Black Bulls to tell him what they're supposed to do.
* Black Clover, when his vision is taken by Catherine's Ash Curse Magic, Yuno hones his magic sensing, allowing him to see mana in the form of a flock of winged beings to sense her location and defeat her.
* Black Clover: When the body of Lumiere is about to crumble away after the battle against Zagred, Nero tells him that she'll go with him. Lumiere asks her not to, telling Nero that she should move on and not close off her potential by dying with him because she has so much left to accomplish with her life. Nero finds companionship without him in the Black Bulls, remembering Lumiere's words when they save her and Asta from the Magic Parliament.
* Black Clover, where in one arc Asta and Noelle meet up with a group of three mages, Fanzell, Dominante, and Mariella, in the Witches Forest Arc. Though they have never appeared in the manga before, Asta and Noelle are not only familiar with them, but have apparently already helped them escape from the Diamond kingdom, and even received trained with them. The characters were originally introduced in a light novel that serves as a side story to the manga, but it can be infuriating when the manga has flashbacks to events that never occurred in the manga. Not only that, but it's nearly impossible to tell when exactly the events of the light novel took place relative to the manga.
* Black Clover who works at the orphanage where he was raised — who isn't interested in him.
* Black Clover: William Vangeance's mask obscures the upper half of his face and is one of his defining features. Used as an insult against him when Asta is arguing with Klaus. Vangeance himself thought it looked lame when he got it, but he was so happy when Julius gave it to him that he wore it anyway. The mask is given justification in Chapter 79. Captain Vangeance wears the mask in order to hide what appears to be a port-wine stain birthmark that completely covers the upper part of his face. After the six month time skip he stops wearing it.
* Black Coffee gets Raynor to confess by pretending to drink the drugged drink that Raynor gave him. What Raynor doesn't know is that Captain Hastings switched out the glasses when Poirot temporarily got Raynor out of the room.
* Black Coffee to conclude that someone had accessed the poison well in advance. Thus the murder must have been pre-planned and not spur of the moment like everyone assumed.
* Black Colossus", Conan is told that his new harness makes him look better than many kings, and the narrator explicitly tells us he will remember that years later.
* Black Colossus", Natohk lays a trail of glittering powder across the path of the charging cavalry, and when their steel shod hooves strike it, the powder erupts in a wall of flame, causing a huge pile-up. Whether it's actually gunpowder or a magical version is not revealed.
* Black Colossus, which they admit he wears better than most kings would.
* Black Comedy (1967), a British platoon in WW2 keep trying to bump off their incompetent lieutenant, but he survives the war and gets them all killed instead.
* Black Comedy. A commando team is on Coruscant and learn that Emperor Palpatine had special programming put in the atmospheric processors so he could suffocate whole sections of the planet on a whim. Face Loran remarks:
* Black Comedy, a gangster ambushes the protagonists right outside a police station. When they point this out, he says that by the time the witness statements have been correlated, they'll probably end up being described as a bunch of

Rastafarians.
* Black Comedy Animal Cruelty: Animal violence and mistreatment of animals is played for dark laughs.
* Black Comedy. A pair of guys go to an organ donor's door and cut him open to get his liver.
* Black Comedy. As such it was full of these types of jokes, with the crowner being...
* Black Comedy at the All-Star Game and took out the top players of many of the rival teams.
* Black Comedy because he's being uncharacteristically goofy, but for a horrifying reason.
* Black Comedy being a slave!" By the end of the ride, Francine's not impressed (though Klaus, who is both German and implied to be a Neo-Nazi, is a big fan).
* Black Comedy" between them and the terrorists, and the scene cuts to the office building where the villains drag Ellis' body out and the hostages are heard wailing in the background.
* Black Comedy, Big Ethel, standing on a bridge with Jughead, threatens to climb onto the ledge and jump off if he won't be hers. "Well," she says, "aren't you going to do anything?" Jughead smiles and gets down on his hands and knees, as though to give her a boost.
* Black Comedy Burst to cause someone to believe the next three words you speak, even if they're something as absurd as "you are coleslaw".
* Black Comedy Burst: When an otherwise lighthearted comedy suddenly starts using darker jokes.
* Black Comedy by falling off a rocket launching structure, the Doctor and his companions are shown wincing at the sound of her body bouncing off various metal beams before she hits the ground.
* Black Comedy by Pat Wood is centered around this trope. A couple hire a hitman to kill their wealthy aunt, but he's killed in an accident just before she arrives so they have to hide the corpse in various places, which she keeps discovering (and promptly fainting, giving them an opportunity to move the corpse again).
* Black Comedy clown steps out... and in the end there's a whole bunch of clowns looking at the dead dog and apologizing.
* Black Comedy episode 'Sex Ed,' this trope comes into play with (sketchings of) giant flying sperm, appropriately enough, attacking one of the stick figure protagonists.
* Black Comedy episode "Vibracaust", where Xavier sees a priest walking with a boy and assumes that the priest has molested the boy. As soon as Xavier is beaten and chased away by the priest, it turns out that the boy is actually the one molesting the priest.
* Black Comedy. Even the good main characters are foul-mouthed and mean to each other. The creators even mention their disbelief in this trope in the commentary.
* Black Comedy explain educative, fun and interesting facts about nature and society; expect your standard child fare here. But off the record, these same characters used to smoke, drink tons of whiskey and swear very loudly and in enough quantities to make a sailor hide his head in shame. Some of the cameramen, together with some of the technicians, put out a videotape with some of the most dirty and hilarious outtakes and presented it to Arenas as a birthday gift. Bet you can imagine what would've happened were someone to upload the video to a public FTP.
* Black Comedy features a still from the book burning video as its icon.
* Black Comedy. Freddy torments a deaf teen named Carlos by sticking a very long q-tip so far into his ear that it pops out Carlos' opposite ear.
* Black Comedy, his hands deep red with blood (but otherwise in an impeccable white uniform) starts talking about his attempts to make G'Kar scream but takes a tangent into rolling his eyes about unions:
* Black Comedy in "Couples", which opens with a man dying of a heart attack while jogging with his husband. It later turns out he was poisoned and the cops go to his spouse. To their surprise, the man immediately confesses to the murder, assuming the cops already figured it out. He then starts moaning over how his lawyer just

broke it to him that the state of New York refuses to acknowledge the marriage as legal and since everything was in his husband's name, he's about to lose their home and not able to inherit any money or even access accounts.
* Black Comedy in response to the terrorist attacks on Paris: "You have the guns, we have the champagner!"
* Black Comedy, it's played completely seriously...until the nurse says that she hates Kreiger for being a Jew, and Kreiger casually has the dogs maul her to death.
* Black Comedy king of that suit. And yes, the evidence points to only one standard deck of cards having been involved in the game. The collective IQ of the setting probably went up a point when the cheater was escorted off the mortal coil.
* Black Comedy: Many examples have been seen as tasteless and unfunny, particularly ones that lampoon topics considered sensitive nowadays. However, the concept itself is still around.
* Black Comedy — and eventually getting killed by — the show's inherent silliness, it's considered one of the darkest episodes in the show's history. It culminates in Homer falling asleep at the man's funeral, talking in his sleep, and causing everyone attending the funeral to laugh.
* Black Comedy — because, as they've tested, the bath starts overflowing after 80 virgins have been bled dry into it.
* Black Comedy." Most of the episode is just BoJack giving a monologue about his now-deceased mother, whom he had a very rocky relationship with. Right at the end, the episode reveals that he'd been at the wrong funeral the entire time.
* Black Comedy mother kills herself. Alan discovers her, and, to make things easier for Barbara, sets it up to make it look accidental.
* Black Comedy. Muldoon threatens to skin Stan and Ollie alive. He does, and the final scene shows them as cartoon skeletons from the neck down.
* Black Comedy onto the device. Anyway, at first, the image is very blurry (they can see someone who's obviously General McGrath, but not a paper he's holding) until West notices the victim's glasses on the table and puts them over his eyes. Then they can see the document clearly.
* Black Comedy or blackmail pictures of roofie-induced crossdressing being posted everywhere, he decides to hang himself instead.
* Black Comedy, preserving his Looney Tunes-esque demise for all time.
* Black Comedy: Pretty much the entire point of this genre, from what we can tell.
* Black Comedy, Roy explains that you start by building a regular robot, then molesting it and hoping that it continues the cycle.
* Black Comedy says they'd better wrap up their meeting "before they break the poor man's legs."
* Black Comedy, seems to prefer some amount of anonymity (albeit with a bit of a twist), preferring to go under his pen name (although his real name has been revealed), appearing on special features of The Oblongs DVD with his face blacked out and voice distorted, and making public appearances wearing clown makeup.
* Black Comedy, so the PM has to make all the decisions because the buck stops with him.
* Black Comedy. The star of the basketball team sings about how his father is abusively obsessed with his performance in the games, and would brutally beat him when his basketball performance was deemed sub-par.
* Black Comedy, when Joe Pesci's hitman character has a nightmare of the titular heads lined up and singing a parody of "Mr. Sandman."
* Black Comedy, when the Sheriff of Nottingham reads out a transcript of a witch being interrogated under torture in a deadpan monotone, complete with cries of agony.
* Black Comedy," when Tom wants to become a real live boy, so Crow paints him "nude" color.
* Black Comedy, which gets him forcibly dragged off the stage and chased out of the building by an angry mob.
* Black Comedy. While talking to the cats, a crow character repeatedly mentions that he wants to eat Carlotta's kittens (but only if they're already dead first). There's also a mouse character who the cats reluctantly swear not to eat after they

befriend him.
* Black Company in order to safely leave the city. In the whole series most of the characters connected to the military are either morally black or grey.
* Black controlled by the son that can only qualify as being alive because it moves.
* Black Cop, White Cop, whose poster can be seen on the wall of his dressing room. (Both cops are played by Tracy Jordan.)
* Black Cougar: The toymaker twists the top of his model lighthouse, causing the fireplace to slide away, and the wall behind to open up, revealing his toy-making room.
* Black Court, and garlic powder is just as effective against them as the cloves are.
* Black Court Vampires count, given that they are literally vampires straight out of Dracula. They share all the Dracula weaknesses, but with their rotten stench and corpse-like appearance, are more in looks-like-Orlok territory.
* Black Court Vampires was published. To get to be that old, they must have been Badass to begin with, or they'd have been killed (again) years ago. This principle seems to most supernatural creatures, as anything that lives long enough to be ancient has to be a certified badass in order to have lived that long.
* Black Crayons, Annabelle Lennox is about five years old and considers Ironhide to be her best friend.
* Black Crayons, when Barricade shows up, Annabelle serves as a distraction so that bullyish thug Carl can escape.
* Black Critic Guy: Online video reviewer who focuses primarily on anime.
* Black Crown: King Valerius Milvian in 'Black Crown' commands troops and fights on the battlefield. The Lords are shown to be able to hold their own in 'Schism' as well.
* Black Crown sees King Marion fighting with an axe in the first short story, perhaps because he knew he would be fighting the armoured King Valerius.
* Black Crusade) actively drives them to fuel their welfare with so many souls, to the point that souls are the main currency on the planet. To make matters worse, it's an open secret that the three city states of Q'sal are locked in a permanent cold war that drives them to outperform and use espionage on each other. If they ever did get into an open war, their combined influence could bring the entire sector into a savage war from which it might never recover.
* Black Crusade but as it is, the Imperium is beyond saving and so the Adeptus Terra are committing atrocities for the sake of a lost cause.
* Black Crusade has the "intelligent cyst" mutation, one of the unambiguously detrimental ones.
* Black Crusade is chock full of those. The most egregious example is misspelling of "Ruinous Powers" (a collective name for the Chaos gods) as "Runic Powers." But, attaching melta bombs to metallic surfaces with "mango-adhesives" is a close second.
* Black Crusade more determined, and so more likely to, hit the subjects. NPCs are a little less predictable.
* Black Crusade rulebook that if peace ever broke out the Imperium would instantly collapse, being built entirely on fighting the Forever War.
* Black Crusade: the warriors have survived this long by sticking to each other, and would do anything to keep each other alive. Of course, this being 40K, an equally likely one is each warrior viewing the rest of the warband as walking meatshields until they can be sacrificed to obtain power from the Dark Gods.
* Black Crusade was even worse, as a bad roll could end with a player or enemy psyker becoming the host to a Greater Daemon, a minor demigod single-handedly capable of sending entire sectors to their knees and causing planet-wide manifestation signs... Until they grew in experience and got talents such as Favored By The Warp and Warp Lock (plus things such as Bastion Of Iron Will in case they ever do get targeted by possession...)
* Black Dagger Brotherhood by essentially killing the ones in authority.
* Black Dagger Brotherhood creates a lesser, the heart is removed and placed in a

ceramic jar. For some reason, the brotherhood attempts to find and store these each time a lesser is killed.
* Black Dagger Brotherhood, due to nearly every sexual experience he'd had up to that point being non-consensual on his part. Much of his development is focused on him getting over his many issues regarding this.
* Black Dagger Brotherhood has Phury — who, owing to a fucked-up mental state, enjoys taking a hammer and chisels to his enemies' joints and carving interesting shapes on their faces.
* Black Dagger Brotherhood qualifies for this trope. And unlike the real Spartans, who started training at age seven, his trainees started at age three. Made worse by the fact that winners of sparring bouts were encouraged to rape the losers. Alumni of this camp include Darius and Vishous.
* Black Dagger Brotherhood reverse this: their eyes glow like lighthouses when they see their mates. When they actually battle the bad guys, no glow.
* Black Dagger Brotherhood series features a Sequel Hook embedded as the B- or C-plot of the current book. You'll be fiending for the next book before you've even finished the one you're on.
* Black Dagger Brotherhood series, we learn that Zsadist, kidnapped by his nanny as an infant, was sold into slavery and eventually used as a sex/blood slave by a sadistic mistress. Zsadist is eventually rescued by his twin brother, Phury, and kills his mistress but suffers intense psychological damage. He is considered souless by his fellow Brothers, and dangerous. His book in the series involves him falling in love with a woman and having to overcome (well, not completely) his past.
* Black Dagger Brotherhood takes a "Love is a Distraction" vow of chastity when he comes of age and decides to search for his kidnapped twin.
* Black Dagger Brotherhood, The Chosen Layla and the Leader of the Band of Bastards Xcor are in love and in opposing sides of a civil war. Layla is loyal to the legal monarchy and is expecting the child of one of the King Wrath's Elite warriors. Xcor is trying to overthrow the king. But for Layla's sake he is trying to find bloodless methods via loopholes and caveats in the old laws.
* Black Dagger Brotherhood, the largest vampire population — and the headquarters of the eponymous secret society — is in Caldwell, NY. Yep.
* Black Dagger Brotherhood. They are hand forged (literally) by Vishous.
* Black Day at Bad Rock." The team have successfully gotten B.A. treated and locked the sheriff and his deputy in their own jail, ensuring they will not be able to catch them. They are heading out of town to avoid Lynch when Hannibal realizes that an outlaw motorcycle gang, the Barbarians, will be coming against the town to get their leader back. They turn the van around.
* Black Death has this as a topic. It shows well how different people responded to the outbreak in 1348.
* Black Death. It's left ambiguous as to whether this is the truth, or if the witch was simply lying to the protagonist to get him to lose his faith in God.
* Black Death So good they were, their trademark striped seaman undershirts were later adopted by VDV, the Russian paratroopers.
* Black Death, "whore" is just the default choice for insulting a woman regardless of anything she says or does. It really was the gravest insult to any woman throughout the Middle Ages. In fact, unfounded slandering like that could be subject to legal prosecution (especially if it came from another woman).
* Black Desert Online, and Griffin starts repeating that their super-buff, asymmetrical, boss-eyed, distorted, molten character is "just like Bart" while Justin laughs powerlessly in the background for literally minutes.
* Black Devil Doll From Hell from the film by Chester Novell Turner (and its remake).
* Black Devil Doll slasher flick with a radical black activist being reincarnated as the eponymous doll.
* Black Diamond Western, has a playing card with the suit of diamond as his calling card.
* Black Diamond Wrestling once ran an angle where a wrestler tapped into evil

powers he probably shouldn't have and started turning regular wrestlers into evil
* Black Dog, an H-manga mangaka, frequently appears in his work as a tiny black figure that apologizes to the audience for various things.
* Black Dog is about hellhound that takes everything away from greedy truckers.
* Black Dog reveals to Crews that he is an FBI agent after he is mortally wounded in a truck-jacking attempt.
* Black Dogs. After their first fight, Sadrao says "well, that was invigorating!". And the protagonist, Lyra, instead of some witty remark, just throws up.
* Black Dogs, and it is implied that humans are just another breed of Funny Animal that resemble monkeys.
* Black Dogs are exceptionally loyal and trustworthy, while the anthropomorphic giant ground sloth is slow and patient and the weasel/ferret character is bloodthirsty and cunning.
* black dogs are malevolent, some are this trope instead. Eg. the Gurt Dog of Somerset in Britain is thought to protect children and lone travellers.
* Black Dogs (if you're human-sized), is said to be so well crafted that if properly taken care of it could be used for a hundred years.
* Black Dogs is extremely fond of clothes and beauty products, and one character remarked that she was found while her house was burning down, and that she was trying to rescue her wardrobe. Naturally she's one of the more levelheaded and pacifistic characters in the book.
* black dogs. Most of them are portentous, some were actively malevolent and a few are actually benevolent.
* Black Dogs: Short-haired, leather-clad elven swordswoman Sinai is in a relationship with Jacyl, also an elf, who has her hair long, wears dresses and likes to buy clothes, among other pursuits more traditionally feminine.
* Black Dogs: The series, set in a medieval fantasy world, features elven lesbian couple Sinai and Jacyl, who have a committed relationship that gets significant attention.
* Black Dogs uses the Kytha (a kind of physical magic) to abort a pregnancy by rape and purposefully sterilizes herself in the process. She knew that if she simply aborted the baby, the villain would just rape her again and again until she conceived and bore a living child.
* Black Domino, a famous Zebra musician from the early parts of the Second Age, is based on
* Black dragons are far and away the most evil and foul-tempered of the dragons, far more so than even the other habitually evil chromatic dragons.
* Black dragons are notable for inverting the basic assumption of this trope — rather than their presence being part of the swamp's inherent hostility, a black dragon taking up residence is what makes the swamp a terrible place to begin with. Black dragons are far and away the most cruel, violent and sadistic of the chromatic dragons, and their casual torment of both the landscape and its inhabitants swiftly turns their home wetlands into barren morasses scarred by acid and stripped of vegetation, while their vicious attacks on anyone who can't fight back swiftly drive out or kill everything but the dragon and its servants.
* Black Dragon series for Epic in the mid-eighties. Two of the characters are turned into demons and made to commit wholesale slaughter, though they are not in control of themselves when they do it. At the end of the story, they are transformed into babies, with the sorceress who did it saying "Their crimes could neither be forgotten nor forgiven; yet in truth, they were as much victims as any they harmed or slew". The de-aging is said to be justice — vengeance tempered with mercy, as they forfeit who they were, but are granted the state of grace given at the moment of creation.
* black dragon's head between him and her, fanged mouth agape, and a bright orange glow at the back of Drogon's throat...
* Black dragons in general tend to have needlessly evil names, like Onyxia, Nefarian, and Sinestra. They're almost always servants of the Old Gods, but even good guys follow this, so apparently that's just their MO.
* Black Dragons' true names end in "ion" or "ian" for males (Deathwing's true name

was Neltharion, for example, while his son's name was Nefarian). Female dragons end in "a" (Sinestra or Onyxia). In the Warcraft universe, black dragons are historically the most evil race and had the most direct contact with mortals, therefore most black dragons are known by nicknames given by mortals, usually based on color (Firemaw, Flamewing, Blacklash).
* black dresses and pointy hats obvious, because they stand out against the apparent uniformity.
* Black Duck by Janet Lisel Taylor is set at the end of the decade, in a small Rhode Island town which facilitates the rum-running for the parties in the big cities.
* Black Dude Dies First: After comedians started mocking its use, and general racism decreased (or at least became much less socially acceptable). It still occasionally happens but it's not expected to anymore, to the point that most examples are coincidences in modern works (or intentional parodies).
* Black Dude Dies First: Character who is a part of a minority is usually as good as dead.
* Black Dude Dies First: In a work of the horror genre, the first victim is a black man.
* Black Dude Dies First: This trope is far more often parodied and lampshaded than it is played straight. A review of all the major horror movie franchises will show that if there's a black guy at all, he's usually either one of the last to die, or even one of the few survivors.
* Black Dynamite, after his crappy space ship falls apart. Dynamite is saved thanks to his gun and a stereotypical black voice AI.
* Black Dynamite and eventual Best Picture Oscar winner The Hurt Locker at the same festival), but due to a relatively new distributor picking it up, it flopped in theaters, closing just short of $300k on a $2.9 million budget and closed after two weeks. Luckily the film found its eventual cult following on DVD and eventually got a show on Adult Swim.
* Black Dynamite and that his "white" look towards the end of his life was actually his real alien appearance all along!
* Black Dynamite, an organization to help kids get off smack "because orphans don't have parents".
* Black Dynamite: A white hunter is eaten by a giant white wolf is eaten by a larger white dinosaur is eaten by an even larger spider... which Black Dynamite shoots in the head.
* Black Dynamite: Black Dynamite is a parody of the blaxploitation action hero, being the meanest, most badass black dude in this world and the next. Secondary characters keep dropping like flies around him but any opponents at best just momentarily inconvenience him personally.
* Black Dynamite different women, and has apparently gotten around quite a bit, considering the number of illegitimate children he has.
* Black Dynamite explored this with when Dynamite had to help Richard Pryor. At one point going into a very scary in-depth look into the comedian's psyche. This was based on Pryor's real-life stint with cocaine (though oddly that took place in the 80s. The series is set in the 70s).
* Black Dynamite has a pair of brothers. One is the title character, who is named Black Dynamite. The other is named Jimmy.
* Black Dynamite has the titular character face off against Fiendish Doctor Wu, who uses his family's "Red Silk" Kung Fu while Black Dynamite fights with his "Panther Fist" style.
* Black Dynamite: In one episode the titular hero is on an island lost to time similar to King Kong's when he's attacked by a giant white wolf. He pulls his weapon but waits until the wolf is eaten by a bigger raptor. Then waits for the raptor to be eaten by a giant spider before finally taking said spider down with a single bullet. Now THAT is how you conserve ammo.
* Black Dynamite). It gets SO bad however, he tries to seriously threaten someone in jail, only for them to laugh in his face, not taking him seriously.
* Black Dynamite it was even deeper in that the actors were actually playing the

fictional actors making the film.
* Black Dynamite noting that some viewers could fairly easily be fooled into thinking the movie is for real.
* Black Dynamite parodies the excessively masculine heroes of blaxploitation films. When introduced, Black Dynamite seems to be penetrating three women at the same time.
* Black Dynamite, pretty much anyone who isn't a ninja is a martial arts expert of some kind, from Whorephanage staff to living preschool-show puppets.
* Black Dynamite, The main character Black Dynamite is being threatened at gunpoint. Suddenly, a boomerang crashes through the window and cuts off the villain's arm! Black Dynamite then states that he "threw that shit before [he] walked in the room".
* Black Dynamite when Bullhorn helps Black Dynamite out in the pool hall. Bullhorn accidentally slaps one of the henchmen for real, who gets mad, breaks character, and approaches Bullhorn's actor, as if to return the favor, but the take is cut short. The next take features a completely different actor playing the same henchman, implying that the original actor had to be replaced.
* Black Dynamite with each contestant being a representative of a different race and each car filled with stereotypical weapons.
* Black Eagle, you are accosted by Adrestian soldiers working for the Flame Emperor. Bernadetta asks Edelgard, princess of Adrestia, if she knew about the connection, and she responds that she knew because she is
* Black Earth Rising (US). The former airs it in the UK, while it's streamed as a Netflix Original elsewhere.
* Black Egrets to the otherwise-attractive Parasoul, instilling a sense of uneasiness in the audience.
* Black Emporium, Hawke can express a preference for their Mabari to stay with their mother Leandra at all times, because his strength and evil-detecting abilities offer her excellent protection. Later, the dog has a brief scene in which he successfully captures a would-be thief in Hawke's closet.
* Blackened Skies are thrown into a new killing game together. Naturally, this proves to be a touchy subject; several of them strive to avoid touching on those issues or anything related to them as much as possible.
* Blackened Skies', before the two plunge into what Kaede calls a monologue-off.
* Blackened Skies immediately realize that he's about to throw them into a Debate Scrum and have this reaction, while the rest have no idea what he's hinting at.
* Blackened Skies of her complexities and contradictions than Celeste is, undermining her efforts in relatively more subtle ways.
* Blackened Skies perspective - whomever they meant may not have seen their relationship the same way.
* Blackened Skies, the bear pops in shouting "YOU'VE GOT THAT WRONG!" He then notes that "Whaddya know, that's actually pretty fun to say!"
* Blackened Skies. This frustrates her to no end, and she attempts to conceal her trauma from the other students; after all, what good is an Ultimate Pianist who can't play?
* Blackened Skies: While Kaede fears that the various delicacies offered at the Death Row Delights kiosk might fall into this, Korekiyo is quick to reassure her that the 'Shinguji Stew' — a dish themed after his own execution — seems to be made of perfectly normal ingredients. Overly salty, yes, but he doesn't taste human flesh. Leading her to naturally question how he knows what human flesh tastes like.
* Blackenstein, a dog whines and barks at the approach of the monstrous Eddie. Eddie kills the dog, and the householders go to investigate why the dog has gone silent. Bad move.
* Blackenstein: After murdering the blonde lady in her backyard, Eddie rips out her intestines. He later does this to the black woman he murders behind the bar.
* Blackenstein, Dr. Stein has a Nobel Prize for his work in solving the DNA sequencing problem. Bizarrely, Winifred that he received a Peace Prize for his work, rather than the far more likely Prize for Physiology or Medicine.

* Blackenstein, Eddie attacks a rapist behind the bar. the rapist squares off and delievers a series of bodyblows to Eddie's torso. This completely fail to faze Eddie, who knock him down and kills him.
* Blackenstein, Eddie carries the unconscious girl he abducts from the dune buggy to the abandoned warehouse like this. As they arrive, she wakes up and starts screaming.
* Blackenstein, Malcolm empties his revolver into the monster Eddie to no effect.
* Blackes Magic was a short-lived American TV show about a magician, Alexander Blacke (played by Hal Linden), who, with some help from his con-man father, Leonard (Harry Morgan), solves mysteries that get in the way of his performances.
* Blackest Night arc was tossing Luthor back to the humans, which Sinestro lampshaded was an act of him giving something to someone. Larfleeze reacts in stunned shock.
* Blackest Night arc. Writers initially planned to have the current Firestorm, Jason and his girlfriend Gehenna, doing a make-out session prior to Gen's death. This was later changed to a quiet conversation about getting married and having kids. Then they changed their minds and had it re-drawn into the make-out scene, but this was fortunately lost somehow and they ended by putting in the conversation.
* Blackest Night because he believes Earth caters to greedy bastards like him. After watching commercials he's come to the conclusion that everyone else on Earth shares his neverending desire for more.
* Blackest Night: Billions of Black Lantern Rings travel together through the universe. They're described by characters as sounding like swarming buzzing flies.
* Blackest Night Black Lantern has received a figure, at the very least.
* Blackest Night, but his sector partner Isamot Kol has his own legs amputated to donate them to Varn, as Kol's own physiology lets him regrow the limbs in question.
* Blackest Night died instantly without leaving a scratch on the Stranger.
* Blackest Night event was built around a number of big name characters who had died and come back over the years. The series ends with a promise that from here on out, "dead is dead," with the explicit exception of Bruce Wayne, whose return was already well underway.
* Blackest Night had Black Lantern Spoony grabbing Linkara, only to be interrupted by a title card and return to Linkara freed. Less an effects limitation and more that they just couldn't figure out a good way to stage Lewis escaping the hold.
* Blackest Night: Killowog gives this to the Black Lantern version of his old Drill Instructor, who kept goading his emotions with his old nickname "Brillowog".
* Blackest Night only caught adult men in his numerous acts of arson).
* Blackest Night, Red Star was drinking in memory of his family (Pantha and Baby Wildebeest).
* Blackest Night revealed that Earth was really the place where life began, which might help explain all the humanoid life in the galaxy.
* Blackest Night (since the zombies are attracted to beating hearts). To thaw out, Deadman possesses them and uses his increased strength to break out. However, he has barely ten seconds to do this before they die.
* Blackest Night, Storm. Solivar, the late king of Gorilla City, also becomes a Black Lantern.
* Blackest Night suppressed vital information and fomented discord within the seven Corps, which were all vital in the banishment of Krona and the end of the Blackest Night.
* Blackest Night, the second Captain Boomerang killed people for his undead Black Lantern father to eat.
* Blackest Night: This was how Bizarro dealt with Black Lantern Solomon Grundy (who was effectively unkillable).
* Blackest Night told him that humans are greedier bastards than he could ever hope to match, and that life on Earth is all about owning things. After spending more time on Earth, Larfleeze has come to agree with Luthor...and he loves Earth for it.
* Blackest Night used these on Smallville. Horror ensued as his mask's abilities to influence any nearby target to near-suicidal hatred, uncontrollable fear or

demented avarice ensued, heightening minor feelings to killing urges.
* Blackest Night uses her lasso to consecrate an area, causing any zombie that sets foot on it to be reduced to ash.
* Black-Eyed frequently have them appearing on someone's doorstep and trying to convince the person to invite them inside, as they're apparently unable to enter otherwise.
* Black Eyed Peas: Happened after adding Fergie to their lineup and switching to a more pop oriented sound which made them commercially successful.
* Black Eyed Peas turning them in a more party-pop-oriented direction.
* Black Eyed Peas was their "song". Given that the song makes fun of women who act like sluts and brag about their fancy clothes to attract men's attention...
* Black Eyed Peas, who often raps about and extols his Filipino heritage and childhood growing up in the country. He is also still conversational in Tagalog.)
* Black Eyes of Crazy: A character is shown to be evil by having black sclera.
* Black Eyes of Evil also came about when Pythosblaze, Frances' player, drew her first fanart of A_J and misinterpreted AJ's badly-shaded skin as having completely black eyes. AJ rolled with it, and it was explained in-RP as one of the side-effects of continuous exposure to the Void.
* Black Eyes of Evil, if they have black eyes then they're likely to be evil.
* Black Eyes of Evil. In this condition she is a lot more coherent and amiable than her usual self, but acts as a reminder that she's not exactly normal, either way.
* Blackface: A racist performance involving non-black people wearing makeup to look like black people.
* Black Face film. Unique in that the original short story ("The Day of Atonement") and play were loosely based on Jolson's life. Al Jolson played the part because the original Broadway performer was unavailable for filming.
* blackface had been kicked out of a restaurant because of their race, he personally invited them out to dinner despite having never met them, saying he'd punch the nose of anyone who had a problem with it. Jolson was also known as the only white man who was allowed into the all-black nightclubs in Harlem.
* Blackface: Person pretends to be black and embodies negative stereotypes of black people vs. person pretends to be white and embodies negative stereotypes of white people.
* Blackface thought he was promoting Nazism by wearing a swastika T-shirt.
* Black Face wasn't generally seen as offensive in the 1920s and '30s as it is today.
* Black fatigue-style uniforms; the quintessential staple of Hollywood and video game special forces teams for decades. Unfortunately that's because in fiction their enemies are only as vigilant as the script writer commands them to be. In real life it is quite possibly one of the worst shades you could wear short of something stupid like shocking pink. This is due in large part to the fact that there are very few blacks in either nature or man-made environments meaning that in daylight you stand out just about everywhere and at night colors such as dark blue or green work just as well if not better. Generally speaking the only way to make black genuinely useful is to pair it with something else; for example white and/or grey. In real life, black fatigues do have their uses, such as security, riot control, breaching/raid teams and the like, but note that these are all situations where the wearer
* BLACK features a truly ridiculous example where a knee-high pile of rubble can only be scaled in one direction because there's a plank on that side forming a ramp. It must be because of the invisible wheelchair the protagonist is obviously confined to.
* Blackfire attempted to marry her sister Starfire off to Glgrdsklechhh, an alien that can only be described as a cross between
* Blackfire flirts pretty heavily with Robin in her first appearance, but this seems less to be actual interest and more just her screwing with her sister Starfire's (Robin's canon
* , Blackfire has this reaction when Control Freak presents himself as "your hopeful groom":

* Blackfire. The four hate it when the Hunter first displays it, and realize it's evil when they see the very similar Heart of Evil. In fact, it's so obviously evil that they're a bit startled when the Hunter claims it's not. When he asks to accompany them back to C'hou so he can give up his adventurous life, they point out that the natives (at least the skahs) have no concept of good or evil, and if he brings Blackfire with him they'll learn what evil is. (Though John mutters that the skahs “might not mind.”)
* Blackfish City by Sam J. Miller, one character has a vivid memory of the floodgates being sabotaged in New York City. Much of the former United States is like this, so much so that the only functioning US government is the US Navy.
* Black Flag also gives you a ramming prow and the option of charging is available from the very beginning. It's existence is also a bit more justified because it can be used as an icebreaker in the icy waters of the North Atlantic Ocean.
* Black Flag, hitting on (and sleeping with, if the spoken word intro is anything to go by) other guys when she claims to have a boyfriend, and blaming her actions on having too much to drink, among other things - however the song later states "You're getting around/I'm not putting it down/It's just what it is/Getting it while it's around", so the song plays the trope straight and subverts it at the same time.
* Black Flag's iconography, from his classic hand-drawn covers to the four-bar logo.
* Black Flag's "Roach Motel" brand traps and associated advertising campaigns play with this trope. "Roaches check in... but they don't check out!"
* Black Flag was studio material, but, according to ex-member Tom Troccoli, it was still improvised in an odd way: each band member improvised alone in the studio without hearing what the other musicians played until recording started.
* Black Flag, which is a video game produced by Abstergo Entertainment in-universe.
* Black Fleet Crisis as extreme xenophobia showed up, the Yevetha refused to submit and were hunted down and systematically killed.
* Black Fleet Crisis Plat Maller is the only person to survive the attack on Polneye by the Yevetha. He's the only survivor from their Purge of all non-Yevethan colonists in Koornacht Cluster as well.
* Black Fleet Crisis, so it's no surprise that he wanted to get the most out of his revenge.
* Black Fleet Crisis trilogy, have retractable blades in their wrists. Depending on the artist, it's either a single blade out of the inside of the wrist or two blades out the sides.
* Black Fleet Crisis trilogy Yevetha have a three-letter given name and a five-letter last name (Nil Spaar).
* Black Fleet Crisis: Yevetha have a fairly rare neuter sex along with male and female.
* Black Fleet Crisis: Yevetha have their brains in their thoraxes, which are also protected by thick bone. They also have auditory cells on their temples. On their wrists they had retractable dewclaws that could shoot out and surprise opponents unaware of them, extending a foot in length. They could also tolerate much greater g-forces than Humans.
* Blackford Oakes has the hero put on trial by an anticommunist cell in East Germany, on suspicion of his having betrayed one of their group to the KGB. True to form, Oakes doesn't blame them, and in fact believes they are acting completely sincerely and legitimately.
* Black Forest is a battle-ruined village in Germany where Bastion was reactivated close nearby.
* Black Forum shows Misa's friend finding a new thread with her name on it.
* Black Fox, and then one more that moves to six months after, where the meat of the story takes place.
* Black Fox begins with Rikka at 10 years old or thereabouts, and hints at her future struggle with her family's tradition as ninjas, and her desire to follow her father's footsteps as a scientist.
* Black Friday infects everyone — herself included — and she ends up

becoming the leader of a cult.
* Black Friday in the U.S. is basically the trope in traditional form. Because Black Friday has insanely low prices on usually expensive items, people will camp out at the stores in hopes of being the first ones in line so they can rush in and grab the thing they want.
* "Black Friday" is an entire episode dedicated to showing how wonderful
* Black Friday plays in the Hatchetfield movie theater. It follows Santa disguising himself as a high schooler and dating a teenager. No one knows why Santa is in the high school, least of the characters watching it.
* Black Friday, saying, "Hold this." And then never comes back for it, leaving them there to just hold it for the rest of the show. (Amusingly, during one show, the audience member in question was cast member Kim Whalen's father, and he just went ahead and finished eating it.)
* Black Friday: The members of the Wiggly cult are very much dimwitted, led only by their greedy desires and their undying admiration for a doll and Linda Monroe, much to the latter's dismay.
* Black Friday who's known to struggle with PTSD flashbacks, so he knows what it's like.
* Black Fury: Total strangers, predatory animals, minions of the bad guy — if there is an ounce of good in them, the titular wild mustang will know.
* Blackfyre. As a reviewer noted, if he's a Blackfyre pretender, then he was killed by the sword his house was named after and largely based their claim to the throne on; if he isn't a pretender and really is Aegon, then the sword of house Blackfyre finally killed a Targaryen king, even if it was too late to do their house any good.
* Black Gal on White Guy Drama: Relationships between black women and white men tend to be stigmatized.
* Black Gas — if an uninfected person gets an infected's bodily fluids in their mouth, eyes, or an open wound, they'll slowly be overcome.
* Black Gas -style comic operates via progressive brain damage, eating away at the parts of the brain responsible for people's inhibitions.
* Blackgate plan involves one of the Trigger Twins answering to both names during a emergency roll-call while the other sneaks away.
* Black Ghost sent a group of mass produced cyborg men to help try to spark a war in 008's home country in Africa and proceeded to sell his advanced weaponry to both sides.
* Black Gives Way to Blue took everything great about the album and tightened it up, and gave it an even clearer vision. It really helped solidify what the band's modern sound should be like.
* Black God, a side-story shows that Namu used to work as a fortune-teller and didn't make much money off of it as she didn't see anything wrong with giving the plain and honest truth. Such as flat-out telling a college kid he'd never pass college as he'd only look at porn all day in front of his mother and telling another man that he'd eventually die in the near future. It's no wonder she didn't get tips.
* Black God, every person has two doppelgangers. When they meet two of the three wither away, but the third will thrive at the cost of the others.
* Black God features this as a major plot point (also based on the traditional belief that seeing your doppleganger is a bad omen.) Everyone on Earth has two dopplegangers (called 'doppeliners'), and if two of them ever meet, they both die, giving the surviving third extraordinary luck.
* Black God, Keita and Akane had 2 grandchildren, with Keita dying of old age. In the manga version, it only shows Keita and Akane having a son.
* Black God means that you have to kill others and drain their life force to keep on living.
* Blackground: For areas where a pitch-black background is used for artistic reasons.
* Blackground: The background of the area has nothing outside of pitch-blackness.
* Black Gryph0n, an online musician and voice actor, has been diagnosed with

Asperger syndrome.
* Black Gryph0n: voice impressions and song covers as well as original music and vlogs.
* Blackguard Aribeth, however, has no immunity to the spell Harm at all. This means that the entire boss fight can be resolved in twenty seconds or less if you brought along Linu as your companion, since Linu learns Harm automatically.
* Black Guards and its sequel, has your band of thugs, madmen and junkies dealing with enemies much worse than yourselves, as you try to prove yourself innocent of a murder in the first game and go on a dark quest for revenge in the second.
* Blackguards: Tales of Assassins, Mercenaries, and Rogues gained a surprisingly large Kickstarter following by promising to be nothing but this.
* Black Gunn: A nightclub owner is drawn into a conflict between the Mafia and a militant Black Power organization of which his brother is a member.
* black guys have big dicks offended. The two women flip-flop back and forth between praise and taunting, making the guys rather conflicted about whether it's worth trying to flirt with these girls or not.
* Black had an interesting kind of New Game+. Complete the game on any difficulty to unlock "Silver Weapons" on that difficulty, giving you infinite ammo and unlocking the next difficulty. Also, if you manage to find every secondary objective item and explode every explodable thing in the hardest setting, you unlock on all difficulties: Infinite ammo, and the M16A2 assault rifle with unlimited underbarrel grenade launcher.
* Black Hand Confessors in the same game can throw hallucinogenic grenades, which cause any infantry caught in their area of effect (including friendlies) to attack their own allies. Unfortunately, it doesn't affect vehicles.
* Blackhand. Gul'dan losing power was also changed from him going into a magical coma after Medivh was killed to the Horde no longer fearing him after Lothar kills Blackhand.
* Black Hand's current backstory strongly implies he's legitimately insane, compulsively wallowing in death as an erotic experience, often hearing voices compelling him to kill.
* Blackhat Chen is a Chinese Army officer, his sister Lien is a network engineer, and Hathaway is an American hacker who has been let out of jail to help them track down a cyber-saboteur. Chen does not try to stop Hathaway sleeping with Lien, but he does tell Hathaway that he isn't much of a catch, even if he doesn't have to go back to jail.
* Blackhat has Elias Kassar, a Lebanese Christian mercenary terrorist who used to fight in the Lebanese Civil War alongside fellow Lebanese Christians under the Kataeb Regulatory Forces.
* Blackhawk, but nobody quite gets around to letting Zinda in on this. When she finds out she is somewhat surprised.
* Blackhawk: Captain von Tepp, a Nazi officer terrorizing Poland, who killed Blackhawk's siblings and inspired him to take up a quest for vengeance before being gunned down at the end of his issue.
* Black Hawk Down - "6-1 going down... 6-1 going down...", said in a very calm voice while the pilot's face displays quite a bit of concern. The radio guys relaying the info around sound more emotional than he does.
* Black Hawk Down, a couple of Delta Force snipers go to rescue one of the pilots of one of the downed helicopters, Durant, and after placing him in a nearby building, they go back to defend the chopper, drawing the militia fighters away from Durant by using themselves as bait. Unfortunately, after the two are killed off, Durant ends up being captured by the Somali militia anyway.
* Black Hawk Down a group of US soldiers is advancing through the city when one of them has his gun shot out of his hands, snapping his index finger so badly that it's left hanging by an inch of skin.
* Black Hawk Down, as Stebbins was court-martialed for raping his infant daughter in 1999.
* Black Hawk Down at the cost of 19 dead + two helicopters shot down on the American side.

* Black Hawk Down Battle of Mogadishu. Very few movies dedicate so much time to battles as this one.
* Blackhawk Down book the Deltas sometimes helped out the Rangers on-base, i.e. teaching techniques, or in the case of one Ranger building him a custom machine gun grip.)
* Black Hawk Down, Colonel McKnight has more than a bad gut feeling about the mission.
* Black Hawk Down: Contrasts the casualties during the movie where 18 American soldiers and 1000-2000 Somalis died.
* Black Hawk Down, Delta Force snipers Gary Gordon and Randy Shughart fight to the death to defend the second Blackhawk crash site, shooting on until they are down to their final few pistol rounds before they are overwhelmed.
* Black Hawk Down did make a major change to the true story, possibly at the Pentagon's behest. The clerk was replaced by a fictional character, for the very good reason that that person had been convicted of sexually assaulting his own daughter.
* Blackhawk Down: During some intense night-time urban fighting, the Rangers' air support can't distinguish between enemies and friendlies, so SGT Eversman runs across the street while under fire to toss an infrared strobe marker onto the roof of a building that Aidid's militiamen are using to fight from. No sooner is Eversman able to get back across the street and under cover do the friendly helicopters begin their strafing run, liberally spraying the targeted building with miniguns and rockets.
* Black Hawk Down features extensive sequences showing off that the entire city Mogadishu qualifies as an arms fair, despite being under the control of a ruthless warlord who will kill people trying to get the food supplies sent by various aid groups.
* Black Hawk Down), following this policy resulted in many casualties.
* Black Hawk Down follows a significant portion of Task Force Ranger, which is made of several Ranger companies as well as a squadron of Delta Force operators.
* Black Hawk Down: Generally discussed as a anti-war film, there is a strong positive side. Both the book and film depict the horror of the mission but also the extraordinary success and tenacity of the Americans in completing the raid: less than two hundred men engage in a firefight with several thousand Somalis and kill 1,000 of them, even with serious problems in command and control hindering the raid.
* Black Hawk Down. He casually walks from a convoy of Humvees to a building, through the open, while Rangers all around him are diving for cover and flinching. He ignores a gunshot wound to his throat that would have opened his carotid artery if it had been a millimeter to the right. After that injury, one of the Rangers tells him he doesn't need to go back out to save the rest of his men. He just smokes his cigar, looks at the guy like he's an idiot, then rides out with the 10th Mountain Division to get the rest of his men.
* Black Hawk Down involved one of the MH-6 Little Bird helicopters obliterating a group of Somali RPG gunners using mounted miniguns.
* Black Hawk Down: In wide shots, those were actual Army Rangers fast-roping from UH-60s.
* Black Hawk Down is set to a battle that took a single day, it's expected - and even the scenes before the struggle are two days prior to the Battle of Mogadishu at maximum.
* Black Hawk Down, Lone Survivor, and is the central conflict in Rules of Engagement. This trope often manifests as one side using this rule against the other side—typically by deliberately using a human shield as a strategic advantage. Obeying this rule often leads to many casualties and/or a no-win situation because "we can't fire back; they're using civilians." The characters are often portrayed as evil (e.g. in many Vietnam war movies) when they do not follow this rule.
* Black Hawk Down of all places. One of the rangers gets a little too close for comfort to an RPG explosion. One of the Delta members (after dispatching the guy

with the launcher) rushes over to check him. After uncovering him from all the rubble, he merely asks "Are you alright? Are you OK?" Which is answered by "Yeah, I can hear bells ringin'," which gives the Delta member a good laugh. Justified in that the characters were in a war zone, and since his response was stating a physical condition he was dealing with at that moment, he was still very much alert. Or, at least alert enough to remain combat effective until he could be thoroughly checked out by a medic or doctor.
* Black Hawk Down, resulting in a significantly worse overall outcome than if he had just left the bodies behind.
* Black Hawk Down some militia show up with an SPG-9 recoilless rifle, which they menace some US soldiers with; a group duly take control of it, use it and then disable it.
* Black Hawk Down that could withstand the withering crossfire that the American Humvees couldn't.
* Black Hawk Down that they don't even exist for six years after the events of the movie actually occur.
* Black Hawk Down, the last we see of Hoot is him grabbing a bite to eat, grabbing his gear, and heading back out into the city to search for the pilot who was taken prisoner earlier in the film. He even casually remarks that it's Monday, the start of a whole new week.
* Black Hawk Down, there's a montage of the Rangers gearing up for their mission, complete with rock music blaring in the background.
* Black Hawk Down this trope. From their hilarious-slash-tearjerker Chess game, which they never manage to finish, to their exchange of looks before they both deploy to aid the downed Night Stalker, the film makes the friendship of the two remarkably clear for two fairly minor characters.
* Black Hawk Down tries to save a fellow Ranger with a horrific leg wound. The medic needs to install a bridging shunt in the patient's femoral artery to keep him from bleeding to death. The surgery has to be performed on a rickety table in a derelict building while the local warlord's mooks are searching for them.
* Black Hawk Down, two helicopter pilots discuss their ongoing Scrabble game while switching patrol routes.
* Black Hawk Down, was the modern American military's first real experience with urban warfare.
* Black Hawk Down when journalist Jim Hoagaland described the term when covering the conflict, and it's tragically illustrated in a film about soldiers finding a reality that severely complicates and compromises their brief. The film displays dramatically the manner in which a seemingly normal mission quickly gets severely complicated.
* Blackhawk Down, when said commander walks up behind him and addresses the troops before putting the errant troop into a headlock.
* Black Hawk Down, which is a popular book among the battalion and required reading at West Point.
* Black Hawk Down, without the immediate urgency of combat as an excuse.)
* Blackhawk movie serial, one of the cliffhangers featured Blackhawk's car being forced on to railroad tracks in front of an oncoming train.
* Blackhawk's "Every Once in Awhile," sung from the perspective of the one who got away ("Just ask her if she ever still thinks about me/She'll say 'every once in a while'")
* Blackhawk's most popular song, "Goodbye Says It All", only got to #11. Four of their songs fared better: the still popular "Every Once in a While" and "I'm Not Strong Enough to Say No" both got to #2, while the #3 "Like There Ain't No Yesterday" and #4 "There You Have It" are far lesser known relative to the #9 "I Sure Can Smell the Rain" and #7 "That's Just About Right" (quite possibly their second-most famous song). "There You Have It" goes double, as it is their only hit on the Hot 100 at #41 despite being one of their most obscure songs overall.
* Blackhawk Squadron version of this, to an extent. Many of the Blackhawks were, however, citizens of countries at war with the Axis powers, or occupied by them.
* Blackhawks, though this one is armed with bunches of tungsten rods. Wildman is in

love with the concept — "Why spend all the money and resources building a laser or a missile when an inert object traveling at Mach Ten does the same amount of damage?"
* Blackhawks' uniforms were partly based on the Nazis (specifically, the boots and pants.)
* Blackhawk. When Dick Giordano succeeded George Kashdan as editor in the last two issues of the comic, his first act was to have G.E.O.R.G.E. get nuked to kingdom come, taking the Blackhawks' superhero costumes along with it.
* Black Haze by some upperclassmen in order to get a rise out of Rood. When Lin unties his hands, the first thing he does is rub his wrists.
* Black Haze, in his debut appearance, is doing this with the leaves on a branch, replacing the standard "he loves me, he loves me not" with "he'll come, he won't come," referring to the Black Magician Blow.
* Black Haze Rood just so that he can kill him himself at a later date. Like the rest of the series, it's played up with a blend of drama and comedy.
* Blackheart and then sending them back in time. Between Blackheart's one-hour time limit before it kills the infected and the life-stealing cost of Chrono Displacement after twenty-four hours, those minions were doomed no matter what.

* Black Hills-type named Nebraska Kid is challenged to a swordfight which requires both participants to strip to the waist. He does so reluctantly, revealing a giant flower tattoo with "To My Mommy" written around it. He then warns the people watching that the first to laugh gets it good.
* Black Hole (about teens who get an STD which mutates them in various ways) one of the major characters has another mouth in his throat. It has a tongue and can talk a little.
* Black Hole commander He is a fat, feeble old man who labors under each breath he draws.
* Black Hole Engine: if humanity had noticed the flaw and corrected it, it would have indicated to the aliens who provided the plans that they were dangerous enough to warrant an immediate invasion. The scientist who noticed the flaw realized it was a trap and deliberately built the engine with the flaw intact so that Earth would have more time to prepare.
* Black Hole High got away with using the word "crappy"; it's rated G, which does not allow cursing of any kind.
* Black Hole High got away with using the word "crappy"; it's rated TV-Y7, which does not allow cursing of any kind.
* Black Hole High: Victor Pearson, the series' antagonist, is bald in the present day, but in the 1987 time zone, he has a full head of hair. Almost everything we see of him in this period is sympathetic. He also manages to keep his hair in an alternate timeline where he's a slightly dotty science teacher. The final kicker: in the series finale, which reveals Pearson's ultimately noble motives, Victor is starting to grow his hair back.
* Black Hole High, when the gang plan on using a nano-sized video camera to spy on Tyler. In an unforeseen turn of events, Tyler brushes the camera off of his shoulder strap, sending the camera flying into Josie's gaping mouth and causing her to swallow on instinct. The rest of the gang, watching from another room, have to figure out how to get the camera out of Josie's body before it loses power and grows back to normal size.

* black hole just sucking up stuff in the sky above the ocean. The weather is even worse as it's just as random but the raindrops and hailstones can be bigger than ships and the ocean can just open up under you into a chasm and swallow everything.
* Black hole mergers, that we've just recently started to detect via gravitational waves. They deserve special mention since spacetime itself
* Black holes are the ultimate example of the sheer power of kinetic energy of falling objects. The process of falling into them releases more mass energy than any known process in the universe, resulting in objects like quasars, which can be trillions of times more luminous than the sun. They also fire incredibly powerful jets from their poles using sheer rotational energy that can sterilize entire galaxies and knock out detectors from billions of light years away. The cosmic rays from a black hole are known to be the most energetic particles ever detected, millions of times more powerful than any particle accelerator.
* Black holes have magnetic fields that can be harnessed to generate power.
* Black holes, if they get close enough. These are cores of dead stars that have high enough gravitational pull to absorb even light. And they cause spaghettification of everything (including planets) that gets close enough. Their existance is still fairly hotly debated, however.
* Black Holes, once formed won't actually exist forever, as they release energy through a process called Hawking radiation, in which quantum fluctuations happen near a black hole and take its mass. While the actual time it would take for a Black Hole to fully evaporate though is believed to vary depending on its size, its estimated to be somewhere between 8,6 × 10^70 years (that's
* Black holes that are not fed will slowly evaporate in the form of Hawking radiation, which could theoretically be captured. (In practice, the universe is not yet cool enough for this form of decay to be possible.)
* Black Holes. The quantum physics as we know it doesn't allow an absolute singularity to form, even though General Relativity does, which may mean that no "true" black holes exist, whereas other theories challenge the idea of the Big Bang as the start of the Universe - it has already been all but disproved in the form it's being taught in schoolbooks, but the event's exact nature still eludes the scientists, and there are multiple conflicting theories without enough evidence to pick one over the others.
* Black Hole Sue that turns her into a compelling character rather than having the plot bend sideways just to show how awesome she is.
* Black Hole Sun. The surreal, apocalyptic music video follows grimacing suburbanites who do weird things before getting swallowed up by a black hole. Songwriter Chris Cornell has stated, "No one seems to get this, but 'Black Hole Sun' is sad... but because the melody is really pretty, everyone thinks it's almost chipper, which is ridiculous."
* Black Holes work on a variant of this; It's widely known that once you pass the event horizon, you can't escape even if you go at lightspeed. The immense gravity of a black hole curves spacetime so much that
* Black Hole, teenagers are being afflicted with a mysterious STD that causes them to mutate randomly, occasionally turning them into literal monsters: barely human creatures that live in the woods. At least some of them seem to have become significantly mentally deranged because of this, turning them into more traditional monster teens.
* black hole. The gate won't shut off either because, as Carter correctly points out, the effect of gravity means time is slower closer to the gate's wormhole. Weeks pass outside the base in the time it takes for them to even realize how serious the problem is.
* black hole. The more popular it gets, the less it is being played because almost all the teams (and substantial parts of the population) are now in a state of permanent warfare with each other over the interpretation of these rules. This is, however, all for the best, because in the long run a good solid war is less psychologically damaging than a protracted game of Brockian Ultra-Cricket.
* Black Hole, the titular object spins around (though this feature was sadly

removed from export copies).
* Black Hole towards the monsters and otherworldy beings she faces, but does think they can be a danger to regular people and tries to contain them as much she can.
* Black Hole which does damage equal to a percentage of anyone who stands in it's max hp every second.
* Black House in order to get shots of the murder victims. Perhaps his lowest moment comes when he attempts to re-incite a defused lynch mob so he can report on the innocent man they were about to hang.
* Black House, retired detective Jack Sawyer uses the Obstruction of Justice tactic on a group of boys being questioned on the whereabouts of their friend. It's made obvious to the reader that this is merely an attempt to impress the boys, as they are being silent about what they know because they're afraid they might be blamed for the friend's disappearance.
* Black House, the biker named Mouse tells of his late girlfriend, Little Nancy. Jack asks how big Little Nancy was since Mouse is 6'2'' and 290 pounds. Mouse remarks that he could have lifted her one-handed.
* Black House, Wanda Kinderling (a woman whose husband, Thornberg, went to prison for murder thanks to protagonist Jack Sawyer) decides to use this opportunity to kill Jack (since she firmly believes her husband was innocent and Jack framed him). While Jack and his friends are on the stage, she draws a gun and shoots Jack Sawyer multiple times, then shouts "See you in hell Hollywood", and aims the gun at her head... only to realize that, in her eagerness, she emptied the gun, leaving no bullet for herself.
* Black Humor attempts to do this in order to later retrieve his friend's corpse so he can be buried in his hometown. The sword's stolen later that night.

* Black Is Bigger in Bed: The stereotype that Black men have large penises.
* Black Is Bigger in Bed, this is the one Black stereotype that is unlikely to ever die (again, this is especially true in porn).
* Blackish, and tries setting him up with a more attractive girl. It looks like she's successful at first, as Junior lands a date with this girl. Then he reveals the only reason the girl went out with him was so he would edit a video for her. Zoe is actually more upset about this than Junior, because she took pride in her matchmaking skills.

* Blackish had Bow hating Junior's white girlfriend, despite herself being mixed. Bow then realizes that this really has to do with her own identity crisis about being mixed race.
* Blackish: In one episode, Zoey tries to help Junior hook up with a popular girl. She uses a bluetooth headset to advise him while he asks her out.
* Blackish is actually titled "The Talk," where Andre discovers his wife already had it with their son years before, and insists on also doing it himself. The result is Andre Jr. suddenly feeling comfortable sharing each and every dirty thought he has.
* Blackish revival), and such indignation led to Barris leaving the show at the end of the season. Ultimately, Hulu streamed the episode in August 2020, in which by that point anti-racism protests had become widespread in the wake of several high-profile murders of black people by cops.
* Blackish shortly before it would air. The episode was supposed to feature Dre discussing controversial themes, such as the national anthem kneeling controversy with Junior, as well as other racial issues. It ultimately was made available on Hulu in 2020.
* Blackish, the episode "Andre from Marseille" has Zoey dating a white French exchange student (also named Andre) that Dre disapproves of. Then he breaks up with her, at which point Dre assumes that Andre is racist and enlists Junior to find out information about him, only to find out that the "Becky" that Andre left Zoey for is in fact another black girl.
* Blackish: The twins Diane and Jack are originally mentioned to be six years old in the first season. By season 3, they're aged up to 10, though they are still played by the same actors.
* Black is incredibly focused on the individual, even more so than the other colors, and would do what it can to stroke its own ego.
* Black isn't the first ROH wrestler to turn an impending move to WWE into a heel run; the aforementioned CM Punk did the same thing.
* Black is. Taken to the extreme, his narcissism and obsession with dominating Goku for his own pleasure brings other implications.
* Black. It is almost as accurate as a sniper rifle and deals about as much damage as one, making it a guaranteed One-Hit Kill on Normal difficulty for all but the strongest enemies (who'll still go down in two shots or one headshot). Having one equipped is almost essential to winning the incredibly hard final fight.
* Blackjack / 21 — the gambler's game; made into a game show, as
* Black Jack adaptations (an OVA series and one film) make frequent use of this.
* Blackjack as a former U.S. Marshal who has to protect high profile figures and is phobic of the color white
* Black Jack between Mabo and Osato. Mabo is an 8 year old orphan who ends up in the care of Osato, who thinks of Mabo as her child and once stated that she wishes he'd call her "mom", but Mabo has developed a crush on Osato and has outright asked her if she would be his bride in the future. That being said, she hasn't outright turned him down, merely stating that she won't marry him for as long as he's shorter than her.
* Black Jack chapter involved a young boy in a hospital who notices that the doctor, nurses and even his mother have changed personalities, and decides that aliens must have taken over their bodies...and he's next! Blackjack eventually explains that the boy has a terminal illness, and the hospital personnel and mother were just walking on eggshells trying not to let him know. Fortunately, Blackjack is there to cure the illness.
* Black Jack features another aversion with an artist who is slowly dying of radiation poisoning due to nuclear fallout.
* 'Black Jack' Geary the best outcome would be to exit Syndic space without ever confronting the armed forces of same - his subordinates feel very differently.
* Black Jack Geary to his sailors and officers and means it sincerely despite the problems they've given him.
* Black Jack has a robber days away from running the clock out and the police officer chasing him crash near the doctor's house. (They're kept in separate rooms,

so don't realize who the other is.) By the time the robber is healed, the time limit has expired—but Blackjack's fee is exactly the amount of money he stole.
* Black Jack has Pinako proudly claim the titular doctor is her husband and she his wife. Depending on the adaptation, he himself sees Pinako as either a daughter or just an assistant. This isn't helped by the fact that she's mentally 18, but her body is that of a little girl's because the mass she had left could only afford her that kind of body in an operation.
* Black Jack has the titular doctor operating on an alien. Black Jack asks for his usual large fee, but since the aliens don't understand money, he takes out a large banknote and asks for more of them. At the end of the chapter, Black Jack is arrested for counterfeiting because the aliens copied the bill exactly, down to the serial number.
* Black Jack, he removed the cyst containing her from her twin's body and built an artificial body for Pinoko, effectively making her a "full" person.
* Black Jack invokes this a few times; since Black Jack is operating illegally in the first place, he can charge any fee he likes, and some characters do indeed wind up doing things they never would have considered otherwise to pay the money.
* Black Jack is a brilliant surgeon who truly cares for his patients, but his outrageous fees and bad attitude give him a bad reputation.
* Black Jack is around, you may as well tear the word 'Incurable' out of the dictionary...). There's always a point when rare becomes just plain made up. Lionitis is rare and highly unlikely; a telekinetic fetiform terratoma is just plain impossible (as far as we know).
* 'Black Jack' Jean Schramme, a mercenary active in the Congo wars of
* Black Jack Justice abound as Jack and Trixie alternate between telling the story to the listeners and presenting the scenes as they happened.
* Black Jack Justice, and Jack managed to grab the third when the lights went out to facilitate the robbery. This leaves the client the only person in any position to have performed the act.
* Black Jack Justice episode "How Much is That Gumshoe in the Window?", Trixie is trying to convince Jack to take in one of the mutt puppies that the episode's upper class dog breeders need to get rid of in a hurry.
* Black Jack Justice episode "The Do-Nothing Detectives", police lieutenant Sabien has Jack and Trixie handcuffed together. He tells them it's a matter of procedure, since they're keeping up a pretense that he's keeping them as material witnesses. In his narration, however, Sabien admits he just thought it was funny.
* Black Jack Justice follows the adventures of two hardboiled detectives, occasionally switching between their often-conflicting narratives.
* Black Jack Justice have Freddie's posterior. Sabien, whose previous statement that he could recognize Jack's fingerprints at a glance was referred to by Trixie as somewhere between "creepy" and "impressive", calls Trixie's ability to recognize a man by the shape of his butt much more "creepy" than "impressive".
* Black Jack Justice have this type of monologue. Occasionally parodied by having the two begin arguing through monologues.
* Black Jack Justice into an art form. Yet no matter how much they insult, threaten, or express their mutual hatred of one another, neither ever considers dissolving their partnership and they always have one another's back in a crisis.
* Black Jack Justice: Multiple characters make note of the "gumshoe gams" of Trixie Dixon, Girl Detective. Trixie herself considers her legs a point of personal pride and even Jack, someone who has no romantic interest in Trixie whatsoever, recognizes Trixie primarily by her legs on one occasion when he sees her in silhouette.
* Black Jack Justice protagonists Jack Justice and Trixie Dixon try their damnedest to remain mercenaries in the world of Law and Order, but will frequently go out of their way to help the people that hire them, and some that don't. "Justice in Love and War" features the pair helping a random man Jack found beaten up in the street rescue the girl he loves from a vengeful crime boss at high risk and no pay and ends on Jack monologuing that the letter telling them the couple was doing well,

had a baby on the way, and making promised that wouldn't come to pass about the baby's name was the finest reward they ever got.
* Black Jack Justice three times. He even compares one of the odd noises to the sound heard in one movie before Boris Karloff jumped out at Bud & Lou.
* Black Jack Justice: While being held prisoner by a crime boss, Jack taunts one of his goons as part of an escape plan. The boss manages to hold the goon in check until Jack brings his mother into it.
* Black Jack keeps a lot of his medical tools in his cape, such as scalpels that he can whip out and throw at people.
* Black Jack leaving Go Gan the only survivor, surrounded by dead bodies of animals and natives, and horribly stricken with radiation poisoning.
* Black Jack manga does this by accident, he's fallen in love with Pinoko's voice, and a coincidence makes him think the gangster's girlfriend is the one with angelic vocal cords. She isn't, and the would-be suitor makes a quick getaway.
* Black Jack, Pinoko swallows a cyanide pill that she found in the surgeon's bag, thinking it was ordinary medicine. Black Jack then has to desperately operate on Pinoko to get the pill out before its outer shell melts.
* Black Jack presses her cheeks together and yelling, "Acchonburike" (which has no actual meaning except for being translated it as "Ohmigewdness") once per episode whenever something surprising happens.
* Black Jack seems to have this problem: all the women he loves either die, are already spoken for or, in one case, change their identity to male after a complete hysterectomy.
* Black Jack. She sees Black Jack as her husband, while he sees her as his daughter.
* Black Jack story, Black Jack's school friend, Makube, is a criminal. He gets detained by the ICPO.
* Blackjack strategy (e.g., "counting cards") and trying not to let casinos notice you thinking too much is a meta-gambling example which can, at its extreme, surpass anything you've read in a spy novel.
* Black Jack there to cover the nasty-looking scar on his face. Normally it happens when he's pretending to be greedy and extort money from someone in order for them to come to some kind of realization.
* Black Jack, the title doctor surgically attaches a young boy with lungs weakened by heart disease to his mother until he can get an organ donor.
* Black Jack, though he charges exorbitant amounts of money for his services, sincerely fights for the lives of his patients; he has a Dr. Kevorkian-esque rival who is presented sympathetically (as in, he also wants to end unnecessary suffering), but who vehemently disagrees with Blackjack.
* Black Jack, when the title character stumbles upon an international drug ring working with a local hospital administrator in the course of treating a coma patient, instead of just shooting him, the gangsters drug Black Jack and leave him to die in a burning peyote grow op.
* Black Jack "Witch Trial", Black Jack defends a woman from an angry mob accusing her of witchcraft, while trying to operate on her deformed infant son to give him a more normal appearance.
* Black Jesus. This is acknowledged in the Season 3 premiere, where it's revealed that despite Vic (Charlie Murphy's character) being an asshole and not believing that Jesus was the real Jesus, his love for God still got him into Heaven.
* Black Jewels and other short-lived races are view as "flash in the pan" beings living only a handful of years compared to the hundreds of the Blooded races. Undead guardian of Hell, Saetan, is over 50,000 years old and even he is considered young when compared to the ancient dragons like Lorn.
* Black Jewels, being made up of both human and animal dreams, is the catalyst for the reconciliation of the kindred and Blood when she convinces the kindred to open their realms again.
* Black Jewels books, Jaenelle and her coven invent a game called "cradle", played with cards and a board. It has twenty-six variations, which the players may switch between in the middle of the game. Their respective husbands and consorts suspect

that they purposely made it up to frustrate the male mind, until Daemon, Jaenelle's consort, invents a twenty-seventh variation that allows him to beat Jaenelle.
* Black Jewels extended story "Winsol Gifts" Saetan anticipates this and actually has prepared some obvious, attractive presents that rattle nicely, filled with junk, to save the more delicate gifts.
* Black Jewels has a couple of examples, mainly because the villain is a hack author. Two characters who had been making fun of the author's cliché-ridden writing are trapped in a house that's trying to kill them while the author watches from inside the walls and records it all as fodder for his next book. At one point, the characters comment that in a horror story, this is exactly when one of them would be stupid enough to go into the cellar. As they're saying this, the cellar door slams shut of its own accord — if they had gone down the stairs, they would have been trapped. Later in the book, the (gay) male main character remarks to the female main character that this is the point in the story where they're supposed to have sex. They look at each other for a moment, and then the woman says, "So what do you want to do in the five minutes that would have taken?"
* Black Jewels. However, circumstances keep them apart until she's 25 and he's ... still a hell of a lot older.
* Black Jewels makes mention of a powerful stimulant that will keep someone on their feet with no food and no rest, as long as it's taken a couple times a day. Once it wears off, the user cannot be flogged awake by anything.
* Black Jewels series, where witches lose much of their power while menstruating.
* Black Jewels, the Blood society runs on this. The highest rank in the Blood caste system is queen, with the highest male rank being warlord prince, which is slightly below a queen. Most of the rulers are queens, with a few warlord princes and princes ruling here and there. Women enjoy great sexual freedom and have the final say on a child's paternity, able to deny parental rights to their child's father even if the father acknowledges the child. Ideally, the system is supposed to ensure both genders' rights by a series of nuances and protocols between women and men. For example, since women are unable to use their magic during period or pregnancy, the men in their lives must protect them. In another example, men are allowed to choose which queens they serve and are usually drawn to a certain queen, and can leave her service if they wish and are free to kill a queen who has become corrupt or tyrannical. Under the manipulation of the High Priestesses Hekatah and Dorothea, the system in Terreille became a straw matriarchy in some places and a matriarchy in name only in others, though the ideal system remained in place in Kaeleer and was later restored in Terreille following the evil priestesses' defeat.
* Black Jewels, the races are often very distinct. For example, all people from Glacia have blond hair and blue eyes. All of the long lived races have brown skin, gold eyes, and black hair, with all Eyrien's having straight hair (it's mentioned when an Eyrien child is noticed to have a slight curl to her hair.) Children of half short-lived and half long-lived descent are easy to pick out; ie, Surreal, being half Hayllian half Dea al Mon, has lighter skin than a Hayllian, green-gold eyes, and pointed ears. The Dea al Mon are considered "short lived" with a lifespan of a hundred years or so, and they all have silver hair, light skin, forest blue eyes, and pointed ears (so they're basically elves) and so Surreal's coloring is believable; her hair is black while her skin is a bit of a mix, which is usually how genetics work, and eye colors do sometimes combine. Lucivar, being half Hayllian and half Eyrien, looks pure Eyrien because the only difference between the races is that Eyriens have wings. In fact, until he was born, no one knew his mother was Eyrien, as she was born with no wings (because her bloodline wasn't pure Eyrien in the first place) and passed as either Hayllian or as a Dehmlan witch.
* Black Jewels trilogy has this problem after the absolutely horrific abuse she suffered as a child. Naturally, she and her love interest manage to work through it eventually.
* Black Jewels trilogy. The character Saetan wipes out an entire people in response to his son's death. However, an incredibly minor character, an inn owner, remembers that a merchant from that island was there, but him and everything the man had brought with simply weren't there anymore. Also, his wife, Heketeah, the one

actually responsible for the death, remembers them and is utterly terrified at the power it takes to simply erase a whole people. Saetan's friend goes to find the island only to find it's completely gone.
* Black Jewels trilogy, when trapped in a village with Lucivar, villagers, and insufficient supplies. Her power begins to consume her body as it is used. Afterward, she can barely walk under her own power.
* Black Jewels universe, women usually rule while men are expected to do most of the non-magical fighting. The Blood's governmental structure depends on the formation of Lady and Knight dynamics between the Queen and the highest-ranking males of her court.
* Black Jewels world, if one of the Blood is powerful enough, they can continue to inhabit their body after death, and are called demon-dead. This is why it's important to "finish the kill," or burn out the person's Jewels (source of power) and brain, so that someone you killed last Tuesday doesn't track you down later to return the favor.
* Black Joke: All central characters are gangsters, and the crime world is depicted as very exciting and luxurious.
* Black Joke is a mob bigwig who was paralyzed in an assassination attempt. He modified his chair to go after the perpetrator. He got his nickname from how he killed the guy — by using his new chair to flatten his would-be killer's Ferrari.
* Black Joke to her son, and thus has a face like a bull's — a flat, wide nose and beady eyes that are much too far apart.
* Blackkat's Reverse has this going with Kurama. Jiraiya accuses Kurama of kidnapping Naruto and the other Jinchuriki chindren. Kurama states Naruto is his nephew, and it was Kurama's right to rescue him. The rest he admits that he did kidnap (save for possibly Yugito, whom he legitimately saved after she ran from Akatsuki).
* Blackkat's Reverse, Kurama inherits this trait from Naruto, as he will not leave people to suffer if he can do anything about it. Kurama refuses to give Naruto and the other young jinchuuriki back to suffer abuse and isolation in their villages, even if it means having Akatsuki and the Elemental Nations hunt him down.
* Blackkat's Reverse malevolent chakra at will. Also, he has no problem with walking around in blood-soaked clothes.
* Blackkat's Reverse reminded the jinchurikis they were people and could have a family in each other. The jinchurikis return the favor by being ready to stand against their own villages for his sake.
* Blackkat's Reverse speech and asserts he should use his power to protect what's important to him, Gaara's answer is that Kurama IS what's important to him.
* Blackk Klansman is about a black police officer who infiltrates the local Ku Klux Klan chapter.
* BlacKkKlansman. This was important because, like Spike Lee's other joints, it includes a lot of subject matter and historical footage that many people find controversial and objectionable. What this led to though, was the movie ironically being slammed by leftist activists for not being dark enough, to the point where some people were accusing Lee of selling out.
* Black Knight 2000, and programmer Ed Boon released pictures of the whitewood, which showed that "B-L-A-C-K" was "F-L-A-S-H" at one point.
* Black Knight 2000 has the Lightning Wheel, which gives out a random award and is a prominent part of the playfield.
* Black Knight and only becomes more so as time goes on. He may not be a literal knight anymore, but he certainly fits the bill.
* Black Knight Bullblack/Magna Defender is out for the villains' blood because they killed his little brother/infant son. The problem is, he doesn't care how much collateral damage he causes in the process...
* Black Knight, can use magnetic force to levitate the ball away from outlanes and the outhole, safely putting it back over the flippers to keep it alive.
* Black Knight Dane Whitman is prone to this, having repeatedly had his consciousness hurtled backwards in time into the body of a medieval ancestor who

previously carried the name.
* Black Knight, had the same gimmick, only now it was advertised to have a full-length song with vocals playing in the background.
* Black Knight, Jamal finds himself in the Middle Ages but hasn't realized it yet. He befriends the disgraced knight Sir Knolte, mistakes him for a homeless person, and hands him a $20 bill as a gesture of kindness. After Jamal walks away, Knolte curiously looks the bill over and then uses it as fuel for his campfire.
* Black Knight, Jamal Walker introduces himself to the medieval people as Jamal Skywalker.
* Black Knight less ambiguously falls into this, with the instruction card summing up the entirety of its plot:
* Black Knight. Martin tries to impress the English primitives with a Bic lighter. Cue unimpressed peasant, "We already have fire."
* Black Knight masterless, landless black knights) after the deaths of Renly Baratheon and Catelyn Stark.
* Black Knight Nuibaba and free Tatiana if the player wants to get Zeke on their side.
* Black Knight, Sheppard tries to impress the Athosians with his lighter. Teyla pulls out a much fancier lighter that also functions as a small flamethrower, much to his consternation.
* Black knights themselves used to roam the lands in older patches, but got removed because they kicked everyone's ass, even the kings' themselves. As having a king taken prisoner by a random black knight tended to throw the game seriously off balance, they had to be
* Black Knight super-warriors loyal to Haazheel Thorne. Long after Haazheel's grip on them has been broken and Wismerhill has become the Emperor of all humanity, he has to resort to consuming human lifeforce for a while until his mages find a way to supply him some other way.
* Black Knight Sword (co-production with Grasshopper Manufacture, a Japanese company)
* Black Knight Sword has this in a role reversal. You are a heroic Black Knight with an intelligent magical sword, who's off to battle the evil princess.
* Black Knight, the single spoken line is in English instead of Latin.
* Black Knight, to the point where it occurs twice during the former game's main theme.
* Black Knight was named Nathan Garrett, and was a villain who worked for Baron Zemo and his Masters of Evil. His end came when, during an air battle with Iron Man, he was knocked from his winged horse and fell a good distance to the ground. Interestingly, Garrett survived for quite some time and summoned his nephew, Dane Whitman, encouraging him to take up the mantle of the Black Knight and restore its name before passing away from his injuries.
* Black Label Society: SDMFs (read as either "Society Dwelling Mother Fucker" or "Strength Determination Merciless Forever"), Berserkers, or the Doom Crew
* Black Label times the amount of caffeine of a normal cup of coffee, and roughly four times the daily limit.
* Black Lady is the Electra complex version of this trope; she only becomes interested in Mamoru because he reminds her of her father. Of course, it's later revealed that he
* Black Lagoon after she finishes mowing down a group of thugs in a bar with her umbrella gun, in doing so she revealed to the surviving thugs that she had several grenades hidden under her dress and had pulled off all the pins in the process.
* Black Lagoon. After their return from Japan, Revy is asked, by Eda, whether she and Rock "did it" or not. Her answer is "Ain't tellin'," which might mean a lot or nothing. The clues in the story could be read in several different ways…
* Black Lagoon and her unit. There is also an internal rivalry between members with military background versus members with intelligence background.
* Black Lagoon and hire mercenaries to kill him really helps with Rock's decision to fall in with the Company.
* Black Lagoon) and is held underwater to bleed to death. He had it coming, though.

* Black Lagoon and starts blasting people to hell. It also doesn't hurt her hand because she's wearing gloves or, more likely, because she is that badass. And, as the next episodes show, this is the bottom of what she can go through unscathed.
* Black Lagoon and the implication seems to be that the last time he was at an airport, he was blowing it up.
* Black Lagoon and they're pointing their guns at each other when more Neo-Nazis try to sneak up on them. Both mention they thought the other was really going to shot him/her, though Dutch said he was joking.
* Black Lagoon and unbuttons her belt, only to gutshoot him with a buckle gun. Those kinds of things actually exist. One was made for a Nazi officer's uniform.
* Black Lagoon and "Villain in Training". He's also the most idealistic of the crew, which occasionally puts him at odds with the more cynical Revy.
* Black Lagoon are a truly messed up sibling version of this. Interestingly, Gretel uses the same gun as the real-life Bonnie and Clyde, a BAR.
* Black Lagoon are shown to be those who have a code, some standards, or just enough plain sense for what's good business. Revy even points it out at one point by saying that even criminals like her have a code of honour. By contrast, criminals like Luau, Chaka and Elvis who have absolutely no restraints or respect for the mutual code of conduct tend to be taken off the board quickly because nobody wants a loose cannon running about and complicating things.
* Black Lagoon. A salaryman kidnapped by pirates, his decision to stay with them introduces the audience to the criminal underworld of the series.
* Black Lagoon. As described by Benny in their first announced appearance: "They have enough talent to fight and win World War III."
* Black Lagoon as Dutch and the gang try to sneak away from a gunfight without being noticed. Unfortunately, Revy gets into an argument with the bartender on the way out and loudly insults him... at the exact moment everyone stops shooting.
* Black Lagoon, at the end of Revy and Roberta's night-long fistfight. While they do knock each other out at the same time, Roberta regains consciousness within moments, whereas the episode ends with Revy still out cold.
* Black Lagoon. At times, stunts like Revy blowing up 6 pirate ships while jumping absurd distances come across as a parody of balls to the walls action films. Ironic when you consider that a large chunk of the badass manly action in this series is done by women.
* Black Lagoon attracting all sorts of criminals and within a couple days, they've already questioned at least six such men.
* Black Lagoon, Balalaika (a Russian veteran from the Afghanistan war and current crime lord) reveals that although her discharge was medical, and on-request, she was unofficially dishonored because she saved a child from a refugee camp, mirroring Caxton stopping his superior officer in 'Nam from leading the unit to rape a young village girl.
* Black Lagoon before attempting to shoot Dutch, only to find that the gun was empty. It's then revealed that the bet was on who the Nazi would try to shoot (himself, the black man, or the half-Chinese woman).
* Black Lagoon bodyguard Ginji Matsuzaki are this; nobility connotations, loyalty oath, ideas of honor, etc.
* Black Lagoon, but also tries to be Garcia's loving and gentle "Roberta," which she can only be with her glasses.
* Black Lagoon by Roberta by wearing a metal codpiece beforehand. However, said codpiece is dented by the attack.
* Black Lagoon. By the time he's ready to fire, Revy shoots him in the gut.
* Black Lagoon, calling each other "whiny bitch" and "nasty she-male".
* Black Lagoon call themselves couriers. Smugglers, pirates, and mercenaries would also fit.
* Black Lagoon, Chang at the El Baile de la Muerte arc when he waits for the arrival of the Lagoon crew and Fabiola alongside Garcia. This led to a tense standoff before Chang grappled with Fabiola to disarm her.
* Black Lagoon consists of a black man, a Chinese-American woman, a Japanese man, and a Jewish-American man.

* Black Lagoon crew divert heat seeking missiles with a flare, before launching their boat in the air and taking the attacking helicopter down with a torpedo.
* Black Lagoon ducks and barely manages to avoid being hit by the body.
* Black Lagoon. Dutch as well, though his operation tends to focus on smuggling and other extra-legal errands. This is probably why the Lagoon Company and Hotel Moscow have such a good business relationship.
* Black Lagoon, Dutch, Eda and Mr. Chang all regularly wear those. Rotton the Wizard tries to look cool with these, but fails.
* Black Lagoon, Dutch may be one of these, as a military character points to flaws in Dutch's accounts of serving in Vietnam and the fact that Dutch appears ignorant of G.I. lingo.
* Black Lagoon: Dutch very much fills this role to his employees on the Lagoon.
* Black Lagoon encompasses just about all four types of "people outside the law" and even introduces characters that seem to fit in a criminal archetype all their own.
* Black Lagoon essentially gets away with creating a yakuza civil war by pulling a few strings and getting the Russian Ambassador to escort her away from her last hit and away from a huge police dragnet, who don't know who she is apart from the fact that an Ambassador just came to pick her up. Interestingly, someone who does know who she is yells at the cops for failing to arrest her, meaning that she didn't actually have this trope in effect but was only counting on them expecting it just long enough for her to make an escape.
* Black Lagoon features such an emergency escape. Only some of the pursuers manage to follow.
* Black Lagoon features The Church of Violence, an illegal arms smuggling operation disguised full-time as a church.
* Black Lagoon get the uptight, fanatical portrayal of them, as does the SS Officer in the flashback. The U-Boat crew, however, are a bit more amiable, but not quite hitting any of the more positive portrayals listed above. The captain even tells the SS guy that, considering how he, his peers and his Führer seem, it might be better that the Nazis lose the war.
* Black Lagoon. Given all of this, it's little wonder that the twins went murderously insane.
* Black Lagoon had half her face torn up by a frag grenade. At first, her eye on that side appears to be fine but it subsequently turns out to be glass.
* Black Lagoon had two seasons of this kind, the second called "The Second Barrage".
* Black Lagoon happy people. Balalaika and her men were more or less forced into a life of crime after they were screwed over by their own government.
* Black Lagoon has a gender flip omake at the end of volume 4. Poor, poor Rock.
* Black Lagoon has a number of these, given it's a 26-episode love letter to 80ies Hollywood action. Revy vs the neo-nazi captain is a good example.
* Black Lagoon has one (though he's also used a shotgun as well). Chaka (the asshole from the Yakuza arc) also uses one. Revy derides Chaka for being a poser for using one for show more than effectiveness, and uses a pair of custom Beretta semiautomatics herself.
* Black Lagoon has the Desantniki (who are called the "Vysotoniki" by Dutch), Balalaika's personal bodyguard and inner circle made up of former USSR paratroopers who fought under her in Afghanistan.
* Black Lagoon has the Lagoon Company teaming up with a NSA-backed special forces unit "Gray Fox" alongside Garcia and Fabiola to locate Roberta in the jungles of Myanmar. Gray Fox and Roberta fought each other to a near standstill.
* Black Lagoon He finally got out a chapter in March 2013... only for him to announce the next chapter would be released around June. He managed to get chapters out until February 2014... and then stopped once more. It may not be a coincidence that in May 2014, Volume 10 came out... and it covered up to Chapter 87, which was the last chapter from February. One wonders if his publishing company was just nagging him to put out enough content to create another volume. The English release of that volume was in April 2015, but there's been no word on when (or IF) Rei will

have more chapters ready.
* Black Lagoon. He isn't much for violence like Revy and Dutch are, but he makes up for it by being the Lagoon Company's negotiator. He's also the most idealistic of the crew.
* Black Lagoon. He still goes down hard, because this is Roberta we're talking about, but at least he kept his jewels relatively intact.
* Black Lagoon ill-advised and suicidally moronic, as Revy herself outright states in her very profanity-laden rant following this) in order to speak out for a girl he just met a few days ago. The girl in question, Yukio Washimine, repays him by trying to have him killed.
* Black Lagoon in action scenes. Balalaika's rationalist ideology and fighting style, Enlightenment, make her that much more intimidating as a result.
* Black Lagoon in his face and a dead mook lands on top of him for good measure.
* Black Lagoon in order to save the rest of the sub, but it's ultimately futile as the sub was left too badly damaged to surface ever again.
* Black Lagoon in the episode "Eagle Hunting and Hunting Eagles" Revy starts off a grenade this way, killing two Neo Nazis in the process while on a submarine.
* Black Lagoon in the same room and have them trying to kill the same opponent counts for this trope. The fact that so many of them live in the same city and have not turned the entire city into a battlefield is a tribute to the presiding criminal orders.
* Black Lagoon. Inverted in "Greenback Jane" where the title character waits till one of her guards goes to the toilet, then locks him inside by tying up the door handle. She then breaks a computer over the head of the other guard.
* Black Lagoon involves her rallying a group of disaffected war veterans at a funeral.
* Black Lagoon is an anime with two Gun Fu experts who use two pistols at close quarters as well as a huge number of gunmen (and women). One of those totes around a minigun...
* Black Lagoon is a series where nearly everyone is either a gunslinger or a noncombatant. Even so, two characters use edged weapons to lethal effect.
* Black Lagoon, is a superhuman assassin who can bring terror to the criminals of Roanapur, including a chainsaw-wielding madwoman, who was scared shitless when Roberta broke her chainsaw.
* Black Lagoon is a very rare non-comedic example, but his psychopathic idiocy, complete and utter lack of care, and nonexistent impulse control all combine to make him dangerous less because of his own deliberate efforts (as he is way too stupid and incompetent to reliably carry out his ill-reasoned schemes to anything resembling completion) and more because of the way that his schemes typically decay.
* Black Lagoon is brimming with these, especially when he's on cocaine (manga) or pot (anime). Among the more notable ones...
* Black Lagoon is entirely a story arc for Sergeant Feng Yifei aka Li Xinlin to clear her name and frame Jane for the hacking op in Germany after Jane framed her while trying to infiltrate her group. PLA officials deemed her rogue and sought to have her killed.
* Black Lagoon isn't knocked out, which technically makes her the winner).
* Black Lagoon is this towards the over-the-top violence that was '90s anime.
* Black Lagoon. It has been implied that they were one of the few people to have fought the other to a stalemate. At the very least Chang is one of the few people besides Rock that Balalaika seems to flirt with but the idea of anyone dominating Balalaika is too ridiculous to contemplate.
* Black Lagoon), leading to some serious issues in her current life as a nihilistic gunslinger and muscle for the Lagoon Company.
* Black Lagoon managed to pull this off in a late episode when Rock upset Balalaika - she stood over him at an angle at which light reflected off her glass eye, evoking the trope.
* Black Lagoon moment when the head of a Russian mafia pretends to speak broken English so that he can translate a negotiation.

* Black Lagoon most dangerous figures, despite his never even touching a gun.
* Black Lagoon. Most notable is her battle with Ginji Manslayer who is about the only character (other than Roberta) who stands a chance against her. In their final fight, his focus slips for a fraction of a second and she seizes that instant to kill him. Another good example is Hansel and Gretel, although they're offed by the Russian mob.
* Black Lagoon. Most who have tried have ended up taking at least one bullet, courtesy of Revy.
* Black Lagoon mount for his sword isn't even practical for fighting, since it has no handguard or hilt wrappings, but he's good enough anyway.
* Black Lagoon Of course, growing up in a very tough slum tends to lead to this sort of thing.
* Black Lagoon of customized Beretta 92 series pistols with, among other things, extended barrels. She calls them the 9mm Sword Cutlass.
* Black Lagoon of Roanapur, he also translated the Lovelace family creed while Roberta was reciting it in Spanish, he correctly identified the terms of affection that Hansel and Gretel used as Romanian, and he was able to translate Feng Yifei's Mandarin for Revy's benefit. Though it's mentioned at one point he worked in procurement and likely came in contact with several languages.
* Black Lagoon, one of them drops the grenade he was holding, which proceeds to bounce down the stairway to where the rest of the Cartel mooks had been standing. Unsurprisingly the US forces easily escape in the confusion.
* Black Lagoon OVA "Roberta's Blood Trail" had the tough task of adapting a manga story arc ("El Baile De La Muerte") that most fans agree went on too long and suffered from poor pacing. For reference, the OVA lasts about as long as the Japan arc from the second season, but has to adapt twice as many chapters. The OVA compresses the narrative without cutting information, changes the order of scenes for dramatic emphasis. Significantly, the action scenes that took up so many manga volumes are shorter, more comprehensible, and more exciting when animated.
* Black Lagoon paycheck! The next time this happens, the only help you'll get is from the Almighty!" And then they go off together.
* Black Lagoon, pinning up maps and taking notes on the walls. When we get back to him later, the writing has spread across the other walls, the floor is littered with empty beer cans and Rock is virtually tearing his hair out.
* Black Lagoon poisoning. It is never explained how the protagonists are able to breathe inside the submarine without their diving gear.
* Black Lagoon. Revy at one point makes a sarcastic quip when his latest kidnapper turns out to be a Japanese high-school girl.
* Black Lagoon. Revy gets bailed out of a firefight by a Chinese woman with throwing knives and a man driving a Jeep. She immediately asks the man:
* Black Lagoon. Revy is just about to drive off in disgust when Jane turns up right on cue. Unfortunately everything after that goes to hell, because if Eda has explained the plan earlier, Revy and Rock could have told her their getaway boat was out of the harbor.
* Black Lagoon, Revy, is waiting for Rock in a park in Japan...and ends up showing a bunch of kids who're nearby playing with pop-guns how it's done, including how to die realistically. When she finds that Rock's been watching, she blushes bright red and begins threatening him with death if he ever tells their friends in Roanapur.
* Black Lagoon, Revy states that she had sex with women in prison, however, her love interest is a guy. Fans debate whether her interest in women extends outside of prison, since in context she was referencing being with women as a threat to make another woman her bitch for making a pass at said male love interest.
* Black Lagoon: Revy takes out Claude "Torch" Weaver in the Greenback Jane arc by shooting his fuel pack, causing him to fly like a rocket before exploding.
* Black Lagoon, Rock returns to his home country of Japan during the Yakuza arc but found himself unable to return to his family and old life after everything he's experienced since his departure.
* Black Lagoon, Rock runs into Revy and is at first relieved that she's still the same, until she unashamedly pulls down her shorts and shows him/her... a little

extra something underneath.
* Black Lagoon: Rokuro Okajima, a.k.a. "Rock", is a white-collar Japanese salaryman who is literally kidnapped by the crew of the eponymous Black Lagoon. As such, he is the one to ask the questions and fill in the audience.
* Black Lagoon series under said pseudonym, with the first one being simply about how he designed the characters and the other being a swimsuit special. (In an ironic twist, because of publishing them under the name Tex-Mex, these artbooks have found their way into the lists of hentai manga despite being totally worksafe.) In one of his swimsuit illustrations, Hiroe even invites readers to draw erotic scenes about Roberta.
* Black Lagoon's female lead is nicknamed "Revy." "Reby" would be a more natural shortening of "Rebecca," but "Revy" is the official transliteration for some reason. "Levy" also crops up in some transliterations. That aside, since it's originally a Hebrew name anyway, it can be safely spelled Revecca too; the Hebrew letter for the 'b' sound is also one of the Hebrew letters for 'v', and the original Hebrew name was Rivkah.
* Black Lagoon she takes the fight to melee because she cannot shoot anymore.
* Black Lagoon since you can see parts of the images in question. Revy and Rock are talking to a very bored Balalaika while she's editing porn videos.
* Black Lagoon's problem, Roanapur probably would've come under pressure from the upstart agency. As it was, the CIA, and their interests in Roanapur, were able to maintain the status quo.
* Black Lagoon takes place in the fictional Thai city of Roanapur, a city riddled with corruption, crime and violence, where gunfights happen in a frequent business, and almost every named character can kick all sorts of ass, whether it be with a guns, knives, or your clever wits. This is especially true if you're a woman. Let's just put it this way, in Roanapur, if you have a name, then you are a SURVIVOR.
* Black Lagoon talks like this because she uses an artificial voice box to speak as her voice box was damaged.
* Black Lagoon that this trope is happening, is completely aghast at what is going on and tries to talk them down, only to get an angry "STAY THE FUCK OUT OF THIS!" from both women. The fight in question is a vicious knock-down-drag-out brawl and goes on for some time, neither of them giving up or looking too good by the end of it.
* Black Lagoon. The anime version never mentions Ibraha's past affiliations.
* Black Lagoon The group is led by Ibraha, who comes from the Middle East (or West Asia). The manga mentions the Abu Sayyaf Group as one of its allies. Rock encounters Masahiro Takenaka, ex-member of the Japanese Red Army who based himself in the Philippines' Mindanao region from Adachi due to the National Police Agency and other police force's successful arrest of JRA members in Japan and overseas. The New People's Army also gets a brief mention in Roanapur by Dutch since the series implies that Lagoon Company delivers weapons and ammo to their hideouts in the country.
* Black Lagoon, this is less to keep the police from catching the killers (because the cops are all thoroughly corrupt) and more to keep the bodies from stinking.
* Black Lagoon, this was implicitly done to Mr. Chin with bombs and a jerrycan (not shown being set up on screen but later the results were) by the Russian Mafia for trying to kill the Lagoon Company. It's triggered by an explosion set off by Balalaika, the leader of the gang.
* Black Lagoon This wouldn't be very impressive if it weren't for the fact that it's a monthly series - so said arc lasted for nearly half the series at the time it ended.
* Black Lagoon. Though, he does salvage some of his reputation by being the only one smart enough to bring a bullet-resistant vest.
* Black Lagoon threatens to show kid hostage Garcia "the colour of his breakfast" after he throws food at her.
* Black Lagoon. To be fair, it's as much a tool of her trade as much as an instrument of mayhem even though she can apparently deflect bullets with it. What's her trade you ask? She 'cleans' up the many bodies that litter Roanapur by making

them... More portable. Occasionally when the bodies are still technically alive in order to give the correct impression to the receivers of the bodies in their portable state.
* Black Lagoon to surviving multiple gunfights, kidnappings, car chases, boat chases, and the list just goes on.
* Black Lagoon" Weaver also doesn't smoke, due to it being forbidden by his religion (he's implied to be a Mormon).
* Black Lagoon. We only see Rock staring in horror (as Revy screams at him not to) and the sound of Yukio choking to death on her own blood. The manga, meanwhile, gives us a completely unobstructed view as she gives him one last smile and falls over dead.
* Black Lagoon when she has a bad day but is also a main character). Balalaika averts it once when she declares personal war on Hansel and Gretel for killing one of her men, though she also had a pragmatic reason since the pair were destabilizing Roanapur by their presence, and by ruthlessly crushing them she sent the message to Hotel Moscow's enemies that there would be a bloody price extracted for anyone who dared attack her or her men.
* Black Lagoon where the most hard-core criminals become students, teachers, and the faculty.
* Black Lagoon, which lasts for hours, resulting in only some bruising, black eyes and bloody noses. By the next episode, she's fine. Then again, there is no indication of how much time has passed between the episodes.
* Black Lagoon whose destructive power he shoots his mouth off about. This shooting off at the mouth gets him killed, as Revy spends the rant reloading her gun and then gunning him down mid-sentence.
* Black Lagoon wields one in "The Hunt for Greenback Jane"/"Roanapur Freak Show".
* Black Lantern, Negative Woman says, "I can't for the life of me understand why. Ah, perhaps 'life' was not the best choice of word."
* Black Lanterns were exploiting this trope by making their victims feel hope, among other emotions, before killing them, so they can feed upon said hope.
* black leather. Chandler, whose resolution was to not make fun of his friends anymore, desperately wants to make fun of how tight they are and tries to prompt the others to mock them for him.
* Black Leather Jackets", Scott, Steve and Fred have telekinetic powers.
* Black Legion Anamnesis, along with dozens of artificially grown brains.
* Black Legion and gives him a plenty of badass moments. He's starting to get fans now.
* Black Legion, especially compared to his fellow sorcerer. While Khayon has tremendous edge in raw power and experience, Sargon can achieve much more subtle effects and has greater control over his power.
* Black Legion hammered into his brain. Goes with the territory, even if he's one of the heroes.
* Black Legion has a strong distaste for Seers, considering their art to be the most imprecise and unreliable of all forms of sorcery. He also states that he has never met a Seer who didn't try to make fate come to pass in their favor and notes that of his fellow Black Legionaries he always hated the three Seers.
* Black Legion is written as the main character's account of the eponymous Legion's history, told first to an Inquisitorial transcription drone and then to the Inquisitors themselves.
* Black Legion, it turns out that Nefertari died years before the story began, but Khayon kept them alive through his sheer force of will and psychic powers. He also erased their memories of the death, for fear that if they remembered, they'd die.
* Black Legion, Lheorvine flat out admits that they're going to steal it.
* Black Legion novels, the main character's name is written as Iskandar Khayon but pronounced "Sekhandur Caine".
* Black Legion of Token Blacks. Post-Ward, it's assumed that the denizens of Nocturne are white, but "turn black" when they become Salamanders.
* Black Legion, the Black Crusades and the Crimson Path. Replace "Inquisitors" with "readers" and there you go.

* Black Legion, the characters encounter Solar Priest, who's the personification of Astronomican, navigational beacon of the Warp, in its calmer aspect. There is apparently another, called the Warlord, but we don't get to see it.
* Black Legion, the Imperium, accepts no one who's not human, gene-pure and Emperor-worshiper.
* Black Legion), which he took from a Space Wolf champion centuries earlier.
* Black leopards and jaguars (aka black panthers) are always drawn without spots, mainly because the spots are almost completely invisible unless under light.
* Blacklight Fantasy, had a psychedelic/spiritual theme and was trancier.
* Blacklight Fantasy. Said album also has "Fascist Funk"("This. Is. the Force. Of Future. Funk. This. Is. The. Force. Of Fascist. Funk.") and "Living in the Future"("I don't think so. I don't think so. I don't think so. I don't think so.").
* Black Lightning: African-American Tobias Whale engages in assorted racist comments concerning the black residents of Freeland, and based on the reaction of one of his subordinates, has a reputation for doing so. Mitigated somewhat in his case as his albinism made him an outsider within the black community while growing up.
* Black Lightning, after Jefferson's heart is stopped by a punch to the chest, his youngest daughter Jennifer accidentally uses her recently-manifested electrical powers to shock it into beating again. Then again, metahuman physiology could be different, especially one whose power is absorbing and manipulating electricity.
* Black Lightning, and has a history of beating people to death with his hands if sufficiently annoyed—though the trope is downplayed both by Tobias's albinism and the fact that his main enemy is himself black.
* Black Lightning, Anissa's girlfriend starts the show as loving and compassionate, and their relationship is loving and full of passion, to the point where Anissa is comfortable telling her about her growing powers. Then, in episode 3, the girl inexplicably becomes jealous, paranoid, and racist, and Anissa suddenly claims that the relationship has been going downhill for a while. No sign of that has been shown in the two previous episodes. All this seems to be done to allow Anissa to hook up with Grace, who might be more supportive of her becoming a superhero.
* Black Lightning: Black Lightning and Thunder (and later Blackbird) are often called vigilantes. Someone on TV wonders why other cities get to call their protectors "superheroes", while theirs are "vigilantes" and then claims it's because they're black. It should be noted that Black Lightning doesn't shy away from killing, though.
* Black Lightning continuity as both have been mentioned on-screen although whether they are real or fictional is not established.
* Black Lightning finds herself trapped in an altered reality where heroes have been reinvented in ridiculous ways, and among them Mari meets Black Lightning's reinvented self: Brown Bomber, a casually racist white guy who turns into a stereotypical black man. Mari (a black woman) is very understandably unamused.
* Black Lightning: Flashbacks to the to the eponymous protagonist's retirement from his original superhero run takes place during the middle of the decade.
* Black Lightning himself using his powers to restart Superman's heart.
* Black Lightning is another superhero who started out using a gadget, only to eventually realise it had unlocked his own powers.
* Black Lightning, Jefferson and Anissa discover the body of the sole surviving assassin. Jefferson lampshades the trope by noting the "second rule of high profile assassinations; always kill the killer."
* Black Lightning: Jefferson can directly stimulate someone's nervous system with low-level electrical discharges, which he uses when making out and later having sex with his ex-wife. Based on her reaction, it's highly pleasurable.
* Black Lightning Jefferson is able to manipulate the human body's electrical fields and Lynne seems to find it quite pleasurable.
* Black Lightning: Joey Toledo, an agent of the 100 who pushes drugs at the hogh school Jefferson Pierce works at. He lasts all of two issues before getting killed.
* Black Lightning part of the Arrowverse... until it was announced that Black Lightning would be appearing in the crossover, although the show itself would not

be devoting an episode to it.
* Black Lightning remain in contact with their dad, and both even become superheroes later (though Jefferson was very adamant that Anissa finish college first).
* Black Lightning's right-hand man for his role in distributing the new designer drug Green Light, which causes far too many people to OD. The titular superhero/vigilante's goal is to invoke this trope against Tobias for killing his father in front of him.
* Black Lightning, the titular character gets a set of armour that not only protects him - it's designed to increase his control over his powers and has high-tech goggles that gives him telescopic sight and "lightning vision". His armour also appears to boost his strength.
* Black Lightning: Tobias Whale is a corrupt councilman, turned feared gang leader, who hasn't been seen for decades and now has only now officially returned — at least "officially". In truth, everybody knows that Tobias was still hiding in Freeland and running the local gang — the One Hundred.
* Black Lightning: Tobias Whale's actor, Marvin Jones III, is a real-life albino black man.
* Black Lightning, where Anissa Pierce and Chenoa are sisters Adriana and Mariana Torres.
* Blacklight Retribution looking at the "smoke screen" caused by the Digi-Grenade causes you to get a digital distortion over that area (a whole bunch of various shades of grey boxes with the word Error written on them) and if you get hit by a EMP grenade your vision has a BSOD (which thankfully recovers).
* Blacklight: Retribution nearly every single soldier wears the same dull grey fatigues, which normally would be great for camouflage in an urban environment...if it wasn't for the bright neon lights all over your body including hands, torso and a particularly helpful pair on the standard helmet indicating the best spot for a headshot.
* Blacklight Retribution put a nasty-looking face on the helmet, such as the Bonebreaker, which is a scowling skull.
* Blacklight Retribution will not only cause the head to explode but will sometimes cause a sharp exploding sound to be heard across the map if the headshot deals enough damage.
* Black Like Me: A character disguises themself as a member of a different social group and discovers how they are treated differently.
* Black Like Me is an account of journalist John Howard Griffin's dyeing his skin black and living in an area he had visited as a white man and describing the differences.
* Black Like Me..) She gained a lot of sympathy for the ways in which men force themselves to conform to gender roles as confining in their own ways as women's. She began by being nervous about whether she was acting properly manly but later realized that it helped her fit in because all of the (actual) men were doing it too.
* BlackLillian's. That blank stare and repeated phrase during the monologue...
* Black Lion, a human-lion hybrid able to fight toe-to-toe with a superhero, but passes out if he spends too long in direct sunlight.
* Blacklisted by Gena Showalter, this trope is explored with drugs. It's more like "Your Illegal Drug Dealers are our Pharmacists". In a future America, aliens are commonplace, but most of them have to take a drug to breathe. This drug, however, is illegal. The main character's love interest sells them and is hunted by the government.
* Blacklist everywhere in small, well-lit and enclosed spaces, which even includes Heavy Infantry HVTs with riot shields. Even worse, the enemies tend to spawn on opposite sides of the map from each other in this mission, so if you want to get a mastery in the first five waves through comboing (Possible in each of Charlie's missions) before all the painful stuff comes in, you better have some good reflexes and luck.
* Black Lives Matter him for compiling a list of people to support, and later

mirrored it after he took it down. Billy D ended up being dumbfounded when the list proved to have the opposite effect he wanted, as there was now more support for Black Lives Matter and its cause than before the list was made.
* Black Lives Matter movement eventually resulted in several such mascots (such as the aforementioned Uncle Ben and Aunt Jemima) being dropped, however.
* Black Lizard 1981 — locked in his mansion's personal dungeon, after making the youth become insane by thumping a pressure point in his head.
* Black Lizard 1981; the main villain, Luo-yi, after slaying his family due to an affair, used latex masks to assume himself to be his dead wife to keep the truth hidden.
* Black locusts its wood is very good both as fuel and for other things, and its flowers are really beloved by the bees, producing delicious honey.
* Black London books, Jack Winter gets a reading from a gifted reader. She ends up possessed, and that which possesses her makes all the cards some variation of "nothing but your death awaits you".
* "Black Lotus Moon". The huge guardian monster in Garilon's tower has large, saucer-shaped eyes with red irises like clots of blood.
* Black Luster Soldier -- Envoy of the Beginning, of similar combos that could be used to achieve similar results.
* Black mage also insisted that they should never speak of the werewolf encounter again, on the grounds that - since the werewolves had thoughtfully decided to
* Black Mage and Fighter were chosen by their avatars to fight for the fate of the world.
* Black Mage: A sorcerer who specializes in using offensive magic for combat.
* Black Mage combines an incredible grasp of magical theory, including schools such as summoning and ice magic that he doesn't actually use, and an unparallelled amount of magical power coursing through his body. Unfortunately for basically everyone in the world, he is also
* Black Mage encounters himself in the Castle of Ordeals, where the Light Warriors have to face symbolic representations of their own flaws. However, the only thing that could represent Black Mage's flaw (Pure Evil) was himself,
* Black Mage has been described as "weak" and "noodly" by his party members. Also smelly, but that's irrelevant.
* "Black Mage has been well. He's radiating pure darkness now. He's got some kind of screaming demon background noise reverb thing going on with his voice. I think he just wants attention."
* Black Mage His tantrums tend to devolve rather quickly into childish whining as well.
* Black Mage is established early on to look very much not human, but it's never made clear whether he started that way or was twisted by all the evil magics he collects.
* Black Mage isn't immune to this himself, either. Among other things, he justifies his penchant for extreme short-term planning on the grounds that since it's always now there is no long term and therefore he can't be screwed by it (shortly after being screwed by it), and his explanation for why he tore off the wings of a fairy in order to stick them on a baby's back and make a fake fairy managed to confuse even Red Mage.
* Black Mage's examples are especially noteworthy as he has a tendency to derail his metaphors into him reveling in the memories of past atrocities, such as
* Black Mage's face is apparently so hideous as to be non-Euclidean — the hat keeping his features in shadow prevents people from
* Black Mage's homicidal impulses seem directly linked to how many stupid things are said in his vicinity at any given point in time. For example, if three people are having a conversation which defies the laws of logic, he will probably snap and stab anything and everything in arm's reach. If his
* Black Mage's reaction to the improbable things his much-hated teammates do. By the time the Light Warriors reach the Temple of Fiends again, he's stopped complaining.
* Black Mages study the ebbing and flowing nature of the Astral and Umbral eras

and apply it to their casting, burning out their MP in fire-aspect Astral stance and restoring it in chunks in the ice-aspected Umbral stance. They also don't start learning any spells with massive impact until becoming Black Mages proper, as high level Black Magic is exceptionally dangerous for Thaumaturges to try to use without a conduit, which their soul crystals act as.
* Black Mage Zeref decides to end his exile, and the dragon Acnologia appears and assault the strongest member of Fairy Tail on Tenrou Island fight them. The final battle with the aforementioned jerkass black dragon involves seven Dragon Slayers fighting him.
* Black Magic #13 story "A Rag - A Bone and a Hank of Hair!" tells of Marcus Jagger, a middle-aged tailor who regrets never having gotten married. He gets an order to make a dress for a female magician and dusts off his previously unused tailor's dummy for it. Once the dress is picked up, the dummy is left in the corner where it gathers dust, gets oil spilled on it, and is rained on through the open window. Come winter and Marcus cranks up the heat from the radiator the dummy is slumped against, which ignites life into it. That night, the radiator fails and the dummy instinctively looks for another source of heat, for which it wraps itself tightly around the sleeping Marcus. He suffocates and the dummy dies too because it no longer has a heat source to maintain its fragile spark.
* Black Magic, and used to keep its master alive beyond death. It can be healed by remorse, by acknowledging your sins as sins and repenting of your crimes.
* Black magic can have this effect on warlocks. The more they use it, the more right it feels to use it. This is particularly true with mind magic. It turns out the Council's draconian "break any of the Laws of Magic and it's
* Black Magic form subverts this by giving him a physical weapon, though he only uses this at the end of the very first game.
* Black magic has plenty of examples that do similar things, although they're not technically "artifacts". Graveborn Muse, for example, is a creature but basically functions like an enchantment or artifact that lets you draw extra cards at the cost of losing life — and it's not optional so if you don't manage to kill your opponent using the extra cards, the Muse will kill you.
* Black Magician and he sacrifices himself to help her defeat their enemies.
* Black Magic. In his defense, it was really the only way of ending the fight without hurting anyone.
* Black Magick #8, Morgan is in a huff with Rowan because he thinks that Rowan and Alex are an item and that Rowan hasn't told him yet. This causes Rowan to burst out laughing.
* Black Magick involved, which Rowan angrily refuses to accept. All the events of the past week catch up to her and she breaks down before Alex can finish explaining, with Alex then convincing the mentally and physically exhausted Rowan to hit the hay.
* Black Magick Issue #1, the man who tries to set fire to Rowan does so by tossing his Zippo into a pool of gasoline he has spread on the floor.
* Black Magick: Issue #9 reveals that Rowan's black cat Hawthorne is able to speak telepathically. Prior to this Hawthorne had shown no sign of being anything other than an ordinary cat.
* Black Magick old, but their factual existence does go back for centuries.
* Black Magick, Rowan Black—practising Wiccan and heir to powerful magical bloodline— is a police detective who rides a motorcycle. Her best friend Alex, who is also a witch, is a kindergarten teacher.
* Black Magick. The organization which hunts witches uses a hammer as its symbol, and its mark on the lighter used in the first issue is what makes Rowan realize that this is not an isolated case of insanity.
* Black Magic learn to create a zombie army, but died before he could use it or pass the knowledge on.
* Black Magic M-66 (sister company to Sentai Filmworks) rescued the OVA and released it sub-only because they "didn't get" the English dub from Bandai.
* Black Magic M-66. Sybil faces extreme danger to get the story and even saves the scientist's granddaughter from the title robot.

* Black Magic spell, which does a huge amount of damage, but costs a lot of mana and has a long cooldown.
* Black Magic. This is why the Wardens have a one-strike-you're-out policy unless another wizard puts their life on the line to grant a warlock a second strike; it's really just putting them out of everyone's misery.
* Black Magic, which required hundreds of human sacrifices to energise and then a final sacrifice to target its destructive power.
* Blackmail: A form of extortion in which the perpetrator threatens to reveal compromising secrets about their victim if they fail to do whatever they demand of them.
* Blackmail Backfire because of unforeseen circumstances (up to and including the blackmailed person having no problem killing the blackmailer).
* Blackmail: I know your secret, so you better do as I tell you or I'll let your little secret out!
* blackmailing her into marrying Lex despite knowing he did that for Clark's sake and had no other options. It was clearly done out of revenge, yet she insists she, in fact was protecting Clark knowing that isn't the truth.
* blackmailing him, but he actually was having an affair with her and killed her to prevent her from speaking and to destroy evidence of her pregnancy.
* blackmailing that he can freely screw them as much as he pleases. He attempts to flex his influence to ensure he gets his way in court but it fails miserably (can't use your influence to stop someone from using solid evidence to show you're a heartless liar).
* "Blackmail" Is Such an Ugly Word: And don't you dare call what I'm doing "blackmail"! I'm merely keeping you in your place. You got that?!
* "Blackmail" Is Such an Ugly Word: A tamer euphemism used to describe criminal actions.
* "Blackmail" Is Such an Ugly Word: Character insists on a euphemism to cover up a negative reality.
* "Blackmail" Is Such an Ugly Word: Evildoers take offense to someone describing an evil deed with an accurate term.
* "Blackmail" Is Such an Ugly Word: If we are doing things that you find offensive, for instance blackmailing you, always know that you are taking things out of proportion.
* "Blackmail" Is Such an Ugly Word: The line is virtually stock dialogue now; as a trope it is at the very least discredited, since it's only used for laughs (or period flavor) these days.
* "Blackmail" Is Such an Ugly Word: This trope is only played for laughs now.
* Blackmail— Pay up or someone finds out something you want kept quiet.
* blackmail them for money or whatever else he wants. He then murders Mia for trying to expose him, pins it on her sister Maya, and even tries to frame Phoenix, Maya's defense attorney, for the murder as punishment for daring to stand up to him.
* blackmail the murderer. In any case, when the murderer attempts to kill this new obstacle, the police burst out from hiding and the murderer is caught red-handed (though for a new crime).
* Black Mama, White Mama, it's really not that surprising. After their escape things get more serious and they have to fight real enemies in a much more deadly manner.
* Black Mama, White Mama: Obviously, one of the selling points of the movie. Numerous minor female characters get fully or partly naked, plus in tittilating situations.
* Black Mama, White Mama they are both stripped to the waist and they struggle to avoid touching the hot metal with their bare skin.
* Black mambas, king cobras, and taipans are considered the snakes with the greatest potential for killing people, not just because of their size, toxicity, amount of venom, speed, and aggression, but also because of their intelligence. They're extremely alert and quick to react, and they're also very curious. They've shown the biggest propensity to escape confinement of any snake. This makes them

extremely hard to handle, and the only reason there aren't many fatalities is that few humans have tried to handle them.
* Black Man (also known as ''Thirteen' in North America) includes a "United States" that was forced to Balkanise through a mix of external and internal pressure; the remnants take the form of the fairly moderate, civilised North Atlantic Union, comprising the North East and New England, the extremely conservative, economically and socially backwards Confederate States of America (informally referred to as "Jesusland", in a nod to the common nickname for "Red State" America) and the capitalistic, libertarian Pacific Rim Union. The Union and the Rim don't get on particularly well, but both are united in their mutual distaste for the Republic, which is more than reciprocated.
* Black Man ditches a spacecraft in the ocean and goes on a killing rampage on Earth. No one can figure out how he escaped the crash before the response team arrived. Until a weighed-down body is found under the sea, and the investigators are belatedly informed that a member of the response team has been missing for some time.
* Black Man does this as a standard tactic, letting a minor associate of the man he's hunting know he's in town, then following as they rush off to deliver a warning.
* Black Man / elite commandos, but later are seen as so dangerous to baseline humans that they are prohibited from interaction with human society and are given the choice of being exiled to Mars or being interred in reservations or "tracts" (essentially open air prisons), if they stay on Earth. They have a hyperdeveloped neural system and a slightly different neurochemistry, as well as an enlarged "area thirteen", being the brain area responsible for alpha male traits in the book. This results in the average thirteen being both physically stronger and more mentally acute/cunning than the average human, but also in being overly aggressive, unable (or rather, very unwilling) to follow orders or be subordinate to anyone and having a lack of social empathy, being only interested in his own benefit. All of this can be somewhat overcome by force of will (as the protagonist, Marsalis, and Sutherland show), but the tendency is always there. Despite the comparatively minor actual biological changes, the thirteens are different enough (and scary enough) to be considered as a subspecies (and, quite often, non-humans) by the baseline population, which they reciprocate by calling humans cattle or "cudlips" and also viewing themselves as a separate, superior species.
* Black Manta. He's masked, but he actually manages to achieve his goal when raiding Atlantis, later
* Black Manta mans a giant tripod in order to steal an armored car in
* Black Manta's classic bubble-head deep sea diver design has been a difficult thing to process in the modern era, coming across as a silly, impractical top heavy look. This film shows Kane building the suit from scratch, adapting Atlantean weaponry alongside his own high tech armor designs, and specifically making the helmet huge so that it could fire a
* Black Manta. This isn't known until he takes his helmet off, but his cunning, utter ruthlessness, and the sheer intimidation he is capable of more than qualify him for this trope.
* Black Man that she'd planned to murder a police colleague who'd betrayed her genetically-engineered husband to the authorities, but she lacked the ruthlessness to carry it through. "You have to be cold, so cold..."
* Black Man. Unsurprisingly he's got a major screw loose by the time he gets to Earth.
* Black Marker lore was found in the Chicxulub crater and is about 65 million years old. No way that's a coincidence.
* Black Market and buys it, intending to return it to him. Only he's stopped by two MPs on the way back to camp who decide since he has it he must be the thief.
* Black Market Arts, they decide to go the art show together. They take an entire case of high-fat, high-cholesterol cookies, and the second cop offers to buy the first cop a large popcorn with butter and a hot dog. The first cop replies, "Oh, yeah, and uh, Diet Coke."

* Black Market: A secretive, illegitimate business network in which criminals sell illegal products or services.
* Black Market: A term referring to the secret network of criminal merchants who sell illegal goods and services.
* Black Market: A term referring to various types of illegitimate underground businesses, in which criminals engage in the sale and trade of illegal products or services.
* "Black Market" had one shoved in, thanks to Ron Moore thinking the episode didn't work at all, and needed to start with
* Black Market has the Tricorp News Network, TNN, provide commentary (and exposition) at key moments.
* Black Market is described as an implant drilled into the brain through the optic nerve. It presumably has quite a lot of memory space, since it stores a personality that can interface with other machines.
* Black Market to be people at all, while the main robot rights campaign undermines itself by employing exceedingly dubious methods.
* Black Market transactions, drug trafficking and other illicit operations have no other recourse to settle disputes other than the use of violence.
* Black Market universe, people can be downloaded into Soul Jars, while machine minds are relegated to Turing Jars. Pirates use this method to endlessly reincarnate; one of the main characters is a "Ghost" in this fashion.
* Black Marsh (aka Argonia) is full of diseases, poisonous life forms,
* Black Mask also suffers from this as one of his earliest fights with Batman caused his namesake mask to fuse to his face — and while adaptations present his current
* Black Mask, he is surprisingly chivalrous. Regulus is surprised that he hasn't even kissed her yet, but Sirius claims that he respects her too much to fool around with her.
* Black Mask is shown to have possibly loved his girlfriend and didn't exercise sadism against his own goons, whereas the comics version disfigured an ex-girlfriend and shown a love for torture.
* Black Mask, Jimmy, who ambushed a hospital guarded by policemen, killing more than twenty officers during his rampage.
* Black Mask killed his parents in a fire to inherit their business and fortune. Unfortunately, he was a lousy businessman and when he tried to burn down the factory to cover his tracks, he wound up with the facial injury that gave him his villain name. He was a lot better at being
* Black Mask Pureblood witch that his family wouldn't disapprove of too much. Lampshaded by Regulus, who asks his brother what he likes about Colette since she's the type of girl Sirius would normally find boring.
* Black Mask: This is the police's reaction to Jimmy's hospital rampage. They may be wearing balaclavas, but their fear can be seen in their eyes...
* Black Mass as they're being interrogated. The ending reveals that they're only doing so after Bulger was exposed as an FBI informant.
* Black Mass can replace them as head of organized crime in Boston. Later, a real informant rats Whitey out for smuggling guns to the IRA, and Whitey kills him with the contempt usually associated with a rat.
* Black Mass in Boston. Whitey wins, after helping the FBI arrest the Italians, and takes total control of organized crime in the city.
* Black Mass. It’s not until he laughs at his own comment that anyone realizes he’s joking.
* Black Mass: Whitey Bulger is a notorious crime lord, murderer, and all-around sociopath. His brother Billy is not only a straight arrow, but he's also a politician and an 18-year member of the Massachusetts state legislature.
* Black Materia is contained within the Temple of the Ancients. When the party goes in and discovers it, they discover it is actually a replica of the real thing, and the real Black Materia is actually the Temple itself that contains it.
* Black — The enemy is at least 6 levels lower than yours. The enemies accuracy and evasion skills are heavily nerfed as well as their damage output but

you gain very little EXP, AP and SP.
* Black Mesa, a picture of the G-man, before finally settling on an advertisement/psa for the BMRF.
* Black Mesa; basically, they made the hard mode Vorts from the original game the standard here.
* Black Mesa in the Source Engine, which Valve added to Steam through Greenlight. Valve allowed it on condition they remove "Source" from the name (so people wouldn't think it was an official Valve release), and on condition that they got first dibs on playing it.
* Black Mesa of improvements from the original 2012 mod version such as new weapons models, new voice lines, and multiplayer.
* Black Mesa, stepping into one of the offices in "Anomalous Materials" reveals that a security guard and a scientist bet lunch on whether Gordon would show up to work that morning.
* Black Mesa, very deliberately added a lot of female scientists to address the imbalance of women in Black Mesa. The company claims to be an "equal-opportunity employer", but all of its employees seen in the original are men, except for the holographic assistant in the tutorial.
* Black Metal acknowledge that they probably wouldn't have heard of them if not for the various violent crimes committed by the members of said bands.
* Black Metal artists can be this, actually, especially of the one-man, DSBM (Depressive-Suicidal Black Metal) variety.
* Black Metal as their main lyrical theme tend to find a way to invoke this trope in a different matter, either through misanthropy or dark myths.
* Black Metal as well. It's difficult to define exactly where their use of one trope ends and the other begins.
* Black Metal band Mayhem, often claimed to support murder, rape, necrophilia, and dictatorship, solely because they are evil. The scary part is, he was dead serious about this. On a side note, this is the same guy who, after his band mate committed suicide, took pictures of the messy aftermath and put it on the cover of his new album.
* Black Metal bands are sometimes accused of this, based on the assumption that black metal is an essentially European art form.
* Black Metal bands tend to be like this. They frequently refuse to give interviews and often refuse to have their pictures taken. Most use pseudonyms and a small few don't even use names at all. Some particularly well-known examples:
* Black Metal bands to do it (see latter-day Bathory for an example), they were the first bands where such and arrangement was a central part of their identities, and given their status as major inspirations for many bands, many of those band unsurprisingly also set themselves up like them.
* Black Metal is a good example (although it has received an alternate mastering by Maor Appelbaum that does not fall under this trope).
* Black Metal is notorious for this. Emperor's early albums are one of the worst. Even with the lyrics, you cannot make out more than four words in a whole song.
* Black Metal is probably a better categorisation of most of their content, though there are still a few intense passages on some of them).
* "Black Metal Ist Krieg" and "Possessed By Black Fucking Metal" by Nargaroth
* Black Metal, which is amusing since black metal is one of the few genres that have a notable number of actual Satanists.
* Black Mirror. Almost every episode has some facet of near future life which would make legal matters incredibly difficult.
* Black Mirror, an anthology series where the main theme of the episodes the nasty consequences caused by the use of technology, has most of the episodes set in future worlds of this sort.
* Black Mirror and being tormented every day by a psychopathic player with practically unlimited power, then there is no denying this is the kind of story they live in.
* Black Mirror: A very interesting version in the season 2 episode "Be Right Back": a young man dies in an accident, and his grieving girlfriend is convinced to try

out an internet service that uses his online data (social media, search history, contacts, etc) to create a digital copy of him for her to interact with. Eventually the service is able to provide her with a blank android body to download the copy into, which she almost instantly regrets doing because the copy can't replicate his emotional responses.
* Black Mirror: Bandersnatch that even requires a ZX Spectrum emulator.
* Black Mirror because they keep abusing technology. The biggest example is Robert Daly from "USS Callister", a creepy, self-entitled nerd who presides as an asshole god over a modded version of a video game he developed and subjects the sentient characters to torture to relieve his frustrations from work.
* Black Mirror": Billy Bauer, founder and CEO of the popular social media network Smithereen, is a liberal, hippy-type young man who is clueless in the face of the hostage crisis indirectly brought about by the app. When the managers finally reach him, he's in the middle of a retreat and contemplating quitting the company.
* Black Mirror can be seen to be an example in that it typical uses a media it criticises in order to be aware of its criticisms. And it mixes comedy and drama, darkness and lightness, while teasing realism.
* Black Mirror, everyone seems to be way more interested in the sensationalism of the ridiculous demands of the princess' kidnapper to actually think about her well-being. It's enforced with her release at the point of no return, making it clear that the kidnapper's actions were nothing more than a statement.
* Black Mirror film, and it's more well known for its gimmick than anything in its story.
* Black Mirror From the episode "Hated in the Nation" It's unclear if Scholes' plan killed everyone targeted, given that, if warned, some people may have been able to hide their faces or try and get somewhere the bees wouldn't pursue them. This is especially true of Nick, who, from working on the case, may have had the knowledge and context to do both.
* Black Mirror has a popular episode wherein people's worth is defined by a 5-point system.
* Black Mirror" has the main characters living in a world that they know to be walled off, referred to as The System. The climax involves them attempting to escape The System by climbing over the wall.
* Black Mirror homage, programmer Robert Daly digitally clones his co-workers for his own private mod of the game he works on. He modifies their code which removes their genitals, preventing them from sexual pleasure, and... answering the call.
* Black Mirror includes a seemingly out-of-place scene where a father gifts their blind infant a guinea pig. When the antagonist of the episode ends up killing the family, the police use a device to scan the memory of the guinea pig to determine the murderer.
* Black Mirror) in order to decide if they would like to be uploaded after their death or not.
* Black Mirror inside a bottle and floating it downstream. However it quickly regains her trail using its electronic sensors.
* Black Mirror: In the episode "Crocodile", Mia kills her ex-boyfriend when she is away on a business trip. She needs a false alibi, so she rents pay-per-view porn and plays it at full volume while she goes out to dispose of the body.
* Black Mirror: In "USS Callister", Daly is initially the focus and we are seemingly meant to empathize with his plight as another sad sack pining for a girl he lacks the nerve to approach and bullied by his peers. Once the digital version of Nanette awakens, it becomes obvious she is the real protagonist, and Daly is the monster she and the crew must overcome.
* Black Mirror, it explores modern anxiety with how technology is taking over our lives.
* Black Mirror: Playtest and two fakeouts involving him thinking he left the game, he's finally taken out and sent home, only to find his mother is showing symptoms of Alzheimer's, one of the many fears explored in the game. He breaks down in tears upon realizing this. You'd think it would end there, but it gets worse: He never started the game in the first place. The man died within 0.04 seconds of strapping

himself in due to leaving his cellphone turned on. The staff notes he spent his last moments convulsing and calling out to his mother.
* Black Mirror: Princess Susannah from the first episode is intended to be the Duchess of Cambridge, being a young royal and focus of public interest while not actual adoration.
* Black Mirror responds with "And your husband was waiting at the end of the staircase with a baseball bat?"
* Black Mirror: Robotic bees who are exact duplicates of real bees are used after the general decrease in population of natural bees, which becomes a problem when someone is able to hack their system.
* Black Mirror: San Junipero (lesbian and bisexual female main characters, queer female romance)
* Black Mirror Season 4 finale "Black Museum", a tourist decides to burn time at the eponymous Black Museum—a collection of dangerous technology associated with high-profile crimes, some of which have actually been featured in previous episodes.
* Black Mirror: Shut Up and Dance. At the end it's revealed he's actually a paedophile who was caught watching child pornography.
* Black Mirror: Shut Up and Dance: Kenny's implied date kicks off the plot of the episode.
* Black Mirror: Striking Vipers, but it's played with because they admit that they don't feel as much attraction in real life, although it's ambiguous how much they're telling the truth.
* Black Mirror's voice is heard as the gamer who harasses the crew when they manage to break out of Daly's universe.
* Black Mirror takes a dark commentary on how people and society abuse technology, showing the negative aspects that it will bring about.
* Black Mirror that are nothing like actual dogs aside from being quadrupedal. Justified, since the name is a reference to Boston Dynamics' BigDog project.
* Black Mirror. The future technology seen is generally sleek, white/gray, and lacks features like visible buttons.
* Black Mirror: The "It was just a simulation!" trope gets used a bit too much. By the time of the fourth season episode "Hang the DJ", the characters musing about how The System may be a simulation is likely to prompt eye rolls from long-time viewers. The romantic (as opposed to horrific) nature of the episode is almost unique to the series, but the other example is by far the most renowned in the series and has won several real-life awards. That episode also turns out to be taking place in a simulation.
* Black Mirror. The mother's intentions were good, but she crossed several lines invading her daughter's privacy, drugging her without her knowledge, etc...
* Black Mirror, the player has the option to call a fortune teller. If you decide to do so, she gives you some cryptic advice which turns out to be helpful in the next chapter.
* Black Mirror. The show, an anthology of cautionary tales about the negative impact technology can have on our lives, makes for quite harrowing viewing most of the time, but even it has some lighter episodes:
* Black Mirror was played by Rory Kinnear, 33 at the time. Not as improbable as some other examples, but the youngest British Prime Minister in the last century was 44 when he assumed office.
* Black Mirror when the 2016 election led the phrase to be used too many times.
* Black Mirror. When the Home Secretary finds out about this, she promptly tells her officials to "lose that page of the report", implying that no one can ever know the secret. The episode ends about a year in the future; since nobody is discussing the truth, it's implied that the gag order was successful.
* Black Mirror, which essentially skewers modern online dating, especially Tindr.
* black mold living inside the Chernobyl reactor chamber We're still not entirely sure how it works.
* Black Moon Chronicles: After the first defeat of the Black Moon armies, Emperor Haghendorf bestows the apparently vacated title of Baron of Moork unto a foppish

aristocrat who thinks his new subjects will just welcome him with open arms. Wismerhill makes a good show of this before capturing the clueless nobleman and seizing his own feudal estates.
* Black Moon Chronicles. Although she still occasionally feasts on human souls, her relationship with Wismerhill also brings out a softer side in her.
* Black Moon Chronicles and the forces of evil opposed to the Empire of Lynn, looks downright ancient.
* Black Moon Chronicles). And yet the crowd loved it, even when the balcony collapsed under his weight.
* Black Moon Chronicles: Apparently reality is made up of many different dimensions tied together by the four elements. After humanity leaves the Earth for a different world when it is about to be destroyed, it takes Lucifer one hell of an effort to find humanity again between all the different universes.
* Black Moon Chronicles are apparently killed off, it turns out that the whole thing was a diversionary tactic so that they could lay low for a while and rebuild their forces without the Emperor recognizing the urgency of nipping this threat in the bud.
* Black Moon Chronicles as a god and is directly allied with the armies of Hell.
* Black Moon Chronicles: As the Baron of Moork, Wismerhill is badgered by the guild leaders who demand more rights of him. He eventually gets so annoyed that he throws the head of the guild through the castle window to his death. Two scared engineers then respectfully ask their lord if they should restore the window, given that they've already had to repair it twice that very week. Wismerhill is so amused that he promises them he'll just use a sword next time.
* Black Moon Chronicles, but the Oracle tells him that every possible path would have led him here.
* Black Moon Chronicles: Castle and city sieges usually amount to thousands of soldiers storming the gates and killing anything in sight. Having sorcerers, dragons, giants and other huge war beasts helps a lot.
* Black Moon Chronicles, demons and indifferent mercenaries vying for power while an impeding doom looms on (or rather above) the horizon.
* Black Moon Chronicles: Dragons only get bigger as they get older. The oldest dragon in the world and the progenitor of his kind is so big that he barely fits through the spacegate.
* Black Moon Chronicles: During the final battle with Haazheel Thorn, he rips off Hellaynnea's arms when she tries to stop him from killing Wismerhill.
* Black Moon Chronicles. Each of them would create a child on Earth and let them battle for the fate of the world.
* Black Moon Chronicles: Goum is just 7-years-old, just like his twin sister, but was cursed to be fully grown so he could fight in the arena.
* Black Moon Chronicles guild as a young boy and brought up in their trade. He was quickly hated by the other boys both for being a non-human and his talent at stealing thanks to being an elf arousing their jealousy. As an adult Pilou eventually sells out the entire guild to get revenge on the master for arranging the death of a friendly thief who had been a father figure to him.
* Black Moon Chronicles: Haazheel and Greldinard stage the death of Wismerhill's father at the hands of the empire so that Wismerhill will join the forces of evil in the final battle for the fate of the world.
* Black Moon Chronicles has his eye gouged out by the dragonlord he was allied with when his insurrection against the emperor falls apart, and has to wear a black eyepatch from then on as he openly joins the forces of evil.
* Black Moon Chronicles. Having not experienced sensational pleasure for eons, she then has a threesome with Wismerhill and his succubus girlfriend.
* Black Moon Chronicles. He almost wins the battle singlehanded in this form, killing pretty much all of Wismerhill's allies before Wismerhill rips his heart out and destroys his former mentor for good.
* Black Moon Chronicles. He doesn't show until the end of the world approaches when he wakes up from his centuries-long slumber to lead his children through the spacegate.

* Black Moon Chronicles holding flowers... and rips a knife out of them, holding it to his throat.
* Black Moon Chronicles if they've fallen in battle, but you better damn hope he considers you useful enough to bother.
* Black Moon Chronicles is defeated, his vengeance consists of dropping the moon onto the planet over about a week.
* Black Moon Chronicles is often seen robbing people of their purses in the background.
* Black Moon Chronicles) just before he can finally meet him and blame it on the empire to incite Wismerhill's fury against the emperor.
* Black Moon Chronicles lover Hellaynnea the succubus to have sex in the clouds.
* Black Moon Chronicles, offers to serve Wismerhill after he spares her life and becomes his consort. This is right after she played a big role in killing Wismerhill's previous girlfriend Fey.
* Black Moon Chronicles: Played for laughs when the hell-lord Pazuzu transforms himself and his demonic minions into an elf prince and his entourage so they can infiltrate a castle. One of the (male) demons who has been transformed into a noblewoman is rather transparent with his boorish body language unbecoming a high lady of the court. His boss incinerates him as a lesson to the others to remember to act their parts.
* Black Moon Chronicles: Since the Empire of Lynn and its vassals and enemies are in a near constant state of warfare, there are numerous examples of massive battles and city sieges being waged between armies of knights, mages, dragon riders, orks, elves, giants, and war machines. Ledroit's artwork is impressive for its attention to detail.
* Black Moon Chronicles stepped in to bring him back and deliver a pointed speech on the arrogance of youth and rushing in without warning).
* Black Moon Chronicles: Stout, short and bearded? Check. Live inside mountains (and active volcanoes)? Check. Master engineers, miners and smiths? Check. Greedy? Check. Love alcohol? Check. Hate orcs? Check. Fight equipped with massive war machines, heavy armor, axes and hammers? Check, check and check.
* Black Moon Chronicles that Pilou grew up in kept the other criminals in line by putting poison in their food and providing an anti-toxin at the end of every day if they had fulfilled their quota. Pilou starts to take a small portion of the poison every day to build up an immunity so he can one day escape.
* Black Moon Chronicles: The army of the Black Moon contains entire units of military sorcerers casting spells at the enemy.
* Black Moon Chronicles: The demon Urmarcht takes over the body of warlord Ghorghor Bey as he's defending a stronghold that his forces have occupied from a counterattack by the Knights of Light. The demon leads him to abandon his defense at the gate tactics and instead meet the knights in open battle so that he and his forces will easily be wiped out.
* Black Moon Chronicles: The Lords of Negation are Haahzeel's most elite knights clad in black armor and controlled by him through their rings. Wismerhill eventually becomes their leader, and has to go through a lengthy ritual that leaves him as some sort of half-human half-ascended being.
* Black Moon Chronicles: The second series is framed as a story told by one of Wismerhill's daughters to her own daughter about how grandfather became the emperor of this strange new world.
* Black Moon Chronicles: The sprawling Empire of Lynn has very little control over its provinces outside the capital region, so is often unable to stop them from going to war with each other, while the Emperor spends most of his time on various campaigns against insubordinate governors to reassert the crown's authority.
* Black Moon Chronicles. They're also pretty much brutish savages who will happily join the Army of the Black Moon in their war against the empire.
* Black Moon Chronicles: They're giant winged humanoids serving God who, unlike the demons, only rarely intervene in the world, most notably when the Knights of Justice summon Gabriel to ask him to make the Knights of Light see the true way after being led astray by its corrupt leadership.

* Black Moon Chronicles, though his priests (or at least, the ones with magical powers) qualify too.
* Black Moon Chronicles to make it a new Hell (with every inhabitant's soul as a bonus).
* Black Moon Chronicles: Very common in this setting. When one faction sends a messenger to another faction, they usually end up dead.
* Black Moon Chronicles. When he goes missing with his army, Beelzebub takes over the vacant throne because no one dares to question him, as he immediately demonstrates by devouring a lesser demon who opposes.
* Black Moon Chronicles: When Lucifer and his son Haazheel Thorn finally meet, the latter looks like a frail old man while the former like somebody in his prime. Lucifer of course is an immortal deity, while Haazheel has been aging normally for decades. Part of Lucifer's plans for Haazheel involves ascending him to full godhood in exchange for delivering the Earth to him.
* Black Moon Chronicles: When Lucifer organizes an invasion of the second Earth after humanity has vacated the old one, he turns himself into a frog and turns back into his demonic self after Hellaynnnea kisses him.
* Black Moon Chronicles: When the end of the world comes knocking, the dragons get rid of all their dragon knight servants/partners/protectors by burning them all.
* Black Moon Chronicles: When Wismerhill first goes on a campaign against the empire, some cities who surrender before his army can sack them take groveling to a degree that disgusts their conquerors and pillagers, even offering their wives and daughters.
* Black Moon Chronicles which usually resides in volcanic landscapes. In fact, the only reason he survived the encounter was that his mother helped him from the spirit world to subdue the beast.
* Black Moon Chronicles, while his others all bore him daughters. Since she arranged all these marriages for him as well, it's all but guaranteed that she engineered this.
* Black Moon Chronicles: Wismerhill goes through two different and very elaborate ones, first when he becomes a high priest of the Black Moon by crawling through a cave system to undergo several trials, and second when he becomes the leader of the Lords of Negation, Haazheel Thorn's most elite soldiers. Both instances involve him dying and being resurrected as well.
* Black Moon Rising, when Quint and Nina jump from a skyscraper to another with the eponymous super car.
* Black Moorish woman prosecuting attorney (!!), who, according to legend, lived in a subterranean kingdom under some mountain in Germany. Probably Sachsenheim assumed that a servant of Venus was a pagan, and a pagan was a Muslim, and a Muslim was a Moor, and that "Brun-hild" meant "brown-maiden" (instead of "byrnie (=mail-coat)-warrior").
* Black Mother, pass us by, turn your face away from us, we are not here,
* Black Mould, the mould was unleashed by a woman who wanted revenge on the slumlord whose filthy properties killed her husband.
* Black Museum, but when they converge back into the story used as the framing device, the ending is much more optimistic.
* Black Narcissus an Englishman is working as an agent for a local noble. He's shown coming into view riding a tiny pony with his feet barely above the ground. It's probably the biggest horse you find in the Himalayas.
* Black Narcissus is dripping with the kind of innuendo the BBFC was not OK with in 1947:
* Black Narcissus to her pre-convent life in Ireland, it's no coincidence that her hair is down.
* Black News Channel, a general news channel aimed at an African American audience.
* Black Nikka didn't quite meet expectations of political correctness in the USA.
* Black Ninja as the eponymous character tells a villain how the hero has paralyzed him for life. The scene is especially odd because the villain is on the toilet, and the only sound aside from the hero talking is a bunch of farting noises.
* Black Ocean Society and had some encounters with Delta Green during WW2.

* "Black on Black" by Dalbello contains an indirect reference: "Turning water into wine, touch yourself and you go blind..."
* Black... only to decide that she's fine wearing her mask until she grows old.
* Black Ops 2 and Black Ops 3 both include the "Prestige Master" Level, which is the highest the player can progress to. In
* Black Ops 2 who's got a nickname or a callsign. Everyone else seems to go by their given last name, including all the fighters in Mason's own squad.
* Black Ops 3... and then, like it, everything but the name of the level, who you're with, the location, and the date are erased:
* Black Ops 4. Instead of perks, they grant the drinker a number of effects (spawning a powerup, changing your gun, allowing purchases for free and so on), and also are repeatedly noted to taste foul.
* Black Ops allow you to open doors, but other times you have to wait for your teammates to come by.
* Black Ops follows the same formula, though enemies' heads can no longer be exploded. However, even the lightest of light machines guns (like the 5.56mm Stoner 63 or the 5.45mm RPK) can now blow off limbs with the right aim.
* Black Ops, Hudson says the quote verbatim when told the only way to escape a pursing Spetznaz hit-squad that wants him, his partner, and their prisoner dead is to jump off the roof of the building they're all standing on.
* Black Ops II. Even the nameless Strike Force soldiers that you control are still fairly talkative.
* Black Ops II follows suit in a fashion, where one level starts off with you taking control of a deep-cover agent within Cordis Die, shooting at Yemeni soldiers and being assisted by the same mercenaries you've been shooting for most of the rest of the game, until the halfway point where you switch perspective back to the usual protagonist. The finale also has Menendez attempt this, stealing a SEAL's uniform to try and escape, though he's discovered almost immediately when one of the SEALs with you notices a friendly body (which turns out to be booby-trapped) stripped of his uniform.
* Black Ops III has Specialists in its online multiplayer, each with their own unique weapon. Examples include the Sparrow, a recurve bow that explodes anything it hits into a strew of chunks of meat, the War Machine, a grenade launcher with much the same effect, and the H.I.V.E, a pod that releases a swarm of electronic bots that infect any poor sap unfortunate enough to get too close, causing their limbs to pop into a spray of chunky gore one-by-one.
* Black Ops was far from great and the single-player a disjointed mess.
* Black Orchid", allowing for a dramatic reveal of his face in the second.
* Black Orchid, a super-powered detective, wears an all-purple superhero costume.
* Black Orchid, Batman provides some assistance to the titular crimefighter, so that she can talk to Poison Ivy at Arkham Asylum.
* Black Orchid is like a whole serial of this. The Doctor sings in the shower, companions play dress-up, everyone shoots the breeze and hangs out in the past mostly having a good time.
* Black Orchid's M.O. involved mugging and replacing a minor female character in each story, with her involvement only revealed at the very end.
* Black Orchid", the Doctor gets trapped in a secret passage. After searching for the catch to the door and failing to find it, he deliberately leans against a random wall — and it clicks open.
* Black Orchid time he tries to tell someone it is indeed there, but the second time it's not. True to the trope, it's been replaced with a mildly interesting thing (a doll). Later he tries to tell the police about his TARDIS, and leads them to it. Of course it's not there either.
* "Black Orchid" was locked up in Cranleigh Manor after an expedition to the Amazon left him disfigured and deranged by his experiences there. The family claimed he never returned.
* Black Orcs, similarly, has a special rule called "armed to da teef", and regular slayers have the "slayer axes" rule. In both cases this rule means they're lugging around enough pointy things to let them decide which weapon they want to use every

round of melee combat, and in the black orcs' case use a standard hand weapon and shield combo (for the defensive benefits) which would normally be illegal as long as the unit has a different weapon set.
* Black Order). Keep in mind, this is a character who impressed Thanos with her love of neverending slaughter, deciding that sitting down and holding onto her husband's weapon was more important than the fight she was STILL a part of at the time.
* Black Order Proxima Midnight. Turns out in the Black Order miniseries, that Corvus wasn't the only ass-ugly to be in love with Proxima. The team muscle, Black Dwarf was also in love though he's happy for the pair and now has his sights set on the beautiful Black Swan, who's the team's powerhouse.
* Black Order: While we know next to nothing about his race, including their aging process, Ebony Maw certainly looks the part.
* Black Orpheus placing the Orpheus and Eurydice myth in Brazil, the Reaper is stalking Eurydice while dressed as a skeleton for Carnaval.
* Black Orpheus: The voice of Eurydice tells Orfeo not to look back. He does anyway, and Eurydice's voice, coming from the mouth of an old woman, tells him she must now go away forever.
* Blackout/All Clear, and she keeps her word. It's implied she becomes an ancestor of Colin Templar, despite being born less than ten years before him.
* "Blackout": a woman tries to seduce her 13-year-old grandson, after sexually abusing her son since he was 13. Her daughter (the boy's mother) finds out. Her mother has been emotionally abusing her for years. After berating her daughter for being ugly, the victim threatens that she still has power over her grandson, and the daughter drowns her.
* Blackout: Colin Templer searches spacetime for his lost time-traveling love
* Blackout contain a prequel novel describing the setting from some of the game's minor character's point of view.
* Blackout Effect, a made-for-TV movie depicting the investigation into a deadly mid-air collision between a passenger jet and a cargo airliner, the scene inside the passenger jet's cabin, as it is in a nosedive and a crash is imminent, a 5-year-old girl — on her first flight alone — is shielded by an airline stewardess as the girl cries out, "I want my mommy!"
* Blackout Effect, a movie centering on a failing radar system at a Chicago airport and a mid-air collision between a cargo plane and a passenger carrier. During one scene in the movie, the recording of the final conversation between the passenger plane pilots and air traffic control is played for the news media; the trope is averted to play up the dramatic pathos, with the pilots — knowing they are going to crash within less than a minute and all efforts to prevent such from happening are no use — crying and saying their goodbyes.
* Blackout had a tiebreaker word that was played if both teams were tied after two rounds. The team that had correctly guessed more words during the first two rounds (or the winner of a backstage coin toss if there was a tie) chose to either play the word or pass to the opponents. The contestant giving clues had 10 seconds to describe the word for his/her partner, and the opposing contestant had three seconds of blackout time, with the same repetition penalty as in the one first two rounds. A correct guess won the game, while a miss gave the win to the opposing team.
* Blackout Rugby has a lot of features for its Premium members, such as a 2D field to watch the games in (instead of the standard text crawl). Also, Premium adds plenty of club customization options. You can even rename your players.
* Black Panther (2018); after poisoning the museum guide, he calls his men, disguised as paramedics, to finish the job and carry him away in a bodybag.
* Black Panther (2018) and her body just falls down without a drop of blood.
* Black Panther (2018), and lets him go free with the female hostages.
* Black Panther (2018), and much focus is placed on the differences between the two and how they ended up on such different paths.
* Black Panther (2018), and why should we care more about slaves sold to the English than slaves sold to the Dahomey?"

* Black Panther (2018) at fans' requests, as shown by his increasingly deflated looking expression in each of those photos. Jordan also (somewhat) jokingly told the crowd at the 2018 MTV Movie Awards to stop requesting cast members to say "Wakanda Forever".
* Black Panther (2018). A younger version of him in a 1992 flashback where he's still in his prime as the Black Panther is played by his son Atandwa Kani.
* Black Panther (2018) begins as an adversary of T'challa who challenges him for the throne. After losing their duel and being spared he later aids T'challa in stopping Killmonger. This leads to him becoming the first Jabari chieftain to sit on the ruling council in Wakanda's history.
* Black Panther (2018), but the nanites can absorb kinetic energy from attacks and then release it.
* Black Panther (2018) caused an increase in black cat adoptions. Happily, this means previously unwanted cats, who were shunned for being considered unlucky, can now go to loving homes.
* Black Panther (2018) concerns. Disney CEO Bob Iger had to intervene to get it into production, and the result made over a billion dollars, was so well-received by critics it actually got nominated for the Academy Award for Best Picture, and served to champion for minority representation (numbers were huge in mostly Black cities!). Iger's input was also crucial in getting out another Marvel movie...
* Black Panther (2018) didn’t deserve its three technical Oscars for score, costume design, and production design, its best picture nomination is seen as this by some. Especially once the planned best popular film category got canned.
* Black Panther (2018), Erik Killmonger dons his own vibranium armor with a snarling jaguar pattern baring its teeth on his mask.
* Black Panther (2018): Erik "Killmonger" Stevens plots to seize control of the Wakandan throne so he can then use the country's advanced technology to supply a worldwide uprising by people of African descent against their perceived oppressors.
* Black Panther (2018): Erik Killmonger used ritual scarification to mark every life he took. His chest, arms and back are covered in these scars taking him from serial killer to mass murderer.
* Black Panther (2018) even doubles down on this when Okoye confirms that the Border Tribe's military was more or less wiped out in this film ("And the border tribe?" "Those who are left"), so that really was all they had.
* Black Panther (2018) features the country of Wakanda using interfaces of vibranium particles that shift through sonar manipulation into various forms/shapes.
* Black Panther (2018) from their home of Wakanda in late April or early May 1992, during the LA riots.
* Black Panther (2018) has a variant. T'Challa goes to Zuri and asks him about N'Jobu's apparent disappearance years ago, but Zuri protests that he made a promise to T'Challa's late father, the previous king, not to say anything. T'Challa then bellows "I AM YOUR KING NOW!", one of the few times he pulls rank, and Zuri tells him the full story.
* Black Panther (2018) has replaced it with an artificial left arm containing a vibranium-powered blaster and sonic emitter.
* Black Panther (2018) has the Dora Milaje, a group of female warriors with the task of protecting the Wakandan royal family. Their leader, Okoye, is close friends with T'Challa.
* Black Panther (2018) is just a re-purposed mining tool; the Wakandans have weapons that make it look like a leaf blower.
* Black Panther (2018), Klaue and Killmonger spend a majority of the film teaming up with each other taking part in a vibranium artifact theft. It's only then that Klaue realizes what's he up against and that he had no idea he was helping the son of N'Jadaka with said theft all along. It's too late for him however as denying Killmonger the right to go to Wakanda ends up costing him his life.
* Black Panther (2018), M'Baku – leader of the reclusive Jabari tribe – threatens to feed Everett Ross to his children if the man speaks out of turn. He gives Ross just enough time to sweat before admitting, "I'm kidding, we are

vegetarians," and nearly falls off his own throne laughing.
* Black Panther (2018) - Okoye visibly has no patience for him whatsoever, while T'Challa playfully tells her to rein it in.
* Black Panther (2018) purposefully does this after T'Challa's resuscitation and reunion with his mother and sister, preparing to take back his throne from Killmonger.
* Black Panther (2018), Shuri does this to her brother, prompting a scolding from their mother.
* Black Panther (2018): T'Challa's rematch with Killmonger, while his allies fight Killmonger's forces and try to stop them from getting any Vibranium out of the country.
* Black Panther (2018): The entire plot revolves around a fall-out between two brothers which carried on through their descendants.
* Black Panther (2018): The Jabari are this in the beginning. When M'Baku and his fellow tribesmen first appear, nobody is happy to see them and Zuri treats him as an unwanted guest as the Jabari have been pariahs in Wakanda for over a thousand years, and the Jabari are also unfriendly towards the rest of Wakanda. Part of why M'Baku initially refuses initially to send his army to help T'Challa in his fight against Killmonger is that up until T'Challa accidentally came, no Wakandan king had been bothered enough to visit Jabari-land in centuries. In the end of the movie, attitudes appear to have changed as M'Baku and by extension, the Jabari, are given a seat on the Ruling Council.
* Black Panther (2018): The water fight scene invokes this — one girl in the theaters actually broke her retainer when Michael B Jordan's Killmonger takes off his shirt to show his tally marks.
* Black Panther (2018), the world's most advanced nation - that has taken great pains to keep its technology hidden - is revealed to the broader world after thousands of years.
* Black Panther (2018). Unfortunately, it comes out as "Good luck and many shoelaces."
* Black Panther (2018): When Everett Ross wakes up in Shuri's lab when recovering from being shot:
* Black Panther (2018) when explaining to T'Challa about the truth of what happened that night years ago between him, T'Chaka and N'Jobu: "We had to maintain the lie."
* Black Panther (2018) when she asks Bruce why he didn't find a simpler configuration for Vision's neural structure. Bruce, who is a gamma radiation physicist and not an engineer or neurologist, mentions that it didn't occur to him and Tony. Shuri sardonically says she's sure he tried his best.
* Black Panther (2018) with T'Challa, M'Baku, and Killmonger bleeding when bludgeoned, impaled, and slashed.
* Black Panther #52 and #53, it was implied that T'Challa had come up with the Black Panther identity after his father's murder, with inspiration taken from Wakanda's panther god. Later writers established that there had already been multiple Black Panthers throughout history, and that T'Challa's father, T'Chaka, held the identity before his death.
* Black Panther - a mocking name that means "orphan king", which is meant to be a reference to the fact that he was the first King of Wakanda to lose his country. But in Wakandan culture, there is a deep stigma against orphans, because centuries of isolation and prosperity have made orphans a rare occurrence, and thus the few Wakandans who are orphaned are assumed to have deserved their state. Thus, when Aneka keeps gleefully using the name around her host, Khadijah, she ends up offending her, as Khadijah was actually an orphan, and suffered derision throughout her childhood because of it. Khadijah's husband, Changamire, takes it as a teachable moment, asking Aneka to examine why she is perpetuating the stigma just to mock an antagonist.
* Black Panther and questions just how dangerous he can be, which Priest has said was a deliberate reference to the way that prior to the 90s, many fans didn't see the character's worth.
* Black Panther and Storm's marriage — despite being popular to a good deal

of fans — ended in divorce as in
* Black Panther, another Japan exclusive for the PSP, focused on a delinquent named Tatsuya Ukyo as he tries to survive after killing a Tojo associate in a botched robbery.
* Black Panther as their heavy cavalry, with their head of security, W'Kabi, riding one as his mount into battle.
* Black Panther, as well as the human traffickers Nakia has infiltrated at the beginning of the movie.
* Black Panther: A Thirsty Gambler (per the credits) in the Korean casino.
* Black Panther. At the end, Killmonger throws T'Challa off the cliffside where they were fighting, but T'Challa survives the fall and is nursed to health in the Mountain Tribe's domain. Later, he returns to challenge Killmonger, since he "never yielded the fight and is obviously not dead."
* Black Panther became the new Black Panther after T'Challa was badly wounded in a plot by Doctor Doom.
* Black Panther because of how King T'Chaka killed his father Prince N'Jobu and left him to fend for himself in a crime ridden ghetto.
* Black Panther before spinning them off into their own movies. Overall, this was better-received than the previous examples, with the characters themselves proving quite popular.
* Black Panther by eating the flesh and bathing in the blood of a rare white gorilla.
* Black Panther by striking the portions of his anatomy that are vulnerable.
* Black Panther constantly gives Nakia this look, he even stops dead to stare at her when they meet at start of the movie.
* Black Panther counts as a male example. (And another particularly appropriate one.)
* Black Panther created the Pantheon of Wakanda, known as Orishas (name given to spirits and deities in the Yoruba language, one of the languages spoken in Wakanda) composed of Egyptian gods as the aforementioned goddess Bast, Toth and Ptah and gods of other origins: Kokou (from Benin) and Mujaji (from South Africa), David Lapham recounted the story of Gorilla-Man (character created by Stan Lee in 1954) and the associated with the Jabari, it was revealed that before the tribe was known as Jabari, there was a cult of a gorilla deity called Ngi (originating in Cameroon). Another is a totemic spider entity that works across the multiverse that Spider-Man has interacted with from time to time.
* Black Panther, Doom even mused that T'Challa might one day make a valuable ally.
* Black Panther: Downplayed, but Okoye teases him for "freezing" in front of his ex Nakia, which mostly consists of him being unable to do much more than say "hi" and smile at her. He's able to articulate his feelings better later on.
* Black Panther, due apparently to several readers wanting clarification as to who Mephisto was (despite how Everett K. Ross's narration over the previous issues stated as much several times).
* Black Panther easy to move in, there's no reason to not just make it look like fabric.
* Black Panther, Erik "Killmonger" Stevens is a former US black-ops operative turned international criminal and the usurper of Wakanda's throne.
* Black Panther fans hate it when the hero is accused of being created as a mascot for the Black Panther Party. Not only did his comic book come out before the party was founded, but Marvel actually changed the hero's name to Black Leopard for a while to avoid any associations with the political organization.
* Black Panther, featuring Marvel's first big screen titular black superhero, was released in February, which is also Black History Month in the United States.
* Black Panther four-quadrant superhero film with the mega-resources of Marvel Studios behind it) and its thoughtful theme of the burdens and desires of monarchy and power.
* Black Panther Fred Hampton once said that "You can kill the revolutionary, but you can't kill the revolution."
* Black Panther gets his powers charged by a plant extract of Wakandan origin.

* Black Panther gives his voice to "Griot", Shuri's AI system which is only really heard through the battle.
* Black Panther has a highly trained group of female bodyguards called the Dora Milaje, who are technically speaking wives-in-waiting - but since he never ever sleeps with any of them, you can't really call them a harem. They call him 'husband', however. They're almost certainly inspired by the "Dahomey Amazons" - see the Real Life section below.
* Black Panther has T'Chaka clearly display favoritism for T'Challa, his heir and a biological son. He didn't seem to really care about Shuri and began to ignore Hunter (his adopted, white son) as soon as T'Challa was born.
* Black Panther has two instances of this in the prologue. It begins thousands of years ago, as four African tribes that make up Wakanda are united by the first Black Panther. Then it skips to 1992, showing T'Chaka's tragic visit to his brother, N'Jobu, that will lead to problems in Wakanda's future. Then it skips once more to the present.
* Black Panther have been sold out and critically praised by African countries such as Nigeria and Kenya.
* Black Panther have the Egyptian goddesses Bast and Sekhmet guide them to the afterlife but believe the Hindu god Hanuman granted the Javari tribe never-ending wood.
* Black Panther he atones for the sins of his father and ancestors by spreading the wonders of his country with the rest of the world.
* Black Panther, he's already the Black Panther when his father is killed in Zemo's attack on the UN and has been so for years prior.
* Black Panther in a nice theater makes it clear that some things (like giving kids of all backgrounds a hero they can see themselves in) override petty rivalries.
* Black Panther in a tree, and one of them is sent flying into a car, hard enough to bend metal. Follow a brutal take-down by a mysterious, black-clad figure with an animalistic look that just shrugs off their bullets and kills them one by one with claws.
* Black Panther in the suit and most other Wakandan technology, also appears purple.
* Black Panther: In Wakanda, the warriors of the Border Tribe have vibranium technology laced in their colorful cloth cloaks, allowing them to erect one-man energy shields before them in battle, and employ them in group for defensive maneuvers.
* Black Panther is 16 and already the head of the Wakandan Design Group, in addition to having several inventions under her belt — including T'Challa's "Sneakers" and the usage of vibranium as an energy source.
* Black Panther is another one of these. Indestructible suit with no weaknesses? Check. King of a technologically superior nation with access to whatever gadgets he needs? Check. Makes all martial arts characters look weak in comparison and all smart people look stupid in comparison? Triple check. Wins nearly all fights outside his rogues gallery with ease? Absolutely.
* Black Panther is primarily a king and does superheroics as a sideline, as did his ancestors.
* Black Panther is publicly known to be Wakandan royalty. It surprises nobody T'Challa takes up the mantle after his father's death. Although his identity was initially unknown at least the people around when he first went after Bucky, due to most people there not being familar with Wakanda's policies. T'Challa immediately unmasks after that fight though to make use of his diplomatic immunity and to get the UN's cooperation.
* Black Panther is sometimes this, depending on the writer. The epitome was Christopher Priest's run where he was running schemes against multiple opponents simultaneously. While he was more than capable of fighting in person, more often than not regardless of who beat who in the physical fight, T'Challa had already won in strategic terms.
* Black Panther" is the mantle that has been passed down through countless generations from warrior to warrior as the chief sovereign and protector of

Wakanda.
* Black Panther. It also lets him absorb and redistribute kinetic energy, making him even more dangerous.
* Black Panther. It shows what happens when the Bodyguard Crush is one-sided on the bodyguard's part.
* Black Panther. Killmonger eventually admits that he couldn't care any less about what happens to him so long as he can see T'Challa and the world share in his suffering.
* Black Panther like the comics it is based on, was very popular in Africa. Although some found the Wakandan accent cheesy, overall, the movie was well-received for humanizing Africans after decades of Western portrayal as a war-torn continent known for its starving children.
* Black Panther overpowers T'Challa during their duel for the throne of Wakanda, but simply tosses him over the waterfall instead of killing him directly. This allows T'Challa to return later in the film and defeat Killmonger.
* Black Panther, respectively) made it impossible for them to start a relationship.
* Black Panther run, was gay. He was unable to make this explicit thanks to the more conservative atmosphere of the '70s (though the subtext is definitely there in Taku's interactions with Venomm) but has since confirmed it in interviews.
* Black Panther's American name is changed to Erik Stevens, with Killmonger being a military nickname. His Wakandan birth name is still N'Jadaka though.
* "Black panthers" are leopards or jaguars with a dark coloration, not a distinct separate species unto themselves.
* Black Panther seems constitutionally incapable of telling a story in a linear fashion.
* Black Panther series, the reason why Kiryu is often accosted by random thugs throughout the series is that surviving a fight with him is a common initiation ceremony for local gangs.
* Black Panther's grandfather is named T'Chanda rather than Azzari (or Azzuri). In Fantastic Four Unlimited #1 (March 1993) by Roy Thomas (scripts) and Herb Trimpe (art), T'Challa's grandfather's name is Chanda.
* Black Panther she'll be with her brother T'challa so she'll be part of the family. Okoye is this to T'challa, Nakia, and Shuri, acting as personal bodyguard to the Golden Tribe.
* Black Panther sidekick Everett K. Ross to narrate: "...homina... homina..."
* Black Panther's Quest has a way obvious twist with Princess Zanda pretending to be Black Widow and framing Black Panther.
* Black Panther subplot feels so tacked-on, you need only change a few lines of dialogue to think they were a current couple dealing with the stress of a long-distance relationship.
* Black Panther sums up his understanding of the titular character's highly convoluted plot during the "Enemy of the State II" arc in a section aptly titled "And You Know I Know You Know".
* Black Panther. T’Challa is also very stoic and mature while Shuri is jokey and even outright crass.
* Black Panther: T'Chaka has to be the absolute king of this trope. While he was murdered by Ulysses Klaw the original comics, he's killed by a different person in almost every adaptation:
* Black Panther, T'Challa is a charming, friendly, and charismatic politician who gets along with most people he meets. This is in stark contrast with the comic book version, who is often smug, secretive, and standoffish towards non-Wakandans (especially Westerners).
* Black Panther, T'Challa is found in cold, wintry Jabari territory, with the ice he's kept under keeping him alive. He wakes up after consuming some Heart-Shaped Herb no worse for wear.
* Black Panther, T'Challa overrules him, fearing that they would somehow turn the cure into a weapon.
* Black Panther: The Hatut Zeraze (Dogs of War) were the secret police of Wakanda until they were disbanded and exiled by T'Challa when he rose to the throne.

Despite this, they still operate in Wakanda as unofficial mercenaries.
* Black Panther, the scenes in Oakland were shot in Atlanta, along with some scenes taking place in London and South Korea. Atlanta City Hall doubles for the United Nations building. The High Museum of Art doubles for the "Museum of Great Britain".
* Black Panther, the throne of Wakanda, and mantle of Black Panther, is passed from father to son, but during the coronation ceremony, anyone can challenge for the throne. The king is stripped of his enhanced abilities to make sure the best man wins, not just because of the Panther abilities.
* Black Panther. The Wakandan consulate sponsored a children's charity which was later revealed to be involved in embezzling and drug-running; one of the charity's wards ended up mysteriously dead. The resulting scandal was dubbed "Wakandagate."
* Black Panther, the Wasp and Spider-Man achieving this through a prolonged period of essentially starving themselves until the urge to eat goes away, although the success rate for this method was mixed.
* Black Panther this trope, however, as the Heart-Shaped Herb allows T'Challa to enter the spirit realm and convene with the souls of past Black Panthers.
* Black Panther uses it's African heroes and African-American villain to explore multiple perspectives on identity. Killmonger is ethnically half-Wakandan but he grew up in America, where due to the legacy of slavery black people have no ties to their ancestral homelands or people groups, leaving blackness as their only identity. As such, he regards all people of African descent around the world as part of a single unified nation, with skin colour trumping any religious, cultural, political or ethnolinguistic differences. The Wakandans on the other hand have held themselves apart from the rest of Africa and the wider world for centuries and see themselves as special and distinct from all other peoples, and do not feel any kinship with the African disapora or even black people in surrounding nations.
* Black Panther Vol. 3 #60, the Coal Tigers are mentioned as being a rank in the Panther Cult.
* Black Panther: Wakanda is highly technologically advanced and extremely civilised, but they have a number of cultural practices which seem downright medieval such as absolute monarchy and men of noble birth having the right to challenge the reigning king to a fight to the death for the throne.
* Black Panther. Wakanda is the most technologically advanced country on the planet, while resembling bronze age Central Africa.
* Black Panther, Wakandans salute by crossing their arms over their chest to form a W.
* Black Panther - wants to take the throne of Wakanda so he can then use its spy network and bleeding-edge technology to conquer the world.
* Black Panther was created by Stan Lee and Jack Kirby in 1966, almost at the same time of the creation of the Black Panthers party. But Lee and Kirby were first. Marvel even attempted for a short time to rename the character to "Black Leopard", to avoid the misunderstanding, but returned soon to the original: they created it first, why should they give it up?
* Black Panther, which was not helped by conspiracy theories about white audiences being violently attacked by black audiences in the theaters for daring to see "their movie." It ended up also making over a billion dollars.
* Black Panther, who at this point both have equal claims to the throne, she doesn't hesitate to choose the leader she feels is right for her country.
* Black Panther Yes, the spear form is older than the gun but the material it is made from makes it more capable than another one.
* Black Paradox: The titular Black Paradox is a group of people who agree to commit suicide together, but in doing so discover a gateway to a parallel universe that disgorges jewels that serve as a great power source. It turns out this alternate universe is actually the afterlife, and the jewels are human souls.
* Black Patch before throwing her out. What he forgets is that she knows every part of his plan, and she goes directly to Helen Danner — the widow of the man he had murdered — and spills the beans.
* Black Patch by pointing it at his henchman Holmon and pulling the trigger twice. When nothing happens, he starts laughing his head off. Holman laughs at first, out

of nerves, but then sobers up and yells at him that its not funny.
* Black Patch Carl is determined to avenge Hank by killing Marshal Clay Morgan. However, while he is extremely skilled with a gun, he has never shot a man before.
* Black Patch, Frenchy De Vere attempts to frame Morgan for murder by having Holman bust Danner out of jail and then shoot him in the back. However, Holman botches the job by killing Danner too close to the jail.
* Black Patch, Holman shoots the escaping Danner twice in the back as part of the plan to frame Marshal Clay Morgan for murder.
* Black Patch is one of the few westerns to make clear the distinction between town marshal and sheriff. Clay Morgan is the town marshal and his authority is limited to the city limits of his town. Ben Maxton is the county sheriff, with authority across the whole county. He visits Clay because he is visiting all the town marshals to warn them to be on the lookout for an outlaw who robbed the bank in the county seat. Maxton is also the one to arrest Clay when he is accused of murder.
* Black Patch, most of the town call Carl 'Flytrap' because one of his jobs is swatting flies in the hotel lobby.
* Black Patch owns the saloon, and is implied to be the closest thing to a crime boss the town has. He dresses in fine European fashions, enjoys gourmet food and champagne, and plays the spinet extremely well. He is complete contrast to his boorish and brutish enforcer Holman.
* Black Patch, the title character got the name because he had to wear such a patch after his enemies cut out his eye.
* Black Patch was written by Leo Gordon, who also plays the supporting role of Hank Danner.
* Black Pawn Movement, dealing with the most obnoxious fans on Youtube. Since the Twilight hype has died down, they have been switching to music, such as Lady Gaga, Insane Clown Posse, and Justin Bieber.
* Black Pearl toward the characters stem from the romance story that took over the trilogy.
* BlackPeopleLoveUs.Com, is in fact a parody of misconceptions that both white and black people have about each other. About half of the emails they publish understand this.
* black person in the show) best put it, "Unfortunately there are guys like these in every country."
* Black Pete and an Opera Singer. Another interpretation is that it was based on Japanese fashion trend "Ganguro" but Gamefreak admit they don't remember what they were thinking when they drew it, most likely it was this trope.
* Black Peter. While Neligan was caught red-handed in attempted burglary (of stock certificates stolen from his murdered father, and thus were arguably his property to begin with), he did not kill Black Peter, and Holmes was able to find the true killer.
* Black Pharaoh. He doesn't usually have the phenotype of a black person, it's just that his skin is so dark that it almost seems to repel light.
* Black Phoenix Alchemy Lab made a series of perfumes with collectible cards designed around the "Carnaval Diabolique".
* Black Phoenix Alchemy Lab. They have an entire line of fragrances called Monsterbait. One of these is Monsterbait: Ventriloquist Dummy.
* BLACKPINK: BLINKS, from combining "black" and "pink." Toxic fans are referred to as BLONKS.
* Blackpool, because of her husband Ripley's terrible money management skills, Natalie puts a flat owned by the family into a trust for their children, to ensure Ripley doesn't sell it and waste that money as well. Ripley is furious when he finds out, and confronts her. She immediately breaks down and starts panicking because she thinks he's found out that she is having an affair with Detective Carlisle. By the time she realizes what he's talking about, she's already revealed the affair.
* Black Powder War, Laurence has to order his own aviators flogged a couple times. Both times he hates to do it but is forced to; once because his man hits a superior naval officer and needs to be appropriately punished to keep the sailors from

turning against the aviators, and again when two of his men break a pretty important law while in Istanbul and this is the alternative to letting them be executed. Both times he is hugely uncomfortable with the proceedings. In the second incident he insists on keeping the count himself silently, so he can stop it early and pretend that they received more lashes than they actually did.
* Black Powder War. Queen Louise waves off concern over this mode of transportation (citing her experience being shuttled about on couriers maybe twice the size of a horse), then asks Laurence "Is that your dragon on the hill over there?"... before the "hill" lifts his head to look at her.
* Black Powder War that set Riley off in the last book). One look and some frantic bundling into a blanket later....
* Black Powder War they see both people and dragons praying towards Mecca.
* Black powder weapons, especially in the United States, are still used for hunting. These weapons can be
* Black Queen, Red King: Changeling venom paralyses its victims and forces them to hallucinate visions of the people they love, often erotic visions, all the while digesting them.
* Black Queen, Red King different false IDs, several of which are opposite genders.
* Black Rain cop who catches the renegade Yakuza Sato, but then has to recapture him once Sato escapes custody in Osaka. Along the way he makes a deal with the much more traditional local boss to take down Sato. The boss makes a point out of the Sato's dishonourable behavior.
* Black Rain in New York. The film includes an exchange in which a Japanese cop tells his US counterpart, played by Michael Douglas, that "We make the machines, we build the future, we won the peace." Douglas' character retorts "And if even one of you guys had an original idea, you'd be too up-tight to pull it out of your ass!"
* Black Rain: Sato beheads Charlie with his sword while riding his motorcycle.
* Black Rain Sugai, but there are other small hints of this, like Japanese detective Mas reprimanding his son for what he sees as his son speaking out of turn to Nick.
* Black Rain villain's men plot to rescue him from the American cop protagonists as soon as they land in Osaka by pretending to be detectives carrying an arrest warrant for the villain, counting on the foreigners to not know Japanese and thus not notice that what they're brandishing is a housing contract. It works.
* Black Rain while visiting a friend in Japan. While standing on a street corner, he saw big American cars pass by. His friend told him that they belonged to the Yakuza.
* Black Rain whose actions are blamed on him having become too Westernized.
* Black reporters be all "I ain't got no prompter". White reporters be all "I don't have a prompter".
* Black Republican: African-American members of the US Republican Party (or any conservative people from a mostly progressive-aligned demographic).
* Black Rifle Coffee Company made some very strange ads where a guy named Dr. Steve sells weird products with a lot of equally-weird uses, such as
* Black Ring. This led to the Joker, of all people, commenting about how Luthor, with his pettiness, squandered the ultimate power to do good.
* Black Robe. After they've been captured by a hostile tribe, Annuka seduces the young brave on guard and then clobbers him in the face with some firewood while he's having sex with her doggie-style.
* Black Robe has the title character's finger slowly sliced off with a sharpened shell. No discretion shot.
* Black Robe, sleeps separately from everyone else, and refuses to have sex with the women.
* Black Rock., and this discovery was actually a major plot point in the series.
* Black Rock, it's very harsh and realistic). They then use a pocketknife to make spears out of branches and prepare to fight back against their attackers.
* Blackrock Mountain was originally the home of the entire Black Iron dwarf nation, its walls honeycombed with their dwellings and monuments. When the Black Dragonflight and Old Horde invaded, the mountain became split between their two

cities: Blackrock Spire, the old city inhabited by the Old Horde; and Blackrock Depths, a new city carved out beneath the Spire to house the displaced dwarves.
* blackrom with anyone. Everyone hates them, but in the "stay away from you creepy loser" way and not the "I love to hate you" way.
* Black Rose and Barbie Boy, during their time in WWC and IWA Puerto Rico, rivaled one another both in the wrestling ring and on the dance floor.
* Black Rose considers hair pulling more disqualification worthy than chair shots, as long as she isn't the one pulling hair anyway. Like Martel she's also protective of her tag partners' and managerial clientele's hair, sometimes more than they are.
* Black Rose could still sometimes be seen in the crowd cheering for El Bronco #1.
* Black Rose has been the target of this a lot. She turned on La Amazona out of envy for the IWA belt but would be blindsided and supplanted by Lady Demonique. Amazona herself would set out to prove she could be even worse than Black Rose after Genesis won the belt. La Rosa Negra was the top threat to the PWS Bombshells thanks to Vinny Vice but then was upstaged by
* Black Rose in the audience and dared her to try her hand at wrestling. She refused on the grounds she niether liked wrestling nor knew how to, but when Suave saw her in the crowd the next week he took that as her acceptance, wouldn't take "no" for an answer, and told her to take down Stacy Colon.
* Black Rose into battle. A fully topless "X-rated" version of the illustration was also proposed for European markets, but it was never produced.
* Black Rose is the niece of three boxers, one of which is the world batamweight champion Julian Solís, who wanted her to become a boxer before her mom cut her boxing career short. Her mom and sister themselves did taekwodo, while her dad and daughter did track and field.
* Black Rose Plasma cannon, which looks like a flamethrower but fires a plasma stream that burns straight through fullerene alloys. Unfortunately it has a tendency to explode and has a reputation for killing more of its users than enemies.
* Black Roses as a tribute to Sophie Lancaster, a British teenager fatally attacked in the summer of 2007 for her goth appearance.
* Black Rose). She's also better known in the continental US than her WWC clients Los Fugitivos de la Calle (Niche and Lynx), El Bronco #1, Huracan Castillo Jr or IWA client Jumping Jeff Jeffery. Jeffery's partner Chicano is at least as well known as her in the English market however, if not by wrestling fans then by boxing fans, as he is part of the Cotto family.
* Black Rose shows Captain Rose entering battle wearing just a cape and a tight red corset.
* Black Rose shows two men doing this on the DMD whenever the ball hits the pop bumpers.
* Black Rose's professional wrestling debut when she was scouted by Rico Suave, who dared her to try it. "It" turned out to be an unsanctioned attack on WWC's then top woman Stacy Colon, but getting bashed by Stacy's brother Eddie while being showed with explicitives from the fans made her hungry for more.
* Black Rose their settlements and take over their land if they don't buy in.
* Black Rose, the torch targets will be flashing in some sequence. Hit the lit target for 500K and an open locker. This Skill Shot has adjustable difficulty settings, too.
* Black Sabbat) by pointing out they need every available vampire knight to fight their wars and they can't afford to waste their forces. Of course, Sabbat has ulterior plans for Requiem too, so had another reason for sparing him.
* Black Sabbath, 5'3" singer Ronnie James Dio stood on a ledge to appear the same height as his bandmates.
* Black Sabbath, and the songs "Sick and Tired" and "Devil and Daughter".
* Black Sabbath breaking into a series of distorted, crazed laughter. Ozzy is quite notorious for this, to the point where many a song of his features it. It's practically his trademark.
* Black Sabbath do a rather impressive one on their self-titled song off their self-titled album. After a 1-minute jam session, the song ends. No less than 3

seconds, you're treated to a sudden blast of sound. Shouldn't be surprising considering it's the first "official" Heavy Metal album.
* Black Sabbath had the tips of his fingers cut off by a metal cutting machine on his last day of work before becoming a professional musician. He ended up creating plastic fingertips covered with leather for grip and used lighter strings to be able to keep playing guitar. Also, a reason he started tuning down his guitar giving the added bonus of a deeper, darker sound. This is a rare positive version of Fingore.
* Black Sabbath. Holst's theme is still in the final mix if you listen very closely.
* Black Sabbath's first album, "Warning" and "Evil Woman", are covers of respectively The Aynsley Dunbar Retaliation and Crow, never mind that the latter song hit the top 20 on the charts.
* Black Sabbath song "Iron Man" is about a man who travels in time to the future, sees the world being destroyed by a man of steel, then while returning to his original time, turns to steel because of a magnetic field. He becomes immobilized and is ignored by the people when he tries to warn them. This causes him to become bitter and angry until he finally has his revenge on mankind. In other words, he becomes the very thing he was trying to save the world from.
* Black Sabbath, the first band to use detuned guitar in a metal context, although they are more of the trope codifiers, because they took disparate elements (dark lyrical themes, riff and guitar-driven music, heavy distortion, drug abuse, and tough attitude) and put them together to create what's known today as "heavy metal".
* Black Sabbath The version with Reznor's vocal was eventually released, after TVT acquired the rights to 1000 Homo DJs' recordings.
* Black Sabbath tragically lost two fingers during an accident with work machinery. In order to ease the guitar he loved to play, he downtuned strings and invented a new style of fingering. This all turned into the founding stones of heavy metal, an entire genre for which he is considered as one of the most important forefathers if not the most important.
* Black Sabbath was considered the "clown" of the group, constantly playing pranks on the other members and performing outrageous stunts and parties to get attention. Once he went solo he became famous for his debauched personal life and shocking onstage antics. His public persona is mostly an act, and in his personal life, he has often struggled with depression, anxiety, and alcoholism.
* Black Sabbath was in turn inspired when they rented out a castle and spent time recording in the dungeons, which freaked them out.
* Black Sabbath was said to go barefoot since he lived poor as a child.
* Black Sabbath was the only one in Sabbath that didn't have a moustache.
* Black Sabbath, when combined with the subject matter, doom-laden riff and Ozzy's screams, is brutally effective.
* Black Sabbath, who only had two fingers on his fret hand. This inspired Tony to continue in music. He made prosthetic tips for the two fingers he lost, then down-tuned his guitar a full step to make it easier to bend the strings. This gave Black Sabbath their signature sound.
* Blacksad - An anthropomorphic detective series, that follows the stories of John Blacksad.
* Blacksad and his even more vicious right-hand man, not the detective hero.
* Blacksad and his "friend" the chief of police Smirnov. Hell they even get shipped together even though Smirnov is already married.
* Blacksad) and is showed to be really friendly with kids but not anything that is inappropriate. Naturally words spread that he is a pedophile and related to the kidnapping of his maid's daughter. While he is an asshole nothing proves that he is a pedophile.
* Blacksad and the Black Panthers look down on him. One of the white supremacists tries to threaten him only for Blacksad to stand up and show himself two heads taller.
* Blacksad: Blacksad is attacked by a knife-wielding man on a foggy evening, and

dryly notes he had the Jack the Ripper impersonation down pat, down to the disappearing in the fog.
* Blacksad. Blacksad tries to ignore it at first, but eventually reaches over to give the driver a black eye.
* Blacksad but we love him because he's cute and he knows when to get serious.
* Blacksad, consists of rich, influential white animals (as in, with white fur), who wear early Nazi-style trenchcoats, have a flag which substitutes a stylized snowflake for the swastika, and wear armbands, but in their actual workings they're instead the KKK, complete with sheet robes and burning crosses.
* Black Saddle, Gib Scott is a Deputy US Marshal who comprises the only law enforcement in that region of New Mexico. This sometimes makes him allies with, and sometimes puts him at odds with, Clay Calhurn, the town's only lawyer.
* Black Saddle: In "Client: McQueen", Clay is hired by his old employer Senator McQueen to get back control of his ranch. McQueen's daughter Susan — now married — is an old crush of Clay's.
* Black Saddle: In "Client: Starkey", Clay discovers that no one in Latigo will talk when he starts asking questions about Ben Starkey. When he attempts to dig deeper, he finds two months worth of papers missing from the newspaper morgue. And then he and Scott find a body in an unmarked grave in Boot Hill...
* Black Saddle: In "Client: Tagger", Culhane is arrested for committing a murder he was trying to prevent. He has to break out of jail and locate the elusive Tagger to prove his innocence.
* Blacksad example, and willing to bend the law in the names of enforcing its spirit rather than the letter.
* Blacksad has good instinct and cat hearing which allows him to pull this off once in a while, even telling someone he is not the first person trying to lure him into a trap before elbowing the assailant behind him.
* Blacksad is a gritty, violent, sexual, political noir comic (populated entirely by anthropomorphic animals, no less) and going for an entirely Disneyfied look wouldn't fit.
* Blacksad is being ordered to let go off a murder case, tipping him that the murderer is wealthy and influential enough to be above the law. This leads him to back Blacksad into getting any semblance of justice by having the murderer killed, write it as a suicide and force the murderer's henchmen into exposing their boss so the public knows of his crimes.
* Blacksad: Ivo Statoc makes a big point to Blacksad about how much of a "cold-blooded" bastard he truly is. He's a toad.
* Blacksad nature and you have an archetypal tall, dark, and handsome character.
* Blacksad, Smirnov even covers for him by lying right in front of the two employees who saw Blacksad carry out the act.
* Blacksad, Smirnov is dragged to a gallery by his wife since she wants their children to appreciate fine art, he is surprised to see that Blacksad is here. Blacksad himself is only there for a job and is somewhat indifferent to the paintings. However, one woman who is part of a left-leaning intellectual group says that cultured and smart don't always go together.
* Blacksad: Statoc's lizard henchman was so disgusted with his murder of Natalia and Leon that he took the gun that Statoc used to blackmail his former boss. He thinks that Blacksad is trying to pull a similar scheme.
* Blacksad. The marriage was in fact all part of a decades-long revenge plot to hurt him for previously leaving their mother to her death.
* Blacksad, this is the nature of Blacksad's past relationship with the deceased Natalia Wilford, as he helped her get rid of a stalker. They started a relationship afterwards but it wore off after some time, and they broke up before her untimely death.
* Blacksad tries to offer Blacksad a job in his employ when he's finally tracked him down and already dispatched his bodyguards; Blacksad refuses.
* Blacksad: Under the Skin investigates (and narrates) over a supposed suicide and is exposed to crime, corruption, infidelities, conspiracies, and so on.
* Blacksad: Under the Skin, like its namesake, follows a cat detective during the

'50s, showcasing the dark sides of it consisting of racism, racial profiling, sexism, corruption, the Mafia, prostitution rings, drug trades, persecution to communism and so on.
* Blacksad white-fur supremacy group. The leader was undercover and is the chief of police. In the first album, one of Statoc's enforcers is a brown bear that beat Blacksad to a pulp with his Rhino partner.
* Black Sails before it aired merely because it came from his production company.
* Black Sails (bisexual female main characters, bisexual female supporting character, bisexual male main character, gay supporting character, queer female romance, queer male romance)
* Black Sails Captain Flint is portrayed as being single-mindedly obsessed with his goals and willing to sacrifice his crew to achieve them. Some of his crew members are already suspicious of him due to an earlier incident where he convinced them to pursue a certain ship that was supposedly carrying valuable cargo. Capturing the ship cost six pirates their lives and the loot was far less than they could have gotten going after an easier target. Flint's real target were two noble passengers who he wanted to kill for revenge. In the present, his pursuit of the Urca and its treasure has caused him to deceive his crew and put the ship at risk multiple times. The only reason the crew has not risen against him is that they are desperate men and figure that they need Flint to get to the treasure. Afterwards, all bets are off.
* Black Sails: Charles Vane killing the giant Albinus. Worth noting is the reason he's naked — he's just been buried alive and dragged himself out of the grave to take vengeance.
* Black Sails crew freed him and gave him the chance to kill the man responsible for his impressment. After doing this Billy resigned himself to never seeing his parents again as he believes they'd reject him for being a killer.
* Black Sails. Flint has embraced his new life and has plans to make New Providence Island into an independent nation. His lover has not fared so well and she is quite willing to support a plot that would help her regain even a small part of her past life.
* Black Sails gold and why he put it on Treasure Island. It also provides backstory for various characters from the book, including Long John Silver, Billy Bones, Israel Hands and Ben Gunn.
* Black Sails is a highly respected and experienced sailor who is starting to feel his age, a fact Jack Rackham is able to use against him in their dealings.
* Black Sails is introduced watching his katana being sharpened. He inspects the blade and passes it back for further sharpening. The other pirate's exasperated reaction implies that Joji's standards for sword sharpness are exceptional.
* Black Sails, resident badass pirate captain Charles Vane idly takes a bite out of an apple, even as he threatens to kill a man and steal his cargo.
* Black Sails start hammering on the deck of a slave ship whose crew has barricaded themselves into a lower compartment. The slaver crew assumes that the pirates are futilely trying to burrow into the compartment, but in reality they're masking the sounds of the ship's slaves striking off their irons in preparation for a revolt.
* Black Sails starts his naval career this way. From a working class fishing village, he works his way up through the ranks from childhood to Lieutenant by determination and skill rather than connections.
* Black Sails. That said, there were Japanese Catholic communities that did settle in Mexico in the 17th century, so it is plausible for Joji to be descended from them.
* Black Sails things are further complicated by the fact that a pirate captain is elected by the crew and is supposed to act in the best interests of the crew at all times. Thus when members of the crew plot to remove Captain Flint from command they feel their actions are perfectly legitimate since Flint is jeopardizing the lives of the crew to further his own personal goals.
* Black Sails, who is a posthumous character in the book, and also features John Silver and Billy Bones as young men. The plot of the show concerns how Flint acquired the treasure trove of Spanish gold that eventually got hidden on the

eponymous island.
* Black Samson who runs a local club has to deal with multiple attempts by a white mobster to muscle in on his territory — and soil it with drugs.
* Black Science briefly uses Krolnar, a giant wielding a massive hammer capable of squashing a person flat.
* Black Science dies in the first few pages of the first book, but subsequent flashbacks to the lab flesh her character out a bit.
* Black Science gives Pia one in the background of Issue 22. She crash-lands without adult protection and survives by securing a political engagement and negotiating a peace agreement between the warring tribes. Grant is shaken by how much she's grown when he catches up to her.
* Black Science has a circle and nesting crescents symbolizing the onionlike nature of the eververse. It shows up constantly across multiple realities.
* Black Science have developed their ideas within the scientific establishment, they choose private financing instead. This allows them to work without the resistance of the hidebound community. They plan to victoriously reveal functioning pillar tech as proof of their theories to stun the world.
* Black Science is dominated by the zirites, a gaseous lifeform that infects flesh-and-blood hosts. There is no evidence that the hosts' minds survive.
* Black Science: Peterson's dimensionaut team returns from a successful foray. During the debriefing one of their finds breaks free and begins slaughtering the team. Mr Block seals the door instead of allowing them to escape or fighting back against the beast. He then calmly orders a backup team out on a new mission.
* Black Science refers to sending the armored division to kidnap women for Block's "rumpus room".
* Black Science revolve around jump-to-jump survival and interpersonal strife within the team. In the background is Mr. Block, who financed the pillar's research specifically to steal technology and dominate multiple dimensions.
* Black Science tells lots of lame dad-jokes to bond with Pia and Nate. Their exasperated reactions in-universe elevate the reader experience to this level.
* Black Science trades his genius away in a desperate bargain and drops to average intelligence.
* Black Science uses dimension-hopping to find a version of herself with a happy family life, then murder her clone and step into that life.
* Black sclerae are actually fairly common in the eyes of apes in general (apart from humans). Most gorillas have black sclerae, but a few individuals have white ones or even a "piebald" combination. It has been theorized that human beings began to favor white sclerae as it helped with non-verbal communication. White sclerae were desired in a potential mate to the point that the genes for black sclera have pretty much disappeared from humans and are now seen as "unnatural" or even
* Black Scorpion Breathtaker is confined to suit of armour that breathes for him: having been shot through both lungs.
* Black Scorpion - He’s a sadist, she’ a masochist, they're both cyborgs so what others consider impalement and dismemberment they consider foreplay.
* Black Scorpion, the Black Scorpion saves Rick from being hanged by the Gangster Prankster by shooting the rope with her scorpion sting.
* Black Screen of Death: While two or more characters are fighting, the screen goes black.
* Black Scrolls. It chronicles the history of the god, the war in heaven, and the creation of devils.
* Black Scrolls of Ahm, which brings them into conflict with both forces of the Abyss and those who view demon lore as inherently corrupting.
* Black Sea has two distinctive layers. The deeper layer is very anoxic and nothing can live in it. Ancient ships that sunk near or under that layer — as well as signs of settlements from when the Sea was a freshwater lake — are found almost perfectly preserved.
* Black Sea the crew's sub sinks and nearly kills everybody is because he loses his head and kills another member.
* Black Shadow's cloning spell from F-Zero GX? The clone immediately banishes

Black Shadow to where Deathborn canonically sent him (this attempt was not her first time running THAT particular game's story mode for on her first time, her third-ever official XQ mission, she had the first try literally phase through her via a defensive ability and copied the binding spell the cloning one was hidden within on the second try).
* Black Sheep (1996), a huge boulder behind the cabin in which the two main characters are staying is loosened by, among other things, David Spade's character standing on it and a rodent digging under it. Finally, a bird flying overhead poops on it, and...
* Black Sheep (1996) delivers this gem. "Rectum? Damn near killed 'em!" The setup involves two bulls reminiscing about their days in the arena, and one correcting the other's grammar regarding an amusing horn placement.
* Black Sheep (1996)'s character being a major pain to his politician brother because he's fat, loud, and clumsy...in other words, a Chris Farley character.
* Black Sheep (2007), a horror movie about killer ... wait for it ... sheep. Though this one is a Horror/Comedy.
* Black Sheep (2007), but then the changes suddenly speed up toward the end.
* Black Sheep (2007): Features weresheep as major threats alongside carnivorous sheep.
* Black Sheep (2007) involves zombie sheep who turn humans into weresheep.
* Black Sheep (2007), in which Henry needs to perform half a dozen steps to get a complicated chainsaw's motor started, only to drop it over the side when the truck he's riding goes over a bump in the field.
* Black Sheep (2007): The Virus in this film is a mutagen originating from a mutant lamb fetus which spreads to other sheep via bites. Besides turning the sheep into ferocious flesh-eaters, the mutagen can cross to sheep-bitten humans, in which case it turns them into likewise-carnivorous were-sheep.
* Black Sheep (2007) you survive an attack, their bite will slowly mutate you into a weresheep. The lead manages to cross a flock of sheep thanks to his infection.
* Black Sheep: A character who sticks out from the rest of their family.
* Black Sheep: A member of the family who is an outcast due to being different from the rest of the bloodline.
* Black Sheep: A member of the family who is looked down on for not being like the rest of the bloodline.
* black sheep as of 2020 (who renamed the network Noovo, after the network's streaming service of the same name).
* Black Sheep combined the then-subsequent news of his father's death causes Henry to develop extreme ovinophobia.
* Black Sheep Hit: A hit song that doesn't sound like anything else the artist ever did.
* Black Sheep Hit, and thus feels out of place compared to their other work, which can cause limited recurrent airplay. This can also mean that fans of the band or singer actively avoid purchasing the song. Especially after the advent of iTunes this can have a big impact on a song's sales, even if it was popular in the year it came out.
* Black Sheep Hit ballad "Because I Love You (The Postman Song)". Two of his three other hits that outpeaked the former three songs were ballads as well.
* Black Sheep Hit "Show Me", which fell just short of the Top 40 at #44.
* Black Sheep Hit: You get new fans because of the one song that sounds nothing like the rest of your music.
* Black Sheep of the family who was disowned for marrying the muggle-born Ted Tonks, and is startled by how similar she physically looks to Bellatrix but with a ton more kindness in her eyes.
* Black Sheep Squadron, as the historical VMF-214 did not assign individual aircraft for their aviators.
* Black Sheep Squadron, both on the show and in real-life was an ace pilot in World War II, having shot down between two to six Japanese planes while he was with the Flying Tigers and 22 more with the Marine Corps.
* Black Sheep Squadron demanded a more sanitized moniker to publicize their

exploits. So they turned to their favorite drinking songs and became "Boyington's Black Sheep" instead, though ironically enough there weren't any especially "Black" Sheep in VMF 214 other than Boyington himself.
* Black Sheep Squadron, where the war in the Pacific is 1/3 fight club, 1/3 drunken frat house party and 1/3 beach vacation at some remote island. With an occasional shootout episode, of course.
* Black Sheep until he whoops in delight — cut to him driving his SUV at top speed through the mud and branches.
* Blackship of Corn by a card effect, do X", and many such similar cases. Due to the wording on Blackship's effect, it bypasses all of that since the card isn't technically being "destroyed".
* Black Shirt: A member of the team who secretly wishes for the enemy to win so they can side with them.
* Black Shirt knows better than you and we will do whatever it takes to help them seize power!
* Black Shirt: Someone who secretly wishes for the enemy to win so they can side with them.
* Black Sigil: Bel Lenora voluntarily sealed itself off from the rest of the world then forgot that the rest of the world existed.
* Black Sigil. Every time Kairu and Isa seem about to kiss, Juji comes in and breaks them up.
* Black Sigil his adopted sister and father. Despite presumably being the heir, Kairu gets subjected to a lot of bullying.
* Black Sigil is pathetically easy, easier than some enemies in the final dungeon.
* Black Sigil, not long after entering the House of Black Stone, your party of three will be broken down, with Kairu alone and Asi with Aurora. It only takes a few minutes before you're together again, though.
* Blacksite: Area 51. After his short scripted behavior runs out, he literally can't do anything except stand in one spot and shoot at you.
* BlackSite: Area 51, its ranks taken from convicts, the homeless, illegal aliens, and soldiers without families, in order to have enough soldiers to fight its wars without having to bring back conscription (and thus infuriate voters and destroy support for the war effort). The first level also took place in Iraq.
* Black Site: A secret government facility that may be used to (illegally) hold prisoners under extrajudicial detention. Physical torture and summary executions are often included.
* Black Site facility, military base, or prison that the authorities really don't want anyone not in the know to access or visit.
* Black Site in Janjira where the MUTO cocoon is located, all of whom bite the dust less than twenty minutes after being introduced when the MUTO hatches and destroys the site.
* Black Sky gives us Dorea Black-Potter, genetically the daughter of Sirius Black by magical IVF but blood-adopted by James Potter while she was still in her mother's womb.
* Black Sky has a Potter wedding ritual designed for this, which lets the caster find the perfect spouse for them. When Dorea uses it, she's sent to Xanxus who shares her determination, her passion and casually terrifies everyone he meets.
* Black Sky has no greatest ambition than cater to the whims of Voldemort and later Dorea, with whom he's bonded as a thrall.
* Black slimes and corrupt slimes can inflict Darkness on you, which lowers the brightness of your screen. Depending on how high your brightness was set to, it could either be a mild inconvenience to a major handicap.
* Blacksmith in Hyrule. When you show him the Master Sword after the Hyrulean Blacksmith has upgraded it, however, he suddenly gets the inspiration to upgrade it even further into the most powerful sword in the game.
* blacksmith, which would never let him get money enough for a wealthy merchant's daughter. When their family is ruined, he pays his suit and tells her father that they can all come and live at the house he can get. (It helps that the girls' father likes him anyway and might have consented to the match regardless.)

* Black Snake Moan. A man takes a woman prisoner because he believes it is his spiritual duty to heal her of her sinful ways and refuses to release her until he does so.
* Black Snow, your player character John Matsuda is an IT specialist being chugged out to the Amaluuk Research Station in Greenland with several other "IT specialists" to investigate why the station's gone dark a week ago. What's supposed to be a routine service leaves all of your coworkers separated, dead, or worse, and, as nightfall and below-zero temperatures take over the station, leaves you to find out what's happened.
* Blackspawn stalkers are one variety of Spawn of Tiamat, a web-weaving, acid-spitting combination of giant spider and black dragon.
* Black Speech and hair curlers - which caused them to shoot her in a panic.
* Black Speech radio in chapter two. Swedish speakers can see phrases "who am (I)", "sorry", "beware" and repeating "no no no".
* Black Speech) that the universal translator couldn't handle it, forcing Harry Kim to work on the problem for the better part of the episode.
* Black Speech, though as this scene is outside, the darkening is less noticeable.
* Black Spiral Dancers think that they can woo Gaia Garou into the Wyrm's embrace. They fail to understand that some Gaia Garou pretend to draw close to the Wyrm so as to undermine the Wyrm's forces.
* Black Spot: It is indicated that a person is marked for death by a mundane or cryptic thing.
* Blackstar about an astronaut who gets stranded in another universe after being sucked through a black hole.
* Black Star and Tsubaki take this a step further by sharing the same bedroom, and one may or may not count them as romantic interest to each other.
* Black Star. Apparently, every one in his family (the Star Clan) is only named by a colour and "Star". Even though it could be as though his first name is "Black" and his last name is "Star", this is unlikely seeing as nobody ever calls him "Black", or "Star".
* Black Star autographs a temporarily paralyzed Maka's face and doodles a Hitler 'stache on her.
* Blackstar. Blue rays of light emerging for underneath seem to keep it afloat, while tearing off the ground below as it moves.
* Blackstar: Carpo the Trobbit does this to the stems of Fire Fruit to make them explode, like grenades, before throwing them. In one episode, he does this before feeding them to some Fire People who were helping Blackstar.
* Blackstar has an episode not only featuring one variation of this trope, but titled after it: "The Air Whales of Anchar".
* Black Star has a "Speed Star" technique that temporarily emulates super speed. Friction with the ground is actually a problem for him; the first time he uses it on-screen, the fresh mud he was running through caused him to slip during a sharp turn.
* Blackstar: In the last episode, a rescue ship from Earth (piloted by Blackstar's beautiful girlfriend, no less) navigates the black hole, finds John Blackstar on Sagar, and offers to take him home. He very nearly takes her up on it, but he finally decides that he's too important to the natives' rebellion against the Overlord, and he chooses to stay. The last scene is her returning to Earth, and sending a message ahead that she wants to come back with proper military forces to help John defeat the Overlord.
* Black Star Rising include a scientist known as Manyface, who once nearly died from brain damage that was treated by replacing the lost sections with pieces from the brain of a dead boy. When asked if he could remember his name, he gave it, then gave the dead boy's name a second later. The two realized that their joined knowledge was a great aid to the scientist's research, and by the start of the story they've collected so many brains they've had to undergo experimental skull-enlargement surgery to fit them all in.
* "Blackstar", Supergirl takes one day to make her way to Earth from the center of the universe.

* Blackstone, a superhero/stage-magician, is a former US Marine (he mustered out and began his stage-magic career some time after a battlefield injury rendered him incapable of field operations). He appears to have worked in military intelligence, and is the security/intelligence specialist of the Sentinels.
* Black Stone Cherry only had one top 10 hit on the rock charts, which just hit #10. It has to have been "White Trash Millionaire", right? Wrong; it's the considerably lesser-known "In My Blood".
* Black Stone Cherry's "Shakin' My Cage" the chorus refers to a "bad moon rising"
* Blackstone (see Radio examples below) also had a comic series in the late 1940s.
* Blackstone The Magic Detective was a 15-minute radio series which aired from October 3, 1948 until March 26, 1950. The series, starring Ed Jerome as "the world's greatest living magician," was based on real-life magician Harry Blackstone Sr. Storylines usually opened with Blackstone (Jerome) telling his friends John (Ted Osborne) and Rhoda (Fran Carlon) about an experience from his past, and this mystery story was then dramatized in a flashback. At the end, Blackstone challenged the audience to find a solution to the magical mystery. Each show concluded with Blackstone outlining a trick that listeners could perform for the amusement of their friends. The scripts were written by Walter B. Gibson, the ghostwriter of Blackstone's books.
* Black Summer, first the police in the Seven Guns' home city were so corrupt the team had to fight them as much as the actual criminals. Second, when John Horus kills the president, far more time, effort and expense is spent hunting down his former associates than Horus himself.
* Black Summoner: After Kelvin cures Efil of her curse, she devotes herself to him.
* Black Sunday involves terrorists, the Super Bowl, the Goodyear blimp, and a large bomb.
* Black Sunday recruit deranged Vietnam vet Lander to develop an anti-personnel weapon, to be used against the President while he attends the Super Bowl. Lander builds a large Claymore mine, and field tests its killing power by convincing a farmer that it's a new television camera. The poor fellow stands still, smiling, when the device goes off, riddling the entire side of his barn with holes. It may be presumed the farmer was liquefied where he stood. The terrorists then plan to install these devices on the exterior of the Goodyear blimp, which will likely kill the President and thousands more in attendance.
* Black Sunday's style, cinematography and story hearkens back to older Gothic horror films of the 1930s.
* Black Sunday version when Dr. Kruvajan leans forward to kiss Asa because AIP heads James H. Nicholson and Samuel Z. Arkoff believed feared that the resulting kissing shot would be misinterpreted as an endorsement of necrophilia.
* Black Sunday, who is playing Israeli counter-terrorist David Kabakov.
* "Black Swan": An apparent innocent bystander at the scene of a drug raid flees from the cops, and the FBI discovers that he's involved in a domestic terrorist plot.
* Black Swan dance instructor for the film, although he doesn't have many lines. He is also her husband and father of her child.
* Black Swan during a surreal and disturbing depiction of the main character's transformation into the 'swan' of 'Swan Lake'.
* Black Swan has a split personality or not; the case could be made either way.
* Black Swan is banned for sexual themes considered too taboo for the country's sensibilities. It would have been released with cuts made, but Mohammad Naser, the UAE cinema censor, declared that there would be too much to cut and there's no point in showing a butchered film.
* Black Swan is batshit insane puts an interesting spin on much of the rest of the movie.
* Black Swan presents her with a fancy cake when she gets the Swan Queen role, trilling "It's our favorite!"
* Black Swan, she rolls over and realizes that her mother is in the room with her. Only a partial example, because her mother was asleep.
* Black Swan, since the pressure from her mother, director, and rivals don't let

up. She starts to become self-destructive both physically and mentally, and begins to hallucinate an evil doppelganger.
* Black Swan's paranoia causes her to view as more devious than she really is. And then there's their sex scene, which could be real or one of Nina's hallucinations fueled by her sexual repression issues.
* Black Swan (thanks to mirrors being used in virtually every shot) uses a lot of this, where the reflections sometimes don't perfectly match the real people, increasingly so as the film progresses and the protagonist's sanity collapses. One non-mirror example happens near the start when one of the images on a wall of pictures blinks, and towards the end, when the protagonist has suffered a complete mental breakdown, we see the entire wall of pictures moving and talking.
* Black Swan: The art director is a little hands-on with his instruction.
* Black Swan. The director's name is Thomas. One minor character—one of Lily's friends at the nightclub—is named Tom.
* Black Swan: The intense stress of life in a ballet corps drives one dancer to paranoia and madness.
* Black Swan, Tomas's nickname for Beth is "little princess". In the end, he calls Nina that.
* Black Swan to portray the polar opposites and the need to outdo her competition start to chip away at her sanity.
* Black Swan was temporarily banned due to the lesbian sex scene which censors saw as "offensive sexual behavior." Public protest and a petition against the ban got it overturned, and the film was eventually released with an R-rating.
* Black Swan. While Nina feels threatened by the new dancer Lily, Lily's not really threatened by her.
* Black Swan, whose fingers start becoming unnaturally long when she's experiencing her hallucination. This was done by extending Natalie Portman's fingers via CGI.
* Black Swordsmen arc if she didn't travel to Falconia she'd likely be killed by the numerous creatures that roam wild.
* Black takes the silliness to further extremes. Many of the waist-high fences can be destroyed (by you or the bad guys)... but passing over the space where they were is still impossible. And the enemies can jump over whatever the heck they want.
* Black Tapestries. The main star is a bitch. Also has a Designated Antagonist, who manages to be a villain by a compulsive "Shoot the Dog" reflex.
* Black Team. Pre-augmentation, two members of Black Team were into each other, going so far as to make out in the showers (they were clothed, but it was pretty intense and it's possible they might have gone farther). As luck would have it, another member of their team happened to be an exception as well, apparent from his ratting them out in jealousy. They seem to have become fully celibate after getting their augmentations, but some tensions still remain.
* Black teas are the tea equivalent, especially the strong, tannic Ceylon, Assam and Kenyan teas favored for "English Breakfast" blends, due to their strong taste and caffeine content compared to green and oolong teas. There's a reason why people add milk and sugar in countries where these teas are popular, such as India and the U.K. Too much of the average black tea can cause the same problems as coffee can. The only "advantage" using this sort of rather strong black tea over coffee is that pure black tea tastes less intense so more people will drink it. A cup of black tea still has nowhere near the caffeine that a cup of coffee does, only containing the same amount as a can of cola. The L-theanine in tea takes the edge off as well. Additionally, the strong, tannic blends marketed as "English Breakfast" and "Irish Breakfast" tea do indeed go perfectly with the actual Full English/Full Irish fry-up.
* Black Templars Space Marine Chapter was so notable, they got their own Codex which was something reserved for first founding Chapters.
* black. The Dark Mechanicus and their Hereteks are often the sources of most of the Daemon Engines. Meanwhile the Iron Warriors (who have close ties to the Dark Mechanicus) are the biggest employers of Daemon Engines and possessed wargear.
* Black theme: "Double leg takedown, two points, ride you! Nothing you can do because I'm a motherfucking Kaiju."

* black.) There's also the alternate universe Tesla of the Tigers, who comes from a world overrun with jungle and whose father Tom of the Tigers was raised by... you can probably guess. Interestingly, Princess Pantha is romantically linked to Tom's Terra Obscura counterpart, Tom Strange.
* Blackthorne himself is a subversion: His native language is English, but he's fluent enough in Dutch to serve on a Dutch ship and fluent enough in Portuguese to
* Black, though it also tends to backfire on her, as it gives her enemies a chance to sneak up on her. Since her power is a sonic scream, she can't use it while she's talking.
* Black Tide, Noxx comes to see Rafen and talk, before they part to bring back the escaped Space Marines to their chapters.
* Black Tide, Rafen and his companions must leave a body, having not a grenade to burn it. Rafen assured him, dying, that he would tell his brothers that he lived to see the death of his foe.
* Black Tide Rising has the survivors at a Catholic school depending on books from the school's library to guide them through their mechanical maintenance and gardening.
* Black Tide Rising is to collect the fluids from the head and spine of its victims. The task is done under secret conditions by Thomas Smith and some associates due to the illegality of the act.
* Black Tide Rising recalls how lucky he felt in high school that his pretty, popular girlfriend Cindy liked him, an overweight kid obsessed with electronics.
* Black Tide Rising series, Faith is 13 years old, a bit taller than the norm for that age, and takes on herds of zombies thanks in part to training from her former special forces soldier father.
* Black Tide Rising series has the Bank of the Americas employing and organizing various gangs and mercenaries to capture or kill zombies to harvest their bodily fluids for the (technically illegal) vaccine as things take a downward spiral.
* Black Tide Rising she's specifically ordered to not squee before being told of the tanks and other armed military vehicles at the Blount Island facility. She does it anyway, before catching herself.
* Black Tide Rising "zombies", but eventually give in to the inevitable as everyone's thoughts gravitate that way anyhow.
* Black-Tie Infiltration has Romeo and some friends gate-crash a party at the Capulet estate, which is where he meets Juliet.
* Black Tie White Noise. This explains why the song is substantially jazzier than the album's other numbers.
* Black Tiger's mask having silver stripes is clearly for artistic purposes. Real black tigers have black stripes, with the "stripes" being thicker areas of fur. But that's not so visible to those in the cheap seats, is it?
* Black Tooth, a Simba (werelion) king among the Bastet, was a brutal ruler who waged a genocidal campaign against the Ajaba (werehyenas).
* Black Tower, is prioritized, and the first rank of initiates are called Soldiers. They fill the Special Forces role.
* black trench coat by performing magic tricks that enabled him to pick up victories over his opponents.
* Black Trillium in the setting and that one of the artifacts' basic powers is protecting their wielder's life.
* Black Trillium is using advanced technology from a lost civilization and calling it magic.
* Black Tri-Stars to dispatch their enemies through teamwork. The both suits have purple and black color scheme, which is unique for the Zaku II and standard for the Dom. Way until Amuro showed up, they were proven to be a serious threat to the Earth Federation.
* black undercurrent to it given Earth's initial interactions with the Minbari:
* Black Uniforms was supporting a drug war against a foreign nation. As they conduct checks for contraband, the unit could give a clean report on the drug shipments and prevent any additional searches. When one shipment was discovered by ordinary soldiers the unit planned to incinerate them along with the evidence.

* Black Veil Brides band, though they do tend to mix it with more modern sounds.
* Black Veil Brides: BVB Army, divided into "Bridesmaids" for females and "Ushers" for males.
* Blackveil, who was a crazed despot eventually dethroned and killed by her people. Historians are unsure if she was an actual historical figure. The protagonist muses that the play was probably created to warn of the evils of women being allowed power, especially since it gained in popularity during the rule of Queen Isen.
* Black Vein Prophecy by Paul Mason and Steven Williams, where the player is an amnesiac hero seeking to uncover his true identity.
* Black Victory: Pokemon have four different types of names: The true name which is their real name and their most closely guarded secret and a great source of power, the social name which is what they socialize with, a rough equivalent would be our term of “username”, the species name which should be obvious to all of us and finally the folk name, which is a moniker or several that other people grant you.
* Black Victory theme their life has taken. It's short, cold, and to the point.
* Black Vikings. Quite literally even, when it is a production of Wagner.
* Black Vulcan's constant habit of appending every double entendre with "In my/his pants."
* Black Walder and Lothar Frey have beards and live up to their family's scummy reputation.
* Blackwall also mentions playing cards with Solas; the game ended with Blackwall having to go back to the barracks with just a "
* Blackwall works alone, away from other Grey Wardens, ostensibly because of his high moral standards, whereas most Wardens have a "
* Black Waltz Number 3, since there's a lenghty several minute cutscene between the last savepoint and this bossfight which you'd have to watch every time you lost this fight, if it were possible.
* Black Ward: Empty Chambers, protagonist Callahan finds himself wandering around an abandoned factory full of monsters.
* Black Warrior, the lone Mexican of the Japanese anti-Mexican La Ola Amarilla
* Blackwatch's. Once that caused the Hope incident, Blackwatch switched over to their current practice of shooting first, performing autopsies, and never asking questions.
* BlackWatch. The Web of Intrigue indicates they had done this to innumerable towns prior the game and the very game itself takes place within a quarantined Manhattan.
* Blackwatch, when asked what he would be doing if he wasn't in the unit, a Blackwatch soldier implies he'd either be dead or in prison.
* Blackwatch with even more sinister-looking masks. The Marines wear slightly less inhuman-looking balaclavas.
* Black Water. After the men in her group get killed and her sister gets terribly injured, Lee is the only person left to fight off the crocodile. She kills the croc, but she returns to find her older sister's lifeless body, thereby making Lee the sole survivor.
* "Blackwater" features Stannis Baratheon's spectacular attempt to seize King's Landing.
* Blackwell and Bell Mysteries featured a special sidequest that took place in the aforementioned Barbary Coast.
* Blackwell Convergence, complete with business cards and newspaper advertisement.
* Blackwell Epiphany, noting that because Joey can only lightly blow on things, fellating the living is his power. He thus declares as canon that "Joey sucks a mean dick".
* Black were all successful, with the first two reaching #1 and the title track reaching #2, but "What the Hell Did I Say" produced his lowest chart peak ever of #46.
* Black-White College has an informal initiation ritual propagated by the disciples. When someone new joins the College, they are invited to the Dao Debate Palace for a friendly competition based upon their comprehension of the Daos and using the magical techniques they've mastered. However, the true goal is to

thoroughly beat and publicly embarrass the new arrivals. The senior disciples say that the purpose is to temper the new disciples pride and show that that they are have entered a bigger world and are no longer the genius-of-geniuses that they were in their previous homes. Part of the real reason, however, is that the senior disciples were embarrassed in this way when they arrived, and now it's their turn to embarrass someone else.
* Black/White version introduces Yamask, a ghost type Pokémon that looks like a shadow-like thing with a golden mask attached to its tail and its evolution, Cofagrigus, a living sarcophagus with an evil face and shadowy hands. Both have the ability Mummy, which means that contact with that Pokémon will cause who ever touches it to gain the Mummy ability as well, leaving the opponent without its original ability and pretty much acting as a contagious "Mummy's Curse".
* Black Widow (#11) strongly implies that SHIELD has assigned her to assassinate a group of war criminals, or she chose to do so of her own accord, suggesting she remains an assassin, even though she is also a member of the Avengers.
* Black Widow (2021) before donning a white version during a mission to a snowy area. During the climax of the movie she and Melina swap suits, putting Melina in white and Natasha back in her signature black. Yelena Belova goes through a similar black to white switch but her suits are slightly looser than Natasha's and she wears a tactical vest over her white suit.
* Black Widow (2021) gave Taskmaster a realistic, utilitarian costume that included mask that actually resembles his skull face from the comics.
* Black Widow (2021) is the story of how two estranged sisters manage to reconnect to each other and their now separated parents by facing a shared problem together. Of course, since this is a superhero action movie, the older sister is a spy, the younger sister is an assassin, the father is a former super-soldier, the mother is a mad, er, morally dubious scientist, they only reason they consider each other a family at all is because they spent three years pretending to be one for a deep-cover assignment, and the shared problem is their former control officer and his not quite dead black-ops agency.
* Black Widow (2021): Made in 2021 and set in 2016, prologue set in 1995.
* Black Widow (2021), Natasha and Yelena are being chased by Taskmaster, so Yelena threatens a nearby driver with her gun to make him leave it so they can drive off.
* Black Widow (2021) reveals that the titular heroine was this, disarming a soldier and threatening the soldiers of the Red Room at gunpoint to protect her sister Yelena. She was only 11 years-old at the time and just as badass as she is now.
* Black Widow (2021) stud, while the Red Guardian in the film is a overweight, tattooed, bearded mess. Although this is mainly due to Alexei spending decades in a gulag, in the flash back opening of the film, he's clean cut and in shape.
* Black Widow (2021). The fact that Dreykov himself (most likely coincidentally) has a passing resemblance to the infamous sex offender Harvey Weinstein only heightens this effect.
* Black Widow (2021): When attacked in Norway, Natasha uses the impetus of Taskmaster's punch to carry her (and the antidote) off the bridge and into the river.
* Black Widow (2021) (with additional digital retouching of an arm gash). The responses show a whole gamut, from amusement at how it's unnoticeable, to thinking that the simple solution of building everything in a soundstage was bypassed to not bother with any unionized jobs.
* Black Widow #2, the Widow dives off a skyscraper in Shanghai to avoid an assassin. After attempting to slow her fall, it eventually ends with her landing atop a car.
* Black Widow #31 as she tosses a grenade into the engine of a plane, her other arm being occupied in clinging to the outside of the plane.
* Black Widow alive just so he can monologue to her. Although at one point Ultron lures Tony into thinking he's going to spiel about his grand plans before just ending the conversation and initiating the fight instead.
* Black Widow also performs one, as seen in the page image, but it's not a landing; she's actually getting up from a slide along the ground.

* Black Widow and Hawkeye learn that the only way to access the Soul Stone is to exchange "a soul for a soul
* Black Widow and the Champions, wore catsuits as a constant, often working alongside S.H.I.E.L.D.
* Black Widow). As a S.H.I.E.L.D. operative, she's also trained to use her sex appeal to seduce targets if the mission calls for it — though usually, she prefers using her fists.
* Black Widow being a trained espionage agent has this as one of her skills.
* Black Widow bleaches her blonde while living off the grid as a fugitive in
* , Black Widow bursts out in a "barking laugh that made everyone jump" when she hears that Vision accidentally walked in on Tony and Wanda having sex.
* Black Widow. Certain writers really play up the Russian-ness in combination with sensuality and take it to some really stereotypical and creepy places.
* Black Widow comics (albeit a less physical Dark Action Girl), but once the brainwashing from the KGB wore off she heel-turned to good and has mostly stayed that way since.
* Black Widow does this in her establishing moment in the movie, combining this trope with
* Black Widow does this in Issue #2 of the Kelly Thompson run before engaging some crooks that have accosted a woman in an alley.
* Black Widow: Enters into many relationships, but gets rid of them just as quickly.
* Black Widowers, and Rubin says, "Never heard of him." Rubin was based on Del Rey.
* Black Widowers": A rich collector's business partnership goes bad, and as the partner leaves, he snaps his suitcase shut in a suspicious manner and chuckles "acquisitively". The collector freaks out and his life goes downhill as he frantically searches through everything he owns to try to find out what valuable item his partner stole from him. Years later, his lawyer confronts the thief and asks him what he took. His answer? "Only his peace of mind, sir."
* Black Widowers as a series of limericks, but grinds to a halt over the difficulty of rhyming Diomedes.
* Black Widowers, gettit?) implied that the agent was trying to communicate the number twenty. The Widowers' guest is thunderstruck at this - in the code they used at the time, '20' meant "Government in firm control" and if they had known this, the Bay of Pigs invasion could have been called off.
* Black Widower": Sideshow Bob and Selma get a Falling-in-Love Montage while they are singing Frank and Nancy Sinatras' "Somethin' Stupid". They have a boat date, have their hair done together, walk in the sand, and they frolic in the meadow.
* Black Widowers: In "Friday the 13th", the guest is attempting to prove that an ancestor of his wife who was executed for attempting to assassinate Calvin Coolidge was actually innocent.
* Black Widowers: The club itself was based on the real-life club he attended, the Trap-Door Spiders, and the members were similarly inspired.
* Black Widowers", the guest mentions that his aunt would never use a simple term if a longer, fancier-sounding one was available; believing that this made her sound educated. Naturally, this habit plays a vital role in the ultimate solution to the mystery.
* Black Widowers", the guest tells the story of a religious fanatic targeting a beauty pageant called Miss Globe and planning to murder one of the contestants. The Miss Globe contest had entrants representing geographical regions as well as countries.
* Black Widowers", where the only information that the Black Widowers have is what Mr Wayne is able to convey about the mystery. This is quite enough for Henry to solve the problem. Other Black Widowers stories generally work in a similar manner, with Henry solving the mystery based on what the guest explains after dinner.
* Black Widowers would sell the short stories individually, and once he had twelve new files, he'd reprint them in a collection, and add commentary about the publication process. A few stories were published in the collection first, because Dr Asimov didn't have the patience to wait on other people's rate of publication.

* Black Widow, explains that he is now crashing the shuttle to stop her. After that the game stops changing and Widow just beats the tar out of the man, but you have to wonder what game they started with and what they were playing when they finished.
* Black Widow finds out her paralyzing gadget doesn't work on Crossbones, as his nerves are all messed up after having
* Black Widow has slowed ageing thanks to an experimental formula used on her.
* Black Widow in one issue. After he takes the gag off, she admits that she kind of enjoyed it.
* Black Widow is a slim lady who thanks to some enhancements can dent steel with her bare hands.
* Black Widow is often depicted as this in her solo adventures. As a trained espionage agent, Natasha's craftiness is her greatest weapon and she often has to outsmart her enemies as well as outfight them.
* Black Widow is the actual truth, as the Author finds out when Cruella uses the magic powers he gave her to kill her mother, who'd been protected by dogs until Cruella could control them.
* Black Widow. It turns out Cruella herself was the one murdering her stepfathers, and that she's been wicked ever since she was a child.
* Black Widow killers cash in on the insurance of murdered relatives (or friends with wills). Typically serial spouses who murder their new husbands/wives and then move on, though they have been known to murder other relations, including children. Almost always women.
* Black Widow managed to escape from the defeat of the Liberators at the end of vol. 2, but Hawkeye hunted her, found her, and killed her with a shot to the head. Still, she was
* Black Widow. Marvel wanted to keep her Cold War ties and her back story as a Soviet super spy without having to retroactively make her appear decades older.
* Black Widow pinball has her on the backglass along with Spidey's other rogues, such as the Vulture and the Green Goblin.
* Black Widows are prone to this trope. The females have a notably-large abdomen, while the less common males are actually smaller than the females. Spiders in general, in fact. Most fish, amphibians, and snakes also follow this rule, but in these cases the difference is far less extreme.
* Black Widow seduced Tony Stark to the point they became engaged, and then turned on the Ultimates.
* Black Widow, she says that she prefers when people underestimate her and fears that anyone knowing her full potential puts her at a disadvantage.
* Black Widow's mentor Ivan Petrovich had unrequited feelings for her for almost as long as he knew her, despite her only seeing him as a friend and father-figure. Eventually, this caused him to snap and concoct a plan in which he faked his death, unleashed nanobots that targeted everyone Natasha knew and cared for, including her former lovers, transferred his brain into a cyborg body, and intended to unleash nuclear devastation upon the world. Natasha was forced to kill him to put an end to his evil plot and as a result lost her oldest and dearest friend.
* Black Widow's portrayal fluctuates between Common and World Class Beauty.
* Black Widow. The Ultimate Marvel and MCU versions ditch all her early characterization and make Nat a badass from the start, though she’s still very skilled at seducing.
* Black Widow, though the same thing has happened to a few of her lovers. They probably just cancel each other out.
* Black Widow uses her grappling-hook apparatus on Vormir to catch Hawkeye as he tries to jump from the cliff and stop his fall, allowing her to sacrifice herself in his stead.
* Black Widow uses one to swing under a bridge in order to escape from the Winter Soldier and his goons.
* Black Widow vs. Widowmaker: Black Widow kills Widowmaker, but Widowmaker had already killed the S.H.I.E.L.D. agent she was working with.
* Black Widow were both professional killers for the Red Room (and in the latter's

case, later HYDRA).
* Black Widow: While abusing a spouse is bad enough, killing a succession of them is a major crossing.
* Black Widow who has murdered several of her own boyfriends or husbands.
* Black Widow won, because the plan included keeping him ignorant of this fact).
* Blackwing delivers too. The "good news" makes kind of sense in a "we're screwed already anyway" mindset.
* Blackwing Descent, one of the tier 11 raids, is home to Deathwing's son Nefarian, who is running experiments on different kinds of dragons. Except Nefarian was already killed several years prior to the
* Black Wings, Black Sails and all of its crew and passengers as prisoners for the Tswana, he gives them the option of either becoming prisoners to the Tswana or joining his pirate crew for a year. Should they join him, they will be treated like any other member of his crew, given fair wages, and will be granted safe passage to any port of their choosing at the end.
* Black Wings, Black Sails, and his cause has attracted yet more convicts, mutineers, runaway slaves, and military deserters all the way from Europe to Africa to the Americas. The leadership of the fleet is also democratic in nature, and they plan to elect a new commander of the fleet to Laurence's post next year, just as was done with Laurence after those initial prisoners repelled his mutinying crew.
* Black Wings, Black Sails series, it is mentioned briefly that William Laurence is broad-shouldered, otherwise reasonably built from his time as a fighting captain, and maybe around average height or so. In this story, Laurence is apparently taller, more imposing, and much stronger from his life of piracy than how he comes across in the original series, easily able to shove through a deck full of sailors and aviators fighting to hold him back. He even knocks out Dayes with a single punch.
* Black Wings, Black Sails, William Laurence was just as he was in Temeraire canon- an honorable naval captain with a strong moral compass in the service of king and country. But the loss of his dragon and nearly being brought to partake in penal slavery, and being mutinied against over it, are what turn him over to fighting the slave trade through piracy.
* Blackwing, Vaarsuvius's raven familiar, makes the extremely sound tactical decision of charging a psion face-first.
* Black Wolves Saga. It does have a fan translation using Visual Novel Reader, however.
* Blackwood also voices his plan to bring the United States "back into the fold" of the Empire. However, this is likely only done to piss off the American ambassador, one of his original supporters, in order to get him to turn against him.
* Blackwood Farm. At first Goblin is Quinn's best friend, but after Quinn becomes a vampire Goblin does as well, and constantly attacks him.
* Black wrestlers also faced this problem. Perhaps due to outbreaks of racially charged violence that tended to erupt in wrestling arenas in some parts of the country, promoters had to be very careful never to A) feature black athletes too prominently; or B) have them engage in behavior, even in
* Black Yoshi is afraid of the Nintendo Switch because he thinks it will beat Sony.
* Black Yoshi is the second contestant, and his first question is "How is a popsicle generally served?", with the four answers being
* Black Zetsu admits to having modified it and other histories to ensure Kaguya's resurrection.
* Black Zetsu backstabs Madara right in the middle of his Evil Gloating
* Black Zetsu had only tricked Madara into thinking so; the Zetsus are actually humans who were mutated by the Shinju a millennium ago.
* Black Zoo: After Joe shoots the tiger Baron, Conrad has Carl feed him to the lioness.
* Black Zoo, Conrad plays the pipe organ to his big cats while lecturing them in his living room.

* Black Zoo. He physically and verbally abuses his wife Edna (and murdered his first wife), and emotionally abuses his son Carl, who is mute as a result of his father's activities.
* Blacula grows some seriously wild sideburns every time he decides to drink someone's blood.
* Blacula. Interestingly, the original film had little of the Blaxploitation tropes, save the name.
* Blacula, lives long enough to see his deceased wife Tuva reincarnated in the contemporary world as Tina.
* bladder, hatching a few days later and evacuating through the urethra. The pain is so agonizing it kills the victim.
* Bladder of Steel can require upwards of 20 hours or more of continuous play. That said, most games often have places that are considered bathroom breaks, such as cutscenes for RPGs.
* Blade'a arm off and then sliced his body in half. The villain regenerates within seconds and utters the quote before moving at lightning speed and unleashing a world of hurt on Blade.
* Blade), a half-vampire hunting down full vampires and other supernatural creatures. His reasons are a serious combination of a few of the above mentioned ones.
* Blade all the strengths, and is constantly fighting his blood addiction. Though to be fair, the Thirst isn't a "weakness". It boosts his powers exponentially. Blade himself just refuses to feed on people for the most part because it makes him feel less human. A normal vampire doesn't have that moral compass.
* Blade also does this to Hannibal King, making him younger and more snarky.
* Blade & Soul Alka attacks a peeping tom during her bath in episode 1.
* Blade & Soul, and is drawn to the prospect of Alka's 7000 gold bounty Palam put out on her. There are others, but they're killed within moments of seeing Alka.
* Blade & Soul. She doesn't kill him since his partner comes out and convinces her otherwise but she does end up scaring the peeper so much he pisses himself in fear.
* Blade & Soul, summoners teach their pet CAT to perform CPR on dead characters. The cat hops on the dead character and performs Hollywood-style chest compression, despite no really having enough weight or strength to do it. It's not even constant with the cat pausing every few seconds. If not interrupted (takes 20 seconds), the dead character is always successfully revived, no matter how long they have waited, as long as the character has not released the corpse and respawned. It's adorable.
* BladeArc, Yuuto has an elf, a thief, a female ogre, a swordwoman, a princess, a crew of female warriors, and Death herself in love with him.
* Blade Batons are pretty cool because they conceal the blades and can act as one weapon or open it up and dual wield a pair of somewhat short swords!
* Blade Below the Shoulder in a retractable housing. German mechs are starting to carry vibro-axes, electrified maces, kinetic hammers, and plasma whips into battle however; along with shields that can mount missile launchers.
* Blade Below the Shoulder: It's attached to the wielder's arm instead of being held.
* Blade Below the Shoulder, the young warrior Egil loses his right hand in combat, but later he earns the gratitude of a dwarf who heals his wound and then forges a special sword for him which can be fixed on Egil's arm stump. With this device Egil can fight as before, and in fact becomes a feared swordsman.
* Blade: Blade's blade has blades ... that pop out from the handle if one doesn't disable the safety.
* blade body and nullify them safely. There are also some Zoans such as Pekoms, thanks to his power letting him protect himself with a turtle shell (though a sneak attack can still at least injure him as Capone Bege showed).
* Blade, both Abigail Whistler and Hannibal King occasionally dual wield revolvers, Abby's being regular guns and King's being heavily customized versions.
* Blade Bunny: After the titular character is badly injured, her first words are to

wonder why heaven is so poorly decorated. Needless to say, she's not dead.
* Blade Bunny for bonus point: Bunny proudly states to her latest employer that she isn't tripped up easily. Then a bystander points out that her bootlaces are untied (again). Bunny trips and faceplants.
* Blade Bunny guest strip discusses other animal/ninja hybrids. The praying mantis ninja girl is rejected due to a headless man holding a sign saying Worth It.
* Blade Bunny where a robot gives this as his explanation for not being religious.
* Blade complex for an obscure character and Marc didn't want to write about him. Still could have done better for being paid.
* Bladedance of Elementalers: Kamito was once know as Ren Ashbell, the Strongest Blade Dancer. Approximately 90% of the female world population appears to have been lesbian for him, and most of them still are. He does not find this amusing.
* Bladedance of Elementalers whose hobby is cooking, frequently threatens to turn people into bizarre dishes (all of them are actually just metaphors for "beat them savagely", along the lines of "make mincemeat out of"). The protagonist starts complimenting her on her eclectic tastes in food once he's used to her threats.
* Bladedancer has been given the mythical sword Destiny's Wave and is expected to be the "Handmaid of Balance." All that's known is that previous Handmaidens have killed good men and bad. (A king who was making a Utopia, someone creating an army of demons.) Chou has, at least once, been assigned to kill an innocent person.
* Bladedancer is a double subversion: She is fully female but dresses as close to boyish as she can get away with in what amounts to a
* Bladed Hedgehog is a hedgehog that happens to be insanely adorable despite having dozens of sword-like quills sticking out of its back.
* Blade doesn't hold. Later, Frost himself messes with Quinn as well by pretending that he's gonna chop off his arms again, then stops at the last second.
* Blade draws in the energy from the surrounding Ether and passes it along to their Driver to use. Blades can use Ether on their own, but not as well as a Driver.
* Blade film, Blade uses fire on one of his enemies. This doesn't kill Quinn (who is a vampire) but it probably makes him wish it had, at least for a while. Funnily enough, Blade probably only set him on fire as a new form of bullying Quinn.
* Blade films have the eponymous hero using advanced technology such as ultraviolet weapons (including bullets with a UV-emitting chemical inside, and a UV light), the vampires engaging in experimental genetics to overcome their weaknesses, and using low-tech such as sunscreen and UV-filtered motorcycle visors to protect themselves in daylight.
* Blade film. She's left out of the remaining series because there's no need for her anymore.
* Blade grabs the end of a train with one arm while holding the love interest in the other. The train pulls them to safety while dislocating his arm.
* Blade has a variant - we know the "corpse" (a burned but still alive vampire) is there, but it attacks all of a sudden.
* Blade has from time to time been presented as the Dreaded or the Boogeyman to vampires. Young vampires fear him, many of them won't even dare whisper his name or his other epithet: The Daywalker.
* Blade, human blood was piped through the sprinkler system, creating both a rain of blood and suppertime to a rave club full of vampires.
* Blade II, a member of the Blood Pack named Lighthammer wields a large maul with retractable spikes.
* Blade II, Blade attaches an explosive device to the back of one of the vampire's heads in order to prevent the vampire from attacking or betraying him.
* Blade II, Blade is a bit surprised when he hears the vampires' proposal to deal with the new Reaper strain:
* Blade II, Blade knew that Scud was a traitor the whole time, but kept him around for this reason.
* Blade II, Blade uses a vampire as this when breaking into the base where Whistler is being held.
* Blade II. Daylight is a cool blue, to contrast with the harsh, halogen yellow of night lighting.

* Blade II does not go off while attached to said head, it's a big enough bomb that when it does, the person holding it (including his head), explodes.
* Blade II: Done in spirit, even although not technically aliens. They find a reaper corpse and begin analyzing it to better understand its anatomy. After suffering in their first encounter by not knowing their weaknesses compared to regular vampires (silver and garlic are useless, UV light is their best bet and provides important information on how Blade eventually beats Nomak), this lets them be more precise and mow them down by the dozens.
* Blade II, except this cut was vertical, and it successfully killed the vampire.
* Blade II film double up on this trope, having one set of lamprey mouth teeth on their tongues and another set surrounding them.
* Blade II injures the poor thing over and over again before killing it in an agonizingly slow manner. By the time it's over, you feel sorry for the creature and it becomes clear that he is completely evil.
* Blade II, is also immune to all but sunlight. His heart is protected by a hard shell, except for under the armpits. Unlike his progeny, who are all ravenous monsters who die if they don't feed for 36 hours, he is smart and calculating.
* Blade II is the daughter of Overlord Eli Damaskinos, one of the rulers of the vampire nation. Despite this, she is a member of the Blood Pack, an elite team of vampire warriors trained to hunt Blade. She actually gives him a pretty good run during their first encounter. It is also made clear that her father does not put a lot of stock in family.
* Blade II. Lighthammer (6'3) and his lover Verlaine (5'6), two vampire members of the Bloodpack.
* Blade II outrun the "fireball" created by a big box of "light grenades." Quite aside from the question of how these light grenades caused an explosion in the first place (or indeed, how the "blast front" flows round a curve of a tunnel in spite of the fact that light beams travel in straight lines) one wonders how fast Wesley Snipes must have been running, considering that light travels at the speed of - well - light...
* Blade II review, after he makes a joke about calling Blade the Tax Dodger in reference to Wesley Snipes' legal troubles for tax evasion, he crumples up a "Tax Joke" paper and throws it at the camera, getting the joke out of the way.
* Blade II), the end of which unfolds in multiple flaps with several smaller, rope-like tongues inside it.
* Blade II: The Reapers feed on vampires. Though they were not above snacking on humans too. The only way to kill them was the sun, as they had a solid bone plate over their heart, and easily healed from a broken neck. They could probably survive decapitation as well; a victim in the middle of turning survived a partial decapitation. After the body was destroyed, the remaining piece was still looking around and blinking with its eye.
* Blade II. Ultimately some of them remain villains throughout the shaky alliance.
* Blade II, Vampire Lord Damaskinos wades into a small but literal pool of blood. Then, later on, Blade is rejuvenated when he takes a nosedive into one such pool.
* Blade II, with the bomb/leash that Blade put on the head of his vampire ally.
* blade in one leg. Both of which prove to be fairly useful against the Elric brothers.
* Blade is a half vampire who hunts vampires, his ally Hannibal King is a friendly vampire who steals blood from blood banks in lieu of killing humans.
* Blade isn't a charity and thus he needs to get the money from anywhere he can (there is also the underlying irony of using the money from the absurdly rich vampire courts to fund his hunting).
* Blade is regarded as an improvement from the first for the more harsh critics of the franchise and —by far— the best of the trilogy (especially in comparison to the third movie) for the fans and the more benevolent critics. It's also considered one of Del Toro's more memorable works (which is say a lot).
* Blade is so named because of his signature katana he uses in his war against the undead.
* Blade, it's of little surprise that the ancient vampire artifact runs off of

blood. Blade is strapped into a huge bloodletting device that causes his blood to fill up all the magical symbols below him, rather similar to the picture above.
* Blade, Karen Jenson is bitten early on by the vampire Quinn. She spends the rest of the film covering the bite marks with a bandage while working to cure herself before she turns; at one point Whistler examines them and remarks that she'll turn vampire within days.
* Blade Kitten cry out "Oscar Michael Golf" (Oh My God) or "Sierra Oscar Lima" (Shit Outta Luck) as you defeat them.
* Blade Kitten is about Kit Ballard, a young Catgirl with pink ears, pink tail, and, of course, a blade.
* Blade Kitten: The games take place on an artificial world made of interlocked hexagons.
* Blade Lock where Zorro and Armand each use their empty hand to grab the other's sword arm, and they glower at each other while ineffectively pushing against each other for three seconds before Armand manages to throw Zorro on his back. A headbutt to the face or a knee to the groin would have ended that quicker.
* Blade made from blood but the test audiences found him hard to relate to and they couldn't get the special effects right.
* Blademasters technique default to this state in combat: they suppress their emotions, the better to focus on the battle and instinctively meet any threat.
* Blade — making this more a case of I Hate You, Vampire Brother.
* Blade movie ends with a short scene of Blade hunting vampires in Moscow. Where, exactly? Well, on the Red Square, konechno!
* Blade movies, the Glamour Failure ends up being needed. If you are a certain vampire's pet, you get a tattoo so other vampires know not to eat you. This helps (and oddly hinders) Blade. And relatedly, despite getting all the good bits of vampire powers in his origin (durability mostly) he cannot detect if his adversary is a human with fake pointy teeth. This also comes back to bite him in the ass (pun intended).
* Blade movies, the vampires use full-body leather suits and motorcycle helmets when they want to go out in the sun.
* Blade movies use vampiric glyphs to mark their territory. The second movie shows that they've learned something from Blade cutting them up en masse, as the glyphs are much better hidden, even invisible to the naked eye. Specifically, they are painted in ultraviolet colors (which vampires can see, but not humans).
* Blade movie, the Nightstalkers use nametags with "Hi My Name Is Fuck You" when they bait some vampires into an ambush.
* Blade. Naturally they crap themselves when he suddenly awakens. Backup comes, but naked Blade tears them to pieces too.
* Blade of Admonition rules for the Blade of Admonition gives it superior Strength and Damage compared to regular power swords.
* Blade of the Immortal, as the main character, the titular immortal swordsman Manji, is bothered by the fact that his reliance on his regeneration induced immortality means that, consequently, his sword skills are slipping.
* Blade of the Immortal even comes out and asks him why he's never tried anything with her, and others have teased him about his lacking sex life. Most put it down to his dead little sister.
* Blade of the Immortal features an immortal bodyguard as one of the central characters, continuously searching for a means of becoming mortal again by making amends for his past crimes.
* Blade of the Immortal features a number of ronin, including Manji himself.
* Blade of the Immortal has Hyakurin's torture which included being beaten, stabbed, poked with red-hot spikes, having her fingernails ripped off and her arm broken and being raped almost continuously for up to several days. She later learns that she is pregnant and she doesn't even know which of her attackers was the father.
* Blade of the Immortal has three separate scars traveling the length of his face. One goes horizontal through his forehead, one horizontal through the bridge of his nose, and the last vertical through his right eye, which actually blinded him in

that eye.
* Blade of the Immortal: Hyakurin bleaches her hair blonde is because when it's dark, she keeps seeing her son's blood in it.
* Blade of the Immortal, Kagehisa Anotsu's true love is the swordswoman Makie Otonotachibana. Her grandmother was the younger sister of Anotsu's grandfather, which makes them second cousins.
* Blade of the Immortal) leaves him unable to fight on. While Giichi's friend Hyakurin is ready to challenge Makie to try and protect him, Giichi is fully aware that Hyakurin doesn't even have a ghost of a chance, so he bows down in front of Makie, admits that she is the strongest warrior, and begs her to just take the win and leave them in peace (especially as Hyakurin is pregnant). While Makie is initially disgusted by his selfishness at begging for his life after slaying so many Itto-ryo warriors, she confesses that she doesn't have a moral high ground either and walks away.
* Blade of the Immortal, Magatsu's main schtick is taking advantage of his surroundings to overcome his (usually more dangerous) opponents. An early quote of his is "He who controls the land can conquer Heaven."
* Blade of the Immortal; most however are just "thugs that just happen to be born into nobility" (like most were during the 18th-century).
* Blade of the Immortal seems to like this. Giichi got one of his ears cut off by Sousuke, and Kagehisa gets his ear sliced by Habaki.
* Blade of the Immortal - Sentai Filmworks rereleased the 2019 adaptation with a dub on home video in 2021.
* Blade of the Immortal, the anti-Swastika sentiment is actually a subversion in many cases. A lot of people who do recognize when a Swastika is used regardless of the Nazi connotations of it will still want to limit its public perception, at least in their own communities, as Holocaust survivors may be traumatized by just seeing the image too much whether it was intended in its use or not. Even striped pajamas have caused issues occasionally, without anyone thinking they were anti-Semitic.
* Blade of the Immortal, the only guys present who do not rape Rin's mother are the ones we're supposed to sympathize with later on, and Anotsu explicitly forbids the rape of Rin herself because "assaulting children shows no class."
* Blade of the Immortal, the protagonist Manji is cursed with an infestation of "sacred bloodworms" which close and heal any wounds he suffers— even severed limbs. However, Manji still feels the pain of his injuries, and the series is about his quest to redeem himself for his previous crimes to end the curse.
* Blade of the Immortal when Shira feeds Rin a dog she befriended (without her knowing) and tells her the equivalent of: "You ate the dog, you must be evil".
* Blade of the Immortal where this trope is at the base of the story. All the main characters are out to prove that katanas are not the best and use weapons designed to counter them.
* Blade of the Immortal who focuses only on his own pleasure. Shira is especially fond of raping women while he's cutting them and does this to several luckless ones who cross his path over the series. Not exactly choosy in regards to "partners", Shira also sexually abuses a young boy named Renzo, keeping Renzo enslaved to him by promising to hunt down the killer of Renzo's father.
* Blade of the Immortal, wields a double-bladed three-section-staff called Haru-no-Okina concealed in a hollowed-out shamisen, a mandolin-like Japanese instrument which she is able to play when not slicing and dicing her enemies.
* Blade of the Young Samurai, you are the titular samurai and you're on a quest to recover 3 magical items in Nippon, including your father's katana which is a "sunblade" that lets you trash practically any enemy you encounter.
* Blade of Toshubi, Lamika, aka Lady Snow Blood, kind of falls into this trope.
* Blade of Toshubi. One character joins the army because the "benefits" get his daughter medicine.
* Blade of Toshubi waiting for the nano-virus to reach safe levels to return.
* Blade of Tyshalle, who gets her throat cut when she tries to knife him. He only fails because the test expected him to use magick, and the instructor hacked the

simulation to bring the other players back to life and beat him senseless, something that was never before needed for the Lakefront sim. Regardless, as the instructor points out, the real point of the test is to show whether the Actor-to-be can give the viewers an interesting death scene.
* Blade of what the word means in the Marvel Universe to make him closer to the movie character.
* Blade on a Stick: Human beings have been using pointy sticks of one design or another for tens of thousands of years. Paintings and literature from Egypt and Mesopotamia all clearly portray spears, and some show the use of long sickles or scythes as weapons of war.
* Blade referred to vampires in one of his catch-phrases as "suckheads".
* Blade Runner (1997) follows the movie with its distinctive noir feeling mixed with s-f settings.
* Blade Runner 2049 after reuniting Deckard with his estranged daughter.
* Blade Runner 2049, and he's actually a Replicant after all. He is crushed by this revelation.
* Blade Runner 2049 as a deliberate attempt to maintain the aesthetic of the first film.
* Blade Runner 2049 as he's running to it. To stop Deckard from being killed in the explosion, Officer K smashes straight through the wall and tackles him. Then a Wallace spinner flies through the broken window into the building and offloads their mooks.
* Blade Runner 2049. As the WB logo glitches, the shot of the WB studios in the logo turns to a nighttime shot with studio neon lights on.
* Blade Runner 2049, by simply exploiting the fact that they are in a sinking car, grabbing her by the throat and shoving her head underwater until she drowns.
* Blade Runner 2049 depending on your perspective. We have a distorted point of view from K that Luv is psychotic and loyal to Wallace, but from Luv's possible perspective, K is a Blade Runner who murders her own kind and has been assigned to kill the child of Rachel and Deckard. She is also clearly disturbed by Wallace's actions and like K has the ability to lie unlike most of the other Replicants. It is possible that she is trying to save the baby from both Wallace and K, and sees herself as the Messiah for the Replicants.
* Blade Runner 2049 features an updated version of the previous test, where Replicants are continuously berated with even more emotionally manipulative questions by an unseen interrogator in another room. In an odd inversion of the first movie's VK test, where it was used to determine whether humans were acting too robotic (and thus Replicants in disguise), the Baseline Test is used to determine whether Replicants are becoming too humanly empathetic or emotional.
* Blade Runner 2049 for anyone who really knows their "Blade Runner" trivia.
* Blade Runner 2049 has gone extinct on Earth. Or at least, anything bigger than a few insects. The protagonist runs into a single stray dog in the desolate wilderness, but its owner isn't even sure it it's artificial or not.
* Blade Runner 2049 has one as his only companion in the irradiated ruins of Las Vegas.
* Blade Runner 2049 indicates that things have gotten even worse over the decades: the entire biosphere has all but died off, the only animals left on the planet are artificial, and everywhere outside the smog-filled cities is a desolate wasteland.
* Blade Runner 2049 in front of him, after she got the drop on the heroes.
* Blade Runner 2049 is an explicit example, a Nexus-9 generation Replicant who hunts down rogue members of previous generations. Replicants in general were legalized again for use on Earth in 2036 after their manufacturer could prove the dependence and more reliable servitude of the post-Tyrell Corp models.
* Blade Runner 2049 is extremely lonely and only has his girlfriend to comfort him. The problem is, she's a hologram he bought to overcome his loneliness, so whenever he tries to kiss her, he's just reminded that she isn't real. Later in the movie, he tries to overcome this by hiring a prostitute to kiss him at the same time the hologram does, so he can at least pretend to be touching his holographic love.
* Blade Runner 2049 is not only a building that dwarfs the nearby former HQ of the

Tyrell Corporation that he bought out but is filled with mostly empty rooms with only a few staff members ever seen. In a place as crowded as future Los Angeles he shows his wealth and power by being able to afford to waste so much space.
* Blade Runner 2049: Luv debatably may be trying to save the child of Deckard from both Wallace and K. She is visibly horrified when Wallace murders a Replicant in cold blood and also possesses the ability to lie, which most other Replicants don't possess. Also from Luv's point of view, K is merely a killer of his own kind and was given the assignment to kill the child. She is however killed by K before we can truly know her motives.
* Blade Runner 2049 made by Wallace Corporation for lonely people who want to experience a relationship (including sharing feelings and intimate thoughts). Joi can synchronize with the body of a real woman for "physical" sex, and does so with a prostitute at one point to have sex with the protagonist.
* Blade Runner 2049 removes all ambiguity from the original question: the Replicants are absolutely conscious and human in every way that matters. However, a new class of artificial being is introduced, the wholly inorganic and electronic Jois, and by the end, it is heart-breakingly unclear whether they are conscious or not.
* Blade Runner 2049 spacesuit) he uses to work in his protein farm, before removing it.
* Blade Runner 2049 specialty-made faux shearling jacket was piqued - enough to make replicas spring up overnight.
* Blade Runner 2049, the protagonist acquires a carved wooden horse and is told he's rich because it's genuine wood.
* Blade Runner 2049 things are even worse. Total environmental collapse has occurred, virtually no life but humanity remains and what food there is consists of slimy GM worms that are implied to taste about as good as they look. Meanwhile environmental damage has triggered an ice age that causes snow to occur in LA in late June/early July and LA itself is even more of a hellhole than the first film with civilization on the brink. Needless to say the only remaining option is to try to get off that rock and for most that simply isn't an option...
* Blade Runner 2049, Tyrell has since gone bankrupt and was bought out by the Wallace Corporation, which now controls the world's food supply.
* Blade Runner 2049, which shows off the expanded frame size. The text has a digital look throughout and the camera travels down the city.
* Blade Runner about the nature of life and sentience. There's also Deckard and K's conversation in the bar, the proper meeting of Blade Runners from two separate eras with too many secrets for each other.
* Blade Runner actually said "The future is not new. It's old". And because of that it looks amazing.
* Blade Runner: All animal species are either extinct or so rare that to own a real one, instead of a replicant version, is lavish expense. Even the daughter of a fantastically wealthy business magnate says that "of course" her pet owl isn't real.
* Blade Runner All in all, Deckard doesn't look like an ace when he does his job.
* Blade Runner: An early script opens on an "Off-World Termination Dump" where expired androids are buried. Three replicants that had been faking their deaths kill their dumpers and escape to Earth.
* Blade Runner anyone? The Nexus-6 models can come across as emotionally immature due to their short ages (limited to 4 years), but later models had fake memories installed to remove even that restraint. The only reliable way to detect them is the Voight-Kampff test which monitors answers and subtle physical response to emotional questions.
* Blade Runner appears to be infested with zeppelins, most of which wind their way through the labyrinthine skyscrapers advertising immigration to the Off-World Colonies, and various Chinese/Japanese products.
* Blade Runner. Blade Runners use an empathy test to separate humans from robots. The replicants we see are quite ruthless and occasionally sadistic, but only toward people they see as enemies. We also see several instances of obvious empathy from

Roy Batty, their leader.
* Blade Runner, but takes the exact opposite stance on its theme. Reportedly, the screenwriters had not read the original book.
* Blade Runner. Deckard goes to put a coat on Zhora, who's come offstage after a strip routine. She uses the opportunity to elbow him in the gut and flee.
* Blade Runner, Deckard is hanging from a rain-slick girder thingy, hundreds of feet above street level, with only his fingers (two of which were broken earlier by Roy).
* Blade Runner, Deckard returns to his apartment only to find the front door slightly ajar. He proceeds with caution only to find that it was Rachael who trespassed and is now sleeping in his bed.
* Blade Runner, Edward James Olmos' character Gaff speaks in a mixture of Spanish, French, Chinese, German, Hungarian, and Japanese. Olmos created a small dictionary of words for the so-called "City Speak".
* Blade Runner had several plot points (such as whether characters were replicants or not) decided either at random in each game, or depending on the choices the player made.
* Blade Runner. Hampton Fancher in any case feels that Deckard's humanity or lack thereof should never be openly addressed and become part of the surface experience of the film, and remain an issue of speculation.
* Blade Runner has graffiti spelling “skinjob” on his apartment door and gets further derogatory remarks from humans in public.
* Blade Runner, in the hopes that the narration would provide some explanation of Deckard and his world for the audience (it didn't). Reportedly, Ridley Scott and Harrison Ford hated them, a sentiment echoed by many moviegoers and critics. According to some, Ford tried to do as bad a job with the voice-overs as possible, an accusation Ford denies.
* Blade Runner in the scene where Deckard is searching Leon's bathroom and finds the snake scale in the tub.
* Blade Runner introduces a much larger building in the form of the Wallace Earth Headquarters.
* Blade Runner is a form of Turing Test. Because androids have no empathy, the tester asks questions designed to provoke an empathetic response and measures the testee's reactions.
* Blade Runner is a good example of this; she's fourteen (despite having the appearance of an eighteen-year-old at the least), naive, and highly impressionable.
* Blade Runner is generally considered superior to the theatrical cut. The narration present in the latter removes all the ambiguity that makes the film a classic in the first place.
* Blade Runner, it made a point of preserving that particular mystery.
* Blade Runner. It was one of the first films that portrayed the future as more dark and grimy and served as the inspiration for a lot of films.
* Blade Runner Joi. Joi hires a prostitute and synchronizes their movements so she can have sex, but there's some question as to whether she's actually in love or just obeying her programming (she's specifically designed as a companion for lonely people).
* Blade Runner, like the film, features synthetic humans known as Replicants, which are only distinguishable from humans psychologically.
* Blade Runner, like the film, has adverts littering the ground level and skyline of the city.
* Blade Runner (many of which are of Nas X himself), robots, and hovering vehicles.
* Blade Runner may not have as short a timespan as the book (see Literature), but still takes only a couple nights from start to finish (especially if Deckard is summoned the same day Leon starts the movie with).
* Blade Runner. "Nothing left but ashes in the wind... nothing moves but ghosts along the road".
* Blade Runner, on the other hand, claims that Deckard was always meant to be a replicant.
* Blade Runner or akin to escaped slaves. Roy Batty has the punk look but not the

personality. Interestingly, J.F. Sebastian is the closest character in the film to the image of cyberpunk as techno hacker.
* Blade Runner: Overcrowded and rainy. The book goes into more detail on the damaged biosphere; real animals are rare enough that owning one (as opposed to a replicant animal) is a status symbol.
* Blade Runner PC game adds black market cheese to her soup. Your character lets her off with a warning since it's not his jurisdiction.
* Blade Runner. Police officer Deckard is trying to get information from strip club owner Taffey Lewis.
* Blade Runner provides something of a variation on the theme: it suffered a similar curse, but instead of cast and crew members, it was the sponsors that got hit:
* Blade Runner: Real animals are a luxury, and people are trying to get off of the dying Earth, which is polluted and irradiated.
* Blade Runner, replicant Roy Batty punches through a wall, pulls Deckard's hand through it and breaks two of his fingers.
* Blade Runner: Replicants, artificially created humanoids, were outlawed for use on Earth, with bounty hunters dubbed "Blade Runners" charged with tracking them down and executing them. However, between the original film and the sequel, this law was overturned when newer generations were proven to be more reliable.
* Blade Runner: Robots (and one female robot in particular) have their sentience questioned by the film's main character, and the other Blade Runners hunting them, using the "Voight-Kampff" test. This test requires the suspect to answer a series of emotionally provocative questions and scenarios while monitoring their involuntary responses. Ultimately, the movie's central struggle and reveal confirms the sentience of the robots once thought only partly human.
* Blade Runner, Roy Batty breaks Deckard's fingers to hamper his ability to use his gun. Deckard starts using his other hand instead.
* Blade Runner says that this was supposed to show that most of the more affluent (i.e. white) population of America had already left Earth for the offworld colonies, and a lot of poor Asians who had also been left behind had subsequently immigrated.
* Blade Runner's movie, but follows a different plot. You can help the Replicants or take them down as a Blade Runner.
* Blade Runner, so he did it without having to shoot any new footage. Notably, the scene is absent in the Director's Cut and the later editions, all of which end with the elevator doors closing (Scott's original ending).
* Blade Runner. The mixture of architectural styles is pretty much realistic, apart from the notable lack of air-conditioning. But the streets filled with uniformly '50s style cars while futuristic spinners zoom overhead ?
* Blade Runner: The original version of the film ended with Deckard knowing that Rachel, as a replicant, presumably only has four years to live. The theatrical release added a narration to the end, offhandedly mentioning that Deckard was told that she was special and didn't have the standard replicant expiration date.
* Blade Runner, the planet's deteriorating condition has killed off most animals, causing people to keep synthetic pets. One can tell how prized they are by the fact that the Voigt-Kampf test scenarios, created to evoke an empathetic response, are mostly centered on animal cruelty.
* Blade Runner. There are also a number of artificially created animals, ranging from snakes to owls.
* Blade Runner. The test involves asking questions that would provoke an empathetic response in a human and note when the replicant fails to show any physical signs.
* Blade Runner, this would mean that he is actually worse than his targets. The amorality is explained as resulting from lacking real childhoods and formative years of experience. There is at least one android in the film (two if you count the main character) who has/have memory implants of growing up with a family and loved ones (even if those loved ones died or left). They both show that they have a sense of right and wrong and the definite android is only exposed after hundreds of times more testing than any previous android.

* Blade Runner to avoid being arrested at some point, due to the simply overwhelming and unrelenting force of the police.
* Blade Runner to restore feeling to it as he nears the last moments of his lifespan.
* Blade Runner, upon which the movie was loosely based, have a similar life expectancy, but this is due to technological limitations.
* Blade Runner used as slaves under the pretext of technology), but in their profile, each is listed as being designed for a specific role in society.
* Blade Runner, when Deckard, fearing Rachael was killed by Gaff in her sleep, cries and kisses her when he hears her breathing.
* Blade Runner, when Deckard is hunting down Pris and Roy at Sebastian's apartment. Sebastian makes lots of very realistic human-size doll-thingies, and Pris pretends to be one, which lets her manage a surprise attack on Deckard.
* Blade Runner when he didn't like the original lines, which was originally a much longer and more formal monologue (Hauer cut more than half of it out and added several of his own lines). Notably, the modifications included the "like tears in the rain" addition at the end.
* Blade Runner, who not only created them as slaves and gave them a soon-to-be expiration date, but also forbade their presence on Earth under penalty of death, no retirement.
* Blade Runner you watch, either Deckard or just Rachel is a/are replicant(s), and going to snuff it fairly soon, or live happily ever after. However, since both Rachael and Deckard (if he is a Replicant after all) are next-generation experimental Replicants, it doesn't necessarily mean they'd have the same four-year lifespan as the Nexus-6 series.
* Blade Runner, Zhora is dramatically defenestrated, though she was probably 'retired' by the preceding gunshots.
* Blades aren't the only thing that can use ether energy. Some substances can block or adsorb it, which can choke Blades of the energy necessary to fight. While the technology is in its infancy, using machines to harvest Ether energy to perform work exists as a proof-of-concept.
* Blade's body or ash. Van Sciver tells her that even if either of those things were found, he'd still look over his shoulder for the rest of his immortal life.
* Blade series implies that vampires and vampyres are actually different things.
* Blade series starring Blade's daughter, Fallon Gray. As of July 2016, it still hasn't shown up. According to Tim Seeley himself, a new artist has taken over, Afua Richardson, while he has quit due to fans throwing a shitstorm over a white man doing a black girl's comic.
* Blade. Seriously, he's called that for a pretty good reason. He isn't crazy, but he's plenty scary and deadly accurate in throwing blades, not to speak of his swordsmanship.
* Blades have long been used and still have a place on modern battlefields, because firearms have limited ammunition and (mainly nowadays) because rifles may not be practically aimed and fired in close quarters. Over-reliance on the ability to simply shoot the enemy can lead to a soldier's death. A knife doesn't jam or run out of ammo. In extremely close combat, as can happen when clearing apartment complexes in
* Blades in the Dark, As a result of the cataclysm, the sun almost went out, appearing as a tiny ember in the sky only briefly at dawn and dusk and leaving the rest of the day mostly dark. Interestingly, the moon still shines as brightly as before the cataclysm, and it may be getting larger, or possibly closer.
* Blades in the Dark beat you to the most damage you can survive, and you don't even get a Resistance roll because they don't stop until you're injured.
* Blades in the Dark capable of producing electric charge) in one form or another.
* Blades in the Dark, "Don't make the PCs look incompetent", and instead to explain their failures with overwhelming odds stacked against them.
* Blades in the Dark don't specify anything ahead of time, except the score's objective, the attack point, and their respective maximum loadouts. This way, the latter can retroactively introduce contingencies into the former's "plans" that had

never been mentioned before, and thus have much better chances of success than if the players had planned their scores in detail.
* Blades in the Dark feature player characters who start out as this. In the former, you are a gang of criminals in a haunted industrial fantasy city. In the latter, you are the crew of a starship, traveling the galaxy to ply your trade as outlaws.
* Blades in the Dark, ghosts, vampires, and demons roam free, and technological progress causes more harm than good.
* Blades in the Dark has the Lost District of Duskwall: a formerly-wealthy area that was abandoned to the ghosts of the Death Lands when the current lighting wall around the city was built (presumably, the city didn't have the resources to extend the wall to cover the district). There is also the Old North Port, which was abandoned long before even that, due to relocation of the main port to the North Hook Channel, and was therefore never protected by the lighting barrier and is currently used as a haven by smugglers.
* Blades in the Dark of the Lampblacks Guild. This was due to the fact that the voice he selected for Pickett was taxing on his vocal chords. Naturally, Pickett becomes the group's mole which promises her a larger role in the narrative. During the story, a ghost claws its way down Pickett's throat, and Luke reasons that she'll probably have a different voice after such an event.
* Blades in the Darkplasm") always carrying electric charge in this setting, which its residents have learned to exploit in order to launch an industrial revolution.
* Blades in the Dark playbook, Leech, to sub in for the dedicated weirdness archetype, the Whisper, through their faculties of observation and experimentation.
* Blades in the Dark series), the industrial revolution was kicked off by the discovery that the blood of the demonic leviathans roaming the Void Sea can be used to produce electric power. By the time the game takes place, its setting is roughly in the Victorian age, with most technology powered by electricity extracted from leviathan blood (although some older tech also uses steam power).
* Blades in the Dark, spectres are a type of ghosts that have been twisted by their deaths and are driven by the desire to take vengeance upon the living by consuming their life energy. Many start off with a specific target (e.g. their murderer), but once the target dies, transfer their hatred upon all of the living.
* Blades in the Dark, their player must make an "incarceration roll" that determines how bad their time behind bar has been. On a bad roll, the character automatically receives a Trauma, which usually has major impact on future role-play, as well as being completely incurable under the regular rules.
* Blades in the Dark, the sea is ink-dark with occasional hints of star patterns.
* Blades in the Dark to start muscling in on other gangs' turf as soon as they have the resources for it.
* Blades in the Dark: Unionisation is an issue that regularly raises its head in Doskvol, mostly among the workers in Coalridge and the Railjacks. The Hive is a merchant's guild that engages in a spot of smuggling on the side, and the lamplighters' guild, bereft of jobs or purpose after the rise of electric streetlights, is now a criminal gang known as the Lampblacks.
* Blades in the Dark" whenever you meet a complication that you as a player weren't prepared for.
* Blades in the Dark with a Gambling vice, they can serve as places to reduce stress (a gameplay mechanic), while for some types of crews, they are available as claims that generate coin after every score.
* Blades involves killings at a country club that turn out to be caused by a killer lawnmower.
* Blade slightly with his guns in that Blade himself mentions the bullets aren't silver. He uses hollow point rounds filled with a mixture of silver nitrate and essence of garlic.
* Blades of Avernum. The message prompt is exactly as follows: "You have a fantastic stroke of luck! You fish out a pair of boots."
* Blades of Exile. You appear in a tiny corridor right next to an ogre. You can kill the ogre to win a prize. Or just run away. The End.

* Blades Of Fury, when a noblewoman wants some pesky guards out of the way she places her own jewels into their hands, without them noticing, and screams. Help arrives, believes the scene she has set that the guards were robbing her or worse and the guards are lynched.
* Blades of Glory: After champion skaters Chazz Michael Michaels and Jimmy MacElroy are banned from Men's Singles skating for fighting on the winner's stand, they end up respectively as A) a drunk lurching his way through a children's skating show and B) a stockboy at a sporting-goods store.
* Blades of Glory get two Cyranos, but the characters having the conversation both stop listening at the right time.
* Blades of Glory has a sister who acts as a henchgirl to her selfish and murderous older siblings and adores them despite their overt manipulations and dirt-like treatment of her.
* Blades of Glory, Jimmy having one of these is kind of what causes the plot to kick off, but in a surprisingly non-scary way in spite of some of the creepy things that the loony fan says to him. This particular fan of his is so obsessed with the idea of having Jimmy back on the rink and is so much the type to think about these things a lot that he manages to find a loophole in the Figure Skating Championships rulebook that Jimmy then exploits.
* Blades of Glory, Jimmy McElroy's "pretty normal childhood" consisted of constant training and various injections to make him a superb skater.
* Blades of Glory offers the word "Mind-bottling", which may or may not be a limited vocabulary version of "Mind-boggling".
* Blades of Glory - The evil skaters tie up one of the heroes in a restroom stall. His attempt to get the next person to enter, a young child, to free him, only ends in the kid running away screaming, "Stranger Danger! STRANGER DANGER!"
* Blades of Glory (then married in real life) play a pairs team of brother and sister. Towards the end of the movie, their real-life relationship is replicated, with disturbing results.
* Blades of Glory: Two men explore the world of couples figure skating.
* Blades of Glory. When several people are interviewed to see how they feel about the male/male pair skating of Chaz and Jimmy, one guy comments in surprise "Wait, the blond chick's a dude?"
* Blades of Steel. Again, there was no real other way to play defense.
* Blades of Steel on the arena scoreboard. Then the puck drops for the second period.
* Blades Of Steel-style, under the winner's son comes to prevent further legal repercussions.
* Blades of Steel) was one of the first hockey video games to feature fighting, and only the loser gets sent to the penalty box. The arcade game had a giant red "FIGHT" button in the middle of the controls, much larger than the two standard-sized buttons used for passing and shooting, and there's also a fight depicted on the home version's box art.
* Blades of Valyrian steel are far sharper and stronger than even the best mundane steel. Forging the metal is a magical process that has become
* Blade Spam: Attacking extremely quickly — sometimes to the point individual strikes are impossible to see with the naked eye.
* Blade spiders are by and large normal giant spiders, except that their legs and pedipalps end in sharp metal blades.
* Blade Squadron has Rebel Wing Commander Adon Fox, leader of Blade Squadron.
* Blade's sword has a rather nasty security feature on it, just in case Blade's prey get any ideas about using his weapon against him.
* Bladestorm The Hundred Years War has the player as an up-and-coming mercenary working for the English and the French in the eponymous war. Although there's no official group or organization monitoring the mercenaries, there are a lot of them working in sort of a loose-knit coalition, such that even facing off against a mercenary on the battlefield doesn't mean you can't be friends. Kicking the snot out of the English or French King, on the other hand...
* Blade Strangers in its stronger form. (In his original game, he could only wield

one weapon at any given time, so this fighting style was impossible.)
* Blade Strangers, where the Mom-stomping-on-someone attack is used as Isaac's super.
* Blade that has an interesting security system built into it to mutilate the hand of any unknowing wielders. (When it's titanium, Blade has to actually behead the vampire to kill them.)
* Blade the bouncer asks the titular character if he has an invitation instead of checking a list. Needless to say, he doesn't and throws the guy through the door.
* Blade: The Daywalker kills Deacon Frost and saves the girl. He refuses to take the serum to cure his special blend of vampirism because there are more vampires that need killing, and he's going to be the one to do it.
* Blade: The poster of the first film show the vampire antagonist Deacon Frost ominously watching over the Daywalker Blade in a blood-red background.
* Blade: The second episode is centered around one farm people. Existence, an underground society of vampires, filled it with young women and kept them alive in water-filled jars to harvest their blood.
* Blade: The Series entering negotiations to play the title character the following year.
* Blade: The Series helps. He gets Krista to sleep with him after killing her brother and forcibly turning her by telling a sob story about his late wife.
* Blade, the title character has a booby-trapped silver katana for fighting vampires.
* Blade Trilogy, also with the death of a supporting character... twice!
* Blade Trilogy: "Blade" is actually a real name, but here it's obviously being milked for sounding scary.
* Blade Trilogy even sued, claiming they were whitewashing him for his own film franchise. However, a myriad of rumours alleged that Wesley Snipes couldn't be bothered to show up on set most of the time, leaving his stunt double having to perform most of the filming in his place; if true, then it's not entirely surprising that Blade ultimately doesn't appear much?
* Blade Trilogy has one of these per film. All of them show Blade loading guns, sheathing knives and his sword, and putting on various other weapons. In the second movie, Whistler and the Blood Pack suit up alongside Blade. In the third film, it's Blade and Abigail Whistler who are loading up.
* Blade Trilogy) have several characters who build high-tech equipment for the vampire hunters. Seriously... ultraviolet light bullets??
* Blade Trilogy, humans who serve the Vampires as "Familiars" are tattooed with their master's clan glyph. It's not laser-scannable, but it does serve to identify them to other Vampires. Like slaves in ancient times, killing them will mean that the offending vampire will have to answer to the human's master.
* Blade Trilogy is actually working for the enemy the entire time, stating that their victory is inevitable, and when the time comes, "I'd rather be a pet than cattle."
* Blade Trilogy) is the big exception. Blade did feed on humans at one point, mostly homeless people, but that was before meeting Whistler and developing the thirst-suppressing serum.
* Blade Trilogy — Comic book adaptation series about a vampire killer. Three films since 1998.
* Blade Trilogy protagonist and its secret societies of vampires, is a notable example of this trope, being a hybrid of the superhero genre, the horror genre, and the action movie genre.
* Blade Trilogy's comic counterpart never wore spandex anyway which might have led to the film studio's being more willing to bring him to the big screen.
* Blade Trilogy series of movies has a longcoat in all his incarnations. Starting with the second film, it's got a red lining.
* Blade Trilogy: Way before the MCU was a thing, Marvel actually turned some heads with this trilogy back in the late 90s/early 2000s. Not only because he was, at the time, one of the lesser known heroes from their stockade, but because he was a person of color at that, so getting his own movie was certainly a draw for many

African-Americans.
* Blade Trilogy, where a minor scratch from any sharp silver object causes vampires to immediately crumble into dust.
* Blade Trilogy" who are more or less property of their vampire master/second-class citizens of their society.
* Blade: Trinity: Dracula aka Drake is said to be the first vampire and the where many vampires in the series descend from. The heroes makes it their main goal to target him with the Daystar virus as they believe killing him will exterminate all vampires.
* Blade: Trinity. Dracula kidnaps an infant and threatens to throw it off a skyscraper. He doesn't though, but instead tosses it in the air, letting it fly for roughly twenty feet, and then is caught hard by Blade. The infant survives all of this.
* Blade: Trinity elaborated even further on this in an interview with the A.V. Club, revealing that not only did Snipes accuse Goyer of being a racist multiple times with little to no provocation, but eventually stopped speaking to him entirely, communicating only in Post-It notes. And because he was such an intense method actor, he signed each one "Blade".
* Blade: Trinity featured a warehouse, one of many, where brain dead people were kept in storage within what at best described as a giant, airtight ziplock bag for backup food supply. This actually was already in cut content of the first movie in the series.
* Blade: Trinity, Hannibal King is captured by the villains and reveals that he had a tracking device, allowing his teammates to know his exact location. He then gives a verbal cue, expecting a Big Damn Heroes moment. It doesn't come and he nervously asks for a cellphone.
* Blade: Trinity has a small silver blade that springs from her wrist that she often uses for killing blows
* Blade: Trinity movie the following year forced WB to rethink it's plans for future DC movies.
* Blade: Trinity spent most of the production smoking weed in his trailer and would only come out of his trailer to film close ups. Most of the scenes with Blade were done with his stand in. He also tried to strangle the director, who responded by paying a biker gang to act as his security. After that Blade would only communicate with the crew via Post-It Notes signed "From Blade".
* Blade: Trinity's plan to survive in the future vampire-dominated world.
* Blade: Trinity: The crux of the third and final film is the use of a virus that will kill all vampires everywhere, seemingly instantaneously.
* Blade: Trinity: The "vampire dogs" have a bottom jaw that splits into two halves.
* Blade: Trinity troupe of newly turned teenage vampires try to turn a local subway station into their own personal buffet. It would have worked if their first victim didn't have silver tipped knives and an energy bow.
* Blade: Trinity was partially intended as one for Hannibal King and Abigail Whistler's Nightstalker characters. It didn't work out.
* Blade: Trinity, where Blade is tricked into killing a familiar instead of a vampire so that the body doesn't disintegrate in the sunlight.
* Blade: Trinity, while Hannibal King is recounting his past experience with a particular evil female vampire, he jokes about how unlike normal female vampires, this one's fangs are located in her vagina.
* Blade. Until he completes the dark ritual, he and his followers have to use a thick covering of sun lotion to survive in sunlight.
* Blade vampire hunter. Him being part vampire, the thing he hates the most has caused him no small amount of grief.
* Blade: Vampires vampires' hunger controls them. Most don't have enough sense of morality or even former human personality to care, but those that do hang on to their former selves experience this trope in full.
* Blade. Weapons sometimes don't hold up against some of the tougher enemies he fights, even when he clearly beats them.
* Blade were exceptionally hard to kill. Apparently, Blade had staked him before

and it didn't take. Hence the fire, and the M.E. developing the magic ammo.
* Blade were supposed to appear in the Epic Heroes wave, but were bumped, although Dani was released in 2019 as a Walgreens exclusive figure.
* Blade when he chops Deacon Frost in half, but the upper body only separates a few inches before his vampire god powers (and a lot of blood) pull the parts back together again.
* Blade when in the end Eric and Karen had no romantic interest in each other.
* Blade where the vampire safehouse is marked with symbols in UV paint.
* Blade, who has the appearance of a man in his 30s has been active since at least the 1970s, and has shown no signs of aging since due to being half vampire.
* Blade with martial arts. Vampires don't seem to hand out many guns to their minions.
* Bladezz: All the charm of a slacker teenager. Does not know how to politely talk to women and doesn't seem interested in learning.
* Bladezz is occasionally seen toying with a deck of playing cards. Vincent Caso is known for carrying these everywhere he goes and is noted on his character page to be "an accomplished sleight of hand artist and playing card handler."
* Blading had long been a popular way to insert drama into a match — where the wrestlers would hide razor blades in their gear and cut themselves to escalate the violence of the match. While men and women did this in most places where pro wrestling occurred to various degrees, women in WWE never bladed, because that would have detracted from the
* Blading. Since the 1970s (if not earlier), American audiences have grown accustomed to fight scenes in action movies that cause the combatants to bleed like stuck pigs, when in fact mild bruises and maybe a few chipped teeth are bound to be the results of a real-life fight. If pro wrestlers didn't bleed as much as they do, spectators might suspect that they "aren't really hurting each other"
* Blahblahblah as Pinky pondered how Brain's head looked like a hippo's. This started a chain of thought, ending with the hippo on a beach, and wondering what the hippo WOULD wear on a beach. At this point Brain interrupted with the trope name.
* Blah blah of how to subtly check for Command Seals without raising suspicions. Tohsaka just stops and stares at him.
* blah people's lives better." He claimed that he started to say "a word" and then mumbled. His opponents said he said "black" and attempted this but couldn't think of another word.
* Blaike Raven of the entire comic, 14 years into its run, but his death is the reason Pandora did not reset for centuries and stayed close to her elf son both of which is highly unusual for an Immortal who typically reset every couple centuries and relatively quickly forget they even have descendants. He is also responsible for the existence of Adrian Raven, a major supporting character.
* Blain Cooper (aka 'Old Painless') hasn't got time to bleed; the Predator stuns him with its first attack and messily eviscerates him with its second, making him both feel pain AND bleed.
* Blaine Anderson; his primary role being Kurt's boyfriend. He rarely gets any real plots or scenes for himself; even the few that don't directly involve Kurt nevertheless end up being more about Kurt than Blaine. In the third season, he had a few Kurt-free plotlines such as friction with Finn and Sam, and his relationship with his brother. Season four, however, sees him become almost completely independent from Kurt. He has plenty of his own storylines and scenes.
* Blaine Anderson was originally a male, gay version of this trope for Kurt, even though Kurt himself has some characteristics typical to this trope. However, until he got himself some
* Blaine, backed by the Warblers, appear at WMHS to sing "Somewhere Only We Know" to Kurt after he moves back to McKinley!
* Blaine does it again, this time with Kurt - their rampant flirtation solidifies with "Baby, It's Cold Outside," and "Candles", which takes place right after their
* Blaine has already endured this as he shows off his tongue piercing which he did himself.

* Blaine Interlude ends with Al, Ken & Harry of Team Rocket finding what they were looking for and reporting back to Giovanni.
* Blaine to capitalize on Primeape's landing blows. While Ash ultimately wins the battle, it turns out much harder than he expected.
* Blaine, with the Dalton Warblers, is another example, he sang more songs in a few episodes than some regulars did all show. Even
* Blaine zig-zags this trope. He genuinely loves football, learned to box and can sometimes 'pass' as straight, but he's also read Patti LuPone's new book, knows all the Vogue covers, and loves showtunes. His wardrobe itself is a mix of classic - bowties and gelled hair - with more flamboyant aspects like bright, super-tight skinny jeans and very fitted shirts.
* Blair & Chuck could only get their happy ending by effectively murdering Chuck's father as he's thrown off a skyscraper rooftop during a fight between the father & son, and they get married simply to avoid having to testify against each other.
* Blaire Darkling tried to do this, leaving behind his life as the dangerous criminal Matthew Vherestorm and tried to redeem himself by working for Paradox, an organization devoted to researching
* Blaire White commentator and political activist. She began taking hormone therapy in 2015 after coming out to her family.
* Blair is also in the Reserves, and finds himself recalled as well (by
* Blair is the most perverted (you should realize this by the end of the first episode), and admits to still being male after the other two change back to normal. It's just that Blair has a cat form so it's hard to tell exactly when/if she's changed back... it would make a nice Brick Joke
* Blair's Sauces and Snacks, whose slogan is "Don't fear death, fear the consequences," has a product line named Death Sauce. Some other extreme hot sauces by various vendors have names like Demon Ichor, Pyro Diablo, Smack My Ass and Call Me Sally, Mega Death, Magma, Vicious Viper, You Can't Handle This Hot Sauce, Rectal Rocket Fuel, Ass In Space ("Ass-tronomically Hot!"), etc.
* Blair the school, and he remains a girl for several chapters, with no suggestion of how it might be undone until it actually happens (leading to another important boy being transformed, albeit with much less of a sense of permanence).
* Blair Waldorf and her "merry band of psychos" (her minions, that is) in
* Blair Witch features a woman who is pushed into a mine shaft and is forced to crawl through a small tunnel.
* Blair Witch freaks out when his sister brings home her black boyfriend for dinner. Then they all get abducted by aliens.
* Blair Witch his friend recovered before 'disappearing' isn't helping matters.
* Blair Witch, in which some gamers hopelessly lost in the hallways of a convention center search in vain for GenCon. They keep moving in circles and winding up at the same vending machine, which invokes this trope every time they return.
* Blair Witch Project goes back into the woods with a new inevitably doomed group lead by Heather Donahue's brother in a desperate attempt to find her after new footage is posted online.
* Blair Witch started because he was a fan of the original, having seen it at its premiere.
* Blair Witch, with no indication that it was part of that franchise. Its actual title and connection to the original were only revealed less than two months before it premiered, at an early screening at San Diego Comic-Con.
* Blaise Zabini is mentioned as the last new Hogwarts student to be sorted in
* Blake and Mortimer adventure "The Time Trap" depicts a dystopian far future in which communication takes place via camera-equipped wrist phones, for those who can afford them anyway.
* Blake and Mortimer, a passage to Atlantis exists in a network of caves in the Azores archipelago. The Azores are an often cited place for Atlantis' location, usually coupled with the theory that the archipelago itself is an Atlantean mountain range that remained above water after the continent sank. Naturally, the whole place is destroyed by the end of the book, with Blake and Mortimer deciding

to keep mum about the whole thing.
* Blake and Mortimer before an entire squadron of Swordfish blows them up before they can launch.
* Blake and Mortimer, Blake convinced Nastasia to become a mole after he revealed to her that her father didn't die from a car accident, but from an assassination carried out by the KGB.
* Blake and Mortimer can fly, go underwater, carry nuclear weapons (with power ranging from "one-shot a battleship" to "level a city") and a single one destroyed an entire naval fleet (battleships and aircraft carriers included).
* Blake and Mortimer, Emperor Basam Damdu, is less mysterious Oriental, and more Hitler-esque, megalomaniac madman.
* Blake and Mortimer. Evil aliens from Markab visited Earth thousands of years in the past (specifically Easter Island) as part of their genocidal crusade against “inferior species”.
* Blake and Mortimer fell down a seven meters deep old well when he was two or three years old. It took half an hour before he was able to be brought back up. The experience resulted in a lot of scenes in his comic strip where characters fall into pits or are walking through underground locations.
* Blake and Mortimer: Han-Dié betrays Mortimer and had him captured to be delivered to Nathan Chase (actually a disguised Olrik). Han-Dié is also captured so he wouldn't leak the professor's kidnapping.
* Blake and Mortimer: Han-Dié helps with the kidnapping of Mortimer and is himself captured to prevent any leaks. Xi-Li orders Han-Dié to translate the scrolls from Sho's diary. It's strongly implied that Xi-Li will dispose of him after his work is finished.
* Blake and Mortimer: In "The Curse of the Thirty Denarii", Mortimer brushes off anything supernatural about the eponymous Thirty Denarii, although he does admit that science can't always explain everything. However, the more he investigates, the more he starts to believe that divine powers are at work:
* Blake and Mortimer: Mortimer and Sushil were best friends since childhood. By the time Mortimer returned to India from his studies, Sushil had changed greatly and joined an Indian extremist group, having grown to consider Mortimer his enemy, but the feeling is one-sided as Mortimer still sees Sushil as his friend.
* Blake and Mortimer, Mortimer finds the time machine along with a recorded message from Miloch, which seems at times to know what Mortimer is doing or saying (not always, however, but enough to unnerve Mortimer). This being a time travel story, Miloch may have been spying Mortimer in advance to record his message, though.
* Blake and Mortimer: Olrik's forces take heavy losses when they attack the British's secret base, much to the protest of one of his officer. Olrik brush it off was they have plenty of reserves.
* Blake and Mortimer: Princess Gita is completely heartbroken because of his father's lies. She thinks that Mortimer seduced her for a pastime and attempted to kill her to protect his eventual marriage (he never intended to marry Agatha) and fled to England. This lead to her attempting to murder Mortimer.
* Blake and Mortimer: Professor Philip Mortimer usually investigates alone and tends to get captured when he's trapped and outnumbered, leading his best friend, Captain Francis Blake to rescue him. Though there are a few cases when Blake also gets captured and Mortimer is the one who rescues him.
* Blake and Mortimer series. Extremely racists, they believe to be superior to all other races in the Galaxy and have no quarrel in exterminate them all.
* Blake and Mortimer technology and become a "menace to the Marcabian Empire". For the moment they reach Earth, they already exterminate several sentient species.
* Blake and Mortimer: The entire series was considered one by its author, who was trained as an opera singer and really thought it was his true calling.
* Blake and Mortimer. The volume was eventually finished by Sterne's girlfriend, Chantal de Spiegeleer, and the second part made by another artist.
* Blake and Mortimer, was published in 2000, over one year after the end of the animated series). As a result, the remaining episodes are original stories.
* Blake and Mortimer. When Olrik (who had been working for a rogue Soviet doctor)

is arrested, he's his usual flippant self when Blake and Mortimer visit his cell, but when he learns he's being exchanged by the British police to the Soviets, he begs for them to prevent it.
* Blake and Mortimer, where Blake and Mortimer walk in the London streets at night and are trying to catch a mysterious criminal.
* Blake and Sun fight a sea dragon Grimm in the late afternoon during Volume 4.
* Blake and Yang had a short relationship. Though it didn't last, they're still good teammates and best friends nevertheless. Yang doesn't have any qualms when Blake begins dating her younger sister Ruby and she even encourages it.
* Blake Belladonna, as shown in Volume 2. Very slowly, she grows to trust her teammates, particularly her partner, Yang.
* Blake Belladonna is very much into romance novels. And by the look on her face, she doesn't want anyone to know this. However the title, "Ninjas of Love," seems to imply a much... deeper meaning than one might find for romance novels.
* Blake Belladonna leaves the White Fang because of her differing moral convictions much like she does in canon
* Blake Belladonna vs Mikasa Ackerman: Blake kills Mikasa, but had her Aura broken and lost her arm in the process. Then a Titan shows up. Blake confidently charges into battle, but with her injuries and no knowledge of a Titan's weak spot, her chances of survival are slim.
* Blake, compared to his Adventures counterpart, is more considerate to Yancy's feelings and more honest about his reasons to not to pursue a relationship with her, admitting that he does like her, instead of dating her just to investigate if she was a member of Team Plasma and dumping her once he learns she isn't.
* Blake Edwards, Clouseau vainly tries to restore order but winds up staring helplessly into the camera.
* Blake Edwards (despite their tumultuous relationship), Graham Stark and Dick Crockett, the latter of whom also worked as his stunt co-ordinator. His main co-writers were Frank and Tom Waldman in the 60s and 70s, and his son Geoffrey Edwards in the 80s. Cinematography duties were handled by various individuals for much of his career, but he settled down to alternating between Harry Stradling Jr. and Dick Bush (the former when he was filming in the US, and the latter in the UK) later on.
* Blake Edwards married in 1969, and their marriage lasted until Edwards died in 2010.
* Blake Edwards, most of his output was comedic, although he continued to do drama here and there.
* Blake Edwards that resulted in a lot of the slapstick he was known for - thus creating jarring tonal shifts. He recut the film in the 90s to make it more serious.
* Blake Edwards, was a huge bomb. But they weren't married when that was made.
* Blake ends up with Sun and Ilia following her around for the latter half of the story. She
* Blake enters the series at a low point in her life, though the show doesn't reveal this at first. As a result, many people assumed the quiet introverted persona she had was her natural state, but it's eventually revealed to have been the result of psychological abuse and trauma. Over the course of the series and her own healing, she reveals herself to not only be passionate about doing the right thing but also to have a very pointed sense of humor, teasing other characters casually.
* Blake has nightmares of the Slayer killing off all of the White Fang, including her father and Ilia.
* Blake has the ears of a cat (though no tail, despite some fans assuming otherwise) and certain feline traits. She also has a pair of Human ears in addition to the Cat ones. Mostly, she has the personality of a cat. One of the extras reveals that she lands on all fours. Unable to ignore a laser light flickering on her terminal, Blake gets up from her terminal and tracks the laser light until she bumps into the perpetrator — Yang. In a subversion, she chases it like a human would: standing upright with an annoyed look on her face. She loves eating whole, raw fish, skin and all. She's also uneasy around dogs, including Ruby and

Yang's pet Corgi Zwei, who follows her happily and seems to treat her like a human.
* Blake He outright admits that concepts like "fear" and "pity" are unknown to him, shocking Whitley and Kelden the Keldeo, with the latter realizing that he wasn't collected with his emotions like his masters, he just doesn't have any.
* Blake in particular can't believe that the various love lives of her friends are even more bizarre and complicated than her smutty books.
* Blake is an exceptionally gifted fighter, who was one of the few students able to enter Beacon Academy without having first gone through years of preparatory combat schooling. She is also the daughter of the man who originally created the White Fang and who currently leads the people of Menagerie. Her family name is Belladonna, and her personal symbol is the belladonna plant, which is a purple flower the same colour as her Aura. She always accents her clothing with purple as a result.
* Blake is first introduced robbing a train owned by Weiss's family, who have enslaved her kind. However, the two girls learn how to put their differences aside when they're put on the same team, and eventually bond as true friends. When Team RWBY try to reach Atlas from the city of Argus, the Atlesian commander of the port is willing to let Weiss Schnee through because of her family connections, but upon seeing a Faunus with her makes it clear that she believes Weiss has fallen in with very questionable company, and will not let them through. Weiss is the first one to leap to Blake's defence.
* Blake is very fond of tuna. When her team learns a bit more about her past, it's her fondness for tuna that Ruby latches onto. In Volume 3, when the team orders noodles, hers comes with a huge pile of fish on top, which the proprietor has cooked specially for her. She's distraught when it gets taken away as soon as Weiss' credit card is declined, diving on Pyrrha's offer to pay when Yang attempts to decline out of politeness.
* Blake launches her opponent into the air, then hits them repeatedly with her scythe as she drives them back down into the ground and makes their body disintegrate.
* Blake Lively but morphs into Blake's usual typecasting around Season 3 or so.
* Blake Lively. It's later indicated that the aggressive great white in question has a bad history with humans, given the spear fragment lodged in its mouth.
* Blake Lively (she's a touch over 5'9"/175 cm, Leighton... isn't) and many of the rest of the cast, a point acknowledged in "The Magnificent Archibalds":
* Blake on her part, since her "captors" do genuinely care about her and offer her better living conditions than what she could realistically attain by running away.
* Blake's 7 always had the ongoing struggle against the totalitarian Federation, but whether it was the foreground concern or subordinate to the current crisis depends on the episode.
* Blake's 7. An accidental version in "Powerplay". A soldier notices the latches on the hatch to an inspection channel in the floor are raised instead of flush with the hatch. However that's because our heroes were leaving the channel, not entering it.
* Blake's 7 and a treasure room holding more wealth than you'd find in the entire Federation banking system (according to Avon). No reason for the latter is ever given.
* Blake's 7, and Avon realises they can just steal it directly and start a fire in the room that will seem like random damage or vandalism.
* Blake's 7 and her crying out Blake's name. This was because Jan Chappell had decided to leave the series; she rejected the idea of a final episode portraying her death and only agreed to voice record her last words.
* Blake's 7 and is forced to use a mind control drug since they lack military power.
* Blake's 7, and it would have been a short show if Servalan had bothered to try.
* Blake's 7 and raises the gun one last time before the scene fades to black.
* Blake's 7 and sharing its lack of special effects budget and some of the same production team, had its own howlers:
* Blake's 7", an unconscious Cally is strapped onto a conveyor belt to be

assimilated into the giant brain running Ultraworld. She is saved at the last minute, the other characters having to contend with zombie-like baddies, who switch the machine back on each time they switch it off — cue lots of fake fighting.....
* Blake's 7, apparently to stop the crew being injured by reflected glare and radiation from their own weapons. The force wall was one of several superior technologies that made the Liberator quite a battlewagon — in "The Harvest of Kairos" Servalan is shocked that the Liberator can fire through its own force wall, and has the ability to overlap its force walls for greater protection. There were several mentions of defense fields and screens used to protect spaceships or surface installations, so the Federation apparently has similar albeit less advanced technology.
* Blake's 7 are implied to be the descendants of colonists from Earth.
* Blake's 7 are playing a chess game at the same time as they're setting up a missile strike on a rebel column.
* Blake's 7 as an officer, but quit and rejoined as an enlisted man because he hated computers and liked manual labour and fighting.
* Blake's 7" as one of the Federation's techno-undead "Mutoid" soldiers.
* Blake's 7 as the losing side has to make the same repatriations as if they'd lost a real war.
* Blake's 7, a telepath in canon, manifested it once under conditions of EXTREME stress, and not entirely voluntarily.
* Blake's 7 audio drama "The Turing Test", unsurprisingly enough, but with a twist. Avon, masquerading as an android, is given the test with what he assumes is a human scientist at the far end. His opponent turns out to be a real, advanced android, which is why the scientists were so willing to accept Avon as one himself - but he's human. So what is she?
* Blake's 7 audio "Warship" the Liberator just barely gets ahead of the shockwave, but getting clipped by the outer edges was enough to bork up the remaining systems and require evacuation.
* Blake's 7 audio "Warship", where the progress of the plasma explosion is given by Zen's countdown and by the sudden silencing of the Andromedan transmissions. (Played straight earlier, though, when we hear Megiddo explode.)
* Blake's 7. Averted in Season 4 with the broken-down cargo ship Scorpio.
* Blake's 7. Avon replies that he was actually turning the device off as a signal that Shrinker had arrived on the scene. Avon's friends promptly teleport into the cell and depart with Avon and Shrinker.
* Blake's 7 Avon shrugs this off, pointing out that people once thought the same thing about the light barrier.
* Blake's 7". Avon spits the (ice cream?) he's eating when Vila (who has been drugged) is lead onto the casino stage to play the Klute at speed chess, thereby risking both his life, if he loses, and their substantial winnings.
* Blake's 7 being loaded onto his chest and stomach that it narrowly avoided breaching contemporary taste and decency standards and left him with slight physical injuries when they all went off.
* Blake's 7", Blake gets caught in one set by his enemy Travis. Fortunately he's wearing a spacesuit boot that protects his foot from any serious damage, but it pins Blake in place out of reach of his teleport bracelet, leading to his capture.
* Blake's 7: Blake is a Rebel Leader of the genuinely dedicated but morally hazy variety.
* Blake's 7, but it's still not really a relationship because neither of them trusts the other any further than they could throw a cake underwater.
* Blake's 7 calls up and demands to know what is happening. Avon answers, "I'm afraid your friend is feeling the pinch."
* Blake's 7", Cally and Jenna stage a cat fight in a crowded bar to cause a distraction. The result is hilarious.
* Blake's 7" contains a line where a disgusted sounding Tarrant complains that the planet they've just teleported down to "looks like a quarry".
* Blake's 7 crew can detect the presence of other minds. It's how she sneaks up on

Blake in an early episode.
* Blake's 7 crew flirt with this, even Blake. In the finale of Season 2, it's made clear that he was fully willing to cause the deaths of millions of people (by computer failure) in order to take down the Federation.
* Blake's 7, crewmember Cally is from Auron, a world where parents clone themselves to create their children. Auron had only started to do it several decades previously, so there were also people who were 'born of natural birth'. Cally herself had a twin sister, Zelda.
* Blake's 7". Dayna has a microgrenade hidden in a tooth, which she primes by putting it back in her mouth and adjusting it with her teeth.
* Blake's 7. Dayna, who's black, wonders before one mission if she'd be able to pass for a native on the planet they're visiting. Avon assures her that the planet was colonized a long time ago, back when there were laws in place requiring colony projects to include a proportionate number of all ethnic groups. Basically, affirmative action in space. The implication is that once the Federation overturned those laws, colony projects suddenly got a lot whiter.
* Blake's 7 did this to various degrees for Blake/Jenna, Avon/Cally, Tarrant/Dayna, and Avon/Soolin.
* Blake's 7 doing this to Blake, with impeccable timing and a perfectly calculated, calm sneer.
* Blake's 7 ends with Avon surrounded by Federation soldiers and everyone else on his side apparently dead (with Blake, at Gareth Thomas' specific request, killed off). The sound of a firefight is played over the closing credits. This was done deliberately with the intention that, if the series was renewed, they could easily kill off any character whose actor did not re-sign their contract while having the characters of returning actors survive the shoot-out. The fact that the series was not renewed for another season means that the fate of every character is intentionally ambiguous - and never resolved.
* Blake's 7 episode "Sand", Del Tarrant and Servalan are trapped by the monster of the week and apparently doomed. There is a heavy hint that they spent some time sweetening each other's final hour before stumbling upon a way of escape.
* Blake's 7 episode "Ultraworld": Tarrant and Dayna (an explosives and weaponry expert) are captured by the Ultras, who want them to demonstrate the "human bonding ceremony" so they can catalogue the information on their computer. They decide to humour the Ultras, while using the "ceremony" as cover for Dayna to extract an explosive device she has hidden in her tooth (?!). She blows a hole in the wall, they escape, the nonplussed aliens are left wondering what happened (one says something along the lines of "Was that the human bonding ceremony?")
* Blake's 7 every 35 generations and attempt to get through a particular door. Turns out the door is a long-range teleport to a robot spacecraft traveling to another world with fresh resources. When the spacecraft arrives and the population are technologically advanced enough to get the door open, they can all travel through.
* Blake's 7 explode after being teleported into space, but it is explicitly explained the first time it happens that this is not a pressure explosion but the result of teleporters being incapable of reassembling you properly if you get teleported beyond the safe range. ("Their atoms would be scattered to the solar winds" — poetically put.) On the occasions when a character actually went out of an airlock instead of being teleported into space, there is no indication they explode and in the first case, the body was clearly shown floating away intact.
* Blake's 7 featured not one, not two, but three Artificial Planets: Crandor, home of the Thaarn; Ultraworld; and Terminal (first called an "artificial planet," later called an "artificially modified planet").
* Blake's 7 Federation. Most torture occurs offscreen, but it's implied to be common procedure, especially for suspected politicals.
* Blake's 7 final episode. (Gauda Prime being the planet the massacre went down on.)
* Blake's 7 finds himself in a running dispute with cocky newcomer Tarrant over who should be in charge of the ship.

* Blake's 7 flees on realising it's going to fail, leaving a video message for her.
* Blake's 7 from another galaxy until the Federation (ironically the same enemy they're rebelling against) arrive to fight them off.
* Blake's 7, giving them enough time to escape before the sand regenerates.
* Blake's 7 had a couple of episodes that implied a human(oid?) galactic civilization existed tens of thousands of years before the present.
* Blake's 7 has put huge shoulder pads on Avon's leather jacket. Fans named the look 'Tugboat Avon'.
* Blake's 7 he could be interrogated, then brainwashed into publicly recanting his cause.
* Blake's 7 his fellow rebels were massacred but Blake's life was spared so he could be brainwashed into denouncing his own revolution.
* Blake's 7 holding it up long enough for the others to pass beneath it in "Pressure Point". In "Orac", a rotating tube elevator rises from the sand to take the protagonists to an underground bunker. The entrance to Xenon Base in Season D involves a pair of revolving triangular doors.
* Blake's 7 if the Liberator were captured, which it is on several occasions.
* Blake's 7. In an inversion of this trope, the scientists who study them live in an underground base, while the Links roam the surface.
* Blake's 7. In "Dawn of the Gods", a robotic slave catcher with teeth painted on the nose and glaring searchlight eyes is sent after our heroes. Some find it more terrifying than others.
* Blake's 7. In "Deliverence", a tiny spacecraft is spinning out of control down to a planet, so the crew eject in two unpowered survival modules. Having witnessed the incident, the crew of the Liberator go down to look for them.
* Blake's 7. In "Gold", Avon is approached by the purser of a spaceship carrying gold to Earth, who wants his help stealing it. Avon isn't above blackmailing Federation employees to provide this assistance, as we see in "Killer" and "Games".
* Blake's 7 initially controlled all of the settled galaxy, except for some outlying settlements, the anomalous Aurons, and a few insular and well-hidden aliens.
* Blake's 7. In "Killer", Avon and Vila blackmail a technician into helping them commit sabotage; however, he writes out a message (because Avon and Vila are listening in the next room) and hands it to an underling to be transmitted to Star Command, warning them of the rebels' presence. Later the technician crushes up the remains of a thermal bomb to avoid leaving evidence behind. As Vila is sweeping up the soot, he notices the pad used earlier and covers it with the soot to read the message.
* Blake's 7. In "Moloch", a brutal Federation soldier is said to enjoy; "women, food, and inflicting pain — in no particular order."
* Blake's 7. In retrospect, he thought he must have been mad, as some of them were quite dangerous.
* Blake's 7. In "Shadow", an organised crime boss prepares to make a nasty example of two people who tried to steal from him. However the example isn't to discourage others from stealing, but to show his superiors and underlings that he's tough enough to run his territory.
* Blake's 7 in "Solitude" and is promptly dumped at Avon's insistence. He returns in later episodes.
* Blake's 7. Ironically, this proved unnecessary as there was no season five.
* Blake's 7 is a classic example; pulpy and elaborate, with lots of weird Elizabethan touches. The episodes "Killer" and "Warlord" have some particularly silly examples.
* Blake's 7 is taking place between two gender-divided societies. Avon summed it up nicely: "It's a problem, isn't it? You can have war between races, war between cultures, war between planets. But once you have war between the sexes, you eventually run out of people."
* Blake's 7 is that fanon Blake is much more hypocritical, manipulative, devious, and stupid than the lone idealist he is in canon.
* Blake's 7. It ends when a large axe slams down on the table in front of her.

* Blake's 7, it features a character announcing, "I am not expendable, I am not stupid, and I am not going."
* Blake's 7, it has the added advantage of enabling extras to be reused for other roles.
* Blake's 7 it is generally believed that Avon survived the events of the final episode. This is probably due to the fact that at least two different sources (an Expanded Universe novel, and the actual attempt at a continuation — spearheaded by Paul Darrow) both used this as a premise for further stories. Therefore this has a bit more traction than theories about other characters surviving, which haven't managed to rise above fanon.
* Blake's 7, it's certainly true that the more embittered and morally-compromised Avon becomes, the more studs he wears, poses he strikes, and lines he delivers in staccato barks.
* Blake's 7. It's faster than any spacecraft in the Terran Federation, has insanely good firepower and shields, and technology as yet unavailable to humanity like a teleport and auto-repair systems that start repairing damage the moment it is made, making it the most fearsome ship in the galaxy.
* Blake's 7. Jan Chappell (Cally) accidentally does this to Sally Knyvette (Jenna) in the episode "Orac" and has to reposition her hand. Likewise Paul Darrow (Avon) wrestling with a female guest star in "Mission to Destiny" — perhaps that's why she hits him in the groin immediately afterwards?
* Blake's 7 justifications such as the atmosphere is too thin to support much vegetation, or the planet has been mined out by the Federation or devastated by nuclear or biological warfare.
* Blake's 7 less organized and systematic than the other examples of this trope.
* Blake's 7. Neither does the Federation use a state religion as a tool of power, which they'd certainly do if religious beliefs had any currency among the population.
* Blake's 7, not only does everyone in the future speak English, but they do so with a posh Received Pronunciation accent. Granted, we're not told how far in the future this is, nor their exact history, so it's possible media kept the language and accent mostly the same for centuries.
* Blake's 7": of four programmed guardians in a capsule carrying them and genetic stock, three survived stasis.
* Blake's 7 of the main cast is subsequently killed off shortly thereafter!
* Blake's 7 on a giant elevator, launches from a letterbox-shaped entrance set in a cliff, flies through a narrow canyon and up into outer space. Reverse for landing.
* Blake's 7 on the planet which the locals had threatened to detonate if the Federation attempted a landing.
* Blake's 7 Orac advises against it, but recommends that he should at least wait till dusk.
* Blake's 7: Orac, the super computer, who can read any computer with "tarial cells" and is therefore able to find any data the characters can possibly want. Whether he then tells them what he finds out is another story...
* Blake's 7 or just a brand name is unknown) with the soma presumably a downer to take the edge off.
* Blake's 7 poor taste. Auron main character Cally is notably absent from the bridge at this point.
* Blake's 7 promptly shoots it and offers to lead the way. But Servalan quickly regains her dignity and announces that she will lead and he will follow!
* Blake's 7 regularly featured women in high-ranking roles in the evil Federation, most notably Supreme Commander Servalan.
* Blake's 7 resulting in a bad case of claustrophobia and the fastest heist in history.
* Blake's 7 room they missed, that he uses to secretly keep things running for their barbarian descendants.
* Blake's 7's Director of Television, Bill Cotton, was enjoying the episode so much he phoned the transmission staff mid-episode and told them to announce that the show was returning.

* Blake's 7 Servalan cuts him off at that point, but Avon points out that he must complete the order or Zen won't accept the command; unless she wants to reprogram Zen, and he's probably the only person with the skill to do that.
* Blake's 7's fondness for Western themes, these made an obligatory appearance.
* Blake's 7; shown by planets rushing past and closeups of our heroes with the G-force buffeting their faces.
* Blake's 7: Sinofar and Jiroc, representatives of a long-dead civilization, appeared to use a combination of this and psionic powers to interfere with a battle in space and teleport selected combatants to a ritual battleground.
* Blake's 7", smugly pointing out that it will teach the others to ask questions in future instead of blindly following Blake's orders.
* Blake's 7 staring down at him, Vila moans, "I'm in Hell, and it's full of Avons."
* Blake's 7 suffered from this one; Paul Darrow, the actor playing him, says he became known as the "kiss of death". In fact one actress was truly furious to learn that he was going to kiss her, because she had been hoping to stay on for another episode.
* Blake's 7" take the cake: those of the weapons designer (the man in the picture) and the bond-slave (the woman). (As someone wrote, "It's hard to perform manual labor when you're dressed like Ming the Merciless.)
* Blake's 7 Tarrant goes out to look for Vila, but finds he's still alive because the place has a breathable atmosphere.
* Blake's 7, Terminal, Star One (a single planet orbiting a star). In "City At The Edge Of The World", Vila discovers a new world suitable for colonization, and there's a joking debate over whether to call it Homeworld or Vilaworld.
* Blake's 7: Terran Federation pursuit ships and planetary interceptors are commonly equipped with "plasma bolts", which can home in on (and strike) a target faster than light with accuracy and precision. They project enough force to destroy most unprotected space-based objects and craft in a single strike. Smaller Federation military vessels may be armed with up to four plasma bolt hardpoints.
* Blake's 7 that runs the Terran Federation) is buried in the mind of the King's Fool on a primitive planet.
* Blake's 7 that the spacecraft has reached its destination, and the wall is another disguised forcefield door with the air seeping in from the outside world.
* Blake's 7 that will kill everyone on the planet if he gets it wrong.
* Blake's 7 that will kill everyone on the planet. They deactivate the timer, but it turns out to be just a transmitter used to send the arming signal to the bomb which is thousands of miles away.
* Blake's 7, the button they thought would teleport him up does nothing, so they have to try buttons at random until it works.
* Blake's 7 the cell where the prisoners are. When he's inevitably overpowered, they then force him to open the door with his palm print (which, of course, opens from the inside).
* Blake's 7, the crew gets captured by an enemy that can keep them from lying, so they resort to evasions to prevent them from finding out that Orac is a computer.
* Blake's 7, the Federation's almighty presence is frequently signified by those white security cameras that show up everywhere, even the teaser.
* Blake's 7. Their only hope of escape is an unarmed and obsolete Apollo-era landing craft.
* Blake's 7, the Liberator crew occasionally used their teleport bracelets to deliberately beam unsuspecting villains beyond the safe range of the teleport, causing them to fail to be reassembled properly and dissipate into dust when they materialised. This was used on Vargas from "Cygnus Alpha" and several other villains-of-the-week.
* Blake's 7, the original team is formed when, having lost several of his own men exploring a deserted alien ship, the commander of the prison ship sends a boarding party comprised of prisoners. Not like that's going to go wrong.
* Blake's 7" the rebels are searching for a Federation officer, who unknown to them has killed a rebel and stolen his uniform. Because this man and other Federation troops are still prowling around, Blake is assigned a bodyguard. Of course the

bodyguard turns out to be the disguised Federation officer, which the rebels only realise when they finally locate the officer's file with his photograph.
* Blake's 7. There's also a crime syndicate that calls itself Terra Nostra.
* Blake's 7. There's also a Labour grade who are regarded as expendable slaves.
* Blake's 7, the roles of prosecution and defense are filled by human beings, but the "Judgement Program" or something similar processes the disposition of the accused. The Terran Federation was, of course, consistently depicted as totalitarian.
* Blake's 7. The stated reason that he wasn't armed doesn't really hold water. Apparently the moral is it's okay to kill innocent bystanders if they're carrying guns.
* Blake's 7", the titular location is an artificial planet made to recreate the history of life on Earth on an accelerated timescale. When the heroes encounter savage ape-like creatures, they assume them to be humanity's ancestors. Later, however, Servalan reveals that evolution on Terminal was accelerated even greater than anticipated.
* Blake's 7: The worm-like giant predatory creatures on Terminal which Vila referred to figuratively as "snakes" had mouths like this.
* Blake's 7 thinks that Earth's 20th Century was a more civilized age and proudly shows off his 'authentic residence' of that era (actually a 19th Century folly).
* Blake's 7, though, and would not count as this trope, and there were a few other ambiguous cases, having descended to barbarism after war or sociological collapse.
* Blake's 7. To ensure the maintenance of their own ethical standards, the Clonemasters clone themselves and indoctrinate the clones in their own belief system.
* Blake's 7 tries to send him back to his planet... but unfortunately for him, it's out of range.
* Blake's 7. Upon his death, the heroes moved in and made it their base of operations for the remainder of the season. When you are a marginal band of outlaws facing a star-spanning empire, there is significant psychological comfort of being hidden under megatons of rock.
* Blake's 7", upon realizing that he and his crew had not only accomplished nothing in the episode itself despite risking their lives repeatedly, but had actually benefited the villainess, he begins to laugh hysterically under the frightened stares of the crew.
* Blake's 7 was originally a man and was originally supposed to appear once. Once Jacqueline Pearce entered the picture, that all changed.
* Blake's 7 was originally supposed to be Vila, but his popularity with viewers saved him (polls ranked him the second favourite after Avon). So, the axe fell on Gan, who was the least popular.
* Blake's 7 was so loud that emergency services rushed to the site, and assistant cameraman Paul Godfrey had to run for his life when the wind blew the fireball in his direction, engulfing his camera in a ball of flame.
* Blake's 7 was still the expected trope. There are always two female members of the Seven — Jenna and Cally, then Cally and Dayna, then Dayna and Soolin.
* Blake's 7", weapons inventor Hal Mellanby uses "vitashock" rifles against barbarians trying to break into the entry hatch of his underground base — the idea being aversion therapy so they'll associate the hatch with pain and stay away, avoiding the need to kill them. However the barbarians aren't stupid; they work out what's happening and sneak up on their firing position during the night.
* Blake's 7", went so far over budget it affected the rest of the season — and became one of the best stories in the series.
* Blake's 7 when he accidentally drops the device he was using into the circuits.
* Blake's 7. When the fourth season opened, they had to take the show in a radically different direction to compensate for the changes.
* Blake's 7, who accuse him of child molestation, in order to subvert any revolutionary support he might acquire.
* Blake's 7 who has decorated his home with rare Earth artifacts including a tray of butterflies, now implied to be extinct (Blake later forces Sarkoff to come with

him by threatening to smash the tray).
* Blake's 7 who's just come up behind Servalan with a bow and arrow. Then a bunch of sword-wielding locals arrive and Servalan admits the gun is empty anyway. Everyone legs it.
* Blake's 7 will be called in to deal with particularly stubborn subjects.
* Blake's 7", without being so similar as to arouse accusations of copying.
* Blake's 7 works, and his captors realize too late he's giving it instructions to open fire.
* Blake's 7 Zen which is perfectly capable of piloting the vessel by itself. It's never revealed what the original crew size and purpose of the vessel is.
* Blake's 7: Zil is one of a humanoid species of parasites who live on the surface of a living planet called "Host."
* Blake's father Ghira instantly dislikes Sun once he notices Sun's feelings for her. He also lambasts Blake for her revealing outfit (in which case he would've likely thrown a seven if he saw her pre-
* Blake Shelton, a fan favorite, and a popular recurrent, despite only reaching #14 on the country charts. The same is true to a lesser extent with "Playboys of the Southwestern World", which only got to #24. "Kiss My Country Ass" is very popular as well, even though it was never a single for him (although a version by writer Rhett Akins hit the bottom of the charts in 2005 before Shelton covered it).
* Blake Shelton endorsed Craig Morgan's song "The Father, My Son, and the Holy Ghost", a song which Morgan recorded after his son died in an accident. Shelton loved the song and asked fans on Twitter to download and share it. Thanks to this, the song became Morgan's first entry on Hot Country Songs in several years and led to him re-signing with Broken Bow Records.
* Blake Shelton hit, but it still feels weird to listen to it and think that this was the dude who made "Boys Round Here".
* Blake Shelton mentions getting the finger from an angry driver in "Some Beach".
* Blake Shelton's career. His #1 debut smash "Austin" was followed by the #18 flop "All Over Me", while his second #1 hit "The Baby" was followed by the #32 "Heavy Liftin'" (and, judging from its chart run, that song was prematurely withdrawn for "Playboys of the Southwestern World", which fared little better at #24).
* Blake Shelton's song "Austin" is about a woman calling a man she broke up with a year prior and only getting his answering machine - but to her surprise at the end of every message, he mentions her by nickname and says that he still loves her. At the end of the song he calls her back, and when she answers it, she echoes the messages he'd been leaving, confirming at the end that she still loves him.
* Blake Shelton's song "Some Beach," he mentions going to the dentist, who doesn't even wait for the Novocaine to kick in before drilling.
* Blake Shelton stepped in and continued promoting the single, getting it all the way to a five-week run at #1.
* Blake Shelton's "The More I Drink" has the observation "The more I drink, the more I drink."
* Blake Shelton, was originally released by Christian musician Dave Barnes.
* Blake Skye Private Eye has all the auditory hallmarks of the Film Noir genre, with a twist of Lovecraftian horror in the mix.
* Blake Skye Private Eye includes many cosmic horror story elements, set against a film noir backdrop.
* Blake started off sounding very timid and unsure, which seems to be the result of her VA, Arryn Zech, not being fully prepared for the role initially. She started sounding a lot more confident and snarky as the show got rolling. As of volume 3, her voice is now sometimes losing a little of its deep, husky quality and slipping more towards Arryn's natural speaking voice (you can hear this best when she gets upset that Weiss might not be able to buy her lunch in "Round One").
* Blake thinks she's a coward because she feels her response to problems is to run away. Even her Semblance reinforces her self-belief by creating decoys that take her hits for her. Examples she uses to "prove" she's a coward include her fleeing the team when she actually lets slip to Weiss that she's ex-White Fang and her abandoning Adam during the Black Trailer.

* Blake. While she's not exactly deluded or immoral, she does still possess a very cold and cynical outlook on the world. She's also implied to be a former terrorist, if her introduction trailer is any indication.
* Blame 2017, getting to the point that he kisses her. He realizes that it was wrong though, backing away from anything else. Unbeknownst to him though, Melissa also has feelings for him, with her jealousy over this resulting in her plotting against him.
* Blame 2017: It's never said exactly what happened with Abigail. Other kids think that she's a "psycho", has multiple personalities and stayed in a psych ward. Whether or not any of that's true isn't clarified, though she did have some kind of past mental breakdown and psychiatric treatment. Mostly at first she just seems solitary and shows little emotion.
* Blame 2017 (its start at least), with the play being put on in the story as well.
* Blame 2017: Melissa leads the other kids in mocking Abigail over her mental illness, including writing cruel graffiti on Abigail's locker.
* Blame 2017: Melissa uses the fact her phone was taken by Mr. Woods (due to her using it in class) as alleged evidence he'd gotten her to send him risqué photos, since they were still on it. She actually took them for Eric.
* Blame 2017 with multiple personalities) and mocked generally as a result of her unspecified mental illness. She endures all this stoically.
* Blame 2017 wrote, co-produced, edited and directed the film along with her starring role. It's her directorial debut.
* Blame a few darkly humorous scenes though, near the beginning... If you squint.
* Blame and possibly where it was entombed until all of it's matter was eventually stripped away.
* Blame an incredibly rare and possibly extinct genetic marker. Kill 99.99999% of all humans would be more accurate.
* Blame consists of thousands upon thousands of post-apocalyptic wastelands stacked on top of one another and compartmentalized.
* Blamed for Being Railroaded: A game (tabletop or video) pretty much forces you to do something, only for in-universe characters or even the game itself to call you out for doing the thing you had no choice in doing.
* Blamed for Being Railroaded (The Plot demanded the player to do something heinous, and everyone hates their character for it)
* Blame features a race called the "Silicon Creatures" or "Silicon Lives". Like the rest of the cast, they're actually just advanced cyborgs who "evolved" from humans, but they're so heavily altered that it's hard to say if the fleshy-looking parts of them are really flesh or not anymore.
* Blame Game seems to be about the couple not returning each other's calls.
* Blame Game: The search for a scapegoat that completely spirals out of control.
* Blame Him: The first enemy you encounter in the game will stab you to death with a knife if she catches you.
* Blame Him: There's some streaks of blood on the floor of the room beyond the first code-locked door.
* Blame is a cyborg who has existed probably as long as the strange machine world of the manga. He is so old that he has forgotten even that he is a cyborg. At least, it seems so. It's hard to tell.
* Blame It on Lisa": Homer and Bart are stopped by a Brazilian lifeguard who notices they are American by Homer's shirt, which shows Uncle Sam devouring the world with the phrase: "Try And Stop Us."
* "Blame It On Lisa" is a very loved episode in Brazil, while it had controversy, many people grew to hate the show thanks to it, and eventually the episode was banned in Brazil for a few years, there are many Simpsons fans in Brazil that love the episode despite its inaccuracies, and even more thanks to the stuff they got right, it helps that Brazilians have low self-esteem and love making jokes about their own country. Special mention goes to the "But our money is too gay" joke, where Homer's kidnappers get a briefcase full of pink and purple money bills, Brazilians said how they needed the Simpsons to realize that in Brazil, bills of 5 Reais and 10 Reais are indeed purple and pink, and that's too gay.

* Blame It On Lisa", when the family visit Rio de Janeiro to find the orphan Lisa was sponsoring, they walk through a slum which has been painted different colors by the government to not offend the tourists, including the rats that cut across them.
* Blame it on socio-economic distribution. The southern booking philosophy could still work in wrestling today. It would also produce shows that fewer TV networks would be willing to air.
* Blame It on the Brain; Hermes and Zapp Brannigan each independently wonder where exactly one shoves things when dealing with a flying brain, and Bender informs Nibbler to 'cram it wherever you three-eyed critters traditionally cram things' when he believes he will have to walk across a narrow bridge over a deep pit.
* Blame manga with the main protagonist, Killy, who endures many physical hardships during his journey. By the final chapters, his otherwise indestructible body is literally falling apart.
* Blame on steroids, cocaine, and whatever stimulants it could find. It's a continuously built up (and spreading) structure that has recently passes Jupiter's orbit in its expansion. The Sun is "somewhere inside".
* blames all of them for what he did. He sees his ability to do so as proof of how great he is.
* Blame ten or so years later Cibo takes over of her past self's who was unfortunate enough to be shunted into the fight by the gravity furnace.
* Blame that chapters featuring only him may contain a lot of action but no dialogue at all.
* Blame The GBE is considered a Class 9 weapon of mass destruction in Blame and is VERY rare to to come across. To give you an idea, at lowest setting, it can shoot a beam 70 km long. Anything in this path is obliterated. At maximum firepower...um...you'd have to see it for yourself.
* Blame the misfortunes of your city/state/province/country on any number of
* Blame: The Silicon Life have been hunting humans since the dawn of the city, as they pose a threat to the established state of the Net Sphere. Humans fare no better: when they get a hold of the architects, they find no guilt in destroying entire hives, as told by Pcell in the sequel one shot. Neither seem to consider coexistence to be possible, even though the City is big enough to house both their civilizations. She seems to value human life, however, so there might be hope after all.

* Blam Machine Head starts after a programmer at the world's biggest manufacturer attempts to inject himself with nanomachines to remodel his physique, causing the nanomachines to go airbornes and kill anything not matching his DNA.
* Blanca, the cat with the blank face, is evidently a male, even though "Blanca" is the feminine form, the gibber-clip is the highest-pitched one used for females, and the outfit is the female skirt. She has no name in Japan, and internationally she's been changed into a girl.
* Blanche dared to attend her prom with Benjamin, despite the scorn of others. Dorothy assumes Benjamin was black. Nope. He was a Yankee from New Jersey.
* Blanche dated one man like this — she was so confused by the idea she misinterpreted it as him not finding her attractive.
* Blanche Dubois she's going through. Vivien was even cast because Elia Kazan's vision was Scarlett O'Hara losing her mind.

* Blanche is frequently referred to as making regular use of these, especially renting them by the hour. In one instance, she unknowingly books the girls into a hotel full of prostitutes and gets them all arrested.
* Blanche Monnier was a 24-year-old lively lady in France, 1876. When her mother learned that she was planning to marry a 'penniless lawyer', however, things turned tragic. The mother, after failing to convince Blanche to end the relationship, locked her in an attic, to a single bed, for twenty-five years. When an anonymous note to the Attorney General revealed the horrific conditions she was living in, police were duty-bound to investigate, and, subsequently, break her out. She was taken to the nearest hospital, and the resulting photograph shows her body, particularly her face, in all its uncanny horror. You can see by looking at her face that she had gone through something

* Blanche was about to be audited for evasion, something that she freely admitted to (she had failed to report the rental income she received from the three other women). Her brilliant plan to get out of this, was of course, to seduce the agent. So the day of the audit arrives and she's dressed in a slinky lingerie. . .only for the agent to be a stern, no-nonsense,

* Blandings Castle books, with the law firm called Shapiro, Shapiro, Shapiro and Shapiro.
* Blandings Castle, Lord Tilbury is annoyed when Galahad Threepwood, who knew him in his youth, calls him on his old nickname, "Stinker".
* Blandings Castle. The Earl's son Freddie qualifies as well; he's a profoundly useless but good-natured young man who ends up married to an American dog food heiress.
* Blandings Castle (without the violence or threats thereof), and the opportunistic pig-keeper George Cyril Wellbeloved as a more conventional Brighella.
* bland, mediocre econoboxes for turning Chrysler around, with many attempts to get him to run for President.
* Bland-Name Product, cheap China-made electronics tend to have brands like these. For example Tobishi (an amalgamation of Toshiba and Mitsubishi) and the unforgettable Panashiba (Panasonic + Toshiba), among others.
* Bland-Name Product than anything. The chain being referenced is a Tokyo-based department store named Isetan.
* Bland-Name Product version of the iPhone that Filburt and Heffer go nuts over at the start of the movie has a ninth version, which was skipped for the iPhone X.
* Bland-Name Product was very similar to the earlier game. It would take a good number of releases before it became a truly different game.
* Bland-Name Product (where characters always chew "Chewley's Gum" and eat fast food from "Mooby's").
* Blank: A Vinylmation Love Story exists to promote Disney's Vinylmation figures.
* Blank: A Vinylmation Love Story involves a pair of unpainted Vinylmation figures. In fact, a fair amount of the cast is faceless.
* blank. Big Jule had the spots taken off "for luck", but he "remember[s] where the spots formerly were".
* Blank Book: A character picks up a book, but it's blank or just has gibberish in it.
* blank cartridge replacing Hexum's, but was not renewed by the network.
* Blank Check as the villains are arrested by the FBI and he walks away from all this stuff.
* Blank Check is dedicated to examining director filmographies through this lense.

* Blank Check is mostly about a kid who lives it up with money he obtained dishonestly, but near the end, he suddenly knows how to use the layout of his castle to stop the bad guys who are out to get him.
* Blank Check moment in that the young boy actually gets a brief on-the-mouth kiss from the adult woman at the end, who tells him to look her up when he's older.
* Blank Check, there are romantic overtones between a woman in her early thirties and a little boy who’s eleven. She’s an FBI agent working undercover at a bank and he’s a kid who gets a million dollars when a crook almost runs him over. He claims he works (at eleven) for an older man who wants to meet her. They go on a date and she kisses him on the mouth and tells him to look her up in a few years and it’s not played in a negative light.
* Blank Check with Griffin & David movies, meaning they fell into this trope just by virtue of doing the podcast.
* Blank Check with Griffin & David was that they watch the films in chronological order and pretend not to realize that any more movies come after the one they're watching. Whenever the hosts would milk this bit for comedy, they would invariably proclaim, apropos of nothing, "I hate bits!" and assure each other that the podcast would contain "no bits."
* Blank Dream is themed around this. In order to reach your destination, you have to track down and experience six of the seven mysteries; the place where the mirror is locked away is considered to be the seventh.

* Blankets, after complaining about sharing a bed with his older brother, Phil gets locked in the "cubby hole", a small unlit room hidden in the playroom, that is covered in dust and filled with pests.
* Blankets, Craig Thompson mentioned a story about a babysitter who did something horrible to him and his little brother. (It's not hard to figure out just what it was...) However, the Babysitter's eyes are never shown. It's a very powerful method to inspire fear - the viewer never sees the full image of the babysitter, making some wonder what the babysitter's gender was, until later.

The woman, for obvious reasons, Kevin, because when he offered his hand to the woman, she grabbed his crotch instead and squeezed as hard as she could, and Blankman because, well... he's a bit of a dork who doesn't really know what's going on.
* Blankman routinely goes into... convulsions... when kissed or otherwise aroused. "Think about math..."
* Blankman, the young Darryl and Kevin rig their antenna up with kitchen items and utensils hanging on a line. During the scene, one of them ends up getting a foot in the toilet, which improves the signal, followed by repeated flushing that causes it to back up—And invokes the wrath of their grandmother.
* Blank Mastermind concerns an amnesiac villain who has to convince his henchmen that he hasn't lost his memories, stop his own evil plans and save his archenemy.
* blank replaced with things like Welshman or person with a senior citizen's bus pass.

* Blank Rune: Blodwen uses her healing powers to heal her friends and keep the living things in her house alive without having to worry about taking care of them. Including keeping her baked goods fresh.
* Blank Rune follows the story of Tana, a girl who lost her magic after the defeat of her masters.
* Blanks, also called "untouchables", "psychic nulls", or "pariahs", are very rare individuals who are psychically negative, or even soulless. They are practically invisible to psykers and daemons who try to observe them using their sixth sense rather than the first five, and a blank's presence will negate psychic abilities around them, makes them immune to possession, and will harm psykers mentally and Daemons physically. Blanks have variable levels of power, and they are measured on the same Greek alphabet scale as Psykers are: with Rho/Pi being the baseline human and the most powerful psykers ascending to Alpha. Sigma is considered to be the point where the "negative" side starts, the Tau (named for their species' position on the same scale) have a
* Blanks are this to psykers, who see them as a "hole in the Warp", and ordinary people generally feel disturbed in their presence (although depending on the source, a blank is either a person born without a soul, or just a person with a mutation that gives some humans psychic powers). Necron Pariahs have a similar effect, inspiring horror and dread in living beings.
* Blanks in battle while the more common Sisters crewing the Black Ships are considered suspect by them.
* Blanks in particular tend to be on the giving and receiving end of this trope. Being cut off from the Warp, which among other things embodies emotion itself, they are nearly incapable of forming emotional attachments to others and vice versa. Not surprising since they are the closest thing besides Necrons (the majority of which have lost their souls and individuality) to

* Blank White Cards is the closest we'll get to "Nomic with cards". The only rules are that the game ends when someone cannot play or draw a card, and the person with the highest score wins. Beyond that, the individual players can write or draw on the cards and have them do pretty much whatever.
* Blank White Eyes: Only started popping up at the start of the New Millennium.
* Blank White Void. Getting into a conflict with her sister, Betty, will break the seal, but Betty wasn't even aware of Melinda's existence. Even while sealed away, she was able to manipulate Melissa into becoming her apprentice.
* Blansky's Beauties character Carmine. That didn't help the show's ratings, but the show did introduce the actors who would play future HD regulars Lori Beth Cunningham, nee Allen, and the Fonz's very own cousin, who would eventually get his own spinoff...
* Blaqk Audio. It's either to pronounce it as "Black" or else it sounds like "blak-k" and "Blak-k Audio" just sounds dumb.
* Blaque: A girl-group similar to TLC, Blaque had a pair of hits in 1999 and 2000, the R. Kelly-penned "808" and the JC Chasez collaboration "Bring It All To Me."
* Blaseball, its rules have some differences. Not to mention that in baseball, players don't usually get incinerated by umpires.
* Blaseball, players are sometimes incinerated by rogue umpires mid-game.
* Blask Mask as well. While he does speak and he has human hands, his "mask" cannot be removed, he has no traceable DNA and his real name from the comics (Roman

Sionis) is never used.
* Blasphemous, and the people there often pray to the Miracle for heaps of it, this actually works out rather well.
* Blasphemous Boast: Someone brags about themselves in a way that insults a deity.
* Blasphemous Boast who made the claim, not Psyche herself. On the other hand, she got off lucky because Aphrodite assigned her son Eros to carry out the retribution... and he promptly fell in love with Psyche.
* Blasphemous can cut themself to trade health for Fervor (mana), and their sword, Mea Culpa ("My Fault"), is covered in thorns for the express purpose of making it painful to wield.
* Blasphemous has Melquíades the Exhumed Archbishop, a giant skeleton propped up by equally giant hands from off-screen.
* Blasphemous has this in the form of the Order of Kissers of Wounds. They have possibly the only Miracle-granted power in Cvstodia that isn't in some way horribly twisted: when they kiss the wounded, the wounds heal faster.
* Blasphemous Praise: Someone compliments another person in a way that insults a deity.
* "Blasphemous Rumours" is a song that's actually about the lead singer's
* Blasphemous skeleton, raised aloft by many hands. Given how the Grievous Miracle works in Cvstodia, it's entirely possible Melquíades's existence is now self-sustaining. He can certainly move his own arms and smack you with his staff without any assistance from the arms holding him up.
* Blasphemous. The protagonist has taken a vow of silence as part of his atonement.
* Blassreiter Gerd) is involved. It gets to the point where it seems like the XAT's job is half dealing with the Demoniacs and half dealing with the seemingly omnipresent news choppers and vans.
* Blassreiter is infected with nanomachines and transforms into an Amalgam. Beatrice convinces him that this is a good thing, as only the Demoniacs will survive the coming Armageddon, and he sets to work infecting the rest of the XAT, all the while claiming it's for their own good.
* Blassreiter kills off the entire XAT save Amanda at the halfway mark.
* Blassreiter was a racing champion who got half-paralyzed. And then ditched by his girlfriend. And then agreed to try "experimental healing".
* Blast Corps. A damaged nuclear missile needs to take the most direct route to a safe demolitions site, but there are a bunch of cities blocking its path, so the player needs to destroy them all. Why do you get to choose which order to play the cities in? Why do you get a medal for destroying all the other buildings that weren't in the way? Why can't you fly the impervious mecha all over the place instead of having to use what amounts to a big pick-up truck for half the levels? And why can you spend all the time you feel like fiddling around with bonus levels, when the missile is always a few seconds away from crashing whenever you enter a mission critical city? And why isn't there anyone else to help you? Who cares, It's fun!
* Blast Corps before it crashes. Then it starts turning into a puzzle as levels feature things like arranging cargo ships so the carrier can roll over water. Then it gains exploration elements as you hunt down the scientists, RDUs, and anything you haven't smashed to the ground yet. Then come the vehicle racing levels...

published nothing but those types of games. All of them were so bad that no one with a clear mind would ever buy their games.
* Blaster, a fusion between a Blastoise and a Cloyster, depicted as a Blastoise head in a Cloyster shell.
* Blaster Knuckle hunts demons that revert to a human form when killed, and have often taken the forms of women and children. The first issue kicks off with him stomping into a saloon and gunning down a pretty brunette pleading for help (she was actually a demon, but...).
* Blaster Knuckle. The Entire premise is about having an intimidating black protagonist kick vampire/demon KKK ass.
* Blaster Lashley after she had interviewed him about professional wrestling and the combat sports he had participated in.
* Blaster Master, a 4-wheel tank that has destructive blaster cannon, three sub-weapons, and is capable of jumping, hovering, swimming, and climbing wall/celling when it's fully customized.
* Blaster Master: Blasting Again's U.S. division closed down around the time and the game wasn't released until it was picked up by Crave Entertainment in 2001.
* Blaster Master book by F.X. Nine often mangles popular catch phrases. Jason usually figures them out quickly, though, and corrects her.
* Blaster Master Boy of the first game with new maps, bosses and weapons.
* Blaster Master can acquire a grappling hook attachment to allow it to zip up toward certain ceilings.
* Blaster Master for the Game Boy Color is similar to the original NES game, reusing graphics and music (albeit with different instruments) from it. However, the maps, weapons, and bosses are entirely new.
* Blaster Master for the Genesis ends with "THE END", then ellipses fade in to view one at a time, followed by a question mark.
* Blaster Master of the Stage 2 and 4 bosses, have different, more powerful attacks than their predecessors.
* Blaster Master, which is a stark contrast with the rest of the soundtrack.
* Blaster Master Zero and whisks you away to the true final level, ending with the ultimate fight against Sophia III possessed by the Mutant Core.
* Blaster Master Zero III versions of the MA pilot battles from the second game as well as Leibniz's rebuilt GARUDA. The ultimate battle of the title trilogy takes place between SOPHIA-J1 and the original Metal Attacker, with the twist being that you get to choose which side you're fighting as.
* Blaster Master Zero II who evenually gets their own sword. The ultimate fight this time is against Drolevo, the ultimate influencer of the mutants.
* Blaster Master Zero — Eve had been corrupted by mutant cells in her body, and she and Jason had to go on a journey to the planet Sophia for a cure — was resolved before they reach their destination, so that game's plot is still somewhat self-contained, with the only thing open is what happened to them after reaching Sophia.
* Blaster Master Zero, whose own popularity got big enough to eclipse the first game. There's still a little of this trope present in gameplay mechanics, though, as it's aesthetically based off of the NES original.
* Blaster Nation #297: It looks like Derrick is lying in bed (with Melissa asleep in his arms) regretting the fact that they'd made love. The rest of the page reveals that what was bugging Derrick was the radio playing Mexican polka music, and he couldn't get up and turn it off without disturbing Melissa.
* Blaster Nation, Ashley's mother dragged her out to "hang out at the mall" to set her up with Matt.
* Blaster Nation is heavy on this, especially Matt and the Fort Shadaloo group.
* Blaster Nation. The two-panel ads show a half-dressed Rinnie telling a pizza delivery man she doesn't have any cash and asking if she can pay some other way. The second panel shows her writing the guy a check.
* Blasteroids, that once destroyed release crystals that give you extra energy, "popcorn asteroids" that once fired begin to grow until they stop in a place and are indestructible until you clear and leave the stage, and kamikaze asteroids that

once hit will speed towards your ship.
* Blasters canonically function by firing plasma formed by energizing Tibanna Gas. Particle beams and laser weapons do exist in the setting, but are seemingly less efficient as infantry weapons, with a notable example of the former being the side mounted bubble turrets on the Republic Gunship, and for the latter, the Death Star.
* blaster shots, however using more advanced technology like repulsors is far more effective than smashing someone with a boulder repeatedly.
* Blasters (which fire particle beams) are overwhelming the most common weapon, particularly in millitary applications. "Slugthrowers" do still exist and are used for civilian applications like hunting (for instance, Luke's weapon that he tries and fails to use against a Tusken Raider in
* Blastfighter, a flashback to the murder of Tiger's wife shows her killer holding her head underwater in a bathtub, and then stabbing her in the neck with an icepick so he blood gushes out into the water.
* Blastfighter, he punches one of them through the window of the grocery store.
* Blastfighter, it explodes. When Tiger's car runs off the road, it explodes before it even hits anything.
* Blastfighter opens with Tiger being released from the state pen after serving 8 years for murdering the man who killed his wife. His ex-partner Pete is waiting to pick him up.
* Blastfighter, Wally and his cronies assault Tiger's friends in an attempt to scare him into leaving the poaching ring alone. However, when they attempt to rape Connie, Pete tries to intervene and Wally shoots him. Realising that he has killed him, Wally orders his men to kill everyone so there are no witnesses.
* Blastfighter: Wally Hanson, a poacher who kills deer slowly because he finds it more amusing and is perfectly willing to go after humans to keep his business going.
* blast from the Crucible save everyone from the Reapers as Shepard almost certainly dies series LOVES this trope, playing sad piano music whenever something even remotely sad happens.
* Blast from the Past, Calvin, an engineer, has created a bomb shelter to protect himself, Helen, his wife, and their incoming son. When the Cuban Missile Crisis begins, he takes her to the shelter, to show her that they would be protected in case war broke out. Just then, a fighter jet malfunctions and crashes onto their house and Calvin locks them in the shelter for thirty-five years, thinking that the Soviets dropped a nuclear weapon. Calvin enjoys the fruits of his labors, while Helen develops a drinking habit due to the isolation and claustrophobia, and since Adam was born and raised in the shelter, only goes along with it because he doesn't know any better.
* Blast from the Past, Calvin has his son Adam clap his hands over his ears and hum loudly to himself so he won't hear Calvin's horrifying description of the strange world of mutants and perversion outside the fallout shelter he's just seen for the first time. Adam is a bit exasperated, as he's a 30-year-old man, but he dutifully complies.
* Blast from the Past has a similar reversal, where the 50's valued Adam reintroduces honesty, chivalry, and (surprisingly) tolerance, albeit on a smaller scale than others on this list.
* Blast from the Past has never interacted with anyone outside of his family for his whole thirty years of living. Upon entering the outside world he falls completely in love with Eve and shows her a new perspective on life and about love.
* Blast from the Past. Living in a bomb shelter with your parents for 35 years will do that to ya.
* Blast from the Past's character thinks he's one, after fleeing into a bunker with his family for thirty years during the outbreak of the Cuban missile crisis, but the fact that the world didn’t end in nuclear war averts this and sees it played for laughs.
* Blast from the Past's childhood while growing up in an underground shelter since his birth in 1962/1963.
* Blast from the Past the main character and his parents spend decades in a

subterranean fallout shelter because his paranoic father though that a minor exchange between the US and the USSR caused World War III, and when the father goes outside after confuses 90s society with a post-apocalyptic world.
* Blast from the Past, the main character has been raised in isolation by parents who haven't seen the outside world in the past 35 years and have raised him according to early 60s social values. When he leaves the bunker to gather supplies, his unfamilitary with the modern world leads to plenty of awkward situations.
* Blast from the Past: The main character has the mindset of someone from the late 50s/early 60s because he was raised in a bunker by parents who cut themselves off from the outside world in 1962 and had no idea of the changes the world went through while they were locked away.
* Blast from the Past. The protagonist and his family, who retreated into a fallout shelter in 1962 and stayed there for 35 years, are so shocked by how much society has changed that they assume civilization was destroyed by a nuclear war.
* Blast from the Past The Webbers have been in the fallout shelter for decades and Helen is getting stir crazy. Calvin fixes hot Dr. Pepper for her to calm her nerves:
* blasting the control panel on the outside seals the door and blasting the control panel on the inside opens the door, not vice versa.
* blasting the shit out of heavily fortified positions or simply discourage the enemy cavalry from coming to the rescue.
* Blasto Bosc announces that his plan for the invasion of Earth is to "enslave their women, eat their children, and rape their cattle."
* Blasto, Bosc, is voiced by the game's assistant producer, Dan Mueller.
* Blast of Tempest, Aika Fuwa starts off the series dead. Despite this, there are many flashbacks to when she was alive, and most of the events in the series are either directly or indirectly influenced by her death.
* Blast of Tempest's Hakaze does this every time she has an internal monologue about what attracts her to Yoshino.
* Blasto is set on Uranus for the express purpose of making these jokes.
* Blasto, the first hanar Spectre, does not have time for your solid waste excretions. He also has forgotten whether his heat sink is over capacity, and wonders
* Blast Out, Colonel Hawkes gets dropped by a Mohawk arrow through his throat.
* Blast Out is ignited when Krug is shot in the back by a cook with a shotgun, then falls to the ground firing his submachine gun into the air.
* Blasto was cancelled due to the aforementioned Phil Hartman's murder two months after the first game's release.
* Blasto with a laser gun and you're most of the way there). He has a jaw that can easily be described as mostly neck, but it's actually so huge that when his mouth is closed, his chin qualifies as half of his face.
* BlastphamousHD, and told another story where he threatened to rape a man who kept hitting on his girlfriend while suggestively touching him doesn't help fend off this reputation.
* BlastphamousHD series, and it almost cost him his life when the girl's gang-banger fiancé found out about it.
* BlastphamousHD watches a "BlastphamousHD Roast" video, at least one joke will have him cracking up.
* Blasts of solar radiation cause the Earth's atmosphere to expand, greatly increasing
* blasts the players' clothes off of them in the process of getting them clean.
* Blast the Hedgehog, who's rarely seen, much less talks, since the 4th episode of
* Blast Works, certain enemies use exhaust which can destroy your ship and, when taken as your own, can save the moment as a very short range weapon.
* Blast Works. Making this feature even better is the ability to upload and download such creations via the game's official website.
* Blatant advertising is particularly prominent in motor racing, where uniforms, vehicles, and tracks are festooned with ads, cameras will go out of their way to film the ads, and the winning driver will shill for his/her sponsors.

* Blatant Burglar: Burglars and thieves always wear clothing that give away that they intend to rob people.
* Blatant Burglar: If someone goes about wearing a striped shirt and an eyemask, they're probably going to try and steal something.
* Blatant Burglar: Thieves stick out like a sore thumb by wearing such things as eyemasks, ski caps, and shirts with black-and-white stripes.
* Blatant Burglar: You can tell this person is a criminal because they wear such stereotypical garb as masks and shirts with black and white stripes.
* blatant cheaters with illegal movesets., however, and the opponents use Pokémon and movesets that are all legal. Only two instances of cheating - which aren't really blatant forms of cheating:
* blatant." However, in the end she gets away with most of the lies, and doesn't suffer any repercussions apart from stress.
* Blatant Item Placement: What's a medkit doing here anyway? Well, the wounded player won't be complaining.
* blatant lie on Diesel 10's part. He tries to deny the accidents he unintentionally causes and puts himself into, just to make him not look stupid, though Splodge don't buy it.
* Blatant Lies about the Comcast Master Race. In a later ad, Clean-Cut Verizon Guy is caught clutching the paw of a basset hound with pen in hand. ("I'm afraid the dog signed the contract, ma'am.")
* Blatant Lies. However, Cole, Josh, and Matt Striker still brought the awesome every week until NXT was relaunched as WWE's developmental show.
* Blatant Lies imaginable. Of all the monstrous races in the galaxy from the parasitic Khrave to the brutish Orks, the Dark Eldar are one of two things (the other being Chaos servants) you REALLY don't want to be taken alive by.
* Blatant Lies is not in effect, this often is instead. And the bigger and more outrageous the lie, the more unrelenting the BS onslaught, the better.
* Blatant Lies— Lies so obvious they lack even a shred of plausibility.
* Blatant Lies of how Joseph got the role of Kane and him explaining the Nod Ring theft in that he planned to steal one of them but someone else stole them before he could.
* Blatant Lies whose sole trait was being a pathological liar who didn't know when to shut up.
* blatantly descriptive, Milky Way. Others less familiar to Americans include Prince Polo, Lion Peanut, Oh Henry!, and Violet Crumble. Showing some awareness of this nonsense, one is literally named "Whatchamacallit." All those are variants on "rectangular lump of candy covered in a layer of chocolate."
* blatantly suggestive - they're in the extremely sexy... domain-name registrar business.
* blatantly (the original-character female protagonist saves "Londo" and "G'Kar" from a human-chauvinist terrorist attack and ends up dating "Garibaldi").
* blatant PR piece by Amazon to discuss its responses to the COVID-19 pandemic.
* blatant treaty violations, and the Federation wasn't exactly very quick to respond. That was a pretty complicated situation born of a monumentally stupid redrawing of lines on the map where Federation citizens ended up on the wrong side of the line... some colonies ended up in an ambiguous 'demilitarized zone'. Others ended up in enemy space and were evacuated, but many of the colonists refused to leave. In fairness to the Federation, there were more than a few in the hierarchy that were on the side of the Maquis (and the Cardassians also had to cede worlds as well) - it's just that the Federation didn't want another war. As far as Star Trek goes, this is one of the few political situations that had actual depth and not just good vs. evil.
* blatant", where a video of a Saturn V taking off was used to represent the launch of a rocket that looked nothing like it.
* Blattodea by Kabutomushi, handily explaining his pupil Anabachi also didn't die when Kabuto smashed his head against the floor.
* Blattodea, Yamato gets overwhelmed by the zombies while trying to keep them from rushing towards Chiyuri and Dinoponera. She is forced to leave him behind, but his

fate is left unclear.
* Blaxploitation: A type of action movie made in the 1970s and '80s where the heroes are always black.
* Blaxploitation: Exploitation movies targeted at the Afro-American market became cult successes, usually involving cool black people getting back at "the man" and white racists.
* Blaxploitation on the plantation. It ends with a black baby being born and the white owner murdering both his wife and his slave in revenge.
* Blaxploitation, seemingly made him all but unstoppable. What is it that finally laid the mighty monster low? The primal forces of nature themselves or divine intervention? No. The police sicced the hounds on him. That's it. Doberman Pinscher fangs trump bullets, apparently.
* Blaxploitation, which is about exactly what you think. A black mob fighting back against the system becomes increasingly radicalized until they're literally wearing SS uniforms and goose-stepping through town.
* Blazars bright, and relativistic lensing sometimes makes it look like the material in the jet is moving faster than light at first glance.
* BlazBlue: Alter Memory anime until she heard it from her colleagues two years later who, unlike her, were part of the cast.
* BlazBlue, Amane Nishiki is confused by a woman in multiple occasions. Just ask Bang, Hazama, Litchi, among others.
* BlazBlue. And like the aforementioned example, they are also discriminated against. A notable few just decided to take a more... radical approach to their protests.
* BlazBlue, and proceeds to grab Bang Shishigami's chest by accident. Tao, being an idiot, does not realize this for a little while.
* BlazBlue and uses Lambda's Idea Engine to upgrade his Azure Grimoire, break Hazama's lock on it, and unleash the True Azure. This might seem like an odd reaction given that they barely spent any time together, but when you remember that the she and the other Murakumo Units are clones of Ragna's little sister you realize that for Ragna this was like watching Hazama murder his little sister right in front of him.
* BlazBlue and when your opponent has 35% life remaining, but you need a spare Barrier Burst in order for it to work. They even changed some of their properties so they can now be comboed into.
* BlazBlue, are able to tap into the seithr naturally with no apparent ill effects.
* Blazblue are named after mathematical terms, such as If P Then Q, Y Two-Dash, Permutation N R, A±B, Equals 0 (which makes you invisible) and Zero Vector. His super moves are N Factorial, F Inverse, F Of G and F Equals, and his Astral Finish is named N To Infinity.
* BlazBlue army unit. It's an unofficial part of the army and answers directly to the Imperator. Their main duty is to look for and hunt any rogue members of the army, and kill them if needed.
* BlazBlue, Bullet barged into Litchi's clinic to ask for directions to Ikaruga. But when Litchi tried to cover that in a lesson, thus delaying Bullet, she threatened to attack. Before she could do that, Litchi started yelling like a sergeant, completed with overuse of maggot. She actually managed to make Bullet cry by calling her a crybaby, by the way.
* Blazblue, but for different petty, prejudiced, and generally despicable reasons.
* BlazBlue: Calamity Trigger (by her own admission, she dresses up other girls because she wouldn't fit into the costumes).
* BlazBlue: Calamity Trigger, just normal Ragna. As a result, while not a pushover, Hakumen still has it easier than most. To further reinforce the anticlimax-ness, the fight before him is (non-Unlimited) Nu.
* BlazBlue: Calamity Trigger lets you pay a small fee to unlock the "Unlimited" forms of some characters, instead of playing for them.
* BlazBlue: Calamity Trigger on Hazama/Terumi in Arcade Mode, he is still just warming up.
* BlazBlue: Calamity Trigger reveals that he's made a similar one named Ignis.

* BlazBlue: Calamity Trigger, the calendar never manages to reach 2200.
* BlazBlue: Calamity Trigger. The first thing you'll notice is that he'll already be across the screen in a few short frames, making him more annoying to fight than Taokaka in terms of speed.
* BlazBlue: Calamity Trigger when it's known there's a whole clan called the Kaka clan.
* BlazBlue can use his Ouroboros Drive in this manner to pull himself to his opponents.
* BlazBlue, causing the sea life and several other animals to go extinct.
* BlazBlue: Central Fiction has Ragna, about to erase himself from existence, giving Jin and Noel a group hug with Noel crying onto Ragna's chest.
* BlazBlue: Central Fiction). Izanami then tells Makoto to kill Noel so that said "wish-nullifying effect" could be gone... but then she points out that it means Makoto's wish, logically, can't be reality after all. Later in the plot, however, the heroes find the real issue behind Noel's problem, and in the end, Makoto gets her wish by herself.
* BlazBlue: Central Fiction Limited Edition includes an artbook, soundtrack, and Noel Vermillion Nendoroid Figure.
* BlazBlue: Central Fiction the main characters are trapped in a simulation inside "The Embryo". The majority of them are in a world very similar to the first BlazBlue game, but at certian point notice discrepancies and memories; for example, Taokaka feels like she already knows the Grim Reaper, Bang starts to wonder why he hates Kagura so much and Carl unexplicably starts crying while telling Celica that Nirvana is not his sister.
* BlazBlue: Central Fiction: The third act of each character's Arcade Mode ends with a different final opponent for each character, relating to that person's role in the story. For the protagonist Ragna, there are plenty of people who could serve as his final enemy: Jin, Terumi, Nu, possibly even Rachel or Hakumen. Ragna's final opponent is, in fact, Amane Nishiki - a randomer with whom Ragna has barely shared a single scene. However, it sets him up for his course of action over the remainder of the act, as told in Story Mode.
* BlazBlue: Central Fiction who began the series waging a pretty-successful war against the entire world government... but Lambda is going to protect him too.
* Blaz Blue Chrono Phantasma brings us Bullet, a character completely incapable of expressing either of her two emotions without first prefacing it with "dull". Calling her "butt floss" will elicit dull anger; just about anything else will evoke dull surprise instead.
* BlazBlue: Chrono Phantasma can summon the Slaver Trans-Am, two small drones that charge into enemies when she attacks.
* Blaz Blue Chrono Phantasma Extend Chibi Heroes Edition comes with a collector's box, artbook, pin badges, and a plush Jubei.
* BlazBlue: Chrono Phantasma has a magenta aura on his/her character portrait.
* BlazBlue: Chrono Phantasma, he turns to face the camera as if to say "What the eff?!" about what just transpired.
* BlazBlue: Chrono Phantasma Hibiki is strapped to a device that strongly reminds of a breaking wheel.
* BlazBlue: Chrono Phantasma is immune to grabs and immobilization effects. This includes a chunk of Distortion Drives and all Astral Heats. Several drives do not affect as well.
* BlazBlue: Chrono Phantasma was enough for her to punch him in the liver or the kidneys with much more force than usual. To be fair, being left overnight in prison without food because the guy you're supposed to be reporting to was drunk off his ass with a floozy in his arms makes retribution very hard to resist.
* BlazBlue, complete with digital monster in a coffin that shoots the beam. It has a four-year "cooldown" period, and the firing sequence is breathtaking to behold.
* BlazBlue: Continuum Shift after getting a one in the dice, despite Taokaka's warning that quitting the game will cause something really bad to all the participants. It results in everyone getting a permanent itch, and when Rachel came back to her mansion, the itch got to her as well.

* BlazBlue: Continuum Shift because in the actual story, Hazama was way meaner and Kokonoe had a justified grudge on him)
* BlazBlue: Continuum Shift but neither he nor Makoto ever met to verify if they experienced the same one.
* BlazBlue: Continuum Shift contains a big fluffy dog that barks repeatedly. Hype Dog swiftly became beloved by the fans.
* BlazBlue: Continuum Shift edition, you get to fight Unlimited Ragna as well. Hazama doesn't get a TFB.
* BlazBlue: Continuum Shift has him recall the time he, Noel, Tsubaki and Makoto (who he was at the academy with) had him go through one of these because he was feeling homesick.
* BlazBlue: Continuum Shift has the characters' story routes operate like this.
* BlazBlue: Continuum Shift has the fighters standing atop a speeding monorail.
* BlazBlue: Continuum Shift. Hazama is weakened significantly after being caught in a trap laid by Kokonoe and is ultimately killed by Hakumen in the True Ending. Relius gets his ass royally handed to him by Valkenhayn and while he comes out of it alive unlike Hazama, he's at Carl's and Litchi's mercy as the then former Imperator abandons him when he no longer proves useful.
* BlazBlue: Continuum Shift, Hazama shows up and tries to knife Makoto bald-faced; when Jin asks Hazama what he thought he was doing, Hazama said he was "educating a subordinate, like any commanding officer should do". Jin refuses to buy it.
* BlazBlue: Continuum Shift is banned on the grounds of suggestive and revealing outfits on some characters.
* BlazBlue: Continuum Shift, Nu-13, like, talked like a hybrid of this and a pirate in Ragna's gag reel.
* BlazBlue: Continuum Shift, Ragna". Ragna responds with "Hey, what the hell'd you call me?!"
* BlazBlue: Continuum Shift thanks to Phantom. Presumably this is a way to justify balancing him, the "strongest creature in the world" against the other characters in the inevitable sequel if he is playable.
* BlazBlue: Continuum Shift went the extra mile by making it much harder to unlock "Unlimited" characters without paying for them. You can also unlock Mu-12 by either spending several hours playing story mode or just buying her as well.
* BlazBlue: Continuum Shift where the final boss, after you have defeated him, comments that the fight was "a good warmup"... Yes, it's you, the player, who gets the "Uh-oh" line.
* BlazBlue: Continuum Shift, which is all about body switching. The voices actors of the characters don't change when they switch bodies, though their tone of voice does change accordingly.
* Blazblue Cross Tag Battle, and tosses them all together in a gigantic clash of worlds.
* BlazBlue: Cross Tag Battle characters being playable in a 2D fighting game for the first time ever.
* Blazblue Cross Tag Battle ends with the opponent turning to dust that flies away upon the final hit.
* Blazblue Cross Tag Battle has been accused of this compared to the previous titles, due to it being in permanent Stylish mode (Which allows for autocombos with the press of one button) while removing the Technical mode, the CPU being too easy, the Story mode being short, and in general, being directed to a more casual audience.
* BlazBlue: Cross Tag Battle, he's portrayed as a notably more grumpy and moody version of this trope.
* BlazBlue: Cross Tag Battle in her show, grunts in pain when hit and also giggles during some intros (her "voice" here is provided by Casey Lee Williams, the girl who provides the vocals for the show's songs).
* Blazblue Cross Tag Battle into an alternate dimension that resembles their respective worlds mixed into one. A mysterious entity reveals that there exist four special Keystones, one for each world; the side that gathers them all will be allowed to return home. So the race is on to gather the Keystones and possibly also

identify and confront the mysterious entity.
* BlazBlue: Cross Tag Battle seems to be the only one wearing the uniform properly.
* BlazBlue: Cross Tag Battle (so now Ruby could be in Es' colors too), or other characters from their respective series'.
* Blazblue Cross Tag Battle; the two show up together in the game's intro, and Makoto is the only character besides Yu to be perfectly nice and respectful to him.
* Blazblue Cross Tag Battle), which revolves around the characters being whisked away into another dimension by a mysterious cosmic entity, with a single spoken instruction: the side that gathers the "Keystones" gets to return home.
* BlazBlue Data, and Mu-12 initially starts off of this courtesty of Terumi's influence but once she regains her sense of self she acts normal.
* BlazBlue deals with this by giving each player a match point, unless said match point makes one player win the entire set. In that case, only the player who's behind gets a match point. If both players need one match point to win, the game continues into overtime instead of ending in a draw.
* BlazBlue, despite being just a kid, he's a vigilante that has captured many criminals with the help of Nirvana. He always talks in a very professional matter and dislikes being treated as a kid. His attitude does hide a rather vulnerable side of him, though.
* BlazBlue drops these a LOT in gag endings, with the English voice-actor's delivery being especially priceless. Case in point:
* BlazBlue either. In one cutscene she drops from the air and leaves a large crater where she punched the ground and, to further let you know how powerful she is, she effortlessly picks up and carries off an unconscious Tsubaki like she were a rag doll.
* BlazBlue embodies it. In Jubei's own words, it was "evil, the likes of which the world has never seen".
* BlazBlue fighting style, and those in the know often mock Kokonoe for bringing such a "flawed" creation to the fight.
* BlazBlue formula also follows this: Act 1 has people minding their own business again before Nine the Phantom pulls them into her place to direct them to face the "armageddon", the Imperator, Hades Izanami. Act 2 has them do just that, as Izanami is trying to create a "world of death".
* BlazBlue games are largely neutral, with both happy and downer elements and neither side getting a clear victory.
* Blazblue gives us the protagonist, Ragna the Bloodedge and his younger brother, Jin Kisaragi. The former is a wanted rebel who seeks to destroy the establishing government, and the latter is considered a hero by said government and embodies order. Ironically, in terms of personality, they're a lot more alike than either of them would like to admit.
* BlazBlue: Hakumen is acknowledged as the leader of the Six Heroes by virtually everyone. He had the greatest sense of justice and the power that was necessary to slay the Black Beast.
* BlazBlue has a human mother (Nine) and a cat father (Jubei), which explains her nekomata appearance.
* BlazBlue, has a special attack where she pins down her opponent, brandishes her claws, and then proceeds to rip and tear at them in a most violent manner. Of course, you don't get to see all of it— after about a second, it's behind a Big Ball of Violence, complete with Taokaka herself popping out and going back in here and there, and the "(|||ﾟ Дﾟ)" bubble from the character being torn apart on the side of the screen as well.
* BlazBlue has a very distinctive application/definition of the words "Phenomena" and "Observation".
* BlazBlue has several ranking soldiers within the NOL, but four of the named officers have no business being in their given posts were it not for the villainous conspiracy that put them there.
* BlazBlue has the 13th Hierarchical City of Kagutsuchi, the main setting of the first game. Every stage from it was set within the city's confines, but even as the story moved on to other locales like Ibukido, Kagutsuchi has remained a large part

of the series' mythos.
* BlazBlue has these in the form of Beastkin, human-animal hybrids manufactured to fight the Black Beast. These hybrids are considered by almost everybody to be second-class citizens.
* BlazBlue, have to win the Continuum Shift? Why? Because he ensured that there was no other possible outcome aside from his victory.
* BlazBlue. He even brings up to Jaune that, despite being old and blind, she's still easily able to kick his ass.
* BlazBlue; he is said to be the strongest vigilante by NOL's records, surpassing biological weapon Taokaka and ninja Bang Shishigami. The boy isn't even a teenager.
* Blazblue he was trying to make a move on Celica. And him trying to explain the situation to her doesn't seem to change her mind.
* BlazBlue:' "I am the man of love and justice, Bang Shishigami!" And while we're at it: "I am the white void. I am the cold steel. I am the just sword. With blade in hand shall I reap the sins of this world and cleanse it in the fires of destruction. I am Hakumen. The end has come!"
* BlazBlue. In particular, it's established that Amaterasu (aka the Master Unit) is the effective "God" of the verse.
* BlazBlue'. In practical terms, this means that she is Death. Not a being that embodies death, but death itself possessing the body of human. A rather dramatic underline for this is shown in Izayoi's Act 2 Arcade, where Izayoi stabs Izanami with the all-killing Immortal Breaker and Izanami doesn't even blink.
* BlazBlue insists "Good Guy" (Ragna) can't possibly be the same person as "Rawgrna" (Ragna's poster).
* BlazBlue) in their wielders in order to make them more "effective" in combat. Thirdly, there's also the fact that a Nox Nyctores shares the Ars Armagus' wonderful side effects.
* BlazBlue: In the story mode, characters only have 3 sprites - neutral, pre-fight and "defeated", and they do something unique in each. Though they also have certain other tics outside those sprites, such as Ragna face-palming, Nine holding a fire on her palm, or Azrael putting his hand on his pockets.
* BlazBlue. Ironically, Kokonoe was the daughter of Nine, one of the ten greatest sorcerers in the world (called the Ten Sages), and also inherits her magic potential.
* BlazBlue is another aversion. She's clearly a doctor and dedicated healer, but she never uses her medical knowledge for combat, usually fighting with telekinesis, chi control, and martial arts... nor does she specifically target body parts for medical damage.
* BlazBlue is backless with a halter top, detached sleeves and a tiny skirt. The top also opens down the front for an alternate look with bonus extensive cleavage.
* BlazBlue is so nasty that Ragna's arcade win quote consists of him recognizing it and warning Tsubaki that she should get rid of it as soon as possible.
* BlazBlue is talking, since they both commonly refer to characters by alternative names and/or titles. Here are a few examples:
* BlazBlue it makes people forget that he's an utterly nasty bastard, and just focus on the trolling (sometimes lumped with the more 'harmless' trolling) aspect.
* BlazBlue itself, there exists official artwork of a character called Alpha-1, essentially a gender-flipped Ragna as a Murakumo Unit.
* BlazBlue jumped in the way and took the blow. She then gives her powers to Ragna, resulting in him getting the "Idea Engine" merging with his Azure Grimoire which makes it's powers closer to complete. He then proceeds to wipe the floor with Terumi.
* BlazBlue. Later, the Ikaruga Civil War, in which Jin became "The Hero of Ikaruga" by murdering Bang's lord.
* BlazBlue Litchi Faye-Ling has really long hair, even after tied to a ponytail. The ponytail can come off and it still touches the ground.
* BlazBlue literally has the Praetorian Guard, which is composed of elite members of other NOL divisions.
* BlazBlue, Makoto's Astral Heat finisher Planet Crusher shows the moon in space

before being crushed to pieces by the impact of the opponent being sent flying into the moon.
* BlazBlue Mu-12, her tone plummets several octaves, in addition to gaining a reverb effect. When she eventually comes to her senses and gains proper control of her Murakumo Unit form, she also loses the deep voice.
* BlazBlue: Nu-13's Drive, "Sword Summoner", allows her to summon swords and other kinds of blades out of dimensional holes. She can position the holes around the target as she repeatedly attacks them, and later, she has a move where she sets a hole that shoots delayed swords.
* BlazBlue of, allowing the construct to speak for him while filtering out most of his unpleasantries.
* BlazBlue. Once she's freed from Terumi's influence, she acts more or less like her base form, Noel Vermillion.
* BlazBlue) or just shoves him the extent of his mad research, knowing that he'd pass out (in which case he'd probably move in for the kill if uninterrupted).
* BlazBlue. Perhaps the only example of a Villain's glamour failing due to sheer enthusiasm.
* BlazBlue played this trope when he was a child. Jin was described as a "crybaby", being sensitive and extremely attached to Ragna. He was often jealous of the attention that Saya was shown and would cry whenever Ragna was ill. He was also terrified of the moon, thinking it would crash at any second. It's easy to see why Ragna got so annoyed with him and paid more attention to Saya.
* BlazBlue, pretty much anyone who ends up getting lost seems to find their way into Rachel Alucard's mansion. Despite her claims it should be much harder to find/access. "How did you get in here?" is practically her catchphrase.
* BlazBlue protective of her. Their relationship is a major focus of the series at that.
* BlazBlue pulls this trope out during the Military Academy flashbacks from time to time with Tsubaki as the Alice, Jin the Bob, and Makoto the Dana. Makoto explicitly says that she "can read [Tsubaki] like a book when it comes to that boy" and that Tsubaki should "drop that good little cadet schtick and just say it".
* BlazBlue. Puppeteer extraordinary and is one of the people that is quite possibly the closest one that can be said to be Hazama's superior other than the Imperator. And he's a gigantic scum.
* BlazBlue, Rachel Alucard doesn't cast a reflection in any reflective surface, be it a mirror, a water puddle or a really reflective floor, due to her being a vampire.
* BlazBlue. Ragna is the brooding, cursing, hot-headed criminal while Celica is energetic, sweet, and an all-around nice person.
* BlazBlue, Ragna says that Taokaka's handwriting looks like chickenscratch.
* BlazBlue: Ragna was at some point before the start of Calamity Trigger nicknamed "the Grim Reaper". He also uses a sword called the Bloodscythe, which turns into a scythe during his "Astral Finish" move.
* BlazBlue remember, she doesn't). In this case their relationship is strictly platonic, however.
* BlazBlue: Remix Heart, and even fell in love with a male classmate. The manga ends with Mai fully accepting her change in life and seeing herself as a girl.
* BlazBlue: Remix Heart that none of her closest friends like her cooking. Except for Mai, due to her "super-taste" ability, she can sense the innocence and earnestness of Noel behind her efforts, which apparently makes it taste like heaven (to her).
* BlazBlue, said to Ragna by Hazama before a fight. He even seems to put on a faux southern drawl just to be extra hammy.
* BlazBlue's attention, who tempts her with a potential cure within the NOL's technology, in exchange for joining his side. As she's out of options, she reluctantly takes his offer, even with her knowing that Hazama is hardly trustworthy. This makes her part of the antagonist side, which continues to the third game; she does, at least, seem to be better off condition-wise, but Arakune's problems remain even then.

* BlazBlue seems to have any ability to recall him, and even that's no more than a mere remembrance of his "will to fight."
* BlazBlue series always has his face covered by a featureless white mask. His name means white face or blank face.
* BlazBlue, she even instructs Tager to prioritise a mission that will reward her with...a rare chocolate.
* Blazblue's Jin freezes people with a variety of ice powers which hurt no more than a normal hit (and considering the attacks involve giant wolf heads, swords and some kind of weird flying surfboard...)
* BlazBlue's Litchi Faye-Ling has a lot of Yin-Yang motifs, her emblem has a Yin-Yang, one of her hairpin is based on a Yin-Yang and in some of her win poses, she's making out a dragon-like motif out of her hand.
* BlazBlue smarts and common sense, which serve her to no end in her job as an Intelligence officer.
* BlazBlue, some as intel units, and a few (like Tsubaki) serves NOL's unofficial black ops unit.
* BlazBlue special match intro. The fight starts because he tries to cop a feel.
* BlazBlue, stating that the world is nothing but lies, everything should die because the only truth out there is despair, and he sure as hell will show them by having Mu-12 destroy Master Unit Amaterasu.
* BlazBlue take turns in this trope - the badass doing the saving is the other one.
* BlazBlue: Taokaka often forgets things that are told to her just seconds after the fact.
* BlazBlue that half of the cast are in possession of are the creation of Nine.
* BlazBlue: The color of a super flash indicates what kind of move your opponent is about to unleash:
* BlazBlue the criminal with the SS rank before she hacked into the government's database to delete the infos about her.
* BlazBlue, the Distortion Drives that take only 50% Heat and don't guarantee a kill have a blue background, while the sure-kill, 100% Heat Astral Heats use a black background with the character's crest overlaying in red briefly.
* BlazBlue: the Ikaruga Civil War, set 5-6 years ago from the present, becomes important in the third game as many characters deal with its aftermath, namely Bullet, Kagura, Azrael, Kokonoe, Tager and Bang. Jin in particular is the man he's now partially because he participated in the war and became its "hero".
* BlazBlue, the NOL branch office is usually mysteriously empty when characters show up there in story mode.
* BlazBlue, the world runs on a quantum principle, i.e "multiple worlds" and uncertainty theory where there exist multiple "possibilities" of events and things in the world. Someone with the power of Phenomenon Intervention is able to change something happening with an existing "possibility" for it. Noel, with her "Eye of the Azure", can see through multiple possibilities and "shift" them around (at first unconsciously, later at will), causing the phenomenon called "Continuum Shift".
* BlazBlue to a cooking contest where Noel and Izanami's cooking wipes out some of the other contestants.
* BlazBlue to almost everyone he interacts with. Over time, he goes through a sufficient character arc, learns how to wield his own powers properly and becomes a more responsible and heroic individual. So he starts off vanilla, while gaining more flavor over time.
* BlazBlue to cut out the part of her brain that governs it. This severely weakened Terumi and she utterly destroyed him when they met face to face.
* BlazBlue, to get all the different endings for the characters in Story mode, you actually have to purposely throw important fights to trigger the different cutscenes and alternate endings. Winning every fight in a particular story usually only unlocks about 50% of the story possibilities for that character!
* BlazBlue. To make things worse, her life is on the line as well, not getting the cure means she will succumb to the same corruption afflicting Arakune and die, leaving everyone else she loves in despair. Not to mention, throughout the

offering, Terumi constantly pressed on Litchi's kind-hearted nature and desire to help everyone she knows (only she hasn't given up on Arakune), exploiting nearly everyone else's ignorance of her plight or their dismissal of her as 'a crazy woman trying to cure her blob-boyfriend who is already a lost cause and better off dead'. Yes, there's a lot more in line than mere obsession here.
* BlazBlue to other Japanese media, and averts, subverts, inverts, double subverts, deconstructs, reconstructs, and generally toys around with these tropes and stereotypes.
* Blazblue two of Litchi's distinguishing features, but that she's downright obsessed with breasts in a seemingly fetishistic way... as seen at one point with the poor 'Average' Tsubaki.
* BlazBlue universe, there is the ongoing conflict between the Novis Orbis Librarium and Sector Seven, who respectively use Magic and Technology.
* BlazBlue uses twin butterfly knives in combat, and has several more hidden within his pockets.
* BlazBlue wear yellow hooded jackets that conceal their entire face, revealing only glowing eyes and a fanged mouth.
* BlazBlue when Hazama loses by time out. As if to mock you for not being able to knock him out before the timer runs out.
* BlazBlue, where an over-the-top metal song chronicles his manliness.
* BlazBlue where any reality-warping effect (which may also affect her) cannot reach, allowing her to keep track of what happened in case she gets amnesia.
* BlazBlue, where a successful use results in the enemy being frozen in a giant block of ice that shatters to let their corpse fall out.
* BlazBlue which can be used to bind criminals and drag them to the nearest NOL outpost).
* BlazBlue, which he only uses to stop victims dying too quickly. Many characters find it hard to believe that Azrael is even human at all.
* BlazBlue, which is creepy as hell coming from what looks like a human girl.
* BlazBlue while in the presence of the other members of the Six Heroes, made it easy for people to connect the dots.
* BlazBlue who finds a new purpose in life. His prosthetic doesn't change any, though.
* BlazBlue, whom her little brother Carl described to be so kind, caring and compassionate that he seriously adored her. Obviously, when she had her soul plucked out by their father Relius (callously, no less) into the Nox Nyctores Nirvana, Carl swears revenge and eternal hatred to Relius.
* BlazBlue (who saw a nuke strike against the Black Beast do jack-shit to it) is understandably horrified when he finds out.
* BlazBlue, with Noel Vermillion, Jin Kisaragi, Tsubaki Yayoi, Makoto Nanaya and Carl Clover all having attended during the backstory.
* BlazBlue with the Cauldron is used more deliberately by Rachel carrying Ragna to about 94 years ago to do a timeline fix that "makes the history more defined" (long story).
* BlazBlue world could probably do with sedatives in the water supply.
* BlazBlue, you have one villain you just can't help but laugh with even as he commits atrocity after atrocity.
* BlazBlue zig-zags this trope a lot with the girls in varying states of dress while the guys are more covered up most of the time, but a few concrete examples exist.
* Blaze: After kidnapping a baby from a rich family, Blaze spends a good part of chapter 13 putting one of these together for his ransom note since "that is how they always do it in movies". He has to start over a few times when he reconsiders the best way to word his demands.
* Blaze and the Monster Machines act and sound like they're adults, predominantly at least 18-21 years old, seeing they're old enough to get adult jobs and even live on their own.
* Blaze and the Monster Machines and have a major themed focus of teaching in return (STEM for the former, Spanish for the latter).

* Blaze and the Monster Machines: Crusher pulls off this trick in "Race to Eagle Rock" and "Deep Sea Grand Prix". Blaze falls for it both times, but it's the latter that he actually realizes he went the wrong way.
* Blaze and the Monster Machines has AJ, the titular character's driver, and Gabby, the mechanic.
* Blaze and the Monster Machines has a tendency to hug Blaze so hard that he struggles to breathe.
* Blaze and the Monster Machines has a "Visor View" built into his helmet to see things no one else can't. As the show progressed, this became rarely used.
* Blaze and the Monster Machines in Season 3. Some even begin minutes before it left off. These are absent on all digital releases.
* Blaze and the Monster Machines: In the "Robot Riders" miniseries of Season 4, Blaze and his friends do this whenever they land after falling or jumping off a high place in robot form.
* Blaze and the Monster Machines. Jenna Dewann's character Bunny was inspired by a drawing her then 5-year-old daughter drew of a fan character for the show.
* Blaze and the Monster Machines where all creatures are despised as monster trucks (animals included).
* Blaze and the Monster Machines, where all the vehicle characters' eyes are black, with the only exception being the eponymous monster truck whose are blue.
* Blaze and Violet are borderline cases. They definitely have magic of some sort, and ally with Omen and Vern at various points, but their magic is rarely shown.
* Blaze: Blaze finds himself on the receiving end of this the first time he has to change the diaper of Joe, the baby he abducted for ransom.
* Blaze is a princess who safegaurds and retrieves her dimension's Sol Emeralds, and can fight anyone who threatens any of them. She also can match with Sonic.
* Blazen!. Although, Comedic Sociopathy pretty much sums most of the comedy in Blazen. Just look at Jin and Hazama...
* Blazen, plays out the beginnings of the scene where Nu-13 first appears very seriously, but quickly allows it to descend (still entirely in robotic monotone):
* Blazen Sun, the oldest of the captains (he's over 130 years old and, in chapter 11 of the sequel
* Blazen Sun, who's over 130 years old and is one, if not the very last, of his generation still in the Guard. Still sharp as a tack — he
* Blaze of Glory, and says to him, "whatever Kid Colt was, he was better'n you".
* Blaze of Glory) are a group of mercs who became disgruntled with the New Republic. Feeling that the Republic wasn't doing enough, the Red Moons decided to do something it.
* Blaze of Glory: If you never read an issue of Carter Slade!Ghost Rider, you might not guess that there's nothing supernatural about him at all. It's just a phosphorescent costume.
* Blaze of Glory killing Reno Jones, telling him that "No one kills Reno Jones but me!"
* Blaze of Glory leading the nightriders into an all-out attack on Wonderment while our heroes do their best to drive him back, even if they have to die trying.
* Blaze of Glory son Cass how to fight, because he won't let him go down the same path as he did.
* Blaze of Glory to scare the city's minority populace, and kill and burn the town and its people indiscriminately solely to scare them into leaving certainly earn the name Terrorists.
* Blaze of Glory western heroes, you bet your six-shooter they're all badass.
* Blaze (or Love in the Time of Supervillains), has worked his way through a long string of blondes, Blaze being the latest target...
* Blaze, seven is identified as a powerful mystical number that can hurt demons and undead beings.
* Blazes spawning from Blaze spawners and patrolling the corridors (and after 1.4.2, Wither Skeletons now spawn there too). The fortresses are little more than enormous bridges, corridors and empty rooms, making their actual intended purpose unclear.

* Blaze the Cat has purple fur and wears mostly purple - she's a princess, protector of the Sol Emeralds and controls fire.
* Blaze the Cat is also an example. She propels herself forward using her pyrokinesis, allowing her to run almost as fast as Sonic.
* Blaze Union, and downright thuggish. Her male half cheerfully announces to the stunned women of the game's cast that "oh right, sorry, I forgot to say: I'm a man at night". Equally shocking to people who first see Male!Iita and then realize that what they thought was a boy dressed in girl's clothes is actually still physically female.
* Blaze Union, at least from the way Garlot immediately groans and goes "well, here we go again" when he falls for Medoute.
* Blaze Union comes to yell at them for fooling around, they make her give it a try too. Medoute instantly takes a liking to cannon-firing as a form of stress relief and immediately gets carried away.
* Blaze Union covered by this trope, whereas Aegina's path deals more with coming to terms with grief and the truth and finding one's place in the world.
* Blaze Union games except Riviera, the A ending is the one that's canon regardless of how "good" or "bad" it is.
* Blaze Union in one of the game's endings. Their feelings for each other are both very mutual and very genuine.
* Blaze Union, Jenon attempts to confess his feelings for Siskier but stops himself at the last minute when he finally realizes that she's in love with Garlot.
* Blaze Union: Pandra is one of the nastiest varieties of the trope; he may have originally rebelled out of the people's interests, but has degenerated into being worse than most bandits. As he intends to thieve, pillage, and rape his way through the country, he has a tendency to get curb-stomped by the heroes quite often.
* Blaze Union. She tells him no thank you so that she'll have the excuse to cuddle up with Byff the immensely fluffy tiger instead.
* Blaze Union, the descendant of Gill the legendary dragonslayer, mentions repeatedly that she's from the secondary line. Characters also discuss that due to the Imperial bloodline being so diluted and spread throughout the people, it's not unusual for children qualifying as Brongaa's descendants to be born in all walks of life; the interesting thing about Gulcasa is that he's the first pureblood to be born in centuries.
* Blaze Union, the two are about the same age physically, and Nessiah is also the smaller and more delicate of the pair. Over time, the two of them shed this trope as Gulcasa becomes more emotionally dominant and Nessiah more dependent.
* Blaze Union, though the former isn't exactly aware of the nature of the shared suffering in that case.
* Blaze Union winds up on hold when the issues that have been plaguing Aegina boil over and she takes center stage. (The other two routes, however, do each have some form of resolution.)
* Blaze Ya Dead Homie from the 1980s, which is why much of his music sounds like late-1980s gangsta rap.
* Blaze Ya Dead Homie, swimming in a portable toilet and things that are too graphic to describe here.
* Blaze, Zoe, and August are this to Lila. Their torture of her in the past, and Lila’s imprisonment of them has resulted in both groups having equal animosity towards one another.
* Blaziken and Beartic have crotch-tufts as well. Thanks to an unfortunate 3D model, Blaziken's looks particularly phallic in
* Blaziken is very popular with bird furries, especially those who are into
* Blazing Angels and two, over time, your service record indicates hundreds of aircraft destroyed, thousands of vehicles blown up, and dozens of ships sent to Davy Jones Locker, and stopping entire enemy offensives single-handedly, and in the endgame, your final objective, destroying an elite German jet squadron, has them taunting you. You've destroyed a twentieth of the Axis air force, a Panzer army, and a quarter of the Japanese Navy, and they STILL INSULT YOU? Granted, in the sequel, the game makes up the excuse that you are in a top secret elite squadron

who has experimental equipment, and you get all of the nation's top awards, but that doesn't cover up the fact that you destroyed enough enemy units to make up the campaign record of an air force.
* Blazing Angels flying missions in France, England, and Africa before transferring to the USAAF for the remainder of the game once America enters the war.
* Blazing Angels it by having your character perform the actual repair, while being talked through it by your teammate.
* Blazing Angels states you can play the skirmish mode in single player (you can't) and describes several multiplayer modes that are not present in the final game.
* Blazing Blade and important to the story, western players generally take her for a random cute girl that gives the hero an item after some mysterious dialog.
* Blazing Blade. And there's also a set of twins: the cheerful mage Lugh and the snarky shaman Rai.
* Blazing Blade, it wouldn't be a stretch to assume that if this weren't an E-rated game, he would be throwing out swears liberally.
* Blazing Blade move from the center of his chamber and can therefore only be hit by the Longbow, which has no innate critical hit chance and is weaker than any other bow.
* Blazing Deserts DLC adds a southern civilization with Arabic and Persian trappings, made of three city states with Arabic-sounding names. The southern civilization is described as being scientifically more advanced than the northern factions, like medieval Arabic civilization was more advanced than medieval Christian Europe.
* Blazing Dragons adventure game. Flicker uses his first invention, the clicker (which was otherwise pointless for the whole game) to trick the evil wizard into exploding the transformed robotic evil dragon king, which they were inside at the time. Because the sound of the clicker was exactly the same sound as the switch on the self-destruct mechanism.
* Blazing Dragons Benthehyena, or Natacha Satari. Her most notable contribution to the fandom is co-creating the #BDRevolution campaign with Season 2 story editor Erika Strobel.
* Blazing Dragons: Discussed. At one point the smart knight announces he was rewarded with a ribbon for deducing the world was the shape of a duck... he was in an insane asylum at the time, take that as you please.
* Blazing Dragons is accidentally knocked out the tallest window in Camelhot by Sir Loungelot. Although it is debatable whether the fall kills him, we never see him again for the rest of the series.
* Blazing Dragons is stuck at Stage 2 as of now, but the #BDRevolution movement has been trying to get the series bumped up to Stage X.
* Blazing Dragons — Co-production between Nelvana (Canada) and Ellipse Programme (France)
* Blazing Dragons, "Quest to Success / Slay the Dragon", plays out like an ordinary episode.
* Blazing Dragons Season 2 had thick lines (along with some radical changes in character design) that was a sharp contrast to the cleaner look of season 1.
* Blazing Inferno Hellfire Sauce: A hot sauce that is extremely hot, causing whoever consumes it to try and cool off the burning taste in their mouth.
* Blazing Inferno Hellfire Sauce formally added the word "sriracha" to their dictionary in 2018.
* Blazing Inferno Hellfire Sauce. None of them feel its effects at first, then it kicks in shortly after Eddy expresses his disappointment with it.
* Blazing Lazers, the player can acquire homing missiles which fire in many different directions. One type of enemy can also do this with its own missiles.
* Blazing Moves involve this, and typically are the signature of fatter characters like Bone Crusher. Subverted in that they can be performed by even the thinnest player characters with the move available, and in all of them, the attacker lands chest-first.
* Blazing Saddles. After Sheriff Bart blows up Mongo and captures him:
* Blazing Saddles. Although they aren't mercenaries per se, the railroad workers

are willing to help the people of Rock Ridge against Hedley Lamarr's troops.
* Blazing Saddles, among the many criminals recruited into the outlaw army of the bad guys are a number of Klansmen. The heroes use their sheets to hide in the crowd, but Bart blows his identity when he reveals his black hands.
* Blazing Saddles: An army of anachronistic villains out to destroy the town of Rock Ridge is stopped dead in their tracks by a toll booth erected in the desert. Absolutely nothing prevents them from going around, but they send runners back for change and then pay and go through one at a time.
* Blazing Saddles and finds out Bart and Jim have tracked him down when the movie screen shows them outside the theater... and they then go into the theatre to find out how things end...
* Blazing Saddles", and in the part where Slim Pickins' character is describing his plan to Hedley — it initially seems like the bandits are just planing to steal things and kill those who resist but spare the women, but it turns out that they just mean to rape them after they're done with the town.
* Blazing Saddles, and the script completely lacks the spoofing and humour style of the film it spun off from.
* Blazing Saddles: "Badgers? Badgers?! We don't need no stinking badgers!"
* Blazing Saddles, Bart gets on his gun belt to shoot the wild man, Mongo, but Jim warns him not to.
* Blazing Saddles: Bart, the new black sheriff, strikes a friendship with Jim, a drunken gunslinger, whom he does not believe is the infamous "Waco Kid". To prove himself, Jim encourages Bart to clap his hands onto a chess piece starting with his hands about about a foot apart, and Jim halfway across the room. Bart claps his hands around the piece, and Jim apparently doesn't even move. When Bart opens his hands, he finds them empty, and Jim reveals that the chess piece is now in his previously empty holster.
* Blazing Saddles became "Μπότες, Σπιρούνια και Καυτές Σέλες" (Boots, Spurs and Burning Hot Saddles)
* Blazing Saddles: Brooks shows up as a Yiddish-speaking Indian chief, the governor who appointed Bart, an aviation pilot among the villains hired by Lamarr, and a couple voice cameos in Lili von Shtupp's musical number.
* Blazing Saddles, but nevertheless succeeds in rallying the townsfolk to not flee Hedley Lamarr's thugs.
* Blazing Saddles cartoon, no fourth wall, the villain drives off-set at the end, and more.
* Blazing Saddles commissary. An actor dressed as Hitler (who is implied to be Jewish) mentions "the bunker scene" before the place explodes into a hilarious pie fight. As the brawl unfolds, said actor can be seen in the background, tossing out rapid-fire Nazi salutes for absolutely no reason at all.
* Blazing Saddles could manage. It was almost two decades before anyone took the Western seriously again.
* Blazing Saddles + Cowboys + Pot full of beans = Memorable (and funniest!) Movie Scene in Cinematic History. This also allows for some of the Funniest Closed Captioning in Video History, as little "pffts" pop up all over the screen, theoretically following each fart.
* Blazing Saddles, during the "Great Pie Fight" scene in the studio commissary near the end. Everyone gets pied; villain Hedley Lemarr tries to avoid the carnage by ducking back into a restroom, but someone's waiting for him in there, and Lemarr comes out with his face completely covered by the pie he was hit with.
* Blazing Saddles ending music...and comments that the hardest part of the whole routine was inventing the Candygram.
* Blazing Saddles, finds Hedley Lamarr, a corrupt government official, trying to drive the settlers of an Old West town off their land so he can steal it. Forced to appoint a sheriff, he selects a random black man, expecting the racist townspeople to be so demoralized that they give up. He certainly didn't expect the sheriff to stop crime and win over the town...

* Blazing Saddles. (Fortunately, Mongo's in a good mood, considering.)
* Blazing Saddles had a special scene written just so Dietrich could show off her accordion. And her legs, of course.
* Blazing Saddles had deleted scenes that turned up in commercial TV prints in part to replace the most vulgar ones from the theatrical cut. These include more "Sheriff Bart fooling Mongo" stuff and a scene where Gov. LePetomane goes into the fake Rock Ridge and shakes hands with its cardboard "residents".
* Blazing Saddles has former gunslinger "Waco Kid" Jim telling the woeful story of his career and how he reached a point where he nearly gunned down a six-year old who challenged him. He threw down his gun to end his career, at which point the "little bastard shot me in the ass!"
* Blazing Saddles has the villagers contribute by making a fake version of their town to lure the bandits into it and then blow it up. Then the heroes lead the whole town in a massive brawl with the remaining bandits.
* Blazing Saddles has this dialogue exchange: "Am I wrong, or is the world... rising?" "I dunno, but whatever it is, I hate it."
* Blazing Saddles. He buys a ticket and sees a later point in the film — showing him that Bart is on his trail. He runs outside to have a final confrontation with Bart. After Bart wins, he and the Kid go back into the theater to see the end of the movie.
* Blazing Saddles Hedley Lamaar comes up with a scheme to drive out the town's residents and acquire the land cheaply, then sell it for millions to the railroad company.
* Blazing Saddles: Hedley Lamarr seeks to purchase all the land of a small town by either sending goons to terrorize the locals or exploiting the locals' racism by sending them a black sheriff.
* Blazing Saddles, Hedley Lamarr's evil plans all come as a result of these.
* Blazing Saddles. He was actually appointed by the state government, rather than elected by the town, mainly because the previous sheriff had been murdered and nobody in Rock Ridge wanted to be the replacement. Hedley Lamarr actually appointed him in the hopes that the townspeople would be so disgusted by having a black sheriff they'd leave the town and he could take all the land. Unfortunately for him, Bart turns out to be pretty good at the job and wins everyone over.
* Blazing Saddles includes a scene that was originally left on the cutting room floor. While Bart and the Waco Kid are being chased by the villains, the duo come to an arrow-sign mounted on a post, smack it so that it starts spinning in circles, and run on. The villains ride up, wait for the sign to finish spinning, and charge off in the indicated direction.
* Blazing Saddles) installed the thing, it actually makes sense that he doesn't go around.
* Blazing Saddles is a bit slow, but can take out a horse in one punch.
* Blazing Saddles". Is this actually what happened, or did whoever wrote the list make a mistake?
* Blazing Saddles: Jazz musician Count Basie shows up leading the orchestra in the desert.
* Blazing Saddles, Jim was the fastest gun in the West, but the stress of having every gunslinger coming for him (culminating in getting shot in the hinder by a little kid) left him with shattered confidence, a shaky hand, and a drinking problem. When he comes back better than ever, he sits tall in his saddle and confidently shoots the guns out of everybody's hands, so fast that you never see his gun leave its holster.
* Blazing Saddles-laden spiel about how his mind is full of brilliant ideas by calling his chief henchman a shitkicker.
* Blazing Saddles. Laine consequently produced such an epic cowboy movie song that it's sometimes played alongside other classic cowboy movie themes non-ironically. According to legend, even Brooks was surprised at how much effort Laine was putting into the song; Brooks considered telling the truth, but ultimately didn't have the heart to reveal that the movie was a spoof comedy.
* Blazing Saddles, Lili von Shtupp refers to "I'm Tired" as "the song that closed

Poland."
* Blazing Saddles: "Mongo like candy." Mongo open box. Mongo not know what next.
* Blazing Saddles: Mongo open candy box, candy box go KABOOM! Powder fill screen. Scene end.
* Blazing Saddles of Klan members. Bart has a fling with burlesque performer Lili von Shtupp—and judging by her dialogue when the lights are out, her attraction is at least partly due to his race.
* Blazing Saddles, one of this jokes is done when Bart says, "Excuse me while I whip this out," then proceeds to reach for a speech letter in his pocket, while the townsfolk gasp and cower in fear, thinking he's going to whip something else out instead.
* Blazing Saddles; other than the fact that it shows up in the middle of an arid desert, it's actually a pretty accurate representation. Rather than panicking, Bart urges his friend that they should remain calm instead of flailing around, then they slowly move back along the rail just enough that they don't disturb the sand grains even more.
* Blazing Saddles people. The process of gaining their trust is a fairly major plot point.
* Blazing Saddles plan to blow up the fake town of Rock Ridge with explosives, but the detonator fails. The Waco Kid has to set off the dynamite by shooting it with a revolver, at a range that would be a challenge to a sniper with a scope mounted rifle.
* Blazing Saddles plays the famous stage performer Lili von Shtupp, aka the "Teutonic Titwillow".
* Blazing Saddles repeatedly breaks the fourth wall throughout the film by making anachronistic jokes, having characters address the audience, and generally acknowledging the medium of filmmaking throughout. This culminates in the climax, when the film literally breaks out of its own set and into other sets throughout a Hollywood backlot, ultimately culminating in a confrontation outside a theater screening the film. This is all part of the theme of deconstructing the Western film genre.
* Blazing Saddles right in the middle of an enormous fist-fight. Jim may also qualify as he propositions Bart when they first meet. Then again he might have just been screwing with him.
* Blazing Saddles. Sheriff Bart and the Waco Kid lure them away, knock them out and steal their robes. Unfortunately, they forget that Sheriff Bart is black...
* Blazing Saddles. Taggart and Lyle callously leave Bart to die in quicksand. After Bart gets out, he prepares to hit Taggart over the head with a shovel.
* Blazing Saddles: Taggart does a "single glomp" version on Hedley Lamaar when he's frightened by a scaffold trap door releasing outside.
* Blazing Saddles. Taggart is slid down the buffet counter of the Warner Bros. commissary. When he gets to the end, the register clerk charges him based on the splashes of food on his clothing.
* Blazing Saddles; the big brawl at the end of the film gets so wild it spills off the movie set into the rest of Hollywood!
* Blazing Saddles, the big fight scene at the end spills out of its set into another soundstage, then spreads into the studio commissary and escalates into a food fight. Hedley tries to evade it by ducking into a restroom, then emerges a second later with a faceful of pie.
* Blazing Saddles. The citizens of the town of Rock Ridge create a fake Rock Ridge filled with explosives as a giant trap for Hedy Lamaar's army.
* Blazing Saddles: The Waco Kid, after Sheriff Bart reads the note from Lili Von Shtupp inviting Bart to her "dwessing woom".
* Blazing Saddles the Waco Kid is such a fast gunslinger you don't even see him move when he draws his gun!
* Blazing Saddles, The Waco Kid punches Black Bart before realizing who he is. He pats his cheek by way of apology and then throws himself back into the fray.
* Blazing Saddles. This belief was the undoing of the Waco Kid way back when.
* Blazing Saddles, villain Hedley Lamarr claims to be unarmed. Bart puts aside his

gun for a fistfight. Hedley was lying. Hedley ends up getting shot anyway.
* Blazing Saddles Western that combines Union Pacific and Marshall stories with a satire on racism. Unscrupulous railroad baron Hedley Lamarr wants to build his railway through the town of Rock Ridge and plots to run the townsfolk out, first by sending his goons to terrorize them, then by making African-American Bart their new sheriff, hoping the racist populace will leave in disgust. Bart catches on to his plan and after winning the people over, plots to defeat Lamarr.
* Blazing Saddles when Bart goes in and comes back out in full outfit, complete with Sheriff's badge.
* Blazing Saddles when Laine found it hilarious. In addition, Brooks's casting call was for "a Frankie Laine-type singer", so he was very much surprised (and happy) when the real Frankie Laine auditioned.
* Blazing Saddles: When Taggart gets an idea, he gets excited and jumps around; Hedley Lamarr thinks he's doing one of these.
* Blazing Saddles: When the newly-minted Sheriff Bart is riding down the street into Rock Ridge, one man is sitting in chair leaned against the wall of a building, gapes at Bart in surprise, and the chair slips out from under him.
* Blazing Saddles, where an effeminate, tuxedo-clad dancer beats ineffectually on the chest of a large cowboy before bursting into tears and collapsing into the cowboy's arms. The cowboy comforts him. ("There, there.")
* Blazing Saddles, where the citizens of Rock Ridge built a mock-up of the whole town, complete with cardboard versions of themselves, so that the bad guys would attack the wrong town.
* Blazing Saddles, where the villain goes into a movie theater to escape the hero, sits down, and sees the hero coming into the theater on the screen.
* Blazing Saddles. While masquerading as a member of the Ku Klux Klan, Sheriff Bart tells Hedy (THAT'S HEDLEY!!) Lamarr why he should be a part of Lamaar's criminal army.
* Blazing Saddles while sucking on a candy, and almost chokes on it before spitting it out.
* Blazing Saddles wind up in a shallow pool. They start doing water ballet.
* Blazing Saddles, with Gabby Johnson during the big brawl in Rock Ridge.
* Blazing Sword years, she yearns for him to stay by her side now that they've been reunited.
* Blazing Team was cancel during its Second season, the show was supposed to have 52 episodes, but ended up with 42. The show ends with Lao-Shi being rescued and Viki going into the realm. The show left plotpoints unresolved.
* Blazing Warriors) on the Sega Saturn reversed the rule; the "Western" characters were good guys with better powers and weapons, and with the exception of a couple of ninja allies, the "Eastern" characters were evil and with lesser but still respectable powers.
* blazons use Old French grammar, which can be jarring for a novice heraldry enthusiast (especially English-speaking ones, but even ones who speak Modern French can get thrown for a loop).
* Bleach ability. It allows him to steal the spirit particles of someone's body and recreate himself after being killed, essentially resulting in a Grand Theft Me (only with the extra that the new body looks like the old one).
* Bleach, a couple of Arrancar, and Ichigo's sisters due to them being family.
* Bleach acts more like a father than a captain towards his subordinates.
* Bleach admitted he struggles to write fights in a serious way and can only do it by involving jokes along the way. Many characters therefore ramp up the ham during battles. Only the most important battles lack any humour to showcase just how significant they are. To wit:
* Bleach after another like it's hot, but unlike with Ichigo Aizen's power-ups are always presented as "part of his plan".
* Bleach after he holds her friends hostage, without them even knowing about it.
* Bleach After taking Ichigo's advice to put compassion before duty if they ever clash again, Byakuya's become much more open about his affection for the two and much more openly protective of both. By the final arc, he's someone both Rukia and

Renji clearly look to for support and guidance.
* Bleach. Aizen, on the other hand, is trained in all forms of Shinigami combat, particularly kido which he frequently employs in battle.
* Bleach. Aizen points out the flaw in Ichigo's logic that's a lie for contradicting what he said earlier when Ichigo himself pointed out how worthless Aizen's word is.
* Bleach: Aizen's secret machinations during the Soul Society arc pit Ichigo's group and the Gotei 13 against each other, giving him the opportunity to delve into Urahara's confiscated research to discover a means of extracting the Hougyoku from Rukia's soul. It's only at the end of the arc that the two groups realise they're on the same side and should be uniting against Aizen.
* Bleach allows him to mostly regain his human form, but at the cost of being permanently transformed into a normal wolf once it's over.
* Bleach all rolled into one. Students certainly don't find the education boring, and may not even make it out the other side alive!
* Bleach all the "sword beasts" (Zanpakuto who killed their shinigami before being turned back and went rogue).
* Bleach, all Zanpakuto spirits are this on a spiritual level to their respective Shinigami/Soul Reaper. Learning to communicate with and subjugate the spirits within the sword are key components of receiving more power from them.
* Bleach almost snap the poor boy's neck! Then he began to cry and nosebleed at the same time.
* Bleach. also had a medieval Christian knight theme given to them by the author.
* Bleach Although he didn't actually try to leave. They considered him potentially dangerous so they held him without charge.
* Bleach. Although Uryu is the only one playing. All Ichigo cares about is saving everyone from the buttload of Hollows that were just summoned, although he does declare himself the winner when he scares off the Menos that appeared.
* Bleach and a desire to avoid feeling guilt on seeing the Hollow's human face.
* Bleach and backed up by the Lieutenant. In the absence of a captain, the Lieutenant has to shoulder full responsibility for the division.
* Bleach and is associated with Hollows. Garganta is the only way to access Hueco Mundo.
* Bleach and is awarded a bed in Yuzu and Karin's room. She reluctantly accepts the bed to allay suspicion even though she would have preferred the closet, simply because she thought it was more cozy and had even brought along several items to help brighten the decor.
* Bleach and it is likely that the unanswered questions the author didn't get to will never be resolved.
* Bleach and tends to degenerate into a silly catfighting between the two. On one occasion, however, it's played for drama. Isshin is shocked when his ambush succeeds, flooring Ichigo who doesn't fight back. It's designed to emphasise how depressed and unhappy Ichigo is at the time. Isshin seems to have a more serious reason for having raised Ichigo this way, as implied when he and Ryuuken discuss what terrible fathers they both are.
* Bleach, and that's because she has an overactive imagination. When Ichigo finds out Yoruichi is a person, she even says "Cats don't talk. Use your head a little, Ichigo", implying that she also thinks it's supposed to be impossible and that she's merely an exception due to not being an actual cat.
* Bleach and was then later surprised to learn that his father Ryūken was also taught in the way of the Quincies, despite him not caring to follow Souken's footsteps at all. The final arc reveals that an entire kingdom of Quincies have been hiding in the shadows for 1000 years and that they aren't completely comprised of only archers, as they abandoned the old ways of the Quincies, leaving the Ishida family as the sole traditional Quincies. Even after the final arc ended, there are still surviving Quincies running around.
* Bleach, and while busy laughing at how screwed the heroes are...is promptly stabbed in the head by Hisagi before he can show anything. This doesn't kill him though. As he lies dying, Tousen is filled with remorse. He asks Hisagi if he can

show him his face, but is abruptly killed by Aizen, who explodes his body.
